This course will discuss the techniques of fiction writing and will offer guidance in writing some works of original short fiction.
Knowledge Area: Artistic Knowledge and Experience
Outcomes:
Students will be able to demonstrate understanding of the critical skills necessary for discussing, analyzing and formulating arguments about fiction, and will produce original short stories

ENGL 318R The Writing of Fiction: Writing Rome (3 Credit Hours)
By exploring the city of Rome through reading, writing, and on-site classes, students will be provided with an interdisciplinary approach to the generation of written work. This course will discuss the techniques of fiction writing, drawing inspiration from the city of Rome as a backdrop. On-site classes will enrich the fiction writing process, while in-class workshops will offer guidance in writing works of short original fiction.
Knowledge Area: Artistic Knowledge and Experience
Interdisciplinary Option: Italian Studies
Outcomes:
Students will be able to demonstrate understanding of the critical skills necessary for discussing, analyzing and formulating arguments about fiction, and will produce original works of fiction in the form of writing portfolio

ENGL 319 Writing Creative Nonfiction (3 Credit Hours)
A workshop in writing and critiquing original creative nonfiction in several representative sub-genres.
Knowledge Area: Artistic Knowledge and Experience
Outcomes:
Students will learn to apply both traditional fictional techniques (eg, in-depth characterization, dramatic plot development, specific concrete detail) and more innovative ones (eg, shifting chronology, genre mixing, eccentric voices, multiple points-of-view) in their nonfiction writing

ENGL 320 English Literature: Medieval Period (3 Credit Hours)
This course provides a survey of Old and Middle English Literature, studied partly in translation and partly in the original.
Interdisciplinary Option: Catholic Studies, European Studies, Medieval Studies
Course equivalencies: X-ENGL320/CATH321/MSTU308
Outcomes:
Students will receive training in the understanding, appreciation, and criticism of works of medieval culture

ENGL 321 Intro to Old English (3 Credit Hours)
This course introduces students to the fundamentals of the Old English language (c. 600-1150), surveying poetry and prose in the original.
Interdisciplinary Option: European Studies, Medieval Studies
Course equivalencies: X-ENGL321/MSTU312
Outcomes:
Students will be able to read Old English and to demonstrate a knowledge of literary works written in this language

ENGL 322 Chaucer (3 Credit Hours)
This course introduces students to the life and writings of Chaucer through the reading of a representative selection (but not necessarily all) of The Canterbury Tales and through considering a variety of critical perspectives on them.
Interdisciplinary Option: Catholic Studies, European Studies, Medieval Studies
Course equivalencies: X-ENGL322/MSTU316
Outcomes:
Students will be able to demonstrate knowledge of Chaucer's poetry, the ability to read Middle English, and familiarity with some critical perspectives on Chaucer's works

ENGL 323 Studies in Medieval Literature (3 Credit Hours)
Intensive study of specific topics in the field of Medieval literature and culture.
Interdisciplinary Option: Catholic Studies, European Studies, Medieval Studies
Course equivalencies: X-ENGL323/MSTU320
Outcomes:
Students will be able to demonstrate an understanding of significant works of the Medieval period, of the historical political, social and intellectual backgrounds that provide a context for the works studied, and of relevant theoretical and critical perspectives

ENGL 325 British Literature-The Renaissance (3 Credit Hours)
This course is a study of selected literature of the Tudor, Stuart, and Cromwellian periods, excluding Shakespeare, by authors such as Sidney, Spenser, Lanyer, Donne, Wroth, and Milton.
Interdisciplinary Option: European Studies, Shakespeare Studies
Outcomes:
Students will become familiar with: the texts of significant authors of the period; how to read these texts in relation to the intellectual and social contexts in which they were produced; the literary genres, traditions, and conventions they employed and transformed

ENGL 326 Shakespeare: Selected Major Plays (3 Credit Hours)
This course is an advanced study of selected plays as theatre and as literature. Topics may include Shakespeare's life, sources, and influence; background of Early Modern literature and drama; Shakespeare's theatre; the tradition of Shakespeare criticism.
Interdisciplinary Option: European Studies, Shakespeare Studies
Outcomes:
Students will be able to demonstrate understanding of, to analyze, and to defend interpretations of the plays of Shakespeare

ENGL 327 Studies in Shakespeare (3 Credit Hours)
Pre-requisites: ENGL 274 or 326
Intensive reading of selected Shakespeare plays.
Interdisciplinary Option: European Studies, Shakespeare Studies
Outcomes:
Students will be able to demonstrate understanding of, to analyze, and to defend interpretations of a particular body of plays by Shakespeare, chosen by genre, theme, etc

ENGL 328 Studies in The Renaissance (3 Credit Hours)
The course will be a highly selective survey of late Renaissance literature, from John Donne and Ben Jonson to Andrew Marvell.
Interdisciplinary Option: Catholic Studies, European Studies, Shakespeare Studies
Outcomes:
Students will be able to: 1) demonstrate an understanding of significant works by selected Renaissance authors; 2) demonstrate an understanding of historical, political, social, and intellectual backgrounds as they provide a context for the poems; 3) demonstrate an understanding of relevant theoretical and critical perspectives

ENGL 329 Milton (3 Credit Hours)
This course will cover Milton's early poetry, one or two of his prose works, and his late, major poems: Paradise Lost, Paradise Regained, and Samson Agonistes.
Interdisciplinary Option: Catholic Studies, European Studies
Outcomes:
Students will be able to: 1) demonstrate an understanding of Milton's major works, and a knowledge of his career; 2) demonstrate an understanding of social, political, and cultural backgrounds as they provide a context for Milton's poems; 3) demonstrate an understanding of relevant theoretical and critical perspectives

ENGL 335 British Literature - The Romantic Period (3 Credit Hours)
This course focuses on the study of literature of the Romantic movement in its historical context; authors may include Blake, Wordsworth, Coleridge, Smith, Byron, P.B. Shelley, M.W. Shelley, Keats, Hemans, Hazlitt, and Austin.
Interdisciplinary Option: European Studies
Outcomes:
Students will be able to demonstrate knowledge of major works of the Romantic movement, and of its relationship to historical developments of the period

ENGL 338 Studies in The Romantic Movmnt (3 Credit Hours)
Students will engage in intensive consideration of selected Romantic period texts. The focus of the course will vary according to the instructor's choice of topic.
Interdisciplinary Option: European Studies
Outcomes:
Students will be able to discuss and analyze the texts studied in this course, and to articulate diverse positions on the issues related to the course's central topic

ENGL 340 British Literature - The Victorian Period (3 Credit Hours)
This course provides a survey of important works of prose, poetry, and fiction from the Victorian period (1832-1901). Authors may include Tennyson, the Brownings, Arnold, the Brontës, Hopkins, Hardy, Newman, Dickens, Thackeray, and George Eliot.
Interdisciplinary Option: European Studies
Outcomes:
Students will demonstrate their ability to analyze and interpret a variety of works studied in the course, and to articulate an awareness of the social, political, and historical contexts that inform an understanding of these works

ENGL 343 Studies in the Victorian Period (3 Credit Hours)
This course provides an opportunity for intensive consideration of selected Victorian texts that centers on a particular theme or genre or author. The course will vary each time it is taught.
Interdisciplinary Option: European Studies
Outcomes:
Students will be able to demonstrate knowledge of the subject of the course and an appreciation of that particular aspect of Victorian life, art, and thought

ENGL 344 Studies in Modernism (3 Credit Hours)
Pre-requisites: UCWR 110 and a 200-level English course
The course focuses on selected issues in current critical discussions of modernism. The issues may concern competing conceptions of modernism and individual writers associated with modernism.
Interdisciplinary Option: European Studies
Outcomes:
Students will be able to articulate diverse positions on the issues of the course

ENGL 345 British Literature Since 1900 (3 Credit Hours)
Pre-requisites: UCWR 110 and one 200-level English course
This course focuses on selected examples of British poetry, fiction, drama, film, and non-fiction written in the 20th century. The principle of selection may be cultural, theoretical, or formal.
Interdisciplinary Option: European Studies
Outcomes:
Students will be able to demonstrate knowledge of assigned texts and will be able to explain the relationship among assigned texts in relation to the themes of the course

ENGL 348 Studies in British Literature Since 1900 (3 Credit Hours)
Pre-requisites: UCWR 110 and any 200-level English course
This course focuses intensively on selected twentieth century British texts in relation to social and literary issues of the period. The selection may focus on cultural, theoretical, or formal issues.
Interdisciplinary Option: European Studies
Outcomes:
Students will be able to demonstrate detailed knowledge of particular texts and will be able to describe the relation of the assigned texts to a particular set of critical questions

ENGL 350 Studies in Postmodernism (3 Credit Hours)
Pre-requisites: UCWR 110 and any 200-level English course
Postmodernism, as an aesthetic response to postmodernity, is an interdisciplinary concept, originating in architecture and encompassing literature, art in various media, digital media, and literary and cultural theory. Focusing primarily on Western literature and theory after WWII, this course investigates postmodernism as a literary period, an aesthetic style, an historical moment, and a cultural problematic.
Outcomes:
Students will learn how the term "postmodernism" functions as a literary period, an aesthetic style, an historical moment, a cultural problematic, as well as a theoretical imperative

ENGL 351 Contemporary Literature (3 Credit Hours)
Contemporary literature is most often defined as literature produced after WWII. This course explores the challenge of defining "contemporary" literature by reading a range of texts from the period in their aesthetic, social, historical, and cultural contexts.
Outcomes:
Students will learn critical and analytical tools for reading contemporary literature

ENGL 354 Contemporary Critical Theory (3 Credit Hours)
This course, which is required of all English majors, introduces students to critical terminology and to issues in contemporary criticism and theory. Readings may include critical works that have informed and established formalist, feminist, psychoanalytic, and Marxist approaches to literary analysis, as well as those associated with gender studies, cultural studies, postcolonialism, and deconstruction.
Outcomes:
Students will be able to demonstrate knowledge and understanding of significant texts and theories relating to issues in contemporary criticism

ENGL 355 Studies in Literary Criticism (3 Credit Hours)
Intensive study of specific topics in the field of literary criticism and theory.
Outcomes:
Students will be able to demonstrate an understanding of significant works in the designated field, and will be able to discuss relevant theoretical and critical perspectives

ENGL 357 Literature from a Writer's Perspective (3 Credit Hours)
Pre-requisites: UCWR 110 and any 200-level English course
This course examines literature from various periods in poetry and/or prose for technical innovation and genre development, with particular emphasis on applications to the creative process.
Outcomes:
Students will gain a deeper understanding of the technical innovations and/or genre developments being studied, and will be able to apply these to their own creative works of fiction and/or poetry

ENGL 358 Cultural Theory (3 Credit Hours)
This course provides an introduction to the theory informing the field of Cultural Studies and to the history of theoretical writings about "culture."
Outcomes:
Students will be able to demonstrate knowledge and understanding of significant theoretical texts in the field of cultural studies

ENGL 359 High and Low Culture (3 Credit Hours)
Students will study the interactions between elite and popular culture, possibly focusing on a historical period or on a conceptual issue such as the framing of "canons." Students will review and assess the assumptions and goals of those who create and critique works of culture. Students will also analyze the criteria by which specific works are judged.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Outcomes:
Students will be able to describe, analyze, and formulate an argument about cultural productions, using appropriate critical and technical vocabulary

ENGL 359A High and Low Culture Before 1700 (3 Credit Hours)
Students will study the interaction between elite and popular culture, focusing on the material and issues relating to the period before 1700. Students will review and assess the assumption and goals of those who create and critique works of culture. Students will also analyze the criteria by which specific works are judged.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Outcomes:
Students will be able to describe, analyze, and formulate an argument about cultural productions, using appropriate critical and technical vocabulary

ENGL 359B High and Low Culture 1700-1900 (3 Credit Hours)
Students will study the interaction between elite and popular culture, focusing on the material and issues relating to the period from 1700-1900. Students will review and assess the assumption and goals of those who create and critique works of culture. Students will also analyze the criteria by which specific works are judged.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Outcomes:
Students will be able to describe, analyze, and formulate an argument about cultural productions, using appropriate critical and technical vocabulary

ENGL 359C High and Low Culture Since 1900 (3 Credit Hours)
Students will study the interaction between elite and popular culture, focusing on the material and issues relating to the period after 1900. Students will review and assess the assumption and goals of those who create and critique works of culture. Students will also analyze the criteria by which specific works are judged.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Outcomes:
Students will be able to describe, analyze, and formulate an argument about cultural productions, using appropriate critical and technical vocabulary

ENGL 361 Modernist Poetry (3 Credit Hours)
Pre-requisites: UCWR 110 and any 200-level ENGL course
This course is a study of poetry written in response to the conditions of modernity from the late 19th century to the middle of the 20th. The course focuses on poetic style and technique as well as on historical and cultural contexts.
Outcomes:
Students will be able to demonstrate knowledge and understanding of significant texts, techniques, and concepts in modernist poetry, and to situate these in relation to important literary and historical contexts

ENGL 362 Studies in Poetry (3 Credit Hours)
Study of poetry centered on a theme, topic, genre, critical approach, author, or group of authors. Readings may cut across historical periods and geographical boundaries.
Outcomes:
Students will be able to demonstrate knowledge and understanding of poetic texts and of their interrelationships and contexts

ENGL 362A Studies in Poetry Before 1700 (3 Credit Hours)
Study of poetry centered on a theme, topic, genre, critical approach, author, or group of authors. Readings may cut across historical periods and geographical boundaries, but will focus on poetry written before 1700.
Course equivalencies: ENGL362/362A/362B/362C
Outcomes:
Students will be able to demonstrate knowledge and understanding of poetic texts and of their interrelationships and contexts

ENGL 362B Studies in Poetry 1700-1900 (3 Credit Hours)
Study of poetry centered on a theme, topic, genre, critical approach, author, or group of authors. Readings may cut across historical periods and geographical boundaries, but will focus on poetry written between 1700 and 1900.
Outcomes:
Students will be able to demonstrate knowledge and understanding of poetic texts and of their interrelationships and contexts

ENGL 362C Studies in Poetry Since 1900 (3 Credit Hours)
Study of poetry centered on a theme, topic, genre, critical approach, author, or group of authors. Readings may cut across historical periods and geographical boundaries, but will focus on poetry written since 1900.
Outcomes:
Students will be able to demonstrate knowledge and understanding of poetic texts and of their interrelationships and contexts

ENGL 363A Major Author, Before 1700 (3 Credit Hours)
Intensive study of the works and contexts of a major author, before 1700. Students will be able to demonstrate an understanding of the texts and contexts of a major author, before 1700.

ENGL 363B Major Author, 1700-1900 (3 Credit Hours)
Intensive study of the works and contexts of a major author, 1700-1900. Students will be able to demonstrate an understanding of the texts and contexts of a major author, before 1700.

ENGL 363C Major Author, After 1900 (3 Credit Hours)
Intensive study of the works and contexts of a major author, after 1900. Students will be able to demonstrate an understanding of the texts and contexts of a major author, after 1900.

ENGL 367 Modern Drama (3 Credit Hours)
Pre-requisites: UCWR 110 and any 200-level ENGL course
This course is a study of dramatists and dramatic forms, techniques, and innovations from the late-nineteenth century to the present.
Interdisciplinary Option: European Studies
Outcomes:
Students will be able to recognize and define major modern dramaturgical techniques and to demonstrate understanding of, to analyze, and to defend interpretations of a variety of plays

ENGL 368 Studies in Drama (3 Credit Hours)
This course is a study of drama centered on a theme, topic, genre, critical approach, author, or group of authors. Readings may cut across historical periods and geographical boundaries.
Outcomes:
Students will be able to demonstrate understanding of the chosen plays in their thematic, generic, or other chosen context; they will be able to analyze and defend interpretations of a variety of plays

ENGL 368A Studies in Drama Before 1700 (3 Credit Hours)
This course is a study of drama centered on a theme, topic, genre, critical approach, author, or group of authors. Readings may cut across historical periods and geographical boundaries, but will focus on drama written before 1700.
Outcomes:
Students will be able to demonstrate understanding of the chosen plays in their thematic, generic, or other chosen context; they will be able to analyze and defend interpretations of a variety of plays

ENGL 368B Studies in Drama 1700-1900 (3 Credit Hours)
This course is a study of drama centered on a theme, topic, genre, critical approach, author, or group of authors. Readings may cut across historical periods and geographical boundaries, but will focus on drama written between 1700 and 1900.
Outcomes:
Students will be able to demonstrate understanding of the chosen plays in their thematic, generic, or other chosen context; they will be able to analyze and defend interpretations of a variety of plays

ENGL 368C Studies in Drama Since 1900 (3 Credit Hours)
This course is a study of drama centered on a theme, topic, genre, critical approach, author, or group of authors. Readings may cut across historical periods and geographical boundaries, but will focus on drama written since 1900.
Outcomes:
Students will be able to demonstrate understanding of the chosen plays in their thematic, generic, or other chosen context; they will be able to analyze and defend interpretations of a variety of plays

ENGL 369A Women in Drama Before 1700 (3 Credit Hours)
This course focuses on women as playwrights, actors, directors, spectators, and subjects of drama before 1700.
Interdisciplinary Option: Women & Gender Studies
Outcomes:
Students will be able to demonstrate understanding of the ways in which women and issues important to women have been presented on the stage; they will be able to analyze and defend interpretations of a variety of plays

ENGL 369B Women in Drama 1700-1900 (3 Credit Hours)
This course focuses on women as playwrights, actors, directors, spectators, and subjects of drama between 1700 and 1900.
Interdisciplinary Option: Women & Gender Studies
Outcomes:
Students will be able to demonstrate understanding of the ways in which women and issues important to women have been presented on the stage; they will be able to analyze and defend interpretations of a variety of plays

ENGL 371 The Modern Novel (3 Credit Hours)
Pre-requisites: UCWR 110 and any 200-level ENGL course
This course covers novels since the late 19th century and explores formal and cultural influences on the form.
Outcomes:
Students will be able to demonstrate understanding of the critical skills and theoretical insights necessary for discussing, analyzing and formulating arguments about the novel in the modern world

ENGL 372 Studies in Fiction (3 Credit Hours)
This course is a study of fiction centered on a theme, topic, genre, critical approach, author, or group of authors. Readings may cut across historical periods and geographical boundaries.
Outcomes:
Students will be able to demonstrate an ability to employ descriptive and critical language appropriate to the discussion and analysis of fiction generally and, in particular, of the kind of fiction (eg theme, topic, genre, etc) on which the course is centered; Students will be able to demonstrate an ability to articulate the formal and thematic continuities and discontinuities among these works

ENGL 372A Studies in Fiction Before 1700 (3 Credit Hours)
This course is a study of fiction centered on a theme, topic, genre, critical approach, author, or group of authors. Readings may cut across historical periods and geographical boundaries, but will focus on fiction written before 1700.
Outcomes:
Students will be able to demonstrate an ability to employ descriptive and critical language appropriate to the discussion and analysis of fiction generally and, in particular, of the kind of fiction (eg theme, topic, genre, etc) on which the course is centered; Students will be able to demonstrate an ability to articulate the formal and thematic continuities and discontinuities among these works

ENGL 372B Studies in Fiction 1700-1900 (3 Credit Hours)
This course is a study of fiction centered on a theme, topic, genre, critical approach, author, or group of authors. Readings may cut across historical periods and geographical boundaries, but will focus on fiction written between 1700-1900.
Outcomes:
Students will be able to demonstrate an ability to employ descriptive and critical language appropriate to the discussion and analysis of fiction generally and, in particular, of the kind of fiction (eg theme, topic, genre, etc) on which the course is centered; Students will be able to demonstrate an ability to articulate the formal and thematic continuities and discontinuities among these works

ENGL 372C Studies in Fiction Since 1900 (3 Credit Hours)
This course is a study of fiction centered on a theme, topic, genre, critical approach, author, or group of authors. Readings may cut across historical periods and geographical boundaries, but will focus on fiction written since 1900.
Outcomes:
Students will be able to demonstrate an ability to employ descriptive and critical language appropriate to the discussion and analysis of fiction generally and, in particular, of the kind of fiction (eg theme, topic, genre, etc) on which the course is centered; Students will be able to demonstrate an ability to articulate the formal and thematic continuities and discontinuities among these works

ENGL 375 American Literature to 1865 (3 Credit Hours)
This course is a study of selected works of American Literature of this period against the background of historical events, political and social changes, moral and cultural traditions. Authors may include Bradford, Bradstreet, Franklin, Poe, Hawthorne, Melville, Emerson, and Thoreau.
Outcomes:
Students will be able to demonstrate understanding of the distinctive historical conditions that inform American literature of this period, and will be able to identify and discuss some of its ideological and generic characteristics

ENGL 376 American Literature 1865-1914 (3 Credit Hours)
This course is a study of the rise of American Literature of this period. Authors may include Whitman, Dickinson, Twain, James, and Dreiser.
Course equivalencies: ENGL 376 / ENGL 380
Outcomes:
Students will be able to demonstrate understanding of the distinctive historical conditions that inform American literature of this period, and will be able to identify and discuss some of its ideological and generic characteristics

ENGL 377 American Literature 1914-1945 (3 Credit Hours)
Pre-requisites: UCWR 110 and any 200-level ENGL course
This course is a study of literature of early twentieth-century America. Authors may include Cather, Eliot, Frost, Hemingway, Fitzgerald, Faulkner, O'Neill, Miller and Williams.
Course equivalencies: ENGL 377 / ENGL 385
Outcomes:
Students will be able to demonstrate knowledge of the literature of this period in American history, and familiarity with critical perspectives on the works studied

ENGL 379 Studies in American Literature (3 Credit Hours)
This course focuses on texts written by American authors. This advanced seminar course varies in topic and may concentrate on a selection of works by a major American writer or a particular literary movement, period, or theme.
Outcomes:
students will be able to demonstrate an understanding of American literature and culture with focused attention to a major or distinctive feature of the American literary tradition

ENGL 379A Studies in American Literature Before 1700 (3 Credit Hours)
This course focuses on texts written by American authors. This advanced seminar course varies in topic and may concentrate on a selection of works by a major American writer or a particular literary movement or theme before 1700.
Outcomes:
Students will be able to demonstrate an understanding of American literature and culture with focused attention to a major or distinctive feature of the American literary tradition

ENGL 379B Studies in American Literature 1700-1900 (3 Credit Hours)
This course focuses on texts written by American authors. This advanced seminar course varies in topic and may concentrate on a selection of works by a major American writer or a particular literary movement or theme in the period from 1700-1900.
Outcomes:
Students will be able to demonstrate an understanding of American literature and culture with focused attention to a major or distinctive feature of the American literary tradition

ENGL 379C Studies in American Literature Since 1900 (3 Credit Hours)
This course focuses on texts written by American authors. This advanced seminar course varies in topic and may concentrate on a selection of works by a major American writer or a particular literary movement or theme in the period since 1900.
Outcomes:
Students will be able to demonstrate an understanding of American literature and culture with focused attention to a major or distinctive feature of the American literary tradition

ENGL 381 Comparative American Literature (3 Credit Hours)
This course focuses on the study of U.S. literature and culture in relation to other literatures and cultures.
Outcomes:
Students will demonstrate an ability to identify the formal and thematic features that, as literature, US writing shares with the literature of other cultures; Students will also demonstrate an ability to specify the formal and thematic features that, as an expression of and response to cultural forces particular to the US, differentiate US writing from that of other cultures

ENGL 381A Comparative Literature Before 1700 (3 Credit Hours)
This course focuses on the study of U.S. literature and culture in relation to other literatures and cultures, with a focus on the period before 1700.
Outcomes:
Students will demonstrate an ability to identify the formal and thematic features that, as literature, US writing shares with the literature of other cultures; Students will also demonstrate an ability to specify the formal and thematic features that, as an expression of and response to cultural forces particular to the US, differentiate US writing from that of other cultures

ENGL 381B Comparative American Literature 1700 - 1900 (3 Credit Hours)
This course focuses on the study of U.S. literature and culture in relation to other literatures and cultures, with a focus on the period before 1700.
Outcomes:
Students will demonstrate an ability to identify the formal and thematic features that, as literature, US writing shares with the literature of other cultures; Students will also demonstrate an ability to specify the formal and thematic features that, as an expression of and response to cultural forces particular to the US, differentiate US writing from that of other cultures

ENGL 381C Comparative American Literature Since 1900 (3 Credit Hours)
This course focuses on the study of U.S. literature and culture in relation to other literatures and cultures, with a focus on the period since 1900.
Outcomes:
Students will demonstrate an ability to identify the formal and thematic features that, as literature, US writing shares with the literature of other cultures; Students will also demonstrate an ability to specify the formal and thematic features that, as an expression of and response to cultural forces particular to the US, differentiate US writing from that of other cultures

ENGL 382 Studies in American Culture (3 Credit Hours)
Intensive study of specific topics in the field of American culture.
Outcomes:
Students will be able to demonstrate an understanding of significant works by selected American authors, of the historical political, social and intellectual backgrounds that provide a context for the works studied, and of relevant theoretical and critical perspectives

ENGL 382A Studies in American Culture Before 1700 (3 Credit Hours)
Intensive study of specific topics in the field of American culture before 1700.
Outcomes:
Students will be able to demonstrate an understanding of significant works by selected American authors, of the historical political, social and intellectual backgrounds that provide a context for the works studied, and of relevant theoretical and critical perspectives

ENGL 382B Studies in American Culture 1700-1900 (3 Credit Hours)
Intensive study of specific topics in the field of American culture between 1700 and 1900.
Outcomes:
Students will be able to demonstrate an understanding of significant works by selected American authors, of the historical political, social and intellectual backgrounds that provide a context for the works studied, and of relevant theoretical and critical perspectives

ENGL 382C Studies in American Culture Since 1900 (3 Credit Hours)
Intensive study of specific topics in the field of American culture since 1900.
Outcomes:
Students will be able to demonstrate an understanding of significant works by selected American authors, of the historical political, social and intellectual backgrounds that provide a context for the works studied, and of relevant theoretical and critical perspectives

ENGL 383 Theology and Literature (1-3 Credit Hours)
Study of theological and religious symbols and themes in modern literature and/or in the arts.
Interdisciplinary Option: Catholic Studies
Course equivalencies: X-THEO383/ENGL383/CATH383
Outcomes:
The student who successfully completes this course will be able to demonstrate knowledge about religion and its intersections with selected contemporary ethical, social, political, economic, or cultural issues

ENGL 384 Studies in African American Literature (3 Credit Hours)
Intensive study of texts written by African American authors. The course varies in topic and may concentrate on a selection of works by a major African American writer or a particular African American literary movement, period, or theme.
Interdisciplinary Option: African Studies and the African Diaspora
Outcomes:
Students will be able to demonstrate an understanding of African American literature and culture with specialized attention to a major or distinctive feature of the African American literary tradition

ENGL 384B Studies in African American Literature, 1700-1900 (3 Credit Hours)
Intensive study of texts written by African American authors. The course varies in topic and may concentrate on a selection of works by a major African American writer or a particular African American literary movement or theme, 1700-1900.
Interdisciplinary Option: African Studies and the African Diaspora
Outcomes:
Students will be able to demonstrate an understanding of African American literature and culture with specialized attention to a major or distinctive feature of the African American literary tradition, 1700-1900

ENGL 384C Studies in African American Literature Since 1900 (3 Credit Hours)
Intensive study of texts written by African American authors. The course varies in topic and may concentrate on a selection of works by a major African American writer or a particular African American literary movement or theme since 1900.
Interdisciplinary Option: African Studies and the African Diaspora
Outcomes:
Students will be able to demonstrate an understanding of African American literature and culture with specialized attention to a major or distinctive feature of the African American literary tradition since 1900

ENGL 390 Advanced Seminar (3 Credit Hours)
Pre-requisites: Junior standing
This course is required of all English majors. It offers an advanced, intensive study of a period, author, genre, theme or critical issue in a seminar setting. Topics are announced when the course is offered.
Outcomes:
Students will be able to recognize the ways that the subject matter of the seminar relates to the production, representation, and interpretation of artistic culture

ENGL 392 Advanced Creative Nonfiction Workshop (3 Credit Hours)
Pre-requisites: ENGL 319 Writing Creative Nonfiction
This is a workshop in writing creative nonfiction, furthering work done in ENGL 319, Writing Creative Nonfiction. Students will write in different genres (e.g., memoir, travel writing, speculative essay, nature writing, the spiritual essay), and will further their study in using both traditional and experimental literary techniques in nonfiction.
Outcomes:
Students will deepen their learning of traditional and innovative methods of writing creative nonfiction, applying them to their original creative nonfictions and discussing and critiquing them in fellow students' work

ENGL 393 Teaching English to Adults: Internship (1-3 Credit Hours)
Pre-requisites: Sophomore Standing or above
This course offers training and practical experience in tutoring adults in written and spoken English in a volunteer literacy program at Loyola University. Students examine literacy issues and write a research paper. This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to demonstrate understanding of societal and cultural factors affecting literacy, and will develop communication and critical thinking skills

ENGL 394 Internship (3 Credit Hours)
Pre-requisites: Junior standing, six English courses
This course provides on-the-job experience for majors in adapting their writing and analytical skills to the needs of such fields as publishing, editing, and public relations.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to analyze their experience in terms of the skills they brought to their jobs, what they learned about the fields they worked in, and what new skills they developed as a result of their experiences

ENGL 395 Honors Tutorial (3 Credit Hours)
Content will vary each time the course is offered, but in general will entail in-depth study of a literary genre or a major author or theme in literature.
Course equivalencies: ENGL 395H / ENGL 395
Outcomes:
Students will strengthen their capacity to analyze literature and to discuss it, both orally and in writing, and will be able to demonstrate understanding of the materials studied and of relevant theoretical and critical perspectives

ENGL 397 Advanced Writing Workshop: Poetry (3 Credit Hours)
Pre-requisites: ENGL 317
Students will read master poets as models and will write and revise poems of their own, which will be discussed by the class in a workshop format.
Outcomes:
Students will produce original poems, building upon skills honed in ENGL 317; They will also be able to demonstrate a deepening understanding of the critical skills necessary for analyzing and discussing original poetry, theirs and their fellow students'

ENGL 398 Advanced Writing Workshop: Fiction (3 Credit Hours)
Pre-requisites: ENGL 318
This course allows students to develop further their skills in writing and analyzing original fiction begun in ENGL 318, in a supportive workshop atmosphere.
Outcomes:
Students will produce original short stories, building upon skills honed in ENGL 318; They will also be able to demonstrate a deepening understanding of the critical skills necessary for analyzing and discussing original fiction, theirs and their fellow students'

ENGL 399 Special Studies in Literature (3 Credit Hours)
Subject matter of this course will be designated by a subscript whenever the course is offered. Usually taken as an independent study.
Outcomes:
Students will be able to demonstrate understanding of the topic of the course, and of the research and critical skills necessary to analyze and discuss it; Usually students will work independently and produce a research paper, under the direction of a faculty member

ENGL 400 Intro to Graduate Study (3 Credit Hours)
The course serves as an introduction to the profession of literary studies for students new to the graduate programs in English. It offers a review of current critical theories and methodologies, research techniques, bibliographic methods, and issues in textual criticism.

ENGL 402 Teaching College Composition (3 Credit Hours)
The course deals with practical matters related to the teaching of college composition. It is organized around an examination of recent theories, methods, and materials used in the teaching of writing.

ENGL 403 Composition Theory (3 Credit Hours)
This course examines major and current advances in composition theory and reviews current scholarship in the teaching of writing, with some attention to the relationship between composition and literary theory.

ENGL 404 Pedagogy: Theory and Practice (3 Credit Hours)
Pre-requisites: ENGL 402
This course is designed to help students integrate theory and practice in teaching literature and cultural studies courses at the college level.
Outcomes:
Students will demonstrate an understanding of pedagogical theories by writing a teaching philosophy in which they explain and defend their theoretical approach; students will put their theory into practice by preparing a course proposal for a literature course, which includes a description and goals, syllabus and guidelines, classroom format, and assignments and evaluations procedures

ENGL 406 History of the English Language (3 Credit Hours)
The course is a study of the causes, mechanisms and consequences of language variation over time, with prominent examples taken from the history of English and its parent languages. All major areas of linguistic theory are considered: phonology, lexis, morphology, syntax, and semantics.
Course equivalencies: X-ENGL426/WOST406/WSGS406

ENGL 410 Contemporary Literary Criticism (3 Credit Hours)
This course presents studies in major contemporary theoretical and critical issues through a survey of major types of critical analysis, such as formalism, structuralism, semiotics, reader-response, deconstruction, psychoanalysis, and feminist criticism.

ENGL 412 History of the Book to 1800 (3 Credit Hours)
Pre-requisites: Graduate status
This course will examine the history of written and printed texts from their beginnings to 1800, including such topics as book production and distribution, early ideas about textual editing, literacy, copyright, and censorship.
Outcomes:
Students will be able to relate textual forms to cultural practices

ENGL 413 Textual Criticism (3 Credit Hours)
An introduction to major textual theories and their history. Topics may include such issues as analytic and descriptive bibliography, theories of copy-text, theoretical and practical issues in editing, and forms of textuality, including manuscript, print and digital.

ENGL 415 Media and Culture (3 Credit Hours)
This course examines the important and evolving roles that media plays in the construction, reformulation, and critique of contemporary culture. Topics will vary but may include digital textuality; visual culture studies; information technologies; postcoloniality and globalization; and web-based communities.

ENGL 419 Contemporary Issues in Literature and Culture (3 Credit Hours)
The course is an intensive study of a particular cultural issue in relation to literature.

ENGL 420 Topics in Critical Theory (3 Credit Hours)
Focused study of a particular problem or movement within critical theory--for example, globalization; the "new aesthetics"; high and low culture; psychoanalytic theory; whiteness studies.

ENGL 422 Postcolonial Theory (3 Credit Hours)
This course traces the origins, key developments, and practice of postcolonial theory, focusing on classic texts in the field (e.g., Senghor, Fanon, Cabral); issues raised by contemporary theorists (e.g., Said, Spivak, Bhabha, Chatterjee); and current challenges to postcolonial theory.

ENGL 423 Marxist Literary Theory (3 Credit Hours)
Intensive study of selected writers and issues within the Marxist tradition of literary and cultural criticism.

ENGL 424 Cultural Studies (3 Credit Hours)
An examination of the theory and practice of cultural studies, with special attention to the role of literary and critical theory in its development.

ENGL 426 Feminist Theory and Criticism (3 Credit Hours)
An intensive study of recent feminist theory in a range of disciplines--including literature, philosophy, history, and law--and covering a variety of approaches, such as psychoanalysis, post-structuralism, post-colonialism, queer theory, and cultural studies.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-ENGL426/WOST406/WSGS406

ENGL 427 Dramatic Theory (3 Credit Hours)
This course presents selected theoretical approaches to drama from the Greeks to the present. Readings may include both theoretical works and plays. Topics may include genre, dramaturgies such as realism, epic theatre, and theatre of the absurd, reception, semiotics, feminist dramatic theory, and performance theory.

ENGL 428 Postmodernism (3 Credit Hours)
Pre-requisites: Graduate status
This course investigates "postmodernism" in its various uses--as a literary period, an aesthetic style, an historical moment, a cultural problematic, and a theoretical imperative. The course includes readings in literature and theory as well as other art forms, such as architecture and the graphic arts.
Outcomes:
Students will demonstrate their ability to define postmodernism in relation to modernism and postmodernity and to analyze postmodern literature and art through seminar papers, oral presentations, and exams

ENGL 430 Topics in Literature Studies (3 Credit Hours)
The course is an intensive study of a particular problem, genre, theme or body of work in literature.

ENGL 433 Seminar in Individual Authors (3 Credit Hours)
Intensive study of a single author. Includes a comprehensive reading of the author's major works, and a review of the critical reception.

ENGL 436 Women Writers in English (3 Credit Hours)
This course focuses on significant issues raised in and by women-authored works, including representations of gender roles and sexualities, and the cultural status and uses of women's literature. Authors from any period(s) in British, American and World literature may be included.

ENGL 437 Topics in Drama (3 Credit Hours)
This course may deal with topics that cut across historical and national boundaries, such as dramatic genres, women in drama, modern reappropriations of earlier drama; with more specialized topics such as performance or feminist dramatic theory; or with historical movements in drama.

ENGL 440 Topics in Medieval Literature (3 Credit Hours)
Studies in a range of Middle English writing serve as a focus for special topics, including mysticism and historical prose from the thirteenth to the fifteenth centuries.

ENGL 441 Old English Language & Literature (3 Credit Hours)
This course introduces Old English language and literature through readings in poetry and prose, with attention, as time allows, to major critical issues in texts of the period.

ENGL 443 Middle English Literature (3 Credit Hours)
This course may address texts that bridge the Old and Middle English periods or texts (excluding Chaucer) that date from the fourteenth-century, such as Langland, Malory, the Gawain-poet, Gower, and women writers.

ENGL 444 Medieval Drama (3 Credit Hours)
The course focuses on English drama from its beginnings to the early Renaissance, including liturgical drama, saints' plays, miracle plays, the cycles, and interludes.

ENGL 447 Chaucer (3 Credit Hours)
This course may focus on the Canterbury Tales or Troilus and Criseyde and the dream visions, and may include some of Chaucer's less frequently studied texts (e.g., his translation of the Consolation of Philosophy).

ENGL 450 Topics in Early Modern Literature & Culture (3 Credit Hours)
This course presents selected studies in poetry and prose of the English Renaissance.

ENGL 455 Shakespeare (3 Credit Hours)
The philosophical, esthetic, and historical problems of Shakespeare's plays are covered in this course, which also focuses on Shakespearean scholarship.

ENGL 456 Early Modern Drama (3 Credit Hours)
This course presents English drama of the period 1550 to 1642. Among the topics to be covered are the rise of the permanent theaters; Elizabethan and Jacobean contemporaries of Shakespeare; Caroline plays and masques. Historical background, theatrical developments, and critical approaches are also studied.

ENGL 457 Seventeenth-Century Literature (3 Credit Hours)
This course is an intensive study of a particular problem, genre, theme or body of work in seventeenth-century literature. Milton's poetry, prose, ideas, and projects are studied against the background of seventeenth-century events; special problems in Milton scholarship are also examined.

ENGL 458 Milton (3 Credit Hours)
Milton's poetry, prose, ideas, and projects are studied against the background of seventeenth-century events; special problems in Milton scholarship are also examined.

ENGL 460 Topics in Restoration & 18th Century Literature (3 Credit Hours)
This course is an intensive study of a particular problem, genre, theme or body of work in Restoration and eighteenth-century literature.

ENGL 470 Topics in Romanticism (3 Credit Hours)
The course is an intensive study of a particular problem, genre, theme or body of work in Romantic literature.

ENGL 471 Poetry of Romantic Period (3 Credit Hours)
The poetry of major and minor Romantic figures is studied in this course, which includes a critical study of their esthetics, philosophical concepts, and critical standards.

ENGL 475 Topics in Victorian Literature (3 Credit Hours)
The course is an intensive study of a particular problem, genre, theme, or body of work in Victorian literature.

ENGL 476 Victorian Poetry (3 Credit Hours)
This course presents the historical, political, social, and intellectual influences on Victorian poetry and examines its artistic and formal innovations and achievements. The authors studied include: Tennyson, Browning, Arnold, Swinburne, and the Rossettis.

ENGL 477 Victorian Prose (3 Credit Hours)
The course examines the major critical and philosophical prose writers of the years 1837-1900: Macaulay, Carlyle, Arnold, Ruskin, Newman, and Pater. It also explores the intellectual, social, and political backgrounds of the period, and identifies Victorian prose styles.

ENGL 478 Victorian Novel (3 Credit Hours)
The course examines the major Victorian novelists: Dickens, Thackeray, the Brontes, Trollope, Eliot, Meredith, and Hardy; religious, social, scientific, historical, and philosophical influences on the novel are also explored.

ENGL 480 Topics in Modernism (3 Credit Hours)
Topics include modernism, the Symbolist movement, Edwardian Period, and other contextual issues that transcend genre boundaries and address larger concerns of social and intellectual history.

ENGL 481 Modern Poetry (3 Credit Hours)
The course examines tradition and experiment in modern poetry and includes English, Irish, and American poets.

ENGL 482 Modern Drama (3 Credit Hours)
This course presents selected studies in dramatists from Ibsen on, including British, American, Continental, and Irish dramatists.

ENGL 483 Modern Novel (3 Credit Hours)
The course concentrates on selected studies in Conrad, Galsworthy, Bennett, Wells, Joyce, Lawrence, Huxley, Woolf, Maugham, Forster and other novelists, but may include additional American, Irish, and Continental novelists.

ENGL 484 Literature and Culture of the Jazz Age (3 Credit Hours)
Taking an interdisciplinary approach to a crucial era, this course will consider such topics as the construction of race in literature and popular culture, the rise of the New Woman, the Harlem Renaissance, and the relationship of jazz to aesthetic modernism.

ENGL 485 Contemporary Literature (3 Credit Hours)
This course concentrates on literature and literary movements of the second half of the twentieth century. Possible topics include postcolonialism (Achebe, Jhabvala, Naipaul, Soyinka, Walcott), postmodernism (Acker, Calvino, Pynchon, Reed), and African-American writing (Baldwin, Morrison, Walker).
Outcomes:
Students will gain an understanding of the diversity of forms, politics, themes, and identities in contemporary literature and the scholarly criticism about it; Students will learn how to teach and write about this literature through oral and written assignments

ENGL 487 Postcolonial Literature (3 Credit Hours)
This course examines the issues of modern-day colonization as depicted in selected fiction, drama, and poetry from Africa, South Asia, the West Indies, and Australia.
Outcomes:
Students will gain an understanding of the diversity of forms, politics, themes, and identities in postcolonial literature and the scholarly criticism about it; Students will learn how to teach and write about this literature through oral and written assignments

ENGL 488 20th Century Literature in English (3 Credit Hours)
Focusing on the relation between texts and their literary and cultural contexts, this course may include any twentieth-century text written in English and may address a particular theme, literary movement, period, nation, or historical event. We may also interrogate the foundation of such categories.
Outcomes:
Students will gain an understanding of the diversity of forms, politics, themes, and identities in 20th-century literature and the scholarly criticism about it; Students will learn how to teach and write about this literature through oral and written assignments

ENGL 489 Magic Realism (3 Credit Hours)
Fusing realistic and symbolic forms, "Magic Realism" raises boundary issues of many kinds, between history and myth, empirical and non-empirical experience, objective and subjective knowledge. This course examines magic realism from its modernist origins to contemporary postmodern and postcolonial fiction in many countries.

ENGL 490 Topics in American Literature (3 Credit Hours)
This course is an intensive study of a particular problem, genre, theme, or body of work in American literature.

ENGL 491 Early American Literature (3 Credit Hours)
This course examines Hispanic, native American, Puritan, colonial, and early nationalist literature in the United States, and explores its American and European backgrounds.

ENGL 492 American Romanticism (3 Credit Hours)
The course includes selected studies in Poe, Emerson, Thoreau, Hawthorne, Melville, Whitman, and others.

ENGL 493 American Realism (3 Credit Hours)
The course features selected studies in American realism, tracing its origins and development as a national literary movement, and reviewing its regional variations and sub-genres, with special attention to Twain, Howells, and James.

ENGL 494 American Literature Since 1914 (3 Credit Hours)
The course is composed of selected studies in representative American writers of poetry, fiction, drama, and prose in the twentieth century.

ENGL 495 Latino/a Literature (3 Credit Hours)
Pre-requisites: Graduate standing and consent of the GPD in English
Latino/a literature has become an important focus in American literary studies because of its unique relation to questions of language, cultural hybridity, and borders. This course takes an interdisciplinary approach to Latino/a fiction, poetry, and drama, including analysis of Latino/a genres like corridos, testimonios, and teatro campesino. Topics include identity politics, transnationalism, cultural traditions and literary forms, textual recovery, gender and sexuality, and (im)migration.
Outcomes:
Students will gain an understanding of the diversity of forms, politics, themes, and identities in Latino/a Literature and the scholarly criticism about it; Students will learn how to teach and write about this literature through oral and written assignments

ENGL 496 African American Literature (3 Credit Hours)
This course focuses on African-American literature over a range of periods and genres including 19th-century slave narratives (Douglass, Jacobs), the fiction and poetry of the Harlem Renaissance (Hurston, Hughes, McKay) and contemporary literature (Ellison, Shange, Morrison).

ENGL 500 Capstone Seminar (3 Credit Hours)
Pre-requisites: 18 credit hours in 400-level courses; GPA of 3 or above
This capstone seminar provides a sustained, semester-long experience of research and writing on a topic in literary studies. A statement of topic is due on the first day of class. Research and writing are supported by scaffolded assignments, peer community, and a syllabus of shared readings drawn from practical guidebooks and exemplars of literary criticism, theory, and scholarship. Students develop an original article-length research paper suitable for submission to a journal in the field of literary studies.
Outcomes:
Assess and intervene in existing scholarly discourses in the field, by developing an\\noriginal article-length research paper suitable for submission to a journal in the field of\\nliterary studies; Write effectively about texts in English, by supporting an interpretative argument with\ \nclose reading

ENGL 501 Directed Readings (3 Credit Hours)
An independent study course supervised by a faculty member with the approval of the program director. Readings are initiated by the student.

ENGL 502 Independent Study-Doctoral Qualification (3 Credit Hours)
The course is composed of special readings in the field of the student's specialization under the supervision of a faculty member with the approval of the chair. Normally the director will be the professor with whom the student plans to write the dissertation. The written outcome of the course will be a draft of a proposal for the dissertation. The course is graded on a credit/no-credit basis.

ENGL 540 Newberry Seminar (3 Credit Hours)
Special topics in literary study offered by the Newberry Library.

ENGL 595 Thesis Supervision (1 Credit Hour)
Directed studies for students working toward a master's thesis.

ENGL 600 Dissertation Supervision (1 Credit Hour)
Directed studies for students working toward a doctoral dissertation.

ENGL 605 Master's Study (1 Credit Hour)
Directed studies for students working toward a master's thesis.

ENGL 610 Doctoral Study (1 Credit Hour)
Directed studies for students working toward a doctoral dissertation.

English as a Second Language (ESL)

Discover, search, courses (p. 2661)!

ESL 20 Special Topics (1-6 Credit Hours)
This course may be customized to fit the needs of student groups. Specialized courses may focus on reading, writing, listening, speaking, pronunciation and subject-specific vocabulary, along with U.S. culture and history.

ESL 50 English for Specific Purposes (0-6 Credit Hours)
Pre-requisites: ESL Placement Test or Equivalent
This course is designed to meet the needs of a specialized ESL group. Some needs may be, but are not limited to listening, speaking, reading, writing, and grammar.

ESL 55 Graduate Preparation (3 Credit Hours)
This course addresses the needs of graduate students at the Intermediate/Low Advanced level. Students will study grammatical and syntactic structures necessary for clear communication in English for academic purposes and will produce a variety of texts.

ESL 60 Low-Intermediate Reading & Vocabulary (0-6 Credit Hours)
This course focuses on developing reading skills with an emphasis on building vocabulary, literal comprehension, and fluency. Students will read graded materials and appropriate ESL books from library resources.

ESL 61 Low-Intermediate Listening & Speaking (0-6 Credit Hours)
This course will provide further instruction in academic listening and speaking for English language learners. Instruction focuses on basic listening and speaking strategies for a variety of situations, including listening for main ideas and details, and giving informal presentations. Students will work on word and stress patterns.

ESL 62 Low-Intermediate Writing & Grammar (0-6 Credit Hours)
In this course students will expand control of English sentence and paragraph structures. Students will develop mastery of simple present and simple past verb tenses, subject verb agreement, singular and plural nouns, and compound and complex sentence structures.

ESL 70 Intermediate Reading & Vocabulary (0-6 Credit Hours)
This course focuses on the development of academic reading skills, with an emphasis on vocabulary development, literal comprehension, and dictionary skills. Students will continue to develop critical thinking skills to understand, analyze, discuss, and write responses to ideas expressed in graded materials and appropriate ESL texts.

ESL 71 Intermediate Listening & Speaking (0-6 Credit Hours)
This course prepares English language learners for the academic listening, note-taking, and discussion skills necessary to be successful in college classes. Students develop academic note-taking skills by listening to real academic lectures and develop discussion skills by responding to lectures, agreeing/disagreeing, supporting opinions, and connecting ideas.

ESL 72 Intermediate Writing & Grammar (0-6 Credit Hours)
In this course students will continue to develop their writing skills through the writing process to create focused, fully developed and well-organized essays. Essays will incorporate outside sources as well as personal experience. Students will also learn to develop mastery of adjective clauses, gerunds and infinitives, and conditional statements.

ESL 80 High-Intermediate Reading and Vocabulary (0-6 Credit Hours)
High Intermediate Reading Skills exposes students to a variety of non-fiction and fiction materials. Fiction materials include short stories and simple novels. Non-Fiction materials will include news reports, scholarly journals and other intermediate level non fiction texts. Attention to reading comprehension including an awareness of main ideas, supporting details, fact/opinion and author's purpose is emphasized. Timed readings are included. Vocabulary development includes advanced

ESL 81 High-Intermediate Listening and Speaking (0-6 Credit Hours)
The Intermediate course focuses on listening and presentation skills that are necessary for university students. Students build listening skills in and out of class through excerpts from lectures, documentaries, radio and TV programs. These skills include predicting and connecting ideas in a lecture, note-taking strategies, listening for cause and effect, key terms, and examples. Students build presentation skills by giving short PowerPoint speeches.

ESL 82 High-Intermediate Writing and Grammar (0-6 Credit Hours)
Students will build upon the skills learned in the prior courses and recognize and produce effective five paragraph essays. Furthermore, students will develop the skills to effectively and accurately write using these rhetorical patterns, to name a few: compare/contrast and cause and effect.

ESL 90 Advanced Reading and Vocabulary (0-6 Credit Hours)
Pre-requisites: ESL Placement Test
Students will develop strategies for managing advanced reading assignments. Students will also increase their vocabulary from reading in general and specialized subject areas.

ESL 91 Advanced Listening and Speaking (0-6 Credit Hours)
Pre-requisites: ESL Placement Test
No course description is available

ESL 92 Advanced Writing and Grammar (0-6 Credit Hours)
Pre-requisites: ESL Placement Test
Students will advance their academic writing skills and communicate more clearly and accurately with an in-depth study of advanced English grammar. Students will effectively write using the rhetorical patterns most commonly used in universities. Students will also learn how to make citations of research sources and examine the cultural/ethical issues related to plagiarism.

ESL 94 English Pronunciation (0-6 Credit Hours)
Students will be able to speak clearly and be understood by others. Students will learn about and practice phonemic awareness and accuracy, stress patterns, intonation, and rhythm with extensive practice. Students will also be able to identify and improve their individual pronunciation issues.

ESL 95 TOEFL Preparation (2-4 Credit Hours)
Pre-requisites: ESL Placement Test
Students will be able to sharpen their test-taking skills and improve your TOEFL score. Students will become familiar with TOEFLLiBT and learn strategies for achieving the score they need.

ESL 96 Graduate Preparation (1.5-3 Credit Hours)
Pre-requisites: ESL Placement Test
Designed as a support for current non-native graduate students, this course focuses on refining the language components - listening, speaking, reading and writing - for success in one's current graduate classes at Loyola. Some of the objectives are doing research, reading and responding to journal articles; editing one's writing for content, organization, grammar, and creating effective presentations and using PowerPoint. NOTE: only open to Graduate students.

ESL 98 American English Pronunciation (3 Credit Hours)
This course assists students in improving phonemic accuracy, stress patterns, intonation, and rhythm. Students will develop class participation and group discussion skills as well as the fundamentals of public speaking. Students are required to practice with pronunciation software in the language resource center.

ESL 101 Graduate Reading and Critical Thinking (0-6 Credit Hours)
This course is intended for current or future graduate level international students and is designed to improve their overall comprehension of college/graduate level texts and critical thinking skills

ESL 102 Graduate Research and Writing (0-6 Credit Hours)
This course is intended for current or future graduate level international students and is designed to improve their academic writing skills and ability to synthesize and critique information from outside sources.

ESL 105 Skill-Building for TOEFL/IELTS (2-4 Credit Hours)
This course is for students with intermediate level language skills. This course will strengthen students' language skills while also familiarizing students with the content, questions, and tasks on the TOEFL iBT and IELTS exams.

Entrepreneurship (ENTR)

Discover, search, courses (p. 2661)!

ENTR 201 Essentials of Entrepreneurship (3 Credit Hours)
Introduces students to the process of entrepreneurship and how to think like an entrepreneur. Students will learn how new entrepreneurial opportunities are conceived, vetted, and acted upon. Course knowledge and skills are presented through a combination of theory and application that will prepare students to move to next level of entrepreneurial studies.
Course equivalencies: MGMT381/ENTR310/ENTR201
Outcomes:
Students will gain insight into the process of entrepreneurship and entrepreneurial mindset; Students will learn to identify problems in the marketplace and discover how to turn these ideas into viable products and services

ENTR 311 Social Entrepreneurship (3 Credit Hours)
Pre-requisites: Sophomore Standing, minimum grade of "C-" in ENTR 201 or ETHC 341
Explore how innovative solutions can address social issues and create sustainable impact. Learn to design, implement, and scale ventures that combine business principles with social change. Engage with case studies, develop entrepreneurial skills, and build a framework for launching ventures that contribute to societal well being.
This course satisfies the Engaged Learning requirement.
Outcomes:
An understanding of what is social entrepreneurship and how it differs from traditional entrepreneurship and non-profit organizations; An understanding of how to build and manage a successful social venture

ENTR 313 Entrepreneurship - Global Opportunity Scan (3 Credit Hours)
Pre-requisites: Sophomore Standing, minimum grade of "C-" in ENTR 201 or IBUS 201
With the power of the Internet, entrepreneurs can quickly research, find, and reach new markets. However, successfully and profitably engaging in a global marketplace requires understanding conflicting and changing business dynamics, barriers to entry into the international arena, and challenging management practices.
Interdisciplinary Option: Global Studies
Outcomes:
An understanding of the characteristics of international markets, including the critical challenges of global expansion and the barriers that exist; Ability to apply the appropriate frameworks to scan for international business opportunities

ENTR 345 Entrepreneurial Marketing (3 Credit Hours)
Pre-requisites: Sophomore Standing, minimum grade of "C-" in ENTR 201 or MARK 201
This course will explore the whole marketing concept, starting with understanding the customer and how the customer changes over the product lifecycle. The course will then explore common marketing channels and sales methods entrepreneurs use and debate their effectiveness at each stage of business.
This course satisfies the Engaged Learning requirement.
Outcomes:
Demonstrate an understanding of marketing of entrepreneurial ventures, the various channels and tactics entrepreneurs use to attract customers and changes over time, and product lifecycle management and customer engagement

ENTR 390 Entrepreneurship Strategies - Capstone (3 Credit Hours)
Pre-requisites: Junior Standing, minimum grade of "C-" in ENTR 201 or ENTR 310
Students will understand how to build a product/service that is attractive to customers yet differentiates it from its competitors. The students will learn how to grow the venture using sales and marketing channels, strong team building, and the financial implications of their decisions.
This course satisfies the Engaged Learning requirement.
Outcomes:
Demonstrate understanding of the importance of core business operational areas, how to launch and grow a new venture, and problem¿solving and critical thinking skills through case analysis, experiential activities, and team¿based project work

ENTR 391 New Venture Lab (3 Credit Hours)
Pre-requisites: Sophomore standing, grade of C- or higher in ENTR 201
This course is for students who want to turn a business idea into a viable new venture or grow an existing one. It is intensive, fast-paced, and hands-on, and students will learn to adapt to the uncertainty and ambiguity of entrepreneurship.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will learn how to systematically approach your startup/idea to maximize learning and minimize waste; Students will test the core assumptions they have about their business idea and conclude whether the assumptions are valid or not; Students will build a product/service based on what they learn from actual customers rather than what students think is best for the customers; Students will learn from peers' experiences in class and the local startup community

ENTR 395 Independent Study (1-3 Credit Hours)
Pre-requisites: Junior standing; Instructor and Dean permission
Independent Study is an in¿depth research or reading project initiated by the student and jointly developed with a faculty member into a specialized area of entrepreneurship not otherwise covered by the department course offerings.
Outcomes:
Varies with topic

ENTR 399 Selected Topics in Entrepreneurship (3 Credit Hours)
Pre-requisites: Junior standing
Special Topics are scheduled classes offered on an ad hoc basis. Specific titles and content will vary.
Outcomes:
Varies with topic

ENTR 480 Recognizing Entrepreneurial Opportunities (3 Credit Hours)
This course will focus on the very early stages of the entrepreneurial process. We will discuss how new opportunities are discovered and how societal value is created throughout this process. In its approach, the course will be based on classic theoretical readings, the insights of economics, strategic management, organizational studies, psychology and cognitive science.
Course equivalencies: X-ENTR 480/MGMT 480
Outcomes:
Apply analytical and critical thinking skills to identify untapped entrepreneurial opportunities

ENTR 481 Entrepreneurship (3 Credit Hours)
Pre-requisites: MGMT 480 or ENTR 480, or Instructor Consent
This course enables the students to develop their new venture ideas. We discuss how to cultivate new business ideas, form venture teams, evaluate the opportunities, and design a firm to bring the ideas to life. At the end, each venture team produces a business plan.
Course equivalencies: X-ENTR 481/MGMT 481
Outcomes:
The students learn how all major functions of a business come together in a new venture; This course will help those who might want to start their own business in the future; It will also help those who will work for existing companies by encouraging them to think more strategically and creatively about business

ENTR 482 Entrepreneurial Marketing (3 Credit Hours)
Pre-requisites: Restricted to Graduate School of Business students
This course is about the marketing challenges in an entrepreneurial firm. Entrepreneurship is the discovery, enactment, and pursuit of new business opportunities. Successful execution of an entrepreneurial idea requires a sound marketing plan. In this course, we will investigate how marketing tools can enable entrepreneurs to realize the full potential of their ideas.
Course equivalencies: X-MGMT 482/ENTR 482

ENTR 483 Strategic Entrepreneurship and Innovation Management (3 Credit Hours)
Pre-requisites: Restricted to Graduate School of Business students
This course will focus on the application of strategic management tools to entrepreneurial situations with an emphasis on the early stages of new venture creation. We will discuss how new opportunities are discovered, how inventions are turned into innovations, and how societal value is created throughout this process.
Course equivalencies: X-MGMT 483/ENTR 483
Outcomes:
At the end of this course, you will be able to: Recognize and discover entrepreneurial opportunities; Manage the creation and appropriation of the value generated by innovations; Apply analytical and critical thinking skills in an uncertain business environment; Apply your learning in a real-life project

ENTR 499 Special Topics in Entrepreneurship (3 Credit Hours)
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

Environmental Science (ENVS)

Discover, search, courses (p. 2661)!

ENVS 101 The Scientific Basis of Environmental Issues (3 Credit Hours)
The foundational course in science is predicated on the view that understanding environmental issues and their underlying scientific principles will occupy a central role in our students' lives and will be critical in their development as informed and participating members of society. The overarching strategy of the course will be to frame environmental science in terms of a series of interacting systems to allow students to analyze a variety of environmental issues. This is a foundational Tier I class; it is prerequisite to all Tier II science core classes.
Knowledge Area: Foundational Scientific Knowledge
Course equivalencies: ENVS 101 / ACISC 101 / ENVS137
Outcomes:
1) Describe scientific principles underlying the causes, consequences, and approaches to mitigation of ongoing environmental crises related to biodiversity, water, agriculture, energy, and climate change; 2) Apply the scientific method to collect, analyze, and interpret data relevant to biodiversity, water, agriculture, energy, and climate change and other scientific topics encountered in their lives; 3) Assess the accuracy of scientific information in different contexts and communicate it effectively to different audiences; 4) Understand sustainability and environmental solutions through an integral ecology lens

ENVS 137 Foundations of Environmental Science I (3 Credit Hours)
Pre-requisites: Restricted to students in the School of Environmental Sustainability major and minor programs
This course will introduce concepts that form the basis of environmental science, including elemental cycling, energy flow/transformation, and the interconnectivity among atmosphere, lithosphere, hydrosphere and biosphere, and within ecosystems. Ways in which knowledge of these concepts informs policy, management and social perception to produce positive change will also be examined.
Course equivalencies: ENVS 101 / ACISC 101 / ENVS137
Outcomes:
Recognize interconnections among scientific disciplines and how their principles are used to investigate and address environmental issues; Understand physical, chemical, and ecological principles underlying environmental science and how these interact

ENVS 200 Environmental Careers and Professional Skills (1 Credit Hour)
Pre-requisites: ENVS 101 or ENVS 137; Restricted to Majors and Minors in the School of Environmental Sustainability at the Sophomore level or above
Introduction to environmental professions and determining skills and individual traits best suited for professions in policy, science, business, community organizing, etc. Begin developing a professional network.
Outcomes:
Select appropriate internships, curriculum, projects to enhance knowledge, skills and experience; develop job hunting and communication skills specific to environmental fields, including resumes, cover letters, presentations

ENVS 203 Environmental Statistics (3 Credit Hours)
Pre-requisites: Restricted to Majors and Minors in the School of Environmental Sustainability
This course introduces basic statistics from probability through multiple regression, employing computer programs with ecological, environmental, and relevant social science examples and data sets.
Outcomes:
Programming/spreadsheet skills; data structure practices and diagnosis; data visualization; appropriate test selection; test execution and interpretation; introduction to qualitative data analysis

ENVS 204 Gender, Health & Environment (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137 or BIOL 101
Exploration of connections between social justice and environmental health using scientific tools of analysis. Focus on experiences of those at intersection of marginalized social locations. Issues include impacts of modern disposable culture and how socially constructed gender roles affect exposure to environmental health risks while biological sex shapes their impacts.
Interdisciplinary Option: Bioethics
Outcomes:
Understanding the web of causality (relationships among scientific, medical, ecological, cultural, behavioral, economic, political, and ethical dimensions) of environmental health problems and how to ameliorate the disproportionate burden of risk

ENVS 207 Plants and Civilization (3 Credit Hours)
Pre-requisites: ENVS 101 or equivalent; please check requirements for declared majors/minors for exceptions
Examines the structure, function, ecology, and diversity of plants, their importance to human civilization, and the impact of societal decisions regarding their use and exploitation.
Knowledge Area: Tier 2 Scientific Knowledge
Interdisciplinary Option: Bioethics, Urban Studies
Outcomes:
Students will demonstrate an understanding of the critical role of plants in the biosphere, their physiological processes, adaptations for specialization, and linkages to humans including agriculture, pest control, and extraction/use of plant-derived products

ENVS 215 Ornithology (3 Credit Hours)
Pre-requisites: ENVS 101, ENVS 137, or BIOL 101
An introduction to the biology of birds including the topics of anatomy, physiology, behavior, ecology, and evolution. Includes some field trips to learn how to identify species and to collect behavioral information.
Outcomes:
Students will demonstrate an understanding of the biology of birds and be able to identify some of the commoner species of birds in our area

ENVS 218 Biodiversity & Biogeography (3 Credit Hours)
Pre-requisites: ENVS 101 or equivalent; please check requirements for declared majors/minors for exceptions
This course covers the creation and maintenance of biodiversity across taxonomic, temporal and spatial scales. It will provide an overview of the history of biogeography, increase understanding of the evolutionary processes that create biodiversity, the influence of biodiversity on ecosystem services, and the rapid biodiversity loss resulting from human actions.
Knowledge Area: Tier 2 Scientific Knowledge
Interdisciplinary Option: Bioethics, Urban Studies
Outcomes:
Students will gain knowledge of and appreciation for the biodiversity of life, its formation through the process of evolution, and the importance of biodiversity to ecosystem function and human welfare

ENVS 220 Conservation Genetics (3 Credit Hours)
Students will gain foundational knowledge of population genetics principals. Throughout the course we will apply the population genetics principals to conservation issues and case studies to gain skills in conservation and management. Students will also evaluate several natural mechanisms of evolutionary change as well as evolutionary responses to anthropogenetic change.
Outcomes:
Learn foundational theories in population genetics; Apply population genetics theory to issues in conservation biology; Understand tools and interpret data sets in conservation genetics; Analyze and disseminate literature in the field of conservation genetics; Gain hands on experience with genetic techniques and analyses

ENVS 223 Soil Ecology (3 Credit Hours)
Pre-requisites: ENVS 101 or equivalent; please check requirements for declared majors/minors for exceptions
This course introduces the properties, functions, and conservation of soil. Topics include belowground ecosystem services, soil biodiversity, biogeochemical cycles, and conservation, human impacts to soils, and the socioeconomic implications of soil degradation. Lectures, laboratory/field soil testing, field trips, and presentations by experts in sustainable soil management are employed.
Knowledge Area: Tier 2 Scientific Knowledge
Interdisciplinary Option: Bioethics, Urban Studies
Outcomes:
Students will understand the properties, functions and methods of conservation/remediation of soils, learn how human activities affect soils and associated socioeconomic consequences, and develop analytical skills to assess soil health

ENVS 224 Climate & Climate Change (3 Credit Hours)
Pre-requisites: ENVS 101 or equivalent; please check requirements for declared majors/minors for exceptions
This course introduces students to basic principles and knowledge to explain climate change. Students will learn about natural and anthropogenic causes of climate change, the interactions between earth-atmosphere-ocean systems, climate feedback mechanisms, and impacts of climate change on the natural physical environment.
Knowledge Area: Tier 2 Scientific Knowledge
Interdisciplinary Option: Bioethics, Urban Studies
Outcomes:
Students will develop cognitive and mathematical skills to draw valid, logical conclusions regarding various observed phenomena such as observed changes in the climate system and observed impacts of climate change

ENVS 226 Science & Conservation of Freshwater Ecosystems (3 Credit Hours)
Pre-requisites: ENVS 101 or equivalent; please check requirements for declared majors/minors for exceptions
Freshwater ecosystems are threatened by water extraction, pollution, invasive species, and many other pressures. This course covers physical, chemical, and biological processes in freshwaters, and the benefits that humans derive from these ecosystems. Major issues for conservation will be covered at global and Great Lakes scales.
Interdisciplinary Option: Bioethics, Urban Studies
Outcomes:
Students will gain understanding of different types of freshwater ecosystems, their functioning and importance for human societies, and the range of pressures they currently face

ENVS 230 Feeding the Planet: Global Perspectives on Sustainability, Culture and Food (3 Credit Hours)
Cross-cultural policies, practices, and beliefs about the production, preparation, consumption, and distribution of food vary widely. This course examines food in historical, political, social, and cultural contexts around the globe. It is divided into four sections that require students to apply concepts in food studies to international case studies and global examples: Cross-Cultural & Global Perspectives on Food; Culture, Identity, and Food; The Political Economy of Food; and Social, Cultural, Political, and Economic Responses to Hunger. Course topics include subsistence patterns and cultural patterns of food preparation and consumption; cultural practices involving food preferences and taboos; the globalization of foods and cuisines; labor practices in industrial agriculture; alternative economies of food; global policies and practices developed to eliminate hunger and malnutrition; the use/misuse of global food aid, and others.
Outcomes:
Explain the rationales of cross-cultural beliefs and practices of our own and others' foodways; Apply interdisciplinary perspectives to analyze the historical, cultural, and political roots of social phenomena and world problems involving food and society; Assess various dimensions of the forms and mechanisms of oppression, discrimination, or privilege in global and local food systems; Investigate coalitions and key ideas, past and present, which address and advocate for economic and social justice in the food system

ENVS 237 Foundations of Environmental Chemistry (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137; Restricted to BA majors in the School of Environmental Sustainability
This course is the second in a three-course sequence required of all ENVS BA majors. These courses provide the basic scientific grounding needed to intelligently discuss environmental issues and to prepare students for more advanced study on the environment. ENVS 237 focuses on the physical and chemical science needed to understand environmental processes. Students will build their quantitative skills in evaluating energy and chemical transactions that impact our environment.
The course will also work on building skills in interpreting scientific information, including using academic peer-reviewed journal articles.
Outcomes:
Be able to quantitatively assess environmental systems and anthropogenic processes that impact the environment; Gain understanding of the physical and chemical processes of environmental systems to be able to describe global climate dynamics, chemical reactions that contribute to environmental issues, the energetics of different energy sources, and technological aspects of alternative energy sources; Appreciate the importance of chemistry and physics as applied to different environmental issues and used by different environmental fields

ENVS 238 Foundations of Environmental Science Lab (1 Credit Hour)
Pre-requisites: ENVS 237 (pre- or co-requisite); Restricted to BA majors in the School of Environmental Sustainability
A lab course designed to be associated with ENVS 237, this course is designed to introduce all ENVS majors to lab safety, basic lab techniques such as use of balances and microscopes, data analysis, and the application of these techniques to the study of environmental science.
Outcomes:
Students will understand and demonstrate safe lab practices and learn to use basic lab equipment to take and analyze environmental science data

ENVS 260 Environmental Journalism (3 Credit Hours)
Pre-requisites: Department Consent Required
The mission of environmental journalism is to raise public awareness about environmental news and issues. It is about being ethical, accurate, fair, and clear, whether reporting, investigating, or advocating for change.
Course equivalencies: X-ENVS 260/ COMM 260
Outcomes:
Students will be able to find, report, and present challenging stories around this topic, in print and in broadcast writing

ENVS 267 Bird Conservation and Ecology (3 Credit Hours)
Pre-requisites: ENVS 101, ENVS 137, or BIOL 102
This engaged-learning course provides an introduction to the theory and practice of avian conservation, ecology and management. Field trips for viewing birds in the wild, observing behavior and collecting data on habitat assessments are highlighted. Students participate in a community service project to gather data for avian conservation and management
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will become skilled in critical reasoning and some bird monitoring techniques, and demonstrate an understanding of the many facets of bird conservation

ENVS 273 Energy and the Environment (3 Credit Hours)
Pre-requisites: ENVS 101, ENVS 137, or BIOL 101, Please check requirements for declared majors/minors for exceptions
The concept of energy developed from antiquity through the present day and applied to national and worldwide energy use patterns, the technologies supporting their use, as well as the societal impact and environmental consequences of energy usage.
Knowledge Area: Tier 2 Scientific Knowledge
Interdisciplinary Option: Bioethics, Peace, Justice, and Conflict Studies
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will become skilled in critical reasoning and methods of inquiry; Students will demonstrate an understanding of critical concepts and knowledge, including heat and energy, the laws of thermodynamics, and current and future technologies and their impact

ENVS 274 Chemistry of the Natural Environment (3 Credit Hours)
Pre-requisites: ENVS 137, MATH 118 and CHEM 160; Restricted to Majors and Minors in the School of Environmental Sustainability
Environmental Chemistry is the study of how materials move through the environment and interact within different environmental systems, including the atmosphere, hydrosphere, lithosphere, and biosphere. In this course, we will use this approach to better understand the chemical and physical reactions taking place and their equilibrium in the natural environment on Earth. The course will investigate these chemical and physical interactions in the three unique environmental compartments of the atmosphere, hydrosphere, and the soil environment, where the lithosphere and biosphere overlap, as we learn more about the materials and reactions that make up the natural environment. Students will utilize problem solving to explore the materials and reactions of the major compartments.
Interdisciplinary Option: Bioethics
Outcomes:
Apply key equations, concepts, and physical laws relevant to environmental chemistry to analyze how materials move through the environment between different environmental compartments (atmosphere, hydrosphere, lithosphere, biosphere); Quantitatively assess materials in air, water, soil, and cells across a range of scales appropriate in environmental science, from the microscopic to the global range; Describe underlying ecosystem functions that establish the chemistry of natural waters, air, and soil

ENVS 275 Chemistry of the Environment Lab (1 Credit Hour)
Pre-requisites: ENVS 280 and (CHEM 102 or CHEM 161); ENVS 274 as pre- or co-requisite; Restricted to Majors and Minors in the School of Environmental Sustainability
Basic techniques for chemical analysis of environmental samples, including air, water and soil. Learn to use electronic data acquisition systems and further develop scientific writing skills.
Outcomes:
Plan experiments, develop good lab techniques, conduct accurate chemical analyses on environmental samples, interpret chemical data, short and long reports describing work and interpreting significance of results

ENVS 276 Chemistry of Environmental Pollution (3 Credit Hours)
Pre-requisites: ENVS 137, CHEM 160, MATH 118, and SES Major
Environmental Chemistry is the study of how materials move through the environment and interact within different environmental systems, including the atmosphere, hydrosphere, lithosphere, and biosphere. In this course, we will use this approach to better understand the chemical and physical reactions that influence the transport and fate of chemical pollutants in our environment. This course will identify major sources of environmental pollutants and technologies for source pollution control as well as understanding how pollutants move through the environment to potentially impact ecosystems and human health. The course will cover pollutants in all environmental compartments including air pollution from combustion sources, water quality issues and water treatment, and soil pollutants with a focus on agrochemicals and their impact on both soil environments and groundwater.
Outcomes:
Apply key equations, concepts, and physical laws relevant to environmental chemistry to analyze how pollutants move through and between different environmental compartments (atmosphere, hydrosphere, lithosphere, biosphere); Describe underlying chemistry of technologies and policies that would address key sources of major pollutants; Be able to utilize physical chemical properties of pollutants as a tool for assessing their persistence and potential to do harm in natural ecosystems

ENVS 278 Hydrology (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137 or BIOL 101
Study of processes which cycle water between oceans, atmosphere, and land surface. This course examines precipitation, evaporation, infiltration, transpiration, groundwater and surface water flow. Understanding these processes is fundamental to managing our resources in the face of mounting environmental challenges and natural resource pressures.
Outcomes:
Understanding of key physical processes and multidirectional complex interactions between different components of the water cycle; ability to apply fundamental equations of conservation to quantify flows

ENVS 279 Climate and History (3 Credit Hours)
Pre-requisites: Department Consent Required
Explores the role of climate in history, from the emergence of homo sapiens to recent anthropogenic climate change. Major topics include the social impact of climate variability, sources of resilience, origins of scientific knowledge, and the use of historical knowledge in the present.
Course equivalencies: X-HIST279E/ ENVS279
Outcomes:
Students will analyze examples of climate shaping history, learn different ways that scholars have treated this relationship, and reflect on how this knowledge might be useful today

ENVS 280 Principles of Ecology (3 Credit Hours)
Pre-requisites: (ENVS 101 or ENVS 137) and (ENVS 237 or CHEM 101 or CHEM 160); Restricted to Majors and Minors in the School of Environmental Sustainability
The purpose of this course is to foster an in-depth understanding of ecology, the study of relationships between organisms and the environment at organizational scales ranging from genes, individuals, and populations to communities, ecosystems, and landscapes. Topics include population dynamics, species interactions, community dynamics, food webs, ecosystem functions, and landscape ecology with a strong emphasis on scientific inquiry and data interpretation.
Interdisciplinary Option: Bioethics
Outcomes:
Students will understand key concepts and principles concerning ecological processes in nature at the gene, individual, population, community, ecosystem and landscape scales and apply knowledge of ecological concepts to current environmental challenges

ENVS 281 Environmental Sustainability & Science in China (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137 or BIOL 101
This course provides students with an understanding of how sustainable systems work and how the structure and function of these systems is altered by human activities. Students will gain first-hand experience studying environmental issues in China, including air pollution, loss of biodiversity, energy, and climate change, through lectures & field trips to China.
Knowledge Area: Tier 2 Scientific Knowledge
Interdisciplinary Option: Chinese Language & Culture
This course satisfies the Engaged Learning requirement.
Outcomes:
a) Describe the characteristics of subtropical climate and ecosystems; b) Explain the interactions between human activities and the environment in China; c) Discuss China's approaches to environmental protection and economic development; d) Recognize the interconnectedness of natural systems, including the role of humans within them; e) Work effectively with people from diverse backgrounds, both individually and in teams, and communicate findings effectively in writing and speech

ENVS 283 Environmental Sustainability (3 Credit Hours)
Pre-requisites: ENVS 101 or equivalent; please check requirements for declared majors/minors for exceptions
Examines the impact of humans as consumers on the environment and how these interactions affect the probability of establishing sustainability for human and non-humans on Earth.
Knowledge Area: Tier 2 Scientific Knowledge
Interdisciplinary Option: Bioethics, Urban Studies
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will become skilled in critical reasoning and methods of inquiry, and demonstrate an understanding of knowledge critical to the field including current human consumptive practices and their effects on the health and well-being of living organisms

ENVS 284 Environmental Justice (3 Credit Hours)
This course examines how policy interacts with race and class to affect differentially people's access to a clean, safe, productive environment. Reviews history of the environmental justice movement, and community, policy, and legal responses. Develops students' ability to work across diverse social groups to advance environmental justice and sustainability.
Interdisciplinary Option: Bioethics
Outcomes:
Describe the history, central aims, practices, and continuing evolution of modern-day environmental justice movements; Identify theories of justice underlying environmental justice movements; Analyze structures and processes of inequality, exclusion, colonization, capitalism, and speciesism as they relate to environmental degradation; Describe how communities build power to address environmental injustices; Reflect upon your own social positionality and consider the value of environmental justice theory and action for your own life

ENVS 285 Eco-spirituality (3 Credit Hours)
Eco-spirituality is an emerging field in ecology, conservation, and religion that recognizes the spiritual component of environmentalism and Earth stewardship. This course explores how ecological efforts are enhanced by including a spiritual dimension and spirituality and religion must include awareness and engagement with ecology and ecological issues.
Outcomes:
1) Draw connections between ecology, spirituality, and Loyola¿s mission; 2) Implement tools and practices that foster personal awareness and reflection; 3) Demonstrate how reflection leads to necessary action

ENVS 286 Principles of Ecology Lab (1 Credit Hour)
Pre-requisites: ENVS 203 and (ENVS 238 or CHEM 111 or CHEM 161) and ENVS 280 (pre- or co-requisite); Restricted to BA Majors in the School of Environmental Sustainability
This course will allow students to develop experience and skills employed in ecological studies, with an emphasis on field work, laboratory analysis, and hypothesis testing. Topics for lab exercises will correspond closely with material from Ecology (ENVS 280) lecture. Course does not satisfy requirements for BIOL major.
Outcomes:
Students will understand basic ecological principles, apply these to design experiments, develop skills in data analysis and interpretation, and learn techniques used to characterize ecosystem properties and human environmental impacts

ENVS 286S Principles of Ecology Lab (1 Credit Hour)
Pre-requisites: ENVS 203 and (CHEM 111 or CHEM 161) and ENVS 280 (pre- or co-requisite); Restricted to BS Majors in the School of Environmental Sustainability
Course content includes lab skills and analytical techniques commonly employed in ecological studies; emphasizes sampling, research design, field work, laboratory technique, data analysis, project development, hypothesis testing, and scientific report writing.
Outcomes:
Understand ecological principles, apply knowledge to ecological experiments, observational studies, and entry-level mathematical models; assess biotic responses to the abiotic environment and to anthropogenic impacts

ENVS 288 Applied Interdisciplinary Data Analysis (3 Credit Hours)
Pre-requisites: (ENVS 280 or BIOL 265) and (STAT 103 or STAT 203)
Restricted to students in SES majors. This course teaches students to approach environmental problem-solving from a systems perspective by understanding the complex adaptive nature of socio-ecological. It introduces analytic techniques used in the natural/social sciences, and provides opportunity to analyze and connect data from various disciplines (e.g., ecology, economics, sociology) to address pressing environmental concerns.
Outcomes:
Students will be able to describe characteristics of complex adaptive systems, become familiar with analytical approaches suited to different sub-disciplines, and apply numerous analytical techniques to real data sets

ENVS 297 North American Environmental History (3 Credit Hours)
Pre-requisites: Department Consent Required
This course surveys the environment and environmentalism in United States history, from the transformation of New England into a farm ecology, the expansion of the cotton South, the settlement of the West, to the rise of industrial cities, suburban sprawl, and the globalization of the economy.
Course equivalencies: X-ENVS297/HIST297E
Outcomes:
Students will be able to demonstrate historical knowledge of environmental thought and ecological science, to draw links between environmental concerns and public policies, and to develop critical thinking and communication skills

ENVS 298 Special Topics (1-12 Credit Hours)
Specific titles and contents vary from semester to semester. Variable credit hours.

ENVS 298L Special Topics with Lab (1-4 Credit Hours)
Specific titles and contents vary from semester to semester. Includes lab component.

ENVS 300 Introduction to Public Health (3 Credit Hours)
Pre-requisites: Restricted to Majors and Minors in the School of Environmental Sustainability; Junior or Senior Standing; Department Consent Required
Public health is the science of preventing disease and protecting and promoting the health of populations and communities. Through interactive exercises and application of concepts, this course considers its history; ethical principles; scientific foundation and tools; biomedical bases; socioeconomic and behavioral factors; environmental issues; and relationship to medical care.
Course equivalencies: X -PUBH 300/ ENVS 300
Outcomes:
Describe the history, core concepts, functions, and methods of public health; Define health disparities and explain how they are produced; Synthesize public health information and communicate it effectively

ENVS 301 Environmental Health (3 Credit Hours)
Pre-requisites: Restricted to Majors and Minors in the School of Environmental Sustainability; Junior or Senior Standing; Department Consent Required
This course is designed as an introduction to the field of environmental health, including regulations, research, disease prevention, and advocacy.
Interdisciplinary Option: Bioethics
Course equivalencies: X-ENVS301/PUBH301/MBPH401
Outcomes:
Students will be able to outline approaches for assessing and controlling environmental hazards that affect community health and discuss major local, national, and global health challenges

ENVS 303 Introduction to Epidemiology (3 Credit Hours)
Pre-requisites: Restricted to Majors and Minors in the School of Environmental Sustainability; Junior or Senior Standing; Department Consent Required
Epidemiology is the study of the distribution and determinants of disease in populations and remains the basic science of public health. This methodology is unique to epidemiology, and in some cases, has even been appropriated by other fields. The objective of this course is to familiarize students with the range of tools used to conduct epidemiologic analysis, including design and measures of association. This course will be taught as an online course combined with an intensive interactive session with faculty and students one weekend in Spring.
Course equivalencies: X- PUBH 303/ENVS 303/MPBH 403

ENVS 310 Introduction to Environmental Law & Policy (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137
This introduction to environmental law surveys some critical federal environmental statutes, rules, and regulations in the United States; important case law decided under those statutes; interaction between federal, state, and local jurisdictions; and impacts on air, land, water, and natural resources.
Outcomes:
Understands how the natural environment is controlled, managed and promoted through the legal system

ENVS 311 Natural Resources and Land Use Law & Policy (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137; and ENVS 310 (recommended)
Focus on legal and policy processes used to govern pollution, water use, endangered species, toxic substances, and environmental impact and risk.
Outcomes:
Students will understand how the natural environment is controlled, managed and promoted through the legal system and how land use laws and policy impact social and economic issues

ENVS 312 Water Law & Policy (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137; and ENVS 310 (recommended)
This course looks at how the law allocates and protects one of our most crucial natural resources -- water. Understanding development and regulation of water ownership and use and how those decisions impact current environmental and socio-economic issues.
Outcomes:
Understand how key laws and policies impact protection and use of water in the United States; understand key legal concepts that shape the management of our water resources

ENVS 313 Energy Law & Policy (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137; and ENVS 310 (recommended)
This course looks at the laws that shape traditional energy production and the growing regulation of renewable and sustainable energy.
Outcomes:
Understand how key laws and policies impact production and use of energy; and how energy is controlled by federal and local regulations and policies

ENVS 316 Energy and Power Systems (3 Credit Hours)
Pre-requisites: Junior or Senior standing; MATH 118
This course introduces the fundamental concepts of energy and power systems, covering essential principles, grid components, and generation technologies through a multidisciplinary lens. Students will explore current and future challenges in energy systems by applying mathematical tools, software, and programming to analyze the topics covered.
Outcomes:
Comprehend Basic Energy and Electrical Concepts: Explain the fundamental principles of electricity, energy, power, voltage, current, and resistance; Differential Generation Technologies: Compare and contrast conventional and renewable generation technologies, and assess their environmental, economic, and social impacts; Understand Grid Operations: Explain the basics of power flow analysis, load balancing, and grid operation; Analyze Energy Markets and Pricing: Discuss how electricity markets function, how electricity is priced, and how the grid is managed; Assess Further Grid Challenges: Evaluate the challenges of integrating renewable energy sources, managing load shifting, and electrifying other sectors, while considering social and equity implications; Apply Long-Term Grid Planning Tools: Identify and apply tools and methodologies used in generation expansion planning, and assess strategic considerations for achieving long-term goals in energy systems

ENVS 320 Conservation Biology (3 Credit Hours)
Pre-requisites: ENVS 280 and ENVS 286/s; or BIOL 265 and 266
Students will learn to apply ecological and evolutionary biological principles to the preservation of wild plant/animal species, and to the preservation/management of ecosystems. Conservation approaches and challenges for all types of ecosystems, will be covered, with emphasis on contemporary threats to biodiversity, including habitat fragmentation, invasive species, and climate change.
Outcomes:
Students will understand how the science of ecology can be used to address issues in species/ecosystem conservation, and recognize that consideration of human actions is essential to address conservation problems

ENVS 321 Conservation Biology Lab (1 Credit Hour)
Pre-requisites: ENVS 280 and ENVS 286/s; or BIOL 265 and 266; and ENVS 320 (pre- or co-requisite)
Students will apply principles learned in ENVS 320 to conservation problems in the Chicago region and elsewhere, through visits to conservation sites and discuss concerns/initiatives with land managers and policy makers. They will develop skills in species identification, ecosystem delineation and description, and the use of field equipment and methods.
Outcomes:
This course will provide practical field and lab experience in population, community and ecosystem conservation; Students will learn how the principles of Conservation Biology are applied, and the associated challenges

ENVS 322 Invasive Species (3 Credit Hours)
Pre-requisites: ENVS 280 or BIOL 265
Invasive species are one of the greatest global threats to biodiversity, ecosystem function, economies, and human health. Species become invasive when moved beyond native range, become established, and cause harm. This course covers how species are moved, how and when they become established, and potential harm they can cause.
Outcomes:
Understanding that because invasive species are moved by humans, and because many of their impacts are felt by humans, they are an inherently multi-disciplinary problem

ENVS 323 Environmental Microbiology (3 Credit Hours)
Pre-requisites: BIOL 101, BIOL 102, CHEM 101, and (CHEM 102 or ENVS 274)
This course introduces the significant role of microorganisms in numerous environmental and human-engineered processes. It covers microbiology and its basic methods to orient students to this field of science and the importance of microbial diversity relevant to agriculture, public health, and ecological restoration.
This course satisfies the Engaged Learning requirement.
Course equivalencies: ENVS 323/ENVS 423
Outcomes:
Students will learn to isolate and characterize environmental microorganisms; Students will investigate the role of microorganisms in nutrient cycling, remediation of soils, and transmission of existing and emerging pathogens

ENVS 324 Climate Science (3 Credit Hours)
Pre-requisites: ENVS 224 and MATH 118
The focus of this course is Earth's climate system, including the role of the atmosphere, ocean, cryosphere and land-atmosphere interaction. This course digs deeper into the physical principles underlying climate processes, energy balance, feedback mechanisms, climate variability and climate dynamics, including large-scale atmospheric and ocean circulation. This course will discuss recent climate change, and projections for future climate scenarios. Students will have hands-on experience with practicing climate modelling tools, analyzing climate data, and exploring current research in climate science. Thus, this course will involve quantitative analysis and will reinforce students' reading, writing, and public-speaking skills through the class project on climate change.
Outcomes:
Understand Earth's Climate Systems: Students will gain an in-depth understanding of Earth's climate system, including the atmosphere, ocean, cryosphere, and land-atmosphere interactions, as well as the physical principles underlying climate processes such as energy balance, feedback mechanisms, and climate variability; Develop Quantitative Analysis Skills: Students will engage in quantitative analysis through climate modeling tools and data interpretation, enabling them to critically analyze climate data and understand large-scale climate dynamics like atmospheric and ocean circulation; Evaluate Climate Change Impacts and Projections: Students will explore recent scientific developments in climate change, assess current climate change impacts, and understand projections for future climate scenarios, preparing them to engage in informed discussions and decision-making related to climate policy and research; Enhance Communication and Research Skills: Through scientific paper reviews and presentations, students will enhance their ability to critically evaluate research, improve their public-speaking skills, and effectively communicate scientific findings to peers, fostering collaboration and scientific literacy

ENVS 325 Sustainable Agriculture (3 Credit Hours)
Pre-requisites: ENVS 280 or BIOL 265
This course provides an introduction to the environmental, social, and economic implications of sustainable agriculture. Students will learn the origins, major concepts, and current issues of sustainability in agriculture. Ecological concepts and principles applied to manage sustainable food production to support community health and economic justice will be explored.
Outcomes:
Students will be able to explain the characteristics of the US agricultural system, the inter-relation among components of sustainable agriculture, and steps necessary to develop a sustainable agricultural system

ENVS 326 Agroecosystems (3 Credit Hours)
Pre-requisites: ENVS 280 and ENVS 286/s; or BIOL 265 and 266; and ENVS 223 (recommended)
In this hands-on course, students will build knowledge and skills in agriculture and ecology through work in greenhouse, laboratory, classroom, and field settings. Students will build on foundations of Environmental Science and Biology by examining challenges of food production, management decisions, and environmental change facing agroecosystems both locally and abroad.
Outcomes:
Students will develop understanding of agricultural systems as related to sustainable practices, develop skills in ecological analysis of these systems, and demonstrate proficiency in communicating scientific information to diverse audiences

ENVS 327 Food Systems Analysis (3 Credit Hours)
Pre-requisites: ENVS 203
This course links conceptual and practical considerations of food-system assessment and develop a base of tools for practitioners. It examines major elements of the assessment process: systems thinking and conceptual frameworks; the food system from consumer and producer perspectives; identifying leverage points that might be influenced to affect positive change.
Outcomes:
Students will understand inter-relationships among environment, food supply, markets, American diets, and health, learn to analyze assessment methods for food-system sectors, and examine conceptual frameworks for food-system analysis

ENVS 330 Restoration Ecology (3 Credit Hours)
Pre-requisites: ENVS 280 and ENVS 286/s; or BIOL 265 and 266
This course provides a theoretical and practical basis for the increasing global efforts to reverse damage caused by humans to ecosystems and species, emphasizing the many perspectives (e.g., ecological, social, political, engineering) that must be considered to develop, implement, and assess restoration projects across a range of ecosystem types.
Outcomes:
Students will apply knowledge from ecology and other disciplines to the practice of ecosystem restoration, and learn to integrate information from multiple disciplines, and stakeholder input, to design/manage restoration projects

ENVS 331 Restoration Ecology Lab (1 Credit Hour)
Pre-requisites: ENVS 280 and 286/s; or BIOL 265 and 266; and ENVS 330 (pre- or co-requisite)
Students will apply principles learned in ENVS 330 to restoration sites in Chicago and beyond. They will visit restoration sites and discuss strategies and initiatives with land managers and policy makers. Students will develop skills in ecological-site description, and in the analytical methods required to determine success of restoration projects.
Outcomes:
Students will gain an understanding of how the science of restoration ecology is applied in practical settings and learn methods used in restoration and assessment of actual restoration projects

ENVS 333 Introduction to the Circular Economy (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137; or MGMT 201 for Quinlan School of Business students
This course introduces principles and concepts of a circular economy that can support a more sustainable future. The course reviews circular design, materials management, business models, supply chains, policy, financing, metrics, and applications. This course may include speakers and/or field trips to learn about companies with circular business practices.
Outcomes:
Explain circular economy; identify applications of circularity; understand role of policy, finance, and design in system-wide change; understand social, environmental, economic impacts of linear economic system

ENVS 335 Ecological Economics (3 Credit Hours)
Pre-requisites: ECON 201 or ECON 202
Ecological Economics is a trans disciplinary course that takes a systems approach to the relationship between planetary stewardship, social justice, and the economy to design a prosperous and desirable future for humans on a finite planet. Ecological economics fuses economic theory and sustainability science to generate new solutions for today's challenges. Topics include sustainable scale, just distribution, efficient allocation and relationships between economic and ecological systems.
Outcomes:
Understanding of ecological economics history, conceptual foundations, principles, tools, indicators, and applications

ENVS 336 Design for Circular & Sustainable Business (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137; or MGMT 201 for Quinlan School of Business students
This project-based course focuses on solving complex human sustainability challenges through the application of sustainable design methods at the product and process level. Students will learn and apply biomimicry, circular, and human-centered design methods to develop conceptual and prototype solutions. Understand and apply: (1) circular design methods (2) biomimicry design methods; and (3) human-centered design (design thinking) methods.
Outcomes:
Understand the role of design in creating a sustainable future

ENVS 338 Climate Change and Human Health (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137 or BIOL 101; Restricted to Majors and Minors in the School of Environmental Sustainability; Junior or Senior Standing
This course provides an introduction overview of the health consequences associated with climate change and the local, federal, and global response to mitigate these negative health outcomes. During the course students will be expected incorporate course content and develop a realistic response public health plan to climate change for a locality of their choosing.
Outcomes:
1) Outline fundamental public health concerns that have been associated with climate change; 2) Identify and critique future steps forward to reduce public health concerns of climate change

ENVS 340 Natural History of Belize (3 Credit Hours)
Pre-requisites: For SES majors and minors, ENVS 101 or ENVS 137; For BIOL majors and minors, BIOL 102 and BIOL 112; For ANTH or GLST majors and minors, Junior or Senior Standing
This Study Abroad field course is designed to build on the foundations learned in Ecology, Environmental Science, and Anthropology classes by examining the biodiversity and tropical ecosystems of Belize, by exploring the cultural traditions of some of its peoples, particularly the Mayans; and learn how local communities are involved in protecting and sustaining ecological and natural sites through community based conservation and sustainability practices.
This course satisfies the Engaged Learning requirement.
Outcomes:
Provide a working understanding of the structure, function, and ecology of tropical ecosystems; their importance to local communities; and the social dimensions of environmental issues, especially those related to justice

ENVS 344 Ecuadorian Ecosystems: Geography, Diversity, and Conservation (3 Credit Hours)
Ecuador is aptly known as "The Country of Four Worlds" due to its four distinct biogeographical landscapes: the Andean highlands, Amazonia, Coastal Region, and the Galapagos Islands. This immersive field-based course will take students to three of these four regions. Class begins during spring semester where students will learn the foundations of the natural history of Ecuadorian Ecosystems. The course then follows with a 3-week field component. Travel will begin in the Andean capital of Quito, from there we will venture to the heart of the Amazon within Yasuni Biosphere Reserve, next we move to the Andean Cloud forests, and finally, the course finishes in the world-famous Galapagos Islands. This course is designed to provide tangible, real-world exposure to the biology and ecosystems of Ecuador.
This course satisfies the Engaged Learning requirement.
Outcomes:
Develop a working understanding of the geographical diversity and distinction of three ecosystems: Andean highlands, Amazonia, and the Galapagos Islands; Develop a working understanding of the unique biota and endemic species of Ecuador and the complexity of the environments that gave rise to these organisms; Learn field techniques and monitoring for understanding ecological condition and species: behavioral monitoring, transects/plots/quadrants, and GPS points/tracking; Develop a working understanding of conservation methodology, especially which techniques have worked for each ecoregion and how conservationists, ecologists, government officials, and local people can do more to preserve the species and habitats of Ecuador; Learn and appreciate cultures of the Ecuadorian people while expanding one's own worldview, tolerance and acceptance

ENVS 345 Conservation and Sustainability of Neotropical Ecosystems (3 Credit Hours)
Pre-requisites: BIOL 265 or ENVS 280; Instructor Consent Required
This course provides an introduction to conservation ecology in Neotropical ecosystems via classroom sessions and experiential learning activities during a Spring-Break field trip to Belize. Students will gain experience in environmental monitoring and biological survey methods. Ecosystems studied: coral reefs, mangrove forests, subtropical rain and dry forests, savannas, rivers, wetlands.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will gain an understanding of tropical climates, neotropical terrestrial/aquatic ecosystems and applied conservation and environmental practices such as nature reserve design and management, community-based resource management, ecotourism, and ecoagriculture

ENVS 350A Solutions to Environmental Problems: Water (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137 or BIOL 101
'STEP. Water' is an interdisciplinary and hands-on course in which students learn about a relevant and complex environmental problems pertaining to water and then develop and implement projects that address the problem on campus and in the local community.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will develop understanding of water-related environmental problems, demonstrate skills/knowledge needed to address those problems, and develop skills to recognize/articulate future possibilities for environmental leadership and civic engagement

ENVS 350B Solutions to Environmental Problems: Biogas (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137 or BIOL 101
'STEP. Biogas' is an interdisciplinary and hands-on course in which students learn about a relevant and complex environmental problems pertaining to biogas production, processing and transport and then develop and implement projects that address the problem on campus and in the local community.
Outcomes:
Students will develop understanding of environmental problems related to biogas, demonstrate skills/knowledge needed to address those problems, and develop skills to recognize/articulate future possibilities for environmental leadership and civic engagement

ENVS 350C Solutions to Environmental Problems: Climate Action (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137 or BIOL 101; and ENVS 224 (recommended)
Consideration of environmental, political, economic, historical, and cultural contexts of climate change. Examination of actions occurring at varying geographic scales to mitigate and/or adapt to climate change impacts. Problem- and solution-based learning of how to invest resources effectively to deal with a changing climate and its consequences.
This course satisfies the Engaged Learning requirement.
Outcomes:
Develop understanding of environmental problems related to climate change, demonstrate skills/knowledge needed to address those problems and recognize/articulate future possibilities for environmental leadership/civic engagement

ENVS 350F Solutions to Environmental Problems: Food Systems (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137 or BIOL 101
'STEP. Food Systems' is an interdisciplinary and hands-on course in which students learn about a relevant and complex environmental problems pertaining to food production, processing and transport and then develop and implement projects that address the problem on campus and in the local community.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will develop understanding of environmental problems related to food systems, demonstrate skills/knowledge needed to address those problems, and develop skills to recognize/articulate future possibilities for environmental leadership and civic engagement

ENVS 351 Introduction to Sustainability Concepts & Impacts (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137 or BIOL 101
Examines environmental, economic, social and political impacts of sustainable practices on general public and global and local organizations. Provides students with understanding of importance to corporations and other entities of measuring, monitoring, and reporting resource use to customers and stakeholders.
Outcomes:
Explaining basic concepts of sustainability and how they relate to operations and goals of institutions and organizations; interaction of social, economic, and ecological systems to influence sustainability challenges and solutions

ENVS 352 Sustainability Assessment & Reporting I (3 Credit Hours)
Pre-requisites: ENVS 351
Fundamental concepts and methodology of measuring and reporting environmental sustainability impacts in the areas of energy, air, buildings and transportation.
Outcomes:
Ability to assess and report sustainability metrics related to energy, air, buildings, and transportation

ENVS 353 Sustainability Assessment & Reporting II (3 Credit Hours)
Pre-requisites: ENVS 351
Fundamental concepts and methodology of measuring and reporting environmental sustainability impacts in the areas of water, land, food and waste. Environmental and social impacts of water use and sources, land use practices, food sourcing and production, and waste production and recovery.
Outcomes:
Ability to assess and report sustainability metrics related to water, land, food, and waste

ENVS 354 Sustainability Plan Development & Reporting (3 Credit Hours)
Pre-requisites: ENVS 351, ENVS 352, and ENVS 353
Capstone course in the four course sequence on Sustainability Assessment & Planning. Using concepts and methodology to create a comprehensive sustainability plan including stakeholder engagement, life cycle analyses, set resource baselines, short- and long-term sustainability goals, budgets and draft sustainability plan for a representative entity.
Outcomes:
Learn best practices to inspire and engage partners and stakeholders to advance environmental sustainability in different types of organizations; Ability to create a comprehensive sustainability plan for organizations and institutions

ENVS 363 Sustainable Business Management (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137; or MGMT 201 for Quinlan School of Business students
Course introduces students to the emerging field of sustainability in business and the growing focus on the social, environmental, and economic performance of businesses. The course presents the scientific, ethical, and business cases for adopting sustainability. This course fulfills a MGMT elective.
Course equivalencies: MGMT/ENVS 363/ENVS 463
Outcomes:
Understand the dimensions of sustainability; understand economics for sustainability; understand the tools and techniques to apply sustainability in each functional area of the business

ENVS 367 Mammalogy (3 Credit Hours)
Pre-requisites: ENVS 280 or BIOL 265
This course will focus on the ecology, evolution, behavior, and conservation of the class, Mammalia. Students will gain insight how this unique group evolved over time and became the dominate lineage over the Tertiary period. Furthermore, we will investigate how mammals hold special social and cultural relationship with humans, and why we have such complicated relationships with mammals, from revering them in religious contexts, to keeping them in our homes, to consuming them as nutrition.
Outcomes:
Working knowledge and mastery of the traits, evolutionary timescale, ecology, and conservation of mammals; Students will also gain experience collecting data (on museum samples as well as observations of living samples) to learn current techniques scientists and conservationists use to advance our understanding of this group

ENVS 369 Field Ornithology (3 Credit Hours)
Pre-requisites: (ENVS 280, ENVS 286, and ENVS 286S) or (BIOL 265 and BIOL 266); ENVS 215 recommended
Field ornithology is an intensive 3-week engaged-learning course at the Loyola University Retreat and Ecology Campus during the peak of the migratory season intended to provide an introduction to the theory and practice of field ornithology. Emphasis will be on field identification and song recognition, census techniques, and avian behavior.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will become skilled in critical reasoning, field techniques, and scientific investigation that demonstrate an understanding of knowledge and techniques used in field ornithology

ENVS 380 Introduction to Geographic Information Systems (3 Credit Hours)
Pre-requisites: Junior or Senior standing
Geographic Information Systems (GIS) is a mapping tool that allows users to create interactive searches, analyze spatial information, edit data and maps, and present the results visually. The course includes lecture, laboratory, and project components. Students will learn basic GIS skills and applications and work on projects with community organizations.
Interdisciplinary Option: Urban Studies
Course equivalencies: ENVS380/ENVS480
Outcomes:
Describe the conceptual/theoretical and practical/technological background of GIS; Describe ethical issues germane to GIS; Prepare/analyze GIS data in research; Apply GIS in community-service projects

ENVS 381 Advanced GIS Applications (3 Credit Hours)
Pre-requisites: ENVS 380 and Restricted to Junior and Senior standing
Students in this course will learn tools required to solve complex environmental problems and gain experience with spatial analysis, network analysis, 3-D analysis, GIS modeling, geostatistics, and other ArcGIS extensions. Students will also learn about internet-based mapping for dissemination of spatial data.
Outcomes:
Understand various spatial relationship concepts and their applications; identify and address common methodological challenges; understand how to use spatial data to make sound arguments in spatial problem solving and planning/policy

ENVS 382 Remote Sensing (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137 or BIOL 101; Restricted to Juniors and Seniors
Science of obtaining information about objects or areas using data from remote sensors on satellites or mounted on aircraft that can detect energy reflected from Earth. Topics include data collection; digital image processing, assessment, evaluation, and enhancement; display alternatives and visualization; electromagnetic radiation principles and radiometric correction; and geometric correction.
Outcomes:
Understand concepts, data, and methods of remotely sensed geographic data; Learn how to obtain and analyze remote sensing data, produce thematic maps, learn landscape patterns, and methods to decipher them

ENVS 383 Human Dimensions of Conservation (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137 or BIOL 101
This course will increase student knowledge of the social, political, economic, psychological, and cultural dimensions that influence the success of conservation projects and develop skills in conducting human dimensions-inquiry using surveys, interviews, observation, and/or participatory methods. It will contribute to preparation for employment in the conservation field and/or graduate study.
Outcomes:
Students will understand the importance of treating the human dimensions of conservation problems with the same scientific rigor customarily given to the ecological dimensions

ENVS 384 Conservation Economics (3 Credit Hours)
Pre-requisites: ECON 201
Explores resource conservation issues using economic principles. Topics include management of forests, wildlife and mineral resources; the demand for parks and outdoor recreation; the debate between environmental preservation and conservation; valuation of ecosystem services; the economics of biodiversity and endangered species; and policies to promote conservation in agriculture.
Outcomes:
Students will learn how natural resource use is affected by economic values, how to critically evaluate natural resource management problems, and evaluate models of dynamic resource extraction and user preferences

ENVS 385 Introduction to Global Health (3 Credit Hours)
Pre-requisites: ENVS 101, ENVS 137, or BIOL 101
This course introduces students to epidemiological and policy aspects of global health with a focus on health disparities at the international level.
Interdisciplinary Option: Bioethics
Course equivalencies: HSM 210 / PUBH 314 / ENVS 385
Outcomes:
Understand approaches to existing and emerging health problems and the relationships between health, poverty, and development

ENVS 386 Python Programming for GIS (3 Credit Hours)
Pre-requisites: Junior or Senior Standing
This course aims to provide students with a comprehensive understanding of Python programming for Geographic Information Systems. Through a combination of lectures, hands-on exercises, and projects, students will develop the skills necessary to leverage Python in GIS applications, automate geospatial workflows, and analyze spatial data. ENVS 380 pre- or co-requisite
Outcomes:
Understand Python programming language, loops and conditional statements; acquire a foundation knowledge of GIS; apply Python programming skills to perform spatial analysis; develop Python scripts to automate common GIS tasks

ENVS 387 Principles of Ecotoxicology (3 Credit Hours)
Pre-requisites: ENVS 280 or BIOL 265; and ENVS 274
This course will provide information on how pollutants affect ecosystems and how we might ameliorate their negative effects in our world. The emphasis of this course will be the fate and effects of pollutants in the ecosystem. The effects will be from molecular level to individual organism, community, and ecosystem levels.
Interdisciplinary Option: Bioethics
Outcomes:
This course will provide students with scientific knowledge in the cause and effects of pollutants in ecosystems and to prepare them for graduate study/future career

ENVS 389 Ecological Risk Assessment (3 Credit Hours)
Pre-requisites: ENVS 274 and ENVS 275
This course covers the area of potential effects of pollutants to ecosystems and practices on risk assessment for pollutants based on exposure and effect data in the literature. Different approaches for assessing the potential ecological impacts and risks of pollutants in support of environmental management will be discussed and practiced.
Outcomes:
Learn toxic effects of pollutants, acquire, organize, and synthesize monitoring and effect data using advanced analysis methods and skills in support of environmental impact and risk assessment via case studies

ENVS 390 Integrative Seminar (3 Credit Hours)
This course requires students to focus on a specific environmental issue or theme, integrating multidisciplinary perspectives, through individual or group presentations, discussion, and analysis of presentations by outside speakers.
Outcomes:
Students will demonstrate an understanding of the multi-faceted and interdisciplinary nature of environmental issues

ENVS 391 Environmental Research (1-3 Credit Hours)
Students may register for independent research on a topic mutually acceptable to the student and any professor in the department. Usually this research is directed to a particular course or to the research of the professor. Enrollment Conditions: Administrative Permission.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to design and carry out the research that is original and meaningful, including data collection, analysis, and interpretation

ENVS 391C Independent Environmental Research (Capstone) (3 Credit Hours)
Pre-requisites: Senior standing and Instructor Consent
Fulfills capstone requirement for SES majors. Through independent research experience, examine how scientific, sociological, economic and political knowledge and perspectives interact and define environmental problems and solutions/mitigation efforts. Research projects must use a multi-disciplinary perspective in analysis and interpretation.
This course satisfies the Engaged Learning requirement.
Outcomes:
Design and carry out research that is original and meaningful, including data collection, analysis, and interpretation

ENVS 391K Independent Environmental Research (Capstone - L) (3 Credit Hours)
Pre-requisites: Senior standing and Instructor consent
Fulfills capstone requirement for SES majors. Through independent research experience, examine how scientific, sociological, economic and political knowledge and perspectives interact and define environmental problems and solutions/mitigation efforts. Research projects must use a multi-disciplinary perspective in analysis and interpretation. This version is used when funds must be drawn from a 'lab fees' budget line to conduct the research.
This course satisfies the Engaged Learning requirement.
Outcomes:
Design and carry out research that is original and meaningful, including data collection, analysis, and interpretation

ENVS 391L Independent Environmental Research-Lab (1-3 Credit Hours)
Students may register for independent research on a topic mutually acceptable to the student and any professor in the department. Usually this research is directed to a particular course or to the research of the professor. This version is used when funds must be drawn from a 'lab fees' budget line to conduct the research. Requires Administrative Permission to enroll.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to design and carry out research that is original and meaningful, including data collection, analysis, and interpretation

ENVS 395 Environmental Internship (3 Credit Hours)
Students seek out and engage in a semester- or summer-long internship with a civic, business, governmental, or academic group providing hands-on experience in work on environmental issues.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will demonstrate, through daily activity logs and a comprehensive final report, a clear understanding of the environmental context and practical applications of their internship experience

ENVS 395C Environmental Internship (Capstone) (3 Credit Hours)
Pre-requisites: Senior standing and Department Consent
Fulfills capstone requirement for SES majors. Through internship experience, students reflect upon academic and extra-curricular activities in their degree program and learn how scientific, sociological, economic and political knowledge and perspectives interact and define environmental problems and solutions/mitigation efforts.
This course satisfies the Engaged Learning requirement.
Outcomes:
Guided reflection on relationship between coursework and internship experience, relate learning to specific activities and experiences in the internship, assess value of internship to future career plans

ENVS 398 Special Topics (3 Credit Hours)
Specific titles and contents vary from semester to semester.

ENVS 398B Environmental Science Topics for BIET Minor Capstone (3 Credit Hours)
Pre-requisites: Two Science courses and two Ethics courses
The interdisciplinary team-taught Bioethics capstone course examines a topic in bioethics from both scientific and ethical points of view. Topics may include biotechnologies, concepts of race and gender, the environment, reproduction, and others. This course number provides a cross-listed elective for Environmental Science students when the Bioethics capstone's topic is environmental.
Interdisciplinary Option: Bioethics
Outcomes:
Students will understand the connection between ethical and environmental science issues with regard to the special topic in environmental science

ENVS 398L Special Topics with Lab (1-4 Credit Hours)
Specific titles and contents vary from semester to semester. Includes lab component.

ENVS 399 Directed Readings (1-3 Credit Hours)
Pre-requisites: Instructor Consent
Directed by an ESP faculty member, students will read, analyze, and discuss a publications focusing on different aspects of a specific environmental issue or theme.
Outcomes:
Students will demonstrate comprehension of, and the ability to apply information from, scientific literature and be able to synthesize information to produce a cogent, synthetic analysis of their topic based on these readings

ENVS 401 Sustainable Systems - Natural Science Perspectives (3 Credit Hours)
This required core course provides an integrated overview of environmental science and sustainability which connect to sustainable development and ecological economics goals to define a just and safe space for the equitable distribution of life's essential re-sources that does not exceed the Earth's capacity to provide and replenish them. Restricted to GRAD students.
Outcomes:
Students will be able to make logical connections between environmental science and sustainability and evaluate data and primary literature in learning best practices for making evidence-based decisions

ENVS 402 Sustainable Systems - Social Science Perspectives (3 Credit Hours)
This required core course examines theoretical perspectives on and practical examples of sustainable development at both global and local/regional scales. Restricted to GRAD students.
Outcomes:
Students learn concepts of sustainable development and system ,resilience, including history, contested meanings, strengths, and limitations of each; How change towards sustainability occurs at multiple scales using social sciences research

ENVS 410 Introduction to Environmental Law & Policy (3 Credit Hours)
This introduction to environmental law surveys some critical federal environmental statutes, rules, and regulations in the United States; important case law decided under those statutes; interaction between federal, state, and local jurisdictions; and impacts on air, land, water, and natural resources. Restricted to GRAD students.
Outcomes:
Understand how the natural environment is controlled, managed and promoted through the legal system

ENVS 411 Natural Resources and Land Use Law & Policy (3 Credit Hours)
Focus on legal and policy processes used to govern pollution, water use, endangered species, toxic substances, and environmental impact and risk. Restricted to GRAD students.
Outcomes:
Students will understand how the natural environment is controlled, managed and promoted through the legal system and how land use laws and policy impact social and economic issues

ENVS 412 Water Law & Policy (3 Credit Hours)
This course looks at how the law allocates and protects one of our most crucial natural resources -- water. Understanding development and regulation of water ownership and use and how those decisions impact current environmental and socio-economic issues. Restricted to GRAD students.
Outcomes:
Understand how key laws and policies impact protection and use of water in the United States; understand key legal concepts that shape the management of our water resources

ENVS 413 Energy Law & Policy (3 Credit Hours)
This course looks at the laws that shape traditional energy production and the growing regulation of renewable and sustainable energy. Restricted to GRAD students.
Outcomes:
Understand how key laws and policies impact production and use of energy; and how energy is controlled by federal and local regulations and policies

ENVS 420 Conservation Biology (3 Credit Hours)
Students will learn to apply ecological and evolutionary biological principles to the preservation of wild plant/animal species, and to the preservation/management of ecosystems. Conservation approaches and challenges for all types of ecosystems, will be covered, with emphasis on contemporary threats to biodiversity, including habitat fragmentation, invasive species, and climate change. Restricted to GRAD students.
Outcomes:
Students will understand how the science of ecology can be used to address issues in species/ecosystem conservation, and recognize that consideration of human actions is essential to address conservation problems

ENVS 422 Invasive Species (3 Credit Hours)
Invasive species are one of the greatest global threats to biodiversity, ecosystem function, economies, and human health. Species become invasive when moved beyond native range, become established, and cause harm. This course covers how species are moved, how and when they become established, and potential harm they can cause. Restricted to GRAD students.
Outcomes:
Understanding that because invasive species are moved by humans, and because many of their impacts are felt by humans, they are an inherently multi-disciplinary problem

ENVS 423 Environmental Microbiology (3 Credit Hours)
This course introduces the significant role of microorganisms in numerous environmental and human-engineered processes. It covers microbiology and its basic methods to orient students to this field of science and the importance of microbial diversity relevant to agriculture, public health, and ecological restoration. Restricted to Graduate Students in the ENSS-MS program.
Course equivalencies: ENVS 323/ENVS 423
Outcomes:
Students will learn to isolate and characterize environmental microorganisms; Students will investigate the role of microorganisms in nutrient cycling, remediation of soils, and transmission of existing and emerging pathogens

ENVS 425 Sustainable Agriculture (3 Credit Hours)
This course provides an introduction to the environmental, social, and economic implications of sustainable agriculture. Students will learn the origins, major concepts, and current issues of sustainability in agriculture. Ecological concepts and principles applied to manage sustainable food production to support community health and economic justice will be explored. Restricted to GRAD students.
Outcomes:
Students will be able to explain the characteristics of the US agricultural system, the inter-relation among components of sustainable agriculture, and steps necessary to develop a sustainable agricultural system

ENVS 426 Agroecosystems (3 Credit Hours)
In this hands-on course, students will build knowledge and skills in agriculture and ecology through work in greenhouse, laboratory, classroom, and field settings. Students will build on foundations of Environmental Science and Biology by examining challenges of food production, management decisions, and environmental change facing agroecosystems both locally and abroad. Restricted to GRAD students.
Outcomes:
Students will develop understanding of agricultural systems as related to sustainable practices, develop skills in ecological analysis of these systems, and demonstrate proficiency in communicating scientific information to diverse audiences

ENVS 427 Food Systems Analysis (3 Credit Hours)
This course links conceptual and practical considerations of food-system assessment and develop a base of tools for practitioners. It examines major elements of the assessment process: systems thinking and conceptual frameworks; the food system from consumer and producer perspectives; identifying leverage points that might be influenced to affect positive change. Restricted to GRAD students.
Outcomes:
Students will understand inter-relationships among environment, food supply, markets, American diets, and health, learn to analyze assessment methods for food-system sectors, and examine conceptual frameworks for food-system analysis

ENVS 430 Restoration Ecology (3 Credit Hours)
This course provides a theoretical and practical basis for the increasing global efforts to reverse damage caused by humans to ecosystems and species, emphasizing the many perspectives (e.g., ecological, social, political, engineering) that must be considered to develop, implement, and assess restoration projects across a range of ecosystem types. Restricted to GRAD students.
Outcomes:
Students will apply knowledge from ecology and other disciplines to the practice of ecosystem restoration, and learn to integrate information from multiple disciplines, and stakeholder input, to design/manage restoration projects

ENVS 433 Introduction to the Circular Economy (3 Credit Hours)
This project-based course focuses on solving complex human sustainability challenges through the application of sustainable design methods at the product and process level. Students will learn and apply biomimicry, circular, and human-centered design methods to develop conceptual and prototype solutions. Restricted to graduate students.
Outcomes:
Understand role of design in creating a sustainable future; Understand and apply: (1) circular design methods; (2) biomimicry design methods; and (3) human-centered design (design thinking) methods

ENVS 435 Ecological Economics (3 Credit Hours)
Ecological Economics is a trans disciplinary course that takes a systems approach to the relationship between planetary stewardship, social justice, and the economy to design a prosperous and desirable future for humans on a finite planet. Ecological economics fuses economic theory and sustainability science to generate new solutions for today's challenges. Restricted to GRAD students.
Outcomes:
Understanding of ecological economics history, conceptual foundations, principles, tools, indicators, and applications; Topics include sustainable scale, just distribution, efficient allocation and relationships between economic

ENVS 436 Design for Circular & Sustainable Business (3 Credit Hours)
This project-based course focuses on solving complex human sustainability challenges through the application of sustainable design methods at the product and process level. Students will learn and apply biomimicry, circular, and human-centered design methods to develop conceptual and prototype solutions. ENVS 436 Restricted to graduate students.
Outcomes:
Understand the role of design in creating a sustainable future; Understand and apply: (1) circular design methods (2) biomimicry design methods; and (3) human-centered design (design thinking) methods

ENVS 438 Climate Change and Human Health (3 Credit Hours)
This course provides an introduction overview of the health consequences associated with climate change and the local, federal, and global response to mitigate these negative health outcomes. During the course students will be expected incorporate course content and develop a realistic response public health plan to climate change for a locality of their choosing. Restricted to GRAD students.
Outcomes:
1) Outline fundamental public health concerns associated with climate change; 2) Identify and critique future steps forward to reduce public health concerns of climate change

ENVS 451 Introduction to Sustainability Concepts & Impacts (3 Credit Hours)
Examines environmental, economic, social and political impacts of sustainable practices on general public and global and local organizations. Provides students with understanding of importance to corporations and other entities of measuring, monitoring, and reporting resource use to customers and stakeholders. Restricted to GRAD students.
Outcomes:
Explaining basic concepts of sustainability and how they relate to operations and goals of institutions and organizations; interaction of social, economic, and ecological systems to influence sustainability challenges and solutions

ENVS 452 Sustainability Assessment & Reporting I (3 Credit Hours)
Pre-requisites: ENVS 451; GRAD students
Fundamental concepts and methodology of measuring and reporting environmental sustainability impacts in the areas of energy, air, buildings and transportation.
Outcomes:
Ability to assess and report sustainability metrics related to energy, air, buildings, and transportation

ENVS 453 Sustainability Assessment & Reporting II (3 Credit Hours)
Pre-requisites: ENVS 451; GRAD students
Fundamental concepts and methodology of measuring and reporting environmental sustainability impacts in the areas of water, land, food and waste. Environmental and social impacts of water use and sources, land use practices, food sourcing and production, and waste production and recovery.
Outcomes:
Ability to assess and report sustainability metrics related to water, land, food, and waste

ENVS 454 Sustainability Plan Development & Reporting (3 Credit Hours)
Pre-requisites: ENVS 451, 452, and 453; GRAD students
Capstone course in the four course sequence on Sustainability Assessment & Planning. Using concepts and methodology to create a comprehensive sustainability plan including stakeholder engagement, life cycle analyses, set resource baselines, short- and long-term sustainability goals, budgets and draft sustainability plan for a representative entity.
Outcomes:
Learn best practices to inspire and engage partners and stakeholders to advance environmental sustainability in different types of organizations; Ability to create a comprehensive sustainability plan for organizations and institutions

ENVS 463 Sustainable Business Management (3 Credit Hours)
Co-requisites: ENVS 410
To introduce students to the emerging field of sustainability in business and the growing focus on the social, environmental, and economic performance of businesses. The course presents the scientific, moral, business, and economic cases for adopting sustainability. This course fulfills a MGMT elective.
Course equivalencies: MGMT/ENVS 363/ENVS 463
Outcomes:
Understand the dimensions of sustainability; understand economics for sustainability; understand the tools and techniques to apply sustainability in each functional area of the business

ENVS 467 Mammalogy (3 Credit Hours)
Pre-requisites: Graduate students only
This course will focus on the ecology, evolution, behavior, and conservation of the class, Mammalia. Students will gain insight how this unique group evolved over time and became the dominate lineage over the Tertiary period. Furthermore, we will investigate how mammals hold special social and cultural relationship with humans, and why we have such complicated relationships with mammals, from revering them in religious contexts, to keeping them in our homes, to consuming them as nutrition.
Outcomes:
Working knowledge and mastery of the traits, evolutionary timescale, ecology, and conservation of mammals; Students will also gain experience collecting data (on museum samples as well as observations of living samples) to learn current techniques scientists and conservationists use to advance our understanding of this group

ENVS 469 Field Ornithology (3 Credit Hours)
Field ornithology is an intensive 3-week engaged-learning course at the Loyola University Retreat and Ecology Campus during the peak of the migratory season intended to provide an introduction to the theory and practice of field ornithology. Emphasis will be on field identification and song recognition, census techniques, and avian behavior. Restricted to GRAD students.
Outcomes:
Students will become skilled in critical reasoning, field techniques, and scientific investigation that demonstrate an understanding of knowledge and techniques used in field ornithology

ENVS 480 Introduction to Geographic Information Systems (3 Credit Hours)
Geographic Information Systems (GIS) is a mapping tool that allows users to create interactive searches, analyze spatial information, edit data and maps, and present the results visually. The course includes lecture, laboratory, and project components. Students will learn basic GIS skills and applications and work on projects with community organizations. Restricted to GRAD students.
Course equivalencies: ENVS380/ENVS480
Outcomes:
Describe the conceptual/theoretical and practical/technological background of GIS; describe ethical issues germane to GIS; prepare/analyze GIS data in research; apply GIS in community-service projects

ENVS 481 Advanced GIS Applications (3 Credit Hours)
Pre-requisites: ENVS 480
Students in this course will learn tools required to solve complex environmental problems and gain experience with spatial analysis, network analysis, 3-D analysis, GIS modeling, geostatistics, and other ArcGIS extensions. Students will also learn about internet-based mapping for dissemination of spatial data.
Outcomes:
Understand various spatial relationship concepts and their applications; identify and address common methodological challenges; understand how to use spatial data to make sound arguments in spatial problem solving and planning/policy

ENVS 482 Remote Sensing (3 Credit Hours)
Science of obtaining information about objects or areas using data from remote sensors on satellites or mounted on aircraft that can detect energy reflected from Earth. Topics include data collection; digital image processing, assessment, evaluation, and enhancement; display alternatives and visualization; electromagnetic radiation principles and radiometric correction; and geometric correction. Restricted to GRAD students.
Outcomes:
Understand concepts, data, and methods of remotely sensed geographic data; Learn how to obtain and analyze remote sensing data, produce thematic maps, learn landscape patterns, and methods to decipher them

ENVS 483 Human Dimensions of Conservation (3 Credit Hours)
This course will increase student knowledge of the social, political, economic, psychological, and cultural dimensions that influence the success of conservation projects and develop skills in conducting human dimensions-inquiry using surveys, interviews, observation, and/or participatory methods. It will contribute to preparation for employment in the conservation field and/or graduate study. Restricted to GRAD students.
Outcomes:
Students will understand the importance of treating the human dimensions of conservation problems with the same scientific rigor customarily given to the ecological dimensions

ENVS 484 Conservation Economics (3 Credit Hours)
Explores resource conservation issues using economic principles. Topics include management of forests, wildlife and mineral resources; the demand for parks and outdoor recreation; the debate between environmental preservation and conservation; valuation of ecosystem services; the economics of biodiversity and endangered species; and policies to promote conservation in agriculture. Restricted to Grad students.
Outcomes:
Students will learn how natural resource use is affected by economic values, how to critically evaluate natural resource management problems, and evaluate models of dynamic resource extraction and user preferences

ENVS 486 Python Programming for GIS (3 Credit Hours)
Pre-requisites: Graduate Student Standing
This course aims to provide students with a comprehensive understanding of Python programming for Geographic Information Systems. Through a combination of lectures, hands-on exercises, and projects, students will develop the skills necessary to leverage Python in GIS applications, automate geospatial workflows, and analyze spatial data. ENVS 480 pre- or co-requisite
Outcomes:
Understand Python programming language, loops and conditional statements; acquire a foundation knowledge of GIS; apply Python programming skills to perform spatial analysis; develop Python scripts to automate common GIS tasks

ENVS 487 Principles of Ecotoxicology (3 Credit Hours)
This course will provide information on how pollutants affect ecosystems and how we might ameliorate their negative effects in our world. The emphasis of this course will be the fate and effects of pollutants in the ecosystem. The effects will be from molecular level to individual organism, community, and ecosystem levels. Restricted to GRAD students.
Outcomes:
This course will provide students with scientific knowledge in the cause and effects of pollutants in ecosystems

ENVS 489 Ecological Risk Assessment (3 Credit Hours)
This course covers the area of potential effects of pollutants to ecosystems and practices on risk assessment for pollutants based on exposure and effect data in the literature. Different approaches for assessing the potential ecological impacts and risks of pollutants in support of environmental management will be discussed and practiced. Restricted to Graduate students.
Outcomes:
Learn toxic effects of pollutants, acquire, organize, and synthesize monitoring and effect data using advanced analysis methods and skills in support of environmental impact and risk assessment via case studies

ENVS 490B Integral Ecology First Studies Program: Biodiversity (1 Credit Hour)
This course explores the environmental crisis of the loss of biodiversity. It covers the evolutionary origin of biodiversity, the importance and glory of biodiversity, and how ecosystem structure and function collapses when we reach the tipping point of species extinction. The course is intended for Jesuit men in formation in the First Studies Program, and is limited to them. No prerequisites are required.
Outcomes:
First Studies men will grasp the scientific concepts of biodiversity, explore the ethical and spiritual dimensions of biodiversity loss, and take actions to lessen the loss of biodiversity

ENVS 490C Integral Ecology First Studies Program: Climate Change (1 Credit Hour)
This course covers the science of climate change including the physical and chemical underpinnings of fossil fuels and greenhouse gases and their impact on trapping solar infrared radiation within the Earth's atmosphere and causing subsequent warming of the land and oceans. Warming of the planet increases the frequency and intensity of storms like hurricanes, cyclones, typhoons, it melts glaciers and causes sea levels to rise. Climate change is modifying the planetary distribution of precipitation which can produce water scarcity in some parts of the world, and leads to flooding and poor water quality in other locations. This course will study the scientific drivers of climate change, and the social and ethical ramifications of how the marginalized are disproportionately impacted. It will touch on environmental justice, water, land and food insecurity, and solutions to the climate crisis in first world countries as well as in developing countries. The course is intended for Jesuit men in formation in the First Studies Program, and is limited to them. No prerequisites are required.
Outcomes:
Understand the chemical composition of the three main classes of fossil fuels and connect the chemistry to greenhouse gases and the greenhouse effect; Explore the many ways in which climate change is impacting the planets' hydrologic cycle, the melting of polar ice caps and glaciers, rising sea levels, increased frequency and intensity of droughts, floods, wildfires and storm events worldwide; Understand the benefits and challenges of clean energy technologies, and where solar, geothermal, wind, biofuels and hydro are good solutions, and the geopolitical environment around clean energy technologies; Analyze key ethical challenges arising from climate change that human beings are confronting with in the world today and understand the moral principles, goals, and virtues important for guiding decisions about making a just transition to a clean energy economy; Discover ways in which spirituality has influenced the human understanding and use of fossil fuels, and recognize the importance of spirituality for responding constructively to today's climate crisis

ENVS 490W Integral Ecology First Studies Program: Water (1 Credit Hour)
This course covers the science of water - physical and chemical properties of water, how the hydrologic cycle distributes water across the planet, how climate change is modifying the distribution of water which can produce water scarcity in some parts of the world, and leads to flooding and poor water quality in other locations, and how the marginalized are disproportionately water insecure. It will touch on environmental justice and water insecurity, and some technologies for cleaning waste water and finishing drinking water in first world countries as well as in developing countries. The course is intended for Jesuit men in formation in the First Studies Program, and is limited to them. No prerequisites are required.
Outcomes:
First Studies men will explore the structure of the water molecule, the water cycle, and the changing water content in the atmosphere; Understand the sources of water, the distribution of water on Earth, and the effect of human activities on distribution cycles; Explore wastewater treatment plants and/or drinking water finishing plants in the city of Chicago to learn how water can be cleaned and reused for human consumption; Analyze key ethical challenges about water that human beings are confronting in the world today and understand the moral principles, goals, and virtues important for guiding water decisions; Discover ways in which spirituality has influenced the human understanding and use of water, and recognize the importance of spirituality for responding constructively to today's water crisis

ENVS 491 Independent Environmental Research (1-4 Credit Hours)
Students may register for independent research on a topic mutually acceptable to the student and any professor in the department. Usually this research is directed to a particular course or to the research of the professor. Post-baccalaureate students only.
Outcomes:
Dependent on the specific research project and goals

ENVS 495 Environmental Internship (3 Credit Hours)
Students seek out and engage in a semester -or summer-long internship with a civic, business, governmental, or academic group providing hands on experience in work on environmental issues. Post-baccalaureate students only.
Outcomes:
Students demonstrate, through daily activity logs and comprehensive final report, a clear understanding of the environmental context and practical applications of their internship experience

ENVS 496 Research (3-12 Credit Hours)
Restricted to GRAD students.

ENVS 498 Special Topics (1-12 Credit Hours)
Pre-requisites: Post-baccalaureate students only
Specific titles and contents vary from semester to semester. Variable credit hours.
Outcomes:
Dependent on the specific course content and goals

ENVS 498L Special Topics with Lab (1-4 Credit Hours)
Specific titles and contents vary from semester to semester. Includes a lab component. Variable credit hours. Post-baccalaureate students only.
Outcomes:
Dependent on the specific course content and goals

ENVS 499 Directed Readings (1-3 Credit Hours)
Directed by an SES faculty member, students will read, analyze, and discuss a publications focusing on different aspects of a specific environmental issue or theme. Post-baccalaureate students only.
Outcomes:
Students demonstrate comprehension, ability to apply information from scientific literature and synthesize information to produce cogent, synthetic analysis of their topic based on these readings

ENVS 595 Thesis Supervision (1 Credit Hour)
Pre-requisites: Restricted to SES, GRAD students
Students will make supervised progress towards completion of their theses.
Outcomes:
Conduct individual research projects

ENVS 605 Master's Study (1 Credit Hour)
Pre-requisites: Restricted to GRAD students
No course description is available

Erikson Institute (ERIK)

Discover, search, courses (p. 2661)!

ERIK E421 Social and Emotional Development I (3 Credit Hours)
This course focuses on the study of social and emotional development in children from birth through age eight. It primarily considers how children experience themselves and others; the role of relationships in development; and the interaction of biological, psychological and social forces. Restricted to Erikson Institute Graduate Students.
Course equivalencies: ERIKE121 / ERIKE21 /ERIKE421

ERIK E426 Cognitive Development (3 Credit Hours)
This course provides students with a basic knowledge of cognitive development in children from birth through age eight and fosters awareness of the application of this knowledge to children with diverse abilities and varying cultural and linguistic backgrounds. Restricted to Erikson Institute Graduate Students.
Course equivalencies: ERIKE126 / ERIKE26 / ERIKE426

ERIK E477 Seminar Children-At-Risk (3 Credit Hours)
This course examines the concept of risk and how it impacts child development. We will use multiple frameworks to examine risk, including public health, developmental psychopathology, and education. Attention will be focused on biological/genetic (such as prematurity and temperament), family (such as parent mental health and child maltreatment), and environmental (such as poverty and neighborhood violence) factors. The consequences of growing up in the context of chronic adversity will be explored, as well as the factors that lead some children to cope with and show resilience in these circumstances. The challenges of understanding risk in current research, as well as the implications of this research for programs and policy will also be discussed.
Course equivalencies: ERIKE477 / ERIKE77

ERIK E479 Teaching & Learning: Linking Theory & Research to Practice (3 Credit Hours)
An understanding of the two domains of learning and teaching is fundamental to the field of child development and education. This course examines these issues through investigating and analyzing exemplary models of recent and influential theory and research. A dialogue-based approach to learning will be used throughout the course to encourage personal involvement in exploring and explaining the science of learning and teaching. Students will also engage in fieldwork, such as on-site observations, conversations with practitioners, and a research project, to gain first-hand experience of these issues.
Course equivalencies: ERIKE479 / ERIKE79

ERIK E481 Seminar Social & Cultural Contexts (3 Credit Hours)
Through an examination of current theory and multidisciplinary social science research, this course explores the influence of contextual factors on the development of children. Socially and culturally constructed factors (such as gender, race, ethnicity and social class) and institutions (such as family, schools, and organized child care) will be discussed in terms of their influence on child rearing and child development. Through course lectures, discussion, and assignments, students will gain an understanding of the variability of child rearing strategies and outcomes across cultural communities; the role of historical and ecological factors in child rearing and family functioning; identity development in complex societies; and sources of possible tensions between different cultural communities and societal institutions (such as schools, social service providers, and child care programs).
Course equivalencies: ERIKE481 / ERIKE81

ERIK E482 Program Evaluation and Implementation Science (3 Credit Hours)
This course provides an advanced introduction to evaluating social services and education programs, including the study of factors leading to better program outcomes (i.e., implementation science). Restricted to Erikson graduate students.
Course equivalencies: ERIKE482 / ERIKE82

ERIK E485 Research Internship (3 Credit Hours)
The student will work either with an Erikson faculty member, research scientist, or research associate, or on a research project at another institution.
Course equivalencies: ERIKE485 / ERIKE85

ERIK E486 Teaching Internship (3 Credit Hours)
The student will teach or assist in teaching a college course in child development or a related topic.
Course equivalencies: ERIKE486 / ERIKE86

ERIK E489 Special Topics in Child Development (3 Credit Hours)
Enrollment for this course should be considered in close consultation with the faculty advisor. This course allows doctoral students to select from a range of applied child development courses at Erikson Institute that are taught by a member of the doctoral program faculty. Examples include Physical Growth and Development; Language Development; and Working with Adults. Students will gain deep understanding of the theories, research, and issues with regard to a special content area in child development and early education.

ERIK E497 Doctoral Study (1 Credit Hour)
Course for continuing doctoral students engaged in study for comprehensive or qualifying examinations.
Course equivalencies: ERIKE497 / ERIKE97

ERIK E499 Dissertation Supervision (1 Credit Hour)
Course for continuing students engaged in dissertation research under advisor's supervision.
Course equivalencies: ERIKE499 / ERIKE99

ERIK E501 First Year Doctoral Seminar (0 Credit Hours)
This course is designed to help graduate students be exposed to various issues in graduate study in the field Child Development and provide them with support and guidance for their success in graduate school.
Outcomes:
1) Be introduced to a life as a graduate student; learn major milestones of the graduate program; 2) Maintain social-emotional well-being and sanity; seek related resources when needed; 3) Learn how to read and find research articles and be prepared to develop a program of research; 4) Implement a writing plan and establish a writing routine; and 5) Explore various career paths both in academia and non-academia

ERIK E502 First Year Doctoral Seminar (1 Credit Hour)
Pre-requisites: Graduate students only
This course is designed to help graduate students be exposed to various issues in graduate study in the field Child Development and provide them with support and guidance for their success in graduate school.
Outcomes:
1) Be introduced to a life as a graduate student; learn major milestones of the graduate program; 2) Maintain social-emotional well-being and sanity; seek related resources when needed; 3) Learn how to read and find research articles and be prepared to develop a program of research; 4) Implement a writing plan and establish a writing routine; 5) Explore various career paths both in academia and non-academia

ERIK E503 Scholarship Skills I (1 Credit Hour)
This course is designed to help graduate students develop their skills in finding, collating, and summarizing scholarly literature in relation to a topic of interest/future research. AI tools will also be explored and interrogated. 2) Learn the most recent tools available for creating literature searches around a topic of research. 3) Create annotated bibliography around a topic of interest/future research. 4) Learn the utility, and its limits, of recent AI tools related to searching and collating literature, and designing research questions.
Outcomes:
1) Increase comfort and facility with literature searches

ERIK E504 Scholarship Skills 2 (1 Credit Hour)
Pre-requisites: Graduate Students only
This course is designed to help graduate students develop their skills in synthesizing and critiquing others' research, thereby providing support to their comprehensive exam milestone as well as helping prepare them for the literature review sections of their thesis or dissertation. 2) Learn the most recent tools available for creating literature searches around a topic of research. 3) Create annotated bibliography around a topic of interest/future research. 4) Learn the utility, and its limits, of recent AI tools related to searching and collating literature, and designing research questions.
Outcomes:
1) Increase comfort and facility with literature searches

ERIK E505 Scholarship Skills 3 (1 Credit Hour)
Pre-requisites: Grad Students only
This course is designed to help graduate students develop their skills in writing, publishing, and disseminating their own research. This will include conference submissions and presentations, grant proposals, manuscripts and articles for peer review. 2) Learn the most recent tools available for creating literature searches around a topic of research. 3) Create annotated bibliography around a topic of interest/future research. 4) Learn the utility, and its limits, of recent AI tools related to searching and collating literature, and designing research questions.
Outcomes:
1) Increase comfort and facility with literature searches

European Studies (EURO)

Discover, search, courses (p. 2661)!

EURO 101 Introduction to European Studies (3 Credit Hours)
This course serves as an introduction to the interdisciplinary field of European studies. It provides an overview of the major disciplines represented in the program, introduces the main approaches covered in the program, and discusses some of the most important topics involving European states, regions, and the European Union. Restricted to European Studies minors.
Interdisciplinary Option: European Studies
Outcomes:
Students will gain a basic understanding of how different disciplines contribute to the study of Europe at the state, sub-state and supra-state levels

EURO 301 European Studies Capstone (3 Credit Hours)
This capstone class is intended to provide seniors a chance to reflect on what they have learned as European Studies minors by focusing on a particular theme. The class takes an interdisciplinary and cross-national approach. Students develop a major research project. Restricted to Juniors and Seniors minoring in European Studies.
Interdisciplinary Option: European Studies
Outcomes:
Through this course students will gain an understanding of the ways in which various fields and their approaches to European Studies can help answer specific important questions about the region

Executive Education (EXED)

Discover, search, courses (p. 2661)!

EXED 101 High-Impact Leadership: Maximizing Your Leadership Potential (0 Credit Hours)
High-Impact Leadership: Maximizing Your Leadership Potential combines the best practices and principles behind the art and science of leadership, decision-making, problem solving and organizational effectiveness.
Outcomes:
Gain an understanding of your leadership style, explore the discipline of leadership, learn the best practices for improving individual and organizational decision making, gain the strategies to build successful teams, manage conflict more effectively and link individual performance to organizational strategy

EXED 102 Project Management Certificate Program (0 Credit Hours)
This program will improve participants' performance by providing industry-standard tools approved by the Project Management Institute (PMI®) to help successfully manage any type of project regardless of scope or industry.
Outcomes:
Gain a comprehensive, formal training in project management, based on the industry-standard body of knowledge; Learn the fundamental tools to effectively manage any project; Learn how to manage projects from initiation, to planning, control and closeout; Learn how to communicate more effectively to project sponsors and team members

EXED 103 mini-MBA Certificate Program (0 Credit Hours)
The Loyola mini-MBA is a comprehensive management development program that provides cutting-edge business skills, coaching and leadership training to help propel your organization and your career forward.
Outcomes:
Strengthen overall business acumen and gain a better understanding of the key functional areas of business, including the frameworks, models and levers that drive organizational success; Develop the skills needed to think strategically and cross-functionally

EXED 104 Digital Marketing Strategy Certificate Program (0 Credit Hours)
This program provides a thorough foundation in the rapidly changing world of digital marketing and prepare you to strategically choose, measure, and implement the right digital marketing components into your overall marketing plan.
Outcomes:
This program provides a thorough foundation in the rapidly changing world of digital marketing and prepare you to strategically choose, measure, and implement the right digital marketing components into your overall marketing plan

EXED 105 Baumhart Center Learning Institutes (0 Credit Hours)
Professional Development skills in Social Enterprise Responsibility

EXED 107 Practical Finance and Accounting (0 Credit Hours)
Participants will learn a comprehensive approach to financial analysis. This program provides a grounding in basic managerial finance, including terminology like valuation, capital investment, financing, and capital structure.
Outcomes:
Develop comfort with the terminology and techniques used in managerial accounting and financial analysis; Learn to confidently read and analyze corporate financial statements; Understand the role of capital budgeting

EXED 108 Strategic Business Communications (0 Credit Hours)
This program teaches techniques to communicate fluently in a variety of situations. Participants learn simple and effective methods to become a more powerful communicator with peers, subordinates, and supervisors.
Outcomes:
Learn to present ideas at face-to-face and virtual meetings; Gain tools to confidently express yourself; Learn to gain support for ideas and suggestions; Understand how to use technology to support communication; Reduce conflict

EXED 109 Supply Chain Management Essentials (0 Credit Hours)
Participants learn the fundamentals of effective supply chain management across the end-to-end supply chain. The certificate program addresses a wide spectrum of supply chain techniques designed to reduce cost, improve profitability, and maximize the customer experience while balancing social, environmental, and economic concerns.
Outcomes:
Learn techniques to create a more efficient and effective supply chain and understanding of key trends, opportunities, and challenges in supply chain management

EXED 110 Lean Certification (0 Credit Hours)
Loyola will offer a new, online platform Lean Certification.
Outcomes:
To have more knowledge on Lean practices in Supply Chain and Logistics areas

EXED 111 Six Sigma Certification (0 Credit Hours)
Loyola will offer a new, online platform for Six Sigma Certifications.
Outcomes:
To have more knowledge on Six sigma for managers

EXED 151 Sysmex America mini-MBA (0 Credit Hours)
Customized mini-MBA that includes Accounting/Finance, Strategy, Marketing, Project Management and Management.
Outcomes:
The mini-MBA is intended for employees across various Sysmex functional areas, from both the home office as well as field operations; The content will be delivered electronically for two cohort groups

EXED 152 Sysmex America Birth of a Customer (0 Credit Hours)
Sysmex Birth of a Customer provides participants with an in-depth look at the internal strategy at Sysmex.
Outcomes:
Panels of senior executives assisted by a faculty moderator talk about how the various elements of organizational strategy combine to meet client needs; Participants complete a related case study

EXED 153 Presence Healthcare Ministry Leadership Program (0 Credit Hours)
Providing training in the basics of Catholic mission, identity, ethics, and leadership, the Certificate in Heath Care Ministry Leadership will prepare Presence Health staff to carry out its mission of providing compassionate, holistic care in the spirit of healing and hope to the communities it serves.
Outcomes:
This program is designed to build a community of leaders with shared formation experience, explore authentic paths to spirituality, develop an understanding of how vacation and call relates to Catholic healthcare, and strengthen overall leadership acumen and strategic thinking abilities

EXED 165 Barilla Leadership & Management Development Program (0 Credit Hours)
This custom program is designed to support the development of a leadership pipeline at Barilla. The program consists of 3 learning modules and integrated capstone projects and covers leadership and business acumen topics.
Outcomes:
Strengthen overall business acumen and gain a better understanding of the key functional areas of business, including the frameworks, models and levers that drive organizational success; Develop strategy skills

EXED 170 McShane Companies Leadership Emphasis (0 Credit Hours)
Formal leadership training provided as a component of the McShane Future Leaders Program.
Outcomes:
Improved leadership and strategy acumen

EXED 173 American College of Surgeons - Leadership (0 Credit Hours)
Customized leadership training for the executive leadership team at American College of Surgeons, includes Leadership Legacy and Decision-Making.
Outcomes:
Provide senior leaders with ongoing leadership skill development

EXED 174 The Cradle (0 Credit Hours)
Participants will learn Leadership Development and Change Management Essentials.
Outcomes:
To have more leadership team at The Cradle

EXED 175 Yaskawa America Inc. (0 Credit Hours)
Participants will learn Negotiation Skills for their Supply Chain team.
Outcomes:
To have more knowledge on negotiations skills for their sales team

EXED 176 MorrisAnderson (0 Credit Hours)
Participants will learn Leadership skills in a 3 hour workshop.
Outcomes:
To assist their team with new managers getting up to speed on their leadership soft skill

EXED 177 Family Business Center Learning Institutes (0 Credit Hours)
Three institutes from FBC are moving their education to EE. This includes Family Business Stewardship Institute, Next Generation Leadership Institute and Governance Institute.
Outcomes:
To assist family business staff with challenges they face within their family organization

EXED 178 Cook County State's Attorney's Office Leadership (0 Credit Hours)
Participants will learn leadership skills during their 3-hour seminar.
Outcomes:
to have more knowledge on managing their teams with the CCSAO

EXED 179 C.H. Robinson Professional Development Programs (0 Credit Hours)
Participants will learn negotiations and sales training.
Outcomes:
To have more knowledge for their team on sale tactics

EXED 180 World's Finest Chocolate Anti Harasssment Training (0 Credit Hours)
The entire staff of WFC will participate in a Loyola created and moderated Anti-Harassment Training.
Outcomes:
To have more knowledge to speak up against harassment in the workplace

EXED 181 Campus Brasil MBA International Program (0 Credit Hours)
Campus Brasil is partnering with a University in Brazil to send 40 MBA students to Loyola this summer.
Outcomes:
To have more knowledge on business global affairs in America vs Brazil

EXED 182 Centene Corporation (0 Credit Hours)
Participants will learn Strategy skills for the management team.
Outcomes:
To have more knowledge on negotiations skills for their sales team

EXED 183 Litera Microsystems (0 Credit Hours)
Participants will learn leadership development skills during an off-site three-day program for their team.
Outcomes:
To have more knowledge of leadership skills for their sales team

EXED 184 Medline Industries (0 Credit Hours)
Participants will learn negotiation skills during an off-site two-day program for their engineering team.
Outcomes:
To have more knowledge of negotiation skills for their team

EXED 185 Anthony Marano Company (0 Credit Hours)
Participants will learn leadership development skills during a two month program for their Executive Team and Sales Team.
Outcomes:
To have more knowledge of leadership and negotiation skills for their team

EXED 186 Box Studio (0 Credit Hours)
Participants will learn project management skills during a two day program for executive team of their small business.
Outcomes:
To have a company wide understanding for a project management model

EXED 187 Triple S (0 Credit Hours)
Participants will learn business soft skills for their family owned businesses who are identified as "emerging leaders" via an association called Triple S.
Outcomes:
To have a good business background when finishing the program

EXED 188 Real Estate Investment Strategy (0 Credit Hours)
Participants will learn from industry experts on how to invest smartly in real estate.
Outcomes:
To have more knowledge of the real estate industry and the Chicago market

EXED 189 Edelman Procurement 101 Program (0 Credit Hours)
Participants will learn best practices in procurement.
Outcomes:
To have more knowledge of the real estate industry and the Chicago market

EXED 190 FBC Peer Advisory Group (0 Credit Hours)
FBC Peer Advisory Group for Family Business Center Members.
Outcomes:
Resolution of family business issues thru discussion

EXED 191 Fundraising for Good (0 Credit Hours)
Baumhart Center Fundraising Sessions.
Outcomes:
Social Impact Fundraising Seminar

EXED 192 Ciena 1 - Day Negotiations Conference Program (0 Credit Hours)
Participants will learn negotiations strategies and skills.
Outcomes:
To have more knowledge on negotiation skills for their sales team

EXED 193 Cook County Sheriff's Office - Executive Leadership Management Program (0 Credit Hours)
Participants will learn management / leadership strategies and skills.
Outcomes:
To have more knowledge on negotiation skills for their sales team

EXED 194 Next Generation Leadership Institute (0 Credit Hours)
Next generation leadership class for family businesses.

EXED 195 Chicago Community Trust (0 Credit Hours)
Participants will learn leadership development skills during a two day program for their Executive team.
Outcomes:
To have more knowledge of leadership skills for their team

EXED 196 Lumberman Leadership Summit 2019 (0 Credit Hours)
Participants will learn leadership development skills during a two day program for their Executive team.
Outcomes:
To have more knowledge of leadership skills for their team

EXED 197 Open Enrollment: SHRM Certification Prep Class (0 Credit Hours)
Participants will learn HR principals for prep for the SHRM Certification Classes.
Outcomes:
To have more knowledge of human resource practices

EXED 198 Custom Program: The Northern Trust Company (0 Credit Hours)
Participants will learn how to be professional advisors for their clients.
Outcomes:
To have more knowledge of business skills in cultivation

EXED 199 Custom Program: Peco Foods Supply Chain and Coms. (0 Credit Hours)
Participants will learn more supply chain skills and how to communicate these skills to their groups.
Outcomes:
To have more knowledge of business skills in cultivation

EXED 200 Custom Program: Bish Creative Display Leadership (0 Credit Hours)
Participants will learn more skills in executive presence via leadership training courses.
Outcomes:
To have more knowledge of business skills leadership, management and communication

EXED 201 FBC Goverence Institute (0 Credit Hours)
Participants will learn Gov. Institute Skills for the alumni of FBC.
Outcomes:
To have more knowledge of business skills leadership, management and communication

EXED 202 Custom Program - Invenergy (0 Credit Hours)
Participants will learn leadership, management, presentation and communication skills.
Outcomes:
To have more knowledge of business skills leadership, management and communication

EXED 203 Custom Program - BluJay (0 Credit Hours)
Participants will learn negotiation skills.
Outcomes:
To have more knowledge communication skills via negotiations

EXED 204 Executive Education Master Classes - Open Enrollment Classes (0 Credit Hours)
These 2-3 classes are designed to pipeline to additional paid programming at LUC.

EXED 205 Diversity, Equity and Inclusion (0 Credit Hours)
Classes for Baumhart Center.
Outcomes:
Business Acumen skill sets

EXED 206 Executive Education - Custom Program - Palo Alto Networks (0 Credit Hours)
These 10 classes are designed to pipeline to additional paid programming at LUC.
Outcomes:
Business Acumen skill sets

EXED 207 Executive Education Custom Program - PNC Bank (0 Credit Hours)
5 - 1.5 hour lecturette series for professional development for the PNC Bank team.
Outcomes:
Business Acumen skill sets

EXED 208 Executive Education Custom Program - Allstate (0 Credit Hours)
3 month long professional development skills for the Allstate procurement officer.
Outcomes:
Business Acumen skill sets

EXED 209 Executive Education Custom Program-Mother McAuley Liberal Arts High School (0 Credit Hours)
3 month long professional development skills for the Mother McAuley leadership team on strategic planning.
Outcomes:
Business Acumen skill sets

EXED 210 Executive Ed Custom Prog-ILSBDC partnership with Loyola Limited & InQbate (0 Credit Hours)
3 month long professional development skills small business owners, in partnership with ILSBDC and Loyola Limited/InQbate
Outcomes:
Professional Marketing Skills Sets

EXED 211 Executive Education Custom Program-Transunion Women in Ldrshp (0 Credit Hours)
A 15-18 month long professional development program with customized case studies related to TU projects and business.
Outcomes:
Business Accument and Leadership Development skills

EXED 212 Executive Education Custom Program - Topco Associates (0 Credit Hours)
A 12 month, professional development program with customized classes focused on Leadership.
Outcomes:
Business Accument and Leadership Development skills

EXED 213 Executive Education Custom Program - National Concierge Association (0 Credit Hours)
A 1 day project management webinar. 90 minutes.
Outcomes:
Project Management Essentials

EXED 214 Executive Education Custom Prog-Alliance for Strong Families & Connections (0 Credit Hours)
A 10 day program, broken up over two weeks, non-profit managers learning about putting good business skills, merging profit and purpose.
Outcomes:
Non-profit management skills

EXED 215 Executive Education Custom Program-Cristo Rey Network DEI Strategy Program (0 Credit Hours)
Six sessions program for non-profit managers learning about DEI Strategy.
Outcomes:
Non-profit management skills

EXED 216 Executive Education Custom Program-Dog Tag Fellows Business Acumen Program (0 Credit Hours)
Six-month program for Dog Tag Fellows (veterans) for small business skill sets.
Outcomes:
Non-profit management skills

EXED 217 Executive Executive Custom Program - City of Chicago Leadership program (0 Credit Hours)
Three session program for the City of Chicago's IG office. on leadership and management skills sets.
Outcomes:
Non-profit management skills

Exercise Physiology (EXCM)

Discover, search, courses (p. 2661)!

EXCM 101 Introduction to Exercise Physiology (3 Credit Hours)
Introduction to the major; also includes a lab component covering Emergency Procedures and Safety Skills, introduction to common safety principles, predisposing factors and common causes of accidents, injuries and illnesses.
This course satisfies the Engaged Learning requirement.

EXCM 110 Soccer Skill and Strategy Activity Lab (1 Credit Hour)
Soccer, the most popular sport played worldwide, is a team game that requires skill, communication, and strategy to maximize success. This course is designed to provide students with a comprehensive understanding of the fundamental skills, techniques, and strategic aspects of soccer. Through practical training sessions and tactical discussions, students will develop individual and team-based competencies necessary for success on the soccer field. This course is suitable for students of all skill levels, from beginners with minimal soccer experience to those with prior playing backgrounds. 2) Understand physical fitness components of playing soccer. 3) Perform drills to train a soccer player.
Outcomes:
1) Describe the technical and tactical skills needed to play a soccer match

EXCM 111 Weight Training and Conditioning Activity Lab (1 Credit Hour)
This course combines practical training sessions with theoretical knowledge to help students understand the principles of developing strength, endurance, and overall physical fitness through weightlifting and conditioning exercises. Throughout the semester, students will engage in resistance training exercises using free weights and bodyweight exercises. Emphasis will be placed on proper form, technique, and safety to ensure a foundation for long-term success in weight training. Additionally, students will learn how to set realistic fitness goals, and track their progress over time. 2) Understand implementation of weightlifting and aerobic conditioning exercise to improve health outcomes. 3) Perform training exercises with proper technique.
Outcomes:
1) Describe proper technique for weight training and conditioning exercises

EXCM 112 Yoga and Mindfulness Activity Lab (1 Credit Hour)
This course offers students an opportunity to explore the transformative practices of yoga and mindfulness, fostering physical well-being, mental clarity, and emotional balance. The course integrates yoga-based practices with contemporary mindfulness techniques, providing a holistic approach to enhancing overall health and wellness. The classes will focus on developing flexibility, strength, and balance through yoga postures (asanas), breath control (pranayama), and meditation.
Outcomes:
1) Describe yoga philosophy and its relevance in modern day living; 2) Understand yoga-based postures to counteract movement deficiencies associated with modern living; 3) Perform yoga postures with proper technique

EXCM 113 Fitness Boxing Activity Lab (1 Credit Hour)
This is an activity-based course that provides students the opportunity to learn and perform boxing techniques. Stances, punching, combinations, blocks, and non-contact sparring drills will be presented. The rules of boxing are introduced. Engage in boxing while observing safety guidelines. 2. Perform offensive and defensive techniques. 3. Demonstrate proper non-contact sparring techniques.
Outcomes:
1

EXCM 114 Basics of Power Lifting Activity Lab (1 Credit Hour)
This is an activity-based course that provides students with the opportunity to learn and perform powerlifting exercises. The focus is on teaching competition rules and standards on the back squat, bench press and deadlift as well as variations that may improve performance. Understand the physiological adaptations that occur because of Powerlifting. 2. Perform proper technique for Powerlifting lifts and variations of those lifts. 3. Identify competition rules and stipulations of the Powerlifting lifts.
Outcomes:
1

EXCM 115 NCCA Personal Training Elective (1 Credit Hour)
This course encompasses an overview of key Exercise Science, training methodology and health behavior change principles. Students will then apply each principle into practice through screening and evaluation, exercise program design, and ethical, legal and professional responsibilities and guidelines.
Outcomes:
Upon successful completion of the course, the student will be able to: Apply key exercise science, training methodology and health behavior change principles in context to the provision of exercise; Apply the practice of exercise and fitness screening and assessment, health appraisal and risk stratification, while simultaneously integrating ethical considerations and client preferences

EXCM 117 NCCA Group Fitness (1 Credit Hour)
This course encompasses an overview of group exercise; to include cardiovascular exercise, strength training and stretching. Students will learn how to lead, instruct and motivate individuals or groups in exercise activities.
Outcomes:
Upon successful completion of the course, the student will be able to: Apply effective, exercise science-based group sessions for different fitness levels; Explain proper technique, demonstrate exercise, and teach appropriate methods to strengthen and stretch certain muscles

EXCM 125 Faith, Sports, and Fitness (3 Credit Hours)
Explore the relationship between faith and sports through a historical context, develop a theological model for engaging in sports and physical activity, and discover ways to improve the mind-body-spirit connection through fitness. Through examination of books, articles, podcasts, documentaries, and current events, this course will discuss topics such as Muscular Christianity, spirituality, athlete identity, sports ministries, cura personalis, and faith-based physical activity.
This course satisfies the Engaged Learning requirement.
Outcomes:
1) Identify basic terminology and knowledge about faith, sports, and fitness; 2) Examine the history of Catholicism, Christianity, and other religions, and how they impact sports and human well-being; 3) Interpret sports and religion through the five areas: social, historical, cultural, theological and ethical

EXCM 155 Anatomy and Physiology I (3 Credit Hours)
A detailed study of the human body and its systems. Applied Human Anatomy and Physiology I course will cover rudimentary anatomy and physiology consisting of cell structure and formation, histology, and the integumentary, skeletal, muscular, and nervous systems.
Outcomes:
Identify major anatomical components of each human system covered; Describe major anatomical components of each human system covered; Understand physiologic functions regarding molecular components, cells, tissues, organ systems and multicellular organisms; Describe the regulation of the human body and how body systems are integrated; Identify concepts from the lecture to the laboratory activities; Demonstrate learned anatomical concepts through hands-on laboratory assessments

EXCM 155L Anatomy and Physiology I Lab (1 Credit Hour)
Pre-requisites: Restricted to Undergraduate Exercise Science Majors
A detailed study of the human body and its systems. Applied Human Anatomy and Physiology I course will cover rudimentary anatomy and physiology consisting of cell structure and formation, histology, and the integumentary, skeletal, muscular, and nervous systems.
Outcomes:
Understand physiologic functions regarding molecular components, cells, tissues, organ systems and multicellular organisms

EXCM 156 Anatomy and Physiology II (3 Credit Hours)
A detailed study of the human body and its systems. Applied Human Anatomy and Physiology I course will cover rudimentary anatomy and physiology consisting of cell structure and formation, histology, and the integumentary, skeletal, muscular, and nervous systems.
Outcomes:
Identify major anatomical components of each human system covered; Describe major anatomical components of each human system covered; Understand physiologic functions regarding molecular components, cells, tissues, organ systems and multicellular organisms; Describe the regulation of the human body and how body systems are integrated; Identify concepts from the lecture to the laboratory activities

EXCM 156L Anatomy and Physiology II Lab (1 Credit Hour)
Pre-requisites: Restricted to Undergraduate Exercise Science Majors
A detailed study of the human body and its systems. Applied Human Anatomy and Physiology I course will cover rudimentary anatomy and physiology consisting of cell structure and formation, histology, and the integumentary, skeletal, muscular, and nervous systems.
Outcomes:
Understand physiologic functions regarding molecular components, cells, tissues, organ systems and multicellular organisms

EXCM 170 Women's Health and Exercise (1 Credit Hour)
This course presents perspectives on physical activity and exercise science specific to women. It will include the identification of issues during various stages of development in the female body and barriers and benefits of exercise unique to women. Students will apply these perspectives to exercise program design and health care interactions with all clients.
Outcomes:
1) Understand the unique circumstances and outcomes of working with women in the field of wellness and fitness; 2) Identify preventative strategies (such as exercise prescription and nutrition guidance) that can compensate for health risks, issues, and deficiencies that female clients and patients may experience throughout their life; 3) Explain exercise modifications and varied benefits during specific periods in a woman's life (adolescents, pregnancy, postpartum, menopause)

EXCM 201 Physiology of Exercise (3 Credit Hours)
Pre-requisites: EXCM 101, EXCM 156, and EXCM 156L
This course covers the energy supply of movement, systemic effects of exercise, and adaptations to exercise training through the lens of physiology. The role of the major physiological systems of the body in maintaining homeostasis during exercise will be studied along with the adaptations that occur in these systems following exercise training. Practical applications of this knowledge will be explored with regards to the role of exercise in maintaining and improving human health and performance.
Outcomes:
Define the structure and function of physiological systems in the body that are essential for the maintenance of homeostasis during exercise; Identify the important physiological responses that occur during exercise and adaptations to chronic exercise training; Interpret practical knowledge of exercise physiology to various health, fitness and athletic scenarios; Outline the assessment of health-related physical fitness and performance tests

EXCM 201L Physiology of Exercise Laboratory (1 Credit Hour)
Pre-requisites: EXCM 201 (may also be taken as a Corequisite)
The purpose of this course is to provide a practical and hands-on approach to studying the body's response to exercise congruent with material learned in EXCM 201 Lecture. This is accomplished through a combination of exercise-related lab activities, in-lab discussions, and written lab assignments. Students will also develop skills in data organization and visualization.
Outcomes:
Interpret metabolic, vascular, respiratory, and skeletal muscle assessment outcomes; Perform basic data organization and visualization techniques in a computer based spreadsheet

EXCM 210 Program Design in Exercise (2 Credit Hours)
Pre-requisites: EXCM 201
This course focuses on the design, implementation and evaluation of exercise programs through case-based application and classroom activities. Health-related components of fitness and fitness assessments are reviewed. Individual and group exercise program designs within community-based settings for individuals through the life cycle are discussed. Evidence-based content is identified to critically analyze and develop conditioning programs and techniques for a broad range of sports and activities. Important elements of program design are used to emphasize desired client program outcomes.
Outcomes:
At the successful completion of the course, the student will be able to: 1) Lead designed group exercises and activities which consider individual needs and differences; 2) Apply training principles and program variables to increase strength, endurance, power, or hypertrophy for the identified client or population; 3) Evaluate the designed exercise prescribed over time for an individual and/ special population; 4) Integrate cognate materials necessary to support the full development of physical performance including nutrition, environment, mobility, clothing and equipment; 5) Design individualized exercise programs for individuals and special groups; 6) Adjust exercise programs based on individual performance and safety considerations

EXCM 301 Advanced Physiology of Exercise (3 Credit Hours)
Pre-requisites: EXCM 201 and Anatomy & Physiology (GNUR 155/155L and GNUR 156/156L)
An advanced course in exercise physiology covering exercise metabolism, temperature regulation and fluid balance.

EXCM 342 Physical Growth, Development and Nutrition (3 Credit Hours)
Pre-requisites: EXCM 101
A survey of the various components involved in personal health and wellness, such as personal fitness, sexuality, mental health, and environmental health as related to the stages of life development.

EXCM 345 Therapeutic Exercise and Rehabilitation (3 Credit Hours)
Pre-requisites: (EXCM 101 & 201) and (BIOL 243 or GNUR 156 &156L)
Explanation and demonstration of the use of therapeutic modalities in the healing process. This will include discussion of the use of therapeutic modalities to enhance the rehabilitation process after athletic injury.

EXCM 350 Sports Nutrition (3 Credit Hours)
Pre-requisites: EXCM 201, CHEM 102 & CHEM 112
This course introduces the essentials of human nutrition for health and emphasizes the roles of key nutrients for athletic performance. This foundational material will be applied to athletic performance including adaptation and recommendations for training and competition. Nutrient recommendations will be reviewed for specific types of sports, exercise and other athletic concerns. The metabolic basis for sports nutrition recommendations is examined.

EXCM 352 Musculoskeletal Assessment and Strength Training (4 Credit Hours)
Pre-requisites: EXCM 201 and Anatomy & Physiology (GNUR 155/155L and GNUR 156/156L)
This course will present the general principal and foundational skills for each component of the injury examination. These general principles will be applied to the recognition and examination of injuries/conditions specific to each body region. Address general medical conditions will likely encounter with patients.

EXCM 364 Intro to Clinical Exercise Testing and Prescription (3 Credit Hours)
Pre-requisites: EXCM 201 and Anatomy & Physiology (GNUR 155/155L and GNUR 156/156L)
This class summarizes recommended procedures, including EKG and other stress testing modalities, for exercise testing and exercise prescription in healthy and diseased individuals.

EXCM 368 Advanced Clinical Testing and Prescriptions (3 Credit Hours)
Pre-requisites: EXCM 201 and Anatomy & Physiology (GNUR 155/155L and GNUR 156/156L)
This course focuses on physiological implications of metabolic conditions such as diabetes, cardiac and pulmonary disease on exercise. The course includes modifications to exercise testing and in-depth preparation for exercise prescription based on diseases and special conditions. The course reviews contraindications and considerations for exercise, EKG interpretation and implications of physiological responses to exercise. Behavioral strategies to implement in client exercise planning and education are addressed. Exercise prescription is discussed as part of the ongoing evaluation of client performance.
Outcomes:
At the successful completion of the course, the student will be able to: 1) Create patient/client focused exercise programs, with modifications and progressive programming based on physiologic alterations; 2) Understand the effect of exercise on the physiological systems of the body and disease states; 3) Analyze exercise testing data from healthy individuals and individuals with physiological alterations; 4) Evaluate EKG responses to exercise; 5) Implement testing protocols and modifications for individuals with physiological alterations; 6) Understand acute responses and chronic adaptations to exercise and the impact on individuals with physiological adaptations

EXCM 375 Special Populations in Exercise Science (2 Credit Hours)
Pre-requisites: EXCM 201 and EXCM 364
This course provides practical information on exercise for persons with a wide range of health conditions, diseases and disabilities. Best-practice exercise prescription protocols for individuals across the life span will be addressed. An overview of unique physiology, effects of the condition on the exercise response, and effects of exercise training on the condition will be discussed. Recommendations for exercise testing and programming are presented for select populations.
Outcomes:
At the successful completion of the course, the student will be able to: 1) Understand the relations between health conditions, disease, disability and physical activity; 2) Establish physical activity outcomes in individuals with health conditions, diseases or disabilities; 3) Modify existing physical activity prescriptions to match individual capabilities and needs; 4) Demonstrate an understanding of the risks and benefits associated with exercise participation: 5) Analyze the results of exercise tests and fitness evaluations in various populations; 6) Modify equipment arrangement and facility resources to accommodate use by individuals with special needs

EXCM 382 Clinical Research: Methods, Design and Ethics w/Lab (3 Credit Hours)
Pre-requisites: EXCM 201 and STAT 103
Study of current literature with implications for exercise and sport science specializations; use of library resources and retrieval systems; evaluation of professional competencies.

EXCM 385 Kinesiology and Sports Biomechanics w/Lab (4 Credit Hours)
Pre-requisites: PHYS 112 and Anatomy & Physiology (GNUR 155/155L and GNUR 156/156L)
Analysis of human movement with emphasis on the biomechanics of exercise and sport movement patterns.

EXCM 387 Movement Anatomy in Exercise (3 Credit Hours)
Concepts and principles from anatomy and biomechanics are integrated into the analysis of human movement. This course focuses on application of the principles of human movement for normal function and application to different levels of physical performance through case based applications and classroom activities. Content includes anatomical lever systems, moment arms, stability and laws of motion. Systematic analysis of human movement in clinical conditions, performance, and wellness settings will be reviewed. Development of individual plans to improve movement is woven throughout the course.
Outcomes:
At the successful completion of the course, the student will be able to: 1) Explain the relationship between biomechanics, anatomy and human movement; 2) Understand upper and lower limb musculoskeletal anatomy, physiology, and function; 3) Apply functional anatomy in the analysis of normal physical performance; 4) Develop individualized plans to correct movement based on the assessment of the individual; 5) Evaluate movement techniques in various populations; 6) Evaluate client outcomes as a result of prescribed exercise modifications to improve movement patterns

EXCM 390 Psychology of Health and Exercise (3 Credit Hours)
Pre-requisites: EXCM 201 and PSYC 273
This course will present current research with focus on the leading theories and applications in health and exercise psychology. The implications and applications of research and practice for health behavior change by health and fitness professionals in diverse populations at the societal and individual levels will also be reviewed.

EXCM 395 Clinical Internship and Patient Management (6 Credit Hours)
Pre-requisites: EXCM 201 and Anatomy & Physiology (GNUR 155/155L and GNUR 156/156L), 4 of 8 upper division EXCM courses
Practical experience working with exercise physiologists, physical therapists, occupational therapists, rehabilitation therapists, and others, in cardiac care and orthopedic rehabilitation.
This course satisfies the Engaged Learning requirement.
Outcomes:
Understand development and implementation of population-based exercise science programs; Demonstrate competency in fitness assessments; Explain management structure(s), staffing patterns and operations of exercise and fitness sites; Implement regular and specific-focus exercise programs; Evaluate regular and specific-focus exercise programming; Demonstrate oral and written communication skills consistent with a leadership role in exercise science

EXCM 399 Special Topics in Physical Therapy (2 Credit Hours)
This course covers the general areas of physical therapy, as well as a relevant topic in physical therapy. This course will be offered as an elective and open to all students. Recommend evidence-based practices using cases studies (ie exercise prescription, patient education, society level affects).
Outcomes:
Examine various research and writing to gain understanding and knowledge in the areas of physical therapy; Evaluate scientific literature; Explore the impact a physical therapist has on their patient through movement improvement, pain management and prevention

EXCM 401 Applied Physiology of Exercise (4 Credit Hours)
This course focuses on biologic system responses at rest, during exercise, and as the result of training. Major emphasis is placed on bridging gaps between introductory concepts of exercise physiology and the contemporary research evidence that further advances the field of exercise science. The effect of environmental systems and factors on the regulatory response to exercise is addressed. The history and major milestones associated with the development of the science of exercise physiology are presented. Future developments in the field of exercise physiology, such as the role of genetics and genomics are integrated into the course. Laboratory and field experiences provide students with opportunities to apply theory to practice.
Outcomes:
1) Describe major milestones, influences, and future directions in the development of the science of exercise physiology; 2) Explain the importance of the physiological adaptations that occur as a result of properly designed training programs; 3) Analyze measures of the physiology of respiration, circulation, energy production, metabolism, and muscle function in rest and exercise states; 4) Interpret research findings focused on cardiovascular, respiratory, metabolic and neuromuscular physiology in exercise science; 5) Perform selected laboratory and field tests of physiological function and physical fitness; 6) Interpret results from laboratory and field tests of physiological function and physical performance; 7) Differentiate positive training changes and signs and symptoms of overtraining among healthy individuals throughout the life cycle

EXCM 424 Motor Learning and Performance (3 Credit Hours)
The course provides instruction in how humans control locomotion and how they learn/re-learn motor skills. Specifically, the course emphasizes the observable behavioral aspects of motor control/learning while detailing the neurophysiological and biomechanical processes that result in motor behaviors. Major course concepts include information processing and decision making; speed, accuracy, and coordination; and knowledge and skill acquisition and transfer.
Outcomes:
1) Understand theoretical approaches that drive motor control and motor learning research; 2) Analyze principles and processes underlying movement skilled performance; 3) Analyze the human motor system and how it supports the acquisition and retention of complex movement skills; 4) Adapt instruction situations to achieve maximum performance and retention of learned skills; 5) Relate information processing and decision-making models to performance and movement

EXCM 435 Health Promotion and Wellness Theories and Frameworks (3 Credit Hours)
This course emphasizes health promotion in diverse and changing cultures and societies. Determining and influencing factors of health are examined from a cultural competence perspective. Major health promotion, wellness, behavioral, and lifestyle theories that influence the professional practice of exercise science in community settings are integrated throughout the course. The role of the exercise scientist in health education for the prevention and treatment of health problems, health promotion, and enhancing quality of life is emphasized.
Outcomes:
1) Relate concepts of health, health promotion, and wellness that influence individual and group health and quality of life; 2) Assess the health education and health promotion needs of individuals and groups in diverse populations; 3) Design culturally congruent health education, wellness, and behavioral modification programs, focused on improved health and quality of life, in community-based settings; 4) Implement health education, wellness, health promotion, and behavioral modification programming for diverse populations; 5) Evaluate health education, wellness, health promotion and behavioral modification programming in a variety of settings, using an outcomes-oriented approach; 6) Identify cultural, social, economic, and political influences on decision making and action in health and wellness

EXCM 444 Strength Training and Conditioning (3 Credit Hours)
This course focuses on the analysis of theory in the improvement of athletic performance, with specific emphasis on assessment and implementation of resistance training programs. Foundational knowledge in human physiology and biomechanics is applied to principles of speed, agility, power, flexibility, and technique development specific to individuals¿ goals. Principles of anaerobic and aerobic metabolism in relation to strength training and conditioning are a major focus in the course. This course provides foundational preparation for students interested in taking the National Strength and Conditioning Association Certified Strength and Conditioning Specialist's exam.
Outcomes:
1) Analyze the relation between resistance training and human performance; 2) Incorporate appropriate exercises, such as resistance training, medicine ball, balance, plyometric, and linear and lateral movement exercises into exercise prescriptions; 3) Differentiate between general fitness prescriptions and specific training to enhance athletic performance; 4) Evaluate biomechanical aspects of efficiency and performance; 5) Apply performance enhancement training principles to individuals' specific needs and goals

EXCM 450 Nutrition, Health and Performance (3 Credit Hours)
This course focuses on advanced concepts of nutrition as these relate to health, exercise, fitness, and performance. The role of micronutrients and macronutrients in major dimension of health and fitness are addressed. Advanced concepts in nutrient selection, metabolism, and timing are integrated into plans for supporting and improving health and performance. Collaborative practice with dietetics professionals and the interprofessional team in optimizing health, fitness, and performance capacity is a major unifying concept of the course.
Outcomes:
1) Attribute major functions of macronutrients and micronutrients to health, exercise, fitness and performance; 2) Apply principles of evidence-based nutrition to the food habits and practices of diverse individuals and populations; 3) Analyze energy and nutrient intake based on level of training and type of sport and exercise; 4) Understand roles and domains of practice of collaborating professions in promoting health, fitness and performance; 5) Develop interprofessional competencies to collaborate with nutrition professionals in optimizing nutrition for health, fitness, and performance

EXCM 454 Applied Sports Science (3 Credit Hours)
This course focuses on the application of science in the study of elite athlete sports performance. Advanced aspects of physiological monitoring, along with other athlete assessment tools will be examined. Special emphasis will be placed on the evidence-based, practical application of these various techniques, enabling a holistic approach to improving athlete health and performance.
Outcomes:
Identify the relation between cumulative stress and human performance; Plan periodized practices of strength and conditioning, sport training, nutrition, and psychological preparation to optimize performance in individual and team sport

EXCM 458 Cardiac and Pulmonary Disease and Rehabilitation (3 Credit Hours)
This course focuses on two prevalent areas of public health concern for the exercise scientist: cardiac and pulmonary health and disease. Emphasis is placed on prevention, etiology, pathophysiology, and understanding the diagnosis and treatment of cardiac and pulmonary disease. The role of the clinical exercise scientist in preventive and rehabilitative exercise intervention and programming to promote cardiac and pulmonary health is emphasized. Key factors in the development, management, and evaluation of cardiopulmonary rehabilitation programs are integrated into the course.
Outcomes:
1) Understand anatomy and physiology associated with cardiopulmonary health and disease; 2) Relate pathophysiology changes in cardiac and pulmonary disease to exercise prescription; 3) Explain diagnostic tests and procedures used in exercise assessment and intervention in cardiac and pulmonary health and disease; 4) Understand essential elements and phases of cardiac and pulmonary rehabilitation; 5) Design preventive exercise prescriptions for cardiac and pulmonary health in individuals and groups; 6) Design rehabilitative exercise prescriptions for patients with cardiac and pulmonary health alterations

EXCM 468 Application of Advanced Clinical Exercise Testing & Prescription (3 Credit Hours)
This course emphasizes theory, techniques, and procedures of clinical exercise stress testing for diagnostic and functional assessment of individuals. Students will develop competencies in clinical testing skills ranging from electrocardiography to graded exercise and physical performance testing. Data from diagnostic testing and functional assessments will be integrated into individualized exercise prescriptions, based on risk assessment and stratification. Responses to emergency situations in the exercise environment are addressed.
Outcomes:
Compare the signs, symptoms and scope of cardiovascular conditions, respiratory conditions, and metabolic conditions, and the development of these pathologies; Apply risk assessment and stratification models in the diagnostic and functional assessment of individuals; Evaluate the indications and contraindications of subject selection for testing, considering safety precautions, indications for test termination, and emergency procedures for conducting a graded exercise stress test; Differentiate normal and abnormal electrocardiographic responses to exercise of varying duration and intensity; Design appropriate exercise test mode and protocols in consideration of client characteristics

EXCM 475 Exercise Applications in Special Populations (3 Credit Hours)
This course focuses on the advanced knowledge and competencies needed to evaluate health behaviors and risk factors in special populations across the lifespan. The administration of fitness assessments and the design, implementation, and evaluation of exercise programs in special populations are addressed. Exercise is approached as a therapeutic and treatment modality for individuals and groups with a variety of anatomic, physiologic, cognitive and sensory alterations.
Outcomes:
1) Understand the advanced physiology of growth and development, aging, and the pathophysiology of health conditions, disease and disability in special populations; 2) Analyze the effects of exercise training and nutrition on the underlying etiology and pathophysiology of acute and chronic conditions; 3) Prescribe exercise activities to optimize health and performance in special populations; 4) Adapt exercise prescriptions based on the individualized needs of individuals with anatomic, physiologic, or sensory challenges; 5) Evaluate the effectiveness of adaptations to exercise prescriptions and programming in special populations

EXCM 478 EKG Interpretation (3 Credit Hours)
This course will help students master the practical competencies of electrocardiography (EKG), including performing a 12-lead EKG, ambulatory monitoring, and the concepts of monitoring and interpreting an EKG with and without exercise stress testing. Additionally, this course will present content related to the cardiac cycle, EKG abnormalities, ectopy, and dysrhythmias, and identifying ischemia. Students will perform hands-on 12-lead EKG analysis at rest and with exercise and the steps required for ambulatory monitor testing.

EXCM 480 Advanced Exercise Assessment and Programming (3 Credit Hours)
This course focuses on principles of periodization applied to a performance enhancement setting. Major dimensions of the course include cycles and periods, peaking for competition, and rest and recovery. Periodization models and theories are examined, with a special emphasis on contemporary research findings that are applied to enhance athletic training and physical performance. Assessment of training programs based on performance requirements are a major emphasis throughout the course.
Outcomes:
1) Apply periodization models in the optimization of athletic or physical training and performance; 2) Analyze the relationship between training volume and intensity over time; 3) Analyze principles of program design for performance enhancement; 4) Evaluate testing approaches to the assessment of strength and conditioning; 5) Generate exercise program modifications for individuals based on youth development, injuries, and inexperience; 6) Relate variables of overload, variation, and specificity to strength and conditioning training

EXCM 482 Research Methods and Evidence in Exercise Science (3 Credit Hours)
This course prepares the student to understand scholarly inquiry, evaluate research evidence, develop evidence-based practices/protocols, and generate knowledge for evidence-based practice in exercise and fitness. Methods of operationalizing scholarly inquiry include: understanding relations among theory, research, and practice; formulating research questions; identifying and appraising existing literature; critically evaluating research methodologies used in the study of an issue or problem; and applying research findings to exercise science practice. Social, cultural, political and ethical issues related to research are addressed, including special considerations of research conducted in exercise settings.
Outcomes:
1) Understand scholarly inquiry processes in relation to evidence-based practice and knowledge generation in the field of Exercise Science; 2) Formulate research questions that address clinical, educational, administrative, or policy issues for evidence-based practice in Exercise Science; 3) Understand the elements of various quantitative research designs; 4) Assess the adequacy of selected quantitative and qualitative designs in answering research questions in Exercise Science; 5) Evaluate extant evidence and theories relevant to knowledge gaps in the field of exercise science; 6) Analyze ethical issues and concerns in research related to Exercise Science

EXCM 485 Applied Biomechanics (4 Credit Hours)
This course will provide an analytical approach to the study of the human nervous system and human motion as applied to kinematic and kinetic analysis, study of anatomy, physiology, and mechanics.
Outcomes:
Students will use and apply laboratory measurement techniques commonly used in exercise science

EXCM 487 Movement Anatomy in Exercise (3 Credit Hours)
Concepts and principles from anatomy and biomechanics are integrated into the analysis of human movement. This course focuses on application of the principles of human movement for normal function and application to different levels of physical performance through case-based applications and classroom activities. Content includes anatomical lever systems, moment arms, stability and laws of motion. Systematic analysis of human movement in clinical conditions, performance, and wellness settings will be reviewed. Development of individual plans to improve movement is woven throughout the course.
Outcomes:
Analyze the relationship between biomechanics, anatomy, and human movement across a range of physical tasks; Integrate advanced understanding of upper and lower limb musculoskeletal anatomy, physiology, and function to explain movement efficiency and constraint; Apply functional anatomy and biomechanical principles to evaluate and justify movement strategies in normal physical performance; Evaluate movement techniques across populations, considering anatomical variation, mechanical tradeoffs, and contextual demands; Evaluate movement outcomes resulting from prescribed exercise or movement modifications, using anatomical and biomechanical rationale to support conclusions

EXCM 490 Special Topics in Exercise Science (1-3 Credit Hours)
Contemporary research, literature, projections and views as applied to fitness, nutrition, health, and well-being. Much of the learning that occurs in this course will be the result of group discussion. The topic areas covered will include fitness, nutrition, health, aging, obesity, and injuries. However, topics covered will largely be determined by student interests. Pre-requisites: Restricted to Parkinson School of Health Sciences and Public Health students.
Outcomes:
1) Understand research findings and scholarly writings in a specific topical area of Exercise Science; 2) Evaluate scientific and theoretical literature in s specific topic area of Exercise Science; 3) Direct scholarly discussion in a topical area of exercise science, with a focus on the individual, family, and community

EXCM 495 Field Experience I (3 Credit Hours)
This course is designed to provide 200 hours of practical experience working with diverse individuals and populations under the supervision and guidance of a preceptor. Settings may include those which provide cardiac and pulmonary care, physical rehabilitation or sports performance. Required seminars focus on program planning and evaluation, and human and fiscal resource management.
Outcomes:
Apply specialized exercise science knowledge and skills by implementing evidence-based interventions within authentic practicum settings; Collaborate effectively within interprofessional teams by integrating diverse professional perspectives to optimize patient/client outcomes; Demonstrate professional engagement through active involvement in planning sessions and team meetings; Evaluate the effectiveness of the exercise science interventions on the individuals or populations served

EXCM 496 Field Experience II (3 Credit Hours)
This course is designed to provide 200 hours of practical experience working with diverse individuals and populations under the supervision and guidance of a preceptor. Settings may include those which provide cardiac and pulmonary care, physical rehabilitation, or sports performance. Required seminars focus on program planning and evaluation, and human and fiscal resource management. This is the second of two required field experiences.
Outcomes:
Apply specialized exercise science knowledge and skills by implementing evidence-based interventions within authentic practicum settings; Collaborate effectively within interprofessional teams by integrating diverse professional perspectives to optimize patient/client outcomes; Demonstrate engagement through active involvement in planning sessions and team meetings; Evaluate the effectiveness of the exercise science interventions on the individuals or populations served

EXCM 499 Independent Study (1-4 Credit Hours)
Pre-requisites: Restricted to Parkinson Exercise Science students
This is a directed study course in exercise science for approved students, supervised by a member of the faculty. Students must have an assigned professor, written objectives, planned outcomes, and timelines. Permission of the Program Director required.
Outcomes:
Students will be able to miiculate a general understanding of the selected topic

Experiential Learning Course (EXPL)

Discover, search, courses (p. 2661)!

EXPL 200 Faculty-Mentored Research (0 Credit Hours)
This course is for LUC faculty-mentored research experiences on campus.
Outcomes:
Students will gain insight into how research is done in the discipline of study

EXPL 290 Seminar in Community-Based Service and Leadership (3 Credit Hours)
This course is a seminar course focusing on community-based service and leadership through service-learning, in which students will work 40 hours over the semester at a non-profit organization.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will gain professional experience at an organization, while reflecting on their service experience in the context of asset-based community development, civic engagement, social justice, leadership in the community, and service for the common good

EXPL 291 Introduction to Research (3 Credit Hours)
This course is a seminar course focused on an introduction to research and community-based research. As an Engaged Learning course, students will work with a community partner on a community-based research project at a non-profit, community-based organization, approved by the Center for Engaged Learning, Teaching, and Scholarship (CELTS).
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will reflect on their research plan and community-based research experience in the context of research as service for the common good

EXPL 292 International Service Learning (3 Credit Hours)
Pre-requisites: Must have 30 credits completed (15 credits if a transfer student) and enroll through International Programs Office
This course is a seminar course focusing on community-based service in an international setting. The focus of the course will be on cultural and political practices from a community perspective through service-learning, in which students will work 50-75 hours over the academic period at international non-profit organizations.
Interdisciplinary Option: Global Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: X-UNIV292/INTS278
Outcomes:
Students will gain professional experience in an international setting, engaging in direct service with a different culture and community, while reflecting on their service experiences in the context of cultural and political community development, the impact of the current environment on specific populations, contemporary issues, social justice and poverty, and global citizenship

EXPL 390 Internship Seminar: Organizational Change and Community Leadership (3 Credit Hours)
This course is a seminar course focusing on organizational leadership and change through a 100 hour internship experience with a non-profit organization, government agency, or business organization, pre-approved by the Center for Experiential Learning.
This course satisfies the Engaged Learning requirement.
Course equivalencies: CPST398/UNIV390
Outcomes:
Students will gain professional experience at an organization while reflecting on their work experience and applying theories of organizational leadership, civic engagement, community development, and leadership in the community

EXPL 391 Seminar in Undergraduate Research Methods (3 Credit Hours)
This seminar course offers undergraduate students the experiential opportunity to engage in research while building their foundation of research methods. Students may be part of the Loyola Undergraduate Research Opportunities Program (LUROP) through a funded fellowship, or students may be working independently with a faculty mentor (volunteering in a lab, working on a research team). All students must have a research project with a faculty mentor identified prior to enrolling in this course. As an experiential learning course, students will need to be engaging in research with a faculty mentor concurrently to taking this course. Students must work a minimum of 5 - 10 hours each week over the semester on their research projects (10 - 15 hours per week over the summer session). Students will reflect on research experience in the context of understanding research paradigms, application of research methodologies, understanding the implications of ethical research, and preparing to present research professionally. This course will provide students engaged in research with the opportunity to develop a formal written research paper and poster, as if the students are preparing to present their research in a professional setting, such as the LUROP Symposium.
This course satisfies the Engaged Learning requirement.

EXPL 393 Seminar in Integrative Leadership (3 Credit Hours)
This is a seminar course for students leaders in approved co-curricular programs (e.g., ABI leaders, student organization executive board, Loyola4Chicago leaders, etc.). Students in this course will complete at least 100 hours in a leadership experience in the context of integrative leadership theory culminating in a portfolio to demonstrate holistic leadership capacity.
This course satisfies the Engaged Learning requirement.
Outcomes:
1) Develop understanding of leadership theories, reflection on actions, and integrative leadership theories; 2) Enhance connection to the institution through leadership experience, and academic and professional learning and development; 3) Produce an integrative professional portfolio

Finance (FINC)

Discover, search, courses (p. 2661)!

FINC 215 Personal Finance (3 Credit Hours)
Pre-requisites: None, does not count toward a concentration in finance
This is an applied course in planning, organizing, and managing an individual's personal finances.
Outcomes:
Students will demonstrate knowledge of financial planning, individual income tax, time value of money, liquidity management, consumer credit, insurance, employee benefits, and the basics of personal investing

FINC 301 Introductory Business Finance (3 Credit Hours)
Pre-requisites: Sophomore standing and C- or better in ISSCM 241 or ISSCM 241H or STAT 103; ECON 201 or ECON 201H; and ACCT 201 or ACCT 201H; ACCT 201 or 201H may also be taken as a co-requisite
The objective of this course is to provide students with a basic understanding of the general principles of business finance: capital investment, financing, capital structure, and related areas including the basics of valuation.
Course equivalencies: FINC332/FINC332H/CPST371
Outcomes:
Students will demonstrate basic knowledge of financial analysis, time value of money, financial decision making, the valuation of financial and physical assets, the risk-return tradeoff, capital budgeting, and dividend policy

FINC 334 Principles of Corporate Finance (3 Credit Hours)
Pre-requisites: Sophomore standing; minimum of C- or better in ECON 201 or ECON 201H; ISSCM 241 or ISSCM 241H or STAT 103; ACCT 201 or ACCT 201H; and MATH 130 or MATH 131 or MATH 161; (ACCT 201 and MATH 130/131/161 may be taken as a co-requisite)
This course provides students with a foundational and integrated knowledge of corporate finance. Topics include discounted cash flows, firm valuation, capital budgeting, principals of the risk and return relationship, market efficiency, capital structure, and financing. Students will be asked to independently complete the Bloomberg Market Concepts (BMC) course.
Course equivalencies: FINC332/FINC 334/CPST271
Outcomes:
Students will demonstrate knowledge of valuation principles, raising funds for investment decisions, capital investment choices, risk and return relationship, capital markets and instruments, all in the context of real-world problems and situations

FINC 334H Principles of Corporate Finance- Honors (3 Credit Hours)
Pre-requisites: Open to students in the Quinlan Honors Program; Sophomore standing; C- or better in ECON 201 or ECON 201H; ISSCM 241 or ISSCM 241H or STAT 103; ACCT 201 or ACCT 201H; and MATH 130 or MATH 131 or MATH 161; (ACCT 201 may taken as a co-requisite)
This course provides students with a foundational and integrated knowledge of corporate finance. Topics include discounted cash flows, firm valuation, capital budgeting, principals of the risk and return relationship, market efficiency, capital structure, and financing. Students will be asked to independently complete the Bloomberg Market Concepts (BMC) course.
Course equivalencies: FINC332/FINC 334/CPST271
Outcomes:
Students will demonstrate knowledge of valuation principles, raising funds for investment decisions, capital investment choices, risk and return relationship, capital markets and instruments, all in the context of real-world problems and situations

FINC 335 Investments (3 Credit Hours)
Pre-requisites: Sophomore Standing and minimum grade of "C-" in FINC 334, FINC 334H or FINC 332, minimum grade of "C-" in MATH 130, MATH 131 or MATH 161
This course is an introductory course of capital market theory which includes the topics of risk and return analysis of stocks, bonds and cash equivalents; modern portfolio theory; bond pricing, the term structure of interest.
Outcomes:
Students will be able to demonstrate the analytical tools and finance theory necessary for making good investment decisions and for understanding the pricing of financial securities

FINC 336 Introduction to Derivatives (3 Credit Hours)
Pre-requisites: Junior standing, C- or better in FINC 335
This course offers a high level introduction to three categories of derivative markets: futures-forwards, swaps and options. Skills to be developed include analytical and decision-making, creative thinking and communication. Risk as both potential loss and opportunity for gain will be highlighted. Cases will be used.
Outcomes:
Exploring ethical and social dimensions of risk management and use and abuse of derivative securities

FINC 337 Banking, Money & Capital Markets (3 Credit Hours)
Pre-requisites: Junior Standing, Minimum grade of "C-" in: FINC 301 or FINC 332 or FINC 332H or FINC 334 or FINC 334H
Introduction to financial markets and institutions and to the Federal Reserve and monetary policy.
Outcomes:
Students will be able to demonstrate an understanding of how financial markets and institutions work and are important to financial decision making, how interest rates and bond prices are determined and interrelated, why and how financial institutions are regulated by the government, and who the Federal Reserve is and how its actions affect the economy

FINC 338 Risk Management and Insurance (3 Credit Hours)
Pre-requisites: Junior Standing, Minimum grade of "C-" in FINC 301 or FINC 332 or FINC 332H or FINC 334 or FINC 334H
Intro to risk identification, risk evaluation & risk treatment methods. Consideration is given to both business & personal risks, with an emphasis on insurance as a risk management tool.
Outcomes:
This course will prepare students with practical risk management and insurance principles/fundamentals, introduce risk management and insurance techniques and apply risk management analytical methods

FINC 342 Advanced Business Finance (3 Credit Hours)
Pre-requisites: Junior standing; Minimum grade of "C-" in FINC 335
This is an advanced course in corporate finance where students are given a thorough grounding in firm valuation and exposed to various financial decisions including raising capital, mergers and acquisitions, leveraged buyouts, spin-offs, and carve-outs, all in the context of their impact on firm value.
Outcomes:
Students will be able to demonstrate an understanding of firm valuation, as well as the impact of various corporate decisions on firm value

FINC 345 Portfolio Management (3 Credit Hours)
Pre-requisites: Junior standing; Minimum grade of "C-" in FINC 335
Topics include a critical appraisal of the efficient market hypothesis, asset allocation using the Markowitz mean-variance framework, fundamental and technical analysis, and mutual fund performance evaluation.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will understand how stocks and other assets are selected; how economic and company information is monitored and used to adjust portfolio holdings; and how portfolios can be optimized to achieve targeted risk/return characteristics

FINC 346 Introduction to Options (3 Credit Hours)
Pre-requisites: Junior standing; Minimum grade of "C-" in FINC 335
This class offers a comprehensive introduction to options, including a detailed examination of option markets, option properties, trading strategies using options, binomial tree and Black-Scholes valuation models, and hedging strategies using options.
Outcomes:
Students will be able to demonstrate an understanding of option markets, option pricing models and how options can be used to hedge risks

FINC 347 Financial Institutions (3 Credit Hours)
Pre-requisites: Junior Standing, Minimum grade of "C-" in FINC 301 or FINC 332 or FINC 332H or FINC 334 or FINC 334H
A study of the crucial role played by financial institutions. The course will be a blend of theory and analysis of the present institutional structure.
Outcomes:
Students will demonstrate an understanding of the following: the important role of financial intermediaries, interest rate risks, credit risks, market risk, and also risk management through capital adequacy and hedging risk with financial derivatives

FINC 349 Real Estate Finance & Investments (3 Credit Hours)
Pre-requisites: Junior standing, Minimum C- in FINC 334
Basic principles of real estate finance as well as practical applications. Learn topics, theories and current developments in real estate. Solve quantitative problems.
Outcomes:
General & working knowledge of real estate jargon and legal documents; Calculate mathematical solutions to problems in real estate; Understand time value of money related to real estate; Valuation of residential and commercial properties

FINC 355 International Finance Management (3 Credit Hours)
Pre-requisites: Junior Standing, Minimum grade of "C-" in FINC 301 or FINC 332 or FINC 332H or FINC 334 or FINC 334H
This course examines the international dimensions of financial management. It introduces additional economic and financial opportunities/challenges faced by multinational corporations.
Interdisciplinary Option: Global Studies, International Business
Course equivalencies: X-FINC355/INTS369
Outcomes:
Students will be able to demonstrate understanding of foreign exchange markets, fundamental international parity relationships, reasons for international diversification, steps in foreign exchange risk management, and capital budgeting for multinational corporation

FINC 356 Advanced Topics in Investment Banking and Asset Management (3 Credit Hours)
Pre-requisites: B- or higher in FINC 335
This course examines selected topics in investment banking and asset management, including stock and bond offerings, private equity, buyouts, mergers and acquisitions. Students in the course research publicly traded companies, write equity research reports and pitch investment ideas; they also mentor junior analysts in the Rambler Investment Fund (RIF).
This course satisfies the Engaged Learning requirement.
Outcomes:
Conduct research; Write an equity investment report and pitch a trade idea; Value companies; Analyze investment banking transactions

FINC 357 Cases in Corporate Finance (3 Credit Hours)
Pre-requisites: Senior standing; Minimum grade of "C-" in FINC 335
This cases based course is designed to explore the practical application of the major corporate finance topics.
Outcomes:
Students will be able to understand how corporations use the conceptual aspects of corporate finance in real life settings; They will also learn to use the necessary tools in evaluating various corporate investment and financing decisions; They will apply these tools in solving the cases involving investment (such as building a new plant, or acquiring another firm) and financing (such as capital structure policy, and cost of capital) decisions

FINC 358 Financial Analytics (3 Credit Hours)
Pre-requisites: Junior Standing and minimum "C-" in FINC 335
This course focuses on how to use Python to build financial models. The course will examine financial securities, portfolio optimization, and valuation problems.
Outcomes:
Building financial models with Python; Translating raw data into meaningful variables for statistical analysis; Estimating statistical models to drive investment decisions; Valuation of securities; Portfolio optimization and implementing trading strategies

FINC 359 Introduction to Fintech (3 Credit Hours)
Pre-requisites: Junior Standing
Minimum grade of "C-" in FINC 301 or FINC 332 or FINC 332H or FINC 334 or FINC 334H. The primary objective of this course is to equip students with economic insights to explore the current developments and future opportunities for disruptive technologies in the financial institutions and financial service sector. The course will take a financial economic and analytic perspective to augment financial talents and entrepreneurship with the necessary tools to understand the interaction of finance, technology, and regulations. It will cover detailed topics of decentralized finance (DeFi) infrastructure including blockchain technologies, cryptocurrencies, and non-fungible tokens (NFTs). Further, it will explore how the DeFi infrastructure together with artificial intelligence (AI) are reshaping the current ecosystem of payments, capital raising, credit and lending, investment, and risk management.
Outcomes:
Students will understand the key concepts of the disruptive technologies in Fintech: blockchain technology, Non-fungible tokens, and Defi infrastructure; Students will comprehend the impacts on financial services through application of disruptive technology; Students will develop the ability to outline the near and long-term possibilities for Decentralized Finance (Defi) and Fintech industry; Students will understand the pricing methodologies for crypto assets and investments; Students will understand the applications of Artificial Intelligence (AI) and Machine Learning in investment and risk management

FINC 365 Advanced International Financial Management (3 Credit Hours)
Pre-requisites: A minimum grade of "C-" in FINC 335 and FINC 355
This course covers advanced topics in international financial management. The course builds on materials discussed in International Financial Management (FINC 355). Specifically, this course exposes the students to: foreign exchange risk management, currency swaps, foreign exchange rate forecasting, efficiency of foreign exchange markets, international capital structure and cost of capital, global investment, multinational capital budgeting, multinational cash management, cross-border acquisitions, and international trade finance.
Outcomes:
Understand the global financial markets, perform multinational capital budgeting, and understand global portfolio management

FINC 395 Independent Study in Finance (1-3 Credit Hours)
Pre-requisites: Junior standing; instructor and dean permission required
Student will conduct in-depth research or reading, initiated by the student and jointly developed with a faculty member, into a specialized area of Finance not otherwise covered by department course offerings.
Outcomes:
Students will be able to demonstrate in-depth understanding of a specialized area or topic in finance

FINC 396 Speaker Series: Risk Management and Insurance (0 Credit Hours)
Professional speaker series for all students majoring in Finance.
Outcomes:
Students will benefit from hearing professionals in the finance industry discuss current events, opportunities and challenges within the industry

FINC 399 Special Topics in Finance (1-3 Credit Hours)
Pre-requisites: Junior standing
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate an understanding of specialized topics not otherwise covered by department regular course offerings

FINC 450 Financial Management (3 Credit Hours)
Pre- or co-requisites: ACCT 400
The goal of this course is to provide students with an understanding of managerial finance: valuation, capital investment, financing, capital structure, and business ethics as they relate to finance.
Outcomes:
Students will demonstrate knowledge of financial analysis, time value of money, risk-reward, asset valuation, capital budgeting, capital structure, and working capital management

FINC 450B Finance for a Sustainable World (3 Credit Hours)
The goal of this course is to provide students with an understanding of managerial finance: valuation, capital investment, financing, capital structure, and business ethics as they relate to finance.
Outcomes:
Students will demonstrate knowledge of financial analysis, time value of money, risk-reward, asset valuation, capital budgeting, capital structure, and working capital management

FINC 450C Financial Management (3 Credit Hours)
Pre-requisites: Enrollment is restricted to students in the Healthcare Management MBA Program
The goal of this course is to provide students with an understanding of managerial finance: valuation, capital investment, financing, capital structure, and business ethics as they relate to finance.
Outcomes:
Students will demonstrate knowledge of financial analysis, time value of money, risk-reward, asset valuation, capital budgeting, capital structure, and working capital management

FINC 450E Financial Management (3 Credit Hours)
Pre-requisites: Restricted to the students in the Executive MBA program
Studies the functions, tools, and policies of financial, investment, and portfolio management. Students analyze the structure of financial markets, valuation of stocks and fixed income securities, risk and return relationships, and portfolio theory. Topics include investment and financial decision making under uncertainty.

FINC 451 Financial Markets & Institutions (3 Credit Hours)
Pre-requisites: FINC 450
Introduction to the financial system in the United States, including the fundamentals and role of money and capital markets, the institutions operating in these markets, the instruments traded, and the organization, functioning and operation of the Federal Reserve System.
Outcomes:
Students will be able to demonstrate an understanding of how financial markets and institutions work and are important to financial decision making, how interest rates and bond prices are determined and interrelated, why and how financial institutions are regulated by the government, and who the Federal Reserve is and how its actions affect the economy

FINC 452 Investment Management (3 Credit Hours)
Pre-requisites: FINC 450 or by Department Consent
This course includes the topics of asset pricing models; risk and return analysis of stocks, bonds and cash equivalents; portfolio theory; bond pricing, the term structure of interest and immunization strategies in managing fixed income securities.
Outcomes:
Students will be able to demonstrate the analytical tools and finance theory necessary for making good investment decisions and for understanding the pricing of financial securities

FINC 453 Topics in Advanced Financial Management (3 Credit Hours)
Pre-requisites: FINC 450 or by Department Consent
This is an advanced course in corporate finance where students are given a thorough grounding in firm valuation and exposed to various financial decisions including raising capital, mergers and acquisitions, leveraged buyouts, spin-offs, and carve-outs, all in the context of their impact on firm value.
Outcomes:
Students will be able to demonstrate an understanding of firm valuation, as well as the impact of various corporate decisions on firm value

FINC 455 International Financial Management (3 Credit Hours)
Pre-requisites: FINC 450 or by Department Consent
This course examines the international dimensions of financial management. It introduces potential opportunities/challenges faced by multinational corporations as they expand their business overseas.
Outcomes:
Students will be able to demonstrate understanding of foreign exchange markets, fundamental international parity relationships, foreign exchange risk management strategies, and capital budgeting for multinational corporations

FINC 455E International Financial Management (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Examines foreign exchange rate exposure and hedging techniques to deal with exposure. Other topics include capital budgeting in an international framework and international financial markets.
Course equivalencies: FINC 455E/FINC 602E

FINC 456 Management of Financial Institutions (3 Credit Hours)
Pre-requisites: FINC 450
The course analyzes the importance played by financial institutions. This is a survey course that analyzes the present financial institutional structure with a special focus on managing risk.
Outcomes:
Students will demonstrate an understanding of the following topics: the role of financial intermediaries in managing interest rate, credit, market and international banking risks; Special attention will be given to procedures for measuring and managing these risks

FINC 459 Independent Study-Finance Management (3 Credit Hours)
Pre-requisites: FINC 450
Student will conduct in-depth research or reading, initiated by the student and jointly developed with a faculty member, into a specialized area of Finance not otherwise covered by department course offerings.
Outcomes:
Students will be able to demonstrate in-depth understanding of a specialized area or topic in finance

FINC 470N Business Finance (3 Credit Hours)
Pre-requisites: FINC 450 or equivalent course
Exposure to international financial markets, international diversification, derivatives, risk management, asset valuation, multinational capital budgeting and more.
Outcomes:
Exposure to international diversification, derivatives, risk management, trading options, asset valuation and more

FINC 552 Emerging Markets (3 Credit Hours)
Pre-requisites: FINC 450 and ECON 420
An introduction to the contribution made by financial markets and institutions to economic growth and development in emerging market countries. Normally taught in Thailand, the course will provide a close look at a successful emerging market country.
Outcomes:
Students will demonstrate an understanding of the following topics: the contribution of financial institutions and markets to economic growth and development, the causes and effects of financial crises, the financial liberalization controversy, the impact of inflation, and the causes and effects of corruption; In addition, students will also demonstrate knowledge of Thailand's economic and financial systems

FINC 553 Applied Portfolio Management (3 Credit Hours)
Pre-requisites: FINC 452
This is a course in investment analysis and applied portfolio management. Topics will include investment policy and objectives, performance analysis and attribution, portfolio design, fixed income analysis and portfolio management, and equity analysis and portfolio management.
Outcomes:
At the conclusion of this course the student should be able to: 1) Create an investment policy statement; 2) Analyze and value fixed income securities; 3) Analyze and value equity securities; and 4) Develop and manage a portfolio of debt and equity securities

FINC 554 Fixed Income (3 Credit Hours)
Pre-requisites: FINC 450, or Quinlan Finance 450 Student Group Waiver; or B or better in FINC 335
This course provides an in-depth coverage of fixed income securities, and their markets. The course is an extension to other offerings in the finance program on futures, equities, and interest rate derivatives. The course is supplemented with hands-on applied sessions using Bloomberg, a leading global benchmark for data and analysis used by financial professionals worldwide.
Outcomes:
Identify the types, classifications, and characteristics of fixed income securities; Use Bloomberg and/or other resources to extract, interpret and aggregate key data; Analyze and price different types of fixed income securities

FINC 556 Investment Banking (3 Credit Hours)
Pre- or co-requisites: FINC 452; or prerequisite FINC 335 with minimum grade of " B"
This course provides a broad overview of the activities of investment banks, including venture capital fundraising, stock and bond underwriting, mergers and acquisitions, trading, asset securitization and money management.
Outcomes:
Students will understand how investment banks enhance capital markets by providing financing and investment services to companies, governments and individuals

FINC 599 Special Topics (3 Credit Hours)
Pre-requisites: FINC 450
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

FINC 602E International Financial Management (1.5 Credit Hours)
Examines foreign exchange rate exposure and hedging techniques to deal with exposure. Other topics include capital budgeting in an international framework and international financial markets.
Course equivalencies: FINC 455E/FINC 602E

FINC 620 Financial Mathematics and Modeling I (3 Credit Hours)
Pre-requisites: FINC 452 (co-requisite) and ISSCM 491 (pre-requisite); OR FINC 335 with a minimum grade of B (pre-requisite)
This course focuses on how to effectively use Python to build financial models. The course initially trains students to become sufficiently proficient to build financial models using Python, and then moves to its applications, such as translating raw data into meaningful indicators to help investment decisions. The course will examine financial securities, portfolio optimization, as well as valuation problems.

FINC 621 Financial Mathematics and Modeling II (3 Credit Hours)
Pre-requisites: FINC 620
Financial mathematics and modeling II is the second in a sequence of two courses. It is a combination of lecture and lab and will focus on the core mathematical, computational and practical modeling aspects encountered in modern financial applications. The programming languages of choice will be R and Excel/VBA. This course has a prerequisite of FINC 450, FINC 452, FINC 620, and ISOM 400. No prior R programming experience is required but familiarity with Excel/VBA is a pre-requisite.

FINC 622 Derivative Securities (3 Credit Hours)
Pre-requisites: FINC 450, or Quinlan Finance 450 Student Group Waiver
This course is a comprehensive introduction to the theory, use, and valuation of derivative securities, with particular emphasis on options and forward/futures contracts. A sound understanding of the intuition underlying option pricing is critical to a thorough understanding of modern finance and financial risk management. We may also look at other types of derivatives as well as some extensions of the most fundamental models.

FINC 624 Interest Rate Risk Management (3 Credit Hours)
Pre-requisites: FINC 622 or FINC 346 with minimum grade of "B"
Students are introduced to a plethora of financial derivatives, including both exchange-traded and OTC products, and then learn to use these products to hedge interest rate and other risks largely through the study of cases and detailed examples emphasizing the formation and use of synthetic positions.
Outcomes:
Students will be able to demonstrate an understanding of a wide variety of derivative products, as well as be able to use these products to manage interest rate and other risks

FINC 625 Applied Econometrics (3 Credit Hours)
Pre-requisites: ECON 420 and ISSCM 491
The purpose of this course is to help students understand feasible econometric techniques in order to mine information to understand economic and financial patterns and to forecast. A rigorous exposition of the theory behind econometric techniques will help students understand the issues raised in different published papers. Topics of econometric techniques covered in this course include panel data analysis, time-series models, discrete choice models, and methods to identify causality between variables. Practical applications will prepare students to use these methods in their own projects.
Course equivalencies: X-ECON625/FINC625

FINC 626 Credit Risk Management and Structured Finance (3 Credit Hours)
Pre-requisites: FINC 622 or FINC 346 with minimum grade of "B"
We study credit risk and credit risk management. We examine a suite of financial securities which can be used to reduce (or magnify) credit risks, especially credit default swaps (CDS), asset-backed securities (ABS) and collateralized debt obligations (CDOs). We consider the role of these structured credit products in the global financial crisis.

FINC 628 Valuation (3 Credit Hours)
Pre-requisites: FINC 450 or Quinlan Finance 450 Student Group Waiver, or FINC 342 with the minimum grade of "B"; Restricted to Graduate School of Business or Undergraduate School of Business
This is an advanced course in valuation where students are given a thorough grounding in traditional valuation models (DCF and relative valuation) and also introduced to real option methods and ideas; a certain emphasis is placed on the valuation of start-ups and students are introduced to the venture capital markets.
Outcomes:
Students will be able to demonstrate an understanding of traditional valuation models as well as real options methods and ideas

FINC 630 Capstone Master of Science Finance (3 Credit Hours)
Pre-requisites: FINC 450 and any 3 additional 450 and above FINC courses
This course integrates theory, analytics, and modeling skills acquired in advanced finance courses. Subject matter will include topics and techniques in corporate finance, international financial management, risk management, and investments. It is intended for Master of Science in Finance (MSF) students and select MBAs concentrating in finance and who have satisfied the necessary prerequisites.
Outcomes:
Students will be able to perform a complicated valuation analysis of a public or private company; Students will understand different short and long-term financing techniques and their impact on a firm's cost of capital, capital structure, financial risk, credit, and business strategy; Students will be able to perform a complicated international capital budgeting analysis; Students will be able to evaluate public and private investments and assess their place in a portfolio

Fine Arts (FNAR)

Discover, search, courses (p. 2661)!

FNAR 110 Foundations of Visual Art (3 Credit Hours)
Explores some of the fundamental principles, concepts, and historical and contemporary contexts that constitute a contemporary art practice. Provides experience across a range of modes of art making while emphasizing the basic concepts that underlie visual expression. Studio activity is augmented with research, discussion, and critique.
Outcomes:
Explore and express visual concepts; Develop creative competencies; Utilize design elements to communicate themes and ideas; Expand cognitive capacities; Comprehend historical and contemporary approaches to visual art

FNAR 112 Two-Dimensional Design (3 Credit Hours)
An examination of the basic elements and organizational systems of visual expression through the application of design principles and theory.
Course equivalencies: FNAR112/ACFNA112
Outcomes:
Students will be able manipulate various forms of media to produce desired spatial effects, and understand how to control by- using such design methods as scale, perspective, and composition - the viewer's understanding of and reaction to visual information on a two-dimensional surface

FNAR 113 Drawing I (3 Credit Hours)
An introduction to the basic elements of drawing including: line, value, texture, volume, shape, proportion, perspective and visual composition. A variety of drawing materials will be explored with an emphasis on observation problems designed to build technical, perceptual, and personal expressive interpretation of form through the drawing idiom.
Knowledge Area: Artistic Knowledge and Experience
Outcomes:
Students will be able to demonstrate an understanding of basic drawing principles and vocabulary, through practice and articulation of both formal and artistic ideas

FNAR 114 Painting I (3 Credit Hours)
An introduction to the basic elements of painting including: the application of drawing, design, and color principles. A variety of materials will be explored with an emphasis on oil painting. Observational problems will be introduced to build technical, perceptual, and personal expressive interpretation of form through the painting idiom.
Knowledge Area: Artistic Knowledge and Experience
Outcomes:
Students will be able to demonstrate an understanding of basic painting principles and vocabulary, through practice and articulation of both formal and artistic ideas

FNAR 115 Foundations of Photography (3 Credit Hours)
This course introduces photography as a form of visual art. Students learn the technical concepts in order to develop their ability to express ideas through photography. The course also emphasizes strengthening visual literacy through lectures, discussions, and critiques. Requirements: A fully adjustable digital camera (DSLR) and an external hard drive are required.
Knowledge Area: Artistic Knowledge and Experience
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: FNAR115/ICVM115/IFMS115
Outcomes:
Students will learn how to formulate and communicate ideas through photography; The course focuses on building the students' visual literacy and understanding of photography as a form of visual art

FNAR 118 Printmaking I (3 Credit Hours)
An exploration of the production of fine art multiples as they are created utilizing zinc and copper plates. Techniques of etching and engraving aquatint and color printing as well as innovative processes are taught.
Outcomes:
Students will demonstrate understanding of the techniques needed to produce images on metal plates and alternative surface; the intrinsic qualities particular to expression in print media, recognize fine prints, specific techniques, and archival quality in historical examples, use intaglio presses as a means of production and form evaluative judgments about printed imagery

FNAR 120 Ceramics: Handbuilding (3 Credit Hours)
An exploration of various handbuilding techniques, surface design techniques, and firing ranges available to the contemporary ceramist. Students are encouraged to pursue individual expression in the context of a broad range of methods and creative concepts.
Knowledge Area: Artistic Knowledge and Experience
Outcomes:
Students will be able to demonstrate the basics of successful construction and glaze techniques; demonstrate creative strategies and critical evaluation of the creative process; demonstrate an understanding of both historical and contemporary approaches to the medium and the role of the Ceramic artist in cultures past and present

FNAR 121 Ceramics: Wheelthrowing (3 Credit Hours)
An introduction to the potters' wheel. Students learn basic throwing skills, explore utilitarian design concepts, and learn to balance spontaneous and practiced approaches to process. Emphasis is on the successful integration of craft and personal expression.
Knowledge Area: Artistic Knowledge and Experience
Course equivalencies: FNAR220/FNAR121
Outcomes:
Students will be able to demonstrate basic wheelthrowing and glaze techniques; demonstrate creative strategies and critical evaluation of the creative process; demonstrate an understanding of both historical and contemporary approaches to the medium and the role of the Ceramic artist in cultures past and present

FNAR 123 Metalwork and Jewelry I (3 Credit Hours)
The methods and processes of construction using nonferrous metals applied to problems in design and function. Projects are designed to familiarize the student with processes in metalwork and the proper use of hand tools.
Outcomes:
Students will demonstrate an understanding of the fundamental characteristics of metal; the ability to cut, shape and manipulate metals; to express visual ideas in low and high relief; and to form judgments about design on other than flat surfaces

FNAR 124 Sculpture Foundations (3 Credit Hours)
An introduction to three dimensional concepts and materials, and associated techniques, in the process of articulating a personal artistic statement. Students will be guided in the fabrication of various 3-D constructions employing a wide range of building materials such as plaster, wood, clay, foam board, paper, and metals.
Knowledge Area: Artistic Knowledge and Experience
Outcomes:
Students will be able to translate two-dimensional sketches and drawings into expressive three dimensional forms; demonstrate basic sculpting techniques and creative strategies; provide critical evaluation of the creative process; and produce objects that are viewable in the round, structurally stable with masses and appendages proportionate to one another

FNAR 132 Visual Communication I (3 Credit Hours)
This course initiates a professional sequence whereby the student receives an introduction to composition, typography, and historical and contemporary concepts in visual communication. It introduces students to page layout software (Adobe InDesign), its relationship to other software packages, and the technical aspects of digital typography.
Outcomes:
Students gain an understanding of fundamental principles of visual communication emphasizing typography, the development technical skills in materials and techniques, and the ability to express formal and creative ideas

FNAR 160 The Crafts of China (3 Credit Hours)
This course examines the artisan crafts of China historically and technically. The course explores how and why the crafts appeared, their historical trajectory and demonstrates how the crafts improved technically. Ceramics, Bronze Castings and Wood works will serve as prototypes. Students will undertake independent researches.
Interdisciplinary Option: Asian Studies
Course equivalencies: FNAR160/ASIA160
Outcomes:
Students will identify how the crafts of woodwork, bronze casting and ceramics evolved and how they are currently practiced in China; Students will articulate an understanding of the function of craft in Chinese culture as well compare and contrast it to the function craft in their own culture

FNAR 190 Color Theory (3 Credit Hours)
An examination of the nature of subtractive and additive color in its physiological, psychological, aesthetic, cultural, and symbolic dimensions through the application of past and current theory. Emphasis is placed on color mixing, color relationships, and understanding color terminology. Students develop proficiency using color in their work as well as gaining a fundamental understanding of the basic visual, aesthetic, and theoretical considerations of color use in art & design.

FNAR 195 Topics in Fine Arts Pre-Collegiate (3 Credit Hours)
This course consists of special topics in specific Fine Arts areas, and is offered for the Pre-Collegiate student.
Outcomes:
While the specific area of study varies, the expectation is that the student will become familiar with the methods, materials and aesthetic properties of that artistic approach, as well as the technical means to control the expression

FNAR 199 Art and Visual Culture (3 Credit Hours)
An introduction to the principles of art and their application to broader visual culture, this course explores the complex nature of art through an examination of its visual elements, techniques, functions, critical methodologies, and related social issues. The course takes advantage of Chicago's artistic resources.
Knowledge Area: Artistic Knowledge and Experience
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X - ACFNA 100 / FNAR 199
Outcomes:
Students will demonstrate knowledge of the elements of visual language, means of visual expression in diverse cultures and eras, media and techniques of art, artistic terminology, and critical approaches to the study of visual culture and related social issues; Students will acquire the skills to interpret art and visual culture in oral and written form

FNAR 200 Global Art History: Prehistoric to 600 CE (3 Credit Hours)
A comprehensive survey that introduces students to the art, architecture, and material practices of global cultures from pre-history to the 7th Century CE. This course will study the internal and cross-cultural relationships between various art forms and the social, geo-political, spiritual, economic, and political contexts in which selected artifacts and monuments were made.
Knowledge Area: Artistic Knowledge and Experience
Interdisciplinary Option: Catholic Studies, European Studies, Italian Studies
Course equivalencies: FNAR200/FNAR200R
Outcomes:
Students will acquire skills to critically analyze formal expressions, materials, functions, meanings, and makers of art and material culture in relation to the historical contexts of ancient global societies

FNAR 200R Art History: Pre-History to Renaissance in Rome (3 Credit Hours)
A general survey which explores the development of art in Western culture from pre-history through the sources of the Renaissance in the fourteenth century with a focus on Rome and Italy.
Course equivalencies: FNAR200/FNAR200R
Outcomes:
Students will be able to demonstrate knowledge of the ideas, formal expressions, themes, techniques, and functions of art in relation to their cultural, social, and historical contexts

FNAR 201 Global Art History: 600-1800CE (3 Credit Hours)
A general survey which explores the development of global art from 540 through 1800.
Knowledge Area: Artistic Knowledge and Experience
Interdisciplinary Option: European Studies, Italian Studies
Course equivalencies: ACFNA 105 / FNAR 201
Outcomes:
Students will acquire skills to critically analyze formal expressions, materials, functions, meanings, and makers of art and material culture in relation to the historical contexts of early modern global societies

FNAR 202 Global Art History: Modern Art (3 Credit Hours)
A comprehensive survey of major artistic movements from a global perspective, engaging key concepts, issues, and modes of production in the modern world. It examines evolving ideas about the forms, content, techniques, and functions of art from the late 18th century to today considered within its socio-political and historical context.
Knowledge Area: Artistic Knowledge and Experience
Interdisciplinary Option: European Studies, Film & Digital Media Studies, Global Studies, International Film & Media Studies
Course equivalencies: FNAR202/ICVM202/IFMS202
Outcomes:
Students will demonstrate knowledge of the key ideas, formal expressions, themes, techniques, and functions of modern art in relation to social-historical contexts and modern culture from a global perspective

FNAR 203 Chicago: Face of a City (3 Credit Hours)
An examination of the history of the Chicago School of Architecture along with public sculpture and mural painting in Chicago, this course explores the changing trends of American public art, artists' response to a public audience, and issues of social responsibility. Participation in class field trips is required.
Interdisciplinary Option: Urban Studies
Outcomes:
Students will be able to identify the major social concerns of the city as well as the means by which visual arts can be integrated into its daily life; They will be able to recognize the major artists and recent artistic developments in their urban context

FNAR 207 Women, Art, and Society (3 Credit Hours)
An examination of women artists in Western culture and the societies in which they worked from the medieval period to the present. Women's artistic production, the styles and subject matter they embraced, and their relation to artistic trends of their eras are explored within the context of social attitudes about gender.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-FNAR207/WOST207/WSGS207
Outcomes:
Students will be able to demonstrate knowledge of women's contribution to the visual arts, the factors that impacted their participation in the art world, the underlying ways that gender constructions impact society, and feminist theory and methodologies related to art

FNAR 213 Drawing II (3 Credit Hours)
Pre-requisites: FNAR 113
An intermediate level drawing course designed to extend the understanding of the visual elements of drawing introduced in FNAR 113. This course includes an emphasis on color, and an exploration of a broader range of drawing media. Observational and conceptual problems are introduced.
Outcomes:
Students will be able to demonstrate an understanding of more advanced drawing principles through expanded practice and articulation of both formal and artistic ideas

FNAR 214 Painting II (3 Credit Hours)
Pre-requisites: FNAR 114
An intermediate level painting course designed to extend the understanding of the application of drawing, design, and color principles introduced in FNAR 114. This course will explore both oil and acrylic painting and a variety of substrates. Emphasis on individualized conceptual problems will be introduced to build technical, perceptual, and personal expressive interpretation of form through the painting idiom.
Outcomes:
Students will be able to demonstrate an understanding of more advanced painting principles through expanded practice and articulation of both formal and artistic ideas

FNAR 216 Lighting Techniques for Photography and Video Art (3 Credit Hours)
Pre-requisites: FNAR 115 or instructor permission
This course examines techniques with both available and artificial lights for works with photography and video. The students learn how the use and control of lighting are essential in working with lens-based media, whether it¿s on-location or in a studio environment. The concepts covered in the class will be used to produce photographic and video works.
Outcomes:
Students learn the equipment and techniques for effectively using available and artificial lights

FNAR 218 Printmaking II (3 Credit Hours)
Pre-requisites: FNAR 118
This course explores specialized work in intaglio, monotypes, and mixed media. Emphasis is placed on the development and perfecting of technique.
Outcomes:
Students demonstrate understanding of mixed-media printing; knowledge of a wide range of printmaking media; apply drawing concepts to the materials of printmaking; produce a consistent body of work in a complex medium; recognize historical prototypes and articulate the differences to others; and form judgments needed to adapt image making in a highly technical area of expression

FNAR 219 Photography: Digital Imaging (3 Credit Hours)
Pre-requisites: FNAR 115 - Foundations of Photography; A fully adjustable digital camera (DSLR) and an external hard drive are required
The course focuses on advanced editing techniques in Photoshop in regards to color correction, color management, image compositing, and image manipulation. Students will also learn the technical and aesthetic concepts that are crucial components of the digital workflow to further develop their visual languages as photographic artists.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-FNAR219/IFMS220
Outcomes:
Students learn more complex editing in Photoshop, how to operate a professional inkjet printer and the importance of paper selection; The course examines possibilities with digital technology

FNAR 222 Sculpture/Ceramics: Intermediate Studio (3 Credit Hours)
Pre-requisites: FNAR 124 and (FNAR 120 or FNAR 121); or instructor permission
This intermediate course expands the students' knowledge of materials, techniques, and concepts relative to the production of three-dimensional artwork. Students explore the dynamic interrelationship between art, craft, and design, with particular emphasis on the role and function of three-dimensional artworks historically and in contemporary practice. The conceptual possibilities for reproduction and multiplication in sculpture and ceramics is also highlighted. Visual and written research is a component of the course, as are personal reflection and group discussion. The course provides context for the key concepts explored.
Course equivalencies: FNAR320/FNAR222
Outcomes:
Students develop technical, aesthetic, and conceptual strategies in the creation of three-dimensional artwork, and increased awareness of cultural / historical perspectives of the medium

FNAR 232 Visual Communication II (3 Credit Hours)
Pre-requisites: FNAR 132 Visual Communication I
A continued study of the visual and conceptual principles introduced in FNAR 132 with an emphasis on advanced typographic principles and an introduction to the history of graphic design.
Outcomes:
Students gain knowledge of graphic design history and advance in their understanding of typography and imagery in the problem-solving processes in graphic design, including the further development of conceptual skills

FNAR 233 Digital Media Design (3 Credit Hours)
An exploration of image creation and design using Adobe Photoshop and Adobe Illustrator. This industry standard software is introduced as a vehicle for basic design concepts and as a tool for creative expression.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Outcomes:
Students gain an understanding of software skills and design basics; They develop the ability and techniques to manipulate software in the production of compositions effectively combining image and typography

FNAR 234 Digital Media: Vector (3 Credit Hours)
An exploration of vector illustration using Adobe Illustrator. This industry standard software is introduced as a vehicle for basic design concepts and as a tool for creative expression.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Outcomes:
Students gain an understanding of software skills and design basics; They develop the ability and techniques to manipulate software in the production of artistic compositions effectively combining image and typography

FNAR 251 African-American Art (3 Credit Hours)
An introduction to the achievements of Americans of African descent beginning with African roots through the Harlem Renaissance to the contemporary work of such internationally recognized artists as Richard Hunt and Martin Puryear. Content may vary according to the particular focus of the instructor.
Interdisciplinary Option: African Studies and the African Diaspora
Course equivalencies: X-FNAR251/BWS 251
Outcomes:
Students will be able to demonstrate knowledge of the richness of African-American visual arts as they developed within and outside the purview of traditional art venues

FNAR 260 The Art of Bookbinding (3 Credit Hours)
An introduction to the basic methods of bookbinding exploring traditional and one-of-a-kind artists books. Sewn, glued and free form structures will form the basis for the study of image and text within the framework of a personal approach to alternative surfaces.
Outcomes:
Students will be able to construct and manipulate a wide variety of media using the grammar and language of the book form; Through selected projects students will utilize compositional elements and descriptive to communicate ideas and concepts in book form

FNAR 303 Visual Arts Pedagogy (3 Credit Hours)
This course explores the ideas of teaching and learning through the visual arts and arts integration as they pertain to teaching artists. Coursework includes lecture and discussion, readings, model teaching, and teaching artist visits. Students will learn art pedagogy, classroom management techniques, and to develop their ideas into a curricular format.
Outcomes:
Students will recognize perspectives and theories around learning through the visual arts, identify appropriate teaching content and techniques, and design appropriate visual arts lessons, aligning content and standards

FNAR 304 Paris in the Nineteenth Century (3 Credit Hours)
An examination of Nineteenth Century art in Paris as shaped by contemporary changes in the physical, social and economic life of the city.
Interdisciplinary Option: European Studies
Outcomes:
Students will be able to demonstrate knowledge of nineteenth century art and artists in the context of the emergence of a modern, industrial urban complex

FNAR 305 American Art to 1945 (3 Credit Hours)
An examination of American painting, sculpture, and architecture from the colonial period to the period immediately following World War II. Emphasis is placed on the development of specifically American art forms as they evolved from their dependency upon European sources.
Outcomes:
Students will be able to recognize and demonstrate knowledge of major artists and artistic movements from the earliest days of the Republic when Europe served as a source of training and inspiration to the beginnings of modern times when global developments shifted the focus of artistic inspiration to New York

FNAR 306 Contemporary Art 1945-Present (3 Credit Hours)
An examination of recent developments in American and European art beginning with the physical shift of the center of artistic authority from Paris to New York during and immediately after World War II.
Outcomes:
Students will be able to recognize and demonstrate knowledge of major artists and artistic movements from the mid-twentieth century to the present day; They will also understand the major theoretical issues of the period

FNAR 311 Advanced Studio (3 Credit Hours)
Pre-requisites: FNAR 213 or FNAR 214 or equivalent
The most advanced level studio course in painting and drawing and is designed to aid the student in developing a body of creative work from conception to production to presentation. This course is conducted as an individual studio practicum between the instructor and student. The course may be taken twice for credit.
Outcomes:
Students will demonstrate a strong understanding of their own creative process through the development of a cohesive body of work

FNAR 314 Painting III (3 Credit Hours)
Pre-requisites: FNAR 114 and 214
An advanced level painting course designed to extend the understanding of the application of drawing, design, and color principles introduced in FNAR 114 and expanded in FNAR 214. This course will explore a range of painting materials and substrates. Emphasis is placed on critique and the development of conceptual problems to build technical, perceptual, and personal expressive interpretation.
Outcomes:
Students will develop a body of work through expanded practice and articulation of both formal and artistic ideas

FNAR 315 Photography: Films and Cameras (3 Credit Hours)
Pre-requisites: FNAR 219 or instructor permission
This course will explore processes and materials related to film-based photography. The primary focus of this course will be shooting films with various types of film cameras. Students will also explore integrating a digital workflow to edit and print images captured on film.
Outcomes:
Students will learn how to use film cameras, scan film, and incorporate a digital workflow with the editing and printing of film to produce photographic projects

FNAR 318 Printmaking III (3 Credit Hours)
Pre-requisites: FNAR 218
A continued exploration of Printmaking I, II which enables the student to enhance technical and conceptual skills in printmaking mediums.
Outcomes:
Through selected projects students will demonstrate knowledge of contemporary trends in printmaking including new digital media and photomechanical processes; They will acquire analysis skills and functional critical knowledge of the grammar and language of prints

FNAR 320 Video Art (3 Credit Hours)
Pre-requisites: FNAR 216 or instructor permission
This is a course on Video Art and expanded lens-based media that introduces students to time-based art and the language and history of moving images. Students will explore the ways in which artists use video in their artworks and the techniques foundational to the craft of creating moving images.
Outcomes:
Students will learn technical skills, such as cinematography, video editing, and audio recording; Students will develop their literacy of video media by exploring artworks made by pioneering artists

FNAR 322 Sculpture & Ceramics: Advanced Studio (3 Credit Hours)
Pre-requisites: FNAR 222 or permission of instructor
An advanced studio course in which students focus on developing an independent, compelling three-dimensional fine arts practice through a more focused approach to the application and synthesis of knowledge and experiences in comparison to Intermediate Studio courses. Visual and written research and field trips are components of the course, as are personal reflection and group discussion. Technical experiments and key concepts are geared specifically to the students interests and artistic goals.
Course equivalencies: FNAR321/FNAR322
Outcomes:
Select and apply appropriate materials and methods to resolve complex visual and conceptual problems and meaningfully discuss key issues; Create a portfolio of work built on independent investigation

FNAR 332 Visual Communication III (3 Credit Hours)
Pre-requisites: FNAR 232 Visual Communication II
This course includes the continued study of contemporary graphic design practice and further work in design with emphasis on analytical and creative approaches to problem solving across many types of media. Students are exposed to current best practices for effective self-promotion.
Outcomes:
Students gain an understanding of how contemporary design is used to communicate; They begin to develop a sophisticated body of work, advancing in their ability to critically evaluate visual communication

FNAR 333 Explorations in Typography (3 Credit Hours)
Pre-requisites: FNAR 232
Students explore both practical and experimental solutions utilizing typography as a means of communication and language visualization; investigating multifaceted modes of expression with emphasis placed on the study and creation of meaning relative to audience, culture, and history.
Outcomes:
Students develop a heightened awareness of the nuanced role that typography plays as a delivery mechanism for narrative structures, information, language visualization, and alternate forms of expression

FNAR 334 Motion Design (3 Credit Hours)
An exploration of time-based motion graphics. Industry standard software is utilized as a vehicle for learning graphic animation concepts and as a tool for creative expression.
Outcomes:
Students gain an understanding of software skills and design basics; They develop the ability and techniques to manipulate software in the production of motion graphics effectively combining image and typography

FNAR 338 Medieval Art (3 Credit Hours)
An examination of the art and architecture of the Christian world from 250 to 1453 CE, including the Early Christian, Byzantine, Carolingian, Romanesque, and Gothic periods as well as the influence of Islamic culture.
Interdisciplinary Option: Catholic Studies, Medieval Studies
Course equivalencies: X-FNAR338/MSTU380/ROST338
Outcomes:
Students will demonstrate knowledge of forms, ideas, themes, techniques, and functions of medieval art and their relation to relevant cultural, social, and historical contexts; They will acquire the skills to critically analyze these relationships and to understand the scholarship and issues related to medieval studies

FNAR 341 Renaissance Art - Painting (3 Credit Hours)
An examination of pictorial arts of the Renaissance in Northern and Southern Europe within the context of the material culture and society of the fifteenth and sixteenth centuries. Content may vary according to the particular focus of the instructor.
Interdisciplinary Option: Catholic Studies
Course equivalencies: X-FNAR341/ROST341
Outcomes:
Students will demonstrate knowledge of techniques, formats, themes, forms, functions, and patronage of European painting and its relation to society and culture and will acquire the skills to critically analyze these relationships

FNAR 342 Art in Rome (3 Credit Hours)
A survey of Rome's artistic heritage, including architecture, mosaic, painting, and sculpture from antiquity to the present day studied within the context of Rome's changing roles in Western European history. Classes are taught on site.
Knowledge Area: Artistic Knowledge and Experience
Interdisciplinary Option: Catholic Studies, European Studies, Italian Studies
Course equivalencies: X-FNAR342/ROST342
Outcomes:
Students will demonstrate knowledge of Rome's cultural role in history and of its artistic traditions and how they relate to their historical context

FNAR 343 Baroque Art (3 Credit Hours)
An examination of art and architecture in Europe during the seventeenth and eighteenth centuries with special concentration on the preeminence of Rome. (Rome Center students are expected to visit and study certain works of art in their original location).
Interdisciplinary Option: Catholic Studies, European Studies, Italian Studies
Course equivalencies: X-FNAR343/ROST343
Outcomes:
Students will demonstrate knowledge of forms, ideas, themes, techniques, and functions of seventeenth and eighteenth-century Western European art and their relation to relevant cultural, social and historical contexts; They acquire skills to critically analyze these relationships and to understand the scholarship and issues related to Baroque studies

FNAR 344 Early Italian Renaissance Art (3 Credit Hours)
An examination of Italian art and architecture from the late thirteenth to the late fifteenth centuries with special emphasis on Florence, Siena, and centers in northern Italy such as Padua and Mantua. (Rome Center students visit and study certain works of art in their original location).
Interdisciplinary Option: Catholic Studies, European Studies, Italian Studies
Course equivalencies: X-FNAR344/ROST344
Outcomes:
Students will demonstrate knowledge of forms, ideas, themes, techniques, and functions of early Italian Renaissance art and their relation to relevant cultural, social, and historical contexts; They acquire skills to critically analyze these relationships and to understand the scholarship and issues related to Italian Renaissance art

FNAR 345 Italian High Renaissance and Mannerist Art (3 Credit Hours)
An examination of Italian painting, sculpture, and architecture from the late fifteenth through the sixteenth centuries, focusing on the art of Florence, Rome, and Venice and including consideration of such artists as Leonardo da Vinci, Michelangelo, Raphael, and Titian. (Rome Center students visit and study works of art in their original location).
Interdisciplinary Option: Catholic Studies, European Studies, Italian Studies
Course equivalencies: X-FNAR345/ROST345
Outcomes:
Students will demonstrate knowledge of forms, ideas, themes, techniques, and functions of Italian High Renaissance and Mannerist art and their relation to relevant cultural, social, and historical contexts; Students acquire skills to critically analyze these relationships and to understand the scholarship and issues related to Italian High Renaissance and Mannerist art

FNAR 349 Art and the Catholic Tradition (3 Credit Hours)
An examination of the integral role that the visual arts and architecture have played in the Catholic faith since its early centuries.
Interdisciplinary Option: Catholic Studies, European Studies
Outcomes:
Students will understand the role of Catholic art and architecture within its theological, social, and historical contexts through an examination of both visual and related textual sources

FNAR 351 Latin American Art I: Ancient to 19th Century (3 Credit Hours)
This course examines creative production in Latin America from its Ancient empires to colonization, and independence in the 19th century. Exploring archaic periods to imperial integration, we consider the legacy of indigenous artistic production and mestizaje in the visual culture in the region from the 16th through 19th century.
Interdisciplinary Option: Latin American Studies
Course equivalencies: X-ANTH344/FNAR351/INTS385/LASP
Outcomes:
Students will demonstrate the ability to distinguish sculptural, pictorial, and architectural styles of diverse cultures within the geographical and temporal boundaries defined, and historical processes that shaped its production

FNAR 352 Islam and Visual Culture (3 Credit Hours)
This course examines the visual forms of Islamic culture from the 7th century to the present. Students will be introduced to the major monuments, artistic techniques, and regional styles, investigating visual works within their historical context and in relation to intercultural engagement.
Interdisciplinary Option: Arabic Language and Culture, Global Studies, Middle East and Islamic World Studies
Course equivalencies: X-FNAR352/IWS352
Outcomes:
Through study of major monuments, artistic techniques, regional style, and intercultural engagement, students will recognize Islam and visual culture as a global phenomenon entailing much more than religious artifacts

FNAR 353 Latin American Art II: Modern to Contemporary (3 Credit Hours)
This course provides an expanded understanding of modernity and its artistic partner, modernism, as well as the political, social and cultural landscapes that informed and formed the art and architecture of Latin America and its diasporic intersections, from the early twentieth century to the present day.
Interdisciplinary Option: Latin American Studies
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will demonstrate the ability to distinguish pictorial, sculptural, performative and architectural styles of diverse artists and identities associated with Latin America, and the historical processes that shaped its production

FNAR 355 Art of Africa (3 Credit Hours)
An examination of the traditional arts of West Africa and the Pacific and their role in the control and organization of tribal societies before the introduction of European influences.
Interdisciplinary Option: African Studies and the African Diaspora, Global Studies
Course equivalencies: ANTH345/BWS/INTS/FNAR355
Outcomes:
Students will demonstrate understanding of the unique role of the visual arts and music in the transmission of traditional mores; They will demonstrate understanding of the social and artistic distinctions found in a comparison of highly centralized societies with loosely defined tribal organization and how this is reflected in different cultural standards

FNAR 356 India, Women and Visual Culture (3 Credit Hours)
This course examines images of women and the work of women artists in India, engaging with broader topics in feminist and postcolonial theory, including indigenous responses to colonialism, contemporary critiques of the female form in Indian art, and the agency of women artists in the twentieth and twenty-first centuries.
Outcomes:
Student will become familiar with the work of Indian women artists and how images of Indian women have been understood and interpreted throughout the 20th and 21st centuries

FNAR 357 South Asian Visual Culture (3 Credit Hours)
An examination of the cultural background and major art forms of South Asia from the Indus River Valley settlements to the Present. As well as sculpture, architecture and painting, popular visual art forms will be examined.
Interdisciplinary Option: Asian Studies, Global Studies
Course equivalencies: X-FNAR357/ASIA357/INTS396
Outcomes:
Students will demonstrate knowledge of the religious, cultural and political forces shaping South Asian art; They will be able to distinguish the regional styles and identify the major monuments of South Asia; Students will understand the role of the visual arts in South Asian society

FNAR 358 Chinese Art and Culture (3 Credit Hours)
An examination of the cultural background and major visual art forms of China from prehistoric to early modern times.
Interdisciplinary Option: Asian Studies, Global Studies
Course equivalencies: X-FNAR358/ASIA358/INTS321
Outcomes:
Students will demonstrate knowledge of the philosophical and religious sources of the major traditional art forms of China; They will recognize the degree to which Confucian morality controlled the social and intellectual principles by which society was governed and the arts evaluated until the advent of Communism

FNAR 359 Japanese Art and Culture (3 Credit Hours)
An examination of the cultural background and major art forms of Japan from earliest times until the twentieth century.
Interdisciplinary Option: Asian Studies, Global Studies, Japanese Language and Culture
Course equivalencies: X-FNAR359/ASIA359/INTS329
Outcomes:
Students will demonstrate knowledge of the philosophical and religious sources of the major art forms of Japan; They will recognize the dual formative influences of indigenous traditions and those of foreign origin in what becomes a uniquely Japanese adaptation and resolution of ideas expressed effectively either verbally or visually

FNAR 360 Picturing Women in Renaissance and Baroque Art (3 Credit Hours)
An examination of issues related to women, art, and society in early modern Europe (15th-17th centuries) through a study of women as subject matter, viewers, producers, and patrons of art. A multi-disciplinary approach is employed to explore how gender as a social, political, and psychological category is reflected in and reinforced by visual culture.
Interdisciplinary Option: European Studies, Women & Gender Studies
Course equivalencies: X-FNAR360/WOST360/WSGS360
Outcomes:
Students will demonstrate knowledge of the ways gender is constructed in society, the origins and effects of gender attitudes, the interrelation between gender and visual culture, and the ways women have claimed agency; Students will critically analyze visual culture and gender attitudes and demonstrate knowledge of feminist theory and scholarly methods

FNAR 364 History of Graphic Design (3 Credit Hours)
A survey of the evolution of graphic communication from prehistory through postmodern design and the digital revolution.
Outcomes:
Students will demonstrate knowledge of the ideas, formal expressions, themes, techniques, and functions of graphic communication in relation to its social-historical context

FNAR 365 History of Photography (3 Credit Hours)
A chronological and thematic survey of the history of photography, especially in Europe and America. Fine art and utilitarian applications of the medium are considered by examining photographers who represent the origin and development of major pictorial forms; the interaction between technology and imagery; and the relationships between photography and historical, social and cultural events.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-FNAR365/ICVM365/IFMS365
Outcomes:
Students will be able to demonstrate understanding of the most important pictorial forms, themes, practitioners, processes and context of photography as a fine and applied art from the beginning of the nineteenth century to the present

FNAR 367 History of Architecture (3 Credit Hours)
An examination of the history of the built environment from the earliest known forms to contemporary examples, in terms of architectural theory, structural realities and socio-cultural usages.
Outcomes:
Students will be able to demonstrate an understanding of the many ways architecture serves the human race, and be able to constructively analyze the specific functions buildings serve within their particular cultural temporal milieu

FNAR 367R Architecture in Rome (3 Credit Hours)
This course explores architectural drawing as a way to incorporate hands-on experience in students` study of architecture in Rome. Students will develop drawing skills by conceptualizing architectural ideas in relationship to Rome's buildings and sites.
Outcomes:
Upon successful completion of this course, students will be able to develop basic architectural drawing skills, to understand graphic standards and drawing conventions of the architectural design as well as to analyze and appreciate Rome's architectural buildings and spaces

FNAR 368 Fine Arts Internship (1-4 Credit Hours)
A comprehensive introduction to gallery and/or studio operations in the Fine Arts Division. Internships will provide opportunities in various aspects of administration, scholarship, teaching, and sustaining standards in studio and/or gallery performance. Gallery internships available at the Ralph Arnold Gallery. External internships upon approval. Teaching/studio assistantship based on class availability. Departmental consent required for enrollment.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will develop practical experience for the professional world and be able to demonstrate knowledge of gallery/museum administration, scholarship, exhibition production, and/or class preparation and teaching

FNAR 380 Internship I (1-4 Credit Hours)
Pre-requisites: FNAR 332 Visual Communication III; Fine Arts Majors only
Visual Communication majors complete an internship providing an opportunity to use their visual and technical skills in a professional setting.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students work with others to develop and complete projects on a predetermined schedule; they get the opportunity to learn from professionals in the field; they find out how well they are doing as judged by the world outside the classroom

FNAR 381 Internship II (1-4 Credit Hours)
Pre-requisites: Permission of chairperson
Visual Communication majors complete an internship providing an opportunity to use their visual and technical skills in a professional setting.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students work with others to develop and complete projects on a predetermined schedule; they get the opportunity to learn from professionals in the field; they find out how well they are doing as judged by the world outside the classroom

FNAR 382 Visual Communication IV (3 Credit Hours)
Pre-requisites: FNAR 332 Visual Communication III and Senior standing or instructor permission
This course perfects the practice and tools of visual communication through a series of advanced projects with the aim of creating a robust and well-balanced body of work.
Outcomes:
Students are prepared to use their skills in research, analysis, and the design processes that lead to creative conceptualization to create appropriate design decisions and refined design solutions

FNAR 383 Interactive Design (3 Credit Hours)
Pre-requisites: FNAR 233 Digital Media Design
This course introduces aspects of interaction and web design including theory, common best practices, usability, information architecture, graphic design in the interactive context, prototyping, and the technical parameters of an interactive environment. Industry standard software will be used. Strong emphasis will be placed on design principles, information hierarchy, and typography.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-FNAR383/ICVM383/IFMS383
Outcomes:
Experience in the research, planning, design, and prototyping of interactive communication

FNAR 388 Critical Approaches to Visual Art (3 Credit Hours)
Pre-requisites: FNAR 202: Modern Art, C- or higher
This course examines key theoretical issues in contemporary art. Students will apply these concepts to develop strategies for creative output. The course will feature readings, discussions, written assignments, and projects to explore interdisciplinary approaches that emphasize idea as the primary means of visual production.
Outcomes:
Gain an understanding of key theoretical concepts in contemporary art; Apply theoretical concepts for the production of artworks; Develop a contemporary art practice in preparation for FNAR 398 Capstone

FNAR 390 Art History: Methods and Research (3 Credit Hours)
Pre-requisites: Restricted to Art History Majors and Minors
An examination of theoretical, critical and methodological issues as related to Modern and Post-Modern art.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-FNAR390/IFMS390
Outcomes:
Students will learn to recognize and apply a range of appropriate theoretical approaches and scholarly methods

FNAR 391 Senior Thesis in Art History (3 Credit Hours)
Students develop an in-depth scholarly research paper while engaging new theoretical frames or topics to expand upon the writing and research of a paper of their choice from a previous art history class. In addition, they will share their research in a final, formal oral presentation.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students produce a polished in-depth research paper; They demonstrate the ability to synthesize and apply ideas from scholarly sources; formulate, develop, and articulate in verbal and written form relevant issues

FNAR 392 Senior Thesis II: FNAR Art History Capstone (3 Credit Hours)
Pre-requisites: FNAR 391 or instructor permission; Art History majors only; Senior standing
The second half of the capstone experience for art history majors. In Senior Thesis II, students write an in-depth scholarly research paper.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students produce a polished in-depth research paper; They demonstrate the ability to synthesize and apply ideas from scholarly sources; formulate, develop, and defend a thesis; and critically analyze and articulate in verbal and written form the issues and ideas relevant to their topic

FNAR 393 Topics in Studio Art (3 Credit Hours)
Special topics in specific areas of study in studio art.
Outcomes:
Students will master topics in areas of studio art not offered elsewhere in the curriculum

FNAR 394 Topics in Art History (1-4 Credit Hours)
Special topics in specific areas of study in art history.
Outcomes:
Students will master topics in areas of art history not offered elsewhere in the curriculum

FNAR 398 Fine Arts Capstone (3 Credit Hours)
Pre-requisites: Completion of the most advanced course in the student's FNAR concentration
The course serves as the culmination of each student's experience as a Fine Art major. Students will demonstrate the ability to produce work that exemplified the application and synthesis of the knowledge gained from the courses and experiences.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will demonstrate the ability to produce art work suitable for exhibit

FNAR 399 Independent Study (1-4 Credit Hours)
Pre-requisites: written permission of instructor and chairperson
Advanced student are afforded the opportunity to work on an in-depth project in the medium of his/her choice in a tutorial setting. The course is developed in consultation with a faculty advisor and is stated formally in a written contract. of definition, goals, procedures and outcomes.
Outcomes:
Students will be able to demonstrate the ability to produce a significant body of original artwork on a focused theme

Food and Nutrition (FONU)

Discover, search, courses (p. 2661)!

FONU 110 Culinary Explorations (3 Credit Hours)
Translate food and nutrition recommendations into delicious and realistic, food-based meals using basic culinary techniques. Examine the major food groups including both common and uncommon foods in each category. Explore ways to incorporate a variety of foods into meals considering budget, health, availability, personal values and preference.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) describe foods in major food category; 2) explain food based recommendations to promote nutritional adequacy and health; 3) demonstrate culinary competence by recipe preparation; 4) critique a unique recipe that they developed; 5) plan menus for a week that meet specified criteria

FONU 215 Fundamentals of Nutrition (3 Credit Hours)
For non-majors. Nutrients essential to a healthy diet, consideration of nutrition issues of public concern.

FONU 225 Food as Culture (3 Credit Hours)
Explore culture through foods and food ways across the globe. This course examines food patterns of each continent using a multidimensional approach. Ethnic, geographical, religious, historical, geographical, and societal influences on food patterns of various regions and people will be presented through didactic and experiential activities. Information will be presented with the perspective of enhancing engagement and build positive relationships with future clients and communities served.
Course equivalencies: FONU 225 / FONU 226R
Outcomes:
Upon successful completion of this course, the student will be able to: identify common food sources of nutrients in the eating patterns of selected cultures; Describe foods, dishes, and preparation methods common to selected nations and cultures; Explain traditional food use in selected cultures, including infant feeding and illness; Compare and contrast typical American to specialized ethnic retail food markets; Discuss experiences with ethnic food

FONU 226R The Mediterranean Diet: Culture, Health, and Nutrition (3 Credit Hours)
Explore culture through foods and foodways of the Mediterranean Diet. Through didactic and experiential activities, this course examines food patterns of the Mediterranean areas using a multidimensional approach, including its historical roots, cultural significance, dietary patterns, nutrient profile, and associated health outcomes by exploring the most iconic foods of Italy and the wider Mediterranean. The course will explore their origins, methods of production, nutritional values, and impact on health and the environment. A key focus will be the contrast between Italian and American eating habits, highlighting how these cultural differences may influence public health in both countries. Core Mediterranean staples across different cultures will be examined in depth, covering their manufacturing processes, nutritional makeup, consumption trends, and potential health implications.
Interdisciplinary Option: European Studies, Global Studies, Italian Studies
Course equivalencies: FONU 225 / FONU 226R
Outcomes:
Identify common food sources of nutrients in the eating patterns of selected cultures of the Mediterranean; Describe foods, dishes, and preparation methods common to selected nations and cultures of the Mediterranean; Explain traditional food use in selected areas of the Mediterranean, including health and illness; Compare and contrast typical eating habits of the US and the Mediterranean, including the culture food markets; Discuss experiences with Mediterranean food and wine

FONU 320 Nutrition Through the Life Cycle (3 Credit Hours)
Pre-requisites: FONU 215 Fundamentals of Nutrition
Learn about nutrient needs through the lifecycle from birth through aging to support optimal health and human potential. Key nutrition concepts to support normal growth and development, health maintenance, and disease prevention will be included. Nutrient needs will be translated to food-based solutions as an integral component of health habits. Community resources will be examined.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) describe the needs and roles of key nutrients at various stages of the life cycle; 2) translate nutrient needs into food-based solutions appropriate for life cycle stage; 3) explain common issues related to nutrition and food patterns specific to life cycle stage; 4) recommend community resources appropriate to life cycle stage

FONU 400 Role Development in Dietetic Practice (1 Credit Hour)
Pre-requisites: Admission to the dietetic internship
This course includes concepts and resources related to professional practice as a registered dietitian. Ethical issues, licensure, and scope of practice will be explored. Professional development will be discussed from entry-level to advanced practice. Fiscal aspects of professional practice, such as reimbursement and compensation, will also be considered.
Outcomes:
Students will define ethical issues, licensure requirements, increase professional development, and learn about fiscal aspects of the practice, such as reimbursement and compensation

FONU 410 Nutrition Focused Physical Assessment (2 Credit Hours)
This course focuses on physical and laboratory assessment skills necessary for the dietitian's practice, particularly in nutritional assessment and medical nutrition therapy. Emphasis is placed on skill development relevant to nutrition care of the individual, and/or for nutrition program delivery or evaluation. This course incorporates both classroom and lab activities. Master of Science in Dietetics major, or instructor permission
Outcomes:
Demonstrate competence in conducting a nutrition-focused physical assessment; Demonstrate skills for assessment and care of the patient receiving specialized nutrition support; Measure common physiologic parameters used in medical nutrition therapy

FONU 420 Transition to Supervised Practice in the Dietetic Internship (1 Credit Hour)
Pre-requisites: admission to LDI
This course begins skill development in preparation for the transition from the classroom environment to supervised practice in dietetics. Topics include ethical, legal, and safety issues for novice dietetic practice such as OSHA, HIPPA, IDPH, and standards of other regulatory agencies in health care. The nutrition care process including nutrition diagnostic language, planning and implementation of medical nutrition therapy (MNT) interventions are discussed. Basic familiarity and use of evidence-based practice protocols related to common conditions such as hypertension, diabetes, cardiovascular, renal, and/or gastrointestinal disorders, provision of specialized nutrition support and others. Medical terminology mastery is expected. Emphasis is placed on synthesis and application of undergraduate material, and effective clinical resource application.

FONU 422 Medical Nutrition Therapy Theory (3 Credit Hours)
Pre-requisites: FONU 420
This course includes the study of medical nutrition therapy (MNT) theory for dietetic practice including acute care, long term and outpatient environments. Complex medical conditions including trauma, burns, transplant, oncology, diabetes mellitus, sepsis, cardiovascular, gastrointestinal, neurological, and renal disorders. Alternate modalities of nutrition supported are included. The course includes theoretical foundations of patient care protocols, synthesis of research findings, and trends in health care related to practice protocols. This course should be taken in conjunction with FONU 423 for current Loyola dietetic interns.

FONU 423 Supervised Practice (SP) in Medical Nutrition Therapy (2 Credit Hours)
Pre-requisites: FONU 420 and admission to the Loyola Dietetic Internship
This course requires the student to complete 480 hours of dietetic SP in health care environments that provide acute care and renal replacement therapy. Students work collaboratively with preceptors in hosting agencies. This accompanies FONU 422. Dates, hours and locations are arranged by the LDI faculty. Evaluation is based on practice performance, and assignments. Additional seminars are required as assigned by faculty.

FONU 424 Public Health Nutrition and Research Theory for Dietetic Practice (3 Credit Hours)
Pre-requisites: FONU 420 and admission to the Loyola Dietetic Internship
This course includes the study of nutritional epidemiology, general principles of public health, major public health nutrition programs, research for beginning dietetic practitioners and professional development issues. Nutritional surveillance, program evaluation, and methods are discussed through lecture and review of professional literature.

FONU 425 Supervised Practice Public Hlth Nutrition, Rsrch, Prof Dvlpmnt & Marketing (2 Credit Hours)
Pre-requisites: FONU 420 and admission to the Loyola Dietetic Internship
This course includes 480 hours of dietetic SP in public health nutrition, research, marketing and an elective professional development area. Students work collaboratively with preceptors in hosting agencies. This accompanies FONU 424. Dates, hours and locations are arranged by the LDI faculty. Evaluation is based on practice performance, and assignments. Additional seminars are required as assigned by faculty.

FONU 426 Food Management Theory: Geriatric Nutrition (1 Credit Hour)
This course provides study of food management theory including food systems, operations, resource management (human, food, financial), quality improvement, safety and sanitation. Geriatric nutrition care and management theory is also revised from perspectives of medical care and facility management including regulatory agency standards.

FONU 427 Supervised Practice: Food Management, Geriatric Nutrition (1 Credit Hour)
This course requires the student to complete 240 hours of SP in food management and geriatric nutrition/long term care environments. Students work collaboratively with preceptors in hosting agencies. This accompanies FONU 426. Dates, hours and locations are arranged by the LDI faculty. Evaluation is based on practice performance, and assignments. Additional seminars are required as assigned by faculty.

FONU 499 Independent Study (1-4 Credit Hours)
Pre-requisites: Restricted to Parkinson Exercise Science students
This is a directed study course in exercise science for approved students, supervised by a member of the faculty. Students must have an assigned professor, written objectives, planned outcomes and timelines. Permission of the Program Director.
Outcomes:
Students will be able to miiculate a general understanding of the selected topic

FONU 501 Writing and Communications in Nutrition and Dietetics (3 Credit Hours)
This course focuses on scientific writing and communication skills essential to dietetic practice. Emphasis will be placed on clarify, consistency and translation of scientific evidence into effective messages for diverse populations. Standards for publication of practice and research based papers understanding and responding to peer review process will be discussed. Master of Science in Dietetics major, or instructor permission
Outcomes:
Create proposals, scientific reports and/or articles using writing skills of planning, drafting, revising and editing to incorporate appropriate evidence tailored to different audiences, publications and media formats

FONU 503 Dietetic Theories & Research Methods (3 Credit Hours)
This course analyzes theories of health and disease with implications for dietetic practice. Principles of research will be examined with a focus on methods to assess food, nutrients and related physical or biochemical parameters.

FONU 505 Trends in Dietetic Practice (2 Credit Hours)
Pre-requisites: admission to the MS in Dietetics, Dietetic Internship or FONU Program Director permission
This course includes emerging scientific research in the dietetics field as it relates to consumer food choices, evaluating the safety and health of the food supply, functional foods, vegetarian diets, food allergics and weight management. The course will focus on theoretical foundations, and synthesis of research trends into practice protocols. Mock counseling sessions will also occur utilizing up to date counseling methods including movational interviewing for behavior change.
Outcomes:
Student will demonstrate knowledge in emerging areas related to dietetic practice

FONU 507 Behavioral Change for Health Promotion (3 Credit Hours)
This course focuses on concepts and theories of health and behavior related to food, nutrition and other behaviors. Evidence to support select skills and techniques for health will be evaluated and applied. The impact of interventions will be analyzed to provide evidence-based frameworks for behavioral change in individuals and groups. Master of Science in Dietetics major, or instructor permission.
Outcomes:
Incorporate evidence-based behavioral change interventions into nutrition care plans; demonstrate skill in a behavioral change encounter in a simulation, analyze major approaches and influences of health promotion (eg policy, community engagement, advocacy and social marketing)

Forensic Science (FRSC)

Discover, search, courses (p. 2661)!

FRSC 340 Introduction to Forensic Science (3 Credit Hours)
Pre-requisites: CJC 101; Restricted to Forensic Science majors
This course provides an overview of the basic principles and uses of forensic science within the field of criminal justice. The course is designed for forensic science majors emphasizing the scientific aspects in the forensic sciences.
Interdisciplinary Option: Forensic Science
Outcomes:
Students will be able to identify the uses and limitations of the existing forensic science techniques used within the field of criminal justice

FRSC 341 Forensic Ethics and Professional Practice (3 Credit Hours)
Pre-requisites: FRSC 340; Restricted to Forensic Science majors
This course develops a basic scientific literacy, understanding of the scientific method of inquiry, understanding ethical thought, and application of ethics to the field and professional practice of forensic science.
Interdisciplinary Option: Forensic Science
Outcomes:
Students will demonstrate an understanding and application of ethics in the forensic sciences; Students will be able to articulate the role and challenges of ethical issues facing forensic science today and the applicability of ethics in the profession and their individual careers

FRSC 342 Expert Witness Testimony and Court Room Demeanor (3 Credit Hours)
Pre-requisites: FRSC 341; Restricted to Forensic Science majors
The goal for this course is to give you the information necessary to be an effective and ethical witness. This should help throughout your career and help make testimony not so much something to be feared as something which represents the culmination of your work in a case.
Interdisciplinary Option: Forensic Science
Outcomes:
Students should develop courtroom and expert witness testimony literacy, understanding of the dynamics during court, and appreciation of the impact to the judicial system

FRSC 343 Physical Organic Chemistry for Forensic Science (3 Credit Hours)
Pre-requisites: PHYS 112; MATH 132; CHEM 222 or (CHEM 224 and CHEM 226) or (CHEM 240, CHEM 241, CHEM 260, and CHEM 272); Restricted to Forensic Science majors
An introduction to the foundational principles of physical and physical organic chemistry. The course focuses on the application of these principles to solving problems in forensic science. The numerous aspects of forensic science require a working knowledge of physical chemistry, the foundational principles, and the interrelation of cause and effect.
Outcomes:
Understand the basic concepts of physical and physical organic chemistry; Acquire and interpret data and form conclusions; Use critical thinking skills in problem solving

FRSC 350 Pattern Evidence I (3 Credit Hours)
Pre-requisites: FRSC 341; Restricted to Forensic Science majors
This course introduces the basic principles and methods of forensic pattern evidence: latent fingerprints, firearms and tool marks, and question documents.
Interdisciplinary Option: Forensic Science
Outcomes:
Students will demonstrate an understanding of the three (3) forensic pattern evidence areas; Students will develop techniques, work on non-probative cases, and write formal reports of findings

FRSC 350L Pattern Evidence Lab I (1 Credit Hour)
Pre-requisites: FRSC 350 (may also be taken as a Corequisite); Restricted to Forensic Science majors
This course introduces the basic laboratory methods of forensic pattern evidence: latent prints, firearms and tool marks, and questioned documents.
Interdisciplinary Option: Forensic Science
Outcomes:
Students will demonstrate a basic competency through development of various techniques; Students will work non-probative cases, along with written formal reports of their findings

FRSC 360 Forensic Drug Chemistry I (3 Credit Hours)
Pre-requisites: (CHEM 212, CHEM 214, CHEM 224, and CHEM 226) or (CHEM 241, CHEM 272, and CHEM 280); Restricted to Forensic Science majors
Co-requisites: FRSC 360L
This course provides an introduction to the basic principles of forensic drug analysis. The use of microscopic, chemical, and chromatographic techniques to gather data, interpret results, and form conclusions are developed. Recognizing the strengths and weaknesses in the techniques used and the correct interpretation of results is stressed.
Interdisciplinary Option: Forensic Science
Outcomes:
Students will be able to discuss techniques, skills, advances, and limitations of the modern forensic laboratory; Students will be able to summarize basic concepts of forensic drug analysis, testing, and formal reporting

FRSC 360L Forensic Drug Chemistry Laboratory I (2 Credit Hours)
Pre-requisites: (CHEM 212, CHEM 214, CHEM 224, and CHEM 226) or (CHEM 241, CHEM 272, and CHEM 280); Restricted to Forensic Science majors
Co-requisites: FRSC 360
This course provides both basic and advanced foundations to the principles of forensic drug analysis. The use of basic and advanced analytical techniques to gather data, interpret results, and form conclusions are developed. Additionally, national forensic laboratory operational standards and requirements are incorporated.
Interdisciplinary Option: Forensic Science
Outcomes:
The techniques, skills, advances, and limitations of the modern forensic laboratory will be discussed; The students will be able to demonstrate basic/advanced concepts of forensic drug analysis, testing, and formal reporting

FRSC 361 Forensic Toxicology I (3 Credit Hours)
Pre-requisites: FRSC 360 and FRSC 360L; Restricted to Forensic Science majors
Co-requisites: FRSC 361L
This course stresses the practical and theoretical aspects to forensic toxicology and the study of drugs and their implications in a forensic setting when toxicity sets in. The analysis and description of drugs are introduced. Case studies are reviewed where drug use may become a forensic matter.
Interdisciplinary Option: Forensic Science
Outcomes:
Students should develop basic scientific literacy, understanding of the scientific method of inquiry, understanding ethical thought, and application of ethics to the field of forensic toxicology

FRSC 361L Forensic Toxicology Laboratory I (1 Credit Hour)
Pre-requisites: FRSC 360 and FRSC 360L; Restricted to Forensic Science majors
Co-requisites: FRSC 361
This course stresses the practical and theoretical aspects to forensic toxicology and the study of drugs and their implications in a forensic setting when toxicity sets in. The analysis and description of drugs are introduced. Case studies are reviewed where drug use may become a forensic matter.
Interdisciplinary Option: Forensic Science
Outcomes:
Students will be able to discuss techniques, skills, advances, and limitations of the modern forensic laboratory; Students will be able to summarize basic concepts of forensic drug analysis, testing, and formal reporting

FRSC 370 Forensic Biology (3 Credit Hours)
Pre-requisites: FRSC 341, BIOL 102, BIOL 112; Restricted to Forensic Science majors
Co-requisites: FRSC 370L
This course stresses the practical and theoretical aspects to forensic biology. Forensic biology includes the examination, identification, and characterization of biological materials found on various types of evidence.
Interdisciplinary Option: Forensic Science
Outcomes:
Students should develop basic scientific literacy, understanding of the scientific method of inquiry, understanding ethical thought, and application of ethics to the field of forensic biology

FRSC 370L Forensic Biology Laboratory (1 Credit Hour)
Pre-requisites: FRSC 341, BIOL 102, and BIOL 112; Restricted to Forensic Science majors
Co-requisites: FRSC 370
This course stresses the practical and theoretical aspects to forensic biology. Forensic biology includes the examination, identification, and characterization of biological materials found on various types of evidence.
Interdisciplinary Option: Forensic Science
Outcomes:
Students should develop basic scientific literacy, understanding of the scientific method of inquiry, understanding ethical thought, and application of ethics to the field of forensic biology

FRSC 371 Forensic Molecular Biology Lecture and Laboratory (5 Credit Hours)
Pre-requisites: BIOL 282, BIOL 283, FRSC 342, FRSC 370, and FRSC 370L; Restricted to Forensic Science majors
This course prepares students to work in forensic DNA analysis. The lectures cover the basic aspects of DNA structure and function while the laboratory gives students experience with the techniques and instruments used in forensic DNA analysis.
Interdisciplinary Option: Forensic Science
Outcomes:
Students will have a strong theoretical understanding of STR marker origin, population biology, and legal uses and will be able to isolate and process DNA for STR scoring

FRSC 390 Forensic Science Internship (1-4 Credit Hours)
Pre-requisites: FRSC 342; Restricted to Forensic Science majors
The purpose of this course is to enhance the student's development and learning through observational and participatory experience in forensic focused criminal justice agencies.
Interdisciplinary Option: Forensic Science
This course satisfies the Engaged Learning requirement.
Course equivalencies: X-FRSC 390/ANTH 396A
Outcomes:
Students will be able to contribute in a meaningful way to the operation of a specific forensic focused criminal justice agency and be able to identify and describe the link between their field experience and prior courses

FRSC 392 Forensic Science Seminar (1 Credit Hour)
A weekly seminar course with presentations - generally given by outside speakers - covering topics in chemistry usually not encountered in the classroom.
Interdisciplinary Option: Forensic Science
Outcomes:
Students will demonstrate their understanding by writing a one page summary of each presentation

FRSC 394 Forensic Science Research (1-4 Credit Hours)
Pre-requisites: Restricted to Forensic Science majors; Prior consultation with the instructor and a completed agreement form; Agreement forms for this directed study course are obtained from the program office, and the completed form (signed by the student, instructor, and program director) must be deposited in the program office before enrollment
This course gives undergraduate students an opportunity to participate in research in a selected area.
Interdisciplinary Option: Forensic Science
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will accomplish the research task defined in the contractual arrangement between the student and the instructor

FRSC 395 Special Topics in the Forensic Science (3 Credit Hours)
Pre-requisites: FRSC 341; Restricted to Forensic Science majors
Special topics courses provide students with an opportunity to examine various forensic science topics not normally offered as part of the Program's regular curriculum.
Interdisciplinary Option: Forensic Science
Outcomes:
Students will be able to gain an understanding of new issues confronting the forensic sciences or an advanced understanding of traditional subjects covered in basic courses

French (FREN)

Discover, search, courses (p. 2661)!

FREN 101 Elementary French I (3 Credit Hours)
Pre-requisites: No previous knowledge of French is expected; Please go to http://www.luc.edu/modernlang/exam.shtml for placement test instructions, especially if you took any French courses in high school or college
Taught in French. Instructs basic communicative French, the people and cultures where it is spoken, using formal and informal registers, and speaking in present and future time. Students will listen and respond, read and write, ask and answer simple questions in basic functional French. Content: personal topics, everyday living.
Outcomes:
Student will successfully interpret and express needs pertaining to home, work, college, leisure, and dining; Achievement level desired: Novice Low, American Council on the Teaching of Foreign Languages (ACTFL*) standards

FREN 102 Elementary French II (3 Credit Hours)
Pre-requisites: FREN 101 or one semester college French with C- or better, or placement test score; Please go to Modern Languages home page for placement test instructions; You must take the placement test if you took any French courses in high school
Taught in French. Continuation of basic French inter-communication skills both producing French (speaking and writing), and interpreting French (listening and reading.) The aim is to comprehend and contribute to discussions about families, housing, sports, travel, and traditions in French.
Outcomes:
Students will comprehend and speak in present, future, and past narrative; get and give simple direction; share personal information; Achievement level desired: ACTFL* Novice Low to Mid

FREN 103 Intermediate French I (3 Credit Hours)
Pre-requisites: FREN 102, or equivalent French at another college, with C- or better, or placement test score; Exam required for placement on the basis of high-school work: please go to Modern Languages home page for placement test instructions
Taught in French. Course continues to work on focus on pronunciation, grammar. and developing conversational and writing fluency. Students will read excerpts of French and francophone media or literature. Topics include the environment and the many francophone cultures and tasks include narrating in more complex past, future and hypothetical contexts.
Outcomes:
Students become more fluent and precise in expressing opinions, asking and answering more probing and data-driven questions, on topic; Achievement level desired ACTFL* Novice Mid to High

FREN 104 Intermediate French II (3 Credit Hours)
Pre-requisites: FREN 103, or equivalent French at another college, with C- or better, or placement test score; Placement test on the basis of high-school work required: please go to Modern languages home page for placement test instructions
Taught in French. Students will comprehend and produce French in more complex contexts (literary and cultural) while reviewing intermediate grammar structures to improve fluency and accuracy. Students present and debate cultural, historical or current events topics; practice expressing emotion, opinion, judgment, necessity, hypotheticals, and regret.
Outcomes:
Students will skillfully interpret and write about literature excerpts or French and francophone media; They will summarize, narrate, and offer opinions; Achievement level desired ACTFL* Novice High to Intermediate Low

FREN 250 French Composition and Conversation I (3 Credit Hours)
Pre-requisites: FREN 104, or college transfer equivalent, with C- or better, or placement test score; Placement test based on high-school work is required: please go to Modern Languages home page for placement test instructions
Taught entirely in French. Students develop advanced interpretive and presentation skills, detecting sequencing, time frames and chronology in texts, whether heard or viewed. Format is discussion, presentation, role plays, several compositions written in a process.
Outcomes:
Students will share points of view verbally and in writing on contemporary topics discovered in current media of French and francophone cultures; Achieved level desired ACTFL* Intermediate Low to Mid

FREN 251 French Composition and Conversation II (3 Credit Hours)
Pre-requisites: FREN 104, or college transfer equivalent, with C- or better or placement test score; Placement test based on high-school work is required: please go to Modern Languages home page for placement test instructions
Taught entirely in French. Via classic, French New Wave, francophone to contemporary French-speaking film students discover and compare cultural differences, discuss global or local concerns, spanning the disciplines. Writing in a process leads to more sophisticated writing skills.
Outcomes:
Students become ever-precise and effective in communicating facts, opinions, and concerns about French-speaking communities in relationship to their own; Achieved level desired ACTFL* Intermediate Low to Mid

FREN 270 Main Currents of French Literature & Culture I (3 Credit Hours)
Pre-requisites: Pass FREN 250 and/or FREN 251 with C- or better or AP credit for both 250 and 251, or with instructor's consent
Survey of representative works of French literature from the Middle Ages, the Renaissance, and the 17th and 18th centuries, examining the formation of French cultural identity up through the Enlightenment and the French Revolution.
Interdisciplinary Option: European Studies
Outcomes:
Students will identify literary and cultural trends and ruptures across these centuries, and explain them in some detail; Achievement level desired: ACTFL* Intermediate Mid to High

FREN 271 Main Currents of French Literature & Culture II (3 Credit Hours)
Pre-requisites: Pass FREN 250 and/or FREN 251 with C or better, acquire AP credit, or instructor's consent
Survey of representative works of French literature in all genres, from Romanticism through narrative realism and the modernist innovations of Surrealism and existentialism in the 20th century.
Interdisciplinary Option: European Studies, Global Studies
Outcomes:
Students will learn to identify these literary and cultural movements, and explain in some detail their importance regarding French cultural identity; Achievement level desired: ACTFL* Intermediate Mid to High

FREN 300 Tutorial for Credit (1-6 Credit Hours)
Pre-requisites: FREN 270 and 271, with C or better, and instructor's consent; If either 270 or 271 have been completed, the other may be taken simultaneously with 3##
Eligible students majoring in French may elect tutorial for credit; topic chosen in consultation with faculty member.
Outcomes:
Student may choose their own topic to explore

FREN 301 Stylistics (3 Credit Hours)
Pre-requisites: FREN 270 and 271, with C or better, and instructor's consent; If either 270 or 271 have been completed, the other may be taken simultaneously with 3##
This is advanced work in writing expository prose is based on intensive study of advanced grammar and syntax with attention to peculiar features of the French idiom. Students examine phonology and phonetics with attention to French speech patterns and rhythms whilst enhancing vocabulary development through the varieties of lexical references and other dictionaries.
Outcomes:
Students will be able to demonstrate a sophisticated, comprehensive command of the complexities of written and spoken French; Achievement level desired: ACTFL* Advanced Low

FREN 302 French for Professions (3 Credit Hours)
Pre-requisites: FREN 270 and 271, with C or better, and instructor's consent; If either 270 or 271 have been completed, the other may be taken simultaneously with 3##
Surviving in global careers--commerce, law, diplomacy, communications, health--requires knowledge of business terminology and organism structures. Students study current events, and present on francophone companies, institutions, and NGO's. Résumés are perfected in French, interview questions are drilled. The French government DAF (Diplôme du français des affaires) exam is optional.
Outcomes:
Students will be able to navigate confidently in French business and diplomatic sectors; They will be prepared to interview in French; ACTFL* achievement level desired: Intermediate High to Advanced Low

FREN 308 Literary Criticism and Theory (3 Credit Hours)
Pre-requisites: Completion of French major course requirements and instructor's consent
Capstone for all French Majors, taken with other Modern Languages & Literatures language majors. Students will study major schools and themes in literary theory, both historical and contemporary. Rhetorical, philosophical, historical, and cultural approaches to literature will be studied in intimate conjunction with specific literary texts drawn from several linguistic and cultural traditions.
Course equivalencies: X-FREN/GERM/ITAL/SPAN308
Outcomes:
Students will be able to demonstrate critical knowledge and understanding of major theoretical issues in the study of literature; ACTFL* achievement level desired: Advanced Low to Mid

FREN 309 Francophone Literature (3 Credit Hours)
Pre-requisites: FREN 271 with C or better, and instructor's consent
Students explore salient characteristics and themes of literature of various genres written in French from Northern and Sub-Saharan Africa, the Caribbean, and Québec. Topics include «la négritude», other reactions to colonialism, `borrowed language', ideas and realities of liberation, post-colonialism, the francophone woman, literature as political agent, and satire.
Interdisciplinary Option: African Studies and the African Diaspora, Global Studies
Course equivalencies: X-FREN309/BWS 309/INTS309
Outcomes:
Students will be able to demonstrate critical knowledge of historical and political implications of these movements in contemporary global society; ACTFL* achievement level desired: Intermediate Mid to Advanced Low

FREN 311 French Modernity (3 Credit Hours)
Pre-requisites: FREN 271 with C or better, and instructor's consent
Students study major French authors of the twentieth and twenty-first centuries (Proust, Malraux, Sartre, Camus, and others), with attention to the historical context of their works against the background of two world wars and world-wide revolutionary movements, along with their interaction with other artistic media.
Interdisciplinary Option: European Studies, Global Studies
Outcomes:
Students will be able to demonstrate critical knowledge of major literary works studied, and appreciate the major issues and their cultural significance; ACTFL* achievement level desired: Intermediate Mid to Advanced Low

FREN 314 Survey of Medieval Literature (3 Credit Hours)
Pre-requisites: FREN 270 with a grade of C or better and permission of the instructor
This course will explore the literature and culture of the French Middle Ages. Students will develop familiarity with literary genres and themes including the chansons de geste, romances, and fabliaux, courtly love, the international character of medieval French literature, voices and representation of women, and the role of the Church.
Interdisciplinary Option: Medieval Studies
Course equivalencies: X-FREN314/MSTU372
Outcomes:
Students will be able to demonstrate critical knowledge of major literary works studied, and appreciate the major issues and their cultural significance; ACTFL* achievement level desired: Intermediate Mid to Advanced Low

FREN 316 Renaissance France (3 Credit Hours)
Pre-requisites: FREN 270 with C or better, and instructor's consent
Students study major authors of the French Renaissance in their historical and cultural contexts. Authors to be read will include Marot, Labé, Scève, Rabelais, Du Bellay, Ronsard, and Montaigne, in conjunction with study of Renaissance culture, the Reformation, the Wars of Religion, and the other arts.
Interdisciplinary Option: European Studies
Outcomes:
Students will be able to demonstrate critical knowledge of major literary works studied, and appreciate the major issues and their cultural significance; ACTFL* achievement level desired: Intermediate Mid to Advanced Low

FREN 317 Le Grand Siècle (3 Credit Hours)
Pre-requisites: FREN 270 with C or better, and instructor's consent
Students study major authors of the "long" 17th century in historical and cultural contexts: Corneille, Cyrano, Descartes, Pascal, Mme de Lafayette, Molière, Racine, Mme de Sévigné, the moralistes, among others. Focus is on complex historical contexts of the period: baby kings, the Fronde, religious conflict, the court and wars of Louis XIV.
Interdisciplinary Option: European Studies
Outcomes:
Students will be able to demonstrate critical knowledge of major literary works studied, and appreciate the major issues and their cultural significance; ACTFL* achievement level desired: Intermediate Mid to Advanced Low

FREN 318 Enlightenment France (3 Credit Hours)
Pre-requisites: FREN 270 with C or better, and instructor's consent
Students study major French authors of the European Enlightenment. Authors to be read will include Montesquieu, Voltaire, Rousseau, and Diderot, among others, in the context of the development of (and resistance to) the Enlightenment and the French Revolution.
Interdisciplinary Option: European Studies
Outcomes:
Students will be able to demonstrate critical knowledge of major literary works studied, and appreciate the major issues and their cultural significance; ACTFL* achievement level desired: Intermediate Mid to Advanced Low

FREN 319 Romantic Century (3 Credit Hours)
Pre-requisites: FREN 271 with C or better, and instructor's consent
Students study the emergence of French Romanticism in the wake of Revolutionary tumult (Lamartine, Vigny, and Hugo), and of the deeper and darker reaction to bourgeois culture (Baudelaire, Flaubert, Rimbaud, and others), marking relations with painting, sculpture, and music.
Interdisciplinary Option: European Studies
Outcomes:
Appreciation of works from modern sensibilities are formulated, plus an understanding of major issues and questions in these works and their culture; ACTFL* achievement level desired: Intermediate Mid-Advanced Low

FREN 320 Survey of Literature of the Theatre (3 Credit Hours)
Pre-requisites: French 270 and 271, with C or better, and instructor's consent; If either 270 or 271 have been completed, the other may be taken simultaneously with 3##
Students study theater in French from its medieval beginnings to the present. Authors/works to be read may include medieval farce, Turnèbe, Corneille, Molière, Racine, Diderot, Hugo, Rostand, Ionesco, Girardoux, Beckett, and Césaire. Works will be studied in historical, cultural, critical, and performing contexts.
Outcomes:
Students will demonstrate critical knowledge of major works of French theater, and appreciate the major issues involved and their cultural significance; ACTFL* achievement level: Intermediate Mid to Advanced Low

FREN 330 Survey-Poetry Thry & Practice (3 Credit Hours)
Pre-requisites: FREN 270 and 271, with C or better, and instructor's consent; If either 270 or 271 have been completed, the other may be taken simultaneously with 3##
Theory and Practice. Study of French narrative, dramatic, and lyric poetry, with emphasis on the lyric.
Outcomes:
Students will be able to demonstrate detailed critical knowledge and comprehension of major literary works of the genre under study, as well as a sophisticated critical appreciation of the major issues and questions in these works and their culture

FREN 340 Survey of Prose: Fictional & Non-Fictional (3 Credit Hours)
Pre-requisites: FREN 270 and/or FREN 271 with C or better, and instructor's consent
Students conduct detailed analysis of the outstanding stylistic features of France's great prose writers from the XVIth century to the present day. Works may include writings by Rabelais, Montaigne, Pascal, Voltaire, Flaubert, Balzac, Michelet, Proust, Camus, Malraux and Lévi-Strauss, among others.
Interdisciplinary Option: European Studies
Outcomes:
Appreciation of the rich variety of expressive skills and moral penetration among France's great prose writers; ACTFL* achievement level desired: Intermediate Mid to Advanced Low

FREN 369 Introduction to French for Reading Knowledge (3 Credit Hours)
This course will prepare students for reading and conducting research in French. Fundamentals of grammar, syntax, and vocabulary essential to reading competence will be covered, using materials drawn from a wide range of fields. Completion of this course with a passing grade fulfills the Graduate School language competency requirement. This course is restricted to graduate students.
Course equivalencies: FREN369 / FREN109

FREN 390 French & Francophone Cultures & Civilizations (3 Credit Hours)
Pre-requisites: FREN 271 with C or better, and instructor's consent
This multidisciplinary study of French and Francophone cultures as they have developed over the centuries will focus on the historical, institutional, religious, and artistic manifestations that have contributed to the formation of these identities. Special attention will be given to their revolutionary role in politics, painting, intellectual life, and cinema.
Interdisciplinary Option: African Studies and the African Diaspora, Global Studies
Course equivalencies: X-FREN390/INTS390
Outcomes:
Students will be able to identify and discuss the revolutionary roles these cultures have had in politics, painting, intellectual life, and cinema; ACTFL* achievement level desired: Intermediate Mid to Advanced Low

FREN 395 Internship (3 Credit Hours)
Pre-requisites: Completion of at least one 300-level French course and instructor's consent
Eligible students who have secured an internship related to the field of study may complete an internship for credit, with the approval of a faculty member. Students complete reflective assignments and a final project in French, in consultation with the faculty member.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students gain professional experience while working with the French language and Francophone cultures and applying skills they have learned in the classroom

FREN 399 French Honors Tutorial (3 Credit Hours)
Eligible students majoring in French and with departmental honors may elect tutorial for credit; topic chosen in consultation with faculty member. Instructor's consent, restricted to students in French BA.
Course equivalencies: FREN399H / FREN399
Outcomes:
Students will explore a topic of their choice guided by a faculty member, and will conduct a research project that will result in a final paper

General Nursing (GNUR)

Discover, search, courses (p. 2661)!

GNUR XXX Comprehensive Exam Semester 1 (0 Credit Hours)
Course designation for program planning master's students into the comprehensive examination requirement; First semester of the process.

GNUR YYY Comprehensive Exam Semester 2 (0 Credit Hours)
Course designation for program planning master's students into the comprehensive examination requirement; Second semester of the process.

GNUR 102 Introduction to Professional Nursing Practice (1 Credit Hour)
This course introduces the mission of the MNSON and the foundations of nursing practice. Nursing is presented as a scientific profession with a heritage of strong values-based leadership based on critical thinking and evidence based practice.
Outcomes:
Describe the mission of the MNSON and discuss the ANA Scope of Standards of Nursing Practice

GNUR 157 Human Anatomy and Physiology I Theory (3 Credit Hours)
Co-requisites: GNUR 157L The first in a two-part sequence, this course is designed to give students a detailed understanding of the structure of the major organs and systems of the human body from the cellular to the system level
It includes the integumentary system, the skeletal system, the skeletal muscles, the nervous system, and the special senses (sight, hearing, smell, taste). By the end of the course, students will be able to demonstrate understanding of the workings of the above systems from an anatomical and physiological viewpoint.
Outcomes:
Use appropriate terminology to discuss anatomy and physiology; Identify anatomical structures and describe the complex interrelationships between structure and function; Explain how body systems work together to maintain homeostasis; Describe the general structure and function of the integumentary system, the skeletal system, the skeletal muscles, the nervous system, and the special senses and their interactions with each other; Recognize and apply patterns that unify, organize, and simplify the abundant detail of anatomy and physiology

GNUR 157L Human Anatomy and Physiology I Lab (1 Credit Hour)
Co-requisites: GNUR 157 This course is the companion laboratory course for GNUR 157, Anatomy and Physiology I
This course is designed to give students a basic understanding of the structure and function of the major organs and systems of the human body from the cellular to the system level of the integumentary, skeletal, muscle and nervous systems. By the end of the course, students will be able to demonstrate understanding of the workings of the systems from an anatomical and physiological viewpoint.
Outcomes:
Identify anatomical structures using appropriate terminology and describe the complex interrelationships between structure and function of the system level of the integumentary, skeletal, muscle and nervous systems; Use appropriate laboratory tools and techniques to examine anatomical structures and physiological functions; Work collaboratively with peers during lab and communicate results of lab work effectively

GNUR 158 Human Anatomy and Physiology II Theory (3 Credit Hours)
Co-requisites: GNUR 158L The second in a two-part sequence, this course is designed to give students a detailed understanding of the structure of the major organs and systems of the human body from the cellular to the system level
It includes the endocrine, cardiovascular, lymphatic, respiratory, digestive, urinary, and reproductive systems, as well as the concepts of development, metabolism, fluid and electrolyte balance, and acid-base balance. By the end of the course, students will be able to demonstrate understanding of the workings of the above systems from an anatomical and physiological viewpoint.
Outcomes:
Use appropriate terminology to discuss anatomy and physiology; Identify anatomical structures and describe the complex interrelationships between structure and function; Explain how body systems work together to maintain homeostasis; Describe the general structure and function of endocrine, cardiovascular, lymphatic, respiratory, digestive, urinary, and reproductive systems, as well as the concepts of development, metabolism, fluid and electrolyte balance, and acid-base balance and their interactions with each other; Recognize and apply patterns that unify, organize, and simplify the abundant detail of anatomy and physiology

GNUR 158L Human Anatomy and Physiology II Lab (1 Credit Hour)
Co-requisites: GNUR 158 This course is the companion laboratory course for GNUR 158, Anatomy and Physiology II
This course is designed to give students a basic understanding of the structure and function of the major organs and systems of the human body from the cellular to the system level of the endocrine, cardiovascular, respiratory, digestive, urinary, and reproductive systems. By the end of the course, students will be able to demonstrate understanding of the workings of the systems from an anatomical and physiological viewpoint.
Outcomes:
Identify anatomical structures using appropriate terminology and describe the complex interrelationships between structure and function of the system level of the endocrine, cardiovascular, respiratory, digestive, urinary, and reproductive systems; Use appropriate laboratory tools and techniques to examine anatomical structures or physiological functions; Work collaboratively with peers during lab and communicate results of lab work effectively

GNUR 160 Chemistry for Health Professions (3 Credit Hours)
Introduction to general chemistry and elements of organic chemistry and biochemistry include the review of families of simple organic molecules and simple sugars, the role of enzymes in biochemical reactions, and the metabolism of carbohydrates, proteins, and lipids. Must also enroll in GNUR 160L.
Course equivalencies: GNUR160/CHEM151

GNUR 160L Chemistry for Health Professions Lab (1 Credit Hour)
Companion laboratory course for GNUR 160, Chemistry for Health Professions Must also enroll in GNUR 160.

GNUR 203 Microbiology for Health Professions with Lab (3 Credit Hours)
This course examines basic concepts of microbial metabolism, genetics, and classification in order to understand their effects on human health. Clinically relevant microbial diseases will be explored, with a focus on microbe-human interactions, epidemiology, and methods to control microbes. The course includes a laboratory component designed to complement lecture topics.
Outcomes:
Identify the association between the major groups of microorganisms, the portals of entry and exit of microorganisms that cause disease, and disease processes; Describe the components and functions of the human immune system, the role it plays in protecting the host, and methods that microorganisms use to evade or defeat the immune system; Apply microbial control principles to aseptic technique, antimicrobial treatments, drug resistance, and antibiotic stewardship; Explain the magnitude of the global impact of microbes on human illness, and the factors that hamper effective global public health efforts; Implement microbiological techniques such as isolation of organisms, counting microbial populations, staining, ELISA, and metabolic identification of organisms

GNUR 207 Concepts of Professional Nursing Practice (2 Credit Hours)
This course explores nursing concepts for professional nursing practice in the care of individuals, families, communities, and populations, along the health-illness continuum. Content includes client and family- centered care, client teaching, levels of prevention, the determinants of health and illness, and the principles of population- focused and culturally sensitive care. Students are introduced to the historical and political influences of the current US health care delivery system with an emphasis on the issues of health care access, health care disparities, social determinants of health, biases in the healthcare setting, and health literacy among culturally diverse and vulnerable populations.
Outcomes:
1) Describe the role of the professional nurse in health promotion and risk reduction for individuals, families, communities, and populations, with an emphasis on the impact of values, lifestyle, and cultural influences; 2) Understand the cultural basis for health beliefs and practices for individuals, families, communities, and populations; 3) Understand the epidemiological model for diseases, including the levels of prevention and population-based approaches; 4) Explain the structure and function of the US health care delivery system and the impact of these factors on access, quality, and cost of health care; 5) Understand the health goals for the nation identified by Healthy People initiative

GNUR 230 Success in Nursing I (1 Credit Hour)
This course is designed to help students to understand and develop the vocabulary and critical thinking skills necessary to increase their success in nursing courses, the nursing program, and the university.
Outcomes:
The student will be able to increase their mathematical, verbal, critical thinking, and study skills; The student will learn to use the nursing process as a problem solving method

GNUR 238 The Foundations of Clinical Practice in Nursing (3 Credit Hours)
Pre-requisites: Must have taken and passed GNUR 155, GNUR 156, and GNUR 160 with a C- or better; Must also enroll in GNUR 238L
This course introduces basic nursing concepts such as critical thinking, the nursing process, physiologic and safety needs of the client, health assessment, and fundamental nursing skills, including safe medication administration. The course prepares students for the role of the professional nurse in the clinical setting.

GNUR 238L Foundations of Clinical Practice in Nursing Lab (1 Credit Hour)
The students will utilize critical thinking skills and the nursing process to apply basic nursing concepts in the performance of health assessment and fundamental nursing skills. The course prepares students for the role of the professional nurse in the clinical setting. Must enroll in GNUR 238.

GNUR 290 Concepts in Older Adult Health (2 Credit Hours)
Pre-requisites: Must have taken and passed GNUR 238, GNUR 293 and GNUR 297 with a C- or better, OR be enrolled in GNUR 238, GNUR 293 and GNUR 297
This course introduces students to the care of older adults. It is designed to explore current concepts and practices pertaining to aging. This course provides an overview of the normal physical, psychological, and social-cultural aspects of the aging process. It addresses health and health alterations of aging and exploration of attitudes toward care of the older adult. Enrollment is restricted to students admitted to the BSN program.

GNUR 293 Pathophysiology (4 Credit Hours)
Pre-requisites: Must have taken and passed GNUR 155, GNUR 156 and GNUR 160 with a C - or better
This course provides the student with knowledge of the basic mechanisms involved in pathophysiological processes.
Outcomes:
The student will be able to use critical thinking skills in the application of pathophysiological processes to clinical practice

GNUR 294 Foundations of Pharmacology (3 Credit Hours)
Pre-requisites: Must have taken and passed GNUR 293, GNUR 203, GNUR 238, GNUR 297 with a C- or better; Must have taken and passed GNUR 238L with a P
This course introduces nursing students to pharmacology and provides them with the foundation needed to administer medications.

GNUR 297 Clinical Nutrition for Nursing Practice (2 Credit Hours)
Pre-requisites: Must have taken and passed GNUR 155, GNUR 156, and GNUR 160 with a C- or better
This course introduces foundations of nutrition for nursing practice. Evidence-based nutrition is applied across the life-span and health continuum. Nutritional assessment, cultural practices and health policies are explored.

GNUR 360 Nursing Research: For Evidence-Based Practice (3 Credit Hours)
Pre-requisites: Must have taken and passed PSYC 304 or STAT 103 with a C- or better
This course provides basic knowledge regarding the research process and the importance of evidence-based nursing practices. Students learn to analyze how evidence is generated to make clinical judgments that inform practice in a variety of settings.
Course equivalencies: GNUR350/GNUR3660

GNUR 361 Nursing Ethics (3 Credit Hours)
Pre-requisites: Must have taken and passed GNUR 360, MSN 277, MSN 277L, GNUR 294, GNUR 290 with a C- or better
This course offers students, as future health care professionals and as health care recipients, opportunities to think philosophically, demonstrate ethical awareness, do ethical reflection, and apply ethical principles in decision-making.
Outcomes:
The student will be able to recognize and respond to ethical challenges inherent in the delivery of health care to individuals with differing philosophical views and diverse backgrounds providing reasoned arguments for views held/positions taken

GNUR 383 Leadership for Professional Nursing Practice (3 Credit Hours)
Pre-requisites: Must have taken and passed MCN 273, MCN 374, CMAN 272, CMAN 380, GNUR 360 with a C- or better , OR MCN 273L, MCN374L, CMAN 272L, CMAN 380L with a P
This course prepares the student to provide leadership in the practice setting and profession. Personal identity and role as nurse leader is addressed from unit-based to organizational and policy environments. Principles of leadership are developed and applied in clinical settings. Legal, regulatory and professional standards related to nursing practice are presented.

GNUR 384 Clinical Role Transition (3 Credit Hours)
Pre-requisites: Must have taken and passed MCN 273, MCN 374, CMAN 272, CMAN 380, GNUR 360,with a C- or better; Must have taken and passed MCN 273L, MCN 374L, CMAN 272L, and CMAN 380L with a P; Must also enroll in GNUR 383
Through preceptor-based learning and seminars, this experience focuses on assimilating the role behaviors of a professional nurse as a provider, designer, manager, and coordinator of care in health care systems, and a member of a profession. Clinical reasoning, critical thinking, prioritization, and the integration of knowledge are emphasized in this experience, focusing on the provision of patient-centered, evidence-based care as a member of an interprofessional health care team.
This course satisfies the Engaged Learning requirement.
Outcomes:
Upon successful completion of this course, the student is able to: 1) Incorporate standards of practice into the development, implementation, and evaluation of evidence-based, patient-centered care; 2) Apply principles of quality and safety in patient care settings; 3) Apply knowledge of prioritization and delegation in the management of care; 4) Collaborate with patients, families, and members of the interprofessional health care team in the design, delivery, and evaluation of evidence-based, patient-centered care; 5) Exemplify role behaviors consistent with a member of a profession; 6) Incorporate ethical, legal, regulatory, financial, and economic considerations into the design, delivery, management, and evaluation of care

GNUR 399 Independent Study (1-5 Credit Hours)
Requires approval of Associate Dean Academic Programs in Nursing.

GNUR 402 Ethics for Health Professionals (2 Credit Hours)
In their various roles and practice settings, health care professionals participate in the unfolding stories of patients/clients and their families. They encounter ethical questions, concerns, problems and dilemmas in the course of their professional lives. These challenges affect health care professionals as independent and collaborative decision makers as well as members of the health care team who may be called upon to implement the decisions of others. This course provides students with opportunities to explore the impact of ethical issues on their personal and professional lives. Individual, family, institutional and societal issues are discussed. Students are guided in the application of frameworks that aid in resolving ethical dilemmas in professional practice. Emphasis is placed on developing skills in reflective moral thinking.

GNUR 403 Theories and Concepts for Professional Nursing Practice (3 Credit Hours)
This course is focused on theories and concepts that inform professional nursing practice across settings and spheres of care. The relations between concepts, theories, nursing knowledge, and nursing practice are emphasized. The evolution of knowledge for nursing practice, in nursing practice, and of nursing practice are emphasized in the course.
Outcomes:
Understand influential forces in the development of knowledge for professional nursing practice; Analyze the relation between theory, research and scholarship, and practice; Differentiate knowledge for nursing practice, knowledge in nursing practice, and knowledge of nursing practice; Relate patterns of knowing to professional nursing practice; Explain the use of selected concepts and theories as guides to nursing practice

GNUR 404 Theories & Concepts for Advanced Clinical Practice (3 Credit Hours)
This course focuses on the development and use of disciplinary knowledge as a foundation for advanced nursing practice. Basic philosophical assumptions and the history of knowledge development in nursing are presented. The relation between concepts, theory, research, and practice are emphasized, with a focus on concepts and middle-range theories that are applied in advanced nursing practice.
Outcomes:
Understand the history and driving forces for knowledge development in nursing; Describe the philosophical foundations of nursing and advanced nursing practice; Understand the levels of theory development in nursing; Explain the use of selected concepts and middle-range theories to guide advanced nursing practice; Analyze concepts and theories for use in nursing practice; Analyze the relation between theory, research, and nursing practice

GNUR 405 Introductory Statistics for Healthcare Professionals (3 Credit Hours)
Pre-requisites: Restricted to MSN, DNP, and PhD Nursing students
This course is focused on facilitating student acquisition of the knowledge and skills that will enable them to manage basic statistical issues that confront practitioners and researchers in health professions. Course topics and experiences will prepare students to interpret findings from published research and quality improvement reports and to conduct basic data analysis in future projects.
Outcomes:
1) Define basic statistical concepts; 2) Differentiate descriptive and inferential statistical tests; 3) Describe the purpose and appropriate application of statistical techniques; 4) Interpret the meaning of statistical tests; 5) Manage and analyze data using statistical software

GNUR 407 Social Justice and Ethics in Health Care (3 Credit Hours)
This course examines social justice, ethics, and nursing advocacy in healthcare at global, national, and local levels for the doctorally prepared nurse. Social justice and ethical issues in healthcare are analyzed using established theories and frameworks. Recommendations for resolution of social justice and ethical issues will be addressed.
Outcomes:
Upon successful completion of this course the student will be able to: 1) Understand the historical, cultural, economic, and political theories and perspectives of social justice and ethics; 2) Analyze social justice and ethical issues at local, national, and global levels; 3) Apply professional codes to individual and interwoven issues of social justice, ethics and leadership; 4) Develop a plan to address population health inequities, based on evidence, codes and principles

GNUR 408 Research for Advanced Clinical Practice (3 Credit Hours)
Pre-requisites: Admission to a Master of Science in Dietetics or Master of Science in Nursing program
This course prepares students to understand that scholarly inquiry, evaluation of evidence, and the development of evidence-based practices and protocols form the foundation health care practice. The importance of translation of scientific evidence to improve practice is emphasized.
Outcomes:
Conceptualize an evidence-based protocol or pilot research study that corresponds to a clinical, educational administrative or policy issue or problem

GNUR 410 Information Technology in Healthcare (3 Credit Hours)
This course prepares graduate-entry nursing students to apply health information technology, informatics, and data analytics to enhance the quality, safety, and equity of patient care. Through case-based learning, hands-on exploration of electronic health records and clinical decision support systems, analysis of real and simulated data, and structured discussion of emerging technologies - such as artificial intelligence and telehealth - students examine how digital tools influence clinical workflows, decision-making, and patient outcomes. Emphasis is placed on ethical and evidence-informed technology use, including privacy and cybersecurity, interoperability, mitigation of algorithmic bias, and equitable access to digital health resources. By the end of the course, learners will be able to critically evaluate and ethically apply health technologies to support data-driven clinical decisions, optimize care processes, collaborate across disciplines, and contribute to technology-enabled quality improvement initiatives in diverse healthcare settings.
Outcomes:
Evaluate electronic health record systems, clinical decision support tools, and health information technologies to optimize nursing workflows, enhance interprofessional communication, and improve patient safety outcomes; Analyze clinical and population health data using informatics principles to identify patterns, interpret trends, and support evidence-based practice and quality improvement initiatives; Assess emerging healthcare technologies and their implementation in clinical practice, including impact on care delivery, patient outcomes, and implications for health equity; Evaluate informatics policies, privacy and security standards, and interoperability frameworks to ensure ethical technology use, protect patient data, and promote equitable access to health information

GNUR 412 Scholarly Inquiry for Evidence-Based Nursing Practice (3 Credit Hours)
This course provides graduate nursing students with the knowledge and skills necessary to engage in scholarly inquiry within advanced nursing roles. Emphasis is placed on understanding and applying research, evidence-based practice, and quality improvement (QI) frameworks to improve health outcomes and healthcare systems. The interrelationships among nursing theory, research, and clinical practice are explored. Through critical appraisal of diverse research methodologies, learners identify practice gaps, evaluate evidence, and design evidence-based projects. Principles of ethical scholarship, cultural humility, and protection of vulnerable populations are emphasized. Students create an individualized plan to advance their role as scholarly nurses who contribute to nursing knowledge and healthcare quality.
Outcomes:
Examine appropriate applications of quality improvement, research, and evidence-based practice in improving patient outcomes; Compare and contrast research methodologies and the appropriate application of each; Analyze the interrelationships among theory, research, and nursing practice to guide advanced clinical decision-making; Design an evidence-based practice project that demonstrates appropriate application of research to practice; Create a plan to advance one's scholarship and professional development as a scholarly nurse; Apply ethical and cultural principles in research, quality improvement, and evidence-based practice

GNUR 413 Advanced Pharmacology (3 Credit Hours)
This course will be the foundation for the advanced practice nurse to make appropriate decisions regarding the pharmacological management of patients in clinical practice. Pharmacological principles, including pharmacokinetics, pharmacodynamics, mechanisms of adverse drug reactions, and contraindications will be discussed. Legal requirements for writing prescriptions and the format for prescriptions as well as common sources of medication errors and methods to prevent them will be described. Developmental considerations, socioeconomic status, and complementary therapies will be addressed throughout the course. Pharmacotherapy of selected common disorders will be addressed. Students will synthesize and integrate diverse viewpoints, principles, and selected research findings related to the complex needs of patients via case study analyses. This course, along with clinical courses, will prepare the advanced practice nurse for prescriptive authority.
Outcomes:
Apply the principles of pharmacokinetics and pharmacodynamics to pharmacological interventions used in selected acute and chronic illnesses; Describe the potential iatrogenic effects of pharmacological therapy; Identify drugs of choice for selected health problems considering the patient's age, socioeconomic status, cultural background, concurrent illnesses, pregnancy, lactation, and potential drug-drug, drug-food, and drug-herbal medicinal interactions; Discuss factors that affect compliance with prescribed and OTC medication regimens and their implication for drug selection and patient education; Comply with TJC National Patient Safety Goals related to prescription writing; Critique research on drug therapy pertinent to one's own practice; Discuss ethical, legal, and economic issues associated with pharmacological interventions

GNUR 414 Health Assessment (2 Credit Hours)
This course prepares students to conduct comprehensive health assessments. Students will develop clinical reasoning skills, physical and psychosocial assessment techniques, and critical thinking skills to inform clinical decision-making. Students will synthesize knowledge gained from this course and required science courses to perform and understand holistic assessments with diverse populations in a variety of healthcare settings.
Outcomes:
Apply clinical reasoning and judgment to conduct comprehensive health assessments across diverse populations; Synthesize and translate assessment data using systematic processes to identify health problems and develop comprehensive, person-centered nursing plans that address actual and potential health needs; Demonstrate assessment knowledge by performing comprehensive health histories and applying clinically relevant physical, psychosocial, and functional assessment findings that distinguish normal from abnormal findings, identify health disparities, and inform nursing practice across the adult lifespan and four spheres of care; Describe system-level quality and safety practices that utilize evidence-based assessment protocols and policies that improve patient outcomes across healthcare settings

GNUR 414L Health Assessment Laboratory and Clinical (1 Credit Hour)
This laboratory course provides students with structured, hands-on practice experiences to develop, refine, and demonstrate competence of comprehensive health assessments. Students apply theoretical knowledge and evidence-based assessment techniques through progressive skill development in laboratory, simulation, and clinical practice settings. Students will integrate clinical reasoning skills and professional communication while performing assessments of the individual and family in various healthcare settings, across diverse populations.
Outcomes:
Conduct comprehensive and focused health history interviews that incorporate developmental, cultural, and contextual factors to guide clinical decision making; Perform systematic, comprehensive physical assessments across all body systems, utilizing clinical reasoning to identify normal and abnormal findings; Analyze and synthesize comprehensive assessment data using clinical reasoning to identify patient-centered nursing problems and establish priorities for evidence-based nursing interventions; Communicate comprehensive assessment findings verbally and through written documentation that reflects professional nursing standards, informs interprofessional collaboration, and meets legal/ethical principles

GNUR 416 Nursing Fundamentals (1 Credit Hour)
This course prepares students to demonstrate mastery of fundamental nursing skills that serve as the foundation for safe, effective, evidence-based, and person-centered nursing practice. The course integrates knowledge from nursing science and pathophysiology to develop clinical judgment, technical proficiency, and professional accountability. Students synthesize theoretical knowledge with hands-on skill development to perform fundamental nursing interventions with precision, safety, and cultural responsiveness across diverse populations and healthcare settings.
Outcomes:
Apply theoretical frameworks and evidence-based knowledge to guide clinical reasoning and patient-centered nursing practice across diverse populations and healthcare settings; Analyze the legal, ethical, and regulatory standards that guide professional nursing practice, documentation requirements, interprofessional collaboration, and quality and safety frameworks; Synthesize principles of mathematics and physiological concepts for safe medication management and identify risks in medication administration across the lifespan

GNUR 416L Nursing Fundamentals Lab and Clinical (1 Credit Hour)
This laboratory course provides hands-on practice in lab, simulation, and clinical environments to develop mastery of fundamental nursing skills. Students apply theoretical knowledge from the concurrent theory course to perform essential nursing interventions with technical proficiency, clinical judgment, and professional accountability. Through skills practice, simulation, and competency-based assessments, students synthesize knowledge with psychomotor skill development, emphasizing precision, safety, and cultural responsiveness across diverse populations and healthcare settings.
Outcomes:
Demonstrate competence in performing fundamental nursing skills with safety, clinical judgment, and person-centered care principles; Accurately document procedures and nursing interventions, ensure interprofessional care coordination, and maintain compliance with legal, regulatory, and ethical standards for professional nursing practice; Integrate nursing knowledge and mathematical competencies to ensure safe medication management

GNUR 418 Advanced Pharmacology and Therapeutics (3 Credit Hours)
This course provides the knowledge and skills to pharmacologically manage patients; health conditions in a safe, high-quality, and cost-effective manner. Emphasis is on the development of therapeutic decision-making for evidence-based and efficacious drug selection based on health problems, individual factors influencing drug response, such as genetics, age, body weight, and lifestyle, and economic considerations. The course focuses on safe prescriptive practice, patient education, and monitoring of therapeutic response, or pharmacovigilance, in diverse populations across the lifespan.
Outcomes:
Apply evidence from nursing and related sciences to guide safe, effective, and cost-conscious pharmacologic decision-making; Develop pharmacological treatment plans based on the integration of physiology, pathophysiology, pharmacodynamics, and pharmacokinetics; Manage pharmacologic therapies safely and accurately, incorporating pharmacokinetics, pharmacodynamics, pharmacogenomics, developmental, and patient-specific considerations; Evaluate nonpharmacological and adjunctive interventions that complement pharmacologic care and align with patient-centered goals; Mitigate risks associated with pharmacologic and nonpharmacologic therapies, including adverse events, drug interactions, and social determinants of health; Engage in interprofessional collaborative practice within professional scope and regulatory boundaries

GNUR 419 Pathophysiology for Nursing Practice (3 Credit Hours)
This course builds upon knowledge of anatomy, physiology, and the biological sciences to examine pathophysiologic mechanisms underlying human disease. Students integrate cellular, molecular, and systems-level processes to understand physiological dysfunction, adaptive and maladaptive responses, and disease progression. Students analyze how genomic, environmental, and social determinants influence health outcomes and apply this understanding to support clinical reasoning, evidence-based practice, and professional nursing judgment across diverse populations.
Outcomes:
Evaluate the adaptive and maladaptive responses of body systems to internal and external stressors using systems thinking; Analyze alterations in normal physiological processes to explain the mechanisms underlying disease states; Integrate cellular, molecular, and systems-level concepts to interpret how alterations in structure and function contribute to disease development and clinical manifestations; Examine the influence of genomic, environmental, and social determinants of health on the development and progression of disease; Synthesize pathophysiologic knowledge as a foundation for advanced clinical reasoning, judgment, and professional nursing practice

GNUR 420 Leadership and Roles in Advanced Nursing Practice (3 Credit Hours)
This course focuses on leadership concepts and theories with emphasis on application for transformation in healthcare. This course is designed to assist the student to enter into leadership and advanced nursing practice roles. Special emphasis is placed on the student's personal and professional development as a leader with a clear, individual vision for impacting the health of specific populations.
Outcomes:
Upon successful completion of this course the student will be able to: 1) Synthesize knowledge of the concept of role and its components as they relate to advanced nursing practice; 2) Understand role expectations of advanced nursing practice and its major components: advanced practitioner (NP, CNS, CNM, CRNA), consultant, change agent, case manager, educator, researcher and leader and how they are integrated into health systems; 3) Articulate the role of the graduate prepared nurse as a clinical nurse expert, leader and innovator in healthcare; 4) Analyze knowledge of leadership theories for use as a foundation for role enactment as a leader in healthcare; 5) Understand principles of systems theory and their application to the clinical environment; 6) Compare models for change and sustainability consistent with current healthcare system dynamics; 7) Identify actionable leadership opportunities to improve nursing practice and patient outcomes; 8) Understand the potential for information systems to support decision making and innovation in practice and care delivery systems

GNUR 421 Pharmacology for Nursing Practice (3 Credit Hours)
This course examines the principles of pharmacology essential for safe, evidence-based nursing practice across the lifespan. Students explore pharmacokinetics, pharmacodynamics, pharmacogenomics, and mechanisms of action of major drug classes used in acute, chronic, and population-based care settings. Emphasis is placed on clinical decision-making, medication safety, patient education, health equity, and interprofessional collaboration. Learners apply pharmacologic knowledge to assess therapeutic effectiveness, anticipate adverse effects, prevent medication errors, and support person-centered care for diverse populations.
Outcomes:
Explain core pharmacologic principles, including pharmacokinetics, pharmacodynamics, and pharmacogenomics; Analyze major drug classes in relation to mechanisms of action, therapeutic effects, adverse effects, and contraindications; Examine the impact of patient-specific factors on medication selection and therapeutic response; Evaluate medication safety principles, including causes of medication errors and adverse drug events; Assess ethical, legal, and regulatory considerations related to medication use in nursing practice; Apply pharmacologic knowledge to clinical scenarios to support clinical reasoning and evidence-informed decisions

GNUR 424 Health Promotion Across the Lifespan (3 Credit Hours)
This course provides students with the skills to promote healthy lifestyles across the lifespan to improve the health of individuals and families. Theoretical models are examined to understand health-promotion decision making. Guided by these theories, students design evidence-based health teaching plans and health maintenance schedules across the lifespan. Using a patient-centered approach, structural, cultural, and social determinants of health are explored, with an emphasis on cultural humility, social justice, and patient safety standards and goals.
Outcomes:
Analyze individual and family health behaviors across the lifespan using established health behavior theories; Assess individual and family health risks using screening guidelines, risk assessment tools, and social, structural, and cultural determinants of health; Apply principles of motivational interviewing and therapeutic communication to support health behavior change in individuals and families; Design evidence-based health teaching plans for individuals or families that incorporate cultural humility, patient-centered care, and patient safety standards; Develop age-appropriate health maintenance schedules for individuals or families based on risk assessment findings and evidence-based screening and prevention guidelines; Demonstrate ethical and professional use of technology, social media, and social marketing strategies to promote health across the lifespan

GNUR 425 Advanced Health Assessment Across the LifeSpan (4 Credit Hours)
This course will prepare the graduate-level nursing student to generate a patient health database, including history and physical examination to inform clinical decision making and health promotion, across the lifespan. The course includes lecture and laboratory components.
Outcomes:
Obtain comprehensive and problem-focused health histories including nutritional, cultural, social, functional, and developmental components; Document comprehensive and problem focused health histories; Perform comprehensive and problem-focused physical examinations; Differentiate normal and abnormal physical, behavioral, and developmental findings; Develop a client problem list based on that patient's health history, and physical examination; Plan anticipatory guidance and health promotion based on age, developmental level and cultural background

GNUR 432 Philosophy of Science (3 Credit Hours)
This course addresses the history and philosophy of science and the influence on nursing knowledge and the rapidly evolving nature of nursing science. This course includes the exploration of a diverse range of historical and contemporary influences of epistemological perspectives of the nature of knowledge and patterns and/or processes of knowing. An evolutionary lens is used to examine the history, philosophical foundations, and associated purpose, and methods of science as a foundation for nursing science.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Describe philosophies of science within historical contexts; 2) Discuss how the nature of knowledge relates to philosophy of science; 3) Analyze how different philosophies of science provide a foundation for nursing knowledge development and discovery; 4) Analyze the association between epistemological and philosophy of science foundations that guide scientific methods

GNUR 436 Psychiatric Mental Health Assessment Across the Lifespan (2 Credit Hours)
Pre-requisites: GNUR 425 Advanced Health Assessment Across the Lifespan
This course focuses on the major principles and skills to conduct a psychiatric mental health assessment across the lifespan. Clinical interviewing skills, eliciting important information, and developing a therapeutic rapport with patients and families are foundational knowledge and skills. Students will learn components of the psychiatric evaluation, including psychiatric review of symptoms and mental status examination, and the development of differential diagnoses and diagnostic formulation. Integrating laboratory findings and medical history into the psychiatric evaluation and utilizing evidence-based clinical practice guidelines will be emphasized. This course will also incorporate theories and practice of diversity and inclusion as it relates to the biopsychosocial and cultural understanding of mental illness.
Outcomes:
At the successful completion of the course, students will be able to: 1) Elicit a comprehensive psychiatric health history and mental health assessment; 2) Distinguish assessment features, interviewing techniques, and legal/ethical aspects for children, adolescents, older or cognitively-impaired adults, and other special populations; 3) Integrate medical history and laboratory findings into differential diagnoses and diagnostic formulation; 4) Apply critical thinking skills and diagnostic reasoning with the use of evidence-based clinical practice guidelines across the lifespan; 5) Identify risk and protective factors, vulnerability, and areas of mental health resilience for patients, families, and communities

GNUR 440 Systematic Inquiry I: Scholarly Writing (2 Credit Hours)
This course focuses on types and styles of academic and scholarly writing. Students learn and apply elements of a rhetorical situation in the production of written work. Style and formatting considerations of scholarly writing are integrated into the drafting and revision of various forms of written work. Experiences with editing, peer-evaluation, and self-evaluation are integrated into the course, along with responding to substantive feedback in the revision of written work. Upon successful completion of this course, the student will be able to:
Outcomes:
1) Compare different genres of academic and scholarly writing styles and products; 2) Apply elements of style and grammar to scholarly writing; 3) Integrate components of a rhetorical situation into logical, focused, and coherent written works; 4) Engage in self and peer critique of written work; 5) Respond to substantive critiques of written work

GNUR 442 Advanced Physiology/Pathophysiology (3 Credit Hours)
This course presents contemporary principles of physiology that underlie the normal function of the human body and serve as a basis for clinical practice in a variety of settings. The content is taught within the context of key molecular processes, cellular and organ system function, and interactions among organ systems. Select clinical cases and exemplars are used to illustrate physiologic concepts and to facilitate the application of physiologic principles to understand the body's homeostatic processes in health and disease. Emphasis is on normal physiology but approaches are used to bridge physiological science with clinical application to common clinical disorders. The educational experience consists of three hours of classroom or on-line instruction per week, independent readings, case analyses, web-based applications, and classroom and/or course platform-supported discussion.
Outcomes:
Explain the physiologic processes that underlie the normal function of the human body; Achieve an understanding of the dynamic interactions of organs and organ systems that promote homeostasis; Interpret and analyze physiologic data within the context of select clinical disorders; Apply the principles of physiology to the understanding of the body's response to threats to homeostasis; Appreciate physiological research aimed at health promotion and the prevention and management of disease

GNUR 443 Psychiatric Mental Health NP Practicum I: Foundational Skills (3 Credit Hours)
This practicum introduces students to foundational skills in psychiatric mental health advanced practice nursing, emphasizing patient-centered care. Students apply basic diagnostic reasoning, screening, interviewing techniques, and management strategies for common behavioral health conditions.
Outcomes:
Demonstrate professionalism in interactions with patients/families and the healthcare team, reflecting ethical standards and respect for patient autonomy; Perform a basic psychiatric mental health history and assessment; Formulate differential diagnoses and basic management plans for common psychiatric mental health problems based on patient data and evidence-based guidelines; Demonstrate therapeutic communication skills in interactions with patients from diverse backgrounds; Collaborate with patients, faculty, preceptors, and other healthcare providers to initiate basic diagnostic and therapeutic interventions; Assess the impact of acute and chronic medical problems on psychiatric assessment, diagnosis, and treatment

GNUR 444 Psychiatric Mental Health NP Practicum II: Expanding Clinical Reasoning (3 Credit Hours)
Building upon foundational skills and competencies, this practicum focuses on advancing clinical reasoning and expanding diagnostic and management capabilities of psychiatric mental health patients across the lifespan. Students will refine their management skills and begin caring for patients with increasingly complex psychiatric mental healthcare needs. Students will continue incorporating health promotion strategies while integrating evidence-based practice.
Outcomes:
Conduct and document an advanced psychiatric history and mental health assessment with consideration for level of care and treatment setting; Justify clinical decision-making in the formulation of differential diagnoses; Implement evidence-based therapeutic plans for common and complex psychiatric mental health conditions, considering patient preferences, socio-economic, and cultural contexts; Engage in shared decision-making with patients and caregivers to promote health, self-care management, and health literacy; Coordinate psychiatric mental health care for children, adolescents, adults, and older adults with consideration to legal, ethical, and social aspects to care

GNUR 445 PMHNP Practicum III: Advanced Clinical Management and Leadership (3 Credit Hours)
This practicum emphasizes the advanced management of common and complex psychiatric mental health patients across the lifespan. Students refine their clinical judgment while developing leadership skills in interprofessional collaboration and psychiatric mental health patient care coordination across the lifespan.
Outcomes:
Manage increasingly complex patient care through comprehensive assessment and evidence-based interventions; Optimize patient care as part of an interprofessional team, demonstrating leadership and accountability in psychiatric mental health care settings; Address healthcare disparities to promote equitable outcomes; Manage challenging patient interactions and ethical dilemmas; Incorporate health and psychosocial risk factors into patient treatment plans; Apply principles of self-empowerment and efficacy for behavior change; Prescribe appropriate psychopharmacologic medications

GNUR 446 PMHNP Practicum IV: Transition to Practice (3 Credit Hours)
This practicum prepares students for independent psychiatric mental health advanced practice nursing. The course emphasis is on full integration of clinical skills, decision-making, and professional roles to prepare competent, independent practitioners who are practice ready.
Outcomes:
Provide independent, comprehensive care that integrates diagnostic reasoning, evidence-based practice, and clinical judgment in managing patients with complex psychiatric mental health diagnoses; Lead interprofessional teams to enhance patient safety, quality, and care outcomes; Utilize health information technologies to improve patient care and outcomes; Reflect on practice experiences to identify areas for continued professional development and lifelong learning as a nurse practitioner; Uphold ethical principles in psychiatric mental health practice, including patient autonomy, confidentiality, collaboration, and informed consent; Facilitate shared decision-making opportunities appropriate to the individual and family members' culture, resources, and health literacy; Integrate mental health promotion and relapse prevention for patients and families; Lead individual and group therapy

GNUR 447 AG Acute Care Nurse Practitioner Practicum I: Foundational Skills (3 Credit Hours)
This practicum introduces students to foundational skills in adult gerontology acute care advanced practice nursing. Students develop competency in patient assessment and are introduced to basic diagnostic reasoning and management strategies for episodic, critical, and complex illness and injury, as well as chronic disease exacerbations from middle adolescence through the adult lifespan.
Outcomes:
Demonstrate professionalism in interactions with patients and the healthcare team; Perform and document clinically relevant focused or comprehensive patient history and physical assessment, including health promotion and disease and injury prevention; Formulate differential diagnoses and basic management plans for episodic, critical, and complex illness and injury as well as chronic disease exacerbations based on patient data and evidence-based guidelines; Communicate effectively to build trust and rapport with patients from diverse backgrounds; Collaborate with patients, faculty, preceptors, and other healthcare providers to initiate basic diagnostic and therapeutic interventions

GNUR 448 AG Acute Care NP Practicum II: Expanding Clinical Reasoning (3 Credit Hours)
Building upon foundational skills and competencies, this practicum focuses on advancing clinical reasoning and expanding diagnostic and management capabilities for middle adolescent, adult, and older adult acute care patients. Students will advance clinical reasoning and expand diagnostic and management skills for patients with increasingly complex episodic, critical, and complex illness and injury, as well as chronic disease exacerbations.
Outcomes:
Justify clinical decision-making in the formulation of differential diagnoses for patients with episodic, critical, and complex illness and injury, as well as chronic disease exacerbations; Implement evidence-based therapeutic plans considering patient preferences, socio-economic, and cultural contexts; Order diagnostic tests aligned with patient presentations; Engage in shared decision-making with patients and caregivers to address risk behavior and promote self-care management, and health literacy; Apply principles of patient care coordination and transitions of care; Manage patients requiring emergent care, consultation, or referral

GNUR 449 AG Acute Care NP Practicum III: Advanced Clinical Management and Leadership (3 Credit Hours)
This practicum emphasizes the advanced management of episodic, critical, and complex illness, injuries, and chronic disease exacerbations from middle adolescence through the adult lifespan. Students refine clinical judgment with emphasis on advancing leadership abilities in interprofessional collaboration and coordinating patient-centered care in high-acuity settings.
Outcomes:
Demonstrate advancing independence in the management of complex patient care; Effectively participate in interprofessional healthcare teams to coordinate and optimize patient care, demonstrating leadership and accountability in acute care settings; Advance integration of the social determinants of health into management plans to address healthcare disparities and promote equitable outcomes middle adolescents through the adult lifespan; Manage difficult patient interactions and ethical dilemmas; Manage patient transitions between care settings, ensuring continuity, and minimizing risks during transfers; Integrate ethical principles into care, including end-of-life decision-making and palliative care

GNUR 451 Psychopharmacology Across the Lifespan (3 Credit Hours)
Pre-requisites: Advanced Pharmacology, Psychiatric Mental Health Advanced Practice Nursing Across the Lifespan I
This course focuses on the development of psychopharmacologic knowledge, critical thinking, and clinical judgment in the application of psychotropic medications to treat and manage psychiatric mental health conditions across the lifespan. Emphasis is on the neurobiological underpinning of psychopathology, pharmacodynamics, and pharmacokinetics of psychotropic medications. Students will learn the general principles of psychopharmacologic treatment, major psychotropic drug classes, and the ethical, legal, and professional guidelines for prescribing as an advanced practice nurse.
Outcomes:
At the successful completion of the course, students will be able to: 1) Understand the neurobiological processes related to the psychopharmacological treatment of psychiatric mental health disorders across the lifespan; 2) Differentiate between the major classes of psychopharmacologic medications in terms of pharmacokinetics, pharmacogenomics, pharmacotherapeutic value, and pharmacodynamics; 3) Apply critical thinking and clinical judgment when selecting appropriate psychotropic medications for patients, including: indication for use, diagnostic reasoning, medication and family history, dosing regimens, side effects, drug interactions, contraindications, and therapeutic drug monitoring; 4) Distinguish the management of psychotropic medications across the developmental lifespan, including children, adolescents, adults and older adults, and for patients with psychiatric comorbidities, substance use disorders, and other acute or chronic medical illnesses; 5) Evaluate therapeutic outcomes of psychopharmacological intervention using evidence-based prescribing guidelines, standard monitoring methodologies, psychological tools sensitive to medication changes, and other recommended laboratory testing; 6) Understand the legal, ethical, socio-cultural, and economic considerations when prescribing psychotropic medications across the lifespan

GNUR 452 AG Acute Care NP Practicum IV: Transition to Practice (3 Credit Hours)
This practicum prepares students for independent acute care practice for adolescents, adults, and older adults. The emphasis is on full integration of clinical skills, decision-making, and professional roles to prepare competent, independent practitioners who are practice ready.
Outcomes:
Provide independent, comprehensive care for complex acute, critical, and chronically ill adult and older adult patients to manage physiologic instability and risk for potential life-threatening conditions; Demonstrate full integration of diagnostic reasoning, evidence-based practice, and clinical judgment in managing complex patient care; Lead interprofessional teams to enhance patient safety, quality, and care outcomes in acute care settings; Utilize health information technologies to improve patient care and outcomes; Reflect on practice experiences to identify areas for continued professional development and lifelong learning as a nurse practitioner

GNUR 453 Social Justice and Ethics in Professional Nursing Practice (2 Credit Hours)
This course focuses on ethics, social justice, and advocacy in the professional nursing role. Frameworks and approaches to ethics, social justice, and advocacy are presented through the perspective of professional nursing practice, professional nursing identity, and responsible citizenship in promoting health and health equity. Strategies to promote self-advocacy skills in individuals and groups are integrated into the course.
Outcomes:
Compare advocacy strategies in advancing social justice, inclusivity, and health equity; Compare ethical frameworks for decision making in professional nursing practice; Understand health-related social justice and health-related ethical issues at the local, regional, national, and global levels; Integrate ethical standards and professional values and guidelines into mission-centered professional nursing practice

GNUR 454 Policy, Advocacy, and Care Coordination (2 Credit Hours)
This course prepares master's entry nursing students to lead and advocate for equitable, coordinated, and patient-centered care within complex healthcare systems. Students explore the nurse's role in care transitions, interprofessional collaboration, and systems-based practice. Emphasis is placed on health policy, population health, and strategies for influencing change through advocacy, leadership, and ethical decision-making to improve health outcomes at the individual, community, and systems levels.
Outcomes:
Apply knowledge of systems and policies to design coordinated care plans that promote safe and equitable outcomes; Integrate principles of team science and leadership to improve care coordination and transitions; Analyze the impact of health policy and financing on care delivery, access, and health equity; Advocate for individuals, families, and populations to influence policy and promote social justice in healthcare; Examine leadership behaviors to advance policy development, ethical practice, and accountability in complex health systems

GNUR 455 Scholarly Writing (1 Credit Hour)
This course provides the opportunity for graduate students to further develop their scholarly writing skills. Research tools, publication ethics, literature reviews, academic writing, scientific research reports, submission strategies and etiquette, and alternative disciplinary genres will be explored.
Outcomes:
Develop individual strategies for reading, generating, revising, editing, and proofreading scholarly writing; Recognize, discuss, and demonstrate dynamics of effective literature reviews, scientific research reports and proposals

GNUR 456 Psychotherapeutics Individuals Groups Families (3 Credit Hours)

Pre-requisites: Psychiatric Mental Health Advanced Practice Nursing Across the Lifespan I

This course focuses on the theoretical underpinnings and professional practice of integrating and evaluating psychotherapeutic modalities into advanced practice psychiatric nursing care with individuals, groups, and families. Using the principles of psychotherapy, students will learn the skills to develop strong therapeutic relationships to enhance mental health treatment, strengthen mental health resilience, and improve psychiatric outcomes. Emphasis will be on patient and family-centered care, which integrates socio-cultural perspectives of mental health and illness, treatment preferences, ethics and values, and legal or economic considerations.

Outcomes:

At the successful completion of the course, students will be able to: 1) Synthesize theories, ideological approaches, and methods for psychotherapeutic intervention as a basis for individual, family, and group therapy; 2) Understand how psychotherapeutic modalities, such as cognitive-behavioral, humanistic, and integrative-holistic therapies, are recommended based on age and developmental level, psychiatric condition, evidence-based practice, and patient-family preferences; 3) Apply clinical judgment, critical thinking, and decision making when integrating principles and techniques of psychotherapy into care; 4) Assess socio-cultural and spiritual perspectives of individuals, groups, and families and incorporate values into care; 5) Evaluate psychotherapeutic approach based on patient or family response, research and practice evidence, and changes in health policy; 6) Integrate legal, ethical, economic, and professional standards to the practice of psychotherapy

GNUR 471 Palliative Care (2 Credit Hours)

This course is designed to provide the student with an overview of the philosophy and principles of palliative care; the course emphasizes the unique knowledge that describes, explains, and guides the provision of hospice and palliative care. Students consider a holistic approach to care, including state-of-the-art nursing interventions that provide effective pain and symptom management and promote psychosocial and spiritual well-being. Students are prepared to serve diverse client populations whose diseases are life-threatening, and to perform effectively as members of an interdisciplinary team providing palliative care.

GNUR 472 Psychiatric Mental Health Advanced Practice Across Lifespan I (3 Credit Hours)

Pre-requisites: GNUR 436 Psychiatric Mental Health Assessment Across the Lifespan

This course focuses on the neuroscientific understanding of psychiatric mental health disorders, which includes current evidence in genetics, biochemistry, neuropsychiatry, and behavioral neurology. Students will learn the DSM-5 classification for mental disorders, including etiology, development and course, risk and prognostic factors, diagnostic criteria, differential diagnoses, and cultural considerations. Major categories of mental disorders examined in this course are: psychosis and schizophrenia, depression and other mood disorders, anxiety disorders, trauma and stressor-related disorders, attention-deficit hyperactivity disorder, and substance use disorders. Evidence-based treatment recommendations for psychiatric disorders will be addressed across the developmental lifespan and expanded within psychopharmacology and psychotherapeutic modalities courses. Socio-cultural and ethical implications of the psychiatric mental health diagnosis also will be discussed.

Outcomes:

At the successful completion of the course, students will be able to: Synthesize neuroscientific evidence for the assessment, diagnosis and treatment of children, adolescents, adults, and older adults with psychiatric mental health disorders; Explain psychiatric mental health diagnoses with an understanding of current brain and behavioral research which emphasizes neurotransmitters, neural circuitry and brain regions, psychiatric symptomology, human behavior, and neuroplasticity; Apply critical thinking, diagnostic reasoning, and clinical judgment to the assessment, diagnosis, treatment, and evaluation of psychiatric mental health disorders across the lifespan; Implement the use of psychological tools and rating scales to strengthen diagnostic certainty, collect subjective and objective data, measure progress, and evaluate treatment outcomes; Examine the socio-cultural and ethical implications associated with the psychiatric mental health diagnosis

GNUR 473 Leadership in Nursing Practice (3 Credit Hours)

This course focuses on leadership concepts and theories, with an emphasis on application for transformation in healthcare. Students will explore contemporary and historical leadership theories, organizational dynamics, change management strategies, and quality improvement methodologies essential for effective nursing leadership. This course prepares nurses to navigate regulatory, financial, legal, ethical, and technological influences that influence healthcare and policies. This prepares nurses to lead interprofessional teams, influence health policy, and drive innovations that promote health equity and social justice.

Outcomes:

Utilize principles of leadership and management concepts and theories to analyze organizational structures, cultures, and processes that impact healthcare delivery and patient outcomes; Apply leadership concepts and strategies to develop personal leadership style that promotes safety, fosters interprofessional teamwork, and promotes solutions to the challenges in healthcare environments; Apply evidence-based change management theories to lead organizational change that improves care quality and patient safety; Analyze health and regulatory policy at organizational, local, state, and national levels to advocate for policy changes that address challenges in the healthcare system; Evaluate quality improvement initiatives that support evidence-based practice and drive measurable improvements in healthcare outcomes; Apply communication strategies to lead interprofessional teams, facilitate collaboration, and promote high-quality, person-centered care across healthcare settings

GNUR 474 Psychiatric Mental Health Advanced Practice Across Lifespan II (3 Credit Hours)
Pre-requisites: GNUR 472 Psychiatric Mental Health Advanced Practice Nursing Across the Lifespan I
This course builds on the knowledge base, diagnostic reasoning, and critical thinking competencies developed in Psychiatric Mental Health Advanced Practice Nursing Across the Lifespan I. This course continues the neuroscientific understanding of psychiatric mental health disorders and DSM-5 classification - for additional categories of illness, including autism and other neurodevelopmental disorders, eating disorders, dementia and delirium, sleep disorders, suicidality, and personality disorders. Evidence-based treatment recommendations for psychiatric disorders will be addressed across the lifespan and expanded within psychopharmacology and psychotherapeutic modalities courses. In addition, emphasis on the bio-social-cultural understanding of mental health and illness will continue to be explored with special consideration to vulnerable groups.
Outcomes:
At the successful completion of the course, students will be able to: 1) Synthesize neuroscientific evidence on the assessment, diagnosis and treatment of children, adolescents, adults, and older adults with psychiatric mental health disorders; 2) Explain psychiatric mental health diagnoses with an understanding of current brain and behavioral research which emphasizes neurotransmitters, neural circuitry and brain regions, psychiatric symptomology, human behavior, and neuroplasticity; 3) Apply critical thinking, diagnostic reasoning, and clinical judgment into the assessment, diagnosis, treatment, and evaluation of psychiatric mental health disorders across the lifespan; 4) Develop treatment recommendations and care plans that incorporate the perspectives, cultures, and values of patients and families with consideration to safety, environmental context, and professional ethics; 5) Explain the complex socio-cultural, ethical, political, and economic context for psychiatric diagnosis, mental health care, and mental health policy within the US; 6) Examine the impact of policy changes and advocacy efforts for special or vulnerable populations within psychiatric mental health care and treatment

GNUR 475 Quality and Safety in Professional Nursing Practice (3 Credit Hours)
This course focuses on quality and safety as interdependent concepts. Quality and safety from the provider and recipient of care perspectives are emphasized, along with organizational and societal factors that contribute to a culture of safety and quality. The professional nurse role in improving quality and safety individually, and within the intraprofessional and interprofessional care teams is a focus of this course.
Outcomes:
Analyze common and distinct attributes and indicators of quality, safety, and cultures of quality and safety; Compare provider, organizational, and societal factors that influence quality and safety; Implement strategies to improve patient care outcomes at the individual, group, and community levels; Compare models and processes of quality, safety, quality improvement, and process improvement; Analyze the nursing role in improving healthcare quality and safety through individual, intraprofessional, and interprofessional actions

GNUR 476 Basic Diagnostics for Advanced Practice (2 Credit Hours)
Pre-requisites: Advanced Health Assessment, Advanced Pathophysiology, Advanced Pharmacology
The focus of this course is on clinical decision making for selecting and interpreting diagnostic tests. Students will use evidence to appropriately gather, interpret, and manage objective diagnostic clinical data to manage various health problems across the lifespan.
Outcomes:
1) Select appropriate diagnostic tests for conditions commonly seen by advanced practice nurses; 2) Evaluate diagnostic tests selection, based on health assessment data, clinical signs and symptoms, cost, risk/benefit analysis; 3) Interpret diagnostic test results for clinical decision making

GNUR 477 Professional Nursing: Identity, Values, and Practice (2 Credit Hours)
This course introduces nursing students to professional identity formation and the foundational competencies needed for safe, ethical, and high-quality nursing practice. Students examine legal, regulatory, and professional standards while developing skills in communication, ethical decision-making, teamwork, accountability, scope of practice, and self-care. Grounded in Jesuit values of cura personalis, magis, reflection, and intentionality, learning activities include case-based analysis, guided reflection, and discussion of real-world professional scenarios. By the end of the course, students will be able to analyze professional nursing standards, integrate Jesuit values into practice, and apply effective communication, decision-making, and self-care strategies to navigate complex professional situations and sustain professional integrity and well-being.
Outcomes:
Evaluate professional nursing standards, ethical codes, and legal and regulatory frameworks to support evidence-based decision-making, accountability, and advocacy for equitable care; Integrate Jesuit values and professional nursing standards to support therapeutic communication, cultural humility, effective teamwork, and professional identity development; Create evidence-based strategies for professional resilience, self-care, and lifelong learning that prevent burnout and support ongoing professional engagement and advocacy; Synthesize values, ethics, knowledge, and professional comportment to develop a professional nursing identity that guides decision-making, relationships, and advocacy across care settings

GNUR 480 Professional Role Development for Nursing (3 Credit Hours)
This clinical immersion experience facilitates the integration of nursing knowledge, clinical reasoning, leadership, and professional role behaviors as students transition into the role of the professional registered nurse. Working in partnership with a preceptor and under faculty supervision, students synthesize concepts from biological, behavioral, and clinical sciences to design, deliver, and evaluate evidence-based, equitable, and person-centered care. Students engage in interprofessional practice, emphasizing clinical judgment, quality improvement, and leadership for health equity. Reflection is used to advance professional identity, ethical comportment, and accountability for outcomes across levels of care.
Outcomes:
Integrate professional standards, evidence, and ethical principles to design, deliver, and evaluate person-centered, equitable, and safe nursing care; Integrate safety culture, quality improvement, and evidence-based principles to evaluate and enhance clinical decision-making, care delivery, and system processes that promote safe, effective, and equitable patient outcomes; Apply leadership and management principles to coordinate, prioritize, and delegate nursing care that ensures safe, effective, and person-centered outcomes; Collaborate with patients, families, and interprofessional teams using effective communication, shared decision-making, and technology to improve quality, safety, and equity in care outcomes; Exemplify accountability, professionalism, and reflective practice consistent with the values and responsibilities of the registered nurse role; Analyze the impact of social, structural, and environmental determinants of health on patient and population outcomes to promote health equity and justice

GNUR 482 Psychiatric Mental Health Advanced Practice Nursing Practicum (3 Credit Hours)
Pre-requisites: GNUR 472
The practicum course guides the development and transition of students to the advanced practice psychiatric nurse practitioner role. Synthesizing knowledge and experience gained from previous courses, the practicum helps students advance their proficiency and skills in caring for patients with acute, chronic, and complex psychiatric mental health problems. With understanding of various psychiatric mental health settings and levels of care, students in the practicum experience will apply their knowledge and synthesis of content with patients, families, and communities across the lifespan. Emphasis will be on the assessment, diagnosis, treatment, and care coordination of psychiatric mental health disorders. Students are expected to progress throughout the clinical practicum from requiring assistance to becoming primarily independent within their population and specialty practice.
Outcomes:
At the successful completion of the course, students will be able to: 1) Elicit and document a comprehensive psychiatric history and mental health assessment with consideration for level of care and treatment setting; 2) Generate differential diagnoses, problem list, and diagnostic formulation after synthesizing and evaluating objective and subjective data from patients, families, and other informants; 3) Develop an evidence-based treatment plan based on psychiatric diagnosis and presentation, knowledge of psychopharmacology and psychotherapeutic approaches, respect for persons, and consideration to special or vulnerable groups; 4) Apply critical thinking, clinical judgment, and decision making when implementing treatment recommendations and evaluating strategies within mental health care plans; 5) Understand the importance of coordinated care for children, adolescents, adults, and older adults with consideration to legal, ethical, and social aspects to care; 6) Implement preventive psychiatric mental health care for populations across the lifespan, which includes health and wellness programs, mental health screening, psychoeducation, counseling and therapeutic services, and integrative and holistic approaches

GNUR 487 Primary Care Nurse Practitioner Practicum I: Foundational Skills (3 Credit Hours)
Co-requisites: GNUR 526 or GNUR 528
This practicum introduces students to foundational skills and competencies in advanced practice nursing in primary care, emphasizing patient-centered care and health promotion. Students apply basic diagnostic reasoning and management strategies for common primary care conditions.
Outcomes:
Demonstrate professionalism in interactions with patients and the healthcare team; Perform clinically relevant focused or comprehensive patient history and physical assessment; Formulate differential diagnoses and basic management plans for common health problems based on patient data and evidence-based guidelines; Communicate effectively to build trust and rapport with patients from diverse backgrounds; Collaborate with patients, faculty, preceptors, and other healthcare providers to initiate basic diagnostic and therapeutic interventions; Screen for health risks and health promotion/disease prevention needs, based on age and risk factors

GNUR 488 Family Nurse Practitioner Practicum II: Expanding Clinical Reasoning (3 Credit Hours)
Co-requisites: MCN 401 and MCN 414
Building upon foundational skills and competencies, this practicum focuses on advancing clinical reasoning and expanding diagnostic and management capabilities of primary care patients across the lifespan. Students will refine management of common health conditions and collaborate to begin caring for patients with increasingly complex healthcare needs. Students will continue incorporating health promotion and disease prevention strategies while integrating evidence-based practice.
Outcomes:
Justify clinical decision-making in the formulation of differential diagnoses; Implement evidence-based therapeutic plans for primary care conditions, considering patient preferences, socio-economic, and cultural contexts; Order diagnostic tests aligned with patient presentations; Engage in shared decision-making with patients and families to promote health, self-care management, and health literacy; Apply principles of patient care coordination and referral for continuity of care across the healthcare continuum; Implement interventions to promote health with at-risk families

GNUR 489 FNP Practicum III: Advanced Clinical Management and Leadership (3 Credit Hours)
This practicum emphasizes the advanced management of common and complex primary care patients across the lifespan. Students refine clinical judgment in managing chronic illnesses, multiple comorbidities, and preventative care while developing leadership skills in interprofessional collaboration and patient care coordination.
Outcomes:
Manage increasingly complex patient care, through comprehensive assessment and evidence-based interventions; Optimize patient care as part of an interprofessional team, demonstrating leadership and accountability in primary care settings; Address healthcare disparities to promote equitable outcomes; Apply current evidence-based guidelines to clinical cases; Manage difficult patient interactions and ethical dilemmas; Prescribe medications for special populations (infants, children, pregnant/lactating women, older adults)

GNUR 490 FNP Practicum IV: Transition to Practice (3 Credit Hours)
This practicum prepares students for independent primary care practice across the lifespan. The course emphasis is on full integration of clinical skills, decision-making, and professional roles in order to prepare competent, independent practitioners who are practice-ready.
Outcomes:
Provide independent, comprehensive care for diverse populations across the lifespan, managing acute, chronic, and preventative care needs; Integrate diagnostic reasoning, evidence-based practice, and clinical judgment in managing complex patient care; Lead interprofessional teams to enhance patient safety, quality, and care outcomes in primary care settings; Utilize health information technologies to improve patient care and outcomes; Reflect on practice experiences to identify areas for continued professional development and lifelong learning as a nurse practitioner; Facilitate family decision-making

GNUR 491 AGPC-NP Practicum II: Expanding Clinical Reasoning (3 Credit Hours)
Building upon foundational skills and competencies, this practicum focuses on advancing clinical reasoning and expanding diagnostic and management capabilities of adolescent, adult, and older adult primary care patients. Students will refine management of common health conditions and begin caring for patients with increasingly complex healthcare needs. Students will continue incorporating health promotion and disease prevention strategies while integrating evidence-based practice.
Outcomes:
Justify clinical decision-making in the formulation of differential diagnoses; Implement evidence-based therapeutic plans for primary care conditions, considering patient preferences, socio-economic, and cultural contexts; Order diagnostic tests aligned with patient presentations; Engage in shared decision-making with patients and caregivers to promote health, self-care management, and health literacy; Apply principles of patient care coordination and referral for continuity of care across the healthcare continuum; Implement interventions to reduce risk factors for diverse and vulnerable populations from middle adolescents to frail older adults

GNUR 492 AGPC-NP Practicum III Advanced Clinical Management and Leadership (3 Credit Hours)
This practicum emphasizes the advanced management of common and complex adolescent, adult, and older adult primary care patients. Students refine clinical judgment in managing chronic illnesses, multiple comorbidities, and preventative care while developing leadership skills in interprofessional collaboration and patient care coordination.
Outcomes:
Manage complex patient care, through comprehensive assessment and evidence-based interventions; Optimize patient care as part of an interprofessional team, demonstrating leadership and accountability in primary care settings; Address healthcare disparities to promote equitable outcomes; Apply current evidence-based guidelines to common and complex clinical cases; Manage difficult patient interactions and ethical dilemmas; Manage medications for the older adult population, incorporating polypharmacy and deprescribing principles

GNUR 493 AGPC-NP Practicum IV: Transition to Practice (3 Credit Hours)
This practicum prepares students for independent primary care practice for adolescents, adults, and older adults. The emphasis is on full integration of clinical skills, decision-making, and professional roles in order to prepare competent, independent practitioners who are practice-ready.
Outcomes:
Provide independent, comprehensive care for diverse populations, managing acute, chronic, and preventative care needs; Integrate diagnostic reasoning, evidence-based practice, and clinical judgment in managing complex patient care; Lead interprofessional teams to enhance patient safety, quality, and care outcomes in primary care settings; Utilize health information technologies to improve patient care and outcomes; Reflect on practice experiences to identify areas for continued professional development and lifelong learning as a nurse practitioner; Manage geriatric syndromes

GNUR 494 WHNP Practicum II: Expanding Clinical Reasoning (3 Credit Hours)
Building upon foundational skills and competencies, this practicum focuses on advancing clinical reasoning and expanding diagnostic and management capabilities of Women's Health primary care and gender related care for patients from puberty across the adult lifespan. Students will refine management of common health conditions and collaborate to begin caring for patients with increasingly complex healthcare needs. Students will continue incorporating health promotion and disease prevention strategies while integrating evidence-based practice.
Outcomes:
Justify clinical decision-making in the formulation of differential diagnoses; Implement evidence-based therapeutic plans for primary care conditions, considering patient preferences, socio-economic, and cultural contexts; Order diagnostic tests aligned with patient presentations; Engage in shared decision-making with patients and families to promote health, self-care management, and health literacy; Apply principles of patient care coordination and referral for continuity of care across the healthcare continuum; Screen for risk factors that may affect reproductive, pregnancy, and/or sexual health status and outcomes; Perform an age appropriate, comprehensive gynecologic, sexual, reproductive, and menopausal health history and physical examination

GNUR 495 WHNP Clinical Practicum III: Advanced Clinical Management and Leadership (3 Credit Hours)
This practicum emphasizes the advanced management of common and complex Women's Health primary care patients inclusive of all gender identities, including transgender and non-binary individuals. Students refine clinical judgment in managing chronic illnesses, multiple comorbidities, and preventative care while developing leadership skills in interprofessional collaboration and patient care coordination for puberty through the adult lifespan.
Outcomes:
Manage increasingly complex patient care through comprehensive assessment and evidence-based interventions; Optimize patient care as part of an interprofessional team, demonstrating leadership and accountability in primary care settings; Address healthcare disparities to promote equitable outcomes; Apply current evidence-based guidelines to clinical cases; Manage difficult patient interactions and ethical dilemmas; Participate in care collaboration for people with complex reproductive and sexual healthcare needs

GNUR 496 WHNP Practicum IV: Transition to Practice (3 Credit Hours)
This practicum prepares students for independent Women's Health/Gender Related primary care practice from puberty across the adult lifespan. The emphasis is on full integration of clinical skills, decision-making, and professional roles.
Outcomes:
Demonstrate professionalism in interactions with patients and the healthcare team; Perform and document clinically relevant focused or comprehensive patient history and physical assessment, including health promotion and disease and injury prevention; Formulate differential diagnoses and basic management plans for episodic, critical, and complex illness and injury as well as chronic disease exacerbations based on patient data and evidence-based guidelines; Communicate effectively to build trust and rapport with patients from diverse backgrounds; Collaborate with patients, faculty, preceptors, and other healthcare providers to initiate basic diagnostic and therapeutic interventions

GNUR 498 Independent Study (1-6 Credit Hours)
Directed study in a specific topic area under the supervision of a faculty member.

GNUR 499 Interprofessional Team Practicum (1-7 Credit Hours)
Consent of discipline Program Director in collaboration with course faculty is required for registration. This course provides opportunities to students with backgrounds in a variety of clinical disciplines to engage in interprofessional team projects in healthcare settings and health and human service organizations, and to develop interprofessional competencies and project management skills.
Outcomes:
Apply knowledge of selected concepts, models, and theories from the clinical and management sciences to the management of high performing teams; apply evidence based/research findings for a selected problem/project; and examine the leader role within an interprofessional team environment

GNUR 500 Phenomena and Theories for Nursing Science I (2 Credit Hours)
This course emphasizes methods to analyze and develop knowledge of a phenomenon that is relevant to nursing science. Traditional and advanced methods of concept analysis and development are explored and critiqued for the advancement of nursing knowledge and nursing science. Fieldwork experiences for developing and refining a phenomenon of interest are included in the course.
Outcomes:
Upon successful completion of the course, the student is able to: 1) Evaluate existing and emerging concept development and analysis methods in developing substantive knowledge of a phenomenon; 2) Differentiate between disciplinary and professional knowledge of a phenomenon of interest; 3) Analyze the theoretical-conceptual-empirical structure of a phenomenon; 4) Compare extant and sensitizing conceptualizations of phenomenon

GNUR 501 Phenomena and Theories for Nursing Science II (2 Credit Hours)
This course is focused on the role of theory in the development of nursing knowledge. Emphasis is placed on strategies for theory development and evaluation in the generation and advancement of nursing science. Levels of theory on a continuum spanning grand theory to middle range theory are examined for utility in nursing science. The relation between theory and the substantive structure of nursing is examined.
Outcomes:
Upon successful completion to this course, the student is able to: 1) Relate the domain and perspective of the substantive structure of nursing to nursing theory and nursing science; 2) Analyze levels of theory, nursing theory, and theory development; 3) Apply theory analysis, theory synthesis, and theory derivation strategies; 4) Evaluate the logical and conceptual structure of theory and nursing theory

GNUR 504 Emergency and Acute Care Procedures for the NP (3 Credit Hours)
Pre-requisites: Advanced Pharmacology, Advanced Health Assessment across the Lifespan, and Advanced Physiology/Pathophysiology
This course is designed to provide the nurse practitioner student with the knowledge and skills necessary to affect patient care outcomes in emergency settings. This course will incorporate procedural skills necessary to meet clinical competencies of the emergency nurse practitioner. Diagnostic and therapeutic procedures used in the evaluation and management of patients with emergent conditions will be incorporated.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Recognize the importance of patient education and informed consent prior to performing procedures; 2) Synthesize knowledge of anatomy, pathophysiology and procedural methods for select interventions; 3) Incorporate understanding of indications, contraindications, and anticipated outcomes in clinical decision-making related to select procedures; 4) Demonstrate beginning skills in the execution of select diagnostic and therapeutic procedures in a procedural lab

GNUR 508 The Nurse Scientist Role (2 Credit Hours)
This course addresses the responsibilities and activities of a nurse scientist including the responsible conduct of research and ethical practice; scientific freedom and social responsibility; collaboration and negotiation; and the peer review process. The development of a program of research and research career trajectory including research funding and dissemination of research are examined. Students will identify traditional and emerging settings for the nurse scientist. The course explores knowledge and skills required to successfully work in teams within the local and global scientific community. The role expectation of the nurse scientist related to intra-professional and interprofessional research and mentorship are examined.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Analyze the qualifications, attributes, professional values, and ethics of a nurse scientist; 2) Identify career trajectory options of a nurse scientist; 3) Analyze stewardship of the nursing discipline within intra- and interprofessional teams

GNUR 509 Teaching Methods (3 Credit Hours)
This course focuses on teaching and learning theories, principles, and practices in nursing education. Major topic areas include philosophies and theories of teaching and learning, teaching and learning processes and resources, curricular and program designs and frameworks, competency development and assessment, evaluation and measurements strategies, the faculty role, and regulatory issues.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Explain philosophies, theories and principles of teaching and learning; 2) Evaluate curricular design and implementation; 3) Analyze evaluation and measurement strategies in nursing education; 4) Discuss expectations of the faculty role; 5) Articulate the relationship among educational setting, teaching methods, and learner outcomes; 6) Evaluate education and nursing education research literature for implementation in practice

GNUR 510 Teaching Practicum (3 Credit Hours)
This practicum course provides students with a context for applying the concepts of teaching and learning in nursing education. Students will experience various dimensions of the teaching role and design, deliver and evaluate teaching/learning strategies. The practicum consists of supervised experiences with assigned faculty mentor(s) in varied teaching/learning environments.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Assess the learning needs and learning styles of learners; 2) Apply effective teaching in a selected area of nursing; 3) Apply principles of evaluation in formative and summative evaluations of the learners

GNUR 512 Quantitative Methods & Design for Nursing Research (3 Credit Hours)
This course focuses on quantitative research methods and designs for nursing research. The linkages between theory, concepts, research design, instrumentation, sampling, data collection and analysis, and reporting are emphasized. Ethical concerns related to the research process are discussed and analyzed. Students will gain practical experiences in quantitative research methods.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Evaluate and synthesize quantitative research studies and identify gaps for future quantitative research; 2) Identify theoretical or conceptual frameworks that guide research; 3) Develop research aims to address gaps in knowledge; 4) Understand conceptual-operational linkages in quantitative nursing research; 5) Assess the adequacy of quantitative designs in answering research questions; 6) Identify ethical concerns of quantitative research and the protection of human subjects; 7) Apply knowledge and skills related to conducting a quantitative research study

GNUR 513 Qualitative Methods in Nursing Research (3 Credit Hours)
This course focuses on exploration of qualitative research approaches including grounded theory, ethnography, phenomenology, narrative, case study, and pragmatic approaches such as qualitative description. Discussion will include a focus on epistemology, ontology, methods, strategies, data collection, analysis, and dissemination of results. Ethical and special concerns of qualitative research are emphasized.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Explain the significance of qualitative research methods for the development of nursing and interdisciplinary science; 2) Explain the relationship between theoretical and philosophical foundations and assumptions of qualitative research methods; 3) Compare the major qualitative research designs in terms of background, purpose, research questions, data gathering techniques, analytical methods and report of results; 4) Develop basic skills in qualitative data collection and analysis; 5) Analyze ethical issues related to qualitative research and the protection of human subjects

GNUR 519 Measurement for Nursing Research (3 Credit Hours)
This course focuses on principles and concepts of measurement in nursing research. Psychometric theory, measurement frameworks and instrument development, critique, and testing are addressed. Methods for generating and evaluating reliability and validity evidence are emphasized and operationalized. Ethical concerns related to the development and use of measuring instruments are examined.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Understand key principles and concepts of psychometric theory and measurement frameworks; 2) Differentiate between reliability and validity as evidence to support the use of a measure; 3) Apply statistical techniques in the generation of reliability and validity evidence; 4) Evaluate the suitability of measuring instruments for use in nursing research; 5) Understand principles and approaches to instrument development and testing; 6) Understand ethical issues related to instrument development, testing, and usage

GNUR 520 Systematic Inq II: Reviewing & Synthesizing Lit (2 Credit Hours)
This course focuses on learning and applying the process of systematic inquiry as a method to identify the state of science of a substantive area, gaps in the literature, and implications for nursing. Students learn how to search, organize and analyze the literature, synthesize and report the findings.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Define systematic inquiry and its relationship to research; 2) Distinguish among different types of literature syntheses; 3) Apply the process of systematic inquiry to a select topic; 4) Apply tools, methods and techniques for organizing literature; 5) Utilize appropriate standardized guidelines when reporting a literature review

GNUR 521 Population-Focused Health (3 Credit Hours)
This course is designed to assist students with identifying, analyzing, and evaluating health issues confronting the doctorally prepared nurse in the provision of population-focused health care. Epidemiologic concepts and databases will be covered in the context of population needs assessments. Evidence-based interventions that address health disparities will be examined.
Outcomes:
1) Analyze the role of federal, state, and local governments in population health; 2) Assess population specific health needs using Healthy People and the determinants of health as frameworks; 3) Examine the role of the World Health Organization and non-governmental organizations in population health; 4) Analyze health disparities and needs of priority populations using databases; 5) Apply epidemiologic concepts when completing a population needs assessment; 6) Examine evidence-based interventions for population specific health issues

GNUR 522 Emergency Health Care of Adults (3 Credit Hours)
Pre-requisites: Advanced Pharmacology, Advanced Health Assessment across the Lifespan, and Advanced Physiology/Pathophysiology
This course is designed to provide the nurse practitioner student with the knowledge and skills necessary to affect patient care outcomes in emergency settings. This course will incorporate procedural skills necessary to meet clinical competencies of the emergency nurse practitioner. Diagnostic and therapeutic procedures used in the evaluation and management of patients with emergent conditions will be incorporated.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Recognize the importance of patient education and informed consent prior to performing procedures; 2) Synthesize knowledge of anatomy, pathophysiology and procedural methods for select interventions; 3) Incorporate understanding of indications, contraindications, and anticipated outcomes in clinical decision-making related to select procedures; 4) Demonstrate beginning skills in the execution of select diagnostic and therapeutic procedures in a procedural lab

GNUR 523 Health Care Policy and Economics (3 Credit Hours)
Course content provides the student with advanced policy, economic and financial knowledge, frameworks and skills required to assume a leadership role in healthcare. An emphasis is placed on using evidence to develop an understanding of key relationships between political, economic and financial dimensions in healthcare and how these relationships affect a selected population of interest.
Outcomes:
Upon successful completion of this course the student will be able to: 1) Evaluate the influences of policy on health care delivery at institutional, local, state, national or global levels; 2) Analyze the effects of health policy; 3) Analyze the effects of economic factors on health care decision making; 4) Apply strategies for assessing costs, maximizing productivity, and achieving quality outcomes in evidence-based practice and/or research; 5) Design practice improvement recommendations that account for policy, economic and financial variables affecting selected populations

GNUR 524 Advanced Reproductive and Sexual Health (3 Credit Hours)
Pre-requisites: GNUR 442 Advanced Physiology; GNUR 413: Advanced Pharmacology; and GNUR 425 Advanced Health Assessment
This course will prepare the advanced practice nurse to manage the reproductive and sexual health care needs of all individuals throughout the lifespan. Theories and knowledge from biological, behavioral, social and nursing sciences will be applied in the provision of care for reproductive and sexual health. Emphasis is on the principles of reproductive anatomy and physiology including puberty, genetics, pregnancy, embryonic/fetal development, parturition, puerperium, lactation, and menopause in relationship to advanced practice nursing care.
Outcomes:
By the end of this course, advanced practice nursing students will: 1) Synthesize principles of neuroendocrine and physiological regulation of female and male reproductive function and the normal parameters of puberty, menarche, fertility, and menopause; 2) Analyze the impact of non-gynecologic primary health conditions on reproductive and sexual health; 3) Incorporate established evidence based sexual and reproductive health clinical practice guidelines; 4) Identify strategies to provide high quality, person-affirming, and culturally inclusive healthcare for self-identified gender and sexual minority persons and non-conforming individuals; 5) Develop genomics and genetic risk factor assessment in relation to reproductive and sexual health care, including basic principles of genetic testing, counseling, and referrals; 6) Utilize technology to manage information, support decision-making, deliver care, and evaluate outcomes

GNUR 525 Special Populations and Topics in Emergency Health Care (3 Credit Hours)
Pre-requisites: Advanced Pharmacology, Advanced Health Assessment across the Lifespan, and Advanced Physiology/Pathophysiology
This course is designed to prepare the emergency nurse practitioner student to assume responsibility for stabilization and treatment of special populations that present to the emergency department. Evidence-based practice is discussed as it relates to the evaluation and treatment of emergent conditions in obstetrics and gynecology, pediatrics, mental health disorders, victims of abuse, and patients receiving palliative and hospice care. Special topics of disaster management, the approach to acute resuscitation, analgesia and procedural sedation, toxicology, environmental emergencies and legal topics in emergency health care will be covered.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Synthesize evidence-based theories and practices into assessment, diagnosis and treatment of patients in special populations that present to the emergency department for care; 2) Analyze subjective/objective information to emulate differential diagnoses of emergent conditions; 3) Establish definitive diagnoses through diagnostic testing; 4) Develop treatment plans that incorporate inter-professional and socio-cultural sensitive treatment options; 5) Recognize legal issues that are unique to the delivery of care in the emergency setting; 6) Apply principles of disaster management to the care of individuals and communities affected by disasters

GNUR 526 Management of Common Adult Health Problems (4 Credit Hours)
Pre-requisites: Advanced Pathophysiology, Advanced Pharmacology and Advanced Health Assessment across the Lifespan
This course is designed to prepare nurse practitioner students to assume responsibility for coordination and management of common primary health care problems across the adult age spectrum. A major focus of the course is to prepare the student to assess and manage selected common health problems of adults/older adults in primary care settings. Indications for collaboration, consultation, and/or referral to other health care providers are emphasized as an integral part of the nurse practitioner role. Evidence-based practice is discussed for Health Promotion and Disease Prevention, evaluation, and treatment of dermatologic, mental health, HEENT, gastrointestinal, and genitourinary problems.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Assess presenting common health problems in adults/older adults with specified conditions; 2) Analyze subjective/objective information to formulate differential diagnoses of common conditions; 3) Establish definitive diagnoses through diagnostic testing; 4) Establish a patient-centered treatment plan that is cost effective, consistent with best evidence, age appropriate, and culturally sensitive; 5) Modify the treatment plan based on outcomes; 6) Recognize problems that require consultation or referral to other members of the multidisciplinary health care team

GNUR 528 Management of Complex Adult Health Problems (4 Credit Hours)
Pre-requisites: Advanced Pathophysiology, Advanced Pharmacology and Advanced Health Assessment across the Lifespan
This course is designed to prepare nurse practitioner students to assume responsibility for coordination and management of complex primary health care problems across the adult age spectrum. A major focus of the course is to prepare the student to assess and manage selected complex health problems of adults/older adults in primary care settings. Indications for collaboration, consultation, and/or referral to other health care providers are emphasized as an integral part of the nurse practitioner role. Evidence-based practice is discussed for evaluation and treatment of cardiovascular, peripheral vascular, respiratory, palliative care, neurological, musculoskeletal, hematologic, endocrine, infectious disease, and renal disease problems.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Assess presenting complex health problems in adults/older adults with specified conditions; 2) Analyze subjective/objective information to formulate differential diagnoses of complex conditions; 3) Establish definitive diagnoses through diagnostic testing; 4) Establish a patient-centered treatment plan that is cost effective, consistent with best evidence, age appropriate, and culturally sensitive; 5) Modify the treatment plan based on outcomes; 6) Recognize problems that require consultation or referral to other members of the multidisciplinary health care team

GNUR 529 Family-Focused Health Promotion and Disease Prevention (3 Credit Hours)
Pre-requisites: GNUR 442 Advanced Physiology; GNUR 413: Advanced Pharmacology; and GNUR 425 Advanced Health Assessment
This course emphasizes a family-focused approach to health promotion, disease prevention, and risk reduction from birth to end of life. Common issues impacting individual, family, population, community, and global health are explored. Strategies for health promotion and disease prevention are addressed with consideration for culture, social determinants of health, and social justice.
Outcomes:
By the end of this course, advanced practice nursing students will: 1) Analyze data sources that identify and predict health risks of the individual, family, and community to facilitate development of clinical intervention strategies; 2) Integrate family systems theory and research on health promotion and disease prevention into strategies to manage health-related problems affecting family and community; 3) Synthesize broad ecological, global and social determinants of health to design evidence-based, culturally relevant clinical interventions and strategies; 4) Apply evidence-based guidelines to the identification and prevention of significant healthcare problems affecting populations at risk; 5) Distinguish cultural, spiritual, ethnic, gender, sexual orientation, economic, environmental, and age cohort differences in the risk, presentation, progression, and treatment of health problems

GNUR 530 Topical Seminar for Nursing (1-5 Credit Hours)
These are seminars in specialty areas of nursing theory (e.g., Parse theory), methods (e.g., historical research, grounded methods), as well as concepts (e.g., spirituality, decision-making, bereavement). Students are encouraged to take those seminars to prepare them for their dissertation.
Outcomes:
Students are expected to use the specialty information to further enhance their understanding of their research phenomenon

GNUR 532 Research Internship (2-3 Credit Hours)
This course provides an opportunity for the student to undergo a mentored experience in scientific inquiry. With the Course Director, students will identify a faculty mentor who has an active program of research and can provide an environment for a mentored experience in scientific investigation. The student and faculty mentor will mutually develop achievable objectives with measureable outcomes. This experience can encompass a broad range of research activities that span the scope of scientific investigation. Successful completion of the internship will provide the student with an experiential base of research, which will enhance their knowledge and skills in the conduct of research and facilitate their socialization into the multifaceted role of an investigator.

GNUR 534 Advanced Practice Nursing Care of Older Adults (2 Credit Hours)
Pre-requisites: GNUR 528 Management of Complex Adult Health Problems for NP students OR MSN 447 for CNS students
This course explores current issues in aging and the care of older adults. A major focus of the course is preparing the advanced practice nurse to manage the healthcare of older adults with multiple medical and psychosocial needs in increasingly complex care systems. Topics include health promotion, disease prevention, and social determinants of health for older adults across the spectrum of health and illness, best practices in the management of geriatric syndromes, and special considerations in the assessment of older adults with functional and cognitive limitations.
Outcomes:
1) Apply current issues in aging, including aging theory, social determinants of health, caregiving, and legal-ethical considerations in the care of older adults; 2) Investigate the variety of care systems and settings where older adults receive care, including transitions of care; 3) Generate comprehensive health maintenance plans for healthy older adults and older adults with multiple comorbidities, incorporating evidence-based screening and prevention principles; 4) Discuss special considerations in the assessment of older adults with functional and cognitive limitations; 5) Apply best practices in assessment and management of geriatric syndromes; 6) Evaluate the importance of interprofessional teamwork in the care of older adults with multiple comorbidities

GNUR 535 Substance Use Disorders Addiction Lifespan I (3 Credit Hours)
Pre-requisites: Psychiatric Mental Health Advanced Practice Nursing Across the Lifespan I and II
This course is an introduction to critical thinking, diagnostic reasoning and clinical judgment to assess, diagnose and treat clients with substance use and addictive disorders. Neurobiological, behavioral, and socioecological perspectives will be used to understand the etiology, course and development, differential diagnoses and management of substance use and addiction. Students will learn pharmacological and non-pharmacological interventions to treat and manage substance use and addictive disorders across the lifespan.
Outcomes:
At the successful completion of the course, students will be able to: 1) Synthesize evidence-based scientific theories of substance use and addictive disorders; 2) Understand the neurobiological, behavioral, and socioecological aspects of substance use and addiction; 3) Assess and diagnose substance use and addictive disorders for clients with developmental considerations across the lifespan; 4) Apply pharmacologic, non-pharmacologic, and behavioral interventions in the management of clients with substance use and addictive disorders; 5) Evaluate management strategies in the treatment of substance use and addictive disorders

GNUR 536 Management of Adults with Acute/Critical Conditions I (3 Credit Hours)

Pre-requisites: Advanced Pathophysiology, Advanced Pharmacology and Advanced Health Assessment across the Lifespan

This course is one of two acute care management courses for students in the Adult-Gerontology Acute Care NP and CNS tracks. Students will integrate pathophysiology in the assessment, diagnoses, collaborative and holistic management of adults and older adults with traumatic, pulmonary and cardiothoracic disorders in acute/critical care. Students will analyze, integrate, and synthesize pathophysiological concepts and current research findings for collaborative management of the acute care adult/older adult.

Outcomes:

Upon successful completion of the course, the student will be able to: 1) Apply knowledge from health, psychological, physiological, and social sciences in the advanced nursing management of adults with trauma and cardiothoracic disorders within an acute care setting; 2) Develop differential diagnoses based on a holistic health assessment including medical and social history, presenting symptoms, physical findings, and diagnostic information; 3) Implement appropriate diagnostic and therapeutic interventions for adults with emphasis on safety, cost, efficacy, and patient's immediate condition and needs; 4) Identify the need for consultation and inter-professional collaboration with and referral to appropriate healthcare providers; 5) Evaluate the effectiveness of treatment plans based on patient's outcomes

GNUR 537 Substance Use Disorders Addiction Lifespan II (2 Credit Hours)

Pre-requisites: Substance Use Disorders and Addiction Across the Lifespan I

This course focuses on the complex management of treating substance use and addictive disorders across the lifespan. Evidence-based strategies for caring for clients with co-occurring substance use and psychiatric disorders are presented. Students will learn innovative and novel approaches within research and practice to treat substance use and addiction. The socio-cultural, ethical, and legal challenges surrounding addiction and substance use disorders also will be explored.

Outcomes:

At the successful completion of the course, students will be able to: 1) Understand different philosophical approaches to manage addiction and substance use, including abstinence and harm reduction models; 2) Implement and evaluate evidence-based strategies to care for clients with complex co-occurring psychiatric and substance use disorders with an emphasis on recovery; 3) Describe how to include family and community members into the management of substance use disorders and address stigma associated with addiction and substance use; 4) Analyze the current research and practice focused on innovative and novel approaches and examine socio-cultural, ethical, and policy implications; 5) Explain the legal, ethical, and economic factors associated with substance use and addiction practice

GNUR 538 Management of Adults with Acute/Critical Conditions II (3 Credit Hours)

Pre-requisites: Advanced Pathophysiology, Advanced Pharmacology and Advanced Health Assessment across the Lifespan

This course is one of two acute care management courses for students in the Adult-Gerontology Acute Care NP and CNS tracks. Students will integrate pathophysiology in assessment, diagnoses, collaborative and holistic management of adults and older adults with systemic disorders that include episodic and chronic health problems in acute/critical care. Students will analyze, integrate, and synthesize pathophysiological concepts and current research findings for collaborative management of the acute care adult/older adult.

Outcomes:

Upon successful completion of the course, the student will be able to: 1) Apply knowledge from health, psychological, physiological, and social sciences in the advanced nursing management of adults with systemic disorders that include acute and critical episodes of health problems in acute care settings; 2) Develop differential diagnoses based on a holistic health assessment including medical and social history, presenting symptoms, physical findings, and diagnostic information; 3) Implement appropriate diagnostic and therapeutic interventions for adults with emphasis on safety, cost, efficacy, and patient's immediate condition and needs; 4) Identify the need for consultation and inter-professional collaboration with and referral to appropriate healthcare providers; 5) Evaluate the effectiveness of treatment plans based on patient's outcomes

GNUR 539 Innovative Science, Theory and Methods (3 Credit Hours)

This course will introduce doctoral students to evolving areas of science and technology relevant to nurse scientists that require collaborative approaches and interdisciplinary team science. Content will focus on informatics and data science, genomics, implementation science, team science, and the value of health care.

Outcomes:

Upon successful completion of this course the student will be able to: 1) Identify core concepts in informatics/data science, genomics, and implementation science; 2) Describe implementation science methods and determine appropriate models for health-related interventions; 3) Analyze the main ethical issues surrounding the use of big data (of all types); 4) Determine the value of innovative science methods to the health care system; 5) Analyze current and future applications of omics for precision health

GNUR 540 Philosophy of Nursing: Nursing as a Moral Practice (3 Credit Hours)

This course provides an opportunity for students to analyze ethical issues and personal, institutional/organizational, societal and global values and beliefs that have an impact on nursing practice, the nursing profession, and healthcare delivery. Students will clearly and carefully articulate their thinking and approach to moral reasoning about various contemporary issues and justify their responses. Presuppositions about clinical practice, education, administration, and their impact will be explored. The realities of the social context and the effects on moral/ethical practice will be discussed.

Outcomes:

1) Analyze the multi-faceted ethical problems in healthcare, nursing practice, education, research, administration and policy; 2) Articulate one's own approach to moral reasoning when responding to bioethical issues in nursing; 3) Identify presuppositions/assumptions underlying one's positions and the bases for accepting those presuppositions/assumptions; 4) Examine fundamental critical questions in ethics and nursing; 5) Explore selected social justice bioethical issues

GNUR 542 Grant and Proposal Writing (3 Credit Hours)
This course provides the foundation for grant development and submission. Content includes identifying sources and types of funding from governmental agencies, private foundations, and professional societies. Fundamental skills and strategies needed to prepare a competitive research grant proposal are addressed. Emphasis is placed on the strategies in revising an application, and the peer review process. Students will gain experience in writing sections of a competitive grant proposal, critiquing proposals and participating in a mock review.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Identify major sources and mechanisms of public and private funding for health-related research; 2) Describe key components of a research grant proposal; 3) Evaluate the strengths and weaknesses of research proposals; 4) Develop skills in preparing a competitive grant application; 5) Critique research grant proposals using peer review process

GNUR 543 Adult Primary Care NP Practicum (1-4 Credit Hours)
Pre-requisites: GNUR 526: Management of Common Adult Health Problems or GNUR 528: Management of Complex Adult Health Problems; WHNP Students also need MCN 414: Childbearing/ Family Course
This practicum course guides the student toward a synthesis of content from nursing and related sciences and the application of this knowledge to the advanced practice role of the nurse practitioner in primary care. During each practicum, the student will care for adult patients. This care includes health promotion, disease prevention, as well as assessment and management of the most common acute, chronic, and complex health problems.
Outcomes:
At the successful completion of this practicum, students will be able to: 1) Perform complete physical, psychological and social health assessments, incorporating principles of health promotion, health maintenance, and chronic disease management; 2) Provide teaching, counseling, and anticipatory guidance in accordance with the patient and family's readiness stage; 3) Evaluate cultural, spiritual, ethical, legal, financial, and policy factors that influence care in the clinical environment through a social justice lens; 4) Integrate knowledge of pathophysiologic and psychosocial changes associated with common acute, chronic and complex health problems into clinical decision-making; 5) Implement evidence-based, developmentally supportive plans of care for adolescents, adults, and older adults; 6) Modify management plan according to clinical response and changes in condition; 7) Utilize technology to manage information, support decision-making, deliver care, and evaluate outcomes; 8) Demonstrate effective communication, collaboration and relationship building with patients, families, and interprofessional team members; 9) Analyze quality issues in the clinical setting, prioritizing patient safety and cost effectiveness

GNUR 544 Nursing and Health Policy (3 Credit Hours)
This course provides a framework for understanding health care delivery systems and the ability to analyze health policy using selected theoretical models. Students will apply theoretical models to evaluate existing and proposed health policies from the perspective of relevant stakeholders. Students will identify the political, economic, legal, social and ethical forces which impact the health policy-making process at the organization, local, state and national level, The changing role and responsibilities of the government, private sector, health professionals, and consumers will be examined in terms of access to care, health care financing, regulations, safety, quality and efficiency. Specific methods and strategies to influence health policy will be explored.
Course equivalencies: X-DNP 503/GNUR 544
Outcomes:
1) Analyze health care delivery systems and specific health policies using selected theoretical models; 2) Describe forces that shape health care policy development and implementation in the United States; 3) Relate the philosophy and ethical basis of Jesuit education to the values and preferences which shape health policy in a pluralistic society; 4) Outline the process of policy development and implementation within the content of multiple forces (government, the private sector, health professionals and consumers) that shape health care policy in the United States; 5) Discuss current health and nursing policy issues in the US and globally with emphasis on the political, social, economic, and cultural factors which influence health disparities and access to care; 6) Analyze a health policy within the student's own area of practice and interest in terms of the social, economic, legal political, and ethical forces that effect current and latent health outcomes; 7) Explain specific methods and strategies hat health care providers can use to advocate for and influence health policy at the organization, local, state, national and/or international level

GNUR 545 Evidence Translation for Advanced Clinical Practice (3 Credit Hours)
This course builds on the student's understanding of using research and scholarly inquiry to address complex practice problems and improve practice outcomes within a contextual setting. Students will focus on developing leadership competencies in the areas of translational research, evidence-based practice and interprofessional teamwork. Key competencies are developed in the critical evaluation and synthesis of extant research, development of evidence-based protocols and evaluation of outcomes.
Outcomes:
Upon successful completion of this course the student will be able to: 1) Evaluate theory, concepts and methods to guide translation of evidence; 2) Formulate questions about population-based practice problems, issues and areas for improvement in context; 3) Synthesize the state of evidence with regard to a specific practice problem; 4) Develop an evidence-based protocol to address the practice problem, issue and/or area for improvement in context; 5) Understand the use of metrics in the identification, monitoring and evaluation of practice outcomes; 6) Analyze social, cultural, political and ethical issues related to implementation of practice and process improvements

GNUR 546 Advanced Statistics I (3 Credit Hours)
This course provides graduate students with a foundation in applied regression analysis techniques used in health, social, and behavioral sciences. The major topics covered in this course are univariate/multivariate linear regression, advanced data screening, model building, variable selection, regression diagnostics, univariate/factorial analysis of variance, and repeated measures design analysis of variance. Conceptual understanding and critical evaluation of statistical models is emphasized. Students will gain practical experience in using statistical software packages for the analysis of data.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Apply general linear modeling techniques in answering research questions; 2) Analyze bivariate and multivariate associations; 3) Interpret results of statistical testing using general linear modeling techniques; 4) Understand the process of model building and variable selection; 5) Evaluate assumptions of general linear models; 6) Apply regression diagnostic techniques

GNUR 547 Advanced Statistics II (3 Credit Hours)
This course will introduce advanced data analysis techniques common in clinical, behavioral and health outcomes research. Students will learn how to conduct and interpret mediational effects and path analysis, multivariate statistical models, repeated measures analysis, nonparametric analysis, and logistic regression models. Although the mathematical basis of the techniques will be considered, the course emphasizes the appropriate use and interpretation of these techniques.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Select appropriate analytic techniques based on the research questions; 2) Understand the computational basis for statistical techniques covered in this course; 3) Evaluate assumptions associated with each statistical technique; 4) Employ statistical software to conduct the appropriate analysis; 5) Interpret the results and make statistical inference

GNUR 550 Substance Use Management Practicum (3 Credit Hours)
Pre-requisites: Psychiatric Mental Health Advanced Practice Practicum
This specialty practicum course has a focus on the diagnostic reasoning and clinical judgment required to assess, diagnose and treat substance use and addictive disorders. Students will integrate knowledge from their coursework and psychiatric mental health population clinical to diagnose and manage clients with substance use and addictive disorders across the lifespan. The student's level of performance is expected to progress throughout the clinical practicum.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Apply evidence-based practice strategies to assess and diagnose children, adolescents, adults and older adult clients with substance use and addictive disorders; 2) Implement management strategies in the treatment of substance use and addictive · disorders; 3) Analyze the ethical, legal, and policy issues impacting advanced practice nursing care of clients with substance use and addictive disorders; 4) Coordinate care across transitions for clients diagnosed with substance use and addictive disorders

GNUR 551 Cancer Care: Cancer Biology and Epidemiology (3 Credit Hours)
Pre-requisites: Advanced Pathophysiology, Advanced Pharmacology and Advanced Health Assessment across the Lifespan
This course is designed to present an in-depth understanding of the current knowledge and research in cancer biology and pathogenesis. Genetic, molecular and cellular mechanisms of cancer pathogenesis are covered in depth. Cancer epidemiology, concepts of primary risk reduction, as well as cancer screening are presented. Susceptibility for hereditary cancers due to germline mutations is included in the context of primary and secondary prevention. Current and future applications of genomics to cancer care are presented and discussed.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Analyze theories and research findings relative to the current understanding of the biology of cancer; 2) Describe national and global trends in cancer incidence and mortality; 3) Discuss evidence supporting cancer prevention; 4) Analyze cancer risk associated with common hereditary cancer syndromes; 5) Understand general principles of cancer screening; 6) Analyze current and future applications of genomics to cancer care

GNUR 553 Cancer Care: Diagnostic and Therapeutic Approaches (3 Credit Hours)
Pre-requisites: Advanced Pathophysiology, Advanced Pharmacology and Advanced Health Assessment across the Lifespan
This course will focus on the diagnostic and management dimensions of select cancers including hereditary cancer syndromes. Specialized content will focus on the therapeutic modalities utilized during the acute care phase of the cancer continuum across multiple care settings. Pharmacology of cancer therapies will be explored.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Differentiate among specific cancer types in terms of: epidemiology, etiology, prevention, screening, detection, classification, and treatment; 2) Apply diagnostic approaches and methods to cancer management; 3) Explain concepts and principles of cancer staging for various cancer types; 4) Apply general principles of treatment planning in cancer management; 5) Compare major treatment modalities; 6) Evaluate evidence-based therapeutic and pharmacologic treatment strategies for patients across the cancer care continuum; 7) Articulate the role of the advanced practice nurse in the interprofessional management of patients

GNUR 555 Cancer Care: Palliative/Supportive Management (3 Credit Hours)
Pre-requisites: Advanced Pathophysiology, Advanced Pharmacology and Advanced Health Assessment across the Lifespan
This course is designed to present an in-depth understanding of the current knowledge and research in psychological and supportive care for patients and families living with cancer. Information relevant to the following domains will be explored: symptom management; psychological, spiritual and culturally-appropriate care; communication; survivorship; and hospice and palliative care.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Analyze theories and research findings relative to the current understanding of cancer and treatment-related symptoms across the cancer care continuum; 2) Identify evidence-based advanced nursing practice for symptom management and psychological care of patients with cancer, across the cancer care continuum, including at the end of life; 3) Identify strategies for effective communication with patients, families, and interprofessional team members; 4) Describe psychosocial, spiritual, and culturally appropriate components of care with patients and families coping with cancer; 5) Explain unique issues of the cancer survivor; 6) Integrate principles of palliative care across the cancer care continuum; 7) Articulate the role of the advanced practice nurse in the interprofessional management of patients

GNUR 560 Cancer Care Advanced Practice Practicum (2-3 Credit Hours)
Pre-requisites: Advanced Pathophysiology, Advanced Pharmacology and Advanced Health Assessment across the Lifespan
The practicum course guides the student in a synthesis of content from nursing and related sciences and allows for the application of this knowledge to the role of the advanced practice nurse providing advanced nursing care to patients and families across the cancer care continuum. Students will gain experience in a variety of settings that will advance their proficiency in caring for patients and families with cancer.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Apply evidence in the assessment and management of patients across the cancer care continuum; 2) Collaborate with health professionals to plan and implement best practices in cancer care; 3) Evaluate the treatment plan for value and quality and modify as needed; 4) Analyze the ethical, legal, cost, and policy issues affecting advanced practice nursing of patients and families across the cancer care continuum; 5) Discuss the value of multidisciplinary cancer care teams to provide the most appropriate care for this complex and vulnerable population; 6) Demonstrate and document personal and professional growth in the role of the advanced practice nurse

GNUR 562 Emergency Health Care Advanced Practice Practicum (1-6 Credit Hours)
Pre-requisites: Advanced Pathophysiology, Advanced Pharmacology and Advanced Health Assessment across the Lifespan
The practicum course guides the student in a synthesis of content from nursing and related sciences and allows for the application of this knowledge to the role of the nurse practitioner in the emergency setting. Students will advance their proficiency in caring for patients that present across the lifespan and across acuity levels.
Outcomes:
1) Apply evidence-based practice strategies to assess and diagnose patients across the lifespan and across acuity levels that present with emergency/urgent conditions; 2) Implement management strategies in the treatment of patients in the emergency department setting; 3) Analyze the ethical, legal, and policy issues impacting advanced practice nursing care of patients that present in an emergency/urgent care setting; 4) Implement proficiency in procedural skills relevant to the evaluation, stabilization, resuscitation, and treatment of the patient in the emergency setting; 5) Integrate the appropriate use of consultation, collaboration, and referral to appropriate health care providers into management of patients in an emergency/urgent care setting

GNUR 570 DNP Scholarly Project: Planning (1 Credit Hour)
Pre- or co-requisites: GNUR 545
The DNP Scholarly Project demonstrates an in-depth knowledge of the student's area of expertise in nursing practice. The DNP Scholarly Project is a synthesis of the student's work which provides a faculty-supervised opportunity for demonstration of the use of evidence to improve either practice or patient outcomes. The project forms the basis for future practice scholarship. This 1 SH course focuses on skills necessary for planning a successful DNP scholarly project. Project identification within the student's area of advanced expertise, organizational needs assessment, and outlining the project are emphasized. Skills necessary for the implementation of a successful DNP scholarly project, including collaborative inter-professional team participation and leadership, communication, and methods for project management, are emphasized.
Outcomes:
Upon successful completion of this course, DNP students will apply project management principles in the identification of a feasible DNP Scholarly Project that reflects the student's practice expertise, is evidence-based and grounded in theory

GNUR 571 DNP Scholarly Project: Proposal and Pre-Implementation (2 Credit Hours)

Pre-requisites: DNP Scholarly Project: Planning

The DNP Scholarly Project demonstrates an in-depth knowledge of the student's area of expertise in nursing practice. The DNP Scholarly Project is a synthesis of the student's work which provides a faculty-supervised opportunity for demonstration of the use of evidence to improve either practice or patient outcomes. The project forms the basis for future practice scholarship. This 2 SH course entails 1 SH of on-line seminar and 1 SH (75 clock hours) of practicum experience. The seminar focuses on full development and writing of a succinct proposal which describes planning, implementing, evaluating, and disseminating a scholarly project. The project is designed to improve patient, practice, or organizational outcomes based on an organizational needs assessment that demonstrates feasibility and organization's readiness for student's proposed project. Development of relationships at the project site, and exploration/initiation of preliminary project steps are emphasized during the practicum hours.

Outcomes:

Upon successful completion of this course, DNP students will: 1) Incorporate findings from an organizational needs assessment into the development of a feasible scholarly project; 2) Defend a written project proposal which links scholarly experiences, use of evidence to improve either practice or patient outcomes or both

GNUR 572 DNP Scholarly Project: Project Implementation (2 Credit Hours)

Pre-requisites: GNUR 571 DNP Scholarly Project: Proposal and Pre-Implementation

The DNP Scholarly Project demonstrates an in-depth knowledge of the student's area of expertise in nursing practice. The DNP Scholarly Project is a synthesis of the student's work which provides a faculty-supervised opportunity for demonstration of the use of evidence to improve either practice or patient outcomes. The project forms the basis for future practice scholarship. This course combines 1 SH of didactic and scheduled on-line seminars throughout the semester with 1 SH (75 clock hours) of practicum experience. Project implementation is the focus of the practicum experience. Project management guidance is provided through on-line seminar sessions, in concert with Faculty Directors, and through communication with the student and external mentor. Students are expected to have a DNP Scholarly Project faculty director, an external member and an approved and willing project site in place prior to course entry.

Outcomes:

Upon successful completion of this course, DNP students will: 1) Implement DNP Scholarly Project using project management skills and competencies; 2) Demonstrate leadership skills in project implementation and management; 3) Apply problem-solving methods and change concepts during project management

GNUR 573 DNP Scholarly Project: Analysis and Dissemination (1 Credit Hour)

Pre-requisites: GNUR 572 DNP Scholarly Project: Implementation

The DNP Scholarly Project demonstrates an in-depth knowledge of the student's area of expertise in nursing practice. The DNP Scholarly Project is a synthesis of the student's work which provides a faculty-supervised opportunity for demonstration of the use of evidence to improve either practice or patient outcomes. The project forms the basis for future practice scholarship. This 1 SH seminar course guides DNP students through the completion of the DNP Scholarly Project, evaluation of project outcomes through analysis of process and outcome indicators, and dissemination. Methods for dissemination include sharing of project outcomes with project site stakeholders, completion of a manuscript, and exploration of a publication site.

Outcomes:

Upon successful completion of this course, DNP student will integrate project elements and data, demonstrating the use of evidence to improve patient or system outcomes

GNUR 574 DNP Project Course I: Foundations of Systems-based Practice (2 Credit Hours)

Pre-requisites: GNUR 404, GNUR 408, and GNUR 521

Co-requisites: GNUR 574L

This course builds on the student's understanding of scholarly inquiry, population health, and leadership roles to address complex practice problems and improve practice outcomes. Students will focus on developing knowledge and skills in problem recognition, needs assessment, development of an evidence-based practice question, and interprofessional teamwork. Key competencies are developed in identification of population-focused priorities, systems-based practice, scholarly inquiry, quality improvement principles, and ethical conduct of scholarship.

Outcomes:

Evaluate theory, concepts, and methods to guide translation of evidence; Formulate questions about population-based practice problems, issues and areas for improvement in context; Discuss the use of metrics in the identification, monitoring, and evaluation of practice outcomes; Analyze social, cultural, political and ethical issues related to planning of practice and process improvements; Analyze practice at micro and macro system levels

GNUR 574L DNP Project Practicum I: Planning (1 Credit Hour)

Pre-requisites: GNUR 404, GNUR 408, and GNUR 521

Co-requisites: GNUR 574

This practicum provides students with an opportunity to work collaboratively with a site mentor (preceptor) and interprofessional stakeholders and build a team for evidence-based practice and quality improvement projects. Students develop competencies in collaboration, systems-based practice, and leadership.

Outcomes:

Engage system stakeholders to complete an organizational needs assessment of local capacity to address population health opportunities; Collaborate with project site mentor and system stakeholders to develop a practice question and outcomes of importance to the organization

GNUR 575 Evidence Translation for Systems-Based Practice (3 Credit Hours)
Pre-requisites: GNUR 404, GNUR 408, GNUR 521, GNUR 574, and GNUR 574L
This course builds on the student's understanding of using evidence and scholarly inquiry to address complex practice problems and improve practice outcomes within a contextual setting. Students will focus on developing knowledge and skills in the areas of evidence-based practice, quality improvement, and interprofessional teamwork. Key competencies are developed in the critical appraisal and synthesis of evidence, development of evidence-based protocols, and evaluation of outcomes.
Outcomes:
Apply guiding theories and/or frameworks from nursing and other disciplines to practice and process improvements; Synthesize the state of evidence regarding practice problems, identifying gaps and barriers in translation of evidence to practice; Engage stakeholders to develop evidence-based protocols and action plans to address a practice issue in context; Identify metrics to monitor and evaluate practice outcomes; Address social, cultural, political and ethical issues related to implementation of practice and process improvements

GNUR 576 DNP Project Course 3: DNP Project Practicum II (1 Credit Hour)
Pre-requisites: GNUR 404, GNUR 408, GNUR 521, GNUR 574, GNUR 574L, and GNUR 575
This practicum provides students with an opportunity to work collaboratively with interprofessional stakeholders to implement and monitor the DNP project. Students develop competencies in quality and safety, collaboration, knowledge of systems, and leadership.
Outcomes:
Apply project management skills and problem-solving methods to the implementation of a DNP project; Demonstrate team leadership skills including cognitive flexibility and professional communication in the implementation of intentional systems change; Monitor project processes and intervention fidelity, especially with regard to social, cultural, and ethical considerations

GNUR 577 DNP Project Course 4: DNP Project Evaluation and Dissemination (2 Credit Hours)
Pre-requisites: GNUR 404, GNUR 408, GNUR 521, GNUR 574, GNUR574L, GNUR 575, and GNUR 576
This course builds on the student's understanding of scholarship and quality and safety to address complex practice problems and improve practice outcomes within a contextual setting. Students will focus on advancing scholarship and presenting outcomes of systems-based practice change. Key competencies are developed in dissemination of outcomes and considerations of cost-effectiveness in care.
Outcomes:
Integrate project elements and data analysis, demonstrating use of evidence to improve patient or system outcomes; Analyze project results in the context of lessons learned, as well as implications for project site sustainability and advanced practice nursing; Conduct a cost-benefit analysis for a systems change, incorporating this into recommendations for future action; Disseminate project findings to university, project site, and professional community

GNUR 598 Directed Study (1-6 Credit Hours)
Directed Study is a focused, defined, and substantive reading or research experience supervised by a faculty member. Directed study involves a close collaboration between the student, supervising faculty, and the academic advisor/chair in the design, scope, and expected student learning outcomes from the experience. Directed study may not be used as a substitute for an existing course or a cancelled course. Directed study credits may range from 1 to 3 semester hours. A course topic of Directed Readings or Directed Research may be requested to be entered on the transcript.

GNUR 600 Dissertation Supervision (1 Credit Hour)
This course focuses on continuing formation as a scholar through the development of the dissertation proposal. Using the student's dissertation plans as a reference point, the course will target strategies and competencies in generating and critically evaluating new knowledge, understanding the legacies of past and current work in the discipline and topic area, the transformational nature of knowledge, and the transformative work of communicating knowledge to others. Students are expected to maintain close and frequent contact with their dissertation chairperson/ committee members during their enrollment in the course. Two semesters in seminar format and thereafter the student works with the Dissertation Chair and committee in completing the dissertation.
Outcomes:
Generate specific aims for a research project; Design a research study to answer specific research questions; Execute data collection according to a research plan; Analyze and interpret research study results; Present findings from a research study; Defend research findings in a public forum; Ensure protection of human subjects in the ethical and responsible conduct of research

GNUR 605 Master's Study (1 Credit Hour)
Course designation for students who have completed their coursework and are completing the master's comprehensive examination. Enrollment in GNUR 605 is considered full-time study. Graded as credit (pass) or no credit (fail). This course can be taken twice.
Outcomes:
Integrate comprehensive knowledge from conceptual and theoretical bases of science and nursing science

GNUR 610 Doctoral Study (1 Credit Hour)
Course designation for students who have completed their coursework and are taking the qualifying examinations. The purpose of the qualifying examination is to assess the depth, breadth, comprehension, integration, and synthesis of knowledge that forms the foundation for conducting the dissertation research.
Outcomes:
Integrate comprehensive knowledge from the philosophical, conceptual and theoretical bases of science and nursing science, and research methods into a developing program of research

German (GERM)

Discover, search, courses (p. 2661)!

GERM 101 Elementary German I (3 Credit Hours)
This course is an introduction to German, designed for students with no previous experience. Students develop communicative language skills and acquire a fundamental knowledge of German-speaking cultures.
Outcomes:
Students will be able to understand simple sentences and short narratives, respond to basic inquiries about themselves and others, formulate basic questions, comprehend basic written texts, and write simple German sentences

GERM 102 Elementary German II (3 Credit Hours)
Pre-requisites: GERM 101
Students will further develop communicative language skills and knowledge of German-speaking cultures, and will finish learning all the basic grammatical structures of the language.
Outcomes:
Students will have learned to express themselves through a wider range of vocabulary and grammatical structures; They will be able to express appropriate reactions to ordinary situations, read more complex texts, and write sentences in short but cohesive paragraphs

GERM 103 Intermediate German I (3 Credit Hours)
Pre-requisites: GERM 102 Students will review and develop their understanding of German grammar and vocabulary
Students will read and discuss a variety of short readings, including short stories and poetry.
Outcomes:
Students will have gained a wider range of oral expression, both lexical and grammatical; They will be able to express more complex reactions, read more complex narrative and literary texts, and write sentences in longer paragraphs

GERM 104 Intermediate German II (3 Credit Hours)
Pre-requisites: GERM 103 This course focuses on review and practice of more complex grammatical elements
Students will read texts of greater length and complexity, expand their vocabulary, and increase their ability to communicate, both orally and in writing.
Outcomes:
Students will have gained a wider range of oral expression, both lexical and grammatical; They will be able to express more complex reactions, read more complex narrative and literary texts, and write sentences in cohesive paragraphs and short essays

GERM 250 Composition & Conversation I (3 Credit Hours)
Pre-requisites: GERM 104
This is a briskly paced class in which students engage in learning to express themselves effectively, both orally and in writing, in German. All work is carried out in German.
Interdisciplinary Option: German Studies
Outcomes:
Students gain confidence in their ability to speak, read and write modern German, and will gain a wider range of oral expression, both lexical and grammatical

GERM 251 Composition & Conversation II (3 Credit Hours)
Pre-requisites: GERM 250
Students will learn to express themselves with increasing sophistication in both oral and written German. Course materials are challenging and may include a full length literary text.
Interdisciplinary Option: German Studies
Outcomes:
Students will gain further confidence in their ability to speak, read and write modern German, and will have gain a wider range of oral expression, both lexical and grammatical

GERM 270 Modern German Literature and Culture I (3 Credit Hours)
Pre-requisites: GERM 103 or equivalent
Representative works in literature, philosophy, and fine arts, with sociopolitical backgrounds, 1830-1900.
Interdisciplinary Option: European Studies, Global Studies
Outcomes:
Students will be able to understand revolutionary post-romanticism, realism, and naturalism in German literature and culture

GERM 271 Modern German Literature and Culture II (3 Credit Hours)
Pre-requisites: GERM 271
Representative works in literature, philosophy, and fine arts, with sociological backgrounds, 1900-present.
Interdisciplinary Option: European Studies, Global Studies
Outcomes:
Students will be able to understand neoromanticism, expressionism, literature and fascism, socialist realism, and postwar culture in West and East Germany

GERM 300 Tutorial for Credit (1-6 Credit Hours)
Pre-requisites: Permission of chairperson
Eligible students minoring in German may elect tutorial for credit.
Outcomes:
Students will be able to focus on a specific aspect of German literature or culture

GERM 320 German-American History: Focus on Chicago (3 Credit Hours)
This engaged-learning course traces the history of German-speaking immigrants in the United States from its very beginnings in 1608, through the 19th century heyday of German immigration, and to the present day. Chicago will function as a case study. Students will interact with the DANK Haus and the German community in Chicago.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will learn about the historical chronology of German-speaking immigration to the United States, assimilation, and German-American cultural contributions to the US, with a focus on Chicago; Students will interact with the DANK Haus and the German community in Chicago

GERM 369 German Reading Knowledge (3 Credit Hours)
This course provides graduate students in the humanities, arts and social sciences with the fundamentals of German grammar for the purposes of reading and translating academic German. Students will work through German grammar explanations, vocabulary, strategies for negotiating meaning, and translation exercises.
Course equivalencies: GERM369 / GERM109

GERM 370 German Cinema (3 Credit Hours)
The course provides an overview of German film from its beginnings until the present time. Movies will be screened and discussed chronologically from the various eras of German film: Silent Movies, Weimar Sound Movies, Film in the Third Reich, Post-War Films, New German Cinema and Movies of Unified Germany. Taught in English.
Interdisciplinary Option: European Studies, Film & Digital Media Studies, Global Studies, German Studies, International Film & Media Studies
Course equivalencies: X-GERM370/ICVM370/IFMS370

German Studies (GRMS)

Discover, search, courses (p. 2661)!

GRMS 300 German Studies Minor Capstone (1 Credit Hour)
In an independent study format, students write a 10-15 page paper that synthesizes the knowledge gained in their coursework into an interdisciplinary project, combining that knowledge with the student's other academic interests. Alternatively, students may secure a supervised internship at a German-related institution or organization that also lines up with their interests Students must be near completion of most requirements for German Studies Minor in order to be eligible for enrollment.
Interdisciplinary Option: German Studies
Outcomes:
Interdisciplinary synthesis of coursework into a paper, or outcomes based on a specific internship, including a reflection component

Global Studies (GLST)

Discover, search, courses (p. 2661)!

GLST 101 Introduction to Global Studies (3 Credit Hours)
This course serves as an introduction to the interdisciplinary field of global studies. It provides an overview of the major disciplines represented in the program, introduces the main regions covered in the program, and discusses important global issues.
Interdisciplinary Option: African Studies and the African Diaspora, Asian Studies, European Studies, Global Studies, Latin American Studies, Middle East and Islamic World Studies
Outcomes:
By analyzing various topics in global studies, students will gain an understanding of the different regions of the world and the ways that different disciplines contribute to this interdisciplinary field

GLST 301 Directed Readings in Global Studies (3 Credit Hours)
Pre-requisites: Course requires permission of instructor; GLST will enroll approved students directly (no self-enrollment or non-GLST advisors); Course is open only to junior and senior majors and minors
This directed readings course may be taken with permission of the director of the Global Studies Program for a course of study not otherwise offered at Loyola that is relevant to the Global Studies Program and addresses at least one of the program's learning outcomes. Students must arrange this course of study with a faculty mentor of their choosing and in conversation with the GLST director. The faculty mentor, who can come from any department or school at Loyola University Chicago, should send the syllabus to the director of the Global Studies Program for approval at least one month before the start of the term in which the student plans to undertake their course of study. Normally, students should complete a substantial research project or a paper of approximately 20,000 words (about forty double-spaced pages) that they work on over the course of the entire semester with their faculty mentor.
Interdisciplinary Option: Global Studies
Outcomes:
Students will 1) demonstrate progress in their research and writing skills; and 2) demonstrate advanced undergraduate knowledge of the issue or issues covered in the directed study course

GLST 302 States and Firms (3 Credit Hours)
This course focuses on the relationship between multinational corporations and the state. It explores the origin of firms, as well as issues such as corruption, tax policy, bailouts, and economic development. It also examines the development of private military contractors and their relationship to state security.
Interdisciplinary Option: Global Studies
Outcomes:
Students will be able to demonstrate understanding of the various relations between multinational corporations and states as well as private military contractors and states

GLST 303 Technological Change and Society (3 Credit Hours)
This course explores how changes in technology affect society in four broad areas: its impact on how we communicate, on the workplace, on regulatory issues surrounding technology firms, and on humanity itself.
Interdisciplinary Option: Global Studies
Outcomes:
Students will be able to demonstrate an understanding of the various relations between technology and society

GLST 304 Global Civil Society and Social Movements (3 Credit Hours)
This course focuses on global civil society groups (both advocacy groups or apolitical) and on social movements that seek to fight injustices. We discuss a variety of examples of civil society projects ranging from monitoring government corruption and promoting micro-credit to organizing transnational protest campaigns.
Interdisciplinary Option: Global Studies
Course equivalencies: X-GLST 304/SOCL 304
Outcomes:
Students will demonstrate a comprehension of the dynamics of global civil society and social movements, both for cases discussed in class and to material from outside class

GLST 305 Globalization and Environmental Sustainability (3 Credit Hours)
This course introduces students to social, political and economic factors that have contributed to globalization, development and their impact on the environment. It provides students with the background and conceptual tools to understand global environmental challenges and questions.
Interdisciplinary Option: Global Studies
Outcomes:
Students will develop a fundamental knowledge of the study of global development and environmental challenges and develop analytical skills to assess the tradeoffs involved in economic development and environmental sustainability

GLST 306 International Development (3 Credit Hours)
This course provides an interdisciplinary overview of the international development system and issues related to development in those countries variously referred to as third world, developing, underdeveloped, or peripheral countries.
Interdisciplinary Option: Global Studies
Course equivalencies: X-GLST 306/SOCL 306
Outcomes:
Students will be able to demonstrate a fundamental knowledge of the various factors that are considered to help or hinder development

GLST 309 The Global Economy (3 Credit Hours)
This course examines global economic relations with a focus on the movement of three items across borders: the movement of goods (trade), the movement of money (finance), and the movement of people (migration). The course aims not only to help students become more informed consumers of the news and events of the day, but also to enable them to critically evaluate and understand these events in their own terms.
Interdisciplinary Option: Global Studies
Course equivalencies: GLST 309 / PLSC 350
Outcomes:
Demonstrate an understanding of global trade, cross-border financial flows, and immigration as well as the political systems that help shape these transactions in at least two countries; Demonstrate an awareness of historical patterns concerning trade, global finance, and immigration and be able to apply knowledge of these historical patterns to current events and debates; Demonstrate the research skills necessary to gather, evaluate, and synthesize information from multiple sources to support an argument about an issue related to global trade, finance, or immigration

GLST 370 Internship in Global Studies (3-6 Credit Hours)
Pre-requisites: Open to all GLST major and minors but requires instructor permission to enroll
Students enrolled in this course must secure an internship relevant to the field of global studies. Students not only engage in regular workplace activities but also attend class meetings, complete writing assignments reflecting on their internship placements, write a final paper, and submit a final evaluation from their workplace supervisor.
Interdisciplinary Option: African Studies and the African Diaspora, Asian Studies, European Studies, Global Studies, Latin American Studies, Middle East and Islamic World Studies
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will demonstrate awareness of at least one important global concern or issue as addressed in the internship

GLST 398 Topics in Global Studies (3 Credit Hours)
This is a variable topics course. Specific topics vary from semester to semester.
Interdisciplinary Option: Global Studies
Outcomes:
Students will be able to demonstrate knowledge of a unique topic in the interdisciplinary field of Global Studies

Graduate Neuroscience (NRSC)

Discover, search, courses (p. 2661)!

NRSC 410 Cellular & Molecular Neurobiology (3 Credit Hours)
This course will review current knowledge of the morphological, biophysical and biochemical properties of neurons. Fundamental neuronal network processes such as stimulus transduction, neuronal plasticity, information processing, and learning and memory will be reviewed.
Outcomes:
An advanced knowledge of the biophysical and biochemical properties of nerve cells and fundamental aspects of more global central nervous system function

NRSC 415 Neurochemistry (3 Credit Hours)
This course is a team-taught neurochemistry course that integrates basic biochemical mechanisms of neurotransmitter synthesis, storage, reuptake, and inactivation with applied correlates to central and peripheral nervous system neurodegenerative disorders. Organic chemistry and neurobiology/neurophysiology are required prerequisite courses. Emphasis is placed on student participation including a student-held lecture series covering a contemporary neurochemical topic of their choosing.
Interdisciplinary Option: Neuroscience

NRSC 421 Neuroscience Teaching (1 Credit Hour)
This course consists in serving as a Teaching Assistant in the medical Neuroscience course labs and proctoring the medical neuroscience course exams. It also includes a weekly pre-lab meeting in which the material for that week's lab is discussed.
Outcomes:
Experience in teaching neuroanatomy for Neuroscience Graduate Program students

NRSC 422 Behavioral Neuroscience (2 Credit Hours)
This course discusses the brain's role in sensory perception, higher perceptual functions, attention, learning and memory, executive function, and emotion. It consists of weekly lectures given by the professor or by one or two students.
Outcomes:
An understanding of higher brain function and experience giving presentations

NRSC 423 Special Topics in Neuroscience (3 Credit Hours)
Restricted to Graduate level students. This course explores a wide spectrum of neuroscience-related topics, and the subject matter will vary with each offering.
Outcomes:
Measures include exam performance, in-class participation, and student presentation

NRSC 499 Research (1-9 Credit Hours)
Independent research for thesis or dissertation under the supervision of a faculty research advisor. Credit varies based upon assigned effort and time spent in the laboratory. Students receive a letter grade from their research advisor.

NRSC 502 Neuroscience Journal Club (0-1 Credit Hours)
Pre-requisites: Must be member of the Neuroscience Graduate Program
One hour weekly course during which all students in the Neuroscience Graduate Program meet to discuss and critically evaluate recent, high impact journal articles covering varied neuroscience topics under the direction of two faculty mentors with neuroscience expertise.
Outcomes:
Students will advance their knowledge of new neuroscience concepts and methods; Students will gain experience in presenting in front of a group; Students will gain confidence in their abilities to critically evaluate experimental design and statistical methods

NRSC 503 Neuroscience Seminar (0-1 Credit Hours)
In both the fall and spring this course includes monthly Neuroscience seminar presentations by internal and external speakers. In the fall, the course also includes weekly journal club presentations by the graduate students: in the spring the course also includes weekly research progress reports by the graduate students.
Outcomes:
A broad overview of current topics in the field and experience giving research presentations

NRSC 595 Thesis Supervision (1 Credit Hour)
Supervised research and writing leading to the completion of the masters of science thesis and degree.
Outcomes:
Form hypotheses, design and perform appropriate experiments to test these hypotheses; Search and critically evaluate scientific literature and data; Clearly and effectively communicate scientific information in both oral and written forms; Incorporate high standards of ethics into research design, execution, data interpretation, and presentation

NRSC 600 Dissertation Supervision (1 Credit Hour)
Supervised research and writing leading to the completion of the Ph.D. dissertation and degree.
Outcomes:
Propose original biomedical research questions and hypotheses; Design and execute critical experiments to evaluate the hypotheses proposed; Search and critically evaluate scientific literature and data; Clearly and effectively communicate scientific information in both oral and written forms; Incorporate high standards of ethics into research design, execution, data interpretation, and presentation

Graduate School Seminar (GSSM)

Discover, search, courses (p. 2661)!

GSSM S59 Thesis Supervision-Summer (1 Credit Hour)
Course for continuing students engaged in thesis research and writing under advisor's supervision during summer.

GSSM S60 Dissertation Supervision-Summer (1 Credit Hour)
Course for continuing students engaged in dissertation research under advisor's supervision during summer.

GSSM S61 Doctoral Study-Summer (1 Credit Hour)
Course for continuing doctoral students engaged in study for comprehensive or qualifying examinations in summer.

GSSM S65 Master's Study-Summer (1 Credit Hour)
Course for continuing master's degree students engaged in study for comprehensive or qualifying examinations during summer.

Greek (GREK)

Discover, search, courses (p. 2661)!

GREK 101 Ancient Greek I (3 Credit Hours)
This course introduces students to elementary grammatical forms, basic syntax, and vocabulary of ancient Greek, and simple readings in the language.
Course equivalencies: GREK131/GREK101
Outcomes:
students should be able to demonstrate basic knowledge of ancient Greek vocabulary, syntax and grammar and deploy it to be able to translate accurately simple Greek sentences and passages into English

GREK 102 Ancient Greek II (3 Credit Hours)
Pre-requisites: GREK 101
This course continues the study of the fundamentals of the ancient Greek language, including more vocabulary, grammar, syntax and more advanced readings. (Ancient Greek I or its equivalent is a prerequisite for this course.)
Course equivalencies: GREK132/GREK102
Outcomes:
Students should be able to demonstrate more advanced knowledge of ancient Greek vocabulary, syntax and grammar, and deploy it to be able to translate accurately more advanced Greek sentences and passages into English

GREK 236 Xenophon (3 Credit Hours)
Pre-requisites: GREK 102
This course centers on translation of representative selections from the prose works of Xenophon, with special emphasis on review of ancient Greek grammar as it is encountered in the selected texts.
Outcomes:
Students should be able to translate the selected prose passages in ancient Greek with accuracy, as well as demonstrate understanding of the content of the passages

GREK 262 Introduction to Plato (3 Credit Hours)
Pre-requisites: GREK 102
This course centers on translation of representative selections from works of the philosopher Plato, with special emphasis on review of ancient Greek grammar as it is encountered in the selected texts.
Outcomes:
Students should be able to translate accurately the selected passages from Plato, as well as demonstrate knowledge and understanding of the content of the passages

GREK 267 Intro to New Testament Greek (3 Credit Hours)
Pre-requisites: GREK 102
This course centers on translation of selections from the New Testament, with special emphasis on review of ancient Greek grammar as it is encountered in the selected texts.
Interdisciplinary Option: Catholic Studies
Course equivalencies: X-GREK267/THEO307
Outcomes:
Students should be able to translate accurately the selected passages, as well as demonstrate knowledge and understanding of the content

GREK 271 Intermediate Greek (3 Credit Hours)
Pre-requisites: GREK 101; GREK 102 or equivalent This intermediate-level course centers on translation of prose and poetry of Greek authors, with special emphasis on review of Greek grammar as it is encountered in the selected texts
No course description is available
Outcomes:
To review and master basic Greek grammar, vocabulary, and syntax; To read and understand selections of Greek prose and poetry in the original language; To prepare for further study in ancient Greek literature (in the original), history, and culture

GREK 275 Introduction to Greek Oratory (3 Credit Hours)
Pre-requisites: GREK 102
This course centers on translation of selections from Attic and other ancient Greek orators, with special emphasis on review of ancient Greek grammar as it is encountered in the selected texts.
Outcomes:
Students should be able to translate accurately the selected passages, analyze and appreciate their style and content, and demonstrate knowledge and understanding of their contexts and meanings, as well as rhetorical figure and constructs in them

GREK 281 Intro to Greek Historiography (3 Credit Hours)
Pre-requisites: GREK 102
This course centers on translation of representative selections from the historical works of ancient Greek authors, with special emphasis on review of ancient Greek grammar as it is encountered in the selected texts.
Outcomes:
Students should be able to translate accurately ancient Greek historical prose passages, analyze and appreciate their style and contents, and demonstrate knowledge and understanding of their various contexts and meanings

GREK 285 Introduction to Greek Poetry (3 Credit Hours)
Pre-requisites: GREK 102
This course centers on translation of representative selections from the poetic works of ancient Greek authors, with special emphases on review of Greek grammar as it is encountered in the selected texts and the basic style and structure of Greek poetry.
Outcomes:
Students should be able to translate accurately the selected passages in Greek poetry, comprehend, analyze and appreciate various poetic genres, as well as demonstrate knowledge and understanding of the content and artistry of the selected poetry

GREK 286 Introduction to Greek Drama (3 Credit Hours)
Pre-requisites: GREK 101 and 102 or their equivalents
This course centers on translation of representative selections from the dramatic works of ancient Greek authors, with special emphases on review of Greek grammar as it is encountered in the selected texts and the basic style and structure of Greek drama.
Outcomes:
Students should be able to translate accurately the selected passages in Greek drama, comprehend, analyze and appreciate the genre, as well as demonstrate knowledge and understanding of the content and artistry of the selected texts

GREK 287 Introduction to Christian Greek (3 Credit Hours)
Pre-requisites: GREK 102
This course focuses on the translation of selected passages from Christian Greek writers, such as Origen, Basil, and Gregory, with special emphasis on review of grammar as it is encountered in the selected texts.
Outcomes:
Students should be able to translate accurately the selected readings, analyze and appreciate their style and content, and demonstrate knowledge and understanding of their contexts and meanings

GREK 289 Readings in Ancient Greek Literature (3 Credit Hours)
Pre-requisites: GREK 101 and 102 or their equivalents
Students study a selected range of texts in ancient Greek literature. (This is a special topics course in ancient Greek.)
Outcomes:
Students should be able to demonstrate deeper knowledge and understanding of ancient Greek literature, its style, and its possible interpretations

GREK 303 Greek Composition (3 Credit Hours)
Pre-requisites: Two other GREK author courses
This course involves practical exercises to develop correct and fluent expression in written ancient Greek prose.
Outcomes:
students should be able to write ancient Greek in various styles, demonstrating facility in deploying fluent knowledge of vocabulary, syntax and grammar in the writing of ancient Greek prose

GREK 315 The Greek Fathers (3 Credit Hours)
This course examines the writings of the early church fathers, including such as Athanasius, Basil and John (Chrysostom); it also comprises an introduction to the historical background of Eastern patristic thought.
Interdisciplinary Option: Catholic Studies
Outcomes:
Students should be able to translate these works with proficiency, demonstrate knowledge in detail of the writings, their authors and their times, and appreciate more deeply the issues and concerns located in these writings

GREK 325 Demosthenes (3 Credit Hours)
This course examines the works of the Attic orator Demosthenes, amid the political and historical context of later Classical Athens.
Outcomes:
Students should be able to translate these works with proficiency, demonstrate knowledge in detail of the genre, the author and his times, and understand and appreciate the ideas, issues and concerns expressed in the orations

GREK 331 Herodotus (3 Credit Hours)
This course focuses on the Histories of Herodotus, the events about which he writes, and the various contexts in which his work was produced.
Outcomes:
Students should be able to translate the Histories with proficiency, as well as demonstrate knowledge in detail of the work, its author, and its historical and political contexts and significances

GREK 335 Thucydides (3 Credit Hours)
This course focuses on the History of the Peloponnesian War of Thucydides, the events about which he writes, and the various contexts in which his work was produced.
Outcomes:
Students should be able to translate the History with proficiency, as well as demonstrate knowledge in detail of the work, its author, and its historical and political contexts and significances

GREK 341 The Iliad (3 Credit Hours)
This course centers on Homer's Iliad and the genre of ancient Greek epic poetry, in particular, on the characters of the heroes and their place within the context of Greek society and thought.
Outcomes:
Students should be able to translate the Iliad with proficiency, and demonstrate detailed knowledge of the author, the poem, its contents and meanings, as well as deeper understanding and appreciation of various contexts of the poem, its transmission, and the accomplishment of its composition

GREK 342 The Odyssey (3 Credit Hours)
This course focuses on Homer's Odyssey and the genre of ancient Greek epic poetry, in particular, on the character of Odysseus and his place within the context of Greek society and thought.
Outcomes:
Students should be able to translate the Odyssey with proficiency, and demonstrate detailed knowledge of the author, the poem, and its contents and meanings, as well as deeper understanding and appreciation of various contexts of the poem, its transmission, and the accomplishment of its composition

GREK 343 Greek Lyric Poetry (3 Credit Hours)
The subject of this course is ancient Greek lyric poetry involving selections from such as Archilochus, Sappho, Alcaeus, and Anacreon.
Outcomes:
Students should be able to translate the selected works with proficiency, demonstrate knowledge in detail about the authors, their poetry, and the various poetic styles they employed, as well as deeper understanding and appreciation of the historical, social and intellectual contexts and influences pertaining to them

GREK 351 Aristophanes (3 Credit Hours)
This course focuses on the comedic poetry of Aristophanes, set against the backdrop of Athens in the late fifth century B.C.E.
Interdisciplinary Option: Shakespeare Studies
Outcomes:
Students should be able to translate the selections of Aristophanes with proficiency, and demonstrate knowledge in detail about the author and his comedies, as well as deeper understanding and appreciation of the historical, social and intellectual contexts and influences pertaining to them

GREK 353 Aeschylus (3 Credit Hours)
This course focuses on selected tragedies of Aeschylus, set against the backdrop of Athens in the earlier fifth century B.C.E.
Interdisciplinary Option: Shakespeare Studies
Outcomes:
Students should be able to translate the selections from Aeschylus with proficiency, and demonstrate knowledge in detail about the author and his tragedies, as well as deeper understanding and appreciation of the historical, social and intellectual contexts and influences pertaining to them

GREK 354 Sophocles (3 Credit Hours)
This course focuses on selected tragedies of Sophocles, set against the backdrop of Athens in the fifth century B.C.E.
Interdisciplinary Option: Shakespeare Studies
Outcomes:
Students should be able to translate the selections from Sophocles with proficiency, and demonstrate knowledge in detail about the author and his tragedies, as well as deeper understanding and appreciation of the historical, social and intellectual contexts and influences pertaining to them

GREK 355 Euripides (3 Credit Hours)
This course focuses on selected tragedies of Euripides, set against the backdrop of Athens in the later fifth century B.C.E.
Interdisciplinary Option: Shakespeare Studies
Outcomes:
Students should be able to translate the selections from Euripides with proficiency, and demonstrate knowledge in detail about the author and his tragedies, as well as deeper understanding and appreciation of the historical, social and intellectual contexts and influences pertaining to them

GREK 360 Theocritus (3 Credit Hours)
This courses centers on the poetry of Theocritus of Syracuse, set against the background of Hellenistic Alexandria.
Outcomes:
Students should be able to translate the selections from Theocritus with proficiency, and demonstrate knowledge in detail about the author, his poetry, and the styles he employed, as well as deeper understanding and appreciation of the historical, social and intellectual contexts and influences pertaining to them

GREK 362 Plato Republic (3 Credit Hours)
This course centers on translation, evaluation and interpretation of selections from Plato's Republic.
Outcomes:
Students should be able to translate the selections with proficiency, and demonstrate knowledge in detail about the author and his work, as well as deeper understanding and appreciation of the work's meaning and the historical, social and intellectual contexts and influences pertaining to it

GREK 388 Readings in Greek Literature I (3 Credit Hours)
Students study a selected range of masterworks in Greek literature. (This is a special topics course in ancient Greek.)
Outcomes:
Students should be able to translate the selected works with proficiency and demonstrate deeper knowledge and understanding of them, their styles and possible interpretations

GREK 389 Readings in Greek Literature II (3 Credit Hours)
Students study a selected range of masterworks in Greek literature. (This is a special topics course in ancient Greek.)
Outcomes:
Students should be able to translate the selected works with proficiency and demonstrate deeper knowledge and understanding of them, their styles and possible interpretations

GREK 412 Readings in Hellenistic Authors (3 Credit Hours)
This course centers on works in Greek of the Hellenistic period, particularly at the intellectual center of Alexandria.
Outcomes:
Students should demonstrate knowledge in detail about the authors, works, and literary enterprise pursued; They should engage critically with current scholarship concerned with the authors and works and with the historical, social, and intellectual contexts and influences pertaining to them

GREK 415 The Greek Fathers (3 Credit Hours)
This course centers on the writings of the early church fathers such as Athanasius, Basil, and John Chrysostom, through which it looks to the historical background of Eastern patristic thought.
Outcomes:
Students should demonstrate knowledge in detail of the writings, their authors and their times; They should engage critically with current scholarship concerned with the authors and works and with the historical, social, cultural, theological, and intellectual contexts and influences pertaining to them

GREK 425 The Attic Orators (3 Credit Hours)
This course examines the works of Attic orators such as Antiphon, Lysias, and Demosthenes, amid the political and historical context of later Classical Athens.
Outcomes:
Students should demonstrate knowledge in detail of the genre, the authors and their times; They should engage critically with current scholarship concerned with the authors and works and with the historical, social, political, legal, and intellectual contexts and influences pertaining to them

GREK 431 Herodotus (3 Credit Hours)
This course focuses on the Histories of Herodotus, the events about which he writes, and the intellectual, social, literary, and historical contexts in which his work was produced.
Outcomes:
Students should demonstrate knowledge in detail of the work, its author, and its historical and political contexts and significances; They should engage critically with current scholarship relating to Herodotus, his project, and his milieu

GREK 435 Thucydides (3 Credit Hours)
This course focuses on the History of the Peloponnesian War by Thucydides, the events about which he writes, and the intellectual, social, literary, and historical contexts in which his work was produced.
Outcomes:
Students should demonstrate knowledge in detail of the work, its author, and its historical and political contexts and significances; They should engage critically with current scholarship relating to Thucydides, his project, and his milieu

GREK 441 The Iliad (3 Credit Hours)
This course centers on Homer's Iliad, the ancient Greek genre of epic poetry, and the importance of this mythology and this literary form for ancient Greek society and thought ever after.
Outcomes:
Students should demonstrate detailed knowledge of the author, the poem, its contents, and their meanings; They should engage critically with current scholarship relating to the poem, its transmission, and the accomplishment of its composition

GREK 442 The Odyssey (3 Credit Hours)
This course centers on Homer's Odyssey, the ancient Greek genre of epic poetry, and the importance of this mythology and this literary form for ancient Greek society and thought ever after.
Outcomes:
Students should demonstrate detailed knowledge of the author, the poem, its contents, and their meanings; They should engage critically with current scholarship relating to the poem, its transmission, and the accomplishment of its composition

GREK 443 Pindar (3 Credit Hours)
This course centers on Pindar and on ancient Greek lyric poetry more generally, potentially including consideration of additional authors such as Archilochus, Sappho, Alcaeus, and Anacreon.
Outcomes:
Students should demonstrate knowledge in detail about the authors, their works, and ancient lyric; They should engage critically with current scholarship relating to ancient lyric's historical, social, literary, and intellectual contexts

GREK 451 Greek Comedy (3 Credit Hours)
This course may focus on the comedic poetry of Aristophanes, set against the backdrop of Athens in the late fifth century B.C.E., or consider the development of New Comedy from Old in the more broadly cosmopolitan Hellenistic world.
Outcomes:
Students should demonstrate knowledge in detail about authors, plays, and the comedic forms; They should engage with current scholarship addressing Greek comedy's historical, social, and intellectual contexts and influences

GREK 453 Aeschylus (3 Credit Hours)
This course focuses on selected tragedies of Aeschylus, set against the backdrop of fifth century B.C.E. Athens.
Outcomes:
Students should demonstrate knowledge in detail about the author, his plays, and the tragedic forms; They should engage with current scholarship addressing Greek tragedy's historical, social, and intellectual contexts and influences

GREK 454 Sophocles (3 Credit Hours)
This course focuses on selected tragedies of Sophocles, set against the backdrop of fifth century B.C.E. Athens.
Outcomes:
Students should demonstrate knowledge in detail about the author, his plays, and the tragedic forms; They should engage with current scholarship addressing Greek tragedy's historical, social, and intellectual contexts and influences

GREK 455 Euripides (3 Credit Hours)
This course focuses on selected tragedies of Euripides, set against the backdrop of fifth century B.C.E. Athens.
Outcomes:
Students should demonstrate knowledge in detail about the author, his plays, and the tragedic forms; They should engage with current scholarship addressing Greek tragedy's historical, social, and intellectual contexts and influences

GREK 462 Plato (3 Credit Hours)
This course centers on translation, evaluation and interpretation of selections from Plato's Republic and/or other philosophical dialogues.
Outcomes:
Students should demonstrate knowledge in detail about the author and his work; They should engage critically with current scholarship concerned with Platonic thought and the historical, social, and intellectual contexts and influences pertaining to it

GREK 473 New Testament Language (3 Credit Hours)
This course centers on study of the language and literary expression of selections from the New Testament.
Outcomes:
Students should demonstrate knowledge and understanding of the texts; They should engage critically with current scholarship exploring the linguistic, historical, social, literary, and intellectual contexts of the New Testament

GREK 488 Readings in Greek Literature I (3 Credit Hours)
This course offers extensive and in-depth study of selected works of ancient Greek literature. The course includes consideration of these works in their social, historical, and literary contexts-that is, both as part of a tradition and as responses to particular moments of Greek societies in history.
Outcomes:
Students should demonstrate detailed understanding of the authors studied and their work; They should engage critically with scholarship concerning each author/work and their various contexts

GREK 489 Readings in Greek Lit II (3 Credit Hours)
This course offers extensive and in-depth study of selected works of ancient Greek literature. The course includes consideration of these works in their social, historical, and literary contexts-that is, both as part of a tradition and as responses to particular moments of Greek societies in history.
Outcomes:
Students should demonstrate detailed understanding of the authors studied and their work; They should engage critically with scholarship concerning each author/work and their various contexts

GREK 499 Directed Study (3 Credit Hours)
This course frames extensive and in-depth study of a selected author or topic involving ancient Greek language or literature, for graduate students to pursue under the direction of a faculty member of the department.
Outcomes:
Students will engage with current scholarship in the field of the investigation, and will demonstrate significant learning

Health Informatics and Data Science (HIDS)

Discover, search, courses (p. 2661)!

HIDS 401 Foundations of Health Informatics (3 Credit Hours)
This course offers students a broad overview of health informatics as a foundation for further study of the topic. Designed as a survey of informatics domains as well as primer of informatics methods, this course serves as an introduction for anyone interested to ask good informatics questions, employ informatics tools, or design informatics systems across a broad range of biomedical applications.
Outcomes:
Understand the differences between data, information, and knowledge, and analyze the processes to transform data into actionable knowledge in the context of health and biomedical domains; Understand the particular nature of data, information, and knowledge in health, analyze the importance and limitations of coding standards; Analyze and evaluate the role of health informatics and its societal impact; Analyze the current trends and current issues in health informatics

HIDS 405 Data Wrangling for Analytics (3 Credit Hours)
Data are messy, come from different sources, and are seldom complete. This course provides an in-depth study of how to prepare data coming from various sources, in different formats, with noisy information, in order to perform meaningful and sound analyses. Contents include grouping data, visualizing data, and aggregating data from the web and other sources.
Outcomes:
1) Program basic data integration and cleaning routines; 2) Evaluate the access and organization of various sources of information; 3) Assess the quality of data for a particular use case; 4) Apply techniques that group, transform and aggregate data

HIDS 408 Building Trust in Scientific Health Communication (3 Credit Hours)
This course familiarizes students with the concepts of misinformation, disinformation, and communicating for impact. Content covered includes how to fact check and how to combat misinformation and disinformation in practice.
Outcomes:
Compare misinformation and disinformation from different perspectives; Identify the predominate narratives in the health misinformation environment; Distinguish between high- and low-level interventions to counteract misinformation

HIDS 411 Clinical Data Science (3 Credit Hours)
Clinical Data Science provides students with an introduction to a broad range of concepts and methods in data science, as they pertain to biomedical research. The focus of the class is on introducing key methods ranging from data collection and storage, to probabilistic methods, etc.
Outcomes:
Understand and describe the steps in the life cycle in biomedical and clinical research; Understand the key principles of data management; Apply, analyze, and evaluate data structures, standards, and quality of data in large biomedical databases and clinical research; Analyze and evaluate key data analytics concepts as they apply to biomedical research; Analyze ethical and legal issues when dealing with biomedical and clinical data

HIDS 412 Translational Bioinformatics (3 Credit Hours)
Pre-requisites: HIDS 411 Clinical Data Science
This course covers the fundamentals of bioinformatics and how they apply to translational and clinical problems. The purpose of this course is to give students a broad overview of the field of bioinformatics, and the tools commonly used, as well as the applications to practical biomedical issues, diseases, population health, drug discovery, etc. The students will also be exposed to a variety of open-source software for sequence alignment, SNPs discovery, and on how to access and analyze data from large biological databases, for translational and clinical research.
Outcomes:
Understand and apply a range of bioinformatics algorithms, and their computational efficiency; Apply and analyze informatics techniques to retrieve, store, and analyze 'omics' data; Apply and analyze open-source tools and open access databases to find and analyze data of translational and clinical importance; Analyze the current trends and problems in bioinformatics and how they relate to clinical issues, population and public health

HIDS 421 Security and Privacy in Healthcare (3 Credit Hours)
This course provides students with a broad exposure to concepts, policies, and methodologies in security and privacy, as they pertain to healthcare research and practice. Information security and data privacy are essential components of biomedical and clinical research, and therefore, it is critical for students to understand security guidelines.
Outcomes:
Understand the role of information security and data privacy in healthcare; Apply basic principles of computer security, such as confidentiality, integrity, and availability; Apply and analyze security principles in research data management; Analyze and evaluate the ethical and legal considerations associated with biomedical and clinical data; Understand and analyze the importance and role of the Institutional Review Board and its function with respect to protecting human subjects

HIDS 422 Ontologies in Healthcare (3 Credit Hours)
This course provides students with essential concepts of ontologies, building ontologies, and knowledge representation as they pertain to health care, and biomedical research. With the ubiquitous nature of computer systems, and information-based systems in health care (and everywhere!) there is a critical need to be able to represent information.
Outcomes:
Understand the role of ontologies in knowledge representation; Understand the differences between realist and anti-realist ontologies; Understand and describe the importance of propositional and predicate logic in knowledge representation and discovery; Understand basic principles of developing ontologies in health care; Build ontologies using computer ontology-building tools; Understand and describe how ontologies affect biomedical informatics systems and how we discovery new knowledge

HIDS 424 Spatial Data Science in Healthcare (3 Credit Hours)
This course is a comprehensive introduction to spatial data analysis and visualization using programming languages (R or Python). Modules will cover core concepts and practical applications of spatial data handling within these tools. The content is structured to progressively build knowledge, starting from basic principles and advancing to more complex analytical techniques.
Outcomes:
1) Differentiate various spatial data formats and structures, including vector and raster data; 2) Demonstrate proficiency in importing, processing, and managing spatial datasets using programming languages, ensuring data integrity and analytical readiness; 3) Produce informative, aesthetically compelling visualizations of spatial data to effectively communicate spatial insights; 4) Interpret spatial patterns, relationships, and trends using statistical methods to derive meaningful conclusions

HIDS 441 Human Centered AI for Healthcare (3 Credit Hours)
This is a survey course of AI user-facing systems for healthcare, that demonstrates the practical use of seminal algorithms in machine learning and AI, as well as principles of interaction design and user center design. In addition, the course focuses on how these design principles and algorithms can be blended to generate impactful systems that help bridge health disparities.
Outcomes:
Assess a healthcare situation that can be improved with interactive technology; Apply interaction design principles to mock up a system that utilizes AI in the context of healthcare; Evaluate interactive systems based on design principles for ehealth/applications that use AI; Compare the opportunities and limitations of seminal AI technologies; Design realistic technological solutions for healthcare problems with the technology available; Communicate the design and evaluation of AI imbued technology for healthcare

HIDS 495 Independent Study (1-4 Credit Hours)
This is a directed study course in health informatics for approved students, supervised by a member of the faculty. Students must have an assigned professor, written objectives, planned outcomes and timelines.
Outcomes:
Students will be able to articulate a general understanding of the selected topic

HIDS 496 Special Topics in Health Informatics (1-3 Credit Hours)
This course covers a specific topic in health informatics.
Outcomes:
Students will be able to articulate a general understanding of the selected topic

HIDS 499 Health Informatics Capstone (1-3 Credit Hours)
Pre-requisites: Students in the HIDS program must have completed 2 semesters of course work
Development of an informatics project, including research question, literature review, and assessment.
Outcomes:
Development of a scholarly paper and presentation

Health Systems Management (HSM)

Discover, search, courses (p. 2661)!

HSM 110 Healthcare in America (3 Credit Hours)
This course introduces the U.S. healthcare system and compares it to systems in other developed nations. Emphasis is given to the government's dominant role in health care delivery, payment and regulation, as well as the differences between public health and health care systems. The social justice implications of cost, quality and access are highlighted.
Interdisciplinary Option: Bioethics
This course satisfies the Engaged Learning requirement.
Outcomes:
Describe the evolution of health care in America and the influence of history on the current health care system; Demonstrate knowledge of the structure and functions of the US health care system; Identify at an introductory level the political, economic and social factors that shape the US health care system; Describe the inter-relationships among healthcare stakeholders including providers, suppliers, payers' workforce, and consumers; Recognize the issues of health care disparities, access to care and social justice present in the current US health care system; Identify criteria for evaluating the evolving and changing US health care system; Compare the US health care system to those of other developed nations

HSM 120 Essentials of Medical Terminology for Health Professionals (1 Credit Hour)
This course introduces students to the language of the health professions. Word structure, prefixes and suffixes, and rules of building and analyzing medical words are introduced. Students explore terms relating to anatomy, pathology, diagnostic and clinical procedures, and select medical specialties. Emphasis is given to defining, interpreting and pronouncing medical terminology.
Outcomes:
Identify structure of medical vocabulary including prefixes, suffixes and root words; Apply the rules of building medical terms; Recognize and define medical terms relating to anatomical structure and function, pathology, diagnostic and clinical procedures, and medical specialties; Use medical terminology accurately in context

HSM 200 Careers in Healthcare Administration (2 Credit Hours)
This course provides an introduction to healthcare administration careers. Students explore the various sectors and supporting industries making up the larger healthcare enterprise. Administrative career options and industry growth patterns are presented. Students are introduced to working professionals and professional organizations representing various sectors of the healthcare industry. Class discussions integrate healthcare industry vocabulary and jargon.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Distinguish healthcare sectors and supporting industries; 2) Describe a variety of roles and functions within healthcare administration; 3) Identify various entry points into a healthcare administration career; and 4) Explore areas of interest for career consideration

HSM 210 Introduction to Global Healthcare Delivery (3 Credit Hours)
Social determinants of health, comparative health systems, global health initiatives and their effects on health outcomes are addressed. Students examine current issues impacting global population health and improvements in care locally and worldwide. Roles of governmental, institutional and corporate organizations in financing, governing and delivering worldwide healthcare are studied.
Interdisciplinary Option: Bioethics, Global Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: HSM 210 / PUBH 314 / ENVS 385
Outcomes:
At the successful completion of the course, the student will be able to: 1) Identify major global health care strengths and challenges; 2) Develop a broad worldview of communities and countries with different lifestyles, economics, and geopolitical systems and how these differences impact health care; 3) Explain the characteristics and roles of governments, non-governmental organizations (NGO's) and public/private partnerships as relates to health and health care around the world; 4) Analyze the impact of globalization on health and healthcare systems; 5) Assess the ethical and social justice issues associated with health inequities around the world; 6) Address a global health care issue, analyze the issue using relevant theoretical concepts and recommend a course of action

HSM 220 Post-Acute & Long-Term Care Management (3 Credit Hours)
This course examines healthcare delivery models designed to meet the needs of older adults and those with disabilities and chronic health conditions. It explores the experience of the patients and caregivers receiving these services as well as the professional workforce who provides them. It also examines the methodologies used to make decisions that impact internal and external customers.
Interdisciplinary Option: Bioethics
This course satisfies the Engaged Learning requirement.
Outcomes:
Analyze the challenges and opportunities faced by the US healthcare system related to changing demographics; Apply theories of aging and disability to the management of post-acute and long-term care services; Compare healthcare delivery models used in post-acute and long-term care services; Articulate the roles, responsibilities, and challenges faced by post-acute and long-term care professionals; Articulate the social justice and ethical issues associated with aging and disability in the context \\nof post-acute and long-term care environments

HSM 230 Fundamentals of Health Equity (3 Credit Hours)
Pre-requisites: HSM 110 (Can also be taken as a corequisite)
This course introduces the concept of health equity and provides an overview of health disparities in the U.S. Students examine the root causes of and explore populations most affected by health inequities. The course explores system approaches and strategies aimed at improving health equity.
Interdisciplinary Option: Bioethics
Outcomes:
Analyze pathways of causality leading to health inequities; Differentiate between disease causation and disparity causation; Compare and contrast strategies to improve health equity in the US; Identify roles and responsibilities of healthcare professionals as agents of change; Explain the relationship between community, social justice and health status; Describe philosophical principles that underlie social justice priorities; Generate ideas for programs and policies that promote health equity

HSM 240 Healthcare Workforce Management and Professionalism (3 Credit Hours)
Co-requisites: HSM 110
This course offers a comprehensive examination of human resources management (HRM) in healthcare, emphasizing its strategic application. It addresses the technical and legal facets of HRM while also fostering the development of professionalism and equipping students to thrive in the ever-evolving healthcare environment.
Outcomes:
Examine the impact of human resources management (HRM) and organizational development principles on healthcare administration practices; Describe how internal and external environments impact the healthcare workforce environment; Identify the key elements of professionalism in healthcare administration, including ethical standards, communication, and teamwork; Analyze scenarios to assess the impact of HRM decisions on healthcare organizations, including their financial and operational outcomes; Evaluate the impact of professionalism on healthcare administration practices; Demonstrate engagement in HRM activities, including negotiation and communication

HSM 280 Healthcare Ethics in Practice (3 Credit Hours)
Pre-requisites: PHIL 130 or equivalent
This course provides an in-depth exploration of ethical leadership within healthcare management. Students will examine historical and contemporary ethical issues that impact the management of healthcare organizations, gaining a comprehensive understanding of the challenges and responsibilities faced by healthcare leaders. The course emphasizes the importance of personal moral perspectives, encouraging students to compare their views with those of their peers and the dominant positions of the day to foster a nuanced appreciation of diverse ethical opinions.
Outcomes:
Describe historical and contemporary ethical issues affecting management of healthcare organizations; Analyze key characteristics of healthcare administrators that contribute to ethical and effective leadership; Apply critical thinking to decision-making models when managing differing opinions and justifying ethical decisions; Reflect on personal values to gain insight into one's vocation and career path in the health sciences, integrating self-awareness with future professional responsibilities

HSM 310 Healthcare Project Management (3 Credit Hours)
Pre-requisites: HSM 110; Course is restricted to Healthcare Administration and Public Health majors
This course introduces the fundamental principles of project management in healthcare organizations, emphasizing the processes, tools, and methodologies necessary for successful project execution. Students will learn how to initiate, plan, execute, monitor, and close projects in healthcare settings, with a focus on strategic alignment, risk management, and stakeholder communication. The course also emphasizes the development of teamwork, leadership, and managerial skills required to effectively manage diverse teams and navigate challenges in dynamic healthcare environments. Through practical applications, students will gain hands-on experience in creating project plans, managing resources, and ensuring successful project outcomes.
Outcomes:
Explain key project management principles, tools, methodologies, and frameworks, with a focus on healthcare projects; Distinguish between the roles and responsibilities of functional managers and project managers; Develop comprehensive healthcare project plans that address scope, goals, timelines, budgets, and stakeholder communication; Identify potential risks for healthcare projects and risk mitigation strategies; Apply leadership and collaboration skills to lead teams and achieve project goals and objectives

HSM 315 Healthcare Quality & Performance Improvement (3 Credit Hours)
Pre-requisites: HSM 240 and HSM 368
This course examines the role of management in measuring performance and achieving quality in healthcare organizations. Emphasis is on the historical evolution, current concepts and future trends associated with measuring and evaluating health care quality. Students explore fundamental concepts of quality improvement design, planning, and methodology.
Outcomes:
1) Articulate the historical evolution and current forces driving changes in healthcare quality; 2) Describe major quality improvement models that provide a framework for change; 3) Differentiate the use of structural, process and outcome indicators for measuring quality; 4) Apply quantitative and qualitative performance measurement approaches to healthcare processes; 5) Apply quality improvement tools and techniques to healthcare processes; 6) Explain operational and clinical quality improvement data; and 7) Apply a systematic quality improvement approach to healthcare processes

HSM 325 Healthcare Fiscal Management (3 Credit Hours)
Pre-requisites: HSM 110 and FINC 301
This course introduces principles of financial management in healthcare organizations. Students will explore budgeting, cost accounting, revenue cycle management, and reimbursement models, including Medicare and Medicaid. Topics also include financial condition assessment, capital planning, and the financial challenges of non-profits, such as uncompensated care. Ethical considerations and future trends, like lean management and innovative payment models, prepare students for dynamic decision-making in healthcare finance.
Outcomes:
Analyze how political, social, economic, and healthcare payment system factors influence financial health and cost structure within US healthcare organizations; Evaluate the financial health and performance of healthcare organizations through analysis and interpretation of financial statements, including the ability to defend financial conclusions; Apply principles of healthcare accounting, cost analysis, budgeting, revenue cycle management, insurance, and reimbursement to support organizational decision-making and strategic planning; Explain the legal, ethical, and social justice considerations in healthcare financial management, including the role of nonprofit organizations, uncompensated care, and their impact on fiscal decision-making

HSM 330 Healthcare Legal & Regulatory Environment (3 Credit Hours)
Pre-requisites: HSM 240 and either HSM 280 or PHIL 284
This course explores the foundations of healthcare law. Key topics include informed consent, joint ventures, medical staff issues, credentialing, liability, and bioethical concerns such as end-of-life decision-making. Additionally, the course explores risk management strategies, fraud and abuse regulations, and other critical healthcare laws. Students will gain insight into the law-making process, the role of regulatory bodies, and their impact on healthcare operations. Emphasis is placed on understanding and applying these concepts to case studies and real-world healthcare management scenarios.
Outcomes:
Examine the structure of the US legal system and its application to healthcare regulations and judicial processes; Describe the principles of liability as they pertain to healthcare organizations, medical staff, and joint ventures; Identify key government regulations impacting healthcare services, professionals, and organizational compliance; Analyze bioethical issues in healthcare regulations, including end-of-life decision-making, negligence, malpractice, informed consent, and the use of human research subjects and their connection to healthcare regulation; Discuss risk management practices and strategies to prevent healthcare fraud, abuse, and regulatory violations

HSM 338 Healthcare Strategy and Marketing (3 Credit Hours)
Pre-requisites: HSM 110, HSM 230, and HSM 310
This course offers an overview of healthcare strategy and marketing, focused on strategic management and marketing fundamentals and tools. Students work individually and in groups to apply strategies specific to healthcare consumers, markets, products and services; developing and presenting the marketing component of a healthcare business plan at the end of the semester.
Outcomes:
Apply principles of strategic management in the context of a healthcare organization; Utilize basis healthcare market research approaches, techniques and tools; Identify ethical and legal issues related to strategy and marketing in healthcare organizations; Develop a strategic marketing campaign for a healthcare product, program or service; Demonstrate effective teamwork skills in producing and presenting multimedia-based strategy and marketing materials and plans

HSM 340 Health Care Policy (3 Credit Hours)
Pre-requisites: HSM 110 and HSM 230; HSM 230 may also be taken as a corequisite
This course explores government's role in organizing, financing and delivering healthcare. With an emphasis on policy formation, advocacy and change, students apply policy analysis tools to contemporary public health and healthcare problems. Using examples such as Medicare, Medicaid or mental health policy, the course highlights the role of leadership as a key component of successful policymaking.
Outcomes:
Explain how federal, state, and local health policy is formulated and implemented; Assess the balance between public good and individual rights in the policy process; Analyze the impact of specific healthcare policy on health outcomes and the delivery of healthcare; Identify future health policy directions that would improve the health status of Americans; Describe the role of individual and organizational leadership in influencing and improving policy outcomes

HSM 345 Healthcare Data Analytics (3 Credit Hours)
Pre-requisites: ACCT 201 and ISSCM 241/PSYC 304 This course explores the use of clinical and operational data to improve outcomes and achieve greater efficiencies in healthcare systems
The role of data analytics in supporting informed decision-making is emphasized. Topics include data manipulation, analysis, and visualization. Practical business intelligence tools, such as Microsoft Excel® or Tableau®, are used.
Outcomes:
Discuss the role of data analytics in clinical and operational improvement efforts; Apply analytic techniques to health and healthcare data using business intelligence tools or applications; Identify meaningful patterns and trends in data sets to inform business decisions; Understand and interpret business needs and extract appropriate data necessary to solve problems; Propose solutions to complex business problems that are supported by data analysis & visualizations

HSM 350 Healthcare Administration Capstone (3 Credit Hours)
Pre-requisites: HSM 240, HSM 310, HSM 315, HSM 325, and HSM 338
The capstone course serves as a culminating experience for undergraduate healthcare administration majors, showcasing their comprehensive knowledge and skills. Through an original team project, students synthesize and apply core concepts - including operations, strategy, quality, finance, project management, marketing, and human resources - to address a problem across diverse service types and care settings in the healthcare system. The course emphasizes solutions aligned with the Jesuit values of social justice and care for others and encourages ethical and equitable approaches to healthcare challenges.
Outcomes:
Apply knowledge of healthcare administration to analyze challenges in a healthcare delivery project; Synthesize data from diverse sources to meet complex project objectives; Incorporate mentor feedback to revise project plans; Manage a large-scale healthcare project to achieve specified outcomes; Demonstrate teamwork and collaboration skills to achieve shared project goals

HSM 355 Special Topics (1-3 Credit Hours)
Pre-requisites: Variable, used as needed,
Variable hours and topics.

HSM 358 Research Literacy for Health Decision-Makers (3 Credit Hours)
Pre-requisites: ISSCM 241 or STAT 103
This course explores the research process and the regulatory requirements in health sciences research. It provides a foundation for application of evidence-based practices in healthcare services. The fundamentals of research design, methodology, interpretation, and critical appraisal are introduced. The course requires critical thinking to determine the relevance of novel research. Emphasis is given to practical applications to decision-making in healthcare administration. Students will present a critical analysis of multiple types of research studies.
Course equivalencies: X - HSM 358 / MHA 450
Outcomes:
Outline research processes; Discuss the strengths and weaknesses of specific levels of evidence; Describe ethical doctrine and regulations impacting human participant protection; Assess study design, measures, and data collection techniques; Critically evaluate health-related research, including analysis and conclusions; Evaluate the relevance of novel research

HSM 360 Healthcare Administration Experiential Learning Practicum (6 Credit Hours)
Pre-requisites: HSM 310, HSM 315, HSM 330, HSM 338, HSM 345, HSM 358, HSM 368, and HSM 386
This course offers students an immersive professional experience within a healthcare setting, providing the opportunity to apply theoretical knowledge gained from prior healthcare administration coursework in a real-world context. Under the guidance of the course instructor(s) and a field preceptor, students collaborate with a healthcare organization to complete goal-oriented projects that align with the organization's needs and objectives. These projects are developed in partnership with the student, faculty advisor, and field preceptor, ensuring both practical relevance and academic rigor. Students are required to complete a minimum of 196 on-site hours, scheduled in coordination with the preceptor. This hands-on engagement allows students to refine their skills, deepen their understanding of healthcare administration, and contribute meaningful outcomes to their host organization.
This course satisfies the Engaged Learning requirement.
Outcomes:
Apply healthcare administration theoretical knowledge, concepts, and skills; Utilize analytical tools to address problems of practice; Exhibit critical thinking and advanced communication skills; Apply ethical reasoning to make at principled decisions in alignment with the Jesuit tradition; Incorporate feedback to enhance improve personal and professional effectiveness; Demonstrate independence, resourcefulness, and thoughtfulness in the workplace

HSM 365 Health Innovation and Entrepreneurship (3 Credit Hours)
This course introduces basic concepts and methods of design thinking and entrepreneurial training through lecture, discussion and experiential activities. Students will form collaborative teams to develop innovative healthcare products, processes or services especially relevant to promoting health equity and reducing health disparities - by practicing customer discovery, problem identification, ideation, prototyping, testing and pitching. Course is open to Juniors and Seniors at the Parkinson School as well as students in the LUC Interdisciplinary Honors Program.
Outcomes:
Students will be able to define basic principles of design thinking and entrepreneurial business model generation, and explain how they can be applied in a variety of healthcare settings as tools for innovation especially related to promoting health equity and reducing health disparities

HSM 368 Management of Healthcare Organizations (3 Credit Hours)
Pre-requisites: HSM 110
This course familiarizes students with the profession of healthcare administration by providing an overview to leadership, management, organizational development and change. Reflecting the uniqueness of the healthcare sector, students are introduced to key principles, practices and theories that support the socially just and ethical management of healthcare organizations.
Outcomes:
1) Differentiate between the roles of healthcare manager and healthcare leader; 2) Describe how management principles are applied in healthcare organizations; 3) Articulate organizational development challenges faced by healthcare entities; 4) Formulate strategies to manage a change intervention; and 5) Explain ethical and social justice responsibilities in healthcare management

HSM 386 Health Information Systems Management (3 Credit Hours)
Pre-requisites: HSM 110 (Can also be taken as a corequisite)
This course explores the management and leadership of health information systems in the healthcare industry. Students will examine the types, purposes, and attributes of clinical and administrative systems used in healthcare organizations. Topics include the value of health information systems in enhancing organizational performance, the systems development lifecycle, and the role of management and leadership in system implementation. Additional focus is placed on addressing privacy, security, and ethical challenges, as well as evaluating the impact of emerging trends on healthcare delivery.
Outcomes:
Describe the major types, purposes, and attributes of clinical and administrative information systems used in health care organizations; Explain the value of health information systems, including their role in supporting organizational performance, strategy, and effective management; Evaluate risks related to privacy, security, and ethical considerations in the use and management of health information systems; Explain how the systems development lifecycle supports the effective management of health information systems; Evaluate the potential impact of emerging trends in health information systems

HSM 390 Applied Decision-Making in Interprofessional Education (3 Credit Hours)
Pre-requisites: Senior standing in Health Science BS program
This course explores the principles and practices of decision-making in interprofessional contexts within the health sciences. Students will examine frameworks for collaborative problem-solving, ethical considerations, and evidence-informed decision-making across diverse professional roles. Emphasis will be placed on applying decision-making models to real-world scenarios, enhancing communication, and fostering teamwork to improve outcomes in health and community settings. Through case studies, simulations, and a team based project, students will develop skills to make effective, equitable, and context-sensitive decisions in interprofessional teams.
Outcomes:
Analyze decision-making theories and models relevant to interprofessional collaboration in health and public health contexts; Apply evidence-based frameworks to make informed decisions in complex, real-world scenarios; Demonstrate effective communication strategies that support shared decision-making among diverse professional roles; Evaluate ethical, cultural, and equity considerations that influence decision-making in interprofessional practice

HSM 391 Interprofessional Internship (3 Credit Hours)
Pre-requisites: Senior standing in Health Science BS program
This internship course provides students with the opportunity to integrate academic learning with professional practice through 200 hours of supervised field experience in health organizations. Students will engage in interprofessional settings where they apply theoretical knowledge, develop professional competencies, and contribute to collaborative practice. Emphasis is placed on reflective practice, professional identity formation, and the development of skills essential for effective teamwork and leadership in health and public health contexts.
Outcomes:
Apply discipline-specific knowledge and interprofessional competencies in a professional health organization setting; Demonstrate effective communication, teamwork, and collaboration skills in interprofessional practice; Evaluate the role of interprofessional collaboration in improving health outcomes and organizational effectiveness; Develop professional skills, networks, and career readiness through supervised experiential learning

HSM 399 Independent Study in Healthcare Administration (1-4 Credit Hours)
Pre-requisites: Permission of the Program Director, Must be enrolled in the undergraduate Healthcare Administration program
This is a directed study course in public health for approved students, supervised by a member of the faculty. Students must have an assigned professor, written objectives, planned outcomes and timelines.
Outcomes:
Upon successful completion of this course, the student will be able to articulate a general understanding of the selected topic

Healthcare Administration (MHA)

Discover, search, courses (p. 2661)!

MHA 405 U.S. Health Systems Management (3 Credit Hours)
This course provides a foundation for understanding the contribution of formal US healthcare services to the nation's health. Content includes how the structure of healthcare in the US healthcare impacts operational management of provider systems focus on how care is organized, delivered, financed and regulated. Major challenges that impact healthcare cost, quality and access are examined with underpinnings of social justice and impact on communities served. Emphasis is placed on management of quality, patient safety and information technology as centerpieces of the modern health care environment.
Outcomes:
Distinguish roles, functions and responsibilities of healthcare system components; Analyze the interaction of social, political and economic forces shaping healthcare delivery and impact on cost, quality and access

MHA 415 Culture of Quality & Safety in Health Care (3 Credit Hours)
Developing, managing healthcare safety and quality programs by demonstrating strategic importance of concepts inside healthcare organizations and clients. Discussion of safety science, high reliability organizations, trends in patient safety, healthcare quality, practices in different healthcare environments, development of organizational cultures, safety & quality, tools for monitoring performance improvement will be examined.
Outcomes:
Students will explain forces driving safety and quality in healthcare, evaluate strategies for improving safety/quality in healthcare, describe influence of systems on outcomes; Analyze role of various systems, factors in creating safe environments of care; Explain "just culture" thinking on safety, quality improvement; Develop plan for improvement of safety/quality

MHA 430 Managerial Epidemiology (3 Credit Hours)
Introduces epidemiological principles, tools pertinent to population health management, delivery of healthcare services, fundamentals of epidemiologic inquiry, population health, community health needs assessment introduced. Methods to effective planning, monitoring, and evaluation of healthcare services. Emphasis given to practical applications, decision-making in healthcare administration, planning, management, financing, outcome evaluation, within healthcare organizations.
Outcomes:
Students will distill the central role of population health management in healthcare administration, epidemiology in evidence-based management, basic principles/methods of descriptive epidemiology to healthcare, administration functions

MHA 440 Healthcare Management and Ethics (3 Credit Hours)
This course deepens insights into profession of healthcare administration, presents key principles, practices of management within healthcare organizations. Emphasis given to knowledge, skills necessary to effectively manage healthcare organizations. The interplay between management and the larger environment of internal/external stakeholders explored, ethical issues common to healthcare management examined. Provides foundation for developing effective management.
Outcomes:
Students will differentiate key principles of management, articulate the governance and management structure of healthcare organizations, synthesize core functions of healthcare manager; Identify/frame/evaluate healthcare management challenges, define strategies for addressing challenges

MHA 450 Research Literacy for Health Decision Makers (3 Credit Hours)
This course explores the research process and the regulatory requirements in health sciences research. The fundamentals of research design, methodology, interpretation, and critical appraisal are introduced. The course requires critical thinking and analysis to determine the relevance of novel research. Emphasis is given to practical applications to decision-making in healthcare administration including planning, management, assessment, and outcome evaluation, within healthcare organizations. Students will present a critical analysis of multiple types of research studies.
Course equivalencies: X - HSM 358 / MHA 450
Outcomes:
Explain the scientific method as it relates to research; Describe research governance, ethical doctrine and regulations impacting human participant protection; Assess study design and describe appropriate measures and data collection techniques; Discuss regulatory and policy factors that impact health-related research; Critically evaluate health-related research, including analysis and conclusions; Evaluate the relevance and implementation challenges of novel research; Determine how ethical healthcare leaders impact innovation and research

MHA 451 Healthcare Finance I (3 Credit Hours)
This course provides a basic understanding of financial management principles with emphasis on the not-for-profit entity. Foundational accounting concepts are explored with a focus on risk, financial statements, capital investments, debt and equity financing.
Outcomes:
Students will be able to recognize the three main corporate financial statements and explain in lay terms the information contained therein

MHA 452 Healthcare Finance II (3 Credit Hours)
Pre-requisites: MHA 451
Building on the foundational learning from Healthcare Finance I, this course focuses on for-profit entities within the health care sector and reimbursement methods. Financial concepts, discounted cash flow analysis, risk, financial performance evaluation, capital investments, capital budgeting, debt, equity financing will be explored. Description, assessments of reimbursement methodologies, strategies will be explored.
Outcomes:
Engage in long-term financial forecasting and planning; Differentiate various reimbursement strategies/ methodologies; Complete comprehensive financial forecast for a healthcare organization

MHA 460 Strategy & Leadership in Healthcare Organizations (3 Credit Hours)
This course examines competitive strategy, leadership in current healthcare environment. Content emphasizes formulation, execution & management, critical evaluation of organizational strategy. Key challenges faced by U.S. healthcare organizations and strategic responses are introduced. The relationship between strategic outcomes and leadership is explored emphasizing values-based leadership and individual qualities that define effective leaders. 2) Evaluate strategic options for a healthcare organization. 3) Formulate a strategy for a healthcare organization. 4) Manage the execution of a defined strategy. 5) Evaluate the performance of a strategic plan. 6) Compare theoretical concepts of leadership.
Outcomes:
1) Analyze the internal and external environment to which a strategy must respond

MHA 468 Healthcare Data Analytics & Business Intelligence (3 Credit Hours)
This course explores the use of data analytics, mining, visualization, tools to support data-driven decisions in healthcare organizations. Students develop a comprehensive view of data, use data to drive outcomes and efficiencies in healthcare. Commonly used methods/challenges in data analytics discussed. Multiple sources are explored including patient-generated data, electronic health records, administrative databases.
Outcomes:
Students will discuss the role of data analytics in health care organizations, demonstrate conceptual and practical knowledge, share structuring of health and healthcare data, retrieve data, perform descriptive analyses on healthcare datasets

MHA 472 Population Health Analytics and Emerging Technology for Healthcare Adminstn (3 Credit Hours)
This course integrates population health, healthcare analytics, business intelligence, and emerging technologies to support data-driven decision-making and organizational change in healthcare settings. Students examine the use of vital statistics, core health indicators, and population-level data to analyze health trends, assess performance, and inform organizational and policy decisions. Emphasis is placed on communicating analytic findings to decision-makers and applying analytic insights, including those supported by artificial intelligence, to lead continuous improvement and change initiatives within healthcare organizations.
Outcomes:
Explain the role of data analytics, population health, and epidemiology in healthcare administration; Analyze healthcare and population health data using appropriate analytic and business intelligence tools; Apply analytics to assess performance, monitor trends, and support quality, safety, and population health improvement; Design data-informed strategies to support evidence-based decision-making and organizational change

MHA 480 Topics in Post-Acute Care (3 Credit Hours)
Pre-requisites: MHA 405, MHA 415, MHA 430, MHA 451, MHA 452, MHA 491, and MHA 492
This course acquaints students with services delivered following traditional acute-care episodes or stays, providing comprehensive overview of programs, policies, services specific to post-acute care providers, facilities. The operating environment is examined with emphasis on regulations, reimbursement, care delivery, alternative delivery systems. Timely issues, challenges, dilemmas confronting long term care management explored.
Outcomes:
Demonstrate understanding of the basic operations of the continuum of post-acute care services, including delivery systems, consumers, providers, competitors; Discuss legal, regulatory environment surrounding post-acute care; Delineate role of financing/reimbursement

MHA 484 Capstone I-Healthcare Decision Support (3 Credit Hours)
Pre-requisites: Instructor Permission required
The course focuses on understanding decision support systems and how they are used to inform leadership decision-making across healthcare organizations. 2) Evaluate strategic options for a healthcare organization. 3) Formulate a strategy for a healthcare organization. 4) Manage the execution of a defined strategy. 5) Evaluate the performance of a strategic plan. 6) Compare theoretical concepts of leadership.
Outcomes:
1) Analyze the internal and external environment to which a strategy must respond

MHA 489 Human Resources and Professionalism (3 Credit Hours)
Human Resources and Professionalism is designed to equip students with the knowledge and skills to effectively manage human resources in the dynamic healthcare industry. Students will explore the role of human resources in healthcare, understanding the success of any healthcare organization is heavily dependent on workforce planning, recruitment, selection and retention. This course introduces the technical and legal aspects of human resources management (HRM) from a strategic business perspective and examines how HRM best practices can be applied to health services organizations (HSO s). The course examines how to manage human resources effectively in the dynamic legal, social, and economic environment currently constraining health care organizations. 2) Develop talent management processes including; recruitment plans, selection, engagement, and retention, and performance appraisal of employees. 3) Identify laws and policies affecting and protecting healthcare workers. 4) Determine effective strategies for conflict identification and management. 5) Discuss ethical leadership, codes of conduct and professional responsibilities. 6) Develop a plan for continued professional development, network expansion, and service to the profession.
Outcomes:
1) Evaluate HR management practices

MHA 490 Research and Innovation in Healthcare Administration (3 Credit Hours)
This course explores the research process and the regulatory requirements in drug, device, and biological product development. The fundamentals of research design, methodology, interpretation, and critical appraisal are introduced. The course requires critical thinking and analysis to determine the relevance of novel research. Emphasis is given to practical applications to decision-making in healthcare administration including planning, management, assessment, and outcome evaluation, within healthcare organizations.
Outcomes:
1) Outline the research and drug, device, and biologic development processes; 2) Discuss regulatory and policy factors that impact health-related research; 3) Critically evaluate health-related research; 4) Evaluate academic and industry contributions to innovation; 5) Evaluate the relevance and implementation challenges of novel research; 6) Determine how ethical healthcare leaders impact innovation and research

MHA 491 Systems Thinking for Healthcare Leaders (1 Credit Hour)
This two-day immersion will serve as an introductory course for the MHA program. Students will explore the concepts of systems thinking and develop practical skills for its application in healthcare settings. Students will be provided with supplemental reading materials and participate in simulations and exercises to hone their skills in this critical leadership competency.
Outcomes:
Students will define systems thinking as a leadership model and Apply relevant components of systems thinking in real-world healthcare setting

MHA 492 Policy in Health Systems (1 Credit Hour)
This Immersion provides students with policy, economic, and governance framework for understanding healthcare delivery systems. Selected theoretical models will be used to analyze existing and proposed health policies from the perspective of relevant stakeholders. Critical appraisal of selected national and global programs including their underlying values, socio-political, and economic issues, is a focus. This critical appraisal,based on the political, economic, legal, social, and ethical forces which impact the health policy-making process will be examined against the backdrop of US healthcare delivery systems. Implications for research and practice aimed at improving health outcomes of a student's target population will be a focus of this course. 2) Define various governance models and their relationships to governing regulatory bodies. 3) Use selected theoretical models to critically analyze health policies and related .issues from multiple stakeholder perspectives, including underrepresented populations.
Outcomes:
1) Describe the policy development and implementation processes in the United States

MHA 493 Healthcare Performance Management (1 Credit Hour)
This two-day immersion helps students build practical skills for ongoing performance management and monitoring of strategically aligned key performance indicators. Students will explore use of scorecards, dashboards as tool for ongoing outcomes monitoring, management within health systems. Students will be provided with supplemental reading, guest lecturers, participate in simulations, exercises.
Outcomes:
Students will build outcome monitoring scorecards and dashboards, effectively communicate outcomes and performance metrics

MHA 494 Multi-disciplinary Teams in Healthcare (1 Credit Hour)
Two-day immersion provides students with practical lessons, recognizing and optimizing the multi-disciplinary nature of healthcare workforces. Focus on building cross-functional teams, recognizing potential strengths/weaknesses of team members from different educational/ practice backgrounds. Team building exercises, small group theories will be incorporated to demonstrate practical value of multi-disciplinary teams. Course includes supplemental reading materials, guest lecturers, simulations, exercises to hone skills in critical leadership competency.
Outcomes:
Students will identify opportunities, challenges facing healthcare workforce; will effectively build multi-disciplinary teams of health care workers from a variety of specialties and fields

MHA 495 Capstone II (3-6 Credit Hours)
Pre-requisites: MHA 484 *Students without work experience or looking to gain more confidence and skill may take a 2nd capstone course, either concurrently or after the first capstone
This course provides students with the direction and support to complete an independent capstone project relative to an area of professional interest. Students develop a 1) workable problem statement; 2) a precise and targeted literature review on the topic of interest; and 3) propose an interventional capstone project to address the identified need/ problem using the principles of Six Sigma DMAIC (Define, Measure, Analyze, Implement, and Control). Students identify a community-based partner organization and secure commitment from the organization and individual preceptor willing to facilitate the project. A written plan of execution is submitted in the form of the Capstone Project Plan. Upon faculty approval, students may begin the implementation of the project. The second capstone provides more experiential learning opportunities and allow for greater interaction with the partner organization and problem-solving methodology. 2) Demonstrate analytic, critical thinking, and problem-solving capabilities by proposing an administrative solution to a healthcare problem.
Outcomes:
1) Examine a relevant healthcare problem or knowledge gap by executing and synthesizing a professional research and literature review

MHA 499 Independent Study in Healthcare Administration (1-3 Credit Hours)
Pre-requisites: Course open to MHA students; Permission of the Program Director
This is a directed study course in healthcare administration for approved students, supervised by a member of the MHA faculty. Students must have assigned professor, written objectives, planned outcomes and timelines.
Outcomes:
Students will be able to articulate a general understanding of the selected topic

Healthcare Management (HCMT)

Discover, search, courses (p. 2661)!

HCMT 501 Healthcare Finance and Accounting (3 Credit Hours)
Pre-requisites: Restricted to students enrolled in the MBA Health Care Management program
No course description is available

HCMT 502 Healthcare Economics (3 Credit Hours)
This course provides an understanding of the unique economic complexities of the health care industry, with a focus on consumer demand for health and the supply of health care services.

HCMT 505 Healthcare Business Ethics (3 Credit Hours)
This course examines the decision-making process in health care settings using an ethical framework that reconciles competing values and a mindset that prioritizes dwindling resources among a significant number of health care stakeholders.

HCMT 506 Healthcare Policy and Law (3 Credit Hours)
This course will introduce the student to the US Legal System and its application to the Healthcare Administrative environment. Topics covered will include the major legislative and regulatory standards of Health Care Law.

HCMT 507 Healthcare Risk Management (3 Credit Hours)
Students will learn to identify legal, ethical, administrative and compliance risk management and patient safety issues and to reach resolutions for the problems presented. Students will learn how to respond to various risk management issues from the perspective of clinicians, lawyers, administrators, managers and patients and appreciate how events are perceived and managed; and often how these perceptions are in conflict.

HCMT 508 Global Issues in Healthcare Management (3 Credit Hours)
This course provides students with an understanding of comparative global health care systems. Topics of study will include different models of funding health care services (via public and private health insurance systems), various models of organization of health care providers, and measures of population health in the visit countries.

HCMT 509 Special Topics in Health Care Management (1.5 Credit Hours)
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary. Enrollment is restricted to students enrolled in MBA-Health Care Management program.
Outcomes:
Students will be able to demonstrate understanding of specialized topics in health care

HCMT 510 Data Driven Decision Making in Healthcare Management (3 Credit Hours)
The intent of this course is to expand data literacy by learning about data tools and how pitfalls can occur in the process of creating them. This includes learning how data is defined, captured, analyzed, and cleaned. In addition, students will learn how data science tools are used within a healthcare setting and what ethical concerns may exist.

HCMT 512 Healthcare Marketing Management (3 Credit Hours)
This course will cover how marketing should be integrated across today's healthcare organizations, and give healthcare leaders a foundational understanding of the marketing concepts necessary for effectively defining their market, communicating with multiple customer groups, and ultimately driving customer loyalty and growth.

HCMT 513 HR Strategic Management (1.5 Credit Hours)
This course will help students understand and analyze the strategic HR challenges and decisions that organizations face today. The course will include lecture, readings, completion of case analysis in learning teams, a group presentation on one case, an individual paper, and a panel discussion with healthcare HR professionals.

HCMT 514 Healthcare Leadership (1.5 Credit Hours)
This course will help students expand their thinking on what it takes to be an effective leader in today's healthcare environment. It will also provide students an opportunity to gain insight on themselves as leaders, including their leadership purpose, values, style, talents, and development priorities.

HCMT 515 Project Management (3 Credit Hours)
Pre-requisites: Restricted to students enrolled in the MBA-HCM program
No course description is available

HCMT 516 Change Management (1.5 Credit Hours)
This course explores the complexity and dynamics of change in organizations, with a particular focus on the health care domain. Topics covered include organization development, managing resistance, and change leadership. Students will develop an awareness of the ethical issues of change and corporate social responsibility. Restricted to Healthcare Management cohort only (HCMC-MBA).
Outcomes:
Students will develop an awareness of the ethical issues of change and corporate social responsibility

HCMT 530 Capstone: Strategic Management (3 Credit Hours)
This is the capstone course of the Health Care MBA program, and is intended to be a bridge to working responsibly and effectively in the real world, particularly in the health care industry. This course will explore the fundamental frameworks for identifying, developing and implementing effective strategy for health care organizations.

Healthcare Professions Education (HPE)

Discover, search, courses (p. 2661)!

HPE 400 Research Methods in Health Professions Education (4 Credit Hours)
Introduction for Health Professions Education (HPE) students to the fundamentals of research design for education and scholarship in teaching and learning. This course offers a deep dive into educational research, covering problem identification, literature review, research question formulation, and the critical evaluation and synthesis of existing studies. It provides a solid foundation in quantitative research (including reliability, validity, survey construction, and validation), qualitative research (focusing on interviews and focus groups), and mixed methods research. The course emphasizes ethical principles in research and teaches effective data interpretation and presentation. Additionally, students will be introduced to grant development and introduced to their capstone project which is a research proposal. This course will equip students with the skills needed to excel in educational research., reliability, validity, survey construction, and survey validation), qualitative research (as it relates to interviews and focus groups) and mixed methods research (how to manage and use more than one method of data collection); Analyze data and ethical research practices that guide educational research; Illustrate grant development with an introduction of the capstone project research proposal.
Outcomes:
Identify a research problem and method of literature review; Formulate research questions and hypothesis; Distinguish between quantitative, qualitative, and mixed methods research; Describe fundamentals of quantitative research (e.g

HPE 401 Fundamentals of Learning and Teaching Modalities in Health Professions (3 Credit Hours)
Introduction to a range of teaching modalities, including large group lectures, small group teaching, case-based, problem-based, and team-based learning, flipped classrooms, standardized patients, simulation, e-learning, procedural, chalk talks, and clinical and bedside teaching. Ignatian Pedagogy will be threaded throughout the course. Rooted in adult learning theories and human cognition, students will review these fundamental concepts and seamlessly apply them throughout the course. There is a strong focus on practical application, enabling participants to create innovative and engaging learner-centered experiences, establish supportive learning environments, and adeptly integrate feedback. As a culmination of their learning, students will craft a final project, utilizing one of these teaching modalities to instruct peers on a relevant topic, applying the skills in a real-world educational context., large group lecture, small group teaching, cased-based, problem based and team-based learning, flipped classroom, standardized patients, simulation, e-learning and clinical and bedside teaching); Define the concepts of adult learning theories (e.g., learning theory, human cognition); Apply knowledge and understanding of androgyny to class work during this course; Demonstrate course skills, including the creation of innovative and engaging learner-centered experiences which will be showcased in the teaching portfolio project; Appraise experience with teaching modalities in education through reflective writing.
Outcomes:
Categorize different teaching modalities (e.g

HPE 402 Technology in Education and Effective Lecture Skills (4 Credit Hours)
In this engaging course, through a series of hands-on activities, participants will design and produce an electronic lecture that skillfully incorporates critical components of effective instruction. Students will not only create an educational presentation, but also assess its effectiveness through peer review, showcasing their critical evaluation skills and the ability to use feedback for continuous improvement. By the course's conclusion, participants implement peer-reviewed feedback and integrate best practices to refine their lecture into a polished, pedagogically effective resource.
Outcomes:
Produce an engaging and impactful electronic lecture that incorporates critical components of effective instruction; Demonstrate critical evaluation skills through peer review of educational content; Use peer feedback to revise and enhance their lecture; Appraise use of technology in education with discussion posts

HPE 403 Principles of Curriculum Design (4 Credit Hours)
The course will focus on the formal process of curriculum development. Much of the course will cover the standard medical education curriculum development process developed by Kern and Thomas (Thomas PA, Kern DE et al. Curriculum Development for Medical Education: A Six-Step Approach. 3rd ed. The Johns Hopkins University Press). Throughout this course, students will delve into essential theoretical literature specific to healthcare education, equipping participants with a solid foundation. They will learn to pinpoint educational challenges through needs assessment and distinguish between learning goals and objectives. Furthermore, students will master the art of crafting effective learning objectives using Bloom's Taxonomy and selecting fitting evaluation designs. Participants will learn educational strategies that will allow them to achieve their curriculum objectives. Finally, students will gain practical strategies for collecting and leveraging educational data to continuously enhance pedagogy, ensuring their healthcare education practices are informed, effective, and patient centered.
Outcomes:
Develop familiarity with essential theoretical literature of Kern's Six-Step Approach to Medical Education curriculum development; Identify curricular problems; Formulate a needs assessment; Recall the fundamental differences between learning goals and objectives; Illustrate how to create learning objectives for courses and educational sessions utilizing Bloom's Taxonomy; Select an appropriate evaluation design based on the identified objectives; Evaluate the effectiveness and impact of various educational technologies on learning outcomes and instructional design; Develop strategies to gather, review, and utilize educational data to improve pedagogy

HPE 404 Statistical Methods for Educational Research (4 Credit Hours)
This course offers a foundational understanding of statistical analysis within the context of research in clinical and health professions education. Through a blend of theoretical knowledge and hands-on practice, students will become proficient in defining core statistical concepts, applying statistical methods to diverse data types, and recognizing statistical analysis as a versatile toolkit for uncovering insights in data. Additionally, they will explore how statistical thinking enhances problem-solving skills in health professions education research and gain an understanding of the purpose and proper application of statistical techniques. Practical skills include conducting statistical tests, interpreting their outcomes, and translating results into meaningful conclusions. By the course's conclusion, students will be well-prepared to engage in evidence-based research, make informed decisions, and contribute to advancements in both clinical practice and medical education.
Outcomes:
Define basic statistical concepts; Analyze statistics from clinical and educational data; Classify statistical analysis as a collection of techniques that are intended to uncover information in data; Discuss how statistical methodology is used to aid thinking in health professions education research; Describe proper use of the statistical techniques that are presented in this course; Compute statistical tests of research hypotheses using methods presented in this course; Interpret the meaning of tests of hypotheses and other statistical computations

HPE 405 Strategies in Assessment, Implementation, and Evaluation in HPE (4 Credit Hours)
This course is designed to equip students with the advanced skills and knowledge required to navigate the evolving landscape of healthcare education. This program offers a dynamic blend of theory and practice. Dive deep into the art and science of designing effective assessment strategies, implementing innovative educational techniques, and rigorously evaluating the outcomes in health professions education. Through critical analysis and synthesis, students will gain the skills to create holistic, evidence-based educational approaches.
Outcomes:
Apply advanced theoretical knowledge to real-world scenarios within the evolving landscape of healthcare education; Employ a blend of theory and practice to effectively address complex challenges and opportunities; Analyze the art and science of effective assessment strategies, innovative educational techniques, outcomes evaluations in health professions education; Demonstrate an understanding of various assessment and testing methods; Appraise educational practices, leveraging advanced skills and knowledge to lead positive change and innovation in healthcare education

HPE 406 Leadership in Health Professions Education (3 Credit Hours)
This course is designed to provide students with an understanding of the various theories that underpin leadership education and practice within the context of health professions education. As an active participant in this class, students will explore the presented leadership theories to shape their approach as an educator but also examine how these theories inform their interactions and engagement with the world within and beyond the healthcare and education domains. Participants will gain insights into how leadership principles can be applied to address the unique challenges and opportunities faced by health professions educators, helping them become a more effective leader and educator in the healthcare field, ultimately contributing to the advancement of healthcare education and practice.
Outcomes:
Review the fundamental concepts of leadership and the theories in the context of health professions education; Analyze ideas, arguments, and viewpoints related to leadership theories within healthcare and educational settings; Assess the effectiveness of different leadership styles, change agent qualities, and approaches in various organizational contexts, especially in the context of driving change; Articulate how one's personal developmental perspective influences both philosophical beliefs and practical applications in healthcare leadership and education

HPE 407 Administrative Skills and Organizational Change (3 Credit Hours)
This course has a clear focus on two main aspects: understanding how organizations undergo transformations and equipping individuals to drive change within an organization. It covers several key areas, including the driving forces behind change, the process of implementing change, the qualities, and skills necessary for effective change agents, and the behavioral theory explaining how both individuals and organizations evolve. A comprehensive grasp of the various theoretical frameworks shaping the organization and structure of higher education is integral to achieving proficiency in these areas. The goal of this course is to provide students with valuable insights into the major functions and structures within higher education. In essence, it's not focused on teaching administrative or faculty tasks but rather on helping participants understand the context within which they operate within higher education. This course introduces students to important concepts, theories, and fiscal practices in higher education. Moreover, it offers opportunities for students to analyze, test, and receive feedback on their financial decision making and its impact on critical higher education issues.
Outcomes:
Explain the significance of theoretical frameworks in shaping the structure of higher education and organizational dynamics; Apply knowledge of organizational change forces; Analyze real-world scenarios of organizational transformation; Examine the various factors contributing to the success or failure of change initiatives within organizations; Demonstrate competence in financial decision-making processes by making informed decisions that address critical higher education issues; Develop innovative approaches for implementing change within an organization

HPE 408 Health Professions Education Capstone Project (3 Credit Hours)
In this course students craft a research proposal primed for submission to the Institutional Review Board (IRB). Guided by seasoned educators and researchers, participants skillfully construct essential components of a robust research proposal that fills a current gap in the literature. Proposals will include an introduction, background, significance, thorough literature review, research methods, budget, and thoughtful implications and conclusions. By course end, students will not only have a well prepared research proposal but also the knowledge and confidence to undertake impactful research in the dynamic landscape of health professions education.
Outcomes:
Demonstrate a grasp of health professions education research principles; Construct an effectively structured research proposal that includes a well-defined introduction, background/significance, and literature review; Develop the research methods, implications, and conclusion sections of a health professions educational research proposal; Generate a coherent, complete, well-structured, and insightful proposal ready for IRB submission

Hebrew (HEBR)

Discover, search, courses (p. 2661)!

HEBR 101 Modern Hebrew I (3 Credit Hours)
An introduction to the fundamentals of modern Hebrew, together with study of the distinctive culture of the Jewish state of Israel.
Outcomes:
Students will be able to understand basic Hebrew sentences and to give basic information about themselves in Hebrew, and will demonstrate knowledge of the culture of modern Israel

HEBR 102 Modern Hebrew II (3 Credit Hours)
Pre-requisites: HEBR 101
A continued introduction to the fundamentals of modern Hebrew, together with study of distinctive culture of the Jewish state of Israel.
Outcomes:
Students will be able to understand basic Hebrew sentences and to give basic information about themselves in Hebrew, and will demonstrate knowledge of the culture modern Israel

HEBR 103 Modern Hebrew III (3 Credit Hours)
Taught in Hebrew. Course focuses on pronunciation, grammar, and developing conversational and writing fluency.

HEBR 104 Modern Hebrew IV (3 Credit Hours)
Taught in Hebrew. Students will comprehend and produce Hebrew in more complex contexts (literary and cultural) while reviewing intermediate grammar structures to improve fluency and accuracy. Students present and debate cultural, historical or current events topics; practice expressing emotion, opinion, judgment, necessity, hypotheticals, and regret.

HEBR 499 Directed Study (3 Credit Hours)
Pre-requisites: Graduate Status; Department Consent required
Independent/directed study of Modern Hebrew, spoken and written.
Outcomes:
Phonetics, grammar, syntax, vocabulary of Modern Hebrew will be learned

Hindi (HNDI)

Discover, search, courses (p. 2661)!

HNDI 100 Urdu Script (1-3 Credit Hours)
A course in the script for Urdu, the national language of Pakistan and much of Muslim India.
Course equivalencies: HNDI100/ASIA100U/IWS100U

HNDI 101 Hindi-Urdu I (3 Credit Hours)
This course is an introduction to the two sister languages, Hindi and Urdu. No previous knowledge of either language is assumed. It also introduces the Devanagari script in which Hindi is written.
Interdisciplinary Option: Asian Studies, Middle East and Islamic World Studies
Course equivalencies: X-HNDI101/ASIAHU1/IWS101U
Outcomes:
Students will be introduced to the spoken language and the script in which the majority of native speakers write the language

HNDI 102 Hindi-Urdu II (3 Credit Hours)
This course is for students who have a basic knowledge of either spoken Hindi or Urdu, but do not read or write in Hindi. The course emphasizes the ability to read and write the script and the acquisition of basic grammatical structures and vocabulary.
Interdisciplinary Option: Asian Studies, Middle East and Islamic World Studies
Course equivalencies: X-HNDI102/ASIAHU2/IWS102U
Outcomes:
Students will be able to develop basic proficiency in the language and will be able to speak, read and write in simple sentences at the elementary level

HNDI 103 Hindi-Urdu III (3 Credit Hours)
This course is for students who have an elementary to intermediate knowledge of either spoken Hindi or Urdu but do no read or write in Hindi. The course emphasizes the ability to read and write in the script and the acquisition of formal grammar and vocabulary.
Interdisciplinary Option: Asian Studies, Middle East and Islamic World Studies
Course equivalencies: X-HNDI103/ASIAHU3/IWS103U
Outcomes:
Students will be able to develop better understanding of grammatical structures and usage; Students will develop more proficiency in reading and writing the language at the intermediate level

HNDI 104 Hindi-Urdu IV (3 Credit Hours)
The course is a continuation of 103 and emphasizes the ability to read and write in the script and the acquisition of formal grammar and vocabulary.
Interdisciplinary Option: Asian Studies, Middle East and Islamic World Studies
Course equivalencies: X-HNDI104/ASIAHU4/IWS104U
Outcomes:
Students will be able to develop better understanding of grammatical structures and usage; Students will develop more proficiency in reading and writing the language at the intermediate level

History (HIST)

Discover, search, courses (p. 2661)!

HIST 101 Culture, Power and Identity: Western Ideas & Institutions to 17th Century (3 Credit Hours)
This course traces the early development of Western ideas and institutions from the ancient Near East; Greece and Rome; the medieval civilization(s); to the European Renaissance and Reformation.
Knowledge Area: Foundational Historical Knowledge
Interdisciplinary Option: Catholic Studies
Course equivalencies: X-HIST101/CATH101/ACHIS101
Outcomes:
Students will gain an understanding of history as a discipline; be able to place Judaism, Christianity, and Islam in historical context; explain the expansion of the West; and develop their critical thinking and communications skills

HIST 102 Culture, Power and Identity: Western Ideas & Institutions from 17th Century (3 Credit Hours)
This course traces the development of Western ideas and institutions and their global impact from the seventeenth century to the present.
Knowledge Area: Foundational Historical Knowledge
Interdisciplinary Option: European Studies
Course equivalencies: ACHIS 102 / HIST 102
Outcomes:
Students will gain an understanding of history as a discipline, develop critical thinking skills based on historical knowledge about the key people, places, and events that shaped the modern world, and hone their communication skills

HIST 103 American Pluralism (3 Credit Hours)
This course is an introduction to the origins, development and structure of the United States as a pluralistic and multiracial society from 1609 to the present.
Knowledge Area: Foundational Historical Knowledge
Outcomes:
Students will gain an understanding of history as a discipline, demonstrate historical knowledge, draw links between the American experience and national identities, and develop critical thinking and communication skills

HIST 104 Global History Since 1500 (3 Credit Hours)
This course deals with the emergence of the modern world, including such topics as the expansion and intensification of cross-cultural interaction; imperialism, colonialism, and nationalism; the spread of information; capitalism, industrialism, and popular sovereignty; race and ethnicity, gender, and socio-economic status.
Knowledge Area: Foundational Historical Knowledge
Interdisciplinary Option: Global Studies
Course equivalencies: HIST / ACHIS 104
Outcomes:
Students will gain an understanding of history as a discipline; Evaluate and explain the forces of historical continuity and change; Demonstrate how the encounters/changes between and among societies produced the world we have today; Analyze and discuss the significance of primary and secondary sources and how they relate to the history under discussion

HIST 205 Modern Western Civilization: Social Sciences in Context (3 Credit Hours)
An introduction to history as a discipline and an analysis of the history of Western civilization since the 17th century that emphasizes the contexts from which emerged the concepts of the social sciences and their related value systems.

HIST 208 East Asian History: Themes & Issues (3 Credit Hours)
Pre-requisites: HIST 101, HIST 102, HIST 103, HIST 104, or equivalent; please check requirements for declared majors/minors for exceptions
This course explores the roles and contributions of China, Japan, and Korea from the sixteenth century to the present tracing such themes as nationalism, capitalism, socialism, imperialism, war, peace, race, and gender struggles.
Knowledge Area: Tier 2 Historical Knowledge
Interdisciplinary Option: Asian Studies, Global Studies, Japanese Language and Culture
Course equivalencies: X-HIST108/ASIA108/INTS108
Outcomes:
Students will demonstrate an ability to evaluate and explain the forces of historical continuity and change; understand the relationships among historical events, cultures and social forces; analyze and discuss the significance of primary and secondary sources

HIST 208X Pre-Modern Chinese History (3 Credit Hours)
This course starts with the formative periods of Chinese civilization from the Neolithic era and ends with the Opium War and the collapse of the Manchu Qing Empire in 1911. This course will provide students with an understanding of modern-day China by looking at China's dynamic and multilayered past.
Knowledge Area: Tier 2 Historical Knowledge
Interdisciplinary Option: Asian Studies, Chinese Language & Culture
Course equivalencies: X-HIST342A/ASIA342A
Outcomes:
Students will learn to: situate major historical events in China's early history in their proper geographical, chronological, and thematic context; and use primary and secondary sources to construct interpretations of historical problems and events

HIST 208Z Modern Chinese History (3 Credit Hours)
The course is specifically designed for foreign students studying in Beijing with the objective of enabling them to understand the ongoing social, economic and political trends which have roots in the past. The time period studied will span from the end of the 19th century through the 20th century.
Knowledge Area: Tier 2 Historical Knowledge
Interdisciplinary Option: Asian Studies, Chinese Language & Culture
Course equivalencies: X-HIST346A/ASIA346A/INTS346A
Outcomes:
students will learn to situate major historical events such as the May Fourth Movement in their proper geographical, chronological, and thematic context; and recognize the extent to which history is at the core of current Chinese leaders' speeches, policy making, and rule making

HIST 209 Islamic History: Themes & Issues (3 Credit Hours)
Pre-requisites: HIST 101, HIST 102, HIST 103, HIST 104, or equivalent; please check requirements for declared majors/minors for exceptions
The course will introduce the historical development of Islamic civilization and the formation of Muslim social and political institutions from the 7th century to the present.
Knowledge Area: Tier 2 Historical Knowledge
Interdisciplinary Option: African Studies and the African Diaspora, Arabic Language and Culture, Asian Studies, Global Studies, Islamic World Studies
Course equivalencies: HIST/ASIA/IWS/INTS109/AFR111
Outcomes:
Students will be able to demonstrate knowledge of the historical development and diversity of Islamic beliefs, practices, and institutions in varied regional contexts and historical periods

HIST 210 Latin American History: Themes & Issues (3 Credit Hours)
Pre-requisites: HIST 101, HIST 102, HIST 103, HIST 104, or equivalent; please check requirements for declared majors/minors for exceptions
This course explores the formation of modern Latin America by examining the region as a global nexus where ideologies, cultures, peoples, and political entities have conjoined and clashed from the fifteenth century to the present. Demonstrate and understanding of the relationships among historical events, culture and social forces. Differentiate between students' values and ways of understanding the world & those of other cultures.
Knowledge Area: Tier 2 Historical Knowledge
Interdisciplinary Option: African Studies and the African Diaspora, Global Studies, Latin American Studies
Outcomes:
Demonstrate and ability to evaluate and explain forces of historical continuity and change; Demonstrate and understanding of the relationships among historical events, culture and social forces; Differentiate between students' values and ways of understanding the world & those of other cultures

HIST 211 US History to 1865: Themes & Issues (3 Credit Hours)
Pre-requisites: HIST 101, HIST 102, HIST 103, HIST 104, or equivalent; please check requirements for declared majors/minors for exceptions
This course is an introduction to the history of the United States from the colonial era through the Civil War.
Knowledge Area: Tier 2 Historical Knowledge
Course equivalencies: HIST201/HIST111/ACHIS201
Outcomes:
Students will demonstrate an understanding of Native American societies, the impact of European colonization, the creation and evolution of democratic institutions in a multicultural society, the geographic expansion of the United States, and the impact of slavery

HIST 212 US History since 1865: Themes & Issues (3 Credit Hours)
Pre-requisites: HIST 101, HIST 102, HIST 103, HIST 104, or equivalent; please check requirements for declared majors/minors for exceptions
This course is an introduction to the history of the United States from the Civil War to the present.
Knowledge Area: Tier 2 Historical Knowledge
Course equivalencies: HIST202/HIST112/ACHIS202
Outcomes:
Students will demonstrate an understanding of how the United States became a modern industrial society, the emergence and evolution of the modern welfare state, the rise of the United States as a global power, and the impact of controversies over civil rights and liberties on American society

HIST 213 African History: Themes & Issues (3 Credit Hours)
Pre-requisites: HIST 101, HIST 102, HIST 103, HIST 104, or equivalent; please check requirements for declared majors/minors for exceptions
This course surveys the history of Africa from dynastic Egypt to post-colonialism. The primary focus of this class is to examine the interactions African peoples had with non-Africans from the 15th century to the present. Engage communication skills and sensitivities. Possess a heightened understanding of diversity in the world.
Knowledge Area: Tier 2 Historical Knowledge
Interdisciplinary Option: African Studies and the African Diaspora, Global Studies, Middle East and Islamic World Studies
Outcomes:
Engage in critical thinking skills and disposition; Engage communication skills and sensitivities; Possess a heightened understanding of diversity in the world

HIST 253A Barbarians and the Fall of the Roman Empire (3 Credit Hours)
This course examines the interaction between Romans and the so-called 'barbarians' such as the Goths, Huns, Slavs, and Arabs from the 2nd to the 7th centuries, with a focus on how new archaeological and skeletal data is changing our understanding of the barbarians.
Interdisciplinary Option: European Studies, Italian Studies, Medieval Studies
Outcomes:
Students will study the role of neighboring peoples in the collapse of the Roman Empire; interpret archaeological data; compare receptions of immigrants and refugees in the ancient and modern world

HIST 254A The Vikings (3 Credit Hours)
The Vikings are popularly thought of as invaders, marauders, destroyers of civilized peace. However, recent research has focused on their society, culture, accomplishments and contributions in a much more positive sense.
Interdisciplinary Option: European Studies, Medieval Studies
Course equivalencies: X-HIST334/MSTU326
Outcomes:
Students will gain an understanding of the impact of the Vikings on European development; a knowledge of historiographical issues concerning the Vikings; and awareness of various types of primary sources

HIST 257A Witchcraft and Science in Pre-Modern Europe (3 Credit Hours)
This course will trace the history of medieval and early modern ideas about nature, magic, demonology, and witchcraft, exploring the history of reason and rationality, elite and popular culture, persecution and society, and the intersections between Magic, Science, and Witchcraft.
Interdisciplinary Option: European Studies, Medieval Studies
Outcomes:
Students will understand connections between witchcraft and popular religions; the gendering of witches; the political and economic aspects of witch trials; and modern portrayals of witches in popular media

HIST 258A Blood, Heresy, and Treason: The Tudors and Stuarts (3 Credit Hours)
This course covers the most crucial period in the history of England, encompassing the Reformation, The Tudors, the Civil War, the Glorious Revolution, and the rise of Britain as a great power. Major figures featured include Richard III, Henry VIII, Thomas More, Elizabeth I, Shakespeare, Oliver Cromwell, and Charles II. Students will confront developments significant not just for the British Isles, but across the globe for centuries. Students will hone their critical thinking skills through the analysis of historical evidence.
Interdisciplinary Option: European Studies

HIST 265A The First World War (3 Credit Hours)
World War I is arguably the greatest watershed separating us from our pre-modern past. This course proposes to explore the causes, campaigns consequences, and cultural legacies of the war. Students will be required to read eyewitness accounts and memoirs, and view films that assess the war's impact on world civilization. Students will learn about the First World War by engaging with primary accounts by combatants and non-combatants. Students will hone their critical thinking skills through the analysis of historical evidence.
Interdisciplinary Option: European Studies

HIST 267A Modern German Culture and Ideas I (3 Credit Hours)
This course will investigate intellectual and cultural responses to major events of nineteenth-century German history, including the Napoleonic Wars, the Restoration, the Revolution of 1848, the unification of Germany, the German Empire under Bismarck and Wilhelm II, and events leading to the First World War.
Interdisciplinary Option: European Studies, German Studies
Course equivalencies: X-HIST321A/INTS321A
Outcomes:
The student will be able to connect German cultural life to political and social developments, and be able to identify intellectual currents such as Romantic Germany, Idealist Germany, and Dionysian Germany

HIST 267B Modern German Culture and Ideas II (3 Credit Hours)
This course will cover the major phases of modern German history: Wilhelmine Germany, Volkish Germany, Germany in the First World War, Weimar Germany, National Socialist Germany, Germany in the Second World War, Post-War West Germany, East Germany, and Reunification. While setting forth the background of political and social developments, we will carefully consider responses to these issues by leaders in German intellectual and cultural life.
Interdisciplinary Option: European Studies, Global Studies, German Studies
Course equivalencies: X-HIST336/INTS336
Outcomes:
Students will apprehend the role of Germany in World War I; the turn to the Weimar Republic; the Rise and Fall of National Socialism; the emergence of two Germanies as a consequence of defeat in World War II; reunification in 1989; and cultural responses to these developments

HIST 275A The Silk Roads: Global Trade, Culture, & Politics (3 Credit Hours)
The course will cover: exchanges between nomad and sedentary populations in East Asia and the flourishing of information routes to modern day Mongolia, Afghanistan, India, Greece and Rome; interactions with European powers, concepts of colonialism, imperialism, and the emergence of 20th century world wars; contemporary geo-political challenges in the region.
Interdisciplinary Option: Asian Studies, Global Studies
Outcomes:
Understand diversity in the World from a historical, political, and economic point of view; familiarize oneself with the relations between Asia and the West; highlight differences, similarities and reciprocal influences

HIST 279C History of Computing (3 Credit Hours)
This course will teach students about the history of computing from the development of number systems and arithmetic, through calculating and computing machines, to advanced communication technology via the Internet. The History of Computing will foster historical awareness about the ongoing relationships between social organization, intellectual climate, and technological innovation. Students will attain computer science literacy while studying core historical concepts. They will learn the background of the computing discipline, which plays a significant role in modern human experience.
Course equivalencies: X - COMP 111 / HIST 279C

HIST 279E Climate and History (3 Credit Hours)
Explores the role of climate in history, from the emergence of homo sapiens to recent anthropogenic climate change. Major topics include the social impact of climate variability, sources of resilience, origins of scientific knowledge, and the use of historical knowledge in the present.
Course equivalencies: X-HIST279E/ ENVS279
Outcomes:
Students will analyze examples of climate shaping history, learn different ways that scholars have treated this relationship, and reflect on how this knowledge might be useful today

HIST 280A Pirates and Sailors in the Revolutionary Atlantic (3 Credit Hours)
Moving beyond seafaring lore and legend, this course places the history of pirates and sailors in the context of "Atlantic history." Students will explore how organized conquests and trading ventures led to the formation of the first British empire and the expansion of commercial networks around the Atlantic and beyond.
Outcomes:
Course prepares students to confront the way political and economic power is exercised, justified, questioned, and resisted during periods of rapid, global capitalist expansion

HIST 290A History of Sexuality in the United States (3 Credit Hours)
This course provides a historical introduction to sexual behaviors and attitudes in the United States from the early American period to the present. The primary emphasis concerns the impact of social and political change on sexual norms and behavior.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-HIST392/WOST/WSGS320
Outcomes:
The course enables students to comprehend the evolving boundaries of sexual behavior and the historical transformations of the family, sexuality, gender, and personal identity in the United States

HIST 291A American Icons: Heroes, Images, Ideas (3 Credit Hours)
We explore US history through Iconic photographs, movies, artworks and essays. For example, the film "To Kill a Mockingbird," allows us to delineate the image of race, class and family in the South during the Great Depression, even as the film opens up Hollywood's role in shaping popular ideologies. Learn about 20th-century US history, including the Great Depression, Civil Rights Movement, and Cold War; develop writing and discussion skills; learn about the relationship between history and memory.

HIST 297E North American Environmental History (3 Credit Hours)
This course surveys the environment and environmentalism in United States history, from the transformation of New England into a farm ecology, the expansion of the cotton South, the settlement of the West, to the rise of industrial cities, suburban sprawl, and the globalization of the economy.
Course equivalencies: X-ENVS297/HIST297E
Outcomes:
Students will be able to demonstrate historical knowledge of environmental thought and ecological science, to draw links between environmental concerns and public policies, and to develop critical thinking and communication skills

HIST 298A History and the Public: Intro to Public History (3 Credit Hours)
History and the Public explores the field of public history with special emphasis on the theory, methods, practice, ethics, and controversies faced when preserving or presenting history outside of a formal classroom environment.
Outcomes:
Appreciate how public historians shape public perceptions of the past and how public perceptions of the past shape public history; appreciate the diverse areas of historical practice; enhance teamwork skills

HIST 299 Historical Methods (3 Credit Hours)
Pre-requisites: 12 hours in HIST
This course studies the ways historians arrive at their interpretation of events. This is accomplished through a history of historical writing or through a special selected topic that illustrates the use of different methods by past and present historians. Students are expected to take this course after completing their four introductory courses for the major.
Outcomes:
students will understand that history is not a set of facts but a discipline that depends on competing paradigms and the ongoing interpretation of primary sources

HIST 300 Topics in History (3 Credit Hours)
Special topics or new approaches of current interest to the instructor. They may be used, like all other 300-level courses, to fulfill the history major distribution requirements. The title of each Topics course, specifying date and/or area, will indicate which distribution requirement it fulfills within the history major. Students can take HIST 300 multiple times.

HIST 300A Topics (3 Credit Hours)
Special topics or new approaches of current interest to the instructor. This course counts as a 300-level history elective. Students may repeat the course for credit when the topic changes.
Outcomes:
Students will gain familiarity with the topic; the ability to make connections between secondary and primary sources; and the capacity to think critically about the ways that historians have approached major issues

HIST 300B Topics in Premodern History (3 Credit Hours)
Special topics or new approaches of current interest to the instructor. This course may be used to fulfill the history major distribution requirement in 300-Level Pre-1700 European History or may count as a 300-Level history elective. Students may repeat the course for credit when the topic changes.
Outcomes:
Students will gain familiarity with the topic; the ability to make connections between secondary and primary sources; and the capacity to think critically about the ways that historians have approached major issues

HIST 300C Topics in European History (Post-1700) (3 Credit Hours)
Special topics or new approaches of current interest to the instructor. This course may be used to fulfill the history major distribution requirement in 300-Level Post-1700 European History or may count as a 300-Level history elective. Students may repeat the course for credit when the topic changes.
Interdisciplinary Option: European Studies
Outcomes:
Students will gain familiarity with the topic; the ability to make connections between secondary and primary sources; and the capacity to think critically about the ways that historians have approached major issues

HIST 300D Topics in U.S. History (3 Credit Hours)
Special topics or new approaches of current interest to the instructor. This course may be used to fulfill the history major distribution requirement in 300-level U.S. history or may count as a 300-level history elective. Students may repeat the course for credit when the topic changes.
Outcomes:
Students will gain familiarity with the topic; the ability to make connections between secondary and primary sources; and the capacity to think critically about the ways that historians have approached major issues

HIST 300E Topics in World History (3 Credit Hours)
Special topics or new approaches of current interest to the instructor. This course may be used to fulfill the history major distribution requirement for a 300-level course in the history of Africa, Asia, Latin America, or the Middle East or may count as a 300-level history elective. Students may repeat the course for credit when the topic changes.
Outcomes:
Students will gain familiarity with the topic; the ability to make connections between secondary and primary sources; and the capacity to think critically about the ways that historians have approached major issues

HIST 301 Plagues: The Black Death and Other Pandemics (3 Credit Hours)
This course examines some of the worst pandemics ever to strike humanity, starting with the outbreaks of smallpox and bubonic in the final centuries of the Roman Empire, the devastating Black Death of the 14th century, and the diseases that destroyed the native Americans in the wake of Columbus's voyages.
Interdisciplinary Option: Bioethics
Course equivalencies: X-HIST301/ESP 304
Outcomes:
Students will gain an understanding of: the role of poverty, nutrition, and population in epidemics; state, church, or community responses to epidemics; how science has changed the history of disease

HIST 302 History of Western Education (3 Credit Hours)
History of Western Education. (ELPS 310)
Course equivalencies: X-ELPS301/HIST302

HIST 303 Pre-Industrial City in Europe (3 Credit Hours)
This course traces urban development from late antiquity to the early modern period.
Interdisciplinary Option: European Studies, Medieval Studies
Course equivalencies: X-HIST303/MSTU324
Outcomes:
Students will demonstrate an understanding of the origins and chronology of European town planning and development; and make comparisons with Islamic and Asian cities

HIST 307 Greece to Alexander the Great (3 Credit Hours)
This course explores ancient Greek history, society and culture, from the Bronze Age through the period of Classical Greece ending with Alexander and his empire.
Interdisciplinary Option: European Studies
Course equivalencies: X-CLST309/HIST307
Outcomes:
Students will be able to evaluate and interpret different types of sources critically and explain how these affect our understanding of the ancient Greeks

HIST 308A History of Rome to Constantine (3 Credit Hours)
This course surveys ancient Roman history, with a focus on Rome's conquest of the Mediterranean, the civil wars that ended the Roman Republic, the good and bad emperors of the Principate, and the conversion of Constantine to Christianity.
Interdisciplinary Option: Catholic Studies, European Studies
Course equivalencies: X-CLST308/HIST308/ROST308
Outcomes:
Students will understand the interrelationship among political, social, economic, and cultural developments and develop their research and writing skills

HIST 308B Pompeii and Herculaneum (3 Credit Hours)
The two best known Roman towns - Pompeii and Herculaneum - whose remains were preserved by the eruption of Mt. Vesuvius in 79 CE - will serve as a microcosm for understanding Roman society.
Interdisciplinary Option: European Studies, Italian Studies
Course equivalencies: HIST328/CLST328/ANTH328
Outcomes:
Students will gain an understanding of how recent archaeological discoveries have changed our view of Pompeii and Herculaneum and learn to "read" such things as dining and bathing rituals, gladiator games, and public and private architecture to gain insight into the structures of Roman social and cultural life

HIST 308C History of Early Christianity (3 Credit Hours)
This course examines the history of Christian communities and beliefs from their emergence in Jewish Palestine to the legalization of that religion in the Late Antique period. Students will gain familiarity with the diversity of early Christian belief, the interaction with the Roman imperial government, the evangelization and spread of Christianity both within the Roman Empire and outside it, the impact of Christianity on Roman social and family life, and the birth of monasticism.
Interdisciplinary Option: Catholic Studies
Course equivalencies: X-HIST309/CATH309
Outcomes:
Students will be able to evaluate the impact of discoveries such as the Dead Sea Scrolls and the Nag Hammadi library on the history of early Christianity; appreciate the extraordinary diversity of early Christianity; understand why Christianity was seen as a threat to Roman family life; improve their research, writing, and oral presentation skills; improve their critical reading skills of both secondary and primary sources

HIST 308D Transformations of Rome in Late Antiquity (3 Credit Hours)
This course focuses on the City of Rome itself from the third century up to the reign of Charlemagne. It demonstrates that this period was a time of gradual transformation and continuity. Both literary sources and the archaeology and epigraphy of the City shall be combined to show that barbarian invasions did not destroy the walls of Rome, and that the arrival of Christianity did not cause the fall of classical culture.
Interdisciplinary Option: European Studies, German Studies
Course equivalencies: HIST 339/CLST 318
Outcomes:
Students will be able to demonstrate an understanding of the working of historical mechanisms, evaluate and critically analyze this historical period

HIST 309 Shipwreck Archaeology (3 Credit Hours)
Students study how the technology of scuba diving combined with scientific archaeology has created a new discipline of shipwreck archaeology since the 1960s. They follow the history of the discipline and explore shipwrecks from Bronze Age Greece to nineteenth-century Chicago. They synthesize the research and conclusions of nautical archaeologists worldwide and organize those findings for presentation to a broader public in the coherent and imaginative form of their own Museum.
Interdisciplinary Option: Medieval Studies
Course equivalencies: XHIST324MSTU330ANTH347CLST324
Outcomes:
Students understand the importance of vessels conserved at Skuldelev, Lake Nemi and Uluburun for tracing the development of commerce and technology among the Vikings, the Romans, and the Syro-Palestinians of the Levant

HIST 310 The Middle Ages (3 Credit Hours)
This course examines European, Islamic and Byzantine society and culture in the Middle Ages.
Interdisciplinary Option: Catholic Studies, German Studies, Medieval Studies
Course equivalencies: X-HIST310/MSTU328/CATH310
Outcomes:
Students will learn of the Middle Ages, including relations between religious and political institutions; cultural developments; the rise of towns; reactions to the Black Death and the Hundred Years War

HIST 310A Medieval World 1100-1500 (3 Credit Hours)
This course examines European society and culture in the later Middle Ages.
Interdisciplinary Option: Catholic Studies, German Studies, Medieval Studies
Course equivalencies: HIST311/MSTU332/CATH311
Outcomes:
Students will demonstrate understanding of new forms of schools and learning; the origins of national monarchies; the crusades; chivalry; courtly love and the role of women; the rise of towns; church and state relations; the Black Death and the Hundred Years War

HIST 310B Medieval Culture (3 Credit Hours)
This course explores the three cultures of the Middle Ages - Islam, Byzantium, and Europe, with particular emphasis on art, music, and literature.
Interdisciplinary Option: Catholic Studies, German Studies
Outcomes:
students will understand how these cultures developed through shared roots, mutual influence, interaction and reaction; be able to interpret artistic expression and material culture in historical context; and gain skill in the analysis of primary sources

HIST 310C Medieval Women (3 Credit Hours)
This course explores the lives of medieval women from 500-1500 CE. While paying close attention to medieval ideas about gender and sexuality, students will examine experiences of medieval women from a range of backgrounds and social statuses as well as male and female roles in family life, religion, and politics.
Interdisciplinary Option: Medieval Studies, Women & Gender Studies
Outcomes:
Students will understand resources concerning medieval women while gaining appreciation for the need to challenge historical "master narratives" that frequently ignore or minimize the experiences and roles of women

HIST 310D Medieval Popular Religion (3 Credit Hours)
This course will explore the "lived" religious experience of medieval people through their actions, behaviors and artifacts. "Folk" (or pagan) survivals, pilgrimage, music and arts, devotion to saints, magical beliefs and practices, and attitudes to the natural/supernatural world[s] may be covered, depending on subtitle.
Interdisciplinary Option: Catholic Studies, Medieval Studies
Outcomes:
Students will appreciate the complex world view and agency of regular medieval people; they will acquire research skills and be able to critically assess primary and secondary source materials

HIST 310F Medieval Inquisitions and Heresy (3 Credit Hours)
This course examines the intriguing range of religious beliefs and practices in medieval Europe. Over the course of the semester, students will explore the criteria and processes by which local communities and translocal authorities defined heresy as well as the political interests and cultural assumptions that shaped labels and definitions.
Interdisciplinary Option: Medieval Studies
Outcomes:
Students will understand beliefs that shaped medieval religiosity, gain appreciation for roles played by heretics and inquisitions in premodern Europe, and look for similar phenomena in the modern world

HIST 310G Supernatural in the Middle Ages (3 Credit Hours)
Understanding the medieval supernatural leads to an appreciation of the richness of medieval society and intellectual culture. How were "natural" and "supernatural" defined across time and space, popular and elite cultures? How were ideas about the "supernatural" shaped by daily life, theology?
Interdisciplinary Option: Catholic Studies, European Studies, Medieval Studies
Outcomes:
Think historically about social and intellectual approaches to the supernatural; Assess arguments; interpret and contextualize primary sources; Develop research skills and ability to formulate questions

HIST 310L Love and Violence in Medieval Culture and Society (3 Credit Hours)
We will investigate the extent to which chivalric ideas controlled or encouraged aristocratic violence; the relationship between violence and courtliness; the extent to which chivalry threatened or strengthened royal government; and the influence of courtly love on gender.
Interdisciplinary Option: Medieval Studies, Women & Gender Studies
Outcomes:
Familiarity with medieval ideas about acceptable forms of violence; understand long-term influence of medieval ideas about love, sexuality, and violence; how to read and interpret medieval literary and social texts

HIST 311B The Crusades: Christianity and Islam (3 Credit Hours)
This course examines the origins and development of the Crusades and the Crusader States in the Islamic East. It will explore crusade ideology, political and military histories of crusades, compare Christian, Jewish, and Muslim perceptions of the crusading movement, and consider invocations of Jihad and Crusade into the modern era.
Interdisciplinary Option: Catholic Studies, European Studies, Middle East and Islamic World Studies, Medieval Studies
Outcomes:
Students will learn about the histories of the Crusades, the communities impacted by them, and historiographical debates on the topic; They will write papers using primary and secondary sources

HIST 312 England to 1485 (3 Credit Hours)
This course examines the history of medieval England, with an emphasis on its cultural history as manifested through written documents, material remains, art and music.
Interdisciplinary Option: Medieval Studies, Shakespeare Studies
Course equivalencies: X-HIST329/MSTU340
Outcomes:
Students will understand that English culture is an amalgamation of Anglo-Saxon and Norman-French culture, with influences from the Celtic and the Latin culture of Roman Catholicism; and will gain skill in the analysis of primary sources

HIST 314 Renaissance (3 Credit Hours)
This course examines the political and cultural life of Italy's five principal city-states (Rome, Florence, Venice, Milan and Naples) from the era of St. Francis and Dante until the sack of Rome in 1527.
Interdisciplinary Option: Catholic Studies, European Studies, Italian Studies, Medieval Studies, Shakespeare Studies
Course equivalencies: HIST314/MSTU336
Outcomes:
Students gain appreciation for the debate about a rebirth of ancient culture in the city-states of Italy; They acquire special cognizance of humanism as a historical phenomenon and the influence of humanism on education, politics, the visual arts and religion

HIST 314A The Jesuits: Life and History (3 Credit Hours)
This course examines the history of the Society of Jesus from its founding by Ignatius Loyola in the 16th century to its activities in the contemporary world.
Interdisciplinary Option: Catholic Studies, European Studies
Course equivalencies: X-HIST297/CATH297
Outcomes:
Students will gain a sense of the characteristics of Jesuit spirituality and the contribution of Jesuits to various fields of human endeavor such as evangelization, education, politics, literature, and the visual arts

HIST 315 The Reformation (3 Credit Hours)
This course examines the birth and progress of the Reformation in Europe from Luther's protest in 1517 to the conclusion of the Thirty Years War in 1648.
Interdisciplinary Option: Catholic Studies, European Studies, German Studies, Shakespeare Studies
Course equivalencies: X-HIST315/CATH316
Outcomes:
Students gain familiarity with the social, religious, intellectual, and political background of the Reformation; Luther's personal religious experience and his theological convictions; the Swiss Reformation of Zwingli and Calvin; the nature and spread of Calvinism; the elements of the Radical Reformation; and the efforts for Catholic Reform culminating at the Council of Trent

HIST 316 History of Poland (3 Credit Hours)
This course examines political, socioeconomic, and cultural developments in Poland since the first Polish state. Its major themes include: the consolidation of the Polish state; economic and political problems in the 17th Century; revolution and independence; World War II; Communist rule in Poland; and Solidarity.
Interdisciplinary Option: European Studies, Global Studies, Polish Studies
Outcomes:
Students will improve their analytical, quantitative synthetic, and critical cognitive skills; develop written and oral communications skills; and gain historical knowledge

HIST 317 Age of Absolutism & the Enlightenment (3 Credit Hours)
The course explores the period that leads directly into the French Revolution.
Interdisciplinary Option: European Studies
Outcomes:
Students gain an appreciation of the social and economic role of Western Europe in the world of the 17th and 18th centuries; the nature of classic absolutism as illustrated by the reign of Louis XIV of France; and the origin and evolution of Prussia and Austria as examples of enlightened absolutism

HIST 318A Early Modern England 1485-1760 (3 Credit Hours)
This course surveys the major political, social, economic, religious, and cultural developments in England under the Tudors, Stuarts and early Hanoverians (1485-1760).
Interdisciplinary Option: European Studies, Shakespeare Studies
Outcomes:
Students examine the complexities of the aftermath of the Wars of the Roses; the English Reformation; Elizabethan and Jacobean culture and society; the English Civil War and Glorious Revolution of 1688; the wars against Louis XIV; and the rise of England as a great power

HIST 318B English Social History 1450-1750 (3 Credit Hours)
This is a course in the social and cultural history of early-modern England. It focuses, in particular, upon the tension between how early modern English men and women saw their world (ordered, hierarchical, stable, divinely sanctioned) and what their world was actually like (disordered, socially mobile, unstable, secular).
Interdisciplinary Option: European Studies
Outcomes:
Students will gain an understanding of the best and most recent work in demography, iconography, family history, women's history, and the histories of material culture, popular culture, religion, education and crime, and be exposed both to a wide variety of historical methodologies as well as related fields such as anthropology and art history

HIST 318C London 1550 - 1715 (3 Credit Hours)
This interdisciplinary introduction to the history of London will assess the economic, political, social, and cultural reasons for the city's importance in British and world history.
Interdisciplinary Option: European Studies, Shakespeare Studies, Urban Studies
Outcomes:
Students will gain an understanding of how a variety of source materials can be are used to develop an urban history of Great Britain's capital and apply this knowledge to enhance their own communication and critical thinking skills

HIST 320 Era French Revolution & Napoleon (3 Credit Hours)
This course analyzes the causes, meanings, and consequences of the French Revolution of 1789 by examining French society and culture from the age of absolutism to the end of Napoleon Bonaparte's empire.
Interdisciplinary Option: European Studies
Outcomes:
Students will gain an understanding of both the Revolution itself and its effects on the course of world history and become familiar with variety of analytic styles, such as narrative, political, economic, social, Marxist, and revisionist approaches to the history of the period

HIST 321 19th Century European Culture and Ideas (3 Credit Hours)
This course investigates the main currents of European thought and culture from the Romantic era to the fin de siècle. Using literary texts and music, as well as visual arts, we will study the major intellectual trends of the nineteenth century and attempt to determine their influence on European society.
Interdisciplinary Option: European Studies, German Studies
Outcomes:
By using their historical knowledge of nineteenth century Europe as a guide, students will develop critical thinking and communications skills about the art, music, and literature of the era

HIST 322 Modern France: From Empire to Postcolonial Nation (3 Credit Hours)
This course explores the cultural and political development of modern France as a nation and imperial power. It examines the formation of national identities; the discourse and practice of French nationalism and republicanism; and the forms of resistance and collaboration that shaped relations between citizens, state, colonized peoples, and empire.
Interdisciplinary Option: European Studies, Global Studies
Course equivalencies: X-HIST338/INTS338
Outcomes:
Students will understand how the development of French republicanism and Enlightenment thinking shaped nation and empire building in the 19th century but also influenced colonial resistance in the 20th century

HIST 324 Italy 19th & 20th Centuries (3 Credit Hours)
This course studies the major currents in Italy from the defeat of Napoleon to the present.
Interdisciplinary Option: European Studies, Global Studies, Italian American Studies, Italian Studies
Course equivalencies: HIST335/INTS335/ROST335
Outcomes:
Students explore the political, social, religious, economic and intellectual currents against the background of Italy's unification as a nation-state

HIST 325 Modern Britain: Empire, Industry, Democracy (3 Credit Hours)
This course examines political changes in Britain, economic and social causes and consequences of industrialization, and the changing position of Great Britain in Europe and the world.
Interdisciplinary Option: European Studies
Outcomes:
Students will demonstrate an understanding of the political process of democratization and the global affect of economic change on Britain as evidenced in the extension of voting rights, the growth of Empire, the creation of the Commonwealth and participation in the European Union

HIST 325A The British Empire: From Barbados to Brexit (3 Credit Hours)
This course examines the rise and decline of Britain's empire.
Interdisciplinary Option: European Studies, Global Studies
Course equivalencies: X-HIST332/INTS332
Outcomes:
Students will understand the different factors responsible for its growth; relationship of empire and British economic and political change; place of empire in the Victorian ethos; different imperial governing arrangements; growth of nationalism and movements for independence within the empire and commonwealth

HIST 326 Ireland: Colony to Nation State (3 Credit Hours)
This course traces the transformation of Britain's oldest colony into an independent nation between the seventeenth and twentieth centuries.
Interdisciplinary Option: European Studies, Global Studies
Course equivalencies: HIST333/INTS333
Outcomes:
Students will develop an understanding of how Irish nationalism shaped British and Irish history and use Ireland as a template to develop critical thinking and communications skills about the transformation of colonies into independent states

HIST 327A The Balkans: History, Fiction, Film (3 Credit Hours)
Covering southeast European areas once ruled by the Habsburg, Venetian, and Ottoman Empires, the course explores the following issues: the rise and fall of empires; nationalism and nation-formation; Communism and post-socialist transformations; popular culture and politics; and experiences of war, organized violence, and international intervention.
Interdisciplinary Option: European Studies, Global Studies, Middle East and Islamic World Studies
Outcomes:
Students will gain fain factual knowledge (terminology, trends, basic structures) of Balkan societies and develop advanced skills in speaking and writing about history

HIST 328 Russia Pre-1917: Empire Building (3 Credit Hours)
This course examines how, by the middle of the 19th century, Russia emerged as the largest empire in the world.
Interdisciplinary Option: European Studies
Outcomes:
Students will be able to explain how Russia survived the ravages of the Mongols under Chingis Khan, the reign of terror under Ivan the Terrible, westernization under Peter the Great; opened itself to new ideas under Catherine the Great, while it continued to preserve an oppressive institution of serfdom and remained a deeply divided society ready to explode in 1917

HIST 328A Russian Empire and Literature (3 Credit Hours)
This course examines a history of the Russian empire through the works of Russian literature. What Russian writers from Pushkin to Tolstoy can tell us about Russia and how a history of the Russian empire is crystallized in the works of fiction are among the issues addressed in this course. Course introduces students to the history of the Russian empire and classics of Russian literature. A historical and literary context will help students understand the predicament of contemporary Russia.
Interdisciplinary Option: European Studies

HIST 329 Women's Sphere in Past Society (3 Credit Hours)
This course examines comparative perspectives on feminism, sexuality, and women in the family and in public life in Europe 1700-present.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-HIST293/WOST256/WSGS256
Outcomes:
Students will demonstrate understanding of women's contributions to history, historian's perspectives on women in history, and the gendered definition of public and private spheres

HIST 329C Empire, Sex, Violence: European Colonial History (3 Credit Hours)
This course examines European colonialism in Africa and Asia. Topics include theories of imperial expansion; the rise of "scientific" racism; the role of class and gender in colonial ideologies; the relationship between ideas of "civilization" and colonial violence; the forces behind decolonization; and globalization in the post-colonial world. Students will know the political and socio-economic factors that shaped European imperialism in the nineteenth and twentieth centuries and understand the consequences of colonialism and decolonization on the world today.
Interdisciplinary Option: European Studies, Global Studies, Women & Gender Studies

HIST 329N Modern European Nationalism: Myth and Reality (3 Credit Hours)
The course will begin by tracing the origins and various forms of European nationalism, continue with the establishment of nation-states in Western and Eastern Europe, and end with a discussion of various national and ethnic issues that dominate European political and ideological discourse today.
Interdisciplinary Option: European Studies, Global Studies, Polish Studies
Outcomes:
Students will explore ways in which nationalism has affected relations between individuals, communities, and states in Europe; Students will assess nationalism's adaptability to diverse social, political, and cultural environments

HIST 330 Europe in the Age of Catastrophe, 1900-1945 (3 Credit Hours)
This course traces the origins of the two world wars in the first half of the twentieth century and assesses the cultural and political movements that transformed Europe and the west in those years.
Interdisciplinary Option: European Studies, Global Studies, German Studies
Course equivalencies: X-HIST325/INTS376
Outcomes:
Students will develop critical thinking and communications skills about how the contemporary world was shaped by the political, military, cultural, and social transformations in the first half of the twentieth century

HIST 330F Fascinating Fascism: 1919 to the Present (3 Credit Hours)
The recent emergence of populist nationalism in the western world has sparked a renewed interest in the political phenomenon of Fascism. This course explores the rise and evolution of Fascist movements and regimes from early twentieth century to the present. Students will learn about the characteristics of Fascist movements, the circumstances that brought some of them to power, and the factors that shaped the behavior of Fascist Regimes.
Interdisciplinary Option: European Studies, Global Studies

HIST 331A Food, Hunger, and Power in the Modern World (3 Credit Hours)
This course explores how conflicts over food shaped the modern world. We compare shifting interpretations of famine (in Ireland, India, and Ethiopia), and explore how food became a "weapon of war" during the World Wars. Finally, the course analyzes how race, gender, and class shaped American food and welfare policies.); Students will develop skills in analytically interpreting both primary and secondary sources; Students will have engaged in independent research with both primary and secondary sources to complete a historical research project; Students will understand how race and gender have shaped and been shaped by the modern food system.
Interdisciplinary Option: Bioethics, European Studies, Global Studies, Women & Gender Studies
Outcomes:
Students will have developed an awareness of the biological, political, social, cultural, and economic meanings of food in modern societies; Students will have gained exposure to different methodological approaches to studying food and hunger (anthropology, economics, sociology, psychology, gender studies etc

HIST 334A The Nazi Revolution (3 Credit Hours)
The course will deal with the causes, main features and consequences of the Nazi movement in Germany and Europe from 1919 to 1945.
Interdisciplinary Option: European Studies, German Studies
Outcomes:
The students explore the origins of Nazism and the reasons for Hitler's success; Students appreciate the elements of "Nazi culture," the nature of Nazi rule in the 1930s, Nazi foreign policy and aggression in the 1930s, and World War II; They acquire a sense of the Nazi movement as a phenomenon growing out of unique German circumstances as well as one reflecting the larger context of modern western history

HIST 334B The Holocaust: History and Memory (3 Credit Hours)
This course explores a defining event of modernity, the genocide of Europe's Jews, by exploring Nazi actions, victims' varied experiences, and international reactions. We will also tackle questions like: Was the Holocaust unique? What does it mean to be a "bystander"? What are the politics of memory and commemoration?
Interdisciplinary Option: European Studies, Global Studies, Peace, Justice, and Conflict Studies, Polish Studies
Course equivalencies: X-HIST304/PAX 304
Outcomes:
Students acquire a sense of the causes, processes and implications of recent genocide; They are challenged to develop the outlines of a theory for predicting when genocide is likely to occur and to provide a clear definition of the term; Most importantly, they articulate from the historical data ways to prevent genocide

HIST 335 The Second World War (3 Credit Hours)
The course examines the history of the war from its origins to the destruction of the Axis powers and the onset of the Cold War.
Interdisciplinary Option: European Studies, Global Studies, German Studies, Polish Studies
Course equivalencies: X-HIST326/INTS328/PAX 326
Outcomes:
Students will understand the interrelationship among political, social, economic, military, and diplomatic developments as demonstrated in the events of the Holocaust, the spread of nationalism, and the origins of the Cold War

HIST 336 Contemporary Europe 1945 to Present (3 Credit Hours)
This course examines the postwar world, the movement toward European integration; the tensions between East and West; problems and proposed solutions in contemporary Europe, as well as responses to these issues made by intellectual and cultural leaders of the modern age.
Interdisciplinary Option: European Studies, Global Studies, German Studies, Polish Studies
Course equivalencies: X-HIST327/INTS327
Outcomes:
Students will understand the process of European integration, including the effects of the Cold War on Europe, the challenges of the re-unification of Germany, the integration of ten Central European nations into the European Union, and cultural reactions to these developments

HIST 337 Rise & Fall of Soviet Union (3 Credit Hours)
This course will cover such issues as the Revolution and Civil War, Stalin's repression, victories in World War II, the years of stagnation, Soviet society, its institutions and culture.
Interdisciplinary Option: European Studies, Global Studies, Polish Studies
Course equivalencies: X-HIST341/INTS392
Outcomes:
Students will be able to explain how the Russian Socialist revolution came into being, what kind of society it sought to create, and how this new society, the Soviet Union, developed and finally dissolved in 1991

HIST 337A Women in Russia and Eurasia, 1860-Present (3 Credit Hours)
This course surveys the experiences of women in the late Russian empire, the Soviet Union, and the states that now comprise the region. In particular, we will examine the ways in which writers, filmmakers, and activists of the 19th, 20th, and 21st centuries have addressed the 'woman question.'
Interdisciplinary Option: European Studies, Global Studies, Women & Gender Studies
Outcomes:
Students will gain understanding of key concepts related to women's history in Russia; they will produce written and oral commentaries on the texts and issues studied in class

HIST 338A History of European Communism (3 Credit Hours)
In this course students will study the history of European Communism from its inception. The success that this ideology enjoyed among European societies makes it necessary to study this phenomenon in detail. The course will begin by tracing the origins of Communism and end with a discussion of its downfall.
Interdisciplinary Option: European Studies, Global Studies, German Studies
Outcomes:
Improved cognitive skills and communications skills; Enhanced historical knowledge

HIST 338B Eastern Europe in the 20th Century (3 Credit Hours)
This course offers a historical survey and analysis of the processes of political, social, cultural, and economic change that affected Eastern Europe in the twentieth century. The course will begin with the break-up of multi-national empires in Eastern Europe and end with the collapse of communism.
Interdisciplinary Option: European Studies, Global Studies
Outcomes:
Improved cognitive skills and communications skills; Enhanced historical knowledge

HIST 339C Modern Europe and the Arts (3 Credit Hours)
This course takes advantage of Chicago's access to one of the most important collections of modern European art in the world. The Art Institute of Chicago offers masterpieces representing every major aesthetic movement in Western history. Full appreciation of these treasures involves recognizing the historical circumstances that surrounded their creation and considering the ideas their creators intended to communicate.
Interdisciplinary Option: European Studies, Global Studies
Course equivalencies: X-HIST305/INTS305A
Outcomes:
Students will better appreciate the great works themselves and learn from them about major developments in modern European social, political, and cultural history

HIST 339F History of Feminist Thought and Social Action (3 Credit Hours)
This course focuses on the history and development of feminist thought and activism since the late eighteenth century. Attention goes beyond just U.S. and European feminist history, exploring Indigenous, Black, and postcolonial feminism to investigate their unique feminist ideas and the challenges they pose to "traditional" feminist thought and action.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X - WSGS 330 / HIST 339F
Outcomes:
Students will learn to identify key concepts, thinkers, activists; analyze and critique some of the major works; and develop an integrated understanding of the history of feminist thought, broadly conceived

HIST 340B Introduction to Islamic History (3 Credit Hours)
This course focuses on the early and medieval history of the states, societies, and cultures of the Middle East from the prophetic mission until the fall of the 'Abbasid empire in 1258.
Interdisciplinary Option: Middle East and Islamic World Studies, Medieval Studies
Course equivalencies: X-HIST312/IWS312
Outcomes:
Students will demonstrate an understanding of the impact of Islam as a religious and cultural phenomenon and be able to analyze historically the Quran as well as primary sources from jurisprudence, philosophy, ethics, and historiography

HIST 341 Modern Middle East (3 Credit Hours)
This course surveys the modern Middle East, with a focus on the Arab world.
Interdisciplinary Option: Arabic Language and Culture, Global Studies, Middle East and Islamic World Studies
Course equivalencies: X-HIST313/INTS313/IWS313
Outcomes:
Students will demonstrate an understanding of the Ottoman background; the age of imperialism; and the 20th century, and be able to approach the period from an anthropological as well as historical perspective

HIST 341B Arab-Israeli Conflict (3 Credit Hours)
This course explores the history of the Arab-Israeli conflict since the beginnings of the immigration of the East Europeans and Russian Jews to Ottoman Palestine in the late 19th century.
Interdisciplinary Option: Global Studies, Middle East and Islamic World Studies, Peace, Justice, and Conflict Studies
Course equivalencies: HIST322/INTS322/PAX 322/IWS322
Outcomes:
Students will gain understanding of national Zionism in Europe; Ottoman and British Palestine; the declaration of the state of Israel; the Palestinian refugee problem; the Arab-Israeli wars; the Camp David agreement and recent peace talks and their aftermath

HIST 341C Tunisia On-Site: Arab Spring, Democratic Change, Islam (3 Credit Hours)
A combination of site visits, lectures, and group discussions throughout Tunisia provides a unique experiential understanding of the relationship between the Arab spring, democratic change, Islam, gender relations, and U.S. foreign policy amidst the historical inheritances of the Carthaginian, Roman, Islamic, and French empires in North Africa.
Interdisciplinary Option: African Studies and the African Diaspora, Arabic Language and Culture, Global Studies, Middle East and Islamic World Studies, Women & Gender Studies
Course equivalencies: X-PLSC 399/HIST 313T
Outcomes:
Experientially based knowledge of the politics, society, culture, history, and international relations of a country (Tunisia) in a region (North Africa) at the intersection of Africa and the Middle East

HIST 342A African History to 1600 (3 Credit Hours)
This course traces the history of the African continent to 1600.
Interdisciplinary Option: African Studies and the African Diaspora
Course equivalencies: X-HIST350/BWS 386/INTS378
Outcomes:
students will demonstrate understanding of the development and diversity of political, economic, ecological, cultural and religious forces in Africa, as well as the relationship between Africa and other world areas

HIST 342B African History Post-1600 (3 Credit Hours)
This course traces the history of the African continent from 1600 to the present, i.e., from the tumult of the slave trade through Africa's resistance to European imperialism and colonialism, and its eventual emergence as an independent continent.
Interdisciplinary Option: African Studies and the African Diaspora, Global Studies, Middle East and Islamic World Studies
Course equivalencies: X-HIST351/BWS 387/INTS351
Outcomes:
Students will appreciate the legacies of colonialism and place the contemporary problems of independence in historical perspective

HIST 342C The History of Islam in Africa (3 Credit Hours)
This course examines the development of Islam in Africa, including issues such as Islamic mysticism, eschatology, and state formation.
Interdisciplinary Option: African Studies and the African Diaspora, Middle East and Islamic World Studies
Course equivalencies: X-HIST349/BWS300/IWS349
Outcomes:
Students will gain an understanding of how and when Islam entered Africa and how the religion shaped African societies prior to the colonial period

HIST 342D African Diaspora in the Middle East and South Asia (3 Credit Hours)
The purpose of this course is to explore the African Diaspora as it pertains to the Middle East and South Asia. Issues such as the concept of slavery in Islam, and identity preservation will be treated throughout the course of the semester. Emphasis will be placed on the role Black Africans such as Antara ibn Shadad, Malik Kafur, and Malik Ambar, just to name a few, played in the formation and crystallization of Middle Eastern and South Asian states, kingdoms and empires.
Interdisciplinary Option: African Studies and the African Diaspora

HIST 342M African Music's Influence on American Music (3 Credit Hours)
This historically-based exploration will analyze the role that African music from the continent played in shaping and forming such American musical forms as the Blues, Jazz, Rock and Roll, Soul Music, and Hip-Hop. The course begins in 15th century West Africa, and ends in the late 20th century American milieu.
Interdisciplinary Option: African Studies and the African Diaspora, Global Studies
Outcomes:
Students will demonstrate understanding of the development and diversity of African, as well as the influence of African music on American culture

HIST 343 Modern South Asia (3 Credit Hours)
This course will examine the modern history of South Asia. It will explore the history of South Asia with a thematic and chronological approach. Important subjects to be examined include: early modern state formation, colonial forms of knowledge, religious identity, gender and class relations, and the political economy in the early modern and colonial state.
Interdisciplinary Option: Asian Studies, Global Studies, Middle East and Islamic World Studies
Outcomes:
Students will enhance their written and oral communication skills; improve their critical thinking skills and improve their ability to engage in historical analysis

HIST 345A Traditional China from Antiquity to 1550 (3 Credit Hours)
This course will trace Chinese history from the origins of classical Chinese civilization in the Shang and Zhou periods to the evolution of an agrarian society under the imperial state.
Interdisciplinary Option: Asian Studies, Chinese Language & Culture
Course equivalencies: X-HIST342/ASIA341
Outcomes:
Students will gain an understanding of how domination by aristocratic lineage gave way to the Confucian state and society based on peasant farming; and how a bureaucratic and autocratic polity existed in symbiosis with a socioeconomic elite that maintained itself through the dominance of the agrarian economy as well as through increasing access to the sources of commerce and trade

HIST 346A Early Modern China: 1550-1800 (3 Credit Hours)
This course studies early modern Chinese society, economy, and the state from ca. 1550 to 1800, a period which marked the culmination of the development of the centralized, bureaucratic, imperial state and exhibited significant innovations in economic structure and activity. Students will be able to describe the pressure of unprecedented demographic growth, and explain how the society began to experience many of the problems that continue. They will be able analyze China's failure to build on its earlier economic and technological successes by exploring intellectual life and its relation to scientific and technological innovation.
Interdisciplinary Option: Asian Studies, Chinese Language & Culture
Course equivalencies: X-HIST344/ASIA344/INTS371

HIST 346B Reform & Revolution in China, 1800-1949 (3 Credit Hours)
This course explores China's attempt to adjust to the complex transformations in its economy, society, politics and intellectual life initiated during the early modern period and transfigured into crisis proportions by unchecked demographic growth. These challenges were heightened and made more acute by the often hostile encounter with first the West and then Japan through the end of World War II.
Interdisciplinary Option: Asian Studies, Chinese Language & Culture, Global Studies
Course equivalencies: X-HIST345/ASIA345/INTS372
Outcomes:
Students will be able to describe and assess the numerous evolutionary and revolutionary strategies for change during the period in China under discussion

HIST 346C History of Christianity in China (3 Credit Hours)
The course will cover the encounter between China and Christianity, from 7th century Nestorian monks, 12th century Franciscan Missions, 16th century Jesuit missionaries, Christianity in the period of Western imperialism, the expulsion of Western missionaries after the 1949 Communist revolution, and the formation of underground churches. Develop critical, writing, and research skills. Deepen understanding of Christianity as a world religion, the history of China, Christianity in China, and historical ties between China and The West.
Interdisciplinary Option: Asian Studies, Catholic Studies, Chinese Language & Culture, Global Studies

HIST 347A China Since 1949: The People's Republic (3 Credit Hours)
This course examines the attempt to create and foster the growth of a socialist state and society in China under the Chinese Communist Party, with attention to the steady transformation of society, the economy, and political life since 1949.
Interdisciplinary Option: Asian Studies, Chinese Language & Culture, Global Studies
Course equivalencies: X-HIST346/ASIA346/INTS373
Outcomes:
Students will be able to assess the major convulsive episodes such as land reform, the Great Leap Forward, the Great Proletarian Cultural Revolution, the Four Modernizations, and the impact and legacy of Mao Zedong

HIST 347C Cultural Revolution-China (3 Credit Hours)
The Great Proletarian Cultural Revolution (1966-1976) was a watershed in China's modern history. Over the course of a decade, Mao summoned the populace to battle "bourgeoisie" of the state by attacking various parts of the social, cultural and political structure.
Interdisciplinary Option: Asian Studies, Chinese Language & Culture, Global Studies
Course equivalencies: X-HIST346B/ASIA346B/INTS346B
Outcomes:
Students will examine the Cultural Revolution from the perspectives of political, social, and cultural history, utilizing memoirs, oral histories, documentary and dramatized films, primary documents written by China's party leaders, and scholarly writings; come to understand these events not solely from the hindsight of post-reform China, but from the perspective of the times during which these events unfolded; and develop their own understandings of what these years meant for the shaping of modern China's state, economy, institutions, and citizens

HIST 347D Modern Chinese History through Film (3 Credit Hours)
This course presents Chinese modern History through the lens of feature films and documentaries. Through a chronological approach, it focuses on the period from the Opium Wars to the present. It discusses political struggles, economic shifts, the encounter with Western Imperialism, the birth of Communist China, the shift to a market economy; it focuses on issues of war, gender, society, rural versus urban, and the environment. Acquire a non-Western Historical perspective; understand diversity in the World; be conversant in modern Chinese History; connect those notions to the historical development of the West; understand film theory and practice.
Interdisciplinary Option: Asian Studies, Chinese Language & Culture, Film & Digital Media Studies, Global Studies, International Film & Media Studies

HIST 349 Contemporary Global Issues: Historical Perspectives (3 Credit Hours)
This course will introduce students to important contemporary issues such as globalization, resurgent ethnic and religious strife, racism, imperialism, and the crisis of the nation state, among others. Both thematic and chronological approaches will be employed in examining selected world regions.
Interdisciplinary Option: Global Studies
Course equivalencies: HIST299BCDE/INTS298
Outcomes:
Students will be able to demonstrate an understanding of the way history shapes pressing issues in the contemporary world, the way a historical approach helps make sense of these same issues, and the value of comparative study and analysis across time and place

HIST 349A Women in East Asia (3 Credit Hours)
This course studies the lives of Asian women in China, Japan, and Korea from early modern times to the present by examining changing roles of women and how these changes have come about.
Interdisciplinary Option: Asian Studies, Global Studies, Japanese Language and Culture, Women & Gender Studies
Course equivalencies: X-HIST296/ASIA296/INTS296/WOST
Outcomes:
Students will be able to explain how life reflects law in the political, social, economic and cultural history of Asian women; how imperialism and war have affected women; how women have effected change

HIST 350 Colonial Latin America (3 Credit Hours)
This course will introduce students to the major themes in the colonial history of the region known today as Latin America from conquest to independence.
Interdisciplinary Option: Latin American Studies
Course equivalencies: X-HIST352/LASP350
Outcomes:
Students will be able to demonstrate an understanding of the following broad themes: the nature and difficulties of colonial rule in culturally diverse societies; the different ways in which individuals from all walks of life fared in the colonies; and the role that religion and the church played in everyday life

HIST 351 Latin American Independence, 1750-1830 (3 Credit Hours)
This course examines independence movements and wars in the region known today as Latin America. Course readings and lectures will explore the impact of the Enlightenment on Bourbon Spain and Spanish America, new movements toward free trade, friction between the church and state, and crown policies toward indigenous peoples.
Interdisciplinary Option: Latin American Studies
Course equivalencies: X-HIST353/LASP351
Outcomes:
Students will be able to demonstrate an understanding of the basic contours of independence movements in Latin America

HIST 352 Latin America in the 19th Century (3 Credit Hours)
This is a survey course that introduces students to the history of Latin America during the nineteenth century through two: 1) Nation Formation: 1780s-1850s and 2) Liberal Reforms and Progress: 1850s-1910.
Interdisciplinary Option: Latin American Studies
Course equivalencies: X-HIST354/LASP352
Outcomes:
Students will demonstrate an understanding of the persistence of political instability, the problems of economic development, and elite and popular perceptions of race, class, and gender; Students will also be able to draw comparisons between different Latin American experiences

HIST 353 Latin America in Recent Times (3 Credit Hours)
This course examines major political, cultural and socio-economic developments in Latin America from the twentieth century to today. Topics to be covered include nationalism and revolution, military dictatorship and state oppression, and hemispheric relations.
Interdisciplinary Option: Global Studies, Latin American Studies
Course equivalencies: X-HIST355/INTS389/LASP353
Outcomes:
Students will be able to demonstrate a broad understanding of the impetus behind the following events and themes: the Mexican Revolution of 1910; Castro and the Cuban Revolution; Peronism; Dirty Wars in Chile, Argentina and Central America; Cold War politics and CIA operations; and the current Drug War in Colombia

HIST 355 The Caribbean & Central America in Colonial/Modern Times (3 Credit Hours)
This course examines the Caribbean and Central America from European conquest and colonization to the present day.
Interdisciplinary Option: Global Studies, Latin American Studies
Course equivalencies: X-HIST356/INTS380/LASP354
Outcomes:
Students will demonstrate an understanding of the significance of the Caribbean and Central America region in world, but especially US, politics since the nineteenth century and increasingly during the Cold War; Students will demonstrate an ability to draw comparisons and contrasts between nations in these regions, especially as they relate to the rest of Latin America and the United States

HIST 356 Mexican History-Ancient to Modern Times (3 Credit Hours)
This course will introduce students to the major themes in Mexican history from pre-Columbian to contemporary times based on three historical periods: Early Mexico, the Nineteenth Century, and Recent Mexico.
Interdisciplinary Option: Global Studies, Latin American Studies
Course equivalencies: X-HIST357/INTS379/LASP355
Outcomes:
Students will be able to demonstrate an ability to draw on the major themes in Mexico history as they relate to the Aztec empire, Spanish conquest and colonialism, independence, modernization, revolution, and democratization

HIST 357 The Mexican Revolution in Popular Imagination (3 Credit Hours)
This course explores debates about the Mexican Revolution (1910-1917) by analyzing its interpretation in scholarship and its representations in memoir, fiction, art and film.
Interdisciplinary Option: Global Studies, Latin American Studies
Outcomes:
Students will demonstrate an understanding of the Mexican Revolution as an event and as a myth in history and popular culture

HIST 358 Women in Latin American History (3 Credit Hours)
This course introduces students to the life experiences of women in Latin America through history, film, oral history, and their personal narratives.
Interdisciplinary Option: Global Studies, Latin American Studies, Women & Gender Studies
Course equivalencies: HIS358/INT368/LASP299/WSGS385
Outcomes:
Students will demonstrate an understanding of the way notions of femininity have been constructed and have changed over time throughout Latin American history, the various and sometimes subtle ways that women have empowered themselves, and the more overt politicization of women since the mid-twentieth century

HIST 359 Teaching World History (3 Credit Hours)
This course focuses on pedagogical approaches, curricular analysis, and methodological developments in the field of World (or Global) history. Students will become familiar with world history by developing a syllabus for a course they may teach in the future at the high school or college level.
Interdisciplinary Option: Global Studies

HIST 359D The Ottoman Empire: A Global Perspective (3 Credit Hours)
The main themes of the course include rise and development of the Ottoman Empire; relations between Muslims, Jews, Christians, and other communities; the practices of inclusion and exclusion along class, gender, and ethno-religious lines; the rise of nationalism; experiences of violence and war; and imperial legacies in post-Ottoman states.
Interdisciplinary Option: European Studies, Middle East and Islamic World Studies
Outcomes:
Gain factual knowledge; Learn to analyze different ideas and texts

HIST 359E Concentration Camps: A Global History (3 Credit Hours)
This course explores the underlying logic of extrajudicial encampment from the camps of 19th-century colonialism to the Soviet Gulag, Nazi death camps, and more contemporary detention centers for refugees and political prisoners. Why have modern states - across the ideological spectrum - made use of camps against real and perceived enemies? Students will understand the underlying political, racial, and economic motives that lead to concentration camps. A transnational approach will help students contextualize specific camp regimes within a larger global history.
Interdisciplinary Option: European Studies

HIST 359F Genocides in the Modern World (3 Credit Hours)
This class evaluates the motives and circumstances of global genocides and uncovers the experiences of those targeted by genocidal violence. The course will range widely from settler colonial violence in the Americas to the Armenian Genocide, the Holocaust, the Khmer Rouge, Rwanda, ISIL, and beyond.
Interdisciplinary Option: Global Studies, Race and Ethnicity
Outcomes:
Students will compare and contrast global genocides across space and time, evaluate the configurations of twentieth-century politics that have generated multiple genocides, and hone critical reading and writing skills

HIST 359H Anti-Colonial Resistance in the Twentieth Century (3 Credit Hours)
This course will explore the end of modern colonialism and the emergence of nation-states in Africa and Asia: one of the most significant transformations in modern history. It will consider how imperial agents justified their subjugation of colonized peoples and how colonial objects came to resist and end colonial rule.
Interdisciplinary Option: Asian Studies, Global Studies, Middle East and Islamic World Studies
Outcomes:
Students will learn about theoretical, political, and historical explanations about the processes of resistance and decolonization; Further, they will develop critical analysis skills and historical knowledge

HIST 360 Community and Culture in Colonial America (3 Credit Hours)
This course covers the story of America's colonial past from its origins in the Atlantic world of the 16th century through its contact and conflicts with Native American peoples.
Outcomes:
Students will demonstrate an understanding of the process of colonial settlement, colonial labor and economic patterns, trans-Atlantic immigration, Colonial Wars of Empire and the conquest of native lands

HIST 360A Slavery and Abolition: Then & Now (3 Credit Hours)
This course will first examine the history of slavery in the ancient and medieval eras, but is devoted mainly to the rise and maturation of slavery and slave trading in the Atlantic world (ca. 1500-1865). The last third of the class charts the resurgence of post-abolition slavery.
Interdisciplinary Option: Race and Ethnicity
Outcomes:
Students will learn about slavery past and present to fashion a moral philosophy of human freedom that can make a world without slavery a reality

HIST 361 The American Revolution, 1763-1815 (3 Credit Hours)
When British colonists in North America declared themselves independent from the British Crown in 1776, they affected the most successful revolution in modern history. This course covers the antecedents and outcomes of their actions from the Seven Years War through the American Revolution to the War of 1812.
Outcomes:
Students will demonstrate an understanding of the origins, actions and significance of the American Revolution; the development of the United States Constitution; and the development of the nation up the War of 1812

HIST 362 America in the Age of Slavery and Capitalism (3 Credit Hours)
This course covers United States social, cultural, economic, and political development during the first half of the nineteenth century.
Outcomes:
Students will demonstrate an understanding of how Modern America was built between 1800 and 1850 through the study of urban development, immigration, gender history, educational developments, wars of expansion, and the growth of a democratic society

HIST 363 Civil War & Reconstruction 1850-1877 (3 Credit Hours)
This course covers the crisis of the Union from the Compromise of 1850 through the Civil War and the era of Reconstruction.
Interdisciplinary Option: African Studies and the African Diaspora
Course equivalencies: X-HIST363/BWS 363
Outcomes:
Students will demonstrate an understanding of the institution of slavery, the rise of abolitionist sentiment, the failure of democratic political institutions, the military history of the war, its cultural impact on the nation, and the struggle for racial justice in the Reconstruction era

HIST 366A World War I and American Culture (3 Credit Hours)
Although World War I's impact on America paled in comparison to that of the European combatants, the wartime experiences affected the nation's economic, political, and cultural life for the remainder of the twentieth century. This course examines America's World War I experience and explores its legacy.
Outcomes:
Students will understand how the United States underwent the transformation from a relatively minor player on the international scene to an international presence, how those living through these years experienced social, cultural, economic, and political challenges associated with American life in the twentieth century; and how the roads taken and not taken during this period have shaped the options available to us today

HIST 367 United States from Great Depression to Recession (3 Credit Hours)
This course focuses on American history from 1929 to the present, a period of economic turmoil, domestic reform, and international engagement.
Interdisciplinary Option: Sociolegal Studies
Outcomes:
Students will demonstrate historical knowledge of the politics and government of the United States since the start of the Great Depression and develop critical thinking and communication skills

HIST 369 20th Century Popular Culture (3 Credit Hours)
This course examines the social and cultural patterns of twentieth century life as revealed in popular novels, vaudeville, movies, music, nightlife, and advertising.
Outcomes:
Students will be able to demonstrate historical knowledge of American traditions of success, family, home, consumption and culture, to draw links between gender and social life, and to develop critical thinking and communication skills

HIST 370 American Business, Wealth, and Inequality (3 Credit Hours)
Beginning with colonization and extending to the 2000s global expansion of Starbucks, this course outlines the history of American business, wealth, and the attendant inequality by exploring the interplay between business, labor, politics, and culture.
Interdisciplinary Option: Sociolegal Studies, Women & Gender Studies
Outcomes:
Students will improve their written communication skills; develop their critical thinking skills; and learn how to execute historical analysis

HIST 372 American Constitutional & Legal History to 1865 (3 Credit Hours)
This course focuses on the constitutional and legal history of the U. S. from colonial times to the end of the Civil War.
Outcomes:
Students will be able to demonstrate historical knowledge of American legal traditions of common law, federalism, and civil liberties, to draw links between social and legal change; to evaluate US Supreme Court decisions, and to develop critical thinking and communication skills

HIST 373 US Law & Public Policy (3 Credit Hours)
This course focuses on the constitutional, legal, & public policy history of the U. S. from the end of the Civil War to the twenty-first century
Interdisciplinary Option: Sociolegal Studies
Outcomes:
Students will demonstrate knowledge of American legal traditions of federalism, civil rights, criminal justice, and civil liberties; understand social, legal, & policy changes; and evaluate US Supreme Court decisions

HIST 373A Crime and Punishment (3 Credit Hours)
This course examines how notions of crime and punishment have evolved between the nineteenth and twentieth centuries (with the early modern period serving as a backdrop).
Interdisciplinary Option: Sociolegal Studies
Course equivalencies: X-HIST373A/CRMJ345
Outcomes:
Students will be able to draw conclusions on what precisely caused the shifts in punishment, with attention to such things as the professionalization of the judiciary, industrialization and urbanization, the American Civil War, and Constitutional changes; Students will also gain an understanding of sociological and anthropological approaches to this topic

HIST 374 Black Politics (3 Credit Hours)
This course will present a general overview of black politics in America, including the major black political ideologies and their theoretical underpinnings and the role of race in urban politics in the late twentieth and early twenty-first centuries.
Interdisciplinary Option: African Studies and the African Diaspora, Race and Ethnicity
Course equivalencies: X-HIST374/PLSC393/BWS374
Outcomes:
Students will gain an understanding of how the circumstances of Reconstruction shaped black political ideologies; how blacks came into political power in major urban centers; and what the contours of debate are in the black community over provocative issues such as the criminal justice system, affirmative action, reparations, and education

HIST 375 Digital History (3 Credit Hours)
Digital resources make primary source material available while database, mapping, and text-mining applications allow us to ask new types of research questions. Digital history is more than just gaining familiarity with digital resources, applications, and platforms; it is about understanding how using these tools has changed the way we study history.
Outcomes:
Gain an introductory technical knowledge of digital tools or methods; Learn to apply technical knowledge about digital history tools to historical questions; Acquire experience managing and creating a team-based digital humanities

HIST 376 History of the American Frontier Movement (3 Credit Hours)
This course will cover the process of frontier expansion in American history.
Outcomes:
Students will understand the frontier as a social process that was part of the American experience from its earliest colonial origins to the end of the nineteenth century; Students will also understand the frontier as a place in the western United States where Americans engaged in cooperation, conflict, and conquest with native peoples, Mexicans, and Asians

HIST 376A History of the American Indian (3 Credit Hours)
This course is a survey of the history of American Indians, including the variety of Pre-Columbian societies, the encounter between Indians and European settlers, the impact of Eurasian diseases, American Indians' fight to avoid removal from their homelands, and the resurgence of Indians as sovereign peoples.
Outcomes:
The student is to emerge from the course with an enhanced ability to appreciate the unique cultures and experiences of American Indians; appreciate the many and important ways in which Indian peoples have changed and adapted over time; and understand the religious, racial, and cultural values that motivated European-American policies toward American Indians

HIST 377 African American Women's History (3 Credit Hours)
Course deepens students' understanding of African American History by emphasizing African American women's leadership, intellectualism, challenges, and social impact. Covering multiple eras from slavery, the civil rights movement to the present-day and difficult topics (including sexual assault), the course examines the diverse experiences of historically marginalized black women.
Interdisciplinary Option: Women & Gender Studies
Outcomes:
Students become familiar with multiple important African American historical figures; increase their understanding of intersectionality (race, gender, sexuality, class) in American history; and gain essential research skills

HIST 378 Latina/o History (3 Credit Hours)
This course introduces the history of Latinos in the United States from the Spanish Colonial period to the present.
Interdisciplinary Option: Latin American Studies, Race and Ethnicity
Course equivalencies: X-HIST378/LASP378
Outcomes:
students will develop a greater appreciation and understanding of the important roles played by Latino men and women in U.S. society; the heterogeneity of the Latina/o population, including generational, regional, class, and gender divisions; and the formation of transnational immigrant communities

HIST 379B History of Italians in Chicago (3 Credit Hours)
The History of Italians in Chicago offers an in-depth look at one of Chicago's important ethnic groups. The course will utilize local resources and include a number of guest speakers from the fields of sociology, literature and political science.
Interdisciplinary Option: Italian American Studies, Italian Studies
Outcomes:
Students will understand the major social-economic forces shaping the history of Italians in Chicago; learn how to do primary research; see themselves and local institutions as a part of history

HIST 380 Introduction to African-American History (3 Credit Hours)
This course is a general survey of African-American history from its African origins to the Present.
Interdisciplinary Option: African Studies and the African Diaspora, Race and Ethnicity
Course equivalencies: X-HIST380/BWS 380
Outcomes:
Upon completion of this class students should have a broad understanding of African-American History from 17th to the early 21st century

HIST 380A Islam in the African-American Experience (3 Credit Hours)
This course traces the development of Islam among African Americans from West African societies prior to the trans-Atlantic slave trade to the influence of Islam on popular culture in the 21st century.
Interdisciplinary Option: African Studies and the African Diaspora, Middle East and Islamic World Studies
Course equivalencies: X-HIST380A/BWS302/IWS380
Outcomes:
Students will gain an understanding of how Islamic identity was maintained in the face of slavery, how and if African-American Muslim communities differ from their emigrant counterparts, and how black nationalist groups such as the Moorish Science Temple and Nation of Islam influenced the Islamization of black consciousness in the 20th century

HIST 381 Rebels & Reformers in U.S. History (3 Credit Hours)
This course explores the success and failure of radical political and social movements in the United States.
Interdisciplinary Option: African Studies and the African Diaspora, Peace, Justice, and Conflict Studies, Women & Gender Studies
Course equivalencies: HIST381/AFR388/PAX387/WSGS303
Outcomes:
Students will understand five major movements for social change in the United States: abolition, women's rights, socialism, peace, and the quest for racial equality

HIST 382 Teaching Race, Class, and Gender (3 Credit Hours)
What resources are there for future K-12 teachers wanting to explore the intersections of gender, race, ethnicity, and class into their classrooms and meet new requirements, like those in Chicago, to broaden the K-12 curriculum? This course is designed for primary and secondary education majors eager to explore digital resources.
Interdisciplinary Option: Latin American Studies, Sociolegal Studies, Women & Gender Studies
Outcomes:
Students will: discover a range of free, digital resources; hone their critical reading and writing skills; craft and share lesson plans and reflections; write and present a peer-reviewed research paper

HIST 384 Irish Diaspora in America (3 Credit Hours)
This course examines the origins and diversity of Irish migration to the United States since the eighteenth century.
Outcomes:
Students will use historical knowledge to develop critical thinking and communications skills about the first large American ethnic minority and its impact on the history of the United States

HIST 385 Chicago in America (3 Credit Hours)
This course surveys the history of Chicago from its origins to the present, using the city as a case study of American urbanization.
Interdisciplinary Option: Urban Studies
Course equivalencies: X-HIST385/URB385
Outcomes:
Students will be able to demonstrate historical knowledge of Chicago's environmental, economic, social, cultural, and political history, to draw links between race relations and urban change, and to develop critical thinking and communication skills

HIST 386 Creation the American Metropolis (3 Credit Hours)
This course examines the transformation of the United States from a simple agrarian and small-town society to a complex urban and suburban nation, covering the pre-Columbian period to the present.
Interdisciplinary Option: Urban Studies
Course equivalencies: X-HIST386/URB386
Outcomes:
Study history of American urbanization; improve writing and analytical thinking

HIST 388 U.S. Wars (3 Credit Hours)
This course will study United States Military history from the Revolutionary War to the War on Terror. We will study key battles, strategy, weapons and leaders. We will also focus on the individual soldier: his pay, recreation, benefits and equipment.
Outcomes:
Students will gain familiarity with the military aspects of warfare in U.S. history and the social aspects of warfare; They will be challenged to integrate those varying perspectives into a coherent synthesis of the topic

HIST 388A Vietnam War (3 Credit Hours)
This course offers a comprehensive examination of origin, execution, and failure of America's war in Vietnam.
Interdisciplinary Option: Asian Studies, Global Studies
Course equivalencies: X-HIST/ASIA/PAX389/INTS388
Outcomes:
Students will understand the ancient origins of the Vietnamese nation, the rise and fall of the French colonial regime, the role of Vietnam in the Cold War, the peace movement, the political and cultural impact of the war on America, the success and failures of the United States military, the impact of the war on the Indo-China region, and the memory of the war in American culture

HIST 389B Topic: Gender, Race, & Class in US History (3 Credit Hours)
This course examines the historical interplay of gender, race and class in the lives of African-American and white women in the United States.
Interdisciplinary Option: Race and Ethnicity, Women & Gender Studies
Course equivalencies: X-HIST295/PAX295/WSGS299
Outcomes:
Students will understand critical themes and periods in the development of racism and sexism, especially the ways in which the two relate; differences and similarities in the manifestations of and reactions to racism and sexism in the lives and thought of African-American and white women of differing class backgrounds

HIST 389C Gender Benders (3 Credit Hours)
This course examines the changes in gender roles and the relationship between men and women from the colonial era to the present.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-HIST294/WOST290/WSGS294
Outcomes:
Students will demonstrate understanding of the changing expectations about and definitions of men and women of how families were organized, how childrearing was handled, who made up the home, and how work and family production followed a sexual division of labor

HIST 389F The Sixties (3 Credit Hours)
This course focuses on the turbulent years from 1960 to 1974 in American history, a period of active social movements and foreign wars.
Outcomes:
Students will be able to demonstrate historical knowledge of American social, political, gender, and cultural change during the 1960s, to draw links between popular mobilizations, countercultures, and social change, and to develop critical thinking and communication skills

HIST 389K Autobiography and Memoir in Recent US History (3 Credit Hours)
Autobiography and Memoir in Recent US History uses personal recollections as a way to get at large themes in history. Topics include immigration, nativism, ethnicity, gender, regionalism, war, religion, and class. Students read intensively as a way of understanding how individuals live their lives within large historical forces and events. This is a writing intensive course. It is also a reading intensive course. It is run as a seminar - learning to discuss and engage with ideas is a key element.

HIST 389N Anti-Immigrant Politics in U.S. History (3 Credit Hours)
The course features studies of anti-immigrant politics sponsored by: 1. the Federalist Party (late 18th c); 2. the "Know Nothing" Party (mid-19th c); 3. the Populist Party (late 19th c); 4. the Ku Klux Klan (1920s); 5. the Republican Party (early 21st c).
Interdisciplinary Option: Italian American Studies, Latin American Studies
Outcomes:
Students will use historical perspective to deconstruct the rhetoric and analyze the socio-economic and political contexts of past and present nativist political movements

HIST 389W Races to the White House: Presidential History (3 Credit Hours)
This course aims to show how the president's election, job, power, and mystique has changed since the Founding. Students will delve into the modern primary and party system's origins, the fierce debates about the Electoral College, the controversies over executive power, the media's importance, and the first families' changing role.
Interdisciplinary Option: Sociolegal Studies
Outcomes:
Students will gain historical knowledge of the American presidency, federalism, and electoral politics and develop critical thinking and communication skills

HIST 390 Senior Capstone (3 Credit Hours)
Each participant will utilize the research skills, historical studies and writing abilities acquired to date to produce a significant paper based largely on historical research in primary sources and bolstered by appropriate secondary sources. Restricted to students in senior standing.
Outcomes:
Students will be able to demonstrate appropriate historical scholarship, analysis and writing skills

HIST 397 History Honors Tutorial (3 Credit Hours)
Students in this course will produce a significant research paper on a topic of their own choice (25-30 pages) based largely on primary sources through archival research and will present their work in a symposium at the end of the course.
This course satisfies the Engaged Learning requirement.
Outcomes:
Produce analytical arguments by using evidence and facts to interpret past events, behavior, and processes in your own historical research project; Identify the arguments put forth by historians in order to compare, evaluate, and criticize different interpretations of the past - In doing so, be able to evaluate the adequacy of evidence (including a variety of sources: documents, films, diaries, images, oral and digital histories, etc) that historians use to make truth claims about the past; Demonstrate an understanding of the processes of historical change and be able to discuss and evaluate causes, complexities, and consequences of change over time in relationship to historical events and processes; Demonstrate an understanding that human values and beliefs are shaped by historical context and they will gain the capacity to make informed judgements about past and present behavior and ideas with a goal of fashioning a more just world - In this endeavor, students will also gain an understanding of the ethical practices and standards for historical research and writing

HIST 398 History Internship (3 Credit Hours)
This course provides three hours credit for students engaged in history related internships in the public and private sectors.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to obtain an internship position, to learn on-the-job from an experienced practitioner in a wide variety of public and private sector settings, to draw links between their present situation and historical research, and to develop critical thinking and communication skills

HIST 399 Directed Study (1-3 Credit Hours)
This course provides students with the opportunity to work under the direction of a faculty member on a particular area of interest that is not part of the department's usual curriculum.
Outcomes:
Students will gain an understanding of a specific area of history through the close reading of selected texts and the preparation of a research paper

HIST 400 Contemporary Approaches to History (3 Credit Hours)
The course focuses on twentieth-century historical writing, emphasizing changing interpretive paradigms and innovative methodologies, and will introduce students to the range of topics and influences that now shape the discipline.
Outcomes:
Students will demonstrate their ability to analyze historical interpretations, while honing their skills in writing and oral presentation

HIST 403 Professional Lives of Historians (3 Credit Hours)
This course explores pedagogical, professional, and ethical issues of importance to historians. We will examine the many identities of historians and the relationship between training in history and career pathways. Students will explore the history of the historical profession, approaches to teaching history, ethical issues in history as well as the diverse pathways available to those with training in history. Each student will complete a pedagogical activity, a career exploration report, and a professionalizing project. Required of all first year PhD students. Open to all other students as an elective.
Outcomes:
Recognize the application of historical training in many arenas; Understand the ethical challenges facing historians

HIST 410 Topics (3 Credit Hours)
Topics vary as this course allows for the offering of specialized topics designed to enhance the graduate curriculum. Students will be demonstrate knowledge of the key features of the topic, analyze and debate the various historical themes concerning it, and complete a historiographical or research paper related to the theme of the class.

HIST 441 Women's & Gender History: Europe (3 Credit Hours)
This course provides an introduction to the major themes and scholarship in women's and gender history. It examines a variety of debates about and methodological approaches to the historical construction of gender, ranging from histories of the body and sexuality to analyses of culture, politics, and the economy. It explores how gender identities were produced and contested at specific historical moments and in different locations.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-HIST441/WOST441/WSGS441

HIST 442 Women's & Gender History: U.S.A. (3 Credit Hours)
The course explores the literature on women and gender in US history with attention to theoretical issues, a broad chronological scope, and cultural diversity. Students will demonstrate their ability to analyze a body of historical literature on women and gender in US history while honing their skills in writing and oral presentation.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-HIST442/WOST442/WSGS442
Outcomes:
Students will demonstrate their ability to analyze a body of historical literature on women and gender in US history, while honing their skills in writing and oral presentation

HIST 450 Nineteenth Century America (3 Credit Hours)
This course focuses on major historiographical questions reflecting the diversity of inquiry in the field of nineteenth century U.S. history. Students will be introduced to the major historiographical debates concerning the development of American society and politics during the nineteenth century. Students learn to critique recent historical literature through discussion and reflective essays.
Outcomes:
Students will be introduced to the major historiographical debates concerning the development of American society and politics during the nineteenth century; Students learn to critique recent historical literature through discussion and reflective essays

HIST 459 Environmental History (3 Credit Hours)
Environmental history expands the customary framework of historical inquiry, incorporating such actors as animals, diseases, and climate alongside more familiar human institutions and creations. This course will expose students to the major concepts, tools, and sources in the field. It will equip students to describe major changes in approaches to environmental history. It will prepare students to write, teach, and develop research projects on environmental history.
Outcomes:
1) Exposure to the major concepts, tools, & sources in the field; 2) Ability to describe major changes in approaches to environmental history

HIST 460 Urban America (3 Credit Hours)
This course examines the evolution of the United States from a rural and small-town society to an urban and suburban nation. Cities, and especially Chicago, have long offered some of the best laboratories for the study of American history, social structure, economic development and cultural change. This colloquium will provide a historiographical introduction to the major questions and issues in the culture and social life of American cities.

HIST 461 Twentieth Century America (3 Credit Hours)
Reading and discussion seminar. Students will read monographs and articles in 20th century U.S. history, including social, cultural, intellectual, and other approaches. The final assignment will be a long historiographic paper.

HIST 464 Transnational Urban History (3 Credit Hours)
This class exposes students to the history of cities across a broad spectrum of time and place. The level of analysis is both more global and more local than traditional narratives of the nation state. This course explores the recurring challenges and possibilities of urban life and urban governance across cultures and time. An emphasis on reading and writing will help students develop the skills of critical analysis. Restricted to Graduate Students.
Outcomes:
Appreciation for the recurring challenges and possibilities of urban life and urban governance across cultures and time; An emphasis on reading and writing will help students develop the skills of critical analysis

HIST 479 Public History Media (3 Credit Hours)
An introduction to the field of digital humanities and public media. Through a series of assignments and in-class labs centered around common Digital Humanities tools and platforms, the class will explore current and historical conversations in digital humanities and new media and address theoretical and practical problems involved in digital humanities-based methods and methodology. The final product of each assignment will be a collaborative digital public humanities project.
Outcomes:
Possess an introductory technical knowledge of digital tools or methods; Ability to apply technical knowledge about digital history tools to historical questions; Familiarity with managing and creating a team-based digital humanities project

HIST 480 Public History: Method & Theory (3 Credit Hours)
This course explores the field of public history with special emphasis on the theoretical and methodological challenges faced when preserving or presenting history outside of a formal classroom environment. Also under consideration will be the professional and ethical responsibilities of the historian both inside and outside of the university setting. Students will be able to understand the theoretical and methodological issues of importance to the field of public history, reflect upon ethical issues involved in the collection, curation, and presentation of history, and participate in applied projects drawing upon public history methodologies and presentation modes.

HIST 481 Management of Historic Resources (3 Credit Hours)
This class is an introduction to historic preservation. The class will review the way public historians work to protect the material culture of the built environment on a local, state, and national level. The class will consist of lectures on aspects of historic preservation, the discussion of weekly readings, and the execution of a preservation project. The project will be to prepare a National Register of Historic Places nomination on a single property or historic district.
Outcomes:
Understand the types of practice that characterizes the field of historic preservation; Understand current emerging issues in historic preservation from an ethical perspective; Experience carrying out the role of the public historian in historic preservation, ability to identify and explain the cultural value of what should be preserved

HIST 482 Archives and Record Management (3 Credit Hours)
This course introduces basic archival theory and methodology. Particular emphasis will be placed on ethics, best practices, and the relationship of archives to allied fields.
Outcomes:
Communicate what archives are and the basic tenants of the profession to a lay audience; Apply archival terminology and concepts to real world scenarios; Identify opportunities in the archival field that are appropriate for their career goals and level of experience; Apply the basics of collection care principles to any given collection at an institution; Understand the components of arrangement and description

HIST 483 Oral History: Method and Practice (3 Credit Hours)
This course will give students a basic understanding of oral history by asking several questions of the discipline, including: What exactly is oral history and what sets it apart from other historical research methodologies? What are the ethical issues involved in undertaking oral history? How does one conduct, record, and archive an interview? What steps are necessary in constructing an oral history project? What are the merits of the various products that can be derived from oral history in both texts and multimedia? In addition to reading oral historical texts and theory, students will conduct at least two interviews and participate in an ongoing oral history project. Students will learn how to develop, conduct, and evaluate an oral history interview and prepare oral history interviews for archival disposition.
Outcomes:
Ability to develop, conduct, and evaluate an oral history interview and prepare oral history interviews for archival disposition

HIST 484 Material Culture (3 Credit Hours)
This class is restricted to Graduate students. This course is an introduction to approaches to the study of American material culture in its many forms, including decorative arts and mass-produced consumer objects; urban form, vernacular architecture, commemorative landscapes; the body and dress; foodways; and the material culture of childhood. The course will consider the ways scholars use material culture to "do" history, with an emphasis on artifacts as evidence.
Outcomes:
1) Students will understand the theory and practice of material culture study; 2) Students will gain experience in artifactural analysis; 3) Students will research and interpret material culture

HIST 487 Public History: Museums (3 Credit Hours)
This course introduces graduate students to issues involved in the management of history museums while considering many questions about the role and function of museums in American society. What does it mean to say that museums serve the public? How can museums become more diverse, equitable, accessible, and inclusive institutions? How do museums tell stories and who gets to decide what stories to tell? How and why do museums collect, care for, and display some objects and not others? Why do people visit museums, what do they experience there, and what do those visits mean to them? What does "success" look like and how does one measure it? What financial, administrative, and ethical issues do museums face? How can museums critically address today's complex political, cultural, and social realities?
Outcomes:
Possess introductory knowledge of the issues involved in the management and operation of history museums; Understand the historic and current role and function of museums in American society; Familiarity with various aspects of museum practice through hands-on activities and project-based coursework

HIST 496 Race, Violence & Memory (3 Credit Hours)
Pre-requisites: Graduate Student status
In the last generation, historians, literary scholars, and other humanists have intensified the study of historical memory and commemoration, even as public demonstrations, debates, and legislation over historical markers and monuments have proliferated. This course examines the ways that Americans have remembered, forgotten, and argued over violent episodes that have played important roles in their history. We will examine three aspects of historical memory: how individuals, institutions, and movements created and silenced historical memories; how these memories were embodied in the commemorative landscape; and how memories and public landscapes have changed over time.
Outcomes:
The course¿s primary goals are provide students with an understanding of these changing historical memories and the tools to incorporate them into the their future professional lives

HIST 498 Dissertation Research (3 Credit Hours)
Students register for this course once they begin work on their dissertation and have not yet completed the sixty hours required for the PhD degree. If necessary, this course can be taken up to three times.

HIST 499 Directed Study (3 Credit Hours)
This course provides students with the opportunity to work under the direction of a faculty member on a particular area of interest. There is a form that must be completed and submitted prior to course registration. There are limits on how many of these can be taken over the course of a student's career: MA (2 times) and PhD (3 times).

HIST 510 Research Seminar - Special Topics (3 Credit Hours)
Research seminar using primary sources in cultural, social, technological, intellectual, and institutional history. Topics vary according to the interest of the instructor. Students will learn how to local and analyze archival material to develop an original article-length research paper. Students will learn how to locate and analyze archival materials to develop an original article-length research paper.

HIST 555 US Social & Intellectual History (3 Credit Hours)
Research seminar that focuses on different topics relating to the social and intellectual history of the United States. Students learn how to locate and analyze archival materials to develop an original article-length research paper.

HIST 558 Studies in American Cultural History (3 Credit Hours)
Research seminar focused on primary sources in American cultural history. Students will learn how to locate and analyze archival materials to develop an original article-length research paper.

HIST 561 Seminar-Gender & Women's History (3 Credit Hours)
This seminar focuses on the use of gender as a category of analysis in history and is particularly appropriate for those who have taken courses in Women's and Gender History or Women's Studies. Students will produce a research paper; they may choose any topic relevant to issues of gender or women for any time period or society, as long as adequate primary sources are available.

HIST 581 Practicum in Public History (3 Credit Hours)
Pre-requisites: HIST 480
Practicums provide students with specific exposure to an aspect of the practice of public history. Practicums are undertaken either under the direct supervision of Loyola faculty or the joint supervision of a Loyola faculty member and a cooperating off-campus supervisor.
Outcomes:
Strengthen skills used in the classroom, including teamwork and reflective practice in praxis situations; Gain experience in communication, collaboration, and intellectual self-confidence; Possess the opportunity to produce a public history work product; Broaden the public history toolkit

HIST 582 Public History Internship (1-3 Credit Hours)
The internship will provide an extended practical experience in the field of public history. Internships are tailored to fit the needs of the individual student and the needs of the off-campus agency involved. As part of their program, all public history students must undertake an internship either doing public history in the private sector or with a public agency. The internship is available during any semester and its timing is related to an individual student's progress in the program. This is a variable credit course. Students in the MA Public History program take a 1-hour internship (50 hours minimum). Students in the PhD program, the MA Program or the dual MAPH/MILS Program take a 3-hour internship (150 hours).
Outcomes:
Enhanced skills learned via program coursework, including teamwork and reflective practice, in praxis situations; Ability to synthesize out-of-classroom and in-classroom learning through practice; Ability to synthesize out-of-classroom learning through reflection; Possess the opportunity to produce a work product appropriate to their particular internship

HIST 584 U.S. Local History (3 Credit Hours)
Research Seminar that explores the nature and practice of local history and explores various methods and approaches central to local history research. This course will introduce students to the literature on local history, acquaint them with the methodology critical to local history research, and have them conduct original research on a local history topic.
Outcomes:
This course has three objectives: 1. to introduce students to the literature on local history; 2. to acquaint students with the methodology critical to local history research, 3. to conduct original research on a local history topic

HIST 585 Career Diversity Internship (3 Credit Hours)
An elective course that allows PhD and MA students explore a career pathway and have the opportunity to see how the skills gained in History can be applied to diverse career settings. Students will gain an exposure to a non-academic career, develop new skills, and gain experience is communication, collaboration, and intellectual self-confidence.
Outcomes:
Exposure to a non-academic career; development of new skills; gain experience in communication, collaboration, & intellectual self-confidence

HIST 598 Dissertation Proposal Seminar (3 Credit Hours)
Students work closely with an advisor to prepare their dissertation proposal.

HIST 599 Directed Primary Research (3 Credit Hours)
Students work under the direction of an advisor on a specific research project and produce a Master's Essay in lieu of the seminar requirement. There is a form that must be completed and submitted prior to course registration.

HIST 600 Dissertation Supervision (1 Credit Hour)
Students take this course once they complete all requirements for the PhD except the dissertation. The purpose of this course is to maintain active enrollment in the Graduate School during the fall and spring semesters. No credit hours are associated with this course and students receive a grade of CR.

HIST 605 Master's Study (1 Credit Hour)
Students register for 605 to maintain active enrollment in the Graduate School during the fall or spring semesters if they are not registered for any graduate class at the master's level while finishing up their requirements, such as field examinations and the research project. No credit hours are associated with this course and students receive a grade of CR.

HIST 610 Doctoral Study (1 Credit Hour)
Students register for this course to maintain active enrollment in the Graduate School during the fall or spring semesters if they are not registered for any graduate class at the master's level while finishing up their requirements, such as field examinations and the research project. No credit hours are associated with this course and students receive a grade of CR.

Honors (HONR)

Discover, search, courses (p. 2661)!

HONR D101 Developments Western Thought I Discussion (3 Credit Hours)
This is the discussion section that complements the Honors Freshman lecture course on the Western Intellectual Traditions: Antiquity to the Middle Ages. All students enrolled in HONR 101 must also be enrolled in a section of HONR D101.
Interdisciplinary Option: Catholic Studies
Course equivalencies: X-HONRD101/CATH101D

HONR D102 Developments in Historical Western Thought II Discussion (3 Credit Hours)
This is the discussion section that complements the Honors Freshman lecture course on the Western Intellectual Traditions: the Renaissance to Modernism. All students enrolled in HONR 102 must also be enrolled in a section of HONR D102.

HONR 101 Western Traditions - Antiquity to the Middle Ages (3 Credit Hours)
This course,(and its companion, HONR 102), opens perspectives on works that have shaped the self-understanding of the Western intellectual tradition. An interdisciplinary team of professors examines these works from a variety of disciplinary paradigms. Students will examine the recurring questions the works pose to each other and to our own culture: questions about the nature of human existence and destiny, and the characteristic problems and possibilities of humanity's struggle for justice, search for truth and hunger for beauty. These courses are structured as three hours of lecture and three hours of seminar each semester.
Interdisciplinary Option: Catholic Studies
Course equivalencies: X-HONR10/CATH102
Outcomes:
Studying a selection of major works from antiquity to the present, students learn how each text reflects its own period, how texts within each period present different views, and how ideas change over time; Written and visual expressions of these themes are examined in relation to the political and cultural background of each period: Ancient Greece and Rome, the Middle Ages, the Renaissance, the Enlightenment, the Romantic Period and modernism

HONR 102 Western Traditions-Renaissance to Modernity (3 Credit Hours)
This course (and its companion, HONR 101) opens perspectives on works that have shaped the self-understanding of the West. An interdisciplinary team of professors examines these works from a variety of disciplinary paradigms. Students will examine the recurring questions the works pose to each other and to our own culture: questions about the nature of human existence and destiny, and the characteristic problems and possibilities of humanity's struggle for justice, search for truth and hunger for beauty. These courses are structured as three hours of lecture and three hours of seminar each semester.
Outcomes:
Studying a selection of major works from antiquity to the present, students learn how each text reflects its own period, how texts within each period present different views, and how ideas change over time; Written and visual expressions of these themes are examined in relation to the political and cultural background of each period: Ancient Greece and Rome, the Middle Ages, the Renaissance, the Enlightenment, the Romantic Period and modernism

HONR 203 The United States Experience (3 Credit Hours)
Pre-requisites: HONR 101, HONR D101, HONR 102, HONR D102
Restricted to students in the Honors Program This course examines the formation and development of the United States. Focusing on selected topics, students learn how much is at stake in competing versions of the past. Students read influential political, literary and historical texts. Professors will introduce students to various ways of understanding the United States experience.
Outcomes:
Students will be able to demonstrate an understanding of the various ways in which the distinctive U.S. experience has been presented; Students will learn to use available public sources to conduct research on aspects of the American experience

HONR 204 Science and Society (3 Credit Hours)
Pre-requisites: Prerequisite HONR 101, HONR D101, HONR 102, HONR D102
Restricted to Honors students. Students will examine the ways natural science and social science address a particular issue as well as the effects of science on society. They will study scientific ways of knowing and organizing knowledge, and demonstrate the capacity to make reasoned and ethical judgments about the impact of science on society.
Outcomes:
Students will learn scientific principles and methods of producing knowledge and to make reasoned and ethical judgments about the impact of science on the individual, community and society

HONR 208 Encountering Latin America and the Caribbean (3 Credit Hours)
Pre-requisites: Completion of HONR 101, HONR D101, HONR 102, and HONR D102
Restricted to students in the Honors Program. This course introduces students to the history and culture of selected nations of Latin America and the Caribbean. Students will study significant ideas and events that have shaped this area. These might include indigenous cultures, colonization, slavery, race relations, independence and revolutionary movements, economic dependency and political instability.
Interdisciplinary Option: Global Studies
Outcomes:
Students will understand the relationships among cultural, economic, political, and social forces, and their impact on human behavior; Students will become aware of variations in human values and behavior, ideas of justice, and shared understandings in unfamiliar cultures

HONR 209 Encountering Asia (3 Credit Hours)
Pre-requisites: Completion of HONR 101, HONR D101, HONR 102, and HONR D102; Restricted to students in the Honors Program
This course will introduce students to various regions in Asia and some of the fundamental components of Asian civilizations as they have evolved historically and persist in the modern world. Regions might include East, South and Southeast Asia.
Interdisciplinary Option: Asian Studies, Global Studies
Outcomes:
Students will learn different methods of interpreting cultural, economic, political, and social forces, and their impact on human behavior; Students will become aware of variations in human identities and values, ideas of justice, and shared understandings in unfamiliar cultures

HONR 210 Encountering Africa (3 Credit Hours)
Pre-requisites: Completion of HONR 101, HONR D101, HONR 102, and HONR D102; Restricted to students in the Honors Program
This course introduces students to various regions in Africa and some of the fundamental components of African civilizations as they have evolved historically and persist in the modern world. These might include classical African civilizations, origins of the slave trade, agriculture, ethnicities, colonialism, nationalism, the modern state.
Interdisciplinary Option: Global Studies, Middle East and Islamic World Studies
Outcomes:
Students will learn different methods of interpreting cultural, economic, political, and social forces, and their impact on human behavior; Students will become aware of variations in human identities and values, ideas of justice, and shared understandings in unfamiliar cultures

HONR 212 Encountering the Middle East (3 Credit Hours)
Pre-requisites: Completion of HONR 101, HONR D101, HONR 102, and HONR D102; Restricted to students in the Honors Program
This course introduces students to various regions in the Middle East and some of the components of selected civilizations in this region as they have evolved historically and persist in the modern world. Topics might include monotheistic religions, the Ottoman Empire, Islamic culture, creation of the modern system of states after the First World War, the place of women in Middle Eastern societies, urban and rural cultures, the political and economic consequences of water scarcity and oil wealth.
Interdisciplinary Option: Global Studies, Middle East and Islamic World Studies
Outcomes:
Students will learn different methods of interpreting cultural, economic, political, and social forces, and their impact on human behavior; Students will become aware of variations in human identities and values, ideas of justice, and methods of interpretation in unfamiliar cultures

HONR 216 Encountering Contemporary Europe (3 Credit Hours)
Pre-requisites: Completion of HONR 101, HONR D101, HONR 102, and HONR D102; Restricted to students in the Honors Program
This course introduces students to selected areas of Europe as they have evolved since World War II. Topics might include Europe's cultural history, nationalism, the European Union, immigration, economic development, and political life. Professors introduce students to various ways of approaching an area with many languages, ethnicities, nation-states and religions.
Interdisciplinary Option: European Studies, Global Studies
Outcomes:
Students will learn different methods of interpreting cultural, economic, political, and social forces, and their impact on human behavior; Students will become aware of variations in human identities and values, ideas of justice, and shared understandings in unfamiliar cultures

HONR 290 Literacy Center (3 Credit Hours)
Pre-requisites: Students in or beyond their second semester; UCWR 110 or equivalent
This course offers training and practical experience in tutoring adults in written and spoken English in a volunteer literacy program. Students will be able to demonstrate understanding of societal and cultural factors affecting literacy, and will develop communication and critical thinking skills.
This course satisfies the Engaged Learning requirement.

HONR 301 Honors Capstone: Moral Responsibility (3 Credit Hours)
This course is the capstone of the Interdisciplinary Honors Program and may be taught from the disciplinary perspectives of philosophy or theology. Students will be able to analyze ethical theories and to apply principles of ethical reasoning and individual moral responsibility to contemporary social issues and questions that arise in everyday life. Students must have 75 credit hours or more to enroll.
Knowledge Area: Ethics

HONR 370 Fieldwork in Honors - Internship (1-3 Credit Hours)
The main goal of this course is to provide students with valuable work experience in a professional field connected with their academic program. It allows students to apply and further develop their knowledge and skills through an internship in a non-academic setting. The course is also intended to serve as a "bridge" between college and career. This internship presents an opportunity for students to gain valuable professional experience as an intern in public or private institutions engaged in public service projects. HONR 370 will satisfy the "service" requirement for all Honors students.
This course satisfies the Engaged Learning requirement.

Human Resources and Employment Relations (HRER)

Discover, search, courses (p. 2661)!

HRER 201 Principles of HR Management (3 Credit Hours)
This course provides an overview of the various functional areas within the field of human resource management for those who will be working in general management positions as well as in the human resources function. Topics will follow a logical sequence beginning with pre-employment planning and continuing through organizational exit. Specifically, topics will include forecasting human resource needs, employee recruitment and selection, training, performance evaluation, wage and salary administration, collective bargaining, legal constraints on personnel practices and organizational exit.
Course equivalencies: HRER 301/HRER 375
Outcomes:
Students will examine the importance of contemporary Human Resources Management; Students will be able to select compensation strategies to support organizational goals

HRER 311 Employment Relations (3 Credit Hours)
Pre-requisites: Junior Standing
This course provides an introduction to employee relations, and how companies, labor unions, human resources professionals and the law shape the contemporary relationship between employees and their employers in the United States.
Course equivalencies: MGMT311/HRER311
Outcomes:
Students will demonstrate how management representatives, unions, and government dynamically interact to provide employees voice, balance group interests and power, and resolve workplace conflict

HRER 313 Compensation Management (3 Credit Hours)
Pre-requisites: Junior standing; C- or better in ISSCM 241 or ISSCM 241H or STAT 103; and C- or better in HRER 301
This course examines reward policies, programs and practices over such matters as base-pay, employee benefits and incentive in private and public organizations.
Course equivalencies: MGMT313/HRER313
Outcomes:
Students will learn how to design and implement reward programs that will give their employers a competitive advantage; to resolve compensation problems from both a human resource professional and managerial perspective; and to negotiate fair pay packages with their employers; Students will improve their team leadership, analytical and writing skills

HRER 317 Human Resource Staffing (3 Credit Hours)
Pre-requisites: Junior Standing, "C-" or better in HRER 301
This course covers topics related to organizational staffing, including job analysis, forecasting, use of biographical information, interviewing, statistical analysis, performance evaluation and legal issues related to selection.
Course equivalencies: MGMT317/HRER317
Outcomes:
Students will acquire the knowledge and skills necessary for the development, implementation and evaluation of a staffing system

HRER 322 Human Resource Development (3 Credit Hours)
Pre-requisites: Junior Standing, "C-" or better in HRER 301
This course examines how organizations develop employees with the technical, interpersonal and leadership skills to be effective in their jobs. The course will incorporate training, development, and performance management topics.
Outcomes:
Students will learn how to conduct a training needs assessment, set learning objectives, establish evaluation criteria, select the best instructional methods, conduct a training program and evaluate the impact of the program on the learner and organization; Students will also improve their presentation, team leadership, analytical and writing skills

HRER 325 Global Employment Relations (3 Credit Hours)
Pre-requisites: Junior Standing, C- or better in HRER 301
This course has two basic objectives: to familiarize students with different employment relations systems in advanced industrial economies in North America, Europe, and Asia; and to introduce students to labor problems associated with a global economy (e.g., sweatshops, child labor, slavery and other coercive labor systems) and to proposed approaches to redressing these problems (e.g., transnational institutions like the ILO, trade agreements, voluntary codes of conduct, labor unions).
Interdisciplinary Option: International Business

HRER 329 Global HR and Organizational Behavior (3 Credit Hours)
Pre-requisites: Junior standing, C- or better in HRER 201, HRER 301, or MGMT 201
This course provides an understanding of the critical roles of Human Resource professionals throughout the strategic globalization process. The course will also teach one to become aware of cross-cultural issues that affect organizational dynamics and behaviors central to management processes, such as staffing, motivation, negotiation, communication, and leadership.
Interdisciplinary Option: Global Studies, International Business
Outcomes:
Survey the three types of topics covered by the field of Global HRM: 1) Management of human resources in global corporations, 2) Management of expatriate employees, and 3) Comparison of HRM practices in a variety of different countries

HRER 364 Negotiation and Conflict Management (3 Credit Hours)
Pre-requisites: Junior standing; minimum grade of "C-" in MGMT 201
Negotiation and conflict management are pervasive in the workplace and in business, occurring between co-workers, managers, vendors, and parties whenever interests diverge. This class focuses on generating self-insight through the experience of engaging in negotiation simulations in each class, and by applying theory of negotiations to class exercises and personal experience.
Outcomes:
Students will learn fundamental principles and theories of negotiations and conflict management; Students will apply course materials to improve problem solving and decision-making; Students will develop specific skills and competencies needed by professionals in the field of management

HRER 395 Independent Study in Human Resources and Employment Relations (1-3 Credit Hours)
Pre-requisites: Junior Standing, C- or better in HRER 301, department consent required
No course description is available

HRER 399 Special Topics in Human Resources and Employment Relations (1-3 Credit Hours)
Pre-requisites: Junior Standing , C- or better in HRER 301
No course description is available

HRER 413 Compensation (3 Credit Hours)
This course examines wage and salary policies and programs in private and public organizations. Legislative and social issues affecting pay decisions and the alignment of pay policies with the business strategy and other human resource programs are covered.
Outcomes:
Students will learn how to design and implement compensation policies and programs that will give their employers a competitive advantage; Students will learn how to resolve compensation problems from both a human resource professional and managerial perspective; Students will learn how to create pay policies that are perceived as just and equitable; Students will improve their team leadership, analytical, and writing skills

HRER 415 Internship (1 Credit Hour)
An internship provides the student with direct exposure to human resources and/or industrial relations functions as they are practiced in the real world.
Course equivalencies: HRIR415/HRER415
Outcomes:
Students will learn to practically apply the concepts and theories learned in the classroom to a real organizational work environment

HRER 417 Managing and Motivating in the Workplace (3 Credit Hours)
The course primarily explores the structure and function of human behavior in organizations. Students will be introduced to the principles of theory of perception, motivation, decision making, and job and organizational design as they relate to organizational realities such as power, politics, and change.
Course equivalencies: CORD/HRIR/TRDV/HRER417/MGMT470
Outcomes:
Students will gain a better understanding of both individual and group behavior in organizational settings and will be able to view organizational change through globalization, diversity, technology, and ethics

HRER 417B Managing and Motivating in the Workplace (3 Credit Hours)
Pre-requisites: Restricted to MBA Baumhart Scholars students
This course explores the structure and function of human behavior in organizations with a special focus on diversity, equity, and inclusion and on change management.
Outcomes:
Students will gain a better understanding of both individual and group behavior in organizational settings and will be able to view organizational change through globalization, diversity, technology and ethics

HRER 417N Managing and Motivating in the Workplace (3 Credit Hours)
Pre-requisites: Restricted to Graduate School of Business students
This course introduces students to organizational behavior (OB) and human resource management (HRM). Students will learn theories and managerial perspectives relating to employee motivation, job attitudes, interpersonal relationships, and decision-making. These concepts will be applied to the HRM topics of job design, staffing, training, compensation, performance management, and employee relations. This course will equip students with the knowledge and skills needed to create a positive work environment as a manager, support meaningful work, and motivate extraordinary employee performance.
Outcomes:
Develop a global perspective and appreciation of culture and diversity in organizations; Integrate and apply OB and HRM with organizations' people management strategies

HRER 418 Human Resources Law (3 Credit Hours)
This course will introduce students, by a combination of statutory case law analysis and readings, to the substantive case law in the area of employee-employer relations' law. The statutes and case law encompass the following: National Labor Relations Act, Title VII of the Civil Rights Act of 1964, Age Discrimination in Employment Act (ADEA), Americans with Disabilities Act (ADA), Civil Rights Act of 1991, Illinois Human Rights Act, and Illinois Employment Law Statutes and Regulations.
Course equivalencies: HRIR418/HRER418
Outcomes:
The primary purpose of this course is to introduce graduate students to a practical examination of the principles of "employee-employer" relations law, also called human resources law or personnel law; Students will be exposed to the principal theories, policies and literature concerning the relevant federal and state (Illinois) court case law and government regulations of the employee-employer relationship in primarily the private sector

HRER 422 Global Human Resource Management (3 Credit Hours)
This course examines the critical roles of Human Resource professionals throughout the strategic globalization process, as well as the cross-cultural issues that affect organizational dynamics and behaviors central to Human Resource processes, such as staffing, training, motivation, negotiation, team building, and communication.
Outcomes:
To survey the three types of topics covered by the field of Global HRM: 1) management of human resources in global corporations, 2) management of expatriate employees, and 3) comparison of HRM practices in a variety of different countries; To consider special topics at the forefront of global HR, such as effects of NAFTA and the European Union, global ethics, and critiques of globalization

HRER 429 Human Resource Development (3 Credit Hours)
This course examines how organizations develop employees with the appropriate technical, interpersonal and leadership skills to be effective in their jobs.
Outcomes:
Students will learn how to conduct a training needs assessment, set learning objectives, establish evaluation criteria, select the best instructional methods, and to evaluate the impact of the program on the employee and organization; In addition to conducting formal training programs, students will learn how to use career planning, job rotation and performance feedback to develop employees and themselves; Students will improve their presentation, team leadership, analytical and writing skills

HRER 430 Leading Change in Organizations (3 Credit Hours)
The course focuses on enhancing managers' capabilities in integrating strategic issues with "people" issues, enabling them to effectively implement change initiatives within diverse global environments.
Course equivalencies: X - MGMT472 / HRER430
Outcomes:
Students will learn fundamental principles, theories, and generalizations needed for competent approaches to implement organizational change that prioritizes managing the "people" aspects of change, as participants or managerial change agents

HRER 433 Group Process and Facilitation (3 Credit Hours)
This course focuses on major concepts of group development and group dynamics. Other topics of discussion include communication patterns, authority relations, leadership, norms, stages of group behaviors, paradoxes of group life, and self-awareness within group settings.
Course equivalencies: HRIR433/HRER433
Outcomes:
Students learn the various tools and techniques of process consultation and also gain knowledge and competence for working with groups; The course combines cognitive and conceptual materials with experienced-based learning

HRER 442 Global Overseas Seminar (3 Credit Hours)
This course examines cross-cultural human resources topics both within the business organization and across the global marketplace.

HRER 452 Human Resources Information Systems (3 Credit Hours)
Pre-requisites: Restricted to Graduate School of Business students
This course offers an in-depth look into the processes involved in implementing Human Resource Information Systems (HRIS) and how to use analytics to drive key business decisions.
Outcomes:
Understand how to prioritize needs and implement and use HRIS to support business decisions; Learn basic programming for analytics

HRER 453 Incentive Pay and Employee Benefit Programs (3 Credit Hours)
This course examines incentive pay and employee benefit programs in private and public organizations. Program design and the alignment of incentive pay and benefit programs with business strategy and human resource programs are covered.
Outcomes:
Students will learn to design and implement incentive pay and employee benefit programs that will give their employers a competitive advantage and be perceived as equitable among employees; Students will improve their team leadership, analytical, and writing skills

HRER 462 Employment Relations (3 Credit Hours)
This course examines critical labor laws in the United States and the structure and function of our employment relations system.
Outcomes:
Students will demonstrate understanding of basic case law in the field of labor relations and how unions, management representatives, and government dynamically interact to provide employee representation, balance group interests, and, ideally, avoid disruptive workplace conflict

HRER 463 Staffing (3 Credit Hours)
This course provides an overview of staffing processes in organizations, with an emphasis on recruitment and selection procedures. Other topics of discussion include legal and strategic issues in staffing and relevant statistical concepts.
Outcomes:
Students will become comfortable with the entire staffing process and be able to design and implement cutting-edge staffing systems, with an emphasis on business strategy

HRER 464 Negotiation and Conflict Management (3 Credit Hours)
Pre-requisites: Restricted to Graduate School of Business students
Negotiation is the art and science of securing agreements and resolving disputes between two or more interdependent parties. The purpose of this course is to develop students' expertise in managing negotiations and conflicts in a variety of settings. It is designed to be relevant to a broad spectrum of problems faced by those working in management.
Outcomes:
Students will develop both analytical and interpersonal skills through engagement in a variety of negotiation exercises

HRER 490 Analytical Problem Solving (3 Credit Hours)
This course is designed as an introductory graduate level course in analytical problem solving, another name for research methods, and design. A basic understanding of, and general familiarity with, fundamentals of statistical concepts is assumed. However, where necessary, we will revisit these concepts briefly. Of course, this is not a course in statistics.
Course equivalencies: HRIR490/HRER490

HRER 498 Independent Study (3-6 Credit Hours)
Student will conduct in-depth research or reading, initiated by the student and jointly developed with a faculty member, into a specialized area of human resources not otherwise covered by department course offerings.
Outcomes:
Students will be able to demonstrate in-depth understanding of a specialized area or topic in human resources management

HRER 499 Special Topics in Human Resources and Employment Relations (3 Credit Hours)
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

HRER 500 Special Topics in Human Resources and Employment Relations (3 Credit Hours)
This course engages students in a chosen special topic in Human Resources and Employment Relations.
Outcomes:
In-depth understanding of a special topic in the area of Human Resources and Employment Relations

HRER 501 Performance Management (3 Credit Hours)
Designed to provide both current and future managers an in-depth understanding of performance appraisals and related issues, this course also emphasizes goal-setting, feedback, and the rating process.
Outcomes:
Students will learn to apply the various techniques used to conduct effective performance appraisal processes and design comprehensive performance management systems for their organizations

HRER 501E Performance Management (1.5 Credit Hours)
Examines the manner in which managers can assess the performance of their subordinates and provide feedback designed to maximize their performance and organizational effectiveness.

HRER 502 Global Employment Relations (3 Credit Hours)
This course introduces students to different employment relations systems in advanced industrial economies in North America, Europe, and Asia and to formats for resolving new types of labor problems that have emerged in a global economy.
Outcomes:
Students will be able to identify critical differentiating aspects of employment relations systems in the developed world and common pro and con arguments regarding proposed solutions to substandard working conditions in the developing world

HRER 511E Conflict Management and Negotiation (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Students participate in hands-on exercises designed to increase their knowledge of conflict resolution and negotiation techniques.
Course equivalencies: MGMT 605E/HRER 511E

HRER 513E Strategic Human Resource Management (1.5 Credit Hours)
As a leader or manager, it is your job to find the right people, engage and motivate them, and structure and operate the organization in a way that enables and inspires people to perform at their best; preserving the organization's financial health and protecting it from legal risks. This course focuses on how best to accomplish this. Enrollment limited to EMBA Cohort.
Outcomes:
Understand the role of HR in the successful execution of business strategy; Understand the importance of fit-driven strategic hiring; Understand the basic tactics of distributive and integrative bargaining

HRER 600E Performance Management (1.5 Credit Hours)
Examines the manner in which managers can assess the performance of their subordinates and provide feedback designed to maximize their performance and organizational effectiveness.

Human Services (HMSV)

Discover, search, courses (p. 2661)!

HMSV 101 Survey of Human Services (3 Credit Hours)
Survey of Human Services will cover basic concepts and models of service delivery in the field. Primary emphasis will be on the growth and evolution of the field, types of services and needy populations, and issues that affect the delivery of human services in the United States.
Interdisciplinary Option: Human Services

HMSV 201 Human Services Practice (3 Credit Hours)
The purpose of this course is to prepare students for their future work in HMSV agencies and to introduce them to HMSV clients. The course will teach students about the basic issues that face HMSV providers and will help them put a human face on HMSV clients. In addition, the course will emphasize the importance of client diversity in formulating assessment and case management strategies for HMSV clients.
Interdisciplinary Option: Human Services
This course satisfies the Engaged Learning requirement.

HMSV 390 Supervised Fieldwork II (6 Credit Hours)
No course description is available
Interdisciplinary Option: Human Services
This course satisfies the Engaged Learning requirement.

Infectious Disease and Immunology (IDIM)

Discover, search, courses (p. 2661)!

IDIM 400 Infections and Immunology (3 Credit Hours)
IDIM 400 integrates basic knowledge of infectious microorganisms with an understanding of innate and adaptive immune systems that react against them. Following a review of infections caused by specific infectious organisms, IDIM 400 will focus on specific aspects of immune systems and how they interact to remove these infectious microorganisms.
Outcomes:
1) Explain the cellular basis of immune development; 2) Differentiate between the mechanisms of activation of immune systems; 3) Analyze the mechanisms involved in combating bacterial and viral infections

IDIM 401 Conceptual Bases of Infectious Diseases (2 Credit Hours)
IDIM 401 integrates a basic science understanding of microorganisms with an understanding of their role in human health. Following a review of bacterial physiology and gene expression, the focus will be on bacterial disease, including basic strategies used to cause disease and details of pathogenesis by medically important bacterial pathogens.
Outcomes:
1) Describe differences between bacteria and eukaryotes; 2) Understand mechanisms by which bacteria cause disease; 3) Understand limitations of current antimicrobial therapies; 4) Differentiate between similar diseases with different causes

IDIM 403 Parasitology and Virology (2 Credit Hours)
Pre-requisites: IDIM 400
The Parasitology and Virology course IDIM 403 is designed to describe infections caused by microorganisms and animal diseases transmissible to man, with a primary focus on parasites and viruses. We will emphasize the pathophysiology of these diseases in humans of various ages. This course will promote an understanding of how the properties of certain infectious agents can in some cases avoid an adequate immune response.
Outcomes:
1) Explain the mechanisms of pathogenicity of various infectious agents; 2) Analyze the mechanisms by which emerging viruses arise; 3) Apply knowledge to viral vaccine development

IDIM 418 Presentation skills (1 Credit Hour)
Scientists must communicate their work in numerous venues, from giving oral presentations in seminars and conferences to writing papers and grant proposals. This course is designed to train students in the design and delivery of effective oral presentations, a skill that can be readily adapted to serve as a starting point for written communications.
Course equivalencies: IDIM418/BMSC418
Outcomes:
1) Identify elements of an effective oral presentation; 2) Deliver an effective oral presentation; 3) Judge the effectiveness of oral presentations

IDIM 492 Research (1-8 Credit Hours)
A major component of the M.S. degree in Infectious Disease and Immunology is the successful completion of a research project integrating basic and clinical science. IDIM 492 is designed to give credit for the research efforts that will result in the Master's thesis.

IDIM 501 Seminar (1 Credit Hour)
IDIM 501 is designed to help students stay abreast of current topics in infectious disease and immunology. Students will attend weekly seminars and are encouraged to interact with invited seminar speakers by asking questions and contributing to group discussions. Upon completion students will have enhanced their understanding of current research.
Outcomes:
1) Describe the results or conclusions from a given seminar presentation; 2) Understand how research is advancing knowledge in a given field covered by a representative seminar; 3) Question new data or their interpretation

IDIM 502 Special Topics in Infectious Disease and Immunology (0-5 Credit Hours)
IDIM is designed to immerse students in current literature, with new topics chosen each year. Students will read the primary literature and participate in discussion sessions. The course will enhance the ability of the student to critically read and interpret scientific literature in infectious disease and immunology.
Outcomes:
1) Critically read and discuss scientific literature in the area covered by the course; 2) Discuss experimental approaches, their limitations, and the conclusions that can be drawn from observed results

IDIM 595 Thesis Supervision (1 Credit Hour)
A major component of the M.S. degree in Infectious Disease and Immunology is the successful completion of a research project integrating basic and clinical science. This course is similar to IDIM 492, except that students are expected to perform at an advanced level in all aspects.
Outcomes:
Understand the significance and clearly communicate the research problem; Describe the approaches used and results obtained; Draw conclusions and identify future directions

Information Systems - Bus (INFS)

Discover, search, courses (p. 2661)!

INFS 247 Business Information Systems (3 Credit Hours)
Focuses on using information technology to support business processes. The purpose and composition of information systems, the utilization of technology and hands-on experience in developing microcomputer business applications with productivity tools (Microsoft Excel and Access).
Course equivalencies: INFS247/ISOM/MGSC247/ACINF247
Outcomes:
Understanding of using information technology to support business processes, and of developing business spreadsheet and database applications

INFS 247H Business Information Systems - Honors (3 Credit Hours)
Pre-requisites: Restricted to students in the School of Business Honors program
Focuses on using information technology to support business processes. The purpose and composition of information systems, the utilization of technology, and hands-on experience in developing microcomputer business applications with productivity tools (Microsoft Excel and Access).
Course equivalencies: INFS247/ISOM/MGSC247/ACINF247
Outcomes:
Understanding of using information technology to support business processes and of developing business spreadsheet and database applications

INFS 336 Global Perspectives on Digital Business (3 Credit Hours)
Pre-requisites: Minimum grade of "C-" in INFS 247
This course will present topics related to managing information systems projects and digital business from a global perspective. Project management issues such as analyzing stakeholders, defining expectations, defining project deliverables, analyzing scope, collecting requirements, developing schedules, and mitigating risk, will be covered. Also, variety of digital business issues, such as digital business models, disruptive forces, and digital strategies will be covered from a global perspective.
Outcomes:
Understanding of concepts and steps related management of digital business project in a global environment; Understanding of general and global digital business concepts and issues

INFS 343 Business Analytics (3 Credit Hours)
Pre-requisites: Sophomore standing; C- or better in (ISSCM 241 or ISSCM 241H or STAT 103), (INFS 247 or INFS 247H), and one of the following: MATH 110, MATH 118, MATH 130, MATH 131, or MATH 161
This course covers basic principles in data modelling, and turning big data into intelligent actionable insights. Through the use of real business case studies and lab sessions students will develop a comprehensive, innovative and practical approach to data analytics that enables them to solve diverse and complex business problems.
Course equivalencies: BSAD343/BSAD343H
Outcomes:
Explain core design concepts, appraise various technological solutions, determine proper analytics methods, integrate data visualization, and make a compelling presentation of a novel use case depicting current market trends

INFS 343H Business Analytics - Honors (3 Credit Hours)
Pre-requisites: Open to students in the Quinlan Honors Program; Requires C- or better in ISSCM 241H or ISSCM 241 or STAT 103, INFS 247 or INFS 247H, and one of the following: MATH 110, MATH 118, MATH 130, MATH 131, or MATH 161
This course covers basic principles in data modeling, and turning big data into intelligent actionable insights. Through the use of real business case studies and lab sessions students will develop a comprehensive, innovative and practical approach to data analytics that enables them to solve diverse and complex business problems.
Course equivalencies: BSAD343/BSAD343H
Outcomes:
Explain core design concepts, appraise various technological solutions, determine proper analytics methods, integrate data visualization, and make a compelling presentation of a novel use case depicting current market trends

INFS 346 Database & Data Warehousing Systems (3 Credit Hours)
Pre-requisites: Sophomore Standing, minimum grade of "C-" in INFS/ISSCM 247
Covers current concepts in database theory and use. The course teaches design, implementation, and utilization of relational database management systems by covering the processes, tools, and methodologies such as business requirement collection, ER modeling, relational modeling, normalization, SQL, and MS Access.
Course equivalencies: ISOM346 / MGSC346
Outcomes:
Students will be able to demonstrate understanding of how to effectively develop and use business database system

INFS 347 Systems Analysis & Design (3 Credit Hours)
Pre-requisites: Sophomore Standing, minimum grade of "C-" in INFS 247
This course studies methods for analyzing, developing and implementing business information systems. Stages of the systems development life cycle are explored in depth. Tools and techniques for structured and object-oriented analysis and design are discussed.
Outcomes:
Understanding of the development and implementation of business information systems

INFS 348 Advanced Data Analytics and AI (3 Credit Hours)
Pre-requisites: Minimum grade of C- in INFS 346 and INFS 343
This course focuses on extracting insights from complex datasets and progresses from data mining and R principles to data transformation and data mining techniques. Using deep learning and large language models, it addresses challenges in AI analytics, emphasizing ensemble learning techniques, model evaluation, and the handling of big data.
Course equivalencies: ISOM348 / MGSC348
Outcomes:
To be able to effectively use technologies such as Hadoop (Map Reduce) & R for solving data-dependent business problems of varying levels of complexity

INFS 360 Data Visualization & Business Intelligence (3 Credit Hours)
Pre-requisites: Minimum grade of "C-" in INFS 346
The amount of data that our world generates is growing at a torrid pace. Sifting through & making sense of these humongous mountains of data is crucial to ensuring business growth, success and to making scientific discoveries & advancements. Data visualization plays an important role in this process.
Outcomes:
Students will be able to process & visualize large amounts of data in order to enable efficient & effective analysis using industry standard software

INFS 362 User Experience (UX) and Biometrics (3 Credit Hours)
This experiential and research-focused course explores the newest developments in the field of user experience (UX) & biometrics (e.g., collecting and analyzing human behavior data through eye tracking, galvanic skin response, facial expression, voice, and brain activity) and introduces various methods used in cutting-edge research laboratories to study human insight in business contexts. Theoretical UX concepts and practical skills in biometric data collection and analysis will be explored using the latest academic research and hands-on work with biometric hardware, software, and data. Students will complete and present the original human subject research project (team-based and with IRB approval) using biometric trackers and biosensors. The research project will be documented in the format of a full academic article.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to communicate the value of User Experience in design; Describe the value of human insights through biometric data; Critically evaluate biometric data-focused research studies; Design and implement a biometric data-focused research study; Analyze and interpret human insights through fundamental biometric data such as gaze, facial expressions, and galvanic skin response; Develop proficiency in working with leading biometric trackers/biosensors and software platform; Write a complete empirical academic article using biometric data

INFS 394 Programming in Python (3 Credit Hours)
Pre-requisites: Junior standing and a minimum grade of C- in INFS 346
This course focuses on how to effectively use the Python computer programming language to support decision making in business. We will particularly focus on using Python for manipulating and analyzing data. In addition to covering the concepts of programming, this course covers working with external data, debugging code and developing user interfaces.
Outcomes:
To learn how to develop computer programs in the Python programming language; To understand the process of debugging code to resolve errors; To read data from external files including from an external database using embedded SQL within Python code

INFS 395 Independent Study in Information Systems (1-3 Credit Hours)
Independent study is in-depth research or reading, initiated by the student and jointly developed with a faculty member in a specialized area of Information Systems not otherwise covered by departmental course offerings. Variable Credit. May count for Information Systems major or minor. Permission of Assistant Dean required.

INFS 397 VBA Programming with MS Office (3 Credit Hours)
Pre-requisites: Junior Standing, minimum grade of "C-" in INFS 346
This course focuses on how to effectively use Microsoft Office's built-in programming language, Visual Basic for Applications (VBA), to build models, primarily in Excel. We will cover issues that facilitate the construction of robust and readily understandable models in the VBA language. Starting with basic modeling functions, the course will progress through complex modeling skills. This course assumes that you are familiar with Basic Excel operations.
Outcomes:
By the end of this course, the student should be able to: build models using Excel built-in functions, build, customize and store Excel macros, design and build accurate, robust models with VBA, build custom VBA procedures, and create user-defined financial functions in VBA

INFS 399 Special Topics in Information Systems (1-3 Credit Hours)
Special topics are scheduled classes offered on an ad hoc basis. Specific titles, prerequisites and content will vary.

INFS 400 Quantitative Methods (0 Credit Hours)
Introduces the non-math-oriented student to the use of mathematical modeling in business. This course begins with a review of topics from algebra, then covers concepts in calculus and applies them to the solving of business problems.
Outcomes:
Students will be able to apply algebraic, calculus, and optimization techniques to model and solve common business decision problems; Students will demonstrate proficiency in evaluating and interpreting functions - including linear, quadratic, exponential, logarithmic, and multivariable functions - to support data-driven managerial decisions

INFS 400C Quantitative Methods (0 Credit Hours)
Pre-requisites: Restricted to students in the Health Care Management MBA Program
Introduces the non-math-oriented student to the use of mathematical modeling in business. This course begins with a review of topics from algebra, then covers concepts in calculus and applies them to the solving of business problems.
Outcomes:
Students will be able to apply algebraic, calculus, and optimization techniques to model and solve common business decision problems; Students will demonstrate proficiency in evaluating and interpreting function, including linear, quadratic, exponential, logarithmic, and multivariable functions, to support data-driven managerial decisions

INFS 400E Quantitative Methods (1.5 Credit Hours)
Quantitative Methods is restricted to students enrolled in the Executive MBA or the Health Care Management MBA programs.
Outcomes:
Students will be able to apply algebraic, calculus, and optimization techniques to model and solve common business decision problems; Students will demonstrate proficiency in evaluating and interpreting functions - including linear, quadratic, exponential, logarithmic, and multivariable functions - to support data-driven managerial decisions

INFS 400N Quantitative Methods I (0 Credit Hours)
Introduces the non-math-oriented student to the use of mathematical modeling in business. This course begins with a review of topics from algebra, then covers concepts in calculus and applies them to the solving of business problems.
Outcomes:
Students will be able to apply algebraic, calculus, and optimization techniques to models and solve common business decision problems; Students will demonstrate proficiency in evaluating and interpreting functions - including linear, quadratic, exponential, logarithmic, and multivariable functions - to support data-driven managerial decisions

INFS 402N Quantitative Methods II - Statistics Primer (0 Credit Hours)
The fundamentals of managerial statistics are presented. Topics include descriptive statistics, regression, and correlation analysis.
Outcomes:
Students will be able to apply foundational statistical concepts - including descriptive statistics, normal distribution, the central limit theorem, and estimation - to summarize data and make evidence based managerial inferences; Students will be able to formulate and evaluate statistical models - such as hypothesis tests and simple/multiple regression - to support decision-making in business contexts

INFS 443 Business Analytics (3 Credit Hours)
Business analytics is the practice of using systematically collected data to support decision-making in business contexts. The goal of this course is to introduce students to the contemporary approaches, tools, and techniques used in business analytics. Because many concepts in this field are best learned through hands-on experience, the course emphasizes obtaining, processing, analyzing, and visualizing data drawn from a variety of business cases. Students will use a modern analytics language widely adopted by data scientists to perform these tasks. Throughout the course, students will develop practical analytic skills and strengthen their ability to generate meaningful business insights through data-driven analysis.
Outcomes:
Explain the key factors differentiating business intelligence from business analytics; Frame a problem in a business analytics context to drive insightful decisions and gain the competitive edge

INFS 484B Project Management (1.5 Credit Hours)
Pre-requisites: Completion of two introductory business courses (ACCT 400, MARK 460, FINC 450, ECON 420, SCMG 480)
The art and science of project management as applied to a variety of business and technical projects in commercial, public, and private sectors. Covers: project life cycle and methodology; teambuilding; project organization, stakeholders, and leadership; proposals and contracts; techniques for project planning, estimating, scheduling, and control; PMO.
Outcomes:
Understanding of the broader role of the project manager with regard to all project stakeholders, and of methods, tools, and procedures for initiating, defining, and executing projects

INFS 484E Project Management (3 Credit Hours)
Explores the art and science of project management and systems development, as applied to a variety of large and small project situations in commercial, public, and private sectors.
Course equivalencies: OPMG601E/ISOM484E
Outcomes:
Students will be able to communicate the value of project management to their staff and peers; Students will be able to describe the roles of the project manager, sponsor, and key stakeholders; Students will be able to coach project managers on the key project management responsibilities; Students will be able to manage a process for identifying, analyzing, and prioritizing a portfolio of projects; Students will be able to identify, engage, and partner with sponsors and key stakeholders; Students will be able to create a culture of project transparency and collaboration; Students will be able to provide project oversight by validating plans and evaluating status

INFS 484N Project Management (3 Credit Hours)
Pre-requisites: Restricted to Graduate School of Business students
Project management is the art, craft, and occasional science of being intentional and systematic about transforming ideas into practice and realizing organizational value. We explore how to design and sequence tasks and deliverables, obtain resources, and manage to deadlines and value.
Outcomes:
Identify project management opportunities; Design executable project plans; Recognize and address risks that arise during execution

INFS 490E Fundamentals of AI for Business (3 Credit Hours)
This course provides a comprehensive overview of Artificial Intelligence (AI) designed for Executive MBA (EMBA) students who are mid-level to senior-level professionals. Students will explore foundational AI concepts, strategic and organizational use cases, and ethical implications through the lens of executive leadership. Emphasis is placed on real-world application, critical analysis, and experiential learning, with a focus on how AI supports enterprise-level decision-making, cross-functional leadership, and long-term competitive advantage.
Outcomes:
Define and explain core AI concepts and terminology; Critically evaluate AI trends, tools, and applications in business strategy; Develop AI integration plans for real-world organizational challenges

INFS 491 Managerial Statistics with Artificial Intelligence (AI) (3 Credit Hours)
Pre-requisites: Graduate School of Business student
This course examines the integration of statistical methods with artificial intelligence (AI) techniques to analyze and interpret complex data. Students will study key statistical concepts, including descriptive statistics, random variables, probability distributions, estimation, hypothesis testing, regression, correlation analysis, and model building. AI-driven approaches will be introduced for various topics. Emphasis is placed on using statistical software and AI to facilitate data analysis and address real-world problems effectively.
Course equivalencies: ISOM491 / MGSC491
Outcomes:
Students will gain a high-level understanding of common statistical tools used in AI and machine learning algorithms and they will be able to derive conclusions from statistical studies; Students will be able to describe data using visual and numerical summaries, analyze and interpret data effectively, perform estimation and hypothesis testing, develop and evaluate statistical models such as regression, apply statistical software for data analysis, and present statistical findings and AI results clearly and accurately

INFS 491C Managerial Statistics (3 Credit Hours)
Pre-requisites: Restricted to students in the Health Care Management MBA Program
The fundamentals of managerial statistics are presented. Topics may include descriptive statistics, random variables, probability distributions, estimation, hypothesis testing, regression, and correlation analysis. Statistical software is used to assist in the analysis of these problems.
Outcomes:
Students will be able to demonstrate understanding of statistical thinking and data analysis technique for decision-making purposes

INFS 492 Database Systems (3 Credit Hours)
This course uses database systems as the focus for studying concepts of data modeling and data manipulation. Procedures for creating, managing, sorting, and processing data are discussed. Concepts of relational database methods are covered as well as the issues that arise in managing information in a database and using it to support business processes.
Course equivalencies: ISOM492 / MGSC492
Outcomes:
Understanding the development and use of business database systems

INFS 492E Business Intelligence/Data Warehousing (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Explores concepts of data warehousing and business intelligence from a managerial perspective.
Course equivalencies: INFS600E/INFS492E

INFS 493 Database Analytics (3 Credit Hours)
Pre-requisites: INFS 492 This course focuses on practical methods for in-database data preparation and manipulation to extract analytical insights out of a large or big data repository
The concept of big data, distributed computing frameworks, and massively parallel processing databases are also covered. Students will become proficient using open source databases, performing extensive advanced SQL programming, writing scripts and manipulating strings, numbers, data, etc. within a database.
Outcomes:
Implement Advanced Data Queries: Conduct advanced searches, hierarchical queries, and implement range-based filtering to address complex data analysis requirements; Master Advanced SQL Techniques: Develop expertise in advanced SQL programming, including \\nstring manipulation, numerical calculations, date handling, and metadata queries; Analyze and Prepare Data for AI: Utilize in-database data preparation techniques to transform raw data into actionable insights, a critical step for AI model development and implementation

INFS 493E Strategic Use of Information Technology (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Focuses on the use of information technology for competitive advantage, including the management of information as a corporate resource, and information systems planning and its relationship to corporate planning.
Course equivalencies: ISOM601E / INFS601E/INFS493E

INFS 494 Applied Data Mining and Artificial Intelligence (AI) (3 Credit Hours)
Data Mining involves the search for patterns in large quantities of data using techniques such as clustering, decision trees, neural networks, and association analysis. Machine learning, the process of using mathematical models of data to help a computer learn without direct instruction, an important application of artificial intelligence (AI), is also introduced.
Outcomes:
The student will be able to build models using an industry-standard package and interpret the results; The student will be able to use AI-enabled tools to discover and extract implicit but potentially useful information from data

INFS 495 Forecasting Methods with Artificial Intelligence (AI) (3 Credit Hours)
Pre-requisites: INFS 402N or INFS 491
Restricted to Graduate School of Business students. Techniques of forecasting and model building are introduced. Methods covered are simple and multiple regression, introduction to time series components, exponential smoothing algorithms, and AIRMA models - Box Jenkins techniques. Business cases are demonstrated and solved using the computer.
Outcomes:
Students will be able to forecast business and economic variables to enhance business decisions; Students will learn how AI enhances forecasting techniques by uncovering complex patterns, automating model optimization, and improving forecast accuracy; Students will be equipped with the skills to create advanced, AI-augmented forecasting models, making them invaluable assets in data-driven decision-making environments

INFS 496 Systems Analysis and Design (3 Credit Hours)
Provides a core set of skills for planning, managing, and executing systems analysis and design processes in e-business and Web-based environments. Topics typically include project initiation and planning, methods used in the determination of information requirements, prototyping, techniques used in systems design, testing, and implementation strategies.
Outcomes:
Understanding of the development and implementation of business information systems

INFS 499 Independent Study (3 Credit Hours)
Independent study is in-depth research or reading, initiated by the student and jointly developed with a faculty member, into a specialized area of information systems not otherwise covered by department course offerings.

INFS 590 Global Strategy and Data (3 Credit Hours)
This course introduces the student to economic and business practices of a foreign country using the analysis of data and on-site experiences. We will focus on business strategies, impediments, and challenges in light of the culture, politics, history, and institutions of a selected country. We will interact with a variety of local people, such as small business owners, firm managers, economists, journalists, and students, in order to inform our understanding and analysis.
Outcomes:
Students will gain knowledge and analytical skills that can assist them in facing the challenges of conducting business in global locations

INFS 592 Data Visualization (3 Credit Hours)
Co-requisites: INFS 492
The amount of data that our world generates is growing at a torrid pace. Sifting through and making sense of these humongous mountains of data is crucial to ensuring business growth, success and to making scientific discoveries and advancements. Data visualization plays an important role in this process.
Outcomes:
Students will be able to process and visualize large amounts of data in order to enable efficient and effective analysis using industry standard software

INFS 595B Decision Strategy Critical Thinking & Decision Analysis (3 Credit Hours)
Making good decisions in the face of uncertainty and risk is at the heart of successful management. This course provides a coherent set of critical thinking and decision analysis tools that are used to carve out well-structured decision models from ill-structured real-life problems and perform analyses to generate insights.
Outcomes:
The course introduces students to a variety of tools that will improve their critical reasoning skills and ultimately the ability to make effective decisions

INFS 596B Data-Driven Decision Making (3 Credit Hours)
Perhaps one of the biggest challenges facing organizations is bridging the gap between those who have technical expertise in information systems and those who are managerial decision makers. This course builds on the decision strategy course to help address that challenge.
Course equivalencies: INFS596N/ISSCM596B
Outcomes:
Understand the sources and limitations of data; Understand how databases organize data sets and the use of SQL to extract data; Increase facility with spreadsheets; Expose students to the issues that arise between those who provide data and those who use data to make business decisions

INFS 596N Data Driven Decision Making (3 Credit Hours)
Pre-requisites: Restricted to Graduate School of Business students
Perhaps one of the biggest challenges facing organizations is bridging the gap between those who have technical expertise in information systems and those who are managerial decision makers. This course builds on the decision strategy course to help address that challenge.
Course equivalencies: INFS596N/ISSCM596B
Outcomes:
Understand the sources and limitations of data; Understand how databases organize data sets and the use of SQL to extract data; Increase facility with spreadsheets; Expose students to the issues that arise between those who provide data and those who use data to make business decisions

INFS 600E Business Intelligence & Data Warehousing (1.5 Credit Hours)
Explores concepts of data warehousing and business intelligence from a managerial perspective.
Course equivalencies: INFS600E/INFS492E

INFS 604E Business Data Analytics - Infrastructure (1.5 Credit Hours)
The course covers concepts related to data organizing and database modeling, and the managerial issues related to the design, implementation, and utilization of systems that support operational data use and provide infrastructure for business data analytics. Enrollment limited to EMBA Cohort.
Outcomes:
Students will learn how to gather, understand, manage, and act on information stored in databases, data warehouses, and Big Data repositories

INFS 605E Business Data Analytics - Application (1.5 Credit Hours)
The course covers the effective uses and applications of data analytics; including On-Line Analytic Processing/Business Intelligence, data mining techniques and their particular applications and data visualizations methods and tools. Enrollment limited to EMBA Cohort.
Outcomes:
Students will learn how business data analytics is applied to create competitive edge and business opportunities and how to understand and manage business data analytics applications projects

INFS 691 Principles of Analytic Programming (3 Credit Hours)
Pre-requisites: INFS 443
This course builds upon foundational knowledge from the Business Analytics course by advancing students' proficiency in analytic programming using a modern analytics language widely adopted by data scientists to perform these tasks. Students learn to manipulate and transform data into actionable insights, create advanced visualizations, write functions and control statements for repeatable analysis, build predictive and prescriptive models, and analyze unstructured text.
Outcomes:
Students will learn to clean, manipulate, transform, and visualize data; Students will be able to write control statements and functions for reproducible analysis as well as build predictive and prescriptive models; Students will use text mining and sentiment tools to analyze text data as well as apply simulation and probabilistic modeling to support business decisions

INFS 791 Programming for Business Decision Making (3 Credit Hours)
This course focuses on how to effectively use a computer programming language to support decision making in business. Examples include using Visual Basic for Applications (VBA) to create applications within Microsoft Excel or using Python for manipulating and analyzing data. In addition to covering the concepts of programming using the specified language, this course covers developing user interfaces, working with external data and debugging code. By the end of this course, the student will be able to build custom procedures and create user-defined functions in the programming language used.

INFS 795 Ethics and Data Analytics (3 Credit Hours)
The rapid advancement in technology necessitates an equally rapid advance in the ethics of data analytics. We will explore ethical questions in this field through the use of business case studies. We will also look at examples of ethical codes of conduct.
Outcomes:
Students will evaluate following ethical considerations: how data is collected, how it is interpreted, how it is applied, and with whom it is shared

INFS 796 Data Warehousing (3 Credit Hours)
Pre-requisites: INFS 492 Outcomes: Students will learn how data warehouses are used to help managers successfully gather, analyze, understand and act on information stored in data warehouses
The components and design issues related to data warehouses and business intelligence techniques for extracting meaningful information from data warehouses are emphasized. Oracle tools will be used to demonstrate design, implementation, and utilization issues.
Course equivalencies: X-ISOM796/MGSC796/CSIS796

INFS 797 Applications of Visualization (3 Credit Hours)
Students will explore human perception and cognition, the use of best design practices, and interacting/storytelling with data.
Outcomes:
This course will develop a vocabulary and framework for discussing, critiquing, assessing, and designing visual displays of quantitative data

INFS 798 AI Product Management (3 Credit Hours)
This 10-week intensive course aims at mastering the end-to-end process of discovering, designing, developing, delivering, and managing products in context to data, machine learning and artificial intelligence. The course concentrates on strategic thinking and tactical implementation of data driven products and provides skills needed to become a successful product manager.
Outcomes:
Apply product management principles to ideate and develop innovative AI tools and solutions; Utilize product management strategies to guide the development of AI tools that support data-driven decision-making; Prototype and validate AI solutions, using product management methodologies to efficiently design, test, and iterate AI prototypes for real-world applications

INFS 799 Special Topics in Information Systems (3 Credit Hours)
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

Information Systems and Supply Chain Management (ISSCM)

Discover, search, courses (p. 2661)!

ISSCM 241 Business Statistics (3 Credit Hours)
This course examines the steps and procedures required to solve problems in science, social science, and business where data are useful - from the definition of the managerial problems to the use of statistical analysis to address these problems.
Knowledge Area: Quantitative Knowledge
Course equivalencies: ISSCM/H/241/STAT103/ACST101/03
Outcomes:
Students will be able to demonstrate understanding of statistical thinking and data analysis technique for decision-making purposes

ISSCM 241H Business Statistics - Honors (3 Credit Hours)
Pre-requisites: Restricted to students in the School of Business Honors program
This course examines the steps and procedures required to solve problems in science, social science, and business where data are useful - from the definition of the managerial problems to the use of statistical analysis - to address these problems.
Course equivalencies: ISSCM/H/241/STAT103/ACST101/03
Outcomes:
Students will be able to demonstrate understanding of statistical thinking and data analysis technique for decision-making purposes

ISSCM 349 Project Management (3 Credit Hours)
Pre-requisites: Junior Standing; Grade of C- or higher in ACCT 201 & MGMT 201
The art and science of project management as applied to business, industrial, and public projects. Covers: the project life cycle; project teambuilding; techniques for planning, scheduling and controlling projects; project organizations; project leadership and stakeholders.
Course equivalencies: ISOM 349/ISOM 357/MGSC 349
Outcomes:
Understanding of the broader role of the project manager with regard to all project stakeholders, and of methods and steps for initiating, defining, and executing projects

ISSCM 393 Requirements Analysis and Communication (3 Credit Hours)
Pre-requisites: Junior Standing, minimum grade of "C-" or better in ISSCM 247
This course focuses on Information Systems requirements and related communication skills. Students will learn how to gather requirements for Information Systems from an organization's users and executives based on a general understanding of organizations and business goals. Students learn techniques of how to translate between organizational needs and requirements for systems and processes, and how to analyze, validate, and prioritize those requirements. A special focus of the course will be to improve business communication skills such as interviewing, listening, presenting and negotiating.
This course satisfies the Engaged Learning requirement.
Course equivalencies: ISOM393 / MGSC393

ISSCM 395 Independent Study in ISSCM (1-3 Credit Hours)
Pre-requisites: Junior Standing, Instructor and Dean permission
Independent study is in-depth research or reading, initiated by the student and jointly developed with a faculty member, into a specialized area of information Systems and Operations Management not otherwise covered by department course offerings. Variable credit. This course is for students who major in either Information Systems or Operations Management. Will count toward major requirements. Permission of Assistant Dean required.

ISSCM 399 Special Topics in ISSCM (1-3 Credit Hours)
Pre-requisites: Junior Standing
Special Topics are scheduled classes offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Course equivalencies: ISOM399 / MGSC399

ISSCM 486E Global Supply Chain Management (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Explores the current business revolution in global logistics and partnering by members of the supply chain to more effectively provide products and services to customers.
Course equivalencies: ISOM486E/OPMG602E

ISSCM 491E Data Analysis for Managers (3 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Provides an in-depth treatment of computer-based data analysis, including sampling, estimation, hypothesis testing, regression, and time-series models. The emphasis is on managerial applications and on letting the data tell the story.
Course equivalencies: ISOM 600E/ISOM491E

ISSCM 595 Decision Analysis (3 Credit Hours)
Pre-requisites: Restricted to School of Business graduate degree students
Making good decisions in face of uncertainty and risk is at the heart of successful management. This course provides a coherent set of critical thinking and decision analysis tools that are used to carve out well-structured decision models from ill-structured real-life problems and perform analyses to generate insights.
Outcomes:
The course introduces students to a variety of tools that will improve their critical reasoning skills and ultimately the ability to make effective decisions

ISSCM 799 Special Topics- Information Systems & Supply Chain Management (3 Credit Hours)
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Course equivalencies: ISOM799 / MGSC799
Outcomes:
Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

Institute of Paralegal Studies (PLST)

Discover, search, courses (p. 2661)!

PLST 331 Introduction to Paralegal Studies (2 Credit Hours)
Required of all students in their first session of study. An introduction to the function and sources of American law (including the U.S. Constitution), the American legal system, the civil litigation process, and legal practice, focusing on the role of the paralegal. Trends in the paralegal field, including regulation and career issues.
Outcomes:
Students will recognize typical paralegal responsibilities in various areas of legal practice and be aware of recent developments in the field, especially regulatory proposals affecting paralegals

PLST 332 Legal Research and Writing I (2 Credit Hours)
Required of all students. An introduction to the fundamentals of legal research, focusing on locating, analyzing and updating case law (court opinions). Practice in researching case law in hard copy and online, and in writing case briefs.
Outcomes:
Students will be able to use various reference books and online services (LEXIS and WESTLAW) to locate, analyze, and update case law, and will be able to write case briefs

PLST 333 Legal Research and Writing II (2 Credit Hours)
Pre-requisites: PLST 332
Required of all students. Further instruction in legal research skills, focusing on locating, analyzing and updating statutory and administrative law. Practice in researching statutory and administrative law in hard copy and online. Drafting routine legal correspondence.

PLST 334 Legal Analysis: Practical Applications (2 Credit Hours)
Pre-requisites: PLST 332 and PLST 333
This writing intensive course will provide extensive practice analyzing factual scenarios, summarizing and applying legal authority and developing written legal arguments. Drafts and rewrites are required.
Outcomes:
To demonstrate comprehension of legal texts of varying levels of complexity; To apply legal rules to factual situations to predict legal outcomes; To use typical legal analytical tools to develop solutions to legal issues; To write clear explanations of the process of analysis used to resolve legal issues

PLST 335 Legal Ethics (2 Credit Hours)
Pre-requisites: PLST 331
Required of all students. Ethical considerations in the practice of law that paralegals are likely to encounter, especially the unauthorized practice of law, client confidentiality and conflicts of interest. Review of ethical codes for attorneys and paralegals.

PLST 336 Corporate Topics for Litigation Paralegals (2 Credit Hours)
Required for the Litigation Practice Certificate. An introduction to the basic principles of agency law, contract law, and the forms of business organizations: sole proprietorships, partnerships (general, registered limited liability and limited), limited liability companies, and corporations.

PLST 339 Secured Transactions and Bankruptcy (2 Credit Hours)
Pre-requisites: PLST 336 or PLST 362; Required for the Corporate Practice Certificate (Water Tower Campus)
An introduction to transactions under Uniform Commercial Code Article 9 (Secured Transactions) and federal bankruptcy law, primarily as it applies to businesses.
Outcomes:
Students will be able to draft UCC forms to perfect security interests as well as bankruptcy forms

PLST 340 Civil Litigation I (2 Credit Hours)
Required for the Litigation Practice Certificate. An introduction to the civil litigation process in state (Illinois) and federal courts, and proceedings in administrative agencies generally, focusing on the initial phases. Instruction in client interviews and pre-litigation investigations, evidentiary issues, and practice in drafting pleadings initiating lawsuits and proceedings through pre-trial motion practice.
Outcomes:
Students will understand the structure and basic operations of these courts, and will be familiar with the rules of procedure governing civil litigation proceedings

PLST 341 Civil Litigation II (2 Credit Hours)
Pre-requisites: PLST 340
Required for the Litigation Practice Certificate. Further instruction in the litigation process, focusing on the discovery, trial, and post-trial stages. Topics include interrogatories, depositions, document production and inspection requests, other discovery tools, settlement negotiations, organization of case files, document control systems, trial preparation, trial procedure, and post-trial proceedings. Overview of alternative dispute resolution.
Outcomes:
Students will be able to conduct client interviews and pre-litigation investigations, and to draft the pleadings initiating lawsuits and proceeding through pre-trial motion practice

PLST 342 Litigation Technology & eDiscovery (2 Credit Hours)
Pre-requisites: PLST 340 and PLST 341; Previous completion of PLST 345 strongly recommended
Required for the Litigation Practice Certificate. Hands-on instruction in software programs (Relativity) commonly used for litigation support, including electronic court filing, eDiscovery, case management, document control and trial presentation.
Outcomes:
Students will be able to assist attorneys in preparing for and conducting trials

PLST 343 Real Estate Transactions I (2 Credit Hours)
Pre-requisites: PLST 336 or PLST 362
An introduction to the concepts of real estate ownership and real estate sales transactions. Practice in preparing standard documents required for real estate transactions: purchase/sale agreements, deeds and other closing documents, title insurance commitments and policies, and surveys.
Outcomes:
Students will be able to draft documents for basic real estate transactions and to assist attorneys in conducting real estate closings

PLST 344 Real Estate Transactions II (2 Credit Hours)
Pre-requisites: PLST 343
Further instruction in real estate transactions, examining issues that arise in all real estate transactions and especially the documentation and closing of these transactions. Commercial real estate leasing.
Outcomes:
Students will be able to prepare documents for these transactions, and to assist attorneys in conducting commercial real estate closings and other transactions

PLST 345 Law Office Computer Applications (2 Credit Hours)
Required of all students. Hands-on instruction in software programs commonly used in law offices: word processing (templates, redlining, tables), spreadsheets (financial data, charts and graphs), pdf management (creating and combining pdfs, creating a portfolio, redacting, adding security) and presentation graphics.
Outcomes:
Students will be proficient in the fundamentals of word processing (templates, redlining, tables), spreadsheets (financial data, charts and graphs), database management (organizing, sorting, and retrieving information), and presentation graphics

PLST 346 Advanced Litigation Technology (2 Credit Hours)
Pre-requisites: PLST 340, PLST 341, PLST 342
Additional instruction in online resources and software typically used in litigation support (e.g. Relativity).
Outcomes:
Students will prepared to use typical litigation resources and software at a basic to intermediate level

PLST 348 Advanced Online Research Skills (2 Credit Hours)
Pre-requisites: PLST 332
This course focuses on research strategies for paralegals and specifically develops skills in the area of online public database research. Students practice researching within publically available online resources in a wide variety of subject areas including court procedure and docketing, business entities, real property, criminal law, environmental compliance, etc. Multiple practical assignments as well as one main research assignment.
Outcomes:
Students will research and write memoranda in support of motions, and will be familiar with the mechanics of appellate court briefs

PLST 349 Torts (2 Credit Hours)
An introduction to civil tort liability, including the intentional torts, negligence, strict liability, and product liability. Role of the paralegal in personal injury litigation. Practice in client interviewing techniques. Basic factual investigation techniques.
Outcomes:
Students will be familiar with the paralegal's role in personal injury litigation from both the plaintiff's and defendant's viewpoints, including typical pleadings and other documents

PLST 350 Medical Malpractice (2 Credit Hours)
Negligence lawsuits brought against health care organizations and health care professionals, from both the plaintiff's and defendant's viewpoints. Illinois law and rules of procedure for medical malpractice cases. Practical skills for locating and organizing medical information.
Outcomes:
The student will be familiar with Illinois law and rules of procedure governing medical malpractice lawsuits and will be able to draft a malpractice complaint as well as locate and organize medical information

PLST 351 Intellectual Property: Patents and Trade Secrets (2 Credit Hours)
An introduction to the terminology, basic principles and documentation requirements of patent protection. Subject matter of patents, the concept of patentability, the patent application process and patent infringement litigation. Trade secret misappropriation.
Outcomes:
Students will be familiar with the concept of patentability, the patent application process (including preparation of basic forms and documents), and patent infringement litigation

PLST 352 Intellectual Property: Trademarks and Copyrights (2 Credit Hours)
An introduction to the terminology, basic principles and documentation requirements of trademark and copyright protection. Registration procedures and infringement disputes.
Outcomes:
Students will be familiar with registration procedures (including preparation of basic forms and documents) and infringement disputes

PLST 353 Securities Regulation (2 Credit Hours)
Pre-requisites: PLST 336 or PLST 362
Federal and state regulation of securities transactions. The stock market and the roles of brokers, specialists and underwriters. Requirements for public offerings of stock, notably the registration statement and prospectus, as well as the anti-fraud provisions.
Outcomes:
Students will be familiar with the requirements for public offerings of stock, notably the registration statement and prospectus, and will be able to complete basic forms required under these laws

PLST 355 Estates, Trusts & Wills (2 Credit Hours)
An introduction to basic principles of estate and trust administration. Practical aspects of administration of estates and trusts for the paralegal. Probate proceedings in Illinois, including the preparation of probate court pleadings, inventories, collection and valuation of assets, distribution of assets to beneficiaries, and accountings. Overview of tax considerations.
Outcomes:
Students will be familiar with wills and will be able to prepare the documents required to administer estates in Illinois

PLST 357 Family Law (2 Credit Hours)
An introduction to the laws governing family relationships, specifically the Illinois Marriage and Dissolution of Marriage Act and related statutes. Factual investigation, preparation of pleadings and other documents, court procedures, settlement agreements, and post-decree modifications. Brief overview of adoption and paternity proceedings.
Outcomes:
Students will be able to prepare pleadings, notices, settlement agreements, and other documents, and to assist the attorney in domestic relations court proceedings

PLST 358 Criminal Law and Litigation (2 Credit Hours)
An introduction to the purpose and scope of substantive criminal law, considering various crimes against persons and property, criminal liability and punishment, and defenses to crimes. Procedural topics, including court forms and pleadings commonly used in the Illinois criminal trial process.
Outcomes:
Students will be able to prepare court forms and pleadings commonly used in the criminal trial process, and to assist attorneys preparing for trial

PLST 359 Environmental Law (2 Credit Hours)
An introduction to federal environmental statutes regulating water quality, waste management and remediation of hazardous substances (Superfund). Issues leading to enforcement proceedings. Research strategies for this technical area.
Outcomes:
Students will be familiar with permit applications, enforcement proceedings, and research strategies for this technical area

PLST 360 Employment Law (2 Credit Hours)
An overview of the legal relationship between employers and employees, including the employment-at-will doctrine, employment contracts, federal and state anti-discrimination laws, and worker's compensation proceedings. Administrative procedures and trial court actions.
Outcomes:
Students will be familiar with federal and Illinois law regulating employment status, employment contracts, anti-discrimination claims, and worker's compensation, and will be able to assist attorneys in administrative agency proceedings and civil lawsuits

PLST 361 Immigration Law (2 Credit Hours)
An overview of U.S. immigration law with emphasis on the paralegal's role. History of immigration law and current policy considerations. Preparation of visa applications, admission and removal of immigrants and non-immigrants, citizenship and naturalization, and humanitarian relief. Document organization and preparation, working with clients, litigation assistance, legal research, and ethical dilemmas.
Outcomes:
Students will be able to prepare various visa applications

PLST 362 Business Organizations (2 Credit Hours)
Required for Corporate Practice Certificate (Water Tower Campus and Cuneo Cohort). This course focuses on the formation and operation of sole proprietorships, partnerships (general, limited, and limited liability), limited liability companies, and corporations. Preparation of standard forms and agreements will be emphasized. Due diligence procedures for mergers and acquisitions and other transactions will be covered.

PLST 363 Contract Administration & Analysis (2 Credit Hours)
Required for Corporate Practice Certificate (Water Tower Campus and Cuneo Cohort). This course focuses on both common-law and Uniform Commercial Code (UCC) Article 2 contracts. The elements of a valid contract will be studied, as well as standard contractual provisions and basic principles of contract interpretation. Students will work with several sample contracts: a confidentiality/nondisclosure agreement, a licensing agreement, and a general trade agreement.

PLST 364 Topics in Corporate Practice (2 Credit Hours)
Pre-requisites: PLST 362 Business Organizations
This course provides an overview of laws relating to business operations, including secured transactions (Uniform Commercial Code Article 9), federal bankruptcy law, and employment law. Compliance with various regulatory requirements will also be covered.

PLST 366 Litigation Topics for Corporate Paralegals (2 Credit Hours)
Required for Corporate Practice Certificate (Water Tower Campus and Cuneo Cohort). This course introduces the civil litigation process in state (Illinois) and federal courts, from the initial phases of pre-litigation investigations and pleadings through the discovery, trial, and post-trial phases. Technological innovations affecting civil litigation, such as electronic court filing and e-discovery procedures, will be given special emphasis.

PLST 368 Corporate Compliance Topics (2 Credit Hours)
Pre-requisites: PLST 362 or PLST 336
This course provides an overview of various regulatory provisions applicable to the financial services industry, including the Anti-Money Laundering (AML) and Business Continuity Plans (BCP) rules, the Foreign Corrupt Practices Act, and insider trading prohibitions. Compliance with the requirements of these laws will be the focus of the course.
Outcomes:
Students will learn practices and procedures to monitor and document compliance with these laws

PLST 369 Advanced Topics in American Law (3 Credit Hours)
Pre-requisites: CPST 200; Enrollment is limited to students in the BA in PLST degree program
This course will build on students' knowledge of the American legal system, examining the role of law in 21st century American society. The course will focus on the interpretation of selected portions of the U.S. Constitution and their effect on American life.
Outcomes:
Students will learn how the US Constitution governs the American legal system and protects individual rights

PLST 370 Advanced Legal Analysis & Writing I (3 Credit Hours)
Pre-requisites: UCWR 110; Enrollment is limited to students in the BA in PLST degree program
This course will provide students with extensive practice in reading and summarizing case law, with particular attention to the rationale for court decisions and the use of precedent, as well as statutory and administrative law. This course will focus on analysis rather than retrieval of legal reference sources.
Course equivalencies: PLST334/PLST370
Outcomes:
Students will learn how to prepare summaries of court decisions, statutes, and administrative regulations

PLST 371 Advanced Legal Analysis & Writing II (3 Credit Hours)
Pre-requisites: PLST 370; Enrollment is limited to students in the BA in PLST degree program
This course will focus on the interaction of case law, statutory law, and administrative law in resolving legal issues. Students will learn to develop legal arguments and write a legal memorandum.
Outcomes:
Students will learn how to use court decisions, statutes, and administrative regulations to develop legal arguments

PLST 395 Applied Paralegal Study (1 Credit Hour)
Pre-requisites: Director's permission required; this course is limited to students in the BA in Paralegal Studies program
This course will require students to explore a contemporary issue in the paralegal field or the practice of law generally. Students will be expected to participate in a minimum of two class meetings and several online activities, concluding with a presentation of their research.

PLST 398 Internship (2 Credit Hours)
Consent of Director and completion of 14-16 semester hours of study. Limited to student's last or second-last term of study. Practical experience (120 hours on site) for advanced students in applying paralegal skills within selected law firms, corporate law departments and governmental agencies. One mandatory class meeting, online journal, online discussions, and final paper. All internships are unpaid; only one internship may be completed for credit toward certificate.

PLST 399 Internship (3 Credit Hours)
Consent of Director and completion of 14-16 semester hours of study. Limited to student's last or second-last term of study. Practical experience (160 hours on site) for advanced students in applying paralegal skills within selected law firms, corporate law departments and governmental agencies. One mandatory class meeting, online journal, online discussions, and final paper. All internships are unpaid; only one internship may be completed for credit toward certificate.

Institute of Pastoral Studies (IPS)

Discover, search, courses (p. 2661)!

IPS 400 Introduction to Graduate and Professional Writing (0 Credit Hours)
Writing skills are essential for success in graduate study and work in a variety of professional and ministerial settings. This course covers the following topics: academic integrity, grammar, research skills, citation, writing organization, thesis construction and critical thinking. Restricted to Institute of Pastoral Studies students
Outcomes:
Students will enhance their writing skills and develop analytical and communication skills that are critical to academic and professional writing

IPS 402 Church and Mission (3 Credit Hours)
Pre-requisites: IPS 570
In the 21st century the Church is a concept best understood within a global context. We will explore the biblical and apostolic concept of Church progressing through Vatican II. We will also examine the four marks of the Church from both historical and contemporary perspectives.
Course equivalencies: X -IPS 402/ BEHL 501
Outcomes:
Articulate a vision of Church, evaluate and critique different ecclesiologies, and understand the development and structure of the Church from biblical times through Vatican II to contemporary times

IPS 403 Spiritual Paths in World Religions (3 Credit Hours)
This course explores the spirituality, theology, and practice of the major religious traditions. You will encounter other faith traditions by entering into their sacred prayer and worship experiences and learning from practitioners of that tradition how they encounter the sacred in their own lives.
Course equivalencies: X -IPS 403/BEHL 504
Outcomes:
Recognize the vast complexity of every religious tradition, resisting the urge to oversimplify; Engage those who practice other traditions in conversation; Experience the spiritual practice of other religious traditions

IPS 404 Theologies of Suffering (3 Credit Hours)
This course focuses on theologies of suffering with written interaction and assignments, personal reflection on the theologies of suffering and substantive feedback. The readings include 1) Scriptural treatment of suffering (Psalms, Job, Lamentations); 2) Theologians on suffering (Moltmann, Schillebeeckx, Gutierrez, Hall); 3) From various perspectives (womanist, liberation theologians, pastoral care).
Outcomes:
Integrate unit reading and resources with contemporary experience, highlighting the key concepts and points made by the authors

IPS 416 Introduction to New Testament (3 Credit Hours)
This course serves as an introduction to and overview of the New Testament. Students explore the world of Jesus and his interpreters from both a historical and a biblical perspective and learn about the religious and cultural world of Palestinian Judaism during the Roman occupation.
Outcomes:
Gain insight into the socio-economic-political context, discover and utilize the tools of historical studies and textual criticism and to translate New Testament faith into their own contexts

IPS 417 Introduction to the Old Testament (3 Credit Hours)
This course is an introduction to the Old Testament, the sacred literature of Christians and Jews. We will examine texts from the Pentateuch, historical, prophetic, and wisdom books. In order to reconstruct the meaning of texts for their original audiences, we will employ methods of modern critical biblical scholarship.
Outcomes:
Understand key theological points, recognize historical realities that gave rise to texts, recognize the theological, sociological, historical critiques expressed by texts, and demonstrate awareness of modern approaches to understanding texts

IPS 420 Ignatian Spiritual Direction Practicum I (3 Credit Hours)
Pre-requisites: Restricted to IPS Spiritual Direction Students
The Ignatian Spiritual Direction Practicum is for those who have experienced the transformative effects of the spirituality of St. Ignatius of Loyola in the Spiritual Exercises and feel called to help others experience this quiet, abiding presence in their lives. Interns develop and deepen their capacity to listen contemplatively to the movements of God in the life and prayer of directees. This includes helping directees discern those movements, make large and small decisions in the light of those movements, and foster an intimacy with God.
Outcomes:
Upon completion of this course, students will be able to: Define and demonstrate spiritual direction in the Ignatian tradition; differentiating between direction, therapy, and pastoral counseling; Recognize key moments in directees, including touchstone moments, images of God and self, key facts of one¿s spiritual journey, and how discernment is operative; Understand and experience the importance of supervision for on-going formation of all spiritual directors; and Identify and implement healthy and appropriate boundaries in a direction relationship

IPS 421 Ignatian Spiritual Direction Practicum II (2 Credit Hours)
Pre-requisites: Restricted to Approved Ignatian Practicum Students
The Ignatian Spiritual Direction Practicum is for those who have experienced the transformative effects of the spirituality of St. Ignatius of Loyola in the Spiritual Exercises and feel called to help others experience this quiet, abiding presence in their lives. Interns develop and deepen their capacity to listen contemplatively to the movements of God in the life and prayer of directees. This includes helping directees discern those movements, make large and small decisions in the light of those movements, and foster an intimacy with God. - Attend to and integrate one¿s personal grief as a way of increasing capacity to direct those who are grieving. - Understand and be aware of resistance in directees and how to respond.
Outcomes:
- Define and demonstrate spiritual direction in the Ignatian tradition
- Integrate learning into directing those with marginalized identities, including people of color, women, members of the LGBTQ+ community, and the aging

IPS 424 Catholic Social Ethics & Migration (3 Credit Hours)
Pre-requisites: Restricted to Institute of Pastoral Studies students
Our pastoral work with migrants requires a theology and an ethic of solidarity that gives greater meaning to the Gospel and to the ecclesial experience through a culture of encounter. In this course, students will receive the opportunity to: (1) Discern the "signs of the times" by listening and putting words to the sufferings, realities and hopes of migrants; (2) Receive the tools for personal and community reflection on the phenomenon of migration and illuminate this reality through from an ethic of solidarity which can be expressed through acts of both charity (welcoming the stranger) and social justice (creating systemic change); (3) To become aware of the psychological, spiritual and social condition that makes the migrant an extremely vulnerable person and realize that our salvation depends on the treatment we give our neighbors (Mt 25:40); (4) To become aware of our status as social beings and the universal call to love through "The Theology of the Good Samaritan" as one of the key teachings of Pope Francis' new encyclical, Fratelli Tutti, which implies working towards creating change in structures to make resettlement easier legally and institutionally; (5) Reflect on the importance and centrality of accompaniment as Jesus' own style and the essential characteristic of his various aspects and challenges included in the pastoral act of accompanying migrants. Note: The course will incorporate a popular religiosity style as well as the personal experiences of students to embrace key topics that are at the very center of our Catholic Social Teaching.
Outcomes:
Explain the key principles of social ethics in the Catholic tradition, particularly as outlined in modern 20th and 21st-century Church documents; Develop a pastoral plan that integrates practical, methodological, and pastoral tools to systematically address the spiritual and social needs of migrants; Critically assess the social structures that hinder the development of migrants and propose ways to accompany and support their holistic growth through ministry

IPS 428 Introduction to Spirituality Praxis (3 Credit Hours)
Investigation of the ministry of spiritual direction/accompaniment in a Christian context. Understanding spiritual direction/accompaniment as a particular form of mentoring and teaching, the course helps students to become critically aware of and explicitly articulate their working spiritual theology.
Outcomes:
Understand the nature of the ministry of spiritual direction; Interpret primary sources on the theme of spiritual formation; Analyze their working spiritual theology and their potential to become spiritual directors

IPS 429 Essentials of Spiritual Direction (3 Credit Hours)
Pre-requisites: IPS 428
This course invites students to consider the practical conditions, requirements and main challenges of the ministry of spiritual direction/ accompaniment so as to further their discernment process and prepare them for the Contextual Education component of their program of study, where they will begin to serve as spiritual directors/companions.
Outcomes:
Identify relational dynamics operative in spiritual direction; Measure the significance of developmental, relational and social-cultural factors for spiritual direction; Employ open listening, questioning and verbatim accounts

IPS 430 Spiritual Direction Development and Practice (3 Credit Hours)
Pre-requisites: Restricted to IPS Spiritual Direction Students
This course is designed for those called to the ministry of spiritual direction in the Christian tradition. It is structured to enable students to clarify their own frames of reference, develop interpersonal skills specific to spiritual direction, and experientially and academically consider the purposes and nuances of spiritual direction. In-class lecture, discussion, and practice of spiritual direction will be incorporated into synchronous sessions.
Outcomes:
More deeply understand and articulate one¿s own spirituality and its influence in one¿s practice of spiritual direction; Identify and explain key components and considerations for the practice of spiritual direction; Engage in meaningful ways with doing spiritual direction with individuals from different identities, communities, and ideologies and how this impacts the practice of spiritual direction; and Demonstrate interpersonal maturity and active listening skills in the context of spiritual direction

IPS 433 Dorothy Day and Thomas Merton (3 Credit Hours)
Dorothy Day, Catholic Worker co-founder, and Thomas Merton, Trappist monk, were outstanding American Catholics. Their lives and teaching raise important questions concerning vocation and religious commitment, war and peace, contemplation and simplicity in modern life, Christian activism, racial justice, capitalism, women, laity, and, with Merton, Christianity's relationship to world religions.
Outcomes:
A critical appropriation of activist-and-contemplative Christian/Catholic Christian spirituality and theology as understood and practiced in the lives of two outstanding American Catholic Christians

IPS 434 Art and Spirit: The Sacred and the Secular (3 Credit Hours)
An introduction to the visual arts exploring various approaches to understanding art, art history, terminology, techniques, media, and motivating factors for creating art from secular and sacred perspectives. A secular art appreciation textbook will be used in conjunction with Sacred Art Learning Units including lectures, readings, museum visits, and discussions on art from the Catholic tradition and other perspectives.
Outcomes:
Students will gain an understanding of liturgical art and environment ministry; enriched sense of religious identity; understanding of basic components of secular and sacred visual art, art history, contemporary art, and the value of art

IPS 435 Spirituality and Same-Sex Orientation (3 Credit Hours)
Spirituality is the lived experience of faith. What is the lived experience of Christian faith of gay and lesbian persons? What are the classical and contemporary resources biblical, theological, scientific, psychological, spiritual and experiential by which gay Christians affirm a spiritual core from which they live their lives and faith?
Outcomes:
Demonstrated understanding of key elements by which gays and lesbians shape lives that are simultaneously faithful to the gospel of Christ, their religious tradition, and the truth of their sexuality

IPS 436 Prayer: Ongoing Path of Conversion (3 Credit Hours)
The course combines theory and practice. It presents prayer as an intimate means of ongoing conversion in the Christian life. Content includes the biblical, historical, and theological foundations of prayer, psychological factors, and the actual practice of various Christian meditative and contemplative practices (lectio divina, meditation, Ignatian contemplation, centering prayer).
Outcomes:
A demonstrated understanding of: the history of Christian prayer; growth and development models in prayer; biblical and theological foundations; the experience of 4 Christian and 1 non-Christian prayer form

IPS 440 The History of Israel (3 Credit Hours)
A study of the history of ancient Israel, with particular attention to the principal features of its religion and its historical evolution in the context of the ancient Near East. Students successfully completing this course can be expected to have achieved a deep level of understanding and of critical thinking with respect to the subject matter of the course.
Course equivalencies: IPS 440/THEO 404

IPS 441 The Pentateuch (3 Credit Hours)
An in-depth examination of the first five books of the Hebrew Bible and the Christian Old Testament , in their unity and discreetness, with a view to articulating the principal themes of the Pentateuch and the history of its composition. Students successfully completing this course can be expected to have achieved a deep level of understanding and of critical thinking with respect to the subject matter of the course.
Course equivalencies: IPS441/THEO 405

IPS 442 Prophetic Literature (3 Credit Hours)
This course examined the prophetic literature of ancient Israel, in its ancient historical context and as it can be illuminated by the contemporary sociological and anthropological perspectives. Standard historical critical methods will be used throughout.
Course equivalencies: IPS 442/THEO 418
Outcomes:
Students successfully completing this course can be expected to have achieved a deep level of understanding and of critical thinking with respect to the subject matter of this course

IPS 443 Wisdom Literature and Psalms (3 Credit Hours)
This course will study the Wisdom tradition and the Psalms of Israel. Formal critical analysis and history of tradition studies will be emphasized. The rich diversity of these parts of scripture will be a prime focus.
Course equivalencies: IPS 443/THEO419
Outcomes:
Students successfully completing this course can be expected to have achieved a deep level of understanding and of critical thinking with respect to the subject matter of the course

IPS 445 The Synoptic Gospels (3 Credit Hours)
Even though the course focuses on Matthew, there will be a continual comparison with the other two Synoptics and occasionally with John. By exegesis of the Gospel of Matthew and the study of its specificity among the gospels, it is hoped students will be able to connect their contemporary experience of Christian diversity to the experiences of the earliest followers of Jesus. Students successfully completing this course can be expected to have achieved a deep level of understanding and of critical thinking with respect to the subject matter of the course.
Course equivalencies: IPS 445/THEO 424

IPS 446 Luke-Acts and the New Testament Church (3 Credit Hours)
This course examines the material on the early church in the Gospel of Luke and the Acts of the Apostles from a historical and critical point of view. Emphasis will be placed on the theological perspective of the writer of Luke-Acts and on the relationship of that perspective to other early Christian writers (Mark, Matthew, and Paul).
Course equivalencies: IPS 446/THEO 425
Outcomes:
Students successfully completing this course can be expected to have achieved a deep level of understanding and of critical thinking with respect to the subject matter of the course

IPS 447 The Johannine Literature (3 Credit Hours)
The gospel of John has arguably exerted more influence on later Christian theology than any other gospel. Its unique Christology, possible anti-Judaism, the history of the Johannine community as reflected in the gospel, and the relation of the gospel to the Johannine epistles will be explored. Students successfully completing this course can be expected to have achieved a deep level of understanding and of critical thinking with respect to the subject matter of the course.
Course equivalencies: IPS 447/THEO426

IPS 448 St. Paul's Contribution to Christianity (3 Credit Hours)
This course looks to three goals: a careful understanding of Paul's thought, to be discovered through exacting analysis of often difficult Pauline passages; an attempt to formulate what is uniquely Pauline in the New Testament witnesses; and an awareness of how deeply Paul affected the formation of Christianity in its facets of spirituality, Christology, redemption, ecclesiology, worship, sacraments, sin, etc.
Course equivalencies: IPS 448/THEO 427
Outcomes:
Students successfully completing this course can be expected to have achieved a deep level of understanding and of critical thinking with respect to the subject matter of the course

IPS 449 The Person of Jesus in the New Testament (3 Credit Hours)
In this course attention will be given to the presentation of the meaning of Jesus Christ within the earliest Christian communities. Emphasis will be placed on both the variety and the development of early Christian attempts to understand the meaning of Jesus. In addition this variety and development will be placed in the context of early Judaism and Graeco-Roman religions.
Course equivalencies: IPS 449/THEO 429
Outcomes:
Students successfully completing this course can be expected to have achieved a deep level of understanding and of critical thinking with respect to the subject matter of the course

IPS 454 Ministry with Young People & Spirituality Today (3 Credit Hours)
Pre-requisites: Restricted to Institute of Pastoral Studies students
Students will explore the foundations for ministry with young people, including the essential components to accompany youth and young adults in developing their identity as missionary disciples. The class will explore Ignatian spirituality as a tool to answer the recurring questions and challenges that shape young people's search for meaning and purpose in life.
Outcomes:
Articulate the differences between Youth Ministry, Young Adult Ministry, and Pastoral Juvenil in relation to the cultural and societal shifts affecting young people today, including secularization and disaffiliation; Apply Ignatian spirituality as a tool for discernment and accompaniment in ministry, supporting young people on their spiritual journeys toward developing their identity as missionary disciples; Evaluate current ministry approaches and propose new strategies for engaging youth, young adults, and jóvenes in a multicultural, secularizing world

IPS 456 Administration and Entrepreneurship in a Pastoral Context (3 Credit Hours)
This course equips students with essential management and leadership skills tailored for pastoral and nonprofit settings. Topics include project financing, budgeting, fundraising, grant writing, safeguarding policies, team building, volunteer management, and meeting coordination. Emphasizing an entrepreneurial approach, students will explore innovative strategies for developing, executing, and sustaining pastoral projects and initiatives that meet community needs. The course fosters a balance between practical skills and visionary leadership, preparing students to manage resources effectively while fostering a mission-driven, entrepreneurial spirit within faith-based and nonprofit settings.
Outcomes:
Critically evaluate management and leadership approaches for pastoral and nonprofit initiatives using case-based analysis that accounts for financial, operational/logistical, safeguarding, and human-resource realities; Produce a strategic plan for a pastoral initiative that includes (a) a project scope and goals, (b) a budget, (c) a financing/fundraising or grant strategy, (d) a staffing/volunteer plan, and (e) an implementation timeline with basic success indicators; Facilitate effective team and volunteer coordination for a pastoral project by applying structured communication and conflict-management practices that support accountability, collaboration, and mission-aligned innovation

IPS 465 Psychology and Spirituality of Life Transitions (3 Credit Hours)
Course examines the dynamics of change, attachment, and loss, suffering and grief and the transition process of endings, empty spaces and new beginnings. Conscious and intentional living is recognized as the most precious gift to give to oneself, loved ones, and the world.
Outcomes:
Students will learn how to face and incorporate change with increased faith and hope; more fully understand the psychological and spiritual impact of change; recognize value and meaning in events of daily life

IPS 467 Introduction to Canon Law (3 Credit Hours)
This course introduces students to Canon Law, also known as church law, which is grounded in the theology and ecclesiology of the Catholic Church.
Outcomes:
General overview of canon law as needed for lay ecclesial ministry; basic understanding of canon law as a discipline; knowledge of canons as related to sacrament of marriage and sacraments of initiation

IPS 472 Pastoral Counseling in an Intercultural Context (3 Credit Hours)
This course invites students into a reflective, interactive, experiential process of exploring the place of culture, values, beliefs, and biases in the counseling context. Students examine their own cultural experiences, with special attention to power dynamics, even as they study the complex dynamics of other cultures.
Outcomes:
Deepen awareness of one's own cultural dynamics; develop an increased understanding of other cultures; consider strategies and interventions for sensitively meeting the needs of those encountered in pastoral counseling

IPS 473 Family Therapy and Personal Transformation (3 Credit Hours)
Family therapy is a unique way of working with individuals, couples and families. This course will examine the foundations of, and theory and practice of family therapy as expressed in five major schools. We will integrate psychological and theological dimensions throughout. The course will balance didactic input and experiential exercises.
Outcomes:
Demonstrated knowledge of application ability of family system theory, family therapy, and understanding of culture and other effects on family systems

IPS 474 Addictions & Modes of Therapy (3 Credit Hours)
Addictions are among the most pervasive and potentially destructive entrapments of the human condition. Their presence in manifold forms, underscores the importance of understanding the roots and sources of its patterns, in order to ultimately shape treatment and therapeutic strategies from a holistic and integrative point of view.
Outcomes:
Gain understanding of general addictive patterns/processes as they are discernible across addictions; Grapple with the roots, causes, and extent of addictions, from various viewpoints; Understand various treatment approaches

IPS 478 Couples Counseling (3 Credit Hours)
This course prepares clinicians to understand and work with couples in crisis by examining five therapy approaches. Marital development, premarital counseling, healthy marital functioning, sexuality, spirituality, physiology, enrichment and working with affairs will be addressed. Class built upon lecture, case study, video presentation, role play, small and large group processing.
Outcomes:
Working knowledge of marital health, conflict and role of affect; ability to assess family dynamics and prepare treatment plan; comfort level with couples

IPS 480 Mindfulness and Pastoral Ministry (3 Credit Hours)
Participants will examine: a) historical overview of mindfulness in Christian and certain Eastern religious traditions; b) integration of mindfulness in pastoral ministry; c) emerging neuroscience regarding mindfulness; and, d) clinical research on the effectiveness of mindfulness in promoting positive mental health.
Outcomes:
Participants will gain the ability to describe the benefits of mindfulness and how mindfulness can be integrated into personal life and utilized in professional and/or ministerial roles; be personally knowledgeable about the experience of developing mindful awareness

IPS 483 The Pastoral Care & Counseling of Men (3 Credit Hours)
This course explains what it means to be male and masculine in this time and culture. Psychological development, influence of culture, power, the Male Code, intimacy, emotions, sexuality, spirituality, and inner life will all be explored. Individual and group, clinical and educational approaches will be discussed.
Outcomes:
Appropriated gender-based approach to working with men; and acquired inquisitiveness to men's issues and upbringing

IPS 485 Religious Education, Evangelization & Cultures (3 Credit Hours)
Religious education, including catechesis, evangelization, religious instruction, and faith formation, occurs within cultural settings (e.g., urban/suburban/rural; secular/religious; settled/immigrant; ethnically diverse/uniform; Millennial/GenX/Boomer/Greatest generation). This course provides the tools to analyze a cultural context, identify barriers to ongoing conversion, and teach effectively for religious and spiritual growth. Understand the educational significance of cultural context; Develop ethnographic and contextual analytical skills; Analyze and evaluate themselves, curricula and others for cultural appropriateness; Create culturally sensitive learning events.
Outcomes:
Know basic catechesis

IPS 486 Principles of Religious Education (3 Credit Hours)
Religious education, including catechesis, evangelization, religious instruction, and faith formation, occurs in many contexts often targeted for a particular age or cultural group. This basic course in religious education reveals the theological and educational roots and introduces the basic elements and processes including assessment, backward design, curriculum and learning. Analyze learning contexts; Apply theories to real life contexts; Evaluate oneself, curricula, and others with standards; Create a lesson addressing a real-life teaching challenge.
Outcomes:
Know and understand basic catechesis

IPS 493 Health Care Integration Project Portfolio (0 Credit Hours)
Pre-requisites: This course must be taken in the last year of study after fulfilling the other requirements for the concentration including: 3 designated health care courses, 2 workshops, basic CPE and CPE residency; Focused on the Certification process, an Integration Project portfolio is required for completion of the Health Care Chaplaincy Concentration in the MA Pastoral Studies program; This 0 credit course seeks to assist in the process by providing supervision for the student Focused on the process for Board Certification. Health Care Integration Project portfolio is required for completion of the Health Care Chaplaincy Concentration in the MA Pastoral Studies program. This 0 credit course seeks to assist in the process by providing supervision for the student.
Outcomes:
Completed portfolio for Board Certification with the National Association of Catholic Chaplains or Association of Professional Chaplains

IPS 499 Guided Study (1-6 Credit Hours)
Topics will vary.

IPS 501 Advanced Human Relation Skills (3 Credit Hours)
Provides the skills needed for the interpersonal involvement essential in any helping relationship. Participants learn and practice the skills of communicating empathy and challenge to others as well as exploring and disclosing oneself. Learning consists of applying theory to the experience of relationships in small groups.
Outcomes:
Students will effectively use ten essential skills to communicate and connect in relationships; Students will practice these skills with one another to understand the effect of these skills on the receiver

IPS 502 Theology of the Developing Person (3 Credit Hours)
This course seeks to help the students think theologically about human personhood. It offers students a theological anthropology presented with developmental considerations in mind. It offers a theological dialogue partner for psychological perspectives on development.
Outcomes:
Students will form a more abiding and working connection between theology and human experience; Students will understand how pastoral and therapeutic practice is strengthened by theological awareness and supports therapeutic and caregiving relationships

IPS 503 Fundamentals of Pastoral Counseling (3 Credit Hours)
Pre-requisites: IPS 501 (minimum grade of C+)
This course focuses on the process and skills of pastoral counseling. Emphasis is on training in basic listening and influencing skills. Students practice selected strategies drawn from various approaches to counseling.
Outcomes:
At the conclusion of this course, students will be expected to demonstrate mastery of two classes of core counseling skills (listening and influencing), which they will practice in small peer groups under the supervision of the instructors

IPS 505 Group Counseling Approaches (3 Credit Hours)
This course introduces students to the theory and practice of group approaches to counseling and preventative, psychoeducation work. Group dynamics and leadership issues are explored. Students will design and lead a group of their choosing.
Outcomes:
From various approaches to structured and unstructured groups, students develop a design for a specific group in which they are interested and which they plan to use in their subsequent career

IPS 507 Pastoral, Psychodynamic Assessment and Intervention (3 Credit Hours)
This course offers students the opportunity to integrate theoretical insights with the practical issues of assessment, diagnosis and response strategies for individuals and families. Psychodynamic and theological models are used in this effort, as is a strong commitment to naming the pastoral dimensions of assessment and response.
Outcomes:
Gain awareness of how healing and renewal is strengthened therapeutically; Examine how prevailing cultural attitudes contribute to human distress and / or renewal

IPS 509 Psychopathology (3 Credit Hours)
Pre-requisites: IPS 517
Students will learn how to use the Diagnostic and Statistical Manual of Mental Disorders 5th Edition (DSM-5) for diagnosing various psychopathological disorders.
Outcomes:
Familiarity with the DSM-5; DSM-IV TR multi-axial system; examine the etiology, treatment, and prognosis of selected mental disorders; develop interviewing skills to identify psychopathology; integrate a pastoral dimension of dealing with persons suffering from psychopathology

IPS 511 Internship Supervision I (3 Credit Hours)
Internship Supervision/Practicum I intend to facilitate entrance into the clinical internship site. Students will obtain further development of theory and skills of pastoral counseling. The course will facilitate the integration of theory and praxis, psychological and theological, and the personal and professional dimensions of one's identity as a pastoral counselor.
Outcomes:
Demonstrate growing integration of pastoral counseling skills and psychological theory into practice; Develop knowledge and understanding of competencies and diverse perspectives needed by spiritually integrated and clinically informed pastoral counselors

IPS 512 Ethics, Pastoral Counseling, and Spirituality (3 Credit Hours)
This course introduces students to the richness and diversity of the Christian moral tradition, giving particular attention to the deep interconnections between spirituality and ethics. It also introduces students to the codes, procedures and theoretical underpinnings of professional ethics, essential for those pursuing vocations as pastoral counselors and spiritual directors.
Outcomes:
Articulate ethical methodologies, relationship between spirituality and ethics, knowledge of several professional codes, skills of assisting clients, awareness of personal ethical stances and their integration in counseling and spiritual direction

IPS 513 Internship Supervision II (3 Credit Hours)
Pre-requisites: IPS 511
Supervision II/Practicum intends to facilitate ongoing development of theory and skills of pastoral counseling. Students will facilitate the integration of theory and practice, psychological and theological, personal and professional dimensions of one's identity as a pastoral counselor. The course includes the completion of the clinical integration project.
Outcomes:
Demonstrate integration of pastoral counseling skills and psychological theory into practice; Consolidate knowledge and understanding of competencies and diverse perspectives needed for spiritually integrated counseling by pastoral counselors

IPS 515 Research Methods (3 Credit Hours)
This course familiarizes students with research methods quantitative and qualitative approaches, experimental research design, interview and survey methods, descriptive and analytical statistics and evaluative research.
Outcomes:
Increased knowledge of research methods and statistics; critically evaluate research literature; become familiar with current research in counseling and pastoral counseling; identify research topics of personal and professional interest

IPS 517 Models of Pastoral Counseling (3 Credit Hours)
Models act like paradigms that inform therapists about what is important to focus on in their clients and what is healing, restorative, and growth-inducing in therapy. Each says something about what normal and abnormal functioning looks like and how therapy helps a person move from unhealthy to healthy functioning.
Outcomes:
Become familiar with basic counseling theories; articulate key concepts, assumptions about human nature, therapist, client relationship, process and goals, techniques, as well as strengths and limitations of each approach

IPS 518 Career Counseling for the Pastoral Counselor (3 Credit Hours)
This course will shed light on the value of the career counseling process by integrating career counseling theory, career inventories case studies, experiential learning and class discussion.
Outcomes:
General understanding of major career development theories and their relevance to the counseling process; Utilize multiple career development exercises and job search strategies, including resume-writing and interviewing techniques

IPS 520 Testing, Measurement & Assessment (3 Credit Hours)
Pre-requisites: Completion of a minimum of 24 credit hours, including Models of Pastoral Counseling (517), Psychopathology (509), and Human Development (555)
The course is required for licensure but is not a prerequisite for other courses. This course will provide an understanding of the role of individual and group approaches to assessment and evaluation and its role in diagnosis, clinical intervention, and treatment planning. It will cover assessment of the various attributes of a person though standardized tests, and also include an overview of statistical procedures relevant to test standardization and interpretation. Students will gain first-hand exposure to specific tests and learn to read and evaluate such instruments.
Outcomes:
This course is being added to the MA PC curriculum in response to a new requirement in state licensure for master level counselors

IPS 530 Clinical Pastoral Care Registration (1 Credit Hour)
Pre-requisites: Must be in MDiv or MAPS program to register for this course; CPE site must be approved prior to engagement; Clinical Pastoral Care registration for MDiv and MAPS students provides confirmation of CPE requirement for degree
This course serves as continuous enrollment and fulltime status verification for IPS students for whom CPE is a program requirement.
Outcomes:
Fulfills CPE or Contextual Ed requirement for MDiv and MAPS students

IPS 531 Christian Doctrine (3 Credit Hours)
The course is divided into two sections: (1) the historical evolution of Christian doctrine and its theological interpretations through Vatican II; (2) the development of doctrine in the post-Vatican II era, including an in-depth study of Karl Rahner's fundamental theology and contemporary theological issues with applications to present-day pastoral ministry.
Course equivalencies: X - IPS 531 / BEHL 502
Outcomes:
Students will discover the tools of historical theology and correlation; revising theological understanding in changed historical-cultural contexts; and the hermeneutical task of translating their meaning into present contexts

IPS 532 Social Context of Ministry (3 Credit Hours)
Christian life and ministry are socially located; they take place in specific social, cultural, political and economic contexts. We cannot minister effectively if we do not have a better understanding of the context in which we are called to serve. These contexts are the environment within which persons minister.
Outcomes:
Gain skills of critical social analysis and theological assessment for strategies of social change to facilitate ministry in a given context

IPS 541 Liturgy and Christian Sacraments (3 Credit Hours)
The Sacraments express our faith bringing us into an encounter with God's grace, forming us into the image of Christ. This course explores the theological, religious, and cultural origins of the liturgy and the sacraments as they have developed in response to the needs of the Church communities throughout time.
Outcomes:
Students will develop the ability to articulate a sacramental theology and understanding of the sacraments that enables them to address the meaning of the sacraments in connection to contemporary culture

IPS 545 The Foundations of Christian Spirituality (3 Credit Hours)
Enrollment Conditions: This course is required of all students in the MASp: Contemporary Spirituality Concentration and/or the Spiritual Direction Concentration; Is also required of all MDiv students. Christian spirituality (the "lived experience of Christian faith") is a separate but partnered academic field with theology today. Key issues are: defining "spirituality", methods in the field, spirituality vs. institutional religion, Jesus Christ (christology), major figures and movements in Christian spirituality's 2000 year history, and classical and contemporary themes.
Course equivalencies: X -IPS 545 / BEHL 503
Outcomes:
Facility defining spirituality and Christian spirituality, and an informed understanding of the person Jesus Christ, the history of Christian spirituality, and the relationship of spirituality to theology and institutional religion

IPS 551 Social Ethics in the Catholic Tradition (3 Credit Hours)
Students should ideally complete IPS 416, 417, and 531 prior to taking this course. This course focuses on the tradition and practice of Catholic social thought. Students will become familiar with the documentary tradition of Catholic social teaching, as well as the ways that Catholic social thought has been embodied and advanced through the lives of Catholic activists and liberation theology. Particular attention will be given to history, texts, methodology, and significant figures in the tradition.
Outcomes:
Upon completion of this course, students will have a thorough knowledge of the tradition of Catholic social thought, will be able to analyze contemporary issues through the lens of this tradition, and will be able to enact this tradition in their ministerial contexts

IPS 553 Moral Theology and Christian Ethics (3 Credit Hours)
This course focuses primarily on methods in ethics. Students will become familiar with the tradition of Catholic moral theology as well as different contemporary methodologies in ethics. Particular attention will be given to the history of the discipline, the role of scripture in moral reasoning, and Catholic social teaching. To articulate the history and central categories in Catholic moral theology; to analyze a variety of contemporary methodologies in theological ethics.

IPS 555 Human Person and Psychological Development (3 Credit Hours)
Human beings are created to grow and mature into their full humanity. Every phase of life carries particular psychological and spiritual agendas. While each person is unique, our developmental story from birth to death is also our universal human story with particular variations, sharpened around gender and cultural differences.
Outcomes:
Exploration of developmental differences; Discovery of reliable markers for ministry to persons throughout the life cycle

IPS 560 Liturgical Leadership (3 Credit Hours)
This practicum develops skills in preparation for preaching and presiding at liturgical celebrations. The student will become familiar with different preaching styles, as well as theories of preaching and presiding. The focus includes public communication and preaching skills, as well as supervising and training volunteer liturgical ministers. Knowledge of preaching and presiding styles and theory.
Outcomes:
Ability to preside at liturgical celebrations; Development of preaching and public speaking skills; Familiarity with liturgical rites

IPS 564 Foundations of Pastoral Care (3 Credit Hours)
Pastoral Care is the ministry of accompanying people in the difficult times of their lives. Students explore the history, theology and purpose of pastoral care, including their own personal loss experiences. Students will be able to assess who they are as minister and what they bring into the pastoral care environment. Students will demonstrate the ability to implement pastoral care skills.

IPS 565 Pastoral Leadership (3 Credit Hours)
Examines recent and contemporary leadership theories, principles and practices, and assists students' applications as pastoral leaders in their own religious traditions and institutions. Offers a wide array of readings from the organizational and corporate literature, church documents, and pastoral literature from Roman Catholic, hierarchical church, and congregational church perspectives.
Outcomes:
Apply leadership literature from organizational, corporate, and pastoral perspectives, growing personal capacity for integrating pastoral management and leadership performances appropriate to their religious traditions, governance structures, and communities

IPS 570 Introduction to Theology and Ministry (3 Credit Hours)
IPS 570: Introduction to Theology and Ministry is recommended as the first course in the program. This course explores the interplay among traditions of theology and ministry, the history of ministry and the challenge of relating foundational traditions to the present array of ministries. The course allows you to become more certain and deliberate about the skills that constitute ministerial practice and ministerial theology.
Outcomes:
Students clarify and articulate a theory of ministry and method of ministry from which to operate; The heart of the course is development of self-confidence ministerial capacities as a professional

IPS 572 Ignatian Spirituality (3 Credit Hours)
This course invites students to consider core elements and principles of Ignatian spirituality, through the study of Ignatius of Loyola's major works and relevant Ignatian literature. Particular attention will be given to the Spiritual Exercises and their use for spiritual direction and formation, discernment and prayer.
Outcomes:
Identify the distinctive characteristics of Ignatian spirituality; Acquire practical knowledge of Ignatian imaginative prayer and discernment of spirits; Learn to adapt and direct Ignatius' Spiritual Exercises for spiritual direction

IPS 573 Spiritual Exercises of St Ignatius (3 Credit Hours)
This course provides an introduction and overview to Ignatian spirituality and the Spiritual Exercises of St. Ignatius of Loyola, equipping students to provide spiritual direction to individuals making the Exercises. Throughout the course we will address and discuss Ignatian topics, such as the movements of the Spiritual Exercises, the importance of discernment as a spiritual director, and one's own personal experience with the Exercises.
Outcomes:
Recognize the Ignatian Rules for Discernment within the context of directing an individual making the Spiritual Exercises; Identify and witness the key movements and meditations of the Spiritual Exercises; Recognize key elements of Ignatian spirituality and how they fit in the Spiritual Exercises; Articulate one's own personal experience and transformation due to Ignatian Spirituality and the Spiritual Exercises; Engage with current and prudent practices and be aware of opportunities for continuing education as spiritual directors

IPS 578 Contextual Education Preparation (1 Credit Hour)
Restricted to Institute of Pastoral Studies students. Prepares students to engage in the practice of contextual education by orienting students to the contextual education framework, focusing on their own vocational identity, and reflecting on how students view the work of ministry. It also covers the logistics of procuring a site and conducting theological action research.
Outcomes:
Facilitate site selection and completion of site agreement; introduce the practice of Theological Action Research; be orientated to contextual education

IPS 579 Contextual Education Introduction (1.5 Credit Hours)
Restricted to Institute of Pastoral Studies students. Facilitates the student's initial foray into work at their contextual education site, through regular coaching for reflection and guidance as well as workshops on useful skills for ministry. Students gain 100 hours of hands on experience at their site of ministry and begin to develop a community-based theological action research project.
Outcomes:
To gain basic familiarity with the contextual education site and to build relationships within the community, and gain basic experience in the work of ministry pertaining to the site

IPS 580 Contextual Education I (1.5 Credit Hours)
Pre-requisites: Completion of at least 18 credit hours, attendance at prep session, approval of site and supervisor by CCE, completed required documentation
Students apply for placement with an approved site at which they will exercise & develop professional/ministerial skills. Students engage in a minimum of 200 hours of leadership praxis. Students receive practically oriented instruction, participate in practice-based workshops & reflect on their leadership experience with their peers & an experienced coach.
Course equivalencies: IPS 580/IPS 640
Outcomes:
Gain tangible skills for leadership in ministry; Test vocational commitments and refine vocational identity; Develop capacity for theological reflection especially toward the integration of discipleship, leadership and mission

IPS 581 Contextual Education II (3 Credit Hours)
Pre-requisites: IPS 580
Students continue in their field placement exercising professional/ministerial leadership and further developing their self-identified professional/ministerial skills. While continuing to engage these contexts, students meet in class to further reflect on their leadership in ministry, discerning emerging strengths and areas of needed growth.
Course equivalencies: IPS 641/IPS 581
Outcomes:
Gain further proficiency in skills for leadership in ministry; Deepen & refine vocational identity in relation to present & future work; Further develop capacities of theological reflection on their work of ministry

IPS 585 Intro to Spiritual Direction Certificate Praxis for Contextual Ed (1.5 Credit Hours)
Designed particularly for Spiritual Direction Certificate students, IPS 585 launches a year-long praxis sequence focused on building competency and experience in the practice of offering spiritual direction. Through an eight-week, 1.5-credit online seminar, students establish a learning plan, form supervision agreements, and begin recruiting, screening, and meeting with directees in a manner consistent with professional and ethical standards. Students engage in guided practice, peer learning, and structured reflection (including verbatim work) while developing an initial plan for a silent or spiritual direction retreat that will be implemented during the fall-spring course sequence.
Outcomes:
Design a personalized praxis plan (learning plan) that identifies formation goals, supervision arrangements, and benchmarks for progress across the year-long sequence; Demonstrate foundational spiritual direction session practices (eg, attentive listening, discernment-oriented questioning, and session structure) in initial directee encounters; Apply ethical and professional standards for spiritual direction practice, including confidentiality, boundaries, documentation, and appropriate referral; Analyze sessions using verbatim reporting and reflective writing to evaluate personal strengths, growth edges, and next steps for competency development; Develop a feasible retreat concept note and preliminary retreat plan (purpose, structure, logistics, and evaluation approach) aligned with program expectations

IPS 586 Spiritual Direction Certificate Praxis I for Contextual Ed (0 Credit Hours)
IPS 586 is the first semester of a two-term, supervised practicum for Spiritual Direction Certificate students. Building on the foundational preparation of IPS 585, students engage in sustained spiritual direction practice with directees and in structured supervision designed to deepen competence, confidence, and ethical integrity. Students work toward the benchmark of completing substantial directee contact hours during the academic year (approximately 50 hours across IPS 586 and IPS 587), with ongoing reflection through verbatim work and self-assessment. During IPS 586, students also refine their retreat plan and complete the preparations necessary to host a silent or spiritual direction retreat during the practicum sequence.
Outcomes:
Sustain regular spiritual direction practice with directees and document progress toward program benchmarks using accurate hour logs and supervision verification; Integrate supervisory feedback to refine spiritual direction skills (eg, presence, listening, discernment, and ethical practice) and demonstrate growth over time; Analyze spiritual direction sessions through recurring verbatim reporting and reflective writing to strengthen critical reflection and self-assessment; Develop and finalize an implementable retreat plan (purpose, schedule, logistics, hospitality, and evaluation) appropriate to the student's context and scope; Evaluate vocational fit and formation needs in light of practicum experiences and articulate concrete next steps for continued growth

IPS 587 Spiritual Direction Certificate Praxis II for Contextual Ed (0 Credit Hours)
IPS 587 is the second semester of the Spiritual Direction Certificate supervised practicum sequence. Students continue providing spiritual direction with directees, deepen their competence through structured supervision, and complete remaining benchmarks for the certificate practicum (approximately 50 total directee contact hours across IPS 586 and IPS 587). The course culminates in the student's leadership of a silent or spiritual direction retreat and in a final integrative self-assessment of readiness for ongoing practice. Students submit a concise praxis portfolio that documents learning, supervision engagement, ethical practice, and next steps for continued formation.
Outcomes:
Demonstrate sustained, ethically grounded spiritual direction practice and complete required directee contact hours with accurate documentation and supervisor verification; Synthesize supervisory feedback across the year to articulate an emerging personal approach to spiritual direction and areas for continued development; Evaluate spiritual direction practice using advanced verbatim reflection that integrates theological/spiritual insight, self-awareness, and practical skill refinement; Plan and lead at least one silent or spiritual direction retreat and assess its effectiveness using participant feedback and self-evaluation; Create a final praxis portfolio that evidences competence, vocational commitment, and a realistic plan for continued supervision and professional/ministerial growth

IPS 593 Integration Project (0 Credit Hours)
The Integration Project (typically a written paper) involves the personal integration and application of one's course of studies at IPS into one's vocational/ministerial identity. 593 is required for MDIV, MASJ, MASp, MAHCML and MAPS students (though MAPS-Health Care Chaplaincy concentration students take 493 instead). Enrollment Conditions: Students should register in their final semester of coursework, or when they are within 9 credits of completing the degree. Registration requires a signed copy of the Integration Project Proposal.
Outcomes:
Successful integration and assessment of students' studies and vocational development

IPS 596 Special Topics in Health Care Ethics (1-3 Credit Hours)
This course is restricted to IPS graduate students.

IPS 599 Special Topics (1-6 Credit Hours)
Topics will vary.
Outcomes:
Outcomes will vary

IPS 605 Master's Study (1 Credit Hour)
IPS students who have not completed their degree are required to be continuously enrolled in a course until their degree is completed. This zero credit hour course fulfills that requirement for those who are finished with their coursework but not their final projects. Maintaining enrollment for those who are finished with their coursework but not their final projects.

IPS 610 Foundations of Social Justice (3 Credit Hours)
This course explores the philosophical, ethical and theological foundations for social justice with a particular emphasis on Catholic Social Teaching and Catholic social ethics, addressing the practice of justice with attention to concrete dilemmas which confront Christians in their efforts to do justice.
Outcomes:
To develop an in-depth understanding of social justice in the Catholic social teaching tradition, and in the Jewish and Christian scriptures; to articulate and support a working definition of social justice informed by the course

IPS 615 Liberation Theology (3 Credit Hours)
Liberation Theology refers to several related theologies that emerged in Latin America. Many more have been developed but all share the same basic methodology, focus their efforts on issues of social justice, and proceed with a prophetic voice. The course introduces the method of liberation theology and surveys a selection of primary texts from a variety of social contexts.
Outcomes:
Students will critically and constructively assess the contributions of Liberation Theology in the broader theological conversation; develop the skills necessary to assess and respond theologically to their own social contexts

IPS 620 Diversity and Equity (3 Credit Hours)
This course explores diversity in a global environment characterized by color, ethnicity, culture, national origin, class, gender, age, religion, physical or mental ability, gender identity and sexuality. Students will effectively analyze and assess the cultural and institutional context of social justice issues. IPS 620 is cross-listed with SOWK 502: Oppression,Privilege,Diversity.
Course equivalencies: ASIA/SOWK/URB370/AFR369/SOWK50

IPS 625 Social Ethics: Politics and Global Economics (3 Credit Hours)
Economic institutions and issues of global justice are considered in the writings of philosophers, economists and socio-political theorists. Students effectively analyze institutional contexts of social justice issues and understand foundational local, national, and international justice issues linked to the political, economic, and social arenas. Analyze & evaluate current trends in international relations policy, economic markets & environmental impact from social justice perspective. Develop tactics for engaging in the work of social change within emerging global context.

IPS 627 Social Entrepreneurship (3 Credit Hours)
Intensive consideration of different examples of social entrepreneurship, including at least one utilizing Catholic Social Teaching; and more general observations of other models of social engagement and challenging unmet needs.
Outcomes:
Creation of an initial business sketch for a viable social entrepreneurship project to address a specific need

IPS 635 Community Organizing and Community Development (3 Credit Hours)
This course combines experiential learning with theories of community organization and development, exploring methods, strategies and key ideas of broad-based community organizing. Students will learn and practice the tools needed to organize as well as exhibit initial (foundational) competencies in social advocacy, community organizing and social change. IPS 635 is cross listed with SOWK 509: Community Intervention.
Course equivalencies: X- SOWK 509/IPS 635
Outcomes:
Increase understanding of approaches and methods of community organizing and community development; Become competent in evaluating resources available for the work of community organizing and development

IPS 651 Clinical Bioethics (3 Credit Hours)
This course will provide an overview of the major areas of clinical biomedical ethics. Issues that will be examined and analyzed include problem-solving methods, the theory and practice of informed consent, end-of-life decision making, physician-assisted suicide, pediatric ethical dilemmas, spirituality in clinical encounters, the injustice of health care disparities, and the role of ethics committees.
Course equivalencies: IPS 651/BEHP 401/BEHL 401
Outcomes:
Participants will gain familiarity with the terminology, resources, and major frameworks of ethical analysis in biomedical ethics

IPS 652 Organizational Ethics I (3 Credit Hours)
This is a two-month long blended course of online learning and a two-day intensive experience on the HSD campus. This course examines ethical issues in health care from the vantage point of decision makers who shape the system, e.g., physicians within a group practice, administrators within a health system, or advocates within a community.
Course equivalencies: IPS 652/BEHP 412/BEHL 412
Outcomes:
Social and economic context of health care in the United States will be overviewed as the background for considering the responsibilities social justice entails to self, one's profession, one's patients, and the underserved

IPS 653 Organizational Ethics II (3 Credit Hours)
This is a two-month long blended course of online learning and a two-day intensive experience on the HSD campus. This course examines the theory, role, and elements of leadership that effectively serve non-profit healthcare systems. In particular, the nature of leadership is examined.
Course equivalencies: IPS 653/BEHP 419/BEHL 419
Outcomes:
Questions of leadership style and theories of what constitutes effective leadership are considered; Communication strategies and methods of organizational change key focuses

IPS 654 Catholic Bioethics and Clinical Practice (3 Credit Hours)
This course offers a topical survey of bioethical issues pertinent to clinical practice in the Catholic context. Topics and concepts considered include abortion, contraception, sterilization, nutrition and hydration, withdrawal of life support, care of the dying, cooperation, conscience, human dignity and personhood.
Course equivalencies: IPS 654/BEHP 415/BEHL415
Outcomes:
Assist students in establishing a substantive familiarity with the positions and moral reasoning of the Catholic tradition in clinical bioethics

IPS 655 Catholic Bioethics and Social Justice (3 Credit Hours)
Course involves an historical study of the development of the body of official Catholic Social Teaching specific to its impact on healthcare delivery in the United States. Current developments in select key social issues and movements are also addressed insofar as those issues and movements influenced healthcare delivery.
Course equivalencies: IPS 655/BEHP 416/BEHL 416
Outcomes:
Develop the participants understanding of the principles of Catholic Social Teaching and their application to the healthcare context

IPS 656 Advancing Health Equity Practice (3 Credit Hours)
A two-month long blended course of online learning and a two-day intensive experience on the HSD campus. Topics cover the role of racial and economic health disparities in the process of care and health outcomes, Cultural and Linguistic Appropriate Standards (CLAS) in health care, self-assessment and evaluation of institutional needs.
Course equivalencies: IPS 656/BEHP 418 / BEHL 418
Outcomes:
Knowledge and skills gained in this course can be used to develop an advocacy role for evaluating and promoting cultural competency within a health care system

IPS 657 Advanced Concepts in Health Systems Management (3 Credit Hours)
The course is structured around a framework that links strategic management with health care outcomes for today and tomorrow. Areas covered include: leadership, team building, planning, customers, markets, information and analysis, communication skills, conflict resolution, resource management, budgeting and organizational performance.
Course equivalencies: X-CMAN 468/BEHL 505/IPS 657
Outcomes:
Analyze major strategic management processes, describe how evidence-research practice can be applied in health systems management, and integrate a framework for strategic management with the key concepts of outcomes-based performance management

IPS 658 Fiscal Management for Health Care Organizations (3 Credit Hours)
The course explores the relationship between the national economic environment and the financial context for current models of health care delivery. A variety of fiscal concepts and techniques such as cost accounting, cost behavior, budgeting, cost benefit/cost effectiveness analysis, cost-volume-profit analysis, cost variance analysis, and performance budgeting are explored.
Course equivalencies: X-IPS 658/CMAN 533/BEHL 506
Outcomes:
Students will develop a framework for understanding key issues in health care financial management; Students will develop a quantitative approach to decision making in health care administration through application of concepts

IPS 659 Management of Professionals in Healthcare Organizations (3 Credit Hours)
This course offers students the opportunity to analyze, expand, and synthesize their understanding of technical, human relations and conceptual skills essential to functioning within the role of manager/administrator in health care settings.
Course equivalencies: X-IPS 659/CMAN568
Outcomes:
Analyze and synthesize knowledge of the concepts of professional role and organizational dynamics for use as a foundation for the role of manager/administrator in health care settings

IPS 660 Leadership in Social Justice Organizations (3 Credit Hours)
This course explores different approaches to leadership on behalf of social justice with a strong focus on developing a personal leadership style and practices to deepen students' sense of vocation. Develops a number of practical leadership skills connected to discernment, leading through adaptive challenges, team development and bridge building, management, and visioning.
Outcomes:
To understand leadership models and techniques for social justice organizations; To integrate spiritual practices and disciplines into leadership and management; To develop skills managing and interfacing with faith-based and non-profit

IPS 672 Media for Ministry and Mission (3 Credit Hours)
For more than a hundred years, film, radio, and television have had a profound effect on the practice on ministry and pastoral care. Now in the 21st century, the explosion of new types of interactive and social media have revolutionized our interactions, our economy, and our world. Churches and social justice organizations, however, have often been slow to adopt or even explore these new technologies.
Outcomes:
Participants will leave this course with an understanding of how to navigate the changing media landscape, think theologically about digital communications, and put media tools to work for ministry and mission; You will learn to plan strategic campaigns, create content, and measure results; Coursework will include engagement with various platforms, as well as an introduction to key concepts from media history and theory

Instructional Design (INDN)

Discover, search, courses (p. 2661)!

INDN 420 Instructional Design Theories and Models (3 Credit Hours)
Pre- or co-requisites: CIEP 470 Principles of Instructional Design
This course covers how theories of human learning can be applied to the instructional process to make it more effective, efficient, and appealing. The course has a two-fold focus: the theoretical principles that have contributed to the field of ID, and how those principles can be applied within practical settings.
Outcomes:
Differentiate/compare/contrast among learning theories, ID theories and ID models; Identify/describe the basic tenets of behavioral, cognitive, and constructivist theories; Identify/describe motivational theories; Select/apply principles in practical learning situations

INDN 421 Design & Development of Instructional Materials (3 Credit Hours)
Pre- or co-requisites: CIEP 470 Principles of Instructional Design
This course builds upon instructional design theories and best practices introduced in the Principles of Instructional Design course. It provides an overview of a variety of instructional tools and technologies and allows students to implement design principles in the development of instructional materials.
Outcomes:
Recall/describe/apply learning theories and methodologies to design/develop instructional materials; Recognize/describe/apply visual literacy strategies and accessibility standards to create instructional materials; Design/develop/implement instructional materials using multiple media

INDN 430 Performance Improvement in Organizations (3 Credit Hours)
Pre- or co-requisites: CIEP 470 Principles of Instructional Design
In this course, learners will identify a problem/cause/solution to a performance problem within an organization using the Human Performance Improvement model. Learners will select a learning intervention and create an evaluation plan to assess its effectiveness. Learners will compare/contrast the instructional design process within a variety of organizations.
Outcomes:
Compare/contrast ID teams in organizations; Analyze data to identify performance gaps/causes; Select a performance intervention based on needs analysis; Compose an evaluation plan; Identify Change Management strategies for implementation

INDN 431 Fundamentals of Learning Analytics (3 Credit Hours)
Pre- or co-requisites: CIEP 470 Principles of Instructional Design
In this course, students will build a foundation for deploying learning analytics to be used in instructional design. The course employs a combination of theory and hands-on experience using business-intelligence tools. Emphasis will be centered on specific models and methodologies in data collection, normalization, visualization, and analysis.
Outcomes:
Explain learning analytics theory; identify recent trends; Use reporting tools to compile/isolate/summarize data; Differentiate between learning models; Align data models to assessments; Conduct predictive data analysis; Discuss ethics considerations

INDN 440 Applications of Human Centered Design Principles (3 Credit Hours)
Pre- or co-requisites: CIEP 470 Principles of Instructional Design
Human-centered design places humans and their needs at the center of the design, compels us to take a holistic/thoughtful approach to our designs. This course uses these principles to examine the design process to create learning experiences that are inclusive and responsive. Learners will also craft their own design philosophy.
Outcomes:
Describe principles of human-centered design; Create a space for learning that incorporates principles of human-centered design; Critique the application and use of these principles; Formulate your own philosophy of design

INDN 490 Instructional Design Capstone (3 Credit Hours)
Pre-requisites: CIEP 470 Principles of Instructional Design, last semester of the program, program director approval; Corequisite: 8W1 remaining course requirements must be completed
Students will apply program outcomes to real-world settings in preparation for an ID career. The course combines research and service learning towards the creation of a project, portfolio and professional artifact. Students will partner with a SME to build a module tailored to their course or institution.
Outcomes:
Conduct a needs assessment, compose learning goals/outcomes, and create an evaluation plan by partnering with a subject matter expert; Create a training module incorporating SME content; Develop a professional portfolio

Integrative Cell Biology (ICB)

Discover, search, courses (p. 2661)!

ICB 401 Gross Anatomy (6 Credit Hours)
The student develops a knowledge and understanding of the basic concepts and facts of human gross anatomy as it relates to function and clinical problems. Lectures, clinical case-based and problem-based learning, computer-aided instructional materials, and cadaver dissection serve as guides to laboratory study.

ICB 403 Graduate Histology (3 Credit Hours)
The course is designed to provide the student with a basic knowledge and understanding of the structure and function of the human body at the light and electron microscopic level. The interdependence between structure and function in the different tissues and organs of the body is emphasized. Clinical and research application of the course material are also stressed.

ICB 411 Advanced Gross Anatomy (2 Credit Hours)
The study of the gross structure of the human body at an advanced level presented at conference sessions. Registrants for this course may include graduate students, advanced medical students, as well as those who hold the M.D. degree and are concurrently registered for advanced work in one of the clinical departments.

ICB 445 Scientific Literature: Review & Critique (0-1 Credit Hours)
Students are taught critical evaluation of scientific literature, hypothesis testing, and presentations. This course involves attendance at scientific presentations by students and outside speakers and a journal club component. Both staff and students participate and the class is only offered during the fall semester. This course alternates with ICB 446 - Review and Seminar.
Outcomes:
Be competent with public speaking and broaden scientific knowledge; Learn to understand and evaluate the scientific contribution of the paper

ICB 446 Review Seminar (0-1 Credit Hours)
The student participates in a series of seminars and journal clubs that provide a forum for intensive review of scientific topics. Research progress reports of the students is incorporated into this course as a part of the scientific presentation. This course alternates with ICB 445 - Scientific Literature: Review & Critique and is only offered during the spring semester.
Outcomes:
Gained exposure to research scientists from outside Loyola University Chicago; Obtained opportunities to network with established scientists

ICB 459 Research (1-8 Credit Hours)
Independent research for thesis or dissertation under the supervision of an appointed faculty adviser. Credit various upon assigned effort and time spent in the laboratory. Requires a written report.

ICB 462 Teaching of Anatomy I (0-2 Credit Hours)
A practical experience in the teaching of Gross Anatomy to graduate and medical students. Students assist in the planning, preparation, and teaching of laboratory sessions. The course allows students to place the experience of teaching gross anatomy on their transcripts as a graded course indicating to future employers that they have gained teaching experience.

ICB 463 Teaching Anatomy II (0-2 Credit Hours)
A practical experience in the teaching of histology to graduate and medical students. Students assist in the planning, preparation and teaching of laboratory sessions. The course allows students to place the experience of teaching histology on their transcripts as a graded course indicating to future employers that they have gained teaching experience.

ICB 501 Special Topics in Anatomy (1-2 Credit Hours)
Occasionally specific faculty members may offer a specialized seminar course. The purpose of such courses is to further graduate student's knowledge in a specialized current scientific research area. The graduate students explore in detail one or more areas of special interest through seminars, conferences, library and laboratory work.

ICB 595 Thesis Supervision (1 Credit Hour)
Supervised research and writing leading to the completion of the masters of science thesis and degree.
Outcomes:
Form hypotheses, design and perform appropriate experiments to test these hypotheses; Search and critically evaluate scientific literature and data; Clearly and effectively communicate scientific information in both oral and written forms; Incorporate high standards of ethics into research design, execution, data interpretation, and presentation

ICB 600 Dissertation Supervision (1 Credit Hour)
Supervised research and writing leading to the completion of the Ph.D. dissertation and degree.
Outcomes:
Propose original biomedical research questions and hypotheses; Design and execute critical experiments to evaluate the hypotheses proposed; Search and critically evaluate scientific literature and data; Clearly and effectively communicate scientific information in both oral and written forms; Incorporate high standards of ethics into research design, execution, data interpretation, and presentation

Interdisciplinary Studies (INDS)

Discover, search, courses (p. 2661)!

INDS 380 Newberry Seminar (6 Credit Hours)
This course is for students selected for the Newberry Library Undergraduate Seminar, an interdisciplinary, humanities research course offered every Spring. The theme of research changes annually. The competition for the five spots for Loyola students is held every Fall. This course satisfies the Engaged Learning requirement.

INDS 400X TBA-Foreign Stdy (0.5-15 Credit Hours)
Temporary indicator course for the duration of the study abroad program.

International Affairs (INTA)

Discover, search, courses (p. 2661)!

INTA 420 Comparative Political Systems (3 Credit Hours)
This course examines political institutions and political behavior in various political systems. Restricted to Graduate School students.
Course equivalencies: X-INTA 420/PLSC 420
Outcomes:
Students will master the literature on comparative politics, including the methodology of comparative analysis

INTA 430 Theories of International Politics (3 Credit Hours)
This course analyzes theories and major issues of international politics. Restricted to Graduate School students.
Course equivalencies: X-INTA 430/PLSC 430
Outcomes:
Students will master the literature in major research areas and theoretical frameworks in international relations

INTA 470 Fieldwork in PLSC-Internship (1-3 Credit Hours)
This is a graduate level course that allows students to get experience through internships. Restricted to Graduate School students.
Course equivalencies: X-PLSC 470/INTA 470
Outcomes:
Students will be able to demonstrate an understanding of models of leadership and public service by working with supervisors who are normally leaders in their fields

INTA 475 Political Analysis I (3 Credit Hours)
This course provides an introduction to the use of inferential statistics in political science. Restricted to Graduate School students.
Course equivalencies: X-INTA 475/PLSC 475
Outcomes:
Students will master the basic statistical techniques used in political science

International Business (IBUS)

Discover, search, courses (p. 2661)!

IBUS 201 Introduction to International Business (3 Credit Hours)
This course will introduce students to the theory and practice of international business with a focus on international environments and activities of multinational enterprises (MNEs). Topics to be included: cultural, social, legal, trade, and financial characteristics in the world markets. The course will also discuss diverse functional areas of MNEs across national borders such as international: production, logistics, finance, human resource management, and marketing.
Interdisciplinary Option: Global Studies
Course equivalencies: IBUS 201/BSAD 202/BHNR 338
Outcomes:
Develop students' theoretical and practical insights for understanding the real world of international business in terms of both external environmental forces and internal strategic management issues surrounding multinational enterprises (MNEs) in the world markets

IBUS 201H Business Management: A Global and Social Perspective (3 Credit Hours)
Pre-requisites: Open to students in the Quinlan business honors program only
This course provides Honors students with opportunities to learn about managing international businesses in a sustainable global environment. The course contents cover the differences in economic, social, and political environments of countries around the world. The course features corporate and academic speakers and discussions of various aspects of international business.
Course equivalencies: IBUS 201/BSAD 202/BHNR 338
Outcomes:
An understanding of global economics, management, and sustainable business of nations and regions in our global economy and social and financial structures under which global businesses are conducted

IBUS 315 International Management (3 Credit Hours)
Pre-requisites: Junior Standing, minimum grade of "C-" in MGMT 201
This course deals with analyzing, formulating, and implementing firm strategies that involve an international component and, accordingly, focuses on the cultural differences, political/economic influences, global market factors, and other contingencies specific to the international marketplace and different host countries/regions that are served by multinational enterprises (MNEs).
Interdisciplinary Option: Global Studies, International Business
Course equivalencies: X-MGMT315/INTS315
Outcomes:
Students will practice skills for formulating and implementing an international strategy using case discussions and group projects that simulate the decision-making process for international market selection and entry by MNEs

IBUS 370 Inernational Business Internship - Engaged Learning (3-6 Credit Hours)
Pre-requisites: Sophomore standing, Permission of Instructor
IBUS 370 is a seminar course that challenges students to analyze the theory and practices from the world of work that impact the ethics of leading, interpersonal and organizational dynamics, and competent work place contributions required for success in the modern business world. Concepts associated with internship/engaged learning as related to career development will be addressed. Students are required to work a minimum of 120 hours over the course of one semester. All internships must be supervised by professionals and may be paid or unpaid.
This course satisfies the Engaged Learning requirement.
Outcomes:
a) Developing a foundation on which a student may build a career; b) Understanding the role of the Jesuit tradition as it relates to leadership and service

IBUS 399 Special Topics in International Business (3 Credit Hours)
Special Topics are classes offered on an ad hoc basis. Specific titles, prerequisites and content will vary.

IBUS 455 International Strategies for Multinational Enterprises (3 Credit Hours)
This course is designed to provide graduate students with (1) a broad overview of modern theories and practices of MNEs for understanding such firms¿ successful international (or global) strategies and (2) an analytical framework for evaluating and developing corporate strategies to help MNEs succeed in the competitive global marketplaces.
Outcomes:
An understanding of the major theoretical perspectives and practical approaches of managing MNEs, and an understanding of successful cases of MNEs; Experience designing strategic management tools for MNEs¿ global success

IBUS 499 Special Topics in International Business (3 Credit Hours)
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

Italian (ITAL)

Discover, search, courses (p. 2661)!

ITAL 101 Italian I (3 Credit Hours)
This course provides an introduction to the basic grammatical elements of Italian, promoting the development of listening comprehension, speaking, reading and writing skills while examining the geography and culture of Italy.
Outcomes:
Students will be able to understand and write basic Italian sentences and to produce orally and in writing short sentences providing basic personal information about themselves, their activities and plans in Italian

ITAL 102 Italian II (3 Credit Hours)
Pre-requisites: ITAL 101
This course continues the introduction to the basic grammatical elements of Italian, promoting the further development of listening comprehension, speaking, reading and writing skills while examining the geography and culture of Italy.
Outcomes:
Students will be able to understand and write basic Italian sentences and to produce orally and in writing short sentences providing basic personal information about themselves, their activities and plans in Italian

ITAL 103 Italian III (3 Credit Hours)
Pre-requisites: ITAL 102
This course examines more complex grammatical elements of Italian, and promotes the development of intermediate listening comprehension, speaking, reading and writing skills.
Outcomes:
Students will be able to understand and write more complex Italian sentences and paragraphs, and to produce orally and in writing paragraphs and longer pieces providing accounts of their present past and future activities, and oral and written reactions to Italian cultural products

ITAL 104 Italian IV (3 Credit Hours)
Pre-requisites: ITAL 103
This course is a comprehensive review of the basic grammatical elements of Italian, while continuing to promote all language skills with particular emphasis on reading and writing proficiency in areas of cultural and societal investigation.
Outcomes:
Students will be able to understand and write increasingly complex Italian sentences and paragraphs and to produce orally and in writing utterances and texts about Italy, its cultural distinctness and its differences from the United States

ITAL 250 Composition & Conversation I (3 Credit Hours)
Pre-requisites: ITAL 104
This advanced conversation and composition course emphasizes the development of advanced Italian speaking and writing skills and examines advanced grammar and vocabulary in relation to advanced skill development.
Outcomes:
Students will further develop their Italian language skill acquired in previous courses and through experience and will strive for functional conversational fluency and the ability to write with clarity, precision and control of grammatical elements

ITAL 251 Composition & Conversation II (3 Credit Hours)
Pre-requisites: ITAL 104
This advanced conversation and composition course can either be taken as a continuation of ITAL 250 or independently. It also emphasizes the development of advanced Italian speaking and writing skills and examines advanced grammar and vocabulary in relation to advanced skill development.
Interdisciplinary Option: Italian Studies
Outcomes:
Students will further develop their Italian language skill acquired in previous courses and through experience and will strive for functional conversational fluency and the ability to write with clarity, precision and control of grammatical elements

ITAL 270 Main Currents of Italian Literature I (3 Credit Hours)
This course, taught in Italian, is an introduction to Italian literary texts of the Middle Ages and early Renaissance in relation to the cultural and social and political history of Italy during its most noteworthy period of development.
Interdisciplinary Option: European Studies, Italian Studies
Outcomes:
Students will demonstrate knowledge of how medieval and Renaissance Italian literary text reflect in a profound way Italy's cultural, artistic and political history in a systematic manner

ITAL 271 Main Currents of Italian Literature II (3 Credit Hours)
This course, taught in Italian, is an introduction to Italian literary texts and films in relation to the cultural and political history of Italy from 1700 to the present.
Interdisciplinary Option: European Studies, Global Studies, Italian Studies
Outcomes:
Students will demonstrate knowledge of how Italian literary texts and film reflect in a profound way Italy's social, cultural, economic and political history in a systematic manner

ITAL 280 Masterpieces of Italian Literature (3 Credit Hours)
Pre-requisites: ITAL 250 and ITAL 251, with C or better; If either 250 or 251 have been completed, the other may be taken simultaneously with this course
This course is dedicated to the study of selected literary masterpieces written in Italian. Canonical and non-canonical works may be included, alongside essays that reflect on the definition and the history of Italian literature and its canon.
Outcomes:
By the end of the course, students will be able to describe, discuss, and present works of literature in expository writing; Students will demonstrate adequate reading and writing skills at level through oral presentations and term papers; Achievement level desired: ACTFL* Intermediate High to Advanced Low

ITAL 282 Studies in a Theme (3 Credit Hours)
Pre-requisites: ITAL 250 and ITAL 251, with C or better; If either 250 or 251 have been completed, the other may be taken simultaneously with this course
This course explores a theme chosen by the instructor on any social, artistic, and intellectual currents in the cultural history of Italy. The course may include cultural expressions such as the visual arts, music, theatre, performance, and film. It may consider different communication platforms such as - but not limited to - social media and pop culture. It may examine different genres and periods.
Outcomes:
By the end of the course, students will be able to identify the historical and social roots of Italian cultural phenomena and differentiate traditions and cultural perspectives in expository writing; Students will demonstrate adequate reading and writing skills at level through oral presentations and term papers; Achievement level desired: ACTFL* Intermediate High to Advanced Low

ITAL 283 Studies in Italian Authors (3 Credit Hours)
Pre-requisites: ITAL 250 and ITAL 251, with C or better; If either 250 or 251 have been completed, the other may be taken simultaneously with this course
This course is dedicated to the study of selected Italian authors. Canonical and non-canonical writers may be included, alongside authors of the Italian diaspora.
Course equivalencies: X-ITAL283/MSTU376
Outcomes:
By the end of the course, students will be able to describe, discuss, and present the works of Italian authors in expository writing; Students will demonstrate adequate reading and writing skills at level through oral presentations and term papers; Achievement level desired: ACTFL* Intermediate High to Advanced Low

ITAL 284 Studies in Italian Film (3 Credit Hours)
Pre-requisites: ITAL 250 and ITAL 251, with C or better; If either 250 or 251 have been completed, the other may be taken simultaneously with this course
This course will focus on one or more aspects of Italian films and may concentrate on narrative structure, genre, authorship, cinematography, casting, setting, and so on. The course may include a diverse selection of Italian high-brow and popular films, alongside readings that highlight their societal and cultural roots.
Interdisciplinary Option: Global Studies
Outcomes:
By the end of the course, students will be able to describe, discuss, and present on various aspects of Italian cinema and the work of Italian filmmakers; Students will demonstrate adequate reading and writing skills at level through oral presentations and term papers; Achievement level desired: ACTFL* Intermediate High to Advanced Low

ITAL 290 The Italians (3 Credit Hours)
Pre-requisites: ITAL 250 and ITAL 251, with C or better; If either 250 or 251 have been completed, the other may be taken simultaneously with this course
This course aims at the acquisition of the Italian language for professional purposes in conducting business in Italy or with Italian companies. It will provide students with professional opportunities in an international and global environment.
Interdisciplinary Option: Italian American Studies
Outcomes:
By the end of the course, students will be familiar with business etiquette and the organization of Italian companies and corporations; Students will demonstrate use of appropriate written professional language in business letters and CV writing, and in oral communication; Achievement level desired: ACTFL* Intermediate High to Advanced Low

ITAL 300 Tutorial for Credit (1-6 Credit Hours)
Students will cover a specially designed program of study through regular meeting with Italian faculty.
Interdisciplinary Option: Italian Studies
Outcomes:
Students will demonstrate knowledge of literature and culture and will improve their language skills

ITAL 301 Stylistics (3 Credit Hours)
Pre-requisites: ITAL 270 and ITAL 271, with C or better; If either 270 or 271 have been completed, the other may be taken simultaneously with this course
This course helps students develop writing skills in expository prose. Based on intensive study of advanced grammar and syntax, the course enhances students' vocabulary through prose, poetry, and essay readings.
Outcomes:
By the end of the course, students will demonstrate a firm and comprehensive command of the complexities of written and spoken Italian in expository writing and oral presentations; Achievement level desired: ACTFL* Advanced Low

ITAL 305 Advanced Grammar (3 Credit Hours)
This course, taught in Italian, is a study of advanced Italian composition and rhetoric, with advanced study of Italian grammar.
Interdisciplinary Option: Italian Studies
Outcomes:
Students will further develop their Italian language skills acquired in previous courses and through experience and will strive to achieve as high a proficiency level as personally possible in their advanced Italian reading and writing ability

ITAL 308 Literary Criticism (3 Credit Hours)
Pre-requisites: ITAL 270 and ITAL 271, with C or better; If either 270 or 271 have been completed, the other may be taken simultaneously with this course
Students will study major schools and themes in literary theory, both historical and contemporary. Rhetorical, philosophical, and cultural approaches to literature will be studied in conjunction with specific literary texts drawn from several linguistic and cultural traditions.
Course equivalencies: X-FREN/GERM/ITAL/SPAN308
Outcomes:
By the end of the course, students will be able to debate, contextualize, and interpret major critical issues in the study and theory of literature in expository writing and oral presentations; ACTFL* achievement level desired: Advanced Low to Mid

ITAL 312 Dante-The Divine Comedy (3 Credit Hours)
This course, taught in Italian, will examine the Vita Nuova and Divine Comedy of Dante Alighieri and study Dante's poetic world in the context of Medieval culture.
Interdisciplinary Option: Catholic Studies, European Studies, Italian Studies, Medieval Studies
Course equivalencies: X-ITAL312/CATH312/MSTU364
Outcomes:
Students will demonstrate knowledge of Dante's Italian and understanding of the historical, cultural, critical and technical vocabulary needed to analyze the Divine Comedy

ITAL 314 Survey 13th & 14th Century Literature (3 Credit Hours)
This course, taught in Italian, will examine the influential literary works of Francis Petrarch and Giovanni Boccaccio with emphasis on their respective masterpieces: the Canzoniere and the Decameron.
Interdisciplinary Option: Catholic Studies, Medieval Studies
Course equivalencies: X-ITAL314/MSTU368
Outcomes:
Students will demonstrate knowledge of Petrarch's poetry and Boccaccio's difficult prose and their techniques of composition

ITAL 315 Italian Renaissance Literature (3 Credit Hours)
This course, taught in Italian, will examine the influential literary works of Poliziano, Lorenzo dei Medici, Machiavelli and Castiglione.
Interdisciplinary Option: Italian Studies
Outcomes:
Students will demonstrate knowledge of Renaissance literature in a variety of genres

ITAL 316 Renaissance Chivalric Poems (3 Credit Hours)
This course, taught in Italian, will examine the Chivalric Romance Epics of Boiardo, Ariosto and Tasso.
Outcomes:
Students will demonstrate knowledge of Renaissance literature 's greatest works

ITAL 317 Survey Early 19th Century Literature (3 Credit Hours)

This course will examine the influential literary works of Giovanni Verga and the school of Verismo and the "romanzi di formazione" of Edmondo De' Amicis, Carlo Collodi, and other significant Italian authors.
Interdisciplinary Option: European Studies, Italian Studies
Outcomes:
Students will demonstrate knowledge of Verga and verismo and of the works of other major late-19th century authors

ITAL 319 Survey of 20th Century Prose (3 Credit Hours)
This course, taught in Italian, will examine representative Italian novels of the 20th century by authors such as Svevo, Silone, Calvino, Bassani, P. Levi, and Ginzburg.
Interdisciplinary Option: European Studies, Global Studies, Italian Studies
Outcomes:
Students will demonstrate knowledge of Italian novelists and their prose and their literary style; Students will improve their Italian reading and writing skills

ITAL 320 Survey of 20th Century Poetry (3 Credit Hours)
This course will examine the major Italian poets of the twentieth century with emphasis on Ungaretti, Quasimodo, Montale, Pasolini, Zanzotto and Luzi.
Interdisciplinary Option: Global Studies
Outcomes:
Students will demonstrate knowledge of Italian poetry and major 20th century poets, Students will demonstrate the ability to interpret Italian poetry and will write their own Italian poetry

ITAL 331 Survey of Italian Theater (3 Credit Hours)
This course will examine representative works of Italian theater from the Renaissance to the present. Featured authors will include Machiavelli, Goldoni, Pirandello and Dario Fo.
Interdisciplinary Option: Italian Studies
Outcomes:
Students will demonstrate knowledge of Italian theater in its historical development; Students will demonstrate the ability to analyze Italian plays and act out famous scenes

ITAL 340 Italian Short Story (3 Credit Hours)
This survey course will examine representative works of the Italian short story tradition from the 13th century Novellino to the present.
Interdisciplinary Option: European Studies, Italian Studies
Outcomes:
Students will demonstrate knowledge of Italian short story in its historical development; Students will demonstrate the ability to analyze Italian short stories and will create their own

ITAL 390 Culture & Civilization (3 Credit Hours)
This course taught in Italian studies the Italy that has emerged since the World War II. examines contemporary Italian culture and society and the problems Italy faces through study of a variety written texts (literary, historical, journalistic) and media.
Interdisciplinary Option: European Studies, Global Studies, Italian American Studies, Italian Studies
Course equivalencies: X-ITAL390/INTS394
Outcomes:
Students will demonstrate knowledge of Italian society as it has been transformed over the past 60 years and will be able to under the role of representative political and cultural figures and forces in promoting change

ITAL 395 Internship (3 Credit Hours)
The internship will enable students to gain practical experience in working in Italian government institutions in Chicago (such as the Italian Cultural Institute) or working in businesses or education.
Interdisciplinary Option: Italian Studies
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will work 4-8 per week and reflect on their experience in conversations with supervising professor and other interns

ITAL 397 Topics in Italian Literature (3 Credit Hours)
Pre-requisites: ITAL 270 and ITAL 271, with C or better; If either 270 or 271 have been completed, the other may be taken simultaneously with this course
This course explores a topic chosen by the instructor on any genre, tradition, and form in the literary history of Italy. The course may include literary expressions such as poetry, the short story, the novel, theatre, travel literature, etc., and may also consider different genres and periods.
Outcomes:
By the end of the course, students will be able to debate, contextualize, and interpret major critical issues in the study of Italian literature in expository writing and oral presentations; Achievement level desired: ACTFL* Advanced Low to Advanced Medium

ITAL 399 Italian Honors Tutorial (3 Credit Hours)
Pre-requisites: Instructor's consent, restricted to students in Italian BA Eligible students majoring in Italian and with departmental honors may elect tutorial for credit; topic chosen in consultation with faculty member.
Interdisciplinary Option: Italian Studies
Course equivalencies: ITAL399H / ITAL399
Outcomes:
Students will explore a topic of their choice guided by a faculty member, and will conduct a research project that will result in a final paper; Achievement level desired: ACTFL* Advanced Low to Advanced-Mid

Japanese (JAPN)

Discover, search, courses (p. 2661)!

JAPN 101 Japanese I (3 Credit Hours)
This course introduces the four basic communicative skills in Japanese: listening, speaking, reading, and writing. Students gain knowledge of Japanese culture and ways of thinking which provide the context for communicating in Japanese. No previous knowledge of Japanese is required.
Interdisciplinary Option: Asian Studies, Japanese Language and Culture
Course equivalencies: X-JAPN101/ASIAJ01
Outcomes:
Students will be able to understand and respond to greetings, introductions, and basic question about time, location, and directions and will be able to read and write hiragana and katakana, the two phonetic Japanese scripts as well as about 25 ideographic characters

JAPN 102 Japanese II (3 Credit Hours)
Pre-requisites: JAPN 101
Students will build on the skills in listening comprehension, speaking, reading and writing gained in JAPN 101.
Interdisciplinary Option: Asian Studies, Japanese Language and Culture
Course equivalencies: X-JAPN102/ASIAJ02
Outcomes:
Students will be able to introduce themselves and others, discuss daily life, and read and write simple paragraph length compositions with the aid of vocabulary lists

JAPN 103 Japanese III (3 Credit Hours)
Pre-requisites: JAPN 102
Students will expand their knowledge of Japanese vocabulary, grammar, usage, and speech levels, using Japanese as a medium for learning Japanese.
Interdisciplinary Option: Asian Studies, Japanese Language and Culture
Course equivalencies: X-JAPN103/ASIAJ03
Outcomes:
Students will use written and spoken Japanese to ask for and express opinions, to ask for assistance, and to participate in a variety of written and verbal social routines

JAPN 104 Japanese IV (3 Credit Hours)
Pre-requisites: JAPN 103
This course extends students' knowledge of Japanese grammar, vocabulary, verbal routines, and cultural patterns. Students will read and respond in Japanese to short works of fiction and non-fiction.
Interdisciplinary Option: Asian Studies, Japanese Language and Culture
Course equivalencies: X-JAPN104/ASIAJ04
Outcomes:
Students will converse in Japanese for extended periods and be able to decode and create many written items from daily life such as application forms, catalogs, and recipes

JAPN 250 Composition & Conversation I (3 Credit Hours)
Students gain mastery of intermediate Japanese grammar and increase their ability to use honorific and humble speech, with increasing use of Japanese as the medium of instruction.
Interdisciplinary Option: Asian Studies, Japanese Language and Culture

JAPN 251 Composition & Conversation II (3 Credit Hours)
This class is conducted mostly in Japanese with students developing the ability to read and discuss longer texts, including primary sources, to gain greater knowledge and understanding of Japan.
Interdisciplinary Option: Asian Studies, Japanese Language and Culture

Latin (LATN)

Discover, search, courses (p. 2661)!

LATN 101 Latin I (3 Credit Hours)
This course introduces students to elementary grammatical forms, basic syntax, and vocabulary of Latin, and simple readings in the language.
Course equivalencies: LATN131/LATN101
Outcomes:
students should be able to demonstrate basic knowledge of Latin vocabulary, syntax and grammar and deploy it to be able to translate accurately simple Latin sentences and passages into English

LATN 102 Latin II (3 Credit Hours)
Pre-requisites: LATN 101
This course continues the study of the fundamentals of the Latin language, including more vocabulary, grammar, syntax and more advanced readings. (Latin I or its equivalent is a prerequisite for this course.)
Course equivalencies: LATN132/LATN102
Outcomes:
students should be able to demonstrate advanced knowledge of basic Latin vocabulary, syntax and grammar and deploy it to be able to translate accurately more advanced Latin sentences and passages into English

LATN 271 Introduction to Reading Latin (3 Credit Hours)
Pre-requisites: LATN 101, 102 (grade of 'B' or higher) or their equivalents (AP Latin credit; CAS Latin competency exam)
This intermediate-level course centers on translation of prose and poetry of Roman authors, with special emphasis on review of Latin grammar as it is encountered in the selected texts.
Outcomes:
Students will be able to translate selected passages of Latin prose and poetry with accuracy, analyze and appreciate Roman literature, and demonstrate understanding of the content of the passages

LATN 281 Intro to Roman Historians (3 Credit Hours)
Pre-requisites: LATN 101 and 102 or their equivalents
This course centers on translation of representative selections from the historical works of Republican, Augustan and other Latin authors.
Outcomes:
Students should be able to translate accurately Latin historical prose passages, analyze and appreciate their style and contents, and demonstrate knowledge and understanding of their various contexts and meanings

LATN 283 The Age of Caesar (3 Credit Hours)
Pre-requisites: LATN 101 and 102 or their equivalents
This course focuses on the literature and society of Rome at the time of Julius Caesar, in particular translation of selected readings from such authors as Lucretius, Catullus, Sallust, Caesar and Cicero.
Interdisciplinary Option: Shakespeare Studies
Outcomes:
Students should be able to translate accurately the selected readings, analyze and appreciate their style and content, and demonstrate knowledge and understanding of their contexts and meanings

LATN 284 The Age of Augustus (3 Credit Hours)
Pre-requisites: LATN 101 and 102 or their equivalents
This course focuses on the literature and society of Rome at the time of Augustus. Selected readings are from such authors as Vergil, Horace, Livy, Ovid, Tibullus and Propertius.
Outcomes:
Students should be able to translate accurately the selected readings, analyze and appreciate their style and content, and demonstrate knowledge and understanding of their contexts and meanings

LATN 286 The Age of Nero (3 Credit Hours)
Pre-requisites: LATN 101 and 102 or their equivalents
This course focuses on the literature and society of Rome at the time of Nero. Selected readings are from such authors as Tacitus, Petronius, Seneca, and Lucan.
Outcomes:
Students should be able to translate accurately the selected readings, analyze and appreciate their style and content, and demonstrate knowledge and understanding of their contexts and meanings

LATN 287 Age of Flavians (3 Credit Hours)
Pre-requisites: LATN 101 and 102 or their equivalents
This course focuses on the literature and society of Rome at the time of the emperors Vespasian, Titus and Domitian. Selected readings are from such authors as Tacitus, Suetonius, Martial and Juvenal.
Outcomes:
Students should be able to translate accurately the selected readings, analyze and appreciate their style and content, and demonstrate knowledge and understanding of their contexts and meanings

LATN 289 Readings in Latin Literature (3 Credit Hours)
Pre-requisites: LATN 101 and 102 or their equivalents
Students study a selected range of masterworks in Latin literature. (This is a special topics course in Latin.)
Outcomes:
Students should be able to demonstrate deeper knowledge and understanding of selected Latin literature, its style and its possible interpretations

LATN 303 Latin Composition (3 Credit Hours)
Pre-requisites: LATN 101 and 102 or their equivalents
This course involves practical exercises to develop correct and fluent expression in written Latin prose.
Outcomes:
Students should be able to write Latin in various styles, demonstrating facility in deploying fluent knowledge of vocabulary, syntax and grammar in the writing of Latin prose

LATN 314 Cicero's Letters (3 Credit Hours)
Pre-requisites: LATN 101 and 102 or their equivalents
This course examines the correspondence of Cicero, as well as the political, social, and intellectual context of Classical Rome.
Outcomes:
Students should be able to translate these works with proficiency, to demonstrate knowledge in detail of the genre of formal Latin correspondence, the author and his times, and to understand and appreciate the ideas, issues and concerns expressed in the letters

LATN 315 The Latin Fathers (3 Credit Hours)
Pre-requisites: LATN 101 and 102 or their equivalents
This course examines the writings of the early church fathers, including such as Ambrose, Jerome and Augustine; it also comprises an introduction to the historical background of Western patristic thought.
Interdisciplinary Option: Catholic Studies
Outcomes:
Students should be able to translate these works with proficiency, demonstrate knowledge in detail of the writings, their authors and their times, and appreciate more deeply the issues and concerns located in these writings

LATN 317 Pliny The Younger (3 Credit Hours)
Pre-requisites: LATN 101 and 102 or their equivalents
This course examines the correspondence of the younger Pliny, as well as the political, social, and intellectual context of later Classical Rome and Roman customs in public and private life.
Outcomes:
Students should be able to translate these works with proficiency, demonstrate knowledge in detail of the genre, the author and his times, and understand and appreciate the ideas, issues and concerns expressed in the letters

LATN 325 The Orations of Cicero (3 Credit Hours)
Pre-requisites: LATN 101 and 102 or their equivalents
This course centers on the public orations of Cicero, his methods of oratorical persuasion, and the judicial processes of late Republican Rome that form the context for these orations.
Outcomes:
Students should be able to translate these works with proficiency, demonstrate knowledge in detail of the genre, the author and his times, understand and appreciate the ideas, issues and concerns expressed in the orations, and comprehend the historical and judicial background of the orations

LATN 328 Quintilian (3 Credit Hours)
Pre-requisites: LATN 101 and LATN 102 or their equivalents
This courses centers on Quintilian and his Institutio Oratoria, a comprehensive textbook of the technical aspects of ancient rhetoric.
Outcomes:
Students should be able to translate these works with proficiency, demonstrate knowledge in detail of Latin rhetoric and oratory, and understand and appreciate Latin rhetorical styles, literary figures, and the structure and contents of Latin speeches

LATN 332 Historical Masterworks I (3 Credit Hours)
Pre-requisites: LATN 101 and 102 or their equivalents
This course examines the works of Livy or Sallust and their contexts in the later Republic and early Empire.
Outcomes:
Students should be able to translate these works with proficiency and demonstrate knowledge in detail of the author/s studied and the contents of the writings, as well appreciation for the genre of historical writing and for its significance within its political and intellectual context

LATN 335 Historical Masterworks II (3 Credit Hours)
Pre-requisites: LATN 101 and 102 or their equivalents
This course examines the works of Tacitus, Suetonius or Latin historical writers of the later Roman Empire.
Outcomes:
Students should be able to translate these works with proficiency and demonstrate knowledge in detail of the author/s studied and the contents of the writings, as well appreciation for the genre of historical writing and for its significance within its political and intellectual contexts

LATN 341 Vergil (3 Credit Hours)
Pre-requisites: LATN 101 and 102 or their equivalents
This course focuses on Vergil's Aeneid and the genre of Latin epic poetry, in particular, on the character of Aeneas and his place within the context of Augustan Roman politics and society.
Outcomes:
Students should be able to translate the Aeneid with proficiency, and demonstrate detailed knowledge of the author, the poem, and its contents and meanings, as well as deeper understanding and appreciation of various contexts of the poem and Vergil's accomplishments in composing it

LATN 343 Latin Verse (3 Credit Hours)
Pre-requisites: LATN 101 and 102 or their equivalents
The subject of this course is Latin poetic verse, including selections from Catullus, Horace, Martial, Statius and other Latin poets.
Outcomes:
Students should be able to translate the works with proficiency, and demonstrate knowledge in detail about the authors, their poetry, and the various poetic styles they employed, as well as deeper understanding and appreciation of the historical, social and intellectual contexts and influences pertaining to them

LATN 344 Roman Elegy (3 Credit Hours)
Pre-requisites: LATN 101 and 102 or their equivalents
The subject of this course is Latin elegiac poetry, including selections from Catullus, Tibullus, Propertius, and Ovid.
Outcomes:
Students should be able to translate Roman elegy with proficiency, and demonstrate knowledge in detail about the authors, their poetry, and Latin elegy, as well as deeper understanding and appreciation of the historical, social and intellectual contexts and influences pertaining to them

LATN 345 Horace (3 Credit Hours)
Pre-requisites: LATN 101 and 102 or their equivalents
This course focuses on selections of the odes, satires and epistles of Horace, set against the backdrop of late Republican and Augustan Rome.
Outcomes:
Students should be able to translate the selections of Horace with proficiency, and demonstrate knowledge in detail about the author, his poetry, the various styles he used, as well as deeper understanding and appreciation of the historical, social and intellectual contexts and influences pertaining to them

LATN 346 Juvenal (3 Credit Hours)
Pre-requisites: LATN 101 and 102 or their equivalents
This course focuses on the satires of Juvenal, set against the backdrop of Flavian Age Rome and the Roman Empire.
Outcomes:
Students should be able to translate the satires with proficiency, and demonstrate knowledge in detail about the author and his satires, as well as deeper understanding and appreciation of the historical, social and intellectual contexts and influences pertaining to them

LATN 347 Early Christian Poetry (3 Credit Hours)
Pre-requisites: LATN 101 and LATN 102 or their equivalents
This courses centers on early Christian poets such as Ausonius, Prudentius and Fortunatus, and their works.
Outcomes:
Students should be able to translate the selected works with proficiency, and demonstrate knowledge in detail about the authors and their poems, as well as deeper understanding and appreciation of the historical, social, spiritual, and intellectual contexts of their works

LATN 351 Roman Comedy (3 Credit Hours)
Pre-requisites: LATN 101 and 102 or their equivalents
This course focuses on the genre of Roman comedy, including selected plays of Plautus and/or Terence.
Interdisciplinary Option: Shakespeare Studies
Outcomes:
Students should be able to translate selected texts in Roman comedy with proficiency and demonstrate knowledge in detail about the authors and their comedies, as well as deeper understanding and appreciation of the historical, social and intellectual contexts and influences pertaining to them

LATN 360 Lucretius (3 Credit Hours)
Pre-requisites: LATN 101 and 102 or their equivalents
This course centers on translation and understanding of the De Rerum Natura of Lucretius.
Outcomes:
Students should be able to translate the poetry of Lucretius with proficiency and demonstrate knowledge in detail about the author and his work, as well as deeper understanding and appreciation of the historical, social and intellectual contexts and influences pertaining to it

LATN 361 St Augustine's Works (3 Credit Hours)
Pre-requisites: LATN 101 and 102 or their equivalents
This course focuses on translation and understanding of the works of Saint Augustine.
Interdisciplinary Option: Catholic Studies
Course equivalencies: LATN361/CATH361
Outcomes:
Students should be able to translate these works with proficiency and be able to demonstrate knowledge in detail about the author and his works, as well as deeper understanding and appreciation of the historical, social and intellectual contexts and influences pertaining to them

LATN 362 Cicero's Philosophical Works (3 Credit Hours)
Pre-requisites: LATN 101 and 102 or their equivalents
This course focuses on translation and understanding of the philosophical works of the orator Cicero, including, for example, De Amicitia.
Outcomes:
Students should be able to translate the philosophical works of Cicero with proficiency and be able to demonstrate knowledge in detail about the author and his works, as well as deeper understanding and appreciation of the historical, social and intellectual contexts and influences pertaining to them

LATN 364 Seneca (3 Credit Hours)
Pre-requisites: LATN 101 and 102 or their equivalents
This course focuses on translation and understanding of the works of the philosopher and playwright, Seneca.
Interdisciplinary Option: Shakespeare Studies
Outcomes:
Students should be able to translate the selected works of Seneca with proficiency and demonstrate knowledge in detail about the author and his works, as well as deeper understanding and appreciation of the historical, social and intellectual contexts and influences pertaining to them

LATN 373 Workshop-Secondary School Latin (3 Credit Hours)
Pre-requisites: LATN 101 and 102 or their equivalents
This course examines the objectives, standards, methods of presentation, testing, audiovisual aids, and desirable backgrounds for the teaching of Latin in secondary schools. This course is for prospective teachers of Latin and is taught in cooperation with Loyola's School of Education.
Course equivalencies: X-CIEP373/LATN373
Outcomes:
Students should be able to demonstrate knowledge of these objective and standards, etc, as well as be able to employ them effectively in classroom contexts

LATN 387 Medieval Latin (3 Credit Hours)
Pre-requisites: LATN 101 and 102 or their equivalents
This course focuses on readings in medieval Latin prose and poetry, as well as on comparison with classical Latin style and content.
Interdisciplinary Option: Medieval Studies
Course equivalencies: X-LATN387/MSTU384
Outcomes:
Students should be able to translate the selected works of the course with proficiency, and demonstrate knowledge in detail about their authors, as well as deeper understanding and appreciation of the historical, social and intellectual contexts and influences pertaining to them

LATN 388 Readings in Latin Literature (3 Credit Hours)
Pre-requisites: LATN 101 and 102 or their equivalents
Students study a selected range of masterworks in Latin literature. (This is a special topics course in Latin.)
Outcomes:
Students should be able to translate the selected works with proficiency and demonstrate deeper knowledge and understanding of selected Latin literature, its style and its possible interpretations

LATN 389 Readings in Latin Literature (3 Credit Hours)
Pre-requisites: LATN 101 and 102 or their equivalents
Students study a selected range of masterworks in Latin literature. (This is a special topics course in Latin.)
Outcomes:
Students should be able to translate the selected works with proficiency and demonstrate deeper knowledge and understanding of selected Latin literature, its style and its possible interpretations

LATN 415 The Latin Fathers (3 Credit Hours)
This course examines the writings of the early church fathers such as Ambrose, Jerome, and Augustine, looking through them to the historical and intellectual background of Western patristic thought.
Outcomes:
Students should demonstrate knowledge in detail of the texts, their authors, and their times; They should engage critically with current scholarship of the field

LATN 418 St Augustine (3 Credit Hours)
This course focuses on selected works of Augustine, set against the backdrop of Roman society and Mediterranean Christianity in the later Roman period.
Outcomes:
Students should demonstrate knowledge in detail about Augustine, his world, and his works; They should engage with current scholarship addressing Augustine's religious, intellectual, literary, social, and historical contexts and influences

LATN 431 Caesar (3 Credit Hours)
This course focuses on Julius Caesar's Commentaries on his Gallic War and the Civil War against Pompey the Great. It examines the texts within multiple frameworks in order to understand the political, military, intellectual, and historical contexts of Caesar's writing.
Outcomes:
Students should demonstrate detailed understanding of Caesar, his texts, and contexts; Additionally, students should engage critically with scholarship relating to Caesar and his place in the world

LATN 432 Livy (3 Credit Hours)
This course focuses on Livy's Ab Urbe Condita and the historical, intellectual, literary, and cultural contexts of this work. It considers Livy's place in Rome's historiographical tradition and the relationship of his work to the emerging imperial government.
Outcomes:
Students should demonstrate detailed understanding of Livy and his historical and cultural context; Additionally, students should engage critically with scholarship on Livy and his work

LATN 435 The Annals of Tacitus (3 Credit Hours)
This course focuses on the historical writings of Tacitus and the historical, intellectual, literary, and cultural contexts of their production. It considers Tacitus's place in the Roman historiographical tradition and the relationship of his work to the Roman imperial administration and socio-political systems of power.
Outcomes:
Students should demonstrate detailed understanding of Tacitus, his texts, and contexts; They should engage critically with scholarship relating to Tacitus, his project, and his world

LATN 436 The Histories of Tacitus (3 Credit Hours)
This course focuses on the historical writings of Tacitus and the historical, intellectual, literary, and cultural contexts of their production. It considers Tacitus's place in the Roman historiographical tradition and the relationship of his work to the Roman imperial administration and socio-political systems of power.
Outcomes:
Students should demonstrate detailed understanding of Tacitus, his texts, and contexts; They should engage critically with scholarship relating to Tacitus, his project, and his world

LATN 438 Suetonius (3 Credit Hours)
This course focuses on Suetonius's Lives and the historical, intellectual, literary, and cultural contexts of his writing. It examines the genre of biography in the ancient historiographical tradition and explores Suetonius's depiction of the Roman Emperors as both biographical and literary creations.
Outcomes:
Students should demonstrate detailed understanding of Suetonius and his historical and cultural context; They should engage critically with current scholarship on Suetonius, his project, and his milieu

LATN 441 The Aeneid of Virgil (3 Credit Hours)
This course centers on Vergil's Aeneid. It examines the poem's place in the tradition of Latin epic poetry with attention to Vergil's literary technique. It explores the poem's participation in and resistance to the Augustan imperial political program. It will touch on the enduring influence of the poem.
Outcomes:
Students should demonstrate detailed understanding of Vergil and the Aeneid; They should engage critically with scholarship concerned with Vergil's social, cultural, and literary contexts and influences

LATN 442 Earlier Works of Virgil (3 Credit Hours)
This course centers on Vergil's Eclogues and/or Georgics. It examines the genre(s) of bucolic and/or didactic poetry, focusing on Vergil's developing technique, especially his commitment to Alexandrian and Neoteric principles. It will explore how these poems respond to the uncertainty of the political moment and emergence of Imperial rule.
Outcomes:
Students should demonstrate detailed understanding of Vergil and his early poems; They should engage critically with scholarship concerned with Vergil's social, cultural, and literary contexts and influences

LATN 443 Catullus (3 Credit Hours)
This course centers on Catullus, the literary genres and traditions in which he worked, and the particular moment of late-Republican neoteric poetry. It considers Catullus' importance as an innovator in Latin poetry, his place in the social fabric of aristocratic Roman culture and how his poetry reflects that culture.
Outcomes:
Students should demonstrate detailed understanding of Catullus' works, literary technique, and world; They should engage critically with scholarship relating to Catullus' historical, social, literary, and intellectual contexts

LATN 444 Roman Elegy (3 Credit Hours)
This course focuses on Latin elegiac poetry through selections from Catullus, Tibullus, Propertius, and/or Ovid. The course explores elegy as a peculiarly Roman literary tradition linked closely to the Late Republic and Early Empire. It examines the recurrent themes and techniques of Latin Elegy.
Outcomes:
Students should demonstrate detailed understanding of Latin elegy; They should engage critically with scholarship concerned with the historical, social, intellectual, and literary contexts of this genre

LATN 445 Ovid (3 Credit Hours)
This course centers on the poetry of Ovid, the genres in which he wrote, and the cultural, social, and historical contexts in which he worked. It explores Ovid's role as both a continuator and innovator within the Roman literary tradition and how his poetry responds to his socio-political moment.
Outcomes:
Students should demonstrate detailed understanding of Ovid and his work; They should engage critically with scholarship concerned with Ovid's social, cultural, and literary contexts and influences

LATN 446 The Odes of Horace (3 Credit Hours)
This course centers on the Odes of Horace, their relationship with traditions of lyric poetry and Roman Alexandrianism, and the cultural, social, and historical contexts to which Horace responded. The course examines Horace's poetic technique and his engagement with the emerging Augustan imperial regime.
Outcomes:
Students should demonstrate detailed understanding of Horace's Odes and their place in Roman poetry; They should engage critically with scholarship addressing Horace's work and various contexts

LATN 451 Roman Comedy (3 Credit Hours)
This course focuses on Roman comedy, including selected plays of Plautus and/or Terence. It examines the place of these works in the traditions of New Comedy more generally, exploring how they are produced in Latin as theater in the context of Roman Republican society.
Outcomes:
Students should demonstrate detailed understanding of the authors, the comedies, and their traditions; They should engage critically with scholarship addressing the plays multiple contexts and influences

LATN 455 Tragedies of Seneca (3 Credit Hours)
This course focuses on selected tragedies of Seneca. It examines these works in light of the traditions of ancient tragic drama and Latin literature more generally. It also explores the connection of these plays to Seneca's Stoic philosophy and the imperial regimes of Claudius and Nero.
Outcomes:
Students should demonstrate detailed understanding of Seneca's tragedies; They should engage critically with scholarship addressing Seneca's literary, philosophical, cultural, and historical contexts and influences

LATN 461 Lucretius (3 Credit Hours)
This course centers on the De Rerum Natura of Lucretius. It examines Lucretius' literary technique and his place in the Roman tradition of hexametric poetry. It also explores Lucretius as a major exponent of Epicurean philosophy and the scientific world view of that philosophical tradition.
Outcomes:
Students should demonstrate detailed understanding of Lucretius' work and its significance; They should engage critically with scholarship addressing Lucretius' literary, philosophical, cultural, and historical contexts and influences

LATN 462 Philosophy of Cicero (3 Credit Hours)
This course focuses on the philosophical works of Cicero and the Roman reception of Greek philosophical thought. It explores Cicero's role as a conduit into the Roman world for Greek ideas, including his contribution to the establishment of a philosophical vocabulary, and the enduring influence of his work.
Outcomes:
Students should demonstrate detailed understanding of individual works and Cicero's greater project; They should engage critically with scholarship addressing the various contexts and influences of Cicero's treatises

LATN 488 Readings in Latin Literature I (3 Credit Hours)
This course offers extensive and in-depth study of selected works of ancient Roman literature. The course includes consideration of these works in their social, historical, and literary contexts-that is, both as part of a tradition and as responses to particular moments in Roman social history.
Outcomes:
Students should demonstrate detailed understanding of the authors studied and their work; They should engage critically with scholarship concerning each author/work and their various contexts

LATN 489 Readings in Latin Literature II (3 Credit Hours)
This course offers extensive and in-depth study of selected works of ancient Roman literature. The course includes consideration of these works in their social, historical, and literary contexts-that is, both as part of a tradition and as responses to particular moments in Roman social history.
Outcomes:
Students should demonstrate detailed understanding of the authors studied and their work; They should engage critically with scholarship concerning each author/work and their various contexts

LATN 499 Directed Study (3 Credit Hours)
This course frames extensive and in-depth study of a selected author or topic involving Latin language or literature written in Latin, for graduate students to pursue under the direction of a faculty member of the department.
Outcomes:
Students will engage with current scholarship in the field of the investigation, and will demonstrate significant learning

LATN 546 Seminar in Roman Satire (3 Credit Hours)
This course investigates Roman verse satire and its traditions through selections from Horace, Persius, and/or Juvenal, considered in their social, historical, and literary contexts. The Romans claimed satire as the one truly Roman genre: this course will explore the key themes and techniques animating the genre and its tradition. They should engage critically with scholarship concerned with the historical, social, intellectual, and literary contexts of this genre.
Outcomes:
Students should demonstrate detailed understating about Roman Satire

Latin Amer Studies (LASP)

Discover, search, courses (p. 2661)!

LASP 196 Topics in Latin American Studies: Introductory (3 Credit Hours)
This is the 100-level special topics course. It is interdisciplinary in nature, and it may cover a wide variety of issues and topics related to Latin America and to Latinos in the U.S.
Outcomes:
Students who successfully finish this class will be able to demonstrate understanding of the topics covered in class, as shown in exams, papers, and other assignments designed to evaluate students

LASP 297 Special Topics (3 Credit Hours)
This is the 200-level special topics course. It is interdisciplinary in nature, and it may cover a wide variety of issues and topics related to Latin America. Topics will vary from semester to semester.

LASP 395 Capstone in Latin American Studies (3 Credit Hours)
Topics in Latin American Studies. Completes the minor in Latin American studies. This tutorial course serves an integrative purpose, requiring the student to focus on a specific issue or theme in Latin American studies research. Each student completes a research project integrating Latin American studies and his/her major field.
Interdisciplinary Option: Global Studies, Latin American Studies
Course equivalencies: LASP395/INTS395A

LASP 396 Topics in Latin American Studies-Advanced (3 Credit Hours)
This is the advanced special topics course. It is interdisciplinary in nature, and it may cover a wide variety of issues and topics related to Latin America and to Latinos in the U.S.
Outcomes:
Students who successfully finish this class will be able to demonstrate a more complex and nuanced understanding of the topics covered in class, as shown in exams, papers, and other assignments designed to test students at an advanced level

Law (LAW)

Discover, search, courses (p. 2661)!

LAW 100 Well-Law for Students (2 Credit Hours)
The purpose of Law School is to equip students for the practice of law. We now know, however, that for many, the law school experience comes at a high cost to their personal wellness. The goal of this course is to provide students with the introductory knowledge and tools necessary to begin to manage the stresses of school, work, and life in healthy ways. The blended learning design includes content accessed asynchronously along with live online interaction. The on-demand content consists of course readings, group discussions, wellness and meditation videos, and other self-care resources.

LAW 107 Illinois Litigation Racism, Injustice & Poverty (2 Credit Hours)
This course will explore why well over fifty percent of the cases pending in Illinois courts involve taking liberty, money, or homes from poor people and how race factors into this reality. While the course will explore the interrelationship of racism, injustice, and poverty, the course will be focused on training students to try cases is these courts and win cases for poor people. The objectives of this course are to (1) to prepare Loyola students to represent poor people in Illinois courts and (2) excite their imagination about social and legal change, while empowering them to see the law as a vehicle for change.

LAW 108 American Indian Law: Indigenous Justice (3 Credit Hours)
This course examines the legal, regulatory, ethical, policy and pragmatic aspects of indigenous cultural heritage and the role of anthropology and archaeology in the United States and globally. Topics include cultural resource management in public and private contexts, participation of stakeholders, and expert anthropological knowledge in legal contexts and public participation. Topics include: the Native American Graves Protection and Repatriation Act (NAGPRA); cultural patrimony; museums; the role of government; the role of the courts; the role of the United Nations; postcolonialism; decolonizing methodologies; social justice issues; tourism, environmental and cultural relationships; oral sources; case studies and other ways of knowing the past that are embedded in law and policy.

LAW 110 Labor and Employment Law in the Education Workplace (2 Credit Hours)
.This course, which meets once a week for two hours, will explore in depth labor and employment issues in the 21st century education workplace. Students will form teams -- representing individual employees, the union, and management- and advocate their respective positions in a variety of contexts, including collective bargaining, unfair labor practice proceedings, teacher discipline and dismissal proceedings, and contract grievance arbitration. Current events and contemporaneous developments will provide the backdrop for the course materials and class activities. Topics will include: tenure, reduction-in-force and seniority rights, and teacher accountability and evaluation of professional personnel under new education reform legislation; public sector bargaining trends in Illinois and nationally; the 2012 Chicago Public Schools teachers strike; LGBT issues, free speech, and workplace right of privacy.

LAW 111 Practical Skills Boot Camp (1 Credit Hour)
Loyola has prepared you to think like a lawyer. In this intensive Boot Camp legal practice seminar, learn to be a lawyer. This seminar will help bridge the gap as you transition from law school into private practice. You will gain the personal skills, practical skills, and business sense to succeed in your legal practice from day one. Among other things, you will learn to think and behave like a practicing attorney. You will learn how to create professional correspondence, organize your practice, interact with colleagues and staff, and build a consistent book of work. You will also learn substantive litigation and transactional skills that will enhance the quality of your legal practice from day one. And you will hear from prominent attorneys in the community as to what they look for in new lawyers and what makes a successful new lawyer.

LAW 113 Civil Procedure (4 Credit Hours)
An introduction to and analysis of the concepts and doctrines that govern the procedure followed in civil litigation, with a focus primarily on litigation pre-trial, reflecting reality. For example, various aspects of jurisdiction to bring suit, choice of law (Erie), as well as pre-trial process, including joinder of claims, parties, and discovery and motion practice are covered. Emphasis is placed on practice in the federal trial courts.

LAW 114 Advanced Legal Analysis (1 Credit Hour)
The class will strengthen students' analytical and reasoning skills. By the end of the course students will have a better understanding of how to read and extract information from cases, and synthesize multiple cases into law, as well as apply that law to new fact patterns.

LAW 117 Philosophy of Law (3 Credit Hours)
Philosophy of Law: Legal and Moral Issues of Economic Sanctions. This course will start with a brief overview of economic sanctions in the contexts of international relations and global governance, and will then look closely at the issues of effectiveness and humanitarian impact. Throughout the course we will draw on materials from a number of sanctions regimes, including South Africa, Cuba, Iraq, and Iran. We will examine a number of ethical topics, looking at the issues of intent, consent, and moral agency in the context of economic sanctions. We will also look at a number of legal issues: whether sanctions come into conflict with international human rights law, such as the International Covenant on Economic, Social, and Cultural Rights; the problem of extraterritoriality; and the recent cases coming out of the European Courts on asset freezes, such as the Kadi case.

LAW 122 Constitutional Law (4 Credit Hours)
An introduction to the United States Constitution. Subjects include the role of the United States Supreme Court, federalism, separation of powers, and individual rights under the Constitution. Particular attention is paid to judicial power and judicial review, national legislative power including commerce power, commerce clause limitations upon state power to regulate, and presidential power and authority in both international and domestic affairs. In addition, the course covers individual rights under the equal protection and due process clauses of the 14th Amendment to the Constitution.

LAW 124 Rapid Response Refugee Clinic (2 Credit Hours)
This one-time experiential offering will pull students into the fast-moving world of refugee law, policy, and practice. Students will join a lecture, held once a week, as they take on refugee cases in a "pop-up clinic" setting. Three day-long weekend clinical sessions will be held throughout the semester.

LAW 125 Sexuality and the Law (2 Credit Hours)
No course description is available

LAW 126 Corporate Compliance Programs (2 Credit Hours)
This is a Skills course. The course will cover the elements necessary to implement a basic compliance and ethics program in a company. Students will become familiar with the basic principles of the Federal Sentencing Guidelines that define an "effective" compliance program. Students will learn the fundamentals of the job of Chief Compliance Officer by working with compliance issues in the media, commercially available compliance training programs and compliance techniques used in major corporations.

LAW 127 Law and Psychology (2-3 Credit Hours)
For many years, the field of psychology focused primarily on mental illness. But more recently, many psychologists have begun to analyze happiness and to study the ways in which all people, healthy or ill, can increase their enjoyment of life. This course will explore the new field of hedonic psychology, evaluating its methods and examining its findings. We will consider whether legal policy can or should be shaped by these findings in an effort to help people become happier.
Outcomes:
Students will learn how the law affects people and will develop their own capacities to work in the law via an improved understanding of themselves and others; Through class discussion and projects, they will hone their abilities to make decisions in work and life and will ideally become more fulfilled and productive future members of the legal profession

LAW 128 Interprofessional Writing and Communication for Hlth Literacy & Hlth Equity (1 Credit Hour)
Students from various disciplines including communications, law, medicine, nursing, public health, and/or social work will learn the fundamental components for good writing and communication with patients. With a focus on low health literacy populations, students will review various documents that patients need to understand for making decisions about their health and wellness, for realizing their health care rights, as well as for ensuring their safety while using health care products. Students will have an opportunity to identify poor communications illustrated within medical appointment details and medication instructions, informed consent documents, medical power of attorney forms, arbitration agreements, and healthcare marketing material. Students will write collaboratively, and problem solve through simulated exercises and hypotheticals to determine how their respective professions can work together for addressing issues of low health literacy and in doing so enhance health equity. Relevant learning outcomes and skill development include: interprofessional teamwork, analysis, as well as written and oral communications.

LAW 130 Transactional Skills Seminar (2 Credit Hours)
The course will examine the lawyer's role in business transactions by looking at examples of two decidedly different transactions - the negotiation of commercial real estate leases and the structure of the purchase, ownership, and operation of a corporate aircraft. The practical skills and knowledge acquired by examining these examples can be applied to virtually all commercial transactions. The class will consider the art of negotiating those transactions - and will focus on the role of the lawyer in those negotiations. We will consider a variety of negotiating strategies and how to deal effectively with opposing counsel who may, or may not, share your particular strategy. In addition, the class will examine a corporate aircraft transaction - with a myriad of parties and opposing interests and regulations - with the goal of appreciating the juggling and balancing necessary to achieve the best result possible. Along the way, we will look at how there is not ONE way to do things, rather there are many ways and many strategies. The rules and processes taught in law school are there to provide guidance; they are not hard and fast rules about the way that a transaction must be done. That's one of the benefits of being a transactional lawyer - the rules are set by the parties as they negotiate. Students will be evaluated on the basis of classroom participation and attendance, a paper, and , in lieu of final exam, a one-on-one negotiation session with the instructor. Regular attendance is expected; if a student cannot attend class, please notify the instructor.

LAW 132 Contracts (4 Credit Hours)
An analysis of the formation, transfer and termination of contract rights and duties, and the legal and equitable remedies available upon breach of contract. This is a Juris Doctor Required course.

LAW 133 Judicial Practicum (2-3 Credit Hours)
The objectives of the course are to hone research skills, learn judicial writing skills, observe the rules of civil procedure in action, follow judicial ethics, and learn the appropriate etiquette in working with a judge and judicial law chambers staff. Students will work in a judicial chambers for 2 or 3 credits (110 hours or 165 hours of work respectively) and also complete the weekly course. The course will focus on building the skills to make this a successful experience by providing research, writing, and ethical scenarios and to translate the experience for future career planning. Students will present on a topic approved by the course instructor related to the judiciary.

LAW 135 Copyright (3 Credit Hours)
No course description is available

LAW 136 Law & Catholic Social Thought (2-3 Credit Hours)
On its website Loyola University Chicago defines itself as "Chicago's Jesuit, Catholic university." It also makes clear that Loyola is fiercely dedicated to promoting "social justice." Likewise, in its Mission Statement, the Law School claims to be "inspired by the Jesuit tradition" and that it seeks "to prepare graduates who will be ethical advocates for justice and equity." Did you ever wonder what this means? What is the justice that Loyola claims to support? There are, of course, many ways of defining justice, and many critical perspectives through which law may be examined: Law & Economics, Legal Positivism, Classical Liberalism, Rawlsian Welfare State Liberalism, Legal Feminism, Legal Realism (and its successor Critical Legal Studies) and Critical Race Theory. For each of these schools of thought there is a whole body of literature that addresses the basic questions of jurisprudence: What is law? What is justice? And what is the relationship between the two? What are rights? And where do they come from? How are law and morality alike, and how are they different? Is law simply the exercise of coercive power or is it something more? There is, in fact, an older school of thought from which these others are derived - a tradition that matches them in depth and rigor. The Judeo-Christian tradition has been thinking about questions of law and justice for well over two millennia. Moreover, since the late 19th century, with the advent of industrialization and urbanization and the new social problems brought on by these phenomena, the Catholic Church has been offering its reflections on questions of law and justice in a body of thought known as Catholic Social Teaching. This literature is composed of papal letters (called encyclicals), documents from the Second Vatican Council, and other magisterial texts. In the course we will read samples of this literature as we think about contemporary problems and possible legal solutions: poverty, racism, capital and labor, globalization, war and peace, environmental deterioration, the family, marriage and sexuality, cultural and religious pluralism. The course will not, however, simply be an historical review of abstract concepts and ideas within the tradition. Law is a practical art, and legal concepts and theories have meaning in application. They are best understood when their consequences are laid bare. Thus, in conjunction with the various documents from Catholic Social Teaching described above, students will also read a number of cases that will help them examine the meaning of these ideas in concrete terms. The aim of this two credit course is philosophical analysis and critical reflection. To this end, students will be required to submit a 2-4 page reflection paper every other week. The goal is for students to emerge from the course not only with a better understanding of law and justice, but with an appreciation for what their own beliefs might mean in the practice of law. The option of a third course credit is available for students who are willing to write an additional paper of at least 20-pages.

LAW 139 The Art of In-House Counseling (3 Credit Hours)
This course will introduce students to the evolving history, roles and responsibilities of in-house legal counsel. Students will investigate the skills and characteristics that contribute to successful and effective practice as an in-house counsel and explore the similarities and differences between in-house legal practice and outside legal practice. Topics covered during the course will include: the relationship between in-house counsel and his/her client; in-house counsel's role in adding value to his/her organization; advising and counseling clients; fact gathering and investigation; managing an in-house counsel to address a variety of situations in which an in-house counsel would be expected to act. Students also will observe experienced, practicing in-house counsel address similar situations and analyze the factors and considerations that contribute to effectively addressing the situations. Students will be expected to regularly attend and participate in class. There will not be a final exam in this course. Students will be evaluated on the basis of a final project (which will involve a class presentation and a written assignment or assignments) and class participation.
Outcomes:
Students will demonstrate the ability to analyze problems that in-house counsel comes across in the course of their employment

LAW 140 Criminal Law (3 Credit Hours)
This course introduces the elements of crime by teaching principles that apply to many crimes. These principles include the nature of criminal acts and of criminal fault, as well as defenses such as self-protection. Homicide and other specific crimes may also be discussed, as may theories of punishment. The primary materials are statutes -- in particular, the Model Penal Code and/or the Illinois Criminal Code. This is a Juris Doctor Required course.

LAW 141 Asylum Law (2 Credit Hours)
This course will provide an overview of U.S. asylum law and procedure, as well as international refugee law. Additionally, we will explore the politics and ethics of bordering practices, both domestically and internationally and within our own communities. In lieu of an exam, students will write a final paper.

LAW 143 Environmental Justice: Race, Class and the Environment (2-3 Credit Hours)
This course explores the disproportionate environmental burdens borne by communities of color and low-income people in the United States and the role of law in contributing to these inequities and in addressing them.
Outcomes:
After taking this course, students will understand the underlying causes and consequences of the disproportionate concentration of polluting industry in low-income communities and communities of color; After taking this course, students will be familiar with a variety of legal strategies and tools that can be used to combat environmental injustice

LAW 145 Gender Based Violence: Law, Practice, and Policy (2 Credit Hours)
Pre-requisites: None, except no 1L
The objective of GBV: Law, Practice, and Policy is to expand students' knowledge and understanding of the web of laws addressing gender-based violence while building practical civil litigation skills The course will begin by reviewing principles of gender- based violence and protections around safety, while also working with students on how to provide trauma-informed advocacy in intaking and representing a GBV survivor in practice. The course will cover civil state and federal housing and family law protections available to survivors of GBV while working through the building blocks of litigation in Illinois circuit courts: drafting a petition, motion to dismiss, and other responsive pleadings, and conducting an in-class oral argument and mediation. This course will help students understand not only the existence and purpose of laws protecting survivors of gender-based violence, but will also give students the opportunity to experience the challenges and considerations in the practical application of these laws in representing survivors in civil court.

LAW 146 Mass Incarceration (2 Credit Hours)
The class covers the rise of the carceral state from the 1970s onward, with a particular focus on the disproportionate impact on Black and Brown people. We trace the roots of the carceral state to slavery and its end, and then move into the war on drugs and war on crime. We will spend the semester exploring the causes of the carceral state (or mass incarceration), its consequences, particularly with respect to families and children and public health, and then we focus on how to address changes to it. Readings vary from poems and law review articles by people who have been formerly incarcerated to scholarship by historians and activists, and political scientists, and a few cases from the Supreme Court. We will have a few guest speakers throughout, as well. There are two short reflection papers assigned (6 pages each) and students are expected to participate in class discussion.

LAW 149 International Intellectual Property Law (3 Credit Hours)
Examines the growing importance of intellectual property in the international context. Covers the scope of protection granted trademarks, copyrights and patents in foreign jurisdictions so that effective comparisons can be made between foreign and domestic law. Explores the scope and substance of international treaties. Strategies for obtaining cost effective intellectual property protection in the global economy will be examined.

LAW 152 Property (4 Credit Hours)
The study of the legal principles governing intellectual property, personal property and real property, including the study of conveyancing, co-ownership, donative transfers, eminent domain, estates and future interests, landlord-tenant, land use controls and title assurance.

LAW 156 Abolition and Movement Lawyering (2 Credit Hours)
This class is designed to be a space for reimagining our world, and how we, as lawyers and future lawyers, can work to dismantle the systems of White supremacy and oppression that incarcerate, punish, and harm Black and brown people in the U.S. while failing to prevent, address, or repair harm or facilitate accountability. Abolition is not just about the dismantling or absence of systems, but as Ruth Wilson Gilmore states, abolition is about presence. Movement lawyering/community lawyering is about taking direction from directly impacted communities and from organizers, as opposed to imposing our leadership or expertise as legal advocates. What can we work to build that is life-affirming instead of life-destroying, that is in solidarity and not another manifestation of the underlying problems? This class will discuss the difference between reform and abolition, the history of abolitionist organizing in Chicago, and the historical and current role of lawyers in social movement.

LAW 158 Comparative Mass Incarceration (1 Credit Hour)
This course will explore mass incarceration and conditions of confinement globally, and compare and contrast racial and ethnic disparities in incarcerated populations, the global use of pretrial detention, its disproportionate impact and use on marginalized populations, and the sentencing and prison practices of countries such as Germany, the Netherlands, and the United States. The course will focus on the disproportionate impact of punishment and incarceration on those from Black and Brown communities and on migrant and refugee populations.

LAW 159 Tax Policy and Inequity (2 Credit Hours)
The objective of this course is to explore the history, evolution, and racial impact of tax policy in the United States. Students will explore the various theories of taxation's role in modern day society; examine the purpose and intent of tax on incomes, consumption, "sins" and assets; highlight the role interest groups play in tax policy and discuss the disparate impact such policy has on communities of color (namely black and brown). Students will be tasked with learning and discussing the intricacies of federal and state and local tax law. They will also write a tax policy that seeks to encourage and/or discourage a societal behavior, which will be discussed and analyzed from various stakeholders' perspectives.

LAW 162 Torts (4 Credit Hours)
A basic course in the substantive law governing compensation for injuries to property and to the person. Considered are intentional wrongs, negligence, malpractice, products liability and strict liability; invasions of personal integrity and emotional well-being; injury to tangible and intangible rights in property; liability insurance and alternatives; and damages. Other risk-bearing alternatives are considered and contrasted with the traditional common law theories. This is a Juris Doctor Required Course.

LAW 163 Climate Justice, Racial Justice, and International Law (1 Credit Hour)
The climate crisis is in the news on a regular basis, as wildfires, melting glaciers, mega-storms, floods, droughts, heat waves, and rising sea levels wreak havoc all over the world. While the climate crisis has often been depicted as a technical problem requiring technical solutions, this course will examine the emerging body of legal scholarship, reports by UN human rights experts, and case studies on the relationship among climate change, racial injustice, and international law. It will analyze the ways that international law contributes to these intersecting injustices and how international law can be used as a tool of transformation and resistance. Caused primarily by the greenhouse gas emissions of the world's most affluent inhabitants, climate change is an injustice because its impacts are experienced most acutely by those who contributed least to the problem and have the fewest resources to protect themselves from harm. These include Indigenous peoples, the small island states, racial and ethnic minorities, poor people, and those who reside in climate-vulnerable geographic regions, including tropical, coastal, and agriculture-dependent low-income countries. While most analyses of climate injustice focus on the impacts of climate change, this course will take a deeper dive into the origins of the fossil fuel-based global economy, and the harms it inflicts on states and peoples racialized as inferior throughout its life cycle historically and currently. For example, the Industrial Revolution, which launched the age of fossil fuels, was made possible by colonialism, slavery, and the international law doctrines that justified and facilitated these practices. In the post-colonial period, international law gave primacy to the rights of foreign investors engaged in natural resource exploitation, at the expense of the states and local communities in which these projects were located. These doctrines enabled European and settler colonial states to control the world's petroleum reserves in collusion with autocratic petro-states and transnational corporations. They also produced corporate impunity for human rights and environmental violations. Today, the extraction, processing, and combustion of fossil fuels has created "sacrifice zones" all over the world in territories belonging to peoples and nations that were colonially designated as inferior.

LAW 164 Mergers and Acquisitions (3 Credit Hours)
This course will introduce students to the issues that arise in merger and acquisition transactions. Students will study the legal framework within which merger and acquisition transactions and the negotiation and documentation of such transactions take place. Students will analyze the considerations involved in selecting various structural alternatives for merger and acquisition transactions, examine the dynamics of the merger and acquisition transactions negotiation process, investigate the various stages of merger and acquisition transactions and focus on the lawyer's role in adding value to such transactions. Students will also have the opportunity to study, evaluate, draft and/or negotiate various types of documents that are commonly encountered in merger and acquisition transactions (such as, confidentiality agreements, employee retention agreements, investment banker engagement letters, letters of intent and purchase and sale agreements.) There will be a take-home final examination. Students taking this class would benefit by having previously taken Business Organizations and Securities Regulation; these classes are not, however, required to take the course.

LAW 166 Education Law Practicum (1-4 Credit Hours)
Law 166-001 (Seminar): This online seminar addresses substantive education law issues and skill development tailored to the practice of education law. Topics to be explored may include systemic reform litigation in education law, special education litigation, school discipline reform, the role of implicit bias in school decision-making, litigation related to trauma-informed practices, bullying litigation, and receiving feedback. This seminar may optionally be paired with a field placement in the area of education law. Placement options include local organizations, school districts, law firms and government agencies. Students must separately register for the field placement component for 1-3 credits (Law 166-002). No permission is required for the seminar portion of this class. Students may enroll in this seminar without registering for the field placement component. Students registering for the field placement component (166-002) must enroll in the seminar component (166-001). This course satisfies the Skills and the Bias, Cross-Cultural Competency and Racism (BCCR) requirements. Law 166-002 (Field Placement): This section is the field work component of the Education Law Practicum. Students have the option to work in one of a variety of local placements where they will work under the supervision of practicing attorneys. Students may choose to provide either: (1) direct representation and legal assistance to children and families in need of special education services; or (2) representation of school districts in education law matters. Students may also work on educational policy matters. Placement options include local organizations, school districts, law firms and government agencies. Students may also participate in Loyola¿s Educational Advocacy Project as an alternative to an external field placement. For part-time students interested in placements outside of the Chicagoland area, additional placements can be identified and approved on a case-by-case basis. Students may register for 1 to 3 credits, depending on their level of time commitment to the field work and agreement of the placement supervisor. Because you will need to identify and obtain a field placement, permission of the instructor is required. If you are interested in participating in the Education Law Practicum, please complete this form: https://luclawschool.formstack.com/forms/application_for_the_education_law_practicum&r=&t=0&bc= . You will need to separately apply for a field placement, which you may do in advance of applying for the Practicum or after applying for the Practicum and receiving additional information on placement options. This course counts as an Experiential Learning (Live Client Experience) and a Skills Course. Law 166-003 (SUFEO): This section of the Education Law Practicum is restricted to students working on education law cases through Stand Up for Each Other Chicago (SUFEO). The course seminar will provide skills-building tailored to direct representation of students and families on school discipline, bullying, special education cases, and other education law matters. Students will be provided with guidance and supervision regarding practical and ethical issues related to representing children and families in these cases. Students will also work on aspects of the SUFEO project, including client intake, case advocacy, legal drafting, outreach to local organizations, know-your-rights trainings, training and mentoring to law student volunteers working on the project, and policy and systemic advocacy to address the barriers experienced by SUFEO¿s clients. (Ross/Moran) Stand Up for Each Other (SUFEO) Board Members will automatically be granted permission to enroll in this class. Other students who would like to seek academic credit for their participation in SUFEO's educational advocacy work should complete this form: https://luclawschool.formstack.com/forms/application_for_the_education_law_practicum&r=&t=0&bc

LAW 170 Race and Real Estate (2 Credit Hours)
The objective of this course is to understand the laws and policies, politics and financial systems in our country that established and sustained segregation, creating our cities' black slums, ghettos and urban neighborhoods. The course would address federal, state and local legal systems, with particular emphasis on Illinois and Chicago. It would cover the Fair Housing Act as well as the Kerner Report; FHA policies, including the Underwriting Manuals that led to redlining; zoning laws and urban planning; public housing and HUD's HOPE VI program; the legality of restrictive covenants; as well as case law related to each of these areas. And finally, this course would address where this has led us to today: the policies, laws and regulations that have attempted to reverse segregation, and those that continue to allow discrimination to continue by exploiting and financially devastating minority neighborhoods.

LAW 173 Advanced Education Law Practicum (1-4 Credit Hours)
This course is for students who have already completed the Education Law Practicum seminar course and field placement. Students will build on the knowledge and skills gained through the Education Law Practicum by engaging in a second field placement, either with an organization or firm where they have been placed previously or with a new education law-related placement. More information about available placements is available on Pearson. The application form is available here. The seminar component of this class will be conducted in-person for 6-8 sessions; the days and times will be selected based on instructor and student availability. This course includes an instructional component that includes seminar discussions and individual meetings with a faculty member to develop skills, enhance understanding of ethical and other practice issues, and discuss cases and legal issues in students field placements. The class aims to deepen students knowledge of current legal and policy issues related to educational inequity, with a focus on race, ethnicity, disability, gender, and their intersection and the role of lawyers in addressing educational inequities. Students have the option to work in one of a variety of local placements where they will work under the supervision of practicing attorneys. Students may choose to provide either: (1) direct representation and legal assistance to children and families in need of special education services; or (2) representation of school districts in education law matters. Students may also work on educational policy matters. Placement options include local organizations, school districts, law firms and government agencies. Students may participate in Loyola's Educational Advocacy Project as an alternative to an external field placement. Students may register for 1 to 3 credits, depending on their level of time commitment to the field work and agreement of the placement supervisor.

LAW 175 Natural Resource Law (3 Credit Hours)
This is the broad survey course on Natural Resources Law. We will explore the protection and multiple uses of natural resource systems; regulation of federal public lands; forests; the National Park System; the Wilderness Preservation System; tribal lands; fish and wildlife management (including the Endangered Species Act and other sources of protection for fisheries and marine mammals); and rangelands. There will be a take-home final exam and in-class presentations.

LAW 176 International Trade Law (1-3 Credit Hours)
The primary goal of this course is to learn the fundamental or basic principles of the international trading system contained in the General Agreement on Tariffs and Trade (GATT) and the treaties of the World Trade Organization (WTO). Students will learn how rules of the GATT/WTO legal system are made and how they are used in domestic legal systems such as the United States. There are five additional learning goals in this course. First, students will gain factual knowledge about how the WTO is run and how disputes are resolved among WTO member countries. Second, students will learn to analyze and critically evaluate how GATT/WTO legal rules are applied in specific cases with a view to gaining and improving their problem solving skills in international trade law. Third, students will gain a broader understanding of how law works in an increasingly global and heterogeneous world and how the proliferation of mega-regional trade agreements and trade wars and COVID-19 have affected the global trading regime. Fourth, the course will promote student interest in learning more about international law on their own including where to find the resources they need for further study. Finally, the paper requirement in the course will develop writing and argument skills.

LAW 178 Antiracism Under Law (2 Credit Hours)
This course will examine the role of the law in replicating our nation's racial hierarchy as manifest across indicia of socio-economic well-being. The class will also analyze various legal means for disrupting this hierarchy. In particular the court will assess the underlying legal dynamics of all material racial disparities along with legal solutions for the diminution of such disparities. The course will take a social justice approach to the continued influence of race on social well-being. As such, the course will focus on the legal system's ability to secure broad-based and sustainable human development, and to actualize the full potential of the entire US population. The course will consider theories suggesting that law should promote the common welfare and secure liberty for all.

LAW 179 The Law of Jury Selection (2 Credit Hours)
This course will focus on the various legal and practical considerations that attorneys must face both during and following the jury selection process. The course will cover: constitutional issues; what must be proven to establish bias; the role of trial consultants (particularly in high profile cases); challenges to the array, challenges for cause and peremptory challenges; timing and procedural limitations; the significance of group dynamics; questioning techniques and the use of questionnaires; problems at trial and during deliberations; and the extent to which the parties may be entitled to examine prospective jurors in various areas of inquiry (such as occupation, education, knowledge of the case, legal and government experience, religious and educational beliefs). Students will participate in mock voir dire, prepare a draft questionnaire, and complete a final paper (7-10 pages).

LAW 184 Advanced Litigation Skills (2 Credit Hours)
Learning litigation skills task-by-task can leave the young practitioner with little guidance on how to form the overall strategy necessary to develop and present an effective civil case. While covering a wide range of specific skills, including opening statement and closing argument, the careful researching of local rules, techniques for examining witnesses, techniques for oral argument and applying a structured approach to settlement negotiations, this course will emphasize the aspects of these skills that support an overall civil litigation strategy. This course will require students to review a variety of materials in preparation for class, to participate in in-class exercises and to submit written work that displays the learning acquired through the in-class exercises. Evaluation of each student's performance will be based primarily on the student's written work.

LAW 185 Business and the Law (2 Credit Hours)
The majority of practicing lawyers represent businesses or individuals with business or investment interests. Unfortunately, the majority of law students have had limited exposure to business law and the first year curriculum offers few opportunities to explore this area. This course is intended to expose first year law students to the fundamental issues and perspectives that pervade business law. The goal is to make these topics accessible to all students, particularly those who have not taken many, if any, undergraduate courses in business, economics or accounting. The course will be divided into three segments. The first segment, entitled "The Law of Business," will introduce students to fundamental business and tax law concepts as well as transactional issues that business lawyers confront. These issues include the alternative ways of organizing a business (corporation, partnership or limited liability company) and the alternative ways of structuring a business acquisition or merger. The second segment, entitled "The Ethical Practice of Business Law" will explore the pressures on new lawyers to conform to an existing culture, how lawyers get into trouble, and how business law can be practiced in an ethical manner. The third segment, entitled "Developing a Financial Mindset" will introduce planning tools (e.g., the time value of money, compound interest) and the planning process in the context of both personal financial planning and business planning. Certain classes may be taught with other professors and practicing lawyers. There will be no final exam in this course. Students will be required to take a mid-term exam and to submit a short final paper. Class participation may also be taken into account. Students will also be expected to read the Wall Street Journal on a daily basis. This course is available to first-year students only.

LAW 189 Employment in the Gig Economy (3 Credit Hours)
No course description is available

LAW 190 Legal Writing I (2 Credit Hours)
Students read and analyze legal authority and learn how to apply the legal authorities to particular fact situations. Through a series of legal memoranda writing assignments, students develop their analytical and writing skills. Students are taught legal research methods through written exercises, research memos, and lectures. Second semester, the course builds on the basic writing, analysis, and research skills students have learned first semester and introduces persuasive writing skills. Students also learn how to present an oral argument to the court. Computerized research techniques are included in the course. In order to provide significant opportunities for instructor feedback, the first-year writing classes are organized into sections of approximately twelve students. Each section is staffed by both a legal writing instructor and a student tutor. This is a JD Required Course.

LAW 190R Basic Legal Research (0 Credit Hours)
This course is an introduction to the tools and sources of legal information you will need during your first year of law school and beyond. This course is a pass/fail component of Legal Writing I.

LAW 191 International Human Rights in Rome: Field Study (1 Credit Hour)
This 1-credit International Human Rights field study course will be co-taught by the School of Law and the School of Education to gain an interdisciplinary perspective on the advocacy work of international sites such as NGOs, schools, and international organizations in Rome. These sites are at the forefront of promoting and protecting human rights and fundamental freedoms of individuals or groups within the city of Rome, Italy and the Mediterranean. This is a pass/no pass course that will be delivered with the materials covered asynchronously for a total of 8 hours prior to May 25th followed by applied learning during specific site visits to be conducted on tentatively Sunday, May 26, the afternoons of May 28 and 29th. This course will have a 5 pages or 2500 word paper requirement due 4 weeks after the Rome Program ends.

LAW 192 Legal Writing II (2 Credit Hours)
Students read and analyze legal authority and learn how to apply the legal authorities to particular fact situations. Through a series of legal memoranda writing assignments, students develop their analytical and writing skills. Students are taught legal research methods through written exercises, research memos, and lectures. Second semester, the course builds on the basic writing, analysis, and research skills students have learned first semester and introduces persuasive writing skills. Students also learn how to present an oral argument to the court. Computerized research techniques are included in the course. In order to provide significant opportunities for instructor feedback, the first-year writing classes are organized into sections of approximately twelve students. Each section is staffed by both a legal writing instructor and a student tutor. This is a JD Required Course.
Course equivalencies: LAW 192 / LAW 591

LAW 193 Diversity and Inclusion: A Professional and Social Responsibility (2 Credit Hours)
This 2 hour course will examine the legal profession which remains one of the least diverse of American professions. Lawyers have unique and varying roles as counselors, advocates, confidants, government officials, adjudicators, and civic leaders. In this course, students will have an opportunity to learn about the legal profession's diversity and inclusion history and challenges, organizational and individual roles and strategies, and current research. This course will engage students with lectures, guest speakers, group discussion, and readings--all materials will be provided by instructors. There will be no cost to the students for materials utilized in this course. There will be a final presentation where students can discuss and elaborate on important topics in the legal profession. Students will gain a deeper understanding of how diversity and inclusion efforts intersect with professional responsibility and its impact on social justice.

LAW 194 Bar Exam Writing Skills (1-2 Credit Hours)
The Bar Exam Writing Skills courses focus on refining your memorization, analytical and writing skills and all skills that are necessary for the bar exam. Whether you need practice writing essays or synthesizing the facts and law and producing a legal work product, these courses will help you master your test-taking skills. This is a Bar course.

LAW 198 The Fundamentals of School Law (2 Credit Hours)
This course provides an overview of statutory, administrative and case law affecting Illinois school districts. Legal issues addressed include: powers and duties of the school board; compliance with open records and open meetings laws; teacher tenure, evaluation, reduction-in-force, and for cause dismissal; collective bargaining and labor dispute resolution; legal aspects of supervision, teacher/school liability, common law and statutory immunities; mandated child abuse reporting. Student issues include state law requirements pertinent to residency; discipline, drugs/weapons offenses, suspension and expulsion; federal and state student confidentiality laws.

LAW 201 Academic Tutor (2 Credit Hours)
Academic tutors assist first-year students with their doctrinal courses. This assistance includes holding office hours, reviewing outlines, and conducting skills workshops. Tutors are selected through an interview process. Academic Tutors receive up to two hours of ungraded credit for each semester in which they tutor.

LAW 202 Human Trafficking Seminar (2 Credit Hours)
The sexual exploitation and trafficking of minors has reached a crisis point, both in the United States and abroad. The United States Congress has responded to this ever-increasing threat by passing extensive legislative enactments aimed at deterring this pernicious activity, providing severe - and often controversial - punishment for those who engage in it. While federal and state prosecutions in this area are at an all-time high, law enforcement and prosecutors continue to miss critical opportunities because they fail to fully understand the nature of the threat, and lack a solid grasp on the integrated arsenal of statutory tools at their disposal. Similarly, members of the judiciary, as well as victim advocates and pretrial service officers, may appreciate the laws on the proverbial books, but often lack familiarity with the sophisticated means employed by organized criminal group and the role of public corruption involved in the large-scale exploitation of children. They also misunderstand the rationalization through which individuals engaged in the exploitation of children tend to self justify their conduct, and have never confronted the statistical realities challenging the belief in meaningful rehabilitation of sex offenders. Put simply, although the complex and inter-related legislative anti-exploitation and anti-trafficking framework is now the firmly established law of the land, its theoretical and practical nuances are widely misunderstood, and indeed are all too frequently not understood at all, by the very professionals entrusted with the difficult task of protecting humanity's most vulnerable. This seminar will start with the statutory analysis rendered more comprehensible through the vehicle of real-world examples from the experience of Judge Kendall who will explain the history and present-day reality of the federal response to child exploitation. The seminar will analyze the various laws that govern the roles of the stakeholders: prosecutors, defense attorneys, judges, immigration officials, pretrial services officers, and victim advocates. The seminar will further explore all of the victim issues that make these cases complex and challenging. Students will explore victims' needs, rights, and opportunities for redress including restitution and expungement of criminal records. Students will hear first hand from federal agents who have prosecuted human trafficking cases; will see and hear the evidence presented to federal juries, will hear from a victim of the crime, and will learn from those victim advocates who seek to redress the harms inflicted upon victims. The seminar will span two days and have multiple speakers and employ an interactive question and answer format. Students will be required to submit a 15 page paper on a topic of interest from the seminar for a final grade. This is a Skills course.

LAW 206 Sex Trafficking: International Comparative Law (1 Credit Hour)
This class will examine the ways countries attempt to regulate sex trafficking. This class will compare and contrast the Nordic and Dutch models of sex trafficking legislation. This class will engage a comparative analysis of each of the aforementioned nation's attempts to regulate sex trafficking, as well as relevant statistics.

LAW 208 Advanced Criminal Law (2 Credit Hours)
In this course, you make the choices that lawyers make in real-world cases. We break down how to apply statutes to fact patterns in a repeatable, step-by-step method, using excerpts from the Model Penal Code. We also hone skills such as eliminating errors in writing. Finally, we question some of the core values underlying our laws. There is no exam, and the grade is based primarily on class participation and on a final presentation in which you discuss a topic of your choice.

LAW 209 Law, Life and Jesuit Spirituality (2 Credit Hours)
Drawing from their legal and personal experiences the students will actively participate in this seminar styled course which examines complementary articles, films, Jesuit documents and Sacred Scripture as objective criteria for their personal reflection and class discussion. The goal of the course is to formulate and hone the skills of reflection, meditation and contemplation as means of developing a spirituality garnered from a Jesuit perspective. Students will be expected to present and lead classroom discussion, submit a brief weekly reflection paper, and present a summary at the end of the course. (Costello)

LAW 210 Evidence (4 Credit Hours)
An evaluation of the rules used to present information to a fact finder in a trial. The three primary units are the rules of relevancy, the rules governing witnesses, and the rule against hearsay. In addition, time is spent on privileges, writings, and demonstrative evidence. The Federal Rules of Evidence provide the focus. This is a Bar course.

LAW 212 Civil Rights (2 Credit Hours)
Pre-requisites: Constitutional Law
The course will focus on the post Civil War constitutional amendments (13th, 14th and 15th Amendments) and the various federal civil rights statutes that have been enacted thereafter in both the 19th and 20th centuries. These laws as a whole are designed to guarantee that all Americans receive equal treatment under law.

LAW 214 Race and the Law (2-3 Credit Hours)
This course covers interdisciplinary, critical perspectives on race and racism and the roles of law and history in shaping the meanings of race in the United States. We will study the histories of the major racialized groups in the United States: African Americans, Indians, Latinos/Latinas, Asian Americans, and Whites. We will also study the differing implications of enslavement, conquest, colonization, and immigration. We will explore how race and racism play out in selected areas such as equality, education and crime and explore significant current events and findings such as: important studies of implicit bias; the Voting Rights Act and allegedly race-neutral restrictions on voting; disparate treatment of minorities in the criminal justice system; and demographic changes and their implications. I expect each student to complete a 25-page research paper on a subject of her choice related to the course. I will work with you to develop a topic and to organize your research in productive ways. Your final grades will be based primarily on your papers, together with your preparation for and participation in class. I.E., you must also do the reading for the course to get anything out of it. There is no final exam in this course. This is a Skills course.

LAW 215 Domestic Violence Practicum (1-3 Credit Hours)
The Domestic Violence Law Practicum provides students with a live-client experience (LCE) through the provision of legal advice and brief services to families served by supervised visitation-exchange centers as part of the Justice for Families program. Student LCE work will be supervised by an experienced domestic relations attorney. Students who participate will be required to attend a seminar designed to complement the LCE work. Students will gain experience with a range of lawyering skills including client counseling, case planning, and written and oral advocacy. The practicum will provide students with training on the substantive law of domestic violence, family law and other areas of law that are likely to impact clients served by the supervised visitation centers. Supervised visitation center clients will sign up for advice an counseling sessions with law students on weekends and possible weeknight appointments. Parents who are utilizing any of the supervised visitation centers will need advice and brief service regarding modification or adjustments to the visitation related remedies in their Order of Protection. Any motions which follow this limited pro se support are filed on a self-represented basis and will not include student court appearances. Referrals for legal representation will be offered in instances in which this is appropriate.

LAW 216 Women and Leadership (1-2 Credit Hours)
Women & Leadership is a 1-2 credit, 7-week seminar course for second- and third-year law students that examines the obstacles that prevent women from reaching leadership positions in proportional numbers, and examines solutions and strategies for overcoming these obstacles. Over the course of 7-weeks, students will engage in dialogue in response to assigned readings, hypotheticals, podcasts, and video presentations such as TED Talks. Students also hear from guest speakers who will discuss their experiences and the decisions that helped shape their careers.
Outcomes:
Understand the status of women in the legal profession and the unique challenges might women face when navigating their career; Define different styles of leadership and how leadership impacts office culture and norms; Identify socioeconomic hinderances and strategies for overcoming these barriers; Attain a basic understanding of privilege and intersectionality and why these concepts are important in a discussion of women and leadership

LAW 217 International Climate Change Policy (1 Credit Hour)
Anthropogenic climate change has become one of the most significant environmental, economic, and societal challenges confronting the global community. This seminar will explore the legal, political, and scientific challenges involved in addressing and responding to climate change. The class will consider international strategies and laws, including the Kyoto Protocol, the Paris Agreement, emissions trading schemes, and approaches to involving the developing world in climate change mitigation.

LAW 220 First Amendment Rights (3 Credit Hours)
This course examines the history, theory, and jurisprudence of the First Amendment, with particular emphasis on the speech, press and religion clauses.

LAW 221 Administrative Law (3 Credit Hours)
This course examines the rules by which federal administrative agencies operate, including the source of administrative authority and procedures governing the exercise of that authority, and considers problems of delegation, agency rulemaking, adjudication and enforcement powers, judicial review of administrative action, and due process requirements.

LAW 224 Student Initiated Capstone Project II (1-4 Credit Hours)
This variable credit course may be repeated for a maximum of four credits.

LAW 231 Secured Transactions (3 Credit Hours)
This course examines the law of consensual liens on personal property under Article 9 of the Uniform Commercial Code. (I know; it sounds boring, but it's actually pretty cool.) The course deals with the use of personal property (both tangible and intangible) as collateral to secure payment or performance obligations. Course materials cover creation of the security interest, effectiveness of the security interest as against the claims of third parties, priorities of claims between competing secured parties and other lien holders and rights upon foreclosure. Having spent my career as a partner-level transactional lawyer (corporate matters, secured debt work, securitization, bankruptcy) at two large firms (Mayer Brown and Kirkland & Ellis) as well as several years as general counsel at a NASDAQ-listed company, I want students to get a deep sense of the practical considerations that should inform their work with the UCC. Article 9 is also tested for the bar exam, so this course will have some immediate pay-offs for law students, irrespective of their intended career path. I will use anonymous polling software to facilitate class discussions. Class time will be split between lectures that give the essential principles of each topic we study and interactive question periods as we work through hypothetical problems contained in the text book.

LAW 232 Bar Exam Fundamentals (2 Credit Hours)
Bar Exam Fundamentals is a two-credit course that will teach you the analytical and organizational skills necessary to enhance your bar exam preparation. In this pass/fail course, we will focus on a combination of substance and skill through the presentation of specific techniques for maximizing performance on all parts of the bar exam. The course will focus on the most heavily tested doctrine in three bar exam topics, exhibiting how those topics have been tested on the Multistate Bar Exam (MBE) and on the Multistate Essay Exam (MEE). In this class, you will learn and review heavily tested subtopics, learn essay and MBE test-taking strategies, increase proficiency in taking MBE questions, and learn how to write a passing bar exam essay answer. You will receive individualized feedback on written assignments that will help you hone your writing skills and give you the tools you need to successfully self-grade during bar prep.

LAW 233 Bankruptcy (3 Credit Hours)
This course will provide a comprehensive survey of basic bankruptcy law. We will devote roughly equal time to consumer bankruptcy and business bankruptcy. Throughout the course, we will touch on the economic, political, and ethical issues underlying bankruptcy's competing goals: providing overextended consumer and business debtors with a fresh start and satisfying creditors' claims in an orderly, fair way. There are no prerequisites. Students' grades will be based on classroom participation and a take-home final exam. (Krivinskas-Shepard) This course will provide a comprehensive survey of basic bankruptcy law. There are no prerequisites. Students' grades will be based on a take-home final exam. (Rosenberg)

LAW 236 Entertainment and Sports Law (2 Credit Hours)
This seminar will introduce students to the real world(s) of sports and entertainment law, examining the separate and distinct bodies of law and practices of both, while giving due to the many commonalities between the two fields, from intellectual property to professional contracts. As legal issues in both sports and entertainment law frequently appear in the headlines, this course will address up-to-the minute issues, while covering the seminal topics and cases within each, both in litigation and transaction. Guest lecturers may participate, as their schedules permit. As there will be efforts made to accommodate guests relevant to this course, the syllabus will be in flux. Further, attendance and class participation are required, making up a significant portion of the grade along with a take-home final examination. Reading assignments can be significant on a weekly basis relevant to the upcoming week's topic.

LAW 240 Criminal Procedure:Investigation (3 Credit Hours)
This course provides a general overview of the criminal justice process, and focuses on the constitutional and other legal requirements that affect law enforcement practices and procedures. Specific topics may include confessions and interrogations, identification procedures, arrest, search and seizure, surveillance, police entrapment, and the right to counsel. This is a Bar course.

LAW 241 Criminal Procedure: Adjudication (3 Credit Hours)
This course is designed to provide a detailed examination of the criminal judicial process, pre-trial to post-trial, and includes an examination of: prosecutorial discretion, right to bail, pre-trial motions, double jeopardy, plea bargaining, discovery, jury selection, various trial issues, appeals, and post-trial remedies. This is a Bar course.

LAW 242 International Criminal Law (1-3 Credit Hours)
This course will explore the main differences in European and American Criminal Law and Procedure. It will feature a discussion of the Amanda Knox case, and discuss the different aspects of trial procedure in both systems.

LAW 244 Cyberlaw (2-3 Credit Hours)
The emergence of the Internet and digital technologies that enhance human abilities to access, store, manipulate, and transmit information has brought with it a host of new legal issues that lawyers preparing to practice in the 21st century will need to understand and address. This survey course will introduce and explore specific problems in applying law to issues arising on the Internet. Topics expected to be covered include the bounds of jurisdiction, privacy, governance and regulation, online commercial transactions, content protection (through intellectual property, contract, and technological means), and cybercrime. There are no prerequisites. Grades for the course will be based on a take home exam and class participation.

LAW 245 Family Law (3 Credit Hours)
This course is a study of cases, statutes, and legal principles relevant to the formation, regulation and dissolution of the family unit, and to legal obligations which arise incident to the family relationship. The course considers: ante nuptial agreements, marriage, annulment, divorce, division of property incident to divorce, maintenance, custody, visitation, child support, adoption, termination of parental rights, and ethical issues. (R. Anderson) This course is a study of cases, statutes, and legal principles relevant to the formation, regulation and dissolution of the family unit, and to legal obligations which arise incident to the family relationship. The course considers: ante nuptial agreements, marriage, annulment, and divorce, division of property incident to divorce, maintenance, custody, visitation, child support, tax law, and ethical issues. (S. Coupet) This course is a study of cases, statutes, and legal principles relevant to the formation, regulation and dissolution of the family unit, and to legal obligations which arise incident to the family relationship. The course considers: ante nuptial agreements, marriage, and divorce, division of property incident to divorce, maintenance, custody, visitation, child support, reproductive technologies, adoption, and termination of parental rights. (K. Baker)

LAW 246 Advanced Mediation Advocacy Practicum (1-4 Credit Hours)
Students will represent pro se clients pursuing employment discrimination claims at mediations taking place at the Equal Employment Opportunity Commission (EEOC) or the Illinois Department of Human Rights (IDHR). Under the supervision of an experienced attorney, students will work in pairs and conduct an interview and counseling session, develop a negotiation strategy and represent the client at the mediation conference. Representation is limited to the mediation. Class time will be devoted to discussions of pending cases and assigned readings in client counseling, mediation advocacy, and basic employment law. This course, which has won high praise from both students and clients, is open to students who have some prior experience with interest - based dispute resolution through a negotiation, mediation, client counseling or ADR course or through participation on a team. LLM students are also eligible for this class. Eligibility for a Supreme Court Rule 711 student license (43 credit hours completed) is preferred but not required. This course counts as a Skills and Live Client Experience course.

LAW 249 Human Trafficking: Advancing Protections for Children Practicum (1-2 Credit Hours)
Section 001 (2 credits) Human trafficking is one of the most egregious crimes that occurs both globally and domestically. While there have been improvements to both global and domestic responses to human trafficking, children who are compelled into forced labor and sexual exploitation continue to be the least identified cohort of survivors. This interactive and interdisciplinary seminar will explore the legal, social, and practical issues confronting children who are survivors of human trafficking, as well as an examination of efforts to prevent and intervene in this social problem. While the seminar will focus on unique issues affecting (international and US citizen) survivors of child trafficking, students will gain knowledge and skills that are applicable to other marginalized populations of children and youth, as well as adult trafficking survivors. The seminar will begin with an overview of a history of anti-slavery statutes and case law to provide a foundation for contemporary international human rights and domestic laws addressing human trafficking. Students will be introduced to various frameworks, including criminal justice, public health, gender-based, human rights, and abolitionist, to combat human trafficking. Students will analyze current research in the field, and explore interventions utilized by both legal, social and public health providers. Assignment and exercises will include mock interviews, critical analysis of legislation, and a final project addressing ways to advance the movement to combat child trafficking in the United States. Scholars and practitioners in the field will provide occasional guest lectures. Section 002 (1-2 credits) The live client experience (LCE) component of this course is available for a select number of students who are interested in augmenting the seminar with experiential work (legal research, advocacy, direct services) that intersects with child trafficking. This can include working on projects at the Center for the Human Rights of Children (CHRC), or placement at an off-site organization providing legal services to human trafficking survivors. Applications for Section 002 are required, and student selection will depend on the number of positions available at selected external sites and CHRC (minimum 6). Participants will be selected by Katherine Kaufka Walts, Director, Center for the Human Rights of Children. While students with a demonstrated interest in this topic will be prioritized, no prior training or experience is required. Note: 1L students are not eligible for LCE credits.

LAW 250 Estates (3 Credit Hours)
This course is a study of the basic legal devices available for transmission of wealth at death: intestate succession, the will, "non-probate" transfers, and trusts. Recurring themes include the special role of lawyers representing clients in these matters, the advantages and disadvantages of different wealth transmission techniques, and the social ramifications of our wealth transmission policies and laws. This is a Bar course.

LAW 251 Commercial Real Estate Transactions (2 Credit Hours)
Commercial Real Estate Transactions focuses on the basic principles of commercial real estate acquisition, financing, and development (including leasing). The course follows a mixed use commercial development project through acquisition (letter of intent through purchase contract and closing) and development (leasing/sale of condominium units). The course highlights the purchase and sale contract, easements, zoning and environmental regulations and closing; the loan process and financing issues; as well as leasing. The course emphasizes the role of the lawyer in real estate transactions and the broad issues involved in modern real estate practice.

LAW 254 Consumer Law (2-3 Credit Hours)
The course surveys consumer law from a transactional perspective, beginning with issues of deception, including false advertising, related to consumer purchases. There is coverage of the law of consumer credit, including issues of discrimination, overpriced credit and deceptive credit practices, and standard form contracts of adhesion and recent Supreme Court rulings covering binding arbitration and class actions. Consumer remedies and special issues of consumer fraud on the Internet complete course coverage. The course is especially recommended for students interested in public interest law.

LAW 255 Business Skills for Name, Image, and Likeness and the Law (1 Credit Hour)
While Name Image Likeness (NIL) is primarily associated with sports, it touches a broad spectrum of individuals; businesses, retailers, fashion designers, magazines and museums; and agencies and organizations that represent musicians, athletes, artists and businesses. This course will examine the intersection of multiple disciplines through exercises in the NIL landscape.

LAW 258 International Cross-Cultural Negotiation and Communication Skills (1 Credit Hour)
This course will introduce students to practical cross-cultural negotiation and communication skills useful in international settings. The course will address the work of Geert Hofstede and the 6D cultural dimensions model as well as the writings of Edward T. Hall regarding high and low context communicators. Learning objectives include: understand basic interest-based negotiation theory; apply negotiation techniques to engage in a problem-solving conversation; identify culture clusters based on the Hofstede 6D model; understand personal cultural preferences in comparison to a country of interest; and use appropriate questions, listening skills and other communication strategies to increase understanding and obtain results that meet client needs and interests. Students will learn though assigned readings, simulated negotiations, feedback, and guest speaker(s).

LAW 262 Genetics Law and Policy (2 Credit Hours)
This course will examine a variety of legal, policy, scientific, social, and ethical issues relating to genetics and genomics. This course will take an interdisciplinary approach to examination of these issues, drawing upon a diverse set of reading materials within the casebook. Topics to be covered include the intersection of law and science generally; genetics research and bioethical issues in human subject research; commercialization, ownership, and patenting; genetic testing and reproduction; gene therapy research and gene editing; access and liability issues; clinical applications of genetics research; and genetic privacy.

LAW 265 Black Traditions in International Law (1-2 Credit Hours)
International Law has neglected the experiences and perspectives of African Americans, in particular, and of black peoples more generally. Yet, international law was central to justifying black subjugation through slavery, colonialism, and their aftermaths today. The purpose of this course is to uncover those hidden histories. In doing so, Black Traditions in International Law will express and foreground the goals, histories and thoughts of black struggle that are not represented in journals, books and other materials of international law that we use to teach international law today. The premise of the proposed course is that Black traditions have long offered visions of global order that challenge the color blindness embedded in accounts of international law. Black traditions counter visions of international law that order the world in accordance with predominantly European and white conceptions of hierarchy and order. They challenge distortions black and non-white peoples as inferior and therefore fair game for subjugation and dehumanization through practices such as slavery and colonialism and the continuing legacies of these practices to date. Learning (c) To unearth the various ways is obscured or how it becomes invisible in international law and what international lawyers are doing about it.
Outcomes:
(a) To demonstrate the centrality of international law both as a site that legally justified black disempowerment but also as a resource for black empowerment including through efforts by African Americans today through United Nations processes such as those established under the United Nations Convention on the Elimination of Racial Discrimination; (b) To demonstrate how racial differences have been mobilized to create and sustain inequality in a wide variety of places through rules of international law and why this is very important for understanding how domestic law intersects with race

LAW 266 Intl Law Review Executive Editors (1-3 Credit Hours)
Students enroll in this course to receive credit for their work as Executive Editors on the International Law Review.

LAW 267 International Law Review Senior Editors (1-2 Credit Hours)
Students enroll in this course to receive credit for their work as Senior Editors on the International Law Review.

LAW 268 International Law Review Members (1 Credit Hour)
Students enroll in this course to receive credit for their work as Members on the International Law Review.

LAW 270 Business Organizations (4 Credit Hours)
This course gives brief treatment to agency and covers partnership as an alternative to the corporate form. Principal emphasis is on the law as it applies to the organization and functioning of corporations. The course focuses on structure and mechanics, capitalization, distributions, organic changes, and duties and liabilities of directors, officers, and controlling shareholders. The federal securities acts are introduced with particular attention to Rule 10b-5. Substantial attention is given to the special problems of the close corporation. This course counts as a Bar course.

LAW 272 Educational Advocacy Practicum (1-3 Credit Hours)
Students study education law in a weekly seminar while also getting live client experience working on education cases supervised by ChildLaw clinical faculty. Students help represent low- and mid-income families in a range of educational disputes including discipline, special education, and bullying.
Outcomes:
Advocate effectively for preK-12th grade students by conducting culturally responsive client intakes, identifying relevant education-law issues, and implementing appropriate legal and non-legal remedies; Communicate and collaborate with stakeholders to advance client interests: present clear, evidence-based arguments in school meetings and written correspondence

LAW 273 Refugee Law and Policy: Welcoming the Stranger (2 Credit Hours)
Refugee law is one of the most dynamic and rewarding areas of law. Nonetheless, in observing the administration of refugee law, we bear witness to some of the United States' most egregious human rights abuses and the abandonment, in some cases, of the rule of law. The goal of this course is to teach students the history of the norm of non-refoulement, in doing so to understand how political, religious, racial and other minority groups are intended to be protected (from persecution, from torture, and from death). Students will learn the history of the Refugee Convention-for whom the document was written, and, consequently, who is left out of protection (considering for example the treatment of victims of private-sphere persecution or climate refugees). Students will learn the role of xenophobia, racism, and subjugation of the "other" in this case the "alien"-other in administering the rule of asylum law. The class will contain a comparative analysis of refugee law under various international and domestic systems. Finally, students will learn about the treatment of child asylum seekers in the United States-namely, the treatment of children as adults in miniature and the "othering" that facilitates this deviant practice.

LAW 276 Criminal Law Practicum (1-3 Credit Hours)
This 2 to 4 credit course will help students develop a broader understanding of the criminal justice landscape. Students will be exposed to practical and substantive issues, garner a better understanding for what it means to practice criminal law, and be exposed to current and historical policies that have helped to shape our criminal justice systems. This course includes a mandatory weekly classroom seminar as well as either a field placement or research component. Students who pursue the field placement option will work in an approved agency under the supervision of practicing attorneys. Students must secure unpaid externships on their own using each agency's own hiring procedures for law students. Past field placements have included the Cook County State's Attorneys Office, The Law Office of the Public Defender - Cook County, and Office of the State Appellate Defender, as well as various legal aid agencies and law firms that have criminal law as a practice area. Approved field placements are available on the Pearson system (https://law-luc.12twenty.com/Login). You may also contact the course instructor at bkantor@luc.edu for additional options or if you have questions about the placement component. Field placement students should register for section 1 seminar (one credit hour) & as well as section 2 (live client experience). Students seeking live client experiential (LCE) credit must enroll in the field placement section 2. Students must complete 55 hours at their placement for each hour of live client credit sought. Accordingly, students may register for up to 3 credit hours of section 2 if they anticipate completing 165 hours at the placement over the course of the semester. Students do not need to have a field placement to participate in this course. Students who do not to work at an approved field placement site will conduct in-depth research on an approved criminal law or policy matter during the semester. Students who pursue the research component will present their findings to the class at the end of the semester. Research students only need to register for section 1 (for 2 credit hours). Whether the student elects to do a field placement or research, each student will have the opportunity to observe courtroom proceedings during the semester. This is a graded course. There is no final exam.

LAW 277 Intellectual Property Litigation (2 Credit Hours)
This advanced intellectual property seminar course uses a simulated litigation format to implement the fundamental concepts introduced in the survey IP class. The goal is to provide students with "real-world" intellectual property litigation experience. Students will be divided into plaintiffs and defendants and will participate in various aspects of a theoretical dispute including prefiling investigations, discovery, claim construction for patents, and summary judgment. Through this process the course will cover both practical and substantive aspects of pre-trial intellectual property litigation practice.

LAW 279 International Data Protection and Artificial Intelligence Law (1 Credit Hour)
This course will explore data protection, informational privacy, and cybersecurity laws around the world, and their intersection with civil rights. We will focus on laws that regulate technologies that can be used unfairly and discriminatorily, as in artificial intelligence, as well as policy strategies to promote fair and safe AI.

LAW 280 Federal Income Tax (3 Credit Hours)
This course introduces and analyzes the basic concepts underlying the law of federal income taxation. Topics include gross income, identification of the taxpayer, deductions, and timing of income, characterization and recognition. These concepts are developed through the study of the Internal Revenue Code, Treasury Regulations and case law. Students who might be interested in pursuing the Tax Certificate MUST take this course in the Fall of their 2nd year. Prof. Kwall's section of this course is only open to first year full-time students who are rising to second year full-time status.

LAW 281 Corp & Partnership Tax (3 Credit Hours)
Pre-requisites: Federal Income Tax (mandatory); Business Organizations is recommended
This course is intended to follow Federal Income Tax. It focuses on the income tax consequences associated with the three principal business forms: the corporation, the partnership, and the limited liability company. The tax issues confronted at the start-up, operating and winding-down phases are examined for each business form.

LAW 282 Law and Accounting (2 Credit Hours)
This course is intended to provide an understanding of basic accounting principles and their practical application in connection with the practice of law. There are no prerequisites and no requirement of a business background. Topics covered include fundamental principles of accounting for business enterprises; how to analyze and understand an income statement, balance sheet, and statement of cash flow; basic concepts of revenue recognition; conventions for capitalization versus expenses; and how to recognize possible manipulation of financial and accounting statements. Recent high profile accounting scandals such as Enron and WorldCom will also be explored.
Outcomes:
Students will become equipped with essential knowledge of the laws and accounting concepts concerning Generally Accepted Accounting Principles (GAAP)

LAW 285 International Law Review Associate Editor (1 Credit Hour)
Students enroll in this course to receive credit for their work as Associate Editors on the International Law Review.

LAW 287 Separation of Powers (3 Credit Hours)
This course will consider the dynamic nature of separation of powers in the American constitutional system, particularly with respect to the relationship between the executive and legislatives branches of the national government, but consideration will also be given to the role of the judicial branch and its interactions with the executive and legislative branches (to which the courts typically refer as the "political branches"). The readings will include some of the founding era documents, constitutional cases, materials such as presidential messages and statements, executive branch legal opinions, and secondary materials. Students will gain a working knowledge of the field through the required readings and develop seminar paper topics during the first part of the semester; they will present the results of their research to the class in the latter part of the semester and will submit papers at the end of the semester. The goal of the course is to provide students with a fundamental understanding of the separation of powers doctrine in the American system of government. They will be expected to show that mastery through classroom participation, oral research presentations, and the submission of final written papers.

LAW 289 Advanced Legal Research: Special Topics (1-2 Credit Hours)
This course is designed to help students learn how to perform legal research in specialized areas of law. The course will introduce students to statutes, legislative history, case law, regulations, state law, international law, and/or treatises and other secondary sources. The course will also help student learn and develop research strategies and techniques.
Outcomes:
By the end of the class, students should be able to identify different types of legal resources, recognize when to use those resources, know how to use them, and describe in writing and verbally their research results

LAW 290 Advanced Legal Research (1 Credit Hour)
In this course, you will explore more sophisticated and advanced areas of legal research, including judicial, administrative, legislative, and subject-specialized research resources. You will also learn about non-legal research resources which can be of value to attorneys.

LAW 293 Advanced Writing for Legal Practice (1-3 Credit Hours)
This skills-based course simulates a legal practice environment. Students complete a series of writing projects related to simulated case files or legal problems. Students are permitted to take multiple sections of this course, as different sections incorporate different practice areas and experiences. Advanced Legal Writing: Business Practice This course emphasizes and builds effective writing and communications skills in the transactional, business practice setting. The course will focus on a range of formal and informal documents and communication formats: drafting contract provisions and letters to clients and counterparties in transactional and pre-contentious settings; reviewing, interpreting, and editing the (often imperfect) contracts submitted by opposing counsel; preparing transaction task lists, due diligence memoranda or other internal communications for use by colleagues; and presentations to a board of directors or other client audience supported by written materials including PowerPoint visuals with substantive content and impact. Some attention will be given to ethics and professionalism in written content, including in the context of engagement letters with clients, declination letters with prospective clients, and conflict waivers among clients. Several sessions will also focus on special considerations when working and communicating with clients and counterparties in or from other countries where the laws, customs, practices, and language are different from our own. In-class sessions will typically be used for lecture and discussion to develop concepts and facts from selected readings and materials, which students will then incorporate in brief written assignments before the next class. There may be occasional in-class brief, flash quizzes based on the assigned readings to launch our discussions. Students will be graded based on written assignments, quizzes and exercises, and class participation. Advanced Writing for Legal Practice: Illinois Civil and Criminal Litigation The preparation of a case for trial calls upon a powerful kind of thinking that is useful in any field of law, as well as necessary to present the case at trial. This course provides specific training in advanced legal writing to build strength and maturity in the kind of analysis that a trial lawyer performs. The course focuses on the development of skills necessary for particular writing assignments that arise in the course of civil and criminal litigation. Students learn how to perform these skills through in-class discussion of the assignments and through the writing necessary to complete the assignments. Because practice in oral advocacy highlights ways in which a lawyer's writing can be improved, this course will call on you to participate in oral advocacy exercises as well as undertake the specific writing assignments. The course covers a wide range of skills, including the drafting of legal memoranda and pleadings, the preparation and presentation of motions, opening statements and closing arguments, the development of outlines to examine or interview witnesses, the use of discovery tools, and the application of a structured approach to settlement negotiations.

LAW 294 International Human Rights (1-3 Credit Hours)
This course offers an introduction to the theory and practice of international human rights law. Through course readings and rigorous discussion, students will learn about international and domestic laws and institutions responsible for the creation and operation of the human rights regime. The course will examine sources of international human rights laws including treaties, customary international law, and domestic law. The course will evaluate international mechanisms involved in human rights protection including the United Nations, regional mechanisms (such as the Inter-American, European and African systems) and various national courts and hybrid tribunals tasked with enforcing international human rights law. In addition to legal theory, the course will help students understand the practice of human rights law with an eye toward understanding the place of the United States in the support of and adherence to human rights norms.

LAW 296 Legal Writing Tutors (1-2 Credit Hours)
Legal Writing tutors work with students in the first-year writing program. They attend all classes of their Legal Writing section, hold regular office hours, and help students develop their research and writing skills.

LAW 297 Legal Technology (1 Credit Hour)
This course will introduce students to a wide variety of law office technologies, including law firm use of everyday software programs like Adobe Acrobat and Microsoft Word, Excel, and Outlook, plus law-firm-specific programs for document automation and assembly, time and billing, case management, e-discovery, and others as time permits.

LAW 301 Police Accountability (3 Credit Hours)
This course examines how the law regulates policing in the United States. We will spend part of the class exploring important court decisions related to police accountability. We will also study other legal mechanisms designed to combat police misconduct, like civil litigation, criminal prosecution, and federal oversight. Ultimately, this course will encourage students to consider whether existing regulatory tools effectively combat police misconduct, and whether these regulations impair the ability of law enforcement to fight crime.

LAW 302 Intellectual Origins of "Othering" in the Law of Nations (2 Credit Hours)
Today, many nations and peoples with formal legal equality are not, in practice, treated equally in international relations. One reason for this is that some nations and peoples were once unequal under prevailing law and legal theory. This course surveys key Western political and legal thought that led to "othering," or legal inequality, in the "Law of Nations," which was a general body of law that eventually became what we today call "international law." After setting out key concepts and themes, the course traces the evolution of thought regarding: the nature of human societies, the interrelationship of human societies, the rights and rules of war, and the acquisition and possession of land by peoples and nations. As necessary, students will be required to review relevant geopolitical history that both influenced and resulted from this evolution. A note of caution: this course will encounter detestable concepts, such as the persistent idea that some humans were "natural slaves," "infidels," "savages," or "barbarians" unworthy of equal legal or moral status or treatment. These concepts played a significant role in legal and moral justifications for colonization and other subjugation, including dispossessing indigenous peoples of their native lands. During the course, students will be required to independently research (at least 1 book or 3 significant scholarly articles) and consider the influences of this history on a contemporary issue in the U.S. or international legal system. The final grade will be determined by a student's effort in completing short reflection papers for each reading assignment, and the quality of a final seminar reflection paper that considers the course as a whole in relation to the student's independent research.

LAW 306 Intellectual Property Colloquium (1 Credit Hour)
This a unique course offered once a year to a select group of students from Loyola and Chicago-Kent. Enrolled students read and discuss draft articles of nationally renowned professors in the field of intellectual property; the articles are typically draft law review articles. The discussions are focused on helping the professors to refine and improve their articles, such that a strong foundation of intellectual property is expected, even though there is no official pre-requisite. This course meets every week, but the students only meet in person roughly half the time, with the other half of the sessions done by videoconference. Three of the in-person classes will be at Chicago-Kent; for those days, the class will begin at 4:10 pm and end by 5:50pm to allow students adequate travel time. There is no final exam or research project required for this class. Instead, students are required to attend and actively participate in all classes. Students are selected based on an application that is available at: www.chicagoip.com.

LAW 310 Special Topics in Law (1-4 Credit Hours)
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate an understanding of specialized topics not otherwise covered by department regular course offerings

LAW 310B Special Topics in Law (1-4 Credit Hours)
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate an understanding of specialized topics not otherwise covered by department regular course offerings

LAW 310P Special Topics in Law (1-4 Credit Hours)
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate an understanding of specialized topics not otherwise covered by department regular course offerings

LAW 311 Advanced Evidence (2 Credit Hours)
This course offers an in-depth study of three important areas in the presentation of evidence at trial: character (e.g., habit, routine and prior bad acts, as well as traditional character traits), hearsay, and expert testimony. Although not a "techniques" course, students will be called upon to participate actively in the class discussions and simulation.

LAW 312 Street Law (3 Credit Hours)
Second- and third-year students teach about law and the legal system in Chicago area elementary and high schools. Students attend a weekly seminar and teach classes in their assigned school. In some schools, students have the option of preparing high school students for a mock trial competition. For that experience, prior or current enrollment in Trial Practice is advisable, but not required. This is a Skills and Comprehensive Simulation course.

LAW 314 Housing, Race, and Poverty (3 Credit Hours)
This course will focus on the enduring impacts of systemic racism and other structural inequities on access to housing. It will proceed in three stages: We begin with a historical review, during which we will explore the myriad laws, policies, and subsidies over the past century in particular, but also throughout American history, that have served to entrench racial segregation and ensure white dominance in access to housing. Next, we take a deep dive into the impacts of this history and the struggles of housing insecurity in the modern era. In addition to our failure to ensure housing to those in poverty, this portion of the course will also review the impacts of discrimination in housing based on race, gender, or LGBTQIA + status. In the final month of the semester we will turn to the topic of modern policy development, especially at the local level, to enable students to interrogate zoning policies and development patterns that have formed the context of their lives so far. We will take a critical lens to these routine practices and empower students to seek out better choices for their communities now and in their future. This is a 3-unit elective course, with substantial class discussion, that will culminate in a take-home exam.
Outcomes:
Prepare students to advocate for policies that provide equitable, safe, and quality housing opportunities to all, reduce car-dependency, and ensure access to resources for all households; Understand the history of racially discriminatory housing policies, including public housing, zoning laws, and other federal and local policies

LAW 315 Cybersecurity (3 Credit Hours)
In a seminar format, this course will introduce tenets of cybersecurity as it unfolds in multiple contexts: from legal, business, economic, and technical perspectives. This course takes an interdisciplinary approach to explain how cybersecurity law has developed and the challenges all attorney face in this rapidly developing area. This class also provides theoretical and practical introductions to the distinctions between privacy and cybersecurity, technical foundations needed to understand the challenges of securing complex systems, and an introduction to the legal concepts that motivate cybersecurity law and policy. This class also introduces processes and frameworks used by private and public institutions to manage cybersecurity programs as industry standards and best practices, and will help students engage in discussion about cybersecurity from a risk management perspective, essential both to business decisions and court outcomes.

LAW 319 Jurisprudence I (3 Credit Hours)
This course will consider a number of topics residing at the cutting edge where law and legal philosophy meet, including: What is law? Must law be related to morality? What is the interpretative function of courts? Should integrity constrain what courts decide? From whence does the duty to obey law come? Are there any human rights? Might some of these rights by manifested by our ideas of liberty, privacy and freedom of expression? Need we respond to terrorism by changing our values? What is distributive justice as compared with corrective or retributive justice? Are distributive justice questions implicated by court decisions involving affirmative action, gender, and sexual orientation? How is corrective justice manifested in tort and contract law? What is ownership? Is ownership of intellectual property morally justified? What is the relationship of causation to responsibility, and what is punishment and how is it justified. Students may take this three hour course either as a lecture course with a midterm and final exam or a seminar with a 20 page research paper due at the end.

LAW 323 Business Skills for New Lawyers (1 Credit Hour)
Currently, the legal marketplace requires new lawyers to have more skill sets than just the traditional one's law schools have provided in the past. To be competitive, 21st century lawyers will require a level of knowledge and proficiency in new areas including, but not limited to, fundamental financial matters, marketing and communication, and how to add value for clients. This course is an introduction to necessary business skills for new lawyers.

LAW 325 Conflict of Laws (3 Credit Hours)
Conflict of Laws considers what law to apply when two or more states or other jurisdictions have connections to a dispute. Suppose that a court has concluded that it has subject matter and personal jurisdiction, so it can "speak law" or "speak rights" to the parties before it (as the term "jurisdiction" suggests) but faces two or more sovereigns whose law arguably might apply. At its most basic, this course addresses the next question: which sovereign's law should the court speak? The course explores this and related questions in many contexts and the various methods that courts and scholars have proposed and adopted to answer them. We consider contrasting points of view regarding choice of law, jurisdiction, and recognition of foreign judgments, asking which policies best promote fairness and harmony both nationally and internationally and meet the federal constitutional requirements of due process of law and full faith and credit for the judgments of other states. A remarkable aspect of this course is the way it cuts across time and many practice areas, probably first introducing you to some of those areas and inviting you to wrestle both with historical legal questions and cutting-edge, or even future, issues.

LAW 326 Reviewing and Righting Wrongful Convictions (2 Credit Hours)
The course explores and addresses the causes of wrongful convictions. We will also explore how the law has changed in response to what we've learned about wrongful convictions. Among other factors, the course will specifically consider interrogations and false confessions, forensics and their (mis)use in the criminal law, and eyewitness testimony and memory and factors that may make it fallible. The course will draw from case law, national academy of science reports and related research, and multidisciplinary research in the areas of psychology, social sciences, and the law. The course will also focus on solutions: how have system actors responded? What changes in law have emerged? What changes in practice, including practices in prosecution or police departments. We address the systemic causes of wrongful convictions and consider the impact of such convictions on men and women of color, particularly on Black men and teenagers, who have been disproportionately impacted. In addition to the seminar component, the course will provide students experience addressing and advising the Minnesota Conviction Review Unit (CRU.) The Minnesota CRU is one of a handful of state-wide conviction review units in the country. In the wake of the murder of George Floyd, community members, legislatures, and policy makers sought ways to address the harms created by the criminal legal system. The CRU formed in 2020, when its partnership with the Great North Innocence Project led to grant funding from the U.S. Department of Justice. That same year, Attorney General Keith Ellison created an advisory board composed of diverse legal and community experts with direct experience in the Minnesota criminal legal system. Students in the course will work directly with the Minnesota CRU to assist the CRU in designing protocol and a prioritization of the hundreds of cases it has been asked to review. Students will not be involved in direct representation of any individuals, nor in the investigation of any individual claims. Rather, students will assist in reviewing and identifying the claims presented for review, and devising a system for their review. Students will work on the issues in small groups during every class. Assessments will be conducted in the following manner: Students will ask to write two short (3 pages) response papers during the semester; students' participation will also be considered; finally, the preparation and development of the experiential work will also be considered and weigh heavily in the grading.

LAW 330 Remedies (3 Credit Hours)
This course examines what courts, including juries, have the power to do in civil cases once a litigant shows he or she has been legally wronged or is threatened with legal wrong. The subject matter of Remedies, now a required subject of inquiry on most state bar examinations, is very broad, meaning, in part, that it draws on many topics of legal study. Constitutional Law, Torts, Contracts, and Federal Civil Procedure, in particular, bear directly on the subject matter of the course. Remedies is therefore sometimes called a "capstone course," because it provides students an opportunity to bring together what they have learned in other courses on substantive and procedural law. One important component of the course is review problem sets (problems similar to examination questions and often presaging them) that are discussed in class. Another is an emphasis on how the remedial issues that become the subject of appellate opinions arise in the first instance, and are presented and play out at the trial court level. Open to all second and third year students. This is a Bar course.

LAW 335 Labor Law (3 Credit Hours)
Labor Law provides students with a comprehensive review and study of United States labor history and policy, with an emphasis on the National Labor Relations Act and its amendments (NLRA), as well as the rights and obligations of individuals, employers and unions under the NLRA, unfair labor practices under the NLRA, the National Labor Relations Board and its enforcement and policy-making powers, a thorough review of how employees select and de-select a bargaining representative (a union), the collective bargaining process, and the role of arbitration in effectuating national labor policy. The course also includes related constitutional, preemption and state law issues.

LAW 337 Employment Law (2-3 Credit Hours)
The law governing the employment relationship is not limited to the union management confrontation of traditional labor law and the proscriptions of employment discrimination statutes. Both common law claims and other statutes have become major sources in challenging, e.g., drug testing, plant closings, lie detectors, whistleblowers, wrongful discharge. This course explores those legal problems. This is not a duplication of either Labor Law or Employment Discrimination; neither is a pre-requisite. The course focuses on the total configuration of statutes regulating employment as well as the emerging common law principles affecting employment relationships.

LAW 339 Biodiversity and Ecosystem Management (2 Credit Hours)
This course will review the issues impacting biodiversity and ecosystems in the 21st century, as well as the policy choices that federal, state, and local governments have made to address these concerns. We will cover biodiversity law, ecosystem management methods, and the emerging relationships these areas have with climate change law and renewable energy development. The grade will be based on a 20-25 page paper, presentation of that paper, and class participation.

LAW 340 Patent Law (2-3 Credit Hours)
Pre-requisites: Intellectual Property is recommended, but not required
This course is designed to expose students to legal issues concerning patents. The substantive law governing patents, including how they are obtained and enforced, is addressed. The format of the class includes lecture/discussions, as well as problem-solving and practical/clinical exercises. No technical background is required (although students should be aware that some patent cases may involve technical subject matter).

LAW 341 Educational Advocacy Lab (2 Credit Hours)
This experiential course explores the intersections between racism, poverty, disability, mental health, gender, and juvenile justice through the lens of education law. As part of their work in this class, law students will participate in simulations and exercises as well as conducting intakes with parents and students who seeking assistance from a free legal helpline for K-12 families facing educational barriers in school. The goal of the intakes is to identify families' legal issues relating to education and support advocacy related to children's educational rights in discipline, special education, bullying, language access, and school enrollment. These intakes will help elucidate the topics covered in the seminar portion of the class which grapples with how school systems historically oppressed low-income students of color and students with disabilities, the laws that were put in place in an attempt to mitigate these harms, and the practices that continue to disproportionately disengage vulnerable populations from school. By the end of the course, you should be able to: 1) describe the laws that protect students in K-12 schools; 2) conduct a culturally competent intake; and 3) illustrate ways that one can effectively advocate for educational equity in schools. This Educational Advocacy Lab course is a prospective elective course and is open to 1Ls, 2Ls, 3Ls, and 4Ls.

LAW 342 IP Bytes (1 Credit Hour)
Students in this course will be writing blog posts and/or editing blog posts for Loyola's IP Bytes blog under supervision of Prof. Ho.

LAW 343 Aviation Law (2 Credit Hours)
This course will serve as both an introduction to the laws of aviation and space in their broadest sense, as well as a survey of legal issues associated with, and bearing on modern aviation and space issues against the backdrop of fundamental business principles. It will incorporate all areas of law covered in the first-year law school curriculum to cover the basic legal frameworks of aviation and space law, including: international treaties; federal and state statutes; federal and state regulations; government regulation of aircraft including drones, air carriers, pilots, airspace, and airports (including land use); choice of law issues relating to all aviation and space related litigation; and case law. Current international space law in U.N. resolutions, treaties, and customary law will be identified as will the legal theory and principles used in the advancement of civil, military, and commercial space activities. Recent developments and more specific topics in space law will be covered, including: property rights and claim of sovereignty over outer space and celestial bodies, Outer Space Treaty requirement applicable to new proposed activities in space, commercialization and privatization of low earth orbit, orbital debris--legal issues and governance, intellectual property, and export control laws as applicable to space activities. Materials will consist of a textbook, as well as cases, statutes, treaties, regulations, and policy statements. Based on availability, guest speakers, employed in key aviation and space related positions internationally, will share perspectives, wisdom, and experiences.

LAW 346 State & Local Taxation (2-3 Credit Hours)
Pre-requisites: Federal Income Tax (Law 280) Recommended: Corporate and Partnership Tax (Law 281)
State and local taxes in the United States are numerous, diverse and constantly evolving. These taxes are also the source of some of the most significant controversies in tax practice today. This course explores the federal and state constitutional and statutory frameworks that underlay state and local income tax (corporate and personal), sales and use taxes, and as time permits, the other significant types of state and local taxes (property taxes, capital based franchise taxes and gross receipts taxes, etc.). While there is a special focus on Illinois, the course is designed to equip a tax practitioner with the tools to approach and understand the tax regimes in most states and localities.

LAW 347 Title IX Compliance in Higher Education (2 Credit Hours)
Students will learn the historical foundations and regulatory evolution of Title IX of the Education Amendments Act of 1972, tracing Title IX and its related regulations from their civil rights origins through the contemporary application of Title IX to admissions, athletics, sexual harassment, and employment. The course invites students to examine and critique all aspects of this important and controversial law, while also introducing the practical knowledge and skills needed by lawyers and education administrators to ensure (or challenge) Title IX compliance in higher education.

LAW 348 Law & Poverty (3 Credit Hours)
This course concerns those areas of civil law which most affect low income persons: landlord/tenant, federal housing, welfare, social security, Medicaid, Medicare, unemployment compensation, and civil rights. Other systemic issues will be explored, such as wealth discrimination, use of legal remedies to promote social change, and the delivery of legal services to low income persons. This is a Perspective Elective course.

LAW 349 Environmental Law (3 Credit Hours)
An introductory course aimed at introducing the major federal environmental statutes and the types of analytical and practical problems encountered in the practice of environmental law and in environmental litigation. The course is devoted to reading and discussion of statutes, cases, articles, and problems in the various environmental media: air, water, and land disposal of waste. The course examines the environmental justice implications of these statutes. Some technical science and economics concepts are included.

LAW 350 Land Use (2-3 Credit Hours)
This course explores land use controls such as zoning and subdivision regulations as exercised by local and state governmental units. The course analyzes the history of land use controls and explores topics such as flexibility and discretion, improper influence and corruption, alternative land use control schemes, suburban zoning and racial/economic exclusion, environmental protection by land use schemes, and growth control. In the process of exploring land use controls, the course analyzes the local institutions and procedures, constitutional issues, and the question of when an improper taking of property occurs in our legal system.

LAW 353 Bankruptcy Litigation Skills Seminar (3 Credit Hours)
This course will explore principles of Federal Bankruptcy Law, with particular emphasis on corporate reorganization under Chapter 11 of the Bankruptcy Code. The course will involve simulated law practice problems and other exercises to provide a hands-on approach to bankruptcy issues.

LAW 354 American Legal History (2 Credit Hours)
Deep controversies over political issues present now: immigration, health care, the power of states, even presidential power will be shaped and possibly resolved by law. This has been so from the Colonial era until this moment. The fundamental idea of this course is that, seen through the lens of history, law has molded and been molded by our social, political and economic relations. American law has been essential in determining the most fundamental questions affecting us: slavery, voting, property-holding, the status of women, the role of religion, what agreements we may make, who is responsible for accidents, whether wealth may be taxed, pollution, and countless other topics. The class critically surveys the legal concepts, forms and institutions that have shaped and been shaped by American society throughout its history.

LAW 355 Privacy Law (2 Credit Hours)
This course is designed to give students an in-depth introduction to the law of data and information privacy around the world as well as practical experience regarding how data privacy issues arise and are resolved. The course will follow a lecture and discussion format focusing on fundamental principles of data privacy and how they apply to various jurisdictions around the world with a particular focus on the United States and Europe. Along the way, students will be given a series of small assignments tied to the substance of the class material and structured around privacy-related problems with which a practicing privacy attorney might be faced.

LAW 356 Storytelling and Presentation Skills for Lawyers (2 Credit Hours)
This course is designed to train student lawyers in the art of storytelling and persuasive presentation for the courtroom. This course will focus on the goal of persuading juries by presenting complex material in narrative form with the ease of a conversation. Students will learn how to construct powerful stories that illustrate critical aspects of the case, using simple language, effective pacing, and vivid character development. Students will also learn how to use vocal inflection and body language to tell the story between the words, project confidence, and how to make a mental/emotional connection with the jury. Courtroom delivery is examined through principles that apply to all spoken interaction: use of space, use of visuals, and use of time. The course focuses concepts drawn from literature, theatre, and public speaking. Students learn the practical storytelling skills that apply to openings, closings, and other forms of legal presentation. Lectures will be viewed in advance of the course in a series of short videos. Each class day includes group work, solo work, and multiple short presentations. Students will study one case file before class and come prepared to develop the facts into a story.
Outcomes:
Ability to construct engaging narratives from case facts; Ability to speak with professional confidence; Ability to use common language for complex legal concepts; Ability to employ voice and body language to aid juror comprehension

LAW 357 Bar Exam Multistate Workshop (1-2 Credit Hours)
This unique workshop will help to prepare students for the Multistate Bar Examination (MBE). The MBE contains 200 multiple choice questions in the areas of constitutional law, contracts, criminal law and procedure, evidence, property and torts. In most states, including Illinois, the MBE constitutes one-half of the entire bar exam. Each workshop will focus on three of the substantive areas tested on the MBE. Students will receive test taking strategies, guidance in answering commonly tested questions, practice answering questions and analysis of their performance. This is a Bar course.

LAW 358 The Quest for Racial Justice in the Long 1960s (3 Credit Hours)
This course will consider the legal and social history of the quest for racial justice in the aftermath of Brown, primarily as it was experienced in the Fifth Circuit, which covered the entire of the Deep South and the Panama Canal Zone at that time.

LAW 361 Insurance Law (2 Credit Hours)
This course offers a basic study of the legal aspects of insurance. Problems common to all types of insurance are considered, including problems of policy interpretation, rights and liabilities of parties and companies, and the regulation of the insurance industry. In addition, special problems raised by particular types of insurance policies are considered. Course covers the comprehensive overview of laws, standards, concepts and remedies related to insurance, including: interests protected by insurance; selection and control of risks; insurable interest; the principle of indemnity; types and classifications of insurance; making, dealing with and termination of insurance contracts; agency, underwriting and claims handling; insurance regulation; subrogation; and extra-contractual liability.

LAW 362 Workers Compensation (2 Credit Hours)
This course will study the rights and responsibilities of injured employees and their employers under workers' compensation and occupational diseases statutes. Third-party actions also are examined.

LAW 366 Immigration Law and Policy (2 Credit Hours)
This course is a survey of U.S. immigration law with an emphasis on immigration policy and current developments. This class is intended to provide a foundation on which to understand immigration law as it currently exists. Topics include the history and legal foundations of U.S. immigration law and will cover family and employment-based immigration benefits, criminal immigration provisions, grounds of inadmissibility, detention/removal, refugee and asylum law, and U.S. citizenship.

LAW 367 Adv Electronic Discovery Skills (1 Credit Hour)
Electronic discovery ("e-discovery" or "eDiscovery" for all the hipsters that joined the practice after 2008 including Professor Tilot) is a discipline required to work with digital evidence during litigation, arbitration, and investigations. It is arguably the most complex part of modern civil litigation in the United States. Fast paced advancement in information technology and the resulting tsunami of digital evidence have proven to be profoundly challenging to the judicial system. The enormous volumes of data generated by litigants and the resultant costs of eDiscovery drive litigation and settlement strategy. The law, the courts and legal practitioners have all had to adjust. Both knowledge of eDiscovery and practical application of eDiscovery are differentiators for many clients choosing counsel and for law firms hiring litigation attorneys. This course will provide you with practical skills that will help you advocate for your clients and be cognizant of the challenges that eDiscovery can create from a litigation and cost perspective. These are must-have skills for litigators regardless of the area of practice. Law 367 will focus on early stage eDiscovery practice. Development of an eDiscovery strategy and negotiation of discovery protocols are two particularly challenging and vitally important aspects of litigation practice. The decisions and concessions made during these early stage tasks ripple throughout the course of a lawsuit. Law 367 will focus on developing the legal acumen and practice skills necessary to successfully navigate these two areas. The purpose of the course is twofold, providing students with a practical understanding of: ¿ eDiscovery concepts that are critical to discovery planning and successful conduct of party negotiations including Meet & Confer Sessions (Rule 26(f) Conferences) ¿ The impacts that early eDiscovery decisions have on case strategy and downstream outcomes

LAW 368 Higher Education Law (2 Credit Hours)
The administration of each college and university in the United States undeniably intersects with the American legal system in multiple ways. Indeed, in today's increasingly regulated and politically charged context, the enterprise of higher education may now be more impacted by the law than ever before. Students in this course will learn how foundational concepts across traditional legal areas (e.g., administrative law, civil rights, torts, intellectual property, etc.) apply to the unique domain of "higher education law" and will explore hot topics such as student discipline, free speech, diversity & inclusion, sexual misconduct/Title IX, and faculty and student unionization - to name a few. Course format will be entirely online, with most weeks taught synchronously and occasional class content delivered asynchronously.

LAW 370 Securities Regulation (3 Credit Hours)
This course introduces students to U.S. regulation of securities and securities markets. It focuses on, among other things, federal regulation of the offer and sale of securities and the public offering process under the Securities Act of 1933; exemptions from federal registration; the reporting obligations of public companies under the Securities Exchange Act of 1934; and antifraud and insider trading doctrine.
Outcomes:
At the end of the course, you will have acquired facility in reading and analyzing the securities laws and associated rules and applying those laws and rules to facts

LAW 371 International Business Trans (1-3 Credit Hours)
An introduction to the legal aspects of international business. The course emphasizes what lawyers need to know to represent clients doing business in the 21st century. It covers international treaties like the Convention on International Sales of Goods (CISG), international letters of credit, international commercial terms, conflicts of laws, international trade policy, the Foreign Corrupt Practices Act, international corruption, international arbitration, and import and export issues and how to draft international agreements. Students will actually draft an international distribution agreement, and will also deal with drafting issues for international agency agreements, international licensing agreements and international franchise agreements. A focus will be on advising clients who are doing international business, in order to help them engage in best practices and avoid pitfalls. (Moses)

LAW 372 International Law and Practice (3 Credit Hours)
This course introduces the structure of the international legal system, examining the sources of international law; the roles of states, individuals and other actors; methods of dispute resolution; and the status of international law in the U.S. The course examines topics of substantive law, including the use of force. Finally, the course examines how international law affects, and can be used in, domestic practice.

LAW 375 Antitrust (3 Credit Hours)
This course treats in depth many aspects of the Sherman and Clayton Acts. Emphasis is placed on an understanding of the policies and objectives underlying the antitrust laws and the extent to which enforcement of the antitrust laws has fulfilled those objectives. Areas examined include monopolies, price fixing, division of markets, exclusive dealing arrangements, boycotts, resale price maintenance, and mergers. Recent trends in sports and health care industry antitrust cases may be discussed. The impact of economic analysis in the antitrust area is also examined.

LAW 376 Student Initiated Capstone Project I (1-4 Credit Hours)
Student Initiated Capstone Project: Engaged Learning (comprehensive simulation and skills) This variable credit course may be repeated for a maximum of four credits. This course is limited to 3L students or rising 3Ls unless exceptional circumstances apply to allow 2L enrollment. The student-initiated capstone project provides students an opportunity to synthesize and apply substantive knowledge, legal analysis, skills and professionalism to a complex legal issue and receive feedback that facilitates their move to practice. Students may propose the provision of project-based legal assistance to a public, non-governmental or professional organization or another proposal that allows students an opportunity to exercise planning, project-management, problem-solving and other skills in a real-world setting, while at the same time developing the capacity for self-directed learning. Project requirements: Students must submit a written proposal for review and approval to the Associate Dean for Academic Affairs in the semester prior to enrollment in the course setting forth the following: - A description of the project, including its purpose and potential impact on the organization on whose behalf the project is being undertaken; - An implementation work plan, including time line and progress benchmarks; - The number of students participating in the project; - A plan for faculty supervision (student must seek out and secure the participation of a faculty adviser); - Memorandum of understanding from the relevant organization (if applicable); - The specific knowledge, skills and values that would be needed to bring the project to successful completion; - Proposed deliverables, which should include a mechanism for student reflection on the capstone experience; - Proposed criteria for evaluating student performance. Examples of approved Capstone projects: SUFEO (Stand Up For Each Other) suspension advocacy project, Dialogue De Novo a Loyola Law community and legal interview podcast, and Legislative Advocacy Supporting the LGBTQ+ Community project.

LAW 377 Intellectual Property Law (3 Credit Hours)
The course is an introduction to the law of intellectual property. This course is a pre-requisite for advanced courses in IP, but also a good survey of the area for students interested in pursuing other legal careers. The focus of the course is on understanding the distinctions and similarities between the various aspects of intellectual property law. The predominate focus on the course is on trademark, patent and copyright law (in about equal proportions), with some attention also devoted to the law of trade secrets. No technical background is expected or required.

LAW 380 Estate & Gift Tax (3 Credit Hours)
The course examines the basic components of the federal transfer tax system (estate tax, gift tax and generation skipping tax), and as their interrelationship. The course emphasizes the structure of the federal transfer tax system and includes suggestions for revision. Students who intend to take Estate Planning must complete this course. Federal Income Tax is highly recommended.

LAW 382 International Tax Law (3 Credit Hours)
Pre-requisites: Federal Income Tax or Permission Required This course focuses on U.S. income tax issues with respect to the foreign activities of U.S. taxpayers and U.S. activities of foreign taxpayers
Particular emphasis is placed on the corporate taxpayer. Foreign tax systems are not addressed specifically except to highlight differences from the U.S. system. Specific topics include the foreign tax credit, sourcing rules, the "effectively connected" doctrine, the concept of trade or business in the U.S. Code section 482 allocations, subpart F income, and tax treaties.

LAW 384 Tax Controversy Practice and Procedure (2 Credit Hours)
Pre-requisites: Federal Income Tax
This course covers procedures and strategies for representing clients and resolving Federal civil tax controversies arising from Internal Revenue Service audits and appeals, including litigation. The course also includes a discussion of tax penalty provisions and the ethical issues faced by advisors in structuring tax motivated transactions and resolving tax controversies.

LAW 385 Nonprofits (3 Credit Hours)
Nonprofit organizations play a crucial part in the U.S. economy. Among other things, they account for almost 10 percent of the wages paid in the United States, and they account for more than 5 percent of the country's GDP. This class will go over the laws that govern this nonprofit activity, including the organization and operation of nonprofit organizations under state law, the rules governing federal tax exemption and charitable deductions for donors, and the laws that govern noncharitable nonprofit organizations. By the end of this class, you should have basic knowledge that you will need to advise nonprofit boards of directors of their legal obligations and ensure that nonprofit organizations comply with relevant federal and state laws.

LAW 386 Advanced Corporate Tax (3 Credit Hours)
This course follows Corporate and Partnership Tax. The principal focus is on taxable and nontaxable acquisitions of a corporate business. The first part of the course focuses on taxable asset sales and stock sales; the second part explores and analyzes the detailed statutory and common law requirements with respect to "non-taxable" acquisitive reorganizations (mergers, stock/asset acquisitions), "nontaxable" divisive reorganizations (spinoffs, split-offs, split-ups) and other nontaxable corporate adjustments (recapitalizations, reincorporations). Please note: Corporate and Partnership Tax is a pre-requisite for this course.

LAW 387 International Environmental Law (3 Credit Hours)
International Environmental Law introduces some of the legal and policy responses to global environmental degradation. The course begins with an introduction to the international legal framework within which international environmental law has developed and provides an overview of the major environmental problems confronting the international community. The course then examines a variety of global environmental problems and the legal regimes that have developed to address these problems. The emphasis throughout the course is on the relationship among environmental protection, economic development, and social development (the three pillars of sustainable development) and on the conflicting goals and priorities of affluent countries (the Global North) and middle- and low-income countries (the Global South). The North-South divide will serve as the key analytical framework through which the course will examine global environmental governance - with particular emphasis on environmental justice and on the perspectives and concerns of historically marginalized states and peoples.

LAW 388 Global Access to Medicine: A Patent Perspective (3 Credit Hours)
This course considers how patents impact access to medicine in today's global economy. While there are many issues that impact access to medicine, patents are the highlight here because patents are often poorly understood, yet have an enormous impact on access to medicine. After all, the existence of a life-saving or sustaining drug is essentially of no utility if it is priced beyond reach. This class aims to broaden students' consideration of different views of patents in the context of exploring a growing web of international agreements that require nations to adopt specific types of patent laws that have implications for the cost of drugs. No prior knowledge of patents or international law is required, although students will learn some aspects of each by the conclusion of the course. Student grades will be based on class participation, as well as a final project and presentation; there will be no final exam.

LAW 389 Public Interest Law Seminar (1-2 Credit Hours)
2L, 3L, and 4L students may enroll in the Public Interest Law Seminar for 1-2 credits. The seminar is a survey of social justice issues, including mass incarceration and the prison industrial complex; inequities relating to education, the environment, health care, and housing; economic justice and labor rights; voting rights and public participation; and migration and immigration, among other topics. Additionally, the course examines how the topics discussed impact communities and intersect with various social identities and systems of oppression. The Public Interest Law Seminar is required to obtain a Public Interest and Social Justice Certificate. At the time of enrollment in the Seminar, students shall have completed or be in the process of completing the 30 required volunteer service hours. In addition, at the time of enrollment in the Seminar, students shall have completed or be in the process of completing a clinical program, practicum, or externship. During the Seminar, students will either write a publishable article on a public interest topic or complete a project related to the public interest. The length of the paper or hours committed to the project will depend on whether the student is enrolled for 1 or 2 credits.

LAW 392 Consumer Law Review Associate Editors (1 Credit Hour)
This is the course to provide credit to student editors of the Consumer Law Review.

LAW 394 Consumer Law Review Senior Editor (1-2 Credit Hours)
This is the course to provide credit to student editors of the Consumer Law Review.

LAW 395 Consumer Law Review Executive Editors (1-3 Credit Hours)
This is the course to provide credit to student editors of the Consumer Law Review.

LAW 396 Consumer Law Review Members (1 Credit Hour)
This is the course to provide credit to student editors of the Consumer Law Review.

LAW 399 Financial Wellness for New Lawyers (1 Credit Hour)
The purpose of this course is to prepare students for the opportunities and personal financial challenges they will encounter during their legal careers. My goal is to show each student that strong financial habits are crucial and beneficial for all types of attorneys and all levels of income. Students will learn that it is possible for all of us to obtain financial freedom, which translates into the power of choice. When we have the power to choose, we have the power to live a life that conforms to our personal values, including the strong values instilled upon us at Loyola. When we are not encumbered by poor financial choices, we are free to choose our professional focus, to share our talents with the disadvantaged members of our community, and to work on passion projects. Importantly, we can choose to spend more time with loved ones.

LAW 400 Corboy Fellows I (3 Credit Hours)
Corboy I is a graded course available to students in their first year of the Corboy Fellowship program. Instructor permission is required for enrollment. In the Corboy I course students earn 3 graded units in the Fall and 3 graded units in the Spring which includes mandatory participation in the evidence/trial practice boot camp at the start of each semester in addition to successful completion of course work in trial practice as required by the syllabus provided by the instructor. In the Fall semester of the course students develop the skills necessary to conduct a trial, including case analysis, opening statements, direct and cross examinations of witnesses, evidentiary objections and foundations for admissibility of evidence, and closing arguments. In the Spring semester of the course students build upon the basic trial advocacy skills developed in the Fall through in-depth case analysis and strategy, advanced direct and cross examination including expert witnesses, and use of the motions in limine to support the basis for evidentiary objections and foundations for admissibility of evidence. Each Fellow is required to apply their learned skills in a local, regional, national or invitation mock trial competition. The Corboy I course satisfies the requirements for Trial Practice I (LAW 411 or LAW 416) and Trial Practice II (LAW 412). Credit: Graded 3 units Fall; Graded 3 units Spring Permission is Required.

LAW 401 Corboy Fellows II (2-3 Credit Hours)
Corboy II is a graded course available to students after their first year in the fellowship program. Only students who have successfully completed the Corboy I course are eligible to enroll in the Corboy II course with instructor permission. In the Corboy II course students earn a maximum of 6 hours of graded credit for participation in mock trial competitions. Graded 3 units Fall; Graded 3 units Spring Permission Required
Outcomes:
Students will become more effective advocates

LAW 402 "Say Her Name:" Intersectional Feminism & Police Violence (4 Credit Hours)
Drawing on literature from criminology, Critical Race Theory, social ethics, and feminist/womanist thought, this seminar will apply an intersectional lens to state violence, from mass incarceration to police shootings of racialized people. This course will introduce students to the foundational concepts of Critical Race Theory and Intersectional Feminism. The course will reflect on the legal and intellectual context out of which white supremacy, white heteropatriarchy, hypermasculinity, and economic exploitation pervade our understanding of normativity as law and order. Students will map and critically examine the multiple trajectories along which the moral and legal authority of the state and its justifications for violence against its most vulnerable are engendered by the convergence of racism, sexism, and classism under the guise of normality, social order, common good, and even the will of God. Further, we will explore how to develop social interventions that disrupt these normative patterns of racialized state violence and facilitate the elimination of racially based, gender biased structures and practices in order to facilitate critical pedagogy, moral leadership, legal practice, and social movement organizing.

LAW 404 Client Counseling (3 Credit Hours)
This class will focus on the attorney client relationship, from interviewing perspective clients to counseling clients throughout the representation process from the perspective of the advocate. In addition to interviewing and counseling skills this course will focus on negotiation skills in the context of negotiation process that occurs between lawyer and client, and with opposing counsel from the perspective of the advocate. The goal is for students to gain an understanding of the best practices for client interviewing, counseling, and negotiation. As a part of this focus, students will learn a variety of models, strategies, tactics and conceptual frameworks to use when they analyze legal matters, counsel clients, and negotiate with their attorney counterparts in a matter. The course will emphasize communication and problem-solving skills with particular attention to communication, cognitive and emotional obstacles to effective negotiation and counseling. The course will also address public policy, legal and ethical issues that arise during legal representation. Interviewing, counseling, and negotiation skills are best learned from hands-on experience. Therefore, a substantial portion of this class will involve in-class exercises and role-playing simulations in small groups. Over the course of this class, you will have the opportunity to serve as advocates, clients, and observers. Every student will be assigned a role for each exercise and will be expected to contribute meaningfully to the learning experience through their role.

LAW 405 Business Practice Transactional Skills (3 Credit Hours)
This course counts as a Comprehensive Simulation and Skills Course
This course will promote skills essential to successful lawyers in business transactional practice: evaluating facts; understanding the central business objectives of clients as well as the goals of other parties to the proposed transaction or relationship; issue spotting and problem solving; and developing, advocating for, and implementing responsive strategies. Three parallel case studies will run through the course, illustrating the application of each topic to different types of client organizations: a Fortune 500 industrial company, an entrepreneurial family-owned business, and a medium-sized not-for-profit organization. The class will be presented with a series of problem simulations built around diverse, realistic business situations for these mock clients. Topics may include structuring; due diligence; letters of intent and similar preliminary documentation; suggesting changes to sample transactional documents that protect and advance clients' objectives; and deal implementation. The course will use traditional learning techniques as well as simulations throughout the semester to explore the role of the transactional lawyer in both a familiar, domestic U.S. context and an increasingly global marketplace. More than ever, business lawyers are afforded the opportunity - and the challenge - of coordinating and planning projects abroad in markets unfamiliar to them, as well as advising international clients with in-bound investments in the lawyer's home market. There are frequent occasions to interact with people whose experience, way of doing business, and goals are different from our own. They may be clients, partners, or counterparties. The professional opportunity in law practice is to become progressively adept at discarding jargon and misconceptions and bridging expectations among transactional participants and their advisors. The course will use primarily real estate project fact situations, since most students can easily imagine and relate to client objectives involved in buying, selling, leasing, or otherwise occupying real property, and since in the international aspects of the course the approaches to property rights and occupancy are so fascinatingly different country to country. But the course's learning points will also have general application in other types of commercial transactions. The course's emphasis on case studies and commercial transaction scenarios is also designed to act as a capstone course which complements and draws upon the students' prior coursework in contracts, real estate and commercial transactions, ethics, and government regulation. Students will be graded based on written assignments and exercises and class participation. There is no final examination for this course. (Hagy)

LAW 406 Mediation Advocacy (2-3 Credit Hours)
This course is designed to give you an important skill set: preparing for and negotiating on behalf of a client in a mediation setting. Unlike a trial, arbitration or appellate setting, where the people listening to you are neutral, in a mediation you are dealing with the decision makers on the other side, people who often behave in a hostile manner towards you and your client. Through practice you can acquire skills that will make you an effective advocate in a mediation setting, including learning to communicate information to the other side in a way they can hear it, identifying the various needs and interests of the parties (as opposed to just the positions), and approaching a dispute as an opportunity to solve a problem creatively. We will touch on the decision science (neuroscience, psychology, and behavioral economics) and cultural competency tools that can make you more effective, and also explore Online Dispute Resolution (ODR), which is quickly emerging as a way to resolve disputes using AI in combination with human mediators. The problem solving skills you will learn in this class can be tremendously helpful whether you are representing a client in a mediation, negotiating a deal in a business or government setting, or settling a case in a pre-trial conference with a judge. Clients appreciate lawyers with these skills because they are able to preserve business and family relationships while still obtaining results that protect client interests at a reasonable cost. Conflict management skills are also highly valued in non-traditional legal careers. The course will also prepare you to represent a client in positional negotiations where the mediator provides an evaluation of the case. Mediation skills are best learned from hands-on experience. Therefore, a substantial portion of this class will involve role-playing simulations. Over the course of this class, you will have the opportunity to serve as mediators, represent clients, be clients, and give feedback as observers.

LAW 407 Immigration Litigation: Admin Law Challenges to Immigration Policy (2 Credit Hours)
Pre-requisites: None, except no 1L
The objectives of the course are to learn how to apply principles of administrative law in the immigration context, in both individual immigration cases and systemic challenges to the immigration system. As to individual claims, students will learn about the numerous limits on judicial review and will study recent Supreme Court decisions that implicate federal court jurisdiction over immigration matters. As to systemic claims, students will learn about how to apply the Administrative Procedure Act to immigration policies, arguing for example that a particular policy is arbitrary and capricious and/or contrary to law, Finally, students will come away with an additional understanding of the pragmatic concerns regarding client standing and the availability of various remedies in the immigration context. The course will use a real world immigration policy as the foundation for this learning. Students will learn about a contemporary immigration policy and develop arguments to challenge or defend it. The principle assignments will be to draft a motion for summary judgment as well as a legal memorandum that addresses the issues that would likely be raised by opposition and potential responses to those arguments. During the classroom sessions, students will read and discuss recent cases challenging administrative policy changes in the immigration space in anticipation of the application of those cases in their final paper.

LAW 408 Restorative Justice Workshop (1 Credit Hour)
In recent decades, courts, communities and schools are returning to restorative methods to address family issues such as child guardianship; escalating violence in our schools and streets; reintegrating prisoners into their communities; making decisions about appropriate sentencing; and the role of victims in the process. In each context, the same issues must be addressed: who is involved, what are the needs of the parties, and what can be done to resolve the issues at hand. This one credit course will be conducted in workshop format over the course of one weekend. Students will be able to identify the core principles underlying the restorative justice paradigm, compare and contrast restorative and retributive justice models, and learn the basic elements of conflict resolution techniques through a restorative lens. We will address the history of restorative justice and students will be trained on a restorative dialogue process.

LAW 409 Negotiation Weekend Workshop (1 Credit Hour)
This skills training course is conducted in an intensive workshop format over the course of one weekend. Students will learn basic negotiation principles and skills and apply them during a series of simulated negotiations where they will play the roles of counsel and clients. The course will explore the negotiation process from negotiation planning to the execution of a final agreement. The course will cover concepts including, but not limited to, needs and interests, BATNA, information-gathering, dealing with emotions and option development. The course is ungraded; however, students will be evaluated by in class performance to determine a grade of pass or fail. Students may register for the Negotiation Weekend Workshop to receive one credit. It is an option to also register for the Client Counseling Weekend Workshops to receive a total of two credits for participating in both weekends. Registration in both courses is not a requirement and each course does stand-alone.

LAW 410 Legal Writing III (2 Credit Hours)
This course focuses on persuasive written and oral communication skills which are necessary for critical analysis and the competent representation of all clients. Students will explore all sides of an argument, provide evaluations of the merits of particular cases, and persuade the reader/listener of the student's position. Pre-requisites: successful completion of Legal Writing I and II. This is a Juris Doctor Required course.

LAW 411 Trial Practice I (3 Credit Hours)
Pre-requisites: Evidence
This graded 3 unit course offers the opportunity to develop the skills necessary to conduct a trial, including case analysis, opening statements, direct and cross examinations of witnesses, evidentiary objections and foundations for admissibility of evidence, and closing arguments. The student/faculty ratio is 8 to 1. The faculty rotate among the student groups and each student is given the opportunity to perform the exercises necessary to learn the skill. Each student is paired with a partner and required to conduct a bench trial and a jury trial during the course of the semester.

LAW 412 Trial Practice II (3 Credit Hours)
Pre-requisites: Evidence and Trial Practice I
Law 412 Trial Practice II, Section One This graded 3 unit course offers the opportunity to build upon the basic trial advocacy skills developed in the Trial Practice I course through in-depth case analysis and strategy, advanced direct and cross examination including expert witnesses, and use of the written and oral motions in limine to support the basis for evidentiary objections and foundations for admissibility of evidence. The student/faculty ratio is 8 to 1. The faculty rotate among the student groups and each student is given the opportunity to perform the exercises necessary to learn the skill. Each student is paired with a partner and required to conduct a two bench trials and a jury trial during the course of the semester. Law 412 Trial Practice II, Section Two TRIAL PRACTICE II: A SECURITIES FRAUD TRIAL This semester-long course provides a unique opportunity to try a securities fraud case to verdict culminating in a full-day mock jury trial as the final. Students in this class, limited to 8 students, will try one complex civil case: a private claim of securities fraud alleging that the Defendants operated a Ponzi scheme in violation of Rule 10b-5 under the Securities Exchange Act of 1934. Students will work with a complex case file, including deposition transcripts, sworn statements, an expert report, investment offering materials, correspondence, bank records, and accounting records. Students will create their own summary and demonstrative exhibits to better inform and persuade the jury, and learn how to persuasively use courtroom technology to use exhibits at trial. Leading up to trial, the students will submit brief written motions in limine and responses; these and other pretrial matters will be addressed at a pretrial conference the week before trial. This course satisfies the Trial Practice II requirement.

LAW 414 Professional Responsibility (3 Credit Hours)
This course, required of all students focuses on ethical questions in the practice of law, and examines the basic premises underlying the lawyer-client relationship and the duties assumed by the members of the legal profession, including duties to clients, the public, the courts, and other professionals. Materials consist of the ABA Model Rules of Professional Conduct, and other pertinent standards regarding lawyers' ethics. This is a Juris Doctor Required course.

LAW 415 Trial of a Business Dispute (2 Credit Hours)
This course will focus on trials and arbitrations of complex commercial disputes, including breach of contract and fraud claims. Students will develop skills examining witnesses, deliver opening/closing, discussing specific pre-trial and trial issues relevant to business disputes, and conduct a full trial of a breach of contract or fraud action.

LAW 416 Trial Practice I (Intensive) (3 Credit Hours)
Pre-requisites: Evidence Corequisite: Evidence, Summer term only
This intensive eight day course is a 3 unit graded course that offers the opportunity to develop the skills necessary to conduct a trial, including case analysis, opening statements, direct and cross examinations of witnesses, evidentiary objections and foundations for admissibility of evidence, and closing arguments. The student/faculty ratio is 8 to 1. The faculty rotate among the student groups and each student is given the opportunity to perform the exercises necessary to learn the skill. Each student is paired with a partner and required to conduct a bench trial and a jury trial during the course.

LAW 417 Advanced Business Law (3 Credit Hours)
This course teaches corporate business law and negotiation skills through a simulated class in which Northwestern and Loyola law students represent either a US pharmaceutical company or an African agricultural production company. The two companies are interested in working together to exploit a new technology and the form of their collaboration will consist of drafting and negotiating a non-disclosure agreement, letter of intent, a joint venture agreement, a licensing agreement, and a long-term supply contract. The negotiations will take place through written exchanges and live negotiations that will be conducted via zoom.

LAW 418 Pre-Trial Litigation (2 Credit Hours)
This course integrates a theoretical and practical approach to the pretrial components of litigation. Students gain an understanding of the purpose of pleadings, pretrial motions, depositions, and settlement conferences, and extend their knowledge through practical experience. The second portion of the course complements the courses in trial practices by investigating the psychology of courtroom communication and its related effects. Overall, students should develop a more well-rounded perspective of the pretrial aspects of litigation.

LAW 419 Business Skills in Sports and Entertainment Law: The Introductory Skill Set (2 Credit Hours)
This course will use current trends, current business practices and the experience of current practitioners in the Sports & Entertainment Industry to introduce, examine and understand Business Skills which are necessary for success in these fields. The use of past deals, structures and documentation from current practitioners will give insight, strategy and the thought process of the facets and nuances to complete a transaction. Engagement via technology or classroom presentation from practitioners in Sports & Entertainment will provide context to course material and provide students a "real world perspective" of the Business Skills necessary for success. Students will be required to draft legal documents and create oral presentations to demonstrate their ability to apply concepts presented during the course.

LAW 424 Professional Identity Formation (1 Credit Hour)
Loyola's mission is to educate diverse, talented students to be responsible leaders in a rapidly changing, interdependent world, to prepare graduates who will be ethical advocates for justice and the rule of law, and to contribute to a deeper understanding of law and legal institutions through a commitment to research, scholarship and public service. The Professional Identity Formation course seeks to advance the mission of the law school by fulfilling two of the main education goals as Loyola Law: advancing the Jesuit tradition of social justice and ethics and law; and to prepare students to be accomplished and ethical leaders in the legal profession and the larger community. The individual development of a professional identity is critical to meeting these goals. This required 1 credit, 5 week first year course seeks to assist students in the recognition and elimination of personal bias and building awareness of how diversity and inclusion of others whose world view is different from one's own is critical to professional development and success in the practice of law. The course objectives include the education and development of professionals prepared to enter the workplace with the tools needed to successfully engage and manage diverse environments with the ability to think critically about various legal issues, problems and solutions and how they impact different groups of people and communities differently based on identity, privilege and oppression. This course is only open to incoming first year Juris Doctor students.

LAW 426 Special Education Law and Advocacy (2-3 Credit Hours)
This course will be offered as a 2-credit course, online only, in Spring 2019. This online course will deal in depth with current and timely issues in the education of children with disabilities. Students will learn federal and State statutory and regulatory procedures in determining eligibility for services, evaluation, development of the individualized education program, and provision of services in the least restrictive environment. The education of special needs children from early childhood through post-secondary transition will be addressed. The course will focus on advocacy, statutory and regulatory compliance, and dispute resolution. Students will assume the roles of parent/student advocate, school administrator, third-party mediator, and school service provider in a variety of online activities, including: participation in eligibility and IEP conferences; disciplinary manifestation determination reviews; resolution sessions, mediation, and pre-hearing due process procedures; and determining Section 504 eligibility and developing and implementing a Section 504 service plan.

LAW 427 Public Interest Law Reporter Executive Editor (1-3 Credit Hours)
Students enrolled in this course receive credit for their work as the executive editors of the law school's Public Interest Law Reporter.

LAW 428 Pub Int Law Reporter Associate Editors (1 Credit Hour)
Students enrolled in this course receive credit for their work as the associate editors of the law school's Public Interest Law Reporter.

LAW 429 Pub Int Law Reporter Members (1 Credit Hour)
Students enrolled in this course receive credit for their work as the members of the law school's Public Interest Law Reporter.

LAW 431 Documenting and Negotiating Finance Transactions (2 Credit Hours)
Pre-requisites: Students taking this class will be expected to have taken Business Organizations
This course offers students an opportunity to focus on the legal issues that arise between borrowers and their financial advisor/banker. Topics covered include a focus on commercial loan agreements, other capital raising vehicles and mergers and acquisitions. The course also focuses on the perspective of the CFO and the banker in deciding when and how to raise additional capital, expansion through acquisition and partnership/joint-ventures with other entities. Students also study examples of actual loan agreements and other related documents as well as analyzing case law involving financial institutions and loan agreements. This course uses practical examples of actual transactions including details of their negotiation and execution with the student actively involved on a case study basis. Knowledge of Secured Transactions and Federal Income Tax would greatly assist the student; these classes are not, however, required to take the course. This is a Skills course.

LAW 435 Deposition Advocacy Workshop (2 Credit Hours)
This Skills and Comprehensive Simulation Program is designed to teach students about Illinois and Federal deposition practice. Topics covered will include: effective deposition questioning strategies and techniques; thorough deponent preparation; efficient and technical use of exhibits; proper objections; methods of rehabilitating your witness; ethical considerations; and how to deal with the most difficult opposing counsel. This class will have lectures, but primarily focus on in class participation and interaction. The grade for this course will be based on individual mock deposition performances, in class participation, and overall contribution to self-critique and classmate critique.

LAW 437 Public Interest Law Reporter Senior Editors (1-2 Credit Hours)
Students enrolled in this course receive credit for their work as the senior editors of the law school's Public Interest Law Reporter.

LAW 438 Dispute Resolution Skills Teams (1-3 Credit Hours)
This is a non-graded course that requires instructor permission to enroll. The course is limited to students that are currently or previously enrolled in the LAW 400, 401, 438, or 499. Students are required to prepare and compete in one or more advocacy competitions. Variable non-graded credit is available from one to three units depending on circumstances as determined by the instructor. Credit: Non-Graded 1-3 units

LAW 440 Advanced Criminal Procedure (2-3 Credit Hours)
Pre-requisites: One other Criminal Procedure course
This unprecedented course will prepare you for criminal law practice by revealing the reality missing from doctrinal courses and most experiential programs. We will dig into that reality in exercises and class discussion rooted in behavioral research on prosecutors, defense attorneys, police officers, judges, and juries. Interesting guest speakers will guide you through the difficulties and dilemmas of contemporary practice. Past guests have said, "I wish I had something like this in law school." You do.
Outcomes:
Evaluate critically the operation of the legal rules presented in the class in light of how the law works in practice; Demonstrate substantial knowledge of challenges faced in the operation of the criminal justice system; Identify the roles and interaction of a variety of actors in the criminal court system--including lawyers, judges, police officers, court personnel and juries; Show how empirical research shows them operating and delineate the impact of how they carry out their jobs has on defendants

LAW 445 Humanitarian Law and Conflict (3 Credit Hours)
This seminar examines the international rules regulating armed conflicts and other armed violence. Topics include the rights and responsibilities of states and individuals under international law, armed conflict identification and classification, the law of the sea, and rules regulating the conduct of fighters and other aspects of armed hostilities, and international human rights law. The course is designed to prepare students for competitions and/or future practice in these areas of law, such as in a government/military or non-governmental organization setting. The final grade is determined by group projects that include answering scenario-based humanitarian law questions and a research project to be selected and completed by assigned student groups. LLM students may enroll in this course with permission.
Outcomes:
Understand the origins, theory, sources and important principles of international law, including the basic attributes of states and of the international legal system; Recognize when conduct is or may be attributable to a state under international law

LAW 446 Mini MBA for Law Students (1 Credit Hour)
Since the onset of the global financial crisis, the role of the lawyer has expanded. Law firms and their clients alike expect new lawyers to not only understand the law but the basics of accounting and finance as well. This intensive pass/no pass course in accounting and finance is designed to help prepare law students for the demands of a career within a law firm. Topics covered include: How to read and analyze financial statements How to calculate returns on investments How to value companies How to structure securities Goal: To prepare law students for careers in a changing economy in which lawyers will be expected, and even obligated, to understand the intricacies of the business world. Description: This Unique program was designed to bring the world of finance and accounting to aspiring lawyers. It seeks to offer law students an overview of business concepts most relevant to legal professionals and relates these concepts to a broad array of practice areas. The course progresses in order of difficulty beginning with basic elements of accounting and concluding with more advance concepts related to securities pricing. Agenda Financial Statements: Analyzing financial statements has been a tsk traditionally performed by investment bankers and accountants. However, with accounting scandals threatening to erode confidence in corporate America, attorneys are taking on a prominent role in preparing and analyzing financial statements. Including the Balance Sheet, Income Statement, and Cash Flow Statement, this course is designed to give students an overview of accounting techniques and their relevance. Financial Analysis: The process of analyzing financial statements is involved in virtually every business decision. As corporate managers and bankers rely more on the advice of their inside and outside counsel, it is now imperative that an attorney better understand basic business decision making tools. This course will allow students to understand different methods of analyzing financial statements, what they are used for, and who uses them. Issues in Financial Reporting: In the wake of the massive corporate accounting scandals such as Enron, WorldCom, and Parmalat, the importance of detecting such fraud has taken on new proportions. No longer a matter reserved exclusively for accounts and financial analysts, accounting fraud is a concern of most attorneys who must be able to detect and report any suspicious of questionable reporting practices. This course is designed to equip students with the basic skills to determine signs of corporate accounting fraud along with guidance on what to do when confronted with such matters. Corporate Finance: With Issues related to corporate finance becoming more relevant today than ever, the role a lawyer plays in structuring transactions, negotiating deal terms, and coordinating the underwriting process is becoming increasingly important. This course provides the basic tools to understand, apply and challenge most aspects of financial management. Valuation: Valuation forms the cornerstone of nearly every business transaction. Whether it involves mergers and acquisitions, leveraged buyouts, venture capital, or real estate, a solid understanding of valuation will ensure an equitable transaction. Attorneys play an active role in these transactions but all too often become entrenched in the purely legal aspects of them. This course will help students to better understand the methodology and techniques behind various forms of valuation and in turn, better serve the needs of their clients. Securities: Attorneys play a vital role in capital formation and deal structuring for companies of all sizes. This course is designed to offer students a better understanding of the financial instruments they help structure. Topics covered will include stocks bonds, and derivatives. Additionally, the course will explore these concepts in the context of real cases drawn from recent transactions. Students will be responsible for class participation and a review project.

LAW 447 Federal Indian Law (3 Credit Hours)
Federal Indian law examines the jurisdictional balance between tribes, states, and the federal government. The course explores the historical development of Indian law, highlighting its relevance to contemporary tribal sovereignty. Topics covered include criminal law, natural resources, taxation, and gaming.

LAW 449 Negotiations Seminar (3 Credit Hours)
Negotiating effectively is one of the most important qualities of a successful lawyer. This course seeks to help you move from negotiating by instinct, as most people do, to negotiating more thoughtfully, more comfortably and with a clearer sense of purpose. This course merges theory with practice to: (1) develop your understanding of negotiation, and your awareness as a negotiator; (2) give you tools and concepts for analyzing and preparing for negotiations; (3) enhance your negotiating skills through frequent role plays, analysis, and feedback; and (4) teach you how to keep learning from your own negotiation experience. In addition to negotiation skills and theory, you will be introduced to issues of representation, ethics, and the place of negotiation in our legal system. The Negotiation Seminar is a highly rewarding and interactive course. The course syllabus consists of assigned readings, simulations, and written assignments almost every class, and attendance at one video debrief where we will analyze your skill set.

LAW 450 Independent Study: Mock Trial Witness (1 Credit Hour)
In this course students participate as witnesses and bailiff/timekeepers during a mock trial, moot court or dispute resolution competition. Students must complete their assigned role as determined by the instructor. Students are required to read, review and learn material in order to perform role. Students are required to adhere to competition rules for the particular role assignment.

LAW 451 Estate Planning (3 Credit Hours)
Pre-requisites: Estate and Gift Tax; Estates is highly recommended
This seminar attempts to simulate the day-to-day practice of an estate planner. The topics range from the initial client interview to the formulation of sophisticated estate plans for those with substantial property, such as a successful business. The goal is to provide exposure to a broad range of client situations with supervised formulation and implementation of estate plans. Students generally work in teams of two or three and submit several drafting assignments throughout the semester. You may not also take Wills and Trust Drafting.

LAW 453 Legal Writing Tutors - Senior Tutors (1-2 Credit Hours)
Pre-requisites: Legal Writing Tutor (LAW 296)
No course description is available

LAW 455 Appellate Advocacy-Intellectual Property (2 Credit Hours)
Pre-requisites: None, except no 1L
This course will teach writing an appellate brief to the U.S. Court of Appeals for the Federal Circuit. The problem will involve one patent law issue and one other related intellectual property issue. The problem is designed to teach an aspect of patent litigation beyond basics covered in introductory doctrinal courses by focusing appealable issues on real-world, common litigation issues such as: claim construction, admissibility of experts in IP cases, damages, and the intersection of patents and antitrust law. The goals of the course are to encourage students to think critically about issues and to evaluate complex issues, learn to organize thoughts around those issues, and learn to communicate clearly, conclusively and with credibility in writing and through oral presentation.

LAW 456 Mediation Seminar (1-2 Credit Hours)
Mediation is a dispute resolution process that enables parties to negotiate their own settlement with the assistance of an impartial third party neutral (the mediator), instead of having a judge decide the outcome for them. As it has become increasingly institutionalized within the legal system, it is important that lawyers be familiar with its benefits, as well as with how it works. This course will offer an overview of mediation theory, techniques, applications, and history. Through simulations and other in-class exercises, students will consider how mediation differs from other types of dispute resolution processes, how mediation styles differ from one another, in what different contexts mediation is used (including commercial, divorce, community, and employment conflicts), and what the role of the attorney-advocate is during mediation. Mediation techniques and skills are extremely beneficial to attorneys. It makes them more effective problem solvers when dealing with a case; it helps them communicate more effectively with opposing counsel; and it helps them in their interviewing skills so that they can better understand the needs and interests of their clients.

LAW 459 Intro to English Legal Profession (1 Credit Hour)
This lecture series is a mandatory preparatory course for students who have been selected to participate in the annual London Comparative Advocacy Program. It explores a variety of issues pertaining to the English history and its legal professions. Topics include the history of the common law, the development of the English legal profession, English civil and criminal procedure, the modern legal professions and the history of London. (Permission is required) This is a Perspective Elective course.

LAW 460 Humanitarian Law in Practice (2 Credit Hours)
Pre-requisites: Humanitarian Law and Conflict
This seminar meets for four hours each week during the first half of the spring semester. It is a scenario-driven course that further deepens a student's knowledge, understanding and practical application of international humanitarian and human rights law. Students are required to prepare group presentations on assigned legal topics (Thursdays) and then participate in scenario-based, role-playing exercises that require practical application of the law (Saturdays). The final grade is determined by contributions to and performance during student group presentations on assigned international humanitarian and human rights law topics and role-playing practical exercises.

LAW 461 Education Law and Policy (2-3 Credit Hours)
This seminar will explore the difficult legal, political and practical issues currently confronting American education. The course will begin with an analysis of the fundamental political and legal principles underlying the American public education system. Students will then be challenged to apply these principles to difficult areas of education law, such as: (1) the adequacy and equity of school funding; (2) the nature of a constitutional right to education; (3) the relationship between public education and religious institutions and practices; (4) legal issues relating to curriculum; (5) equal educational rights, including issues of desegregation and affirmative action; (6) the constitutional rights of students; (7) special education; and (8) the rights and responsibilities of educators. Students will be required to participate actively in class, to facilitate class discussion of a selected topic, and to submit a paper which analyzes critically an important issue raised in the class. There will be no final examination. This course counts as a Perspective Elective course.
Course equivalencies: MPP 461/LAW 461

LAW 463 Mindfulness and Well-Being (1 Credit Hour)
Are you stressed? Would you like improve your focus and memory? Prioritizing a healthy brain is important not only because learning the law is intellectually challenging, but also because lawyers suffer from anxiety, stress and substance abuse at an alarming rate. The objectives of this course include learning how mindfulness meditation, food choices, exercise, and various stress reduction techniques can improve brain health and well-being. You will practice meditating regularly both in class and on your own and will be introduced to science that demonstrates how mindfulness meditation can physically change your brain in a short period of time. This course will also cover using mindfulness to heal from technology and other addictions. You will also learn how mindfulness practice builds a variety of human capacities and skills that can be consciously applied with clients, colleagues, staff, opposing counsel, judges, juries and others. We will make these connections throughout the course using readings, meditation (together and apart), videos, class discussion, in-class exercises, personal journaling and guest speakers. You will also learn about recent advances in scientific research on the human microbiome, the mind-gut connection, and how to improve your well-being and brain performance through eating an anti-inflammatory diet. We will also explore the impact of exercise, gratitude practices, and quick stress reduction techniques. Students will also examine the stress response, brain biases (including implicit racial bias), and techniques to improve emotional intelligence in stressful conflict situations. Developing these skills will help you gain resilience to flourish in a demanding profession and bring your best self to serve your clients and communities. (Disclaimer: I am not a therapist, or a certified nutritionist, and I encourage students with mental health concerns to seek/continue treatment as needed with their therapists and/or physicians. The university Wellness Center also provides services and guidance for students with mental health concerns.)

LAW 464 Information Technology and Human Rights Practicum (1-3 Credit Hours)
In light of the ongoing digital transformation, societies are more reliant than ever on innovative technological solutions and ICT to address modern-day challenges. At the same time, this can raise fundamental rights issues in the digital space that confront companies and require highly skilled legal counsel to guide companies in their risk and impact assessments, due diligence and compliance processes, and government relations. The course examines timely human rights issues pertaining to digital technologies (especially ICT) in the areas of data privacy, content regulation, and other on- and offline fundamental rights issues in a US, transatlantic and international context. The goal is to provide students with the knowledge and tools to advise corporate clients on how to navigate these cutting-edge legal challenges. There are many highly topical and timely human rights issues pertaining to digital technologies and ICT confronting companies and their legal counsel, that this course will cover. Challenges around these emerging issues dominate the headlines almost on a daily basis and include biases in artificial intelligence, privacy issues in cross-border data transfers and innovative technologies (i.e. IoT, digital identity), disinformation and election integrity, government access to personal data (on public policy grounds, including public health, national security, etc.), hate speech and other harmful online content, cyberattacks (including during armed conflicts), and internet shutdowns. The course also features an optional practicum component (for one additional credit hour) providing interested students with the opportunity to become engaged in a real-life project on the topic with a relevant entity involving ICT companies and intersecting in a systemic and impactful way with human rights issues in IT, domestically or internationally. The class will be held synchronously via Zoom every Saturday from 9.30am to 11.30am CST. This will enable live class discussions with students and the instructor. Guest speakers from the industry, international organizations, law firms, and/or civil society may occasionally join the class discussion. For any questions about the course, please email Dr. Caroline Kaeb at ckaeb@luc.edu; Dr. Kaeb is a policy officer on digital issues at the European Commission in Brussels and you can find more information about Dr. Kaeb's profile at https://www.luc.edu/law/faculty/facultyandadministrationprofiles/kaeb-caroline.shtml

LAW 467 Advocacy Competition Supplement (1-3 Credit Hours)
This is a non-graded course that requires instructor permission to enroll. The course is limited to students that are currently or previously enrolled in the LAW 400, 401, 438, or 499. Students are required to prepare and compete in one or more advocacy competitions. Variable non-graded credit is available from one to three units depending on circumstances as determined by the instructor. Credit: Non-Graded 1-3 units

LAW 470 Immigration Practicum Advancing (1-4 Credit Hours)
Immigration law is one of the most complex, dynamic, and rewarding areas of practice. Yet, it is often viewed as a specialized field that rarely is connected to other public interest areas of law, including child and family law, poverty law, housing, education, health, and criminal justice. The goal of this course is to teach the current realities of immigration law as experienced in practice, and to show how it intersects other field of public interest law in the pursuit of social justice. This unique course has a classroom component and a field-work component. The class meets formally two hours per week in the evening to cover substantive immigration law issues, current topics/changes in immigration practice, and to develop practical skills tailored to the practice of immigration law practice and advocacy, with an emphasis on issues affecting families and children. Topics include family-based petitions, persons fleeing persecution, unaccompanied children, forced family separation, providing trauma informed services, intersection of family law and immigration law, and deportation defense. The course includes in-class simulations and role-plays. One course is NOT required to take the other. Students are expected to work at their extern field placement site a minimum of 55 hours in order to earn 1 academic credit hour, or 110 hours in order to earn 2 academic credit hours. Instructors may vary across terms, and are experienced professionals with diverse areas of practice in immigration law. You are required to complete assigned readings before class. Readings will also be posted to TWEN. If you are interested in pursuing externship credits, please contact the Director of the Immigration Law Practicum, Katherine Kaufka Walts.

LAW 471 Teaching Assistants (1-3 Credit Hours)
Course enrollment requires permission of the instructor or Academic Dean. Teaching assistants receive academic credit for serving in a tutor capacity for identified courses not otherwise within the jurisdiction of the academic tutor program.

LAW 472 Structured Finance (2 Credit Hours)
Securitization is a form of highly sophisticated business transaction in which a company seeking financing gathers together pools of its financial assets, such as auto loans, deposits them in a bankruptcy remote subsidiary and causes the subsidiary to issue securities or borrow loans that are backed by the pool of financial assets. Well-known types of securitizations include mortgage-backed securities and collateralized debt obligations. Although these types of transactions received a great deal of scrutiny during and after the financial crisis, securitization also includes other forms of asset-backed securities that are an essential component of modern financial markets. As this course will demonstrate, a successful securitization integrates a bunch of different bodies of commercial law, including securities law, bankruptcy law, secured transactions, corporation law, tax, and regulatory acts such as Dodd-Frank and ERISA. This course uses an actual securitization transaction to illustrate the interplay of these bodies of law. The course also looks at the greater legal implications of these transactions on the financial markets in the wake of the financial crisis. 2L and 3L students that have an interest in corporate or transactional law, general business law or finance should consider this course I shall assign homework problems for most classes, which we shall discuss in the next class. The course grade will be based on participation in this class discussion and on the results of a take-home examination. This course also counts as an elective course for the Certificate in Transactional Law.

LAW 473 Class Actions (2 Credit Hours)
Some of the most cutting-edge and challenging litigation in the courts today are class actions or complex cases involving numerous parties and/or very complicated claims. These cases can take up enormous resources of our courts and the litigants and yet result in resolutions that are fair and efficient if litigated and adjudicated properly. This course focuses on the emerging issues in such cases, the innovative uses to which scientific evidence is being put in class actions, and the methods used to resolve such disputes. Students will be expected to participate as part of litigation teams in strategic discussions and exercises highlighting the material covered in the course and will be evaluated on those exercises as well as a final examination. The class would meet, at a mutually convenient time, once a week for two credits and feature at least two guest speakers (e.g., class action lawyer, jurist, expert). Students will be given a hypothetical class action highlighting key issues and tensions within class, and brief and argue their positions on (1) class certification and (2) class settlement approval.

LAW 475 Multistate Bar Exam Fundamentals (2 Credit Hours)
This is a Bar course.

LAW 476 Art Law (3 Credit Hours)
Art Law and Transactions is a study of the main legal issues involved in the acquisition, ownership and disposition of works of art. The primary perspective is that of an attorney in the representation of an art collector, and how the transactional arc involves regular concerns, such as contract law, as well as art specific concerns, such as Nazi-era looted art. Part I Acquisition begins with a focus on the legal issues raised by the various venues for art purchases (art commissions, through a dealer, at auction) and follows with the two core issues of authenticity and good title. Part II Ownership concerns three topics that could arise during the ownership phase: crossing borders, moral rights and art loans. Part III Disposition completes the transactional loop with a discussion of how one transfers works of art during life or at death, whether by sale or gratuitous transfers, including valuation concerns. The course will include several drafting exercises (some of which will be done in teams) and a one-hour in-class final.

LAW 478 Real Estate Transactions (2-3 Credit Hours)
Real Estate Transactions focuses on the basic principles of commercial real estate transfer, development, finance and leasing. The course follows a multi-party commercial development project through acquisition, financing and leasing. The course highlights the purchase and sale contract, easements, zoning and environmental regulations and closing; the loan process and financing issues; as well as leasing. The course also addresses the role of the lawyer in real estate transactions and the broad issues involved in modern real estate practice.

LAW 480 Business Planning (3 Credit Hours)
Business Organizations is a prerequisite for Business Planning, but is recommended for Business Planning: Transactions. Business Planning: Transactions A business lawyer needs to know, or at least be generally familiar with, many areas of law. Therefore, the purpose of this course is to teach many legal issues, including: (1) the organization of a business (e.g., the types of legal entities including "C" corporation, "S" corporation, partnership, and limited liability company), organizational documents for a corporation and a limited liability company, control issues including the problems of a minority shareholder in a privately owned business, and understanding balance sheets and income statements; (ii) the financing of that business (including compliance with the federal securities laws in connection with private offerings and public offerings, bank borrowing and granting collateral pursuant to Article 9 of the UCC); (iii) certain key day-to-day transactions (including intellectual property, environmental law, labor law, real estate law, and sales of personal property as regulated by Article 2 of the UCC); (iv) buying and selling a business (including certain tax and non tax issues, documentation, hostile tender offers, going private and leveraged buyouts); and (v) the financially trouble business (including workouts and the rudiments of securitization). There is a large handout, but the substance of the course is contained primarily in the lectures. Therefore, regular attendance is expected. There is no prerequisite for this course but some prior exposure to business law (e.g., Business Organizations) is desirable.

LAW 481 Employee Benefits Law (3 Credit Hours)
No course description is available

LAW 482 Advising Not-For-Profit Organizations (3 Credit Hours)
This course counts as a Comprehensive Simulation and Skills Course There are more than 1.5 million not-for-profit organizations in the United States alone, and more throughout the world. Not-for-profit organizations contribute to society in many ways, through diverse missions from education and research, to social services, relief, and advocacy, to religion, to arts and culture. In addition to the impact made through their missions, not-for-profits as a group are significant as employers and for their contribution to the general economy as well. Not-for-profit organizations exist to further their charitable purposes, do not distribute dividends or net revenues (having no private shareholders or owners), and often are formed and operated to qualify for Federal income tax exemption under Section 501(c)(3) or other provisions of the Internal Revenue Code. Nonetheless, they have many of the same operational needs and characteristics of any other business. They occupy space (whether owned, leased, or hosted by others). They purchase and consume goods and services from vendors and suppliers. They manage and cope with attendant risks. Interestingly, commentators suggest that not-for-profits can be more complex to manage, and to advise, than a for-profit business. The organization may have funding constraints, staff constraints, and knowledge constraints, particularly when coping with transactions or situations that arise only occasionally or where the organization is governed or operated in whole or in part by volunteers. Not-for-profit facilities and operations can be uniquely complex (think for example about a museum, a zoo, a hospital, or a cathedral), and their diverse sources of governmental and private funding can come with extensive conditions, restrictions, and reporting requirements. They may even be offered (or accept) donated goods or services in kind, gifts that come with their own implications. This course will explore the opportunities and challenges for lawyers involved with not-for-profit organizations, whether as paid or pro bono legal advisors, or as board members or volunteers. The course will use a combination of traditional lecture and discussion, case study simulations, and guest speakers, as well as individual meetings with students on directed work. The course will be centered around a recurrent series of fictional clients, each a not-for-profit organization, engaged in a variety of operational and transactional situations. Each client organization will have a different mission, size, and resources, as well as mock client representatives who will have different business and style preferences, which the class will need to accommodate and will come to anticipate in fashioning and recommending solutions for each client. Each student will be invited to select and imagine a mock client organization with a not-for-profit mission suited to the student's interest and will have the opportunity to identify and explore individual topics relevant to not-for-profit transactions, operations, and governance. The course will also consider issues of legal ethics and professional conduct, as well as governance and fiduciary duty of board members, in the not-for-profit context. The course's emphasis on case studies and commercial transaction scenarios is also designed to act as a capstone course which complements and draws upon the students' prior coursework in contracts, real estate and commercial transactions, ethics, and government regulation. In these ways, the course emphasizes skills relevant in any transactional project, for-profit or otherwise. Students will be graded based on class participation, written assignments and exercises, and a paper and presentation resulting from research and study on their chosen mock client and individual study topics. There is no final examination for this course. (Hagy)

LAW 483 Federal Tax Clinic I (2-4 Credit Hours)
The purpose of the Federal Tax Clinic is to educate the student in the practice and procedures of federal tax law and dispute resolution before the Internal Revenue Service (IRS) and the United States Tax Court. The tax clinic is neither exclusively a "skills center" nor a "theory center." Instead, all the numerous components of tax law practice are integrated in the curriculum of both classroom study and legal practice with actual clients. Some of the subjects include client interviewing and counseling, negotiations, and tax litigation. Students handle cases at the IRS and Tax Court level on a clinical basis and, with the clinic attorneys, prepare all appropriate written responses to the IRS, prepare Tax Court petitions, and litigate tax cases. Federal Income Tax is a prerequisite. This is a Skills and Live Client Experience course.

LAW 485 Journal of Regulatory Compliance Executive Editor (1-3 Credit Hours)
The Journal of Regulatory Compliance (the JRC) is a semiannual legal journal published by second- and third-year law students at Loyola University Law School Chicago. Members of the Journal of Regulatory Compliance staff review, analyze and edit articles prepared and submitted by authors who are not members of the JRC. Members of the JRC Staff also complete and submit or review and edit three blogs for the Inside Compliance blog per semester. The JRC also hosts an symposium on critical Compliance issues with a host of leading experts in the field. Students are invited for membership on the JRC Staff based upon academic achievement and entry in a writing competition. The course is presented on a pass / fail basis.

LAW 486 Federal Tax Clinic II (1-2 Credit Hours)
The purpose of the Federal Tax Clinic is to educate the student in the practice and procedures of federal tax law and dispute resolution before the Internal Revenue Service (IRS) and the United States Tax Court. Federal Tax Clinic II affords students from the tax clinic the opportunity to carry their cases through to completion. It is more independent and sophisticated than tax clinic I. Students continue to develop the skills that they learned in tax clinic I, including client interviewing, negotiations, tax litigation, correspondence with the IRS, and preparation of petitions to Tax Court. Federal Income Tax and Tax Clinic I are prerequisites. This is a Skills and Live Client Experience course.

LAW 487 Law Journal Members (1 Credit Hour)
Law Journal Members are responsible for editing, cite checking, page-proofing and proofreading articles selected for publication in the Loyola University Chicago Law Journal under the supervision of Executive Editors and Senior Editors. Each Law Journal Member must also prepare and submit an original note or comment of publishable quality.

LAW 488 Journal of Regulatory Compliance Senior Editor (1-2 Credit Hours)
The Journal of Regulatory Compliance (the JRC) is a semiannual legal journal published by second- and third-year law students at Loyola University Law School Chicago. Members of the Journal of Regulatory Compliance staff review, analyze and edit articles prepared and submitted by authors who are not members of the JRC. Members of the JRC Staff also complete and submit or review and edit three blogs for the Inside Compliance blog per semester. The JRC also hosts an symposium on critical Compliance issues with a host of leading experts in the field. Students are invited for membership on the JRC Staff based upon academic achievement and entry in a writing competition. The course is presented on a pass / fail basis.

LAW 489 Journal of Regulatory Compliance Associate Editor (1 Credit Hour)
The Journal of Regulatory Compliance (the JRC) is a semiannual legal journal published by second- and third-year law students at Loyola University Law School, Chicago. Members of the Journal of Regulatory Compliance staff review, analyze and edit articles prepared and submitted by authors who are not members of the JRC. Members of the JRC Staff also complete and submit or review and edit three blogs for the Inside Compliance blog per semester. The JRC also hosts an symposium on critical Compliance issues with a host of leading experts in the field. Students are invited for membership on the JRC Staff based upon academic achievement and entry in a writing competition. The course is presented on a pass / fail basis.

LAW 490 Law Journal Executive Editors (1-3 Credit Hours)
Law Journal Executive Editors are ultimately responsible for the publication of the Loyola University Chicago Law Journal. They oversee the selection, editing, cite checking, page-proofing and proofreading of articles chosen for publication in the Journal. They also oversee Law Journal Members and Senior Editors in the performance of their responsibilities. Law Journal Executor Editors are also responsible for planning and hosting the Law Journal's annual symposium conference.

LAW 491 Law Journal Senior Editors (1-2 Credit Hours)
Law Journal Members are responsible for editing, cite checking, page-proofing and proofreading articles selected for publication in the Loyola University Chicago Law Journal under the supervision of Executive Editors. Law Journal Senior Editors are also responsible for other tasks assigned to them by Executive Editors that contribute to the operation of the Journal.

LAW 493 Adult Guardianship Project (3 Credit Hours)
This course offers 3 graded experiential learning credits for weekend JD students and students whose non-traditional schedules do not allow them to participate in a legal clinic or externship. The Adult Guardianship Project allows 711-license eligible law students the opportunity to represent real clients seeking guardianship of adult family members. The course requires three two-hour lecture components covering the requisite substantive areas of law as well as biweekly office hours for individual casework instruction. Lectures include client interviewing, case management procedures, substantive issues in the Probate Division, hearing advocacy, as well as best practices for working with diverse populations. To be inclusive of more law students, this course is designed to accommodate remote participation as needed given all client meetings and court appearances will be held on Zoom. Students must be eligible to appear in Court under Supreme Court Rule 711. Students who have successfully completed a minimum of 43.0 credit hours at the School of Law may enroll in the course.
Outcomes:
Conduct client interviews and develop rapport critical to advocating for real clients; Develop sufficient knowledge of adult guardianship of the person under the Illinois Probate Statute; Learn to draft and file the legal pleadings necessary in adult guardianship matters; Use 711 license to appear at all court dates on behalf of clients under the supervision of a licensed attorney

LAW 494 Law Journal Associate Editors (1 Credit Hour)
This is the course to provide credit to student editors of the Loyola University Chicago Law Journal.

LAW 495 ABA Tax Section Law Student Tax Challenge (1 Credit Hour)
An alternative to traditional moot court competitions, the Law Student Tax Challenge (LSTC) is organized by the Section¿s Young Lawyers Forum. The LSTC asks two-person teams of students to solve a complex business problem that might arise in everyday tax practice. Teams are initially evaluated on two criteria: a memorandum to a senior partner and a letter to a client explaining the result. Based on the written work product, six teams from the J.D. Division and four teams from the LL.M. Division receive a free trip to the Section¿s Midyear Meeting, where each team presents its submission before a panel of judges consisting of the country¿s top tax practitioners and government officials, including tax court judges. The competition is a great way for law students to showcase their knowledge in a real-world setting and gain valuable exposure to the tax law community. The problem is released in September and the written submissions are due in November. Teams are notified in December if they have been selected to present their papers at the ABA Tax Section Midyear meeting which happens at the end of January or beginning of February.

LAW 498 Corporate Governance Law and Practice (2 Credit Hours)
Pre-requisites: Business Organizations
In this course students will study and analyze the law and practice of corporate governance law for publicly-held corporations. Introductory sessions will detail corporate governance law and regulation, with a specific focus on the impact of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010. Thereafter, a number of alternative proposed reforms will be assessed Finally, the course will address practical element of corporate governance practice including professional responsibility issues, the director selection process, board diversity, and empirical learning regarding the best corporate governance practices.

LAW 499 Trial Practice I Applied (1-3 Credit Hours)
This graded 3 unit course requires instructor permission to enroll. Students develop the skills necessary to conduct a trial, including case analysis, opening statements, direct and cross examinations of witnesses, evidentiary objections and foundations for admissibility of evidence, and closing arguments. Students are required to participate in the mandatory evidence boot camp at the start of the semester. Each student is required to apply their learned skills in one or more local, regional, national or invitation mock trial competition. This course satisfies the requirements of Trial Practice I (LAW 411 or LAW 416).

LAW 504 Lawyers as Leaders (2 Credit Hours)
No course description is available

LAW 506 Patent Prosecution Seminar (2 Credit Hours)
During the Patent Prosecution Seminar, students will learn the requirements needed to procure a patent and navigate through the different stages of the patent examination process with the U.S. Patent and Trademark Office. Skills that are developed during the Seminar include conducting an Inventor Interview, drafting claims of a patent, responding to an Office Action, conducting an Examiner Interview, and drafting a petition or preliminary response for an Inter Partes Review proceeding. After taking the seminar, students are confident in their skills to procure a patent on behalf of clients.

LAW 509 Federal Courts (2-3 Credit Hours)
This course builds on the knowledge gained in constitutional law and civil procedure. One of the most important features of our constitutional system is the general division of governmental authority between state and national governments, and nowhere is that division of authority more important to practicing lawyers than in the allocation of judicial power between the state and federal courts. The former are, of course, courts of general jurisdiction, while the latter are courts of limited jurisdiction. The overall design of the course seeks to assist students in thinking about this allocation of power, not as a merely theoretical matter, but as one of real practical consequence in connection with a client's substantive goals and how best to serve them. Litigants typically want access to the federal courts for very specific (and often very important) reasons: to obtain remedies for violations of federal constitutional and statutory law, or, in some cases, to secure a forum that they believe will be more hospitable to their claims. Seen in this way, the law of the federal courts consists of doctrines that either facilitate or frustrate litigants in achieving their substantive goals in the federal (and state) courts. The aim of the course is to provide students with a basic framework for thinking effectively about these problems. This course may be offered only every other year.

LAW 510 Graduate Fellowship Independent Research (1-4 Credit Hours)
With the consent of a faculty member supervising the research, a student may earn credit. The scope and subject is arranged between the student and the faculty member.

LAW 511 London Comparative Advocacy Prgrm (1 Credit Hour)
Each year, students are selected to travel to London for about two weeks between semesters. In London, students engage in a number of activities focusing on the British legal professions, the system of advocacy in the U.K., and legal history. For students who hope to be selected for the program, completion of Evidence is recommended. Applications for the program are due each April and the program faculty selects the participants for the following year. There are always far more applicants to the program than available space. This course is the second credit of a two-credit ungraded program. To prepare for the visit to London, students are required to take "Introduction to the English Legal Profession" (1 credit) during the fall semester prior to the trip. Participants are then required to register for this course in the spring semester after the conclusion of the trip to London. Students are required to submit a 20 page research paper by a deadline in May on a topic approved by the instructor.

LAW 515 Special Topic: Alternative Energy (2 Credit Hours)
No course description is available

LAW 516 Prisoner Constitutional Rights Litigation (3 Credit Hours)
Pre-requisites: None, except no 1L
Prisoner Rights Litigation is enormous. It accounts for up to twenty percent of cases filed in federal courts; indeed, over 300 of the roughly 1,500 civil cases filed in the U.S. Court of Appeals for the Seventh Circuit in 2022 were brought by prisoners alleging unconstitutional conditions of confinement (lack of healthcare or dental care, cell infestations, inhumane temperatures, discipline without due process, suppression of religion or speech, or inadequate diet-to name some). And in this area, access to counsel is a critically unmet legal need, forcing many prisoners to litigate potentially meritorious claims without counsel. Yet this absence of counsel is perplexing given that this practice area can be lucrative for attorneys due to the guarantee of attorneys' fees under the Civil Rights Attorneys Fees Act. To resolve that discrepancy, this course is intended to prepare students for practice in prisoner's rights cases. This course will benefit students whether they practice in this area full time or on a pro-bono basis. The topics this course will cover include the federal rights that individuals retain while detained pending trial and after conviction, as well as areas of practice unique to litigating prisoners' constitutional claims. Students will also have an opportunity during the semester to hear from a guest speaker (TBA) who was formerly incarcerated and will discuss common issues of living in prison, including physical conditions, medical and mental health care, access to the grievance process and the courts in general. Course formative and evaluative assessments will provide students opportunities to learn the material, demonstrate understanding, and hone writing skills for practice. The primary method to assess student learning in this course will be the preparation of both a trial brief and an appellate brief. Students will also undergo four unannounced quizzes that will measure how well they understand the material. In addition to these assignments, class participation is critical and will be part of the final course grade.

LAW 518 Advanced Mediation and Courthouse Practicum (1-3 Credit Hours)
This course is for students who have already taken and passed the Mediation Certification & Courthouse Practicum. Students in this course will further develop and build upon their mediation skills by mediating actual long model cases at the Center for Conflict Resolution, as well as short model cases at the Cook County courts. Students will turn in written case summaries and assessments after the mediations and use the classroom time to discuss and learn from each other's mediation experiences. This is a 1-3-credit course. Grading is based on participation in mediations, class discussions and written work. Professor permission is required. This is a Skills and Experiential Learning course.

LAW 519 National Security Law (2 Credit Hours)
This course examines the current constitutional and statutory framework guiding government institutions tasked with national security responsibilities, as well as their historical roots. It covers such themes as the allocation and interplay of power between the Congress and the President on matters of war making, emergency powers, intelligence gathering, targeted killing, indefinite detention, Military Commissions, and the looming prospect of a statutory schema for addressing the rising threat of domestic terrorism. Conventional wisdom overweighs 9/11 and its aftermath as the anchor point for examination of this field of law. In fact, and as the course explores, its roots must be traced from 19th century conflicts with native peoples to slavery and the Civil War, and then coursing through industrial and social strife in the early 20th century, Cold War anti-Communism and the 1947 National Security Act, to the ongoing War on Terror - foreign in the wake of 9/11 to which paralleling concerns of domestic forms now proliferate, with each draw on organizing tenets involving the othering of minorities. To the extent that "national security law," can be said to cogently exist as a discreet field, it operates from the underpinnings of a complex mix of legal and political theory under the penumbra of Emergency Powers or, more classically, The State of Exception made famous by Weimar jurist and political theorist Carl Schmitt, with antecedents in the work of John Locke and Thomas Hobbes. The mix is inextricably intertwined with U.S. foreign policy concerns and their historical fluctuations. These theoretical considerations therefore frame and inform the course's interrogation of the legal structures and doctrines. It also engages with the topic of how ideas of membership and belonging have shaped our judgments as a world power nation-state about who and what counts as an external threat.

LAW 522 Election Law (2-3 Credit Hours)
Election Law will introduce students to the legal regulation of elections and politics. It will cover major Supreme Court cases with respect to the right to vote, regulation of political parties and candidates, redistricting, race and representation, and campaign finance. This course provides a good foundation for students interested in the law of democracy.
Outcomes:
Understand the legal limitations on governmental infringements of electoral rights; Understand how constitutional guarantees like the freedom of speech intersect with the nontextual constitutional right to vote

LAW 524 Sales (3 Credit Hours)
Sales is an advanced contracts course and offers an opportunity to develop drafting, contractual and statutory interpretation, and client counseling skills. Students will gain an in-depth understanding of the law governing sales of goods and Article 2 of the UCC.

LAW 525 Law, Politics, and Society (2 Credit Hours)
This seminar focuses on the relationship between law, politics, and society in one particular area - the criminal justice system. Drawing on a variety of sources, including court decisions and empirical studies, we will examine how the criminal law works, "on the ground." The seminar is organized in the following manner: after a brief introduction to some socially created bases for popular notions of criminality and lawbreaking, we will focus on socio-legal studies in six areas: criminal courts and criminal justice personnel, criminal trials, prosecutors, defense attorneys, the police and punishment. Issues we will consider include the disparity between what the law says and what happens in reality; the role of race, class, and gender in the decisions made by those whose job it is to enforce the criminal law; the role the criminal justice system is intended to play in society, and finally whether the criminal justice system lives up to the goal of balancing the interests of justice, order, and liberty.

LAW 530 International Law Colloquium (2 Credit Hours)
This seminar will examine select topics in contemporary international law practice and scholarship. Approximately every other week, the course will feature presentations of papers or works in progress by a leading international law scholar or practitioner. Students will submit short written comments of each paper in advance of its presentation. These comments will be sent to the speaker and the two hour session will be devoted to discussion of the paper and these comments.

LAW 531 The Administrative State (2-3 Credit Hours)
Pre-requisites: Preference will be given to 1LFT students
2L and 3L students may enroll on a space available basis. This 1L perspective elective seminar examines the role of executive branch and independent federal agencies (like the Federal Trade Commission) under our Constitution. These agencies regulate much of the economy and much of our daily lives far more than the state and federal court systems. Despite being critical to our individual liberties, health, and economic well-being, the work of such agencies is under attack. The seminar will look at recent Supreme Court cases which challenge in different ways the work and very existence of such agencies.
Outcomes:
Understand the role of administrative agencies in our legal system; Prepare a thoughtful 20 page page on one or more of the legal challenges such agencies face under current and anticipated Supreme Court litigation; This course may be used to satisfy the upper class writing requirement with permission of instructor for 3 credit hours upon completion of a more substantial seminar paper meeting the requirements of the writing requirement

LAW 536 Legislative Drafting (1-2 Credit Hours)
The Legislative Drafting Workshop will provide law students with an introduction to legislative drafting with a specific focus on the unintended consequences that can result from well-meaning legislation. Students will learn the basics of how to draft a law for enactment in the state of Illinois. We will analyze several statutes to identify common problems, and other well-known unforeseen issues. There are several types of unintended consequences, and students will learn how to identify and prevent them. The course will consist of several in-class assignments where students will be given proposed legislation and they will identify many possible unintended consequences of the law and they will then correct them either by rewriting the law or drafting an amendment. The course will be taught by legal professionals with extensive experience in legislative drafting and litigation. The students will gain practical skills by learning from two practicing litigators who experience the effects of unintended consequences every day.

LAW 538 Critical Race Theory (2 Credit Hours)
Critical Race Theory teaches analytical tools to study how law can create and cure racism. The course re-examines the first year curriculum (e.g., torts, contracts, criminal law, property, and civil procedure) to show that the law is conscious of race, and to explore how seemingly neutral application of the law can have devastating consequences for racial minorities.The course puts Critical Race Theory in conversation with other critical approaches like feminist theory and class studies. Our course goal is to address the following question: What would the legal landscape look like if society were to account for (and address) racial oppression?

LAW 539 Affordable Housing Law & Policy (2 Credit Hours)
The course will a provide an historical overview of federal housing statutes and programs to lay the groundwork for understanding how these programs and their successors are being utilized today to preserve and construct affordable rental housing. Case studies analyzing the legal organizational and financing structure of mixed income public housing developments in Chicago will demonstrate how public-private partnerships work in practice. Supreme Court and lower court cases that have impacted the course of affordable housing will be analyzed particularly in relation to the Fair Housing Act of 1968. The course will conclude with a review of employment opportunities in this field and how most effectively to pursue them.

LAW 540 Community Law Center Clinic III (2 Credit Hours)
Pre-requisites: Must have previously taken Community Law Center Clinic I
This course is open to returning Community Law Center Clinic I students seeking 2 credit hours. .

LAW 542 Trademark Law Seminar (2 Credit Hours)
Pre-requisites: Intellectual Property or Instructor Permission
No course description is available

LAW 549 Antitrust & Intellectual Property Seminar (2 Credit Hours)
Pre-requisites: Intellectual Property, Copyright or Antitrust Law or instructor permission
This seminar focuses on the interface between Intellectual Property (IP) and antitrust law. Patents, copyrights and trademarks and other IP regimes confer exclusionary rights. Exclusive rights provide incentives and serve other ends, but their exercise can also impede competition distort otherwise competitive markets. This seminar will address the intersection of IP and Antitrust with respect to issues such as standard setting, licensing, corporate strategy, product design, efforts to increase market share and mergers and acquisitions.

LAW 551 eDiscovery and Problem Solving (2 Credit Hours)
Pre-requisites: Civil Procedure, Criminal Law, Constitutional Law
Electronic discovery ("eDiscovery") is the practice of working with digital evidence during legal proceedings. It is at the intersection of law and such information technology disciplines as computer forensics, information governance, data analytics, machine and rule based learning, and artificial intelligence (and so that we do not scare anyone away, we expect that most students will have little experience with these concepts). Proficiency in e-discovery has become a must-have skill set for litigators. The Federal Rules of Civil Procedure and Evidence have already been modified multiple times in the last few years to try to address e-discovery concerns, and additional changes are under review by the drafters. The states have followed suit with their own rules. A burgeoning body of case law comes down each year, attempting to define the legal and ethical obligations of parties and counsel when preserving, collecting, reviewing, and producing electronically stored information. The result is a fundamental change in litigation practice. For example: the enormous costs of e-discovery drive settlement strategy in commercial litigation; divorce and trade-secret cases hinge on the contents of a party's cloud email account; product liability and personal injury cases focus on output from the Internet of Things; prosecutors and criminal defense attorneys fight to balance the wealth of evidence available from mobile phones with privacy rights; legal privilege protections are diminished because it is difficult to find attorney/client communications among large volumes of email; technology-savvy attorneys use their expertise to contest the authenticity and probative value of key pieces of evidence based on arcane metadata; parties seek arbitration or trial venues based on the protections and burden of local discovery rules; international reaction to US cyber-snooping hindered the ability of US litigants to obtain information from foreign parties; and, attorneys and litigants are sanctioned with alarming frequency for failure to properly manage e-discovery. Mastery of e-discovery is a differentiator for clients choosing counsel and for law firms in the hiring of new attorneys.
Law 551 is a survey course, to familiarize students with foundational concepts, and to delve into some of the more challenging questions that e-discovery poses. It will also look at creative and strategic ways that lawyers use digital evidence to advance their cases. The course will include a combination of lecture, discussion, and practical application, allowing students an opportunity to explore issues and practice their advocacy and problem solving skills. Readings will consist of case law, statutory and regulatory guidelines, ethical guidelines, research, and white papers. Grading will be based on class participation, a mid-term exam and a theme paper.
Outcomes:
Understanding eDiscovery workflows and best practices; Understanding governing rules and case law regarding eDiscovery

LAW 552 Political Civil Rights (1 Credit Hour)
The purpose of this course is to provide students with a survey of current and emerging issues in American civil rights litigation. It defines civil rights broadly and incorporates issues related to food justice as well as traditional doctrines addressing discrimination based on race, gender and other identities. As a start, the materials on racial discrimination serve as an anchor. The foundational framework for our civil rights laws is directly related to our racially discriminatory laws. For that reason, the course starts with landmark cases and historical developments impacting the social and legal treatment of blacks and other communities of color. Additionally, it asks students to think about what law is, what law is doing, and what it should be. The coverage, then, expands to the diverse areas of civil rights laws. Throughout, students will learn the contours of each doctrine, the principles that form it and their practical relevance. This begins with a discussion of racial discrimination as the catalyst for civil rights jurisprudence in America. The Civil Rights Act and relevant doctrines of the 14th Amendment are important to understanding the development of civil rights litigation. Ongoing and emerging issues affecting gay, transgender, women, nonconforming individuals, and poor classes are also covered as vibrant parts of civil rights jurisprudence. To this end, the course's materials are divided into three parts: the first part deals with foundational and historical issues that impact today's jurisprudence. Chapters in this first section examine the road to Brown and the struggle for desegregation in school systems nationally. It also discusses pre and post Reconstruction cases and statutes still relevant today. The second part examines in detail the cases and laws that make up the modern civil rights landscape. As such, it starts with the Civil Rights Act and a close examination of Title VII, Tile IX and Title VI. This section also includes cases that make up the voting rights canon as well as chapters on disability law, language minorities, and gender discrimination. The third section delves into a study of emerging issues in the twenty-first century. In these materials, relevant issues include the struggle for sustainability as civil rights issues, food justice, gender identity, sexual orientation, and same sex marriage.

LAW 553 Sex Trafficking (3 Credit Hours)
This seminar will explore sex trafficking as a structural problem of intersectional inequality and sexualized violence. This class will combine theory with a comprehensive overview of legal doctrine in areas of substantive criminal law and procedure. Students will also read several articles addressing intersectional feminism and critical race theory approaches to law, hierarchy, and vulnerability.

LAW 554 Family Law Practicum (1 Credit Hour)
Students in this practicum will administer a skills component of the traditional Family Law foundational course, focusing specifically on the drafting of an antenuptial agreement in a complex case hypothetical. Practicum students will serve as clients in the drafting exercise. In this capacity, students will meet face-to-face with the collective group of student attorneys representing each client and engage in ongoing, timely and detailed electronic communication with student attorney teams throughout the course of the skills exercise. Practicum students will also assist in evaluating the client counseling facet of the exercise, and in reviewing each prenup for its substantive terms. Each practicum student will spend approximately 40 hours engaged in work related to the exercise. Students may enroll in this practicum only with permission from the instructor.

LAW 555 Children and the Law (2 Credit Hours)
This course adopts a novel Critical Youth Theory approach to address a range of legal claims grounded in substantive due process from a child-centered perspective. We will explore the various ways in which child-centeredness shapes the legal discourse and how centering children invites us to think differently about legal problem-solving. Topics include: Voting, Right to Identity, Climate Crises, Global Perspectives on Children, Gun Violence, Poverty among others.

LAW 556 Alternative Dispute Resolution (2-3 Credit Hours)
This course aims to help law students become effective problem solvers through development of their knowledge and skills in negotiation, mediation, and arbitration as applied to a range of legal disputes. Students will learn to assist clients in identifying their goals and searching for creative solutions that produce efficient, expansive and effective outcomes. Students will learn about negotiation, mediation, and arbitration through lectures, but primarily through case simulations followed by critical feedback. Class attendance is critical. Class focus will be on the mediation and collaborative legal forums of Alternative Dispute Resolution, with an emphasis on learning procedural aspects of mediation and arbitration, and the collaborative skills of negotiation. This course will provide students with the opportunity to gain practical knowledge and familiarity with the different methods of alternatives to litigation. Classes will include lectures, simulations, role-playing, and outcome-based actual case studies. This is a Skills course.

LAW 558 Comparative Freedom of Speech (1-2 Credit Hours)
This course will explore the first amendment provisions dealing with free speech, freedom of association and religion with particular emphasis on free speech and association in a time of terror. We will also study the European counterpart protections with significant stress on civil and criminal defamation.

LAW 560 International Research (1-2 Credit Hours)
With the consent of a faculty member supervising the research, a student may earn credit for a project related to an international law subject. The scope and subject is arranged between the student and the faculty member.

LAW 564 Animal Law and Policy (2-3 Credit Hours)
Animals (meaning comprehensively for this purpose non-human mammals, birds, reptiles, fish, and insects) are central to our world in a myriad of ways. Historically, and still today (not without controversy and for better or worse depending both on degree and on your perspective), animals were and are a major source of food, as well as a tool of production as farm labor, transportation, policing and security, military activities, and entertainment and education, an object of scientific and medical research, and work as service and support animals. Animals are also key components - and participants - in our ecology and environment; after all, they have been on the planet in one form or another 500 million years before the first humans are believed to have emerged (and, even then, Darwin might point out that we have them to thank). Moreover, companion animals have been sources of friendship, companionship, and love throughout centuries and especially in modern society where they are often viewed as family members and not as possessions. These attachments, and public concern for the welfare of animals, also result in a determination to protect animals (although arguably in some contexts but not others) from neglect and abuse. For all of these reasons, animals intersect with virtually every aspect of legal concept and practice: property law, contracts, tort, criminal law, environmental law, wills and trusts, constitutional law, international law and trade, and more. And, like every area of law, animal law continues to evolve through legislative and regulatory action, judicial decision, and societal sentiment. That change can be complex, involving considerations of both human and non-human safety and wellbeing, ethical and moral beliefs, and economic interests. In this course, together we will explore themes across the spectrum of how the law touches and treats animals in our society, in our economy, in our homes, and in the wild. We will use a textbook as a starting resource, supplemented by materials from primary and real-world sources and contexts, as points of discussion and discernment. Each class member will also select an individual topic in an area of personal interest to develop in further depth and to share with the class to expand our knowledge. Coursework on which the performance assessment is based will be composed of a series of objective or short-answer written assignments throughout the course, a concise paper and class presentation on the student's chosen individual in-depth topic, a brief take home final examination that also serves as a summative reflection on the course, and class participation.

LAW 566 Blockchain & the Law (2 Credit Hours)
No course description is available

LAW 568 European Union Law (1-3 Credit Hours)
This seminar will provide a survey of the key Treaty provisions and legislation of the European Union (EU) and the key institutions of the EU that enforce these provisions. The course will focus on the so-called four freedoms of EU law - the free movement of goods, services, people, and investments. The course will also discuss the progress of the EU towards its long term goal of the completion of a single European market and discuss selected areas of the substantive law of the EU including competition law (antitrust). Students will prepare a paper on a mutually agreeable topic and submit an outline, first draft, and final version as well as present their topic in class toward the end of the seminar.

LAW 572 Special Education Dispute Resolution (1 Credit Hour)
This one credit hour weekend course will provide students with an intensive simulated experience in the various processes of resolution of special education disputes. Areas addressed will include some or all of the following: contested IEP meetings, manifestation determination reviews, resolution meetings, mediation, and due process hearings. Assuming the roles of parent¿s counsel and school district counsel, students will develop a practical working knowledge of federal and Illinois statutes and regulations governing special education dispute resolution; develop a legal understanding of, and working familiarity with, student special education records and documents; and learn how to interview and prepare clients, witnesses, school personnel, experts, and others for their respective roles in the dispute resolution process.

LAW 573 Terrorism Prosecution: Civil Rights & Executive Power in Theory & Practice (2 Credit Hours)
This class will examine how terrorism cases are investigated, prosecuted, defended and punished. It will address how suspected terrorists are targeted and captured, including surveillance methods and interrogation techniques, as well as the questions of whether these measures are effective and potentially undermine well-established and deeply in-grained constitutional liberties and culture. It will cover classified evidence in the adversarial process -- including how it is gathered, how it impacts charging decisions and trial strategies, and how courts manage it in adversarial proceedings. In addition to drawing out these issues as they operate in civilian courts, the course will also examine judicial alternatives, including the use of military tribunals or national security adjudicative systems in other constitutional democracies, as well as extra-judicial and judicially pre-emptive measures such as preventative detention, designations and the freezing of assets. Overarching issues that will animate our exploration will be the need for emergency rules and powers, the role(s) of the courts and counsel, and how well the U.S. legal system faces the challenge of balancing rule of law and civil liberty principles with the national security concerns in countering terrorism, both internationally and domestically. This is a non-exam course. Grades will be based (i) short written impression statements on assigned weekly readings which will be used as prompts for class discussion; (ii) classroom participation, and; (iii) a 15-20 page paper on a topic of choice in the field. The class will include participation by guest speakers, including scholars and practitioners in the field. This is a Skills course.

LAW 575 Futures, Swaps, & Other Derivatives (2 Credit Hours)
No course description is available

LAW 576 The Corporation and the Constitution (2 Credit Hours)
This class will investigate the origin in law of the corporate form and explore the challenges presented by the modern corporation, both from the standpoint of its legal structure as a business organization formed by law, and the rights and privileges afforded corporations under case law that interprets the corporation as a jural "person." Readings will be considered from colonial charters to the recent U.S. Supreme Court decision in Citizens United v. FEC (2010). There will be special emphasis on the contracts and commerce clauses of the Constitution, as well as the 14th Amendment. This course is not so much concerned with corporate responsibility as it is with corporate governance and accountability. We will explore the concept of limited liability, trace the evolution of legal personhood, examine the original public purpose requirement of the corporate entity as contemplated in law, and consider the role of public law in the world of the self-regulating market.(Class will meet at Chicago Kent Law School.)

LAW 578 Student Disciplinary Hearing Workshop (1 Credit Hour)
This one credit weekend course will provide students with an intensive simulated experience in conducting a student disciplinary administrative hearing. Assuming the roles of counsel for the student and counsel for the school district, workshop participants will prepare for and represent their respective clients in a school expulsion hearing. Participants will develop an understanding of the constitutional principles of due process, freedom of speech, and search and seizure as they pertain to students in the public school setting; as well as Illinois School Code statutory provisions regarding student discipline, suspension and expulsion.
In the course of preparing for the culminating disciplinary hearing, participants will gain a working familiarity with student codes of conduct and student school records and documents, and they will hone their skills in interviewing and preparing clients, witnesses, and school personnel for their respective roles in the discipline process and administrative hearing. Students will also deliver opening and/or closing statements and conduct direct and cross-examinations of witnesses and, through this process, will enhance skills applicable to a variety of court and administrative hearing settings. This is a Skills and Experiential Learning course.

LAW 584 Mediation Certification & Courthouse Practicum (4 Credit Hours)
Students in this course will be trained to become certified mediators and then develop their mediation skills through hands-on experience mediating in court. The course starts with a mandatory intensive mediation skills training conducted by the Center for Conflict Resolution (CCR) at the beginning of the semester. The course will thereafter meet once a week as part of CCR's certification process to discuss, practice and improve upon student mediation skills. Students who meet all of CCR's certification requirements will be certified as CCR volunteer mediators and mediate actual cases in Cook County courts, while continuing to meet in class to discuss and build on what they learn in the mediations. Upon completion of this course and the CCR certification process, students will be able to continue volunteering as mediators for CCR, as long as they continue to meet CCR's volunteer requirements. Instructor Permission Required. Spots are limited so students are encouraged not to delay seeking permission to register for the course. To apply, email Professors Block and Eatherton. Preference will be given to students who have already completed a mediation or negotiation course, whose fall schedules are compatible with the court mediation schedule, and who are in their final year of school. Those who do not get a spot may request to be put on the waitlist. Enrollment Requirements: Restricted to J.D. and LL.M. students

LAW 586 Community Law Center Clinic Veterans Practicum (2-4 Credit Hours)
Pre-requisites: 44 credit hours completed
The Veterans Practicum is a cross-disciplinary effort in partnership with the School of Social Work designed to better address veterans' social and legal needs. Senior law students will use 711 license to represent veterans and their families in a myriad of civil legal matters under the supervision of the director, Emily Vaughan. Students who enroll in this course must be available to be for office hours one morning or one afternoon each week (Monday-Friday). The Practicum also has a classroom component that meets each Wednesday from noon to 2 p.m. The purpose of the classroom component is to provide students with a theoretical overview of the lawyering skills that will be required of them in their casework.

LAW 590 Victims and the Criminal Process (2 Credit Hours)
This course tracks the victim's role and the rights of and responsibilities to victims. The course considers the different stages of the criminal process, from investigation through sentence and post-sentence matters, and the law of victims' rights through that process. It examines state constitutions and federal statutory victims' rights. The course also examines definitions of "victim" to see who is included and excluded; examines gender and racial bias in criminal justice and how these impact response to crime; it examines historical and comparative responses to victims of crime, and analyzes how the law serves different kinds of victims, including victims of wrongful convictions, victims of financial fraud, and other classes of victims. The course will require a research paper. No exam.
Outcomes:
Students will learn the statutory and constitutional rights and laws pertaining to victims; Students will examine and consider policy implications related to the rights of victims; Students will collaborate with colleagues to present on at least one area of victims' rights and proposed reforms

LAW 592 Independent Research (1-2 Credit Hours)
With the consent of a faculty member supervising the research, a student may earn one or two units of ungraded credit. The scope and subject is arranged between the student and the faculty member. It is expected that for each hour of academic credit the student will produce a scholarly work of publishable quality of approximately 30 pages in length. The project that is the subject of the Independent Research must be completed during the semester in which the registration occurs. This variable credit course may be repeated for a maximum of six (ungraded) credits. (For additional requirements see the associate dean.) This is a Non-Graded Course.

LAW 593 Graduate Fellowship Extern (1-4 Credit Hours)
Students may earn externship credit for working at an approved externship site. This program is designed to offer students practical experience.

LAW 594 Directed Study (1-2 Credit Hours)
A student may earn up to two units of ungraded credit for undertaking a research project for a faculty member. The scope and subject is chosen by the faculty member, who exercises control over the project. It is expected that for each hour of academic credit the student will engage in substantial legal work for at least fifty-five (55) hours during the semester. The project that is the subject of the Directed Study must be completed during the semester in which the registration occurs. This variable credit course may be repeated for a maximum of six (ungraded) credits. (For additional requirements see the Associate Dean.)

LAW 595 Community LawCtr Clinic I (4 Credit Hours)
The Community Law Center Clinic (LUCLC) course is designed to teach students the essential skills involved in the practice of law, including client interviewing and counseling, hearing advocacy, negotiation and practice management. These skills are taught in conjunction with the representation by students of clients in civil cases under the supervision of Professor Theresa Ceko and the law school's clinical faculty. The Law Center is located in Room 1005 of the law school. Students who enroll in the clinic course must be available to be in the clinic either one morning or one afternoon each week (Monday-Friday). The course also has a classroom component that meets each Wednesday from noon to 2 p.m. The purpose of the classroom component is to provide students with a theoretical overview of the lawyering skills that they perform at the clinic. In addition to regular clinic hours and classroom work, clinic students work on their cases during an additional 6 hours a week, most of this work done on the student's own time. Any student who has completed the first year of law school can enroll in the clinic course. Students in the LUCLC represent children in contested guardianship cases and clients in civil cases involving landlord/tenant, family and elder law problems. Many of LUCLC's clients are low income persons. Serving persons who cannot afford legal services sensitizes students to the special ways that the law affects the lives of the indigent. Another important aspect of the LUCLC course is the opportunity for students to develop their own sense of the lawyer's professional role. Students experience the complexity of the attorney-client relationship and the myriad ethical dimensions of lawyering. Students are exposed for the first time to the conflicts, frustrations and rewards inherent in legal practice. Enrollment in the Community Law Center Clinic course also helps students prepare for the performance tests that have been added to many state bar examinations, including Illinois. The skills that these performance tests measure are the same skills that students learn through their client representation. The Community Law Center Clinic course is an excellent bridge from the law school classroom to the law office. It allows students to begin to learn how to practice law in a reflective environment.

LAW 596 Community Law Center Clinic II (3 Credit Hours)
Students in the LUCLC represent children in contested guardianship cases and clients in civil cases involving landlord/tenant, family and elder law problems. Many of LUCLC's clients are low income persons. Serving persons who cannot afford legal services sensitizes students to the special ways that the law affects the lives of the indigent. Another important aspect of the LUCLC course is the opportunity for students to develop their own sense of the lawyer's professional role. Students experience the complexity of the attorney-client relationship and the myriad ethical dimensions of lawyering. Students are exposed for the first time to the conflicts, frustrations and rewards inherent in legal practice. Enrollment in the Community Law Center Clinic course also helps students prepare for the performance tests that have been added to many state bar examinations, including Illinois. The skills that these performance tests measure are the same skills that students learn through their client representation. The Community Law Center Clinic course is an excellent bridge from the law school classroom to the law office. It allows students to begin to learn how to practice law in a reflective environment.

LAW 597 The Use of Force in International and Domestic Law (2 Credit Hours)
This course introduces students to constraints on the use of force in international and U.S. domestic law. International law topics include: (1) a brief introduction to international law and legal theory; (2) the United Nations Charter and limits on the use of force between states; (3) the difference between armed conflict and law enforcement matters; (4) rules regulating the conduct of fighters during an armed conflict; (5) human rights law, and; (6) the law of the sea. Domestic law topics include: (1) the general relationship between international law and the U.S. legal system; (2) the allocation of authority to use and limit the use of force under the U.S. Constitution; (3) domestic law regulating the conduct of armed hostilities, and; (4) domestic statutes regulating the use of the armed forces for domestic law enforcement and other emergencies. The final grade is determined by a take-home final exam, class preparation and participation, and contributions to in-class group work.

LAW 598 Appellate Advocacy Honors Program (2 Credit Hours)
The Appellate Advocacy Honors Program is the classroom component of Loyola's Moot Court Program. Students will learn effective appellate advocacy through lectures and workshops. Work completed in the classroom will not only prepare students for their competitions, but also strengthen written and oral advocacy skills for legal practice. This is a Skills and Comprehensive Simulation course.

LAW 599 Externship Intensive Field Placement (1-3 Credit Hours)
Externship - Intensive Field Placement - Chicago (1-3) Skills, Live Client Experience Students enrolled in the JD program who have completed all required first year courses may apply for an externship at an approved field placement site. Certain field placements may limit eligibility to students who have completed certain course work or who have obtained their Illinois Supreme Court Rule 711 license. Students in the externship program may earn 2 or 3 hours of non-graded credit for supervised work performed at an approved field placement site. Students participating in the externship program are also enrolled in a contemporaneous and competency based seminar course. The classroom component of the course has been designed to complement the legal work performed by the student in the field. The focus of the seminar course is on professional identity formation, professional skills, ethics, and cultural competence. The goal of the course is to assist students as they transition to the practice of law. There is no final examination in this course. This course is offered each semester. Externship: Intensive Field Placement - Washington, DC (2-3) Skills, Live Client Experience Students enrolled in the JD program who have completed all required first year courses may apply for an externship at an approved field placement site. Certain field placements may limit eligibility to students who have completed certain course work. Students in the externship program may earn 2 or 3 hours of non-graded credit for supervised work performed at an approved field placement site. Students participating in the externship program are also enrolled in a contemporaneous and competency based seminar course. The classroom component of the course has been designed to complement the legal work performed by the student in the field. The focus of the seminar course is on professional identity formation, professional skills, ethics, and cultural competence. The goal of the course is to prepare students who expect to practice law in the DC area with their transition to the practice. There is no final examination in this course. There is no final examination in this course. This course is offered only during the summer semester.
Outcomes:
Students will integrate substantive law and legal skills learned in the classroom into real-world legal settings through supervised practice, reflection, and feedback; Students will exhibit professionalism by adhering to ethical obligations, communicating effectively with supervisors and clients, managing time and workload expectations, and engaging in reflective practice to improve their lawyering skills

LAW 601 Child, Family, and the State (2 Credit Hours)
This course examines the legal relationships among children, families, and the state. Areas of law to be examined include child welfare, education, and juvenile justice. The course will explore Supreme Court jurisprudence on the issue of parental rights and family privacy as well as the doctrine of children's rights. Attention will be paid to the role of race, gender, and class and their intersection in shaping the ways in which children and families interface with governmental systems. Students in the course will be asked to grapple with critiques of governmental systems impacting children and families, explore calls to reconstruct and reconstitute these systems, and examine the role of lawyers working from within and outside these systems.

LAW 602 ChildLaw Trial Practice (Intensive) (3 Credit Hours)
This is Trial Practice I with an emphasis on those issues important to advocacy in cases involving children. The course is taught by a team of lawyers and judges experienced in child advocacy, with a student/faculty ratio of no more than 8 to 1. The principal objective is to introduce students to litigation principles, and to teach them advocacy skills in an intensive learn-by-doing environment. The case files from which exercises are drawn also enable students to prepare for the special challenges involved in the representation of children (child witnesses, unique problems in expert testimony, special evidentiary issues, etc.). At the end of the course each student conducts a complete trial before a mock jury at the Daley Center. Evidence is a prerequisite and the course requires instructor permission. This is a Skills and Experiential Learning course.

LAW 606 Legislation and Policy Clinic (2-4 Credit Hours)
The ChildLaw Legislation and Policy Clinic is part of the Civitas ChildLaw Center. Students in this Clinic have an opportunity to work, under the supervision of a faculty member, on a legislative or policy project that may involve any or all of the following: critiquing pending bills or existing legislation, drafting bills, developing summaries and fact sheets about pending bills, and building and working with coalitions to develop legislative ideas and consensus. Topics cover a range of child and family issues. Spring semester students primarily work on projects begun during the Fall Clinic, including researching and drafting legislation concerning child protection and juvenile justice reform issues. Students work in teams and must have sufficient time or flexibility during the work day to participate in some internal team meetings as well as attend meetings outside the Law School, as needed. (Instructor permission required.)

LAW 608 Juvenile Justice (2 Credit Hours)
In this course, we will explore legal and policy questions centered on how society should respond to children, adolescents and youth adults who commit crimes. To what degree should developmental differences between youth and adults be reflected in law and policy? Are legislators or individual judges in the best position to decide how to meet the needs of youthful offenders while at the same time protecting the interests of victims and the larger community? What responsibility do parents and communities bear in providing children and opportunity to change their behavior? How should the justice system interact with other systems, including education, mental health and child welfare? Summative assessment in the course will be measured by student performance on a midterm exam and a final paper, together with exemplary preparation, attendance and participation.

LAW 613 ChildLaw Fellows Seminar (1 Credit Hour)
This seminar serves as a capstone opportunity for ChildLaw Fellows to contextualize their interdisciplinary legal education and to explore their roles as advocates in working in and reforming the complex and evolving systems that affect children and their families.

LAW 615 Child and Family Law Mediation (2 Credit Hours)
This course will explore the use of mediation in disputes involving children and families. Students will survey various models and uses of mediation and related dispute resolution processes in the following contexts: divorce, custody and visitation issues; child protection; juvenile delinquency; balanced and restorative justice; adult guardianships; youth violence prevention and peer mediation; and special education. Further, students will consider the impact of domestic violence and other impairments on the child and family mediation process. In addition to reviewing basic mediation skills, students will participate in classroom exercises designed to develop their ability to think critically about issues, as well as apply mediation strategies to dispute resolution scenarios. This is an Experiential Learning course.

LAW 617 Policy Practicum: Issues in Childlaw (1-3 Credit Hours)
Instructor Permission Required

LAW 620 Civitas ChildLaw Clinic (1-4 Credit Hours)
The Civitas ChildLaw Clinic represents children in a variety of settings including child protection (abuse and neglect), family separation (custody and visitation), education, and other kinds of cases involving children and youth. Students typically work on at least two cases during the course of a semester, under the supervision of at least one member of the Clinic faculty. The Clinic also includes a weekly seminar that addresses relevant substantive law, advocacy skills, and ethical issues in the representation of children. Students will learn about the law governing their areas of practice and gain experience with a range of lawyering skills, including client interviewing and counseling, case planning, and written and oral advocacy. While the subject matter of the Clinic's cases focuses on children's issues, students should expect to develop skills transferrable to any practice setting. The course is open to all students eligible for a student practice license under Illinois Supreme Court Rule 711, and no prior experience in working with children is required. Instructor permission is required for enrollment, and the application for the course can be found here: https://www.luc.edu/media/lucedu/law/experiental/pdfs/childlaw-clinicapplication_fillable.pdf. Professor Bruce Boyer (bboyer@luc.edu) serves as the Clinic Director, and Professor Stacey Platt (splatt@luc.edu) serves as Associate Director. Students receive four credits for their first semester enrolled in the course; students repeating the Clinic for a second semester receive three credits, with other credit options available with permission of the instructor. This is a Skills and Live Client Experience course.

LAW 622 Operationalizing Treaties (2 Credit Hours)
Operationalizing Treaties probes the relationship between multilateral treaty implementation and economic, social, and institutional development at the domestic level. Particular attention will be devoted to treaties involving arms control, the environment, human rights, labor, and transnational crime for which economic considerations offer limited motivation for state compliance. A central theme of the course is the relation of treaty operationalization to national development.

LAW 625 Mediation Workshop (1 Credit Hour)
Mediation is an alternative to litigation which enables disputing parties to negotiate their own agreed settlement. It involves an impartial third party neutral, the mediator, who assists disputing parties in this alternative dispute resolution (ADR) process. This course will offer an overview of mediation techniques, applications, and history. Through simulations and other in-class exercises, students will consider how mediation differs from other types of ADR processes, how mediation styles and models differ from one another, and how the role of the attorney-advocate changes during mediation. This course will be conducted in an intensive workshop format over the course of one weekend where students will role play as client and attorney. No textbook is required, nor is there a first assignment. This is a Skills and Experiential Learning course.

LAW 631 ChildLaw Graduate Extern (1-3 Credit Hours)
Students seeking credit for successful completion of an experiential learning opportunity (externship) may register for up to 3 credits. Students are responsible for securing an externship placement that focuses on issues impacting children and families. Prior to accepting the placement, a student must receive prior approval from the Academic Director of Child and Family Law Programs. Students must commit to work 60 hours per credit at the approved internship site. At the end of the externship, students must submit a short paper describing the nature of the work performed and how the externship experience advanced their understanding of child and family law.

LAW 641 Childlaw Directed Study (1-3 Credit Hours)
Students have the option of working individually on a research project with a faculty member on a credit/no credit basis. An interested student must first identify a faculty member willing to supervise the project and submit an abstract of proposed work to the faculty member. The project must relate to issues of child and/or family law. If the faculty member agrees to supervise the project for the requested credit hours, he or she will work with the student to develop a supervision schedule to ensure successful completion of the project.

LAW 643 Children's Legal Rights Executive Journal Editor (1-3 Credit Hours)
The Children's Legal Rights Journal ("CLRJ") is a legal journal published by law students at Loyola University Chicago School of Law in cooperation with the National Association of Counsel for Children. Members of the CLRJ staff review, select, and edit articles prepared and submitted by authors from multiple disciplines - including law, social work, and psychology - focused on legal and adjacent issues related to children's care and empowerment. All new staff must also write a short feature article that is published in either the fall or spring issue as well as a long-form student article which may be selected for publication in the spring. The CLRJ staff hosts a yearly symposium on child law issues, with presentations by nationally recognized experts. Students are invited for membership on the CLRJ Staff after their first year of law school based upon an application and entry in a writing competition. The course is graded on a pass/fail basis.

LAW 644 Chldrn Leg Rights Jrnl Assoc Editors (1-3 Credit Hours)
The Children's Legal Rights Journal ("CLRJ") is a legal journal published by law students at Loyola University Chicago School of Law in cooperation with the National Association of Counsel for Children. Members of the CLRJ staff review, select, and edit articles prepared and submitted by authors from multiple disciplines - including law, social work, and psychology - focused on legal and adjacent issues related to children's care and empowerment. All new staff must also write a short feature article that is published in either the fall or spring issue as well as a long-form student article which may be selected for publication in the spring. The CLRJ staff hosts a yearly symposium on child law issues, with presentations by nationally recognized experts. Students are invited for membership on the CLRJ Staff after their first year of law school based upon an application and entry in a writing competition. The course is graded on a pass/fail basis.

LAW 645 Children's Legal Rights Journal Senior Editors (1-2 Credit Hours)
The Children's Legal Rights Journal ("CLRJ") is a legal journal published by law students at Loyola University Chicago School of Law in cooperation with the National Association of Counsel for Children. Members of the CLRJ staff review, select, and edit articles prepared and submitted by authors from multiple disciplines - including law, social work, and psychology - focused on legal and adjacent issues related to children's care and empowerment. All new staff must also write a short feature article that is published in either the fall or spring issue as well as a long-form student article which may be selected for publication in the spring. The CLRJ staff hosts a yearly symposium on child law issues, with presentations by nationally recognized experts. Students are invited for membership on the CLRJ Staff after their first year of law school based upon an application and entry in a writing competition. The course is graded on a pass/fail basis.

LAW 651 LL.M. Childlaw Thesis (3 Credit Hours)
Students enrolled in the Child and Family Law LLM degree program must enroll in this course in order to graduate. Working with a thesis supervisor, students have the option of completing a research paper of publishable quality. Students and their supervisor work together to agree on a topic and supervision schedule. LLM students must complete all required elective credits before enrolling.
Outcomes:
Develop focused, original research topic in partnership with the thesis supervisor that aligns with academic interests and scholarly standards, demonstrating potential for academic contribution and publication; Create a comprehensive research plan in collaboration with the thesis supervisor, outlining clear research questions, methodologies, and a timeline that supports the completion of a publishable paper; Execute independent research through the selection of appropriate methodologies, critical analysis of existing literature, and data gathering to address defined research questions; Apply critical thinking to the work, with integration of supervisor feedback to refine and strengthen the research findings, methodology, and overall structure, enhancing the clarity and depth of the paper

LAW 652 LL.M. Paper Completion-Childlaw (1 Credit Hour)
Students who are unable to complete their thesis in the LLM ChildLaw Paper course in a timely manner must enroll in this course. Depending on the status of research and writing completed during the LLM ChildLaw Paper course, the faculty supervisor will, in consultation with the student, agree on the required number of credits needed for successful completion of the course requirement.

LAW 654 Current Issues in Children's Law Seminar (2 Credit Hours)
This interdisciplinary seminar is designed to give students an opportunity to engage in an in-depth exploration of current and emerging issues in children's law. The seminar will focus on the legal implications of current child welfare policy and practice, ongoing efforts at child welfare and juvenile justice reform through state and federal initiatives, the use of empirical research in guiding child welfare and juvenile justice initiatives, and long term implications for families and children. Specific topics include, among others, an introduction to the concept of therapeutic jurisprudence, advocacy for children in the child welfare and juvenile justice systems, the role of race and class in permanency planning for children, the legal and ethical implications of privatized child welfare services, and ancillary domestic relations issues that often arise within child welfare.

LAW 663 Children's Summer Institute (3 Credit Hours)
The focus of this year's class is on the safety nets in place - and needed - to support children and families and prevent entry into our child welfare and juvenile justice systems. Over the course of the week, students from different graduate programs will engage in an interdisciplinary exploration of a series of complex questions involving children's best interests, and the policy and practice considerations and challenges impacting government decision making when it comes to reimagining our current structures. Instructor Permission Required

LAW 665 Introduction to the Study of Law and Legal Systems (2 Credit Hours)
This required foundational course introduces students to the sources and functions of law in our society. The course begins with an explanation of the structure and traditions of the American court system. Students then lean to read and analyze cases and statutes and develop basic legal written and oral presentation skills. The course uses child and family law cases and problems and provides students with the background they will need for future children's law and policy studies. MJ students should take Law 665 in conjunction with Law 667 in their first term.

LAW 667 Introduction to Children's Law, Policy and Practice (2 Credit Hours)

Co-requisites: MJ students should take LAW 667 in conjunction with LAW 665

This required course is designed to give students an introductory overview of the law as it affects children. It begins with a discussion of the constitutional relationship among children, parents and the state, as well as the respective roles of the federal and state governments in the regulation of children and families. The course then introduces students to the principal areas of civil and criminal law that affect children and families. With this baseline of understanding, students can choose elective courses that provide a more in-depth study of a particular topic (e.g. education law, child welfare, etc.).

Outcomes:

Create a community of learners and leverage shared experiences in an online forum; Understand the difference between rights granted to adults compared to children; Apply leading US Supreme Court cases affecting children's law through discussions and course writing assignments; Remember Juvenile Court's jurisdiction over: 1) abused/neglected/dependent youth, 2) delinquent children, and 3) children who commit status offenses; Evaluate general facets of educational law including students' rights, schools' rights, and private education; Analyze general facets of mental health law including voluntary and involuntary treatment or institutionalization of minors; Understand general facets of family law including marriage, divorce, child support, and "best interest" custody determinations; Evaluate general facets of children's international law and international treaties affecting children, including the United Nations Convention on the Rights of the Child; Remember ethical and liability issues in practice including areas such as confidentiality, record-keeping, responses to a subpoena, and testifying as an expert; Create ways to be a trauma-informed advocate and understand expectations in the courtroom when testifying as an expert witness or lay person

LAW 668 Leadership Development (4 Credit Hours)

Pre-requisites: For Child Law MJ students: LAW 665 and LAW 667

One of the distinguishing features of the Online MJ in Children's Law and Policy is its focus on the development of leadership skills for child advocates across a range of disciplines and organizations. This required cornerstone course begins with an introduction to different types and styles of leadership before turning to a more practice-based preparation for leadership in such areas as operations, human resources, finance, and communications.

Outcomes:

Define "management" and "leadership" and discriminate between them; Observe and grasp the bigger picture of the global trends and leadership challenges that call for servant leadership in today's world-especially concerning child and family welfare; Define and provide examples of the basic concept of "servant leadership"; Understand what motivates people and discern what motivates them as individuals; Be familiar with the history of organization development and dynamics and where the field of organization behavior is in today's environment; Understand why people resist change and the barriers to making it happen for people and systems; Apprehend how adults learn and how this is relevant to leadership, to "unlocking the human equation" and to aligning others to transformational change; Define the concept and role of "culture" in organizations and systems and understand the leader's role in shaping the values and ethos of an organization or group; Learn their own personality "type" and understand how personality affects behavior in the workplace; Demonstrate commitment to treating differences in the workplace such as generational gender, ethnic, religious, sexual preference, class, country of origin, educational background, etc, with sensitivity and mindfulness; Be exposed to the disciplinary approaches and tools of "organization development" as a tool for strategic leadership and change; Master the "leaders' tool chest"-a variety of tools, templates and models that leaders use to diagnose leverage points in organizations, engage in problem finding and definition and then utilize a strategic blueprint to manifest change; Can name the most popular organizational large scale approaches to lead change in organizations and systems; Know what strategic thinking is and how the ability to take a strategic viewpoint translates into change initiatives; Demonstrate outcomes oriented strategic thinking by drafting SMART goals-specific, measurable, achievable, realistic and timely; Name a variety of leadership models, including situational leadership, servant leadership, authentic leadership, transactional vs transformational, 5th level leadership, leading with soul and leadership as jazz; Develop and articulate the key elements of their own unique leadership brand or "identity", building from the models studied and reflecting on their own mission and leadership "journey"; Reflect on their own life story, career lifeline and values to create a vision and mission statement for their own leadership agenda; Define the elements of two way communication and how to listen actively as well as conduct "fierce or powerful conversations"; Knows the value using story to align others to their vision-can demonstrate how telling a powerful story can be a valuable tool for persuasion for leaders; Complete several self assessments and determine how self-awareness is a vital part of the EQ and CQ-and essential to being a successful servant leader; Articulate a leadership "mantra" and life's mission statement; Understand the concept of creating a learning organization and know a variety of ways to develop the talents and human potential in staff, colleagues and themselves (aka demonstrate a commitment to lifelong development and learning); Demonstrate the ability to find and define a problem or challenge in their own field or discipline and create a compelling proposal for a project, innovation or initiative that creates change or improves the welfare of the target group of children and or families; Demonstrate curiosity about cutting edge thinking in leadership-such as "anti-fragility" training, neuro-science brain research, how AI will impact the workplace, leadership as jazz, Positivist Psychology and Appreciative Inquiry, etc; Envision how they will apply the insights from this course to their own leadership agenda and utilize their insights about change both personally and professionally

LAW 669 Education Law and Policy (3 Credit Hours)
Pre-requisites: LAW 665, 667 & 668
This course explores some of the challenging legal and practical issues confronting education in America, including the uncertain boundaries between public and private education, the constitutional and statutory rights of students, including equal access and treatment, the increasingly fluid constitutional and statutory rights of teachers, and the structure of educational governance, including the role of the federal government, local control, school board powers and even strategic planning.

LAW 670 Child Welfare Law and Policy (2-3 Credit Hours)
Pre-requisites: Law 665, 667 and 668
This course focuses on federal and state legal and policy efforts to protect children from abuse, neglect and other forms of maltreatment. Topics include mandatory reporting laws, liability issues, the general structure and content of child protection laws, including permanency planning termination of parental rights. Students will explore the concept of the best interest of the child in a legal context and review laws and research aimed at promoting children's welfare.

LAW 671 Juvenile Justice Law and Policy (2-3 Credit Hours)
This course explores the law, policies and practices of the American juvenile justice system, past, present and future. The focus is on children who are in conflict with the law and those who, by virtue of their status as children, are subject to the jurisdiction of the juvenile court for engaging in conduct such as curfew violations, running away, and other forms of potentially harmful adolescent behavior. Among other issues, the course will examine how juvenile justice law and policy has been shaped by new research on adolescent development, including brain research.

LAW 672 Family Law and Policy (3 Credit Hours)
The focus of the course is on the rapidly changing legal, social, and scientific landscape of family law. The course covers traditional areas such as marriage formation and dissolution, support, child custody and the role of the child's attorney, as well as emerging areas such as same-sex marriage, collaborative law, and defacto and equitable parenthood.

LAW 673 Mental Health Law and Children (2 Credit Hours)
Pre-requisites: LAW 665, LAW 667 and LAW 668
Mental health and substance abuse impacts everyone. According to the National Institute of Mental Health, in a given year approximately one quarter of adults in the United States are diagnosable for one or more mental illnesses. Additionally, one out of five children, either currently or at some point during their life, are diagnosed with a mental illness. Mental illness has a profound impact on children and families, including the legal response to these issues. Students will study the cases, statutes, and legal doctrines relating to the rights and inpatient/outpatient treatment of persons with mental illness or a developmental disability, with a special emphasis on children, youth, and parents and/or legal guardians. Topics covered include: informed consent to outpatient and inpatient treatment, admission/transfer/discharge, confidentiality of mental health records, litigation issues addressed by practitioners, and risk management strategies for mental health practitioners. This course will use cases and examples to compare and contrast application of the law and policies.

LAW 674 Law, Poverty and Public Benefits (2 Credit Hours)
According to the National Center for Children in Poverty, children are disproportionately impacted by poverty, especially children of color and immigrant children. These risks are greatest for children who experience poverty when they are young and/or experience deep and persistent poverty. This course concerns those areas of civil law which most affect low income children and families, including public benefits such as welfare, housing, education, and health care. Other systemic issues will be explored, such as wealth discrimination, use of legal remedies to promote social change, and the delivery of legal and other services to children.

LAW 675 Legislation and Law Reform (2 Credit Hours)
This course introduces students generally to the legislative process and more specifically to federal and state laws and policies that affect children and families. Students will have an opportunity to draft model legislation, critique existing or proposed legislation, and learn techniques for educating lawmakers and policies makers about children's needs and the importance of research and data in formulating child-centered and effective laws an policies.

LAW 676 Conflict Resolution in Child and Family Law (2 Credit Hours)
One of the newest trends in children's law is the effort to find ways to resolve disputes without resort to the adversary system. Examples include restorative justice initiatives in schools and the juvenile justice systems, collaborative decision-making in family law, and mediation in the health care and child protection contexts. in this course students learn about the various types of alternative dispute resolution (ADR) (e.g., mediation, negotiation, collaborative dissolution) through a series of case examples and practical exercises.

LAW 677 ChildLaw Thesis/Capstone (4 Credit Hours)
Pre-requisites: Law 665, 667, 668, and required elective credits
Students are expected to complete either a thesis or capstone project of substantial depth that explores a specific area of children's law and policy and that integrates subject matter and/or leadership skills learned in the M.J. curriculum. The project is completed in close cooperation with a faculty advisor. Students are required to present their thesis or capstone project to faculty and fellow students during their graduation (Educational Immersion) weekend.

LAW 678 International Children's Rights (2-3 Credit Hours)
Pre-requisites: LAW 665, LAW 667, and LAW 688
This 3-credit elective course serves as an introduction to international children's rights. It provides an overview of international human rights principles and procedures affecting children, with special emphasis on the UN Convention on the Rights of the Child. With this baseline understanding, you will explore thematic topics affecting children, including issues such as corporal punishment, child marriage, child labor, international adoption and abduction, discrimination, child soldiers, environmental challenges and child participation. Issues of equity, leadership and advocacy are identified and discussed throughout the course. As you proceed through the material, you are asked to remember and reflect on the fact that the world's most vulnerable children, those who most need the protection of international human rights law, are poor children of color. Please hold that thought near to you as you examine the range of issues that children experience around the globe and the potential for international human rights to respond to those issues.
Outcomes:
Identify human rights that all children should enjoy; Articulate the nature and scope of challenges children face around the world; Assess ways in which globalization has impacted children and families positively and negatively

LAW 679 Children's Health Law and Policy (2 Credit Hours)
Pre-requisites: LAW 665, LAW 667 & LAW 668
The purpose of this course is to teach interested students the application of law to critical public health issues that affect children and youth. Students will first learn basic principles of public health including the distinction between health promotion, disease prevention, and health protection. Next, the course will address the constitutional and statutory foundation of public health law, how legislative and regulatory decisions must negotiate the balance between individual rights and public good, and how the principles of parents patriae and state police powers affect child health. Cases studies in the areas of obesity, reproductive health rights of minors, mandatory school immunizations, student drug testing, and violence prevention will illustrate the application of public health jurisprudence from the national to the state levels.

LAW 680 ChildLaw MJ Independent Study (1-4 Credit Hours)
Pre-requisites: LAW 665, LAW 667, LAW 668 Research paper/project to be approved by a Child Law faculty member and Director before enrolling
The student will be engaged in research and in initiating the development of a curriculum targeted to a teen audience that educates teens about local and federal laws that have an impact on their lives as adolescents, including juvenile justice issues, mental health laws, custody issues, drinking and driving. The student has been working with adolescents on psychological issues as part of her field placement for the Masters of Social Work degree. This course will allow her to broaden that focus to include legal considerations that play an important role in helping teens who will soon be emancipated and facing lives as adults. The first part of the course will require the student to identify the specific issues and laws that will be included in the curriculum and to explore resources, both in law journals and in interviews with teaching faculty, that will inform her presentation of the issues. The second part of the course will be devoted to developing the format for the curriculum that will be most effective in reaching this media savvy audience. The format will be informed by the student's knowledge from the field of social work of the psychological development of adolescents and their needs, supported by current research. The goal of the course is to begin a project which will be fully completed at the end of the thesis capstone course in the Master's in Jurisprudence Degree.

LAW 682 Education Immersion Weekend Seminar (0-2 Credit Hours)
In addition to the required curriculum, students are required to travel to Loyola's Chicago campus at least once during their tenure in the program for an Education Immersion Weekend (EIW). During the weekend, students gather in person to workshop or present their thesis/capstone project, attend experiential learning workshops, and meet with faculty, students and alumni.

LAW 683 Legal Issues in School Discipline (2 Credit Hours)
The course will address the Constitutional implications of student discipline and the statutory provisions governing student discipline and the administrative hearing process. Students will learn about `zero tolerance' policies, the role that school discipline plays in the `school-to-prison pipeline' and the discriminatory impact of school discipline policies. Issues relating to discipline in charter schools and discipline of students with disabilities will also be addressed. Other topics to be discussed include disciplinary-related challenges that arise in the context of protecting vulnerable children, including issues of harassment and bullying of LGBT students and students with disabilities, and the legal tenets governing school districts' responses to cyberbullying and the rise of social networks and digital media. Emerging trends in alternatives to punitive school discipline practices, such as human rights approaches, positive behavior interventions and supports, and restorative justice, will be examined.
Course equivalencies: X-CIEP 620/LAW 683

LAW 684 System Consultation in School Discipline Reform (2 Credit Hours)
The purpose of this course is to integrate and apply two interrelated broad literature bases within the field of education: (1) system change and data analysis literature informing best practices in analyzing system school data and needs assessment findings and using the findings to plan for system level discipline change; and (2) best practices in the school leadership and teaming to effect system level reform in school discipline. The focus of the course will be on the systems change process as it relates to the issue of school discipline. Through the course, students will gain skills and experience reviewing and analyzing school and district-level data, and they will develop and administer a needs assessment tool relating to school discipline and multi-tiered systems of support in their respective settings. They will also analyze system level variables, which have historically prevented true discipline reform (e.g., unreliable data collection systems, poorly structured teaming, access to systematic and ongoing professional development and technical assistance and rooted beliefs and biases).
Course equivalencies: LAW 684 / CIEP 535

LAW 685 Restorative Justice (2 Credit Hours)
This course begins with an intensive in-person weekend retreat where students will build relationships with each other and, through experiential exercises and lively discussion, internalize core principles. Throughout the retreat and course, students compare and contrast restorative and retributive justice models, practice proactive and responsive restorative techniques, and identify personal and professional shifts to exemplify a restorative mindset. Specific restorative techniques which students will learn include restorative language, facilitation of a variety of types of circles, restorative dialogue processes, and systems and structures to accommodate restorative practice within school life. Through additional seminars, students will strengthen their knowledge of the history, theory, research, and practice of restorative justice. The culminating focus of the course invites students to apply restorative principles and practices in their own school or district setting.

LAW 687 Introduction to Legislative and Policy Advocacy (3 Credit Hours)
The purpose of this course is to provide tools and strategies for students interested in learning the techniques for effective advocacy at the state and federal levels. The first portion of the course will provide historical context on the three branches of governments' ability to make policy. The course will then examine the processes that turn a problem into a legislative solution, including how to move a bill into law. The These tools include identifying an issue, conducting national surveys, building a base through community organizing, drafting, lobbying, and offering testimony in committee. A recurring theme in the course is the need to examine external obstacles that impact policy making. Students will also learn how to conduct racial equity impact assessments and how the absence of this work has impacted policy decisions in the United States in the past.

LAW 689 Family Law (3 Credit Hours)
This 3-credit elective course in family law specifically designed for post J.D. students provides an overview of the laws and court decisions in the United States that have shaped family life and the institutions of marriage and parenthood, with a special emphasis on the role of the legal system as it affects children's rights and welfare within these institutions. With a base line understanding of the general principles of constitutional law in family law cases, students then turn to an exploration of thematic topics, including evolving standards for child custody and the factors in custody decisions, including race, religion and domestic violence and the formation of multiple- parent families and child custody. We also explore corporal punishment and other parental decisions of child rearing, including emerging issues of children's privacy in the age of social media and the increasing recognition in family law of children's rights to be heard in decisions affecting their welfare.

LAW 690 Financial Aspects of Divorce (3 Credit Hours)
The Financial Aspects of Divorce is a 3 credit course designed for students practicing in the area of family law that will cover what a practitioner needs to know from both theoretical and pragmatic perspectives. The course will explore the historical background of divorce law and the jurisdictional limitations on resolving financial issues in divorce litigation. We will study the establishment, modification and enforcement of child support and spousal maintenance obligations. We will examine numerous aspects of property distribution, including determining the marital or nonmarital character of property, equitable distribution of marital property, valuation and treatment of specific types of property such as real estate, retirement accounts and business interests, and dissipation of marital assets. The course will also include discussions of financial discovery and awards of attorneys fees in divorce litigation.

LAW 691 Domestic Violence: Theories, Policies and Societal Impact (2-3 Credit Hours)
Domestic Violence (Theory, Polices and Societal Impact) will provide students with an understanding of the evolution of domestic violence theory; an overview of what acts constitute domestic violence; myths surrounding the causes of domestic violence; common misconceptions regarding the types of people who abuse and are abused; the various state and federal laws that affect domestic violence arrests, police liability, prosecution, and services; and the impact of domestic violence in family law, child welfare, and immigration proceedings. Through weekly modules incorporating readings, lectures, videos and supplemental materials, students will become familiar with the many components (social and legal) of this complex subject.

LAW 692 Special Education Law and Advocacy (2 Credit Hours)
This online course will deal in depth with current and timely issues in the education of children with disabilities. Students will learn federal and State statutory and regulatory procedures in determining eligibility for services, evaluation, development of the individualized education program, and provision of services in the least restrictive environment. The education of special needs children from early childhood through post-secondary transition will be addressed. The course will focus on advocacy, statutory and regulatory compliance, and dispute resolution. Students will form teams assuming the roles of parent/student advocate, school administrators, and school service providers in a variety of simulated activities throughout the semester, including: participation in eligibility and IEP conferences; disciplinary manifestation determination reviews; resolution sessions, mediation, and pre-hearing due process procedures; and determining Section 504 eligibility and developing and implementing a Section 504 service plan.

LAW 703 Informed Consent Law and Patient Rights (3 Credit Hours)
This introduces students to the legal, ethical, and practical issues related to physicians' duty to secure patient consent to medical treatment, addressing (1) historical injustices, (2) common law doctrine, (3) current controversies implicating constitutional law, and (4) practical challenges of implementing informed consent for diverse patient populations.
Outcomes:
Describe the historical injustices and unethical medical practices that led to the development of informed consent law in the US; Identify the elements of a cause of action for breach of informed consent and critically evaluate whether these elements adequately protect patients' rights; Demonstrate the interplay between the common law of informed consent and constitutional principles of equal protection, substantive due process, and free speech; Reflect on complex challenges relating to informed consent and patient rights in the context of end-of-life, reproductive, sexual, and mental health care; Propose changes to the law and practice of informed consent that would more effectively meet the needs of vulnerable patients, particularly patients with low health literacy

LAW 710 Health Law: Patients and Populations (3 Credit Hours)
This course provides a broad survey of the most fundamental legal issues surrounding the delivery of health care in America. No prior knowledge of health law is required. Major topics include state and federal regulation of health care providers and institutions; tort liability in the context of medical care; patient and provider rights and obligations; public and private insurance systems; and basic issues in bioethics and public health. By the end of this course, students should understand both the current state of American health law, and the social forces that have shaped its historical development.

LAW 711 Corporate Transactions in Health Law (2-3 Credit Hours)
This course addresses key corporate and regulatory concepts impacting the delivery of health care. The course focus will be transactional, with students first gaining an understanding of basic corporate law and regulatory principles, and then learning to integrate core federal and state laws into choice and use of corporate structures and operational strategies. The course will examine health care transactions from the perspectives of a hospital, physicians and other providers. It is recommended that students take Health Law: Business & Finance and Business Organizations prior to taking this course.

LAW 712 Legal Writing for Medical Malpractice Trial: The Expert (2 Credit Hours)
Pre-requisites: None, except no 1L
The course is designed to provide second-year students who are interested in health law litigation-or civil litigation and trial work generally-the opportunity to analyze medical expert opinions and challenge them by motion. A medical malpractice trial often becomes a "battle of the experts". If the trial is the battle, then pre-trial motion practice defines the battlefield. Students will research both the Frye standard that applies to challenges in Illinois, and the subsequent Daubert standard that applies to challenges in federal court and most state courts. Students will be provided with a closed "record" that includes a complaint, answer, selected written discovery, excerpts from depositions of treating physicians, and a full deposition of the expert to be challenged. The exact facts and opinions will need to be developed over the spring and summer but could include a dispute based on the preferred approach for a surgical procedure, the process for extracting and freezing eggs for fertility treatment, best practices for preventing falls in a nursing faculty, the use of homeopathic medicine, or off-label use of prescription medicine. The course will be mindful that most (if not all) second-year students have not taken Evidence but will include some discussion of motions to exclude expert opinions in the context of pre-trial motions in limine and pre-trial preparation. The course will culminate in a final motion to exclude using the Daubert standard and a mock hearing of that motion. Learning objectives include understanding how trial judges use Frye or Daubert to review proposed expert opinions to determine if sufficiently reliable, analyzing expert opinions and testimony, preparing oral arguments against opposing expert testimony, writing persuasively about medical opinions using case law, medical literature, evidentiary standards and policy, and gaining practical experience about the type of writing that trial lawyers do before trial. Learning objectives include understanding how trial judges use Frye or Daubert to review proposed expert opinions to determine if sufficiently reliable, analyzing expert opinions and testimony, preparing oral arguments against opposing expert testimony, writing persuasively about medical opinions using case law, medical literature, evidentiary standards, and policy, and gaining practical experience about the type of writing that trial lawyers do before trial.

LAW 713 Health Law Directed Study (1-3 Credit Hours)
Pre-requisites: none
Open to: LLM, MJ, SJD, and DLaw students. LLM, MJ, SJD, and DLaw students may earn credit for participation in a targeted research tutorial. The scope and subject are chosen with the guidance of a faculty member who directs the students. (JD students can research in the health law field, but must register for the JD Directed Study.) This is a Non-Graded Course.

LAW 714 Health Law Graduate Externship (1-3 Credit Hours)
Open to: LLM students enrolled in campus courses. Students enrolled in the LLM in Health Law degree program may earn externship credit for working at an approved health law externship site. This program is designed to offer students practical experience to further develop lawyering skills and health law expertise. Students may receive up to three credits. This is a Non-Graded course.

LAW 715 Bioethics, Law & Policy (2-3 Credit Hours)
This course provides an overview of American law as it relates to emerging ethical issues in medicine and health care. It is intended to give students an appreciation of the ways in which medical practice and decision-making are guided by modern American principles of constitutional, tort, administrative, and criminal law. Students will learn how the law's regulatory powers have been used to set boundaries in medicine, and, in turn, how theories of medical ethics and practice have informed modern legal developments. Topics covered vary from year to year, but may include issues in end-of-life care, research ethics, reproductive autonomy, distributive justice, and genetic technology. This course counts as a Perspective Elective course.

LAW 717 Mental Health Law (2 Credit Hours)
This course introduces students to the cases, statutes, and legal doctrines relating to the rights, treatment, and commitment of persons with mental illness, developmental disabilities, or intellectual disabilities. Topics covered include: confidentiality of mental health records, forms of surrogate decision-makers (i.e. guardianship, powers of attorney), mental health treatment for minors, right to refuse treatment, special education, and the Americans with Disabilities Act (ADA). Students will discuss real-life cases and examples to compare and contract application of the law and policies.

LAW 718 Food and Drug Law (3 Credit Hours)
This course provides an overview of the regulation of a variety of health care and medical products overseen by the Food & Drug Administration, including foods, dietary supplements, pharmaceuticals, medical devices, and tobacco products. The course will explore topics regarding premarket research and development, clinical trials, review and approval, and post-marketing monitoring and reporting. Legal concepts of agency rulemaking, products liability, commercial free speech, human subjects research, state regulation and preemption, civil and criminal remedies, and enforcement mechanisms will also be explored. A science background is not required for this course.

LAW 720 Health Care Payment and Policy (2 Credit Hours)
Health Care Payment and Policy is a course which focuses on the roles of payers, purchasers, providers and consumers in the shifting arena of health care coverage. Throughout the course, we will consider the Affordable Care Act and the regulations implemented over the past decade to implement that law and set in motion the health care industry's move to value-based care. The first part of the course will explore the development of health insurance, the growth of managed care models and the role of employers in shaping health benefits. The second portion of the course will explore the evolution of Medicare and Medicaid. The final portion of the course will consider the ongoing transition to value-based care payment and delivery models. This will include an evaluation of new payment models such as Accountable Care Organizations and Patient Centered Medical Homes. Students will also examine value-based strategies that drive better quality outcomes, enhance patient experiences and lower health care costs, including those needed to improve health and wellness of individuals and address the social determinants of health across communities.

LAW 722 Health Care Innovation & Regulatory Compliance (1 Credit Hour)
The health care sector features rapid changes in technology, business models, patient needs, and payor requirements. Innovation can create potential risk under legal frameworks that were not designed with a modern health system in mind. While it is important to identify these legal risks, clients often want lawyers to go a step further to design legally-compliant solutions to facilitate innovation. This course will help students learn practical skills to evaluate and manage legal risk for novel or developing health care concepts. These skills may include: evaluating exposure under anti-fraud laws like the Anti-Kickback Statue to scenarios where no safe harbor applies, understanding implications of different uses or transfers of Personal Health Information, understanding the role of coverage policies (Medicare, Medicaid, commercial), and evaluating FDA guidance concerning Software as a Medical Device. For example, students may be asked to write an Advisory Opinion request or other request for guidance from an applicable Federal or State agency regarding an innovative model, or a draft policy memo identifying applicable legal risks and potential.

LAW 726 Health Law Competition Team (1 Credit Hour)
This course is to be taken by students selected to compete on Loyola's health law competition teams. A JD student representing Loyola at either the L. Edward Bryant, Jr. National Health Law Competition OR at the Maryland Health Law Regulatory & Compliance Competition may register for one ungraded credit. This course will count for skills credit.

LAW 727 Annals of Health Law Executive Editors (1-3 Credit Hours)
Pre-requisites: none
Open to: JD students by permission only. Annals of Health Law Executive Editors are solely responsible for the management of the entire process of publication of the Annals, including selecting the staff, communicating with authors, and performing final edits on all articles before publication. Additionally, Executive Editors oversee the planning of the annual symposium, maintain the website, and work on other special projects. These selected positions require immense dedication and responsibility. Executive Editors must possess superior legal knowledge and editing/ writing skills. Additionally, the abilities to manage, delegate and supervise others are essential. This is a Non-Graded course.

LAW 729 Health Care Litigation and Medical Malpractice (2 Credit Hours)
This course will cover key areas of health care litigation. Students will explore the substantive and procedural law of medical negligence litigation and learn about pretrial matters such as drafting pleadings, motions and deposing experts. Students will have the opportunity to develop trial techniques including preparing direct and cross examinations. They will also be able to participate in a medical negligence mock trial. Additional topics will include compliance and internal investigations, licensing procedures, technology litigation, managed care litigation, and ERISA preemption. This is a Skills course.

LAW 730 Health Justice Practicum (3 Credit Hours)
Students will address the health harming legal needs of vulnerable low-income families and individuals by conducting holistic client intake interviews with patients referred to Legal Aid Chicago's medical-legal partnership projects. Students will engage in issue spotting, legal research, identifying appropriate resources, and drafting intake memos and advice and referral letters to clients. Students may also participate in pro se outreach at health clinics, providing direct support to patients preparing pro se legal documents. Students may handle cases in a variety of areas of law including public benefits, access to health care, disability, education, housing, family law, as well as other areas of law that impact client health and well-being. Enrollment in the Clinic requires a significant time commitment and flexibility in the student's schedule. Students are required to manage their own intakes, collaborate with health partners, and be responsive to supervising attorneys. The Health Justice Practicum is geared towards weekend students and consists of a bi-weekly four-hour seminar, remote weekly intakes and research on cases, and remote supervision with an adjunct instructor from Legal Aid Chicago. Students should expect to spend 4 hours weekly on intake activities and 3 hours per week on readings and assignments. The Health Justice Practicum is open to 2L, 3L and 4L students.
Outcomes:
Develop and improve fundamental lawyering skills including issue spotting, case analysis, investigation, and legal research and writing

LAW 733 Annals of Hlth Law Senior Editors (1-2 Credit Hours)
Pre-requisites: none
Open to: JD students by permission only. Annals of Health Law Senior Editors prepare each article for publication. They generally supervise the editing work of Annals members. They manage and oversee the cite-checking process. This is a Non-Graded course.

LAW 734 Annals of Health Law Members (1 Credit Hour)
Pre-requisites: none
Open to: JD students by permission only. The members of the Annals of Health Law are responsible for editing and cite-checking article submissions, including providing substantive recommendations. They generally assist the Senior Members with the preparation of articles for publication. Members must be organized, detail-oriented, and dedicated to their role in the Annals publication process. They must possess superior cite-checking and editing skills. Additionally, each member must write an article of publishable quality for Advance Directive, the Annals online counterpart. This is a Non-Graded course.

LAW 739 Health Information Privacy and Technology (1-2 Credit Hours)
This course covers the Health Insurance Portability and Accountability Act and the statutory and regulatory framework for the privacy and security of health information. Students will learn about the historical basis of privacy and global comparisons. Topics will include data privacy, security, oversight, and breaches of protected health information.

LAW 741 Health Law: Business and Finance (3 Credit Hours)
In a survey format, this course will introduce tenets of healthcare business, and how operations and business status introduce potential legal issues. In order to explore these issues, we will introduce the variety and types of healthcare businesses and organizations and their attendant financial operations, as well as the types of relationships and situations that give rise to potential lawsuits (including fiduciary trust relationships between physicians and patients and insurers and their customers, and the government and its citizens or residents).

LAW 745 Access to Health Care (2-3 Credit Hours)
Access to Health Care is a seven-week course exploring the legal, political, environmental, financial and medical issues surrounding access to health in the United States and internationally, with particular emphasis on people who are experiencing poverty and the uninsured. The course is complemented with a required spring break field study to an impoverished region in the United States or abroad.

LAW 746 Women's Health: Law & Policy (1 Credit Hour)
In this course, students will evaluate the laws and policies that have impacted the heallth of women in the United States. The first part of the course will be an introduction to women's health law and policy. Discussion will focus on the challenges, opportunities, and existing efforts to improve access to health, healthcare, innovation, and research for women including the laws and policies that influence women's health. This course will cover topics including equal pay and the wage gap; clinical research; reproductive health; maternal health; sexual health and menopause, menstruation and period poverty. This will be an interactive, discussion-based, weekend seminar that offers an opportunity to learn from leading women's health experts from across the country.

LAW 748 Public Health Law (3 Credit Hours)
No course description is available

LAW 750 Health Law LLM Thesis Project, Term 2 (2 Credit Hours)
LLM students are required to complete a written thesis, demonstrating scholarly research of an important legal issue. The thesis must be of a quality determined to be acceptable by the student's faculty advisor, reflecting mastery of the subject matter explored, critical thinking and clear, sophisticated writing. The thesis is completed over the course of two semesters in close cooperation with a faculty advisor. This second course will focus on completing and refining the thesis project, and presenting a thesis defense to faculty and fellow students. This course is for students in the campus LLM program.

LAW 751 LL.M. Paper Supervision (3 Credit Hours)
Open to: LLM students only with permission. LLM students who do not complete the LL.M. Paper within the requisite period of time must register for this class each semester until the paper has been accepted by the advisor. This is a Non-Graded course.

LAW 754 Health Justice Lab (3 Credit Hours)
This interprofessional and experiential course will bring together students from law, public health, and medicine to explore racism and its impact on health.

LAW 755 Health Justice Project (3-4 Credit Hours)
The Health Justice Project is a medical-legal partnership clinic that provides law students with an intensive, challenging education in the fundamentals of legal practice, interdisciplinary collaboration, creative upstream problem solving, poverty law, systemic advocacy, and professionalism. Through collaborative and holistic representation of vulnerable low-income families and individuals, student attorneys will address the social, legal and systemic barriers that prevent long-term health and stability. HJP student attorneys may handle cases in a variety of areas of law including public benefits, access to health care, disability, education, housing, family law, as well as other areas of law that impact client health and well-being. Enrollment in the Clinic requires a significant time commitment and flexibility in the student's schedule. Students are required to manage their own cases in teams of two, maintain client relationships, attend hearings and court appearances, collaborate with interdisciplinary partners, and tend to other client matters throughout the semester. Students must be available to participate in a mandatory orientation prior to the start of the semester. LAW 755-022 Student attorneys will address the health harming legal needs of vulnerable low-income families and individuals by conducting holistic client intake interviews with patients referred by HJPs health partners, issue spotting, engaging in legal research, identifying appropriate resources, and drafting intake memos and advice and referral letters to clients. Students may handle cases in a variety of areas of law including public benefits, access to health care, disability, education, housing, family law, as well as other areas of law that impact client health and well-being. Enrollment in the Clinic requires a significant time commitment and flexibility in the student's schedule. Students are required to manage their own intakes, collaborate with HJP partners, and be responsive to supervising attorneys.

LAW 757 Advanced Health Justice Project (2-4 Credit Hours)
Students who have successfully completed the Health Justice Project clinic may enroll in the Advanced Health Justice Project, in which they will continue to represent clients and complete projects to improve the health and well-being of vulnerable low income families and individuals in Chicago through holistic, collaborative, and systemic advocacy. Faculty permission required.

LAW 760 Disability Law (2 Credit Hours)
This class focuses on the large issues of doctrine, theory, and policy that disabled persons and disability rights law raise in employment, government services, public accommodations, health care, housing, and education. We will address key theoretical and policy questions, as well as remedies under the Americans with Disabilities Act (As Amended), the Rehabilitation Act, and the Individuals with Disabilities Education Act, in light of recent Supreme Court decisions, as well as recent judicial and regulatory developments relating to deinstitutionalization. The class will survey the history of the disability rights movement, and trace the development of legal and social thinking about disability and disabled persons, from frameworks of affliction, to charity/medicalization, through civil rights, human variation, and contemporary intersectional and critical disability theories.
Outcomes:
Students will be able to express, orally and in writing, how the development of US law regarding disabled persons reflects evolving understandings of disability; Students will be able to evaluate critically (positively and negatively), orally and in writing, selected major contemporary legal developments affecting the life prospects of disabled persons

LAW 765 Constitutional Issues in Health Law (2 Credit Hours)
The Supreme Court's recent decision upholding the major provisions of the Patient Protection and Affordable Care Act has brought new attention to the intersection between constitutional law and health care. This seminar gives students the opportunity to engage deeply with some of the most compelling constitutional issues of our time, including the use of federal spending powers to expand state Medicaid programs; the health insurance mandate as a regulation of interstate commerce; federalism conflicts in the medicalization of marijuana; medical providers' free speech rights; compelled commercial speech in the tobacco industry; religious objections to controversial medical procedures; cruel and unusual medical treatment of prisoners; as well as substantive due process challenges relating to public health, end of life care, and reproductive autonomy.

LAW 770 Doctoral Dissertation Research I (2 Credit Hours)
Pre-requisites: none
Open to: SJD and DLaw students only. Candidates will be required to rework the doctoral proposal s/he submitted with his/her admission application into a 30-40 page summary paper which shall serve as a roadmap for the first draft of the dissertation. Students must also make a presentation on an aspect of their research to a group of doctoral students and advisors. This is a Non-Graded course.

LAW 772 Doctoral Dissertation Research II (2 Credit Hours)
Pre-requisites: Doctoral Dissertation Research I
Open to: SJD and DLaw students only. Candidates must draft a detailed dissertation outline, have it evaluated by his/her advisor, and incorporate any necessary changes into a final outline. Once the dissertation outline is approved, the first draft of the dissertation should be completed and submitted to the advisor. This is a Non-Graded course.

LAW 773 Doctoral Dissertation Supervision (1 Credit Hour)
Pre-requisites: Doctoral Dissertation Research I and II, Bibliography Tutorial
Open to: SJD and DLaw students only. The dissertation advisor will work with the candidate to form a doctoral committee comprised of the advisor and two outside readers. (In the case of foreign students, one outside reader may be sufficient.) The committee will assist the student by consulting on dissertation substantive issues, reviewing the working draft and approving the final product. Dissertations should represent important contributions to the field, (minimum length 150 pages and double spaced) but specific format and content needs to be clarified between the candidate, the advisor, and the committee. Once clarified, the suggested format must be followed. Once the dissertation has been completed, it must be presented at an open forum to be attended by interested members of the law school community. Students must enroll in this course during both fall and spring semesters of his/her second year. This is a Non-Graded course.

LAW 777 Doctoral Dissertation Supervision and Completion (1 Credit Hour)
Pre-requisites: Doctoral Dissertation Research I and II, Bibliography Tutorial
The dissertation advisor will work with the candidate to form a doctoral committee comprised of the advisor and two outside readers. (In the case of foreign students, one outside reader may be sufficient.) The committee will assist the student by consulting on dissertation substantive issues and reviewing the working draft. Students must enroll in this course during the fall semester of his or her second year. Open to: S.J.D. and D.Law students only

LAW 779 Current Topics in Pandemic Law and Policy (2 Credit Hours)
This course examines the legal and ethical foundations of pandemic and emergency preparedness, intervention, and evaluation in the context of the ongoing SARS-CoV-2/COVID-19 pandemic. Using open-access resources developed by health law experts, students will study the pandemic from multi-doctrinal (e.g., constitutional, criminal, administrative, health, employment, privacy, and civil rights) perspectives.

LAW 793 Administrative Law and Health Care Regulation (2 Credit Hours)
Administrative Law (Law 221) is a pre-requisite.

LAW 797 Risk Management, Patient Safety & Quality (2 Credit Hours)
Students will utilize reading materials, case studies, hospital risk management scenarios and data sets provided in class to apply knowledge to specific RM and patient safety scenarios and to use critical thinking skills to solve problems. Through the readings and case study analysis students will learn to identify legal, ethical, administrative, compliance, risk management and patient safety issues and to reach resolutions for the problems presented, even when a clear legal response may not be available or in the best interests of the patient. We will be learning how to respond to a variety of risk management issues from the perspective of clinicians, lawyers, administrators, managers and patients and appreciate how events are perceived and managed. We will also discuss how these perceptions of key stakeholders are in conflict and how those conflicts can be managed. Finally, students will also learn how principles of risk management have changed since the 1998 IOM Report and how the changes in our current health care system will further challenge both patients and providers. This report called for increased focus on systemic failures and moving away from a culture of blame and shame to a culture of transparency and learning. With the passage of the ACA and not efforts to repeal and replace we will also discuss how risk management, safety and compliance are likely to further change as our health care delivery system evolves.

LAW 798 Health Care Compliance (2 Credit Hours)
This course is designed to expose law students to key legal concepts in the health care corporate compliance and ethics fields, which may be broadly defined as the application of internal corporate initiatives to ensure compliance with applicable federal and state laws and regulations. Health care is a highly regulated industry, and a health care attorney must have a broad understanding of compliance issues. Through readings and class discussion on common health law topics such as the Anti-kickback Statute, the Stark law, the False Claims Act and its whistleblower provisions, students will develop an understanding of the need for and the role of the Compliance Officer in a health care institution. Students also will begin to explore recent movement toward more broadly-based organizational integrity and ethics programs. Underlying course themes will include how to structure an effective compliance program and the role of government enforcement in controlling health care costs. Readings will derive from various sources. There is no required book. Case law, legislation, regulations, government reports and legal articles will be available on Sakai. As in any graduate-level course, thinking about and discussing the issues with an open and creative mind is actively encouraged.

LAW 803 Business Organizations (3 Credit Hours)
This course is taken in the second semester of study and introduces agency law, partnership law, corporate law and the LLC. Principal emphasis is on the law as it applies to the organization and functioning of business entities, including the duties and obligations of managers of such entities. The course focuses on structure and mechanics, capitalization, distribution, organic changes, and duties and liabilities of directors, officers, and controlling shareholders. The federal securities acts are introduced with particular attention to Rule 10b-5. Substantial attention is given to the special problems of the close corporation.
Outcomes:
Evaluate the rationale behind businesspersons' choice of a particular business entity in a given business context; Assess the relative merits of general partnerships, corporations, limited liability companies, and limited partnerships as business entities; Analyze shareholder rights and directors' and officers' powers and duties; Examine the relationships between principals and agents; Describe various filing policies and processes for business entities at secretary of states' offices; Explore key facets of federal securities regulation

LAW 806 Introduction to Business Law Clinic for International LLM Students (1-2 Credit Hours)
This course is designed to introduce international students to clinical work with for profit and not for profit businesses in the Chicagoland area, developing their counseling and drafting skills.

LAW 808 Governance, Ethics, & Compliance (3 Credit Hours)
This course emphasizes the importance of legal compliance and ethics to the mission of the corporation and the business entrepreneur. Students will write a paper undertaking a legal case study of losses sustained by actual business (in reputation or otherwise) from acting in an unethical or illegal manner. The role of the corporation and the business leader in society is examined.
Outcomes:
Understand the importance of legal compliance and ethical practices in ensuring the long-term success of corporations and business entrepreneurs; Analyze the impact of unethical and illegal business practices by examining real-world case studies of businesses that sustained losses in reputation, financial stability, or legal standing; Evaluate the role of business leaders in promoting ethical decision-making and legal compliance within their organizations and in society; Develop critical thinking skills by researching and writing a paper on a legal case study, highlighting the consequences of ethical and legal failures in business; Apply legal and ethical frameworks to assess the social responsibility of corporations, emphasizing the interconnectedness of business practices and societal well-being; Enhance communication skills through written analysis, demonstrating the ability to clearly present and support arguments regarding legal and ethical issues in business

LAW 812 Financial Institution Regulation (2 Credit Hours)
The course has two objectives. First, it will examine and analyze the current bank regulatory system. Consideration will be given to the function and regulation of depository institutions, as well as, that of various classes of affiliated entities such as those involved in the issuance of securities, insurance and merchant banking. Second, the course will examine the mechanics of key bank operations including, syndicated lending, underwriting and the securitization of debt securities.

LAW 814 Business Law Graduate Externship (1-3 Credit Hours)
Open to: LLM students enrolled in campus courses. Students enrolled in the LLM in Business Law degree program may earn externship credit for working at an approved business law externship site. This program is designed to offer students practical experience to further develop lawyering skills and business law expertise. Students may receive up to three credits.

LAW 816 Racial Justice Seminar Series (3 Credit Hours)
This course exposes students to seven unique and emerging racial justice in health care or compliance. Each emerging issue is selected based on its likely impact on the industry and its timeliness, given current political, business or health care challenges. This course is structured over 13 weeks, in which we alternate between reading weeks, where students are given reading material to introduce them to each issue, and synchronous classroom lectures by national experts on each subject. At the end of the course, each student is asked to write a reflective paper on one of the issues presented and describe the impact that they believe it will have on their practice.

LAW 817 Compliance and Securities Regulation (3 Credit Hours)
This course will focus on the basic principles of the Securities Act of 1933, which sets forth the requirements for registration of all securities sales unless an exemption is available. The course will cover the concept of what is a security, the registration requirements of Section 5 of the '33 Act, the exemptions from registration, particularly the intrastate offering exemption (Section 3 (a)(11) and Rule 147); Section 4(1) and 4(2) (and Regulation D) regarding private offerings; Rule 144A "big boy" transactions and certain other exemptions; the timing and rules for preparation of registration statements and prospectuses under Section 5; key aspects of Regulation S-X; the consequences of the failure to register (Sections 11, 12, 13 and 17); jurisdiction; and other similar topics.

LAW 819 Diversity, Inclusion, and the Law (2 Credit Hours)
This course will cover skills used in cultural competency and diversity, equity, and inclusion (DEI) positions in an organization. Students will learn about organizational context and structure, leadership and communication styles, and sources of workplace disputes. Students will also learn about conflict prevention strategies.

LAW 820 Compliance and Culture (2-3 Credit Hours)
The course will study the best practices in the compliance industry and lessons learned from corporate scandals. The faculty will share examples how to deal with "compliance issues" across multiple industries. The course will be organized as a series of hypotheticals presented to the students who will work through issue spotting regulatory and compliance concerns, developing an audit plan for the issues, protocols, identifying needed policies and procedures, and establishing corrective actions for remediation.
Outcomes:
Understanding of the Federal Sentencing Guidelines and their application to the development of appropriate corporate compliance programs; Recognition of the importance of a company's culture and the relationship between corporate culture and an effective compliance program; Understanding of basic corporate laws and ability to identify possible violations of those laws; Development of appropriate compliance plans and actions to address the improvement of a company's culture; Recognition of and understanding of lessons learned from the major corporate scandals, attendant investigations and corrective actions taken studied in the class; Recognize the concept of institutional fairness and understand and apply ethics as a foundation to a successful corporate compliance program

LAW 821 International Business Transactions (2 Credit Hours)
This course serves as an introduction to the background and legal framework of international business transactions. Students will: - study the business and legal issues that impact international business transactions; - gain insight into the dynamics of structuring international business transactions; - learn about the role that lawyers and legal professionals play in international business; - examine key legal topics that often arise in international business transactions; and - explore careers in international business law.

LAW 823 Privacy and Security of Corporate Information (2 Credit Hours)
This course provides an overview of compliance issues and requirements in information management, including information technology and record keeping requirements.

LAW 825 Business Law Center Clinical & Seminar (2-4 Credit Hours)
The Business Law Clinic (the "BLC") is a live client transactional legal clinic that represents for profit and not for profit businesses in the Chicagoland area. Student clinicians work with several BLC clients during the course of a semester. All work is overseen by BLC faculty. In addition to client work, the BLC includes a weekly seminar (Tuesday, 10:00am - 12:00 p.m.), which covers relevant substantive law, ethical issues and pragmatic lawyering skills, such as drafting, negotiating and client counseling. The work in the BLC is completely transactional in nature. The BLC does not handle contested matters or complex tax. Participation in the BLC requires a significant time commitment (a minimum of 3 hours per week per credit hour, in addition to the seminar), and a degree of flexibility in the student's schedule. All student clinicians are expected to communicate with their clients regularly, meet with their clients as needed, efficiently and effectively perform the related transactional work, maintain their client's files in an organized and professional manner, regularly attend the seminar classes and participate in various seminar exercises. Recommended courses, in order of preference, are Business Organizations, Federal Income Tax and Corporate & Partnership Tax. Class is limited to 14-16 students and instructor permission and an application is required. This is a Skills and Live Client Experience course.

LAW 826 Business Law Clinic II (1-3 Credit Hours)
Pre-requisites: Business Law Clinic and Seminar I, Permission Required
Business Law Clinic II is a continuation of Business Law Clinic I. Student clinicians will continue working with for profit and not for profit businesses in the Chicagoland area. Learning from their experience in Clinic I, Clinic II students have the opportunity to further develop their counseling and drafting skills. Clinic II student clinicians have the same hourly requirements as Clinic I, however, there is no seminar component.

LAW 828 LLM Externship Field Placement (1-3 Credit Hours)
Open to: LLM students enrolled in campus courses. Students enrolled in any campus based LLM program may earn between one to three externship credits for working at an approved LLM externship site. This externship is designed to offer practical experience to further develop law related skills and expertise in various legal fields. A maximum of 3 credit hours can be attained during the LLM program. This is an Experiential Learning course.

LAW 829 Global Compliance (2-3 Credit Hours)
This course will offer students the opportunity to study significant areas of law from foreign jurisdictions that impact doing business abroad or foreign companies doing business in the U.S. A selection of areas of law that will be covered include the UK Bribery Act, European Union privacy regulation, technology transfer laws (including U.S. import-export controls), national security issues associated with doing business in certain companies, and developing laws of emerging markets in Asia.

LAW 832 Contracts (3 Credit Hours)
This course describes the basic anatomy of a contract, including the key components of contracts and how they are organized. The course then uses multiple exercises to teach how to review, negotiate, and draft provisions of business contracts. Students will also learn how to manage risk through careful drafting.

LAW 833 Securities Regulation for Lawyers (2 Credit Hours)
This course will provide attorneys with an overview of securities regulation as well as case studies and practical drafting exercises designed for the securities attorney.

LAW 835 Compliance Training Methods (3 Credit Hours)
This course is designed to provide students with practical experience in developing training and education material. An emphasis will be placed on explaining complex regulations and laws to a workforce. The course will also explore varying pedagogical methods for delivering compliance education.

LAW 836 Compliance Seminar Series (1 Credit Hour)
This course is designed to provide an overview of recent developments in corporate compliance. The course will feature bi-weekly guest speaker on topics of interest to the compliance community. Students will be assessed through short written responses to each lecture and a final essay.

LAW 837 Breach Incident Management and Reporting (3 Credit Hours)
A breach of privacy is considered inappropriate use or disclosure of personal data. Numerous laws regulate what constitutes a breach and the legal obligations if there is a breach. This course will examine: (a) what constitutes a "breach" or "incident" under a variety of scenarios and industries, (b) what legal obligations regulated entities have to act on a breach or incident, (c) what liabilities in tort or contract may exist as the result of breaches, (d) corrective actions to manage breaches and minimize recurrence, (e) electronic security measures to minimize breaches and incidents, (f) a survey of the most common cyberattacks for students to gain familiarity with trends in electronic breaches, and (g) practice in drafting notices, incident reports, and corrective actions.

LAW 838 European Union Privacy Law (3 Credit Hours)
European Union Regulation 2016/679 was adopted by the European Parliament and European Council in 2016 and has world-wide privacy law implications, not merely for activities inside the European Union. The law seeks to protect natural persons when their personal data is used by any regulated entity doing business in the EU. The law also requires regulated entities to have organized compliance efforts on a global scale. The course will examine: (a) the history of privacy law in the EU, (b) the response of the EU member states to past EU privacy directives and the current law, (c) the current EU privacy law's impact on business and data storage around the world, (d) the compliance organizational structures needed to respond to the law, and (e) liability associated with non-compliance. No background on EU law is needed; the course will begin with teaching the basic legal and constitutional structure of the European Union in order to situate the course privacy law material.

LAW 839 Corporate Compliance (2-3 Credit Hours)
This course will cover the elements necessary to implement a basic compliance and ethics program in a company. Students will become familiar with the basic principles of the Federal Sentencing Guidelines that define an effective compliance program. Students will learn the fundamentals of the job of Chief Compliance Officer by working with compliance issues in the media, commercially available compliance training programs and compliance techniques used in major corporations.
Outcomes:
Understand the role of Compliance in an organization and its effect upon an organization's culture; Comprehend the legal underpinnings for a corporate compliance program, including the Federal Sentencing Guidelines, as well as the key frameworks for a corporate compliance program such as COSO;Learn and understand the seven elements of an effective compliance program and how they work to create and influence an organizations culture and its employees' behavior; Appreciate the relationship between ethics and compliance and how both concepts contribute to an organization's well-being, as well as recognize how each corporate function like Legal, HR, Audit and Compliance must be responsible for some part of a company's compliance program

LAW 841 Intntl Commercial Arbitration & the CISG (1-3 Credit Hours)
The course uses as a focus the Willem C. Vis International Moot Arbitration Competition. Sponsored by Pace Law School, the Vis Moot is based on a problem governed by the U.N. Convention on Contracts for the International Sale of Goods (CISG). In the spring, an oral competition is held in two different venues, Vienna and Hong Kong. Recently, Loyola has been able to send a different team of students to each of the venues. The course includes about three weeks of study of the CISG, as well as approximately three weeks of study of international commercial arbitration, including basic laws and rules, how to draft an arbitration clause, how to choose an arbitrator, and how to participate in an arbitration as an advocate and as an arbitrator. While the first half of the semester is spent learning about the CISG and arbitration, the second half is spent putting that knowledge into practice. When the problem on which the Moot Competition is based comes on line in October, students work collaboratively to draft Claimants' and Respondents' memoranda. The Claimant's memorandum is due in early December, and the Respondent's memorandum is due in late January. Students also present tow oral arguments: one at the law school before a panel of moot alumni, and one before arbitrators from Chicago law firms, at the offices of the respective law firms. At the end of the semester, eight students are chosen who will have the opportunity to compete in Vienna and Hong Kong during the spring semester, for an additional two hours of credit. Through the emphasis on both brief writing and oral arguments, students make significant progress in their skills as advocates, as well as their understanding of dispute resolution in an international context. Their accomplishments have been well recognized in both competitions. More information about the Vis Moot is on the Pace Law School Website: www.cisg.law.pace.edu/vis.html. Eligibility: If a student is part of a moot court team that will be arguing in the fall semester, he or she is not eligible to take this course, since this is a skills-based course requiring substantial out of class effort in both brief writing and oral argument. If a student is part of a moot court team that will be arguing in the spring semester, he or she is eligible to take the course in the fall, but will not be eligible to compete to be an oralist in the Vienna or Hong Kong competition. Corboy Fellows are not permitted to take this course. Important: Permission of the professor is required. In order to apply, please submit a resume and a statement of interest by mid-April to Professor Moses, mmoses1@luc.edu explaining a little about your background, and why you are interested in taking this course.

LAW 842 International Commercial Arbitration (1-2 Credit Hours)
The course uses as a focus the Willem C. Vis International Moot Arbitration Competition. Sponsored by Pace Law School, the Vis Moot is based on a problem governed by the U.N. Convention on Contracts for the International Sale of Goods (CISG). In the spring, an oral competition is held in two different venues, Vienna and Hong Kong. Recently, Loyola has been able to send a different team of students to each of the venues. The course includes about three weeks of study of the CISG, as well as approximately three weeks of study of international commercial arbitration, including basic laws and rules, how to draft an arbitration clause, how to choose an arbitrator, and how to participate in an arbitration as an advocate and as an arbitrator. While the first half of the semester is spent learning about the CISG and arbitration, the second half is spent putting that knowledge into practice. When the problem on which the Moot Competition is based comes on line in October, students work collaboratively to draft Claimants' and Respondents' memoranda. The Claimant's memorandum is due in early December, and the Respondent's memorandum is due in late January. Students also present an oral argument before arbitrators from Chicago law firms, at the offices of the respective law firms. At the end of the semester, a second oral argument is held at the law school, after which students are chosen who will have the opportunity to compete in Vienna and Hong Kong during the spring semester, for an additional two hours of credit. Through the emphasis on both brief writing and oral arguments, students make significant progress in their skills as advocates, as well as their understanding of dispute resolution in an international context. Their accomplishments have been well recognized in both competitions. More information about the Vis Moot is on the Pace Law School Website: www.cisg.law.pace.edu/vis.html. Eligibility: If a student is part of a moot court team that will be arguing in the fall semester, he or she is not eligible to take this course, since this is a skills-based course requiring substantial out of class effort in both brief writing and oral argument. If a student is part of a moot court team that will be arguing in the spring semester, he or she is eligible to take the course in the fall, but will not be eligible to compete to be an oralist in the Vienna or Hong Kong competition. Corboy Fellows are not permitted to take this course. Important: Permission of the professor is required. In order to apply, please submit a resume and a statement of interest to Professor Moses, mmoses1@luc.edu explaining a little about your background, and why you are interested in taking this course

LAW 844 Advanced Trial Practice (3 Credit Hours)
This course will teach students the law and techniques used during the trial process. The course will instruct students and require them to simulate jury selection and voir dire, opening statements, witness examinations, exhibits, objections, and closing statements.

LAW 845 The Foreign Corrupt Practices Act (3 Credit Hours)
This course will examine the FCPA in-depth from the perspective of U.S. companies doing business in foreign jurisdictions and interacting with public officials and regulatory bodies. The course will also examine how companies that might consider themselves a "U.S.-only" business could find themselves with FCPA risk. The course will examine both the law and enforcement actions. The course will also review ways to incorporate FCPA risk into a compliance program so that a company's workforce is educated on FCPA risk and examine how to remediate potential non-compliance with FCPA.

LAW 847 Business Law Graduate Directed/Independent Study (1-3 Credit Hours)
Open to campus based LLM or MJ students. Students will work under the supervision of a member of the Loyola law faculty for purposes of completing scholarly work as defined by the supervising faculty member. This may include but is not limited to assisting a faculty member on an article for publication or on the development of new teaching methods particularly those using technology as part of instructional practices, or producing a scholarly proposal or paper, relating to business law topics, which can be counted as preliminary work towards the completion of a the LLM or MJ thesis requirement. Students may receive up to three credits.

LAW 857 Leadership and Strategy (3 Credit Hours)
As a leader or manager in your organization, it is your job to find the right people, engage and motivate them, and structure and operate the organization in a way that enables and inspires people to perform at their best. And, you have to do this in a way that preserves the organization's financial health and protects it from legal risks. Your professional success depends directly on your ability to make the right strategic decisions, and effectively lead and inspire individuals, teams and projects. This course is designed to enhance your ability to do this. This course also will enable students to examine varied approaches to leadership that are based on personal and organizational mission, vision and values. Students will have an opportunity to explore their own values and approach to leadership and accountability.
Outcomes:
By the end of this class students will be able to: Model the characteristics and skills of visionary leaders; Critically define and analyze business problems and formulate data- and information-driven business decisions; Articulate the responsibility leaders have to all stakeholders and the application of ethical principles to business practices; Successfully participate in and lead multi-functional team projects; and Demonstrate proficiency in the various forms of communication

LAW 858 Cybersecurity Management (2-3 Credit Hours)
This course will introduce students to the key legal, business and ethical issues related to cybersecurity. Students will gain familiarity with a framework for approaching cybersecurity through evaluating threats, risks and vulnerabilities and developing appropriate and proportional policies, processes and countermeasures to maintain the integrity of computers, systems and data.
Outcomes:
Students will gain familiarity with a framework for the management of cybersecurity through evaluating threats, risks and vulnerabilities and developing appropriate and proportional policies, processes and countermeasures; Be able to maintain the integrity of computers, systems, devices and data

LAW 859 Environmental Enforcement and Compliance (2 Credit Hours)
This class will provide an overview of corporate compliance principles applied in the environmental context, as well as to provide a general overview of federal environmental law compliance. This course will examine the principles of an "effective" corporate environmental compliance program and will provide a framework for students to identify, prevent, detect, respond and correct any environmental non-compliance.

LAW 860 LLM Tax Seminar (2 Credit Hours)
In the LLM Tax Seminar, tax LL.M. students will research a topic in tax deeply and write a thesis on that topic.

LAW 866 Antitrust & Intellectual Property (2 Credit Hours)
This seminar focuses on the interface between Intellectual Property (IP) and antitrust law. Patents, copyrights and trademarks and other IP regimes confer exclusionary rights. Exclusive rights provide incentives and serve other ends, but their exercise can also impede competition distort otherwise competitive markets. This seminar will address the intersection of IP and Antitrust with respect to issues such as standard setting, licensing, corporate strategy, product design, efforts to increase market share and mergers and acquisitions.

LAW 874 Environmental, Social, and Governance (ESG) (3 Credit Hours)
This course explores the relationship between corporate compliance and Environmental, Social, and Governance (ESG) principles. ESG has gained importance in recent years as a framework for businesses striving to be profitable and socially responsible. The course will analyze the application of Compliance principles from the Federal Sentencing Guidelines to the ESG model, covering aspects such as climate change, sustainability, workers' rights, diversity, and governance ethics. Students will trace the evolution of ESG from the Triple Bottom Line to Corporate Social Responsibility and examine the viability of the Friedman Model. Additionally, the course will explore ESG reporting models and their impact on governance and investing. Upon completion, students will understand ESG principles, their relation to compliance, and best practices for corporate governance and ESG reporting.
Outcomes:
Summarize the background and key milestones of the ESG movement, and the key drivers; Articulate the basic elements of a corporate ESG program (generally), as well as the benefits of an effective ESG program, and the risks arising from a poor one; Articulate/explain the various definitions, reporting standards and individual parameters/criteria that are commonly used (and tailored) within a Corporation's Environmental, Social and Governance ("ESG") program; Review and assess the adequacy of a Corporation's ESG strategy, internal policies, disclosures, and related initiatives by applying an understanding of both applicable regulatory requirements and program best practices; Understand the role of standard setting and rating agencies; Locate, assemble and compare ESG reports (and the various evaluative criteria) for various companies within different industry sectors - that were prepared by the top four ESG rating agencies for various industry sectors (eg MSCI, Sustainalytics, Bloomberg and ISS); Recommend the processes, the supporting initiatives, the supporting players (from various corporate departments), as well as outside ESG experts and advisors that must be engaged and coordinated to develop and implement an effective ESG program; Forecast some of the upcoming issues in the future of ESG, and how companies can best be prepared

LAW 878 Orientation Program for International LLM Students (1 Credit Hour)
Introduction to Core Concepts of Common Law and Studying Techniques for International LLM Students This online summer course is limited to international LLM students. The orientation is an immersive preparation for students and lawyers trained abroad who will learn what to expect from their law school courses and how they can meet the expectations of their professors. We will introduce core common law concepts and structure of US legal institutions. Students will hone their written and oral communication skills and train practice skills critical to success in law school.

LAW 880 Introduction to U.S. Law and the Legal System (1 Credit Hour)
This course is required for international students in the LL.M. in U.S. Law or the LL.M. in International Law. This required foundational course introduces students to the sources and functions of law in our society. The course begins with an explanation of the structure and traditions of the American court system. Students then learn to read and analyze cases and statutes and develop basic legal written and oral presentation skills. The course uses cases from various fields and provides students with the background they will need for understanding American law.
Outcomes:
Describe the structure, functions, and traditions of the American court system, including the roles of various courts and legal actors in the administration of justice; Develop the ability to read and critically analyze judicial opinions, statutes, and other legal texts, identifying key legal principles, issues, and reasoning used in reaching decisions; Identify and explain the primary sources of American law (statutes, case law, and regulations) and understand their interrelationship within the legal system; Use case examples from various fields of law to understand how legal principles are applied in different contexts, including civil, criminal, and administrative law

LAW 881 Legal Research and Writing for Foreign Lawyers I (2 Credit Hours)
This course is required for international students in the LL.M. in U.S. Law or the LL.M. in International Law. During the fall semester, students take Legal Research and Writing I and are introduced to legal research methods and the fundamentals of legal writing. Students read and analyze legal authority and learn how to apply the legal authorities to particular fact situations. Through a series of legal memoranda and exam writing assignments, students develop their analytical and writing skills. Students are taught legal research methods through written exercises, research memos, and lectures. During the spring semester, students take Legal Research and Writing II which builds on the basic writing, analysis, and research skills learned in the first semester. In the spring semester, students are also introduced to persuasive writing and learn how to present an oral argument to the court. Computerized research techniques are included in the course.
Outcomes:
Identify and apply various legal research tools and strategies to locate relevant case law, statutes, and secondary sources; Interpret and analyze legal texts, including cases, statutes, and secondary sources, to understand their relevance and application to specific factual situations; Apply legal research findings to hypothetical factual scenarios, demonstrating a solid understanding of how to structure legal arguments

LAW 882 Legal Research and Writing for Foreign Lawyers II (2 Credit Hours)
This course is required for international students in the LL.M. and U.S. Law or the LL.M. in International Law. During the fall semester, students take Legal Research and Writing I and are introduced to legal research methods and the fundamentals of legal writing. Students read and analyze legal authority and learn how to apply the legal authorities to particular fact situations. Through a series of legal memoranda and exam writing assignments, students develop their analytical and writing skills. Students are taught legal research methods through written exercises, research memos, and lectures. During the spring semester, students take Legal Research and Writing II which builds on the basic writing, analysis, and research skills learned in the first semester. In the spring semester, students are also introduced to persuasive writing and learn how to present an oral argument to the court. Computerized research techniques are included in the course.
Outcomes:
Develop the ability to present oral arguments clearly and persuasively to a court; Synthesize legal research, analysis, and writing in the context of real-world legal practice, preparing them for future legal internships and employment

LAW 883 Introduction to the Law of the United States II (1 Credit Hour)
This course is required for international students in the LL.M. in U.S. Law or the LL.M. in International Law. It is taught as a 1-credit hour course in the spring semester (I) and in the fall semester (II). This required foundational course introduces students to the sources and functions of law in our society. The course begins with an explanation of the structure and traditions of the American court system. Students then learn to read and analyze cases and statutes and develop basic legal written and oral presentation skills. The course uses cases from various fields and provides students with the background they will need for understanding American law.

LAW 884 Doctoral Dissertation Research and S.J.D. Colloquium I (1 Credit Hour)
This course will consist of three distinctive components: 1. Doctoral Research: Candidates will learn research methods as well as get thoroughly acquainted with the variety of research materials, (on-campus, online and otherwise) that will aid them in the development of their dissertation projects. 2. Legal Theory: Candidates will learn the fundamentals of current legal academic thought in areas such as comparative law, law and economics, legal theory, legal realism, and critical race theory. 3. Scholars Forum: Candidates will discuss their research with their peers and others and elicit feedback on drafts of their work at various stages.

LAW 885 Doctoral Dissertation Research and S.J.D. Colloquium II (1 Credit Hour)
Pre-requisites: (LAW 884) Doctoral Dissertation Research and S.J.D
This course will allow further development of the three distinctive components from part one of this course: 1. Doctoral Research: Candidates will continue to learn research methods as well as get thoroughly acquainted with the variety of research materials, (on-campus, online and otherwise) that will aid them in the development of their dissertation projects. 2. Legal Theory: Candidates will continue to learn the fundamentals of current legal academic thought in areas such as comparative law, law and economics, legal theory, legal realism, and critical race theory. 3. Scholars Forum: Candidates will continue to discuss their research with their peers and others and elicit feedback on drafts of their work at various stages. Colloquium I

LAW 886 Doctoral Dissertation Supervision (1 Credit Hour)
Pre-requisites: (LAW 885) Doctoral Dissertation Research and S.J.D
This course will allow candidates to focus on developing their dissertation and building on the preliminary research they conducted during the first year. Candidates will continue to meet, either in person or by remote means, with their Advisory Committee twice a year. Colloquium II

LAW 887 Doctoral Dissertation Supervision and Completion (1 Credit Hour)
Pre-requisites: (LAW 877) Doctoral Dissertation Supervision II
This course will allow candidates to continue to develop and complete the dissertation.

LAW 900 Introduction to Legal Study and Legal Writing (4 Credit Hours)
This foundation course introduces students to the sources and functions of law in our society. The course begins with an explanation of the structure of the American court system. Students then learn to read and brief cases, synthesize cases, and develop basic legal writing and analysis skills. Through multiple short writing assignments, students learn to construct a legal office memorandum, the final course requirement. The course utilizes health law cases and problems and provides students with background for future health law studies. This course is open to online Master of Jurisprudence students in the Health Law and Business Law programs.

LAW 901 Introduction to Legal Research (3 Credit Hours)
This course provides an overview of the legal research process. The student will learn basic legal research skills with a focus on online legal sources. Students will search for health law cases, statutes, regulations and law journal articles. They will learn how to use citators to verify that a case or statute is still good law and also learn the proper form for citation of legal authorities.
Outcomes:
Explain the fundamental principles underlying legal research; Use LexisNexis to find cases, statutes, regulations and secondary sources; Explain the importance of using citations and avoiding plagiarism

LAW 902 Introduction to Health Law and Policy (3 Credit Hours)
Co-requisites: Health Law LLM students should take Law 902 in conjunction with Law 903 in their first term
This course is designed to expose students to the legal issues that arise from the relationship between and among patients and health care providers. Primary areas include: conflicts between cost effective and high quality health care; access to care; individual and institutional liability; public and private regulation; accreditation and licensure; hospital/medical staff relationships; patient rights, with a special focus on informed consent; and other legal issues in the acute care setting.
Outcomes:
Identify and explain the key legal principles that govern the relationship between patients and health care providers, including the roles of individual and institutional liability; Synthesize theoretical legal concepts and practical applications in health law, utilizing case studies and real-world scenarios to understand how laws affect health care decisions; Cultivate the ability to reason ethically and legally through complex health care issues, making informed decisions that balance patient rights, provider responsibilities, and institutional obligations; Evaluate the tension between cost-effective health care delivery and maintaining high-quality care, and explore the legal implications of these conflicts for health care providers and patients; Discuss the legal challenges related to equitable access to health care, including the impact of public and private regulations on health care delivery and patient access; Critically assess the legal principles surrounding individual and institutional liability in health care settings, including the identification of negligent conduct, vicarious liability, and the allocation of responsibility between health care providers, institutions, and patients; Compare and contrast public and private regulations that govern health care practices, including federal and state laws, and their impact on health care providers, patients, and institutions; Describe the processes and legal requirements for health care provider accreditation and licensure, and the implications for compliance and accountability in the health care system; Investigate the legal dynamics between hospital administrators, medical staff, and other stakeholders in acute care settings, focusing on their respective responsibilities and liabilities; Analyze the legal standards surrounding patient rights, with a special focus on the doctrine of informed consent, and its application in acute care settings; Critically assess the role of law in the acute care setting, including legal risk management, liability concerns, and the rights of patients and health care providers

LAW 903 Health Care Financing (3 Credit Hours)
Pre-requisites: Prerequisite for Health Law MJ students: Law 900, 901, and 902
Health Law MJ students should take Law 903 in conjunction with Law 904. Health Law LLM students should take Law 903 in conjunction with 902 in their first term. Students explore the general principles and techniques of financial management and accounting as applied to health care organizations. Considerable focus is placed upon definition, history, and methods by which providers of health care services are reimbursed by third parties., insurance companies, government programs) impact financial operations of health care organizations; Examine common reimbursement methods, such as capitation, bundled payments, and Medicare/Medicaid; Identify financial challenges faced by health care providers due to third-party reimbursement; Investigate the impact of underpayment or delayed payments on health care organizations' financial health.
Outcomes:
Define key financial management concepts and principles as they apply to health care organizations; Analyze the role of financial management in ensuring the sustainability of health care providers ; Identify the historical developments that have shaped reimbursement systems in health care; Understand how reimbursement models have evolved over time, from fee-for-service to modern value-based care structures; Demonstrate proficiency in applying basic accounting techniques, including budgeting, forecasting, and financial reporting, within health care organizations; Understand how financial statements (balance sheets, income statements, cash flow statements) are used in health care decision-making; Analyze how third-party payers (e.g

LAW 904 Health Care Regulation and Policy (3 Credit Hours)
Pre-requisites: Prerequisites for Health Law MJ students: LAW 900, 901, and 902
Health Law MJ students should take LAW 904 in conjunction with LAW 903. This course looks at patient representation issues in the context of judicial advocacy and public policy formation and explores patient rights in the context of federal opinions and strategies they utilize. The role of government in health care is explored through a review of major government health programs, particularly Medicare and Medicaid, with a focus on the fundamentals of legislative and administrative processes in health policy development and implementation. Issues to be explored will be drawn from the wide array of health matters in which governments are involved.
Outcomes:
Describe the three separate branches of government and the role each plays in the policymaking process; Identify five specific reasons achieving meaningful health care reform is so difficult in the United States; Research a health policy issue that negatively impacts citizens of the US or of the state where you live; Advocate for necessary policy change by providing a balanced analysis of available and best options for advancing a specific health policy option

LAW 907 Bioethics & Social Justice (3 Credit Hours)
Students investigate issues arising from advances in biological science and technology and learn about their impact on the legal rights and of patients, health providers, and government policy makers. Issues explored range from legal and ethical dilemmas in the treatment of individuals to broader societal issues addressing the allocation of health care resources.
Outcomes:
Identify and evaluate key legal and ethical dilemmas arising from advances in biological science and technology, such as gene editing, AI integration, stem cell research, and personalized medicine; Discuss the balance between innovation in health technologies and the protection of individual patient rights; Explore how emerging biological sciences and AI impact the legal rights of patients, including issues of consent, privacy, and autonomy; Investigate the legal implications of patient data use and the role of artificial intelligence in clinical decision-making; Analyze the responsibilities and legal liabilities of health care providers in the use of advanced technologies, including AI-driven diagnostics and treatment protocols; Explore issues of malpractice and negligence in the context of innovative treatment methods and technologies; Investigate the role of government policy in regulating emerging technologies, such as biotechnology, AI, and digital health tools; Examine the regulatory frameworks for ensuring safety, efficacy, and ethical use of new technologies in health care; Articulate the need for an effective compliance program, and the legal and business benefits of having an effective compliance program; Describe the elements of a successful corporate compliance program designed to deter, and to detect and remedy fraudulent or abusive practices; Discuss the fundamental health care fraud and abuse and related laws, privacy and security laws, and research laws that apply to most health care providers in the context of "compliance"

LAW 909 Risk Management, Patient Safety and Quality (2 Credit Hours)
This course is designed as a general survey course to provide you with an introduction to the concepts associated with managing risk, promoting quality and enhancing safety in the health care industry. The course begins with a general description of traditional risk management and then proceeds to discussion the various aspects of risk management, patient safety and quality that influence the delivery of health care.

LAW 910 Health Care Compliance (2-3 Credit Hours)
This course will progress from the basics of a compliance program, including the compliance operations and the Code of Conduct, to specific issues facing the healthcare industry such as anti-kickback, Stark, False Claims Act, and civil monetary penalties; conflicts of interest and governance; tax; coding and billing; privacy, technology, data, and security; and the link between regulatory issues and quality of care. Students will be assigned projects to show them how to implement in a practical setting the various laws, regulations, and standards as well as understand the enforcement environment. THIS CLASS IS ONLY AVAILABLE ONLINE AND WITH PERMISSION.

LAW 912 Liability & Dispute Resolution in Health Care (2 Credit Hours)
In this course students will take an in-depth look at both the substantive and procedural law of medical negligence litigation and ways to avoid litigation through communication and resolution processes and the use of other alternative means of reconciliation following harm. Students will also review and discuss the motivations behind medical malpractice litigation and will include detailed discussions about the comprehensive, principled, and systematic approach to the prevention and response to patient harm including communication and resolution programs such as the Michigan Model, CANDOR, and the BETA HEART program. Students will discover, during the course, the impact of medical harm and litigation on patients, families, caregivers and society. Case-based videos involving actual patient harm events and demonstrating the power of empathic communication are used throughout the course.

LAW 916 Telemedicine (3 Credit Hours)
This class will explore the evolution of Telemedicine to Telehealth. It will begin by describing the legal and regulatory framework which governs all Telehealth encounters and the reimbursement and coverage parity issues which have, for years, limited growth in this critical aspect of health care. The course will also cover the impact of state licensing compacts, the challenges associated with technology, HIPAA and privacy concerns and how Telehealth can serve to reduce health care disparities and issues associated with access to needed health care services for geriatric and other patients.
Outcomes:
Analyze the legal and regulatory landscape governing Telehealth, including the key laws, policies, and guidelines that shape Telehealth practice, and evaluate their impact on the growth and implementation of Telemedicine services; Evaluate the technological barriers and challenges that impact Telehealth, including issues related to connectivity, platform accessibility, and the integration of health information technologies and examine HIPAA regulations and privacy concerns in the context of Telehealth services; Examine the potential benefits and drawbacks of Telehealth in improving patient care, focusing on patient outcomes, continuity of care, and the quality of healthcare delivered remotely; Discuss the ethical issues surrounding Telehealth, including equity, informed consent, and the challenges of ensuring the security and confidentiality of patient information in virtual care settings; Propose strategies and solutions for overcoming the challenges faced by Telehealth, including addressing regulatory, technological, and access issues, and ensuring the equitable delivery of Telehealth services across diverse patient populations

LAW 917 Public Health and the Law (3 Credit Hours)
Public Health Law is a two-credit survey course that covers core legal issues encountered in regulation and public policy affecting population health. The course will provide students with an overview of topics that concern regulatory theory, administrative law, legislation, and individual rights' concerns. As public health authorities are confronted with ever complex challenges, the role of law is pivotal in both directing regulatory responses, as well in shaping strategies to combat perceived abuses of government power. Few areas of law and policy are as dynamic as public health law as the field plays a central role in major, ongoing areas of population health such as Covid-19, opioid abuse, climate change, disaster preparedness and response, etc. The course will focus on four themes: (1) the structure and powers of public health agencies in confronting traditional and evolving health threats, (2) the challenge of balancing individual rights against population health concerns, (3) the role of civil litigation in influencing changes in public health with a focus on legal settlements in the areas of tobacco and opioids, (4) international and comparative law approaches to meeting cross border health challenges. The course is taught online and combines several live class sessions with programmed modules. Students will be required to make several in-class presentations that will be the basis of three required essay assignments.
Outcomes:
Develop an understanding of legal issues concerning vaccines, and how regulators need to balance public need with individual rights in this context particularly in relation to Covid-19; Appreciate key legal issues that concern the adoption of isolation and quarantine measure, as well as travel restrictions that can be invoked to protect population health, drawing on both domestic and international law principles; Explore the role of regulators in developing policies to deal with population health disparities, focusing on the issue of obesity and its implications in minority populations; Describe the key variables in the formation of public health regulation including risk assessment, cost benefit analysis, transparency and the application of the precautionary principle; Demonstrate a mastery of the Bill of Rights' issues that impact public health regulation and have an appreciation of the legal tension between individual liberty and population health, of particular importance will be an understanding of due process and equal protection, and how those principles are manifest in public health case law, and students will be expected to have a solid understanding of the elements of Jacobson v Massachusetts and an awareness of how those elements can serve as a basis of regulatory analysis; Understand how the issue of federalism is central to public health law; Develop a familiarity with public health activities regarding access to clean water; Appreciate the role tort law plays in public health law with a special focus on tobacco and opioids

LAW 918 Health Care Privacy and Security (3 Credit Hours)
This course is an overview of Health Information Law and Policy as it pertains to data security and privacy of electronic health records here in the United States. Students will examine how individual health information is collected, maintained, and transferred in this electronic information age, and the ramifications when such information is improperly protected, stolen, and misused.
Outcomes:
Identify the key federal laws and regulations related to the privacy and security of electronic health records (EHRs), such as HIPAA (Health Insurance Portability and Accountability Act) and the HITECH Act; Understand the role of state laws and regulations in complementing federal health information privacy and security requirements; Analyze the processes by which health care organizations collect, store, and transfer electronic health records (EHRs) across different systems and platforms; Discuss the challenges and opportunities presented by health information technology, including electronic health records, health information exchanges, and patient portals; Assess the legal consequences and regulatory responses to breaches of electronic health information, including data theft, unauthorized access, and misuse; Explore the ethical dilemmas surrounding the protection of patient privacy in the context of health information technology; Understand the compliance mechanisms, such as audits, risk assessments, and security protocols, that organizations use to ensure adherence to health information privacy and security regulations; Analyze case studies of organizations that have successfully implemented privacy and security measures and those that have faced significant challenges or penalties; Engage with current issues such as the growing concern over cyberattacks, data sharing across organizations, and health data interoperability; Explore potential future developments in health information law and policy, considering technological advancements, evolving legal frameworks, and new public health concerns

LAW 920 Health Law Seminar Series (1 Credit Hour)
This course exposes students to seven unique and emerging issues impacting the health care industry. Each issue has the potential to impact providers, health care organizations, health care attorneys, and consumers. Each emerging issue is selected based on its likely impact on the industry and its timeliness, given current political and health care challenges. This course is structured over 14 weeks, in which we alternate between reading weeks, where students are given reading material to introduce them to each issue, and synchronous classroom lectures by national experts on each subject. At the end of the course, each student is asked to write a reflective paper on one of the issues presented and describe the impact that they believe it will have on their practice or the delivery of health care in general. This course is graded pass/fail.
Outcomes:
Increase knowledge of emerging issues in health law; Increase understanding of the complexity and importance of health care law and compliance

LAW 921 Health Insurance and Health Care Regulation (2 Credit Hours)
This course is designed around the regulation of health insurance companies in the United States with an eye toward the coming changes brought about by the Affordable Care Act. Although the Affordable Care Act (ACA) is federal, its implementation is reliant on the states. This course will address how the current regulatory system will adapt to the new federal health care scheme.

LAW 922 Advanced Health Care Compliance (2 Credit Hours)
Pre-requisites: LAW 910 - Health Care Compliance (Online)
This course explores advanced concepts in health care compliance. This course will present a complex health care compliance scenario each module which the student must analyze and comment upon. The scenarios will cover a broad array of regulatory subject matters which must be analyzed in the context of compliance program principles.
Outcomes:
Gain experience unpacking complex compliance scenarios; Put into practice regulatory compliance knowledge gained in compliance curriculum

LAW 923 Privacy Program Management (2 Credit Hours)
Pre-requisites: LAW 918 or LAW 823 is a prerequisite
If working on the Certificate in Privacy Law, no prerequisites are required for this course. This course explores advanced concepts in privacy and security law and is designed as a continuation of either of the introductory privacy courses (LAW 918 or LAW 823). This course will present a complex compliance privacy and security scenarios each module which the student must analyze and comment upon.
Outcomes:
Understand and apply the 7 elements of a compliance program to the analysis and formation of an effective privacy compliance program; Apply basic legal and regulatory principles to the evaluation of issues in complex scenarios related to privacy and security issues; Demonstrate an understanding of the risks and mitigation tactics needed to enhance privacy/security program management

LAW 924 Conducting Internal Investigations (2-3 Credit Hours)
This course will cover practical techniques in responding to suspected non-compliance as well as liability exposure in how investigations are handled. The course will also discuss resolution of identified non-compliance and methods for discharging an organization's legal obligations to correct non-compliance, including self-disclosures and refunds. Additionally, the course will cover responding to government inquiries and audits.
Outcomes:
Students will understand the context for internal investigations; Students will learn practical skills for planning and conducting internal investigations; Students will learn how internal investigations are resolved; Students will understand how to identify and access the information available on websites of relevant regulatory/accreditation agencies; Students will understand how to respond to government inquiries, audits, and investigations (including those of government contractors); Students will understand the interplay between government and internal investigations

LAW 925 Drafting Policies and Procedures (3 Credit Hours)
This course is designed to provide practical experience in drafting operational policies from compliance regulations. Having clear policies and procedures is an essential element of an effective compliance program. The course will explore liability associated with how policies are drafted as well as non-compliance with an institution's policy commitment. The course will teach skills and techniques for turning complex regulations into accessible policies for the workforce.
Outcomes:
Understand the types and roles of written standards; Understand the considerations for writing and editing written standards; Articulate the process for deploying and managing effective written standards

LAW 926 Human Subjects Protection (3 Credit Hours)
This course will cover the law of protecting human subjects in clinical research. Federal agencies require institutions conducting research to have a study approved by an Institutional Review Board (IRB), obtain informed consent from the human subject, and self-disclose to the government various events. The course will review the regulations governing IRBs, the content of informed consent forms, the monitoring of research studies, and the disclosure of unanticipated events and significant non-compliance. The course will look at enforcement cases as well as tort liability. Financial relationships between investigators and sponsors will also be covered.
Outcomes:
Examine the regulatory requirements governing human research; Gain a thorough understanding of how to apply the regulations to clinical research protocols; Understand the operational and regulatory requirements of research ethics committees; Examine the role of Legal Counsel to institutions conducting human research

LAW 927 Food and Drug Law (2 Credit Hours)
This course will cover advanced topics in the law governing development and approval of devices, drugs, and biologics under the jurisdiction of the U.S. Food and Drug Administration. The course will review regulatory obligations for both manufacturers and providers conducting FDA-regulated clinical research. The course will also cover enforcement of non-compliance and how organizations develop compliance infrastructure to manage the highly detailed FDA regulations.
Outcomes:
Discuss the background of drug/device regulation in the U.S. and the structure of the FDA; Discuss basic terms used in drug pricing; Distinguish among drugs, devices, biologics, dietary supplements and food; Discuss FDA inspections and enforcement mechanisms; Discuss the various approval pathways for "new drugs," and regulation of over-the-counter drugs; Discuss FDA patent concepts and market exclusivities; Discuss the various approval pathways for devices; Describe FDA regulatory paradigm for biologics; Describe the process for the conduct of clinical investigations in humans of drugs and devices and identify common compliance issues arising in the context of these investigations; Discuss FDA regulations for ensuring quality and consistency (eg, GMP, GLP, QSR); Describe FDA's processes for post-market surveillance of drugs and devices, including recalls; Discuss FDA's labeling and advertising requirements, and understand interaction between FDA and FTC; Describe off-label promotion and the intersection of FDA promotional requirements with First Amendment law and the False Claims Act

LAW 929 Enterprise Risk Management (2-3 Credit Hours)
Enterprise Risk Management (ERM) provides a comprehensive framework for making strategic decisions, taking into consideration concepts of both value creation and value protection. The approach looks at strategies for managing risk, uncertainty and growth and their relationship to total value. This course will cover the specific skills and techniques necessary to manage risk across increasingly complex organizations and to align business strategies with goals and culture. Prerequisites for Compliance and Enterprise Risk Management MJ students: Law 900, 901, and 903. CERM MJ students should take Law 929 in conjunction with Law 839. CERM LLM students should take Law 929 in conjunction with Law 839 in their first term.

LAW 930 Leadership and Management Seminar Series (1 Credit Hour)
This course is comprised of a series of lectures on topics in leadership and management by different experts in the field. Every other week students attend a live synchronous class on a leadership or management topic. Topics vary each term and are intended to cover hot topics and essential skills in leadership and management. The course is open to students in online business and health law programs.

LAW 937 Dispute System Design (2 Credit Hours)
This course will focus on the theory and practice dispute system design. Through the semester we will explore dispute systems, analyze design processes, and advance practical skills. Students will participate in simulated dispute resolution processes as a party and analyze real-world dispute systems.

LAW 938 Mediation & Turning Conflict Convo into Dialogue (2 Credit Hours)
This course will focus on the theory and practice of mediation. Through the semester we will explore mediation models and skills. Students will participate in simulated mediations as mediators and parties. Students will learn mediation skills to manage challenging conversations and conflicts and assist others in conflict situations.

LAW 939 Problem-Solving Negotiation Skills (2 Credit Hours)
The purpose of this course is to study and practice effective negotiating strategies and techniques, as well as improve students¿ understanding of negotiation and their effectiveness as negotiators. The readings and class discussions will provide students with a theoretical framework to prepare, conduct, and review negotiations and several strategies to enhance their abilities as negotiators. Through participation in a series of negotiation simulations and critical reflection in class, students will increase awareness of their negotiation behavior and their ability to negotiate more skillfully. This course seeks to help you move from negotiating by instinct, as most people do, to negotiating more thoughtfully, more comfortably and with a clearer sense of purpose. This course merges theory with practice to: (1) develop your understanding of negotiation, and your awareness as a negotiator; (2) give you tools and concepts for analyzing and preparing for negotiations; (3) enhance your negotiating skills through frequent role plays, analysis, and feedback; and (4) teach you how to keep learning from your own negotiation experience. In addition to negotiation skills and theory, you will be introduced to issues of representation, ethics, and the place of negotiation in our legal system. The course syllabus consists of assigned readings, simulations, and written assignments for almost every class, and attendance and one video debrief where we will analyze your skill set.

LAW 940 Restorative Processes in Conflict Resolution (2 Credit Hours)
This course prepares community members and professionals from all fields to apply Restorative Practices to their contexts. The curriculum focuses on proactive techniques to mitigate harm and responsive techniques to address harm, connecting anti-oppression and Restorative Justice, and leadership methods to implement systemic organizational restorative change. Specific restorative practices which students will learn include self-regulation, restorative mindsets and language, facilitation of a variety of Circles, restorative conversations, restorative mediation, and contracting. Through additional online seminars, students will strengthen their knowledge of the history, theory, research, and practice of Restorative Justice. The culminating focus of the course invites students to apply restorative principles and practices in their own setting.

LAW 951 MJ Thesis/Capstone Term One (2 Credit Hours)
Pre-requisites: Students must successfully complete 26 credit hours to be eligible to enroll in 951; Prerequisites for Health Law MJ students: Law 900, 901, 902, 903, 904,910 and required elective credits; Prerequisites for Compliance and Enterprise Risk Management MJ students: Law 900, 901, 803, 839, 929, and required elective credits
MJ students are required to complete a written thesis, demonstrating scholarly research of an important legal issue. The thesis must be of a quality determined to be acceptable by the student's faculty advisor, reflecting mastery of the subject matter explored, critical thinking and clear, sophisticated writing. The thesis is completed over the course of two semesters in close cooperation with a faculty advisor. This first thesis course will focus on topic selection, thesis creation, detailed outline, research methodology, introduction, and writing a partial draft. This course is for students in the online MJ program.
Outcomes:
Produce a final submission of publishable quality, demonstrating strong research, writing, and analytical skills; Conduct independent research, critically analyze data, and present their findings clearly and concisely in a scholarly thesis format; Receive and apply personalized feedback to make meaningful improvements in their writing and research processes; Engage with selected readings and resources to enhance their research and writing, tailoring their use based on individual needs and topics

LAW 952 MJ Thesis Project Term Two (2 Credit Hours)
Pre-requisites: Law 951
MJ students are required to complete a written thesis, demonstrating scholarly research of an important legal issue. The thesis must be of a quality determined to be acceptable by the student's faculty advisor, reflecting mastery of the subject matter explored, critical thinking and clear, sophisticated writing. The thesis is completed over the course of two semesters in close cooperation with a faculty advisor. This second course will focus on completing and refining the thesis project, and presenting a thesis defense to faculty and fellow students. This course is for students in the online MJ program.

LAW 955 Administrative Law and Health Care Regulation (3 Credit Hours)
The course focuses on the role of federal and state agencies and government branches in regulating health care. Students will learn the fundamentals of administrative law through a health care lens. Topics covered will include government rulemaking, investigations, and enforcement. Students will learn how to locate and understand the interplay of sources of administrative law and analyze statutes and regulations.

LAW 956 Health Care Payment and Policy (3 Credit Hours)
This course covers the types of health care payors and the relationships between them, including HMOs, PPOs, CMPs, Medicare and Medicaid, and other managed care arrangements. Topics will include utilization review, ERISA, agency doctrine and payor operational and contracting issues. Students will become familiar with managed care and analyze healthcare plans and policies. (LLM only or with permission)) will likely affect access to care and health care spending; Explain the major drivers of cost growth and the factors that threaten the sustainability and solvency of the US health care system.
Outcomes:
Describe the structure and organization of the US health care system; Identify basic concepts related to health insurance coverage; Explain how both private health insurance and public health insurance function and how they are financed; Compare and contrast health care delivery models; Identify the various determinants of access to care for low-income and vulnerable populations; Evaluate how specific policy considerations (including quality of care, aging population, technology, etc

LAW 957 Corporate Health Care Transactions (2 Credit Hours)
This course overs the business and legal issues that arise in health care transactions and the business and regulatory environment surrounding transactions. Topics covered will include organizational operations, the contents and role of organizational documents, and the application of tax laws to transactions. Students will analyze organizational documents and prepare presentations on issues presented by transactions (LLM only or with permission.)

LAW 958 Clinical Research Compliance (2 Credit Hours)
This course serves as an introduction to the growing area of health law known as "life sciences". The theme for this course centers on the research and development of pharmaceutical drugs and devices and the role of the FDA in regulating this process. Topics covered will include genomics, personalized medicine, the FCPA, basic patent and intellectual property issues, and financing. Students will learn to analyze the FDA approval process (LLM only or with permission.)

LAW 959 Physician Regulation & Practice Management (2 Credit Hours)
This course is designed to introduce students to the laws, agencies, and other bodies that license, regulate and discipline physicians. Topics covered will include licensing proceedings and hearings and health care entity policies addressing these issues (LLM only or with permission.)

LAW 960 Fraud and Abuse - Stark Intensive (3 Credit Hours)
This course covers federal physician self-referral law, commonly known as stark law, and fraud and abuse law. Students will learn about the statutes, regulations and advisory opinions that define the parameters of physician referrals and anti-kickback laws, analyzing case studies for fraud and self-referral issues. Students will also familiarize themselves with the laws, regulations and government regulatory actions designed to combat false claims and other types of fraudulent activities. (LLM only or with permission.)

LAW 981 Advocacy Dynamics: Legislating for Equity (2 Credit Hours)
The purpose of this course is to provide tools and strategies for students interested in learning the techniques for effective advocacy at the state and federal levels. The first portion of the course will provide historical context on the three branches of governments¿ ability to make policy. The course will then examine the processes that turn a problem into a legislative solution, including how to move a bill into law. These tools include identifying an issue, conducting national surveys, building a base through community organizing, drafting, lobbying, and offering testimony in committee. A recurring theme in the course is the need to examine external obstacles that impact policy making.

LAW 982 Advancing DEI in the Corporate Compliance Program (2 Credit Hours)
This course will examine the relationship between corporate Compliance and the emerging corporate governance principles known as Environmental, Social and Governance (ESG). ESG represents a set of operating principles assist business entities as they strive to be both profitable and socially responsible. The ESG model has grown in use and popularity over the past decade and now is considered essential for many businesses. This course will examine the application of Compliance principles as outlined in the Federal Sentencing Guidelines to the ESG framework. It will examine 8 discreet elements of each principle, such as climate change, sustainability and emission standards for Environmental, workers and human rights, equality and fairness and diversity and inclusion for Social and board independence, fair compensation and ethics and compliance for Governance. It will trace the roots of the ESG movement from the Triple Bottom Line to sustainability to Corporate Social Responsibility to ESG. It will also examine the fundamental purposes of corporations and whether the Friedman Model from the Chicago School remains viable. The course will also consider various reporting models for ESG elements and their impact upon corporate governance and investing.

LAW 983 Advancing Social Justice in the HC Industry (2 Credit Hours)
This is a survey course covering a range of topics including: ethical theory, end of life care issues, informed consent, assisted reproduction, research ethics, social justice, and health care reform and related impacts on public health issues. Due to the breadth of the subject, a thorough consideration of each topic listed cannot be achieved and certain important topics, such as genetics issues, will not be addressed here. Broad health care policy issues are also covered in other Loyola courses, so that content will not be duplicated in this course.

LAW 995 LLM Thesis Project Term One (2 Credit Hours)
Pre-requisites: This course is for students in the online LLM program; Students must successfully complete 20 credit hours to be eligible to enroll in 995, which is the final course in the program; Prerequisites for Health Law LLM students: Law 902, 903, 910 and required elective credits; Prerequisites for Compliance and Enterprise Risk Management LLM students: Law 839, 929, and required elective credits
LLM students are required to complete a written thesis, demonstrating scholarly research of an important legal issue. The thesis must be of a quality determined to be acceptable by the student's faculty advisor, reflecting mastery of the subject matter explored, critical thinking, and clear, concise writing. The thesis is completed over the course of two semesters in close cooperation with a faculty advisor. This first thesis course will cover all the vital parts of a thesis which includes topic selection, thesis creation, detailed outline, research methodology, introduction, and writing a partial draft.
Outcomes:
Develop focused, original research topic in partnership with the thesis supervisor that aligns with academic interests and scholarly standards, demonstrating potential for academic contribution and publication; Create comprehensive research plan in collaboration with the thesis supervisor, outlining clear research questions, methodologies, and a timeline that supports the completion of a publishable paper; Execute independent research through the selection of appropriate methodologies, critical analysis of existing literature, and data gathering to address defined research questions; Apply critical thinking to the work, with integration of supervisor feedback to refine and strengthen the research findings, methodology, and overall structure, enhancing the clarity and depth of the paper

LAW 996 LLM Thesis Project Term Two (2 Credit Hours)
Pre-requisites: Law 995
LLM students are required to complete a written thesis, demonstrating scholarly research of an important legal issue. The thesis must be of a quality determined to be acceptable by the student's faculty advisor, reflecting mastery of the subject matter explored, critical thinking and clear, sophisticated writing. The thesis is completed over the course of two semesters in close cooperation with a faculty advisor. This second course will focus on completing and refining the thesis project, and presenting a thesis defense to faculty and fellow students. This course is for students in the online LLM program.

Legal Environment of Business (LREB)

Discover, search, courses (p. 2661)!

LREB 315 Law and the Regulatory Environment of Business I (3 Credit Hours)
Pre-requisites: Junior standing
This course is designed to familiarize the student with the American legal system. Intended primarily for students who have not previously studied law, the course includes a review of the concept of law, the function of the courts, and the dual judicial system of the United States. An appreciation of legal history and the operation of law are developed through the vehicle of a detailed analysis of contract law and a survey of other topical headings.
Course equivalencies: LREB315/315H
Outcomes:
The students should achieve an awareness of the necessity of voluntary compliance with general legal concepts in order for society to enable all persons to live together in harmony; An understanding of the court system as a substitute for self-help is deemed essential and knowledge of binding contract law is fostered as a basis for all agreements

LREB 315H Law and the Regulatory Environment of Business I - Honors (3 Credit Hours)
Pre-requisites: Junior standing; restricted to SBA honors students
This course is designed to familiarize the student with the American legal system. Intended primarily for students who have not previously studied law, the course includes a review of the concept of law, the function of the courts, and the dual judicial system of the United States. An appreciation of legal history and the operation of law are developed through the vehicle of a detailed analysis of contract law and a survey of other topical headings.
Course equivalencies: LREB315/315H
Outcomes:
The students should achieve an awareness of the necessity of voluntary compliance with general legal concepts in order for society to enable all persons to live together in harmony; An understanding of the court system as a substitute for self-help is deemed essential and knowledge of binding contract law is fostered as a basis for all agreements

LREB 443E Executive Legal Liability (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Treats selected areas of corporate activities in which officers and directors are subject to personal liability including conflicts of interest, security transactions, and provisions of the Foreign Corrupt Practices Act. Students will design company compliance programs related to such matters including anti-trust regulations.
Course equivalencies: LREB600E/LREB443E

LREB 445 Entrepreneurship Law (3 Credit Hours)
Pre-requisites: Quinlan School of Business graduate students
This course provides aspiring and established business owners with an understanding of the recurring legal issues at various stages in entrepreneurship. Comprehending these principles will assist business owners in better organizing their business structures and operations.
Outcomes:
The goal is to help increase a business' duration and profitability by implementing appropriate processes to reduce the potentially substantial costs and irreparable harm associated with failing to apply proper attention to foreseeable commercial risks

Linguistics (LING)

Discover, search, courses (p. 2661)!

LING 302 Methods of Teaching Foreign Language (3 Credit Hours)
This course is an introduction to the fields of Second Language Acquisition as well as Foreign Language Teaching.
Outcomes:
Students will gain a solid understanding of the underlying psychological processes of language acquisition, and how this knowledge is used in the design of pedagogical materials for the second/ foreign language classroom; Students will also receive pragmatic instruction in the teaching of the different linguistic skills

Literature in Translation (LITR)

Discover, search, courses (p. 2661)!

LITR 161 Introduction to Italian Culture (3 Credit Hours)
This course introduces students to major social, artistic, and intellectual currents in the cultural history of Italy from antiquity to contemporary times. The overall goal is to reflect on how Italian culture has transcended the strict confines of its national origin to become a source of universal values and inspiration.
Interdisciplinary Option: European Studies, Global Studies, Italian American Studies, Italian Studies
Outcomes:
Students will be able to identify the historical roots of Italian cultural phenomena; Students will become familiar with differing traditions and cultural perspectives; Students will enhance their reading and critical thinking skills

LITR 200 European Masterpieces (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
Major European literary texts will be examined in a historical and cultural context and in their transhistorical, universal aspects that make them masterpieces. Students will understand how literary masterpieces help us develop critical consciousness of our experience.
Knowledge Area: Tier 2 Literary Knowledge
Interdisciplinary Option: European Studies, Global Studies
Course equivalencies: LITR200/INTS200

LITR 202 European Novel (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
This course will focus on major EUROPEAN novels.
Knowledge Area: Tier 2 Literary Knowledge
Interdisciplinary Option: European Studies, Global Studies
Course equivalencies: LITR202/INTS204
Outcomes:
Students will gain an overview of the literary production of representative EUROPEAN novelists studied in the historical and societal context

LITR 203 European Drama (3 Credit Hours)
This course will focus on major European novels.
Interdisciplinary Option: European Studies, Global Studies
Course equivalencies: X-LITR203/INTS205
Outcomes:
Students will learn how drama enhances our understanding of human interaction, violence, social order and the margins of individual freedom

LITR 204 European Film (3 Credit Hours)
This course will focus on major European films in order to give students an overview of the film production of representative European filmmakers studied in the historical and societal context.
Interdisciplinary Option: European Studies, Film & Digital Media Studies, Global Studies, International Film & Media Studies
Course equivalencies: X-LITR204/INTS206/IFMS205
Outcomes:
Students will gain an understanding of the distinctive aspects of the major European movements such as Italian neorealism, French new wave, New German Cinema and old and new Spanish surrealism

LITR 211 Latina Authors (3 Credit Hours)

Students will develop executive and general management skills through an understanding of how the various functions of an organization operate as a whole; Students will also build their skills in conducting strategic analyses in a variety of industries and competitive situations and gain a stronger understanding of the competitive challenges of the market environment

MGMT 304H Strategic Management - Honors (3 Credit Hours)
Pre-requisites: Senior standing; minimum grade of "C-" in MGMT 201 or MGMT 201H, MARK 201 or MARK 201H, SCMG 332 or SCMG 332H or SCMG 232 or SCMG 232H, and FINC 301 or FINC 334 or FINC 334H; restricted to SBA honors students
This capstone course analyzes the responsibilities of general management in formulating and implementing business¿level and corporate¿level strategies. Strategic management addresses the strategic positioning, organizational structure, resources and capabilities of the organization to generate and sustain competitive advantage. The course applies strategic analysis principles to integrate all the BBA core courses.
Course equivalencies: MGMT304/304H
Outcomes:
Students will develop executive and general management skills through an understanding of how the various functions of an organization operate as a whole; Students will also build their skills in conducting strategic analyses in a variety of industries and competitive situations and gain a stronger understanding of the competitive challenges of the market environment

MGMT 318 Organizational Development and Change (3 Credit Hours)
Pre-requisites: Junior Standing, minimum grade of "C-" in MGMT 201 or HSM 368
This course examines the theory and practice of organizational development and change, with an emphasis on effective change management.
Outcomes:
Students will understand the complexity of change in organizations and learn how to use change interventions to manage different types of organizational changes, including the redesign of jobs and restructuring

MGMT 320 Leading and Managing Teams (3 Credit Hours)
Pre-requisites: Junior Standing, minimum grade of "C-" in MGMT 201
This course examines the characteristics of effective teams and team players in an organizational context and covers theories and concepts of team composition, roles and leadership, decision making, team charters, conflict management, team networks and international teams.
Outcomes:
Students will gain an understanding of team processes and team performance in organizations, learn tools that make teams effective, develop team skills and practice creating, monitoring and improving an ongoing team effort

MGMT 331 Managing Nonprofit Organizations (3 Credit Hours)
Pre- or co-requisites: MGMT 201
Students will learn the knowledge, skills, and values for managing nonprofit organizations. We will examine how non-profits develop their mission, strategic plan, and program model, as well as how they fund their efforts and continuously improve their performance. Students will apply their knowledge through case study explorations of different Chicagoland non-profits. Students will demonstrate an understanding of the evolving non-profit sector; students will demonstrate an analytic ability to assess non-profit strategy; students will understand the management skills needed at high-performing non-profits
This course satisfies the Engaged Learning requirement.

MGMT 335 Micro-Enterprise Consulting (3 Credit Hours)
Pre-requisites: Junior Standing, minimum grade of "C-" in MGMT 201; Instructor permission
In the Jesuit tradition of using knowledge to serve humanity, students utilize and improve their business knowledge and skills by meeting the real-life business consulting needs of individual entrepreneurial and not-for-profit clients starting up or operating businesses in economically distressed communities.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students improve skills in service-oriented communication, project management, teamwork, and cross-functional business analysis; and learn how locally-owned business can foster community economic development; Consulting clients receive a feasibility analysis or business plan to help guide business operations and obtain financing for a new or struggling business

MGMT 345 Ethics, Economics & Entrepreneurship (3 Credit Hours)
Pre-requisites: Junior Standing, 'C-' or better in MGMT 201
The entrepreneur has been reviled as a social parasite and cheered as a moral hero. Through an examination of some classic works on entrepreneurship and the writings of our guest speakers, in Ethics, Economics, and Entrepreneurship we will take up three main questions: Who is the entrepreneur - that is, what activities or characteristics make one an entrepreneur?; Why did the entrepreneur largely disappear from intellectual discourse in the middle 20th century?; How ought we to evaluate the entrepreneur morally - and does the answer depend upon who we understand the entrepreneur to be?

MGMT 360 Values-Based Leadership (3 Credit Hours)
Pre-requisites: Junior Standing, minimum grade of "C-" in MGMT 201
An examination of several major approaches to leadership that are based on personal and organizational values.
Course equivalencies: MGMT360/360H
Outcomes:
Students will understand major approaches to leadership, examine their own values and approach to leadership and improve their leadership skills

MGMT 363 Sustainable Business Management (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137; or MGMT 201 for Quinlan School of Business students
Course introduces students to the emerging field of sustainability in business and the growing focus on the social, environmental, and economic performance of businesses. The course presents the scientific, ethical, and business cases for adopting sustainability. This course fulfills a MGMT elective.\\n
Course equivalencies: MGMT/ENVS 363/ENVS 463
Outcomes:
Understand the dimensions of sustainability; Understand economics for sustainability; Understand the tools and techniques to apply sustainability in each functional area of the business

MGMT 377 Family Business Management (3 Credit Hours)
Pre-requisites: Grade of C- or better in MGMT 201
This course examines family, ownership and management challenges in operating a family business, including governance and leadership succession. It is designed for students pursuing a career in family business or providing service to one. It will use a systems model of family and business to demonstrate connections among key stakeholders. This course satisfies the Engaged Learning requirement.
Outcomes:
Students will understand the goals, characteristics, social and economic impact, and dynamics of family businesses; They will know how to integrate entrepreneurial/management concepts and available resources to strengthen business performance

MGMT 395 Independent Study in Management (1-3 Credit Hours)
Pre-requisites: Junior standing; Instructor and Dean permission
No course description is available

MGMT 399 Special Topics in Management (1-3 Credit Hours)
Pre-requisites: Junior standing
No course description is available

MGMT 400B Values-Based Leadership (1.5 Credit Hours)
This course will explore major approaches to leadership that are based on personal and organizational values. Students will have an opportunity to explore their own values and approach to leadership and be challenged to identify opportunities for improvement.
Outcomes:
Students will: 1) learn and understand fundamental and diverse principles and theories of leadership and management; 2) develop a clearer understanding of and commitment to personal values as a way of developing a sound basis for making personal and professional decisions; 3) apply what they learn in this course to clarify thinking on leadership and to solve problems in the future; 4) learn to analyze and critically evaluate different ideas, concepts and points of view on the concepts of leadership and management; 5) develop a personal style that will begin to answer the question "What kind of leader do I want to be?"; and 6) Understand the meaning of "vocation" and how it applies to each student's life

MGMT 401B Innovative Corporate Social Responsibility (1.5 Credit Hours)
This course will analyze why and how global businesses are innovating to address corporate responsibility expectations. The course will focus on companies that are co-creating value and will examine impacts from businesses, civil society and public policy that enhance (or detract from) competitiveness.
Outcomes:
Students will be able to: 1) examine the interaction between market and civil society institutions in the development of corporate responsibility initiatives; 2) demonstrate understanding of changing legal, social, and political environments as they affect organizations; and 3) analyze organizational situations, identify key issues, and formulate arguments and appropriate ways to innovatively implement changes

MGMT 402B Social Enterprise (1.5 Credit Hours)
Social enterprise seeks to create ventures that provide critical social services in innovative ways using the concepts and methods of business. This course aims to prepare students to engage in social enterprise by focusing on how to create social value by business means; how to start and sustain an entrepreneurial social venture; how to scale social innovation and grow an organization; how to obtain funding and generate earned revenue; how to adopt an appropriate legal governance structure and tax status; and how to measure, document, and communicate social impact.
Outcomes:
Students will demonstrate: 1) an understanding of the social enterprise sector, including what distinguishes social entrepreneurship from both traditional social services and traditional entrepreneurship; 2) a strategic understanding of how social enterprises succeed; 3) the ability to use analytical tools to develop and measure the impact of social enterprise models; and 4) the ability to formulate their ideas into a social enterprise model presentation

MGMT 403B Creating Ethical Work Environments (1.5 Credit Hours)
This course will explore how companies create and sustain ethical work environments and challenge students to systematically think about ethical dilemmas in human resources. The course will explore ethical practice across four areas of human resources: 1) acquiring employees (employment planning, recruitment, and selection); 2) developing employees (training, mentoring, performance feedback); 3) rewarding employees (salary, incentives, benefits); and 4) managing employment relations (unions, safety). The course will include an emphasis across these areas on diversity, inclusion, and social responsibility.
Outcomes:
Students will: 1) have familiarity with major ethical issues in human resources; 2) understand how companies make ethical human resources decisions aligned with their values; and 3) demonstrate knowledge of current human resource approaches to diversity, inclusion, and social responsibility

MGMT 404B ESG Investing (1.5 Credit Hours)
This course will explore the growing integration of environmental, social and governance (ESG) factors into global investment decision-making. Students will learn about: 1) the history and growth of ESG in investing; 2) how to assess a company's climate impact, water management, health and safety policies, supply chain integrity and other ESG factors in the context of financial risk and performance analysis; and 3) how companies can improve their ESG performance.
Outcomes:
Students will: 1) understand why ESG factors influence a company's financial performance; 2) assess a company's ESG performance; and 3) develop recommendations for ESG improvement

MGMT 405B Sustainable Business Management (1.5 Credit Hours)
No course description is available
Outcomes:
Understand the dimensions of sustainability; understand economics for sustainability; understand the tools and techniques to apply sustainability in each functional area of the business

MGMT 406B Influential Leadership (1.5 Credit Hours)
This course will equip students with the tools to be influential leaders by better understanding their own leadership styles, further developing their emotional intelligence, and learning how to best apply their styles effectively in the workplace. Students will be able to: 1) identify their personal leadership styles; 2) know how to apply their leadership most effectively in different organizational contexts with an emphasis on emotional intelligence; and 3) demonstrate familiarity with coaching techniques to improve personal and team performance.

MGMT 407B Impact Investing (3 Credit Hours)
This course will explore the rise of investments aimed simultaneously at social, environmental, and financial returns.
Outcomes:
Explore the rise of investments aimed simultaneously at social, environmental, and financial returns; Understand how impact investing works and the growing spectrum of investment firms with impact investing strategies; Evaluate an investment with an SROI (social return on investment) framework

MGMT 426N Leadership Development (1.5 Credit Hours)
Leader development is a systematic process that outlines self-improvement goals and strategies to assist leaders to take advantage of opportunities. Development planning consists of identifying development needs, prioritizing development needs, building a development plan, and modifying the development plan. Restricted to School of Business graduate students.
Outcomes:
1) Develop an understanding of the skills that are necessary to be an effective leader; 2) Create a development plan to become a more effective leader and responsible leader who exhibits personal integrity and ethical awareness

MGMT 430B Strategy and Leadership (3 Credit Hours)
The MBA Capstone explores the manner in which companies develop and implement a strategic plan and examines characteristics of effective general managers and leaders. This course is restricted to students in the MBA program and should be taken during the student's final quarter.
Outcomes:
Students will develop an explicit personal way of thinking about the business enterprise as a total system and the manner in which it can gain a sustainable competitive advantage by drafting a complete business plan for a start-up entity; Students will also sharpen their team, analytical, writing, and presentation skills and begin to evaluate the type of leadership skills they will need to move into increasingly more responsible positions inside organizations

MGMT 430E Capstone (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Brings all of the learning together from the program as it concludes. This course builds on the Entrepreneurship course by having teams prepare a complete business plan for the concept they have developed.
Course equivalencies: MGMT610E/MGMT430E

MGMT 430N Strategy and Leadership (3 Credit Hours)
Pre-requisites: MGMT 425N, MGMT 426N, MARK 470N, FINC 470N, and INFS 596N
The MBA Capstone explores the manner in which companies develop and implement a strategic business plan and also examines characteristics and responsibilities of effective general managers and strategic leaders in business organizations.
Outcomes:
An understanding about the business enterprise as a total system and the way it can gain a sustainable competitive advantage; Development of team, analytical, writing, and presentation skills, and the type of leadership skills they will need to move into organizations

MGMT 431N Business Consulting Course (3 Credit Hours)
Pre-requisites: MGMT 425N, MGMT 426N, MARK 470N, FINC 470N, and INFS 596N
This applied fieldwork project provides an opportunity to apply the knowledge and skills learned in the classroom to a client. The student teams will work directly with companies to create implementable business solutions.
Outcomes:
1) Increase proficiency in integrating the techniques, processes and procedures of the fundamental business disciplines; 2) Learn to apply the theory, skills, and knowledge from the business disciplines to business practice; 3) Demonstrate an innovative, entrepreneurial approach to management decisions

MGMT 444 Introduction to ESG - Expectations & Opportunities (3 Credit Hours)
Pre-requisites: Open to all graduate degree and graduate certificate students
Concepts and practices of ESG are introduced within the context of growing and emerging megatrends such as climate change and social justice concerns that presents companies with new risks and new opportunities. Themes related to private and public companies will be explored.
Outcomes:
Develop strong grounding in the overall themes of ESG; Develop an understanding of the core methods for assessing ESG outcomes; Establish the foundation for delivering ESG impact

MGMT 445 ESG in Practice-Business Leadership in Times of Change (3 Credit Hours)
Pre-requisites: MGMT 444
Class integrates the full knowledge of ESG by building on introductory course while encouraging students to integrate prior ESG knowledge from both practice and other classes. Students apply content and build out plans and pathways for a specific organization.
Outcomes:
Demonstrate understanding of reporting tools and approaches; Demonstrate applied understanding of ESG topics; Demonstrate understanding of ESG values based on leadership and change management

MGMT 460B Marketing Management (3 Credit Hours)
This course develops a broad understanding of the marketing principles that undergird successful marketing strategies and marketing plans with special attention given to international and ethical considerations.
Outcomes:
Students use and apply marketing principles, strategic research, consumer analysis and target marketing to either a project or to case studies

MGMT 460E Values Based Leadership (1.5 Credit Hours)
This course is focused on "values-based" leadership. This is an umbrella term that covers a wide range of approaches to leadership, all of which have at their foundation a set of values or principles, or at least an examination of one's values and beliefs.
Outcomes:
To assist students in beginning to develop a personally relevant and valuable style of leadership and management that will positively impact them and their organizations in a complex, diverse, and interdependent world

MGMT 472 Leading Change in Organizations (3 Credit Hours)
The course focuses on enhancing managers' capabilities in integrating strategic issues with "people" issues, enabling them to effectively implement change initiatives within diverse global environments. Special Note: MGMT 472 is cross-listed with HRER 430.
Course equivalencies: X - MGMT472 / HRER430
Outcomes:
Students will learn fundamental principles, theories, and generalizations needed for competent approaches to implement organizational change that prioritizes managing the "people" aspects of change, as participants or managerial change agents

MGMT 472E Organizational Change and Development (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Explores the complexity and dynamics of change in organizations. Topics covered include organization development, managing resistance, and change leadership.
Course equivalencies: MGMT 602E/MGMT 472M

MGMT 474E Strategic Management (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. This course introduces and develops strategic techniques to facilitate an organization's articulation of its mission and goals and its formation, implementation, and evaluation of key strategies. Additional topics include: strategic thinking, competitive advantage, vertical and horizontal integration, and planning horizon.
Course equivalencies: MGMT 604E/MGMT474E

MGMT 475 Cross-Cultural Dimensions of International Management & Marketing (3 Credit Hours)
This course examines cross-cultural management and marketing topics both within the business organization and across the global marketplace. Special note: MGMT 475 is cross-listed with MARK 475.
Course equivalencies: X-MARK475/MGMT475
Outcomes:
Students learn how differences in national and ethnic cultures affect the behavior of employees working in organizations, managers making business decisions and consumers making product choices

MGMT 477 Family Business (3 Credit Hours)
This course examines the family, ownership and management challenges involved in operating a family business, including governance and leadership succession.
Outcomes:
Students will be able to analyze the stumbling blocks to family business succession, compare differences between family and non-family owned firms and understand the impact of systems of family ownership and management on a firm's stakeholders and advisors

MGMT 479 Independent Study in Management (3 Credit Hours)
Student will conduct in-depth research or reading, initiated by the student and jointly developed with a faculty member, into a specialized area of management not otherwise covered by department course offerings.
Outcomes:
Students will be able to demonstrate in-depth understanding of a specialized area or topic in management

MGMT 481E Innovation and the Entrepreneurial Mindset (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Introduces the tools necessary for an individual to determine a relevant business concept and prepare to form a business to take that concept to market.
Course equivalencies: MGMT 607E/MGMT 481E

MGMT 482 Entrepreneurial Marketing (3 Credit Hours)
This course is about the marketing challenges in an entrepreneurial firm. Entrepreneurship is the discovery, enactment and pursuit of new business opportunities. Successful execution of an entrepreneurial idea requires a sound marketing plan. In this course, we will investigate how marketing tools can enable entrepreneurs to realize the full potential of their ideas."
Course equivalencies: X-MGMT 482/ENTR 482

MGMT 483 Strategic Entrepreneurship and Innovation Management (3 Credit Hours)
This course will focus on the application of strategic management tools to entrepreneurial situations with an emphasis on the early stages of new venture creation. We will discuss how new opportunities are discovered, how inventions are turned into innovations, and how societal value is created throughout this process. At the end of this course, you will be able to: Recognize and discover entrepreneurial opportunities; Manage the creation and appropriation of the value generated by innovations; Apply analytical and critical thinking skills in an uncertain business environment; Apply your learning in a real-life project.
Course equivalencies: X-MGMT 483/ENTR 483

MGMT 485 Social Enterprise (3 Credit Hours)
Social enterprise seeks to create ventures that provide critical social services in innovative ways using the concepts and methods of business. This course aims to prepare students to engage in social enterprise by focusing on how to create social value by business means; how to start and sustain an entrepreneurial social venture; how to scale social innovation and grow an organization; how to obtain funding and generate earned revenue; how to adopt an appropriate legal governance structure and tax status; and how to measure, document, and communicate social impact.

MGMT 499 Special Topics in Management (3 Credit Hours)
Pre-requisites: Graduate Business Student
No course description is available

MGMT 573 Business Strategy (3 Credit Hours)
This course analyzes the responsibilities of general management in formulating, communicating, and implementing a strategic plan. Whereas corporate strategy (MGMT 574) defines the vertical and horizontal scope of a firm, business strategy (MGMT 573) is concerned with how the firm generates and sustains competitive advantage within a particular industry or product market. Students will develop executive and general management skills through an understanding of how the various functions of an organization operate as a whole. Through case studies, students will also build their skills in conducting strategic analyses in a variety of industries and competitive situations and gain a stronger understanding of the challenges of the business environment.

MGMT 574 Corporate Strategy (3 Credit Hours)
This course focuses on the strategic management of multi-business firms. Whereas business strategy or competitive strategy is concerned with how the firm competes within a particular industry or product market, corporate strategy defines the scope of the firm in terms of the industries and markets in which it competes.

MGMT 602E Organizational Change & Development (1.5 Credit Hours)
Explores the complexity and dynamics of change in organizations. Topics covered include organization development, managing resistance, and change leadership.
Course equivalencies: MGMT 602E/MGMT 472M

MGMT 605E Conflict Management & Negotiation (1.5 Credit Hours)
Students participate in hands-on exercises designed to increase their knowledge of conflict resolution and negotiation techniques.
Course equivalencies: MGMT 605E/HRER 511E

MGMT 606E International Immersion (3 Credit Hours)
Students take an international trip to two countries to gain a better understanding of the opportunities and challenges and opportunities related to international business endeavors.

MGMT 607E Entrepreneurship (1.5 Credit Hours)
Introduces the tools necessary for an individual to determine a relevant business concept and prepare a business concept for the marketplace.
Course equivalencies: MGMT 607E/MGMT 481E

MGMT 610E Capstone (1.5 Credit Hours)
Enrollment limited to students in MBA for Executives program.
This course brings together all of the learning from the program as it concludes. Students prepare and present a complete business plan for the concept they developed in the Entrepreneurship course (MGMT 607E).
Course equivalencies: MGMT610E/MGMT430E

Marketing (MARK)

Discover, search, courses (p. 2661)!

MARK 201 Principles of Marketing (3 Credit Hours)
Pre-requisites: Sophomore standing or first-year students with a declared Marketing BBA
This course develops an understanding of the marketing systems by which organizations plan, price, promote, and distribute products and services to selected target markets.
Course equivalencies: MARK201/201H/301/CPST340
Outcomes:
Students analyze market conditions and apply the basic tools to develop marketing strategies to successfully meet the customers' needs resulting in a viable, profitable organization

MARK 201H Principles of Marketing - Honors (3 Credit Hours)
Pre-requisites: Sophomore standing or above; Restricted to SBA honors students
This course develops an understanding of the marketing systems by which organizations plan, price, promote and distribute products and services to selected target markets.
Course equivalencies: MARK201/201H/301/CPST340
Outcomes:
Students analyze market conditions and apply the basic tools to develop marketing strategies to successfully meet the customers' needs resulting in a viable, profitable organization

MARK 310 Consumer Behavior (3 Credit Hours)
Pre-requisites: Sophomore standing; minimum grade of "C-" in MARK 201
This course develops an understanding of how consumers behave before, during, and after the consumption process through a discussion of cultural, social, and perceptual factors.
Outcomes:
Students evaluate consumer behavior and apply their understanding in the creation of a marketing plan designed to improve the brand equity of a firm

MARK 311 Marketing Research (3 Credit Hours)
Pre-requisites: Junior standing, minimum grade of "C-" in MARK 310 and (ISSCM 241 or ISSCM 241H or STAT 103)
This course develops an understanding of the research process from problem formulation through research report preparation. Both qualitative and quantitative research methodologies are discussed. The focus is on using research results in marketing decision making. Empirical data are analyzed using state of the art analytical tools.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students identify managerial problems, research objectives, design data collection instruments, and sampling procedures; Data collection and analysis is discussed; Cases, exercises and/or a written research proposal or report is a primary outcome of the course

MARK 312 Gender and Marketing (3 Credit Hours)
Pre-requisites: Sophomore standing; minimum grade of "C-" in MARK 201
How do the 4Ps of Marketing - product, price, place, and promotion - influence gender, and how does gender influence the 4Ps? Students will learn how to address the relationship between Gender and Marketing. Example topics may include, but are not limited to: Masculinity, Media, and Marketing; Women, Media, and Marketing; and Millennials, Gender, and Marketing.
Outcomes:
Understand how marketing strategy reflects and shapes socio-cultural norms so that you can build strategies that reflect and shape those norms; Learn how research on social trends is conducted and how it is used in strategy, so that you can perform such research in marketing contexts

MARK 320 Marketing for Environmental Sustainability (3 Credit Hours)
Pre-requisites: Sophomore Standing; minimum grade of "C-" in MARK 201
The course shows students how to use marketing to address the complexities of sustainability including: climate change, poverty, food shortages, oil depletion, and species extinction. Design-for-environment, full-cost pricing, greening the channels of distribution, and life-cycle impact are some of the concepts covered in this course.
Outcomes:
Provide students with the knowledge and skills needed to develop marketing products that contribute to environmental sustainability

MARK 321 Ignatian Design Thinking (3 Credit Hours)
Pre-requisites: Minimum grade of C- in MARK 201 and Junior standing
This course will provide an in-depth look into the role design thinking plays in our Ignatian tradition for servant leadership. Through human-centered design practices, we will explore our Ignatian imagination to seek and solve for our world's grandest challenges.
This course satisfies the Engaged Learning requirement.
Outcomes:
An understanding in the scope and application of human-centered design as a Mindset and a Method

MARK 323 Personal Selling (3 Credit Hours)
Pre-requisites: Sophomore standing; minimum grade of "C-" in MARK 201
This course develops an understanding of the role of personal selling and sales force management, which are extremely critical in business-to-business marketing strategies, and the ethical and legal responsibilities of sales managers.
Outcomes:
Students develop skills in sales force organization and sales techniques as well as in the recruiting, selecting, training, motivating, compensating, and evaluating sales people

MARK 334 Services Marketing (3 Credit Hours)
Pre-requisites: Sophomore Standing; minimum grade of "C-" in MARK 201
Service organizations (eg banks, transportation companies, hotels, hospitals, educational institutions, and professional services) require a distinctive approach to marketing strategy in both development and execution. Also, the course focuses on the role of service in manufacturing businesses. The course will cover why people are essential to service success. Differentiate between product and service characteristics; understand, analyze, develop, modify employee behavior in a service environment, identify critical issues to service design, understand importance of facility location.
Outcomes:
Identify the differences between marketing in service versus manufacturing organizations and understand how "service" can be a competitive advantage in manufacturing organizations; Understand the unique challenges involved in marketing and managing services

MARK 360 Retailing Management (3 Credit Hours)
Pre-requisites: Sophomore standing; minimum grade of "C-" in MARK 201
This course develops an understanding of retailing and the role that retailing plays in the marketing system and in marketing strategies.
Outcomes:
Students analyze and develop retail strategies that fit and support overall marketing strategies

MARK 363 International Marketing (3 Credit Hours)
Pre-requisites: Sophomore standing; minimum grade of "C-" in MARK 201
This course develops an understanding of how marketing strategies are developed in the global environment.
Interdisciplinary Option: Global Studies, International Business
Outcomes:
Students evaluate cultural, governmental, economic, and competitive conditions to illustrate how these factors impact an organization's marketing strategy; Attention is paid to the positive and negative consequences of globalization

MARK 367 Multicultural Marketing (3 Credit Hours)
Pre-requisites: Sophomore Standing; minimum grade of "C-" in MARK 201
In this course, we address (1) past and current knowledge on multicultural marketing, (2) important challenges with respect to marketplace diversity and inclusion, and (3) what approaches can be used to construct better marketing plans and tactics.
Outcomes:
Students should have a working knowledge of the principal theories and research findings in multicultural marketing and should be able to integrate and apply this knowledge with respect to effective strategies for marketplace diversity and inclusion

MARK 370 Political Marketing (3 Credit Hours)
Pre-requisites: Junior standing, minimum grade of "C-" in MARK 201
No course description is available

MARK 373 Integrated Marketing Communications (3 Credit Hours)
Pre-requisites: Sophomore standing; minimum grade of "C-" in MARK 201
This course develops an understanding of advertising strategy and advertising campaigns, including the external environment, how agencies are structured, and how consumer metrics are integrated.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students develop skills in managing the integration of media, strategy, and creative design in developing sound advertising campaigns

MARK 380 Digital Marketing (3 Credit Hours)
Pre-requisites: Sophomore standing; minimum grade of "C-" in MARK 201
Emphasis is on strategies and tactics for creating, retaining, and enhancing customer relationships via the internet, including social media, and on integrating the digital environment into the marketing mix. In addition to learning fundamental principles of the digital channel, students will apply the learned principles of the digital channel in a class project. Readings, lectures, and industry professionals may be used to provide insights and relevance to this area of marketing.
Outcomes:
Students will be able to analyze and assess online marketing platforms and develop an integrated digital marketing plan

MARK 390 Marketing Strategies (3 Credit Hours)
Pre-requisites: Senior standing, minimum grade of "C-" in MARK 310, (FINC 301 or FINC 334 or FINC 334H), (SCMG 332 or SCMG 332H or SCMG 232 or SCMG 232H), and prior or concurrent enrollment in MARK 311
This capstone course develops an understanding of all marketing decisions involved in planning marketing strategies.
Course equivalencies: MARK390 / MARK324
Outcomes:
Students develop a comprehensive marketing plan by applying skills in financial analysis, competitive scanning, and appropriate marketing strategies

MARK 395 Independent Study (1-3 Credit Hours)
Pre-requisites: Junior standing; Instructor and Dean permission
Independent Study is an in-depth research or reading, initiated by the student and jointly developed with a faculty member, into a specialized area of marketing not otherwise covered by the department course offerings.
Outcomes:
Varies with topic

MARK 399 Special Topics in Marketing (1-3 Credit Hours)
Pre-requisites: Junior standing
Special Topics are scheduled classes offered on an ad hoc basis. Specific titles and content will vary.
Outcomes:
Varies with topic

MARK 425N Business Communication (1.5 Credit Hours)
Effective communication skills are important because they give leaders and followers the ability to transmit and receive information with a high probability that the intended message is passed from sender to receiver. Good leaders communicate ideas, articulate arguments, advocate positions, solicit ideas from others, and persuade others. Restricted to School of Business graduate students.
Outcomes:
1) Learn to communicate effectively in an oral presentation; 2) Develop specific skills to enhance effective professional interpersonal communication as well as written and oral communication

MARK 460 Marketing Management (3 Credit Hours)
This course develops a broad understanding of the marketing principles that undergird successful marketing strategies and marketing plans with special attention given to international and ethical considerations.
Outcomes:
Students use and apply marketing principles, strategic research, consumer analysis and target marketing to either a project or to case studies

MARK 460B Marketing Management (3 Credit Hours)
This course develops a broad understanding of the marketing principles that undergird successful marketing strategies and marketing plans with special attention given to international and ethical considerations.
Outcomes:
Students use and apply marketing principles, strategic research, consumer analysis and target marketing to either a project or to case studies

MARK 460E Marketing Management (3 Credit Hours)
Pre-requisites: Restricted to students in the Executive MBA Program
Introduces use of strategic research, customer analysis, target market, and the application of marketing tools to a variety of case problems. Emphasis is placed on product planning, pricing policies, promotional methods, and distribution channels. Considers cultural, governmental, economic, business, and environmental factors affecting the marketing of goods and services globally.
Course equivalencies: MARK600E/MARK460E

MARK 461 Research Methods in Marketing (3 Credit Hours)
Pre-requisites: MARK 460
This course develops an understanding of the marketing research process and the role of survey research in it.
Outcomes:
Students formulate research problems and a design research study, including the development of a questionnaire, selection of an appropriate sample and data analysis

MARK 463 Sales and Strategic Leadership (3 Credit Hours)
Pre-requisites: MARK 460
This course develops an understanding of the tools and techniques required for developing a sales force and for managing revenue generation within organizations.
Outcomes:
Students apply processes for hiring and managing sales professionals; tools for successful account management; and skills in solving revenue generation problems facing profit and non-profit organizations

MARK 464 Integrated Marketing Communication (3 Credit Hours)
Pre-requisites: MARK 460; MARK 467 is recommended
This course develops an understanding of how advertising, sales promotion, public relations, personal selling and in same cases packaging decisions form a coordinated marketing communications plan.
Outcomes:
Students apply the elements of integrated marketing communications and develop a coordinated Marketing Communications plan for a project or case study

MARK 465 International Marketing (3 Credit Hours)
Pre-requisites: MARK 460 or by Department Consent
This course develops an understanding of marketing problems in an international context with particular attention given to how international factors impact consumers, competition, and marketing strategies. Students analyze cases and identify optimal solutions to international marketing problems.
Outcomes:
Students apply the principles of marketing to solve marketing problems in an international context

MARK 467 Consumer Behavior (3 Credit Hours)
Pre-requisites: MARK 460
This course develops an understanding of how consumers behave before, during, and after the consumption process by exploring both the micro-level mental processes that impact consumer decision-making as well as the macro- level cultural and social influences on consumer behavior.
Outcomes:
Students apply course concepts and theories to develop a consumer analysis and marketing strategies for a firm or non-profit organization

MARK 468 Digital Marketing (3 Credit Hours)
Pre-requisites: MARK 460 or by Department Consent
This course develops an understanding of the Internet as part of an overall marketing strategy by considering the ways in which the Internet has changed marketing and business. The course covers topics such as online consumer behavior, web analytics, online advertising, email, social media, mobile, and search engine marketing (paid and organic). In addition to learning fundamental principles of digital channels, students will apply the learned principles in a class project; example projects include creating a paid search campaign for a client, running a digital marketing simulation, writing a digital marketing plan, or conducting a social media audit.
Outcomes:
Students develop the power to act effectively by using technology in increasingly complex buying environments

MARK 469 Independent Study-Marketing Management (3 Credit Hours)
Pre-requisites: MARK 460
Independent study is in-depth research or reading, initiated by the student and jointly developed with a faculty member, into a specialized area not otherwise covered by department course offerings. Variable credit. Permission of area coordinator required. Special Topics are scheduled classes; specific titles and content will vary.
Outcomes:
Varies with course of study selected

MARK 470N Research, Insights and Storytelling (3 Credit Hours)
Pre-requisites: MARK 460 or equivalent
Students will learn to monitor trends and shifts in the socio-cultural landscape, identify relevant market information, gather consumer research and translate into actionable strategies through storytelling. Enrollment limited to MBA Students. Collect, analyze & glean insights from data; Apply & translate insights into compelling stories for actionable business outcomes & social impact.
Outcomes:
Understand research process & approaches

MARK 472E Market Opportunity Analysis (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Enables students to discover market opportunities and business relationships that are critical to sustainable business growth. Course will challenge students to move away from "copy cat" business ideas to innovative business solutions.
Course equivalencies: MARK 604E/MARK472E

MARK 561 Comparative Consumer Behavior (3 Credit Hours)
This course develops an understanding of the marketing implications of cultural differences and similarities between the people of two or more nations and considers two opposing views of marketing scholars as to whether the similarities or the differences are the more important factor.
Outcomes:
Students apply methods of cross-cultural analysis as well as examine frameworks for assessing multinational strategies

MARK 562 Database Marketing Strategy (3 Credit Hours)
Pre-requisites: MARK 460
This course develops an understanding of the development and use of databases for marketing, retrieval of appropriate data and analysis of that data to increase marketing effectiveness.
Outcomes:
The student will perform database manipulation and analysis of data; Analysis includes at least univariate analysis, cross-tabulation, creation of new variables, regression analysis and recency-frequency-monetary analysis

MARK 564 Brand Equity and Marketing Strategy (3 Credit Hours)
Pre-requisites: MARK 460 or by Departmental Consent
This course develops an understanding of the way firms may increase their share of market and profits by creating, building, and managing strong, unique, and favorable brand equity for their products and services.
Outcomes:
Students develop a Brand Plan, evaluating the contributions of traditional brand elements, and develop a framework for creating the marketing strategies required for successfully building and managing brand equity

MARK 566 Integrated Media Planning (3 Credit Hours)
The course provides an overall understanding of media planning: basic media concepts, buying and selling of media, development and evaluating effective media strategies and plans, and the role that media plays in an integrated marketing and communications plan. The course is recommended for students with little or no media planning experience.

MARK 567 Customer Relationship Management (3 Credit Hours)
Pre-requisites: MARK 460; MARK 468 is recommended
This course develops an understanding of CRM as a business philosophy that involves acquiring new customers as well as maintaining long-term and profitable relationships with existing customers. Key concepts such as customer experience, customer satisfaction, loyalty, customer lifetime value, among others, will be explored.
Outcomes:
Students conduct an analysis and critique of a firm's CRM strategy and provide recommendations for improving the customer-firm/customer-brand relationship

MARK 568 Social Media & Content Marketing (3 Credit Hours)
Pre-requisites: MARK 460
This course examines the connection between social media and content marketing for the purposes of branding, acquisitions, customer retention, employee recruitment, and other important organizational initiatives. Assess, implement, and leverage tools to build community and attract customers. Prove the ROI of any social media or content marketing effort.
Outcomes:
Develop social media and content marketing strategies that drive value

MARK 569 Special Topics (3 Credit Hours)
Pre-requisites: MARK 460
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

MARK 660 Digital Marketing Analytics (3 Credit Hours)
Pre-requisites: MARK 460 or equivalent
Restricted to Graduate Business students. This course is centered around decision-making based on data gathered from users' interactions with digital channels such as websites, online search (organic and paid), display media, social media, email, and mobile. Students will learn how to define objectives, collect, and analyze data, and recommend useful insights for more effective marketing strategies.
Outcomes:
Students will be able to understand how consumers interact with brands across owned, paid, and earned media; Students will be able to apply the digital marketing analytics process into various decision-making situations\\n; Students will be equipped to establish business measurement models and identify KPIs for various digital media; Students will have the ability to analyze the digital marketing strategies adopted by a firm and recommend data-driven decisions; Students will be able to evaluate the effectiveness of different digital media channels

MARK 661 Customer Analytics (3 Credit Hours)
Pre-requisites: MARK 460 or equivalent and (ISSCM 402N or ISSCM 491); Restricted to Graduate Business students
In this course students will study how to use data analytics to learn about customer needs and improve targeting individual consumers. The course will encourage students to apply scientific methods and models to predict and respond to customer choices. This is the key part of learning Big Data. The term Big Data is viewed in the broad sense as it relates to various aspects of the consumer behavior, which may be captured, measured, and transformed to the digital form.
Outcomes:
Through applications of statistical models to the analysis of the real-world databases, the students will learn how firms may use customer data to serve customers better

MARK 662 Marketing Metrics (3 Credit Hours)
Pre-requisites: MARK 460 or equivalent and (ISSCM 402N or ISSCM 491); Restricted to Graduate Business students
This course is designed with marketing managers in mind. As profession marketing is evolving, it is no longer based primarily on the conceptual content. Marketers get exposed to thousand times the volume of data she(he) saw five years ago. More data cannot lead to better decision making unless managers learn how to use that data in meaningful ways. In this course, students will be introduced to the analytical decision models that assist modern managers in making marketing decisions related to targeting, product design, communications, and more.
Outcomes:
Learn analytical techniques and decision models for enhancing marketing decision making in the modern organizations; Improve skills to viewing marketing processes and relationships systematically and analytically; Learn power of decision models applied in the real managerial contexts; Provide students with toolkit that may be used to assess, and measure return on marketing investments in organizations

Master of Public Health (MPBH)

Discover, search, courses (p. 2661)!

MPBH 400 Determinants of Population Health (3 Credit Hours)
This course will introduce students to the public health perspective population perspective. A major focus of the course is understanding the fundamentals of health disparities and how they are produced and reproduced, and how simple solutions to our most pressing public health problems are unlikely to succeed. Graduate standing in the MPH or Public Health Certificate Program, or permission of instructor.

MPBH 401 Environmental Health (3 Credit Hours)
This course is designed as an introduction to environmental public health issues, laws, regulations, research, and advocacy. Environmental factors including biological, physical and chemical factors that affect the health of a community will be presented. The environmental media (air, water and land) and various community exposure concerns will also be presented. The course will utilize available internet resources to access environmental data, and focus related research. A team project will be completed requiring literature review and presentation and critical assessment of a successful (or unsuccessful) environmental advocacy campaign.
Course equivalencies: X-ENVS301/PUBH301/MBPH401

MPBH 402 Public Health Practice and Management (3 Credit Hours)
This course will provide an introduction to public health practices and cover management basics as applied to the public health field. The topics covered in the course will be examined through the lenses of prevention, social justice and the role of governmental public health. In Part I of the course, we will study basic public health concepts, core public health functions and practices, public health infrastructure at the local, state and federal levels, and the major areas of public health services and interventions. In Part II, we will cover management principles and functions such as planning, organizing, controlling and leading. We will apply these concepts to the administration of public health organizations.
Outcomes:
Assess population needs, assets and capacities that affect communities' health; Apply awareness of cultural values and practices to the design or implementation of public health policies or programs; Design a population-based policy, program, project or intervention; Explain basic principles and tools of budget and resource management; Apply principles of leadership, governance and management, which include creating a vision, empowering others, fostering collaboration and guiding decision making

MPBH 403 Introduction to Epidemiology (3 Credit Hours)
Epidemiology is the study of the distribution and determinants of disease in populations and remains the basic science of public health. This methodology is unique to epidemiology, and in some cases, has even been appropriated by other fields. The objective of this course is to familiarize students with the range of tools used to conduct epidemiologic analysis, including design and measures of association. This course will be taught as an online course combined with an intensive interactive session with faculty and students one weekend in Spring.
Course equivalencies: X- PUBH 303/ENVS 303/MPBH 403

MPBH 404 Biostatistics for Health and Biological Science (3 Credit Hours)
Introductory course allows students to utilize SAS software to perform analytical methods including Graphical and Numerical Descriptive Statistics, Probability calculations and distributions with emphasis on the binomial(discrete) and normal (continuous) distributions, Inferential Statistics: Point Estimation, Interval Estimation and Hypothesis Testing, Nonparametric statistical methods and Sample Size Calculation.
Course equivalencies: CRME420/BMSC402/MPBH404

MPBH 407 Public Health Policy: Concepts and Practice (3 Credit Hours)
Pre-requisites: Open for registration for MPH students; All other students require department approval
No course description is available
Course equivalencies: PUBH 307/MPBH 407

MPBH 409 Biostatistics I (3 Credit Hours)
Pre-requisites: Introductory course
Introductory biostatistics course which allows students to utilize STATA software and perform/ operate analytic methods. Course provides outline of tests of statistical significance and probability theory. Students will conduct statistical hypothesis testing using methods presented in class.

MPBH 410 MPH Practicum (1-3 Credit Hours)
All MPH students are required to complete at least 1 credit of a practicum (internship) to gain a better understanding of a public health practice, directly utilize their own MPH training, and network with public health professionals in the field. Students need to provide a signed agreement and must be in the process of completing 21 credit hours, including at least four core courses.

MPBH 411 MPH Capstone (1-3 Credit Hours)
The goal of the Capstone project is to provide students the opportunity to demonstrate knowledge and skills acquired in the academic coursework and through practicum experience. The objective is to enable the student to work on a project which translates both general and discipline specific information into public health practice. Students should complete the core, program specific courses. We recommend to split credits over last two semesters and register 1 credit each semester.
Outcomes:
The Capstone will provide the students an opportunity to exhibit their proficiency in public health skills through a written report and oral presentation

MPBH 412 Intro to Statistical Computing for Public Health (1-3 Credit Hours)
Pre-requisites: This course is designed for students who have taken or are taking Introduction to Epidemiology (MPBH 403) and Biostatistics I (MPBH 404 or 409)
This course introduces students to statistical computing. The emphasis is on manipulating data sets and basic statistical procedures such as t-tests, chi-square tests, and correlations. The course currently focuses on the use of SAS and STATA software packages., data importation from various sources, cleaning, validation, subsetting, merging, and transforming datasets); Construct clear and concise documentation of newly created datasets; Use SAS data-step programming, macros, and built-in procedures for statistical analysis and visualization (i.e., PROC MEANS, FREQ, SGPLOT, and UNIVARIATE); Demonstrate the ability to use descriptive techniques to summarize public health data (i.e., t-tests, chi-square tests, and basic regression models); Describe the results of basic statistical analyses.
Outcomes:
Execute data management techniques to create public health analytical datasets (i.e

MPBH 414 Introduction to Global Health (3 Credit Hours)
This course is is an introduction to global health at the graduate level to provide the student with an understanding of health surveillance systems, and determinants, consequences and trends of disease in low- and middle-income countries, with some reference to high-income countries and regions. Both infectious and non-communicable diseases will be addressed, as will reproductive and women's health, nutrition, immigration health and environmental health. The format of the course will be both didactic, with some asynchronous lectures online, and student-led discussion and teamwork in the classroom.
Outcomes:
Synthesize the most commonly used global health metrics, intervention frameworks, and monitoring and evaluation strategies in the creation of a global health program plan; Summarize reasons for health inequities and disparities which exist in low- and middle-income countries, as well as higher-income countries; Examine specific risk factors for poor outcomes in common global health issues; Illustrate the concept of global health security and its impact on disease outbreaks; Evaluate case studies of existing global health interventions and policies; Compare and contrast existing global health funding and implementation systems, such as bilateral aid, multilateral agencies, and public/private partnerships, including ethical concerns

MPBH 415 Non-Communicable Disease Epidemiology (3 Credit Hours)
Pre-requisites: MPBH 403 or consent of instructor
This course covers public health topics related to non-communicable diseases (NCDs). The course explores topics such as: burden of NCDs in populations; the conceptual frameworks for studying chronic disease causation and control; the epidemiology of cardiometabolic diseases as well as the epidemiologic transition in relation to risk factors for the major chronic diseases (e.g. nutrition, obesity, physical exercise, alcohol and tobacco use) as well as upstream factors impacting on diseases such as food policy and the built environment; integrated healthcare services and public health interventions; and, the study designs used to assess associations between exposures and NCDs.
Outcomes:
Apply frameworks to understand social and ecological determinants of non-communicable diseases, as well as the biological and behavioral risk factors across the life-course; Articulate the methodological issues in the study of non-communicable diseases including tools for surveillance, the limits of observational evidence, life-course epidemiology and genetic associations, assessment of risk and risk scores, burden of disease estimates; Explain the drivers of non-communicable disease epidemiology; Discuss interventions to prevent and control non-communicable diseases low-middle income countries

MPBH 416 Health Services Research Methods (3 Credit Hours)
This course introduces students to the scope of health services research by addressing issues central to understanding and applying modern research to public health and health policy. Formulate questions and develop studies using primary data collection approach that are timely and relevant to contemporary organization, financing, and delivery of U.S. public health.
Outcomes:
Determine health services research's scope

MPBH 417 Global Maternal and Child Health (3 Credit Hours)
Pre-requisites: MPBH 414 and MPBH 403
This course prepares the student to gain substantive knowledge of the key issues in global maternal and child health. With a focus on low-and-middle income countries (LMICs), the course will provide the student an opportunity to delve into critical issues faced by women and children, assess health disparities, and examine social justice issues in LMICs. In addition, the student will be expected to think critically about existing programs, research, and policy involving maternal and child health.
Outcomes:
Identify specific risk factors for poor outcomes in reproductive health; Discuss contemporary issues surrounding maternal and child health; Apply methods of program evaluation to health programming for women and children in an international setting; Analyze major causes and trends of morbidity and mortality among women and children in LMICs; Explain the social, political and economic determinants of maternal and child health and how they contribute to population health and health inequities; Explain how globalization affects global burdens of disease among women and children

MPBH 418 Global Health Experience Seminar (0 Credit Hours)
This 0-credit seminar course prepares students selected for the summer global health internship to engage ethically, professionally, and effectively in international public health settings. Through interactive sessions, students will explore foundational global health concepts, complete ethics and safety training, analyze key public health indicators for their assigned site, and reflect on the role of culture in shaping health beliefs and health systems. Emphasis will be placed on responsible global engagement, cultural humility, and comparative analysis of health systems. Successful completion of this course is required for participation in the summer field internship abroad.
Outcomes:
Analyze the health status of populations using available data for your assigned local sit; Describe how cultural context influences perceptions of health and disease in your local implementation context; Compare and contrast the local national model or health system for provision of healthcare to the US system, including their respective effects on health and healthcare expenditure; Define local, national, and international codes of ethics and how they are relevant to one's working environment

MPBH 420 Public Health Law: Theories and Cases (3 Credit Hours)
This course explores how the law can be utilized to promote, or impede, proposed public health interventions at the local, state, federal level. Students review key theories of public health law that examine the role of the legislature, executive agencies, and the courts in crafting, executing, reviewing public health policy. This course is geared towards MPH students in Public Health Policy and Management track, and no prior training in law or legal analysis is assumed.
Outcomes:
Describe the inter-dependence of law and public health; Identify areas of law applicable to promoting public health; Articulate the legal, ethical and practical conflicts that arise in approaching public health through law

MPBH 421 Biostatistics II (3 Credit Hours)
Pre-requisites: MPBH 409 Biostatistics I Students will utilize text on Biostatistics for Public Health
Course will cover linear and logistic regression and ANOVA. Students will utilize STATA software for hypothesis testing.
Outcomes:
Students will conduct statistical hypothesis testing using methods presented in class

MPBH 422 Population Health Planning & Management (3 Credit Hours)
This course prepares students to confront--thoughtfully and systematically-resource allocation decisions by developing the knowledge, tools, and skills needed to plan, implement, and evaluate programs, interventions, and services that address public health problems, improve population health, and reduce inequities.

MPBH 423 Intermediate Epidemiology (3 Credit Hours)
Pre-requisites: MPBH 403 Introduction to Epidemiology and MPBH 412 Introduction to Statistical Computing for Public Health Research
Intermediate Epidemiology focuses on analysis of observational data. Students should have completed Introduction to Epidemiology and Biostatistics I prior to enrolling in this course.

MPBH 424 Health Economics and Healthcare Financing (3 Credit Hours)
This course will examine selected topics in health economics with major implications for healthcare delivery, healthcare financing and clinical and public health research. Essential economic theories and methods for exploring each topic will be discussed along a review of existing empirical research.
Outcomes:
Describe the US health delivery and financing system; Apply essential economic theories/methods to study consumer behavior and healthcare demand, healthcare market and supply of services, and medical cost-effectiveness analysis

MPBH 425 Policy Analysis (3 Credit Hours)
This course will provide an introduction to the issues and methods of health policy analysis. Health policy analysis requires several distinct sets of skills: technical understanding of analytical tools, understanding the policy and managerial context within and outside of your organization, and the ability to produce and communicate practical advice. This is a track-specific requirement for MPH Graduates in the Health Policy track.
Outcomes:
Students will develop a good working understanding of the methods specific to these issues examined through this course and will also learn how to apply these to specific problems

MPBH 426 Infectious Disease Epidemiology (3 Credit Hours)
Pre-requisites: Introduction to Epidemiology (MPBH 403)
This course will introduce the basic methods for infectious disease epidemiology and review case studies of important disease syndromes and entities. Important terminology and definitions for infectious disease epidemiology will be reviewed, including nomenclature related to outbreak investigations, disease surveillance, laboratory diagnosis, molecular epidemiology, disease transmission and susceptibility.

MPBH 427 Advanced Statistical Methods (1-3 Credit Hours)
Co-requisites: MPBH 421 (or prior completion of a two-semester course sequence in Biostatistics) and one course in statistical computing such as MPBH 412
This course covers a broad overview of statistical models and estimation methods for outcome variables (normal and non-normal) that are clustered or measured repeatedly in time or space. The focus is on applications and computer software methods for correlated regression models, including ANOVA based methods, hierarchical linear models, etc.
Outcomes:
Apply generalized linear models to regress a set of explanatory variables against non-normally distributed outcomes, including binary outcomes (logistic regression), multinomial outcomes (ordinal and multinomial logistic regression), and count outcomes (Poisson and negative-binomial regression); Identify and employ appropriate methods for the analysis of repeated measures, including the use of generalized estimating equations (GEE models) and/or mixed-effects models for nested and hierarchical data; Analyze data using Parametric methods for time-to-event data; Conduct Bayesian estimation for unknown parameters; Employ multivariate methods to solve real-world problems and dimensionality reduction; Use statistical programming to apply learned statistical models and estimation methods; Explain the results of statistical analyses

MPBH 430 Environmental Health Policy (3 Credit Hours)
This course provides an introduction overview of the health consequences associated with climate change and the local, federal, and global response to mitigate these negative health outcomes. During the course students will be expected incorporate course content and develop a realistic response public health plan to climate change for a locality of their choosing. This course is offered both online and in-person.
Outcomes:
1) Outline fundamental public health concerns that have been associated with climate change; 2) Identify and critique future steps forward to reduce public health concerns of climate change

MPBH 431 Grant Writing (3 Credit Hours)
This course will provide an overview of the NIH extramural funding process, with additional information on funding opportunities outside NIH. Students will learn the key components of successful grants and factors that may lead to grants not being reviewed favorably. The focus will be on grant writing skills.
Outcomes:
Students will be required to write a 10-12 page R01-style grant proposal (application), as described in the NIH guidelines

MPBH 432 Health Impact Assessment (3 Credit Hours)
This course is an introduction to health impact assessment which is a decision-support tool that uses a combination of procedures, methods, and approaches to determine how a policy, project/program may affect the health of a community, and the distribution of those effects within the population of the community.

MPBH 433 Clinical Trials (3 Credit Hours)
Clinical Trials course is designed for students interested in the design, implementation and management of clinical trials and their ethical and clinical implications. Topics include trial design, randomization, recruitment and sample size, monitoring and analysis. Students should have completed Introduction to Epidemiology and Biostatistics I prior to enrolling in this course.

MPBH 434 Systematic Review and Meta-Analysis (3 Credit Hours)
Meta analysis course provides instruction on methods for synthesizing clinical research information and how to assess the strength of the evidence for policy development and clinic contexts. The course is designed to highlight rigorous systematic review methods while students complete a systematic review on a topic of their choice. Students should have completed Introduction to Epidemiology and Biostatistics I prior to enrolling in this course.

MPBH 449 Biostatistics for Public Health Interventions (3 Credit Hours)
This course targets the application of sophisticated statistical methodologies to enhance the efficacy and precision of public health interventions. At the heart of this course is a rigorous examination of strategies for reducing bias in observational studies through advanced techniques such as imputation for missing data and propensity scores. The curriculum is expanded to include psychometric analysis, providing essential tools for the evaluation of measurement instruments, and ecological analysis, which aids in the interpretation of population-level health outcomes. A significant addition to this course is the analysis of screening and diagnostic tests, focusing on studying measures of accuracy and agreement critical for evaluating the performance of these tests in public health. The course also explores the complexities of survey design, offering insights into managing and analyzing data from multifaceted study designs to ensure the reliability and validity of intervention assessments.
Outcomes:
Apply advanced statistical techniques including imputation for missing data, and propensity score analysis to reduce bias in observational studies; Evaluate the design of public health research studies and interventions for methodological soundness; Apply psychometric principles to evaluate the reliability and validity of measurement instruments used in public health research; Use ecological analysis to interpret population-level health outcomes, understanding the impact of environmental and social factors on public health

MPBH 450 Biostatistics for Electronic Health Record (EHR) Data (3 Credit Hours)
Pre-requisites: Students must have completed MPBH 449
This course delves into the analysis and interpretation of data from Electronic Health Records (EHRs), a cornerstone of clinical, epidemiologic, and translational research. Emphasizing a hands-on approach, it covers EHR system fundamentals, data extraction and cleaning, privacy standards, case identification, study design, and advanced statistical analysis. Students will learn to navigate EHR data structures, medical vocabularies, and relational databases, applying these skills to design research studies and create patient cohorts. The goal is to equip students with the ability to harness EHR data for innovative healthcare solutions., ICD, CPT, NDC, SNOMED, and LOINC codes) for accurate case identification; Develop skills in constructing patient cohorts and extracting relevant data; Identify controls and apply propensity score matching in observational research; Design robust matched case-control and retrospective cohort studies using EHR data; Recognize privacy and security standards, including HIPAA regulations; Apply advanced statistical methods to analyze EHR data and assess research findings critically.
Outcomes:
Explain relational database and data warehouse models pertinent to EHR data; Use medical vocabularies and ontologies (i.e

MPBH 460 Public Health Data Visualization and Reporting (3 Credit Hours)
Pre-requisites: Students must have completed MPBH 421 (Biostatistics II) or equivalent experience in biostatistical methods and public health principles
This course is designed to navigate the intersection of public health data, visual communication, and ethical representation, focusing on creating impactful visuals that cater to diverse audiences including patients, healthcare providers, policymakers, and the broader community. It emphasizes the ethical considerations in data visualization, tackling potential biases, and ensuring visuals are both informative and accessible. Through practical applications, students will learn to craft infographics, community health maps, dashboards, and effective manuscript tables, all while understanding the unique needs of different user groups. The course will explore advanced visualization techniques like heatmaps, interaction visuals, and temporal data displays, equipping students with the skills to present complex health data.
Outcomes:
Develop the ability to create impactful and ethically responsible visual representations of public health data tailored to diverse audiences, including patients, healthcare providers, policymakers, and the general public; Explore advanced data visualization techniques, including heatmaps, interactive visuals, and temporal data displays, to effectively present complex health information; Apply ethical considerations in data visualization, addressing potential biases and ensuring that visuals are accurate, accessible, and inclusive; Design visual communication strategies into public health research and reporting to enhance the impact and understanding of data-driven insights

MPBH 495 Special Topics (1-3 Credit Hours)
This course covers a specific topic in public health. Restricted to students in the Master of Public Health (MPH) program, or with permission of the instructor. Outcome: students will be able to articulate a general understanding of the selected topic.

MPBH 499 Public Health in Action (3 Credit Hours)
Public Health in Action prepares MPH students for the real world through practical hands-on learning that addresses the cross-disciplinary competencies in advocacy, leadership, budgeting, planning and implementing programs with limited resources, building a shared vision and mission, setting priorities and goals, contributing on inter-professional teams, advancing cultural diversity and inclusiveness in community health efforts, building partnerships, leading community initiatives, and communicating to media. It is intended students will take this course at the end of the MPH program. Enrollment Conditions: Graduate standing in the MPH Program and graduating in the current or following semester, or permission of instructor. Students should have completed at least 18 credit hours of coursework, including all other core courses. MD/MPH students may take this course in the spring of their first year in the program.

Master of Public Policy (MPP)

Discover, search, courses (p. 2661)!

MPP 400 Policy Design and Analysis (3 Credit Hours)
Students will learn to analyze issues to determine if there is a role for government intervention, to evaluate public policy options that could address the identified problem, and to design programs that would target the specific issues. The role of political factors in affecting these decisions is also covered.

MPP 401 Analytical Tools in Public Policy (3 Credit Hours)
This class covers diverse modeling tools in public policy, drawing from fields such as economics, geography, demography, spatial analysis, risk analysis. decision theory. The emphasis is on applied analysis to address current public policy issues.

MPP 402 Cost Benefit Analysis (3 Credit Hours)
The course cover the basics of the CBA technique with applications in several policy areas. CBA is grounded in the policy evaluation framework, including discussion of ethical issues and the use of CBA information in policy and program decisions.
Outcomes:
Ability to conduct CBA analysis, understand its use in the policy process, including ethical issues

MPP 403 Public Budget and Finance (3 Credit Hours)
This course provides students with practical knowledge about the budget process and the tools to construct and analyze a public budget. General theories of public finance and the role of the budget as a political document are covered. Assignments will provide practice in the budgeting approaches covered in the readings.

MPP 404 Public Policy Process (3 Credit Hours)
This class provides an introduction to the major theories of the public policy process. We consider issues of problem definition, social construction, agenda setting, the role of government institutions and interest groups in determining policy outcomes.
Outcomes:
Students will understand how political considerations, institutions, and rules of government affect public policy outcomes

MPP 405 Statistical Methods & Analysis for Public Policy I (3 Credit Hours)
This course is an introduction to statistical modeling, and hypothesis testing for applied problems in urban affairs and public policy. This class will provide the foundation for thinking about casual relationships, determining differences among groups, and what might account for those differences.
Outcomes:
Students will learn to conduct basis statistical analysis and write literate data analysis reports

MPP 406 Statistical Methods & Analysis Public Policy II (3 Credit Hours)
Pre-requisites: MPP 405
This class develops the multiple linear regression model and extensions of it that are commonly used in the study of public policy. We investigate the relationships between the type of data available and the quantitative models to use, including logistic analysis and use of simultaneous equations.
Outcomes:
Students will learn to use the tools necessary to understand, critique, and conduct advanced statistics

MPP 407 Local Economic Development (3 Credit Hours)
Students will learn the current theories of local economic development, including the role of infrastructure, access to markets, workforce quality (human capital), technology development, the role of universities, and the value of networks among business actors. Students will use these theories to create a metropolitan benchmarking report and strategic plan.

MPP 408 Political Feasibility Analysis (3 Credit Hours)
Pre-requisites: Graduate Students Only
Students will analyze strategies for assessing the political feasibility of enacting and implementing public policies. Crafting a message, use of media to communicate that message, identification of allies and opponents, and how to navigate legislative and bureaucratic processes will be covered.
Outcomes:
Ability to craft and implement a comprehensive political strategy to change public policy outcomes; Includes: creating messages, use of media, development of grassroots campaign, work within legislatures and government agencies

MPP 409 Education Policy and Politics (3 Credit Hours)
Pre-requisites: Graduate Students Only
This seminar focuses on K-12 policy in the U.S. using a policy analysis framework. We evaluate alternative policy proposals related to different theories of equality and school quality. We examine market-driven, standards-based, human capital, fiscal, and community-based models of reform. The course concludes by examining the political context for reform.
Outcomes:
Develop analytical ability to identify the contemporary problems with education, what causes them, and what policy reforms could be used to address those problems

MPP 410 Special Topics in Public Policy (3 Credit Hours)
This seminar course will cover specialized topics in public policy in greater detail.
Outcomes:
Students will learn about current issues related to the topic, relevant theoretical approaches, and application of theories to the specific issue in order to develop policy solutions

MPP 411 Environmental Governance (3 Credit Hours)
Environmental governance examines the institutions used to manage the environment and natural resources. The class pulls from political, economic, sociological and ecological frameworks to develop an interdisciplinary examination of the management of resources, both in the US and abroad.

MPP 412 Urban Politics and Policy (3 Credit Hours)
The course examines sources of power in the city and their impact on city policies, including the role of economic power, federalism, government structures, neighborhood groups, and voting. The focus is on any systematic bias in city policies and how likely that the bias could be overcome.
Outcomes:
Understand the major theories of urban politics and use them to analyze potential policy outcomes in cities

MPP 413 Intergovernmental Relations (3 Credit Hours)
This class looks at what determines the allocation of responsibility and power across U.S. levels of government, how do the different levels interact with each other, and how does this system affect why some policy problems appear to receive a lot of attention and others do not. Department consent required.
Outcomes:
Understand how principles of federalism shape policy subsystems, which then affects who addresses policy problems and how outcomes are shaped by the various governments

MPP 414 Affordable Housing Finance and Policy (3 Credit Hours)
This course focuses on how affordable housing programs work - the policy side, the development side, the investment side, and the legal side. This requires an understanding of the legal principles underlying real estate finance, the principles of investment, impact of tax laws, and demographic and economic factors that affect the supply and demand for housing. Department Consent Required.
Outcomes:
Gain knowledge of affordable housing criteria, needs assessments, financial and investment factors that affect supply, structure of common affordable housing policies

MPP 461 Education Law & Policy (3 Credit Hours)
This seminar explores legal, political and practical issues confronting American education. The course begins with analysis of fundamental political and philosophical principles underlying the educational system. Students then apply these principles to areas of education law - such as school finance, governance, the balance between federal and state roles in curriculum. Department consent required for enrollment.
Course equivalencies: MPP 461/LAW 461
Outcomes:
Students will be able to: understand fundamental legal doctrines governing US education law, research legal and political issues in education policy; analyze education problems and develop policy options

MPP 499 Directed Readings (3 Credit Hours)
An independent study course provides the opportunity for a student to develop knowledge regarding a particular topic of interest, beyond that available in traditional courses. The student will develop a contract with the faculty member who supervises the independent study to specify the topics covered, the tasks to be performed, and the grading criteria. Students are expected to participate in development of a reading list. Regular meetings of the student and the faculty supervisor will occur throughout the semester.

MPP 500 Public Policy Evaluation (3 Credit Hours)
Pre-requisites: PLSC 476 or SOCL 414
This class covers basic methods of evaluating the impact of public policies. We will read examples of each type of evaluation and discuss the difficulties each case illustrates in doing applied research - including statistical problems, ethical issues, and the potential impact of the evaluation on policy change.

MPP 501 Public Policy Internship (3 Credit Hours)
Enrollment is restricted to students in MUAPP program. Students will work with an organization in the public sector (typically nonprofit or government) to apply concepts and skills from the first-year MUAPP curriculum. They will develop a portfolio of work products to demonstrate their competencies and interests to future employers. Students will gain relevant work experience; apply concepts and skills developed in other courses in the MUAPP curriculum; create a portfolio of work products to demonstrate abilities to future employers.

MPP 502 Professional Development Skills (1 Credit Hour)
Requirement for MPP graduate students. The class develops professional skills for students to identify and pursue internship and career options. Policy practitioners discuss their experiences, illustrating different work in the policy field. Job search strategies, resume writing, and informational interviews are covered.

MPP 503 Public Policy Practicum (3 Credit Hours)
Enrollment is restricted to students in MUAPP program. This is a capstone course for the masters degree in public policy or urban affairs. The goal is to gain experience working as a team conducting a policy analysis or program evaluation project. Faculty will determine the topic for the course, often based on a real world client's interests.
Outcomes:
Students apply concepts and skills developed in the MUAPP curriculum to a real world problem; work with a client and stakeholders; create a research report appropriate to an applied environment

MPP 606 Childlaw Legislation and Policy Clinic (3 Credit Hours)
Permission of instructor is required prior to registration. Students work on a legislative project under faculty supervision that involves: developing an advocacy and coalition building strategy, drafting bills, developing fact sheets and summaries for pending legislative in Springfield, visiting the state legislature to observe and participate in the process of policy advocacy regarding a child or family law issue.
Outcomes:
Develop skills necessary in policy advocacy: critiquing legislation, assessing a legislative problem, researching the problem, proposing solutions, and drafting materials and presenting information orally

Maternal/Child Nursing (MCN)

Discover, search, courses (p. 2661)!

MCN 273 Family Health Patterns I (3 Credit Hours)
Pre-requisites: Must have taken and passed MSN 277, GNUR 294 with a C- or better; Must have taken and passed MSN 277L with a P; Must also enroll in MCN 273L
This course allows students to apply concepts from systems theory and the levels of prevention models to structure the presentation of selected concepts related to health promotion and health maintenance of childbearing and parenting families.
Outcomes:
The student will be able to use critical thinking to apply knowledge from nursing and other disciplines in the care of childbearing and parenting families

MCN 273L Family Health Patterns I: Lab (3 Credit Hours)
Co-requisites: Must enroll on MCN 273
No course description is available

MCN 374 Family Health Patterns II: Care of the Child and Family (3 Credit Hours)
Pre-requisites: Must have taken and passed MSN 277 and 277L, GNUR 294 with a C- or better; Must also enroll in MCN 374L
This course uses the Health People 2010 initiative to structure the presentation of selected concepts related to the health promotion, health maintenance and health restoration of infants, children, adolescents and their families.
Outcomes:
Students will be able to use critical thinking to apply knowledge from nursing and other disciplines in the care of infants, children, adolescents and their families

MCN 374L Family Health Patterns II: Lab (3 Credit Hours)
Co-requisites: Must also enroll in MCN 374
No course description is available

MCN 401 Child/Family Health (3 Credit Hours)
Pre-requisites: B- or higher in GNUR 413, GNUR 425, and GNUR 442
MCN 401 is designed to prepare the Nurse Practitioner to assume responsibility for the coordination and management of health care for children, birth through adolescence. A developmental perspective is used to address the primary health care needs of the childrearing family with an emphasis on meeting the psychosocial and developmental needs of children and families. A major focus of the course is to prepare the student to assess, diagnose and manage selected common health problems of the pediatric population in primary care settings. Indications for collaboration, consultation, and/or referral to other members of the health care team are emphasized as an integral part of the nurse practitioner's role. The accompanying practicum offers the student an opportunity to exercise critical clinical judgment and implement theoretical knowledge in the management of the pediatric population, both in health and when experiencing common health problems.

MCN 414 Childbearing/Family (3 Credit Hours)
Pre-requisites: GNUR 413, GNUR 425 & GNUR 442 (minimum grade of B-)
This course will prepare the advanced practice nurse to manage the health care of essentially normal childbearing women during the prenatal and postpartum periods. Theories and knowledge from biological, behavioral, social and nursing sciences will be applied in the provision of care for childbearing women and families. Emphasis is on the concept of wellness during pregnancy, recognition of high-risk conditions requiring referral or collaborative practice, and the importance of support from family and community networks.

MCN 420 APN Practicum: Child/Family Health (1-3 Credit Hours)
Pre-requisites: GNUR 413, GNUR 425, and GNUR 442 (minimum grade of B-)
Co-requisites: MCN 401 (as prerequisite, minimum grade of B-)
This practicum course guides the student toward a synthesis of content from nursing and related sciences and the application of this knowledge to the advanced practice role of Nurse Practitioner in primary care. During each practicum, the student will care for patients progressing in complexity from health promotion and disease prevention to assessment and management of the most common acute, chronic, and complex health problems. The student's level of performance is expected to progress throughout the clinical practicum from requiring assistance to becoming primarily independent. Pre or
Course equivalencies: MCN 420 / MCN 406

MCN 430 Reproductive Health and Nursing Care of the Childbearing Family (3 Credit Hours)
This course examines the reproductive health and nursing care of people with gender-related needs across the lifespan, including perinatal families from preconception through the postpartum period, including care of the newborn. Emphasis is on the concept of wellness during the preconception, pregnancy, and postpartum periods with recognition of high-risk conditions, and the importance of support from family and community networks. The course is designed to foster an understanding of reproductive justice and the impact of social determinants on family health. Upon completing the course, learners will be able to provide evidence-based, and equitable care for birthing individuals and their families.
Outcomes:
Synthesize physiologic, developmental, and psychosocial knowledge to analyze the adaptations of the perinatal person; Evaluate how social, structural, environmental, and policy determinants of health influence reproductive and family outcomes; Appraise and apply evidence-based interventions to promote wellness, prevent complications, and manage high-risk reproductive and perinatal conditions; Integrate leadership and communication competencies to coordinate interprofessional, person-centered, and family-inclusive reproductive care across the lifespan; Integrate principles of reproductive justice and ethics to advocate for equitable care and informed decision-making for all birthing individuals; Analyze neonatal growth, adaptation, and developmental trajectories across varying levels of risk to inform evidence-informed nursing management

MCN 430L Reproductive Health and Nursing Care of the Childbearing Family Clinical (2 Credit Hours)
This clinical course provides students with opportunities to apply theoretical knowledge and evidence-based practice to promote wellness, prevent complications, and manage high-risk reproductive and perinatal conditions across the lifespan. Students will engage in the care of individuals with gender-related reproductive health needs, from menarche through menopause, with an emphasis on the care of childbearing families throughout pregnancy, birth, and the postpartum period. Priority is placed on clinical reasoning, interprofessional collaboration, reproductive justice, and culturally responsive, person-centered care.
Outcomes:
Evaluate physiological, psychosocial, and pathophysiological adaptations of the childbearing person and fetus/neonate to conduct comprehensive assessments of the perinatal family; Provide safe, equitable, and therapeutic nursing care to individuals and the perinatal family across varying levels of risk and complexity, integrating cultural, social, and environmental contexts to inform clinical reasoning; Collaborate effectively with individuals, families, and interprofessional teams to optimize reproductive health outcomes through communication, advocacy, and shared decision-making; Integrate advanced pharmacologic principles and current evidence to ensure safe medication management during the perinatal period; Integrate ethical reasoning, professional accountability, and reflective practice to guide nursing actions in perinatal scenarios; Exemplify professional behaviors through leadership, accountability, and role modeling in professional conduct, including reliability, appearance, communication, and decision-making

MCN 431 Pediatric Nursing (3 Credit Hours)
This course prepares students to provide comprehensive, evidence-based, person-centered care to pediatric patients and families from infancy through adolescence and across the healthcare continuum. The course integrates the four spheres of care (health promotion and disease prevention, chronic disease management, regenerative/restorative care, and hospice/palliative/supportive care), the levels of prevention model, and the Healthy People initiative to address complex health needs and promote health equity for diverse pediatric populations. Major pediatric topics are covered, with an emphasis on family-centered care, pediatric assessment, developmental assessment, interprofessional communication, and care coordination.
Outcomes:
Synthesize nursing and interdisciplinary knowledge to analyze normal and altered physical and psychosocial growth and development patterns from infancy through adolescence, including application of theoretical frameworks to inform clinical reasoning and judgment; Implement and evaluate evidence-based preventive interventions and population-focused risk reduction strategies for pediatric populations and families, incorporating principles of health equity, social determinants of health, and cultural responsiveness; Develop and evaluate evidence-based care for pediatric patients and families experiencing health alterations, integrating person-centered care principles and systems-based practice approaches; Critically evaluate and advocate for policy changes and system-level interventions that address current trends, structural barriers, and health disparities affecting pediatric populations, demonstrating leadership in advancing health equity and transforming healthcare delivery systems

MCN 431L Pediatric Nursing Clinical (2 Credit Hours)
This clinical course provides students with structured, faculty-supervised practice experiences to synthesize and apply theoretical concepts, evidence-based knowledge, and clinical competencies to provide comprehensive, developmentally supportive, person-centered nursing care to pediatric patients and families. Students will incorporate concepts of family-centered care, teamwork, and patient safety into the care provided. Students practice across the four spheres of care (health promotion and disease prevention, chronic disease management, regenerative/restorative care, and hospice/palliative/supportive care), the levels of prevention model, and diverse healthcare settings to promote health equity and optimal outcomes for diverse pediatric populations.
Outcomes:
Synthesize developmental theories of Piaget and Erickson to conduct developmental assessments from infancy through adolescence, identify developmental variations and risk factors, and translate findings into developmentally supportive interventions to promote optimal growth and well-being; Demonstrate competence in conducting comprehensive and focused physical assessments on pediatric patients from infancy through adolescence, integrating developmental considerations, family-centered approaches, and culturally responsive techniques and distinguishing between normal and abnormal findings; Synthesize pediatric assessments to formulate evidence-based nursing concept maps to guide care that addresses complex health needs across multiple settings (acute hospital, primary care, outpatient, and community); Demonstrate effective communication strategies across interprofessional teams, patients, families, and communities; Demonstrate exemplary professional behaviors including integrity, appropriate professional presence, ethical conduct, confidentiality, and advocacy

MCN 516 Pediatric Primary Care NP Practicum (3 Credit Hours)
Pre-requisites: MCN 401 Child/Family Health
This course guides the student toward a synthesis of content from nursing and related sciences, applying this knowledge to the role of the nurse practitioner in the primary care of pediatric patients. During this practicum experience, the student will care for children from birth through adolescence across a continuum from health promotion to the management of common health problems.
Outcomes:
At the successful completion of this practicum, students will be able to: 1) Perform a complete physical, psychological and social health assessment incorporating principles of child development, health promotion and health maintenance; 2) Provide developmentally appropriate teaching, counseling, and anticipatory guidance; 3) Apply preventive interventions and risk reduction strategies for infants through adolescents, and their families; 4) Evaluate cultural, spiritual, ethical, legal, financial, and policy factors that influence care in the clinical environment through a social justice lens; 5) Implement evidence-based, developmentally supportive plans of care for pediatric patients and their families; 6) Modify management plans according to clinical responses and changes in condition; 7) Utilize technology to manage information, support decision-making, deliver care, and evaluate outcomes; 8) Demonstrate effective communication, collaboration and relationship building with patients, families, and interprofessional team members; 9) Analyze quality issues in the clinical setting, prioritizing patient safety and cost effectiveness

MCN 530 Topical Seminar for Nursing (1-5 Credit Hours)
These are seminars in specialty areas of nursing theory (e.g., Parse theory), methods (e.g., historical research, grounded methods), as well as concepts (e.g., spirituality, decision-making, bereavement). Students are encouraged to take those seminars to prepare them for their dissertation. Restricted to Graduate Nursing students.
Outcomes:
Students are expected to use the specialty information to further enhance their understanding of their research phenomenon

Mathematical Sciences (MATH)

Discover, search, courses (p. 2661)!

MATH 100 Intermediate Algebra (3 Credit Hours)
Pre-requisites: Math Placement Test
This course covers the fundamentals of algebra, ranging from linear equations and their graphs through exponents and systems of equations.
Course equivalencies: ACMAT100/MATH100
Outcomes:
Students will receive the preparation needed to use algebra in other courses or, if they plan to take calculus, to enroll in Precalculus I

MATH 108 Real World Modeling with Mathematics (3 Credit Hours)
This course investigates mathematical modeling applied to a variety of topics such as linear programming, coding information, probability and statistics, scheduling problems and social choice.
Knowledge Area: Quantitative Knowledge
Outcomes:
Students will understand the usefulness of mathematical modeling in a variety of disciplines within the life sciences, the social sciences, and business; This course satisfies the quantitative literacy requirement of the core curriculum

MATH 110 Business Precalculus (3 Credit Hours)
Pre-requisites: (MATH100 or math placement of MATH117 or above) AND (Declared major in the Quinlan School of Business OR the ECON-BA Major)
A one-semester course in precalculus designed for business students. It includes the study of functions, their graphs, and their basic properties. Techniques for solving equations involving linear, quadratic, polynomial, exponential and logarithmic functions are explored, and ideas like inverse functions are developed. An emphasis is placed on business applications.
Outcomes:
Students will be able to work with and analyze polynomial, logarithmic and exponential functions using a variety of techniques and apply those skills in a variety of contexts, especially business applications

MATH 117 Precalculus I (3 Credit Hours)
Pre-requisites: Math Placement Test or MATH 100
This course covers a variety of algebraic topics, including functions and their applications, graph transformations, composition and inverse functions, as well as polynomial and rational functions.
Course equivalencies: ACMAT 117/MATH 117
Outcomes:
Students who plan to study calculus will obtain the algebraic background needed to enroll in Precalculus II

MATH 118 Precalculus II (3 Credit Hours)
Pre-requisites: MATH 110, MATH 117, or Math Placement Test
This course covers topics ranging from exponential and logarithmic functions to trigonometric functions. It also considers applications of these topics in various settings.
Course equivalencies: MATH 118/ ACMAT 118
Outcomes:
Students will obtain the background needed to enroll in either of the department's calculus sequences

MATH 123 Topics (1-3 Credit Hours)
Freshman Mathematics/Statistics Seminar (1-3 Credit Hours): A freshman seminar with no prerequisites on topics in the mathematical sciences drawn from algebra, geometry, statistics, and their applications.

MATH 130 Business Calculus (4 Credit Hours)
Pre-requisites: (MATH110 or MATH118 or math placement of MATH131 or 161) AND (Declared major in the Quinlan School of Business OR the ECON-BA Major)
An introduction to calculus focused on business applications. The following topics are considered: modeling change using algebraic, exponential and logarithmic functions, derivatives, optimization, integration, functions of two variables, and partial derivatives.
Outcomes:
Students will understand and be able to use methods of calculus (especially differential calculus) and be able to apply these in a variety of contexts, especially business applications

MATH 131 Applied Calculus I (3 Credit Hours)
Pre-requisites: Math Placement Test or MATH 118
An introduction to differential and integral calculus, with an emphasis on applications. This course is intended for students in the life and social sciences, computer science, and business. Topics include: modeling change using functions including exponential and trigonometric functions, the concept of the derivative, computing the derivative, applications of the derivative to business and life, social and computer sciences, and an introduction to integration.
Interdisciplinary Option: Bioinformatics, Forensic Science
Outcomes:
Students will obtain an understanding of calculus and methods for applying calculus (especially differential calculus), including modeling/analyzing processes (such as population growth and cooling), interpreting the derivative (numerical, graphical, and algebraic), and optimization (such as finding the time and level for a peak drug concentration)

MATH 132 Applied Calculus II (3 Credit Hours)
Pre-requisites: MATH 131
This course is a continuation of MATH 131. Topics include: definition and interpretations of the integral (numerically, graphically, and algebraically), basic techniques for computing anti-derivatives, applications to probability, an introduction to multi-variable calculus and optimization for functions of several variables, and mathematical modeling using differential equations. (This course is not a substitute for MATH 162.)
Interdisciplinary Option: Bioinformatics, Forensic Science
Outcomes:
Students will obtain an understanding of integral and multi-variable calculus, including modeling/analyzing processes with the integral, optimization of functions of several variables, and modeling with differential equations

MATH 147 Mathematics For Teachers I (3 Credit Hours)
For course description, see CIEP 104.
This course satisfies the Engaged Learning requirement.
Course equivalencies: X-CIEP104/MATH147

MATH 148 Mathematics For Teachers II (3 Credit Hours)
For course description, see CIEP 105.
Course equivalencies: X-CIEP105/MATH148

MATH 160A Seminar A for Calculus Transition (1 Credit Hour)
Pre-requisites: (MATH 130 or MATH 131) and department consent
Co-requisites: MATH 162
This seminar is a corequisite support course for students transitioning from applied or business calculus (MATH 130 or MATH 131) to the more rigorous theoretical calculus sequence (MATH 162). Topics include applications of differentiation, optimization, implicit differentiation, related rates and techniques of integration. Designed to bridge the conceptual and technical gaps between the two calculus tracks, the seminar emphasizes conceptual understanding, problem-solving strategies, and mathematical communication.
Outcomes:
Students will obtain the background and skills needed in MATH 162 when they make the transition from MATH 130 or MATH 131, including concurrent support and enrichment for the corequisite course

MATH 160B Seminar B for Calculus Transition (2 Credit Hours)
Pre-requisites: MATH 132 and department consent
Co-requisites: MATH 263
This seminar is a corequisite support course for students transitioning from applied calculus (MATH 132) to the more rigorous theoretical calculus sequence (MATH 263). Topics include applications of differentiation, optimization, implicit differentiation, related rates, techniques of integration, vectors and matrices, and double integrals. Designed to bridge the conceptual and technical gaps between the two calculus tracks, the seminar emphasizes conceptual understanding, problem-solving strategies, and mathematical communication.
Outcomes:
Students will obtain the background and skills needed in MATH 263 when they make the transition from MATH 132, including concurrent support and enrichment for the corequisite course

MATH 161 Calculus I (4 Credit Hours)
Pre-requisites: Math Placement Test or MATH 118
This course provides a standard introduction to differential and integral calculus and covers topics ranging from functions and limits to derivatives and their applications to definite and indefinite integrals and the fundamental theorem of calculus and their applications.
Interdisciplinary Option: Bioinformatics, Forensic Science
Course equivalencies: ACMAT 161/MATH 161
Outcomes:
Students will obtain a theoretical understanding of principles of differential and integral calculus, will demonstrate computational skills in support of reasoning and interpretation, and will apply concepts such as the derivative and the integral to modeling processes; Students will be able to make use of a wide variety of techniques of differentiation

MATH 162 Calculus II (4 Credit Hours)
Pre-requisites: MATH 161
This course is a continuation of Calculus I and includes the calculus of various classes of functions, techniques of integration, applications of integral calculus, three-dimensional geometry, and differentiation and integration in two variables.
Interdisciplinary Option: Bioinformatics
Course equivalencies: ACMAT 162/MATH 162
Outcomes:
Students will obtain an understanding of techniques for finding anti-derivatives, and applications of the integral to questions in three-dimensional geometry and physics; Students will obtain conceptual understanding about functions of several variables and apply these concepts to optimization and integration questions for functions of two variables; Students will employ techniques for solving differential equations and their applications

MATH 162A Calculus II, Alternate (4 Credit Hours)
Pre-requisites: MATH 161
This course is a continuation of Calculus I and includes the calculus of various classes of functions, techniques of integration, applications of integral calculus, sequences and infinite series, and an introduction to differential equations. This course follows a traditional approach to calculus sequencing.
Interdisciplinary Option: Bioinformatics
Outcomes:
Students will obtain the background needed for further study in mathematics and to apply mathematics in the physical sciences

MATH 170 Service Learning in Mathematics (3 Credit Hours)
Pre-requisites: B+ or higher in any of the following (MATH 118 or MATH 131 or MATH 132 or MATH 161 or MATH 162 or MATH 263 or MATH 263A)
Students will learn best practices to communicate mathematical concepts and skills to diverse populations by engaging in tutoring mathematics to the undergraduate population at Loyola. This course is designed to promote and encourage engagement and rigor in mathematical concepts and skills among the diverse communities of learners at Loyola.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students in this course will deepen their understanding of mathematical concepts and skills and be able to communicate this effectively to diverse communities of learners

MATH 201 Introduction to Discrete Mathematics & Number Theory (3 Credit Hours)
Pre-requisites: MATH 161
This course covers topics from discrete mathematics and number theory, areas of mathematics not seen in calculus courses and abundant in applications, that provide students with the concepts and techniques of mathematical proof needed in 300 level courses in mathematics.
Outcomes:
Students will obtain an understanding of the basic concepts and techniques involved in constructing rigorous proofs of mathematical statements

MATH 212 Linear Algebra (3 Credit Hours)
Pre-requisites: MATH 132 or MATH 162 or MATH 162A
This course provides an introduction to linear algebra in abstract vector spaces with an emphasis on Rn, covering topics such as Gaussian elimination, matrix algebra, linear independence and spanning, linear transformations and eigenvalues; software packages such as MAPLE may be used.
Outcomes:
Students will receive an introduction to abstract mathematics in a setting that encourages the thinking needed in more advanced mathematics courses

MATH 215 Object-Oriented Programming with Mathematics (3 Credit Hours)
Pre-requisites: MATH 132 or MATH 162 or MATH 162A
This is an introductory programming course for students interested in mathematics and scientific computing. Students will program primarily in a general object-oriented language such as Python, with supplementary exercises in a computer algebra system. Examples will be drawn primarily from applications of calculus, elementary number theory, and cryptography.
Course equivalencies: X-COMP215/MATH215
Outcomes:
Students will learn basic scripting and object-oriented programming, with the goal of being able to solve mathematical and scientific problems

MATH 263 Multivariable Calculus (4 Credit Hours)
Pre-requisites: MATH 162
This course covers the differential and integral calculus of multivariable and vector valued functions, and sequences and infinite series, culminating with Green's Theorem, the Divergence Theorem, and Stokes' Theorem.
Outcomes:
Students will obtain an understanding of multivariable calculus and its applications, as well as background needed for the study of more advanced mathematics

MATH 263A Multivariable Calculus, Alternate (4 Credit Hours)
Pre-requisites: MATH 162A
This course covers the differential and integral calculus of multivariable and vector valued functions, culminating with Green's Theorem, the Divergence Theorem, and Stokes' Theorem. This course follows a traditional approach to calculus sequencing.
Outcomes:
Students will obtain an understanding of multivariable calculus and its applications, as well as background needed for the study of more advanced mathematics

MATH 264 Ordinary Differential Equations (3 Credit Hours)
Pre-requisites: MATH 263 or MATH 263A (Can also be a corequisite)
This course covers the theory, solution techniques, and applications surrounding linear and non-linear first- and second-order differential equations, including systems of equations.
Outcomes:
Students will obtain an understanding of elementary differential equations and their applications

MATH 266 Differential Equations and Linear Algebra (3 Credit Hours)
Co-requisites: MATH 263 or MATH 263A
This course provides an introduction to basic topics in ordinary differential equations and linear algebra. Topics include first and second-order differential equations, Laplace transform, systems of first-order differential equations, systems of linear algebraic equations, matrix algebra, bases and dimension for vector spaces, linear independence, linear transformations, determinants, eigenvalues, and eigenvectors.
Prerequisites or
Outcomes:
Students will learn fundamental results and methods in ordinary differential equations and linear algebra, with a strong emphasis on topics that are particularly relevant for Engineering Science

MATH 277 Problem-Solving Seminar (1 Credit Hour)
In a seminar setting, students discuss and present proofs (or computer examples) as solutions to regional and national mathematics contest problems usually involving techniques drawn from elementary logic, calculus of one and several variables, combinatorics, number theory, geometry, basic algebra, and abstract algebra.
Outcomes:
To improve a student's ability to communicate mathematically and to strengthen the student's problem-solving skills

MATH 298 Research Seminar in Mathematics (1 Credit Hour)
Pre-requisites: MATH 162 or MATH 162A
A seminar-style course that covers various topics about how to conduct research in mathematical sciences while engaging students in active research projects with faculty mentors.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will obtain an initial insight into a number of areas of advanced study in mathematics

MATH 301 History of Mathematics (3 Credit Hours)
Pre-requisites: MATH 132 or MATH 162 or MATH 162A
This course explores selected topics in the history of mathematics ranging from Babylonian and Egyptian mathematics to Pythagoras and Euclid to the Hindu-Arabic numeration system to Newton and Leibniz to geometries other that Euclid's to the mathematical art of Escher.
Outcomes:
Students will obtain a unique historical perspective on the various areas of mathematics that they are studying in their other courses

MATH 304 Introduction to Probability (3 Credit Hours)
Pre-requisites: MATH 263 or MATH 263A (may also be taken as Corequisites)
For description, see STAT 304.
Course equivalencies: X-MATH304/STAT304
Outcomes:
Students obtain the theoretical background in probability needed for further study in probability and statistics

MATH 305 Introduction to Mathematical Statistics (3 Credit Hours)
For prerequisites and description, see STAT 305.
Course equivalencies: X-MATH305/STAT305

MATH 306 Intro to Stochastic Processes (3 Credit Hours)
For prerequisites and description, see STAT 306.
Course equivalencies: X-MATH306/STAT306

MATH 309 Numerical Methods (3 Credit Hours)
Pre-requisites: (COMP 170 or COMP 215) and [(MATH 212 and MATH 264) or MATH 266]
An introduction to numerical techniques for solving mathematical problems where exact solutions are impractical or computationally intensive. Topics include numerical errors, root finding, interpolation and approximation, solutions to systems of linear equations, numerical differentiation and integration, numerical solutions to ordinary and partial differential equations equations, and other selected topics.
Course equivalencies: X-COMP309/MATH309
Outcomes:
Students will obtain an understanding of how numerical methods can be used in a variety of areas of mathematics

MATH 313 Abstract Algebra (3 Credit Hours)
Pre-requisites: MATH 201 and 212
This course provides a rigorous introduction to the study of structures such as groups, rings, and fields; emphasis is on the theory of groups with topics such as subgroups, cyclic groups, Abelian groups, permutation groups, homomorphisms, cosets, and factor groups.
Outcomes:
Students will be able to read, understand, and communicate arguments about group theory and abstract algebraic structures, preparing them for further advanced work in mathematics

MATH 314 Advanced Topics Abstract Algebra (3 Credit Hours)
Pre-requisites: MATH 313
This course studies advanced algebraic systems with an emphasis on rings and fields, culminating with the Galois theory of equations.
Outcomes:
Students will be able to read, understand, and communicate arguments about rings, fields and abstract algebraic structures, preparing them for further advanced work in mathematics

MATH 315 Advanced Topics in Linear Algebra (3 Credit Hours)
Pre-requisites: MATH 313
This course offers a rigorous abstract approach to vector spaces and transformations, including similarity, duality, canonical forms, inner products, bilinear forms, Hermitian and unitary spaces, and other selected topics.
Outcomes:
Students will obtain an understanding of advanced linear algebra structures that will prepare them for graduate level work in mathematics and industry work involving mathematics

MATH 318 Combinatorics (3 Credit Hours)
Pre-requisites: (MATH 162 or MATH 162A) and MATH 201
This course offers a rigorous introduction to combinatorics, including topics such as induction, the pigeon-hole principle, permutations, combinations, recurrence relations, generating functions, the inclusion-exclusion principle, and other selected topics.
Outcomes:
Students will obtain an understanding of the basic topics in combinatorics that will prepare them for advanced study of related topics in mathematics and computer science

MATH 320 Mathematical Logic (3 Credit Hours)
Pre-requisites: MATH 201
This course in modern mathematical logic begins with a study of propositional logic and leads to the study of first-order predicate logic, including quantifiers, models, syntax, semantics, the completeness and compactness theorems, and other selected topics.
Outcomes:
Students will develop a fuller understanding of mathematical logic and therefore of the underlying theory behind proofs of mathematical assertions

MATH 322 Advanced Number Theory (3 Credit Hours)
Pre-requisites: MATH 201
This course will cover Pythagorean triples, problems related to Fermat's Last Theorem, Pell's equation, Fermat's method of descent, primes in arithmetic progressions, Mersenne primes, perfect numbers, primitive roots, primality testing, Carmichael numbers, RSA public key encryption, quadratic residues, and quadratic reciprocity. Additional topics will be covered as time permits.
Outcomes:
Students will be able to solve important practical and theoretical number theory problems; Students will be exposed to both significant recently solved number theory problems and currently unsolved conjectures

MATH 328 Algebraic Coding Theory (3 Credit Hours)
Pre-requisites: MATH 212 or MATH 266
Codes with algebraic structure for error control are examined. Block codes including Hamming codes and Reed-Muller codes, BCH codes, and other cyclic codes and their implementation are treated. Other topics may include: convolutional codes, efficiency considerations, and Shannon's fundamental theorem of information theory.
Course equivalencies: X-MATH328/COMP328

MATH 331 Cryptography (3 Credit Hours)
Pre-requisites: Theoretical Foundations: MATH201 or COMP363; Programming Foundations: COMP125 or COMP150 or COMP170 or COMP/MATH 215
This course introduces the formal foundations of cryptography and also investigates some well-known standards and protocols, including private and public key cryptosystems, hashing, digital signatures, RSA, DSS, PGP, and related topics.
Course equivalencies: X-COMP331/MATH331
Outcomes:
Students will gain an understanding of cryptosystems widely used to protect data security on the internet, and be able to apply the ideas in new situations as needed

MATH 344 Geometry (3 Credit Hours)
Pre-requisites: MATH 212
This course discusses axiomatic systems which define geometries and includes topics from synthetic and analytic projective geometry.
Outcomes:
Students will obtain an understanding of the many different geometries that are studied by teachers and researchers

MATH 345 Introduction to Financial Mathematics Derivatives (3 Credit Hours)
Pre-requisites: (MATH 264 or MATH 266) and MATH 304
The course provides an introduction to the mathematical theory of option pricing. We will rigorously derive option relationships using no arbitrage conditions, introduce rudimentary stochastic calculus and Brownian motion as models for stock prices, and give an introduction to methods for solving partial differential equations to give explicit Black-Scholes formulas.
Outcomes:
The students will gain knowledge of the theory of options, bond and stock pricing, portfolio optimization, and will be exposed to other relevant applications of Mathematics to Finance

MATH 351 Introduction to Real Analysis I (3 Credit Hours)
Pre-requisites: MATH 201 and (MATH 263 or MATH 263A) and (MATH 212 or MATH 266)
An introduction to the topology of, and to the functions on the real line or more general metric spaces. Topics include sequences, including sequences of functions, completeness, compactness, continuity, uniform continuity, and differentiation.
Outcomes:
Students will obtain an understanding of the fundamentals of real analysis that will prepare them for advanced work in mathematics

MATH 352 Introduction to Real Analysis II (3 Credit Hours)
Pre-requisites: MATH 351
A continuation of MATH 351. Topics include Riemann integration, series, including series of functions, and select topics in continuity and differentiation of multivariable functions, fixed point, implicit and inverse function theorems.
Outcomes:
Students will obtain an understanding of topics in advanced analysis that will prepare them for graduate level work in mathematics

MATH 353 Introduction to Complex Analysis (3 Credit Hours)
Pre-requisites: (MATH 264 or MATH 266) and MATH 351
An introduction to the algebra and geometry of complex numbers, topology of the complex plane, and the theory of functions of a complex variable, including: analytic functions, contour integrals, the Cauchy integral formula, harmonic functions, Laurent series, residues and poles, the Fundamental Theorem of Algebra, and other selected topics.
Outcomes:
Students will obtain an understanding of the fundamentals of complex analysis that will prepare them for advanced work in mathematics

MATH 355 Methods of Applied Mathematics (3 Credit Hours)
Pre-requisites: MATH 264
Vector calculus, linear transformations, matrices, series solutions of differential equations, special functions; Fourier series, Fourier and Laplace transforms; Partial differential equations and topics from complex analysis, Green's functions, integral equations, the calculus of variations.
Course equivalencies: X-PHYS301/PHYS271/MATH355
Outcomes:
Facility with mathematical methods used in sciences and engineering

MATH 356 Introduction to Mathematical Modeling (3 Credit Hours)
Pre-requisites: MATH 266 or (MATH 264 and MATH 212)
This course will teach students how to use various areas of mathematics, such as vector calculus, linear algebra, and/or differential equations, to formulate and analyze mathematical models in, for example, mechanics, physics, biology, economics, etc.
Outcomes:
Students will learn how to use the tools from previous mathematics classes to formulate models of real world phenomena

MATH 358 Introduction to Optimization (3 Credit Hours)
Pre-requisites: (MATH 162 or MATH 263A) and (MATH 212 or MATH 266)
The course is an introduction to linear, nonlinear, and integer optimization, and may include optimization on graphs, stochastic optimization, etc. Modeling of real-life problems as optimization problems, mathematical analysis of resulting optimization problems, and computational approaches to solving the problems will be covered.
Course equivalencies: X-MATH358/STAT358
Outcomes:
Students will learn how to recognize optimization problems, model real-life challenges as optimization problems, perform mathematical analysis of the problems, and solve the problems using computational tools

MATH 360 Introduction to Game Theory (3 Credit Hours)
Pre-requisites: MATH 162 or MATH 162A
The noncooperative and cooperative theories of games. Two person zero sum matrix games, nonzero sum N-person games, Nash equilibria of games with a continuum of strategies, auctions, duels. Cooperative game theory, including the theory of bargaining, the theory of fair allocation of rewards using the nucleolus and using the Shapley value.
Outcomes:
Students will obtain an understanding of the fundamentals of mathematical game theory and will be able to apply this knowledge in a variety of settings

MATH 365 Introduction to Partial Differential Equations (3 Credit Hours)
Pre-requisites: MATH 264 or MATH 266
This course provides an introduction to basic topics in partial differential equations (PDE). In addition to first order PDE, such as the transport equation, the main types of second order PDE, including the Laplace equation, the heat equation, and the wave equation, will be studied in detail.
Outcomes:
Students will learn fundamental results and methods in partial differential equations and their applications

MATH 366 Applied Dynamical Systems (3 Credit Hours)
Pre-requisites: MATH 266 Linear Algebra and Differential Equations or (MATH 264 Ordinary Differential Equations and MATH 212 Linear Algebra)
Modeling, analysis, and prediction of short-term and asymptotic behavior of dynamical systems is studied. Continuous-time and discrete-time dynamical systems are considered, and modeled by differential and difference equations, respectively. Motivation comes from biological, chemical, mechanical, and engineering systems.
Outcomes:
Students will learn how to model dynamical systems and predict their behavior

MATH 376 Formal Language & Automata (3 Credit Hours)
Pre-requisites: COMP 163 or MATH 201 or MATH 212 or MATH 266
This course introduces formal language theory, including such topics as finite automata and regular expressions, pushdown automata and context-free grammars, Turing machines, undecidability, and the halting problem.
Course equivalencies: X-COMP376/MATH376
Outcomes:
An understanding of the theoretical underpinnings of computability and complexity in computer science

MATH 386 Introduction to Topology (3 Credit Hours)
Pre-requisites: MATH 201 and 212 This first course in topology discusses topological spaces, continuity, connectedness and path-connectedness, compactness, product spaces, quotient spaces, metric spaces, countability and separation axioms, and other selected topics
No course description is available
Outcomes:
Students will obtain a background in topology that will allow them to apply this topic to other areas of mathematics or to pursue graduate studies

MATH 388 Special Topics in Mathematics (1-3 Credit Hours)
This course covers advanced topics in mathematics, including analysis, topology, algebra, applied mathematics, and logic.
Outcomes:
Students will obtain an understanding of an advanced topic in their major

MATH 390 Advanced Research Seminar in Mathematics (2 Credit Hours)
Pre-requisites: MATH 304/STAT 304 or MATH 313 or MATH 351
The seminar will cultivate students' presentation skills through participation in and critical discussion of brief lectures on familiar and unfamiliar topics; preparation and presentation of two brief lectures by the student (one on a familiar topic from the curriculum, one on a higher level material not customarily from the curriculum); and preparation of an extended abstract summarizing the advanced material presented.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will gain the ability to present material in Mathematics and applications to a general audience

MATH 395 Capstone Seminar (3 Credit Hours)
Pre-requisites: MATH 313 Abstract Algebra, MATH 351 Introduction to Real Analysis I, and MATH 390 Undergraduate Seminar
The course unifies the knowledge gained in previous Mathematics courses and provides an opportunity for in-depth study and presentation of advanced material not usually covered in the standard Mathematics curriculum.
Outcomes:
Students will learn how to integrate previous knowledge in exploring new topics in Mathematics, discover applications to other disciplines, and refine their mathematical writing and presentation skills

MATH 398 Independent Study (1-6 Credit Hours)
This course allows students to engage in independent study on selected topics in mathematics under the supervision of a faculty member.
Outcomes:
Students will obtain an understanding of an advanced topic in their major

MATH 401 Introduction to Graduate Study in Mathematics (1 Credit Hour)
Pre-requisites: Graduate Student status
This is a professional development seminar for the beginning graduate student. Through short lectures, faculty panels, career panels, regular reading and writing assignments, and assorted workshops, it provides the student with the tools they need to succeed in the program, and beyond.
Outcomes:
Students will: gain practice reading, writing, listening to, and summarizing advanced mathematics; learn the pedagogical, ethical, and DEI matters associated with careers in the mathematical sciences; gain practice giving lectures, writing problem-sets, and grading mathematics; explore possible career trajectories

MATH 404 Probability & Statistics I (3 Credit Hours)
As the first part in a two-semester sequence, this course introduces basic principles of probability including combinatorial methods, probability and cumulative density and mass functions, moment generating functions and applications, expected values and variance and other moments, and order statistics. This course emphasizes related theorems and proofs.
Course equivalencies: X-MATH404/STAT404

MATH 405 Probability & Statistics II (3 Credit Hours)
As the second part in a two-semester sequence, this course thoroughly explores the central limit theorem and its variants and uses, estimation, hypothesis testing, sufficiency, efficiency, uniformly most powerful methods, information, and asymptotic methods. Time permitting, Bayesian topics may also be explored and discussed.
Course equivalencies: X-MATH405/STAT405

MATH 406 Stochastic Processes (3 Credit Hours)
This course addresses topics such as finite-state Markov processes and Markov chains, classification of states, long-run behavior, continuous time processes, birth and death processes, random walks, and Brownian motion.
Course equivalencies: X-MATH406/STAT406

MATH 409 Advanced Numerical Analysis (3 Credit Hours)
Pre-requisites: Some background in programing, linear algebra and differential equations
An introduction to numerical techniques for solving mathematical problems where exact solutions are impractical or computationally intensive. Topics include numerical errors, root finding, interpolation and approximation, methods for solving systems of linear equations, high order numerical differentiation and integration, eigenvalue problems, numerical solutions to ordinary and partial differential equations, and other selected topics.
Course equivalencies: X-COMP409/MATH409
Outcomes:
Students will obtain an understanding of theoretical concepts and rigorous analytical skills for the use of numerical methods to analyze and solve complex mathematical and real-world problems

MATH 413 Algebra I (3 Credit Hours)
Pre-requisites: Graduate standing
This course covers basic algebraic structures, focused mainly on groups. Topics include normal subgroups, isomorphism theorems, and actions on sets. Additional topics chosen from the theory of groups or closely related structures.
Outcomes:
Students will strengthen their ability to read, understand, and communicate arguments about groups and their actions, preparing them for further advanced work in mathematics

MATH 414 Algebra II (3 Credit Hours)
Pre-requisites: MATH 313 or MATH 413 or permission from the Graduate Program Director
This course covers basic algebraic structures, focused mainly on rings, fields and Galois theory. Additional topics chosen from the theory of rings fields or closely related structures.
Outcomes:
Students will strengthen their ability to read, understand, and communicate arguments about rings and fields, preparing them for further advanced work in mathematics

MATH 415 Topics in Linear Algebra (3 Credit Hours)
Pre-requisites: Graduate standing
An abstract approach to the study of finite- and infinite-dimensional vector spaces and their transformations. Selected topics may include similarity, duality, canonical forms, singular value decomposition, inner products, discrete Fourier transform, bilinear forms, Hermitian and unitary spaces.
Outcomes:
Students will strengthen their ability to read, understand, and communicate arguments about finite- and infinite-dimensional vector spaces and their transformations, preparing them for further advanced work in mathematics

MATH 416 Survey of Algebra (3 Credit Hours)
Pre-requisites: Graduate Student status
A survey course in three parts. I: the theorems of Burnside, Sylow, and Jordan-Holder, toward the classification of finite simple groups. II: (noncommutative) rings and modules over PIDs, including applications to classification problems. III: additional topic chosen by instructor, e.g., category theory, homological algebra, division rings, and representation theory.
Outcomes:
Students will demonstrate facility with standard proof techniques in abstract algebra, and the ability to work with algebraic structures (including actions, morphisms, and quotients; concretely and abstractly); Students will recognize the common theme of classification uniting the course topics

MATH 418 Combinatorial Mathematics (3 Credit Hours)
An introduction to the basic methods of counting and generation, including: induction, pigeon-hole principle, permutations, combinations, recurrence relations, generating functions, and inclusion-exclusion principle. Topics drawn from partitions, graph theory, graph coloring, and combinatorial design, Polya's theory, Ramsey's theorem, and optimization problems.
Course equivalencies: X-COMP418/MATH418

MATH 420 Topics in Mathematical Logic (3 Credit Hours)
Pre-requisites: MATH 313 or MATH 351 or permission of the instructor
This course will be a mathematical study of the concepts of truth and proof and how they relate to each other. The main topics to be covered are propositional logic, first order predicate logic, computability and undecidability results.
Outcomes:
Students will develop proof writing skills, expand mathematical literacy, understand the expressive power and limitations of propositional and predicate logics and learn the mathematical meaning of "truth" and "proof"

MATH 422 Advanced Topics in Number Theory (3 Credit Hours)
Pre-requisites: MATH 201 or the equivalent or permission of the instructor
Topics chosen from: Pythagorean triples, Fermat's Last Theorem, Pell's equation, Fermat descent, primes in arithmetic progressions, Mersenne primes, perfect numbers, primitive roots, primality testing, Carmichael numbers, RSA encryption, quadratic residues, quadratic reciprocity, integers as the sum of squares, Gaussian integers, continued fractions, the distribution of primes, Diophantine approximation, elliptic curves; others.
Outcomes:
Understand the importance of historically significant concepts and problems in number theory; Understand the proofs of related theorems; Solve problems and prove theorems from topics covered in class

MATH 428 Algebraic Coding Theory (3 Credit Hours)
Codes with algebraic structure for error control are examined. Block codes including Hamming codes and Reed-Muller codes, BCH codes, quadratic residue codes, and other cyclic codes and their implementation are treated. Other topics may include: convolutional codes, efficiency considerations, and Shannon's fundamental theorem of information theory.
Course equivalencies: X-COMP428/MATH428

MATH 431 Cryptography (3 Credit Hours)
This course introduces the formal foundations of cryptography and also investigates some well-known standards and protocols, including private and public key cryptosystems, hashing, digital signatures, RSA, DSS, PGP, and related topics. Additional topics may include more modern cryptosystems, such as those based on elliptic curve and lattices.
Course equivalencies: X-COMP431/MATH431

MATH 443 Intro to Algebraic Topology (3 Credit Hours)
In the study of topology, algebraic constructions (called "invariants") are used to help determine whether two differently presented topological spaces are indeed different. In this course, we introduce various topics related to this endeavor, including homotopy equivalence of topological spaces, group presentations, homomorphisms of spaces and of groups, covering spaces, the fundamental group, and homology theories. Time permitting, the cohomology ring of a space will also be introduced.

MATH 444 Topics in Geometry (1-3 Credit Hours)
An axiomatic approach to the study of geometry. While Euclidean geometry will be the main focus, elliptic and hyperbolic geometries will also be studied in detail. Additional non-Euclidean geometries (including projective, metric, and finite) and additional approaches (such as transformations and synthetic treatments) will also make an appearance.

MATH 445 Financial Math Derivatives (3 Credit Hours)
A first course in the mathematics of derivatives pricing. Topics include options markets, Black-Scholes pricing formulas, stochastic calculus, hedging schemes, binomial option pricing, exotic options, and more general derivatives.

MATH 451 Analysis I (3 Credit Hours)
Pre-requisites: Graduate Standing
A rigorous review of the topology of, and of the functions on, the real line and more general metric spaces. Topics include sequences, including sequences of functions, completeness, compactness, continuity, uniform continuity, and differentiation.
Outcomes:
Students will master the mathematical rigor behind undergraduate real analysis and obtain preparation for further graduate courses in analysis and its applications

MATH 452 Analysis II (3 Credit Hours)
Pre-requisites: MATH 451 or MATH 351 or permission from the Graduate Program Director
A continuation of MATH 451. A rigorous treatment of Riemann and elements of Lebesgue integration, series, including series of functions, and select topics in continuity and differentiation of multivariable functions, fixed point, implicit and inverse function theorems.
Outcomes:
Students will master the mathematical rigor behind undergraduate real analysis and obtain preparation for further graduate courses in analysis and its applications

MATH 453 Complex Analysis (3 Credit Hours)
Pre-requisites: MATH 351 or MATH 451 or permission from the Graduate Program Director
A rigorous introduction to the algebra and geometry of complex numbers, topology of the complex plane, and the theory of functions of a complex variable, including: analytic functions, contour integrals, the Cauchy integral formula, harmonic functions, Laurent series, residues and poles, conformal mapping, analytic continuation, transfer theory, etc.
Outcomes:
Students will master the mathematical rigor behind undergraduate complex analysis, gain exposure to advanced topics in complex analysis, and obtain preparation for further graduate courses in analysis and its applications

MATH 454 Survey of Analysis (3 Credit Hours)
Pre-requisites: Graduate Student status
An introduction to advanced topics in analysis, including measure theory, functional analysis and partial differentials equations. Measurable sets; the Lebesgue integral in Rn; Lp and other function spaces; weak convergence; Lax-Milgram Theorem; and the calculus of variations. These topics are then applied to the study of linear PDEs. Students will be able to apply these concepts to study PDEs.
Outcomes:
Students will understand the central elements of Lebesgue integration (from measurable sets to the fundamental theorem of calculus for Lebesgue integrals) and of Lp spaces (including Minkowski and Hölder inequalities)

MATH 456 Mathematical Modeling (3 Credit Hours)
Pre-requisites: Graduate standing
This course will involve students using various areas of mathematics, such as vector calculus, linear algebra, and differential equations, to formulate and analyze mathematical models in, for example, mechanics, physics, biology, economics, etc.
Outcomes:
Students will gain experience using the tools from previous mathematics classes to formulate models of real world phenomena

MATH 458 Optimization (3 Credit Hours)
Pre-requisites: MATH 351 or permission from the Graduate Program Director
The course is a rigorous treatment of linear, nonlinear, and integer optimization, and may include optimization on graphs, stochastic optimization, etc. Modeling of real-life problems as optimization problems, mathematical analysis of resulting optimization problems, including proving existence of solutions, optimality conditions, convergence of algorithms, and computational approaches to solving the problems will be covered.
Course equivalencies: X-MATH458/STAT458/428
Outcomes:
Students will learn how to recognize optimization problems, model real-life challenges as optimization problems, solve the problems using computational methods, and perform rigorous mathematical analysis of the problems and prove convergence of the computational methods

MATH 460 Game Theory (3 Credit Hours)
Pre-requisites: Graduate standing
The theory and applications of noncooperative and cooperative games. Two person zero sum matrix games, nonzero sum N-person games, Nash equilibria of games with a continuum of strategies, auctions, duels. Cooperative game theory, including the theory of bargaining, the theory of fair allocation of rewards using the nucleolus and using the Shapley value.
Outcomes:
Students will obtain an understanding of the fundamentals of mathematical game theory, including the theoretical underpinnings of this theory, and will be able to apply this knowledge in a variety of settings

MATH 465 Introduction to Partial Differential Equations (3 Credit Hours)
This course is an introduction to the subject of partial differential equations. Focus will be on studying linear partial differential equations, such as the wave equation, that appear ubiquitously in nature. To solve these equations we will use techniques such as separation of variables and Fourier series. We will also discuss different boundary conditions, and their physical interpretation.

MATH 466 Dynamical Systems (3 Credit Hours)
Pre-requisites: Graduate standing
Modeling, rigorous analysis, and prediction of short-term and asymptotic behavior of dynamical systems is studied. Continuous-time and discrete-time dynamical systems are considered, and modeled by usually nonlinear differential and difference equations, respectively. Motivation comes from biological, chemical, mechanical, and engineering systems.
Outcomes:
Students will be able to model dynamical systems, perform rigorous mathematical analysis of them, and predict their behavior

MATH 475 Functional Analysis (3 Credit Hours)
Metric, normed, Banach, Hilbert, and sequence spaces. Linear operators and Fourier analysis. Hahn-Banach extension principle, Baire category, and uniform boundedness. Selected applications to economics, physics, engineering, and quantum theory.

MATH 476 Automata & Formal Languages (3 Credit Hours)
Pre-requisites: MATH 201 or MATH 212 or COMP 163
No course description is available
Course equivalencies: X-COMP476/MATH476

MATH 486 General Topology (3 Credit Hours)
Pre-requisites: Graduate standing
This course builds on the basics of point-set topology and discusses topological spaces, continuity, connectedness and path-connectedness, compactness, product spaces, quotient spaces, metric spaces, countability and separation axioms. Further topics may include category theory and basic homotopy theory.
Outcomes:
Students will strengthen their ability to read, understand, and communicate arguments about general topological spaces, preparing them for further advanced work in mathematics

MATH 488 Special Topics in Mathematics (1-4 Credit Hours)
Selected topics in mathematics not covered in the department's regular course offerings. May be repeated for credit.

MATH 495 Graduate Practicum in Mathematics (2 Credit Hours)
Pre-requisites: MATH 401 and (MATH 414 or MATH 452 or MATH 416 or MATH 454); Graduate Student status
A project-based course. Under faculty consultation, students will design and independently carry out a research project devoted to the development, pedagogy, or application of mathematics. To earn credit for this course, the student will deliver both an oral presentation and technical paper at the level expected in the professional workplace.
Outcomes:
Students will have: analyzed professional literature from multiple sources, resulting in a motivating question for the project; gained practice communicating clearly, concisely, and in-step with discipline norms; and contributed to the learning, teaching, or application of mathematics through their findings

MATH 498 Independent Study (1-6 Credit Hours)
This is a directed study course undertaken by advanced students and supervised by a member of the graduate faculty.

MATH 595 Thesis Supervision (1-6 Credit Hours)
Research under faculty guidance including training in scientific writing and the production of a thesis and research presentation.

MATH 605 Master's Study (1 Credit Hour)
This course is a non-credit means of permitting students to be formally enrolled at Loyola while preparing for the final practicum.

Medical Laboratory Science (MLS)

Discover, search, courses (p. 2661)!

MLS 401 Laboratory Fundamentals (2 Credit Hours)
Introduction to life in the clinical laboratory. Safety practices, laboratory mathematics, statistical analysis, and fundamental laboratory training in phlebotomy, pipetting, microscopy and calibrations.
Outcomes:
Demonstrate and identify safe and professional knowledge consistent with the field of Medical Laboratory Science, including use of universal precautions and ability to decipher Safety Data Sheets; Accurately perform skills needed in medical laboratory science including phlebotomy, processing of specimens, pipetting, microscopy, and calibrations\\n; Demonstrate competency in use of laboratory calculations\\n; Understand the history and role Medical Laboratory Scientists play in health care

MLS 410 Clinical Immunology (2 Credit Hours)
This course focuses on principles and procedures of immunology and serology. Emphasis will be on the role of the immune system in health and disease and developing an understanding of the role of both humoral and cellular immunity. Admission to M.S. in Medical Laboratory Science program. Upon completion, students will demonstrate understanding of the discipline of immunology and apply theoretical concepts to differentiate patient health and disease states.

MLS 415 Urinalysis and Body Fluids (2 Credit Hours)
Theoretical and applied concepts related to the formation, collection, processing, and evaluation of urine and body fluids. Study of urine and body fluids including chemical, physical, and microscopic properties. This course also encompasses the evaluation of normal fluid characteristics, and those that reflect abnormality or disease. Restricted to students in the M.S. in Medical Laboratory Science program. Upon completion, students will be able to explain the formation of fluids in the human body and correlate normal and pathological states associated with chemical, physical and microscopic findings.

MLS 420 Molecular Diagnostics (2 Credit Hours)
This course is will provide students with an understanding of the processes which have been collectively referred to as molecular biology as they relate to laboratory medicine. Instruction emphasizes molecular methodologies and current applications of molecular diagnostics utilized in the clinical laboratory. Upon completion of this course students will gain a background in molecular biology which will promote critical thinking and problem solving as it relates to clinical molecular diagnostics.

MLS 430 Clinical Chemistry I (3 Credit Hours)
Pre-requisites: Admission to M.S. in Medical Laboratory Science program
This course is designed for medical laboratory science students to gain an understanding of the analytical principles and components of instrumentation utilized in clinical chemistry laboratories.
Outcomes:
Upon completion of this course, students will describe chemical constituents of bodily fluids, their regulation and laboratory methods of analysis for compounds including electrolytes, carbohydrates, lipids and proteins

MLS 440 Clinical Chemistry II (2 Credit Hours)
Advanced course in clinical chemistry/biochemistry which continues study of measurement and interpretation of chemical constituents in human blood and body fluids. Topics include endocrinology, organ systems, therapeutic drug monitoring, toxicology, tumor markers and nutritional chemistry. This course will prepare students for their clinical practicum in Clinical Chemistry. Enrollment Condition: Admission to the M.S. in Medical Laboratory Science program
Outcomes:
Upon completion, students will be able to identify interrelated human metabolic functions in normal and disease states, analyze laboratory data, interpret results, and utilize information to determine a diagnosis

MLS 450 Hematology (2 Credit Hours)
Co-requisites: MLS 450L
This course focuses on the study of formed elements of blood including production and maturation. Normal cell morphology and abnormal morphologic changes due to disease states are studied. Recognition and correlation of pathological changes in morphology, cytochemistry and distribution of cells in peripheral blood and bone marrow are discussed. This course will prepare students for their clinical practicum in Hematology.
Outcomes:
Describe the physiology, development of cells, and process of hematopoiesis; Discuss the function of normal cellular elements of blood and associate abnormal elements to disease states; Identify the morphological characteristics of both normal and abnormal cellular elements of blood; Describe anemias, determine appropriate testing for disorder, and classify based on morphology and underlying cause; Differentiate myeloproliferative, myelodysplastic, and lymphoproliferative disorders by connecting laboratory findings with diagnosis

MLS 450L Hematology Laboratory (2 Credit Hours)
Co-requisites: MLS 450
This course emphasizes the integration of hematologic theory and applied laboratory practice to prepare students for clinical testing environments. Students perform manual and automated hematologic procedures while applying conceptual knowledge to interpret laboratory results. Professional conduct and laboratory safety are emphasized throughout the course. This course will prepare students for their clinical practicum in Hematology.
Outcomes:
Demonstrate competency in routine and specialized hematology procedures, including identification and troubleshooting of common sources of laboratory error to ensure accurate patient results; Analyze and evaluate laboratory findings with hematologic disease states, including anemias, leukocyte disorders, and platelet abnormalities, using provided cases and unknown specimen analysis; Apply laboratory safety guidelines, including standard precautions and PPE use, to promote personal and laboratory safety

MLS 455 Hemostasis (2 Credit Hours)
This course will cover the mechanisms by which blood coagulates. Topics explored include the pathophysiology of hemostatic disorders and the antithrombotic therapies utilized to manage them. Focus on examination of the coagulation system and correlations of laboratory results to clinical findings in the classification of disorders. Admission to the M.S. in Medical Laboratory Science program. Upon completion of this course students will apply knowledge of the process of coagulation to interpret laboratory results as they relate to hemostatic dysfunctions and treatment of clinical disease.

MLS 460 Immunohematology (3 Credit Hours)
Co-requisites: MLS 460L
This course focuses on principles of antigen/antibody reactions and their relevance to Immunohematology. The ABO and Rh systems, major blood group systems, regulation, common procedures, adverse reactions, and donation of blood components are all studied as integral parts to the practice of transfusion medicine. This course will prepare students for a clinical practicum in Immunohematology.
Outcomes:
Apply theoretical Immunohematology concepts in the technical evaluation of the antigen and antibody characteristics of blood group systems; Evaluate ABO/Rh blood groups and resolve discrepancies utilizing forward and reverse blood typing of test samples; Solve simple and complex antibody identifications, including identification of multiple antibodies; Analyze the roles and responsibilities of the transfusion service within the healthcare system, including donor screening, blood component selection, transfusion support, and specialized testing for maternal, neonatal, and other special patient populations

MLS 460L Immunohematology Laboratory (2 Credit Hours)
Co-requisites: MLS 460
This course focuses on applying immunohematology theory through hands-on laboratory testing and clinical problem solving. Students perform routine and specialized immunohematology testing, interpret serologic findings, and resolve discrepancies using case-based and unknown specimens to support transfusion decision-making. This course will prepare students for a clinical practicum in Immunohematology.
Outcomes:
Perform routine and specialized immunohematology testing, including ABO/Rh typing, antibody screening and identification, and compatibility testing, following established laboratory procedures; Interpret serologic reactions and laboratory data to identify clinically significant antibodies and discrepancies; Use laboratory findings from given cases and unknown specimens to resolve immunohematologic problems and support appropriate transfusion decisions; Apply laboratory safety guidelines, including standard precautions and PPE use, to promote personal and laboratory safety

MLS 465 Laboratory Leadership I (1 Credit Hour)
Pre-requisites: Admission to the M.S. in Medical Laboratory Science program
This first of three courses in the leadership series, prepares the student for an entry-level laboratory position by developing skills in basic laboratory management practices including principles of leadership, functions of a manager, and personnel management.
Outcomes:
Upon completion of this course students will be able to utilize leadership theories to evaluate and demonstrate effective management through evaluation of common clinical laboratory issues

MLS 466 Laboratory Leadership II (1 Credit Hour)
The second installment in the three course Leadership series prepares the student for a laboratory position by developing skills in basic laboratory management practices including financial considerations, laboratory regulations, and laboratory operations. Admission to the M.S. in Medical Laboratory Science program. Upon completion of this course students will exhibit knowledge of the financial requirements needed for effective laboratory management and the role of laboratorians in regulation and accreditation of laboratories.

MLS 467 Laboratory Leadership III (1 Credit Hour)
The final installment in the Leadership series of courses prepares the student for a laboratory position by developing skills in career planning, introduction to professional development, grant writing, and process improvement planning. Completion of MLS 466 Laboratory Leadership II and good academic standing as defined by the M.S. in Medical Laboratory Science handbook. Upon completion of this course students will exhibit skills needed for effective laboratory management including departmental improvement planning, professional development and performance feedback.

MLS 470 Bacteriology and Virology (3 Credit Hours)
Co-requisites: MLS 470L
Introduction to bacteria and viruses, with a focus on organisms that are medically relevant to humans. Specimen collection, processing, identification techniques, and recognition of key diagnostic features will be emphasized. Students will correlate clinical features to laboratory findings. This course will prepare students for their clinical practicum in Microbiology.
Outcomes:
Differentiate pathogens from commensal bacteria for specific sites of the human body; Evaluate appropriate methods for collection and processing of clinical specimens, transport devices, and diagnostic laboratory methods for recovery and identification of bacteria and viruses; Accurately identify bacteria and viruses through key features including specimen type, diagnostic testing, treatment, and other clinical information

MLS 470L Bacteriology Laboratory (2 Credit Hours)
Co-requisites: MLS 470
This course focuses on applying bacteriology concepts through hands-on laboratory work in a student microbiology laboratory. Students connect theoretical knowledge to practice by cultivating organisms, interpreting laboratory results, and evaluating organism significance within diagnostic workflows. Emphasis is placed on linking laboratory findings to clinical context, troubleshooting results, and supporting clinical decision-making. This course prepares students for a clinical practicum in Microbiology.
Outcomes:
Apply bacteriology concepts through hands-on laboratory practice to evaluate clinically relevant microorganisms from human specimens; Differentiate pathogens from normal or commensal flora by interpreting laboratory findings; Analyze and troubleshoot microbiology testing outcomes through evaluation of laboratory data, organism characteristics, diagnostic methods, workflow, and potential sources of error; Integrate laboratory findings with clinical features to support diagnostic reasoning while adhering to laboratory safety guidelines, including standard precautions and appropriate PPE use

MLS 475 Clinical Parasitology and Mycology (2 Credit Hours)
Study of parasites and fungi that are medically relevant to humans. This course introduces students to the taxonomy and identification of morphologic and microscopic characteristics of parasites and fungi. Diagnosis of disease states based upon laboratory findings will be emphasized. Admission to the M.S. in Medical Laboratory Science program. Upon completion of this course, students will be able to identify the pathogenesis, symptomatology, laboratory diagnosis, and treatment for the parasites and fungi included in the course.

MLS 481 Clinical Practice in Hematology (3 Credit Hours)
Pre-requisites: Completion of MLS 410, MLS 415, MLS 450, MLS 466 and good academic standing as defined by the M.S. in Medical Laboratory Science Handbook
Clinical experience in Hematology under the guidance of qualified medical laboratory professionals. Students will apply knowledge and clinical skills gained in their first year courses. This course focuses on the acquisition of manual and automated laboratory skills, laboratory safety, understanding the principles of test procedures, instrumentation, and quality control.
Outcomes:
Upon completion of this course students will provide evidence of possessing the knowledge and skills necessary to perform Hematology testing in a medical laboratory

MLS 482 Clinical Practice in Chemistry (3 Credit Hours)
Pre-requisites: Completion of MLS 440, MLS 466, and good academic standing as defined by the M.S. in Medical Laboratory Science Handbook
Clinical experience in Chemistry under the guidance of qualified medical laboratory professionals. Students will apply knowledge and clinical skills gained in their first year courses. This course focuses on the acquisition of manual and automated laboratory skills, laboratory safety, understanding the principles of test procedures, instrumentation, and quality control.
Outcomes:
Upon completion of this course students will provide evidence of possessing the knowledge and skills necessary to perform Chemistry testing in a medical laboratory

MLS 483 Clinical Practice in Immunohematology (3 Credit Hours)
Clinical experience in Immunohematology under the guidance of qualified medical laboratory professionals. Students will apply knowledge and clinical skills gained in their first year courses. This course focuses on the acquisition of manual and automated laboratory skills, laboratory safety, understanding the principles of test procedures, instrumentation, and quality control. Completion of MLS 455, MLS 460, MLS 466, and good academic standing as defined by the M.S. in Medical Laboratory Science Handbook. Upon completion of this course students will provide evidence of possessing the knowledge and skills necessary to perform Immunohematology testing in a medical laboratory.

MLS 484 Clinical Practice in Hemostasis and Body Fluids (1-2 Credit Hours)
Pre-requisites: MLS 415, MLS 455, MLS 466, and good academic standing as defined by the M.S. in Medical Laboratory Science Handbook
Clinical experience in Hemostasis, Urinalysis, and other Body Fluid analyses under the guidance of qualified medical laboratory professionals. Application of knowledge and clinical skills gained from first year courses. Focus on acquisition of manual and automated laboratory skills, laboratory safety, principles of test procedures, instrumentation, and quality control.
Outcomes:
Upon completion of this course students will demonstrate evidence of possessing the knowledge and skills necessary to perform Hemostasis, Urinalysis, and Body Fluid analyses testing in a medical laboratory

MLS 485 Clinical Practice in Microbiology (3 Credit Hours)
Pre-requisites: Completion of MLS 470, MLS 475, and good academic standing as defined in the M.S. in Medical Laboratory handbook
Clinical experience in Microbiology under the guidance of qualified medical laboratory professionals. Students will apply knowledge and clinical skills gained in their first-year courses. This course focuses on the acquisition of manual and automated laboratory skills, laboratory safety, understanding the principles of test procedures, instrumentation, and quality control.
Outcomes:
Upon completion of this course students will provide evidence of possessing the knowledge and skills necessary to perform Microbiologic testing in a medical laboratory

MLS 486 Clinical Practice - MLS Special Topics (1-2 Credit Hours)
Clinical experience in specialty areas of laboratory medicine under the guidance of qualified medical laboratory professionals. Students will actively engage in applying the medical knowledge and clinical skills gained in the didactic and student training laboratory courses in Molecular Diagnostics, Flow Cytometry, HLA testing, and laboratory administration. Completion of MLS 420, MLS 466, and good academic standing as defined in the M.S. in Medical Laboratory Science handbook. Upon completion of this course students will provide evidence of possessing the knowledge and skills needed to enter into specialty areas of a medical laboratory.

MLS 490 MLS Educational Practice and Review (2 Credit Hours)
Pre-requisites: Completion of MLS 466 and good academic standing as defined by the M.S. in Medical Laboratory Science handbook
This course will prepare students for taking a Medical Laboratory Science certification exam. Students will gain basic educational and pedagogical approaches needed to train others in the field of Medical Laboratory Science. Application of theories demonstrated through presentation of review lectures and assisting in kinesthetic instruction for laboratory sessions.
Outcomes:
Upon completion of this course students will be able to utilize effective teaching strategies to plan and present a lecture unit, including writing objectives and assessment strategies

MLS 495 Medical Laboratory Science Capstone (1-2 Credit Hours)
Pre-requisites: Completion of MLS 466 and good academic standing as defined by the M.S. in Medical Laboratory Science handbook
The MLS Capstone exposes students to leadership and ancillary niche aspects beyond those of a standard Medical Laboratory Science curriculum. Students will create a Capstone project to reflect on their unique experience in the field and demonstrate the capacity to utilize knowledge and make evidence-based decisions regarding laboratory medicine.
Outcomes:
This course will provide students the opportunity to demonstrate knowledge and skills acquired in the academic coursework, professional practice, and their Capstone Experience

Medical Physics (MPHY)

Discover, search, courses (p. 2661)!

MPHY 400 Interactions of Radiation with Matter (3 Credit Hours)
Introductions of radiation with matter and provides the foundation for future courses in imaging and therapy. Topics covered include: exponential attenuation, x-ray production, interactions of radiation with matter, radioactive decay, atomic and nuclear structure, charged particle equilibrium, cavity theory, dosimetry, ionization chambers and other measurement devices.
Outcomes:
Students will understand how x-rays are produced, basic interactions of photons and electrons in matter, cavity theory, ionization chambers and other devices

MPHY 402 Image-Based Anatomy and Physiology (3 Credit Hours)
Pre-requisites: Graduate standing in the MPHY program or permission of instructor
This course will cover all the expected basic elements of human anatomy and medical physiology with a particular emphasis on the radiographic anatomy of relevance to medical physicists.

MPHY 404 Physics and Mathematics of Medical Imaging I (3 Credit Hours)
Pre-requisites: Enrollment in MPHY 400
The fundamental physics and mathematics related to image creation are the primary pics of this course. Specific topics related to imaging include: linear algebra, Fourier analysis, sampling theory, random variables and stochastic processes, image formation, biokinetics and compartmental analysis. Graduate standing in the MPHY program or permission of instructor.

MPHY 410 Medical Physics Seminar (1 Credit Hour)
Pre-requisites: Graduate standing in the MPHY program or permission of instructor
Held once per week, seminars are required for all graduate students in Medical Physics so as to introduce them to the research actively being pursued by the program's faculty and senior graduate students.

Medical/Surgical Nursing (MSN)

Discover, search, courses (p. 2661)!

MSN 277 Medical/Surgical Nursing: Adult Health I (4 Credit Hours)
Pre-requisites: Must have taken and passed PSYC 273 or PSYC 274 and GNUR 294 with a C- or better OR Must have taken and passed PSYC 273 or PSYC 274 with a C- or better and be enrolled in GNUR 294
This course is designed to use levels of prevention to provide nursing care for adults with selected health issues. Emphasis is placed on health promotion, early detection and treatment and restoration of health for individuals, families and communities across the health care continuum.

MSN 277L Medical/Surgical Nursing: Adult Health Lab I (3 Credit Hours)
Must also enroll in MSN 277. This course is designed to apply levels of prevention in nursing care for adults with selected health issues. Emphasis is placed on health promotion, early detection and treatment and restoration of health for individuals, families, and communities across the health care continuum.

MSN 377 Adult Health II - Advanced Medical-Surgical (4 Credit Hours)
Pre-requisites: Must have taken and passed MSN 277, MSN 277L, GNUR 290, GNUR 294, GNUR 360,with a C- or better; Must also enroll in MSN 377L
This course builds on MSN 277, Adult Health I, and focuses on the nursing care of adults experiencing selected critical health issues. Physical, psychosocial, cultural, spiritual assessments and health data are incorporated into the identification of interventions within the context of life-threatening conditions. Students incorporate evidence-based practice guidelines and interdisciplinary collaboration to maximize health outcomes.
Outcomes:
Nursing care of adults experiencing selected critical health issues

MSN 377L Adult Health II - Advanced Medical Surgical Clinical (3 Credit Hours)
Must also enroll in MSN 377. This course builds on MSN 277L, Adult Health I Clinical, and focuses on the nursing care of adults experiencing selected critical health issues. Physical, psychosocial, cultural, spiritual assessments and health data are obtained and interventions are provided within the context of life-threatening conditions. Students incorporate evidence-based practice guidelines and interdisciplinary collaboration to maximize health outcomes.
Outcomes:
Nursing care of adults experiencing selected critical health issues - clinical

MSN 408 APN Practicum (1-9 Credit Hours)
Pre-requisites: GNUR 413, GNUR 425 & GNUR 442 (minimum grade of B-)
This course prepares the student to understand that scholarly inquiry, evaluation of evidence, and the development of evidence-based practices/protocols form the foundation for evidence-based practice. Methods of operationalizing scholarly inquiry include understanding relationships among nursing theory, research, principles of epidemiology and practice; formulating research questions and evidence-based practice questions; identifying and appraising existing literature; critically evaluating research methodologies used in the study of an issue or problem; and applying inquiry to practice. The importance of the translation of scientific evidence to improve practice is emphasized. Social, cultural, political and ethical issues related to research are addressed, consistent with the Jesuit values surrounding social justice.

MSN 422 Adult Health Nursing I: Foundations of Medical-Surgical Care (3 Credit Hours)
This didactic course prepares nursing students to deliver evidence-based, person-centered care to adults with common acute and chronic conditions affecting multiple body systems. Through interactive lectures, case-based analysis, clinical reasoning activities, and integration of informatics and quality-improvement concepts, students apply the nursing process while synthesizing pathophysiological and pharmacological knowledge to promote safe, effective, and equitable care across diverse healthcare settings. Grounded in Jesuit values of cura personalis and social justice, learning experiences emphasize the influence of health systems, social determinants of health, and emerging technologies, including artificial intelligence, while highlighting the ethical responsibilities and essential role of human judgment in clinical decision-making. By the end of the course, learners will be able to analyze complex adult health conditions, prioritize and coordinate nursing care using evidence and clinical judgment, collaborate effectively within interprofessional teams, and apply systems-based and informatics-informed strategies to optimize adult health outcomes.
Outcomes:
Analyze assessment data using pathophysiology, pharmacology, and clinical decision tools to prioritize nursing care for adults with acute and chronic conditions; Design evidence-based, person-centered nursing care plans that integrate clinical reasoning and prioritize patient safety to achieve effective outcomes for adults with acute and chronic conditions; Evaluate interprofessional collaboration frameworks and therapeutic communication strategies to support culturally responsive, team-based care for adults and their families; Analyze healthcare delivery systems, care coordination processes, and health information technologies to determine their influence on health equity, access, and quality of care for adult populations; Develop patient- and family-centered education strategies that promote health literacy, self-management, and shared decision-making for adults with acute and chronic condition

MSN 422L Adult Health Nursing I: Foundations of Medical-Surgical Care Clinical (2 Credit Hours)
This clinical course provides pre-licensure nursing students with supervised experiential learning opportunities to apply evidence-based, person-centered nursing care for adults with common acute and chronic conditions across healthcare settings. Building on concurrent didactic content, students actively integrate pathophysiologic and pharmacologic knowledge, clinical judgment, and the nursing process to assess, plan, implement, and evaluate care for adults with complex health needs. Through direct patient care, interprofessional collaboration, and reflective practice, students examine how health systems, social determinants of health, and emerging technologies influence care delivery and outcomes. Grounded in Jesuit values of cura personalis and social justice, the clinical experience emphasizes ethical practice, patient safety, health equity, and accountability within scope of practice. By the end of the course, students will demonstrate the ability to deliver safe, compassionate, and coordinated nursing care, communicate effectively within interprofessional teams, and reflect on their development as professional nurses in adult healthcare environments.
Outcomes:
Apply comprehensive assessment skills and clinical judgment to deliver safe, evidence-based nursing care for adults with common acute and chronic conditions under faculty or preceptor supervision; Implement evidence-based, person-centered nursing care plans that reflect clinical priorities, patient goals, and quality and safety principles in diverse adult health care settings; Demonstrate effective interprofessional communication and teamwork, including timely documentation and SBAR handoffs, to support coordinated, culturally responsive care for adults and families; Integrate health systems knowledge, care coordination processes, and health information technologies to support continuity of care, patient safety, and equitable access to services; Educate patients and families using health-literacy-responsive strategies that promote self-management, shared decision-making, and safe transitions of care

MSN 433 Suturing and Acute Wound Management (1 Credit Hour)
This course is designed to enable the APRN student to obtain the theoretical knowledge and practical skills necessary to assess and manage acute wounds. This didactic/lab course discusses principles of wound care and teaches students techniques of wound closure including pain control, basic suturing and advanced skin closures; management of infections and injuries to the skin, hands and feet; and simple incision and drainage of abscesses. The student will be able to practice advanced skills that essential in the clinical management of the patient with acute wounds.

MSN 447 CNS Practice Across the Adult Age Spectrum (3 Credit Hours)
This course promotes in-depth exploration of significant clinical problems occurring in adult health patients from the vantage point of the advanced practice nurse prepared as a clinical nurse specialist (CNS). This course will prepare the CNS student for expert clinical practice and the competencies to translate clinical expertise into quality, cost-effective outcomes for adult patients. A major focus of the course is to prepare CNS students to assume responsibility for coordination, management and assurance of safety and quality of care of adult patients across the three spheres of influence: patient/client, nurses and nursing practice, organization/system of adult health patients. Attention will be directed to identifying and analyzing selected problems, designing effective advanced nursing interventions and evaluating health care outcomes related to adult health patients. Special consideration with be given to the top Medicare diagnoses, National Patient Safety Goals, CMS core performance measures, and new models for healthcare delivery. Indications for leadership, collaboration and consultation with other health care professionals are emphasized to insure optimal clinical management and achievement of evidence-based outcomes for the hospitalized adult patient. Strategies for improving the quality of health care through patient safety interventions and strategies are incorporated into patient care protocols at the individual, group and system level. The subsequent APN practicum offers the student an opportunity to exercise critical judgment and implement theoretical knowledge in the coordinating and managing the care of adults experiencing acute and chronic health problems.

MSN 465 Adult Health Nursing II: Complex and High Acuity Care (3 Credit Hours)
This concept-based course prepares nursing students to plan care for adults with complex, acute, and life-threatening conditions through advanced clinical reasoning across interacting physiological, professional, and psychosocial concepts. Using case-based learning, concept mapping, and unfolding high-acuity scenarios, students examine how multisystem interactions drive patient deterioration, how professional practice addresses systems-level challenges, and how ethical, cultural, and end-of-life considerations shape crisis care. Grounded in Jesuit values of cura personalis and social justice, learners evaluate quality and safety initiatives, healthcare systems, and emerging technologies, including artificial intelligence, with emphasis on equity, advocacy, and the nurse's role in improving outcomes. By course completion, students will recognize and respond to complex patient deterioration, coordinate care in high-acuity environments, and apply systems-based, ethical, person-centered decision-making to support safe, equitable care for critically ill adults and those facing end-of-life transitions.
Outcomes:
Synthesize advanced pathophysiologic and pharmacologic concepts to plan evidence-based nursing care for adults with complex, multisystem, and life-threatening conditions; Analyze clinical data and patterns of deterioration, and safety risks to guide nursing responses for adults with complex health needs; Design interprofessional collaboration and care coordination strategies that support effective teamwork and safe transitions of care in high-acuity and complex clinical environments; Appraise health policies, informatics applications, and organizational structures to propose system-level improvements that enhance equity, efficiency, and patient safety; Integrate ethical principles, psychosocial considerations, and evidence-based palliative approaches to plan compassionate, person-centered care for adults experiencing serious illness and end-of-life transitions

MSN 465L Adult Health Nursing II: Complex and High Acuity Care Clinical (2 Credit Hours)
This clinical course provides nursing students with supervised experiential learning focused on the care of adults with complex, multisystem, and life-threatening conditions in high-acuity healthcare settings. Building on concurrent Adult Health II didactic content, students apply advanced clinical judgment, prioritize care for deteriorating patients, and integrate pathophysiologic, pharmacologic, psychosocial, and ethical considerations into nursing practice. Through direct patient care, interprofessional collaboration, documentation, and reflective practice, students examine how health systems, technology, policy, and equity influence outcomes for critically ill and dying patients. Grounded in Jesuit values of cura personalis and social justice, the clinical experience emphasizes compassionate, ethical, and accountable nursing care across acute, transitional, and community-linked settings. By the end of the course, students will demonstrate readiness to safely manage complex patient assignments, communicate effectively within interprofessional teams, and provide person-centered care in high-acuity and end-of-life contexts.
Outcomes:
Apply advanced assessment skills and clinical judgment to deliver safe, evidence-based nursing care for adults with complex, multisystem, and high-acuity health conditions; Prioritize and manage care for deteriorating patients by integrating physiologic data, medication effects, and safety indicators within scope of practice; Demonstrate effective interprofessional communication, including SBAR handoffs and professional documentation, to support coordinated care across high-acuity settings and transitions; Integrate systems awareness, informatics tools, and safety principles to support quality care, risk mitigation, and equitable outcomes for complex adult patients; Provide compassionate, person-centered nursing care that incorporates ethical principles, psychosocial support, and palliative approaches for adults experiencing serious illness and end-of-life transitions

MSN 485 APN Practicum: Adult/Older Adult Acute Care NP (1-12 Credit Hours)

Pre-requisites: GNUR 413, GNUR 425 & GNUR 442 (minimum grade of B-)
This clinical practicum is designed to guide the student toward the development of scientific knowledge and advanced practice skills in the area of acute care nursing. The attainment of this advanced practice mastery involves the synthesis of concepts, knowledge and skills gained in the previous courses applied to the care of the acutely ill adult patient. Course content focuses primarily on the advanced practice of acute care nursing and guides the student toward an actualization of the role of the acute care practitioner. The student will care for the acute care patient from admission to the tertiary care center through discharge/rehabilitation when possible. Through the use of nursing frameworks, nursing diagnosis, the nursing process, application of advanced knowledge, and advanced practice skills, the student will develop strategies for the nursing management of the critically ill patient. Professional, legal, cultural and ethical implications are presented. The practicum offers the student opportunities to work with the interdisciplinary team and to develop skills necessary for advanced practice nursing, advanced management, and exploration of research in the area of acute care nursing. Clinical seminars will include discussion of concepts that have been introduced in previous courses and will be built upon with added depth. A grand rounds/case study approach will be utilized with cases cared for by students in the clinical arena. Other possible topics include: implementation of the advanced practice nursing role, social support, patient advocacy, vulnerable populations, cultural diversity, contracting, credentialing, privileging, etc. Seminars will also include identification of ethical issues in the students' practice, application of research findings, applying a Jesuit philosophy in the care of the acutely ill individual or family, and individual development of a philosophy of advanced practice nursing. Seminars will include student and faculty-led discussions.

MSN 510 Clinical Practicum for Advanced Practice in the CNS role (2-4 Credit Hours)

Pre-requisites: MSN 447 CNS Practice Across the Adult Age Spectrum
This practicum course guides the student toward a synthesis of concepts and content from nursing and related sciences, and toward the application of this knowledge to the advanced practice nursing of patients across the adult age spectrum. Clinical Nurse Specialist (CNS) students are prepared to impact three spheres: client, nurse/ nursing practice and the healthcare system. This course prepares students to make important contributions to health care including: disseminating new knowledge; designing and evaluating innovative strategies to improve quality of care and safety in all settings; improving systems of care; providing leadership that promotes interprofessional collaboration; and influencing and shaping health policy. Clinical experiences are provided in clinical areas related to the student's population as well as area of specialization in order to demonstrate achievement of quality, cost-effective, patient focused outcomes across all three spheres of impact.

Outcomes:

At the end of the course the student will be able to: 1) Apply nursing health related models in the clinical practice setting; 2) Collaborate with the interprofessional team to support and improve patient outcomes; 3) Demonstrate the role of the CNS across the three spheres of impact: client, nurse/ nursing practice, and the healthcare system; 4) Design, deliver and evaluate evidence-based solutions to health-care problems that represent translation of best evidence into practice; 5) Utilize technology to manage information, support decision-making, deliver care, and evaluate outcomes; 6) Incorporate teaching-learning principles in meeting the educational needs of patients, their families, professional nursing staff, and the community at large; and 7) Analyze psychosocial, legal, ethical, political, and spiritual factors relevant to advanced nursing practice across the three spheres of impact

MSN 516 Adult Gerontology Acute Care NP Practicum (2-5 Credit Hours)

Pre-requisites: GNUR 536 Mgmt of Adults with Acute/Critical Conditions I and 538 Mgmt of Adults with Acute/Critical Conditions II
This practicum course guides the student toward a synthesis of content from nursing and related sciences and the application of this knowledge to the advanced practice role of the nurse practitioner in acute care. The practicum offers the student opportunities to work with the interprofessional team and to develop skills necessary for advanced practice nursing, including advanced management and exploration of evidence in the area of acute care nursing.

Outcomes:

1) Assess acutely ill adults applying nursing, behavioral and natural sciences concepts; 2) Collaborate with an interprofessional team in providing care to acutely ill patients in primary, secondary and tertiary health care settings; 3) Apply evidence-based strategies to the management of acutely ill adults; 4) Utilize technology to manage information, support decision-making, deliver care, and evaluate outcomes; 5) Incorporate teaching-learning principles in meeting the educational needs of patients, families, and the community at large; 6) Examine quality improvement issues in the clinical setting, prioritizing patient safety and cost effectiveness; 7) Evaluate cultural, spiritual, ethical, legal, financial, and policy factors that influence care in the clinical environment through a social justice lens

MSN 520 Clinical Nurse Specialist Practicum I (3 Credit Hours)
This practicum introduces students to the role and functions of the clinical nurse specialist (CNS) in the systematic delivery of advanced practice nursing within organizations. Students will demonstrate initial role development as a CNS in the care of patients across the adult age spectrum. Competencies and components of the role of CNS are explored in the three spheres of impact (Patient Care, Nurses and Nursing, Organization and Systems).
Outcomes:
Apply current evidence to guide CNS practice; Generate clinical decisions based on integrated pathophysiological, pharmacological, and psychosocial knowledge; Collaborate with the interprofessional team to support and improve patient outcomes; Identify the role of the CNS across the three spheres of impact: client, nurse/ nursing practice, and the healthcare system; Operationalize the CNS role in direct patient care and consultation

MSN 522 Clinical Nurse Specialist Practicum II (3 Credit Hours)
In this practicum the CNS student will continue to develop CNS role competencies. Students will employ data-driven decision-making to enhance clinical and organizational outcomes. Students will demonstrate leadership in care delivery, safety, and quality improvement at the system level.
Outcomes:
Assess the practice environment and processes for improvement opportunities; Participate in systematic quality improvement and safety initiatives; Mentor nurses and nursing staff in using evidence-based practice principles; Participate in the process of selecting, integrating, managing, and evaluating technology and products to promote safety, quality, efficiency; Incorporate teaching-learning principles in meeting the educational needs of patients, their families, professional nursing staff, and the community at large; Facilitate interprofessional collaboration to address practice gaps

MSN 523 Clinical Nurse Specialist Practicum III (3 Credit Hours)
This practicum continues student growth in CNS role development actualizing functions and competencies of the clinical nurse specialist (CNS) in the systematic delivery of advanced practice nursing within complex organizations. Competencies and components of the role of the CNS are explored in the care of patients across the adult age spectrum to demonstrate assessment and intervention strategies, including pharmacologic and nonpharmacologic interventions, to address acute and chronic health conditions and human responses to illness. Students are expected to exhibit professional accountability and role identity as CNS.
Outcomes:
Design evidence-based interventions, including advanced nursing therapies, to meet the needs of complex patients; Incorporate determinants of health and health equity assessments and perspectives into practice; Prescribe medications, therapeutics, diagnostic studies, equipment, and procedures to manage the health issues of patients; Lead quality improvement and safety initiatives; Apply clinical practice guidelines and evidence to inform CNS-led interventions

MSN 524 Clinical Nurse Specialist Practicum IV (3 Credit Hours)
This final CNS practicum offers CNS students the opportunity to fully enact CNS role competencies in all spheres of impact (patient, nurse, system). Students will achieve competency in designing and evaluating innovative strategies to improve quality of care and safety in all settings; improving systems of care; providing leadership that promotes interprofessional collaboration; and influencing and shaping health policy. This course provides the student an opportunity to demonstrate a synthesis of previous coursework and clinical practicum in preparation for independent advanced practice as a clinical and professional leader. Students are expected to exhibit professional accountability and role identity as CNS.
Outcomes:
Implement advanced CNS role competencies across the client, nurse/nursing practice, and healthcare system spheres of impact; Demonstrate CNS practice and fiscal outcomes to internal stakeholders; Design, deliver, and evaluate evidence-based solutions to health-care problems that represent translation of best evidence into practice; Utilize technology to manage information, support decision-making, deliver care, and evaluate outcomes; Apply ethical decision-making frameworks to advocate for patients/families, nurses, other healthcare providers, populations, and the community; Demonstrate leadership in interprofessional collaboration for evidence-based care; Integrate scholarship, leadership, and clinical expertise to improve health outcomes

Medieval Studies (MSTU)

Discover, search, courses (p. 2661)!

MSTU 300 Integrative Experience I (1.5 Credit Hours)
This course is the first in a two-semester sequence of courses designed to provide students with a synoptic view of the field of Medieval Studies and train them to do cross-disciplinary work within that field.
Interdisciplinary Option: Medieval Studies
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to produce original research on some topic pertaining to the Middle Ages that utilizes and integrates no less than two methodologies drawn from diverse disciplines

MSTU 301 Integrative Experience II (1.5 Credit Hours)
This course is the second in a two-semester sequence of courses designed to provide students with a synoptic view of the field of Medieval Studies and train them to do cross-disciplinary work within that field.
Interdisciplinary Option: Medieval Studies
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to produce original research on some topic pertaining to the Middle Ages that utilizes and integrates no less than two methodologies drawn from diverse disciplines

Microbiology and Immunology (MIIM)

Discover, search, courses (p. 2661)!

MIIM 411 Basic Molecular Microbiology (2-3 Credit Hours)
This course is an introduction to fundamental concepts in microbiology
Outcomes:
Students will be able to demonstrate an understanding of the morphology, growth, division, development, molecular biology, genetics and physiology of microorganisms

MIIM 413 Basic Concepts of Immunology (3 Credit Hours)
This course is an introduction to the concepts of host immunity and defense.
Outcomes:
Students will be able to understand the fundamental principles of immunobiology, immunochemistry and immunogenetics, host immunity and defense, and the basic concepts of normal host defense versus the untoward responses (hypersensitivity) and their consequences

MIIM 414 Virology (3 Credit Hours)
This is a survey course that examines animal viruses and their interactions with host cells.
Course equivalencies: X-MBIO414/MIIM414
Outcomes:
Students will be able to demonstrate an understanding of viral structure and multiplication, and molecular interactions of important animal viruses with their host cells

MIIM 415 Medical Immunology (2 Credit Hours)
Pre-requisites: General Biology and/or Cell Biology Course is open to all Integrated Program in Biomedical Sciences PhD and MS students, graduate Nursing students, medical students, and advanced undergraduate students
The medical immunology course provides an in depth description of the components of the innate and adaptive immune system and how they interact to protect humans against infectious microorganisms. The course will have two 3 hour sessions per week for 8 weeks as well as 2 written exams.
Outcomes:
Be able to describe the development and mechanism(s) of activation of the innate and adaptive immune systems, their regulation and outcomes of their inability to do so

MIIM 420 Methods & Techniques in Microbiology Research (1 Credit Hour)
This course is an introduction to the theory of techniques used for research in microbiology and immunology.
Outcomes:
Students will be able to demonstrate competency with various research techniques including spectrophotometry, centrifugation, chromatography, photography, as well as other methods necessary for the study of microbiology, immunology or virology

MIIM 431 The Molecular Biology of Viruses (3 Credit Hours)
Pre-requisites: Include undergraduate or graduate-level courses in cell biology and biochemistry, graduate course 402 Microbes and Hosts, and / or prior approval from the course director(s)
The course will cover molecular biology and biochemistry of virus infections. Current understanding of virus-cell entry, replication, and assembly will be prominent themes. Course will include lectures on viral evolution, ecology, pathogenesis and viral immunology. The interactive course will include lectures, review of current virology literature, and student-led presentations.
Course equivalencies: MBIO431/MIIM431
Outcomes:
Detailed understanding of virology; be able to integrate concepts in this field with chemistry and health science; comprehend and appreciate current literature; be prepared for lab studies

MIIM 441 Immunology-Immunochemistry (3 Credit Hours)
This is an advanced immunology course that emphasizes structural concepts in immunology. Review and discussion of current literature exemplifies concepts presented in lecture.
Outcomes:
Students will demonstrate an understanding of the chemical definition of antigens, immunogens, structural concepts in immunology, immunoglobulin structure, structure of antigens and their interactions, and recognition of antigen by T-cells and B-cells

MIIM 442 Cell & Molecular Immunology (3 Credit Hours)
This is an advanced immunology course that examines the cellular and molecular basis of the immune response.
Outcomes:
Students will be able to demonstrate an understanding of the cellular and molecular basis of the immune response, as well as the cellular cooperation essential to the nature of immunology

MIIM 443 Molecular B-Cell Immunology (4 Credit Hours)
This is an advanced molecular immunology course with emphasis on proteins, genes and molecular interactions within the B-lymphocyte compartment of the immune system. Course includes critical evaluation of recent literature.
Outcomes:
Students will demonstrate an understanding of proteins, genes and molecular interactions within the B-lymphocyte compartment of the immune system

MIIM 461 Microbiological Cytology & Ultrastructure (3 Credit Hours)
This is an advanced course that presents the principles and application of light and electron microscopes for the study of cell structure and function.
Outcomes:
Students will demonstrate an understanding of the principles of light and electron microscopes and their use as tools in cellular and molecular biology

MIIM 471 Molecular Microbial Genetics (3 Credit Hours)
This course introduces advanced students to the importance of genetics to a wide range of biological problems.
Outcomes:
Students will demonstrate an ability to read, think, write, and speak critically about various genetic approaches used to identify essential genes, mutagenesis and recombination, transcription, development, symbiosis, and pathogenesis

MIIM 490 Molecular Biology of Oncogenesis (2 Credit Hours)
This course is an advanced course that provides a detailed analysis of molecular events that result in the tumorigenic transformation of eukaryotic cells.
Outcomes:
Students will demonstrate an understanding of oncogenesis by DNA and RNA tumor viruses, the role of oncogenesis and their relationship to normal genes, hormonal effects, and chromosomal abnormalities

MIIM 492 Research (1-12 Credit Hours)
Independent research for thesis or dissertation under the supervision of a faculty research advisor. Credit varies based upon assigned effort and time spent in the laboratory. Students receive a letter grade from their research advisor.
Outcomes:
Students will learn how to perform laboratory work, including how to appropriately control their experiments, how to interpret results, and what conclusions they may draw

MIIM 501 Seminar (0 Credit Hours)
This course provides opportunities for students to hear about cutting-edge research being conducted nationally and internationally.
Outcomes:
Students will be able to demonstrate a general awareness of current research in the area of microbiology, immunology and virology

MIIM 502 Special Topics (1-4 Credit Hours)
This course is covers a specific topic in microbiology, immunology or virology.
Outcomes:
Students will be able to able to articulate a general understanding of the selected topic

MIIM 503 Current Literature (0-1 Credit Hours)
This course is a paper-driven course in which papers of current interest are read and discussed.
Outcomes:
Students will demonstrate an ability to identify, critically analyze and articulate key concepts of scientific papers

MIIM 595 Thesis Supervision (1 Credit Hour)
This course allows the student to pursue a research topic under the mentorship of a faculty advisor.
Outcomes:
Students will contribute to the existing body of scientific knowledge and/or methodology in their thesis area; They will defend their results to their committee members

MIIM 600 Dissertation Supervision (1 Credit Hour)
This course allows the student to pursue a research topic under the mentorship of a faculty advisor.
Outcomes:
Students will add new knowledge to the existing body of scientific knowledge in their dissertation area; They will defend their results in a public forum

Military Science (MLSC)

Discover, search, courses (p. 2661)!

MLSC 101 Introduction to the Army (1 Credit Hour)
Pre-requisites: This course is open to all students
MLSC 101 consists of both lecture and lab sections. Focuses on introduction to the Army and basic Soldier skills. Students receive an introduction to the Army Profession and examine what it means to be a professional in the U.S. Army.
Outcomes:
Understand the basic structure of the US Army and its customs and courtesies; Accept the Army as a Values-based organization and embrace the scholar-athlete-warrior ethos

MLSC 102 Foundations of Leadership (1 Credit Hour)
Pre-requisites: This course is open to all students
MLSC 102 consists of both lecture and lab sections. Introduces students to the personal challenges and competencies that are critical for effective leadership.
Outcomes:
Understand the basic structure of the US Army and its customs and courtesies; Accept the Army as a Values-based organization and embrace the scholar-athlete-warrior ethos

MLSC 201 Leadership and Ethics (2 Credit Hours)
Pre-requisites: This course is open to all students
MLSC 201 consists of both lecture and lab sections. Focuses on leadership and ethics. Adds depth to the student's knowledge of the different leadership styles.
Outcomes:
Student grounded in foundational leadership doctrine and skills, comprehends critical thinking, problem-solving, and value of diversity, understands the officer's role in leading change and the Army as a profession

MLSC 202 Army Doctrine and Decision Making (2 Credit Hours)
Pre-requisites: This course is open to all students
MLSC 202 consists of both lecture and lab sections. Focuses on Army doctrine and decision making. Begins with analytical techniques, creative thinking skills and the Army problem solving process as related to situations faced by leaders when making decisions.
Outcomes:
Student grounded in foundational leadership doctrine and skills, comprehends critical thinking, problem-solving, and value of diversity, understands the officer's role in leading change and the Army as a profession

MLSC 250 Physical Readiness Training (1 Credit Hour)
This course is designed to develop the fitness capabilities of future Army officers. Students will be introduced to and become proficient in the physical components of muscular strength, muscular endurance, aerobic endurance, anaerobic endurance, and power.
Outcomes:
Future Army officers ready to meet the physical demands of any duty or combat position, move lethally on the battlefield, accomplish the mission and continue to fight, win, and come home healthy

MLSC 301 Training Management and the Warfighting Functions (3 Credit Hours)
Pre-requisites: Restricted to ROTC students; MLSC 202 or departmental consent is required
MLSC 301 consists of both lecture and lab sections. Focuses on training management and the warfighting functions. Student will study, practice, and apply the fundamentals of Training Management and how the Army operates through the Warfighting Functions.
Outcomes:
Student who possesses enhanced individual and collective skills, effectively leads formations in various scenarios, effective at receiving and giving peer evaluations, committed and disciplined ethically, academically, physically, and socially

MLSC 302 Applied Leadership in Small Unit Operations (3 Credit Hours)
Pre-requisites: Restricted to ROTC students; MLSC 301 or departmental consent is required
MLSC 302 consists of both lecture and lab sections; focuses on applied leadership in small unit operations; analyze, test, and relate the fundamentals of direct level leadership and small unit tactics at the platoon level.
This course satisfies the Engaged Learning requirement.
Outcomes:
Student who possesses enhanced individual and collective skills, effectively leads formations in various scenarios, effective at receiving and giving peer evaluations, committed and disciplined ethically, academically, physically, and socially; Successful completion of this course will help prepare contracted Army ROTC students for the Cadet Summer Training Advance Camp, which students normally attend summer of junior year at Fort Knox, KY

MLSC 311 The Army Officer (3 Credit Hours)
Pre-requisites: Restricted to ROTC students
MLSC 302 or departmental consent is required. MLSC 311 consists of both lecture and lab sections. Focuses on development of the Army Officer. Students will learn about Army programs that support counseling subordinates and evaluating performance, values and ethics, career planning, and legal responsibilities.
Outcomes:
Produces a leader of character possessing a professional identity, who thrives in operationally ambiguous environments and is a moral exemplar and skilled critical thinker, problem solver, and team builder

MLSC 312 Company Grade Leadership (3 Credit Hours)
Pre-requisites: Restricted to ROTC students
MLSC 311 or departmental consent is required. MLSC 312 consists of both lecture and lab sections. Develop knowledge, skills, and abilities required of junior officers pertaining to the Army in Multidomain Operations and Company Grade Officer roles and responsibilities.
Outcomes:
Produces a leader of character possessing a professional identity, who thrives in operationally ambiguous environments and is a moral exemplar and skilled critical thinker, problem solver, and team builder; Successful completion of this course will assist in preparing contracted ROTC students for the Basic Officer Leadership Course-B and is a mandatory requirement for commissioning

Music (MUSC)

Discover, search, courses (p. 2661)!

MUSC 101 Music: Art of Listening (3 Credit Hours)
Focus is on the acquisition and enhancement of listening skills through direct experience of musical works along with an examination of cross-cultural similarities and differences among musical styles. Concert attendance is required.
Knowledge Area: Artistic Knowledge and Experience
Outcomes:
A cultivation of musical perception through a process of repeated and guided listening; strengthening of listening skills while developing and expanding styles perspectives

MUSC 102 Class Piano for Beginners (3 Credit Hours)
For the student who has never had keyboard instruction and is interested in learning the art of performance on the piano. Fundamentals of music theory, note reading and personal enjoyment are emphasized. Strongly recommended for those preparing to teach music in elementary school.
Knowledge Area: Artistic Knowledge and Experience
Outcomes:
A basic keyboard ability with an emphasis on reading music symbols accurately while also enjoying the making and doing of music

MUSC 103 Class Guitar for Beginners (3 Credit Hours)
For the student who has never had guitar instruction and is interested in learning the art of performance on the guitar. Fundamentals of music theory, note reading and personal enjoyment are emphasized. Strongly recommended for those preparing to teach music in elementary school.
Knowledge Area: Artistic Knowledge and Experience
Outcomes:
A basic guitar ability with an emphasis on reading music symbols accurately while also enjoying the making and doing of music

MUSC 104 Gospel Choir (1 Credit Hour)
Admission through audition. A mixed ensemble of singers performing primarily Gospel music (Spirituals, Blues, etc). Admission through audition. The choir participates in at least one public performance each semester. May be repeated to a limit of eight hours.
Interdisciplinary Option: African Studies and the African Diaspora
This course satisfies the Engaged Learning requirement.
Course equivalencies: X-MUSC104/BWS 104
Outcomes:
Students gain proper vocal/choral technique and knowledge of the musical literature offered each semester through rehearsal and performance; They reflect on their personal and collective artistic growth through the process

MUSC 105 Symphony Orchestra (1 Credit Hour)
Admission through audition. The study and performance of standard orchestral literature. Students must provide their own instruments and should have previous ensemble experience. The ensemble gives at least two concerts each semester.
Knowledge Area: Artistic Knowledge and Experience
This course satisfies the Engaged Learning requirement.
Outcomes:
Students gain proper instrumental technique and knowledge of the musical literature offered each semester through rehearsal and performance; Students reflect on their personal and collective artistic growth throughout the process

MUSC 106 Guitar Ensemble (1 Credit Hour)
Admission through audition. For advanced guitarists. The study, rehearsal and performance of transcriptions and original works for guitar ensemble. Repertoire from the Renaissance through the present will be performed. Students must provide their own instruments. Gives at least one concert each semester.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students gain proper guitar technique and knowledge of the musical literature offered each semester through rehearsal and performance; Students reflect on their personal and collective artistic growth throughout the process

MUSC 107 Chorus (1 Credit Hour)
University Chorus is a topics course in ensemble singing devoted to the study, rehearsal and performance of standard choral literature of all periods. Admission through audition. Gives at least two performances each semester. Some sections require audition for admission.
Knowledge Area: Artistic Knowledge and Experience
This course satisfies the Engaged Learning requirement.
Outcomes:
Students improve their vocal/choral technique and knowledge of the musical literature through rehearsal and performance; They reflect on their personal and collective artistic growth throughout the performance process

MUSC 108 Liturgical Choir: Cantorum (1 Credit Hour)
Admission through audition. An SATB ensemble providing music for the Sunday liturgies in Madonna della Strada Chapel and other university liturgical and choral functions and concerts. Repertoire includes both traditional and contemporary sacred music. Admission through audition.
Knowledge Area: Artistic Knowledge and Experience
This course satisfies the Engaged Learning requirement.
Outcomes:
Students gain proper vocal/choral technique and knowledge of the musical literature offered each semester through rehearsal and performance; Students reflect on their personal and collective artistic throughout the performance process

MUSC 109 Jazz Ensemble (1 Credit Hour)
Admission through audition. Rehearsal and performance of standard Jazz and Big Band music. Members must have previous Jazz Band experience. Performs publicly at least twice each semester of the academic year.
Knowledge Area: Artistic Knowledge and Experience
Interdisciplinary Option: African Studies and the African Diaspora
This course satisfies the Engaged Learning requirement.
Course equivalencies: X-MUSC109/BWS 109
Outcomes:
Students improve instrumental technique and gain knowledge of the musical literature offered through rehearsal and performance; Students reflect on their personal and collective artistic growth throughout the performance process

MUSC 110 Wind Ensemble (1 Credit Hour)
Admission through audition. The study and performance of standard wind ensemble literature. Students must provide their own instruments and should have previous ensemble experience. The ensemble gives at least two concerts each semester.
Knowledge Area: Artistic Knowledge and Experience
This course satisfies the Engaged Learning requirement.
Outcomes:
Students improve instrumental technique and gain knowledge of the musical literature offered through rehearsal and performance; Students reflect on their personal and collective artistic growth throughout the performance process

MUSC 111 Percussion Ensemble (1 Credit Hour)
Enrollment Requirements: Audition and permission of the instructor. The study and performance of standard percussion ensemble literature. The ensemble gives at least two concerts each semester.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students improve instrumental technique and gain knowledge of the musical literature offered through rehearsal and performance; Students reflect on their personal and collective artistic growth throughout the performance process

MUSC 112 Loyola University Technology Ensemble (1 Credit Hour)
Loyola University Technology Ensemble (LUTE) is a performing ensemble with a composition & engineering component. Its primary instrumentation is electronic or electroacoustic, encompassing digital and analogue electronic instruments, live coding, circuit bending, and repurposing of devices or objects, etc. LUTE will appear in public at least once during each semester.
Course equivalencies: X-COMP 112/MUSC 112
Outcomes:
Collaborate to compose, engineer, and perform unique technology-driven musical experiences; design interface modules for electroacoustic performance; encode musical ideas in software or digital musical instruments; perform publicly

MUSC 122 Introduction to Digital Music (3 Credit Hours)
Computers and digital tools have been seeping into the world of music, and this course aims to explore this newly formed territory. This course is intended for students who wish to learn more about electronic music, signal processing, and algorithmic music composition. Understanding of the physics of musical sound and digital audio, facility with hands-on applications of algorithmic music composition and musicology, and ability to design and render digital instruments.
Knowledge Area: Quantitative Knowledge
Course equivalencies: X-COMP 122/MUSC 122

MUSC 142 Class Voice for Beginners (3 Credit Hours)
For the student who has never had voice instruction and is interested in learning the art of vocal performance. Fundamentals of music theory, note reading and personal enjoyment are emphasized. Strongly recommended for those preparing to teach in elementary school.
Knowledge Area: Artistic Knowledge and Experience
Course equivalencies: THTR242/THTR142/MUSC142
Outcomes:
A basic vocal ability with an emphasis on reading music symbols accurately while also enjoying the making and doing of music

MUSC 144 Music Theory I (3 Credit Hours)
Co-requisites: MUSC 145
An introduction to the fundamentals of melodic construction in all the diatonic modes (major/minor and modal) and culminates in control of two-part counterpoint. Melodies will be examined and broken down into their essential components. The class strengthens the basic musicianship skills of the student through performance of the students' written compositions illustrating the class concepts. Must be taken concurrently with MUSC 145.
Outcomes:
Through the study of melody students will develop an understanding of musical notation, the organization and color of all diatonic scales (major/minor and modal), interaction between intervals, transposition and its implications, rhythmic and beat structure, and begin developing critical analysis skills

MUSC 145 Musicianship Lab I (1 Credit Hour)
Co-requisites: MUSC 144
This course reinforces concepts presented in Music Theory I and introduces students to the basic concepts of sight singing, ear training and dictation. The voice is the class's primary focus. This course must be taken concurrently with MUSC 144.
Outcomes:
Recognize Music Theory I concepts by ear, dictate accurately those concepts, and recreate them on the voice and piano; Apply these concepts to student's primary instrument

MUSC 153 The Music of China (3 Credit Hours)
This course surveys the broad range of Chinese musical traditions as well as the practice of fieldwork, music theory and methodological issues encountered in Chinese music studies.
Outcomes:
Students will identify Chinese musical traditions throughout history and their connections to the Chinese language, history, cultural and religious studies and politics

MUSC 154 Intro to Opera (3 Credit Hours)
Survey of opera from 1600 to the present and consideration of opera as an art form which combines music and drama. Analysis of libretto structure and study of the variety of operatic styles are included.
Course equivalencies: X-MUSC154/THTR154
Outcomes:
Fundamental acquaintance with a wide selection of operatic literature and the principle eras of the European and American traditions

MUSC 154R Introduction to Opera in Rome (3 Credit Hours)
This course offers the student an overview of the development of opera in Europe with a particular emphasis on some of the most representative Italian operas and authors from the 17th to the 20th century. As the course considers opera as a cultural phenomenon, the historical, intellectual, political, social, religious and economic conditions that influenced the development of this art will be also examined.
Knowledge Area: Artistic Knowledge and Experience
Interdisciplinary Option: Italian Studies
Course equivalencies: X-MUSC154/THTR154
Outcomes:
Students will acquire the basic understanding the cultural phenomenon of opera and the style differences of different historical periods, as well as musical terms

MUSC 155 Intro to Symphonic Music (3 Credit Hours)
Survey of the principal forms of orchestral music from the Baroque to the present. Course will include: the symphony, concerto suite, overture, and symphonic poems. (Also offered at Rome Center.)
Outcomes:
Functional knowledge of the language and grammar of music through selected analysis and experience of specific symphonic literature

MUSC 156 Intro to Jazz (3 Credit Hours)
Survey of the development of jazz emphasizing the major trends and artists of this unique American style. Listening skills will be developed.
Interdisciplinary Option: African Studies and the African Diaspora
Course equivalencies: X-MUSC156/BWS 156
Outcomes:
Functional knowledge of the language and grammar of this uniquely American music through selected analysis and experience of specific jazz literature

MUSC 157 America Popular Song (3 Credit Hours)
Survey of American popular song from the early 19th century minstrel shows to the present. The evolution of this music and its relationship to society will be studied. Listening skills will be developed.
Outcomes:
Functional knowledge of the language and grammar of popular music through selected analysis and experience of specific repertoire

MUSC 161 Music in United States (3 Credit Hours)
An historical survey and guided listening experience of the evolution of music in the United States from the earliest inhabitants and settlers to the dawn of the 21st century. Special emphasis will be given to a selected era and/or music type.
Outcomes:
An understanding of the societal influences on the music of the United States and an appreciation of its music repertoire

MUSC 185 Jazz Improvisation (3 Credit Hours)
Previous basic understanding of theory and analysis is essential. Fundamentals will be expanded and enhanced through writing, listening and performing. An emphasis will be placed on learning the jazz language by ear. Students will also learn to read lead sheets and chord symbols, developing the ability to apply the jazz language to the repertoire.
Outcomes:
Appreciation for and ability to create and perform jazz improvisation

MUSC 186 Jazz Arranging (3 Credit Hours)
Fundamentals of composition and arranging will be expanded and enhanced through writing and listening. Students will learn information about the instrumentation of the big band, instrument ranges, and how to use software to make arrangements. Previous basic understanding of theory and analysis is essential.

MUSC 201 Music Technology I (3 Credit Hours)
This introductory course in Music Technology is designed to introduce students to MIDI orchestration, sequencing and digital audio editing. The course is designed to present software and hardware as tools for the creation of sound design as musical composition.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Outcomes:
Demonstrate proficiency in using software as a musical instrument to orchestrate, perform and record

MUSC 202 Class Piano II (3 Credit Hours)
Pre-requisites: MUSC 102 or permission of the instructor
This applied group class is designed for students who have successfully completed MUSC 102, or have previously attained a similar level of proficiency. Emphasis is on a variety of styles and levels of keyboard repertoire to promote a balance of new information with musical material that reinforce concepts.
Outcomes:
Students will demonstrate basic keyboard skills, piano repertoire and musical styles, to express themselves musically at the piano

MUSC 203 Class Guitar II (3 Credit Hours)
Pre-requisites: MUSC 103 or permission of the department
This course is a continuation of (MUSC 103) or a previously attained equivalent level of study and musical skill development. Throughout the course students refine technical skills and music theory as applied to the guitar. Students perform in both solo and ensemble settings.
Outcomes:
Students will demonstrate an ongoing development of coordination skills, fingerboard knowledge, sight-reading skills, performance practices and intermediate repertoire knowledge

MUSC 207 Chamber Choir (1 Credit Hour)
Audition Required. An ensemble of advanced singers performing works written especially for the smaller choir. Performance of music from all historical periods suitable for this type of choir. The choir participates in at least two public performances each semester. Admission through audition. May be repeated for up to eight credit hours.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students gain knowledge of the musical literature offered through rehearsal and performance, while integrating proper vocal/choral technique; Students reflect on their personal and collective artistic growth throughout the performance process

MUSC 244 Music Theory II (3 Credit Hours)
Pre-requisites: MUSC 144; Corequisite: MUSC 245
An introduction to the fundamentals of harmonic progressions controlled through either expansion of a tonic-dominant phrase structure, elaborations of two-part counterpoint structures, or control of the three basic root motion models. Music will be analyzed using chord matrixes and reductions into two-part frameworks. The class strengthens the basic musicianship skills through performance students' compositions illustrating the class concepts. Must be taken concurrently with MUSC 245.
Outcomes:
Through the study of harmony students will develop an understanding of all chord types, root motion, cadence types, how tonal music expands upon the basic tonic-dominant phrase, voice leading techniques, and begins exploring the techniques of chromaticism and modulation; The class will also further develop the student's critical analysis skills

MUSC 245 Musicianship Lab II (1 Credit Hour)
Co-requisites: MUSC 244
Students build on basic voice and board skills acquired in Musicianship Lab I and reinforce concepts introduced in Music Theory II by recreating the concepts on the keyboard and voice. This course must be taken concurrently with MUSC 244.
Outcomes:
Recognize Music Theory II concepts by ear, dictate accurately those concepts, and recreate them on the voice and piano; Apply these concepts to student's primary instrument

MUSC 246 Composition I (3 Credit Hours)
Course deals with the study of music theory and simple and binary forms. In addition to that, students compose an original piece of music for two instruments that receives public performance.
This course satisfies the Engaged Learning requirement.
Outcomes:
Through the study of relevant music scores, students learn the principles of composition and instrumentation to then apply them to their own compositions

MUSC 247 Composition II (3 Credit Hours)
Pre-requisites: MUSC 246
This course deals with the study of melody, counterpoint, harmony, and shorter forms. In addition to the study of theory and form, students compose an original piece of music for two instruments that is presented professionally at a public performance.
Outcomes:
Through the study of related scores and with the supervision of instructor, students compose an original work for violin and piano or violoncello and piano

MUSC 248 Jazz Composition and Arranging (3 Credit Hours)
Pre-requisites: MUSC 144
A study of the harmonic, melodic, and rhythmic theories that lead to the ability to compose and arrange in the jazz idiom. Emphasis will be placed on common harmonic progressions, scale / chord relationships, melody, song forms, and extended harmony and reharmonization. Students will also learn the basic principles of arranging and music notation, culminating in a final composition and arranging project for jazz quintet.
Outcomes:
The ability to compose and arrange music for small jazz combos of up to two horns plus rhythm section

MUSC 252 Music History I (3 Credit Hours)
Pre-requisites: MUSC 144 and MUSC 145 or taken concurrently
European music from the Medieval to the early Baroque where vocal music dominated, and the study of counterpoint led to the birth of harmony.
Interdisciplinary Option: Catholic Studies, European Studies
Outcomes:
Through listening, performance and study students demonstrate an understanding of how melodic composition gave rise to harmony and formed the foundation of Western music

MUSC 255 Music in Catholic Worship (3 Credit Hours)
Pre-requisites: MUSC 252
This course will trace the development of music in liturgy from Gregorian chant through Vatican II and to the present, examining repertoire and forms, musical and theological trends, and how music has been employed in the expression of the living prayer of the Roman Catholic Church through the centuries.
Interdisciplinary Option: Catholic Studies
Course equivalencies: X-MUSC255/CATH255
Outcomes:
Students can identify the major shifts and movements of music in the Catholic Church from the Middle Ages to the present, including the shifts represented by the Second Vatican Council

MUSC 256 Jazz Music History (3 Credit Hours)
This course is a historical and listening survey exploring the development of jazz music from its origins at the turn of the 20th century to the music of the present era. Many styles of jazz and a multitude of important musicians will be discussed, as well as important cultural and sociological aspects of the art form.
Interdisciplinary Option: Italian American Studies
Outcomes:
Through listening, lecture, required reading, and concert attendance, the student will gain an understanding of the basic musical elements of jazz, it's musical and sociological contexts, and how these elements have developed and changed over the music's varied history

MUSC 260 Conducting (3 Credit Hours)
The student will acquire a personal conducting style through study and practical application and will develop the basic skills that make one an effective, well-rounded conductor.
Outcomes:
Students will demonstrate rudimentary skills of conducting: including conducting patterns, cues, score reading and analysis

MUSC 261 Lyric Diction I: Italian and German (1 Credit Hour)
This course will acquaint students with the rules of diction in the two major languages of classical singing, German and Italian. Students will gain both a theoretical understanding of the rules of diction and the practical ability to make the relevant sounds and sing in these languages. Concurrent enrollment in 280K Applied Music: Voice is required.
Outcomes:
To successfully transcribe Italian and German into IPA; To learn and produce all of the relevant sounds of German and Italian; To sing in German and Italian with accurate diction

MUSC 262 Lyric Diction II: French and Other Languages (1 Credit Hour)
This course will acquaint the student with the rules of French, English and Latin. Students will gain both a theoretical understanding of the rules of diction and the practical ability to make relevant sounds and sing in these languages. Concurrent enrollment in 280K Applied Music: Voice is required.
Outcomes:
To successfully transcribe French, English and Latin texts into IPA; To learn to produce all of the relevant sounds of French; To sing in French, English and Latin with accurate diction

MUSC 280A Applied Music: Clarinet (1 Credit Hour)
Twelve 30-minute individual lessons in clarinet. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 280AA Applied Music: Conducting (1 Credit Hour)
Pre-requisites: MUSC 144, MUSC 145, MUSC 244, MUSC 245, MUSC 260
Twelve 30-minute individual lessons in conducting. Topics include: baton techniques, gestural mechanics, ear training, score study, transpositions, orchestrational basics, phrasing, and chord recognition. Choral, orchestral, or wind band considerations will be explored in greater detail, according to the background of the student.
Outcomes:
Advanced skills in conducting both small and large ensembles, score study, rehearsal, and concert programming

MUSC 280B Applied Music: Percussion (1 Credit Hour)
Twelve 30-minute individual lessons in percussion. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 280BB Applied Music: Improvisation (1 Credit Hour)
Pre-requisites: MUSC 144, 145, 244, 245, 185, 385
Twelve 30-minute individual lessons in improvisation. Building upon a strong theoretical foundation attained from the prerequisite courses, students receive focused instruction on the harmonic, melodic, and rhythmic theories that lead to the ability to improvise. Students may study with any of the jazz faculty regardless of their primary instrument.
Outcomes:
Students will learn to improvise over intermediate to advanced tunes in the jazz repertoire

MUSC 280C Applied Music: Oboe (1 Credit Hour)
Twelve 30-minute individual lessons in oboe. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 280E Applied Music: Trumpet (1 Credit Hour)
Twelve 30-minute individual lessons in trumpet. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 280F Applied Music: Saxophone (1 Credit Hour)
Twelve 30-minute individual lessons in saxophone. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 280G Applied Music: Guitar (1 Credit Hour)
Twelve 30-minute individual lessons in classical or electric guitar. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 280I Applied Music: Organ (1 Credit Hour)
Twelve 30-minute individual lessons in organ. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 280J Applied Music: Piano (1 Credit Hour)
Twelve 30-minute individual lessons in piano. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 280K Applied Music: Voice (1 Credit Hour)
Twelve 30-minute individual lessons in voice. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 280L Applied Music: Violin (1 Credit Hour)
Twelve 30-minute individual lessons in violin. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 280M Applied Music: Flute (1 Credit Hour)
Twelve 30-minute individual lessons in flute. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 280N Applied Music: Cello (1 Credit Hour)
Twelve 30-minute individual lessons in cello. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 280O Applied Music: Double Bass (1 Credit Hour)
Twelve 30-minute individual lessons in double bass. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 280P Applied Music: Viola (1 Credit Hour)
Twelve 30-minute individual lessons in viola. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 280Q Applied Music: Horn (1 Credit Hour)
Twelve 30-minute individual lessons in horn. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 280R Applied Music: Trombone (1 Credit Hour)
Twelve 30-minute individual lessons in trombone. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 280S Applied Music: Harp (1 Credit Hour)
Twelve 30-minute individual lessons in harp. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 280U Applied Music: Drum Set (1 Credit Hour)
Twelve 30-minute individual lessons in drum set. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 280V Applied Music: Low Brass (1 Credit Hour)
Twelve 30-minute individual lessons in low brass, including euphonium and/or tuba. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 280Y Applied Music: Bassoon (1 Credit Hour)
Twelve 30-minute individual lessons in bassoon. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 280Z Applied Music: Composition (1 Credit Hour)
Pre-requisites: MUSC 144, 244,145, 245; 246 or 248
Twelve 30-minute individual lessons. Building upon a strong theoretical foundation attained from the prerequisite courses, students receive focused instruction to develop original compositions from concept to completion. Idioms, genres, forms, instrumentation, and other considerations will vary from student to student. May be repeated for up to 8 credit hours.
Outcomes:
The ability to more fully develop original musical ideas into completed, and professionally notated, compositions

MUSC 289 Chamber Music (1 Credit Hour)
Small ensemble (2-10 member) applied music study through non-jazz instrumental ensembles. Open to strings, woodwinds, brass, keyboard instruments. One or more public performance is required.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students gain knowledge of the musical literature offered and improve their ensemble playing skills through rehearsal and performance; Students reflect on their personal and collective artistic growth throughout the performance process

MUSC 290 Jazz Combo (1 Credit Hour)
Small group applied jazz music study through ensemble playing. One or more public performance is required. Enrollment Conditions: Audition and permission of the instructor
This course satisfies the Engaged Learning requirement.
Outcomes:
Students gain knowledge of the musical literature and improve their ensemble playing skills through rehearsal and performance; Students reflect on their personal and collective artistic growth throughout the performance process

MUSC 320 Rehearsal and Performance (1 Credit Hour)
This course allows students to receive credit for performing in an on-campus production during the semester. Completion and submission of a journal or paper is required. Permission of department is required.
This course satisfies the Engaged Learning requirement.

MUSC 326 Digital Music Programming (3 Credit Hours)
Pre-requisites: COMP/MUSC 122, MUSC 201, COMP 125, COMP 150, COMP 170, or permission of instructor
This course is an exploration of coding for music applications. Topics include digital audio and synthesis theory and basic, musical data structures, and principles of computer music composition and interactivity. Students will design synthesis and sampling instruments, algorithmic music generators, signal processors, and interactive control systems using one or more music programming languages.
Course equivalencies: X-COMP 326/MUSC 326
Outcomes:
Create software modules for processing digital audio, MIDI, and generative music; develop interactive interfaces; export applications or modules; produce a portfolio of creative projects in areas of real-time audio/MIDI processing

MUSC 333 Music and Ritual in Catholic Liturgical Life (3 Credit Hours)
Drawing both from liturgical documents and the ritual texts themselves, this course explores how the theology and spirituality of our Catholic tradition are expressed in the music, liturgies, and rituals of the Roman Catholic Church.
Outcomes:
Students are conversant with the components, structure, and musical elements of the Catholic liturgy and how the Mass interacts with the spiritual and cultural lives of the faithful

MUSC 344 Music Theory III (3 Credit Hours)
Pre-requisites: MUSC 244 or permission of chair
Study of large compositional forms and the extended harmonic vocabulary of music of the 19th century. Continued development of aural, keyboard, sight-singing, compositional and analytical skills in class, computer lab and small group sessions.
Outcomes:
Expansion and deepening of knowledge of the language and grammar of music and their interaction; Ability to use this understanding in both written and aural analysis and to form and defend evaluative judgments about music

MUSC 345 Music Theory IV (3 Credit Hours)
Pre-requisites: MUSC 344 or permission of chair
Continued examination of the structural aspects of music with a focus on contrapuntal forms. Study of the compositional vocabularies of 20th century music. Continued development of aural, keyboard, sightsinging, compositional and analytical skills in class, computer lab and weekly skills sessions.
Outcomes:
Expansion and deepening of knowledge of the language and grammar of music and their interaction; Ability to use this understanding in both written and aural analysis and to form and defend evaluative judgments about music

MUSC 347 Composition III (3 Credit Hours)
Pre-requisites: MUSC 247
Course provides students with the ability to compose an original work for string quartet and examines larger forms, chromatic harmony, extended tonality, and modern techniques.
Outcomes:
Through the writing of original music and the study of related scores students demonstrate an understanding of musical forms and techniques and the ability to compose music for string quartet

MUSC 353 Music History II (3 Credit Hours)
Pre-requisites: MUSC 244 and MUSC 245
A new shared musical language spreads through Europe during the Baroque through Romantic period giving rise to the best known composers of Western music.
Interdisciplinary Option: European Studies
Course equivalencies: MUSC353 / MUSC253
Outcomes:
Students demonstrate an understanding of how composers developed music during this common practice period to create some of the most well known works of the Western cannon

MUSC 354 Music History III (3 Credit Hours)
Pre-requisites: MUSC 244 and MUSC 245
Composers in the modern era turn to innovative and foreign influences as technological developments allow the Western musical tradition to spread throughout the world.
Course equivalencies: MUSC354 / MUSC254
Outcomes:
Students are able to identify and articulate the many musical innovations and movements that helped turn Western music into a global force of expression

MUSC 363 Foundations of Vocal Technique and Pedagogy (3 Credit Hours)
This course will acquaint students with the basics of anatomy and physiology associated with singing technique, including the anatomy of the larynx, the structure of posture and breathing, and the physics of resonance. Additional topics will include vocal registers, healthy use of voice, and the basics of vocal instruction. Recognize healthy modes of phonation across musical styles. Learn to structure a voice lesson.
Outcomes:
Identify the major anatomical structures used in singing and their function

MUSC 364 Vocal Repertoire (3 Credit Hours)
This course covers a broad spectrum of vocal repertoire from 1600 to the present. Emphasis will be given to the application of stylistic conventions and the development of effective performance skills, culminating in public performance.
Outcomes:
To gain knowledge of important vocal repertoire and history; To develop the creative capacity to perform vocal music of different styles and eras

MUSC 365 Vocal Performance Workshop (3 Credit Hours)
The class aims to develop students' ability to deliver compelling performances on the musical stage. The first portion of the semester is focused on gaining and applying theoretical knowledge of acting for the singer. The second portion of the class focuses on preparing and performing opera/musical scenes.
Outcomes:
Acquire foundational skills in acting for singers / Learn basics of stagecraft for musical production / Perform operatic and/or musical theatre scenes

MUSC 370 The Business of Music (3 Credit Hours)
The Business of Music will offer a broad overview as to how the music industry works and provide insight into various career options. The course will include weekly discussions on current events in the music industry as they occur and feature a host of guest speakers. Students will also learn about the recording industry, music publishing, and the digital music world.
Outcomes:
An understanding of careers in the areas of performance, composition, production, management, education, and radio

MUSC 374 Musical Theatre Repertoire (4 Credit Hours)
This capstone repertoire course synthesizes musical theatre history, theory and performance. It is designed to develop students' ability to perform vocally, dramatically and physically within the canon of musical theatre repertoire. It culminates in a musical theatre showcase which features student performance of the repertoire learned in class.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will demonstrate an understanding of the history of musical theatre performance by comparing the work of significant composers, directors and choreographers and demonstrate understanding of the intrinsic requirements for effective synthesis of vocal, dramatic and dance performance

MUSC 380A Applied Music Advanced: Clarinet (1 Credit Hour)
Twelve 60-minute individual lessons in clarinet. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 380AA Applied Music Advanced: Conducting (1 Credit Hour)
Pre-requisites: MUSC 144, MUSC 145, MUSC 244, MUSC 245, MUSC 260
Twelve 60-minute individual lessons in conducting. Topics include: baton techniques, gestural mechanics, ear training, score study, transpositions, orchestrational basics, phrasing, and chord recognition. Choral, orchestral, or wind band considerations will be explored in greater detail, according to the background of the student.
Outcomes:
Advanced skills in conducting both small and large ensembles, score study, rehearsal, and concert programming

MUSC 380B Applied Music Advanced: Percussion (1 Credit Hour)
Twelve 60-minute individual lessons in percussion. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 380BB Applied Music Advanced: Improvisation (1 Credit Hour)
Pre-requisites: MUSC 144, 145, 244, 245, 185, 385
Twelve 60-minute individual lessons in improvisation. Building upon a strong theoretical foundation attained from the prerequisite courses, students receive focused instruction on the harmonic, melodic, and rhythmic theories that lead to the ability to improvise. Students may study with any of the jazz faculty regardless of their primary instrument.
Outcomes:
Students will learn to improvise over intermediate to advanced tunes in the jazz repertoire

MUSC 380C Applied Music Advanced: Oboe (1 Credit Hour)
Twelve 60-minute individual lessons in oboe. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 380E Applied Music Advanced: Trumpet (1 Credit Hour)
Twelve 60-minute individual lessons in trumpet. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 380F Applied Music Advanced: Saxophone (1 Credit Hour)
Twelve 60-minute individual lessons in saxophone. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 380G Applied Music Advanced: Guitar (1 Credit Hour)
Twelve 60-minute individual lessons in classical or electric guitar. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 380I Applied Music Advanced: Organ (1 Credit Hour)
Twelve 60-minute individual lessons in organ. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 380J Applied Music Advanced: Piano (1 Credit Hour)
Twelve 60-minute individual lessons in piano. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 380K Applied Music Advanced: Voice (1 Credit Hour)
Twelve 60-minute individual lessons in voice. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 380L Applied Music Advanced: Violin (1 Credit Hour)
Twelve 60-minute individual lessons in violin. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 380M Applied Music Advanced: Flute (1 Credit Hour)
Twelve 60-minute individual lessons in flute. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 380N Applied Music Advanced: Cello (1 Credit Hour)
Twelve 60-minute individual lessons in cello. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 380O Applied Music Advanced: Double Bass (1 Credit Hour)
Twelve 60-minute individual lessons in double bass. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 380P Applied Music Advanced: Viola (1 Credit Hour)
Twelve 60-minute individual lessons in viola. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 380Q Applied Music Advanced: Horn (1 Credit Hour)
Twelve 60-minute individual lessons in horn. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 380R Applied Music: Advanced Trombone (1 Credit Hour)
Twelve 60-minute individual lessons in trombone. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 380S Applied Music Advanced: Harp (1 Credit Hour)
Twelve 60-minute individual lessons in harp. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 380U Applied Music Advanced: Drum Set (1 Credit Hour)
Twelve 60-minute individual lessons in drum set. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 380V Applied Music Advanced: Low Brass (1 Credit Hour)
Twelve 60-minute individual lessons in low brass, including euphonium and/or tuba. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 380Y Applied Music Advanced: Bassoon (1 Credit Hour)
Twelve 60-minute individual lessons in bassoon. Performance opportunities including studio classes, Honors Recital, and an end-of-semester jury. May be repeated for up to 8 credit hours.
Outcomes:
Functional to advanced performance ability based on technical and musical development

MUSC 380Z Applied Music Advanced: Composition (1 Credit Hour)
Pre-requisites: MUSC 144, 244,145, 245; 246 or 248
Twelve 60-minute individual lessons. Building upon a strong theoretical foundation attained from the prerequisite courses, students receive focused instruction to develop original compositions from concept to completion. Idioms, genres, forms, instrumentation, and other considerations will vary from student to student. May be repeated for up to 8 credit hours.
Outcomes:
The ability to more fully develop original musical ideas into completed, and professionally notated, compositions

MUSC 385 Jazz Improvisation II (3 Credit Hours)
Pre-requisites: MUSC 185 Jazz Improvisation
A continued study of the harmonic, melodic, and rhythmic theories that lead to the ability to improvise in the jazz genre. Emphasis is on ear training, listening, extended harmony, motivic development, rhythm, and scale /chord relationships.
Outcomes:
Students will be able to construct bass lines, build four-part chordal accompaniment at the piano, and improvise melodies and improvise over intermediate to advanced tunes in the jazz

MUSC 386 Orchestration (3 Credit Hours)
Pre-requisites: MUSIC 144 or permission of chair
Immersion in the art of writing for the instruments of the orchestra in order to understand and write /arrange music for the indigenous capability of each instrument while achieving desired sound effects.
Outcomes:
Ability to score effectively for every instrumental family and also to write/arrange music for any instrumental ensemble

MUSC 387 Solo Recital: MUSC Capstone (1-4 Credit Hours)
Pre-requisites: Department's permission and audition
Preparation and presentation of a full-length, balanced program by memory in one's major area of performance. This may be taken twice for credit.
Outcomes:
For the performance-oriented student, the capstone of 4 years of applied study as well as fulfillment of an experience required by graduate schools for performance majors

MUSC 388 Lecture/Recital: MUSC Capstone (3 Credit Hours)
Pre-requisites: Music Major only
A directed studies capstone experience course. Project proposal must be approved by the course advisor by the end of the first week of the semester. A Public presentation of the project is required. Examples of appropriate capstone projects include, a performance of a composition, paper presentation, digital music design for a commercial product, conduct a chamber ensemble or the creation of a music installation. This course satisfies the Engaged Learning requirement.
Outcomes:
Synthesize previous course work into a public presentation in the students' area of interest

MUSC 389 Topics in Music (1-9 Credit Hours)
Specific course titles and content will vary. May be taken as directed study under the supervision of a designated faculty member for independent or small group research in special areas of interest. Because of variations described, students may repeat the course for a total of six hours.
Outcomes:
Opportunity to experience a music elective which is not ordinarily in the music offerings and thus enables individual enhancement of unique interests

MUSC 394 Internship in Music (1-6 Credit Hours)
Music students complete a semester long internship providing an opportunity to use their technical, research or organizations skills in a professional setting. Students must complete and reflect upon 50 hours of internship experience per credit hour that is pre-approved by the Department of Fine and Performing Arts. Department permission required. No more than 6 credit hours of Internship or Fieldwork can be applied to the major.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students gain professional experience working at a music organization while reflecting on their work experience and applying theories and techniques acquired from their music courses

MUSC 397 Fieldwork in Chicago - Music (1-6 Credit Hours)
Variable credit (1-6 hours) given for performances or projects undertaken with professional music organizations outside the university. Students keep a journal and write evaluative papers. Permission of the Department of Fine and Performing Arts Required. Repeatable for up to 6 credit hours, however no more than 6 credit hours can be applied towards the major.
This course satisfies the Engaged Learning requirement.
Outcomes:
Specific outcomes and credit hours to be assigned to be determined by the student in consultation with the Director of Music and the project supervisor

MUSC 399 Independent Study (1-6 Credit Hours)
Pre-requisites: written permission of chairperson
Independent study projects may be of various kinds and in any recognized area of the theatre arts. Such projects should be done under the close supervision of a music faculty member.
Outcomes:
Specific outcomes and credit hours assigned to be determined by the student in consultation with the chairperson and theatre faculty supervisor

Neuroscience (NEUR)

Discover, search, courses (p. 2661)!

NEUR 101 Introduction to Neuroscience (3 Credit Hours)
Pre-requisites: None; Recommended: BIOL 101 and PSYC 101
This course will introduce students to basic concepts and the variety of topics in the field of neuroscience, including neuroanatomy (gross and cellular), neurophysiology, the neural basis of behavior, malfunctions due to disease and injury, and methods used to study these areas, laying a foundation for advanced coursework in neuroscience.
Interdisciplinary Option: Neuroscience
Course equivalencies: X-BIOL 202/PSYC202/NEUR 101
Outcomes:
Knowledge of the organization of the nervous system, neural processes underlying cognitive functioning and behavior, and awareness of research methods and techniques for advancing the interdisciplinary field of neuroscience

NEUR 300 Seminar in Neuroscience (1 Credit Hour)
Pre-requisites: NEUR 101 with grade of C- or better; Restricted to Neuroscience Majors or Minors
The seminar introduces students to the interdisciplinary nature of modern neuroscience with an emphasis on the various neuroscience research activities employed in the field both at Loyola University Chicago and other academic and professional environments.
Interdisciplinary Option: Neuroscience
Outcomes:
Students will become proficient in reading and listening to primary neuroscience research; Students will also reflect on current neuroscience research with respect to contemporary issues in society

Peace Studies (PAX)

Discover, search, courses (p. 2661)!

PAX 201 Peace Studies Overview (3 Credit Hours)
A general introduction to peace studies as an area of inquiry. Students identify concrete social justice issues and their relevance to domains of societal, international and ecological spheres of violence and address literature on nonviolence or limited use of violence through a critical research paper and other course applications.
Interdisciplinary Option: Interreligious and Interfaith Studies, Peace, Justice, and Conflict Studies

PAX 390 Directed Readings in Peace Studies (3 Credit Hours)
An independent program of reading and research developed in consultation with a supervising faculty member and the PAX director. It usually includes a review of the peace studies literature in the student's major field, with a final research project that integrates the student's major with peace studies.
Interdisciplinary Option: Peace, Justice, and Conflict Studies

Pharmacology (PHAR)

Discover, search, courses (p. 2661)!

PHAR 405 Pharmacology Journal Club (0-1 Credit Hours)
This course involves students in reading and presenting the scientific literature in journal club format with the goals of learning to, i) evaluate the pharmacological literature and voice a critique in a constructive manner, ii) present such literature in a peer-context, and iii) assimilate information presented by other speakers and formulate, ask, and discuss around relevant appropriate questions.

PHAR 406 Special Problems in Pharmacology (1-4 Credit Hours)
This course covers a specific topic in pharmacological or biomedical sciences. The topics can vary among different special topics courses.

PHAR 407 Fundamentals of Drug Discovery and Development (3 Credit Hours)
This course introduces the process of drug discovery, and students will explore the theoretical and practical aspects of the entire process from concept to clinical trials. Topics include selection, design and use of disease models, current methods and strategies of drug target identification, lead molecule identification, the clinical trial process and pre- and post-market safety.
Outcomes:
Upon completion of this course, the students will have sufficient understanding of the drug discovery process to: 1) Discuss the methods and strategies used to identify potential drug targets; 2) Describe approaches used to screen for lead molecules; 3) Articulate the general FDA regulatory requirements encountered in bringing a new drug to market; 4) Identify requirements for pre-clinical assessment of potential compounds; 5) Define and describe the steps of the clinical trials process; and 6) Articulate and discuss ethical aspects in drug development, including, but not limited to, animal use, clinical trials, intellectual property and research design and integrity

PHAR 408 Molecular Basis of Disease and Therapeutics (3 Credit Hours)
The course focus is on understanding contemporary research in the pathophysiology of major human diseases and in the development of respective therapeutic treatment strategies. Emphasis will be on cutting edge studies in molecular medicine, including topics in cardiology, endocrinology, oncology, inflammatory diseases and in the neurosciences. There are no prerequisites, but students should have a solid understanding of cell and molecular biology, biochemistry and systems physiology.
Outcomes:
Understand contemporary research strategies applicable to investigating the molecular basis of disease and therapeutics and develop critical thinking and writing skills in hypothesis testing, experimental design and data analyses

PHAR 409 Principles of Pharmacology (3 Credit Hours)
This course introduces students to the fundamental principles of pharmacology and the clinical use of the major classes of drugs currently used with a focus upon fundamental concepts. Topics include drugs and their receptors, molecular aspects of drug targets and drug action, pharmacodynamics and the quantitative aspects of drug-receptor interactions, pharmacokinetic properties of drugs influencing drug distribution and drug dosing, drug metabolism and the effects of genetics on drug action, mechanisms of drug toxicity, and scientific approaches to the discovery of new drugs. Finally, the pharmacology and clinical uses of the major classes of drugs, including drugs used to treat diseases of various systems including cardiovascular, central nervous system, endocrine/reproductive systems, and cancer are covered.

PHAR 410 Signal Transduction (3 Credit Hours)
This course is open to all Ph.D., M.D./Ph.D., and M.S. students. Students will gain a theoretical and practical understanding of how extracellular signals are transduced through receptors into metabolic events. It is designed for second year PhD students who have completed the Biomedical Sciences core curriculum. The format is one lecture followed by one research paper discussion for each topic. Students will also gain in-depth knowledge of the signal transduction topics covered in the course.
Outcomes:
Students will be able to interpret data and design experiments examining signal transduction pathways

PHAR 415 Current Topics in Pharmacology and Epidemiology of Disease (2 Credit Hours)
This advanced graduate level course will cover an up-to-date overview of topics directly relevant to pharmacovigilance, pharmacoepidemiology, and the factors that play a role in success or failure of approved therapeutic agents.
Outcomes:
Students who complete this course will gain knowledge of major epidemiology concepts and statistical principles used in epidemiology and pharmacovigilance

PHAR 420 Pharmacovigilance: A Practical Approach (4 Credit Hours)
This advanced graduate level course will provide an up-to-date and in-depth understanding of pharmacovigilance in the context of modern pharmaceutical drug development and pharmacology. Pharmacovigilance is the pharmacological science relating to the detection, collection, assessment, monitoring, and prevention of adverse effects associated with pharmaceutical products. Enrollment Condition: Drug Discovery (PHAR 407), recommended but not required Students will be able to identify and describe the regulatory environment and product safety as it pertains to the collection, assessment, reporting and analysis of adverse events.
Outcomes:
Upon completion of this course, students will demonstrate an understanding of pharmacovigilance and patient safety

PHAR 453 The Teaching of Pharmacology (0-1 Credit Hours)
This course teaches the practice and pedagogy of graduate level teaching. Students work under supervision to prepare and present a didactic lecture which is reviewed by faculty and students.

PHAR 499 Research (1-12 Credit Hours)
Independent research for thesis or dissertation under the supervision of a faculty research advisor. Credit varies based upon assigned effort and time spent in the laboratory. Students receive a letter grade from their research advisor.
Outcomes:
Generate, analyze, and interpret original research data using appropriate analytical and statistical approaches; Apply appropriate experimental methodologies to investigate the hypotheses in your proposal, including, if appropriate, therapeutic discovery/development, molecular mechanisms of disease and drug action, toxicology, and drug safety/pharmacovigilance; Integrate findings from experimental studies with current scientific literature to advance understanding of pharmacological mechanisms; Demonstrate independence, professionalism, and ethical conduct in the planning, execution, and reporting of your research

PHAR 595 Thesis Supervision (1 Credit Hour)
Supervised research and writing leading to the completion of the masters of science thesis and degree.
Outcomes:
Develop and write a research thesis proposal addressing a significant question in molecular pharmacology; Generate, analyze, and interpret original research data using appropriate analytical and statistical approaches; Integrate findings from experimental studies with current scientific literature to advance understanding of pharmacological mechanisms; Demonstrate independence, professionalism, and ethical conduct in the planning, execution, and reporting of your research

PHAR 600 Dissertation Supervision (1 Credit Hour)
Supervised research and writing leading to the completion of the Ph.D. dissertation and degree.
Outcomes:
Develop and write a research dissertation proposal addressing a significant question in molecular pharmacology; Apply appropriate experimental methodologies to investigate the hypotheses in your proposal, including, if appropriate, therapeutic discovery/development, molecular mechanisms of disease and drug action, toxicology, and drug safety/pharmacovigilance; Generate, analyze, and interpret original research data using appropriate analytical and statistical approaches; Integrate findings from experimental studies with current scientific literature to advance understanding of pharmacological mechanisms; Demonstrate independence, professionalism, and ethical conduct in the planning, execution, and reporting of your research

Philosophy (PHIL)

Discover, search, courses (p. 2661)!

PHIL 130 Philosophy & Persons (3 Credit Hours)
This course introduces students to the fundamental philosophical issues that bear on our understanding of persons in three equally weighted components, namely, Persons & Knowledge, Persons & Values, and Persons & Reality.
Knowledge Area: Foundational Philosophical Knowledge
Course equivalencies: PHIL120/130/180/ACPHI130
Outcomes:
Students will be able to explain a claim to truth, to explain theories of value in human life, and to describe theories of the metaphysical nature of human persons

PHIL 180 Being Human: Philosophical Perspectives (3 Credit Hours)
The course examines the way philosophy looks for fundamental characteristics that identify life as a properly human life, asks about its ultimate meaning or purpose, and raises questions about what counts as a good life.
Course equivalencies: PHIL120/130/180/ACPHI130
Outcomes:
Students will be able to demonstrate understanding of the various approaches of the philosophical question of what it means to be human

PHIL 181 Ethics (3 Credit Hours)
This course is a general introduction to ethics and moral philosophy.
Knowledge Area: Ethics
Course equivalencies: PHIL 181 / PHIL 281 /ACPHI 281
Outcomes:
Students will be able to demonstrate understanding of criteria for choosing between conflicting ethical theories, moral disagreement, the justification of moral judgments, and the application of ethical standards to practical decision-making and ethical questions that arise in everyday life

PHIL 182 Social and Political Philosophy (3 Credit Hours)
This course will investigate one of the central questions of philosophy and social theory: how we, as human beings, should live together.
Knowledge Area: Ethics
Course equivalencies: PHIL162/182/262/282/ACPHI205
Outcomes:
Students will be able to demonstrate understanding of the major philosophical questions in the area of social philosophy with attention to the historical and conceptual development of these questions and be able to articulate some of the major problems and responses central to this area of philosophy

PHIL 190 Loyola's Mission: The Philosophical Vision (3 Credit Hours)
Enrollment is limited to transfer students with 30 or more credit hours. The course introduces transfer students to the mission of LUC, especially "Transformative Education," by means of the methodology of philosophy."
Outcomes:
Students who take the course acquire an intellectual and experiential assimilation of LUC's mission, especially as it relates to "Transformative Education

PHIL 193 Contemporary Chinese Philosophy (3 Credit Hours)
Students will analyze the development of Chinese contemporary thought in its different stages: rejection of the tradition and its recent reevaluation.
Interdisciplinary Option: Asian Studies, Global Studies
Course equivalencies: X-PHIL193/ASIA193/INTS193

PHIL 262 Social & Political Philosophy - Civic Engagement (3 Credit Hours)
Pre-requisites: PHIL 130
This course will investigate one of the central questions of philosophy and social theory: how we, as human beings, should live together. Because it includes a service learning experience it satisfies the civic engagement core requirement.
Knowledge Area: Ethics
This course satisfies the Engaged Learning requirement.
Course equivalencies: PHIL162/182/262/282/ACPHI205
Outcomes:
Students will be able to demonstrate understanding of the major philosophical questions in the area of social philosophy with attention to the historical and conceptual development of these questions, and be able to articulate some of the major problems and responses central to this area of philosophy

PHIL 263 Contemporary Ethical Issues - Civic Engagement (3 Credit Hours)
Pre-requisites: PHIL 130
This course explores ethical reasoning by considering a variety of contemporary issues in ethics. Because it includes a service learning experience it satisfies the civic engagement core requirement.
Outcomes:
Students will develop a deeper appreciation of moral problems, and will gain practice in using philosophical moral reasoning

PHIL 264 Health Care Ethics - Civic Engagement (3 Credit Hours)
Requirement: PHIL 130 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of Philosophy or Department of Political Science. This course studies philosophical ethics as practiced in the health care setting. It includes a service-learning experience and satisfies the civic engagement core requirement.
Knowledge Area: Tier 2 Philosophical Knowledge
Interdisciplinary Option: Bioethics
This course satisfies the Engaged Learning requirement.
Course equivalencies: ACPHI 284 / PHIL 264/ PHIL 284
Outcomes:
Students will be able to demonstrate understanding of traditional moral theories in a health care framework, as well as the varieties of ethical challenges facing contemporary health care

PHIL 267 Aesthetics - Civic Engagement (3 Credit Hours)
Pre-requisites: PHIL 130 or equivalent; please check requirements for declared majors/minors for exceptions
The course explores philosophical issues in aesthetics like the nature of art and beauty through, in part, service-learning in retirement communities and theaters, as examples.
Outcomes:
Students will be able to demonstrate their understanding of aesthetics and the value of leadership development and civic engagement

PHIL 271 Philosophy of Religion (3 Credit Hours)
Pre-requisites: PHIL 130 or equivalent; please check requirements for declared majors/minors for exceptions
This course explores the development, not only of some classic positions within the philosophy of religion, but also of how these views have affected the formulation of more contemporary discussions.
Knowledge Area: Tier 2 Philosophical Knowledge
Course equivalencies: PHIL 171 / PHIL 271
Outcomes:
Students will be able to demonstrate understanding of the enterprise of using reason, broadly construed, to articulate issues arising out of religious belief and practice and to formulate and defend positions with respect to those issues

PHIL 272 Metaphysics (3 Credit Hours)
Pre-requisites: PHIL 130 or equivalent; please check requirements for declared majors/minors for exceptions
This course examines the fundamental principles by which the nature of reality can be explained.
Knowledge Area: Tier 2 Philosophical Knowledge
Course equivalencies: PHIL 172 / PHIL 272
Outcomes:
Students will be able to demonstrate understanding of the central issues surrounding the field of metaphysics

PHIL 273 Philosophy of Science (3 Credit Hours)
Pre-requisites: PHIL 130 or equivalent; please check requirements for declared majors/minors for exceptions
This course examines the nature of scientific knowledge and its claim to possess a distinctive method of inquiry.
Knowledge Area: Tier 2 Philosophical Knowledge
Interdisciplinary Option: Neuroscience
Course equivalencies: PHIL 173 / PHIL 273
Outcomes:
Students will be able to demonstrate understanding of the mode of inquiry which is the scientific method

PHIL 274 Logic (3 Credit Hours)
Pre-requisites: PHIL 130 or equivalent; please check requirements for declared majors/minors for exceptions
This course is a detailed study of the deductive methods and principles of correct reasoning, from both the traditional and modern point of view.
Knowledge Area: Tier 2 Philosophical Knowledge
Course equivalencies: PHIL 174/PHIL 274/ACPHI 274
Outcomes:
Students will be able to formally analyze, evaluate, and demonstrate the various aspects of argumentation

PHIL 275 Theory of Knowledge (3 Credit Hours)
Pre-requisites: PHIL 130 or equivalent; please check requirements for declared majors/minors for exceptions
This course examines both the nature and the reliability of human knowledge.
Knowledge Area: Tier 2 Philosophical Knowledge
Course equivalencies: PHIL 175 / PHIL 275
Outcomes:
Students will be able to demonstrate understanding of the various approaches to the study of knowledge

PHIL 276 Philosophy of Mind (3 Credit Hours)
This course is a study of the different philosophical views regarding the nature and the existence of the mind and its relation to material bodies.
Interdisciplinary Option: Neuroscience
Course equivalencies: X-PSYC 276/ PHIL 276/PHIL 176
Outcomes:
Students will be able to demonstrate understanding of the various philosophical views and problems regarding the mind and its relation to matter

PHIL 277 Aesthetics (3 Credit Hours)
Pre-requisites: PHIL 130 or equivalent; please check requirements for declared majors/minors for exceptions
This course will explore one or more of the following philosophical questions in aesthetics: What is art? What is good art (art evaluation or critical theory)? What is beauty? What is it about human nature that allows us to experience beauty?
Knowledge Area: Tier 2 Philosophical Knowledge
Course equivalencies: PHIL 277/PHIL 277R
Outcomes:
Students will be able to demonstrate understanding of the various approaches to the philosophical study of beauty and the arts

PHIL 277R Aesthetics: the Aesthetic Experience in Rome (3 Credit Hours)
Pre-requisites: PHIL 130 or equivalent; please check requirements for declared majors/minors for exceptions
This course will explore one or more of the following philosophical questions in aesthetics, with reference particularly to aesthetic experience in Rome: What is art? What is good art (art evaluation or critical theory)? What is beauty? What is it about human nature that allows us to experience beauty? Outcomes: Students will be able to demonstrate understanding of the various approaches to the philosophical study of beauty and the arts.
Knowledge Area: Tier 2 Philosophical Knowledge
Interdisciplinary Option: Italian Studies
Course equivalencies: PHIL 277/PHIL 277R
Outcomes:
Students will be able to demonstrate understanding of the various approaches to the philosophical study of beauty and the arts

PHIL 279 Judgment and Decision-Making (3 Credit Hours)
Pre-requisites: PHIL 130 or equivalent; please check requirements for declared majors/minors for exceptions
Students can take only one course from PHIL 279, PSYC 279, PSYC 280.
This course examines the philosophical and psychological foundations of decision-making.
Knowledge Area: Tier 2 Philosophical Knowledge
Outcomes:
Students will be able to demonstrate understanding of the principles of reasoning and decision-making

PHIL 283 Business Ethics (3 Credit Hours)
Effective Spring 2007 students who have taken and successfully passed PHIL 185 are not eligible to take MGMT 341. This course is an introduction to ethics which focuses on ethical issues in the world of business and commerce.
Outcomes:
Students will be able to examine and assess various ethical theories and apply those theories to ethical issues in business

PHIL 284 Health Care Ethics (3 Credit Hours)
Pre-requisites: PHIL 130 or equivalent, Please check requirements for declared majors/minors for exceptions
This course studies philosophical ethics as practiced in the health care setting.
Knowledge Area: Tier 2 Philosophical Knowledge
Interdisciplinary Option: Bioethics
Course equivalencies: ACPHI 284 / PHIL 264/ PHIL 284
Outcomes:
Students will be able to demonstrate understanding of traditional moral theories in a health care framework, as well as the varieties of ethical challenges facing contemporary health care

PHIL 285 Contemporary Ethical Issues (3 Credit Hours)
This course explores ethical reasoning through consideration of a variety of contemporary issues in ethics, such as: abortion, euthanasia, corruption, discrimination, poverty, and justice.
Interdisciplinary Option: Bioethics
Outcomes:
Students will develop a deeper appreciation of moral problems and will gain practice at using philosophical moral reasoning to come to justifiable ethical choices and answers

PHIL 286 Ethics and Education (3 Credit Hours)
Pre-requisites: PHIL 130 or equivalent; please check requirements for declared majors/minors for exceptions
This course examines philosophical ethics as it informs and guides the activity of teaching.
Knowledge Area: Tier 2 Philosophical Knowledge
Outcomes:
Students will be able to examine and assess various ethical theories and apply those theories to ethical issues in teaching

PHIL 287 Environmental Ethics (3 Credit Hours)
Pre-requisites: PHIL 130 or equivalent; please check requirements for declared majors/minors for exceptions
This course introduces students to ethical reasoning and to various topics in environmental ethics. Topics may include: pollution, animal rights, and natural resources.
Knowledge Area: Tier 2 Philosophical Knowledge
Interdisciplinary Option: Bioethics
Course equivalencies: PHIL187/BIET187
Outcomes:
Students will demonstrate an understanding of diverse ethical theories and an ability to use philosophical reasoning to defend positions in topics covered

PHIL 288 Culture and Civilization (3 Credit Hours)
Pre-requisites: PHIL 130 or equivalent; please check requirements for declared majors/minors for exceptions
This course examines the nature, causes, and possible future development of human culture and civilization.
Knowledge Area: Tier 2 Philosophical Knowledge
Course equivalencies: PHIL 288/288R
Outcomes:
Students will be able to demonstrate understanding of the various approaches to the philosophical study of human culture and civilization

PHIL 288R Culture & Civilization in Rome (3 Credit Hours)
Pre-requisites: PHIL 130 or equivalent; please check requirements for declared majors/minors for exceptions
This course examines the nature, causes, and possible future development of human culture and civilization with an emphasis on Italian philosophers during the Renaissance.
Knowledge Area: Tier 2 Philosophical Knowledge
Interdisciplinary Option: Italian American Studies, Italian Studies
Course equivalencies: PHIL 288/288R
Outcomes:
Students will be able to demonstrate understanding of the various approaches to the philosophical study of human culture and civilization

PHIL 289 Philosophy and Gender (3 Credit Hours)
This course considers gender as a philosophical question. Is gender simply a biological truth, or is it a social construct? How does gender affect our roles and opportunities in society? Should gender play a role in discussion of human rights?
Outcomes:
The student will develop a philosophical understanding of gender and will be able to articulate in a thoughtful manner understanding of issues concerning ethics, society and biology concerning gender

PHIL 301 Symbolic Logic (3 Credit Hours)
This course is an introduction to the study of modern symbolic logic, emphasizing formalization and proof construction. The student is introduced to the terminology and chief concepts of modern logic.
Outcomes:
Students will be able to symbolically analyze, evaluate, and demonstrate the various aspects of formal reasoning

PHIL 302 Topics in Formal Logic (3 Credit Hours)
Selected topic regarding logical theory or metatheory, such as the completeness of formal systems, non-standard logics, computability, foundational issues regarding mathematics.
Outcomes:
Students will develop an advanced understanding of the selected topic in formal logic

PHIL 304 History of Ancient Philosophy (3 Credit Hours)
Pre-requisites: Students must have taken at least two philosophy courses
This course studies the philosophies of the ancient Greeks, including the pre-Socratics, Plato, and Aristotle.
Interdisciplinary Option: European Studies, Italian Studies
Course equivalencies: X-PHIL304/CLST304
Outcomes:
Students will be able to understand and articulate philosophical problems and answers representative of the ancient Greek philosophers

PHIL 305 Medieval Philosophy (3 Credit Hours)
This course studies the philosophies of the major thinkers of the 4th to the 12th centuries, such as Augustine, Scotus, Boethius, Avicenna, Anselm, Abelard, Maimonides, and Averroes.
Interdisciplinary Option: Catholic Studies, European Studies, Medieval Studies
Course equivalencies: X-PHIL305/CATH305/MSTU344
Outcomes:
Students will be able to understand and articulate philosophical problems and answers representative of the early medieval philosophers

PHIL 306 19th Century Philosophy (3 Credit Hours)
Pre-requisites: Students must have taken at least two philosophy courses
This course studies 19th century post-Kantian philosophy from idealism toward phenomenology. May include philosophers such as Hegel, Nietzsche, and Husserl.
Interdisciplinary Option: European Studies, German Studies
Outcomes:
Students will be able to understand and articulate philosophical problems and answers representative of 19th century post-Kantian philosophy

PHIL 307 13th & 14th Century Philosophy (3 Credit Hours)
This course studies major thinkers of the 13th and 14th centuries, such as Albertus Magnus, Aquinas, Scotus, William of Ockham, Roger Bacon.
Interdisciplinary Option: Catholic Studies, European Studies
Course equivalencies: X-PHIL307/CATH307
Outcomes:
Students will be able to understand and articulate philosophical problems and answers representative of the late medieval philosophers

PHIL 308 Islamic Philosophy (3 Credit Hours)
Covers the development of classical Islamic philosophy from 800 to 1200 CE. Attention will be given to the central topics (God, the cosmos, knowledge, the human good) with which Muslim philosophers were concerned and to major figures such as Al-Kindi, Al-Farabi, Ibn Sina (Avicenna). Al-Ghazali and Ibn Rushd (Averroes).
Interdisciplinary Option: Middle East and Islamic World Studies
Course equivalencies: X-PHIL308THEO357MSTU334IWS308
Outcomes:
Students will be able to articulate and discuss major philosophical problems of concern to Muslim philosophers of the classical period

PHIL 309 Classical Modern Philosophy (3 Credit Hours)
Pre-requisites: Students must have taken at least two philosophy courses
This course studies selected philosophers from the early modern period, such as Descartes, Spinoza, Leibniz, Locke, Hume, Berkeley, Kant.
Interdisciplinary Option: European Studies, German Studies
Outcomes:
Students will be able to understand and articulate philosophical problems and answers representative of the early modern philosophers

PHIL 310 Issues in Philosophy of Human Nature (3 Credit Hours)
Pre-requisites: Students must have taken at least two philosophy courses
This course gives intensive consideration to various issues that pertain to being human, such as freedom, determinism, person, society, mind-body, immortality, etc.
Outcomes:
Students will be able to understand and articulate a deeper awareness of philosophical problems and answers regarding key issues of human nature

PHIL 311 Issues in Metaphysics (3 Credit Hours)
Pre-requisites: Students must have taken at least two philosophy courses
This course studies various philosophical issues regarding the nature of all reality, including existence, causality, relations, abstract entities, purpose, the possibility of knowledge of reality.
Outcomes:
Students will be able to understand and articulate a deeper awareness of philosophical problems and answers regarding key metaphysical issues

PHIL 312 Problems in the Philosophy of God (3 Credit Hours)
Pre-requisites: Students must have taken at least two philosophy courses
This course studies classical and contemporary approaches to knowledge of the existence of God, divine attributes, good and evil, providence and human freedom.
Interdisciplinary Option: Catholic Studies
Outcomes:
Students will be able to understand and articulate a deeper awareness of philosophical problems and answers regarding philosophical views of God

PHIL 318 Philosophy of Art (3 Credit Hours)
Reading and discussion of selected philosophical texts concerning the nature of art and artistic experience.
Outcomes:
Students will be able to understand and articulate philosophical problems and answers to questions regarding the nature of art and artistic experience

PHIL 319 Studies in Philososphy & Literature (3 Credit Hours)
This course is a study of selected works of literature and a discussion of philosophical issues in relation to these works.
Outcomes:
Students will be able to understand and articulate a deeper awareness of philosophical problems and answers to questions regarding the nature of literary work, the relations of philosophical and literary language, and methods of interpretation

PHIL 320 The Philosophy of St Augustine (3 Credit Hours)
This course is a study of the principal works of Augustine, such as the Confessions, City of God.
Interdisciplinary Option: Catholic Studies, Medieval Studies
Course equivalencies: X-PHIL320/CATH320/MSTU346
Outcomes:
Students will be able to understand and articulate philosophical problems and answers found in the works of Augustine

PHIL 321 Ethics and Society (3 Credit Hours)
Pre-requisites: Students must have taken at least two philosophy courses
This course is a study of the rights, duties, and virtues of individuals as members of societies, covering issues such as family and state, social justice, international society, war, and globalization.
Interdisciplinary Option: Sociolegal Studies
Outcomes:
Students will be able to understand and articulate a deeper awareness of philosophical problems and answers to questions regarding ethics in social contexts

PHIL 322 Feminist Philosophies (3 Credit Hours)
This course will examine a variety of philosophical frameworks for thinking about gender, sexuality, the problems of sexism, and proposed solutions to those problems. Students will explore the complexity and diversity of feminist thought by examining many different feminist philosophies including liberal, radical, cultural, Marxist/socialist, existentialist, postmodern, ecological, and indigenous perspectives.
Interdisciplinary Option: Women & Gender Studies
Outcomes:
Students will demonstrate competence in the terminology, concepts, methodologies, and theories used by feminist philosophers; Students will learn to analyze feminist philosophies from multiple perspectives and will develop reasoned solutions to problems; Students will learn to communicate knowledge, ideas, and reasoning clearly and effectively in written or oral forms

PHIL 323 Philosophy of Law (3 Credit Hours)
This course pursues a philosophical analysis of law. It deals with topics such as philosophical presuppositions of law, origin and purpose of law, law as social control, current legal problems involving ethical issues.
Interdisciplinary Option: Sociolegal Studies
Outcomes:
Students will be able to understand and articulate philosophical problems and answers to questions regarding law and its applications

PHIL 324 Topics in Ethics (3 Credit Hours)
Pre-requisites: Students must have taken at least two philosophy courses
This course studies a particular topic selected from the field of ethics.
Outcomes:
Students will be able to understand and articulate a deeper awareness of philosophical problems and answers to questions regarding the selected topic

PHIL 324B Bioethics Minor Capstone: Philosophical Topics (3 Credit Hours)
Pre-requisites: Two Science courses and two Ethics courses
This course number will only be used when PHIL 324 is tagged with the Bioethics Minor Capstone course.
Interdisciplinary Option: Bioethics
Outcomes:
Students will understand the connection between ethical and scientific issues with regard to the special topic in philosophy

PHIL 325 Ethics & Case Based Reasoning (3 Credit Hours)
Pre-requisites: Two previous philosophy courses
This course is an engaged learning course that provides students with a unique opportunity to practice applying moral theories and argumentative principles to personal and social- ethical problems, and to teach middle school students how to do the same. The course focuses on presenting solutions to cases and hence involves research, writing, and oral presentation.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to understand and articulate a deeper awareness of philosophical problems and answers to questions using a case based system

PHIL 326 Political Philosophy (3 Credit Hours)
This course is an examination of the major theories of political society, studying important aspects of political society and their relationships to human nature.
Interdisciplinary Option: Sociolegal Studies
Outcomes:
Students will be able to understand and articulate philosophical problems and answers to questions regarding the nature of political society in relation to its members

PHIL 327 Topics in Political Philosophy (3 Credit Hours)
This course will concentrate on a specific issue or issues in political philosophy. Typical topics include civil disobedience, war and peace, political revolution, punishment, and criminal justice.
Outcomes:
Students will be able to understand and articulate a deeper awareness of philosophical problems and answers to questions regarding the selected topic

PHIL 328 Philosophical Questions in Human Rights (3 Credit Hours)
Pre-requisites: Two prior courses in Philosophy
This course addresses questions in human rights such as the concept of rights and its critics, sovereignty and its relation to global governance, the role of intent, and how human rights are gendered.
Outcomes:
Students are expected to have an overview of the major legal frameworks for human rights, as well as an understanding of several of the major philosophical issues and related literature

PHIL 329 International Ethics (3 Credit Hours)
Pre-requisites: Two prior courses in either Philosophy or Political Science
This course is intended to give students an overview of some of the major frameworks for addressing ethical issues in the international arena. This includes Just War doctrine, economic rights, and global governance.
Outcomes:
Students are expected to be familiar with the major treaties, international law doctrines, and institutions relevant to international ethics, as well the pertinent secondary literature

PHIL 330 Theory of Knowledge (3 Credit Hours)
Pre-requisites: Students must have taken at least two philosophy courses
This course will study major philosophical positions regarding knowledge, belief, thought and language, truth, evidence, reason, perception, skepticism.
Outcomes:
Students will be able to understand and articulate philosophical problems and answers to questions regarding the field of knowledge and related issues

PHIL 331 Philosophy of Technology (3 Credit Hours)
Pre-requisites: Students must have taken at least two philosophy courses
This course introduces students to various philosophical approaches to technology with a special emphasis on computation and artificial intelligence.
Outcomes:
Describe and evaluate various approaches to technology's capacity to frame or shape human life; Describe and evaluate various philosophical approaches to artificial intelligence

PHIL 333 Language: Theories Ancient & Modern (3 Credit Hours)
Classical, modern, and contemporary philosophical theories on the nature and structure of human language.
Course equivalencies: X-LING333/PHIL333
Outcomes:
Students will be able to understand and articulate some philosophical problems and answers regarding the nature and structure of human language

PHIL 335 Asian Philosophy (3 Credit Hours)
A study of fundamental tenets of major Eastern philosophies (Chinese, Japanese, Indian) in comparison to Western tradition. Course may vary in emphasis on particular philosophies and themes.
Interdisciplinary Option: Asian Studies, Global Studies, Japanese Language and Culture
Course equivalencies: X-PHIL335/ASIA335/INTS334
Outcomes:
Students will be able to understand and articulate philosophical problems and answers to questions regarding Eastern philosophical thought

PHIL 340 Philosophy of St Thomas Aquinas (3 Credit Hours)
A study of the philosophy of Thomas Aquinas, including background regarding his life and medieval context.
Interdisciplinary Option: Catholic Studies, Medieval Studies
Course equivalencies: X-PHIL340/MSTU348
Outcomes:
Students will be able to understand and articulate philosophical problems and answers to questions regarding the thought of Aquinas and its medieval context

PHIL 342 Topics in the Catholic Philosophical Tradition (3 Credit Hours)
Pre-requisites: One class in philosophy or permission of instructor
This course examines the Catholic philosophical tradition, beginning with its roots in ancient Greek philosophy, through the medieval period in the work of figures such as St. Augustine and St. Thomas Aquinas, and up to and including contemporary Catholic philosophy.
Course equivalencies: X-CATH 303 / PHIL 342
Outcomes:
Students will be conversant and familiar with the Catholic philosophical tradition throughout its history, demonstrating proficiency in operating within the philosophical framework of this tradition

PHIL 344 Philosophy of Human Nature (3 Credit Hours)
The course explores at an advanced level the relation of human nature and aesthetics through, in part, service-learning in retirement communities and theaters, as examples.
Outcomes:
Students will be able to demonstrate advanced understanding of the relation between human nature and aesthetics and the value of leadership development and civic engagement

PHIL 350 Directed Reading (3 Credit Hours)
Pre-requisites: Students must have taken at least two philosophy courses
Independent research according to program developed jointly by the student and a faculty director. Open to majors and to non-majors with the permission of the chairperson.
Outcomes:
Students will be able to understand and articulate philosophical problems and answers regarding the selected topic

PHIL 354 Topics in Bioethics (3 Credit Hours)
Pre-requisites: Students must have taken at least two philosophy courses
This course studies a particular topic selected from the field of bioethics.
Interdisciplinary Option: Bioethics
Outcomes:
Students will be able to understand and articulate a deeper awareness of philosophical problems and answers to questions regarding the selected topic in bioethics; Students will develop effective philosophical writing and presentation skills

PHIL 355 Neuroethics (3 Credit Hours)
Pre-requisites: students must have taken at least two philosophy courses
This course focuses on ethical considerations emerging from contemporary research in neuroscience, as well as neuroscientific techniques for studying ethical questions. Students will be able to demonstrate understanding of the ways in which the study of ethics and neuroscience inform each other
Interdisciplinary Option: Bioethics
Course equivalencies: X - PSYC355/PHIL355

PHIL 360 Contemporary European Philosophy (3 Credit Hours)
Pre-requisites: Students must have taken at least two philosophy courses
Readings and discussion drawn from contemporary French and German philosophers, such as Merleau-Ponty, Sartre, Heidegger, Derrida, Foucault.
Interdisciplinary Option: European Studies
Outcomes:
Students will be able to understand and articulate philosophical problems and answers representative of contemporary French and German philosophy

PHIL 362 The British Philosophers (3 Credit Hours)
Readings and discussion drawn from early modern and modern British philosophers such as Hobbes, Locke, Hutcheson, Hume, Smith, Bentham, Mill.
Outcomes:
Students will be able to understand and articulate philosophical problems and answers representative of early British philosophy

PHIL 369 Philosophy of Medicine (3 Credit Hours)
Pre-requisites: Students must have taken at least two philosophy courses
This course investigates philosophical questions concerning the practice of medicine, such as the epistemology of medicine, the nature of health and disease, what is a profession, and the nature of suffering.
Interdisciplinary Option: Bioethics
Course equivalencies: X-PHIL369/BIET369
Outcomes:
The student will develop a critical understanding of the practice of medicine from a philosophical point of view

PHIL 370 Intro to American Philosophy (3 Credit Hours)
This course studies American Philosophers such as Peirce, James, Dewey, with an evaluation of their principles.
Outcomes:
Students will be able to understand and articulate philosophical problems and answers representative of American philosophy

PHIL 374 Philosophy of History (3 Credit Hours)
Study of the nature of historical knowledge and of theories concerning historical process.
Outcomes:
Students will be able to understand and articulate philosophical problems and answers regarding history as a discipline and a historical process

PHIL 375 Philosophy of Marxism (3 Credit Hours)
A study of the philosophical dimensions of the thought of Karl Marx, his 19th century precursors and 20th century interpreters.
Interdisciplinary Option: German Studies
Course equivalencies: PHIL394/PHIL375
Outcomes:
Students will be able to understand and articulate philosophical problems and answers to questions regarding the thought of Karl Marx and Marxism

PHIL 379 John F. Grant, M.D., Symposium on Health Care Ethics (3 Credit Hours)
Pre-requisites: Students must have taken at least two philosophy courses
This course explores contemporary philosophical, ethical, and social policy questions concerning issues in health care and biomedical ethics.
Interdisciplinary Option: Bioethics
Outcomes:
Students will develop a more advanced understanding of contemporary health care ethics and bioethics through direct student participation in an interactive seminar environment; Students will learn to apply ethical reasoning and ethical judgment (concepts, theories, methods) to discuss issues in health care and biomedical ethics; Students will develop effective writing and oral presentation skills

PHIL 380 Topics in Philosophy of Religion (3 Credit Hours)
Pre-requisites: Students must have taken at least two philosophy courses
This course studies various philosophical issues regarding religion. May include issues such as religious concepts, types of religion, divine attributes, free will and providence, problem of evil.
Course equivalencies: PHIL391/PHIL380
Outcomes:
Students will be able to understand and articulate a deeper awareness of philosophical problems and answers regarding key religious issues

PHIL 381 Philosophy of Science (3 Credit Hours)
Readings and discussion of selected texts regarding theories of scientific methods, scientific reasoning, metaphysical foundations of science, philosophical problems of scientific theories about physical reality.
Outcomes:
Students will be able to understand and articulate philosophical problems and answers regarding scientific inquiry and theory

PHIL 382 Philosophy of Social Science (3 Credit Hours)
Study of philosophical issues in the practice of contemporary behavioral sciences: theory, fact and value, causality, relativism, functionalism, statistical generalization, social planning.
Outcomes:
Students will be able to understand and articulate philosophical problems and answers regarding issues in the behavioral sciences

PHIL 383 Philosophy of Psychology (3 Credit Hours)
Pre-requisites: Students must have taken at least two philosophy courses
A philosophical analysis of theoretical positions in psychology. May include issues regarding methodology, perception, learning theory, rationality, emotions.
Outcomes:
Students will be able to understand and articulate philosophical problems and answers regarding issues in the field of psychology

PHIL 384 Topics in Philosophy & Science (3 Credit Hours)
Particular topics selected from philosophy and science. Typical topics include the Scientific Revolution, positivism, space and time, relativity theory, cosmology, evolution.
Outcomes:
Students will be able to understand and articulate philosophical problems and answers regarding the selected topic

PHIL 385 Environmental Ethics (3 Credit Hours)
This course will examine a number of controversial moral issues involving our environment. Theoretical and applied topics may include animal rights and species rights, nonwestern environmental perspectives, ecofeminism, duties to future generations, overpopulation, pollution, nuclear power, and environmental issues in policy making and business ethics.

PHIL 386 Analytic Philosophy (3 Credit Hours)
A survey of 20th century British and American philosophy in the analytic tradition, including philosophers such as Russell, Moore, Wittgenstein, Carnap, Quine.
Outcomes:
Students will be able to understand and articulate philosophical problems and answers regarding the analytic tradition in philosophy

PHIL 387 Topics in Philosophy of Mind (3 Credit Hours)
Pre-requisites: Students must have taken at least two philosophy courses
This course is a critical study of issues such as the mind-body problem, personal identity, knowledge of other minds, consciousness, and perception.
Interdisciplinary Option: Neuroscience
Outcomes:
Students will be able to understand and articulate philosophical problems and answers regarding issues in the philosophy of mind

PHIL 388 History of Ethics (3 Credit Hours)
An intensive study of the ethical theories of several major figures in the history of western moral philosophy, including, for example, the systems of Aristotle, Kant, and Mill.
Outcomes:
Students will develop a more advanced understanding of philosophical problems and answers to questions in the field of ethics by means of this historical study

PHIL 389 Contemporary Issues (3 Credit Hours)
Pre-requisites: Students must have taken at least two philosophy courses
Study of a selected topic in some area of contemporary philosophy.
Outcomes:
Students will be able to understand and articulate philosophical problems and answers regarding the selected topic

PHIL 390 Independent Study for Majors (3 Credit Hours)
Pre-requisites: Students must be a philosophy major with adequate background
In-depth independent research developed jointly by the student and a faculty director. The topic should be one with which the student has some familiarity so that the research can be an examination of it in-depth.
Outcomes:
Students will be able to understand and articulate philosophical problems and answers regarding the selected topic

PHIL 391 Topics in Philosophy of Religion (3 Credit Hours)
PHIL 391 was re-numbered to PHIL 380.
Course equivalencies: PHIL391/PHIL380

PHIL 393 Philosophy & The Human Sciences (0 Credit Hours)
This seminar explores a selected theme in health care ethics. Extensive use is made of visiting guest experts. Students should have completed four courses in philosophy, including a course in health care ethics.
Outcomes:
Students will develop a more advanced philosophical understanding of health care ethics, through direct student participation in an interactive seminar environment

PHIL 395 Seminar in Ancient Philosophy (3 Credit Hours)
This course will study selected issues from ancient philosophy. Course intended for philosophy majors. Students should have completed five philosophy courses, including PHIL 304.
Outcomes:
Students will develop a more advanced understanding of ancient philosophy, through direct student participation in an interactive seminar environment

PHIL 396 Seminar in Medieval Philosophy (3 Credit Hours)
This course will study selected issues from ancient philosophy. Course intended for philosophy majors. Students should have completed five philosophy courses, including a course in medieval philosophy.
Interdisciplinary Option: Medieval Studies
Course equivalencies: X-PHIL396/MSTU350
Outcomes:
Students will develop a more advanced understanding of medieval philosophy, through direct student participation in an interactive seminar environment

PHIL 397 Capstone Seminar in Classical Modern Philosophy (3 Credit Hours)
This course will study selected issues from early modern philosophy. Course intended for philosophy majors. Students should have completed five philosophy courses, including PHIL 309.
Outcomes:
Students will develop a more advanced understanding of early modern philosophy, through direct student participation in an interactive seminar environment

PHIL 398 Capstone Seminar in Contemporary Philosophy (3 Credit Hours)
Pre-requisites: Course intended for philosophy majors
Students should have completed at least five philosophy courses. This course will study selected issues in contemporary philosophy. Course intended for philosophy majors. Students should have completed five philosophy courses.
Outcomes:
Students will develop a more advanced understanding of contemporary philosophy, through direct student participation in an interactive seminar environment

PHIL 399 Capstone Seminar on a Topic in Philosophy (3 Credit Hours)
Pre-requisites: Course intended for philosophy majors
Students should have completed at least five philosophy courses. This course engages the student in an analysis and discussion of special problems found in various areas of philosophy. Student should have completed five philosophy courses.
Outcomes:
Students will develop a more advanced understanding of the philosophical enterprise, through direct student participation in an interactive seminar environment

PHIL 400 Philosophy Research Tools (3 Credit Hours)
This course introduces students to several methodological approaches to philosophical issues.

PHIL 401 Plato (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Plato
Course equivalencies: X-PHIL401/CLST412

PHIL 402 Aristotle (3 Credit Hours)
Prepares students for advanced work on some aspect of the philosophical thought of Aristotle.

PHIL 403 Ancient Philosophy (3 Credit Hours)
Prepares students for advanced work on a particular philosophical theme or problem in ancient philosophy.

PHIL 405 Augustine (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Augustine.

PHIL 406 Aquinas (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Aquinas.

PHIL 407 Medieval Philosophy (3 Credit Hours)
Introduces students to a specialized topic in medieval philosophy.

PHIL 408 Late Medieval Philosophy (3 Credit Hours)
Prepares students for advanced work on one or more late medieval philosophers such as Scotus and Ockham.

PHIL 410 Descartes (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Descartes.

PHIL 411 Classical Rationalism (3 Credit Hours)
Introduces students to a specialized topic in early modern rationalism, typically with reference to Descartes, Leibniz, and/or Spinoza.

PHIL 412 Classical Empiricism (3 Credit Hours)
Introduces students to a specialized topic in early modern empiricism, typically with reference to Locke, Berkeley, and/or Hume.

PHIL 415 Kant (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Kant.

PHIL 416 17th-18th Century Philosophy (3 Credit Hours)
Introduces students to a specialized topic in early modern philosophy from Descartes to Kant.

PHIL 417 Classical German Philosophy (3 Credit Hours)
Pre-requisites: Graduate student status
Classical German Philosophy begins with Kant and his immediate predecessors, and extends to the early mid-19th century, including figures such as Herder, Fichte, Schelling, Goethe, Schiller , and Hegel, Feurebach, and Marc, among others. This course may include critiques of developments out of classical German philosophy. Students will become conversant with the major projects and schools of thought in the wake of Kant's Critical Philosophy. Students will also become competent in engaging basic research in the philosophy of this era.
Outcomes:
Students will become conversant with the major projects and schools of thought in the wake of Kant's Critical philosophy

PHIL 419 Aesthetics (3 Credit Hours)
Prepares students for advanced work in philosophical issues and/or figures in aesthetics.
Outcomes:
Students will become conversant with the major projects and schools of thought in the field of aesthetics; Students will also gain knowledge of contemporary scholarship and develop basic research skills in this field

PHIL 420 Hegel (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Hegel.

PHIL 421 Marx (3 Credit Hours)
Prepares students for advanced work on Marx and Marxist philosophy.

PHIL 422 Nietzsche (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Nietzsche.

PHIL 425 19th Century Philosophy (3 Credit Hours)
Introduces students to a specialized topic in nineteenth century philosophy.

PHIL 430 Husserl (3 Credit Hours)
Prepares students for advanced work on the phenomenology of Husserl.

PHIL 431 Marxism (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Marx and/or philosophers working in the Marxist tradition.

PHIL 432 Heidegger (3 Credit Hours)
Prepares students for advanced work on the thought of Heidegger.

PHIL 433 Phenomenology/Existentialism (3 Credit Hours)
Introduces students to a specialized topic in either phenomenology and/or existential philosophy.

PHIL 434 Hermeneutics & Critical Theory (3 Credit Hours)
Introduces students to a specialized topic in either philosophical hermeneutics and/or the critical theory of the Frankfurt School.

PHIL 436 Contemporary French Philosophy (3 Credit Hours)
Introduces students to a specialized topic in recent French philosophy.

PHIL 437 Contemporary German Philosophy (3 Credit Hours)
Introduces students to a specialized topic in recent German philosophy.

PHIL 438 Topics in Continental Philosophy (3 Credit Hours)
Introduces students to a specialized topic in some aspect of European philosophy from Kant to the present.

PHIL 439 Chinese Philosophy (3 Credit Hours)
Prepares students for advanced work on Chinese philosophy.

PHIL 440 American Philosophy (3 Credit Hours)
Prepares students for advanced work on the American philosophical tradition.

PHIL 441 Wittgenstein (3 Credit Hours)
Prepares students for advanced work on the philosophical thought of Wittgenstein.

PHIL 442 Anglo-American Philosophy (3 Credit Hours)
Prepares students for advanced work on some aspect of the pragmatist and/or analytic philosophical traditions.

PHIL 443 Anglo-American Epistemology (3 Credit Hours)
Introduces students to a specialized topic in analytic epistemology.

PHIL 444 Studies in Logic (3 Credit Hours)
Introduces students to some aspect of formal logic, such as formal systems, axiomatic set theory, mathematical logic, modal logic, tense logic, epistemic logic, deontic logic, formal semantics, and philosophical logic.

PHIL 445 Philosophy of Mind (3 Credit Hours)
Prepares students for advanced work on philosophical issues concerning the problem of consciousness and the nature of mental functions.

PHIL 446 Philosophy of Perception (3 Credit Hours)
Prepares students for advanced work on philosophical issues pertaining to perception.

PHIL 447 Issues in Cognitive Science (3 Credit Hours)
Introduces students to specialized topics in the philosophy of cognitive sciences.

PHIL 449 Philosophy of Language (3 Credit Hours)
Prepares students for advanced work on philosophical issues about the relationship between language, thought, meaning, and reference.

PHIL 450 Epistemology (3 Credit Hours)
Prepares students for advanced work on philosophical issues concerning the nature of belief and knowledge.

PHIL 451 Metaphysics (3 Credit Hours)
Prepares students for advanced work on philosophical issues about the nature of reality.

PHIL 452 Philosophy of Science (3 Credit Hours)
Prepares students for advanced work on philosophical issues pertaining to the natural sciences.

PHIL 453 Philosophy of Technology (3 Credit Hours)
Pre-requisites: Restricted to Graduate Philosophy students, Other graduate students may enroll with Graduate Program Director permission
Introduces students to key issues, debates, and figures in the philosophy of technology, including both metaphysical and ethical issues related to computation, artificial intelligence, and human versus machine personhood.
Outcomes:
Interpret and compare the work of major figures in the philosophy of technology; Analyze and evaluate the ethical implications of technology on human persons and society; Analyze and evaluate theories of the ontology of technology; Produce original arguments based on the text, figures, and themes engaged in the course and apply these arguments to contemporary technological issues

PHIL 454 Philosophy of Religion (3 Credit Hours)
Prepares students for advanced work on philosophical issues concerning religious practices and beliefs.

PHIL 455 Philosophical Theology (3 Credit Hours)
Prepares students for advanced work in philosophical issues and/or figures in philosophical theology.

PHIL 457 Aesthetics (3 Credit Hours)
Prepares students for advanced work on philosophical issues pertaining to the nature of art and aesthetic judgment.

PHIL 458 Philosophy of History (3 Credit Hours)
Prepares students for advanced work on philosophical issues pertaining to history and historiography.

PHIL 459 Philosophy of Law (3 Credit Hours)
Prepares students for advanced work on philosophical issues concerning legal institutions and practices.

PHIL 462 Kant's Moral Philosophy (3 Credit Hours)
Prepares students for advanced work on the practical philosophy of Kant.

PHIL 463 Virtue Ethics (3 Credit Hours)
Prepares students for advanced work on classical and/or contemporary themes in the virtue tradition in moral philosophy.

PHIL 464 Utilitarianism (3 Credit Hours)
Introduces students to classical and contemporary formulations of utilitarian ethics.

PHIL 466 Major Authors in Moral Philosophy (3 Credit Hours)
Prepares students for advanced work on the ethical theories of one or more key figures in the history of philosophy.

PHIL 467 Contemporary Ethical Theories (3 Credit Hours)
Prepares students for advanced work on issues in contemporary moral philosophy.

PHIL 468 Topics in Ethics (3 Credit Hours)
Introduces students to specialized topics in ethical theory.

PHIL 469 Ethics and Rationality (3 Credit Hours)
Introduces students to philosophical issues concerning the relationship between rationality and moral thinking.

PHIL 470 Ethics & Economic Justice (3 Credit Hours)
Prepares students for advanced work on ethical and social-political issues concerning economic practice and theory.

PHIL 474 Principles of Business Ethics (3 Credit Hours)
Introduces students to philosophical approaches to ethical issues concerning the relationship between business and society.

PHIL 475 Philosophy of Nursing: Nursing as a Moral Practice (3 Credit Hours)
This course provides an opportunity for students to analyze ethical issues and personal, institutional/organizational, societal and global values and beliefs that have an impact on nursing practice, the nursing profession, and healthcare delivery. Students will clearly and carefully articulate their thinking and approach to moral reasoning about various contemporary issues and justify their responses. Presuppositions about clinical practice, education, administration, and their impact will be explored. The realities of the social context and the effects on moral/ethical practice will be discussed.
Course equivalencies: X-GNUR540/PHIL475

PHIL 477 Social Health Care Ethics (3 Credit Hours)
Prepares students for advanced work in philosophical approaches to social issues in health care.

PHIL 478 Research Methods in Social Justice (3 Credit Hours)
Pre-requisites: Limited to graduate students only
This course looks at several different methodological approaches to social justice issues: broad ethical frameworks; specific ethical issues, such as intent and volition; quantitative analysis; US law; and international law.
Outcomes:
Students are expected to know how to conduct literature reviews, how to use these approaches in analyzing social justice issues, and how to write up and present their research

PHIL 479 Issues in Applied Ethics (3 Credit Hours)
Introduces students to specialized topics in applied ethics.

PHIL 480 Social & Political Philosophy (3 Credit Hours)
Introduces students to specialized topics in social and political philosophy, such as theories of justice, social contract theory, human rights, and issues pertaining to race, class, and gender.

PHIL 481 Philosophy of Action (3 Credit Hours)
This course deals with the distinction between action and mere behavior. Related topics: causal vs. teleological views, intention, reasons for action (as distinct from causes of action), practical identity, free agency, practical reason, deliberation and choice, the relationship between emotional capacities and responsible agency.
Outcomes:
Students will understand the basic features of human agency

PHIL 482 Philosophy of Social Science (3 Credit Hours)
Introduces students to philosophical issues concerning the social sciences.

PHIL 483 Philosophical Questions in Human Rights (3 Credit Hours)
Pre-requisites: Limited to graduate students only
This course addresses questions in human rights such as the concept of rights and its critics, sovereignty and its relation to global governance, the role of intent, and how human rights are gendered.
Outcomes:
Students are expected to have an overview of the major legal frameworks for human rights, as well as an understanding of several of the major philosophical issues and related literature

PHIL 484 Philosophical Anthropology (3 Credit Hours)
Prepares students for advanced work about philosophical conceptions of human existence.
Interdisciplinary Option: Women & Gender Studies

PHIL 485 International Ethics (3 Credit Hours)
Pre-requisites: Limited to graduate students only
This course is intended to give students an overview of some of the major frameworks for addressing ethical issues in the international arena. This includes Just War doctrine, economic rights, and global governance.
Outcomes:
Students are expected to be familiar with the major treaties, international law doctrines, and institutions relevant to international ethics, as well the pertinent secondary literature

PHIL 487 Moral and Legal Issues of Economic Sanctions (3 Credit Hours)
Pre-requisites: Limited to graduate students only
This course will provide an introduction to economic sanctions in the context of foreign relations and global governance. We will look closely at the issues of effectiveness and humanitarian impact. We will also look at legal issues, such as the problem of extraterritoriality.
Outcomes:
It is expected that students will have an overview of how sanctions interact with international law, institutions of global governance, and human rights law

PHIL 490 Current Philosophical Issues (3 Credit Hours)
Introduces students to specialized topics in some area of contemporary philosophy.

PHIL 500 Directed Readings and Research (3 Credit Hours)
This course is a directed reading focused on an advanced topic in philosophy. The student and the faculty supervisor will agree on the topic and nature of the work.

PHIL 501 Directed Readings & Research (3 Credit Hours)
This course is a directed reading focused on an advanced topic in philosophy. The student and the faculty supervisor will agree on the topic and nature of the work.

PHIL 502 Directed Readings & Research (3 Credit Hours)
This course is a directed reading focused on an advanced topic in philosophy. The student and the faculty supervisor will agree on the topic and nature of the work.

PHIL 503 Directed Readings & Research (3 Credit Hours)
This course is a directed reading focused on an advanced topic in philosophy. The student and the faculty supervisor will agree on the topic and nature of the work.

PHIL 505 Teaching Internship I (0-3 Credit Hours)
This course introduces students to best practices in philosophical pedagogy.

PHIL 510 Clinical Ethics Practicum (3 Credit Hours)
This course will include some combination of academic and non-academic work, involving some aspect of clinical ethics. The student and the faculty supervisor will agree on the scope of the project and the nature of the work.

PHIL 511 Social Ethics Practicum (3 Credit Hours)
This course will include some combination of academic and non-academic work, involving some aspect of social ethics. the student and the faculty supervisor will agree on the scope of the project and the nature of the work.

PHIL 550 Integrative Seminar (3 Credit Hours)
This course prepares students for advanced work in philosophy, and emphasizes ways in which philosophy can play an integrative role.

PHIL 590 Dissertation Proposal Seminar (1 Credit Hour)
This semester-long, non-credit, pass/non-pass course is intended for Ph.D. students in their third or fourth years. Our purpose consists in taking students from their initial, general ideas on a dissertation to a developed proposal.
Outcomes:
The class will culminate in producing a final dissertation proposal and a community of researchers who are able and willing to support each other in the development and writing up of dissertation proposals

PHIL 595 Thesis Supervision (1 Credit Hour)
This course allows continuing master's students to continue work on their master's thesis or paper. Please consult with philosophy department graduate program director before registering.

PHIL 600 Dissertation Supervision (1 Credit Hour)
This course is intended for students who have completed their dissertation proposal and are currently working on their dissertation. Please consult with department graduate program director before registering.

PHIL 605 Master's Study (1 Credit Hour)
This course allows continuing master's students to continue work on their master's thesis or paper. Please consult with philosophy department graduate program director before registering.

PHIL 610 Doctoral Study (1 Credit Hour)
This course is intended primarily for students who are currently working on their dissertation proposal. Please consult with philosophy department graduate program director before registering.

Physics (PHYS)

Discover, search, courses (p. 2661)!

PHYS 101 Liberal Arts Physics (3 Credit Hours)
Pre-requisites: ENVS 101 or equivalent; please check requirements for declared majors/minors for exceptions
For non-science majors. Selected topics from classical and modern physics emphasizing beauty, symmetry, and simplicity. Contemporary issues of physics and society.
Knowledge Area: Tier 2 Scientific Knowledge
Outcomes:
Understanding of interaction between theory and experiment, role of physics in society, science vs. nonscience; solve problems using algebra, geometry, vectors, and graphs; synthesize disparate physics topics

PHYS 102 Planetary and Stellar Astronomy (3 Credit Hours)
Pre-requisites: ENVS 101 or equivalent; please check requirements for declared majors/minors for exceptions
This course covers the astronomy of the solar system and planetary science as well as the astronomy of stars and galaxies. This includes study of earth and comparative study of all the planets, as well as the birth, evolution, and death of stars, the clustering of stars and galaxies, the expanding universe and cosmology.
Knowledge Area: Tier 2 Scientific Knowledge
Outcomes:
Students will demonstrate an understanding of the fundamental knowledge and concepts in astronomy, the qualitative and quantitative reasoning used, and how this science can be applied

PHYS 106 Physics of Music (3 Credit Hours)
Pre-requisites: ENVS 101 or equivalent; please check requirements for declared majors/minors for exceptions
Language, structure, history and styles of music; motion, force, energy and waves applied to production of sound; physical properties of instruments and musical acoustics.
Knowledge Area: Tier 2 Scientific Knowledge
Outcomes:
Knowledge of music fundamentals; understand how instruments function; apply physics concepts and experimentation to analyze the production of music and acoustics

PHYS 111 College Physics I Lec / Dis (3 Credit Hours)
Pre-requisites: Math Placement Test or MATH 118
Non-calculus introduction to vectors, kinematics, Newtonian mechanics of translational, rotational, and oscillatory motion, energy and momentum conservation, and thermodynamics.
Interdisciplinary Option: Forensic Science
Outcomes:
Understanding of analytical description of motion and application of conservation laws; develop scientific insight and proficiency in solving representative problems

PHYS 111L College Physics Laboratory I (1 Credit Hour)
Pre- or co-requisites: PHYS 111 or PHYS 121; Prerequisite: MATH 118 or MDT
Laboratories cover selected topics in introductory mechanics, including freefall, uniform circular motion, work-energy, collisions, rotational motion, and harmonic motion.
Interdisciplinary Option: Forensic Science
Outcomes:
Experience and familiarity with basic measuring devices and simple mechanics equipment; Understand measurement errors and their propagation, plotting and interpretation of data, the connection between theory and experiment for selected topics in elementary mechanics

PHYS 112 College Physics II Lec/Disc (3 Credit Hours)
Pre-requisites: PHYS 111 or equivalent
PHYS 111 and 112 provide a non-calculus introduction to physics. Topics include electricity and magnetism, sound, optics, and selected topics from modern physics.
Interdisciplinary Option: Forensic Science
Course equivalencies: PHYS112/PHYS112K/PHYS122
Outcomes:
Understand and apply electromagnetism to 2- and 3-dimensional problems in physical and biological sciences

PHYS 112L College Physics Lab II (1 Credit Hour)
Pre-requisites: PHYS 112 or PHYS 122 (may also be taken as corequisite); also prerequisite PHYS 111L; For ESBE, ESCE, and ESEE majors only: Prerequisite or corequisite of PHYS 122
Laboratories cover selected topics in electrical circuits and optics, including DC circuits, resonance in AC circuits, ray optics, and prism and grating spectrometers.
Interdisciplinary Option: Forensic Science
Outcomes:
Understand the connection between theory and experiment for selected topics in elementary electrical circuits and optics; Experience and familiarity with DC power supplies, digital multi-meters, function generators, oscilloscopes, mirrors, lenses, and spectrometers; Ability to correlate simple electronic schematic diagrams with actual circuits

PHYS 121 College Physics I with Calculus Lecture/Discussion (3 Credit Hours)
Co-requisites: MATH 131 or MATH 161
Calculus-based introduction to vectors, kinematics, Newtonian mechanics of translational, rotational, and oscillatory motion, energy and momentum conservation, and thermodynamics.
Interdisciplinary Option: Forensic Science
Outcomes:
Understanding of analytical description of motion and application of conservation laws; develop scientific insight and proficiency in solving representative problems

PHYS 122 College Physics II with Calculus Lecture/Discussion (3 Credit Hours)
Pre-requisites: PHYS 121; Corequisite: MATH 132 or MATH 162
Calculus-based introduction to electricity and magnetism, sound, optics, and selected topics from modern physics.
Interdisciplinary Option: Forensic Science
Course equivalencies: PHYS112/PHYS112K/PHYS122
Outcomes:
Understand and apply electromagnetism to 2- and 3-dimensional problems in physical and biological sciences

PHYS 126F Freshman Projects (1 Credit Hour)
Pre-requisites: PHYS 111 or 121 (C- or better); Enrollment restricted to PHYS, BPHY, TPAM, and PCSC majors Outcomes: Students should gain a deeper understanding of the material covered in introductory physics and learn about research methods employed by physicists
Under the guidance of a faculty member, students perform research on a physics-related topic through a semester-long project. The project involves development of a proposal, building of experimental apparatus, data collection/analysis, and theoretical calculations.
This course satisfies the Engaged Learning requirement.

PHYS 130 Introduction to Computational Physics (3 Credit Hours)
Pre-requisites: PHYS 121 (C- or better); Corequisite: PHYS 122
This is an introductory computational physics course. The course will cover basic computational skills using Python and common scientific Python packages. We will solve a set of programming exercises that enhances both the understanding of introductory physics (Newton's laws, work, energy, momentum) and physics problem solving skills.
Outcomes:
Students should be able to write a Python program to perform numerical calculations in physics and gain computational skills that would be utilized in upper division physics coursework and research

PHYS 235 Modern Physics (3 Credit Hours)
Pre-requisites: PHYS 122 (C- or better); Corequisites: PHYS 235L and MATH 263; Enrollment is restricted to PHYS, BPHY, TPAM and PCSC majors and PHYS minors
This course covers the Special Theory of Relativity and Introductory Quantum Mechanics.
Outcomes:
Understand the relative nature of space and time; the duality of waves and particles; the microscopic structure of matter and its macroscopic consequences

PHYS 235L Modern Physics Laboratory (1 Credit Hour)
Co-requisites: PHYS 235
Modern physics experiments including electromagnetic waves (microwaves), interferometry, spectroscopy, electron and quantum physics, and solid-state physics.
Outcomes:
Students will gain hands on experience and familiarity with experiments from early modern physics, the ability to use spreadsheets and symbolic algebraic software for problem solving and data interpretation, and experience documenting and reporting results including historical background searches

PHYS 301 Mathematical Methods in Physics (3 Credit Hours)
Pre-requisites: PHYS 235; Corequisite: MATH 264
Lecture and computer laboratory; Mathematical and computer methods in physics and engineering; Topics include vector calculus, functions of a complex variable, phasors, Fourier analysis, linear transformations, matrices, first and second order differential equations, special functions, numerical and symbolic computer applications.
Course equivalencies: X-PHYS301/PHYS271/MATH355

PHYS 303 Electronics I (3 Credit Hours)
Pre-requisites: PHYS 122 (C- or better); Corequisite: PHYS 303L; Enrollment restricted to PHYS, BPHY, TPAM, PCSC majors and PHYS minors
Study of analog electronics, including direct and alternating circuit analysis, resonant circuits, diodes, transistors, amplifiers, operational amplifiers, noise, feedback and oscillators.
Outcomes:
Students will understand and manipulate equations and concepts, and gain experience with electronics equipment, plotting and interpretation of data, synthesizing and writing laboratory results, and the formal verbal presentation of results

PHYS 303L Electronics Laboratory (1 Credit Hour)
Pre-requisites: PHYS 122 (C- or better); Corequisite: PHYS 303; Enrollment restricted to PHYS, BPHY, TPAM, PCSC majors and PHYS minors
Students will learn to use various electronic components, instruments, techniques, and applications. This course is the lab component for PHYS 303.
Outcomes:
Students should get a deeper understanding of the material covered in PHYS 303 (Analog and digital electronics) by experimentally verifying many of the concepts covered in that course; Students will also learn to recognize various components and develop confidence in using them

PHYS 310 Optics (3 Credit Hours)
Pre-requisites: PHYS 235 (C- or better); Corequisite: PHYS 310L; Enrollment restricted to PHYS, BPHY, TPAM, PCSC majors and PHYS minors
The course covers electromagnetic nature of light, geometrical optics, polarization, Fresnel relations, interference, Fraunhofer and Fresnel diffraction, Fourier optics, lasers, and holography.
Outcomes:
Students will gain knowledge of the principles of classical and modern optics, the role of optics in the development of quantum mechanics and its applications to modern technology

PHYS 310L Optics Lab (1 Credit Hour)
Pre-requisites: PHYS 235 (C- or better); Corequisite: PHYS 310; Enrollment restricted to PHYS, BPHY, TPAM, PCSC majors and PHYS minors
Students will learn to use various optical components, instruments, techniques, and applications. This course is the lab component to PHYS 310.
Outcomes:
Students should get a deeper understanding of the material covered in PHYS 310 (Geometrical and wave optics) by experimentally verifying many of the concepts covered in that course; Students will also learn to recognize various components and develop confidence in using them

PHYS 314 Theoretical Mechanics I (3 Credit Hours)
Pre-requisites: PHYS 122 (C- or better); Corequisites: MATH 264 and PHYS 301 Outcomes: Students will gain understanding of analytical and numerical methods of mechanics, understanding of principles in dynamics, and experience in applying formalisms of Lagrange and Hamilton to mechanics in preparation for other areas of physics and engineering
Newtonian particle dynamics, conservation theorems, oscillations, gravitation, generalized coordinates, Lagrange and Hamilton formalisms.

PHYS 315 Theoretical Mechanics II (3 Credit Hours)
Pre-requisites: PHYS 314
This course is a continuation of PHYS 314 and covers dynamics of system of particles, moving coordinates, rigid body dynamics, systems of oscillators, motion in a central force field, relativity.
Outcomes:
Students will gain understanding of analytical and numerical methods of mechanics, and of the laws of dynamics and their applications

PHYS 328 Thermal Physical & Statistical Mechanics (3 Credit Hours)
Pre-requisites: PHYS 235 and PHYS 301
This course examines the fundamental concepts of temperature, entropy, and thermodynamic equilibrium, the first and second law, engines, the third law, and Boltzmann, Fermi-Dirac, and Bose-Einstein statistics.
Outcomes:
Students will learn to compare thermodynamical versus statistical characterizations of macroscopic systems with applications ranging from analyzing Fermi gases and black body radiation to information theory

PHYS 338 Advanced Physics Laboratory (2 Credit Hours)
Pre-requisites: PHYS 301 and PHYS 314; Restricted to PHYS, TPAM, PCSC, and BPHY majors
Lab course with advanced experiments in mechanics, biophysics, electromagnetism, quantum mechanics, solid state, and particle physics. Students will receive training in data analysis methods, data acquisition systems, signal processing, and 3D fabrication. Students will work in teams on a final independent project.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will gain an understanding of experiment design, data analysis, and error estimation in the context of investigating physical principles and using different instrumentation

PHYS 351 Electricity and Magnetism I (3 Credit Hours)
Pre-requisites: PHYS 235, 301 & MATH 264
Electrostatics and magnetostatics in a vacuum as well as in linear media, and an introduction to electrodynamics.
Outcomes:
Students will gain an understanding of mathematical methods of electrodynamics, of static electricity and magnetism including Coulomb's, Gauss', Ampere's, and Faraday's laws and their applications, and of solutions of Laplace's and Maxwell's equations

PHYS 352 Electricity and Magnetism II (3 Credit Hours)
Pre-requisites: PHYS 351
Introduction to electrodynamics and the special theory of relativity.
Outcomes:
Students will gain an understanding of electromagnetic field energy and momentum, Maxwell's equations and their applications including electromagnetic radiation and emission, involving retarded potentials and Lorentz covariance

PHYS 361 Quantum Mechanics I (3 Credit Hours)
Pre-requisites: PHYS 235 & PHYS 301
Non-relativistic quantum mechanics.
Outcomes:
Students will understand and use separation of variables, finite polynomials, and matrix algebra to solve the Schroedinger equation, explain microscopic structure of matter, and describe philosophical interpretations of quantum mechanics

PHYS 371 Biophysics (3 Credit Hours)
Pre-requisites: For Biology and Molecular Biology majors: BIOL 251, (PHYS 112 or 122), and (MATH 132 or 162); For all other majors: PHYS 235 and BIOL 101
An upper-level course in biological physics focused on a quantitative description of the physical processes driving molecular and cellular processes with an emphasis on experiment design and analysis.
Outcomes:
Students will understand how to apply physical principles and probabilistic analysis toward the study of biological phenomena at molecular and cellular levels

PHYS 380 Special Topics in Physics (1-3 Credit Hours)
Pre-requisites: Instructor's permission
This variable (1-3) credit enrichment course introduces students to a topic not generally covered in other courses. This course can be repeated.
Outcomes:
Students will understand the material of the course and develop an ability to apply the knowledge gained to other contexts

PHYS 381 Special Topics in Physics (1-3 Credit Hours)
Pre-requisites: Instructor's permission
This variable (1-3) credit enrichment course introduces students to a topic not generally covered in other courses. This course can be repeated.
Outcomes:
Students understand the material of the course and develop an ability to apply the knowledge gained to other contexts

PHYS 391 Research (1-12 Credit Hours)
Research in physics or an associated field. This is a variable credit course and can be repeated.
This course satisfies the Engaged Learning requirement.
Course equivalencies: PHYS391 / PHYS385 / PHYS386
Outcomes:
Under the guidance of a faculty member, students study and understand research methods employed by physicists and gain a deeper understanding of a particular area of physics

PHYS 394 Argonne Lab Research (3 Credit Hours)
Pre-requisites: Chairperson's permission and acceptance by appropriate program
Study and research at the Argonne National Laboratory. Only those students who are accepted into the Argonne National Laboratory's student program (or similar programs elsewhere) are eligible. No tuition is charged.
Outcomes:
Students will work with a research group at Argonne or other laboratory to understand research methods employed by physicists and get a deeper understanding of a particular area of physics

PHYS 395 Argonne Lab Research (3 Credit Hours)
Pre-requisites: Chairperson's permission and acceptance by appropriate program
Study and research at the Argonne National Laboratory. Only those students who are accepted into the Argonne National Laboratory's student program (or similar programs elsewhere) are eligible. No tuition is charged.
Outcomes:
Students will work with a research group at Argonne or other laboratory to understand research methods employed by physicists and get a deeper understanding of a particular area of physics

PHYS 495 AP Physics Workshop (3 Credit Hours)
This graduate level course offers pedagogical content knowledge training for in-service high school teachers preparing to teach AP Physics.

Physiology (PIOL)

Discover, search, courses (p. 2661)!

PIOL 301 Functions of the Human Body (5 Credit Hours)
This course explores major organ systems in an integrative fashion covering all aspects from physiology to metabolic biochemistry. Emphasis is placed on understanding key concepts of normal physiological and biochemical systems in healthy humans.

PIOL 401 Physiology (4 Credit Hours)
This course integrates the contents of two sections of the medical school (M1) course Function of the Human Body course (PIO L301); with additional meetings to present discuss papers at graduate level (2 paper presentations per graduate student). In the Fall semester, students will review cell physiology and autonomic neuroscience, and will learn cardiovascular and renal physiology in depth. The course topics will include introductory cell & neurophysiology, skeletal and smooth muscle, cardiac electrophysiology, EKG, cardiac muscle mechanics, circulation, special circulations, and renal physiology. In the Spring semester, students will learn pulmonary, acid-base balance, gastrointestinal, endocrine, and reproductive physiology. Instructor Consent Required.
Outcomes:
Students familiar with introductory physiology are expected to learn and understand cardiovascular, reproductive and endocrine systems in an integrative fashion in this course; Emphasis will be placed on understanding key concepts of normal physiological and biochemical systems in healthy humans; Selected aspects of pathophysiological processes will be discussed to illustrate how an understanding of normal function can be applied to clinical medicine

PIOL 410 Intro to Research (1-3 Credit Hours)
This course provides an introduction to a wide variety of commonly used techniques in cell and molecular physiology research, with concomitant laboratory rotations to learn those techniques.

PIOL 412 Research (1-6 Credit Hours)
Independent research for thesis or dissertation under the supervision of a faculty research advisor. Credit varies based upon assigned effort and time spent in the laboratory. Students receive a letter grade from their research advisor.

PIOL 414 Graduate Colloquy (1-8 Credit Hours)
Special advanced topics course with variable credit. Paper discussion and instructor-led presentations.

PIOL 416 Research Seminar (1 Credit Hour)
Seminar presentation on PhD candidate's dissertation topics advance.

PIOL 417 Cellular Physiology (3 Credit Hours)
Pre-requisites: Restricted to Master of Physiology Program students
The major goal of the Cellular Physiology course is to define the molecular and cellular basis of systems Physiology and Pathophysiology. The course consists in distinct sessions of teaching, problem solving, and reviews.
Outcomes:
- Understand the relationships among molecular, cellular and systems physiology; - Understand membrane structure and function; - Understand distinct metabolic and signaling pathways

PIOL 418 Teaching of Physiology (0 Credit Hours)
Teaching training and practice opportunities for upper level PhD candidates.

PIOL 420 Methods/Technical in Physiological Research (2 Credit Hours)
This course is intended for students seeking advanced knowledge of cutting-edge experimental approaches currently used in cardiovascular, metabolic, and neuroscience research. These topics will be discussed in both a technical/methodological sense, and in the context of the current scientific literature.

PIOL 421 Function of the Human Body I (4 Credit Hours)
This course will present the basic concepts and principles of human physiology. The course topics will include: introductory cell & neurophysiology, skeletal and smooth muscle, cardiac electrophysiology, EKG, cardiac muscle mechanics, circulation, special circulations and pulmonary physiology. The format will be lectures, simulations, small group problem sessions and scheduled reviews. Small group problem sessions will be held after each subject area and will focus on clinical application and integration of conceptual information presented in lectures. Small group sessions and reviews also will provide the student with the opportunity to obtain clarification from instructors of any outstanding questions and are designed to encourage active learning, as well as develop critical thinking and problem solving skills. Students will be evaluated by multiple choice and essay exams given after each of the 5 major topic areas. Course material will be geared toward non-thesis Masters students. Given that physiology is the basis of medicine, this course will prepare students with the basic science knowledge to successfully continue their professional development in future biomedical programs.
Outcomes:
Students will be able to describe the cellular mechanisms responsible for cardiac, skeletal and smooth muscle contraction and the factors that regulate their activity

PIOL 422 Function of the Human Body II (4 Credit Hours)
Enrollment limited to Masters of Science in Physiology students. This course presents the basic concepts and principles of human physiology. The course will be presented over one semester and the topics include: renal, acid-base balance, gastrointestinal, endocrine, and reproductive physiology. The format will be lectures, small group problem sessions and scheduled reviews.
Outcomes:
Students will be able to explain the cellular mechanisms responsible for normal renal, acid-base, endocrine, gastrointestinal and reproductive physiology

PIOL 423 Biochemical Physiology (3 Credit Hours)
Biochemical Physiology will give students knowledge of foundational processes that dictate cellular physiologic processes. Topics include the structure and properties of nucleic acids, amino acids, protein structure and folding, enzyme kinetics, metabolic pathways and intracellular signal transduction. The course will present the biochemical physiology.
Outcomes:
Student completing this course should: - Understand the biochemical mechanisms which underlie physiological processes; - Understand protein structure dynamics and how these structures are dictated by second

PIOL 425 Physiology of Aging (3 Credit Hours)
Pre-requisites: BMSC 410, BMSC 412, BMSC 416
The focus of this special topics course is on the unique physiological changes that occur with aging. Didactic instruction will be supplemented with readings from current primary literature in the field. Students will be responsible for reading and presenting articles for group discussion.
Outcomes:
1) Acquire advanced knowledge of aging processes; 2) Identify key gaps in knowledge in the aging field; 3) Engage in transformational/critical discussion of seminal papers in the aging field

PIOL 426 Biophysical Research Methods (3 Credit Hours)
Pre-requisites: IPBS Core curriculum The focus of this special topics course is to introduce students to the field of biophysics, with special focus on practical applications of biophysical methods in research Didactic instruction will be supplemented with readings from current primary literature in the field. Students will be responsible for reading and presenting articles for group discussion.
Outcomes:
Demonstrate a general understanding of the field of biophysics; Demonstrate deep knowledge and understanding of fundamental aspects cell mechanics, muscle mechanics, and integrated biomechanics; Demonstrate knowledge of current biophysical methods used in research; Demonstrate knowledge of fluorescence spectroscopy; Demonstrate knowledge of microscopy; Demonstrate understanding of computational biology approaches; Critically evaluate biophysical data from the literature; Interpret biophysical data for a general audience and effectively communicate biophysical information in both oral and written forms; Incorporate high standards of ethics into data interpretation and presentation

PIOL 430 Basic Human Anatomy (2 Credit Hours)
Enrollment limited to Masters of Science in Physiology students. This course will provide students with the basic concepts and facts of human gross anatomy as they related to physiology and function. Specific sections include the musculo-skeletal components of the extremities, trunk and head, the peripheral nervous system to include both the somatic and autonomic systems, the cardiovascular system, respiratory system, digestive system, urinary system and reproductive system. Each system will integrate embryology, radiology and basic clinical applications.
Outcomes:
Students will be able to describe and integrate basic human anatomy of the major organ systems to physiology and clinical medicine

PIOL 446 Cardiovascular Journal Club (1 Credit Hour)
Presentation and discussion of original research papers with focus on cardiovascular physiology topics.

PIOL 450 Fundamentals Of Neurophysiology (4 Credit Hours)
This course imparts the basic concepts and fundamentals of Neurophysiology, with emphasis on concepts relevant to human neuroscience. Students will learn Neurophysiology fundamentals at the cellular, structural and physiological levels of various complex systems in the brain, with specific discussion of clinical correlates of Pathophysiological conditions.
Outcomes:
Students successfully completing this course will be able to understand and explain neurophysiological mechanisms relevant to normal and abnormal conditions

PIOL 461 Introduction to Human Pathophysiology (5 Credit Hours)
Restricted to students in the Masters of Science in Physiology program. This course presents the basic concepts and principles of human pathophysiology. The course will be presented over one semester and the topics include: clinical evaluation of cardiac structure and function followed by a review of the major disorders of cardiovascular function.
Outcomes:
Students will be able to critically evaluate basic pathophysiological mechanisms underlying the most common forms of adult human cardiovascular disease

PIOL 468 Neurophysiology Journal Club (1 Credit Hour)
Presentation and discussion of original research papers with focus on neurophysiology topics.

PIOL 470 Excitability & Ion Transport (1-4 Credit Hours)
The course focuses on basic concepts of the physical movement of ions during activation of voltage- and ligand- gated ion channels.

PIOL 472 Structure/Function Membrane Proteins (3 Credit Hours)
The course explores basic and advanced concepts of membrane proteins structure, cell biology and function.

PIOL 500 Professional Development I (3 Credit Hours)
Must be enrolled in the MSP program. Professional Development will meet once/month throughout the one-year MSP program. Students will receive information about the options available for a career in the health sciences and will enhance their professional portfolio by participating in a variety of workshops designed to better equip them for a health science career.
Outcomes:
Students will be able to understand the curriculum and admission requirements of the various professional health programs and gain an understanding of the interview process

PIOL 501 Professional Development II (1 Credit Hour)
Pre-requisites: PIOL 500
Professional Development will meet and have self-directed study time throughout the spring semester of the MSMP program. Students will receive bi-weekly, specific individualized one-on-one mentoring from their academic advisors and also meet with the course director for specific lectures on their AMCAS and AACOMAS applications for medical and DO schools. Students will continue to enhance their knowledge of the admissions process by having general lectures and individual sessions discussing their motivation, enhancing their self-awareness, writing their personal statements, their selection of appropriate medical schools, selection of activities (community and medical volunteering, health care exposure (shadowing, scribing, etc.), research for their application, overall discussions on writing their secondary statements, choice of letters of recommendation, etc. MSMP students only.
Outcomes:
Following successful completion of this course, the MSMP student will: 1) Demonstrate enhanced ability for self-awareness and analysis regarding their medical school application; 2) Demonstrate self-reflection in the selection of target medical schools, discussing their fit in terms of each medical school's mission statement; 3) Continue working with their academic advisor to prepare a well-written personal statement appropriately tailored to the professional program of choice; 4) Demonstrate understating of the application process and preparation of application forms

PIOL 595 Thesis Supervision (1 Credit Hour)
Supervised research and writing leading to the completion of the masters of science thesis and degree.
Outcomes:
Form hypotheses, design and perform appropriate experiments to test these hypotheses; Search and critically evaluate scientific literature and data; Clearly and effectively communicate scientific information in both oral and written forms; Incorporate high standards of ethics into research design, execution, data interpretation, and presentation

PIOL 600 Dissertation Supervision (1 Credit Hour)
Supervised research and writing leading to the completion of the Ph.D. dissertation and degree.
Outcomes:
Propose original biomedical research questions and hypotheses; Design and execute critical experiments to evaluate the hypotheses proposed; Search and critically evaluate scientific literature and data; Clearly and effectively communicate scientific information in both oral and written forms; Incorporate high standards of ethics into research design, execution, data interpretation, and presentation

PIOL 605 Physiology Study (0 Credit Hours)
Must be enrolled during fall semester of MS program in Physiology. Holding course to keep the student active in the program while completing MS degree requirements.

Polish (POLS)

Discover, search, courses (p. 2661)!

POLS 101 Polish I (3 Credit Hours)
This course focuses on introducing the student to the basics of Polish, through conversation, pronunciation and grammar. Primary emphasis is on enabling the student to speak and understand basic Polish.
Interdisciplinary Option: Polish Studies
Outcomes:
Students will be able to use correctly and understand the basic grammatical forms of the verbs, nouns and adjectives of Polish as an inflected language; They will be appropriately prepared to complete the full view of Polish structures in Polish

POLS 102 Polish II (3 Credit Hours)
This course focuses on introducing the student to the basics of Polish, through conversation, pronunciation and grammar. Primary emphasis is on enabling the student to speak and understand basic Polish.
Interdisciplinary Option: Polish Studies
Outcomes:
Students will be able to use correctly and understand the basic grammatical forms of the verbs, nouns and adjectives of Polish as an inflected language; They will be appropriately prepared to complete the full view of Polish structures in Polish

POLS 103 Polish III (3 Credit Hours)
Pre-requisites: POLS 102
This course is designed to further develop and improve student's ability to speak and read Polish, by introducing advanced grammar, vocabulary, idioms, phraseology and syntax structures.
Interdisciplinary Option: Polish Studies
Outcomes:
Students will be able to use correctly and understand various grammatical forms of verbs, nouns, adjectives, adverbs and numbers; They will be appropriately prepared to use Polish grammatical and stylistic structures required in POLS 104

POLS 104 Polish IV (3 Credit Hours)
Pre-requisites: POLS 103
This course focuses on improving the student's ability to communicate in Polish both oral and written. Primary emphasis is on speaking and basic writing in Polish using proper grammatical and stylistic structures.
Interdisciplinary Option: Polish Studies
Outcomes:
Students will be able to express themselves in spoken and written Polish with the level of fluency appropriate for POLS 250

POLS 201 Polish Medical Terminology (3 Credit Hours)
Pre-requisites: POLS 104 or equivalent
This course is designed to prepare students for medical and healthcare related professions, future physicians and nurses, healthcare administrators and health insurance specialists. We will study Polish vocabulary for anatomy and physiology, and introduced Polish terms for medical procedures and tests. We will use phraseology common for taking medical history. Students will practice using medical terminology in patient interviews, reading articles from healthcare publications as well as understanding and formulating medical instructions. In this course we will also talk about cultural issues in practicing medicine, including the cultural differences between Polish and American approach. There will be strong emphasis on speaking, listening, and reading Polish.
Outcomes:
Students will expand their Polish vocabulary, including body parts and functions, diseases and their manifestations; They will practice taking a medical history in dialogues between medical professionals and their clients as well as use medical names and description

POLS 202 Polish for Healthcare (3 Credit Hours)
Pre-requisites: POLS 104 or equivalent
This course is designed to prepare students for medical professions, future physicians, dentists, and nurses. We will practice vocabulary for anatomy and physiology, Polish terms for medical procedure and test as well as phraseology used in every day in doctor-patient communication. This course will cover medical specializations such as: pediatrician, nutritionist, internist, immunologist, neurologist, psychiatrist and surgeon. We will also talk about cultural issues in practicing medicine. There will be strong emphasis on speaking, listening, and reading Polish and using more advanced aspects of Polish grammar.
Outcomes:
Students will learn medical vocabulary, including body parts and organs, physiology and functions of various systems; They will practice taking medical history in dialogues between medical professionals and their patients, and they will write descriptions of medical conditions

POLS 250 Composition & Conversation I (3 Credit Hours)
Pre-requisites: POLS 104
This course focuses on improving and further developing student's ability to converse and write in literary Polish language. Primary emphasis is on proper grammatical and stylistic expression in Polish with extended vocabulary and phraseology.
Interdisciplinary Option: Polish Studies
Outcomes:
Students will be able to express themselves in spoken and written Polish by making oral presentations and writing short compositions; They will be appropriately prepared for POLS 251

POLS 251 Composition & Conversation II (3 Credit Hours)
Pre-requisites: POLS 250
This course focuses on enhancing and polishing student's ability to converse and write in contemporary Polish language. Primary emphasis is on standard, literary Polish with its grammatical, orthographical and stylistic level expected of an educated Polish speaker.
Interdisciplinary Option: Polish Studies
Outcomes:
Students will be able to speak fluently, make oral presentations and write essays in standard literary Polish language with fluency of an educated Polish speaker

POLS 270 Contemporary Polish Culture in the Original Language (3 Credit Hours)
Pre-requisites: POLS 104 or equivalent
We will discuss the key elements of Polish culture as it is evolving in the fast changing social, technological, and economic circumstances after the political transformation of Central Europe. Students will explore the cultural traditions and values of the pre-WWII generation and the Soviet era generation, which led many to emigrate from Poland.
Interdisciplinary Option: Polish Studies

Polish Studies (POST)

Discover, search, courses (p. 2661)!

POST 199 Topics in Polish Studies: Introductory (1-6 Credit Hours)
Introduction to a specific theme in Polish Studies, e.g. Polish immigration, emergent Poland after World War II, etc.
Interdisciplinary Option: Polish Studies
Outcomes:
To gain a basic knowledge of Poland through its art, history, politics, religion, philosophy, or cinema

POST 299 Topics in Polish Studies: Intermediate Topics (1-6 Credit Hours)
Exploration of important themes in Polish Studies, such as Polish immigration, emergent Poland after World War II, etc.
Interdisciplinary Option: Polish Studies
Outcomes:
To enhance knowledge of Polish Studies through different disciplines: art, history, politics, religion, philosophy, or cinema

POST 395 Polish Studies Capstone (3 Credit Hours)
Capstone course to the POST Minor program. This is a tutorial course with a service learning component that serves an integrative purpose. In the tutorial students will focus on a specific issue or theme in POST. The syllabus will reflect the research interests of the faculty member who administers the course.
Interdisciplinary Option: Polish Studies
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to integrate their coursework in the POST minor with their major concentration

POST 399 Topics in Polish Studies: Advanced (1-6 Credit Hours)
Intensive study of a specific theme or themes in the broad field of Polish Studies: language, art, literature & film, politics, music, and history.
Interdisciplinary Option: Polish Studies
Outcomes:
To provide an in-depth knowledge of Polish Studies

Political Science (PLSC)

Discover, search, courses (p. 2661)!

PLSC 100 Political Theory (3 Credit Hours)
Pre-requisites: PHIL 130 or equivalent; please check requirements for declared majors/minors for exceptions
An introduction to political theory, covering the principal ideas, controversies and institutions of political society.
Knowledge Area: Tier 2 Philosophical Knowledge
Course equivalencies: ACPOL 200 / PLSC 100
Outcomes:
Students will be able to demonstrate an understanding of major approaches to the normative study of politics; to identify the assumptions underlying philosophical arguments; and to critically assess different theories of political justice

PLSC 101 American Politics (3 Credit Hours)
Pre-requisites: ANTH 100, PLSC 102, SOCL 101, WSGS 101, or equivalent; please check requirements for declared majors/minors for exceptions
American national government and politics, including institutions, group and electoral processes, and public policy.
Knowledge Area: Tier 2 Societal Knowledge
Course equivalencies: ACPOL 101 / PLSC 101
Outcomes:
Students will be able to demonstrate an understanding of the American political system, the patterns of political participation and behavior of diverse individuals and groups in American society, and evaluate the roles and processes of US political institutions

PLSC 102 International Relations in an Age of Globalization (3 Credit Hours)
Competing perspectives on international politics and global issues such as North-South relations, human rights, war and peace, population growth, and environmentalism.
Knowledge Area: Foundational Societal Knowledge
Interdisciplinary Option: African Studies and the African Diaspora, Global Studies, Peace, Justice, and Conflict Studies
Course equivalencies: ACPOL 202 / PLSC 102
Outcomes:
Students will be able to demonstrate an understanding of the main approaches to the study of international politics and to analyze and assess such major substantive issues as interstate war, terrorism, arms control, international political economy, and sustainable development

PLSC 103 Comparative Politics (3 Credit Hours)
Pre-requisites: ANTH 100, PLSC 102, SOCL 101, WSGS 101, or equivalent; please check requirements for declared majors/minors for exceptions
A cross-national comparison of political institutions and political behavior.
Knowledge Area: Tier 2 Societal Knowledge
Interdisciplinary Option: Global Studies
Outcomes:
Students will learn why political systems differ and how different political systems function and change

PLSC 123 Speak Up Democracy (0-3 Credit Hours)
"Speak Up Democracy" is a course on perennial questions about the workings of democracies. Participating students will investigate the connection between speech and political power, ruminating on whose voices are heard (and silenced) in a democracy. This summer program is animated by a central question: how should we speak to one another in a democracy? The course is open to high school students participating in the summer program.

PLSC 202 Mock Trial (3 Credit Hours)
Students will study the trial as a process for finding truth and administering justice by learning the dynamics of the trial, by developing trial strategy, by learning how to conduct and respond to direct and cross examination and by delivering effective opening and closing arguments. Mock trial is an engaged learning course. Prior Permission is required.
This course satisfies the Engaged Learning requirement.
Outcomes:
Mock trials are an activity that promotes critical thinking and reasoning; They call upon students to employ their problem-solving and public-speaking skills, and students gain knowledge of legal practices and procedures

PLSC 203 Moot Court (3 Credit Hours)
Students will study the appeal as a process for finding truth and administering justice by learning the dynamics of appellate advocacy, by developing oral argument strategies, by learning how to respond to questions posed by judges in competition, and by delivering effective summations and rebuttal arguments. Moot court is an engaged learning course.
This course satisfies the Engaged Learning requirement.
Outcomes:
Moot court competitions are an activity that promotes critical thinking and reasoning; They will enhance their ability-to-think- on-their-feet skills, their legal research skills, and their public-speaking skills; Students gain knowledge of legal argumentation and constitutional law

PLSC 204 Conflict Management (3 Credit Hours)
This course considers a variety of different approaches to international conflict management: direct bargaining, mediation, military intervention, economic sanctions, arbitration, adjudication, and peacekeeping. In addition to learning about the differences among these various conflict resolution techniques.
Interdisciplinary Option: Global Studies
Outcomes:
This course will treat state conflict as a natural phenomenon that must be understood before it can be mitigated; Doing so requires scientific investigation

PLSC 208 Representation in the United States (3 Credit Hours)
Considers what "political representation" means and how scholars study how well representation works in the contemporary United States.
Outcomes:
Understanding of concept of political representation and tools scholars use to study representation

PLSC 213 International Human Rights (3 Credit Hours)
This course focuses on the theoretical foundations of such international human rights as well as their practical implications. It discusses the roles of states, intergovernmental organizations, and nongovernmental organizations in shaping human rights norms and practices. They will also understand practical causes and consequences of human rights policies.
Interdisciplinary Option: Global Studies
Outcomes:
Students will be able to identify assumptions of arguments and critically assess different theories of international human rights

PLSC 215 Politics of Marginalized Groups (3 Credit Hours)
This course focuses on the role that race, ethnicity, and marginalized status plays in American politics and public policy. It will provide a general overview of several groups, including Blacks, Latinxs, Asian and Muslim Americans, Women, LGBTQ, immigrants and refugees, indigenous peoples and other groups.
Outcomes:
Students will acquire an understanding of the historical exclusion of various groups from the political system and the resulting political participation and behavior patterns of minoritized groups in American society

PLSC 216 Political Numbers (3 Credit Hours)
This course will train participants to be critical consumers of political arguments that cite quantitative evidence. The course will take a hands-on approach where students learn how to conduct, interpret, and critique quantitative analysis using common statistical software packages.
Knowledge Area: Quantitative Knowledge
Outcomes:
Students will learn to critically engage with the numbers-based claims they encounter in the political arena and beyond; They will also learn how to conduct and present quantitative analysis

PLSC 218 African-American Politics (3 Credit Hours)
The political goals, behavior, voting patterns, group structures, values, and attitudes of various segments of the African-American population, and how these affect the political system.
Interdisciplinary Option: African Studies and the African Diaspora, Human Services, Race and Ethnicity
Course equivalencies: X-PLSC218/BWS 218
Outcomes:
Students will be able to demonstrate an understanding of the patterns of political participation and behavior of African-American individuals and groups in American society

PLSC 232 Politics of the United Kingdom (3 Credit Hours)
This course offers an introduction to politics in the United Kingdom (officially known as the United Kingdom of Great Britain and Northern Ireland, and unofficially referred to as Britain).
Interdisciplinary Option: European Studies, Global Studies
Outcomes:
Students will be able to demonstrate an understanding of the structure and operation of the United Kingdom's domestic political system, as well as its relations with the rest of the world, especially the European Union

PLSC 236 Political Communication (3 Credit Hours)
The purpose of this course is to explore and examine how elected officials and institutions communicate to the public - and the role journalists and PR professionals play in the process--through readings, seminar, and practicum. The class will challenge students to grapple with questions like - What is the meaning of the "truth" in today's media environment?
Outcomes:
Students will understand how and why journalists cover what they cover, and the roles PR professionals/spin doctors attempt to shape the media narrative

PLSC 238 Political Advocacy (3 Credit Hours)
Policy-making and implementation in the United States is a complicated process. In any given year laws are passed by elected officials, decisions that guide our implementation of the law are made by government agencies, and rulings handed down by the courts shape our interpretation of those laws.
Outcomes:
Students will understand their place in the policy-making ecosystem, and the efficacy of those efforts

PLSC 251 Women in American Politics (3 Credit Hours)
This course focuses on Women and Politics in the United States. It looks at women's movements both historical and current, how women and men in the United States act differently in politics in terms of voting behavior, as political candidates, and as elected leaders. Students will gain a better understanding of the U.S. political system and how and when women are treated equally and unequally when compared with men.
Interdisciplinary Option: Women & Gender Studies

PLSC 252 Capitalism and Its Discontents (3 Credit Hours)
This course analyzes the intersection of capitalist economics and politics from a critical perspective. Capitalism and Marxism will be reviewed, followed by a critical examination of how capitalism has played out in economic/political practice in the world today. Includes discussions of many economic topics recently in the news, and the potential for change in a variety of directions. Students will learn to critically analyze the ways in which modern economics leads to less than optimal solutions, including economic inequality. They will also learn to identify other options that may lead to greater equality and economic success.
Interdisciplinary Option: Global Studies

PLSC 300 Contemporary Political Issues (3 Credit Hours)
Variable titles. Investigation of selected topics or methods in politics. This course may apply to any of the four areas of the department, and may be repeated depending on subject matter.
Outcomes:
Students will gain an in-depth knowledge of a unique topic in contemporary politics

PLSC 300A Contemporary Political Issues: American Politics (3 Credit Hours)
Investigation of selected topics or methods in American Politics. This course may be repeated depending on subject matter.

PLSC 300B Contemporary Political Issues: Political Theory (3 Credit Hours)
Investigation of selected topics or methods in Political Theory. This course may be repeated depending on subject matter.

PLSC 300C Contemporary Political Issues: Comparative Politics (3 Credit Hours)
Investigation of selected topics or methods in Comparative Politics. This course may be repeated depending on subject matter.

PLSC 300D Contemporary Political issues in International Relations (3 Credit Hours)
Investigation of selected topics or methods in International Relations. This course may be repeated depending on subject matter.

PLSC 301 Political Justice (3 Credit Hours)
A study of alternative conceptions of political justice and the attempts to institutionalize them in various political systems.
Outcomes:
Students will be required to demonstrate a mastery of competing theories about how various goods should be distributed fairly, and apply the just-war doctrine to various real-world cases; This course will help students to analyze and appraise social practices and policies that claim to be consistent with principles of justice

PLSC 302 American Political Thought (3 Credit Hours)
Major political themes from the founding era to the present.
Outcomes:
Students will learn to interpret and evaluate the assumptions and principles guiding the writings of major American political theorists, and to reflect on their significance in the evolution of American politics and society

PLSC 304 Ancient Political Thought (3 Credit Hours)
(CLST 305) A study of major political theorists from Plato to the fall of the Roman republic.
Outcomes:
Students will learn to interpret and evaluate the assumptions and principles guiding the writings of major Ancient Greek and early Roman political theorists

PLSC 306 Modern Political Thought (3 Credit Hours)
A study of major political theorists from Machiavelli to the French Revolution.
Interdisciplinary Option: European Studies
Outcomes:
Students will learn to interpret and evaluate the assumptions and principles guiding the writings of the major political theorists from Machiavelli to Rousseau

PLSC 307 Democratic Theory (3 Credit Hours)
This course examines normative arguments for and against popular rule.
Outcomes:
Students will be able to explain and assess critically arguments for and against democratic government

PLSC 308 Contemporary Political Thought (3 Credit Hours)
A study of major political theorists from the nineteenth century to the present.
Interdisciplinary Option: German Studies
Outcomes:
Students will learn to interpret and evaluate the assumptions and guiding principles of the writings of major political theorists from the nineteenth century to the present

PLSC 310B Catholic Political Thought (3 Credit Hours)
A survey of classic and contemporary political thinkers in the Roman Catholic tradition. The problems examined include religious pluralism, moral decay, natural law, distributive justice, political obligation, war, and peace.

PLSC 311 Social Science Research Practicum: Cook County Community Survey (3 Credit Hours)
Pre-requisites: PLSC 216 or equivalent
Familiarity with R, Stata, SAS, or SPSS necessary. Students will analyze this year's iteration of the annual Cook County Community Survey. They will draw on the data to prepare written, public-facing reports, public presentations, and scholarly research.
This course satisfies the Engaged Learning requirement.
Course equivalencies: PLSC 311/SOCL 311
Outcomes:
Describe the strengths and limitations of modern polling techniques; Use statistical software to analyze survey data; Communicate findings from surveys to a broad audience orally and in written form

PLSC 312 Feminist Theory (3 Credit Hours)
(WOST 318) A survey of classical and contemporary feminist political theory.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-PLSC312/WOST318/WSGS318
Outcomes:
Students will learn to interpret and evaluate the assumptions and principles guiding the writings of influential feminist political theorists and their critics, and to reflect on the significance of feminist political theory in promoting a more just society

PLSC 313 Resistance and Obligation (3 Credit Hours)
This course examines normative arguments about the source of political obligation and the right to resist government through various means, both violent and nonviolent.
Outcomes:
Students will be able to explain and assess critically various arguments about the duty to obey and the right to disobey government

PLSC 314 Liberalism (3 Credit Hours)
A survey of classical and contemporary political theorists in the liberal tradition.
Outcomes:
Students will learn to interpret and evaluate the assumptions and principles guiding the writings of major liberal political theorists and their critics, and to reflect on the significance of liberal political theory in promoting a more just society

PLSC 316 Politics of Genocide (3 Credit Hours)
This course analyzes the politics surrounding genocide, war crimes and crimes against humanity in contemporary times. The primary focus is on occurrences since the end of the Cold War, including the former Yugoslavia, Rwanda, Sudan and the Democratic Republic of the Congo.
Interdisciplinary Option: African Studies and the African Diaspora, Global Studies, Race and Ethnicity
Outcomes:
Students will be able to demonstrate an understanding of genocide and other massive human rights violations, along with the role of the international community in preventing future atrocities

PLSC 317 Politics of International Health (3 Credit Hours)
This course discusses political issues in the field of international health, including comparing health care systems in the industrialized world, and treatment of diseases in the developing world, particularly Africa (HIV/AIDs, TB, Malaria, etc). Students will be able to demonstrate an understanding of international health and comparative health systems.
Interdisciplinary Option: African Studies and the African Diaspora, Global Studies

PLSC 319 Women, Law & Public Policy (3 Credit Hours)
The legal arrangements and public policies that structure the relationships of women and men in American society.
Interdisciplinary Option: Human Services, Women & Gender Studies
Course equivalencies: X-PLSC319/WOST319/WSGS319
Outcomes:
Students will be able to analyze and appraise the impact of judicial decisions and public policies on women in the United States

PLSC 320 Constitutional Law-Due Process (3 Credit Hours)
The Supreme Court's role in defining substantive and procedural due process issues such as criminal procedure, individual autonomy, and economic regulation.
Interdisciplinary Option: Sociolegal Studies
Outcomes:
Students will be able to demonstrate an understanding of the meaning and application of due process in American law and its impact in safeguarding individual freedoms and civil rights

PLSC 321 Constitutional Law-Powers of Government (3 Credit Hours)
The Supreme Court's role in allocating power among the three branches of the national government and between the state and federal governments.
Interdisciplinary Option: Sociolegal Studies
Outcomes:
Students will be able to demonstrate an understanding of alternative judicial approaches to the separation of governmental powers

PLSC 322 Constitutional Law-Rights and Liberties (3 Credit Hours)
The Supreme Court's role in defining constitutional guarantees of equal protection and individual freedom.
Interdisciplinary Option: Sociolegal Studies
Outcomes:
Students will be able to demonstrate an understanding of the meaning, protection and boundaries of civil rights and individual liberties in American law

PLSC 325 American Foreign Policy (3 Credit Hours)
(INTS 375) Origins and development of American foreign policies; the method of their formulation and conduct.
Interdisciplinary Option: Global Studies
Course equivalencies: X-PLSC325/INTS375
Outcomes:
Students will be able to demonstrate an understanding of the formulation, adoption and implementation of American foreign policy and its impact on domestic and international affairs

PLSC 326 American National Security (3 Credit Hours)
American national security policy, including the role of major political actors, the defense budgetary process, and the capability and effectiveness of the military.
Interdisciplinary Option: Peace, Justice, and Conflict Studies
Course equivalencies: X-PLSC326/PAX 327
Outcomes:
Students will be able to analyze and assess the formation, adoption and implementation of national security policies in the United States and their impact on domestic and international affairs

PLSC 327 Political Psychology (3 Credit Hours)
Political attitudes from a social psychological perspective with emphasis on cognitive development models.
Outcomes:
Students will be able to understand the psychological sources of political decision making

PLSC 329 Interest Group Politics (3 Credit Hours)
A study of the role of interest groups in American politics and policy.
Outcomes:
Students will be able to analyze and assess the patterns of political participation and behavior of diverse interest groups and their impact on the American political system

PLSC 330 Global Justice (3 Credit Hours)
This course explores debates about global justice such as immigration, climate change, free trade, and humanitarian interventions. Rooted in political theory, the course also includes readings from sociology, philosophy, and economics.
Interdisciplinary Option: Global Studies
Outcomes:
Students will learn to critically assess different theories of political justice and learn how to evaluate the moral and political justifications of international practices and policies

PLSC 331 Islamic Political Thought (3 Credit Hours)
An introduction to Islamic political thought, covering main ideas, questions, debates of the Islamic religio-political society, from the Qur'an to the present. Among the authors studied include al-Farabi, al-Mawardi, Ibn Khaldun, Islamic feminists, Islamic modernists, and Islamists.
Interdisciplinary Option: Global Studies, Middle East and Islamic World Studies
Outcomes:
Students will be able to identify assumptions of arguments, critically assess different theories, and, having been familiarized with the inherent entanglement of religion and politics, will be able to identify what is specific to Islamic governance and what may be universalized

PLSC 332 Politics of American Bureaucracies (3 Credit Hours)
The political and social aspects of American bureaucracies at the local, state and national levels with emphasis on the roles of administrators and administrative institutions in the political system and policy process.
Outcomes:
Students will be able understand the role of the federal bureaucracy in the formulation, adoption and implementation of public policies, and their impact on the everyday lives of citizens

PLSC 333 Crossing Borders: The Politics of Immigration (3 Credit Hours)
This course explores immigration policies and practices around the world. The primary goal is to gain a better understanding of the choices both countries and would-be immigrants face, as well as the consequences of the laws and policies enacted to regulate the movement of people across borders.
Interdisciplinary Option: Global Studies
Outcomes:
Understand the range of motivations that cause people to migrate, the laws and policies to regulate this movement, the consequences of migration, and contribute to societal debates about migration

PLSC 334 Urban Policies and Problems (3 Credit Hours)
An analysis of selected problems confronting governments in urban America as well as the range of public policies that address urban problems. (May be repeated with different issues.)
Interdisciplinary Option: Human Services, Race and Ethnicity, Urban Studies
Outcomes:
Students will obtain in-depth knowledge of a unique topic in the area of urban policy-making

PLSC 335 Urban Semester Seminar (3 Credit Hours)
See course description for SOCL 335.
Interdisciplinary Option: Urban Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: X-SOCL335/PLSC335
Outcomes:
See outcome for SOCL 335

PLSC 336 Politics in Contemporary China (3 Credit Hours)
This course primarily focuses on domestic politics in post-1978 China. It introduces and examines China's key political institutions and players, various forms of political participation by political elites and ordinary citizens, and issues on governance and political reforms.
Interdisciplinary Option: Asian Studies, Global Studies
Outcomes:
Students will be able to make informed use of China as a case in more general arguments and have a solid footing from which to pursue more in-depth study of particular topics in China

PLSC 337 Terrorism (3 Credit Hours)
An analysis of different types of terrorist insurgencies across the globe and of the efforts by governments to combat terrorism
Interdisciplinary Option: Global Studies
Course equivalencies: X-PLSC337/INTS337/CJC337
Outcomes:
Students will be able to explain what motives the turn to terror as a method of struggle and to assess the morality and effectiveness of the counterterrorism tactics adopted by various governments

PLSC 339 Political Ideologies (3 Credit Hours)
(INTS 369) A comparative analysis of important modern political ideologies and the functions they serve in the political system. Attention will be devoted to the ideologies of non-Western regimes and movements.
Interdisciplinary Option: Global Studies
Course equivalencies: X-PLSC339/INTS339
Outcomes:
Students will be able to analyze and assess the role and impact of political ideologies in the foundation, development, and justification of various political regimes

PLSC 340 International Relations of Africa (3 Credit Hours)
An introduction to the international relations of the countries that comprise the African continent. The primary focus is the evolution of African international relations during the post-colonial period (c. 1960-present).
Interdisciplinary Option: African Studies and the African Diaspora, Global Studies, Middle East and Islamic World Studies
Course equivalencies: X-PLSC340/BWS 340/INTS340
Outcomes:
Students will be able to demonstrate an understanding of the nature and evolution of African international relations with the major northern industrialized democracies and various regions of the developing world

PLSC 342 African Politics (3 Credit Hours)
Forces shaping political societies south of the Sahara: the heritage of colonialism, the sociology of modernization, race related stresses, economic factors, and political movements.
Interdisciplinary Option: African Studies and the African Diaspora, Global Studies, Middle East and Islamic World Studies
Course equivalencies: PLSC342/BWS 342/INTS342/IWS342
Outcomes:
Students will be able to demonstrate an understanding of the formation and structure of African political systems, the patterns of political participation and behavior of diverse individuals, groups, and governments in African societies, and evaluate the roles and processes of African political institutions

PLSC 343 Latin American Politics (3 Credit Hours)
(INTS 343) (LASP 343) Historical, cultural, economic and political forces in the governments of Latin America and the Caribbean.
Interdisciplinary Option: Global Studies, Latin American Studies
Course equivalencies: X-PLSC343/INTS343/LASP343
Outcomes:
Students will be able to demonstrate an understanding of the formation and structure of Latin American and Caribbean political systems, the patterns of political participation and behavior of diverse individuals, groups, and governments in Latin American and Caribbean societies, and evaluate the roles and processes of Latin American and Caribbean political institutions

PLSC 346 East Asian Politics (3 Credit Hours)
(ASIA 342) (INTS 346) The social forces and structure of politics and government of East Asia.
Interdisciplinary Option: Asian Studies, Global Studies
Course equivalencies: X-PLSC346/ASIA342/INTS346
Outcomes:
Students will be able to demonstrate an understanding of the formation and structure of East Asian political systems, the patterns of political participation and behavior of diverse individuals and groups in East Asian societies, and evaluate the roles and processes of East Asian political institutions

PLSC 347 The European Union (3 Credit Hours)
(INTS 381) An introduction to the European Union, a regional organization linking the nations of Europe.
Interdisciplinary Option: European Studies, Global Studies, Polish Studies
Course equivalencies: X-PLSC347/INTS381
Outcomes:
Students will be able to demonstrate an understanding of the formation and structure of the European Union, the patterns of political participation and behavior of diverse individuals, groups, and governments in the European Union, and evaluate the roles and processes of the European Union's political institutions

PLSC 348 Soviet & Post-Soviet Politics (3 Credit Hours)
(INTS 382) An examination of the institutions, processes, and policies of the former Soviet Union and its successor states.
Interdisciplinary Option: European Studies, Global Studies, Polish Studies
Course equivalencies: X-PLSC348/INTS382
Outcomes:
Students will be able to demonstrate an understanding of the formation and structure of the former Soviet Union, the patterns of political participation and behavior of diverse individuals and groups in the former Soviet Union, and evaluate the roles and processes of the former Soviet Union's political institutions; Students will also be able to understand the collapse of the former Soviet Union and the formation and structure of its successor states

PLSC 349 Eastern European Politics (3 Credit Hours)
(INTS 382) An examination of the institutions, processes, and policies of the former Soviet Union and its successor states.
Interdisciplinary Option: European Studies, Global Studies, Polish Studies
Course equivalencies: X-PLSC349/INTS349
Outcomes:
Students will be able to demonstrate an understanding of the formation and structure of the former Soviet Union, the patterns of political participation and behavior of diverse individuals and groups in the former Soviet Union, and evaluate the roles and processes of the former Soviet Union's political institutions; Students will also be able to understand the collapse of the former Soviet Union and the formation and structure of its successor states

PLSC 350 Global Political Economy (3 Credit Hours)
An examination of the modern global economy with attention to the interrelationship between the economic and political orders.
Course equivalencies: GLST 309 / PLSC 350
Outcomes:
Students will be able to demonstrate knowledge of the global economy and the interrelationship between economic and political systems in the modern world

PLSC 353 International Law (3 Credit Hours)
(INTS 353) (PAX 353) Introduction to legal principles and procedures of recognized international law.
Interdisciplinary Option: Global Studies, Peace, Justice, and Conflict Studies, Sociolegal Studies
Course equivalencies: X-PLSC353/INTS353/PAX 353
Outcomes:
Students will be able to demonstrate an understanding of the role and impact of law and legal principles and institutions in international relations

PLSC 354 Global Environmental Politics (3 Credit Hours)
(ESP 354) (INTS 354) (PAX 354) Examines the linkages between the world's natural environment and the global political system.
Interdisciplinary Option: Global Studies, Peace, Justice, and Conflict Studies
Course equivalencies: X-PLSC/ESP/INTS/PAX 354
Outcomes:
Students will be able to demonstrate an understanding of the role of various private, national and international actors in the formulation, adoption and implementation of environmental public policies

PLSC 355C Women and Politics: A Cross-National Perspective (3 Credit Hours)
This course offers a cross-national perspective of women's status in the political world, as voters, activists, and officeholders. It examines women's participation in the developed and developing world. Students will acquire knowledge of the role of women as political actors in a multitude of nations in the world.
Interdisciplinary Option: Global Studies, Women & Gender Studies
Course equivalencies: PLSC355C/WSGS355C/INTS361C

PLSC 356 Intervent in World Politics (3 Credit Hours)
(INTS 356) (PAX 356) Examines the purposeful use of political, economic, and military instruments by one country to influence the domestic or the foreign policies of another country.
Interdisciplinary Option: Global Studies, Peace, Justice, and Conflict Studies
Course equivalencies: X-PLSC356/INTS356/PAX 356
Outcomes:
Students will obtain an in-depth knowledge of the historical evolution, potential constraints, and case studies of U.S. intervention in the post World-War II era

PLSC 357 Hollywood and Law (3 Credit Hours)
This course analyzes films that focus on justice, the law, and the legal system, to see what they tell us about political and legal culture, and what messages (if any) they have for contemporary politics.
Outcomes:
Student will analyze how Hollywood portrays law, policy, and major trials and court decisions as well as be able to locate and ask questions about how the depiction of law, politics, and civic responsibility have changed across time

PLSC 358 War, Peace and Politics (3 Credit Hours)
(PAX 358) The historical evolution of war, the nature of wars in the 20th century and into the 21st century, the nature of threats, sources of conflict, and procedures for peaceful resolution of disputes.
Interdisciplinary Option: Global Studies
Course equivalencies: X-PLSC358/INTS358/PAX 358
Outcomes:
Students will be able to demonstrate an understanding of the principal causes of wars, the means and ends of warfare, and the process and prospects of reestablishing peace

PLSC 358D The Scientific Study of War (3 Credit Hours)
This course provides an introduction to & overview of the concepts & approaches related to the causes of war, conflict, and peace in the international system. The main topics of the course are: (1) an introduction to understanding war as a social science topic, (2) the origins of the demands and disputes that can lead to war, (3) the escalation of these, (4) the expansion of war, (5) the consequences of war, and (6) the possibility of peace.
Interdisciplinary Option: Global Studies

PLSC 359 Revolutions (3 Credit Hours)
(INTS 368) A critical examination of different empirical theories of revolution. Case studies will be drawn from Europe, Asia, Africa, and the Americas.
Interdisciplinary Option: Global Studies
Course equivalencies: X-PLSC359/INTS384
Outcomes:
Students will be able to analyze and assess the causes, development, and consequences of modern revolutionary movements and revolutions

PLSC 360 Western European Politics (3 Credit Hours)
(INTS 360) Comparative study of the structures, processes, and functions of the parties and governments of the western powers with emphasis on the United Kingdom, France and the German Federal Republic.
Interdisciplinary Option: European Studies, Global Studies
Course equivalencies: PLSC360/INTS360
Outcomes:
Students will be able to demonstrate an understanding of the formation and structure of West European political systems, the patterns of political participation and behavior of diverse individuals and groups in West European societies, and evaluate the roles and processes of West European political institutions

PLSC 362 Politics Developing Societies (3 Credit Hours)
(INTS 362) Social, economic, and ideological factors influencing political developments in emerging nations.
Interdisciplinary Option: Global Studies
Course equivalencies: X-PLSC362/INTS362
Outcomes:
Students will be able to demonstrate an understanding of the foundation and structure of emerging nations, the patterns of political participation and behavior of diverse individuals, groups, and governments in developing societies, and evaluate the roles and processes of political institutions in developing societies

PLSC 363 International Politics (3 Credit Hours)
This course is intended to serve as an advanced exploration of the field of international politics. Students will explore the most recent developments in international relations theory and select political developments within the international system, including the evolution of these developments in various regions of the world.
Interdisciplinary Option: Global Studies
Outcomes:
Students will hone their ability to assess/critique cutting edge theories and developments within the field of international politics

PLSC 364 UN & International Organization (3 Credit Hours)
(INTS 364) (PAX 364) An examination of the purposes, organization, background, and operations of existing international organizations.
Interdisciplinary Option: Global Studies, Peace, Justice, and Conflict Studies
Course equivalencies: X-PLSC364/INTS364/PAX 364
Outcomes:
Students will be able to demonstrate an understanding of the formation and structure of various International Organizations, especially the United Nations, the patterns of political participation and behavior of individuals, private and public groups, and governments in International Organizations, and evaluate the roles and processes of International Organizations

PLSC 365 Italian Politics & Government (3 Credit Hours)
(INTS 365) (ROST 365) An examination of the institutions, processes, and practices of Italian political life. Major concern is with post-1945 Italian politics.
Interdisciplinary Option: European Studies, Global Studies, Italian Studies
Course equivalencies: X-PLSC365/INTS365/ROST365
Outcomes:
Students will be able to demonstrate an understanding of the formation and structure of Italy's contemporary political system, the patterns of political participation and behavior of diverse individuals and groups in Italian society, and evaluate the roles and processes of Italian political institutions

PLSC 366 Dictatorship (3 Credit Hours)
This comparative politics course examines the origins, dynamics, and contradictions of various nondemocratic forms of government, including military and party dictatorships.
Interdisciplinary Option: Global Studies
Course equivalencies: X-PLSC366/INTS366
Outcomes:
Students will be able to explain why authoritarian systems rise and fall and how politics in these systems compares to the political process in democratic states

PLSC 367 Model United Nations (3 Credit Hours)
Introduction to the operations and practices of United Nations, including training for student participation in the Model U.N. program. Students taking PLSC 367 Model UN class and act as leaders of the team that represents Loyola at the New York conference. Prior permission required to enroll.
Interdisciplinary Option: Global Studies, Peace, Justice, and Conflict Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: X-PLSC367/INTS367/PAX 367
Outcomes:
Students will demonstrate an understanding of the formation and structure of the United Nations; Understanding in enhanced by the practical experience gained by participating in Loyola's Model UN program

PLSC 368 Politics of the Middle East (3 Credit Hours)
This course will draw upon the theoretical insights of comparative politics to examine politics in the Middle East and North Africa. The seminar focuses on issues that are important for understanding the contemporary politics of the region, from the persistence of authoritarianism, petropolitics, political Islam, Arab-Israeli conflict, and the rise of ISIS to ethnic divisions, gender relations, and social movements.
Interdisciplinary Option: Arabic Language and Culture, Global Studies, Middle East and Islamic World Studies
Course equivalencies: X-PLSC368/INTS391/IWS368

PLSC 369 Politics of Energy (3 Credit Hours)
The course will discuss how the challenges of climate change, energy security, and poverty alleviation are being tackled by politicians and the public. It will also assess the degree to which changes in energy resources bring changes in economic, political, and social power.
Interdisciplinary Option: Global Studies
Outcomes:
Students will gain a firm understanding of the various global and regional trends that are shaping 21st Century foreign policy behavior generally, and energy diplomacy specifically

PLSC 370 Fieldwork in Political Science-Internship (1-6 Credit Hours)
Practical experience in political and governmental agencies and organizations in Chicago and Washington, D.C.
Interdisciplinary Option: Human Services
This course satisfies the Engaged Learning requirement.
Outcomes:
Students learn about different forms of public service and the ethical responsibilities of civic engagement; Working in a professional office for fifteen weeks allows students to experience the world of public service first-hand; Students will be able to demonstrate an understanding of models of leadership and public service by working with supervisors who are normally leaders in their fields

PLSC 371 Roman Law (3 Credit Hours)
(CLST 362) An introduction to the general principles and basic concepts of Roman civil law with emphasis upon the Late Republican-Early Imperial period.
Interdisciplinary Option: European Studies
Course equivalencies: X-CLST362/PLSC371/ROST362
Outcomes:
Students will be able to demonstrate an understanding of the assumptions and principles guiding the formulation and implementation of Roman civil law

PLSC 372 Crime, Race & Violence (3 Credit Hours)
This course discusses the political aspects that affect crime and violence in the United states, with a special focus on questions of race.
Interdisciplinary Option: African Studies and the African Diaspora, Human Services, Peace, Justice, and Conflict Studies, Psychology of Crime and Justice, Sociolegal Studies, Urban Studies
Course equivalencies: X-CJC/BWS/AFR/PLSC372/PAX373

PLSC 373 Politics and Literature (3 Credit Hours)
Literature as a medium of political analysis and political criticism. The literary tradition examined may vary, and the course may be repeated for credit, depending on the subject matter.
Outcomes:
Students will learn to interpret and evaluate the political assumptions and principles underlying the writings of major literary figures, and to reflect on the role and significance of literature in promoting a more just society

PLSC 374 Democracy (3 Credit Hours)
A critical examination of the theory and practice of democratic government. The subfield to which this course belongs varies depending on its content.
Outcomes:
Students will be able to analyze and assess the theoretical arguments for and against democracy, and to demonstrate an understanding of the various institutional arrangements of democratic government

PLSC 376 Political Behavior and Public Opinion (3 Credit Hours)
This course will cover a range of topics pertaining to public opinion and political behavior in the United States. Topics will include how public opinion is measured, research on the factors that shape public attitudes about political matters, and work that examines who participates in politics and why.
Outcomes:
Students will learn about substantive scholarly findings on these topics, as well as the methodologies researchers use to answer questions about public opinion and political participation

PLSC 377 American Public Policies (3 Credit Hours)
Public policy-making at the national and state government levels; includes social, economic, fiscal, judicial, and moral policies.
Course equivalencies: PLSC377 / PLSC205
Outcomes:
Students will obtain in-depth knowledge of a unique topic in the area of American public policy adoption and implementation

PLSC 379 The Legislative Process (3 Credit Hours)
Legislative campaigns and elections, the formal procedures of law making, the influence of political parties and interest groups, and the interaction with the president, the judiciary, and the bureaucracy.
Course equivalencies: PLSC379 / PLSC210
Outcomes:
Students will be able to analyze and assess the role and processes of the US Congress in the deliberation and formulation of domestic policies and their impact on the everyday lives of citizens

PLSC 380 Public Policy Analysis (3 Credit Hours)
The course offers a broad approach to the study of public policy.

PLSC 381 The American Presidency (3 Credit Hours)
The powers, roles, and responsibilities of the presidential office with special attention to political leadership, the bureaucracy, and political parties.
Course equivalencies: PLSC381 / PLSC211
Outcomes:
Students will be able to analyze and assess the role and impact of the U.S. presidency on domestic policy and foreign affairs

PLSC 384 The Judicial Process (3 Credit Hours)
The judicial process in the American court system from the Supreme Court to local trial courts, civil and criminal procedure, appellate court decision-making, and the impact of judicial policies on American politics and society.
Interdisciplinary Option: Sociolegal Studies
Course equivalencies: PLSC384 / PLSC212
Outcomes:
Students will be able analyze and assess the role and impact of the U.S. court system on the protection of individual freedoms and civil rights

PLSC 385 Introduction to Law (3 Credit Hours)
The nature of law in society, including the constitutional origins and institutional structure of legal systems, the practices of the legal profession, and the substance of selected areas of case law.
Interdisciplinary Option: Sociolegal Studies
Course equivalencies: CRMJ375/PLSC385/PLSC214
Outcomes:
Students will be able to understand the role of law and the legal system in American politics and its impact on the everyday lives of citizens

PLSC 386 Campaigns and Elections (3 Credit Hours)
The organization, functions, and behavior of political parties and elections in the United States.
Course equivalencies: PLSC386 / PLSC217
Outcomes:
Students will be able to analyze and evaluate the role and impact of political parties and elections on the American political system

PLSC 387 Politics and the Press (3 Credit Hours)
A study of the dynamics between politics and the press, including its impact on campaigns, elections, and public policy.
Course equivalencies: X-PLSC387/CMUN340
Outcomes:
Students will be able to analyze and assess the role and impact of the press on the American politics

PLSC 388 The Morality and Legality of War (3 Credit Hours)
Competing perspectives on the moral, legal, and practical challenges of military force as a tool of foreign policy, especially focused on the complexity of using force to pursue humanitarian goals.
Interdisciplinary Option: Global Studies
Outcomes:
Students will be able to demonstrate an understanding of just war theory, international humanitarian law, and major theories of humanitarianism, to analyze the stakes and trade-offs involved in decisions about war and peace, and to critically engage with contemporary foreign policy events

PLSC 389 State Politics (3 Credit Hours)
A comparative study of the composition and powers of state governments.
Course equivalencies: PLSC389 / PLSC221
Outcomes:
Students will be able to demonstrate an understanding of state governments, the patterns of political participation and behavior of diverse individuals and groups in state politics, and evaluate the roles and processes of state political institutions

PLSC 390 Urban Politics (3 Credit Hours)
Political processes in cities and other local governments, Examination of mayors, city councils, bureaucrats, and their interaction with local citizens and interest groups.
Interdisciplinary Option: Human Services, Race and Ethnicity, Urban Studies
Course equivalencies: PLSC390 / PLSC222
Outcomes:
Students will be able to demonstrate an understanding of urban governments, the patterns of political participation and behavior of diverse individuals and groups in urban politics, and evaluate the roles and processes of urban political institutions

PLSC 391 Chicago Politics (3 Credit Hours)
The political groups in Chicago, their political power and impact on city politics and policy. Attention will be given to the powers and roles of city council and the mayor's office.
Interdisciplinary Option: Human Services, Italian American Studies
Course equivalencies: PLSC391 / PLSC224
Outcomes:
Students will be able to demonstrate an understanding of Chicago government, the patterns of political participation and behavior of diverse individuals and groups in Chicago politics, and evaluate the roles and processes of Chicago's political institutions

PLSC 392 Environmental Politics (3 Credit Hours)
The issues, significant actors, and public policies relating to the environment. (ESP 235) (PAX 235)
Interdisciplinary Option: Peace, Justice, and Conflict Studies, Urban Studies
Course equivalencies: PLSC392/PLSC/ESP/PAX235
Outcomes:
Students will be able to analyze and assess the role of various actors in the formulation, adoption and implementation of environmental public policies, and their impact on the everyday lives of citizens

PLSC 395 Political Science Honors Seminar (3 Credit Hours)
Variable titles. Investigation of selected topics or methods in Political Science.
Outcomes:
Students will gain an in-depth knowledge of a unique topic or method in Political Science

PLSC 396 Directed Readings (1-3 Credit Hours)
Opportunity for an unusually accomplished student to pursue a discrete area of knowledge in political studies in a format designed to stimulate highly productive effort.
Outcomes:
Students will hone research and writing skills in close collaboration with a faculty sponsor

PLSC 397 Urban Studies Research (3 Credit Hours)
The course allows students to engage in research-related projects related to urban studies.
Interdisciplinary Option: Urban Studies
Course equivalencies: X-PLSC397/URB397

PLSC 398 Washington DC Internship Seminar (3 Credit Hours)
This course requires you to combine your academic interests and your internship, allowing you to reflect on and think deeply about the relationship between your internship, experience and academic learning. This course will also explore political Washington.
Outcomes:
This course will clarify students' career goals, and demonstrate how these goals can be enhanced by their academic work

PLSC 399 Tunisia On-Site: Arab Spring, Democratic Change, Islam (3 Credit Hours)
A combination of site visits, lectures, and group discussions throughout Tunisia provides a unique experiential understanding of the relationship between the Arab spring, democratic change, Islam, gender relations, and U.S. foreign policy amidst the historical inheritances of the Carthaginian, Roman, Islamic, and French empires in North Africa.
Interdisciplinary Option: African Studies and the African Diaspora, Arabic Language and Culture, Global Studies, Middle East and Islamic World Studies, Women & Gender Studies
Course equivalencies: X-PLSC 399/HIST 313T
Outcomes:
Experientially based knowledge of the politics, society, culture, history, and international relations of a country (Tunisia) in a region (North Africa) at the intersection of Africa and the Middle East

PLSC 400 Scope and Methods of Political Science (3 Credit Hours)
This is a broad course that lays out the main approaches to political science.

PLSC 401 Intro to Research Design & Method (3 Credit Hours)
This course is an introduction to principles of research design in political science. The main objective of this course is to familiarize students with the social scientific approach to studying politics.
Outcomes:
Students will learn how to ask empirical questions about the political world, how to develop theories and generate testable hypotheses, how to collect appropriate types of evidence, how to answer research questions scientifically using such evidence, and how to clearly convey their evidence and argument to others

PLSC 402 Seminar on Empirical Analysis (3 Credit Hours)
The course allows students to develop additional methods to empirical analysis.

PLSC 404 Selected Problems in American Politics (3 Credit Hours)
This course focuses on selected problems in the study of American politics and the American Political system.
Outcomes:
Gain an in-depth understanding of selected problems in American politics and the American Political system

PLSC 405 American Executive Branch (3 Credit Hours)
This course relies on historical and contemporary scholarly literature on the American presidency to analyze the development and scope of rhetorical and party leadership, legislative relations, the commander-in-chief and diplomatic roles as well as the growth of the institutionalized presidency.
Outcomes:
Students will master the key literature on the American presidency as well as conduct research on a particular aspect of the US presidency

PLSC 406 American Legislative Branch (3 Credit Hours)
This course focuses on the organization of and decision-making in the US legislative branch.
Outcomes:
Students will fully understand how the US Congress is structured and legislates, as well as its interactions with other US institutions and with American society

PLSC 407 Public Policy-Making & Implementation (3 Credit Hours)
This course examines the process and dynamics of US policy-making systems.
Outcomes:
Students will understand the development of the public sector agenda, the policy formation and legitimation processes, and the role of implementation functions, as these relate to substantive issues or policy arenas

PLSC 409 Organizational Theory (3 Credit Hours)
The course offers a broad approach to the various theoretical and practical approaches to the study of organizations.

PLSC 410 Urban Politics (3 Credit Hours)
This course addresses the major theories, studies and issues of urban politics.
Outcomes:
Students will understand "political machines", parties, interest groups, voting, protests, minority and ethnic groups, city councils, mayors, bureaucrats and community power structures

PLSC 411 American Political Parties/Electoral Process (3 Credit Hours)
This course analyzes the roles and functions of the party system and voting behavior in the United States.
Outcomes:
Students will understand the role of mass communication and issues in elections, the impact of party identification, and the impact of the electoral system on behavior of party and voter

PLSC 412 Constitutional Politics (3 Credit Hours)
This course examines constitutional policy-making in the United States.
Outcomes:
Students will understand the political role of the Supreme Court, judicial values in constitutional adjudication, and the impact of court decisions

PLSC 416 US Political Institutions (3 Credit Hours)
The course surveys academic literature on political institutions in the United States including the legislative, executive, and judicial branches of the federal government, state and local governments, parties, interest groups, media organizations, and civic organizations.
Outcomes:
Students will gain an in-depth understanding of a wide variety of political institutions and how they interact with one another

PLSC 417 The American Legal System (3 Credit Hours)
This course examines the structure, functions, interrelationships, dynamics, and decision-making processes of the US legal system.
Outcomes:
Students will understand the major components of the American legal system - legislatures, administrative agencies, and courts

PLSC 418 Political Psychology & Socialization (3 Credit Hours)
This course examines psychological, social and environmental influences on political attitudes and behavior.
Outcomes:
Students will understand the psychodynamics of political development and socialization as they interact with opinion formation and political participation

PLSC 419 Managing Urban Government (3 Credit Hours)
This course studies the politics of urban government management.
Outcomes:
Students will understand the environments in which the urban manager functions

PLSC 420 Comparative Political Systems (3 Credit Hours)
This course examines political institutions and political behavior in various political systems.
Course equivalencies: X-INTA 420/PLSC 420
Outcomes:
Students will master the literature on comparative politics, including the methodology of comparative analysis

PLSC 421 Democratic Political Systems (3 Credit Hours)
This course examines selected democratic political systems.
Outcomes:
Students will understand how selected democratic systems operate, focusing on their similarities and differences

PLSC 422 Authoritarian Political Systems (3 Credit Hours)
This is a graduate-level seminar on authoritarian political systems. The course explores theoretical perspectives on authoritarianism, political institutions in non-democracies, and paths to democratization.
Outcomes:
Students will become familiar with concepts and theories of authoritarianism, gain knowledge about different types of authoritarian rule, and learn about how authoritarian governments work and perpetuate power

PLSC 423 Soviet & Post-Soviet Politics (3 Credit Hours)
This course analyzes the development of Soviet and post-Soviet politics since 1917.
Outcomes:
Students will understand the emergence and development of Soviet politics, as well as its decline in the mid-1980s

PLSC 424 Politics of Developing Areas (3 Credit Hours)
This course examines the politics of the "developing world."
Outcomes:
Students will understand the methods used to analyze politics in the developing and underdeveloped nation-states

PLSC 425 Sub-Saharan Africa (3 Credit Hours)
This course examines politics in Africa from the pre-colonial period to the present.
Outcomes:
Students will understand issues relating to decolonization, ethnicity, class, political economy, democratization, and regime transition in Sub-Saharan Africa

PLSC 426 Latin American Politics (3 Credit Hours)
This course examines important themes in the study of politics in Latin America.
Outcomes:
Students will understand the current scholarship and methodologies in the study of Latin American politics

PLSC 427 Politics of the Middle East (3 Credit Hours)
Enrollment Conditions: Permission of the instructor required. This course offers a historical and thematic approach to study the society and politics of the contemporary Middle East. Two central aims of the course are to cultivate critical perceptions regarding widespread images and descriptions of the region and to bolster students' historical, socioeconomic and political knowledge of the region.
Outcomes:
Students will master important political science literature on the Middle East and be well positioned to pursue original research

PLSC 428 Political Violence (3 Credit Hours)
This course offers a thematic approach to the study of political violence with a particular focus on armed conflicts involving non-state actors (i.e., civil wars). It addresses a wide variety of questions informed by the cutting-edge research in political science and other disciplines.
Outcomes:
Students will develop an understanding of the causes of different forms of violence in different parts of the world, motivations of people who participate in violence, and solutions to armed conflicts

PLSC 429 Comparative Politics Selected Problems (3 Credit Hours)
This course examines selected issues in comparative politics.
Outcomes:
Students will master the literature or conduct research in a particular area of comparative politics

PLSC 430 Theories of International Politics (3 Credit Hours)
This course analyzes theories and major issues of international politics.
Course equivalencies: X-INTA 430/PLSC 430
Outcomes:
Students will master the literature in major research areas and theoretical frameworks in international relations

PLSC 431 Formulation US Foreign Policy (3 Credit Hours)
This course examines how US foreign policy is made.
Outcomes:
Students will understand the decision-making institutions and their interaction in the formulation and execution of political, military and economic foreign policy

PLSC 432 Comparative Foreign Policy Analysis (3 Credit Hours)
This course examines contemporary policy positions of major blocs of nations as well as specific nations.
Outcomes:
Students will understand how foreign policy is made in countries other than the United States, as well as the policy of blocs of nations

PLSC 433 International Organization (3 Credit Hours)
This course examines the development and role of international organizations.
Outcomes:
Students will understand the political and administrative principles and problems of various types of international organizations, including the United Nations, the World Trade Organization, the World Bank, the International Monetary Fund and other key global and regional organizations

PLSC 435 International Political Economics (3 Credit Hours)
This course examines global economic systems.
Outcomes:
Students will understand global political-economic relations in the post-WWII period, including international monetary relations, international trade, regional integration, direct investment, debt, and development assistance

PLSC 436 International Conflict (3 Credit Hours)
This course focuses on concepts and approaches related to the causes of war, conflict and peace in the international system.

PLSC 437 Selected Problems International Law (3 Credit Hours)
This course examines selected issues or problems in international law.
Outcomes:
Students will understand contemporary theories of international law and the relationships among the various traditional and contemporary areas of international law

PLSC 439 Selected Problems in International Politics (3 Credit Hours)
This course examines important themes and theories in international politics.
Outcomes:
Students will master a specific body of literature or conduct research in a particular area of international relations

PLSC 440 Ancient Political Thought (3 Credit Hours)
This course examines the major works of the most important theorists within the classical tradition.
Outcomes:
Students will master key writings of Thucydides, Plato, Aristotle, and other theorists

PLSC 442 Modern Political Thought (3 Credit Hours)
This course examines major modern political thinkers.
Outcomes:
Students will master key works of from the Italian Renaissance to the French Revolution

PLSC 444 Great Authors (3 Credit Hours)
This course focuses on the works of political theorists in the western tradition.
Outcomes:
Students will master key works of theorists in the western tradition

PLSC 446 Political Ethics (3 Credit Hours)
This course surveys classic debates on ethics - such as utilitarianism and deontological ethics - to provide students with analytical tools to answer the deceptively simple question "What is the right thing to do?" The course draws on classical readings of political philosophy, while seeking to make those abstract problems tangible by applying them to real world cases and examples.

PLSC 447 American Political Thought to Civil War (3 Credit Hours)
This course examines pre-Civil War US political thought.
Outcomes:
Students will master the works of key thinkers from the American founding to the Civil War

PLSC 449 19th Century Political Thought (3 Credit Hours)
This course examines key theorists in the nineteenth century.
Outcomes:
Student will master the works of key theorists beginning with the French Revolution and through the nineteenth century

PLSC 470 Fieldwork in Political Science-Internship (1-3 Credit Hours)
This is a graduate level course that allows students to get experience through internships. Restricted to Graduate School students.
Course equivalencies: X-PLSC 470/INTA 470
Outcomes:
Students will be able to demonstrate an understanding of models of leadership and public service by working with supervisors who are normally leaders in their fields

PLSC 475 Political Analysis I (3 Credit Hours)
This course provides an introduction to the use of inferential statistics in political science.
Course equivalencies: X-INTA 475/PLSC 475
Outcomes:
Students will master the basic statistical techniques used in political science

PLSC 476 Political Analysis II (3 Credit Hours)
This is an intermediate course in data analysis methods in political science.
Outcomes:
Students will master intermediate research and quantitative methods in political science

PLSC 499 Directed Readings (3-6 Credit Hours)
This course involves specialized study under the supervision of a faculty member.
Outcomes:
Students will master a particular segment of academic literature or conduct in-depth research on a specific topic

PLSC 502 Seminar in Political Behavior (3 Credit Hours)
This course examines selected topics in the development and shaping of political behavior.
Outcomes:
Students will master the political behavior literature and conduct research in specific areas of the discipline

PLSC 503 Seminar: Law & Political Behavior (3 Credit Hours)
This course analyzes selected topics concerning the relationship between legal processes, policies, and politics.
Outcomes:
Students will understand a particular topic in law and political behavior

PLSC 504 Seminar: American Public Policy (3 Credit Hours)
This seminar analyzes the American public policy.
Outcomes:
Students will understand the formation, implementation, and evaluation of public policies in the United States

PLSC 505 Seminar in Urban Problems (3 Credit Hours)
This course analyzes selected policies in urban and state politics.
Outcomes:
Students will understand the politics of specific urban and state policies

PLSC 506 Seminar State & Urban Policy Analysis (3 Credit Hours)
This course examines current perspectives and techniques in the analysis of state and urban policies.
Outcomes:
Students will understand contemporary policy analysis perspective and techniques as well as methods in policy analysis

PLSC 515 Seminar-Public Administration (3 Credit Hours)
This is an upper-level seminar on complex questions related to public administration.

PLSC 520 Seminar: Comparative Politics (3 Credit Hours)
This course examines an important, contemporary area of research in comparative politics.
Outcomes:
Students will master a specific body of literature and conduct research in a specific area in comparative politics

PLSC 521 Seminar Western European Politics (3 Credit Hours)
This course examines contemporary politics in Western European countries.
Outcomes:
Students will understand political and policy developments in Western Europe, as well as the structures of the European Union and the North Atlantic Treaty Organization

PLSC 531 Seminar: International Politics (3 Credit Hours)
This course examines various research topics in international politics.
Outcomes:
Students will master a particular body of work or conduct research in a specific area of international politics

PLSC 532 Soviet/Post-Soviet Foreign Policy (3 Credit Hours)
This course examines the foreign policies of the Soviet Union and the post-Soviet states.
Outcomes:
Students will understand the formulation and application Soviet and post-Soviet foreign policies

PLSC 533 U.S. National Security (3 Credit Hours)
This course examines the U.S. security establishment and the national security process.
Outcomes:
Students will understand how US security policy is made, including the defense budget, US force structure, intelligence, covert operations, and the role of Congress

PLSC 543 Liberalism (3 Credit Hours)
This course analyzes liberal political thought.
Outcomes:
Students will master key works and theorists focusing on equality, liberty, natural rights, utilitarianism, and idealistic bases of modern liberal society

PLSC 546 Political Philosophy Selected Problems (3 Credit Hours)
This course examines a selected theoretical issue in the history of political thought.
Outcomes:
Students will master the writings and theories in a particular theme of political theory

PLSC 595 Thesis Supervision (1 Credit Hour)
The is the first course in a two-course sequence for researching a thesis towards earning a Master's degree.

PLSC 596 Thesis Research (3 Credit Hours)
The is the second course in a two-course sequence for researching a thesis towards earning a Master's degree.

PLSC 597 Dissertation Research (3-6 Credit Hours)
The course is for students researching a thesis topic towards writing a dissertation prospectus.

PLSC 598 Teaching Internship (3 Credit Hours)
The course allows students to complete an internship focused on teaching.

PLSC 600 Dissertation Supervision (1 Credit Hour)
The course is for students researching a dissertation towards earning a PhD.

PLSC 605 Master's Study (1 Credit Hour)
The course is for students researching a thesis towards earning a Master's degree.

PLSC 610 Doctoral Study (1 Credit Hour)
The course is for students researching a dissertation towards earning a PhD.

ProLaw (PLAW)

Discover, search, courses (p. 2661)!

PLAW 101 Comparative and Ethical Lawyering for the Rule of Law (3 Credit Hours)
This course will develop the students' knowledge and skills required to provide advice and assistance in a country with a culture and a legal tradition different from the culture and legal system in which they received their education. The course will examine and compare the main elements of particular relevance to rule of law assistance work in major world legal traditions: common law, civil law, Islamic law, customary law and mixed legal traditions. It will also explore how the force of their normativity is effectively applied and how institutional frameworks deal with overlaps. Finally, the course will encourage students to consider the ethical dimension of cross-systems rule of law advising.

PLAW 102 History, Theory and Practice of Rule of Law for Development (3 Credit Hours)
This course provides an overview of the main intellectual foundations supporting the view that law and development are linked. While this connection may appear obvious, the course seeks to show that the relationship may not be as straightforward as first impressions might lead one to believe. Indeed, proponents of the presumed relation between law and development must confront two important distinctions well known to social scientists: causation versus correlation. Evidence that societies, which have achieved high levels of development, typically have good legal systems is incontrovertible. What is less clear is how they got where they are and in what sequence. Put differently, do good laws and institutions generate good development outcomes or does development lead to good laws and institutions? The course applies interdisciplinary and comparative research in history, economics, sociology, political science, regulatory theory, and philosophy to questions of law and the development of legal institutions and does not assume any prior knowledge in any field outside of law.

PLAW 103 Theory and Practice of Assessments in Rule of Law Advising (2 Credit Hours)
This course will provide students with the knowledge and skills required to undertake assessments, the crucial lynchpin which supports the design of specific policies, legal and regulatory reforms and administrative actions. The course demonstrates how developing a clear understanding of problems facing a society is fundamental to good governance and the rule of law. The course assumes that such understanding can be facilitated through professionally prepared assessments which identify the root causes of problems facing a country in a given area and put forward options for remedial action. Students will learn how to use the rich body of documented experience and guidance available on structuring and preparing assessments by learning how to plan and carry out assessments linked, for instance, to justice sector reform, access to justice, the improvement of the legal framework for investment and sustainable business and the control of human trafficking.

PLAW 104 International Development Architecture (3 Credit Hours)
This course covers the rule of law and governance dimensions to international development assistance. It examines both the institutional frameworks and legal mechanisms by which international development assistance is distributed for rule of law and state-building activities and the legal and regulatory structures that apply to development assistance. The course begins by considering the reasons that donors provide aid generally and for rule of law, followed by the examination of the normative frameworks and standards that shape the manner in which aid is distributed, institutions and actors, mechanisms by which aid is programmed and actual use of aid by recipients. The overall approach begins at the global level and follows the chain of development aid through its various elements down to the national level. A key theme of the course is that the approach to international development assistance is broadening. Historically, financing for development was understood primarily in terms of public sector resources. As a result of a confluence of factors, development institutions have been seeking to gather resources from the private sector to supplement official development aid.

PLAW 105 Sustainable Development Through International Commerce and Investment (2 Credit Hours)
International commercial transactions and investments can serve as the vehicles for sustainable development that respects economic, social, environmental, and other important values of the parties involved. Modern-day corporations have enormous resources and, when properly deployed, significant capabilities to promote sustainable development. This course explains the life cycle and range of international transactions and investment - from procurement of goods and services and licensing of technology to large infrastructure and public-private partnership projects. It sets out how properly structured transactions can promote prudent and sustainable development in developing and emerging economies. It describes how private companies, investors, regulators, financiers, governments, NGOs, and other stakeholders can work for the mutual benefit of the communities and countries involved as well as responsible long-term goals.

PLAW 106 Design of Rule of Law Programs and Proposal Preparation (2 Credit Hours)
This course will build the understanding and skills of students in project design and the preparation of written proposals related to rule of law assistance, which can be carried out either in the context of an internationally financed assistance arrangement or as a nationally-driven and self-financed initiative. Building on the needs assessments PROLAW course, the course will position project design as it fits into the overall project lifecycle, as well as its relationship with results-based management. The course will allow the student to understand the theory behind and the methods for conducting problem, stakeholder and risk analyses, designing a logical intervention including project objectives, outcomes, outputs and activities, setting a budget, performance indicators, and means of measuring project progress, and applying theory of change and other logical framework tools. In the second half of the course students will out their newly acquired knowledge and skills to use by preparing a full written project proposal. The course will examine donor thinking behind requirements and how to respond to them, examine current thinking concerning the effectiveness of the project approach to rule of law reform and consider the meaning of innovation, such as problem-driven iterative approaches.

PLAW 107 Rule of Law in Conflict Prevention and Peacebuilding (2 Credit Hours)
This course explores the relationship between rule of law, conflict prevention, mitigation and peacebuilding for development. Drawing from ongoing case studies and international practice, the course examines the drivers of conflict, the dynamics and changes in the social fabric during conflict and how rule of law addresses those challenges. Focus is on justice as foundational to establishing the security and institutional legitimacy necessary for human development. The course will examine how unaccountable and ineffective law enforcement and governance institutions contribute to conflict. Given an understanding of the context, course discussions will seek to identify practical modalities for strengthening rule of law and justice reform, including transitional justice. Course materials include case studies, evidence-based analyses and commentary. Students will be called upon to apply the course learning to a specific conflict affected context. Drawing on other courses in the program such as assessment, program design, implementation and oversight, students will identify opportunities for rule of law engagement in conflict contexts and propose relevant strategies and adaptive programming.

PLAW 108 Legal Systems and Methods (3 Credit Hours)
This course aims at providing those PROLAW students with first degrees in other than law with a framework for understanding the central features, branches, functions and notions of law and the evolution of legal systems and their influence on systems of governance. After a general introduction on legal methods and the sources of law in the main legal traditions, the course will examine the interaction between norms, policies and societal values in different branches of the law. Students will learn key law-related skills such as legal reasoning, analysis, planning and problem solving and how law influences advising, negotiating and mediation.

PLAW 110 Principles of International Economic Law (3 Credit Hours)
Principles of International Economic Law is a required PROLAW course covering selected topics in the law governing international business transaction, international trade law, alternative dispute resolution, and international litigation. It is an asynchronous online course with two modules per week of recorded video lectures, required readings, and follow up assignments with feedback from the instructors. The course is also available as an elective for JD and other LLM students with permission of instructor.

PLAW 250 Research and Writing on the Rule of Law (3 Credit Hours)
.This course is designed to assist lawyers and other professionals working with the law in developing the techniques of researching and writing in relation to rule of law development. The primary objective of this course is to enable students to apply research skills, which will be instrumental for conducting in depth studies on rule of law development topics for major papers during the PROLAW Program and for the final capstone project. With a focus on development issues, substantial emphasis is given to socio-legal and empirical legal research methodologies. A secondary objective is that students will acquire writing skills that can be used in various practice settings involving legal and policy analysis, policymaking, and implementation of rule of law development research studies. Students will also gain expertise on how to research and analyze issues from other disciplines that contribute to the processes and dynamics of legal and institutional reform. This knowledge is foundational for developing theories of change and is critical to formulating strategies, plans, and analyses of rule of law advocacy and reform programs.

PLAW 251 Rule of Law Thesis Supervision and Completion (3 Credit Hours)
Open to LLM students only by permission provided by Program Director.

PLAW 252 PROLAW Completion (0 Credit Hours)
Open to: Students within the LLM and MJ programs in Rule of Law for Development (PROLAW program). Students who do not complete their capstone project or thesis paper within the requisite period of time set by the PROLAW Program must register for this course. Permission to register is required.

PLAW 253 Rule of Law Capstone Project (2-3 Credit Hours)
The Rule of Law Capstone Project is the culmination of the student's academic and personal experiences in the PROLAW program. In carrying out the Capstone Project, students will have the opportunity to consolidate everything they have learned in the PROLAW curriculum and reinforce their practical experience in applying this knowledge and skills through a final multi-faceted exercise. The final outcome of this course will enable each student to demonstrate in relation to a specific real-world law and governance reform process that he or she is capable of using what was learned in PROLAW to produce useful and professional documentation and communicate this content to clients and stakeholders effectively. In some cases, students may develop or have a preexisting relationship with an external organization, which provides an opportunity for the student to work on their particular topic. Students may alternatively decide to conduct research and determine the need and feasibility of a possible initiative to address the problem they identify. Likewise, students can also choose to develop a project to implement an existing agenda or initiative at the national or international levels. Each student will be supervised by a Capstone Project advisor.

PLAW 907 Rule of Law Project Management, Monitoring & Evaluation (3 Credit Hours)
This course will analyze the main principles, tasks and tools commonly used to manage a rule of law project, particularly in comparison to other types of project management. Topics will include the control of the timing of various steps in implementation (start up, work planning, activities, monitoring and evaluation, reporting, and close out), human resource management, stakeholder management, procurement, inventory, and budgeting. The course will also address common challenges including managing a project with weak design or insufficient budget, managing conflicts, dealing with emergencies and mid-course corrections, and the key requirements for successful project management, teamwork, accountability, leadership, substantive knowledge and skills, and cultural literacy. Students will have an opportunity to apply their knowledge and skills by working through a model project in teams and producing a sample deliverable on time, on budget, and according to specifications.

Psychology (PSYC)

Discover, search, courses (p. 2661)!

PSYC 100 Psychological Perspectives on the Experience of Globalization (3 Credit Hours)
Globalization from a psychological perspective. Applying core psychological concepts, research and theory to cross-cultural issues of behavior and development. Topics may include human rights of children, human trafficking, immigration, moral issues of international trade, parenting across cultures.
Outcomes:
Students will learn basic concepts and theories and apply them to real-world globalization problems

PSYC 101 General Psychology (3 Credit Hours)
Pre-requisites: ANTH 100, PLSC 102, SOCL 101, WSGS 101, or equivalent; please check requirements for declared majors/minors for exceptions
Introduction to concepts, theories, and methods in psychology. Emphasis is given to the scientific study of consciousness and human behavior. Topics include: human development, learning, thinking, perception, personality, testing, mental illness and mental health, biological and social aspects of behavior.
Knowledge Area: Tier 2 Societal Knowledge
Interdisciplinary Option: Human Services, Psychology of Crime and Justice
Course equivalencies: ACPSY 201 / PSYC 101
Outcomes:
Students will master basic concepts and key theories and learn to apply them to real-world situations

PSYC 201 Psychology Advising and Career Development (1 Credit Hour)
Pre-requisites: PSYC 101, PSYC-BS major
Overview of the psychology major at Loyola and career options in psychology. Introduces students to psychology career development resources. Students will also prepare for opportunities in independent research and internships and plan for a career including creating a resume and CV.
Outcomes:
Students will learn about career options in psychology and plan their psychology major to support and develop their career interests

PSYC 225 Psychology of Peace (3 Credit Hours)
Application of psychological theories, concepts, and research to issues of peace and conflict. Areas covered include international conflicts and international peacebuilding (including war, terrorism, and global environmental issues) as well as interpersonal conflicts and conflict resolution (including crime, family violence, and conflict arising from prejudice and perceived threat). Classic theories of peace are also analyzed and connected to psychological theory and research.
Interdisciplinary Option: Peace, Justice, and Conflict Studies
Course equivalencies: PSYC 225/PAX225

PSYC 235 Psychology of Human Sexuality (3 Credit Hours)
Pre-requisites: PSYC 101
This course will explore sexuality as a multi-faceted and diverse phenomenon structured by individual experience, interpersonal relationships, and societal institutions. Topics include anatomy and physiology, intersectionality, power and privilege, sexual diversity, attraction and love, relationships, and sexual health education.
Interdisciplinary Option: Bioethics, Human Services, Women & Gender Studies
Outcomes:
Students will demonstrate an understanding of the biological, psychological and socio-cultural aspects of human sexuality, along with gender and sexual diversity

PSYC 237 Cross-Cultural Psychology (3 Credit Hours)
Pre-requisites: PSYC 101
Students will learn about cultural factors that influence cognition, perception, emotion, behavior, motivation, and mental health. Similarities and difference in both explicit and implicit cultural factors will be emphasized. Students will explore their identities, values, and biases. Students will engage in reflection to increase cultural awareness and sensitivity towards others.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will demonstrate an understanding of concepts and research methodologies in cross-cultural psychology; Students will develop critical thinking skills, as well as increased cultural awareness and sensitivity towards others

PSYC 238 Psychology of Gender (3 Credit Hours)
Pre-requisites: ANTH 100, PLSC 102, SOCL 101, WSGS 101, or equivalent; please check requirements for declared majors/minors for exceptions
This course reviews psychological research and theory concerning gender and sex from a biopsychosocial perspective. Course material emphasizes how gender as an identity, social role, and system of power affects nearly every aspect of our lives.
Knowledge Area: Tier 2 Societal Knowledge
Interdisciplinary Option: Bioethics, Human Services, Women & Gender Studies
Outcomes:
Students will learn about the diversity of gender within and across cultures, gender socialization and its effects, the role of gender inequality in multiple contexts, and how gender intersects with other identities

PSYC 239 Understanding Bias and Inclusivity (3 Credit Hours)
Using an intersectional lens, students learn about how privilege, power, and oppression shape ourselves, perceptions of others, and our social world. They consider how ourselves and others are shaped by and operate within the larger social system. Students explore their identities, values, and biases. Students engage in self-reflection to increase self-awareness. Articulate how personal power can be used to create change.
Interdisciplinary Option: Race and Ethnicity, Women & Gender Studies
Course equivalencies: X - PSYC 239/ SOCL 239
Outcomes:
Identify feelings about course topics; Demonstrate self-awareness of identities and values, including the value of difference; Engage in intergroup dialogue

PSYC 240 Psychology-Biology of Perception (3 Credit Hours)
Pre-requisites: For Biology majors: BIOL 102, BIOL 112, and PSYC 101; For all others: PSYC 101
Introduction to the study of sensory systems, especially vision and audition, emphasizing historical development of the field, multi-disciplinary scientific approaches, recent research and theory on the mechanisms of seeing and hearing, and applications of research to real-world problems.
Interdisciplinary Option: Neuroscience
Outcomes:
Students will understand and be able to explain how knowledge of the functioning of sensory systems is obtained using a variety of experimental methods, how stimulus energy is translated into neural signals, how the brain processes sensory information, and how these processes determine conscious perception

PSYC 250 Cognitive Psychology (3 Credit Hours)
Pre-requisites: PSYC 101
Overview of cognitive psychology. Topics include: human information processing, object recognition, memory, attention, language production and comprehension, reasoning and problem solving.
Outcomes:
Students will understand and be able to explain how knowledge about mental events is obtained using a variety of experimental methods, discuss current empirical research and theories of cognition, understand well established cognitive theories about attention, memory, language processing, reasoning and decision-making

PSYC 251 Learning and Memory (3 Credit Hours)
Pre-requisites: Grade of C- or better in PSYC 101 and NEUR 101
This course surveys the field of learning and memory, including working, episodic, and semantic memory, nonassociative learning, classical and operant conditioning, skill learning, and neuroplasticity. Behavioral, neuroscientific, and clinical perspectives will be considered.
Interdisciplinary Option: Neuroscience

PSYC 273 Developmental Psychology (3 Credit Hours)
Pre-requisites: PSYC 101
Survey of theory and research relevant to human growth and development with emphasis on physical, cognitive, and social development from infancy through adolescence.
Interdisciplinary Option: Human Services
Course equivalencies: X-CPSY273/PSYC273
Outcomes:
Students will demonstrate understanding of basic theory and research in human development, and will develop skills in critical examination of psychological research as applied to current issues in human development

PSYC 274 Lifespan Development (3 Credit Hours)
Pre-requisites: PSYC 101
This course provides a survey of current theory, research, and applications on development (physical, cognitive, and social/emotional development) that are present at each stage of the lifespan. Normal development is emphasized; however, special human circumstances are also explored.
Outcomes:
Students will demonstrate an understanding of theory and research in development across the lifespan; Students will develop critical thinking skills, applying research to contemporary issues in lifespan development

PSYC 275 Social Psychology (3 Credit Hours)
Pre-requisites: ANTH 100, PLSC 102, SOCL 101, WSGS 101, or equivalent; please check requirements for declared majors/minors for exceptions
Introduction to the field of social psychology; including topics such as social cognition, impression formation, social influence, attitude formation and change, stereotyping and prejudice, aggression, pro-social behavior, and group behavior.
Knowledge Area: Tier 2 Societal Knowledge
Interdisciplinary Option: Human Services, Psychology of Crime and Justice
Course equivalencies: ACPSY 275 / PSYC 275
Outcomes:
Students will demonstrate the ability to think critically about fundamental theoretical approaches within social psychology, scientific methods of hypothesis testing, and potential applications of social psychology that address real-world problems

PSYC 276 Philosophy of Mind (3 Credit Hours)
Pre-requisites: PHIL 130
This course is a study of the different philosophical views regarding the nature and the existence of the mind and its relation to material bodies. Students will be able to demonstrate understanding of the various philosophical views and problems regarding the mind and its relation to matter.
Course equivalencies: X-PSYC 276/ PHIL 276/PHIL 176

PSYC 277 Environmental Psychology (3 Credit Hours)
Human behavior is at the root of environmental degradation. This course examines how psychological processes influence behaviors that help or hurt the environment and how psychology can promote conservation. The course identifies theory-based interventions and evaluates their effectiveness. Class activities allow students to practice applying psychology to promote environmental sustainability.
Outcomes:
Students will be able to identify the psychological bases of environmental problems; Students will be introduced to theories and practical strategies to change behavior as it relates to environmental issues

PSYC 280 Psychology of Judgment and Decision-Making (3 Credit Hours)
Pre-requisites: PHIL 130 or equivalent; please check requirements for declared majors/minors for exceptions; Students can only take one course from PHIL 279, PSYC 279, PSYC 280
This course examines the forces that shape decision-making, from the individual and day-to-day to the shaping of public policy. Psychological research on cognitive biases, economic models, and philosophical perspectives on deductive reasoning and what makes a good decision will be discussed.
Knowledge Area: Tier 2 Philosophical Knowledge
Outcomes:
Students will learn fundamental principles and theories - including various biases and decision-making errors, and learn to apply the course to improve thinking, problem-solving, and decisions

PSYC 302 History & Systems in Psychology (3 Credit Hours)
Pre-requisites: PSYC 101
A systematic treatment of the historical roots and foundation of psychology. Special emphasis is placed on relating past trends to current developments in the field.
Outcomes:
Students will demonstrate knowledge of the foundations of psychology as a science, including major schools and theoretical frameworks, and make connections between past trends and current approaches

PSYC 304 Statistics (3 Credit Hours)
Pre-requisites: PSYC 101
This course is an introduction to fundamentals of statistical analysis in psychology.
Interdisciplinary Option: Human Services
Outcomes:
Students will demonstrate the ability to analyze data, interpret the results of research using basic statistical methods, and understand the conceptual foundation, appropriate use, and limitations of these statistical methods

PSYC 306 Research Methods in Psychology (3 Credit Hours)
Pre-requisites: PSYC 304 or STAT 335
Logic and theory of the scientific method. Basic principles of scientific research methodologies employed in approaching major problem areas in psychology. This class is writing intensive.
Interdisciplinary Option: Human Services, Neuroscience, Urban Studies
Outcomes:
Students will demonstrate knowledge and skills necessary to: formulate research questions and hypotheses, develop research designs, operationalize variables, and gather data in an ethical manner; choose appropriate statistical methods for analyzing data and interpret results of statistical analyses; write a scientific paper in APA style; and critically evaluate research

PSYC 307 Psychology of Language (3 Credit Hours)
Pre-requisites: PSYC 101
Analysis of language as symbol-behavior specific to humans, language structure and competence, language performance, and the neurophysiological basis of language. Methods for investigating language processing, acquisition, bilingualism, and language disorders will be considered.
Outcomes:
Students will demonstrate understanding of major theories, research methodologies, and empirical knowledge in the study of language

PSYC 310 Lab in Program Evaluation (3 Credit Hours)
Pre-requisites: PSYC 306; PSYC 275 is also recommended
Special attention is given to the fundamental skills needed to evaluate human service programs including research methodology and research diplomacy. The strengths and weaknesses of several evaluation strategies will be discussed in terms of scientific validity, ethical constraints, and political acceptability.
Outcomes:
Students apply their developing evaluation skills in a class project and present the data in a written report

PSYC 311 Lab in Psychobiology (3 Credit Hours)
Pre-requisites: For Psychology BS and Cognitive & Behavioral Neuroscience majors: PSYC 306 and (NEUR 101, PSYC 240, or PSYC 382) with minimum grades of C-; For all others: (STAT 335 or PSYC 304) and (NEUR 101, PSYC 240, or PSYC 382) with minimum grades of C-
Introduction to the structures and functions of vertebrate nervous systems and how these systems compute and process information. Laboratory experience with concepts and methods in the neurophysiological study of the bases of perception and other behaviors. Hearing is used as an example.
Interdisciplinary Option: Neuroscience
Outcomes:
Students will learn the concepts of basic neurophysiology and the theory of signal detectability and have experience applying the logic and formulation of neurophysiological theories of perception

PSYC 312 Lab in Cognitive Neuroscience (3 Credit Hours)
Pre-requisites: PSYC 306 and PSYC 382
This course is a laboratory practicum in the techniques of cognitive neuroscience, with an emphasis on electrophysiological and hemodynamic methods of measuring nervous system function during cognitive and behavioral tasks and the effects of noninvasive brain stimulation.
Interdisciplinary Option: Neuroscience
Outcomes:
Students will develop scientific research skills as they relate to the field of cognitive neuroscience, including experimental design, physiological methods of data collection, statistical analysis and interpretation, and reporting findings

PSYC 313 Lab in Behavioral Neuroscience (3 Credit Hours)
Pre-requisites: PSYC 306 and either PSYC 251 or PSYC 382
Provides an understanding of the structure and function of the brain as it relates to behavior through empirical data collection and analyses. Course objectives will be met through demonstrations, hands-on laboratory experience with different behavioral assays, histology, an evaluation of scientific literature, and scientific communication via poster presentations.
Outcomes:
Develop a breadth of neuroscientific knowledge and skills involving critical thinking, research ethics, experimental design, animal behavior, data collection and analysis, and dissemination of scientific findings in different formats

PSYC 314 Lab in Experimental Psychology: Cognition (3 Credit Hours)
Pre-requisites: PSYC 306 (C-) and (C- in PSYC 250, PSYC 251, PSCY 307, or PSYC 382)
Laboratory demonstrations, experiments, and microcomputer applications in the area of human cognition. Topics vary, but include learning, memory, thinking and language processing.
Interdisciplinary Option: Neuroscience
Outcomes:
Students gain skills and experience in experimental design, measurement, statistical analyses, and report writing as they relate to research on human cognition

PSYC 315 Lab in Tests & Measurements (3 Credit Hours)
Pre-requisites: PSYC 306 and either PSYC 331 or PSYC 346
Topics include: theory of psychological testing and assessment; historical context and related legal and ethical considerations; basics of test construction and evaluation, including reliability, validity, and standardization; and common measures of personality, attitudes, and ability and their psychometric properties. PSYC 338 is recommended.
Outcomes:
Students will learn to demonstrate proficiency with psychological testing terminology and concepts

PSYC 316 Lab in Experimental Psychology: Sense & Perception (3 Credit Hours)
Pre-requisites: PSYC 306, NEUR 101 (formerly PSYC/BIOL 202) or PSYC 240
Laboratory demonstrations, experiments, and microcomputer applications to the psychophysical and physiological study of sensory systems. The course stresses the research methods and quantitative measures that are used in characterizing sensory processes, especially visual and auditory systems.
Interdisciplinary Option: Neuroscience
Outcomes:
Students gain skills and experience in experimental design, measurement, statistical analyses, and report writing as they relate to research in sensory processes

PSYC 318 Lab in Developmental Psychology (3 Credit Hours)
Pre-requisites: C- or better in PSYC 306 and either PSYC 273 or PSYC 274
Lecture and laboratory on empirical studies of developmental processes in humans. Focus is on research in particular content areas within developmental stages (e.g., infancy, childhood, adolescence, adulthood) and research on changes in behavior across time.
Outcomes:
Students will demonstrate skills and knowledge of developmental methodology, designing, conducting, and analyzing and interpreting the results of a research project, and writing a research paper in APA format

PSYC 321 Laboratory-Social Psychology (3 Credit Hours)
Pre-requisites: PSYC 275 and 306
Lectures, demonstrations, readings, and individual or group research projects illustrating various methods, such as observation, interviewing, archives, standardized tests, and experimentation, are used to learn about topics such as group influences on the individual, attitudes, prosocial and antisocial behavior, and perception of self and others.
Outcomes:
Students will demonstrate skills and knowledge of methodology in social psychological research; designing, conducting, and analyzing and interpreting the results of a research project, and writing a research paper in APA format

PSYC 327 Lab on Body Image (3 Credit Hours)
Pre-requisites: C- or better in PSYC 306 and either PSYC 275 or PSYC 338
Lab on Body Image focuses on the scholarly study of body image and eating disorders, as well as how research is conducted in the field. Students will complete smaller labs and a larger research project in the field.
Outcomes:
1) Learn about the scholarly study of body image and eating disorders; 2) Learn general research methods in Psychology and specific ones pertaining to the topic; 3) Learn about computer packages, including SPSS to analyze data

PSYC 331 Psychopathology (3 Credit Hours)
Pre-requisites: PSYC 101
Nature and causes of maladjustment and mental disorders. History of mental illness, diagnosis, research, and treatment of mental disorders.
Interdisciplinary Option: Human Services, Psychology of Crime and Justice
Course equivalencies: X-CPSY333/PSYC331/ACPSY280
Outcomes:
Students will demonstrate understanding of current approaches to researching maladaptive behavior, current views of maladaptive behavior, major categories of "mental disorders", factors contributing to development of problems, different types of intervention strategies, and appreciation of social, ethical, and legal issues

PSYC 332 Affective Neuroscience (3 Credit Hours)
Pre-requisites: PSYC 101 or NEUR 101 (formerly PSYC/BIOL 202)
Affective experiences promote human adaptability and survival, and healthy emotion function is critical to promoting physical and psychological well being. The course will provide an overview of fundamental neurobiological correlates associated with emotion function and processing affective stimuli.
Interdisciplinary Option: Neuroscience
Outcomes:
Students will understand theories regarding brain mechanisms associated with emotion processing and the techniques used for studying these mechanisms

PSYC 338 Psychology of Personality (3 Credit Hours)
Pre-requisites: PSYC 101 Facts and principles of personality study
Nature of personality, its structure, development, expression, and measurement. Exposition and evaluation of personality study methods with critical review of traditional and modern theories of personality.
Interdisciplinary Option: Psychology of Crime and Justice
Course equivalencies: X-CPSY338/PSYC338
Outcomes:
Students will acquire an understanding of different personality theories, critically evaluate these theories, and apply what they have learned

PSYC 340 Psychology of Women (3 Credit Hours)
Pre-requisites: PSYC 101
Review of psychological aspects of women's experiences. Topics include psychological aspects of biological events such as menarche, pregnancy, menopause; aspects of women's work and family roles; and mental health issues relevant to women.
Interdisciplinary Option: Human Services, Women & Gender Studies
Course equivalencies: PSYC340/WOST340/WSGS340
Outcomes:
Students will demonstrate knowledge of critical contemporary issues impacting women and girls, and critically evaluate/analyze academic theory, social institutions, and media

PSYC 346 Psychopathology of Childhood (3 Credit Hours)
Pre-requisites: PSYC 273
Consideration of the nature and causes of maladjustment, emotional disorders, and learning disabilities in children in conjunction with approaches to prevention and remediation.
Interdisciplinary Option: Human Services, Psychology of Crime and Justice
Outcomes:
Students will demonstrate knowledge of the major categories of childhood psychopathology and methods of diagnosis, theories of causes of maladjustment and mental illness in children and adolescents, and types of intervention strategies

PSYC 348 Psychology of Adolescence (3 Credit Hours)
Pre-requisites: PSYC 273
In-depth study of adolescence using an interdisciplinary approach. Integration of cultural, social, psychological, and biological perspectives.
Interdisciplinary Option: Human Services, Psychology of Crime and Justice
Outcomes:
Students will appreciate the various factors leading to similarities and differences in the experience of adolescence in America and in other cultures, and will demonstrate understanding of major theories, research methodologies, and empirical knowledge in the study of adolescence

PSYC 349 Maturity and Aging (3 Credit Hours)
Pre-requisites: PSYC 273 or PSYC 274 with a C- or better
Overview of theory and research relevant to middle age and aging. Topics include personality, cognitive and social functioning as well as biological functioning. Applications to life situations such as living arrangements, provision of health services, and retirement are discussed.
Interdisciplinary Option: Bioethics, Human Services
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will demonstrate understanding of major theories, research methodologies, and empirical knowledge in the study of maturity and aging, and learn to recognize and reject myths and stereotypes associated with adult development and aging

PSYC 350 Developmental Cognitive Neuroscience (3 Credit Hours)
Pre-requisites: PSYC 101, NEUR 101 (formerly PSYC/BIOL 202)
An overview of theory and research relevant to the study of the developing child through the use of neuroscience methods; topics may include: brain plasticity and maturation, sensorimotor systems, attention, memory, executive function, language, social cognition, and typical and atypical development.
Interdisciplinary Option: Neuroscience
Outcomes:
Students will gain knowledge of basic theory and research in the field of developmental cognitive neuroscience and will acquire understanding of brain and behavior relationships in a developmental context

PSYC 352 Neuropsychology (3 Credit Hours)
Pre-requisites: PSYC 101 and NEUR 101
Neuropsychology is the interdisciplinary study of the relation between human brain function and behavior. This course is an undergraduate survey of topics related to neuropsychology, including neuroanatomy, psychophysiology, and cognitive neuroscience. A primary goal of the course is to introduce undergraduate students to neuropsychological concepts in research and applied settings.
Interdisciplinary Option: Neuroscience
Outcomes:
Successful completion of this course leads to mastery of CNS function and structure; The ability to integrate this information will allow students to develop and test hypotheses about brain-behavior relationships

PSYC 353 Applied Social Psychology (3 Credit Hours)
Pre-requisites: PSYC 275
Applications of principles and methods of social psychology to social issues and problems in such areas as: law and justice, health and health care, education, natural and built environments, population, work, life and intergroup relations.
Outcomes:
Students will demonstrate the ability to apply knowledge of major theories, research methodologies, and empirical knowledge in social psychology to real-world issues and problems

PSYC 355 Neuroethics (3 Credit Hours)
Pre-requisites: students must have taken at least two philosophy courses
This course focuses on ethical considerations emerging from contemporary research in neuroscience, as well as neuroscientific techniques for studying ethical questions. Students will be able to demonstrate understanding of the ways in which the study of ethics and neuroscience inform each other
Interdisciplinary Option: Bioethics
Course equivalencies: X - PSYC355/PHIL355

PSYC 356 Consumer Psychology (3 Credit Hours)
Pre-requisites: PSYC 101
Introduction to the field of consumer psychology; including topics such as consumer attitude formation and change, persuasive communication and consumer behavior, the psychology of advertising, consumer decision making, personality and consumer behavior, identity and consumer behavior, and culture and consumer behavior.
Outcomes:
Students will understand and apply theoretical approaches within consumer psychology and the psychology of advertising

PSYC 360 Understanding Prejudice (3 Credit Hours)
Pre-requisites: PSYC 101
Prejudice from a psychological perspective. Applying psychological concepts, research, and theory to understand the origins and consequences of prejudice as well as potential remedies.
Interdisciplinary Option: African Studies and the African Diaspora, Psychology of Crime and Justice, Race and Ethnicity, Women & Gender Studies
Course equivalencies: BWS360/WSGS360
Outcomes:
Students will learn the origins of stereotypes and prejudice, the nature of prejudice against different social groups, how people are affected by prejudice and cope with prejudice, and the processes that may change stereotypes, reduce prejudice, and improve intergroup relations

PSYC 362 Industrial/Organizational Psychology (3 Credit Hours)
Pre-requisites: C- or better in PSYC 101 Outcomes: Students will demonstrate understanding and ability to think critically about how the science of behavior is applied to work environments
Study of human behavior in work settings. Topics include principles of employee selection, job analysis, motivation and morale, managerial behavior, organization development and socialization, leadership, conflict management, work design and group process.
Course equivalencies: PSYC362 / PSYC364

PSYC 368 Counseling (3 Credit Hours)
Pre-requisites: PSYC 101; PSYC 331 or 338 is also recommended
Introduction to the theory, techniques, and research behind major helping interventions, focusing on individual psychotherapy with adults.
Interdisciplinary Option: Human Services
Outcomes:
Students will critically evaluate different approaches to intervention in terms of their theoretical underpinnings, applications, goals and effectiveness, and will develop the ability to utilize some basic counseling skills

PSYC 369 Psychology Honors Readings (3 Credit Hours)
Pre-requisites: Membership in the Psychology Honors award program and approval of the Department Honors Advisor
Directed readings and development of a formal research proposal on a topic of interest to the student and the faculty member with whom he/she has chosen to work. Students are not restricted to working with the faculty member whose name is listed in the schedule of classes.
Outcomes:
Students will write a literature review and research proposal for the honors thesis

PSYC 370 Psychology Honors Research (3 Credit Hours)
Pre-requisites: PSYC 369
Students carry out the research proposed in PSYC 369 and prepare a formal report constituting the honors thesis. Approval of the thesis by the honors committee earns the psychology honors award. PSYC 370 is a capstone course.
This course satisfies the Engaged Learning requirement.
Course equivalencies: PSYC370H / PSYC370
Outcomes:
Students will conduct research, analyze and interpret data, and write a thesis

PSYC 371 Psychology of Political Behavior (3 Credit Hours)
Examination of the determinants of political judgments and decision; including topics such as voting preference, stereotypes and political thinking, racism and political behavior, ideology and public opinion, the effect of the media on political thought.
Outcomes:
Understanding of core theoretical and methodological approaches commonly applied to the study of political psychology

PSYC 372 Psychology & Law (3 Credit Hours)
Pre-requisites: PSYC 101
Introduction to the areas of overlap between psychology and the law. Topics include roles of psychologists in legal settings, accuracy of eyewitness testimony, jury processes, accuracy of polygraph examinations, and issues surrounding the insanity defense.
Interdisciplinary Option: Psychology of Crime and Justice, Sociolegal Studies
Course equivalencies: X- CJC 377 / PSYC 372
Outcomes:
Students will learn to analyze biases in the U.S. jury system, elucidate the weaknesses of eyewitness testimony, outline the issues in the insanity defense, understand the issues in Rape Trauma Syndrome and Battered Spouse Syndrome, understand the methods and effects of scientific jury selection, understand the complex issues surrounding confessions, and view the US justice system in a social justice context

PSYC 373 Health Psychology (3 Credit Hours)
Pre-requisites: PSYC 101
Survey of psychological and behavioral influences on how people stay healthy, why they become ill, and how they respond when they do become ill. Topics include: health behavior and primary prevention, stress and coping, patient-physician interaction, and management of chronic illness.
Interdisciplinary Option: Bioethics, Human Services
Outcomes:
Students will demonstrate an understanding of the complex interaction of an individual's psychology and physical health, as well as understanding of different intervention and prevention programs, the structure of the health care system, and the various roles psychologists play in this system

PSYC 374 Community Psychology (3 Credit Hours)
Pre-requisites: PSYC 101
Prevention of mental disorder and promotion of well-being, primarily through creating more mentally healthy environments, but also by enhancing individual resilience. Recognizing the toxicity of psychosocial stressors such as inequality, poverty, alienation, and discrimination, community psychologists also fight for social justice through empowerment of oppressed groups and policy advocacy. Understanding of the methods of community psychology; effects of societal, cultural, and environmental influences on psychological and community well-being.
Interdisciplinary Option: Human Services, Neuroscience

PSYC 375 Psychology of Addiction (3 Credit Hours)
Pre-requisites: PSYC 101
Survey of historical, demographical, and statistical aspects of substance abuse. Abuse of alcohol and drugs, as well as eating disorders, may be considered. A variety of theoretical models and interventions are discussed.
Interdisciplinary Option: Psychology of Crime and Justice
Outcomes:
Students will demonstrate understanding of the psychopharmacological effects of various substances, major research findings in the area of substance abuse, and prevention and intervention techniques

PSYC 376 Psychology of Religion (3 Credit Hours)
Introduction to the major issues, theories and empirical approaches in the psychology of religion; effect of religion on beliefs, motivations, emotions and behaviors.
Outcomes:
Understanding of the relationship between religion and psychological variables (eg, adjustment, prejudice, and prosocial behavior)

PSYC 377 Psychology of Music (3 Credit Hours)
Pre-requisites: PSYC 101
Engagement in musical activities is common across all human cultures. This course will introduce students to the interdisciplinary field of psychology of music and will focus on how humans perceive and are affected by music, how we create music, and how music is integrated into human life.
Outcomes:
Students will understand theories regarding brain mechanisms associated with emotion processing and the techniques used for studying these mechanisms

PSYC 378 Drugs and Behavior (3 Credit Hours)
Pre-requisites: NEUR 101
This course will introduce students to neuropsychopharmacology. Acute and long term effects of addictive drugs and drugs used to treat psychiatric disorders on neural function and behavior are discussed by integrating human and preclinical animal studies. Major types of drugs of abuse, antidepressants, antipsychotics, and anxiolytics will be discussed.
Outcomes:
Knowledge of the mechanisms of action of drugs, including illicit drugs and drugs used to treat psychiatric disorders

PSYC 381 Advanced Statistical Analysis-Computer:Social Science (3 Credit Hours)
Pre-requisites: PSYC 304 or SOCL 301
Expanded treatment of topics covered in PSYC 304 with emphasis on using standard computer analysis packages (SPSS).
Outcomes:
Students will demonstrate the ability to discuss theoretical assumptions of various statistical techniques, choose the appropriate statistical test in a variety of situations, use SPSS to enter data and perform a statistical analysis, and interpret the results of statistical analyses

PSYC 382 Behavorial and Cognitive Neuroscience (3 Credit Hours)
Pre-requisites: For BIOL-BS, BIOL-MINR, and BIOE-BS students: BIOL 102 and NEUR 101; For all others: NEUR 101
Overview of topics and methodologies used in behavioral and cognitive neuroscience including: attention, learning and memory, language, reasoning, decision making, intelligence, emotions, social cognition, and consciousness.
Interdisciplinary Option: Neuroscience
Outcomes:
Students will understand theories regarding brain mechanisms, underlying mental events and the technologies used for studying these mechanisms

PSYC 383 Methods in Computational Neuroscience (3 Credit Hours)
Pre-requisites: NEUR 101; (MATH 131 or MATH 161); and (COMP 150, COMP 170, COMP 180, or DSCI 101) This course introduces the methods necessary to work with computational models of neural processing in the brain
These methods include differential equations for neuroscience, Simulink programming, linear algebra for neural networks, MATLAB coding, and probability theory for neuroscience. For each method, classes will include lectures, and computer exercises or illustrations.
Interdisciplinary Option: Neuroscience
Course equivalencies: X - COMP 386/PSYC 383
Outcomes:
Appreciation of the mathematical and computational techniques used to understand the brain, specially differential equations to model neurons, linear algebra used for neural networks, and probability theory capturing brain performance

PSYC 384 Computational Modeling of the Brain (3 Credit Hours)
Pre-requisites: PSYC 383/COMP 386 or instructor permission This course uses a mix of lectures and computer labs to introduce computational models of the neural processing in the brain
These models capture single neurons and synapses, biological neural networks, and high-level computational theory. Each class will cover the models with lectures and computer labs, the latter using MATLAB and Simulink.
Interdisciplinary Option: Neuroscience
Course equivalencies: X - COMP 389/PSYC 384
Outcomes:
Appreciation that brain function cannot be understood without proper mathematical and computational frameworks, and ability to apply these frameworks adeptly in the various domains of neuroscience from neurons to cognition

PSYC 385 Practicum in Peace Activism (3 Credit Hours)
Students will learn how to recognize and navigate the psychological pitfalls that accompany work as a peace activist. Topics include building programs, recruiting volunteers, managing media messages, avoiding burnout, handling conflict within organizations, and securing funding for peace activities. Psychological constructs and theories such as group dynamics, perceived control, learned helplessness, attitude change, and altruism will be used to increase understanding of processes related to peace activism.
Course equivalencies: PSYC385/PAX385

PSYC 386 Psychology Seminar: Selected Topics (3 Credit Hours)
Pre-requisites: PSYC 101
An upper-level, intensive seminar on selected aspects of psychology.
Outcomes:
Students will demonstrate understanding of major theories, research methodologies, and empirical knowledge in the selected topic

PSYC 387 Seminar in Behavorial and Cognitive Neurosciences (3 Credit Hours)
Pre-requisites: NEUR 101 (formerly PSYC/BIOL 202); PSYC 382/BIOL 284, limited to NRCB-BS seniors
Lecture/discussions will focus on issues central to behavioral neuroscience, emphasizing human and animal mental processes and neural information processing mechanisms. Students will read primary research papers and practice analytical skills in class discussion and presentations. Presentations and exams will promote critical thinking and a general understanding of current issues in behavioral and cognitive neurosciences.
Interdisciplinary Option: Neuroscience
Outcomes:
Students will become familiar with principles of cognitive and behavioral approaches to the study of the neural bases of behavior; Students will also learn how to critically read primary research papers and present these papers to the class

PSYC 390 Internship in Psychology (3 Credit Hours)
Pre-requisites: PSYC 304 and approval via an internship application due on the 5th Friday of the previous semester
Capstone service-learning experience for psychology majors, involving application and development of psychological knowledge and skills through an internship (100 hours) in a human service organization or applied research setting, combined with regular class meetings, reading and writing assignments. Students arrange placements and complete a project on site. Application details may be found here: https://luc.edu/psychology/undergraduate/internshipinpsychology. Practical, pre-professional job skills, critical analysis and connection between theory and practice, on topics of: human service agency operation; effective working relationships; professional communication; cultural competence; values and ethics.
This course satisfies the Engaged Learning requirement.

PSYC 396 Teaching Internship in Psychology (3 Credit Hours)
Pre-requisites: Junior or Senior standing; Department consent required
This course provides undergraduate students serving as teaching assistants in psychology academic structure and guided reflection. Through readings, discussions, and reflective assignments, students will develop skills in supporting student learning and managing classroom responsibilities. The course complements practical work as teaching assistants in psychology courses, integrating theory and practice.
This course satisfies the Engaged Learning requirement.
Outcomes:
Demonstrate understanding of how students learn and how to facilitate effective classroom engagement; Connect teaching experiences to psychological and educational theory; Develop transferable professional skills such as leadership and organization

PSYC 397 Independent Research (3 Credit Hours)
Pre-requisites: PSYC 306 and approval of internship coordinator
Limited to psychology majors with senior standing. Capstone opportunity to conduct research under the guidance of a psychology faculty member. Only one of PSYC 397 and 399 may count toward the psychology major.
Interdisciplinary Option: Neuroscience
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will gain experience in all aspects of psychological research, including literature review, formulating hypotheses, designing and conducting research, analyzing data and interpreting results, communicating the results of research in written reports

PSYC 399 Special Studies in Psychology (1-3 Credit Hours)
Pre-requisites: permission of instructor and department
Opportunity for individual reading or research in a specialized area not otherwise covered by the Department's course offerings. Only one of PSYC 397 and 399 may count toward the psychology major.
Outcomes:
Students will gain experience (eg, integrating research results from various sources, conducting research) working directly with a faculty member on a current topic in psychology

PSYC 401 History & Systems of Psychology (3 Credit Hours)
History and systems is a survey course that covers past events and persons that directly influenced the formation of contemporary psychology in the United States.
Outcomes:
Students will become familiar with the history of psychology and influential theoretical systems in the field of psychology; The course is partly designed to aid in preparation for the EPPP licensing exam for those students intending to seek professional licensure

PSYC 412 Introduction to the Profession of Clinical Psychology (3 Credit Hours)
Required course for PhD program in Clinical Psychology-an introduction to our field. This course provides an introduction to the profession of Clinical Psychology by focusing on basic research and clinical skills necessary for a career as a clinical scientist and practitioner.
Outcomes:
Students will develop skills such as establishing rapport, empathic and reflective listening, gathering information, and making intervention decisions via supervised interview experiences

PSYC 420 Research Methods in Psychology (3 Credit Hours)
An intensive coverage of classical and current psychological research methodology and a review and implementation of various strategies for proposing research, collecting and analyzing data, and writing scholarly articles.
Outcomes:
Students will learn multiple methods for conducting psychological research, how to critique published research, and how to write research proposals and reports

PSYC 432 Intellectual & Personality Assessment (3 Credit Hours)
This course covers the psychometric properties, administration procedures, and applications of the most common adult psychological measures. Students will gain an understanding of psychometric theory.
Outcomes:
Students will be able to administer and become familiar with how to interpret a WAIS-III, the MMPI-2, the Sentence Completion Test, and the TAT

PSYC 435 Seminar in Cognitive Neuroscience (3 Credit Hours)
The way that information is represented and processed in the brain is central to a broad range of topics in psychological science. In this course we will consider how the methods of cognitive neuroscience including brain imaging (e.g., EEG/ERP, fMRI) and dissociation-based techniques such as neuropsychology and TMS, have revolutionized the exploration of these topics. We will pay particular attention to how these techniques can be used to understand higher-level cognition during development and in questions related to social psychology and psychopathology. Class participants will be introduced to these techniques, read, critique and present results from the primary literature, and also have an opportunity to develop ideas using these methods relating to their own research interests.

PSYC 436 Psychopharmacology (3 Credit Hours)
The types and mechanisms of medications used in the treatment of mental disorder are reviewed. Emphasis is given to behavioral effects and treatment effectiveness of drugs. Psychopharmacological research design and literature are reviewed.
Outcomes:
Students will learn basics of neurotransmission and be informed about medications including antidepressants, mood stabilizers, anti-psychotics, and substance abuse

PSYC 438 Principles of Psychological Assessment Child & Adult (3 Credit Hours)
This course is designed to expose students to a variety of assessment tools and tests available for children ranging from 1 month to 18 years of age.
Outcomes:
Students will develop competence in the administration and write-up of basic intelligence, achievement, and visual motor tests for children presenting with, for example, learning disabilities, mental retardation, social/communication disorders

PSYC 440 Theory & Research in Psychology of Language (3 Credit Hours)
This course provides an overview of theory and research on the psychology of language.

PSYC 446 Psychopathology (3 Credit Hours)
This course reviews concepts, research, and theory (historical and current) in psychopathology and emphasizes diagnosis and etiology.
Outcomes:
Students will gain an appreciation for the major issues in the area of psychopathology, the ability to think clearly and scientifically about these issues, and an understanding of major mental disorders

PSYC 451 Psychopathology of Childhood & Adolescents (3 Credit Hours)
This course provides an overview of theory and research on adjustment problems during childhood and adolescence using an ecological-developmental perspective.
Outcomes:
By gaining insight into the factors that enhance or interfere with positive developmental processes, students learn how to apply research and theory to improve the services they will offer to children and families in their professional careers

PSYC 452 Clinical Treatment of Children & Adolescents (3 Credit Hours)
This course provides an overview of theory and research on empirically-supported interventions for children and families.
Outcomes:
Students learn how to select and evaluate needed prevention programs and interventions for children and families to achieve therapeutic goals

PSYC 455 Developmental Psychology (3 Credit Hours)
This course provides an overview of theory and research on developmental psychology.

PSYC 460 Social Psychological Theory (3 Credit Hours)
Survey of basic concepts, theories, and research in social psychology. Contents include foundations of social psychology; broad theoretical orientations (e.g., evolutionary, behavioral, cognitive, affective, individual, societal, cultural); specific theories at the intrapersonal, interpersonal, intra-group, and inter-group levels of analysis.
Outcomes:
Knowledge and skills in theory construction and criticism; understanding relation between theory and research methods; applying theories to social problems

PSYC 461 Attitude and Attitude Change (3 Credit Hours)
Survey of attitude formation and change literature. Topics include the nature and measurement of attitudes, explicit versus implicit attitudes, effects of attitudes on cognition and behavior.
Outcomes:
Knowledge and skills that enable the integration of multiple theories to conceptualize attitudinal phenomena, critical evaluation of research, written and oral expression about attitude topics, application of attitude theories to practical problems

PSYC 462 Cognitive Social Psychology (3 Credit Hours)
In depth examination of the human cognition within its social context; including topics such as impression formation, attribution, stereotyping, prejudice, social information processing, mental control, affect and social information processing, unconscious social cognition.
Outcomes:
An understanding of basic theoretical approaches and scientific methods of hypothesis testing within social cognition; Development of skills needed to perform research within social cognition

PSYC 464 Practicum in Psychotherapy I (3 Credit Hours)
This two semester practicum course provides applied experience conducting psychotherapy at Loyola University Chicago's Wellness Center.
Outcomes:
For client populations seeking psychotherapy, practicum students will be able to develop a treatment plan, articulate treatment goals, develop a working therapeutic alliance, and execute elementary psychotherapeutic techniques

PSYC 472 Organizational Psychology (3 Credit Hours)
Covers theory, research, and methods associated with behavior in organizational settings. Learning outcomes include knowledge of theory and methods of personnel selection, performance measurement and appraisal, knowledge and skills training; theory and research on leadership, motivation, group behavior, etc.

PSYC 473 Social Development (3 Credit Hours)
This course is designed to provide an advanced level introduction and discussion of critical issues essential to the study of social development. The contribution of multiple contexts (e.g., family, peers, culture) to social development is a major focus of this class.
Outcomes:
Students will become familiar with the several theoretical accounts as well as major empirical findings in the core areas of social development

PSYC 474 Research in Group Dynamics (3 Credit Hours)
Covers theory, methods, and research on behavior in and by groups from a social psychological perspective. Learning outcomes include knowledge of theory and research on group structure, group performance, group decision making, negotiation, and intergroup behavior; ability to design research about group behavior and to analyze data from group research.

PSYC 475 Cognitive Development (3 Credit Hours)
This course is designed to provide an advanced level introduction to critical issues in the study of cognitive development from infancy through childhood.
Outcomes:
Students will be expected to draw connections between the major theoretical accounts of cognitive development and the empirical literature in core areas of children's cognition

PSYC 477 The Self and Self-Esteem (3 Credit Hours)
Pre-requisites: Graduate Standing
Graduate seminar focusing on psychological theory and research on the self and self-esteem. Course will focus on where self knowledge comes from and how it affects human behavior.
Outcomes:
Knowledge of psychological theory and research on the self and self-esteem

PSYC 479 Cognition and Emotion (3 Credit Hours)
Pre-requisites: Graduate Standing
Graduate seminar focusing on psychological theory and research on the role that emotion plays in cognitive activity and behavior. Course will focus on how emotion affects cognition and how different emotions have different effects.
Outcomes:
Knowledge of psychological theory and research on cognition and emotion

PSYC 482 Advanced Statistics (3 Credit Hours)
Covers analysis of factorial designs and other multifactor data sets.
Outcomes:
Learning outcomes include theory and assumptions underlying analysis of variance and multiple regression; ability to use SPSS to analyze data from factorial designs and other multifactor research endeavors

PSYC 484 Prejudice and Intergroup Relations (3 Credit Hours)
Pre-requisites: Graduate Standing
Graduate seminar focusing on psychological theory and research on intergroup relations, stereotyping and prejudice. Course will focus on the perceptions, cognitions and behaviors toward members of our own group and members of outgroups.
Outcomes:
Knowledge of psychological theory and research on intergroup relations and prejudice

PSYC 485 Psychology and Law (3 Credit Hours)
Application of social psychological theory and research to criminal behavior and the criminal justice system. Specific topics include crime causation, mass media effects, jury selection, eyewitness accuracy, and crime prevention.
Outcomes:
An understanding of core theoretical and methodological approaches to criminal justice research, development of skills needed to perform psychologically oriented criminal justice research

PSYC 486 Methods of Program Evaluation (3 Credit Hours)
Overview of program evaluation methods, politics, ethics, and applications; including topics such as quasi-experimental design, statistical analysis issues, ethical guidelines, implementation strategies, and presentation styles.
Outcomes:
An understanding of the methods, strategies, ethical issues, and implementation obstacles of evaluation research; Development of skills needed to perform high quality evaluation research in a variety of applied settings

PSYC 489 Political Cognition (3 Credit Hours)
Examination of the cognitive determinants of political judgments and decision; including topics such as political information processing, voting preference, political stereotyping, racism, ideology and public opinion, and media effects.
Outcomes:
An understanding of core theoretical approaches within political psychology, scientific methods of hypothesis testing within political psychology, and the development of skills needed to perform research within political psychology

PSYC 491 Multivariate Analysis (3 Credit Hours)
An introduction to the theory and application of multivariate statistical techniques in psychology.
Outcomes:
Students will learn the conceptual underpinnings (including matrix algebra) and will also learn to conduct analyses for the following procedures: multiple and logistic regression, MANOVA, loglinear analysis, canonical correlation, factor analysis, and cluster analysis

PSYC 493 Structural Equation Modeling (3 Credit Hours)
An introduction to structural equation modeling as a multivariate statistical tool, including confirmatory factor analysis, path analysis, causal modeling, diagramming structural models, assessing model fit, model development and identification, multi-sample analysis, and longitudinal analysis.
Outcomes:
An understanding of the logic and mechanics of structural equation modeling, and the skills necessary to use LISREL 8 software to conduct structural analyses

PSYC 509 Seminar on Teaching Psychology (0 Credit Hours)
This course provides an introduction to the psychology teaching and learning.

PSYC 510 Ethics & Professional Practice (3 Credit Hours)
The ethical standards and practice of psychologists, including basic principles of ethics, application of ethics to professional practice and to research, and professional problems and practices are reviewed.
Outcomes:
Students will learn to manage complex ethical problems encountered in psychological practice, research, and education

PSYC 513 Adolescence (3 Credit Hours)
This course offers an in-depth study of adolescence from a psychological as well as cultural and historical perspective, with a focus on biological, cognitive, psychological, and social changes.
Outcomes:
Students will learn important components of psychological health and maladaptation during the adolescent developmental period and how family, peer, and school contexts affect adolescent development

PSYC 514 Research in Development Psychology (3 Credit Hours)
The goal of this course is to survey important methods, issues, research designs, and other topics specific to research in developmental psychology and cultivate students¿ scientific skills like critical thought and evaluation of research.
Outcomes:
Students will be able to demonstrate understanding of developmental methodology, design, ethical concerns, and other issues relevant to developmental science

PSYC 515 Infancy (3 Credit Hours)
The goal of this course is to survey important topics in the field of infancy, the period of development from birth through approximately 3 years.
Outcomes:
Students will demonstrate understanding of infant developmental science in particular content areas and the processes underlying change

PSYC 518 Seminar Selected Topics-Clinical Psychology (3 Credit Hours)
This course provides an overview of selected topics in clinical psychology.

PSYC 525 Seminar in Social Psychology (3 Credit Hours)
This course provides an overview of theory and research on social psychology.

PSYC 535 Internship in Applied Social Psychology (1 Credit Hour)
Students complete an applied social psychology internship during this course.

PSYC 540 Psychology of Language Development (3 Credit Hours)
This course provides an overview of theory and research on the psychology of language development.

PSYC 545 Select Topics in Developmental Psychology (3 Credit Hours)
This course provides an overview of selected topics in developmental psychology.

PSYC 548 Risk and Opportunity in Childhood and Adolescence (3 Credit Hours)
This course provides an overview of theory and research on risk an opportunity in childhood and adolescence.

PSYC 552 Neuropsychology (3 Credit Hours)
Neuropsychology involves the interdisciplinary study of the relations between human brain function and behavior.

PSYC 553 Neuropsychological Assessment (3 Credit Hours)
This course covers the major areas of neuropsychological assessment, including major assessment techniques, interviewing, report writing, and psychometric issues.
Outcomes:
Students will learn major issues and topic areas in neuropsychological assessment (eg, attention, language, memory, visual perception, motor functioning, executive functioning, and emotional functioning)

PSYC 555 Social Psychology Research and Professional Development (0 Credit Hours)
Pre-requisites: Graduate student standing in Social Psychology
Course will involve research presentations and other forms of professional development.
Outcomes:
Course will involve research presentations and other forms of professional development

PSYC 556 Developmental Psychology Research and Professional Development (0 Credit Hours)
Pre-requisites: Restricted to graduate students in Developmental Psychology
This course will involve research presentations and other forms of professional development.
Outcomes:
Students will gain the skills and knowledge necessary to present their research to colleagues; Students will possess greater readiness for their post-graduate career

PSYC 560 Human Diversity (3 Credit Hours)
This course provides a foundation in human diversity as it relates to the practice of clinical psychology. The course will examine theoretical perspectives and research findings related to human diversity. The goal of this course is to challenge students to think critically about the influence of human diversity on their psychological practice, research, and teaching.

PSYC 568 Evidence-Based Practice in Clinical Psychology (3 Credit Hours)
Pre-requisites: PSYC 412, or approval of instructor
This course provides a theoretical and skills-based overview of evidence-based practice (EBP) in clinical psychology, and surveys the theoretical and applied aspects of various evidence-based intervention approaches in psychology, including Motivational Interviewing (MI), Interpersonal Therapy (IPT), Cognitive Behavior Therapy (CBT), and Dialectical Behavior Therapy (DBT). Students will demonstrate an understanding of current theories and methods in evidence-based psychotherapy.

PSYC 595 Thesis Supervision (1-3 Credit Hours)
Pre-requisites: Enrollment is Restricted to Psychology graduate students
Students will make supervised progress towards completion of their theses.

PSYC 596 Internship in Clinical Psychology (1 Credit Hour)
Students complete a full time APA approved clinical internship during this course.

PSYC 597 Integrative Readings in Psychology (3 Credit Hours)
Students complete integrated readings under the supervision of a faculty member.

PSYC 598 Research (3-6 Credit Hours)
Students complete research under supervision of a faculty member.

PSYC 599 Directed Readings (3-6 Credit Hours)
Students complete directed readings under the supervision of a faculty member.

PSYC 600 Dissertation Supervision (1 Credit Hour)
Students complete dissertation research under the supervision of a faculty member.
Outcomes:
Students will make progress on their dissertation research

PSYC 605 Master's Study (1 Credit Hour)
Students complete master's thesis readings and research under the supervision of a faculty member.
Outcomes:
Students will make progress on their MA thesis proposal

PSYC 610 Doctoral Study (1 Credit Hour)
Students complete dissertation readings and research under the supervision of a faculty member.

Psychology of Crime and Justice (PSCJ)

Discover, search, courses (p. 2661)!

PSCJ 399 Independent Study (3 Credit Hours)
This course provides students with the opportunity to work under the direction of a faculty member on a particular area of interest that is not part of the Psychology of Crime and Justice minor's usual curriculum. Program permission required.
Interdisciplinary Option: Psychology of Crime and Justice
Outcomes:
Gain supervised research experience in a specific area of psychology and law

Public Health (PUBH)

Discover, search, courses (p. 2661)!

PUBH 199 Service-Learning in Health Sciences Leadership (3 Credit Hours)
This introductory course aims to teach students the fundamental concepts, principles, and practices associated with interprofessional health approaches. The course will emphasize the importance of teamwork, communication, and respect among various health professionals in delivering holistic care across the health continuum.
Outcomes:
Compare roles, responsibilities, values, ethics, communication, and teamwork of various health professions; Discuss evidence-based impact of interprofessional research, practice, and education; Communicate effectively across professions; Participate in interprofessional teams and case-based activities

PUBH 300 Introduction to Public Health (3 Credit Hours)
Public health is the science of preventing disease and protecting and promoting the health of populations and communities. Through interactive exercises and application of concepts, this course considers its history; ethical principles; scientific foundation and tools; biomedical bases; socioeconomic and behavioral factors; environmental issues; and relationship to medical care.
Course equivalencies: X -PUBH 300/ ENVS 300
Outcomes:
Describe the history, core concepts, functions, and methods of public health; Define health disparities and explain how they are produced; Synthesize public health information and communicate it effectively

PUBH 301 Health and the Environment (3 Credit Hours)
This course is designed as an introduction to the field of environmental health, including regulations, research, disease prevention, and advocacy.
Course equivalencies: X-ENVS301/PUBH301/MBPH401
Outcomes:
Students will be able to outline approaches for assessing and controlling environmental hazards that affect community health and discuss major local, national, and global health challenges

PUBH 303 Fundamentals of Epidemiology (3 Credit Hours)
Epidemiology is the study of the distribution and determinants of disease in populations and remains the basic science of public health. The objective of this course is to familiarize students with the range of tools used to conduct epidemiologic analysis, including study design and measures of association.
Course equivalencies: X- PUBH 303/ENVS 303/MPBH 403
Outcomes:
Apply epidemiological methods to public health problems; select appropriate quantitative data collection, study designs, and analytical methods; apply adjustment techniques; and calculate measures of association; and interpret and communicate results

PUBH 304 Health Behavior and Health Promotion (3 Credit Hours)
This introductory course is designed to provide students with a foundation in behavioral theory as applied to public health practice, including health education and health promotion. Health education strategies will be examined from the perspective of health literacy, cultural competency, and adult learning behaviors among other dynamics.
This course satisfies the Engaged Learning requirement.
Outcomes:
Describe a range of health behavior theories and frameworks commonly incorporated into public health interventions on the individual, interpersonal, and community level

PUBH 305 Public Health Communication (3 Credit Hours)
This course will teach students effective use of health literacy and health communication tools, including the use of mass media, online social media, and health professions' communication with patients in clinical settings.
Outcomes:
Students will be able to develop communication tools such as infographics and brief web-based videos and evaluate public health information

PUBH 306 Critical Thinking in Public Health (3 Credit Hours)
This course is designed to prepare students to make reasoned, intelligent decisions about public health matters by learning about and practicing how to think, read, write, and speak critically.
Outcomes:
Be able to evaluate the credibility of sources of information, scrutinize arguments, recognize biases in oneself and in others, and take a stand on public health issues and support it

PUBH 307 Foundations of Public Health Policy (3 Credit Hours)
Provides students with theoretical frameworks to understand public health policy issues, introduces public policy making processes, and enables students to analyze position papers on policy topics. Drawing from law, economics, political science, ethics and epidemiology, the course provides students with the knowledge and skills to understand policy-making processes.
Course equivalencies: PUBH 307/MPBH 407
Outcomes:
Explain how federal, state, and local health policy is formulated, implemented and evaluated; Assess the balance between the public good and individual rights in the policy process in public health

PUBH 309 Introduction to Biostatistical Methods for Public Health (3 Credit Hours)
This course offers an introductory overview of the fundamental and foundational biostatistical concepts and methods that are critical in the field of public health. Emphasizing the application and interpretation of biostatistical methods, it covers a broad spectrum of topics including graphical and numerical descriptive statistics for data summarization and exploration; probability theory with an emphasis on the binomial (discrete) and normal (continuous) distributions, which are crucial for understanding statistical inference; and inferential statistics, encompassing point estimation, interval estimation, and hypothesis testing to support evidence-based decision-making. The course also introduces nonparametric statistical methods for analyzing data without assuming a specific distribution.
Outcomes:
Explain the fundamental concepts of probability and statistics as they apply to public health data; Analyze graphical and numerical descriptive statistics to effectively summarize public health data; Evaluate basic inferential statistical methods, including hypothesis testing and confidence intervals, to draw and justify conclusions from public health data; Justify the appropriate statistical methods for specific public health research scenarios based on the data type and research question; Communicate statistical information effectively to various audiences within the field of public health

PUBH 310 Public Health Internship (3 Credit Hours)
This practical internship course will integrate theory, where students will unpack the complexities of Public Health and gain an understanding of the roles and responsibilities of professionals. Careers in Public Health are multidimensional, students will integrate real world experience reflecting on experiences of leadership, health equity, community engagement, and professional development.
This course satisfies the Engaged Learning requirement.
Outcomes:
Integrate academic internship experience with course curriculum academic content through critical reflection of leadership theory and development; assess leadership identity, leadership behavior, and civic role in a public health framework

PUBH 313 Community Assessment and Program Planning (3 Credit Hours)
This course will teach the basics of community health assessment and public health program planning, implementation, monitoring, and evaluation. This will include learning data collection techniques, program design, data analysis strategies, and how to present evaluation findings to different audiences. Students will then apply the lessons learned in class by developing a project plan for a hypothetical public health program.
Outcomes:
Describe a community health assessment; Define conceptual frameworks and logic models and their purpose in the context of public health programs; Design data collection tools for community health assessment and program evaluation purposes; Determine the best evaluation strategy to use in various programmatic scenarios; Apply program planning, implementation, monitoring, and evaluation methods to case study assessment

PUBH 314 Global Public Health (3 Credit Hours)
This course is an introduction to global health at the undergraduate level to provide the students with an understanding of global health goals and governance, health surveillance systems, and the determinants, consequences and trends of disease in low- and middle-income countries, with some reference to high-income countries and regions. Both infectious and non-communicable diseases will be addressed, as will reproductive and women's health, children's health, nutrition, immigration, and environmental health.
Course equivalencies: HSM 210 / PUBH 314 / ENVS 385
Outcomes:
Define the most commonly used global health metrics, international goals, and common global health issues; Describe the various ways historical colonialism and modern globalization impact global health outcomes and programs; Analyze case studies of existing global health interventions and policies; Apply knowledge of global health statistics, common health issues, and public health interventions in the development of a country health profile; Identify reasons for health inequities/disparities which exist in low- and middle-income countries, as well as higher-income countries; Compare current global health funding and implementation systems, such as foreign aid, the United Nations, public/private partnerships

PUBH 315 Public Health Advocacy (3 Credit Hours)
This course is designed to equip students with a foundational understanding of the essential role of advocacy in informing and advancing public health policy, as well as skills necessary to engage in that process. Students will examine public health advocacy campaigns, the legislative process at the local, state, and federal level, the need for evidence-based research in shaping public health policy, the importance of critically evaluating policy proposals, and the incorporation of health equity in the process. The course will cover assessment of the political landscape, stakeholder engagement, and the development of strong written, verbal, and multi-media communication skills. The class will address current public health issues through lectures, class discussions, and projects, including projects aimed at engaging legislators.
Outcomes:
Develop effective advocacy strategies tailored to public health issues; Evaluate evidence-based research to support policy recommendations; Engage diverse stakeholders to advance public health initiatives; Craft persuasive advocacy messages for diverse audiences; Explain the legislative and policy-making processes involved in implementing public health changes

PUBH 320 Global Health Internship (3 Credit Hours)
Pre-requisites: Restricted to students accepted into an official Parkinson School study abroad program
Co-requisites: PUBH 321 (may also be taken as a Prerequisite)
This internship course is for students selected for the global health field experience. Students will travel to an international site and collaborate, either individually or in groups, with a local community partner on a practical public health project that will result in a deliverable students will provide to the partner. Each student is expected to complete at least 100 hours of fieldwork and fulfill all project requirements while abroad. Students will use an asset-based assessment modality, as opposed to deficit-based, when developing their projects. Upon return, students will share their experience with the Loyola University Chicago community through a final presentation.
This course satisfies the Engaged Learning requirement.
Outcomes:
Collaborate with a host or partner organization to determine a local project that will meet their programmatic needs; Co-create strategies with the partner organization and implementation community to address the assigned health issue; Summarize lessons learned and project plans for the local partner, implementation community, and LUC community via a presentation; Demonstrate interprofessional values and communication skills that demonstrate respect for, and awareness of, the unique cultures, values, roles/responsibilities, and expertise represented by other professionals and groups that work in global health

PUBH 321 Global Health Experience Seminar (1 Credit Hour)
Pre-requisites: Only for students accepted into an official Parkinson School study abroad
This 1-credit seminar course prepares students selected for the summer global health internship to engage ethically, professionally, and effectively in international public health settings. Through interactive sessions, students will explore foundational global health concepts, complete ethics and safety training, analyze key public health indicators for their assigned site, and reflect on the role of culture in shaping health beliefs and health systems. Emphasis will be placed on responsible global engagement, cultural humility, and comparative analysis of health systems. Successful completion of this course is required for participation in the summer field internship abroad.
Outcomes:
Analyze the health status of populations using available data for your assigned local site; Describe how cultural context influences perceptions of health and disease in your local implementation context; Compare and contrast the local national model or health system for provision of healthcare to the US system, including their respective effects on health and healthcare expenditure; Define local, national, and international codes of ethics and how they are relevant to one's working environment

PUBH 390 Special Topics: Public Health Intelligence (3 Credit Hours)
Pre-requisites: Students must have completed one statistics course including STAT 103, PSYC 304, STAT 335, ISSCM 241 equivalent
This course provides both a conceptual foundation and a hands-on introduction for PH informatics - the science of collecting, organizing, and using information to promote and protect the health of all people. Students will work with real-life data sets, from food safety to crime reports, while furthering their understanding of the intersection of public health practice and informatics.
Outcomes:
After taking this course, students will have developed a conceptual foundation for quickly assessing data sets and evaluating informatics approaches to produce high-quality information resources for decision makers

PUBH 391 Leadership and Public Health Entrepreneurship (3 Credit Hours)
Public health entrepreneurship provides a pathway for action to solving public health challenges. Students will learn how to identify public health challenges, ideate, develop sustainable solutions rooted in evidence, cultivate partnerships, lead with authenticity, communicate through the art of storytelling, and champion community well-being.
Outcomes:
Define public health entrepreneurship and explore its role in addressing health disparities with communities

PUBH 392 Special Topics In Public Health (1-3 Credit Hours)
Pre-requisites: Restricted to students in the Bachelor of Public Health (BSPH) program, or with permission of the instructor
This course covers a specific topic in public health.
Outcomes:
Students will be able to articulate a general understanding of the selected topic

PUBH 395 Independent Study in Public Health (1-4 Credit Hours)
This is a directed study course in public health for approved students, supervised by a member of the faculty. Students must have an assigned professor, written objectives, planned outcomes and timelines. Students must have permission from the Public Health Program Director to enroll.
Outcomes:
Upon successful completion of this course, the student will be able to articulate a general understanding of the selected topic

PUBH 399 Public Health Capstone Experience (3 Credit Hours)
This course is a cumulative, integrative and scholarly or applied experience or inquiry project. It may include internships, service-learning projects, senior seminars, portfolio projects, or research paper. The project provides the opportunity for students to demonstrate proficiency in effective communication skills through a written report and oral presentation.
This course satisfies the Engaged Learning requirement.
Outcomes:
Demonstrate in written report and oral presentation the knowledge and skills acquired during the undergraduate program through selected projects which translate gained information into public health practice, including research

Public Service Leadership (PSLD)

Discover, search, courses (p. 2661)!

PSLD 400 Introduction to Public Service (3 Credit Hours)
Introduces students to organizational theories and practices useful to public service managers. Teaches students how to use structural, human resource, political and symbolic perspectives to rethink public service organizations. Provides an introduction to managerial issues including workforce diversity, decision making, and leadership; stresses critical thinking skills. Open to students admitted into the MA in Public Service Leadership program (PSLD-MA).
Outcomes:
Knowledge of ethics, values, and skills for organizational leadership in human service and public service agencies; Knowledge of theory, organizational functions and structures, leadership styles, and value-driven leadership

PSLD 402 Foundations of Global Strategic Communication (3 Credit Hours)
Globalization challenges almost every aspect of communication from creating and delivering messages to spreading ideas that cross language, time, and cultural barriers. The course focuses on using strategies communication planning and management to guide communication activities in organizations. Open to students admitted into the MA in Public Service Leadership program (PSLD-MA).
Outcomes:
Knowledge of critical communication skills and values; Understand the interplay between communication, technology, and culture

PSLD 403 Program Management and Development (3 Credit Hours)
There is an increasing demand for public service workers who can work with diverse communities through program management and development using strengths and empowerment perspectives and social and economic justice principles. This course builds on the ecological systems perspective that views program development as an arena for social change. Open to students admitted into the MA in Public Service Leadership program (PSLD-MA).
Outcomes:
Knowledge and skills needed for planning new or adapting existing programs within the context of diverse communities; Develop skill set for program development and quality improvement

PSLD 404 Data, Visualization and Evaluation (3 Credit Hours)
Using Microsoft Excel, this course introduces students to the use of quantitative data in policy, public management, and non-profit decision making. Topics include causal inference, descriptive statistics, data visualization, probability, statistical inference, and regression analysis. Open to students admitted into the MA in Public Service Leadership program (PSLD-MA).
Outcomes:
Hands-on knowledge and experience managing and analyzing data sets; Best practices for presenting data to diverse stakeholders

PSLD 405 Design Thinking in Mitigating Complex Social Problems (3 Credit Hours)
Design thinking is a way of working with user-centered innovation to address problems where not all knowledge is available at the outset, i.e. the problem itself is unknown (wicked problems). Design thinking rests on principles such as user involvement, problem framing, experimentation, visualization, and diversity. Open to students admitted into the MA in Public Service Leadership program (PSLD-MA).
Outcomes:
Develop critical skills for management and innovation; Develop creative potential of individuals and enable them to deal with wicked problems

PSLD 420 Disaster Operations and Management (3 Credit Hours)
Pre-requisites: Only open to students admitted into the MA in Public Service Leadership (PSLD-MA)
Introduction to emergency management theories and practices that are critical in the emergency management profession. Covers the phases of emergency management, human and political aspects, the importance of effective resource management, environmental concerns, and the threats and hazard identification and risk assessment process that is important to emergency management organizations. Introduces participants to issues related to managing personnel, including volunteers, workforce diversity, decision-making, leadership, and stresses critical thinking skills.
Outcomes:
Knowledge of theory, organizational functions and structures, phases of emergency management, resource management, ethics, politics, and threats and hazards; Develops ability to solve complex problems and engaged with a wide variety of organizations that support emergency management

PSLD 422 Disasters and Vulnerable Populations (3 Credit Hours)
Pre-requisites: Only open to students admitted into the MA in Public Service Leadership (PSLD-MA)
Disasters create lasting impacts for communities large and small. This course introduces students to emergency management concepts that ensure the needs are being met for citizens with access and functional needs, those living in areas with high social vulnerability, and other vulnerable populations throughout the community. Teaches students to include vulnerable populations in all phases of emergency management and provides students with the opportunity to learn critical communication and problem-solving skills.
Outcomes:
Understand the make-up of the community being served, ensure plans, processes, and disaster response includes vulnerable populations within the community; Knowledge of tools and resources available to assist in preparedness activities to ensure they involve the community in its entirety

PSLD 423 Integrated Social-Medical Issues in Emergency Management (3 Credit Hours)
Pre-requisites: Only open to students admitted into the MA in Public Service Leadership (PSLD-MA) Outcomes: Identify social and medical issues in EM practices; Apply the concepts of EM within a social-medical context; Describe EM social and medical organizations and structures and their relation to public service; Apply concepts of leadership to public service, EM, and other sectors
This course builds on existing leadership and public service knowledge with the application of emergency management principles under the shared perspectives of social-medical outlooks. It analyzes current trends and issues within emergency management through a social-medical paradigm and their impact on the public service models and leadership outcomes, including leadership challenges, ineffective communication and processes, and emergency response software, and their impact on medical and social infrastructure,

PSLD 430 Understanding and Mitigating Poverty (3 Credit Hours)
Pre-requisites: Only open to students admitted into the MA in Public Service Leadership (PSLD-MA)
This course examines the nature, extent, and causes of poverty and inequality in the US while relying on literature from sociology, political science, economics, psychology and other disciplines. It analyzes the anti-poverty initiatives and policies launched over the past five decades and examines the role of culture, discrimination and classism as well as policy issues.
Outcomes:
Understand key issues regarding causes and consequences of poverty; Describe approaches to understanding and providing solutions to poverty; Explore the dynamics of commitment to social change and anti-poverty initiatives through grantmaking

PSLD 431 Foundations of Social and Sustainable Development (3 Credit Hours)
Pre-requisites: Only open to students admitted into the MA in Public Service Leadership (PSLD-MA)
Addresses global design for economic and social development via the UN adoption of Sustainable Development Goals and targets. Examines policies and programs that aim to achieve inclusive, people-centered and sustainable development. Covers the basics of narrative policy analysis, measures and outcomes. Explores environmental, social, and economic concerns and their impact at local, national and global levels.
Outcomes:
Identify challenges in social and sustainable development especially in transition to renewable resource use in specific populations; Assess the complex overlap of current science, economics, and geopolitics underlying the overuse of resources, impact on population, and considerations of economic growth

PSLD 432 Gender Diversity & Sustainable Social Development (3 Credit Hours)
Pre-requisites: Only open to students admitted into the MA in Public Service Leadership (PSLD-MA)
This course uses the UNWomen's approach to gender diversity and sustainable development to encompass the issues that hinder and those that contribute to the progress of women and gender diversity within sustainable development. The course reviews the environmental, social, and economic relevance and impact on gender. The specific topics will include, the intersectionality of gender and sustainability in the context of agriculture, forestry, water, health, investment and corporate social responsibility and each topic will highlight a specific region or nation. The course will provide an overview of the underlying intersectionalities of class, age, region within Asia, Latin America, and Africa.
Outcomes:
Describe sustainability and the significance of its interaction with gender; Critically review the history of global development agenda from a gendered perspective; Utilize interdisciplinary frameworks of gender inequity and sustainability; Assess variations in women's contributions to social development - historically, culturally, and politically; and Analyze women and gender within issues of Agriculture, Forestry, Water, Health and Investment in sustainable development

PSLD 433 Social Analysis Inequality Poverty and Development (3 Credit Hours)
Pre-requisites: Only open to students admitted into the MA in Public Service Leadership (PSLD-MA)
This course will introduce students to some of these key concepts and debates to enable critical evaluation of how well sociological understandings of development inform the social analysis of exclusion, poverty and inequality, as well as what implications this might have for development policy especially when focusing on underserved communities.
Outcomes:
Describe the key concepts and debates surrounding poverty and inequality; Evaluate sociological understanding that inform the social analysis of exclusion; and Assess implications for policy regarding underserved communities

PSLD 441 Public Service Leadership Capstone Project Proposal (2 Credit Hours)
Pre-requisites: Last semester of the program and program director approval
Co-requisites: Summer 8wk session: elective course completed
The Public Service Leadership Capstone Project is an opportunity for students to integrate and synthesize the knowledge, values and skills developed in the program as they prepare for a career in public service leadership. The Capstone Project will showcase the student's skill as a leader in a chosen area of professional interest. From the perspective of a leadership role, students will design a public service project that is applicable to a real-world setting or population. Students' specific interests, backgrounds, previous coursework, and personal and professional goals will contribute to their further exploration of leadership. Selection and investigation of an area of interest will allow students to focus and deepen their understanding of the role(s) of leadership in that specific context. These may include such areas as social services, public administration, emergency management, healthcare, education. Projects may include case studies, program evaluations, policy analysis studies, organizational analyses, strategic plans.
Outcomes:
Apply knowledge gained throughout the MPS to a relevant public management, nonprofit management, or policy problem; Identify and define a topic /research question for the capstone project focusing on leadership roles; Practice leadership in planning a project in a chosen area of focus; Design a project that applies concepts and theories learned in the program

PSLD 442 Public Service Leadership Capstone Project Implementation (2 Credit Hours)
Pre-requisites: PSLD 441
Co-requisites: Summer 8wk session: elective course completed
The Public Service Leadership Capstone Project is an opportunity for students to integrate and synthesize the knowledge, values and skills developed in the program as they prepare for a career in public service leadership. The Capstone Project will showcase the student's skill as a leader in a chosen area of professional interest. The Capstone Project Implementation course allows students to apply many aspects of the program to a real-world setting and helps them prepare for a career in public service leadership. The capstone project will allow students practice leadership in executing a project of their design within a chosen professional setting. Students will showcase their skill as a leader through project presentation and reflection.
Outcomes:
Implement a project that applies concepts and theories learned in the program to a chosen area of focus; Practice leadership in executing the project; Present and reflect on leadership role

Quinlan Business (QUIN)

Discover, search, courses (p. 2661)!

QUIN 101 Business Learning and Careers (0 Credit Hours)
Pre-requisites: Quinlan School of Business undergraduates only
This course provides an overview of business majors at Quinlan and related career outcomes for graduates in each major.
Outcomes:
Students will understand the different attributes of Quinlan majors, variation in skill development and focus, and pathways for career success

QUIN 102 Financial Literacy and Well-Being (1 Credit Hour)
Pre-requisites: Quinlan School of Business undergraduates only
Students develop a comprehensive understanding of financial literacy by learning practical knowledge and tactics for successful personal financial management. This course makes direct connections between financial literacy and financial well-being.
Outcomes:
Students will understand personal finance terminology and resources, know how to choose financial instruments, comprehend basic economic function and policies, and be able to make ethical financial decisions and set goals

QUIN 202 Career Preparation (2 Credit Hours)
Pre-requisites: Sophomore standing, Quinlan School of Business student
Career Preparation provides an introduction to the critical skills required for successful career development and job search navigation. Students will learn about career development; develop job/internship search skills; establish a job/internship search action plan and begin to become oriented to employer research. Topics addressed will include resume/job search correspondence; interviewing skills; network building; career & employer research and career development resource building.
Course equivalencies: QUIN 202 / QUIN 202H
Outcomes:
Develop skills that can be used for career and life planning both now and in the future, including resume & cover letter writing, interviewing, salary negotiation, maintaining a professional online presence, plus effective communication skills through class discussions and individual presentations, and personal responsibility

QUIN 202H Career Preparation - Honors (2 Credit Hours)
Pre-requisites: Quinlan Business Honors Student
Career Preparation provides an introduction to the critical skills required for successful career development and job search navigation. Students will learn about career development; develop job/internship search skills; establish a job/internship search action plan and begin to become oriented to employer research. Topics addressed will include resume/job search correspondence; interviewing skills; network building; career & employer research and career development resource building.
Course equivalencies: QUIN 202 / QUIN 202H
Outcomes:
Develop skills that can be used for career and life planning both now and in the future, including resume & cover letter writing, interviewing, salary negotiation, maintaining a professional online presence, plus effective communication skills through class discussions and individual presentations, and personal responsibility

QUIN 300 Business Internship - Elective Credit (1-3 Credit Hours)
Pre-requisites: Sophomore standing, Quinlan School of Business student
This course provides general elective credit for an approved internship, with credit based on hours worked for the term (1cr for 56-84 hours, 2cr for 85-119 hours, 3cr for 120+ hours). Internships must be approved by the instructor in advance, no later than last date of late/change registration.

QUIN 351 Business Internship-Engaged Learning (3 Credit Hours)
Pre-requisites: Junior standing, School of Business student, & "C-" or better in QUIN 202 or BSAD 220
This course satisfies the Engaged Learning requirement and connects an internship with academic learning and reflection. Topics include goal-setting, navigating the workplace, and career planning. Internships must be approved by instructor by the last date of late/change registration (required: work 120+ hours during term enrolled, submit name of supervisor). Students must be working in an internship during the term of enrollment into QUIN 351.
This course satisfies the Engaged Learning requirement.

QUIN 390 Capstone in Business of Applied Artificial Intelligence (3 Credit Hours)
Pre-requisites: ACCT 331
This immersive, hands-on course focuses on solving a real-world business problem in collaboration with a sponsoring firm. Students will work through all phases of an AI project lifecycle: defining the business problem, analyzing data, developing KPIs, preparing large data sets, building and refining AI models, and delivering actionable recommendations. The project emphasizes consultative team-based work, critical thinking, stakeholder management, and professional communication skills. Students will learn how to translate business objectives into technical solutions, leverage syndicated and government data, and apply best practices in AI model development and deployment. Students will present to the sponsoring firm at key milestones, culminating in a final presentation and required course deliverables including a detailed project description, model notebooks and related documentation, and a user guide.
Outcomes:
Translate business challenges into AI solutions; Acquire, clean, and integrate large and diverse data sets; Evaluate and select appropriate analytical and modeling techniques; Develop, validate, and refine AI models; Communicate findings effectively to technical and non-technical stakeholders; Understand and address ethical, legal, and societal issues in AI implementation

QUIN 399 Special Topics (3 Credit Hours)
This course will cover a variety of special topics in Economics.

QUIN 401 US Culture & Academic Success Skills for International Students (0 Credit Hours)
This course is restricted to international students admitted to the Quinlan School of Business Graduate Programs. Verbal and nonverbal communication, active listening, participation in classroom discussions, collaborative group work, presentation skills, reading comprehension strategies, academic writing, understanding and avoiding plagiarism.
Outcomes:
International students will be better prepared for achieving success in graduate business studies by adapting to unfamiliar cultural differences in and out of the classroom

QUIN 403 Fundamentals of Business (3 Credit Hours)
Only students with undergraduate degrees other than business are eligible to take this course. This course examines essential topics in management, marketing, operations, information systems, accounting and finance. Within each discipline, we examine the key decisions that are made and how those decisions are or should be made. They will understand what decisions are made in each discipline and how those decisions should be made.
Outcomes:
By the end of this course, students will be familiar with the key discipline areas in business

QUIN 499 Special Topics (3 Credit Hours)
Enrollment is restricted to students in the Quinlan Graduate School of Business. This course offers students the opportunity to gain additional understanding of special business topics not otherwise addressed in the standard graduate business curriculum. The subject and content vary and are offered on an ad hoc basis.
Outcomes:
Students will demonstrate an understanding of a specialized topic not otherwise addressed in the standard graduate business curriculum

QUIN 501 Internship - Curriculum Practical Training (1-3 Credit Hours)
This is the companion course for any Graduate Business student concurrently engaged in an internship for 1 to 3 hours of elective academic credit. BSAD may be taken for academic credit up to three times for a total of 3 credit hours.
Outcomes:
Students will gain first-hand experience with a particular project or area of business operations, will engage in reflection on their contributions to the workplace and the overall internship experience

Research Methods (RMTD)

Discover, search, courses (p. 2661)!

RMTD 380 Statistical Methods (3 Credit Hours)
This undergraduate course provides an introduction to descriptive and inferential statistical methods used in education, psychology and the health professions.
Course equivalencies: RMTD380 / CPSY380
Outcomes:
Students will be able to analyze quantitative data using a statistical computing package, to interpret and communicate the results of a statistical analysis in written and oral presentations, and to understand the assumptions and limitations of using statistical methods for analysis

RMTD 400 Introduction to Research Methodology (3 Credit Hours)
This course provides an introduction to research methods used in education and the social sciences including qualitative and quantitative research designs.
Course equivalencies: RMTD400 / CIEP495
Outcomes:
Students will be able to critique the argument and methods used in a primary research study, to integrate in a written literature review the results of studies in order to present an argument, and to understand the ethical issues involved in research with human subjects

RMTD 403 Survey Research (3 Credit Hours)
This course provides an introduction to the design and analysis of survey research, and the psychological foundations of questionnaire design.
Course equivalencies: RMTD403 / CIEP494
Outcomes:
Students will be able to develop a survey or questionnaire, design a study using a survey or questionnaire, gather and record data from a survey or questionnaire, analyze the resulting data from a survey or questionnaire, and present and interpret the results in oral and written form

RMTD 404 Introduction to Educational Statistics (3 Credit Hours)
This graduate course provides an introduction to descriptive and inferential statistical methods used in education, psychology and the health professions.
Outcomes:
Students will be able to analyze quantitative data using a statistical computing package, to interpret and communicate the results of a statistical analysis in written and oral presentations, and to understand the assumptions and limitations of using statistical methods for analysis

RMTD 406 Educational Evaluation (3 Credit Hours)
The course will focus on the theories, models, strategies and practices that are germane to educational evaluation, including the history of evaluation studies in the social sciences, the various roles of the evaluator in the development and assessment of programs, evaluation theory and social policy.
Course equivalencies: RMTD406 / CIEP496
Outcomes:
Students will be able to state the purposes, benefits and importance of evaluation research, describe the history and culture associated with evaluation in the US, to read and critique a range of evaluation proposals and reports, to compare and contrast different approaches to evaluation, to develop a proposal for a program evaluation including writing measurable program objectives, planning data collection methods and presenting results to consumers

RMTD 407 Introduction to Evaluation Theory (3 Credit Hours)
This course introduces students to program evaluation theory in the social sciences, including various conceptualizations of evaluation, historical development of the field, purposes of evaluation, and social and political contexts of evaluation practice.
Outcomes:
Students will engage major theoretical concepts of the field - methods, use, values, and practice - from the perspectives of various evaluation theorists; Throughout course readings, discussion and assignments, students will have the opportunity to critically reflect on understandings of social justice, implicitly and explicitly, evident in the evaluation theories

RMTD 408 Evaluation and Evidence in Cross Cultural Contexts (3 Credit Hours)
M.Ed. IEPE Cohort: Develop students ability to communicate quantitative, qualitative and mixed method data to a range of stakeholders. Emphasis placed on multicultural contexts and the development of sophisticated understandings of the politics of evaluation and evidence. Enrollment Restrictions: M. ED. Online Cohort IEPE.
Outcomes:
This course focuses on the writing, presentation and publication dimensions of evaluative work; Develop students ability to communicate quantitative, qualitative and mixed method data to a range of stakeholders; Emphasis placed on multicultural contexts and the development of sophisticated understandings of the politics of evaluation and evidence

RMTD 410 Communicating Research Findings (3 Credit Hours)
This course will expose students to strategies for developing clear arguments in engaging, relevant, content-rich papers and presentations. This course will familiarize students with conventions of written research that improve acceptance and publication rates. It will also explore alternative forms of representing research findings.
Outcomes:
Students will have enhanced skills in communicating research findings to diverse audiences, both verbally and in writing

RMTD 411 Introduction to Human Performance Technology (3 Credit Hours)
This course introduces students to the models, practices and competencies associated with field of Human performance improvement.
Outcomes:
Students will be able to apply the practices associated with the roles of an HPT professional; Students will conduct an analysis of an organizational problem and plan an appropriate intervention and change management strategy

RMTD 412 Needs Assessment (3 Credit Hours)
In this course, students will learn the principles of needs assessment to improve programs and organizations. Needs assessments are a systematic set of procedures to identify within an organization a set of priorities to improve programs and/or organizations.
Outcomes:
Students will plan a needs assessment, develop data collection tools and conduct a practice assessment

RMTD 415 Practicum in Organizational Evaluation (3 Credit Hours)
This practicum course is intended to help candidates integrate theoretical and research coursework with the practice of organizational evaluation and to reflect on their own development as professionals in the service of social justice. The practicum project involves the planning, conducting and reporting results of an evaluation, human performance improvement, or needs assessment project.
Outcomes:
During the course of the practicum candidates are expected to complete a practicum project

RMTD 420 Educational Research I: Building a Body of Evidence With Qualitative Method (3 Credit Hours)
Pre-requisites: RMTD 400 or equivalent
This course explores the discipline and practice of qualitative research, introducing students to the discipline of qualitative research through examination of various theories, traditions, genres, and components of this form of inquiry.
Outcomes:
Students will be able to discuss the meanings of research and of research traditions within the social sciences, to recognize and discuss various epistemologies, traditions, designs, theories, ethical issues and components of qualitative research, to analyze qualitative studies in terms of design, methodology, validity, findings, ethics and conclusions in oral and written critiques, to conceptualize, design, and implement a small-scale qualitative study, and to interpret and present research study findings

RMTD 421 Educational Research II: Building a Body of Evidence Quantitative Method (3 Credit Hours)
This course introduces students to the theories, traditions and components of quantitative research in the social sciences, integrating basic design principles of quantitative research with commonly used statistical methods for analyzing data from these designs.
Outcomes:
Students will be able to recognize and discuss various epistemologies, designs, theories and ethical issues in quantitative research, to critique quantitative studies in terms of design, methodology, validity, statistical analysis, results, ethics and conclusions in oral and written critiques, to apply statistical methods to quantitative data using a statistical analysis computer program, to understand and discuss the theoretical basis and underlying assumptions of various statistical methods in the context of common quantitative study designs, and to analyze, interpret and present the findings of a data analysis

RMTD 422 Single Subject Design (3 Credit Hours)
Pre-requisites: RMTD 400
This course will introduce students to single-case experimental designs as they apply to research and practice in special education and other educational settings. Methods for single-case experiments are applicable to monitoring response to intervention as well as research on low-incidence conditions. Students will learn to critique single-subject experimental research studies and to design studies to monitor treatment interventions in educational settings.

RMTD 430 Psychological Measurement (3 Credit Hours)
This course introduces the assumptions underlying measurement in psychology and education including types of measurements, test development, and theoretical, quantitative and practical issues of reliability, validity and scoring.
Course equivalencies: RMTD430 / CPSY430
Outcomes:
Students will be able to critique studies of the development, reliability and validity of measurement instruments, and to design and plan a study of the reliability and validity of a measurement instrument

RMTD 432 Item Response Theory (3 Credit Hours)
No course description is available
Course equivalencies: RMTD432 / CPSY488

RMTD 440 Mixed Methods Research (3 Credit Hours)
Pre-requisites: RMTD 420 and RMTD 421; Enrollment is restricted to Graduate Education Students
The course addresses the theory and practice of mixing inquiry methodologies in educational and social inquiry. The course covers selected roots of the contemporary interest in mixing methods, various conceptualizations of mixed methods design and analysis, and challenges of mixed methods practice. Students will develop a historical understanding of mixed methods and various frameworks for mixed methods, as well as basic competencies in mixed methods practice.

RMTD 470 Case Study Research (3 Credit Hours)
Pre-requisites: RMTD 420
This course in an in-depth study of a qualitative research methodology: case study. This course allows students to carry out a case study, as well as engage issues common across qualitative research methodologies, such as the flexibility in research design, the ethical dimensions of qualitative research, and qualitative data analysis. Course content is applicable to research and evaluation contexts in education as well as other social and human service practices.

RMTD 481 Advanced Educational Statistics (3 Credit Hours)
This course covers statistical inference, hypothesis testing, estimation of power, factorial analysis of variance, multiple regression and selected non-parametric statistical techniques.
Course equivalencies: RMTD481 / CPSY490
Outcomes:
Students will be able to identify and justify the use of particular statistical techniques for a given research question, to analyze quantitative data using a statistical computing package, to interpret and communicate the results of a statistical analysis in written and oral presentations, and to critique the assumptions and limitations of statistical techniques in a given analysis

RMTD 482 Introduction to Linear Models (3 Credit Hours)
This course covers simple/multiple regression, one- and two- way analysis of variance (ANOVA) followed by multiple comparisons, and analysis of covariance (ANCOVA). Knowledge of basic algebra is required; knowledge of calculus is not required.
Course equivalencies: RMTD482 / CPSY493
Outcomes:
Students will be able to identify and justify the use of particular univariate statistical techniques for a given research question, to analyze quantitative data using SPSS, and to interpret the results of a statistical analysis in written and oral presentations

RMTD 483 Multivariate Statistics (3 Credit Hours)
Pre-requisites: RMTD 421 (B or Better)
This course covers multiple regression, multivariate analysis of variance (MANOVA), multivariate analysis of covariance (MANCOVA), repeated MANOVA, discriminant analysis, canonical correlation and possibly principal components/factors analysis. Knowledge of basic algebra and univariate inferential statistical techniques is required; knowledge of calculus is not required.
Course equivalencies: RMTD483 / CPSY492
Outcomes:
This course equips students with knowledge and hands-on experience for conducting valid quantitative research focusing on multivariate statistics; Students will be able to identify and justify the use of particular multivariate statistical techniques for a given research question, to analyze multivariate data using SPSS, and to interpret and communicate the results of a statistical analysis in written and oral presentations

RMTD 484 Hierarchical Linear Models (3 Credit Hours)
This course examines the conceptual, substantive, and methodological issues in analyzing multilevel data (i.e., on individuals in organizational settings such as schools, corporations, hospitals, communities) using methods for hierarchical linear models.
Course equivalencies: RMTD484 / CPSY491
Outcomes:
Students will be able to identify and justify the use of hierarchical linear models for a given research question, to analyze multilevel data using a statistical computing package, to interpret and communicate the results of a hierarchical linear model in written and oral presentations, and to critique the assumptions and limitations of the use of hierarchical linear models in a given analysis

RMTD 487 Factor Analysis (3 Credit Hours)
No course description is available

RMTD 488 Meta-Analysis (3 Credit Hours)
This course introduces statistical methods in the design and analysis of quantitative research syntheses.
Outcomes:
Students will be able to design and plan a small-scale research review, to locate and evaluate the studies for a review, to code and organize the studies for a review, to analyze the effect sizes from a review, and to produce a comprehensive written synthesis of the study results

RMTD 520 Research Seminar I (3 Credit Hours)
This course will provide doctoral students with an intro to their PhD/EdD program as well as an intro to the dissertation process. The course will focus on methods and processes involved in developing a prospectus and review of literature for a dissertation.
Outcomes:
Students will develop a plan of study for their degree as well as prospectus for their dissertation

RMTD 530 Seminar in Tests & Measurements (3 Credit Hours)
Educational and psychological tests are commonly used to measure latent traits (e.g., knowledge, aptitude, achievement, attitude, and personality), often with the goal of making inferences on individuals or groups of individuals. Item response theory (IRT) measurement models are useful tools in examining the quality of the data that arises from the administration of such tests, which in turn allows us to make judgements about the validity of the test scores (or latent trait estimates) and the quality of the tests (are the items confusing and/or are they biased). This course will introduce students to commonly used IRT models for analyzing dichotomous (e.g., 0=incorrect and 1=correct) and polytomous (0=never, 1=sometimes, 2=always) test data. While much of the course will be application oriented, some technical details that facilitate the understanding of the IRT and highlight the advantages of it over classical test theory (CTT) will be provided. Knowledge of basic algebra, linear modeling, and CTT is required.
Course equivalencies: RMTD530 / CPSY590

RMTD 580 Selected Topics (3 Credit Hours)
What is the role of qualitative critical research when the need for social justice has never been greater? (p. 1) ask Denzin and Lincoln (2017). In this course, we will begin by reviewing systems of inquiry within research in general explore as a basis for our deep dive into the importance of qualitative critical inquiry. We will focus on the meaning and discourses around critical qualitative research by exploring four methodologies: counter-storytelling, PhotoVoice, Youth Participatory Action Research, and Portraiture. Guest scholars who specialize in such methods will describe their purpose and process with qualitative critical research. Students will reflect on readings, write an article critique, and collaboratively present on a methodology and conceptual framework. Students will leave this course able to speak the language of qualitative research in new, robust, and meaningful ways coupled with a better understanding of who they are as researchers and the possibilities of social transformation through qualitative design.

RMTD 590 Seminar:Advanced Mixed Methods (3 Credit Hours)
Pre-requisites: RMTD 420, 421
This course explores the theory and practice of mixed methods research in program evaluation and applied social science research.
Course equivalencies: RMTD590 / CPSY580
Outcomes:
Students will become familiar with selected roots of the contemporary interest in mixed methods research and evaluation, as well as various approaches to mixing research paradigms, purposes, designs, analyses, methods, and so on; Students will develop knowledge for identifying and critiquing mixed method research; They will also be able to develop a mixed methods study

Rome Studies (ROST)

Discover, search, courses (p. 2661)!

ROST 199 Topics in Rome Studies: Introductory (1-3 Credit Hours)
Variable topics in Rome Studies at the elementary level.

ROST 299 Topics in Rome Studies: Intermediate (1-3 Credit Hours)
Variable topics in Rome Studies at the intermediate level.

ROST 370 International Internship - Rome Focus (3-6 Credit Hours)
Enrollment is limited to Rome Center Students Only. This course offers students at the John Felice Rome Center an opportunity to gain valuable professional experience as an intern in Italian and international organizations and companies, essentially making the city of Rome their classroom.
Interdisciplinary Option: Italian American Studies
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will obtain in-depth knowledge and practical experience in an international professional work setting relevant to the student's future career

ROST 382 Human Rights: View from Rome (3 Credit Hours)
Pre-requisites: Enrollment is restricted to Rome Center Students Only
The course aims to discuss with the students the socio-juridical developments of human rights and their applications in the Mediterranean area. The course provides basic tools for understanding the history and principles underlying human rights. It is organized in two parts to discuss human rights related to two fundamental issues of the contemporary age: migration and religious freedom.
Interdisciplinary Option: Catholic Studies, Global Studies, Italian American Studies, Italian Studies, Race and Ethnicity
This course satisfies the Engaged Learning requirement.
Outcomes:
Demonstrate knowledge of history and principles underlying human rights; Assess application of human rights related to migration and religious freedom; Identify current challenges regarding the enjoyment of human rights in the Mediterranean area; Demonstrate self-reflection, anchored in the service-learning experience

Russian (RUSS)

Discover, search, courses (p. 2661)!

RUSS 101 Russian I (3 Credit Hours)
This course is an introduction to the basic elements of the Russian language and to Russian culture.
Outcomes:
Students will develop communicative skills and a fundamental knowledge of the Russian people, language and culture

RUSS 102 Russian II (3 Credit Hours)
Pre-requisites: RUSS 101
This course continues the study of the Russian language and culture.
Outcomes:
Students will continue developing communicative skills and further their knowledge of the Russian people, language and culture

RUSS 103 Russian III (3 Credit Hours)
Pre-requisites: RUSS 102
This course is an intensive review of speaking, listening, reading, and writing Russian.
Outcomes:
Students will develop audio-lingual facility in communication and the ability to read simple texts in Russian

RUSS 104 Russian IV (3 Credit Hours)
Pre-requisites: RUSS 103
This course continues the intensive review of speaking, listening, reading, and writing Russian.
Outcomes:
Students will develop audio-lingual facility in communication and the ability to read short literary and cultural texts in Russian

RUSS 290 Russia and Russians in the World (3 Credit Hours)
RUSS 290 is a service learning course focusing on leadership through service learning and the study of the Russian language and history.
This course satisfies the Engaged Learning requirement.
Outcomes:
1) Students will develop Russian language skills (speaking, listening, reading, writing) and expand their knowledge of Russian history and culture; 2) Student will develop civic engagement leadership skills through practical service work and reflection

Social Work (SOWK)

Discover, search, courses (p. 2661)!

SOWK 200 Introduction to Social Work (3 Credit Hours)
This course is an introduction to the social work profession through the identification of some of the human problems in society and the role of both society and social services in response to the problems. Students have the opportunity to observe several social service agencies and to evaluate current ways in which agencies interpret social problems and administer services. Students will be able to evaluate current ways in which agencies interpret social problems and administer services.
This course satisfies the Engaged Learning requirement.
Outcomes:
1) Describe and apply the mission, values, and roles of the social work profession and demonstrate ethical and professional behavior through participation in service-learning experiences; 2) Analyze social problems and human needs within historical, cultural, and structural contexts to explain how social, racial, and economic injustice affects individuals and communities; 3) Apply the person-in-environment perspective to engage with individuals, groups, organizations, and communities and reflect on civic responsibility and community involvement

SOWK 301 Practice Skills with Individuals and Families (3 Credit Hours)
Pre-requisites: Undergraduate Social Work majors; Senior Standing; A grade of "C" or higher in the following courses: SOWK 200, SOWK 370, SOWK 305, (SOWK 201 or SOWK 307), and SOWK 350
Co-requisites: SOWK 380
This introductory micro practice course begins by focusing on the development of core skills for social workers in their encounters with individuals and families.
Course equivalencies: SOWK 301/SOWK 503
Outcomes:
1) Apply ethical standards, professional values, and cultural humility to social work practice situations involving individuals, families, groups, organizations, and communities; 2) Engage and assess individuals, families, groups, organizations, and communities by integrating biopsychosocial perspectives and evidence-informed practice frameworks; 3) Develop and implement appropriate intervention strategies that respond to client needs and promote well-being across social work practice settings

SOWK 302 Integrated Micro/Mezzo/Macro Theory and Practice (3 Credit Hours)

Pre-requisites: Undergraduate Social Work majors; Senior Standing; A grade of "C" or higher in the following courses: SOWK 200, SOWK 370, SOWK 305, (SOWK 201 or SOWK 307), and SOWK 350

This course extends theoretical knowledge and practical skills in mezzo and macro social work practice that support anti-racist and anti-oppressive, community engaged practices. While integrating theories of sociology, political science, anthropology, public health, and urban studies; as well as practice knowledge; the class examines relationships between social, economic, political, and cultural structures, collective action, and individual attitudes and behaviors.

Outcomes:

1) Apply integrated micro, mezzo, and macro practice frameworks to analyze social problems affecting marginalized populations using ethical, anti-racist, and justice-oriented perspectives; 2) Engage and assess individuals, families, groups, organizations, and communities by synthesizing theory, research, and contextual factors within an integrated practice model; 3) Design and evaluate integrated interventions that address social problems through coordinated micro, mezzo, and macro strategies informed by research and reflective practice

SOWK 303 Group Work Practice in Social Work: Micro/Mezzo/Macro (3 Credit Hours)

Pre-requisites: Undergraduate Social Work majors; Senior standing; A grade of "C" or higher in the following courses - SOWK 200, (SOWK 201 or 307), SOWK 370, SOWK 305, and SOWK 350; SOWK 301 is also required as a pre or corequisite

This course presents theoretical and practical approaches to social work with groups, with a focus on group development, dynamics, and processes.

Course equivalencies: SOWK 303/SOWK 505

Outcomes:

1) Demonstrate and apply ethical and professional behavior by integrating social work values, self-awareness, and group facilitation skills that promote inclusivity, collaboration, and mutual support among diverse group members; 2) Analyze and synthesize group dynamics, theories, and evidence-based practices to assess group needs, develop goals, and implement interventions that foster empowerment and social justice; 3) Engage and collaborate with individuals and groups to plan, lead, and evaluate group processes that enhance collective well-being, inclusion, and effective problem-solving across diverse settings

SOWK 305 Life Span Development, Human Behavior, Trauma, & Theory (3 Credit Hours)

Pre-requisites: Undergraduate Social Work majors, Social Work minors, or Human Services majors; Junior standing; For Social Work majors only, SOWK 200, SOWK 370 (these courses may also be a corequisite); For SW minors only, SOWK 200 and SOWK 370 (courses may also be a corequisite)

This course will consider bio-psycho-social-spiritual theories across the life-course, with a focus on trauma and resilience and an understanding of the role of neuroscience in development.

Course equivalencies: SOWK 305/SOWK 500

Outcomes:

1) Analyze biopsychosocial-spiritual development across the life span by examining how trauma, resilience, culture, and social environments influence individuals and families at different developmental stages; 2) Apply human development and social work theories to real-life contexts in order to interpret individual and family experiences across the life course, with attention to diversity, oppression, and resilience; 3) Evaluate how social work knowledge of life span development informs ethical, culturally responsive practice and contributes to effective engagement, assessment, and intervention across systems

SOWK 307 Social Work Policy and Community Intervention (3 Credit Hours)

Pre-requisites: Undergraduate Social Work majors, Social Work minors, or Human Services majors; Junior standing

Co-requisites: SOWK 200 and SOWK 370

Drawing from social work theory, research, and practice, Social Work Policy and Community Interventions examines the roles of social workers in policy practice as well as change agents within community and organizational contexts.

Outcomes:

1) Analyze how social, racial, economic, and environmental injustices are embedded in existing policies and evaluate their impacts on individuals, families, and communities; 2) Design and advocate for equitable, evidence-informed policies that promote social change and address systemic inequities at local, national, and global levels; 3) Apply policy analysis frameworks and research evidence to assess the effectiveness of policy interventions and design strategies for implementation that improve service delivery and community well-being

SOWK 308 Integrated Micro, Mezzo, and Macro Practice (3 Credit Hours)
Pre-requisites: Undergraduate Social Work students; BSW major; Senior Standing; "C" or higher in the following courses: SOWK 200, 370, 305, (201 or 307), and 350
This course focuses on integrated practice approaches that span three frameworks, including micro (e.g. individuals, families, and groups), mezzo (e.g. communities), and macro (e.g. systems, society) levels. It will examine various theories and models, the quality and utility of empirical research, as well as the impact of interprofessional and interdisciplinary collaboration efforts.
Outcomes:
1) Critically analyze social work research studies for ethical rigor, cultural responsiveness, anti-racist practice, and methodological quality using established research standards, Aligned with Competency 3: Engage in Anti-Racism, Diversity, Equity, and Inclusion in Practice, Aligned Assignments: Research Ethics Tutorial (CITI Training Certification), Article Critique, Midterm Exam; 2) Apply practice-informed research principles to formulate research questions, select appropriate qualitative, quantitative, or mixed-methods designs, and justify methodological choices relevant to social work practice, Aligned with Competency 4: Engage in Practice-Informed Research and Research-Informed Practice, Aligned Assignments: Midterm Exam, Article Critique, Evaluation Research Proposal\\n; 3) Design and evaluate a research or program evaluation proposal that includes ethical considerations, sampling strategies, data collection plans, and analysis approaches to assess practice and program effectiveness, Aligned with Competency 9: Evaluate Practice with Individuals, Families, Groups, Organizations, and Communities, Aligned Assignments: Evaluation Research Proposal, Article Critique, Research Ethics Tutorial (CITI Training Certification)

SOWK 330 Internship I and Simulated Experience (4 Credit Hours)
Pre-requisites: Undergraduate Social Work majors; Senior standing; A grade of "C" or higher in the following courses: SOWK 200, SOWK 370, SOWK 305, (SOWK 201 or SOWK 307), and SOWK 350
The goal of the field education program is to provide an integrative experience that brings classroom theory to the field of practice. The field education program will challenge the student to integrate professional values and personal perspectives.
Interdisciplinary Option: Human Services
This course satisfies the Engaged Learning requirement.
Outcomes:
Demonstrate ethical and professional behavior in field practice by applying the NASW Code of Ethics, engaging in reflective supervision, and maintaining professional responsibility in internship settings; Engage and assess individuals, families, groups, organizations, and communities using culturally responsive, anti-racist, and person-in-environment frameworks to inform social work practice and policy-relevant decision-making; Implement, evaluate, and advocate for evidence-informed and policy-relevant interventions in collaboration with clients and constituencies to achieve practice goals and improve outcomes

SOWK 340 Internship II and Simulated Experience (4 Credit Hours)
Pre-requisites: Undergraduate Social Work majors; Senior standing; A grade of "C" or higher in the following courses: SOWK 200, (SOWK 201 or 307), SOWK 370, SOWK 305, and SOWK 350
Co-requisites: SOWK 330
The goal of the field education program is to provide an integrative experience that brings classroom theory to the field of practice. The field education program will challenge the student to integrate professional values and personal perspectives.
This course satisfies the Engaged Learning requirement.
Outcomes:
Demonstrate ethical and professional behavior in field practice by applying the NASW Code of Ethics, engaging in reflective supervision, and maintaining professional responsibility in internship settings; Engage and assess individuals, families, groups, organizations, and communities using culturally responsive, anti-racist, and person-in-environment frameworks to inform social work practice and policy-relevant decision-making; Implement, evaluate, and advocate for evidence-informed and policy-relevant interventions in collaboration with clients and constituencies to achieve practice goals and improve outcomes

SOWK 350 Preparation for Practice (3 Credit Hours)
Pre-requisites: Undergraduate Social Work majors; Junior standing
Co-requisites: SOWK 200 and SOWK 370; If SOWK 200 or SOWK 370 have been taken previously, a grade of C or higher is needed
Students will strengthen professional identification and to facilitate the transfer from social work education to professional practice or graduate studies.
Outcomes:
1) Demonstrate ethical and professional behavior by applying social work values, self-awareness, and reflective practice to the development of a professional social work identity and readiness for field placement; 2) Apply an understanding of diversity, difference, and systems of oppression to analyze social work practice areas and ethical dilemmas across micro, mezzo, and macro contexts; 3) Examine the role of policy, organizations, and professional systems in shaping social work practice and prepare for effective engagement in field and inter-professional settings

SOWK 360 Independent Study (1-3 Credit Hours)
Pre-requisites: Junior standing
A course designed for individuals or small groups to focus on selected issues and problems in social work practice beyond course offerings.

SOWK 361 Special Topics (3 Credit Hours)
Pre-requisites: Sophomore standing
A survey course on a particular topic, such as aging, alcoholism and drug dependency, family process, group process, African-American men, gender, race, and culture. Students will understand how these issues affect social work practice.

SOWK 370 Power, Oppression, Privilege, and Social Justice (3 Credit Hours)
Pre-requisites: Sophomore standing
This course is designed to assist social work students with understanding the concepts of power, privilege, oppression, and social justice in their work with historically marginalized and oppressed populations.
Outcomes:
Analyze how their personal identities, values, and biases influence professional behavior, and apply ethical principles and cultural humility to evaluate their practice within diverse and oppressive systems; Evaluate how systems of power, privilege, and oppression shape human rights and opportunities, and create strategies to advance social, economic, and environmental justice through advocacy and allyship at the micro, mezzo, and macro levels; Synthesize theoretical frameworks (critical race theory, intersectionality, anti-oppressive and strengths-based practice) to design and apply culturally responsive, collaborative interventions that promote empowerment and systemic change

SOWK 380 Assessment of Client Concerns in Context (3 Credit Hours)
Pre-requisites: Undergraduate Social Work majors; Senior standing; A grade of "C" or higher in the following courses: SOWK 200, (SOWK 201 or 307), SOWK 370, SOWK 305, and SOWK 350
Co-requisites: SOWK 301
Course will teach students to conduct a strengths-based and contextual assessment of client concerns. Students will learn to conduct a culturally informed bio-psycho-social-spiritual assessment in which they gather information about presenting concerns from the perspective of clients and collateral sources.
Course equivalencies: SOWK 380/SOWK 501
Outcomes:
1) Demonstrate and apply knowledge and skills for conducting a biopsychosocial-spiritual assessment; 2) Conceptualize culturally-informed diagnostic assessment; 3) Develop and apply DSM-5-TR diagnostic assessment to a simulated patient, producing a culturally-informed DSM-5-TR diagnosis

SOWK 390 Research and Evaluation in Social Work Practice (3 Credit Hours)
Pre-requisites: Undergraduate Social Work majors, Social Work minors, or Human Services majors; Senior standing; For Social Work majors only: A grade of "C" or higher in the following courses: SOWK 200, SOWK 370, (SOWK 201 or 307), and SOWK 305
This course introduces the methods of social work research, including problem formulation, research ethics, research designs, measurement, data collection, sampling, and data analysis through a social justice/anti-racist/global perspective.
Interdisciplinary Option: Human Services, Urban Studies
Course equivalencies: SOWK 390/SOWK 506
Outcomes:
1) Critically analyze social work research studies for ethical rigor, cultural responsiveness, anti-racist practice, and methodological quality using established research standards; 2) Apply practice-informed research principles to formulate research questions, select appropriate qualitative, quantitative, or mixed-methods designs, and justify methodological choices relevant to social work practice; 3) Design and evaluate a research or program evaluation proposal that includes ethical considerations, sampling strategies, data collection plans, and analysis approaches to assess practice and program effectiveness

SOWK 500 Life Span Development, Human Behavior, Trauma, & Theory (3 Credit Hours)
This course will consider bio-psycho-social-spiritual theories across the life-course, with a focus on trauma and resilience and an understanding of the role of neuroscience in development.
Course equivalencies: SOWK 305/SOWK 500
Outcomes:
1) Analyze how racism, oppression, cultural context, and structural inequities influence human development and adaptation across the life span using biopsychosocial spiritual and life course perspectives; 2) Apply theories of human development, trauma, resilience, and neuroscience to explain engagement with individuals and families within their social and environmental contexts; 3) Assess developmental strengths, stressors, risk and protective factors, and environmental influences affecting individuals and families at different life stages using relevant social work theories and empirical literature

SOWK 501 Assessment of Client Concerns in Context (3 Credit Hours)
Course will teach students to conduct a strengths-based and contextual assessment of client concerns. Students will learn to conduct a culturally informed bio-psycho-social-spiritual assessment in which they gather information about presenting concerns from the perspective of clients and collateral sources.
Course equivalencies: SOWK 380/SOWK 501
Outcomes:
1) Demonstrate and apply knowledge and skills for conducting a biopsychosocial-spiritual assessment; 2) Conceptualize culturally-informed diagnostic assessment; 3) Develop and apply DSM-5-TR diagnostic assessment to a simulated patient, producing a culturally-informed DSM-5-TR diagnosis

SOWK 502 Power, Oppression, Privilege, and Social Justice (3 Credit Hours)
This course is designed to assist social work students with understanding the concepts of power, privilege, oppression, and social justice in their work with historically marginalized and oppressed populations.
Course equivalencies: ASIA/SOWK/URB370/AFR369/SOWK50
Outcomes:
Analyze how personal identities, values, and biases influence professional behavior, and apply ethical principles and cultural humility to evaluate practice within diverse and oppressive systems; Evaluate how systems of power, privilege, and oppression shape human rights and opportunities, and create strategies to advance social, economic, and environmental justice through advocacy and allyship at the micro, mezzo, and macro levels; Synthesize theoretical frameworks (critical race theory, intersectionality, anti-oppressive and strengths-based practice) to design and apply culturally responsive, collaborative interventions that promote empowerment and systemic change

SOWK 503 Practice Skills with Individuals and Families (3 Credit Hours)
Pre-requisites: Corequisite is SOWK 501; Restricted to Graduate Social Work students
This introductory micro practice course begins by focusing on the development of core skills for social workers in their encounters with individuals and families.
Course equivalencies: SOWK 301/SOWK 503
Outcomes:
1) Analyze biopsychosocial-spiritual development across the life span by examining how trauma, resilience, culture, and social environments influence individuals and families at different developmental stages; 2) Apply human development and social work theories to real-life contexts in order to interpret individual and family experiences across the life course, with attention to diversity, oppression, and resilience; 3) Evaluate how social work knowledge of life span development informs ethical, culturally responsive practice and contributes to effective engagement, assessment, and intervention across systems

SOWK 504 Integrated Micro/Mezzo/Macro Theory and Practice (3 Credit Hours)
This course extends theoretical knowledge and practical skills in mezzo and macro social work practice that support anti-racist and anti-oppressive, community engaged practices. While integrating theories of sociology, political science, anthropology, public health, and urban studies, as well as practice knowledge, the class examines relationships between social, economic, political, and cultural structures, collective action, and individual attitudes and behaviors.
Outcomes:
1) Understand integrated practice models that apply across micro, mezzo, and macro domains, 2) appraise the quality and utility of empirical research related to the key theories, topics, and problems examined

SOWK 505 Group Work Practice in Social Work: Micro/Mezzo/Macro (3 Credit Hours)
This course presents theoretical and practical approaches to social work with groups, with a focus on group development, dynamics, and processes.
Course equivalencies: SOWK 303/SOWK 505
Outcomes:
1) Demonstrate and apply ethical and professional behavior by integrating social work values, self-awareness, and group facilitation skills that promote inclusivity, collaboration, and mutual support among diverse group members; 2) Analyze and synthesize group dynamics, theories, and evidence-based practices to assess group needs, develop goals, and implement interventions that foster empowerment and social justice; 3) Engage and collaborate with individuals and groups to plan, lead, and evaluate group processes that enhance collective well-being, inclusion, and effective problem-solving across diverse settings

SOWK 506 Research and Evaluation in Social Work Practice (3 Credit Hours)
This course introduces the methods of social work research, including problem formulation, research ethics, research designs, measurement, data collection, sampling, and data analysis through a social justice/anti-racist/global perspective.
Course equivalencies: SOWK 390/SOWK 506
Outcomes:
1) Critically analyze social work research studies for ethical rigor, cultural responsiveness, anti-racist practice, and methodological quality using established research standards; 2) Apply practice-informed research principles to formulate research questions, select appropriate qualitative, quantitative, or mixed-methods designs, and justify methodological choices relevant to social work practice; 3) Design and evaluate a research or program evaluation proposal that includes ethical considerations, sampling strategies, data collection plans, and analysis approaches to assess practice and program effectiveness

SOWK 508 Integrated Micro, Mezzo, and Macro Practice (3 Credit Hours)
Pre-requisites: Restricted to Graduate Social Work Students
This course focuses on integrated practice approaches that span three frameworks, including micro (e.g. individuals, families, and groups), mezzo (e.g. communities), and macro (e.g. systems, society) levels. It will examine various theories and models, the quality and utility of empirical research, as well as the impact of interprofessional and interdisciplinary collaboration efforts.
Outcomes:
1) Apply ethical, professional, and anti-oppressive social work values to engage individuals, families, groups, organizations, and communities using integrated micro, mezzo, and macro practice frameworks that advance human rights and social justice; 2) Assess social problems, client systems, and policy contexts using person-in-environment, systems, and policy-aware frameworks to identify strengths, risks, and structural influences across micro, mezzo, and macro levels of practice; 3) Design and implement integrated intervention strategies that address social problems through coordinated micro, mezzo, and macro actions to promote equitable, sustainable change

SOWK 509 Social Work Policy and Community Intervention (3 Credit Hours)
Drawing from social work theory, research, and practice, Social Work Policy and Community Interventions examines the roles of social workers in policy practice as well as change agents within community and organizational contexts.
Outcomes:
1) Analyze how social, racial, economic, and environmental injustices are embedded in existing policies and evaluate their impacts on individuals, families, and communities; 2) Design and advocate for equitable, evidence-informed policies that promote social change and address systemic inequities at local, national, and global levels; 3) Apply policy analysis frameworks and research evidence to assess the effectiveness of policy interventions and design strategies for implementation that improve service delivery and community well-being

SOWK 600 Dissertation Supervision (1 Credit Hour)
Students register for this course once they have finished their core curriculum, passed their comps, and have an approved dissertation proposal.\\n
Outcomes:
Design and defend a dissertation proposal and prepare and submit an application for Institutional Review Board (IRB) approval; Implement original research by executing the approved study and defending the final dissertation according to program standards

SOWK 602 Health and Behavioral Health Policy and Systems (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course provides students with frameworks for understanding the interrelationship between developments in health and behavioral health policy, delivery systems, and social work practice on micro, mezzo, and macro levels. Practice issues associated with organizational structure, patient-centered care, team and interdisciplinary relations, as well as collaboration and conflict, are considered.
Outcomes:
Analyze and evaluate the structure and financing of US health and behavioral health systems to identify disparities and propose strategies that promote equitable access to care; Critically assess and apply theories and models of health policy to develop evidence-informed recommendations that address systemic inequities in health and behavioral health service delivery; Design and advocate for policy and organizational changes that advance social, racial, and economic justice within health and behavioral health systems through interdisciplinary collaboration and stakeholder engagement

SOWK 603 Seminar in Brief Treatment (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This seminar builds on the student's knowledge of short-term treatment, expanding this knowledge and skill toward understanding, and the practice of brief treatment as a modality of social work intervention. It examines the essential components of brief treatment (task-centered, crisis intervention, brief psychotherapy) with individual clients.
Outcomes:
Demonstrate ethical and culturally responsive professional behavior by applying social work values, self-reflection, and critical thinking to diverse brief treatment settings and client populations; Integrate and apply evidence-informed theories and research to assess client needs and formulate treatment goals within brief therapeutic frameworks such as psychodynamic, cognitive-behavioral, and solution-focused models; Design, implement, and evaluate time-limited interventions that promote client empowerment, well-being, and measurable progress within ethical and evidence-based social work practice

SOWK 604 Advanced Clinical Social Work Practice with Groups (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
The course focuses on multiple theoretical approaches in group work practice with diverse and at-risk populations with an emphasis on social and economic justice
Although the focus is on treatment groups, content will include the structure, function and techniques of intervention with all types of groups, emphasizing the conscious use of self. The method of instruction is interactive, collaborative, and experientially based.
Outcomes:
Demonstrate and apply ethical, reflective, and culturally responsive professional behavior by integrating social work values, group work standards, and anti-oppressive frameworks in diverse group settings; Analyze and synthesize theories, research, and policies that inform group work practice, and design interventions that promote human rights, social, racial, economic, and environmental justice within therapeutic and community groups; Engage, assess, intervene, and evaluate group processes by applying evidence-informed models, facilitating collaboration, and evaluating outcomes to strengthen group cohesion and empower members

SOWK 605 Human Sexuality and Sexual Dysfunction (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, SOWK 506, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course provides basic knowledge about the physiology and psychology of human sexuality as well as consideration of some areas of sexual dysfunction. Attention is also focused on cultural, societal, and personal attitudes which may affect the student's response to this area of practice.
Outcomes:
Analyze how their own identities, values, and biases influence perceptions of human sexuality and evaluate how ethical principles and cultural humility can be applied to promote sex-positive, inclusive, and affirming practice across client systems; Evaluate how intersecting systems of power, privilege, and oppression shape sexual health outcomes and create strategies to advance human rights and sexual justice through advocacy, policy development, and macro-level interventions; Synthesize research, theory, and clinical frameworks to design and implement evidence-informed interventions that address sexuality-related issues across the lifespan and promote empowerment, advocacy, and systemic change

SOWK 606 Practicum in Research & Evaluation (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 506, SOWK 509, and SWII 530S; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course is designed to introduce MSW students to a range of philosophies, methods, and techniques that are useful for evaluating human service programs and practice interventions. The course is intended to help you become more aware of the range of evaluation activities conducted in health care and human service agencies and to prepare you to conduct your own small and mid-range evaluations of programs and practice.

SOWK 609A School Social Work Policy and Practice I (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students, Advanced Standing Online Students, or 5 Year Social Work Students
This course is the first of a two-semester course sequence for school social work candidates, which aims to integrate an analytic understanding of the role of school social workers, and appreciation of school social workers' current and historical contributions to K-12 education.
Outcomes:
Demonstrate and apply ethical, anti-racist, and equity-informed professional behavior by analyzing the roles and responsibilities of school social workers within P-12 systems and adhering to NASW standards and school-based policies; Critically analyze and synthesize school and education policies to evaluate their impact on student well-being, access, and equity, and propose strategies that promote human rights and social, racial, and economic justice; Design and evaluate evidence-informed, systemic interventions that address barriers to learning and promote inclusive, trauma-informed, and data-driven practices in school settings

SOWK 609B School Social Work Policy and Practice II (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students, Advanced Standing Online Students, or 5 Year Social Work Students
This course is the second of a two-semester course sequence for school social work candidates, which aims to integrate an analytic understanding of the role of school social workers, and appreciation of school social workers' current and historical contributions to K-12 education.
Outcomes:
Demonstrate and apply ethical, reflective, and culturally responsive professional behavior in school settings by integrating anti-racist, anti-oppressive, and evidence-informed principles in their assessment and intervention practices; Analyze and synthesize data from multiple sources to assess student strengths and needs, design functional behavioral analyses, and develop evidence-informed intervention plans that promote equity and positive student outcomes; Evaluate and advocate for policies and crisis intervention strategies that advance human rights, social and racial justice, and systemic well-being within educational environments

SOWK 611 Social Work Practice with Couples (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course explores clinical models and techniques for the treatment of couples with relationship problems
Primary attention is given to the integration of systemic and analytical theories. Specific strategies and techniques are presented and demonstrated. Attention is given to the range of symptomatology and challenges including sexual dysfunction.
Outcomes:
Demonstrate and apply anti-racist, diversity-informed, and equity-based perspectives in analyzing relational dynamics, power imbalances, and cultural influences in couple therapy; Integrate and synthesize evidence-informed theories, research findings, and systemic frameworks to assess couple functioning and develop treatment plans responsive to diverse relational contexts; Design, implement, and evaluate therapeutic interventions using multiple couple therapy models to promote emotional connection, relational resilience, and positive outcomes for diverse and non-traditional couples

SOWK 612 Family Assessment and Intervention (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
The course examines different theoretical approaches to assessment and intervention with families
The focus will be on interpersonal interaction patterns and on systems rather than on individual feelings and behaviors, although those aspects of working with family members are not excluded. Different models of family therapy will be described, applied to case problems, compared with other models and/or theories, and evaluated for their effectiveness.
Outcomes:
Demonstrate and apply ethical and culturally responsive professional behavior by integrating anti-racist, anti-oppressive, and equity-based principles into family assessment and intervention practices; Analyze and evaluate family dynamics, structures, and systems through evidence-informed frameworks to develop assessment plans and advocate for policies that promote human rights, justice, and equitable access to family support resources; Design, implement, and evaluate family-centered interventions that promote communication, resilience, and systemic change within diverse, nontraditional, and intergenerational family systems

SOWK 613 Advanced Family Treatment (3 Credit Hours)
This course deepens students clinical practice competence in family therapy. Through discussion and experiential exercises, use of case vignettes and films, it will refine understanding of the therapeutic process and the development of treatment skills. Students will advance their understanding of the relationship between treatment goals and treatment techniques.

SOWK 614 Clinical Social Work Practice in Health Care (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course will view the practice of social work in health care as the integration of physical and mental health. We will explore in depth the biopsychosocial concomitants of physical and mental disorders. The integration of both health and mental health has implications for assessment and intervention and relies upon a person-centered/relation-centered framework.
Outcomes:
Demonstrate and apply ethical, professional, and collaborative behavior by integrating social work values, standards, and interprofessional communication skills in healthcare settings to support holistic client care; Analyze and evaluate health disparities and systemic inequities by applying evidence-informed research and policy frameworks that advance human rights, social, racial, and economic justice in healthcare practice; Design, implement, and assess biopsychosocial-spiritual interventions that address the complex needs of individuals and families across diverse healthcare contexts through culturally responsive and client-centered practice

SOWK 615 Social Work Practice with Adolescents (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
Social workers encounter adolescents in a variety of settings, including schools, mental health, child welfare, medical, juvenile justice, and substance abuse treatment. This course seeks to prepare students for direct intervention with adolescents and their families in these settings and within young people's own social contexts.
Outcomes:
Integrate and apply research-informed theories and evidence-based frameworks to understand adolescent developmental processes (neurobiological, cognitive, emotional, and social) in order to differentiate normative behavior from indicators of psychological distress or maladjustment; Evaluate how environmental, cultural, and systemic factors influence adolescent identity formation, risk-taking, and resilience within diverse social contexts; Design and implement developmentally appropriate, strengths-based intervention strategies to support adolescents and their families across multiple practice settings, including schools, mental health, and other child-serving systems

SOWK 616 Psychotherapy with Adults (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students, Advanced Standing Online Students, or 5 Year Social Work Students
This practice course focuses on the content and processes of psychotherapy and the strategic use of therapeutic communications with adults. The focus will include psychotherapy informed by psychodynamic and developmental frameworks.
Outcomes:
Demonstrate and apply ethical, reflective, and culturally responsive professional behavior by integrating social work values and anti-oppressive principles into psychotherapy with diverse adult populations; Analyze and evaluate the impact of systemic inequities, intersectionality, and human rights concerns on adult mental health to develop psychotherapeutic approaches that promote social, racial, and economic justice; Design, implement, and assess evidence-informed psychotherapeutic interventions that enhance client well-being and strengthen therapeutic relationships through engagement, assessment, intervention, and evaluation processes

SOWK 618 The Role of Religion and Spirituality in Psychotherapy (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course examines the predominant practice theories regarding religion and spirituality for the "person-in-the-situation". Included in the course material are relevant neurological, psychological, philosophical, theological, and sociocultural understandings of the interface between social work practice and religion and spirituality.
Outcomes:
Demonstrate and apply ethical and professional behavior by integrating social work values, critical self-reflection, and cultural humility in the assessment and understanding of how clients' religious practices and spiritual beliefs interface with mental health disorders; Analyze and evaluate the impact of systemic oppression, social inequities, and human rights issues on mental health to develop culturally responsive and justice-oriented approaches to clinical practice and psychopathology; Apply and integrate evidence-informed theories and diagnostic frameworks to assess, formulate, and intervene effectively with individuals and families experiencing mental health challenges within diverse social, religious, and spiritual contexts

SOWK 619 Issues in Treatment of Women (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
The focus of the course is the identification and application of clinical social work assessment and intervention relevant to practice with women. The circumstances of women are directly relevant to the studies of children and families, as well as health and mental health since they generally are the primary caregivers for others in our society.
Outcomes:
Analyze and apply feminist, intersectional, and research-informed frameworks to evaluate gendered experiences and inform evidence-based clinical and advocacy practices with cisgender women; Demonstrate and integrate engagement strategies that build collaborative, culturally responsive, and trauma-informed relationships with women and their families in diverse practice settings; Design, implement, and evaluate feminist-informed interventions that promote empowerment, resilience, and systemic change to improve well-being and advance social justice for women

SOWK 620 Clinical Social Work Practice with Children (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students, Advanced Standing Online Students, or 5 Year Social Work Students
This course focuses on learning about clinical social work with children through helping students deeply understand a clinical relationship that children find meaningful in advancing their self-determination. In keeping with the present and future of clinical social work, this course includes a multicultural and global focus.
Outcomes:
Demonstrate and apply anti-racist, diversity-informed, and equity-centered perspectives to analyze how cultural, developmental, and systemic factors influence social work practice with children and their families; Integrate and implement evidence-informed theories, developmental frameworks, and assessment tools to engage, assess, and intervene effectively with children and their families across diverse contexts; Evaluate and reflect on practice outcomes by measuring intervention effectiveness and adapting strategies to enhance trauma-informed, ethical, and strengths-based practice with children and families

SOWK 621 Clinical Practice in Addiction (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students, Advanced Standing Online Students, or 5 Year Social Work Students
This advanced-level course is associated with counseling clients affected by Substance Use Disorders (SUD). The core Functions and skills examined include: screening, intake, orientation, assessment, treatment planning, counseling (individual, family and group), case management, crisis intervention, client education, referral, reports and recordkeeping, consultation with other professionals and intervention.
Outcomes:
Demonstrate and apply ethical decision-making frameworks and professional standards to analyze complex situations involving clients with substance use disorders, ensuring integrity and accountability in practice; Integrate and evaluate research-informed theories, diagnostic criteria, and assessment tools to develop individualized, evidence-based treatment plans that promote client recovery and resilience; Design, implement, and assess intervention strategies that enhance client engagement, family support, and community collaboration to promote sustainable recovery and systemic change

SOWK 622 Substance Abuse Treatment in Groups (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course will focus on the many applications of group work to serve substance use disorder (SUD) affected clients. Through a combination of assigned readings, attendance at group meetings, and hands-on participation in small groups within the class, students will gain a working knowledge of how groups function to assist those recovering from SUDs.
Outcomes:
Demonstrate and apply ethical, culturally responsive, and evidence-informed professional behavior by integrating social work values and anti-oppressive principles into group treatment with individuals experiencing substance use disorders; Analyze and synthesize theoretical models and research evidence to design and facilitate effective, trauma-informed, and strengths-based group interventions that promote recovery and resilience among diverse populations; Implement and evaluate group-based interventions by applying motivational interviewing, mutual aid, and empowerment-focused strategies to enhance client engagement, well-being, and sustained behavioral change

SOWK 626 Social Work with Severely Mentally Ill (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course offers students the chance to learn about leading-edge social work approaches providing humane care for severely mentally ill clients, especially those clients with concomitant substance abuse, developmental disabilities, and severe socioeconomic disadvantage. Working with the client's environment, collaboration with other systems, advocacy and program development are considered.
Outcomes:
Demonstrate ethical, culturally responsive, and anti-oppressive social work practice with individuals, families, groups, organizations, and communities affected by severe mental illness and upholding human rights, equity, and social justice; Analyze and integrate research-informed and practice-informed evidence to assess, intervene, and evaluate services for individuals and families experiencing severe mental illness, applying critical thinking and reflective judgment to improve outcomes; Design advocacy strategies, policy initiatives, and community-based interventions that address systemic barriers and promote inclusion, empowerment, and recovery among people with severe mental illness

SOWK 631 Clinical Social Work Practice with Family Violence (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course will focus primarily on interpersonal and family violence between partners and the impact of violence on the family. It will examine the various epistemological conceptualizations of violence, and the treatment of violence as it is experienced by and from various family members within an ecological framework with consideration of micro, mezzo, and macro areas of practice.
Outcomes:
Analyze family violence using ethical reasoning and an intersectional, justice-oriented lens to demonstrate professional behavior, uphold human rights, and integrate anti-racism, diversity, equity, and inclusion in clinical decision-making; Apply research-informed theories, policies, and evidence-based frameworks to engage, assess, and intervene with individuals, families, groups, organizations, and communities affected by violence across the lifespan; Evaluate clinical, policy, and programmatic responses to family violence and construct informed recommendations while maintaining reflective awareness of professional values, biases, and well-being, Aligned with: Competencies 1-8 (integrated and holistic alignment)

SOWK 632 Clinical Social Work with Older Adults (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students, Advanced Standing Online Students, or 5 Year Social Work Students
This course includes a review of the basic concepts of gerontology/ geriatric practice, mental health issues, and interventions. The content of the course is intended to challenge students to move beyond basic levels of knowledge. It is intended to help students adapt social work theory (person-in-environment), practice principles, standards, and values to practice with older adults.
Outcomes:
Demonstrate knowledge of theories and practice concepts regarding the unique and diverse needs and capacities of older adults and their families, including mental health, substance abuse, and neurological challenges; Identify diversity, social justice, and human rights challenges for older adults with attention to the unique challenges of aging for groups that have been marginalized and discriminated against during their lifetimes; Utilize the elements of a biopsychosocial assessment and apply relevant laws, policies, and knowledge of resources to social work practice with older adults

SOWK 634 Special Topics (1-3 Credit Hours)
Topics for these courses are diverse. The purpose of having these courses is to expand the curriculum content and expose students to new and innovative subject matter. The topic of the course will be included in the class notes.

SOWK 637 Neurodevelopment and Trauma (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course is an advanced concentration year practice elective focused on assessing the neurodevelopmental impact of trauma and selecting interventions consistent with this assessment. Students will learn to identify major regions of the brain, appreciate the sequential nature of brain development, and determine which areas of the brain have likely been affected by developmental trauma. Consistent with a neurosequential understanding of development, students will be taught to recognize which interventions involve specific brain regions in order to assist them in choosing those most likely to promote growth in areas of the brain impacted by trauma. This assessment and intervention process occurs within the frameworks of systems and attachment theories, which recognize that the relational environments and communities in which clients live must be adequately safe and supportive for any intervention to be effective. This course is a hybrid course, incorporating recorded material supplied by The Child Trauma Academy. By the end of the course, students will have completed the majority of the requirements for Phase I Certification in the Neurosequential Model of Therapeutics. Because of this, the reading and out-of-class workload for this course is heavier than usual.
Outcomes:
Demonstrate and apply anti-racist, diversity-informed, and equity-centered perspectives to analyze how social, cultural, and systemic factors influence neurodevelopmental and trauma-related outcomes across the lifespan; Integrate and synthesize neuroscience-informed theories and trauma assessment tools to assess the developmental, relational, and environmental impacts of trauma on individuals and families; Design and evaluate evidence-informed, brain-based, and relationally focused interventions that promote resilience, recovery, and healing for individuals and communities affected by trauma

SOWK 645 Crisis Intervention (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students, Advanced Standing Online Students, or 5 Year Social Work Students
This course provides students with the theoretical bases and practical skills for working with clients in crisis. This course focuses on general crisis theories, assessment models, and treatment/ intervention strategies. Students will concentrate on the application of these theories, models, and strategies in various practice settings.
Outcomes:
Demonstrate and apply ethical and professional behavior by integrating the NASW Code of Ethics, professional values, and self-reflective practice when assessing individual crises through an intersectional, culturally responsive, and anti-oppressive lens; Analyze and evaluate how political, systemic, and cultural factors contribute to crises in order to inform holistic, equitable, and evidence-informed crisis interventions with individuals, groups, families, and communities; Identify and implement evidence-based, trauma-informed crisis interventions that promote stabilization and enhance the well-being of individuals, groups, families, and communities

SOWK 650 Leadership & Supervision in Service Organizations (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
Course content focuses on providing knowledge, values, ethics, and skills in guiding the work of others within social service organizations. Content areas include but are not limited to staff management, administrative supervision principles, models and styles, staff development, clinical supervision, teamwork, staff selection, legal and ethical issues, evaluation and termination, mediation, and conflict resolution.
Outcomes:
Demonstrate and apply ethical, inclusive, and socially just leadership behaviors by integrating professional values, anti-oppressive principles, and human rights frameworks into supervision and organizational practice; Analyze and synthesize research-informed theories and models of leadership, supervision, and organizational behavior to assess group and organizational dynamics and develop effective strategies for staff engagement, communication, and change management; Design, implement, and evaluate leadership and supervision practices that enhance team effectiveness, promote equity and professional growth, and improve outcomes across organizational systems

SOWK 652 Organizations, Program Development, and Evaluation (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course builds knowledge and skills in the areas of program development, sustainability, and evaluation. Program development is presented using an approach that also highlights the role of power, values, needs, and resources in decision-making processes. Grant-writing skills are developed alongside a critical analysis of social entrepreneurship and longstanding models of philanthropy. Knowledge and application of technology-based strategies to monitoring, evaluation and program improvement through data collection, data analysis, and data presentation are covered as well.
Outcomes:
Demonstrate and apply ethical and culturally responsive professional behavior by integrating anti-racist, inclusive, and justice-oriented principles into the design, implementation, and evaluation of social service programs; Analyze and synthesize research-informed theories, organizational models, and policy frameworks to develop logic models, evaluation plans, and funding strategies that strengthen organizational effectiveness and sustainability; Design, implement, and evaluate evidence-informed programs and fiscal strategies that enhance community impact, promote equity, and improve outcomes through ethical decision-making and continuous program improvement

SOWK 653 Community Organizing and Policy Practice (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course focuses on the practice of community and political organizing designed to bring about social, economic, and racial justice. It explores interdisciplinary theories relating to processes of social change, representation, and power.
Outcomes:
Demonstrate and apply anti-racist, diversity-informed, and justice-oriented approaches to analyze systemic inequities and advocate for policies and practices that promote human rights and social, racial, economic, and environmental justice; Integrate and synthesize community organizing, policy practice, and participatory frameworks to assess power structures, identify community needs and assets, and develop strategies for collective social action; Design, implement, and evaluate community-based and policy-driven interventions that empower marginalized groups, mobilize resources, and advance structural change through collaborative organizing and advocacy

SOWK 656 Social Work Practice with LGBTQ Populations (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
This course is designed to provide students with an in-depth and critical understanding of social work practice issues related to individuals who are lesbian, gay, bisexual, transgender, and queer (+) (LGBTQ+), which includes intersex, two-spirit, demisexual, asexual, pansexual, omnisexual, their families, and the communities in which they live.
Outcomes:
Analyze how personal values, biases, and social identities influence professional relationships with LGBTQ+ clients and apply ethical decision-making frameworks to evaluate culturally responsive and affirming interventions across micro, mezzo, and macro levels of practice; Evaluate how intersecting systems of power, oppression, and privilege shape the lived experiences of LGBTQ+ individuals and create strategies that advance human rights, social, economic, and environmental justice through policy practice, advocacy, and coalition-building; Synthesize theories, research, and clinical frameworks (eg, minority stress theory, intersectionality, and trauma-informed care) to design and implement affirming, evidence-informed interventions that promote resilience, empowerment, and systemic change in LGBTQ+ communities

SOWK 662 Professional Development (3 Credit Hours)
This course focuses on the student's development as a social work professional and as a potential leader within the field, and the opportunities and strategies for personal professional impact. It is designed for the student who wants to develop a vision for advancing within the profession.

SOWK 670 Bridging Psychodynamic Theory and Cognitive Behavioral Practice (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students or 5 Year Social Work Students
Psychodynamic theory and cognitive-behavioral theory are each associated with methods of intervention that have consistently been found to have therapeutic value for clients with a variety of psychosocial problems.
Outcomes:
Demonstrate and apply ethical, professional, and culturally responsive practice by integrating psychodynamic and cognitive-behavioral theories into clinical assessment and intervention with diverse client populations; Analyze and synthesize psychodynamic and cognitive-behavioral theoretical frameworks to assess client needs, formulate treatment goals, and select evidence-informed strategies that promote growth and resilience; Design, implement, and evaluate integrated treatment plans that enhance client well-being and advance effective therapeutic outcomes through the combined use of psychodynamic and cognitive-behavioral approaches

SOWK 680 Advanced Micro-Level Practice (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students, Advanced Standing Online Students, or 5 Year Social Work Students
Micro Practice extends foundation knowledge of generalist practice and requires critical understanding of diverse theories and their related evidence-informed practice models. Critical analysis examines these models from an anti-racist and strengths perspective in order to intervene effectively using a variety of systems perspectives in situations of increased complexity.
Outcomes:
Demonstrate ethical, professional, and culturally responsive behavior by integrating anti-oppressive frameworks, critical self-reflection, and respect for diversity to advance human rights and equitable clinical social work practice with individuals, families, and groups; Assess clinical cases using clinical theories and policy-aware frameworks, develop treatment plans grounded in research-informed practice, and effectively engage with individuals, families, and groups in clinical settings; Implement evidence-based clinical interventions that improve client functioning and evaluate intervention outcomes across diverse individuals and families

SOWK 681 Advanced Mezzo & Macro Practice (3 Credit Hours)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504, SOWK 505, SOWK 509, and SWII 530S; P in SWII 530; or Advanced Standing Students, Advanced Standing Online Students, or 5 Year Social Work Students
This course will focus on integrated practice approaches that span the micro (e.g., individuals/families/groups), mezzo (e.g., communities), and macro (e.g., systems, societal) frameworks. Numerous theories and models will be examined throughout the semester. The course also explores the role of the social work profession in creating social and organizational change, as well as interprofessional and interdisciplinary efforts.
Outcomes:
Demonstrate self-awareness and professional behavior in engaging with individuals, teams, community groups and organizations; Understand and demonstrate effective group and team facilitation and mediation process skills that facilitate engagement and collaboration

SOWK 682 Advanced Mezzo and Macro Practice (3 Credit Hours)
Pre-requisites: Restricted to Graduate Social Work students, Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, and SOWK 509; P in SWII 530; or Advanced Standing Students, Advanced Standing Online Students, or 5 Year Social Work Students
This course extends theoretical knowledge and practical skills in mezzo and macro social work practice that support anti-racist and anti-oppressive, community-engaged practices and considers the community as a place of practice and source of social change and discusses the role. Emphasis is given to philanthropy and its critiques, as well as grant-writing. In addition, the course will provide(s) practical experience such as creating work team contracts, articulating the elements of a typical grant proposal, and reviewing grant proposals.
Outcomes:
Demonstrate and apply ethical, professional, and justice-oriented practice by integrating diverse theoretical frameworks and engaging in advocacy to promote equity and inclusion across systems of care; Analyze and synthesize policy, research, and practice perspectives to assess problems across micro, mezzo, and macro contexts and develop interventions that address the complex needs of individuals, families, and communities; Design, implement, and evaluate integrated practice interventions that promote collaboration, empowerment, and sustainable change within and across systems

SOWK 689 Arts-Based and Experiential Approaches to Social Work (3 Credit Hours)
Pre-requisites: SOWK 501 and SOWK 503 (Grade of C or better), or Advanced Standing or 5-Year SOWK Students
Students learn about arts-based and experiential approaches in social work practice, the theories that drive and support their use, and the evidence that supports their use throughout all levels of social work practice, including the micro, mezzo, and macro levels.
Outcomes:
Demonstrate and apply anti-racist, diversity-informed, and inclusive practice by integrating arts-based and experiential approaches to promote social justice, equity, and empowerment among diverse client populations; Engage and collaborate with individuals, families, groups, organizations, and communities to incorporate creative, somatic, and expressive interventions that enhance engagement, communication, and healing across social work contexts; Design, implement, and evaluate arts-based and experiential treatment plans that promote resilience, growth, and transformation through innovative and culturally responsive interventions

SOWK 690 Independent Study (1-3 Credit Hours)
Independent studies generally consist of research, activities, and papers. Dependent on a student's needs, the course can be either 1, 2 or 3 credit hours and the requirements are adjusted accordingly. Students need to find a full-time faculty member willing to teach this course, obtain approval from the faculty member, as well as the Program Director to register for this course.

SOWK 714 Philanthropy, Public Policy, and Community Change (3 Credit Hours)
Pre-requisites: Graduate Social Work; Or Advanced Standing Students or 5-Year Social Work Students
This course examines the roles that philanthropy and foundations play in advancing, influencing, and preventing social and community change. It explores relationships between public policy and philanthropic giving. Patterns of giving, policy intervention strategies, structural issues, and programmatic opportunities and constraints will be illuminated.
Course equivalencies: PHPY402/SOWK714
Outcomes:
Engage with individuals, groups, organizations, and communities to critically examine philanthropy, public policy, and social change and reflect on their own positionality within systems of power and funding; Assess the roles, impacts, and accountability of philanthropic foundations and public policies by applying research, theory, and critical analysis to social welfare systems and community change efforts; Intervene and evaluate strategies for philanthropy-driven and policy-informed social change by analyzing evidence, engaging community perspectives, and assessing outcomes of alternative funding and advocacy approaches

SOWK 722 Introduction to Alcohol and Other Drug Disorders (3 Credit Hours)
This course will inform students about the prevalence of substance use disorders. These disorders are a part of the broad spectrum of social work practice. An assumption of the course is that SUD manifests in a variety of social work practice settings, therefore all social workers must have basic skills to identify, intervene with and refer to SUD-involved clients.
Outcomes:
Apply ethical, professional, and anti-oppressive social work principles to substance use practice by examining social justice, diversity, and human rights issues affecting individuals, families, and communities impacted by substance use disorders; Analyze substance use patterns, cultural contexts, and policy influences to assess the impact of alcohol and other drugs on individuals, families, and communities across micro, mezzo, and macro levels of practice; Evaluate substance use interventions, prevention strategies, and recovery-oriented approaches by integrating research-informed knowledge, experiential learning, and reflective practice to inform social work responses to substance use disorders

SOWK 730 Immigration Dynamics and U.S. Social Policy (3 Credit Hours)
This course also offers an exploration into some of the social policy and social welfare concerns associated with contemporary migration. This examination considers the social, political, environmental, and economic causes and consequences of migration; public policy regarding migration and the rights of immigrants; and the roles of governmental and nongovernmental local, national, and international organizations. Social justice themes related to migration are also explored.
Outcomes:
Analyze how US migration laws, policies, and historical practices produce and reproduce social, racial, economic, and environmental injustices, and apply that analysis to explain implications for immigrant well-being and service access; Apply anti-racist, diversity, equity, and inclusion principles to critically evaluate immigration-related programs, case materials, and classroom discussions, and to design culturally responsive teaching cases or interventions; Evaluate policy options and synthesize research, primary sources, and community perspectives to propose evidence-informed policy or practice recommendations and to assess their likely effects on individuals, families, and communities

SOWK 731 Social Work Practice with Refugees and Immigrants (3 Credit Hours)
This course focuses on identification and application of clinical social work assessment and intervention with major migrant groups. It considers immigrant and refugee individuals and families currently living in the U.S., helping students build a knowledge base for effective work, especially with those experiencing violence and trauma.
Outcomes:
Analyze and apply anti-racist, culturally responsive, and trauma-informed frameworks to advance human rights and social, racial, economic, and environmental justice in clinical practice with immigrants and refugees; Integrate research evidence, theoretical perspectives, and client narratives to develop and evaluate practice-informed interventions that promote resilience and empowerment among immigrant and refugee individuals, families, and communities; Design and implement collaborative, multi-level intervention strategies that strengthen engagement, assessment, and advocacy with immigrant and refugee populations while fostering sustainable change in organizational and community contexts

SOWK 732 Migration, Social Justice, and Human Rights (3 Credit Hours)
This course offers an exploration into some of the human rights and social justice concerns associated with global migration. It addresses distinct perspectives and practices of justice as they relate to concrete ethical and justice dilemmas posed by contemporary migration, immigration policies, and the social, political, and environmental factors that contribute to voluntary and forced migration.
Outcomes:
Evaluate and apply social work ethical principles and professional standards to complex human rights and migration scenarios, demonstrating integrity, critical reflection, and ethical decision-making in practice; Analyze and advocate for equitable social policies and practices that promote human rights, anti-racism, and social justice for migrants and refugees across micro, mezzo, and macro levels of practice; Design and propose policy-informed interventions that address human insecurities and systemic inequities affecting immigrant and refugee communities, integrating diverse social justice frameworks and evidence-informed approaches

SOWK 733 North American Migration Dynamics, Challenges & Opportunity (1-3 Credit Hours)
This course is offered in Mexico in collaboration with IberoAmericana an opportunity for Loyola students to come together with Mexican students to study migration related issues affecting our respective countries and shared continent. Specifically, the course will focus on central themes concerning the opportunities as well as challenges to fundamental social institutions and migration dynamics of policies for North America.

SOWK 734 Social Policy and Older Adults (3 Credit Hours)
This course will focus on services issues related to geriatric case management, home care and the continuum of community based services as well as the relationship between informal and formal support. In addition to exploring direct services and programs for older adults, there will be consideration of the needs and services for family caregivers.
Outcomes:
Students in this class will demonstrate the capacity to engage in critical thinking, apply knowledge of human behavior and the social environment, engage in policy practice to advance social and economic well-being and to deliver effective social work services; and respond to contexts that shape practice

SOWK 735 Loss, Grief, and Dying (3 Credit Hours)
Losses, followed by grief reactions are present in nearly every clinical situation that Social Workers encounter. This course will help students acquire skills in helping clients (and themselves) transition through grief in response to non-death and death experiences. The course builds on knowledge of direct practice, human behavior theory, life span development, and cultural diversity.
Outcomes:
Evaluate ethical and professional responsibilities in social work practice with loss, grief, and bereavement across diverse cultural and social contexts; Assess individual, family, and community responses to loss and grief using culturally responsive and theoretically informed social work frameworks; Apply and evaluate intervention strategies that support healing, meaning-making, and resilience in individuals and communities experiencing loss and bereavement

SOWK 754 Global Social Work: Reflective Practice for Justice and Peace (3 Credit Hours)
Pre-requisites: Restricted to Graduate Social Work students
This course provides an introduction to social work practice in an international context. The emphasis is on understanding cross-cultural peace-building practices using clinical skills and community action activities that build civil society structures and promote peaceful resolution of socially traumatized experiences. This course includes video conferencing.
Outcomes:
Demonstrate and apply anti-racist, diversity-informed, and human rights-based frameworks to analyze global issues of oppression, inequality, and justice across diverse cultural contexts; Integrate and synthesize policy, advocacy, and global practice models to develop strategies that influence international social welfare systems and promote equitable and sustainable community development; Design and evaluate culturally responsive and collaborative interventions that strengthen cross-national partnerships and promote social change, peace-building, and community resilience

SOWK 763 Women in a Global Context (3 Credit Hours)
Pre-requisites: Restricted to Graduate Social Work students
This course covers understanding women in a global context, social development institutions, and women's representation within them and in related media and social media. It builds the knowledge of relevance to students of social work, women's studies, international studies, migration, and communication.
Outcomes:
By the end of this course, students will be able to: 1) Critically analyze global social policies through a feminist lens to evaluate their impact on women's rights and social, racial, economic, and environmental justice (Aligned with Competency 2 - Advance Human Rights and Social, Racial, Economic, and Environmental Justice); 2) Assess and interpret diverse cultural, social, and political perspectives influencing women's lived experiences globally to enhance cross-cultural understanding and advocacy in social work practice (Aligned with Competency 5 - Engage Diversity and Difference in Practice)\\n; 3) Create evidence-informed media or policy advocacy products that promote equitable representation and justice for women in global and local contexts (Aligned with Competency 2 - Advance Human Rights and Social, Racial, Economic, and Environmental Justice and Competency 5 - Engage Diversity and Difference in Practice)

SOWK 780 Integrative Seminar I Advanced School Mental Health Program (1 Credit Hour)
Enrollment Conditions: Students must be enrolled in the Advanced School Mental Health Certificate program. This is the first semester of a two semester first level integrative seminar for students in the Advanced School Mental Health Certificate Program. Students will have the opportunity to apply material covered in certificate program classes and receive guidance and feedback during the course of the seminar.

SOWK 781 Integrative Seminar II Advanced School Mental Health Program (2 Credit Hours)
Enrollment Conditions: Students must be enrolled in the Advanced School Mental Health Certificate program. They must have completed SOWK 780 prior to taking this course. This is the second semester of a two semester first level integrative seminar for students in the Advanced School Mental Health Certificate Program.
Outcomes:
Students will have the opportunity to apply material covered in certificate program classes and receive guidance and feedback during the course of the seminar

SOWK 782 Integrative Seminar III Advanced School Mental Health Program (1 Credit Hour)
This is the first semester of a two semester second level integrative seminar for students in the Advanced School Mental Health Certificate Program. Students must be enrolled in the Advanced School Mental Health Certificate program.
Outcomes:
Students will have the opportunity to expand their application of material covered in certificate program classes and receive guidance and feedback during the course of the seminar

SOWK 783 Integrative Seminar IV Advanced School Mental Health Program (2 Credit Hours)
Students must be enrolled in the Advanced School Mental Health Certificate program. They must have completed SOWK 782. This is the second semester of a two semester second level integrative seminar for students in the Advanced School Mental Health Certificate Program.
Outcomes:
Students will have the opportunity to expand their application of material covered in certificate program classes and receive guidance and feedback during the course of the seminar

SOWK 784 Evidence Based Practice in Schools (3 Credit Hours)
Students must be enrolled in the Advanced School Mental Health Certificate program. This course focuses on increasing understanding and the utilization of evidence based practice techniques in the school setting.
Outcomes:
Students will have an increased ability to apply EBP interventions in educational settings

SOWK 785 Solution-Focused Brief Therapy Techniques (3 Credit Hours)
Students must be enrolled in the Advanced School Mental Health Certificate program. This course focuses on increasing understanding and the utilization of solution-focused brief therapy techniques in school settings.
Outcomes:
Students will have an increased ability to apply solution-focused brief therapy techniques in educational settings

SOWK 786 Special Topics in School Social Work (3 Credit Hours)
Students must be enrolled in the Advanced School Mental Health Certificate program. This course will focus on different critical issues related to social work interventions in school settings.
Outcomes:
Students will gain expertise in various interventions of importance to effective social work in school settings

SOWK 787 Special Topics in School Social Work - Immersion Weekend (1 Credit Hour)
This is a one credit course that compliments SOWK 786 and provides an immersion experience related to the special topic course for that year. Students must be enrolled in the Advanced School Mental Health Certificate program. They must have completed or be concurrently enrolled in SOWK 786.
Outcomes:
Students will gain additional expertise in various interventions of importance to effective social work in school settings

SOWK 788 SMHAPP Independent Study (2 Credit Hours)
Independent study for students admitted into the SMHAPP certificate program. Restricted to SMHAPP certificate program.

SOWK 800 Statistics (3 Credit Hours)
Pre-requisites: Restricted to Social Work PhD students; Students in other LUC Doctoral programs may register for the course with approval from the School of Social Work Doctoral Program Director
This course is the first in a two-semester sequence of statistics courses required of all social work doctoral students. The course covers basic statistical concepts of probability, sampling distributions, confidence intervals, and statistical inference. The focus for the course is the applied use of statistical methods for the analysis of social science data using SPSS and manual calculations. In addition to covering applied statistical concepts and their application to data, the course will also critically examine the question of causality.
Outcomes:
Understand basic statistical concepts of probability, sampling distributions, confidence intervals, and statistical inference, including z-tests, t-tests, ANOVA, and Chi-square; Examine critically the question of causality; Demonstrate critical thinking around how statistics and quantitative analysis can be used to both marginalize and empower racial, ethnic, and other identity and/or geographic community groups

SOWK 801 Historical & Contemporary Issues in Social Work Practice (3 Credit Hours)
Pre-requisites: Doctoral student standing at Loyola University Chicago; Students in other LUC Doctoral programs may register for the course with approval from the School of Social Work Doctoral Program Director
The course will provide a critical review and analysis of the historical development of social work practice and identify and explore contemporary issues that impact the current delivery of social work practice services. Students will read from the professional literature ranging from the early 1900s to the present; critically evaluate the development of social work practice theory, knowledge, and skills as the profession sought to define what constitutes social work practice; examine the broader social, cultural, political, economic, and other contextual forces that shaped (and were shaped by) the development of social work practice and the provision of services to individuals, families, groups, and communities.
Outcomes:
Evaluate the general historical development of social work practice in the 19th, 20th, and 21st centuries, and its impact upon the empowerment and oppression of historically marginalized communities; Evaluate how historically marginalized communities created systems of mutual aid to support each other outside of the profession of social work; Identify the domains of social work practice knowledge and the intellectual currents which have influenced its ongoing development

SOWK 802 Grand Theories & Perspectives in Social Work Knowledge (3 Credit Hours)
Pre-requisites: Restricted to Social Work PhD students; Students in other LUC Doctoral programs may register for the course with approval from the School of Social Work Doctoral Program Director
This course focuses on grand theories and perspectives which guide social work practice, research, and policy. Students in this course will critically examine the grand theories and perspectives which have influenced social work in the past, currently influence social work, and will likely shape the profession of social work in the future. Through examining and critiquing the grand theories and perspectives, students will be challenged to think about how these theories do and do not address social and economic justice while also acquiring more knowledge regarding how these theories and perspectives help students better understand their substantive areas.
Outcomes:
Examine various theoretical models and perspectives of practice in social work; Explore the advantages and limitations of social work paradigms; Understand the utility and difficulties associated with a multi-theoretical approach to social work practice and research

SOWK 803 Advanced Statistics (3 Credit Hours)
Pre-requisites: Restricted to students in the Social Work PhD program; Completion of SOWK 800 with a grade of B- or higher; Students in other LUC Doctoral programs may register for the course with approval from the School of Social Work Doctoral Program Director; Completion of a course comparable to SOWK 800 with a grade of B- or higher is required; Interested non-social work PhD students are to submit the comparable course syllabus to the social work Doctoral Program Director for review and approval
This is the second in a two-semester sequence of statistics courses required of all social work doctoral students. The course covers various multivariate statistical analysis techniques to test hypotheses that are most relevant to issues of social, economic, racial, and environmental justice.
Outcomes:
Understand correlation, two-way ANOVA, linear, multiple, and logistic regression; Apply these techniques, test assumptions, and interpret results using statistical software; Promote critical thinking around how statistics can be used to both marginalize and empower racial, ethnic, and other identity and/or geographic community groups, and around ethics in quantitative analysis

SOWK 804 Qualitative Research (3 Credit Hours)
Pre-requisites: Restricted to students in the Social Work PhD program with completion of SOWK 818 with a grade of B- or higher; For non-social work PhD students, completion of a course comparable to SOWK 818 with a grade of B- or higher and approval from the School of Social Work Doctoral Program Director; Interested non-social work PhD students are to submit the comparable course syllabus to the social work Doctoral Program Director for review and approval
This course provides an overview of the fundamentals of qualitative research. It provides a detailed consideration of knowledge and skills in qualitative inquiry. The science and paradigms for qualitative inquiry in social work are examined as well as principles for qualitative inquiry design including data collection, analysis, and writing.
Outcomes:
Articulate the connections between paradigm, research question, qualitative method, and methods for data analysis; Design and implement a qualitative research project that appropriately matches research questions; Describe the development and usefulness of different qualitative research methods, including ethnography and ethnomethodology, grounded theory, phenomenological approaches, historical research, and constructivist inquiry

SOWK 805 Research Practicum I (3 Credit Hours)
Pre-requisites: Doctoral student standing in the School of Social Work at Loyola University Chicago; Completion of SOWK 800, SOWK 803, SOWK 804, SOWK 818 with a grade of B- or higher
This is a two-semester course emphasizing research methodology, development, and acquisition of measurement tools if applicable, quantitative and qualitative analysis, ethical considerations, and dissemination of research. Students will carry out team-based projects using both methods across both semesters working together with the instructors of the courses. The first semester will emphasize methodology, data analysis, and developing findings, while the second semester will focus on study write-up, revisions, and preparing manuscripts for submission to peer-reviewed journals.
Outcomes:
Critique research articles or their designs that demonstrate various methodologies and identify their strengths and weaknesses, as well as their contributions to social work practice; Identify a research problem and select an appropriate design and analysis plan; Create at least 2 manuscripts for publication or other similar documents reporting on the findings of their project

SOWK 806 Research Practicum II (3 Credit Hours)
Pre-requisites: Doctoral student standing in the School of Social Work at Loyola University Chicago; Completion of SOWK 805 with a grade of B- or higher
This is a two-semester course emphasizing research methodology, development, and acquisition of measurement tools if applicable, quantitative and qualitative analysis, ethical considerations, and dissemination of research. Students will carry out team-based projects using both methods across both semesters working together with the instructors of the courses. The first semester will emphasize methodology, data analysis, and developing findings, while the second semester will focus on study write-up, revisions, and preparing manuscripts for submission to peer-reviewed journals.
Outcomes:
Critique research articles or their designs that demonstrate various methodologies; Identify strengths, weaknesses, and contributions of research articles to social work; Complete a research project that identifies a research problem and select an appropriate design and analysis plan

SOWK 808 Integration of Research, Practice, & Theory in Social Work Scholarship (3 Credit Hours)
Pre-requisites: Completion of SOWK 800, SOWK 803, SOWK 804, SOWK 818 with a grade of B- or higher and Social Work PhD Student; For non-social work PhD students, completion of comparable courses with a grade of B- or higher; Interested non-social work PhD students are to submit the comparable course syllabi to the social work Doctoral Program Director for review and approval
This course focuses on the examination of research, practice, and theory as well as the integration of these focal areas in doctoral students' substantive areas. Students will examine the research, theories, and practices that have been used in their substantive areas to gain further knowledge of the current state of their substantive areas and address key research questions.
Outcomes:
Examine research, theories, and practices in student's own substantive areas; Identify gaps in knowledge in student's own substantive areas of research; Explore ideas for future research and scholarship; Critically evaluate existing evidence in student's own areas of research

SOWK 817 The Nature of Social Work Knowledge (3 Credit Hours)
Pre-requisites: Doctoral student standing at Loyola University Chicago; Students in other LUC Doctoral programs may register for the course with approval from the School of Social Work Doctoral Program Director
This course aims to help students understand the variety of contemporary understandings of science in the social and behavioral sciences and foundational aspects of designing research to develop conceptual frameworks for social work practice. Emphasis will be on science as a problem-solving process, with scientific knowledge development being a major link for the social worker between the roles of practitioner and researcher.
Outcomes:
Evaluate key aspects in philosophy of research for the social and behavioral sciences; Evaluate and analyze the major paradigms of knowledge generation in social work; Formulate an approach to scientific knowledge, with a focus on emancipation, anti-oppression as values key to the mission of social work, considering how approaches to science support or undermine those goals

SOWK 818 Social Work Research Methodology: Overview of the Fundamentals (3 Credit Hours)
Pre-requisites: Doctoral student standing at Loyola University Chicago; Students in other LUC Doctoral programs may register for the course with approval from the School of Social Work Doctoral Program Director
This course presents an overview and critical analysis of the research methods commonly used in social work and other related disciplines. The course will involve reading about these research methods, critically analyzing a variety of research reports, and applying research methods to an area relevant to the advancement of knowledge about social work selected by each student.
Outcomes:
Understand the epistemological bases of various approaches to research on the research process and knowledge development in the social sciences; Understand the variety of traditions of research in and relevant to the social work profession, with an emphasis on research about practice, to identify and analyze the research and evaluation designs or strategies of inquiry; Understand problem formulation process, including engaging in the process of identifying and refining the description of a study issue, the statement of a research question, and the connection of it to a strategy of inquiry

SOWK 820 Social Theory & Social Change (3 Credit Hours)
Pre-requisites: Doctoral student standing at Loyola University Chicago; Students in other LUC Doctoral programs may register for the course with approval from the School of Social Work Doctoral Program Director
This course will explore the evolution and development of macro practice in the United States with a focus on theory and methods that undergird community practice and policy practice. Course content will include a conceptual history of macro practice within social work, including the unique role of macro practice methods in carrying out the mission of the social work profession. The role of different forms of power, at the institutional and social level, as well as values and ethical dilemmas associated with macro practice and their relation to social work, will also inform the course.
Outcomes:
Evaluate the use of macro practice, including community practice (ie, development, planning, organization) and policy practice in the United States; Critically analyze how macro practice evolved within the social work profession, including the degree to which macro practice methods and models have advanced social work's historic mission and values; Identify how macro practice methods are used to address forms of social, political, and economic inequality, promote social justice, and secure human rights

SOWK 822 Organizational Analysis (3 Credit Hours)
Pre-requisites: Doctoral student standing at Loyola University Chicago; Students in other LUC Doctoral programs may register for the course with approval from the School of Social Work Doctoral Program Director
This course explores the ways in which an organizational lens can be usefully applied in the context of social welfare-related research. The course will provide an overview of the ways in which scholars have approached the study of organizations and highlight theoretical traditions useful for understanding the work of human service organizations.
Outcomes:
Apply an organizational lens to analyze the roles and functions of human service organizations-such as social service agencies, schools, and advocacy organizations-in addressing social problems; Critically evaluate major theoretical traditions in organizational studies and assess their relevance to contemporary social welfare research contexts; Integrate organizational theory into original research designs, selecting appropriate theoretical frameworks and methodological approaches to explore questions related to social welfare and human service delivery

SOWK 827 Doctoral Study (1 Credit Hour)
Students register for this course during the semester they are taking their comprehensive exams and any semesters they do not yet have an approved proposal.
Outcomes:
Evaluate and demonstrate mastery of core disciplinary knowledge by successfully completing the comprehensive examination according to program criteria; Design a dissertation proposal plan and select a dissertation chair/adviser in collaboration with the doctoral program director

SOWK 828 Teaching Seminar and Practicum I (3 Credit Hours)
Pre-requisites: Doctoral student standing at Loyola University Chicago; Students in other LUC Doctoral programs may register for the course with approval from the School of Social Work Doctoral Program Director
This course is designed to provide doctoral students with a thorough overview of teaching within a university setting from social justice and anti-racist perspective and the practical experience of preparing and teaching a course. This course focuses on theories of learning, the application of these theories to the teaching process, and the teaching process itself. SOWK 829 is a continuation of this content.
Outcomes:
Identify, discuss and analyze various teaching activities in relation to theories of learning and antiracist pedagogy; Identify and know how to develop a course in an area of specific academic interest and professional expertise; Develop a personal pedagogical style and accompanying statement, supplemented by additional relevant technological expertise which will support a sense of competence in your own ability to teach

SOWK 829 Teaching Seminar & Practicum II (3 Credit Hours)
Pre-requisites: Doctoral student standing at Loyola University Chicago and completion of SOWK 828 with a grade of B- or higher; Students in other LUC Doctoral programs may register for the course with approval from the School of Social Work Doctoral Program Director
This course is designed to provide doctoral students with a thorough overview of teaching within a university setting from a social justice and anti-racist perspective with the practical experience of preparing and teaching course content. SOWK 829 also continues focus on integrating material from SOWK 828 and creating and managing an inclusive environment via a variety of learning platforms with diverse students.
Outcomes:
Identify one's own biases and triggers to include and conduct class discussions on issues of social justice and diversity as it relates to the various topics in all social work courses; Develop ability to manage conflict around issues of diversity, whether it be political, theoretical, or personal issues raised in class discussion; Assess and critique their own and their colleagues' teaching style, instructional methods, and general strengths and weaknesses as a social work instructor

Social Work Internship Instruction (SWII)

Discover, search, courses (p. 2661)!

SWII 530 Internship I & Simulated Experience (1 Credit Hour)
The goal of the internship education program is to provide an integrative experience that brings classroom theory to practice. The internship education program will challenge the student to integrate professional values and personal perspectives.
Outcomes:
Demonstrate ethical and professional behavior in field practice by applying the NASW Code of Ethics, engaging in reflective supervision, and maintaining professional responsibility in internship settings; Engage and assess individuals, families, groups, organizations, and communities using culturally responsive, anti-racist, and person-in-environment frameworks to inform social work practice and policy-relevant decision-making; Implement, evaluate, and advocate for evidence-informed and policy-relevant interventions in collaboration with clients and constituencies to achieve practice goals and improve outcomes

SWII 531 Internship II & Simulated Experience (1 Credit Hour)
The goal of the internship education program is to provide an integrative experience that brings classroom theory to practice. The internship education program will challenge the student to integrate professional values and personal perspectives.
Outcomes:
1) Demonstrate ethical and professional behavior in field practice by applying the NASW Code of Ethics, engaging in reflective supervision, and maintaining professional responsibility in internship settings; 2) Engage and assess individuals, families, groups, organizations, and communities using culturally responsive, anti-racist, and person-in-environment frameworks to inform social work practice and policy-relevant decision-making; 3) Implement, evaluate, and advocate for evidence-informed and policy-relevant interventions in collaboration with clients and constituencies to achieve practice goals and improve outcomes

SWII 630 Field Instruction III & Simulated Experience (1 Credit Hour)
The goal of the field education program is to provide an integrative experience that brings classroom theory to the field of practice. The field education program will challenge the student to integrate professional values and personal perspectives.
Outcomes:
1) Understand the professional purpose, values, and ethical implications of social work practice, 2) develop knowledge of the multiple frames of reference that reflect the organization and diversity of the profession

SWII 630S Integrative Seminar (2 Credit Hours)
This course is the second of two seminars that serve to enrich students' field experience. The focus of this course is upon experiences and progress of the student in the first semester of advanced field and the relationship of the field experience to specific advanced practice class content.
Outcomes:
1) Integrate classroom knowledge and skills into the field setting, 2) reflect on field learning experiences and growth of professional sense of self

SWII 631 Field Instruction IV & Simulated Experience (1 Credit Hour)
The goal of the field education program is to provide an integrative experience that brings classroom theory to the field of practice. The field education program will challenge the student to integrate professional values and personal perspectives.
Outcomes:
1) Understand the professional purpose, values, and ethical implications of social work practice, 2) develop knowledge of the multiple frames of reference that reflect the organization and diversity of the profession

SWII 632 Internship Instruction III & Simulated Experiences (1 Credit Hour)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, SOWK 509; P in SWII 530; or Advanced Standing Students, Advanced Standing Online Students, Students or 5 Year Social Work Students
The goal of the internship education program is to provide an integrative experience that brings classroom theory to practice. The internship education program will challenge the student to integrate professional values and personal perspectives.
Outcomes:
Demonstrate ethical and professional behavior in specialized field practice by applying the NASW Code of Ethics, engaging in reflective supervision, and maintaining accountability and professionalism in internship settings; Advance human rights and social, racial, economic, and environmental justice by applying anti-racist, culturally responsive, and inclusive frameworks within specialized internship settings; Engage, assess, intervene, and evaluate practice with individuals, families, groups, organizations, and communities by integrating theory, research, and practice-informed strategies within specialized field settings

SWII 633 Internship Instruction IV & Simulated Experiences (1 Credit Hour)
Pre-requisites: Grade of C or higher in SOWK 500, SOWK 501, SOWK 502, SOWK 503, SOWK 504 or SOWK 508, SOWK 505, SOWK 509; P in SWII 530; or Advanced Standing Students, Advanced Standing Online Students, Students or 5 Year Social Work Students
Co-requisites: SWII 632
The goal of the internship education program is to provide an integrative experience that brings classroom theory to practice. The internship education program will challenge the student to integrate professional values and personal perspectives.
Outcomes:
Demonstrate ethical and professional behavior in specialized field practice by applying the NASW Code of Ethics, engaging in reflective supervision, and maintaining accountability and professionalism in internship settings; Advance human rights and social, racial, economic, and environmental justice by applying anti-racist, culturally responsive, and inclusive frameworks within specialized internship settings; Engage, assess, intervene, and evaluate practice with individuals, families, groups, organizations, and communities by integrating theory, research, and practice-informed strategies within specialized field settings

Sociolegal Studies (SLGL)

Discover, search, courses (p. 2661)!

SLGL 200 Introduction to Sociolegal Studies (3 Credit Hours)
The course will introduce students to several complementary perspectives from the interdisciplinary "Law and Society" movement: the sociology of law; the psychology of justice; the anthropology of disputing; the economics of rulemaking; and the institutional politics of courts and legislatures.
Interdisciplinary Option: Sociolegal Studies
Outcomes:
Compare & critique different social science theories of law; understand the role of law in society and the intersection of law, politics, economics, and culture

SLGL 399 Independent Study (3 Credit Hours)
This course provides students with the opportunity to work under the direction of a faculty member on a particular area of interest that is not part of the Sociolegal Studies minor's usual curriculum. Program permission required. Students will gain an understanding of a specific area of sociolegal studies through the close reading of selected texts or through directed research.
Interdisciplinary Option: Sociolegal Studies

Sociology (SOCL)

Discover, search, courses (p. 2661)!

SOCL 101 Society in a Global Age (3 Credit Hours)
This foundational course in the social sciences introduces students to key sociological perspectives and methods to examine global issues. Students explore how institutions, culture, and systems of power and inequality shape people's lives across diverse communities and contexts.
Knowledge Area: Foundational Societal Knowledge
Interdisciplinary Option: African Studies and the African Diaspora
Outcomes:
Identify examples of the relationship between institutions and individuals; Explain the impact that culture has on group dynamics and social interactions within local, national, and global settings; Summarize how people's identities are formed through a complex interaction of biographical, societal, or cultural contexts; Describe the experiences of underrepresented, marginalized, or oppressed communities within various contexts, including inequality in outcomes and resistance to systems of oppression; Analyze how systems of power, privilege, and oppression (eg, racism, sexism, heterosexism, ableism) operate to create and maintain inequality as well as how resistance to these systems is enacted

SOCL 121 Social Problems (3 Credit Hours)
Pre-requisites: ANTH 100, PLSC 102, SOCL 101, WSGS 101, or equivalent; please check requirements for declared majors/minors for exceptions
This course is an opportunity to examine major issues facing society. In addition to analyzing the roots of social problems, the course addresses social policy concerns and explores solutions.
Knowledge Area: Tier 2 Societal Knowledge
Interdisciplinary Option: Human Services, Peace, Justice, and Conflict Studies
Course equivalencies: SOCL121/PAX 121
Outcomes:
Students will be able to critically examine the impact of a social problem and its possible solutions; to integrate knowledge gleaned from a variety of disciplines; to find and utilize relevant data and research in defining issues and solutions; and to view social problems from macro and micro perspectives as a means of applying workable solutions for the issues facing society

SOCL 122 Race and Ethnic Relations (3 Credit Hours)
Pre-requisites: ANTH 100, PLSC 102, SOCL 101, WSGS 101, or equivalent; please check requirements for declared majors/minors for exceptions
This course examines the development of cultural, society, and self-understanding by exploring the social construction of race in the United States. The course explores how social constructions of race affect interpersonal relations, laws, policies, and practices in various racial and ethnic communities.
Knowledge Area: Tier 2 Societal Knowledge
Interdisciplinary Option: African Studies and the African Diaspora, Asian Studies, Human Services, Italian American Studies, Peace, Justice, and Conflict Studies, Race and Ethnicity
Course equivalencies: X-SOCL122/ASIA122/BWS 122/PAX
Outcomes:
Students will be able to demonstrate understanding of the conditions which have worsened racial tensions as well as how social movements have been successful at eradicating racially oppressive laws and working towards a just society

SOCL 123 Mass Media and Popular Culture (3 Credit Hours)
This course examines the connections between the media of mass communication and multiple forms of popular art and culture. Topics considered include the social, political, and cultural organization of mass communication and its impact on values, expectations, and life styles of contemporary society.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies, Women & Gender Studies
Course equivalencies: SOCL123/WSGS123/IFMS123
Outcomes:
Students will be able to demonstrate understanding of the social relationships between mass media and the general population

SOCL 125 Chicago: Urban Metropolis (3 Credit Hours)
Pre-requisites: ANTH 100, PLSC 102, SOCL 101, WSGS 101, or equivalent; please check requirements for declared majors/minors for exceptions
This course explores the development of Chicago metropolitan region from the 1830's to the present day. Students will explore the urban area not only through texts, but also through fieldwork.
Knowledge Area: Tier 2 Societal Knowledge
Interdisciplinary Option: African Studies and the African Diaspora, Urban Studies
Course equivalencies: SOCL125/URB125
Outcomes:
Students will be able to demonstrate understanding of the geography, history, and people of the Chicago metropolitan region

SOCL 127 Social Analysis and Social Action (3 Credit Hours)
This course helps students who are volunteering at local congregations and agencies better understand the communities and issues they will encounter in Chicago. It emphasizes the analysis of "social solutions" to social problems as well as personal reflection and action.
Interdisciplinary Option: Peace, Justice, and Conflict Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: X-SOCL127/PAX127
Outcomes:
Analyzing and acting on social issues

SOCL 145 Religion & Society (3 Credit Hours)
Pre-requisites: ANTH 100, PLSC 102, SOCL 101, WSGS 101, or equivalent; please check requirements for declared majors/minors for exceptions
This course examines how religion and society interact.
Knowledge Area: Tier 2 Societal Knowledge
Interdisciplinary Option: Catholic Studies
Outcomes:
Students will be able to demonstrate understanding of how individual behavior, organizations, and society as a whole are affected by religious ideas and institutions, and how religion is itself changed by its encounter with changing social circumstances

SOCL 171 Sociology of Sex and Gender (3 Credit Hours)
Pre-requisites: ANTH 100, PLSC 102, SOCL 101, WSGS 101, or equivalent; please check requirements for declared majors/minors for exceptions
This course explores the social organization of sex and gender.
Knowledge Area: Tier 2 Societal Knowledge
Interdisciplinary Option: Human Services, Women & Gender Studies
Course equivalencies: X-SOCL271/WOST271/WSGS271
Outcomes:
Students will be able to situate their pre-conceived experiences of the naturalness of gender in a particular historical and cultural context

SOCL 205 Sociological Thought (3 Credit Hours)
This course examines classical and contemporary sociological theories and uses them as frameworks for understanding modern society. Such social theories attempt to explain and understand the world, as well as inspire further research and theory.
Interdisciplinary Option: German Studies
Outcomes:
The class provides students with theoretical foundations for understanding social organizations as well as the social processes that transform societies

SOCL 206 Principles of Social Research (3 Credit Hours)
This course is an introduction to the basic research methodologies of sociology. A variety of methods used in sociological analysis and data generation will be considered. Students learn how to select and use methodologies appropriate for various research projects. They will be able to critically evaluate existing research and select appropriate techniques to undertake original research.
Interdisciplinary Option: Human Services, Urban Studies
Outcomes:
Students will learn how social science research is conducted

SOCL 210 Gender and Work (3 Credit Hours)
This course looks at the nature of work through the lens of gender. It considers how male and female labor force participation has changed over time. It examines the ways working families are transformed when women combine employment with domestic responsibilities and child care, or when men's jobs no longer provide a family wage.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-SOCL210/WOST210/WSGS210
Outcomes:
Students learn how gender has been and remains a fundamental organizational principle in the workplace and the labor force

SOCL 215 Law & Society (3 Credit Hours)
This course trains students to examine the law as a sociological concept and to look at the relationship between the legal system and society. A critical concern is whether changes in the legal system reflect societal change or do changes in the legal system stimulate change in society.
Interdisciplinary Option: Global Studies, Sociolegal Studies
Outcomes:
Students learn to recognize the close linkage between the law and social structure; They also gain experience examining legal texts and decisions

SOCL 216 The Sociology of Violence (3 Credit Hours)
The threat of violence is a significant concern for individuals in many societies. In this course, violence will be studied as a social phenomenon. Topics of particular concern include: family violence, gang violence, and terrorism.
Interdisciplinary Option: Peace, Justice, and Conflict Studies, Urban Studies
Course equivalencies: X-SOCL216/PAX 291
Outcomes:
Students learn to examine the causes of violence from a sociological perspective; They also learn methods to reduce violence and the harm it causes

SOCL 221 Sociology and Culture of the Life Course (3 Credit Hours)
Life course studies emerged in response to the sociological need to understand how social change intersects with the aging process. Social and cultural contexts, individual experience and agency, and historical time and place are elements in the construction of a life and the social relationships that make it up.
Interdisciplinary Option: Bioethics, Human Services
Course equivalencies: X-ANTH221/SOCL221
Outcomes:
Students learn sociological concepts and theories relevant to the life course and how they help us understand local and global changes; Learn about programs and policies pertinent to an aging society

SOCL 222 Poverty & Welfare in America (3 Credit Hours)
In this course, students learn to think critically about the character, causes and responses to poverty in American society, using both historical and contemporary evidence.
Outcomes:
Students will understand the strengths and limitations of American welfare policy in relation to poverty

SOCL 225 Sociology of Health Care (3 Credit Hours)
This course examines the sociology of health care with particular attention to: social and psychological factors; health care professionals; inter-personal relations in health care; the organization and use of health services; and the relationship between aging and health.
Interdisciplinary Option: Bioethics, Race and Ethnicity
Course equivalencies: X-SOCL225/BIET225
Outcomes:
Students will understand the role that social forces play in the health and wellness of individuals, the community and society; Students will engage with different theoretical perspectives to examine how race, ethnicity, and gender shape health outcomes and access to health care in the US and other countries; Students will learn about empirical patterns of racial and ethnic disparities in health, health care delivery, and health policy

SOCL 226 Science, Technology, & Society (3 Credit Hours)
This course serves as a broad introduction to the social study and analysis of science and technology in society. It examines how scientific knowledge and technologies are created and constructed and how they influence and are influenced by society.
Outcomes:
Students will be able to understand how scientific knowledge and technologies are developed in particular historical and cultural contexts and analyze their impact on our daily lives

SOCL 228 Sociology of the African American Experience (3 Credit Hours)
A sociological inquiry into the historical and contemporary experience of African Americans. Social movements and social change, urban and institutional processes, social values and collective behavior, and African Americans and public policy are among the topics explored.
Interdisciplinary Option: African Studies and the African Diaspora, Race and Ethnicity
Course equivalencies: X-SOCL228/BWS 228
Outcomes:
Students will gain a deeper understanding of the experiences that African Americans have in American society and of the social, political and institutional forces that have contributed to the historical and contemporary experience of African Americans

SOCL 230 Self & Society (3 Credit Hours)
This course examines the relationships between the self as a social product and the larger society in which that self is socialized, develops and expresses itself. Various theories of selfhood are explored.
Outcomes:
Students will come to appreciate how selfhood, their own and others, is a product of historical factors as well as social contexts such as class, gender, race and ethnicity

SOCL 231 Childhood and Society (3 Credit Hours)
This course looks at the social construction of childhood, the impact of parents, the media, peer groups, and educational institutions as well as changing social attitudes about the place of children in society.
Interdisciplinary Option: Human Services
Outcomes:
Students will gain a better understanding of the historical and social manner in which childhood is constructed and the impacts of various social institutions, family, religion, media, education on childhood development

SOCL 234 City, Suburbs & Beyond (3 Credit Hours)
This course studies the historical emergence of cities, focusing on the ecological, demographic, and organizational processes involved in the continuing growth and change of metropolitan areas and in the relationship of a metropolitan area to the surrounding region.
Interdisciplinary Option: Human Services, Race and Ethnicity, Urban Studies
Course equivalencies: X-SOCL234/URB234
Outcomes:
Students will understand fundamental facts and theories about the character and development of cities and urban regions

SOCL 235 Communities in a Global Age (3 Credit Hours)
This course examines communities sociologically, both as a concept and as they exist in society. The course covers urban, racial/ethnic, religious, territorial, utopian, ideological, and web-based communities, and their strengths and limitations in a rapidly changing global world.
Interdisciplinary Option: Urban Studies
Outcomes:
Students will identify, describe, and analyze communities using sociological concepts and be able to assess the mechanisms by which old and new communities are being formed as well as their consequences for social life

SOCL 236 Population Studies (3 Credit Hours)
This course introduces the study of demography by examining trends of fertility, work, marriage, migration and mortality.
Interdisciplinary Option: Bioethics, Human Services
Course equivalencies: SOCL236 / SOCL285
Outcomes:
Students will gain an understanding of how the size, composition, and dynamics of a population influence the social, economic, and political structure of individual nations and the world

SOCL 237 Professions and Society (3 Credit Hours)
Work involving high levels of expertise - medical, legal, technical, and much else - is a critical component of modern society. This course examines how professional work is structured, the way professionals are trained and organized, the privileges and responsibilities of professional work, and the role of conflicts over expertise in modern society.
Outcomes:
Students will gain an understanding of how work based on knowledge and expertise is organized and on the social and economic factors that contribute to the position of professionals in society

SOCL 239 Understanding Bias and Inclusivity (3 Credit Hours)
Using an intersectional lens, students learn about how privilege, power, and oppression shape ourselves, perceptions of others, and our social world. They consider how ourselves and others are shaped by and operate within the larger social system. Students explore their identities, values, and biases. Students engage in self-reflection to increase self-awareness.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X - PSYC 239/ SOCL 239
Outcomes:
Identify feelings about course topics; Demonstrate self-awareness of identities and values, including the value of difference; Engage in intergroup dialogue; Articulate how personal power can be used to create change

SOCL 240 Families (3 Credit Hours)
Contemporary family structures encompass a variety of living arrangements and social relationships. This course considers differences and similarities among the various family types and explores the social, cultural, and economic forces structuring family life.
Interdisciplinary Option: Human Services, Women & Gender Studies
Course equivalencies: X-SOCL240/WOST242/WSGS242
Outcomes:
Students will develop an expanded understanding of the varieties of family arrangements and the connections between family life and the wider social, political, and economic environment

SOCL 245 Sociology of Education (3 Credit Hours)
This course is a rigorous introduction into the scholarly traditions and contemporary research developments in the sociology of education. Topics include: educational stratification and inequality, how educational institutions function and with what policy implications, and social psychology/human development.
Interdisciplinary Option: Race and Ethnicity
Outcomes:
Identify areas of research interest; trace connections to studies in the field; analyze and evaluate policy effectiveness; evaluate the capacity and potential for institutions to support efforts at social justice

SOCL 247 Sociology of Culture (3 Credit Hours)
This course examines the social production, consumption, and use of culture and cultural objects, especially in the fields of literature, art, music, mass media and religion.
Outcomes:
Students will learn sociological methods of analyzing culture and cultural objects, and will understand the social organization of cultural production and consumption

SOCL 250 Inequality in Society (3 Credit Hours)
Pre-requisites: ANTH 100, PLSC 102, SOCL 101, WSGS 101, or equivalent; please check requirements for declared majors/minors for exceptions
This course examines the manner in which contemporary society is divided by race, ethnicity, class, sexuality and gender, and the impact of social institutions on these divisions. An emphasis will be placed on income/wealth differences, status differences, class conflict and social conflict over time.
Knowledge Area: Tier 2 Societal Knowledge
Interdisciplinary Option: African Studies and the African Diaspora, Asian Studies, Human Services, Peace, Justice, and Conflict Studies, Race and Ethnicity, Women & Gender Studies
Course equivalencies: ASIA/AFR/SOCL/WSGS 250
Outcomes:
Students will acquire a better understanding of social inequality and what can be done to make society more just

SOCL 252 Global Inequalities (3 Credit Hours)
This course examines inequality on a global scale, focusing on the impact of globalization processes on race, class, and gender inequalities here and abroad.
Interdisciplinary Option: Global Studies, Human Services, Race and Ethnicity
Outcomes:
Students will analyze how race, class, and gender inequalities influence each other across national boundaries, and will recognize global causes and consequences of inequality

SOCL 254 Sociology of Migration (3 Credit Hours)
This course is designed to provide a sociological understanding concerning various impacts of immigration in the United States. International migration patterns have significantly affected the development of US society since its inception. In recent decades, the United States experienced a record number of new immigrants from a variety of countries. In this course, we examine fundamental concepts for studying migration and theories that explain international migration. We also discuss how immigrants have redefined - and will keep redefining - local and foreign demographic dynamics in receiving and sending societies, transnational networks, and a more complex ethno-racial diversity with meaningful international roots.
Interdisciplinary Option: African Studies and the African Diaspora, Asian Studies, Global Studies, Latin American Studies, Race and Ethnicity, Women & Gender Studies
Outcomes:
Be familiar with key theories, concepts, and analyses that explain migration issues in the United States; Understand the relevance of historical and contemporary associations among cultural, economic, political, and social forces, as well as their impact on immigration; Understand the relevance of sociological knowledge on migration issues for dealing with current social problems at different levels (ex: remedial policies, activism, educational objectives)

SOCL 255 Deviance and Social Control (3 Credit Hours)
This course is a socio-historical look at definitions of deviant behavior and individuals, an examination of techniques of social control, and an analysis of specific forms of deviant behavior such as crime and mental illness.
Interdisciplinary Option: Human Services
Outcomes:
Students learn to analyze how history, science, and philosophy combine to define the nature of deviant behavior and to identify deviant individuals

SOCL 258 Confronting Homelessness: Local to Global (3 Credit Hours)
Pre-requisites: SOCL 101 or PSYC 100 or PLS 102 or ANTH 100
Who are homeless people in the United States and beyond? Why are they homeless? What is being done to address the issues of homelessness? This course addresses these questions from a variety of disciplinary perspectives. As an "engaged learning" course, students will also learn by assisting at various agencies. The student will be able to discuss framings of the causes of homelessness and evaluate different policy approaches for addressing it while contributing work to a local agency.
Interdisciplinary Option: Urban Studies

SOCL 260 Power in Society (3 Credit Hours)
This course focuses on sociological theories and case studies of power, authority, and social change. It explores the ways in which power relations perpetuate social inequality and the ways in which social conflicts and power struggles transforms society.
Outcomes:
Students learn about the structures of power in economic systems, political systems, and organizations; the cultural and ideological underpinnings of power relationships; and political struggles for social change

SOCL 261 Social Movements & Social Change (3 Credit Hours)
This course examines the dynamics of collective behavior and movements promoting social change.
Interdisciplinary Option: Peace, Justice, and Conflict Studies, Sociolegal Studies
Outcomes:
Students will demonstrate understanding of competing explanations of social movements and social change and will be able to test various theories by analyzing historical movements for change

SOCL 265 Globalization & Society (3 Credit Hours)
This course examines the nature of contemporary globalization and considers how it influences communities, nations and the world.
The course examines the positive and negative consequences of globalization and the global justice movements that have emerged seeking more equality, tolerance and environmental stewardship.
Interdisciplinary Option: Global Studies, Urban Studies
This course satisfies the Engaged Learning requirement.
Outcomes:
Students learn how economic, political and cultural aspect of globalization impact society in an increasingly interconnected world

SOCL 267 Italy Today (3 Credit Hours)
Pre-requisites: One Tier I Foundational Social and Cultural Knowledge Core course: SOCL 101, ANTH 100, PLSC 102, or PSYC 100
Italy Today traces the nation's extraordinary transformation from the ashes of World War II to the leading economic and cultural power it is today and analyses a broad range of issues in contemporary Italy, such as Catholicism, gender, family, emigration and immigration, regional identities, media and material culture.
Interdisciplinary Option: Global Studies, Italian American Studies, Italian Studies
Outcomes:
Understand the transformation of Italy since WWII Think critically about issues such as stereotypes, regional identities, and diversity

SOCL 272 Environmental Sociology (3 Credit Hours)
This course examines the distinctively social aspect of the relationship of people to their environments, both built and natural.
Interdisciplinary Option: Bioethics, Global Studies, Human Services, Peace, Justice, and Conflict Studies, Urban Studies
Course equivalencies: X-SOCL272/ESP272PAX 272BIET272
Outcomes:
Students will recognize the role that both social and physical factors play in the environmental problems facing the world; Students will also develop critical thinking skills needed to evaluate statements and policy proposal to improve environmental quality

SOCL 276 The Sociology and Politics of Food (3 Credit Hours)
Explores the impact of globalized economic, political, and social relationships through the prism of food. Considers the cultural and ideological dimensions of food, the structure of food production and consumption, and responses to the global food system.
Interdisciplinary Option: Urban Studies
Outcomes:
Students will gain awareness of themselves as consumers of food and food products

SOCL 278 Global Health (3 Credit Hours)
This course addresses the underlying social, economic, political, and cultural mechanisms driving some of the leading issues in global health today, including the rise of non-communicable diseases in low and middle income countries, neglected infectious diseases, human resources for health, and access to global pharmaceuticals.
Interdisciplinary Option: Bioethics
Outcomes:
Students will become familiar with evaluating the global health policy process and debating possible routes to achieving health equity

SOCL 280 Topics in Contemporary Sociology (3 Credit Hours)
The course examines selected contemporary sociological issues. Topics addressed represent specialized or newly developing areas of sociological inquiry. Topics will vary from semester to semester.
Outcomes:
Students gain insights into contemporary social issues and learn how to use the concepts, theory and methods of sociology to examine them

SOCL 281 Current Issues in Medical Education (1 Credit Hour)
Pre-requisites: Sophomore Standing or Above; Instructor Permission
This class is an opportunity to examine selected reform and innovation movements facing health professional education and training. Sophomore standing or above is required.
Outcomes:
Students will demonstrate critical analysis of selected reforms and innovations in health professional education and training

SOCL 301 Statistics for Social Research (4 Credit Hours)
Pre-requisites: SOCL 206
The course is a comprehensive introduction to statistical analysis in social research. Topics include: univariate, bivariate, and multivariate analysis, computer statistical applications and interpretation of results.
Interdisciplinary Option: Human Services
Outcomes:
Students will demonstrate understanding of statistical thinking and data analysis techniques and be able to use them to evaluate existing research and conduct original research

SOCL 302 Qualitative Research (3 Credit Hours)
An introduction to the major qualitative methods of social inquiry. Participant observation, interviewing, historical analysis, and content analysis, as well as ethical issues of field research are studied.
Outcomes:
Students will gain understanding of important methods of data collection and analysis common in social science research; Students will gain experience using these techniques to conduct research and evaluate the research of others

SOCL 304 Global Civil Society and Social Movements (3 Credit Hours)
This course focuses on global civil society groups (both advocacy groups or apolitical) and on social movements that seek to fight injustices. We discuss a variety of examples of civil society projects ranging from monitoring government corruption and promoting micro-credit to organizing transnational protest campaigns.
Interdisciplinary Option: Global Studies
Course equivalencies: X-GLST 304/SOCL 304
Outcomes:
Students will demonstrate a comprehension of the dynamics of global civil society and social movements, both for cases discussed in class and to material from outside class

SOCL 306 International Development (3 Credit Hours)
This course provides an interdisciplinary overview of the international development system and issues related to development in those countries variously referred to as third world, developing, underdeveloped, or peripheral countries.
Interdisciplinary Option: Global Studies
Course equivalencies: X-GLST 306/SOCL 306
Outcomes:
Students will develop a fundamental knowledge of the various factors that are considered to help or hinder development

SOCL 311 Social Science Research Practicum: Cook County Community Survey (3 Credit Hours)
Pre-requisites: SOCL 301 or equivalent
Familiarity with R, Stata, SAS, or SPSS necessary. Students will analyze this year's iteration of the annual Cook County Community Survey. They will draw on the data to prepare written, public-facing reports, public presentations, and scholarly research.
This course satisfies the Engaged Learning requirement.
Course equivalencies: PLSC 311/SOCL 311
Outcomes:
Describe the strengths and limitations of modern polling techniques; Use statistical software to analyze survey data; Communicate findings from surveys to a broad audience orally and in written form

SOCL 334 Latinas/os/xs in Space (3 Credit Hours)
Latinas/os/xs are the largest minoritized population in the United States with a population of more than 60 million. As the fasting growing demographic in the U.S., how is this complex and variegated population (re)conceptualizing, (re)framing, (re)making, and (de)constructing spatial boundaries? Further, how are Latinas/os/xs both transforming and challenging U.S. physical and conceptual landscapes? Drawing from spatial, decolonial, and feminist of color theories, we will engage these questions through a thematic exploration of the ways that Latinas/os/xs have influenced, shaped, and (re)used space as a struggle to maintain dignity and engage in place-making. We will connect these ideas to geography, citizenship, civil rights, social justice, and cultural practices. This is a discussion and project-based course.
Interdisciplinary Option: Latin American Studies, Race and Ethnicity, Women & Gender Studies
Outcomes:
Identify and describe the impact Latinas/os/xs have on US culture, history, and geography; Critically analyze political, social, and cultural treatment of Latinas/os/xs in the US; Critically analyze US culture using spatial and decolonial theories; Understand the intersection(s) of space, race, and opportunity within the US; Link social issues and responses to creative outlets/endeavors; Work in small teams; Gain oral presentation skills

SOCL 335 Urban Semester Seminar (3 Credit Hours)
Pre-requisites: Junior or senior standing
Students explore how cities work through texts, field trips, and guest speakers, and help find solutions to pressing urban issues. They fulfill civic engagement core value requirement.
Interdisciplinary Option: Urban Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: X-SOCL335/PLSC335
Outcomes:
Students will understand and address inequities in urban communities, and identify avenues of leadership and civic engagement in contemporary cities

SOCL 365 Social Theory & Social Research (3 Credit Hours)
Pre-requisites: SOCL 205, 206, 301, and senior standing, or permission of instructor or chair
In this capstone course, each student designs and conducts an empirical research project resulting in a senior research paper.
Outcomes:
Student demonstrate mastery of sociological theory and methods by writing a research paper bringing a full complement of sociological skills to bear on an issue of substantial theoretical and/or practical importance

SOCL 370 Undergrad Seminar-Special Topics (3 Credit Hours)
Using a seminar format, the course undertakes an in-depth study of selected contemporary sociological issues in depth. Topics addressed represent specialized or newly emerging areas of sociological inquiry and will vary from semester to semester.
Outcomes:
Students have opportunity to examine contemporary social issues in a seminar environment and learn how to use the concepts, theory and methods of sociology to examine them

SOCL 372 Directed Readings (3 Credit Hours)
Pre-requisites: Permission of instructor or chair
Independent study of a selected body of sociological literature on a topic defined by the student in collaboration with a faculty advisor.
Outcomes:
Student gains in-depth knowledge of a selected sub-field of sociology

SOCL 380 Internship (3-6 Credit Hours)
Pre-requisites: Permission of instructor or chair
Supervised field experience for students working in a selected community organization, government agency, social agency, or business.
Interdisciplinary Option: Human Services
This course satisfies the Engaged Learning requirement.
Outcomes:
Students have opportunity to apply the skills and analysis of sociology to a concrete situation

SOCL 397 Independent Study Projects (3 Credit Hours)
Independent study of a topic delineated by the student in collaboration with an individual faculty member.
Outcomes:
Student gains experience and expertise in defining and conducting independent scholarly work

SOCL 398 Independent Study Projects (1-6 Credit Hours)
Independent research done in collaboration with a faculty member on a sociological topic defined by the student in consultation with a faculty member.
Outcomes:
Student gains experience and expertise conducting independent research

SOCL 399 Independent Study Projects (3 Credit Hours)
Advanced independent research in collaboration with a faculty member on a sociological topic relevant to the student. Limited to senior Sociology majors.
Outcomes:
Student gains experience and expertise conducting independent research

SOCL 403 Sociological Perspectives I (3 Credit Hours)
Important theoretical and methodological concerns will be discussed with particular attention paid to how these concerns affect substantive areas in sociology.
Outcomes:
Students will gain familiarity with major themes that will shape their graduate education in sociology

SOCL 404 Sociological Perspectives II (3 Credit Hours)
Faculty will discuss their intellectual biographies and work that is of current interest to them.
Outcomes:
Students will gain familiarity with the range of substantive, theoretical and methodical concerns of the department's faculty

SOCL 405 History Sociological Thought (3 Credit Hours)
This course looks at the intellectual roots and expressions of the foundations of sociological theory in the 19th and early 20th century.
Outcomes:
Students will gain familiarity with the classical texts in sociological theory that established some of the basic perspectives, issues and debates that inform contemporary social theory and research

SOCL 406 Modern Sociological Theory (3 Credit Hours)
This course examines some of the dominant perspectives and trends of modern social theory.
Outcomes:
Students will develop familiarity with the primary sources that represent current trends in modern and postmodern theories

SOCL 410 Logic of Sociological Inquiry (3 Credit Hours)
This course explores the structures of sociological research, analyses, and explanations. Several major types of data collection will be examined and evaluated.
Outcomes:
Students will be able to formulate sociological problems, understand the relationship between problem formulation and data collection, measurement and analyses and develop the capacity to utilize different social scientific methods

SOCL 412 Qualitative Methods in Social Research (3 Credit Hours)
This course is an introduction to the major qualitative methods of social inquiry and the ethical issues raised by qualitative research.
Outcomes:
Students learn the skills of participant observation, interviewing, historical analysis, building theory from qualitative data, coding and content analysis

SOCL 413 Sociological Practicum (3 Credit Hours)
The class examines theoretical issues and past research relating to a particular social topic and then designs and completes a collective research project. Topics vary.
Outcomes:
Students gain facility with research design and group research practices

SOCL 414 Statistical Methods Analysis I (3 Credit Hours)
After a review of bivariate regression and cross-tabular analysis, the course provides an extended treatment of the general linear model. Topics include model construction, interpretation of results, partitioning of variance, tests of statistical significance and interactions.
Outcomes:
Students will be able to employ general linear models in original research and critically evaluate existing empirical research

SOCL 415 Statistical Methods of Analysis II (3 Credit Hours)
The course extends the applications of the general linear model to topics including path analysis, logistic regression, factor analysis and spatial and cluster analysis.
Outcomes:
Student will: understand the techniques with enough clarity to recognize when they are appropriate research tools; gain sufficient expertise to apply the techniques to moderately complex research problems; be able critically review the relevant literature

SOCL 418 Demography (3 Credit Hours)
This course examines the basic techniques used to assemble, analyze, and present demographic information. It also examines U.S. and world demographic trends and the causes and consequences of such demographic change.
Outcomes:
Students will gain an in-depth knowledge of demographic trends and an understanding of the sources, limitations, and advantages of various types of demographic data

SOCL 421 Theories Social Change (3 Credit Hours)
The course will critically appraise major theories of social change and examine different methodologies on both the macro- and micro-sociological levels.
Outcomes:
Students will gain a working knowledge of the major theoretical and methodological issues in the field

SOCL 423 Social Movements (3 Credit Hours)
This course will use case studies of contemporary social movements to examine collective efforts to promote social or cultural change. They will gain an understanding of the recursive relationship between empirical research and theory development.
Outcomes:
Students will be able to apply major theoretical perspectives on social movements to a variety of historical cases

SOCL 425 Inequality and Society (3 Credit Hours)
This is an empirical and theoretical inquiry into the causes, consequences, and dynamics of social inequality in modern societies.
Outcomes:
Student will be able to explain the distribution of economic, political, and social resources in society; the processes of class formation and the role of race and gender

SOCL 426 Sociology of Gender (3 Credit Hours)
This course surveys sociological and related scholarship on women and gender relations.
Outcomes:
Students will come to understand the social construction of gender and its centrality to studies of identity and sexuality, the division of labor, families and reproduction, violence, poverty, race, class and globalization

SOCL 427 Political Sociology (3 Credit Hours)
The course examines major theories of political action and change. Particular attention is paid to policy development.
Outcomes:
Students will develop an empirical and theoretical knowledge of the working of political systems and to be able to apply that knowledge to the development of social policy

SOCL 428 Poverty and Social Welfare (3 Credit Hours)
This course examines the development of poverty and social welfare efforts over time in the United States, with some comparisons to other industrial societies.
Outcomes:
Students will understand the character and consequences of poverty and social welfare policies in the United States, emphasizing current conditions and possibilities for the future

SOCL 431 Social Structure and Personality (3 Credit Hours)
This course examines the relationships between the individual and larger social structure and social trends.
Outcomes:
Students will gain familiarity with current research and theory concerning the relationship of self identity and personal narratives to socialization and structural factors, and the ways in which social class, work, race and nation construct age, gender and sub-cultural forms of subjectivity

SOCL 432 Socialization Thru Life Cycle (3 Credit Hours)
This course traces the nature of socialization and development of the individual through the life cycle.
Outcomes:
Students will become familiar with research and theory concerning the processes by which persons are socialized into sexual, racial, religious, occupational, marital, and parental social roles, identities and patterns of interactions at various stages of life

SOCL 435 Adult Development and Aging (3 Credit Hours)
The older adult population and adult development is examined from social and cultural perspectives.
Outcomes:
Studies will develop a knowledge of gerontological theories and research which pertain to the family, the community, political life, the economy, work and retirement, religious life, and other social institutions

SOCL 438 The Family (3 Credit Hours)
This course explores families, their changing internal structures, and their roles in contemporary societies.
Outcomes:
Students will develop an understanding of the household division of labor, mothering, the shifting character of marriage, the paid and unpaid work of care, dual career families, single parent households, racial/ethnic families, adoption, blended families, welfare policies, families in the class structure, and global issues

SOCL 439 Community Change (3 Credit Hours)
Contemporary communities are examined from a sociological perspective. Both geographic communities and communities of interest are studied.
Outcomes:
Students gain an understanding of how research can be used to facilitate social change in community settings; and an awareness of how community organizations, informal networks, and broader social forces shape the character and sustainability of particular communities

SOCL 440 Organizations & Organizational Change (3 Credit Hours)
This course examines the structures and processes that typify contemporary organizations, with particular attention to how organizations change.
Outcomes:
Students will be able to apply sociological methods to analyze organizations, and will develop an understanding of bureaucracy and alternative structures; the effect of organizational structure on administrators, workers, and clients; and how organizations are affected by their social environment

SOCL 441 Sociology of Religion (3 Credit Hours)
This course studies the relationship between religion and society, and explores central topics in the sociology of religion.
Outcomes:
Students will learn to define and explain religious organizations, beliefs, and practices as distinctly social phenomena, and understand how social processes both shape the form and content of religious life and in turn are shaped by them

SOCL 442 Religious Conflict & Change (3 Credit Hours)
This course will explore the complex reciprocal relationship between religion and historical processes of social change.
Outcomes:
Students will be able to analyze historical instances of religious conflict and change in the U.S. and other regions of the world; They will gain an understanding of how religion both affects and is affected by historical, political, and social change

SOCL 446 Knowledge, Power & Expertise (3 Credit Hours)
This course focuses on the relationship between knowledge, expertise and power in societies and how this relationship has consequences for the structure of knowledge and the organization of society.
Outcomes:
Students will be able to demonstrate a sociological understanding of the construction of knowledge and the organization of authority and expertise

SOCL 447 Sociology of Culture (3 Credit Hours)
This course will examine the relationship between social phenomena and cultural expressions, and the various ways sociologists have conceived of those relationships.
Outcomes:
Students will learn to apply sociological theories and methods to an analysis of cultural fields and understand the diversity of contemporary cultural objects and expressions, and how they are produced and used in social action

SOCL 448 Technology & Material Culture (3 Credit Hours)
This course will serve as an introduction to the sociology of things, most notably the sociology of technology, design and the built environment.
Outcomes:
Students will develop an understanding of both cultural, constructivist and political-economic approaches to the construction of technology and artifacts, and of a variety of theoretical approaches to the study of their impact and audience-response

SOCL 452 Complex Organizations (3 Credit Hours)
Formal organizations treated comparatively and systematically as major components of modern social organization are featured.
Outcomes:
Students will develop an understanding of leading theoretical traditions, historical and cross-national variation, organization-environment relations, and selected internal processes in the field of complex organizations

SOCL 453 Occupations and Professions (3 Credit Hours)
This course focuses on the structure of paid work in modern society, and its relationship to unpaid work and to self-employment. Special attention is given to the role of skills and knowledge in the structuring of work.
Outcomes:
Students will develop an understanding of how both macro and micro factors structure work; from capitalism, industrialism, gender, race and globalization to workplace interaction and culture

SOCL 461 Race & Ethnicity (3 Credit Hours)
This course explores the construction, meaning, uses and consequences of racial and ethnic identity in American society over time.
Outcomes:
Students will understand the role of migration and immigration on the construction of identity; analyze prejudice, discrimination, and inter-group conflict; and explore how social movements have and are changing these group relationships

SOCL 462 The Urban Metropolis (3 Credit Hours)
This course examines urbanization and its consequences through social theory and empirical studies emphasizing the modern European and American experience.
Outcomes:
Students will understand ecological and political economy perspectives on metropolitan development; changing regional patterns of population, housing, and employment; and urban governance, planning, and policies for the future

SOCL 463 Sociology & Natural Environment (3 Credit Hours)
This course examines the relationship between social life and the natural environment.
Outcomes:
Students will be able to demonstrate a sociological understanding of the relationship of humans to the natural environment and draw connections between basic ecological understandings of nature and the human impact on the natural world

SOCL 471 Sociology of Deviance & Control (3 Credit Hours)
This course is a socio-historical look at definitions of forms of deviant behavior and the identification of individuals as deviant.
Outcomes:
The student will learn how history and philosophy shape the definitions of deviant behavior and the methods used to control it; They will develop a sociological imagination to perceive the meaning of deviance beyond the superficialities of today's headlines

SOCL 473 Criminology (3 Credit Hours)
This course examines modern and traditional theories of criminology and their implications for social control, with emphasis on current work in criminology theory, social planning, and evaluation research.
Outcomes:
The student will acquire knowledge of the relationship between the various explanations of crime patterns and how these theories work to reduce or fail to reduce the level of criminal behavior

SOCL 481 Medical Sociology (3 Credit Hours)
This course will examine critical factors affecting mortality and morbidity; mental health; health services; community health; cross-cultural differences; aging and the strategy and conduct of socio-medical research.
Outcomes:
The student will be able to critically analyze the social components of illness and of health and to integrate theory and research in the study of health care institutions globally

SOCL 482 Education in Society (3 Credit Hours)
This course focuses on the social processes that affect both the means and ends of education. It has three units: Schools as Organizations; Inequality in Education; and Education and Cultural Reproduction. Open to all Graduate students.
Outcomes:
Improved understanding of the social processes and outcomes of education

SOCL 483 Teaching Sociology (3 Credit Hours)
Pre-requisites: Completion of at least one semester of graduate coursework
Students will learn to identify good teaching practices, to practice relevant skills, and to begin a lifelong process of professional development. They will develop materials for an undergraduate course.
Outcomes:
Students will create a portfolio of materials for an undergraduate course that reflect "best practices" in education

SOCL 490 Workshop: Applied Sociology (1 Credit Hour)
This focuses on special issues for methods used by applied sociologists, and topics vary from semester to semester. Most workshops involve presentations by faculty or applied sociologists from outside the university.
Outcomes:
Students will develop expertise in, for example: survey research, evaluation research, use of population data in policy making, focus groups, and developing community leadership

SOCL 491 Sociological Discourse (3 Credit Hours)
The course examines the nature of sociological argumentation in existing scholarly and popular literature and in the students' own writing.
Outcomes:
Students will be able to formulate and present sociological arguments in both oral and written forms, and to demonstrate their understanding of the relationship between problem formulation, data collection and measurement and analysis in their own and others' work

SOCL 494 Internship (3 Credit Hours)
Placements are typically in non-academic settings, e.g., government agencies, community organizations, businesses, or labor organizations. Students are expected to work a minimum of 100 hours and write an internship report.
Outcomes:
Students will develop skills in applying sociological methods and theoretical perspectives to the understanding and ameliorating of social issues in real world settings

SOCL 497 Independent Research (3 Credit Hours)
Students registered for independent study will meet as a workshop, under the guidance of a faculty member, at least three times per semester. These skills are important for expeditious completion of proposals, theses, and dissertations.
Outcomes:
Students will develop the skills and dispositions necessary to be successful and productive in independent work

SOCL 498 Independent Research (1-3 Credit Hours)
Work on an individual research project under the supervision of a faculty member. These skills are important for expeditious completion of proposals, theses, and dissertations.
Outcomes:
Students will develop the skills and dispositions necessary to be successful and productive in independent work

SOCL 499 Directed Study (3 Credit Hours)
Develop a reading list and paper under the supervision of a faculty member.

SOCL 500 Seminar-Applied Sociology & Social Policy (3 Credit Hours)
This course examines the use of sociology in determining and selecting alternative social policies.
Outcomes:
Students will develop knowledge about the roles that applied sociologists play in society; the relationship between sociologists and clients or organizations; the social research process and how it affects the research product; and ethical considerations of applied sociologists

SOCL 505 Controversery Current Social Thought (3 Credit Hours)
This is a seminar in which students and faculty will examine in detail particular controversies that are emerging in theoretical approaches to sociology. Topics will vary.
Outcomes:
Students will develop advanced skills in theoretical discourse

SOCL 510 Research Special Areas (3 Credit Hours)
Advanced methodology seminar in special topics.
Outcomes:
Students will develop advanced skills in the special area

SOCL 520 Topics in Contemporary Society (3 Credit Hours)
Various topics in the study of modern society
Outcomes:
Students will develop advanced skills in the particular area

SOCL 525 Seminar in Comparative Studies (3 Credit Hours)
The seminar will expose participants to comparative approaches in defining issues, topics or institutions, researched by comparative sociologists and cultural anthropologists. Specific topics for consideration will vary.
Outcomes:
Students will acquire knowledge of the utility of comparative approaches to cultural and social structures in developing greater definition and clarity, and a deeper understanding of a given topic

SOCL 540 Issues: Sociology of Religion (3 Credit Hours)
Focused study on a variable topic in the sociology of religion.

SOCL 560 Seminar-Issues in Communities & Urban Sociology (3 Credit Hours)
This course explores current issues in cities and in the sociological study of cities.
Outcomes:
Students will become familiar with current debates in urban sociology and apply sociological theories and analysis to contemporary issues in cities

SOCL 580 Seminar: Issues in Medical Sociology (3 Credit Hours)
This course explores a specialized topic in the sociology of health and medicine. Restricted to Graduate Students.
Outcomes:
Ability to analyze individual, social and institutional effects on health and medicine

SOCL 595 Thesis Supervision (1 Credit Hour)
Write a thesis under the supervision of a faculty member.

SOCL 600 Dissertation Supervision (1 Credit Hour)
Write a dissertation under the supervision of a faculty member.

SOCL 605 Master's Study (1 Credit Hour)
Develop a reading list and paper for an MA project under faculty supervision.

SOCL 610 Doctoral Study (1 Credit Hour)
This course can only be taken two times during a doctoral student's career.

Spanish (SPAN)

Discover, search, courses (p. 2661)!

SPAN 101 Spanish I (3 Credit Hours)
This course is an introduction to the basic elements of Spanish language and culture. It is designed for students with no previous experience in Spanish.
Outcomes:
Students will be able to understand simple messages and short narratives, respond to basic inquiries about themselves and others, formulate basic questions, as well as understand basic written texts

SPAN 102 Spanish II (3 Credit Hours)
Pre-requisites: SPAN 101
This course builds on SPAN 101, and introduces students to new topics and grammatical structures.
Interdisciplinary Option: Latin American Studies
Outcomes:
Students will be able to produce sounds in Spanish more accurately, express appropriate reactions to ordinary situations, understand basic oral commands, read more complex texts, and write sentences in cohesive paragraphs

SPAN 103 Spanish III (3 Credit Hours)
Pre-requisites: SPAN 102
This course is the first semester of second-year Spanish.
Outcomes:
Students will increase their knowledge of Spanish grammar and vocabulary, and their Spanish communication skills

SPAN 104 Spanish IV (3 Credit Hours)
Pre-requisites: SPAN 103
This course is the second semester of second-year Spanish.
Outcomes:
Students will continue to perfect their knowledge of Spanish grammar and vocabulary, with greater stress on reading and speaking

SPAN 190 Spanish for Medical Professionals I (3 Credit Hours)
This course develops intermediate-level skills in comprehension and conversation for the health professions. It is for students who have completed at least Spanish 104 who have intermediate-level Spanish language skills.
Outcomes:
Students will be able to understand and use appropriate Spanish expressions in a variety of situations involving use of Medical Spanish; Students will understand essential information about the dialects and cultural characteristics of major Spanish speaking populations in Chicago

SPAN 195 Spanish for Medical Interpretation (3 Credit Hours)
This course is part of an intermediate advanced sequence focusing on (mainly) advanced oral intercultural skills in Spanish language oriented to preparing students for the interaction with Spanish speaking patients with none or little English skills. Students will develop a strong cultural sensitivity to improve future patient-doctor communications, while reflecting on the role of medical interpreters in successful medical outcomes. An intensive speaking, translating and interpreting training will help to strengthen students' knowledge of language and their confidence in its use.

SPAN 250 Composition & Conversation I (3 Credit Hours)
Pre-requisites: SPAN 104
This course is the first in an intermediate-level sequence designed to develop greater fluency in speech and writing through diverse readings and activities and is taught in Spanish.
Outcomes:
Students will be able to speak, read, write, and comprehend readings in Spanish at the intermediate level

SPAN 251 Composition & Conversation II (3 Credit Hours)
Pre-requisites: SPAN 250
Advanced conversation and composition course designed to develop greater fluency in speech and writing through diverse readings and activities. Taught in Spanish and required for Spanish majors.
Outcomes:
Students will be able to speak, read, write, and comprehend readings in Spanish at the advanced, third-year college level

SPAN 252 Composition & Conversation: Native Speakers (3 Credit Hours)
Pre-requisites: fluency in Spanish
This course is designed for Spanish-speaking students, and is an Intensive study of grammar and composition.
Outcomes:
Students will develop greater fluency in written Spanish

SPAN 253 Advanced Composition & Conversation: Native Speakers (3 Credit Hours)
Pre-requisites: SPAN 252 or equivalent
This course is a continuation of SPAN 252.
Outcomes:
Students will develop greater fluency in written Spanish

SPAN 270 Introduction to Critical Analysis in Spanish (3 Credit Hours)
This course reviews and sharpens the essential skills and techniques necessary to critically read, interpret, and write and speak about all genres of Hispanic literature (narrative, poetry, drama, and essay) in Spanish. In so doing, students refine their linguistic skills, and gain awareness of the complexities of the Spanish-speaking world.
Interdisciplinary Option: European Studies
Outcomes:
Students will gain the necessary skills for critically reading, writing and discussing all genres of Hispanic literature

SPAN 271 Introduction to Iberian Literature and Culture (3 Credit Hours)
An introduction to Iberian literature, film, and cultural production, designed to provide students with an understanding of Iberian culture, history, and society, while also honing their linguistic and analytical skills.
Interdisciplinary Option: European Studies, Global Studies
Outcomes:
Students will gain a grounding in Iberian literary and cultural production, an understanding of various literary and cultural forms, and an awareness of their context of production

SPAN 272 Introduction to Spanish American Literature and Culture (3 Credit Hours)
An introduction to Spanish-speaking Latin American literature, film, and other forms of cultural production, designed to provide students with an understanding of the region's variety and complexity while also honing their linguistic and analytical skills.
Outcomes:
Students will obtain a grounding in Spanish-speaking Latin American literary and cultural production, an understanding of various literary and cultural forms, and an awareness of their context of production

SPAN 282 Studies in a Theme (3 Credit Hours)
Pre-requisites: SPAN 104 or equivalent, and/or intermediate or above proficiency in Spanish as indicated by the foreign language placement exam
Close examination of a particular theme within the contemporary Spanish-speaking world not covered by the Department's regular course offerings. Focus may vary from term to term and depending on the instructor. This course counts towards the SPAN-MINR but not the SPAN-BA or SLIT-MINR. This course also counts towards satisfying the CAS language competency requirement.
Outcomes:
Describe a variety of social values, traditions, texts, artifacts, and other cultural expressions within historical contexts; Compare cultural phenomena across Spanish-speaking communities; Evaluate critical perspectives within cultural, literary, and social contexts

SPAN 300 Tutorial for Credit (1-6 Credit Hours)
Pre-requisites: permission of chairperson
Course material will be agreed upon by the student and instructor.
Outcomes:
Students will explore an aspect of Spanish language, culture and civilization, or literature not present in the curriculum or not offered that semester

SPAN 302 Business Spanish (3 Credit Hours)
Introduction to the fundamentals of the Spanish language and Hispanic culture as it relates to business practices.
Outcomes:
Students will learn the language of commerce in Spanish

SPAN 305 Advanced Spanish Grammar (3 Credit Hours)
Pre-requisites: SPAN 251 and permission of chairperson
This course is an overview of the most important aspects of Spanish grammar: sentence components, verbal systems, pronominal system, sentence structure, and paragraph structure.
Outcomes:
Students will be able to analyze words, sentences, both simple and compound, and to properly use pertinent linguistic terminology

SPAN 308 Literary Criticism (3 Credit Hours)
Introduction to various theories and methods of literary criticism and textual analysis. Conducted in English.
Course equivalencies: X-FREN/GERM/ITAL/SPAN308
Outcomes:
Students will be able to demonstrate a comprehensive critical knowledge of major currents and themes in international literary criticism and theory

SPAN 311 Generation of 1898 (3 Credit Hours)
Pre-requisites: Permission of chairperson
This course studies the distinctive group of turn-of-the-century Spanish writers known as the 'Generation of 1898': Unamuno, Baroja, Valle-Inclán, Machado, etc.
Interdisciplinary Option: European Studies, Global Studies
Outcomes:
Students will be able to discern the similarities and differences among the writers of this generation, as well as their relationship to modernism

SPAN 314 Survey of Medieval Literature (3 Credit Hours)
This course is a survey of the more prominent works of the Spanish Middle Ages - El Cantar de Mío Cid, El libro del buen amor, El conde Lucanor, and La tragicomedia de Calisto y Melibea o La Celestina - which reflect the religious, spiritual, and intellectual currents of Medieval Spain. In the form of seminar discussions and independent study, students will examine the aesthetic, social, and political trends of the ninth through fifteenth centuries, as well as the most important themes writers developed in pre-modern Iberia: honor, authority, vice and virtue, pilgrimage, devotion, and humor. These themes will be explored in the major works (primary sources), which will be complemented by secondary source readings and each student's independent research. The writers and texts studied in this course will also be viewed in the context of the greater artistic production in Spain and Medieval Europe.
Interdisciplinary Option: European Studies, Medieval Studies

SPAN 319 Romanticism (3 Credit Hours)
Pre-requisites: permission of chairperson
Study of the principle philosophical and esthetic characteristics of romanticism through readings in the major Spanish and/or Latin American romantic authors.
Interdisciplinary Option: European Studies
Outcomes:
Students will be able to recognize the principle characteristics of romanticism, its foreign influences, and its historical development in a variety of genres, including drama, prose fiction, essay, and poetry

SPAN 321 20th Century Theatre (3 Credit Hours)
Pre-requisites: permission of chairperson
An examination of 20th Century Theater in Spain covering such dramatists as Valle-Inclán, J. Benavente, M. Mihura, García Lorca, Buero Vallejo, and others.
Interdisciplinary Option: Global Studies
Outcomes:
Students will gain an understanding of dramatic genres and the contribution of Spanish playwrights to contemporary discussions on political and aesthetic issues

SPAN 326 Theater of The Golden Age (3 Credit Hours)
Pre-requisites: permission of chairperson
A study of major Renaissance and Baroque plays by Calderón, Lope de Vega, Tirso de Molina, Mira de Amescua, Juan Ruiz de Alarcón, and others.
Interdisciplinary Option: European Studies
Outcomes:
Students will learn to recognize mythological and historical themes while discussing the ethics of tragedy, the evolution of comic characters, and social concerns in the era of absolutism

SPAN 330 Survey-Poetry Theory & Practice (3 Credit Hours)
The poetry of the 19th century in Spain and Latin America derives from two literary, artistic and cultural movements: romanticism and modernism.

SPAN 331 20th Century Poetry (3 Credit Hours)
Pre-requisites: Permission of chairperson
A study of the development of modern Spanish poetry from post-modernism to the present with a special emphasis on the Hispanic poets of the avant garde.
Interdisciplinary Option: European Studies, Global Studies
Outcomes:
Students will able to recognize the major poetic trends, forms, themes, and movements in 20th century Spanish verse

SPAN 336 Poetry of The Golden Age (3 Credit Hours)
Pre-requisites: permission of chairperson
An exploration of the influence of the Italian Renaissance on the Spanish tradition: Garsilaso de la Vega, Herrera, San Juan de la Cruz, Fray Luis de León, Quevedo, Góngora and others.
Outcomes:
Students will learn to recognize classical themes and rhetorical techniques, and to trace the development of such genres as epic, satire, and the lyric

SPAN 339 19th Century Poetry (3 Credit Hours)
Pre-requisites: permission of chairperson
This course is a survey of 19th-century literature, with emphasis on Romanticism and Realism.
Outcomes:
Students will become acquainted with the rich literature of the nineteenth century and will improve their critical and analytical skills

SPAN 340 Survey Prose-Fictional & Nonfiction (3 Credit Hours)
Pre-requisites: permission of chairperson
This course traces the development of Spanish prose from the Middle Ages to the present day. All prose genres are included.
Interdisciplinary Option: European Studies
Outcomes:
Students will come to appreciate and understand how peninsular prose has developed

SPAN 341 20th Century Spanish Literature (3 Credit Hours)
Pre-requisites: permission of chairperson
Beginning with the Generation of 1898 and concluding with post-modernism, this course studies the rich literature of modern Spain.
Interdisciplinary Option: European Studies, Global Studies
Outcomes:
Students will better understand and appreciate the complexities of modern Spanish literature, as well as improve their critical and analytical skills

SPAN 346 Prose of The Golden Age (3 Credit Hours)
Pre-requisites: permission of chairperson
An approach to the picaresque, the pastoral novel and the essay with their concern with power and submission in everyday life. A study of the growing role of individual experience in fictional modes.
Interdisciplinary Option: European Studies
Outcomes:
Students will recognize the confluence of different prose styles, and the creation of individual voices in fiction; They will also become familiar with emerging concerns with religious and scientific issues during the period

SPAN 347 Cervantes Don Quijote (3 Credit Hours)
Pre-requisites: permission of chairperson
This course reads Cervantes' masterpiece with an emphasis on critical approaches, and on the book's impact on the invention of the modern novel.
Interdisciplinary Option: European Studies
Outcomes:
Students will learn about Cervantes's contribution to the development of modern fiction; They will become familiar with the novel's connection to other literary genres, and the role of metafiction and textuality

SPAN 349 Realism and Naturalism (3 Credit Hours)
Pre-requisites: permission of chairperson
This course is primarily a study of the novel of Realism and Naturalism, as well as of the short story.
Interdisciplinary Option: European Studies, Global Studies
Outcomes:
Students will be able to understand the goals of the great Realists and Naturalists and see their relationship to the major European masters of the nineteenth century

SPAN 352 Masterpieces of Latin American Literature (3 Credit Hours)
Pre-requisites: permission of chairperson
This course is a survey of representative works from pre-Colombian times to the present day, and an introduction to literary genres and defining themes in Latin American literature. It is taught in Spanish.
Interdisciplinary Option: Latin American Studies
Course equivalencies: X-SPAN352/LASP372
Outcomes:
Students will be able to understand the principal works, movements, and genres in Latin American literature

SPAN 353 Literary Masterpieces of Spain (3 Credit Hours)
This course is a survey of representative works of Spanish literature from the Middle Ages to the present, that is, from the first texts in the Castilian Spanish language (eleventh century), to works of the Renaissance and Baroque, and beyond, to key works of modern and contemporary times.
Outcomes:
Students will obtain a firm grasp of Iberian literary production, and an awareness of their context of production

SPAN 360 Intro to Hispanic Linguistics (3 Credit Hours)
Pre-requisites: SPAN 271 or 272
Introduction to Hispanic Linguistics is an introductory course on the structure of Spanish and its use in the Spanish-speaking world. Introducing the linguistic terminology and the basis for this science, helping the student analyze the grammatical structure and sounds of Spanish, and familiarizing the student with the different varieties of Spanish.

SPAN 361 Hispanic Women Writers (3 Credit Hours)
Pre-requisites: SPAN 271 or SPAN 272
A comparative study of 20th century Spanish and Latin American women writers who practice a variety of genres: autobiography, memoir, novel, short story, poetry, and testimonio.
Interdisciplinary Option: Women & Gender Studies
Outcomes:
Students will be able to recognize the major concerns of 20th century Hispanic women's writing

SPAN 362 History of Hispanic Feminism (3 Credit Hours)
This course challenges the usual view of feminism in Hispanic societies - that it played a minimal role in the revolutionary movements of the 20th century - through the reading of a series of works from the colonial period to the present, that chart the Hispanic woman's struggle to achieve liberation and self-realization.
Interdisciplinary Option: Global Studies
Outcomes:
Students will be able to trace the true history of Hispanic feminism, beginning with Sor Juanna Ines de la Cruz, and ending with such contemporary feminist writers as Rosario Ferre, Rosario Castellanos, Montserrat Roig, and Rosa Montero

SPAN 363 Borges (3 Credit Hours)
This course focuses on the poetry and prose of Jorge Luis Borges, one of the central figures in 20th century Latin American literature, and one of the major writers of modern times.
Interdisciplinary Option: Global Studies
Outcomes:
Students will be able to recognize the major themes and forms of Borges, as well as appreciate his seminal role in the creation of the so-called literature of the "boom" in Latin America

SPAN 364 Advanced Spanish Oral Expression (3 Credit Hours)
This advanced Spanish course will induce students to acquire more sophisticated tools for conversational management and oral expression, and in enlarging their vocabulary through structured practice.
Outcomes:
Students will gain more sophisticated skills and fluency in Spanish

SPAN 365 Latin American Cinema (3 Credit Hours)
This course will focus on Latin American cinema, from its early beginnings in silent cinema to the present. Instructor's consent required to enroll.
Interdisciplinary Option: Global Studies, Latin American Studies
Outcomes:
Students will gain an understanding of the formation of national film industries, the emergence of larger regional trends, and the cinematic treatment of social, political and economic aspects of various Latin American countries

SPAN 366 Spanish Cinema (3 Credit Hours)
Spanish film from early Surrealistic cinema to contemporary pastiche: Bunuel, Berlanga, Erice, Borau, Saura, Aranda, Almadovar, etc.
Interdisciplinary Option: European Studies, Global Studies
Outcomes:
Students will gain an understanding of the development of cinema in Spanish society, and how it incorporated old genres such as comedy or melodrama

SPAN 367 Spanish Sociolinguistics (3 Credit Hours)
This course is an introduction to sociolinguistics.
Outcomes:
Students will gain a rudimentary knowledge of the linguistic sciences (semantics, phonology, syntax, language acquisition) with a focus mainly on linguistic issues of great relevance in contemporary United States: Ebonics, Spanglish, language in the media, language and gender, and language in politics, and the 'English only' movement

SPAN 368 Baroque and Neobaroque (3 Credit Hours)

SPAN 397 Topics in Hispanic Literature (3 Credit Hours)
This revolving-topics course allows students to focus on a specific theme, such as Hispanic Feminism, Visions of America, or The Literature, Cinema ad Music of 21st century Spain. It also provides for in-depth study of a single author, such as Federico Garcia Lorca, Miguel de Unamuno or Jorge Luis Borges.
Interdisciplinary Option: Latin American Studies
Course equivalencies: X-SPAN397/LASP397

SPAN 402 Methods of Teaching Spanish (3 Credit Hours)
This graduate course introduces an overview of major theories and current issues in second/foreign language acquisition in both classroom and natural/non-instructed settings while providing guidance and practice with their applications to teaching. Students will explore theoretical, investigative, and practical issues of communicative language teaching that will help them develop communicative classroom environments that blend listening, speaking, reading, and writing.
The material in this course should encourage students to question assumptions and begin to formulate their own ideas about what goes on in their classrooms and in second language learning in general.

SPAN 403 Structure of Modern Spanish (3 Credit Hours)
An introduction to Spanish linguistics to provide a general understanding of phonology, morphology and syntax, as well as a history of Spanish grammar including variation and change.
Outcomes:
Students will understand the rules that govern sounds, word and sentence structure, and the dynamic interaction between Spanish and its neighboring languages

SPAN 405 Critical Methods (3 Credit Hours)
This course provides training in the application of contemporary critical methods with attention to the development of greater proficiency in literary analysis and written expression.
Outcomes:
Students will be able to discuss and write about knowledgeably works from the major literary genres: drama, prose fiction, essay, and poetry

SPAN 410 General Linguistics & Romance Languages (3 Credit Hours)
This graduate course introduces an overview of major theories and current issues in heritage language acquisition in both classroom and natural/non-instructed settings while providing guidance and practice with their applications to teaching. The material in this course should encourage students to question assumptions and begin to formalize their own ideas about what goes on in their classrooms and in heritage language learning in general.
Course equivalencies: X-SPAN410/CLST410/FREN410

SPAN 415 Medieval Spanish Literature (3 Credit Hours)
This course studies the development of Spanish medieval literature from the jarchas through the Celestina.
Outcomes:
Along with increasing their knowledge of Spanish history in the medieval period, students will be able to appreciate how the literature reflects the culture of the period

SPAN 416 Golden Age of Spanish Literature (3 Credit Hours)
This course is a graduate seminar whose primary focus is the literary production of the Spanish Golden Age, which dates from the second half of the sixteenth century to the end of the seventeenth. Students will analyze works of various genres - autobiography, prose, drama, poetry and the novel - by the most prominent authors of the time, including Teresa of Ávila, John of the Cross, Miguel de Cervantes, Baltasar Gracián, Francisco de Quevedo, Luis de Góngora, Félix Lope de Vega, Pedro Calderón de la Barca, Tirso de Molina and María de Zayas. We will give special attention to the historical, social and cultural context of early modern Spain, and students will gain exposure to the major critical trends and interpretation of Golden Age literature. The authors to be studied confront readers with the complex social fabric of pre-modern Spain and immerse us in the religious and economic realities of the Iberian Peninsula, the Mediterranean world and Europe. Our close reading of the texts will allow us to explore how early modern Spanish writers reflect the spiritual, intellectual and political currents of their time, especially as they shed light upon the network of institutions, practices, and beliefs that constituted Spanish culture.

SPAN 419 Romanticism in Spanish Literature (3 Credit Hours)
This course is a survey of Romanticism as a literary movement including its influence upon nineteenth-century culture.
Outcomes:
Students will be able to understand the philosophical, artistic, and esthetic tenents of Romanticism and their representation in a series of Hispanic texts from prose fiction to poetry and drama

SPAN 420 Realism & Naturalism (3 Credit Hours)
This course focuses on the various political, ideological, and intellectual trends that have shaped nineteenth-century Spanish literature and emphasizes the aesthetic and cultural influences that made the Spanish literary universe unique. It also takes up the question of the ways in which the literature of nineteenth-century Spain might be compared to that of Latin America and of the Western world generally. It will provide an overview of the key topics, writers, and literary genres of nineteenth-century Spanish literature, with particular emphasis on novels, poetry, folletines, short stories and, to a lesser extent, visual art. We will discuss the complexities of Spanish modernity using current theoretical perspectives in addition to various historical approaches, while emphasizing the way in which these texts offer multiple views of Spanish national identity and the construction of different models of the modern self.

SPAN 421 Theatre of Twentieth Century (3 Credit Hours)
The evolution of theatrical modes in 20th Century Spain. Authors: M. Mihura, Benavente, Valle Inclán, Arniches, García Lorca, Buero Vallejo, etc.
Outcomes:
Students will be able to explain how theater has dealt with contemporary experiences such as the Spanish Civil War, civil war, the polarization of society, group thinking, dictatorship, the inception of new mores and the inevitability of change

SPAN 426 Theater of The Golden Age (3 Credit Hours)
This course is a graduate seminar with a primary focus on theatrical works written in the Spanish Golden Age, which began in the mid-sixteenth century with the dramatist Lope de Rueda and ended in the late seventeenth century with the death of Calderón de la Barca. It combines the study of shorter works, entremeses, and full-length plays, or comedias, written by the most renowned playwrights of early modern Spain, including Cervantes, Lope de Vega and Tirso de Molina. Through the reading of these authors, students will explore the themes and social factors which shaped the plays of the Golden Age and will become familiar with the theatrical tradition that impacted Spanish society at all levels. Attention will also be given to the role of gender, religion, and socio-economic status in pre-modern Spanish society. We will use these texts in order to understand the historical context and the main currents of thought in early modern Spain.

SPAN 431 Poetry of The 20th Century (3 Credit Hours)
This course traces developments in Spanish poetry through a study of the works of selected poets, with special emphasis on the writers of the Generation of 1927.
Outcomes:
Students will understand the relationship between modernism and the avant garde, as well as the turn toward free verse and social poetry in the post-war period

SPAN 436 Poetry of The Golden Age (3 Credit Hours)
This course covers poetic theory and practice from Garcilaso to Góngora. It presents the classic modes as they were imitated and transformed to create a new poetic language.
Outcomes:
Students will be able to recognize the distinct styles and forms of Golden Age poetry

SPAN 437 Golden Age-Spanish Mysticism (3 Credit Hours)
This course is a survey of the most prominent authors of the Spanish Golden Age mystics - Ignatius of Loyola, Teresa of Avila, and John of the Cross, whose writings reflect the religious, spiritual, and intellectual currents of Counter-Reformation Spain. In the form of an independent study, students will examine the ascetical, mystical, and Illuminist trends of the sixteenth and seventeenth centuries, as well as the most important themes these writers developed in early modern Iberia: conversion and authority, vice and virtue, penance and pilgrimage, devotion and humor. These themes will be explored in the majors works (primary sources) of these authors, which will be complemented by secondary source readings and each student's independent research. The writers studied in this course and their texts will also be viewed in the context of the greater literary and artistic production of the Spanish Golden Age.

SPAN 441 Prose of The 20th Century (3 Credit Hours)
This course studies the development of Spanish prose from the Generation of 1898/ Modernism through Post-modernism, with emphasis on the novel, short story, and essay.
Outcomes:
Students will better appreciate and understand the complex literature of modern Spain

SPAN 446 Prose of The Golden Age (3 Credit Hours)
The course studies representative selections from the pastoral and the picaresque novel, the short novel, and didactic works of the period (Gracián and Quevedo).
Outcomes:
Students will understand how these authors expressed colliding sensibilities, and incorporated traditional themes-love, knowledge, deception, violence-through parody and satire

SPAN 447 Don Quijote (3 Credit Hours)
This course is a graduate seminar and its primary focus is the literary masterpiece of Miguel de Cervantes, El ingenioso hidalgo don Quijote de la Mancha (1605, 1615). Students will analyze the work that has come to be known as the first modern novel of Europe, and, through a close reading of the text, study the novel in relation to the literary traditions of the Renaissance: novella, the pastoral romance, the romance of chivalry, the humanist dialogue, the picaresque novel, including poetry and the comedia. We will give special attention to the historical, social and cultural context of Cervantes' world, and students will gain exposure to the major critical trends and interpretations surrounding his novel. Cervantes confronts readers with the complex social fabric of early modern Spain, and immerses us in the religious and economic realities of the Iberian Peninsula and the Mediterranean world. Our close reading of Don Quijote will explore its links to the network of institutions, practices, and beliefs that constituted early modern Spanish culture.

SPAN 470 Hispanic-American Poetry (3 Credit Hours)
The course traces the development of Latin American poetry in such representative poets as Rubén Darío, Gabriela Mistral, and Octavio Paz.
Outcomes:
Students will recognize the major themes and forms of Latin American poetry with a special emphasis on the 19th and 20th centuries

SPAN 480 Hispanic-American Novel (3 Credit Hours)
Pre-requisites: graduate standing
Analyzes salient themes and formal features of twentieth-century novel. Taught in Spanish. Prerequisite: graduate standing.
Outcomes:
Students will identify stylistic and thematic contours of the modern Latin American novel and draw connections between works of literature and the broader culture

SPAN 487 La Novela De La Revolucion Mexico (3 Credit Hours)
Pre-requisites: graduate standing
An analysis of representative works and themes of the Mexican Revolution, its mystique, critique, and legacy. Taught in Spanish.
Outcomes:
Students will comprehend main features of literature of the Revolution and draw relationships to contemporary Mexican cultural themes

SPAN 489 Cuento Hispano-Americano (3 Credit Hours)
The development of the Hispanic short story is studies in this course. Authors included are Quiroga, Cortázar, García Márquez, Castellanos, Valenzuela, and Ferré.
Outcomes:
Students will be able to contextualize the stories, analyze them both formally and thematically, and recognize the different types of short story written in Latin American: realist, fantastic, folkloric, indigenist, humorous, detective, metaphysical, social protest, feminist, etc

SPAN 490 Hispanic Culture & Civilization (3 Credit Hours)
Pre-requisites: graduate standing
Interdisciplinary seminar brings to bear perspectives of literary intellectuals, anthropologists, sociologists, educators, and theologians on the topic. Visions of America. Taught in Spanish.
Outcomes:
Students will understand significance and many facets of theme of cultural identity in Latin America as expressed in various disciplines

SPAN 499 Graduate Internship (1-6 Credit Hours)
A course designed to provide students with the opportunity to make a connection between Hispanic Studies and its praxis in a professional work environment.

SPAN 500 Directed Readings (3 Credit Hours)
The course is composed of special readings undertaken only by highly qualified students and supervised by a member of the department.
Outcomes:
Students will be able to work individually on a research project of their own selection

SPAN 501 Thesis Research (3 Credit Hours)
Pre-requisites: Completion of initial thesis forms appearing on the GS website; permission of thesis director
Designed for graduate students who wish to write an M.A. thesis, and therefore conduct, and receive credit for, thesis-related research under the direction of the thesis director.
Outcomes:
To advance the student's knowledge in the area of focus; to enhance research skills and allow the student to develop bibliographies and a research paper

SPAN 595 Thesis Supervision (1 Credit Hour)
This course provides ongoing guidance and supervision, with a view to project completion, for students writing their MA thesis.

SPAN 599 Directed Primary Research (3 Credit Hours)
Pre-requisites: Students must have the permission of the Instructor of Record to enroll in this course
This course will culminate in the completion and presentation of a well-polished article-length paper in modern languages, literatures and linguistics to faculty members in the form of an oral defense. This course fulfills the Masters Essay.
Outcomes:
To refine and articulate a specific article-length research project in Hispanic Studies, and to research, write and defend this successfully completed project

SPAN 605 Master's Study (1 Credit Hour)
This course provides ongoing guidance and supervision, with a view to project completion, for students writing their Masters' essay.

Sport Management (SPRT)

Discover, search, courses (p. 2661)!

SPRT 130 The Business of Sports (3 Credit Hours)
An overview of the sport industry intended to increase student awareness of the structure and operations of sport organizations from a management and leadership perspective.

SPRT 320 Social Aspects of Sport Management (3 Credit Hours)
Pre-requisites: Junior Standing, minimum grade of "C-" in SPRT 130
This course provides an examination of the role and relevance of sport in modern American society; impact of sport on society and the influence which cultural institutions have on sport. Sport related issues and controversies in contemporary sport as framed from a sociological and ethical perspective will be discussed.

SPRT 330 Economics of Sport (3 Credit Hours)
Pre-requisites: Minimum grade of "C-" in ECON 201 and SPRT 130
Using the tools of economic analysis, this course will examine issues pertaining to professional and amateur sports. It will also address economic policy of various sport industry segments.
Outcomes:
Examine issues pertaining to professional and amateur sports; Address economic policy of various sport industry segments; Use economic analysis tool

SPRT 335 Fundamentals of Sport Finance (3 Credit Hours)
Pre-requisites: Junior standing, minimum grade of "C-" in SPRT 130
No course description is available

SPRT 339 Sports Facility Management and Operations (3 Credit Hours)
Pre-requisites: Junior standing; minimum grade of "C-" in SPRT 130
This course examines the comprehensive planning for development and operations of new and existing sport and fitness facilities and the management of those events.
Course equivalencies: X-SPRT339/ISOM339

SPRT 345 Globalization of Sport Industry (3 Credit Hours)
Pre-requisites: Junior Standing, minimum grade of "C-" in SPRT 130
The course provides an analysis of the impact of the globalization of sport in relation to the organization and management of international sport, including the Olympic movement and the examination of U.S. professional sports. A comprehensive investigation of international governance, political, social, and economic issues which leagues and corporations must consider in conducting business in foreign markets.
Interdisciplinary Option: Global Studies, International Business
Outcomes:
Students will be able to explain how sport is organized, managed, funded, and governed across the different regions of the world; Students will be able to identify the major forms of sport governance that exist worldwide; Students will analyze how different cultures interpret sport differently

SPRT 365 Fundamentals Sport Marketing (3 Credit Hours)
Pre-requisites: Junior Standing, minimum grade of "C-" in SPRT 130 and MARK 201
This course focuses on the application of marketing principles and practices to the sport industry. Consideration given to marketing sport both as a spectator and a participant.
Course equivalencies: X-SPRT365/MARK365

SPRT 375 Sport Media (3 Credit Hours)
Pre-requisites: Sophomore Standing, minimum grade of "C-" in SPRT 130
A course designed to expose students to sports media in the digital age. The course covers topics in journalism, broadcasting, and production and outlines best practices for success in the industry. The course also analyzes the market forces that control sports media as well as legal and ethical dilemmas in the field.

SPRT 380 Legal Aspects in Sport Management (3 Credit Hours)
Pre-requisites: Junior Standing, minimum grade of "C-" in SPRT 130
An examination of legal issues which arise in the sport industry, including both amateur and professional sports with a strong emphasis on ethical concerns.

SPRT 385 Sport Analytics (3 Credit Hours)
Pre-requisites: Junior standing, C- or better in SPRT 130 and BSAD 343
This course examines the collection and analysis of data to enhance decision making within sport. The course reviews analytic usage across different sport management segments such as finance, marketing, sales and logistics. Additionally, data and analytics within sport performance, wearable technology, coaching and player management are investigated.
Outcomes:
Obtain introductory knowledge and technical competence using statistical and analytical software; Determine and perform appropriate statistical analysis to think critically; reason, analyze and problem solve sport industry specific issues

SPRT 395 Independent Study (1-3 Credit Hours)
This course will provide independent study opportunity in Sports Management.

SPRT 399 Special Topics in Sport Management (1-3 Credit Hours)
Pre-requisites: Junior Standing & C- or better in SPRT 130
No course description is available

SPRT 532 Sport Law (3 Credit Hours)
This course examines and analyzes legal issues connected to amateur and professional sport associated with the fundamental concepts of law, sport business structure and legal authority and understanding the process of legal research. Students will comprehend the legal and court system, legal process, and the fundamental concepts of common, statutory, and constitutional law; perform and analyze sport law research; understand the elements of negligence; discuss recent court interpretations; and recommend a risk management standard of practice in the sport industry.

Statistics (STAT)

Discover, search, courses (p. 2661)!

STAT 103 Fundamentals of Statistics (3 Credit Hours)
This course provides an introduction to statistical reasoning and techniques in descriptive and inferential statistics and their applications in economics, education, genetics, medicine, physics, political science, and psychology. Not open to students who have completed ISOM 241.
Knowledge Area: Quantitative Knowledge
Course equivalencies: ISSCM/H/241/STAT103/ACST101/03
Outcomes:
Students will obtain a background in the fundamentals of descriptive and inferential statistics along with an understanding of their uses and misuses; This course satisfies the quantitative literacy requirement of the core curriculum

STAT 203 Introduction to Probability & Statistics (3 Credit Hours)
Pre-requisites: MATH 132 or MATH 162 or MATH 162A; MATH 162 may also be taken concurrently as a co-requisite
This course is a Calculus-based rigorous introduction to basic topics in probability (distributions, expectations, variance, central limit theorem and the law of large numbers) and statistics (estimation, hypothesis testing, regression, design of experiments) needed in engineering and science applications.
Outcomes:
Students will obtain required knowledge in probability and statistics useful in every area of engineering and science; They will learn how to assess data and outcomes of experiments

STAT 303 SAS Programming and Applied Statistics (3 Credit Hours)
Pre-requisites: STAT 103, STAT 203, or STAT 335
This course provides an introduction to SAS programming in the context of practical problems taken from applied statistics.
Outcomes:
Students obtain extensive experience with data-set manipulations, SAS procedures, and their application in contexts such as t-tests, simple and multiple regression, ANOVA, and regression

STAT 304 Introduction to Probability (3 Credit Hours)
Pre-requisites: MATH 263 or MATH 263A (may also be taken as Corequisites)
This course provides a calculus based introduction to probability theory, including topics such as combinatorial analysis, conditional probability, and a variety of statistical distributions.
Course equivalencies: X-MATH304/STAT304
Outcomes:
Students obtain the theoretical background in probability needed for further study in probability and statistics

STAT 305 Introduction to Mathematical Statistics (3 Credit Hours)
Pre-requisites: STAT 304
This course is a continuation of STAT 304 and applies the techniques of calculus and probability to the study of advanced topics in statistics.
Course equivalencies: X-MATH305/STAT305
Outcomes:
Students obtain the theoretical background in statistics needed for graduate level work in probability and statistics

STAT 306 Introduction to Stochastic Processes (3 Credit Hours)
Pre-requisites: (STAT 203 or STAT 335) and (MATH 212 or MATH 266)
This course addresses topics such as finite-state Markov chains, classification of states, long-run behavior, birth and death processes, random walks, Poisson processes and their variations, and Brownian motion.
Course equivalencies: X-MATH306/STAT306
Outcomes:
Students will obtain a background in stochastic processes and apply this in areas like biology, social science, sports, and finance

STAT 307 Statistical Design & Analysis of Experiments (3 Credit Hours)
Pre-requisites: (STAT 203 or STAT 335 with a C- or better) and STAT 308 with a C- or better
This course discusses comparative experiments, analysis of variance and covariance, fixed and random effects models, and a variety of experimental design models including cross-over and split plot designs; contemporary statistical software will be used extensively.
Outcomes:
Students will obtain the background in statistical design and analysis of experiments needed to apply them in their own areas of interest

STAT 308 Applied Regression Analysis (3 Credit Hours)
Pre-requisites: STAT 203 or 335
This course discusses simple and multiple linear regression methods, multiple comparison estimation procedures, residual analysis, and other methods for studying the aptness of a proposed regression model; contemporary statistical software will be used extensively.
Outcomes:
Students will obtain an extensive background in the applications of regression analysis and computer coding of regression models

STAT 310 Categorical Data Analysis (3 Credit Hours)
Pre-requisites: (STAT 203 or STAT 335) and (STAT 303 or STAT 308)
An introduction to modern-day extensions of simple linear regression and ANOVA to the chi-square test including logistic regression and log-linear modelling techniques based on generalized linear models. Methods for matched-pair, small datasets, ordinal and multi-category data also discussed. This course focuses on applications using real-life data sets, and uses popular software packages.
Outcomes:
Students will obtain an extensive background in the applications of categorical data analysis methods

STAT 311 Applied Survival Analysis (3 Credit Hours)
Pre-requisites: STAT 308 (Applied Regression Analysis)
This course focuses on methods for analyzing time-to-event data. The course will explore non-parametric methods for analyzing time-to-event data like Life tables, the Kaplan-Meier method, the Nelson-Aalen method and the log-rank test. This course will also explore semi-parametric models such as the Cox proportional hazards regression models and parametric models including exponential, Weibull and log-logistic regression model.
Outcomes:
Derive survival and hazard functions from an underlying distribution, calculate survival probabilities and hazard rates, compare survival probabilities and hazard ratios between two or more cohorts

STAT 321 Computational Aspects of Modeling and Simulation (3 Credit Hours)
Pre-requisites: STAT 308
This course uses SAS and R languages to address statistical modelling and to conduct statistical simulations to assess linear, generalized linear, nonlinear and complex models and experimental designs.
Course equivalencies: X-STAT356/COMP321/STAT321
Outcomes:
Students will gain practical experience and knowledge in real-world statistical situations for which underlying theory is cumbersome or intractable

STAT 335 Introduction to Biostatistics (3 Credit Hours)
Pre-requisites: For Bioinformatics majors: BIOL 101 and (MATH 132, MATH 162, or MATH 162A); For all others: BIOL 102 and (MATH 132, MATH 162, or MATH 162A); MATH 162 may be taken as a Corequisite for all majors
This course provides an introduction to descriptive and inferential statistics in the biological sciences. Topics include data visualization, probability, discrete and continuous probability distributions, confidence intervals, t-tests, tests of proportions, chi-square tests, correlation, linear regression, and ANOVA. Contemporary computer software will be used to apply the methods.
Interdisciplinary Option: Bioinformatics, Forensic Science
Outcomes:
Students will be able to visualize data appropriately, properly design a statistical experiment, apply the correct statistical methods, and properly analyze the results

STAT 336 Advanced Biostatistics (3 Credit Hours)
Pre-requisites: STAT 203 or STAT 335
This course overviews applied statistical methods useful in biomedical modelling chosen from: experimental design, categorical data analysis including logistic regression, nonlinear regression, bioassay and synergy modelling, multivariate methods, survival statistics, and longitudinal data analysis techniques. Modern statistical software methods will be extensively used and illustrated.
Outcomes:
Students are expected to obtain expertise in applying this course's advanced biostatistical methods application areas including knowing how best to implement these methods, interpret results, and use statistical software output

STAT 337 Quantitative Methods in Bioinformatics (3 Credit Hours)
Pre-requisites: STAT 203 or STAT 335
This course develops the mathematical and statistical methods necessary to analyze and interpret genomic and proteomic data, including signal analysis, sequence alignment methods, data-base search methods useful in bioinformatics and data mining.
Interdisciplinary Option: Bioinformatics
Outcomes:
Students will obtain the quantitative skills used in BLAST, including inference, stochastic processes and hidden Markov models, random walks, microarray analysis and biological sequence analysis

STAT 338 Predictive Analytics (3 Credit Hours)
Pre-requisites: STAT 308
Students will study methods for predicting future events and properly classifying data using both supervised and unsupervised statistical learning techniques.
Outcomes:
Learn methods for predicting and classifying; Model Selection; Evaluate the effectiveness and accuracy of a model/prediction

STAT 344 Longitudinal Data Analysis and Mixed Modelling (3 Credit Hours)
Pre-requisites: (STAT 203 or STAT 335 with a C- or better) and STAT 308 with a C- or better or permission of the instructor
Repeated measures and longitudinal data are ubiquitous in studies, research and applications. This course explores methods for repeated measures, longitudinal (time-series), and nested/hierarchical data in a detailed manner. These methods take account of correlations between measurements by allowing each individual in a study to serve as their own control.
Outcomes:
Students are expected to master the analysis and interpretation of repeated measures, longitudinal, mixed, and nested/hierarchical data; This includes effectively using R, SAS or other software for these data analyses

STAT 351 Nonparametric Statistical Methods (3 Credit Hours)
Pre-requisites: STAT 203 or STAT 335 with C- or better
This course will cover the basic principles of nonparametric methods in statistics including: one, two and K sample location methods; tests of randomness; tests of goodness of fit; nonlinear correlation; histogram; density estimation; nonparametric regression. Students should learn how to apply the nonparametric techniques in real datasets, interpret the results and draw conclusions.

STAT 360 Introduction to Bayesian Statistics (3 Credit Hours)
Pre-requisites: STAT 308
An introduction to Bayesian data analysis and statistical inference. Topics include single and multiple Bayesian models, hierarchical models, Bayesian linear regression models. The course will also consider computational methods related to Bayesian inference such as Markov Chain Monte Carlo methods. Emphasis is placed on both theoretical understanding and practical implementation using statistical software.
Outcomes:
Students will understand the principles of Bayesian inference; implement and evaluate Bayesian models using computational tools; and effectively communicate Bayesian results in applied contexts

STAT 364 Introduction to Multivariate Statistics (3 Credit Hours)
Pre-requisites: STAT 308
This course introduces students to the concepts and methods used to analyze multivariate data in an applied context. Topics include exploring and visualizing multivariate data, linear algebra for multivariate methods, principal components and factor analysis, canonical correlation, discriminant and cluster analysis, multivariate normal distributions, MANOVA, and other dimensionality reduction techniques. Emphasis will be placed on interpreting results and applying methods using real-world data. Statistical software such as R will be used for computation and visualization.
Outcomes:
Students will be able to: 1) describe and visualize relationships among multiple variables in multivariate datasets; 2) apply linear algebra concepts relevant to multivariate analysis; 3) perform and interpret principal component and factor analyses; 4) communicate results from multivariate analyses clearly and effectively

STAT 370 Data Science Consulting (3 Credit Hours)
Pre-requisites: STAT 308
Students will work on a research project with a client acting as a consultant on the statistical and computational aspects of the project. Students are required to meet with a client, develop a strategy for addressing their problem, and present their results to the client (and their classmates).
This course satisfies the Engaged Learning requirement.
Outcomes:
1) Apply methods learned in classes to a address a real world problem; 2) Oral and Written presentation skills; 3) Collaboration skills

STAT 388 Topics (1-3 Credit Hours)
Pre-requisites: STAT 203 or STAT 335
This course covers advanced topics in statistics, such as multivariate analysis, sampling theory, non-parametric methods, decision theory, and Bayesian analysis.
Outcomes:
Students will obtain an understanding of an advanced topic in their major

STAT 390 Undergraduate Seminar (1 Credit Hour)
Pre-requisites: Senior Standing, including completion of MATH 304/ STAT 304
The seminar will cultivate students' presentation skills through participation in and critical discussion of brief lectures on familiar and unfamiliar topics; preparation and presentation of two brief lectures by the student (one on a familiar topic from the curriculum, one on a higher level material not customarily from the curriculum); and preparation of an extended abstract summarizing the advanced material presented.
Outcomes:
Students will gain the ability to present material in Statistics, and their applications to a general audience

STAT 391 Internship in Actuarial Science (1-3 Credit Hours)
Pre-requisites: STAT 304 and 396; approval of the internship director
This course offers an opportunity to obtain experience in actuarial science in a professional environment; placement requires approval of the internship coordinator and acceptance by an employer.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will obtain first hand experience doing actuarial work in a real world environment

STAT 396 Actuarial Seminar I (1 Credit Hour)
Pre-requisites: MATH 263
The seminar provides a comprehensive review of the probability topics that most commonly appear on the Actuarial Exam P. Topics covered include: axiomatic probability, combinatorial probability, conditional probability and Bayes' Theorem, independence, random variables and their various distributions, joint distributions, marginal distributions, conditional distributions of tow of more random variables.
Outcomes:
The purpose of the seminar is to prepare students for the Actuarial Exam P; The students will also learn test-taking strategies and will have the opportunity to take practice tests

STAT 397 Actuarial Seminar II (1 Credit Hour)
Pre-requisites: MATH 263
The seminar is a continuation of STAT 396. It provides a comprehensive review of topics in probability and risk management directed toward students preparing for the Actuarial Exam P. Additional topics may include order statistics, moment-generating functions, the Central Limit Theorem and risk analysis.
Outcomes:
The purpose of the seminar is to prepare students for the Actuarial Exam P; The students will also learn test-taking strategies and will have the opportunity to take practice tests

STAT 398 Independent Study (1-6 Credit Hours)
This course allows students to engage in independent study on selected topics in statistics under the supervision of a faculty member.
Outcomes:
Students will obtain an understanding of an advanced topic in their major

STAT 399H Honors Tutorial (1-3 Credit Hours)
This course allows students in the honors program to engage in independent study of selected topics in statistics for honors credit under the supervision of a faculty member.
Course equivalencies: STAT399H / STAT399
Outcomes:
Students will obtain an understanding of an advanced topic in their major

STAT 401 Introduction to Applied Statistics Using R (1 Credit Hour)
Pre-requisites: Limited to Graduate Students Only
This course covers the basics of applied statistics including descriptive statistics and visualization (including graphing), univariate methods, inference, hypothesis testing and confidence intervals, two-sample and paired analyses, simple and multiple linear regression, ANOVA and logistic regression. The course introduces and uses the R freeware package.
Outcomes:
Upon completion of this course, it is expected that students will skillfully and accurately perform real-time data analysis using R and R/Studio

STAT 403 SAS Program & Applied Statistics (3 Credit Hours)
While simultaneously reviewing basic statistical methods (t tests, regression, ANOVA, interaction, etc.), this course introduces statistical modelling using the SAS program, involving the DATA step and various SAS procedures. Working on hands-on projects using real datasets, students present their final project results.

STAT 404 Probability & Statistics I (3 Credit Hours)
As the first part in a two-semester sequence, this course introduces basic principles of probability including combinatorial methods, probability and cumulative density and mass functions, moment generating functions and applications, expected values and variance and other moments, and order statistics. This course emphasizes related theorems and proofs.
Course equivalencies: X-MATH404/STAT404

STAT 405 Probability & Statistics II (3 Credit Hours)
As the second part in a two-semester sequence, this course thoroughly explores the central limit theorem and its variants and uses, estimation, hypothesis testing, sufficiency, efficiency, uniformly most powerful methods, information, and asymptotic methods. Time permitting, Bayesian topics may also be explored and discussed.
Course equivalencies: X-MATH405/STAT405

STAT 406 Stochastic Processes (3 Credit Hours)
This course addresses topics such as finite-state Markov chains, classification of states, long-run behavior, birth and death processes, random walks, Poisson processes and their variations, and Brownian motion. In addition to applications, some theoretical derivations/proofs will also be emphasized.
Course equivalencies: X-MATH406/STAT406
Outcomes:
Students mastery of methods in stochastic processes and the ability to apply these in areas like biology, social science, sports, and finance

STAT 407 Statistical Design (3 Credit Hours)
This course provides students with a thorough introduction to statistical experimental design and to the statistical methods used to analyze the resulting data. The concepts of comparative experiments, ANOVA and mean separation procedures will be reviewed; blocking (complete and incomplete) will be discussed, as will be factorial designs, fractional factorial designs, and confounding. The course will focus on biometric applications such as clinical trials, HIV studies, and environmental and agricultural research, but industrial and other examples will occasionally be provided to show the breadth of application of experimental design ideas.

STAT 408 Applied Regression Analysis (3 Credit Hours)
This course provides students with a thorough introduction to applied regression methodology. The concept of simple linear regression will be reviewed and discussed using matrices, and multiple linear regression, transformations, diagnostics, polynomial regression, indicator variables, model building and multicolinearity will be discussed, as will be nonlinear and generalized linear regression. The course will focus on applications such as those from biometry and biostatistics (clinical trials, HIV studies, etc.), sports, engineering, agriculture and environmental science.

STAT 410 Categorical Data Analysis (3 Credit Hours)
This course provides an introduction to modern-day extensions of simple linear regression and ANOVA to the chi-square test including logistic regression and log-linear modeling techniques based on generalized linear models. Specialized methods for ordinal data, small samples, multi-category data, and matched pairs will also be discussed. The focus throughout this course will be on applications and real-life data sets.

STAT 411 Applied Survival Analysis (3 Credit Hours)
Modern statistical methods are covered to analyze data that is right, left and/or interval-censored. Nonparametric approaches such as the Kaplan-Meier estimation technique, log-rank test and proportional-hazards model are considered as are parametric methods such as those based on the Exponential and Weibull distribution. Accelerated failure time models and nonlinear models are also discussed.

STAT 421 Math Modeling & Simulation (3 Credit Hours)
This course uses SAS, R and high-level languages to perform statistical modelling by conducting statistical simulations to assess linear, generalized linear, nonlinear and complex models and experimental designs. Students will gain practical experience and knowledge in real-world statistical situations for which underlying theory is cumbersome or otherwise intractable.
Course equivalencies: X-COMP421/MATH421/STAT421

STAT 426 Advanced Statistical Inference (3 Credit Hours)
This course presents the role of likelihood methods in a whole range of statistical problems. The course reviews theoretical developments such as efficiency, completeness, and the Cramer-Rao lower bound, and shows how the likelihood approach is used to surpass these methods and to analyze regression problems, to deal with nuisance parameters by using marginal likelihood methods, and to deal with complex data structures such as censored and spatial data.

STAT 436 Topics in Biostatistics (3 Credit Hours)
This course covers experimental design (including interaction, analysis of covariance, and crossover designs) and the analysis of designed studies, simple and multiple linear regression, generalized linear and nonlinear regression, bioassay, relative potency and drug synergy, multivariate analysis (including MANOVA and multivariate regression), repeated measures (designs and analysis), and survival analysis (Cox proportional odds, log-rank tests, Kaplan-Meier estimation) of censored data. The emphasis of the course will be on applications instead of statistical theory, and students will be required to analyze real-life datasets using popular statistical packages.

STAT 437 Quantitative Bioinformatics (3 Credit Hours)
This course explores recently developed mathematical, probabilistic and statistical methods currently used in the fields of bioinformatics and DNA microarray and protein array data analysis. These include stochastic processes, (hidden and traditional) Markov chains, tree- and clustering techniques (including principal components analysis and biplots), discriminant analysis, experimental design strategies and ANOVA methods. Our focus in this course is on the application of these techniques and on meaningful interpretation of results.

STAT 438 Introduction to Predictive Analytics (3 Credit Hours)
Pre-requisites: Graduate students only
This course focuses on finding patterns, associations, and relationships in data. In examining real-world datasets, this course highlights, develops and applies methods in simple and multiple linear and logistic regression, classification and discriminant analysis, resampling methods, model selection, additive models and splines, tree-based methods, support vector machines, and unsupervised learning techniques such as clustering and PCA.
Outcomes:
Upon completion of this course, it is expected that students will master applied methods in predictive analytics (using R and/or Python) with applications to real data-sets

STAT 444 Longitudinal Data Analysis and Mixed Modeling (3 Credit Hours)
Pre-requisites: Graduate Students only
This course focuses on repeated measures, longitudinal, hierarchical and mixed modeling data analysis with an eye to applications, model identification, software implementation, and interpretation of computer results.
Outcomes:
Upon completion of this course, it is expected that students will master applied mixed-modelling methods (using R and/or SAS) with applications to real data-sets

STAT 451 Applied Nonparametric Methods (3 Credit Hours)
Pre-requisites: Graduate Students only
Many basic statistical techniques are based upon normal or binomial distributional assumptions which may not be appropriate in practice. This course introduces and illustrates rank-based methods, permutation tests, bootstrap methods, and curve smoothing useful to analyze data when normal and/or binomial assumptions are not valid.
Outcomes:
Upon completion of this course, it is expected that students will master applied nonparametric statistical methods (using R and/or SAS) with applications to real data-sets

STAT 460 Bayesian Statistical Methods (3 Credit Hours)
Pre-requisites: STAT 308 or STAT 408
A graduate-level treatment of Bayesian methods for data analysis focusing on the theoretical foundations and computational strategies for modern Bayesian inference. Topics include the formulation and analysis of single- and multi-parameter Bayesian models, hierarchical and multilevel structures, and Bayesian generalized linear models. The course will also consider advanced Markov Chain Monte Carlo computational techniques such as Gibbs sampling, Metropolis-Hastings algorithm, and Hamiltonian Monte Carlo. Emphasis is placed on both the mathematical underpinnings of Bayesian analysis and the implementation of complex models using contemporary software tools.
Outcomes:
By the end of the course, students will be able to: formulate and analyze complex Bayesian models; compare and select complex Bayesian models; critically interpret and communicate Bayesian analyses in research settings; extend basic Bayesian methods to advanced/nonstandard models

STAT 464 Multivariate Statistical Methods (3 Credit Hours)
Pre-requisites: STAT 308 or STAT 408
The course emphasizes both the theoretical foundations and applied aspects of multivariate analysis. Students will examine data exploration, inference, and model-based approaches, including principal components, factor and canonical correlation analysis, discriminant and cluster analysis, MANOVA, and modern dimensionality reduction techniques. The course will also introduce extensions of these methods and encourage critical evaluation of their assumptions and limitations. Statistical software, such as R, will be used for implementation and analysis.
Outcomes:
By the end of the course students will be able to: explain and analyze the theoretical framework underlying common multivariate methods; derive and interpret results from principal component and factor analyses; apply and critique modern dimensionality reduction and visualization techniques

STAT 465 Actuarial Theory I (0 Credit Hours)
This course provides an introduction to the models and methods used in actuarial mathematics and risk theory. Students are expected to gain a broad understanding of frequency and severity modelling, pricing, and accumulated risk. This course includes a blend of theory and applications.
Course equivalencies: X-MATH465/STAT465

STAT 466 Actuarial Theory II (0 Credit Hours)
With an introductory background in the field provided in STAT 465, this course thoroughly explores modelling and estimation techniques in actuarial mathematics and risk theory.
Course equivalencies: X-STAT466/MATH466

STAT 468 Risk Theory (0 Credit Hours)
With a focus on insurance, pensions and investments, this course provides an overview of the theory of risk, emphasizing the statistical challenges and assumptions inherent in models and methods.
Course equivalencies: X-STAT468/MATH468

STAT 488 Topics in Statistics (1-3 Credit Hours)
This topics course provides the means for new courses on current or 'hot' topics to be offered to students, with the topics being crafted to the given topic at hand. As such, the course may be taken repeatedly.

STAT 495 Statistical Consulting Capstone (2 Credit Hours)
Pre-requisites: Graduate Students only
Students enrolled in this course will be introduced to statistical consulting techniques useful for work with researchers and decision-makers in university, medical, financial and industrial settings; students will engage in actual hands-on statistical consulting with administrators, researchers, or students at one of Loyola's lakeside campuses or remotely.
Outcomes:
Upon completion of this course, it is expected that students will master the soft-skills of statistical consulting, communication, active listening, and real-time data analysis

STAT 498 Independent Study Statistics (1-6 Credit Hours)
Working with a statistics faculty member on a one-on-one or small group format, this course affords students the opportunity to thorough explore a statistical topic at greater depth. Generally, it involves a good deal of outside reading and/or programming, and weekly meetings with the professor.

Supply Chain Management (SCMG)

Discover, search, courses (p. 2661)!

SCMG 232 Introduction to Supply Chain Management (3 Credit Hours)
Introduction to the concept of supply chain management, including a broad overview of main functional roles such as procurement, transportation, and inventory. Introduction to best practice methods for planning and managing supply chains, including how to do so efficiently, ethically, and sustainably. Methods include analytics and lean management.
Course equivalencies: SCMG332/332H/SCMG232/232H
Outcomes:
Understanding of fundamental activities in supply chain management, methodologies to support those activities, and how they impact a firm both in terms of its profit and its impact on society and the planet

SCMG 232H Introduction to Supply Chain Management-Honors (3 Credit Hours)
Introduction to the concept of supply chain management, including a broad overview of main functional roles such as procurement, transportation, and inventory. Introduction to best practice methods for planning and managing supply chains, including how to do so efficiently, ethically, and sustainably. Methods include analytics and lean management.
Course equivalencies: SCMG332/332H/SCMG232/232H
Outcomes:
Understanding of fundamental activities in supply chain management, methodologies to support those activities, and how they impact a firm both in terms of its profit and its impact on society and the planet

SCMG 332 Operations Management (3 Credit Hours)
Pre-requisites: Sophomore standing and minimum grade "C-" ISSCM 241
Introduction to concepts and methods for managing production and service operations. Topics include demand forecasting, aggregate and capacity planning, inventory management, facility layout and location, just-in-time, managing quality, project planning, resource allocation, and logistics.
Course equivalencies: SCMG332/332H/SCMG232/232H
Outcomes:
Understanding of basic issues and role of operations management in organizations, and of tools for problem-solving in operations management

SCMG 332H Operations Management - Honors (3 Credit Hours)
Pre-requisites: Sophomore Standing or above; minimum grade of "C-" in ISSCM 241 or ISSCM 241H; Restricted to SBA Honors Students
Introduction to concepts and methods for managing production and service operations. Topics include demand forecasting, aggregate and capacity planning, inventory management, facility layout and location, just-in-time, managing quality, project planning, resource allocation, and logistics.
Course equivalencies: SCMG332/332H/SCMG232/232H
Outcomes:
Understanding of basic issues and role of operations management in organizations, and of tools for problem-solving in operations management

SCMG 337 Inventory and Warehouse Management (3 Credit Hours)
Pre-requisites: Sophomore Standing; minimum grade of "C-" in SCMG 332 or SCMG 332H or SCMG 232 or SCMG 232H; INFS 247 or INFS 247H; ISSCM 241 or ISSCM 241H or STAT 103
This course explores strategies for efficient and environmentally sustainable management of inventory in supply chains. Topics include inventory tracking and classification, warehousing activities, and inventory replenishment strategies. Emphasis is placed on the development and implementation of quantitative decision-making models.
Course equivalencies: OPMG337 / MGSC337
Outcomes:
Students will understand how material flows through a warehouse and the primary tasks involved in a warehouse (receiving, order picking, put-away, etc); Understand how to measure and improve key performance indicators related to warehousing and inventory management (inventory turns, days of supply, etc); Identify, understand, and implement different inventory review strategies (periodic vs continuous) and replenishment policies; Gain experience with using spreadsheet tools and simulation software to support supply chain decision-making

SCMG 338 Global Transportation (3 Credit Hours)
Pre-requisites: Sophomore Standing; Minimum grade of "C-" in SCMG 332 or SCMG 332H or SCMG 232 or SCMG 232H; INFS 247 or INFS 247H; ISSCM 241 or ISSCM 241H or STAT 103
The goal of this course is to give students exposure to and understanding of how freight transportation is managed within the supply chain, with a special emphasis on sustainability. Students will learn how different modes of transport, cost structures, and environmental considerations interact to shape strategic and operational decisions in global logistics.
Interdisciplinary Option: Global Studies, International Business
Course equivalencies: OPMG338 / MGSC338
Outcomes:
Students will develop an understanding of the role of transportation within the supply chain and how it is managed; Gain familiarity with key transportation management techniques that support the creation of more sustainable and efficient supply chains

SCMG 340 Global Procurement (3 Credit Hours)
Pre-requisites: Sophomore Standing; minimum grade of "C-" in SCMG 332 or SCMG 332H or SCMG 232 or SCMG 232H; ISSCM 241 or ISSCM 241H or STAT 103
This course introduces students to the core principles of sourcing and supplier management, emphasizing real-world applications. It presents best practices in sourcing and supplier management and covers specific areas such as spend management, risk management, contract management, and supplier scorecards. It also highlights integral complementary processes such as inventory management, logistics and order fulfillment.
Outcomes:
Students will engage in discussions about best practices in global procurement and analyze their application; Research a global organization that performs sourcing and supplier management and present findings to the class; Participate in discussions on emerging topics like spend management, risk, contract management and scorecards; Analyze a sourcing and supplier management strategy to present to a Board of Directors

SCMG 341 Supply Chain Analytics (3 Credit Hours)
Pre-requisites: Junior Standing; minimum grade of "C-" in SCMG 332 or SCMG 332H or SCMG 232 or SCMG 232H; INFS 247 or INFS 247H; ISSCM 241 or ISSCM 241H or STAT 103
This course introduces students to the application of business and data analytics across key supply chain functions. Students learn to identify, manipulate, visualize, and model data to support strategic and operational decision-making in modern supply chains. Topics include demand forecasting, customer segmentation and cohort analysis, supplier selection and risk assessment, inventory classification and prediction, and supply chain performance measurement. Through hands-on use of a widely used programming software and real-world business cases, students develop the skills to design, execute, and communicate business analytics projects that enhance supply chain performance, profitability, and sustainability.
Course equivalencies: ISOM341 / MGSC341
Outcomes:
Students will develop an understanding of the fundamental concepts and tools used to analyze\\nand improve core supply chain functions through business and data analytics; Students will be able to identify and describe key data sources and performance metrics related to demand, customer, supply, and inventory management; Prepare, visualize, and analyze supply chain data using widely used programming software; Apply forecasting, segmentation, and classification techniques to real supply chain problems\\nsuch as demand prediction, customer analysis, supplier evaluation, and inventory classification; Interpret and communicate analytics results to support decision-making

SCMG 342 Supply Chain Optimization (3 Credit Hours)
Pre-requisites: Junior Standing; minimum grade of "C-" in SCMG 332 or SCMG 332H or SCMG 232 or SCMG 232H; INFS 247 or INFS 247H; ISSCM 241 or ISSCM 241H or STAT 103
This course studies various analytical methods and tools for making decisions that will lead to cost effective products, services and processes. Topics include developing decision-making optimization models and implementing those models in Excel. The course will highlight models used in supply chain management; including facility location, transportation network design and vehicle routing.
Outcomes:
Students will develop an understanding of optimization modeling, implementing optimization models in Excel and problem-solving techniques; Students will learn how to build and solve decision-making optimization and simulation models in Excel to develop skills in spreadsheet modeling/optimization/engineering

SCMG 346 Analytics for Social Good (3 Credit Hours)
Pre-requisites: Junior Standing; minimum grade of "C-" in SCMG 332 or SCMG 332H or SCMG 232 or SCMG 232H; INFS 247 or INFS 247H; ISSCM 241 or ISSCM 241H or STAT 103
This course introduces students to the application of analytics methods in the context of humanitarian, nonprofit, public health, and public service supply chains. Students will develop foundational skills in probability, descriptive analytics, data visualization, simulation, and predictive modeling using Excel and Python. Through cases and projects, students will apply these tools to analyze and address challenges in socially focused supply chain and operations settings.
Outcomes:
Students will be able to use data-driven methods to evaluate, interpret, and communicate solutions to operational problems in social-good contexts; Develop technical proficiency in key analytics methods, including descriptive analysis, data visualization, probability, simulation, predictive modeling, and clustering techniques, using Excel and Python; Understand the unique goals and challenges of humanitarian, nonprofit, public health, and public service supply chains, and apply analytics to address real-world problems in these contexts; Analyze, interpret, and solve operational problems by applying quantitative methods and evaluating the trade-offs between various objectives in social-good contexts; Communicate findings effectively through concise briefs, reports, and presentations tailored to both technical and non-technical stakeholders; Work collaboratively to design and evaluate data-driven solutions for case-based and project-based problems; Reflect on the broader ethical and societal implications of applying analytics in social-good contexts

SCMG 383 Service and Operations Management (3 Credit Hours)
Pre-requisites: Junior Standing; minimum grade of "C-" in SCMG 332 or SCMG 332H or SCMG 232 or SCMG 232H; ISSCM 241 or ISSCM 241H or STAT 103
This course introduces analytical methods and managerial tools for improving the design and control of service and operations systems. Topics include process analysis, capacity planning, queuing theory, Lean management, quality improvement, and forecasting. The course places special emphasis on applications in healthcare operations, such as patient flow, scheduling, and resource utilization.
Course equivalencies: ISOM383 / MGSC383
Outcomes:
Students will learn to analyze processes, evaluate capacity, manage variability, and enhance quality and efficiency in manufacturing and service operations; Understand and analyze processes using operations management concepts; Evaluate capacity and flow to identify bottlenecks and recommend improvements; Apply queuing theory to model waiting lines and design more effective service systems; Use Lean principles and statistical process control to reduce waste and improve quality in healthcare and service operations; Develop and interpret forecasts for demand and resource planning in service systems; Integrate analytical tools and managerial thinking to make evidence-based operational decisions

SCMG 395 Independent Study in Operations Management (1-3 Credit Hours)
Independent study is in-depth research or reading, initiated by the student and jointly developed with a faculty member in a specialized area of Operations Management not otherwise covered by departmental course offerings. Variable Credit. May count for Operations Management major or minor. Permission of Assistant Dean required.

SCMG 396 Supply Chain Seminar (0 Credit Hours)
Professional speaker series for all students majoring in Supply Chain Management. Students will benefit from hearing professionals in the supply chain industry discuss current events, opportunities and challenges within the industry.

SCMG 399 Special Topics in Operations Management (1-3 Credit Hours)
Special topics are scheduled classes offered on an ad hoc basis. Specific titles, prerequisites and content will vary.

SCMG 480 Intro to Operations Management (3 Credit Hours)
Introduction to concepts and methods for managing operations in manufacturing and service organizations. Topics typically include forecasting, capacity and aggregate planning, material requirements planning, scheduling, facility layout and location, inventory management, just-in-time, total quality management, project planning, and logistics.
Course equivalencies: ISOM480 / MGSC480
Outcomes:
Students will understand the basic issues and role of operations management in organizations and learn tools for problem-solving in operations management

SCMG 480B Operations Management (3 Credit Hours)
Pre-requisites: Restricted to MBA Baumhart Scholars students
This course explores concepts and methods for managing operations, including forecasting, capacity and aggregate planning, sustainable management, material requirements planning, scheduling, project planning, logistics, supply chain transparency, and supplier diversity.
Outcomes:
Students will understand the basic issues and role of operations management in organizations and learn tools for problem-solving in operations management

SCMG 480C Intro to Operations Management (3 Credit Hours)
Pre-requisites: Enrollment is restricted to students in the Healthcare Management MBA Program
Introduction to concepts and methods for managing operations in manufacturing and service organizations. Topics typically include forecasting, capacity and aggregate planning, material requirements planning, scheduling, facility layout and location, inventory management, just-in-time, total quality management, project planning, and logistics.
Outcomes:
Students will understand the basic issues and role of operations management in organizations and learn tools for problem-solving in operations management

SCMG 481 Performance Improvement in Business Processes (3 Credit Hours)
Focuses on process view of the organization and provides students with a formal approach to designing, monitoring and improving business processes. The course provides the tools, methods and practical examples to help managers learn how to think from a process standpoint and how to ensure critical processes are controlled and functioning efficiently and effectively in their organization.
Course equivalencies: ISOM481 / MGSC481
Outcomes:
Understanding of the quality management concepts, performance improvement frameworks (Six Sigma, ISO, Baldridge), and process improvement practices using a step-by-step problem solving methodology

SCMG 481E Performance Improvement in Business Processes (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Focuses on teaching students how to successfully analyze a business process, research methods for improving a process, and adapt/integrate the improvement methods into the business process in a prioritized and actionable manner. The course accomplishes this through the concepts of benchmarking, best practices, and performance improvement principles.
Course equivalencies: OPMG 603E/OPMG 481E

SCMG 482 Lean Production Concepts and Practices (3 Credit Hours)
Methods for managing manufacturing and service operations based upon Toyota Production System. Topics include the principles of JIT and lean production, pull production, setup reduction, preventive maintenance, cellular manufacturing, standard operations, visual management, employee empowerment, and supplier partnerships.
Course equivalencies: ISOM482 / MGSC482
Outcomes:
Understanding of concepts and tools for reducing waste and continuously improving operations based upon Toyota's success-proven approach

SCMG 483 Management of Service Operations (3 Credit Hours)
Pre-requisites: SCMG/ISSCM 480
This course explores the application of operations management concepts and techniques in service-sector organizations, and, in particular, how services are delivered to the customer.
Course equivalencies: OPMG483/CSIS483
Outcomes:
Understanding how service management requires unique tools for managing customer expectations while simultaneously delivering services that exceed those expectations

SCMG 486 Global Logistics (3 Credit Hours)
Pre-requisites: Graduate School of Business student
This course examines how business partners along the supply chain can work together to gain competitive advantage in moving products and services around the world to satisfy customers.
Outcomes:
Understanding best practices like vendor-managed inventory and category management, and the application of information technologies for sharing information

SCMG 486E Global Supply Chain Management (1.5 Credit Hours)
Explores the current business revolution in global logistics and partnering by members of the supply chain to more effectively provide products and services to customers. Must be part of the Cohort of Executive MBA (EMBA) students to enroll.

SCMG 487 Purchasing Management (3 Credit Hours)
Pre-requisites: Graduate School of Business students
A study of organizational procurement processes and decision making framework. Topics include in-sourcing/out-sourcing decisions based on total cost of ownership; purchasing cycle and processes; developing material and technical specifications; supplier evaluation, selection and management; supplier quality management; purchasing capital goods and services; global sourcing and e-commerce; and purchasing tools and analytics.
Outcomes:
Students will have developed an understanding of fundamental and strategic issues in material planning and procurement, with the ability to source in a global marketplace

SCMG 488 Inventory Management (3 Credit Hours)
Pre-requisites: Graduate School of Business students
A study of the fundamental principles of effective management of inventory with emphasis on inventory costs, product stratification, performance measures, demand forecasting, periodic and continuous review, safety stock, material requirements planning, customer service and use of technology in inventory management. Issues related to storage and handling of inventory stock are also studied.
Outcomes:
Students will have developed an understanding of the issues involved in planning, managing and control of inventories and materials in a supply chain

SCMG 489 Supply Chain Analytics (3 Credit Hours)
Pre-requisites: Graduate School of Business students
A study of the design, development, and use of decision models for analysis of supply chain problems. This course provides an example-driven approach to learn about important supply chain models, problems, and solution methodologies. The objectives of this course are to develop valuable modeling skills that students can appreciate and use effectively.
Outcomes:
Students will have developed an understanding of the issues involved in the use of decision support tools for analysis of supply chain problems

SCMG 499 Independent Study-Production & Operations Management (3 Credit Hours)
Independent study is in-depth research or reading, initiated by the student and jointly developed with a faculty member, into a specialized area of operations management not otherwise covered by department course offerings.

SCMG 589 Supply Chain Management Consulting (3 Credit Hours)
Pre-requisites: SCMG 480 Intro to Operations Mgmt; Graduate School of Business students
This course is the capstone of the Supply Chain Management Portfolio of the Master of Science in Supply Chain Management curriculum. As such, it is designed to integrate course topics covered in the foundation courses and engage students in discussions of critical supply chain leadership topics.
Outcomes:
Students will have developed an understanding of how to apply the concepts learned throughout the Supply Chain Management curriculum to a variety of full scale problems

SCMG 595 Risk Analysis for Business and Supply Chain Strategy (3 Credit Hours)
Pre-requisites: Restricted to Graduate School of Business students
This course introduces students to practical tools for evaluating complex choices under uncertainty, quantifying trade-offs, and generating managerial insights. Students will learn how to structure decision problems, build decision trees, conduct scenario planning, and model uncertainty to support strategic business decisions. Through case studies - ranging from investment decisions and project management to new product launches - students will see how these methods are applied in practice. Emphasis is placed on using software to address real-world risk analysis problems commonly encountered in supply chain management, finance, accounting, marketing, and business analytics contexts.
Outcomes:
Students will be able to design advanced decision-analysis models - including decision trees, scenario plans, and quantitative risk assessments; Students will be able to implement advanced decision-analysis models to evaluate complex business choices under uncertainty and generate defensible, data-driven managerial recommendations across functional contexts; Students will be able to apply specialized software tools to analyze risk scenarios, quantify trade-offs, and synthesize insights that inform strategic business and supply chain decisions

SCMG 603E Performance Improvement in Business Processes (1.5 Credit Hours)
Restricted to Executive MBA students. This course focuses on the process view of the organization and provides students with a formal approach to designing, monitoring and improving business processes. The course provides tools, methods and practical examples to help managers learn how to think from a process standpoint and how to ensure critical processes are controlled and function efficiently and effectively.
Course equivalencies: OPMG 603E/OPMG 481E
Outcomes:
Understanding the quality management concepts, performance improvement frameworks (Six Sigma, ISO, Baldridge), and process improvement practices using a step-by-step problem solving methodology

SCMG 799 Special Topics in Supply Chain Management (3 Credit Hours)
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

Teaching, Learning & Leading with Schls and Commun (TLSC)

Discover, search, courses (p. 2661)!

TLSC 110 The Profession and Our Program (TLLSC) (1 Credit Hour)
This module (course) introduces teacher candidates (students) to the profession and our program (TLLSC) with a focus on collaborative relationships within and among schools, families, and communities. This module (course) will expose teacher candidates (students) to specific knowledge and skill indicators necessary for educators to embody the dispositions of the profession.
This course satisfies the Engaged Learning requirement.
Outcomes:
Teacher candidates (students) will reflect on the knowledge, skills, and dispositions of educators with regard to teaching diverse students, the mission of Professionalism in Service of Social Justice, and the connection between research and practice related to collaborative relationships

TLSC 120 Bringing Language, Learning & Development Theory into Practice (2 Credit Hours)
In this module, students will observe and learn key principles and stages developmental and learning theories via clinical experiences in birth to grade 12 settings (including infant/toddler, preschool, elementary, middle, and high schools). The primary focus of these experiences is to explore the ways in which physical characteristics, communication skills, cognitive capacities, and social-emotional needs of children be used to understand theory and inform adult-child interaction and developmentally appropriate pedagogical practices in birth to grade 12 settings with both typically and atypically developing children.
This course satisfies the Engaged Learning requirement.
Outcomes:
Through guided observation, students will explore the ways in which social, cultural, and environmental contexts shape the development and cognitive processing at each age, and use this knowledge to inform recommendations for developmentally appropriate adult-child interaction and pedagogical practices with every age range from birth through grade 12

TLSC 130 Sequence One: 130 Community Immersion (1 Credit Hour)
This module (course) is designed to engage teacher candidates (students) in an authentic exploration of the inherent relationship between P-12 schools and the surrounding community. Teacher candidates (students) are introduced to the concepts of cultural and social capital as they work in small groups to explore a thematic component of these communities. Must be registered for TLSC 110 and TLSC 120 concurrently.
This course satisfies the Engaged Learning requirement.
Outcomes:
Teacher candidates (students) will complete a Community Map Project, which includes a map of community elements, concept map depicting the relationship between elements and resources, narrative analysis of findings, and personal reflection

TLSC 140 Teaching, Learning and Leading for Social Justice (1 Credit Hour)
Pre-requisites: (TLSC 110, 120, and 130 (may also be taken as Corequisites)) OR CIEP 360; Restricted to All SOE Undergraduate Majors
This module (course) builds on candidates' initial explorations of diverse learning environments and continues to develop candidates' understanding of the School of Education's mission of professionalism in service of social justice and the core tenets of culturally responsive pedagogy. Candidates will complete a self-documentation project in which they explore their own identities and recognize how their thinking, behavior, and being are influenced by their own personal experiences, race/ethnicity, social class, language, religion, age, etc.

TLSC 150 Constructive Learning Environments For Diverse Students (1 Credit Hour)
Pre-requisites: (TLSC 110, 120, and 130 (may also be taken as Corequisites)) OR CIEP 360; Restricted to All SOE Undergraduate Majors
This module (course) deepens teacher candidates' introduction to learning and development through consideration of the importance of healthy learning environments. Candidates will complete a classroom management self-assessment and develop a related action plan for enhancing a constructive classroom environment.

TLSC 160 Analyzing Culturally-Responsive Classroom Instruction (1 Credit Hour)
Pre-requisites: (TLSC 110, 120, and 130 (may be taken as Corequisites)) OR CIEP 360; Restricted to All SOE Undergraduate Majors
This module (course) builds on candidates' initial explorations of learning and development and the core tenets of culturally responsive pedagogy as candidates are introduced to backward design and Universal Design for Learning. Candidates will conduct a lesson analysis to assess the effectiveness of a lesson based on established criteria for culturally responsive teaching.

TLSC 210 Educational Policy For Diverse Students (2 Credit Hours)
Pre-requisites: TLSC 140, 150, and 160 with a minimum grade of "C" or better; Restricted to All SOE Undergraduate Majors
This module (course) specifically engages teachers in looking at the policy related to diverse students in schools, particularly language policy (affecting ELLs and bilingual students) and special education policy (affecting students with special needs). Candidates will learn the policies, laws and court cases that impact classrooms, see how educational policies are enacted into classroom practice to support students, and make suggestions on continued ways to improve the achievement of students in urban classrooms and schools. Teacher candidates will explain the role of policy in educational practice, including the role of the teacher in advocating for change within the educational institution.

TLSC 221 Individualized Instruction and Assessment for Diverse Learners (1-2 Credit Hours)
Pre-requisites: TLSC 140, 150, and 160 with a minimum grade of "C" or better; Restricted to all SOE Undergraduate Majors
This module is designed for teacher candidates to appreciate, discern, and utilize the individual needs of students to plan instruction and support student achievement, particularly students with diverse learning and behavioral needs. Through the use of case study research to conduct individualized assessments with diverse learners, candidates will work with students with special needs or those at risk of this being identified as having a disability. Candidates will apply learning to the instructional context with academically, behaviorally, culturally, cognitively, and socially/emotionally diverse students.
Outcomes:
Use research and evidence-based practices to design instruction that includes the alignment of goals, objectives, assessments and instructional strategies to meet the individual needs of students; Use data to drive instruction and assess teaching and learning effectiveness; Apply deep understanding of both content and pedagogy to provide developmentally appropriate instruction to all students; Hold high expectations and build on the assets of diverse students (including, but not limited to, race, ethnicity, culture, language, SES, immigration status, exceptionality, ability, sexual orientation, gender, gender identity); Explicitly integrate the teaching of reading, writing, communication and technology across content area; Create and support safe and healthy learning environments for all students

TLSC 222 Authentic Assessment and Instruction for Bilingual Learners (2 Credit Hours)
Pre-requisites: TLSC 140, 150, and 160 with a minimum grade of "C" or better; Restricted to All SOE Undergraduate Majors
This module is designed for teacher candidates to appreciate, discern, and utilize the individual strengths and needs of students who speak a language other than English to plan instruction and support student achievement. Through the use of case study research, candidates conduct individualized, authentic assessments that focus on cultural backgrounds and language development of focal students. Candidates apply their learning with bilingual learners to support language and literacy development and acclimation to learning in the academic context
Outcomes:
Use research and evidence-based practices to design instruction that includes the alignment of goals, objectives, assessments and instructional strategies to meet the individual needs of students; Use data to drive instruction and assess the effectiveness of their teaching and students' learning; Apply deep understandings of both content and language pedagogy to provide developmentally appropriate instruction to students who are learning English as an added language, who may have interrupted schooling, and/or who may have experienced trauma as a result of their immigration experiences and/or dangerous issues in their home country; Hold high expectations and build on the assets of students from different cultural and linguistic backgrounds (including, but not limited to, ethnicity, culture, language, SES, immigration status); Integrate the teaching of language and literacy across all content areas and in ways that use a variety of media to do; and Create and support safe and supportive learning contexts for all students

TLSC 231 Teaching Science/Writing in Elem and Middle Grades (3 Credit Hours)
Pre-requisites: TLSC 210, TLSC 221, TLSC 222, Co-requisite TLSC 232; Minimum grade of "C"; Restricted to ELMS-BSED, SPED-BSED, BILI-BSED majors
This course introduces candidates (students) to the discipline and culture of science; provides experiences that engage candidates in the teaching and learning of science across varied school and non-school contexts; develops knowledge and skills to teach science through an inquiry approach and integrate writing.
This course satisfies the Engaged Learning requirement.
Outcomes:
Candidates will develop, implement, analyze, and reflect upon instructional and materials that ensure rigorous, relevant, inquiry-based science instruction is accessible to all students; Candidates complete an authentic personal inquiry project

TLSC 232 Integrated Teaching/Learning Social Studies & Writing in Elementary Grades (3 Credit Hours)
Pre-requisites: TLSC 210, TLSC 221, TLSC 222, Corequisite TLSC 231; Minimum grade of "C"; Restricted to ELMS-BSED, SPED-BSED, BILI-BSED majors
This introduces candidates (students) to the disciplines of the social studies; provides experiences engaging in the teaching and learning of elementary social studies across varied school and non-school contexts; develops knowledge and skills to teach social studies through an inquiry approach and integrate writing.
Outcomes:
Candidates will develop, implement, analyze, and reflect upon instruction that ensure rigorous, relevant, inquiry-based social studies instruction is accessible to all students; Candidates complete an authentic personal inquiry project

TLSC 240 Language, Culture, and Pedagogy in Bilingual Classrooms (3 Credit Hours)
Pre-requisites: TLSC 210, TLSC 221, AND TLSC 222 (Grade "C" or better); Restricted to BILI-BSED, and BILI-MINR
This module deals with bilingual education, schools, classrooms, and learners, with an emphasis on building off of students' cultural and linguistic resources to utilize and maintain native language. In order to accomplish these important building blocks of bilingual education, teacher candidates will inquire into and analyze the school's approach to family and community involvement with a specific lens on L1 maintenance and bilingualism. Candidates will engage with parents, families, and communities to inform the analysis of the school and classroom's alignment to language use in homes and communities.

TLSC 250 Developmentally Appropriate Practice with Infants/Toddlers & Their Families (3 Credit Hours)
Pre-requisites: TLSC 210, TLSC 221, and TLSC 222 (Minimum of "C" grade); Co-requisite: 251, 252, 253; Restricted to ECSE-BSED
Infants-Toddlers-EI 1 is the first of two clinically-based modules emphasizing specialized knowledge and skills for working with children from birth to age three in early intervention (EI) and EHS (Early Head Start) settings. This course explore current knowledge and research findings about high-quality, developmentally appropriate early childhood care and education in the context of programs for infants and toddlers (including those with special needs) and their families and is designed to prepare future teachers to fill the role of an effective early interventionist and infant/toddler specialist.
Outcomes:
As a result of this experience (which includes components related to assessment, intervention, work with families, and infant/toddler development), students will demonstrate proficiency at designing safe, supportive environments of nurturing care for infants and toddlers (including those with special needs) and their families by applying the principles of developmentally appropriate practice in curriculum design/delivery, assessment, and intervention

TLSC 251 Family-Centered Assessment and Intervention in Early Intervention (3 Credit Hours)
Pre-requisites: TLSC 210, TLSC 221, and TLSC 222 (Minimum of "C" grade); Co-requisite: 250, 252, 253; Restricted to ECSE-BSED
Infants-Toddlers-EI 1 is the second of two clinically-based modules emphasizing specialized knowledge and skills for working with children from birth to age three in early intervention (EI) and EHS (Early Head Start) settings. This course includes intensive clinical experiences in EI with infants and toddlers with special needs and their families, and is designed to complement Infants-Toddlers-EI 1 (Developmentally Appropriate Practice (DAP) with Infants/Toddlers and their Families) in preparing future teachers to fill the role of an effective early interventionist and infant/toddler specialist.
Outcomes:
As a result of this experience which (like I-T-EI 1) includes components related to assessment, intervention, diverse families, and infant/toddler development, students will develop their skills in working directly with families in designing assessment systems and interventions for infants and toddlers with special needs that address family resources, priorities, and needs

TLSC 252 Foundations, Settings, and Studies of Effective Early Childhood Education (1 Credit Hour)
Pre-requisites: TLSC 210, TLSC 221, and TLSC 222 (Minimum of "C" grade); Co-requisite: TLSC 250, TLSC 251, TLSC 253; Restricted to ECSE-BSED
This field-based module provides an introduction to the diverse settings in which children birth-8 are served. Candidates will investigate the interlaced professions of early childhood education and early childhood special education.
Outcomes:
Students will interpret and analyze trends in early care and education

TLSC 253 Developmentally Approp Practice Assmt&Intervention Young Children Spcl Nds (2 Credit Hours)
Pre-requisites: TLSC 210, TLSC 221, and TLSC 222 (Minimum of "C" grade); Co-requisite: TLSC 250, TLSC 251, TLSC 252; Restricted to ECSE-BSED
This course frames sequence 4 in the TLLSC teacher preparation program. It addresses knowledge and skills in understanding the development of young children with special needs and the implications of that understanding for assessment and intervention in birth to five.
Outcomes:
Candidates will develop classroom environments, curriculum, and instructional strategies for working with infants, toddlers, and preschoolers, as well as demonstrating mastery of authentic assessments required for IL state credentialing

TLSC 260 Typical and A-Typical Development (2 Credit Hours)
This module (course) further develops and deepens candidates' (students) understanding and application typical and a-typical development of youth. Candidates use information about human development to develop individualized support plans for students with special needs.
Outcomes:
Teacher candidates (students) will reflect information related to the ways children develop a-typically and develop a mock individualized support plan for review

TLSC 261 Significant Disabilities and Life Planning (2 Credit Hours)
This module (course) further develops and deepens candidates' (students) understanding and application of the develop support for people with disabilities. Candidates use information regarding special needs to identify appropriate support and intervention models.
Outcomes:
Teacher candidates (students) will apply information related to students with significant support needs within individualize education plans

TLSC 262 Assistive and Adaptive Technology (2 Credit Hours)
This module (course) further develops and deepens candidates' (students) understanding of support for people with disabilities. Candidates use information regarding special needs to identify appropriate assistive and adaptive technology supports.
Outcomes:
Teacher candidates (students) will apply information related to students with significant support needs when identifying assistive and adaptive technology to be incorporated within individualize education plans

TLSC 263 Transition Planning (2 Credit Hours)
This module (course) further develops and deepens candidates' (students) understanding of support for people with disabilities. Candidates use information regarding special needs to develop transition support plans.
Outcomes:
Teacher candidates (students) will apply information related to students with significant support needs when supporting the development of the transition components of individualized education plans

TLSC 300A Professional Learning Communities (0 Credit Hours)
Professional learning communities (PLCs) provide the opportunity to engage in collaboration with a community of learners - discussing and making meaning of all learning and experiences in schools and communities. At the close of each semester, following the completion of the PLCs by specialty area and submission of the summative assessments for other sequences, teacher candidates will reflect upon their personal and professional learning during that semester. Teacher candidates will (a) share learning from various school-based experiences, (b) apply learning through completion of summative assessments, and (c) synthesize learning through reflection and discussion related to EUs and dispositions.

TLSC 300B Professional Learning Communities (1 Credit Hour)
Professional learning communities (PLCs) provide the opportunity to engage in collaboration with a community of learners - discussing and making meaning of all learning and experiences in schools and communities. At the close of each semester, following the completion of the PLCs by specialty area and submission of the summative assessments for other sequences, teacher candidates will reflect upon their personal and professional learning during that semester. Teacher candidates will (a) share learning from various school-based experiences, (b) apply learning through completion of summative assessments, and (c) synthesize learning through reflection and discussion related to EUs and dispositions.

TLSC 310 Language and Literacy for Diverse Students (2 Credit Hours)
This module (course) introduces teacher candidates (students) to essential foundations in teaching reading. Emphasized will be skills developmentally appropriate for the candidate's teaching endorsement level including phonological awareness, phonics, vocabulary, fluency and text comprehension. A balance of instructional practices appropriate for a variety of narrative and informational texts will be included.
Outcomes:
Teacher candidates (students) will learn to design and teach lessons, focusing on standards based reading skills to linguistically diverse students, through use of research based reading strategies

TLSC 320 Using Classroom Data in a Collaborative Env to Advance Student Achievement (2 Credit Hours)
This module (course) develops candidates' ability to collect, represent, and analyze appropriate classroom data. Students will use this ability to determine the level of objective mastery and measure student growth. Reflection on the analysis will guide candidates' decisions regarding instructional adjustment and individual student needs
Outcomes:
Teacher candidates will be proficient in the use of data based decision making that informs instruction and guides students' academic and behavioral modifications

TLSC 325 Teaching Internship in Informal Education Settings (3 Credit Hours)
The internship experience builds on experiences teacher candidates have in the TLLSC program working with local museums. Candidates will complete internship hours on site at assigned museum, working directly with the museum's Ed department. In addition, they will participate in online seminar meetings designed to make sense of the internship experiences , digest the relevant literature and draw research to practice connections. Develop and assess personal learning objectives following Loyola Center for Experiential Learning protocols.

TLSC 326 Informal Science Education Seminar (3 Credit Hours)
This course examines current issues around teaching and learning in informal science education (ISE). Students will develop and apply an understanding of learning theories related to learning in informal science, collaborations between informal and formal science education, issues around access and equity, and research and evaluation related to informal science education.
Outcomes:
Describe characteristics of teaching and learning in informal science settings; Describe practices that support learning and development in informal science settings; Summarize theories and frameworks relevant to understanding teaching, learning and development in informal science settings; Explain the ways in which out-of-school science programs collaborate with and support in-school science teaching and learning; Explain challenges and barriers to collaboration between in and out of school science teaching and learning; Debate the strengths and challenges of particular programs and/or institutions in terms of promoting science interest, engagement, and learning; Critique efforts to broaden participation in informal science and learning, including people with physical disabilities, diverse learning needs, and from minority backgrounds; Summarize current and historical research and evaluation priorities, approaches and findings related to informal science education

TLSC 330 Discipline-Specific Literacy for Diverse Students (2 Credit Hours)
This module (course) supports teacher candidates (students) in developing their knowledge and skills in teaching and assessing literacy in discipline specific contexts. Emphasized will be the identification and use of culturally responsive texts, evidence based strategies, data based decision making skills and new literacies (technology and online resources) designed to target all students' literacy needs, including those with linguistically diverse backgrounds.
Outcomes:
Teacher candidates (students) will apply understanding of literacy lesson design, assessment and instruction in discipline specific contexts, They will be required to collect and utilize data to teach targeted standards based reading skills to linguistically diverse students and to utilize technology in their lesson delivery

TLSC 340 Teaching and Learning in an Area of Specialization (2 Credit Hours)
This module (course) further develops and deepens candidates' (students) understanding and application of designing instruction in an area of specialization. Candidates use data, select essential content, implement strategic pedagogy, and integrate technology to meet the needs of PreK-12
Outcomes:
Teacher candidates (students) will reflect on their implementation of the full instructional cycle and after analysis of the data generated from that instruction will identify research that informs instruction future teaching

TLSC 350 Teaching and Learning with a Global Framework (4 Credit Hours)
Teacher candidates (students) will work with PreK-12 teachers to develop and implement a transdisciplinary/interdisciplinary curriculum unit with a service component. This module's (course) experiences are specifically designed to prepare candidates (students) for teaching in schools that offer an International Baccalaureate program.
Outcomes:
Teacher candidates (students) assess their instruction using a global framework in this module (course) and develop an action plan to improve practice as they move into the final phase of the teacher preparation program

TLSC 360 Developing Rigorous and Relevant Instruction & Assessment (2-3 Credit Hours)
Pre-requisites: TLSC 350
Co-requisites: TLSC 370; TLSC 360 and 370 must be taken together; Register for TLSC 370 first
This module (course) requires candidates, with increasing independence and more limited support from a mentor teacher, to develop rigorous and relevant instruction and assessment. Candidates will demonstrate their ability to use individual student data to plan appropriate and relevant instruction and assessment for all.
Outcomes:
Teacher candidates will obtain and analyze a variety of individual and whole class data and use this data to inform their development of differentiated and rigorous instruction and assessment

TLSC 370 Design&Implement Rigorous&Rlvnt Instrctn&Assmt: Tching Perform Assmt Prep (2-3 Credit Hours)
This module (course) requires candidates, with increasing independence and more limited support from a mentor teacher, to implement rigorous and relevant instruction and assessment. Candidates will, while delivering the instructional unit designed in Module 7.1, be required to use a variety of assessments, provide reflection and feedback on the results of assessment using assessment data and make adaptations in order to improve student achievement.
Outcomes:
Teacher candidates will explain how what they have learned from the assessment data will influence their planning and future instruction for students

TLSC 380 Tching, Lrning & Leading with Schools & Communities Internship: Stud Tching (6-12 Credit Hours)
This module (course) represents the candidates' full-time student teaching experience. Candidates will complete three of the edTPA tasks required for certification (edTPA: Designing Instruction Task; edTPA: Assessing Learning Task; and edTPA: The Culminating Teaching Experience Task) in order to document and demonstrate each candidate's ability to effectively teach his/her subject matter. Candidates will also engage in focused reflection on student teaching and their entire teacher preparation program. Candidates will complete the School of Education's Professional Practice Profile (PPP) essay at the end of the module. This course satisfies the Engaged Learning requirement.
Outcomes:
Utilize research and evidence-based practices to design instruction that includes the alignment of goals, objectives, assessments and instructional strategies to meet the individual needs of students EU3; Create and support safe and healthy learning environments for all students EU9; Utilize information from theories and related research based practices when making decisions and taking action in their professional practice EU10; Maintain and utilize global perspectives and international-mindedness when engaging in teaching, learning and leading, including the awareness and application of the social, cultural, inter-cultural and linguistic facets of student achievement EU11; Enact principles of social justice in the school and community by focusing on the intellectual, social and emotional development of all students, promoting human rights, reducing inequalities, and increasing the empowerment of society's most vulnerable groups EU1; Hold high expectations and build on the assets of diverse students (including, but not limited to race, ethnicity, culture, language, SES, immigration status, exceptionality, ability, sexual orientation, gender, and gender identity) EU7; Engage in collaborative relationships with fellow teachers, school personnel, administrators, students, families and communities and promote collaboration among students to ensure the academic success, and social and emotional well-being of all students EU2; Design and implement standards-based units and lesson plans to maximize learning for all students by using an appropriate variety of assessments, culturally responsive practices, multiple resources/representations and questioning to encourage critical/high-order thinking inquiry and problem solving based on high expectations for each student's learning and behavior (3H, 3I, 3N, 3Q, 5I, 5L, 5M, 5Q, 5S, 7K, 7P, 8N, 9A) (IB) EU3 S2, S3, S5, S6, S9; Use data to evaluate and monitor students' needs, instruction and collaboration for impact on teaching and learning, (1C, 4L, 4N, 4Q, 5M, 5N, 5J, 8I, 8O, 8S, 9K, 9N) (IB) EU9 S7, S8; Demonstrate understanding and proficiency in core concepts, constructs and working principles from theories and research when making decisions and taking actions related to specific TLLSC EUs and EU indicators, (1C, 2A, 2B, 2C, 2I, 2J, 2G, 3A, 3Q, 4A, 4L, 5A, 5B, 5E, 5F, 5S, 6B, 6C, 7A, 7B, 7C, 7F, 9L) (IB) EU10 K1, K2, K3, K4, S1, S2; Demonstrate the ability to recognize and value student diversity and the differences in how students learn and provide instruction to accommodate such diversity, (1K, 2K, 5M, 7M, 8J) (IB) EU11 S2, S3, S4, S6; Support and deliver instruction in cooperation with their assigned co-teacher, (1H, 1I, 1L, 3I, 3J, 3M, 3P, 4C, 4K, 4N, 5I, 7P, 9J)(IB) EU1 S7, EU2 S8, EU4 S7; Provide a written analysis of each observed lesson, with a focus on their ability to make content accessible, the level of student engagement, the use of developmentally appropriate teaching practices, and the teaching of English language learners and students with special needs, (1H, 3J, 5H, 5K, 5M, 5P,7Q)(IB) EU3 S10, S11, S16, S18 EU4 S5; Reflect in writing and discussion on their ability to deliver and adapt relevant instruction and assessments, classroom management and professional interaction with teachers, students and families, (5H, 5J, 9K) (IB) EU6 S12 EU2 S9; Conduct regular pre- and post-observation conferences with Internship Coaches and Co-teachers to evaluate personal instructional style, preparation, use of technology, collaboration to promote learning and professional interactions to determine their impact on barriers to student learning, student success, self-esteem and inclusion (4K, 4N, 5K, 5M, 5N, 8I, 8J,8O, 8P,8S, 9C, 9K, 9N) (IB) EU9 S6, S8

TLSC 401 Language, Learning & Development Theories in Practice (2 Credit Hours)
Students will learn key principles and stages of language acquisition, developmental and learning theories through clinical experiences with children from birth to grade 12. Field experiences provide opportunities to explore ways in which physical characteristics, communication skills, cognitive capacities, and the social-emotional needs of children are used to understand theory and inform adult-child interaction and developmentally appropriate practice.
Outcomes:
Students will explore the ways in which social, cultural, and environmental contexts shape language, development and cognitive processing at each age, and use this knowledge to inform recommendations for developmentally appropriate adult-child interaction and pedagogical practices with every age range from birth through grade 12

TLSC 403 Teaching for Social Justice and Equity (3 Credit Hours)
This module targets candidates' understandings of the School of Education's mission of professionalism in service of social justice, the core tenets of culturally responsive pedagogy, and the applications via backwards design and Universal Design for Learning. Candidates will explore their own identities as future teachers and consider how teachers' identities and experiences transfer into and influence instructional practice with students.
Outcomes:
Candidates will complete a self-documentation project in which they explore their own identities and recognize how their thinking, behavior, and being are influenced by their own personal experiences, race/ethnicity, social class, language, religion, age, etc

TLSC 404 Constructive Learning Environments for Diverse Students (3 Credit Hours)
This module is designed for candidates to discern and utilize students' needs and design classroom environment and instruction to support learning and development. In this module, candidates hone knowledge and skills for working with students with special needs, specifically taking the lens on social, emotional, and behavioral needs.
Outcomes:
Candidates will demonstrate learning through the completion of a functional behavioral analysis (FBA) of one student within the specific environmental and instructional classroom context

TLSC 406 Educational Policy for Diverse Students (3 Credit Hours)
This module specifically engages teachers in looking at the policy related to diverse students in schools, particularly language policy (affecting ELLs and bilingual students) and special education policy (affecting students with special needs).
Outcomes:
Teacher candidates will explain the role of policy in educational practice, including the role of the teacher in advocating for change within the educational institution

TLSC 407 Individualized Assessment and Instruction for Diverse Students (3 Credit Hours)
This module is specifically designed for teacher candidates to appreciate, discern, and utilize the individual needs of students to plan instruction and support student achievement. In this module, student achievement is not only conceptualized as academic, but also social, emotional, behavioral, cultural, and linguistic. Through the use of case study research to conduct individualized assessments with diverse students, candidates will be able to apply learning to the instructional context with culturally, linguistically, and cognitively diverse students, specifically working with a labeled English language learner (ELL) and a student with special needs.
Outcomes:
Through the use of case study research to collect individualized, authentic language and literacy assessments, candidates will apply learning through work a labeled English learner

TLSC 410 Language, Culture and Pedagogy in Bilingual Classrooms (3 Credit Hours)
This module deals with bilingual education, schools, classrooms and learners with an emphasis on building off of students' cultural and linguistic resources to utilize and maintain native language. In order to accomplish these important building blocks of bilingual education, teacher candidates will inquire into and analyze the school's approach to family and community involvement with a specific lens on L1 maintenance and bilingualism.
Outcomes:
Candidates will engage with parents, families and communities to inform the analysis of the school and classroom's alignment to language use in homes and communities

TLSC 420 Teaching Mathematics in Elementary Grade Classrooms (2 Credit Hours)
This module introduces teacher candidates (students) to developmentally appropriate instruction in mathematics in the elementary grades and how to use assessment data to inform instruction.
Outcomes:
Teacher candidates will develop, teach, and reflect upon mathematics instruction that develops conceptual understanding, targets the use of Specialized Content Knowledge, guides student problem solving through extended response questions, builds mathematical knowledge, strategies and explanation

TLSC 421 Teaching Science in Elementary Grade Classrooms (2 Credit Hours)
Pre-requisites: Graduate Education Students Only
This module introduces candidates to the discipline of science, providing them experiences engaging in the teaching and learning of elementary science, and specifically works to help candidates integrate literacy into their science instruction. Candidates develop knowledge and skills needed to teach science through an inquiry approach and integrate literacy into their science teaching.
Outcomes:
Candidates will set and work towards professional development goals related to science content, science pedagogy, and science assessment; They will compile a portfolio of evidence to show they have worked towards their goals and reflect on how their understanding of science teaching and learning has shifted throughout the module

TLSC 422 Teaching Social Studies in Elementary Grade Classrooms (2 Credit Hours)
Pre-requisites: Graduate School of Education Student Only
This module introduces candidates to the disciplines of the social studies, providing them experience in the teaching and learning of elementary social studies, and specifically helps candidates integrate literacy into their social studies instruction. Candidates develop knowledge and skills needed to teach social studies through an inquiry approach and integrate literacy into their social studies teaching.
Outcomes:
Teacher candidates will develop and implement an interdisciplinary social studies unit over the course of the module and will develop an essay of demonstrating their understanding of role social studies plays in the elementary school curriculum

TLSC 425 Teaching Internship in Informal Education Settings (3 Credit Hours)
The internship experience builds on experiences teacher candidates have in the TLLSC program working with local museums. Candidates will complete internship hours on site at assigned museum, working directly with the museum's Ed department. In addition, they will participate in online seminar meetings designed to make sense of the internship experiences , digest the relevant literature and draw research to practice connections. Develop and assess personal learning objectives following Loyola Center for Experiential Learning protocols.

TLSC 426 Informal Science Education Seminar (3 Credit Hours)
This course examines current issues around teaching and learning in informal science education (ISE). Students will develop and apply an understanding of learning theories related to learning in informal science, collaborations between informal and formal science education, issues around access and equity, and research and evaluation related to informal science education.
Outcomes:
Describe characteristics of teaching and learning in informal science settings; Describe practices that support learning and development in informal science settings; Summarize theories and frameworks relevant to understanding teaching, learning and development in informal science settings; Explain the ways in which out-of-school science programs collaborate with and support in-school science teaching and learning; Explain challenges and barriers to collaboration between in and out of school science teaching and learning; Debate the strengths and challenges of particular programs and/or institutions in terms of promoting science interest, engagement, and learning; Critique efforts to broaden participation in informal science and learning, including people with physical disabilities, diverse learning needs, and from minority backgrounds; Summarize current and historical research and evaluation priorities, approaches and findings related to informal science education

TLSC 430 Typical and A-Typical Development (2 Credit Hours)
This module further develops and deepens candidates' understanding and application typical and a-typical development of youth. Candidates use information about human development to develop individualized support plans for students with special needs.
Outcomes:
Teacher candidates will reflect information related to the ways children develop a-typically and develop a mock individualized support plan for review

TLSC 431 Significant Disabilities and Life Planning (2 Credit Hours)
This module further develops and deepens candidates' understanding and application of the develop support for people with disabilities. Candidates use information regarding special needs to identify appropriate support and intervention models.
Outcomes:
Teacher candidates will apply information related to students with significant support needs within individualize education plans

TLSC 432 Assistive and Adaptive Technology (2 Credit Hours)
This module further develops and deepens candidates' (students) understanding of support for people with disabilities. Candidates use information regarding special needs to identify appropriate assistive and adaptive technology supports.
Outcomes:
Teacher candidates will apply information related to students with significant support needs when identifying assistive and adaptive technology to be incorporated within individualize education plans

TLSC 433 Transition Planning (2 Credit Hours)
This module further develops and deepens candidates' understanding of support for people with disabilities. Candidates use information regarding special needs to develop transition support plans.
Outcomes:
Teacher candidates will apply information related to students with significant support needs when supporting the development of the transition components of individualized education plans

TLSC 440 Language and Literacy (3 Credit Hours)
This module introduces candidates to the foundational knowledge for effective literacy instruction, including phonemic awareness, phonics, vocabulary, fluency, and comprehension. Candidates develop the knowledge and skills required for core curriculum based literacy instruction, then apply these skills and knowledge while designing and teaching lessons focused on supporting linguistically diverse students language and literacy development through the use of research based literacy strategies.
Outcomes:
Teacher candidates will learn to design and teach lessons, focusing on standard-based reading skills to linguistically diverse students through use of research based reading strategies

TLSC 442 Disciplinary Literacy (3 Credit Hours)
This module supports candidates in developing their knowledge and skills related to literacy in discipline specific contexts, with an emphasis on culturally responsive texts, evidence based strategies, data based decision making skills, and new literacies to target all students' literacy needs, including those with linguistically diverse backgrounds. Additionally, teacher candidates will collect, represent, and analyze classroom data, and use this analysis to adjust literacy instruction for students, as well as target individual students' needs. Teacher candidates will design and teach disciplinary literacy lessons using data based decision making, as well as technology during lesson delivery.
Outcomes:
Teacher candidates will apply understanding of literacy lesson design, assessment and instruction in discipline specific contexts; They will be required to collect and utilize data to teach targeted standards based reading skills to linguistically diverse students and to utilize technology in their lesson delivery

TLSC 443 Adolescent Literacy Instruction (3 Credit Hours)
This course focuses on developing effective instructional practices that promote the ongoing development of adolescent literac(ies) including essential reading skills, critical literacy skills, multimodal literacy skills, and disciplinary literacy skills. Foundational in the premise that all adolescents have and can develop a variety of literacies that facilitate reading the word to read the world, teacher candidates will develop a repertoire of strategies for building essential reading skills and developing academic language informed by CCSS and WIDA standards. They will also learn how to bring together their content knowledge, understandings of academic language and literacy, criticality, and the importance of using multimodal texts to create lessons that address the needs of all learners, including emerging bilinguals.
Outcomes:
Use research and evidence-based practices to design instruction that includes the alignment of goals, objectives, assessments and instructional strategies to meet the individual needs of students; Hold high expectations and build on the assets of diverse students (including, but not limited to race, ethnicity, culture, language, SES, immigration status, exceptionality, ability, sexual orientation, gender, and gender identity)

TLSC 450 Teaching and Learning in an Area of Specialization (3 Credit Hours)
This module further develops and deepens candidates' (students) understanding and application of designing instruction in an area of specialization. Candidates use data, select essential content, implement strategic pedagogy, and integrate technology to meet the needs of PreK-12 students in a particular curricular area.
Outcomes:
Teacher candidates will reflect on their implementation of the full instructional cycle and after analysis of the data generated from that instruction will identify research that informs instruction future teaching

TLSC 452 Advanced Foundations of Early Childhood Education (1 Credit Hour)

This course is an exploration of contemporary issues in early childhood programs for young children (both typically developing and those with disabilities) aged birth to eight and their families. In this course, graduate students will investigate the interlaced professions of early childhood education, early intervention, and early childhood special education. By learning about diverse settings in which young children and families are served, candidates gain an overview of early education, experience a variety of program models/types, and learn standards of ethical behavior and practice.

Outcomes:

Candidates will understand that effective educators enact principles of social justice in the school and community by focusing on the intellectual, social and emotional development of all students, promoting human rights, reducing inequalities, and increasing the empowerment of society's most vulnerable groups; Candidates will understand that effective educators engage in collaborative relationships with fellow teachers, school personnel, administrators, students, families and communities and promote collaboration among students to ensure the academic success, and social and emotional well-being of all students; Candidates will understand that effective educators use research and evidence-based practices to design instruction that includes the alignment of goals, objectives, assessments and instructional strategies to meet the individual needs of students; Candidates will understand that effective educators use data to drive instruction and assess teaching and learning effectiveness; Candidates will understand that effective educators apply knowledge of policy and local, state, national, and international educational contexts to advocate with and for students and families; Candidates will understand that effective educators apply deep understanding of both content and pedagogy to provide developmentally appropriate instruction to all students; Candidates will understand that effective educators hold high expectations and build on the assets of diverse students (including, but not limited to race, ethnicity, culture, language, SES, immigration status, exceptionality, ability, sexual orientation, gender, and gender identity); Candidates will understand that effective educators explicitly integrate the teaching of reading, writing, communication and technology across content areas; Candidates will understand that effective educators create and support safe and healthy learning environments for all students; Candidates will understand that effective educators utilize information from theories and related research based practices when making decisions and taking action in their professional practice; Candidates will understand that effective educators maintain and utilize global perspectives and international-mindedness when engaging in teaching, learning and leading, including the awareness and application of the social, cultural, inter-cultural and linguistic facets of student achievement

TLSC 453 Early Childhood Development and Developmentally Appropriate Practices (2 Credit Hours)

This course provides a framework for understanding early childhood development and the role of early childhood educators in understanding individual development through authentic and other forms of assessment for children aged birth to 5 (including those with special needs) and their families. The course prepares candidates to understand and assess children's development, as well as to participate in developmentally appropriate assessment, select classroom environments, curriculum, and interventions/instructional strategies for infants, toddlers, and preschoolers. This course emphasizes that practices are only developmentally appropriate when families are included in these processes. Students will gain knowledge and skills required to serve as inclusive educators and assessment leaders in early childhood and special education.

Outcomes:

Candidates will understand that effective educators enact principles of social justice in the school and community by focusing on the intellectual, social and emotional development of all students, promoting human rights, reducing inequalities, and increasing the empowerment of society's most vulnerable groups; Candidates will understand that effective educators engage in collaborative relationships with fellow teachers, school personnel, administrators, students, families and communities and promote collaboration among students to ensure the academic success, and social and emotional well-being of all students; Candidates will understand that effective educators use research and evidence-based practices to design instruction that includes the alignment of goals, objectives, assessments and instructional strategies to meet the individual needs of students; Candidates will understand that effective educators use data to drive instruction and assess teaching and learning effectiveness; Candidates will understand that effective educators apply knowledge of policy and local, state, national, and international educational contexts to advocate with and for students and families; Candidates will understand that effective educators apply deep understanding of both content and pedagogy to provide developmentally appropriate instruction to all students; Candidates will understand that effective educators hold high expectations and build on the assets of diverse students (including, but not limited to race, ethnicity, culture, language, SES, immigration status, exceptionality, ability, sexual orientation, gender, and gender identity); Candidates will understand that effective educators explicitly integrate the teaching of reading, writing, communication and technology across content areas; Candidates will understand that effective educators create and support safe and healthy learning environments for all students; Candidates will understand that effective educators utilize information from theories and related research based practices when making decisions and taking action in their professional practice; Candidates will understand that effective educators maintain and utilize global perspectives and international-mindedness when engaging in teaching, learning and leading, including the awareness and application of the social, cultural, inter-cultural and linguistic facets of student achievement

TLSC 455 Secondary Content Mthds: Currclm, Instrctn & Assmt Secondary Content Areas (6 Credit Hours)
This 6-credit course content-area methods course focuses on three primary areas: curriculum design, instruction, and assessment within the secondary content areas.
Outcomes:
This course module focuses on current bodies of knowledge in the field of Science Education; Candidates must demonstrate understanding of A Framework for K-12 Science Education and the Next Generation Science Standards], as well as current literature; They will also critically evaluate curriculum, instructional and assessment practices in a variety of diverse classroom and community settings, with a focus on equity

TLSC 456 Language & Literacy in the Secondary Content Area (3 Credit Hours)
This 3-credit course content-area methods course focuses on three primary areas: curriculum design, instruction, and assessment within the secondary content areas - language and Literacy.

TLSC 460 Developing Rigorous and Relevant Instruction and Assessment (2 Credit Hours)
This module requires candidates, with increasing independence and more limited support from a mentor teacher, to develop rigorous and relevant instruction and assessment. Candidates will demonstrate their ability to use individual student data to plan appropriate and relevant instruction and assessment for all.
Outcomes:
Teacher candidates will obtain and analyze a variety of individual and whole class data and use this data to inform their development of differentiated and rigorous instruction and assessment

TLSC 461 Designing and Implementing Rigorous and Relevant Instruction (3 Credit Hours)
This module requires candidates, with increasing independence and more limited support from a mentor teacher, to implement rigorous and relevant instruction and assessment. Candidates will be required to use a variety of assessments, provide reflection and feedback on the results of assessment using assessment data and make adaptations in order to improve student achievement.
Outcomes:
Teacher candidates will explain how what they have learned from the assessment data will influence their planning and future instruction for students

TLSC 462 Advanced Inclusive Practices in Early Childhood Education (3 Credit Hours)
This course focuses on the role of ECSE professionals in inclusive preschool programs, including the role of ECE and ECSE teachers in supporting tiered models in general education, and the development, implementation, and evaluation of individualized education plans. In addition, these personnel are called upon to provide services that are interdisciplinary, multicultural, family-centered, inclusive, and developmentally appropriate, and that prove effective regardless of family circumstances. Students will gain experience in developing strategies for meeting the educational and developmental needs of preschoolers who experience circumstances and conditions that potentially interfere with optimal growth and development.
Outcomes:
Candidates will understand that effective educators enact principles of social justice in the school and community by focusing on the intellectual, social and emotional development of all students, promoting human rights, reducing inequalities, and increasing the empowerment of society's most vulnerable groups; Candidates will understand that effective educators engage in collaborative relationships with fellow teachers, school personnel, administrators, students, families and communities and promote collaboration among students to ensure the academic success, and social and emotional well-being of all students; Candidates will understand that effective educators use research and evidence-based practices to design instruction that includes the alignment of goals, objectives, assessments and instructional strategies to meet the individual needs of students; Candidates will understand that effective educators use data to drive instruction and assess teaching and learning effectiveness; Candidates will understand that effective educators apply knowledge of policy and local, state, national, and international educational contexts to advocate with and for students and families; Candidates will understand that effective educators apply deep understanding of both content and pedagogy to provide developmentally appropriate instruction to all students; Candidates will understand that effective educators hold high expectations and build on the assets of diverse students (including, but not limited to race, ethnicity, culture, language, SES, immigration status, exceptionality, ability, sexual orientation, gender, and gender identity); Candidates will understand that effective educators explicitly integrate the teaching of reading, writing, communication and technology across content areas; Candidates will understand that effective educators create and support safe and healthy learning environments for all students; Candidates will understand that effective educators utilize information from theories and related research based practices when making decisions and taking action in their professional practice; Candidates will understand that effective educators maintain and utilize global perspectives and international-mindedness when engaging in teaching, learning and leading, including the awareness and application of the social, cultural, inter-cultural and linguistic facets of student achievement

TLSC 463 Supporting and Serving Families in Early Childhood Education (2 Credit Hours)
In this course, students apply models, skills, and processes of teaming when collaborating to support and serve families in the role of an early childhood educator. and professionals. Culturally and linguistically responsive and affirming practices will be explored, in addition to family systems and family diversity, and students will explore a variety of collaborative strategies while working with and supporting families. Teaming models, skills, and processes, including appropriate uses of technology will also be explored as avenues for ensuring responsive early childhood education, early intervention, and early childhood special education. Students will learn about and engage directly with families as a result of this course.
Outcomes:
Candidates will understand that effective educators enact principles of social justice in the school and community by focusing on the intellectual, social and emotional development of all students, promoting human rights, reducing inequalities, and increasing the empowerment of society's most vulnerable groups; Candidates will understand that effective educators engage in collaborative relationships with fellow teachers, school personnel, administrators, students, families and communities and promote collaboration among students to ensure the academic success, and social and emotional well-being of all students; Candidates will understand that effective educators use research and evidence-based practices to design instruction that includes the alignment of goals, objectives, assessments and instructional strategies to meet the individual needs of students; Candidates will understand that effective educators use data to drive instruction and assess teaching and learning effectiveness; Candidates will understand that effective educators apply knowledge of policy and local, state, national, and international educational contexts to advocate with and for students and families; Candidates will understand that effective educators apply deep understanding of both content and pedagogy to provide developmentally appropriate instruction to all students; Candidates will understand that effective educators hold high expectations and build on the assets of diverse students (including, but not limited to race, ethnicity, culture, language, SES, immigration status, exceptionality, ability, sexual orientation, gender, and gender identity); Candidates will understand that effective educators explicitly integrate the teaching of reading, writing, communication and technology across content areas; Candidates will understand that effective educators create and support safe and healthy learning environments for all students; Candidates will understand that effective educators utilize information from theories and related research based practices when making decisions and taking action in their professional practice; Candidates will understand that effective educators maintain and utilize global perspectives and international-mindedness when engaging in teaching, learning and leading, including the awareness and application of the social, cultural, inter-cultural and linguistic facets of student achievement

TLSC 470 Student Teaching for Change (7 Credit Hours)
This module represents the candidate's full-time student teaching experience. It serves as the culmination of candidate's full-time student teaching experience and allows for focused reflection on student teaching and their entire teacher preparation program.
Outcomes:
Candidates will complete the edTPA to document and demonstrate each candidate's ability to effectively teach his/her subject matter; Candidates also complete the School of Education's Professional Practice Profile essay

TLSC 470A Student Teaching for Change (1-6 Credit Hours)
This module represents the candidates full-time student teaching experience. It serves as the culmination of candidates full-time student teaching experience and allows for focused reflection on student teaching and their entire teacher preparation program.
Outcomes:
Candidates will complete part of the edTPA to document and demonstrate each candidate's ability to effectively teach his/her subject matter

TLSC 470B Student Teaching for Change (1-6 Credit Hours)
This module represents the candidates' full-time student teaching experience. It serves as the culmination of candidates' full-time student teaching experience and allows for focused reflection on student teaching and their entire teacher preparation program.
Outcomes:
Candidates will complete the edTPA to document and demonstrate each candidate's ability to effectively teach his/her subject matter; Candidates also complete the School of Education's Professional Practice Profile essay

TLSC 480 Teaching for Change Field Seminar (1 Credit Hour)
This module introduces teacher candidates' to learning and development through observation, investigation, and analysis of teaching practice and student learning in secondary-level classrooms. Candidates will complete a classroom profile assignment and develop a related action plan for enhancing a constructive classroom environment. Recognize the role of choice, motivation, and scaffolded support in creating a low-risk and positive social environment; (5F) Identify significant components of healthy learning environments (e.g., where students, teachers, and families feel safe, mutual respect, connected, and demonstrate high levels of self- efficacy). (4A, 4E) (IB)
Outcomes:
EU7K7 - Summarize the connection between teacher expectations and attitudes and student academic achievement, inclusion, and excellence; (3H)

Theatre (THTR)

Discover, search, courses (p. 2661)!

THTR 100 Intro to Theatre Experience (3 Credit Hours)
This course is an introductory study of the theatrical art form and its contemporary production practice. Students engage in a series of workshops and participatory creative projects.
Knowledge Area: Artistic Knowledge and Experience
Outcomes:
Students will demonstrate the ability to identify the variety of collaborating arts and artists that combine to create of a work of theatre; to analyze a play script for live performance; to evaluate theatrical production; and to creatively apply knowledge of theatrical process through expressive and creative endeavors

THTR 142 Class Voice for Beginners (3 Credit Hours)
This class is for the student who has never had voice instruction and is interested in learning the art of performance in voice. Strongly recommended for those interested in the music major, theater or public speaking/performance
Course equivalencies: THTR242/THTR142/MUSC142
Outcomes:
Students will demonstrate understanding and application of the fundamentals of music theory, diction, and tone

THTR 154 Introduction to Opera (3 Credit Hours)
Survey of opera from 1600 to the present and consideration of opera as an art form which combines music and drama. Analysis of libretto structure and study of the variety of operatic styles are included.
Course equivalencies: X-MUSC154/THTR154
Outcomes:
Fundamental acquaintance with a wide selection of operatic literature and the principle eras of the European and American traditions

THTR 203 Dramatic & Theatrical Process (3 Credit Hours)
This course is an introduction to the basic methods of analyzing and interpreting plays representative of the modern stage (from Ibsen to the present). It explores how text analysis is, for all theatre artists, a critical first step in transferring the printed play text to the stage.
Outcomes:
Students will acquire the ability to analyze a play's structure and ideational content, its characters, and the potential challenges each play presents to theatre artists seeking to produce the play on the stage for a modern audience

THTR 204 Playwriting (3 Credit Hours)
This course is and introduction to the theories and techniques of playwriting with particular emphasis on the analysis of dramatic structure.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will demonstrate an understanding of the theories and techniques of playwriting and dramatic structure through application of these skills in several playwriting exercises and the development of a one act play

THTR 205 Theatre in Chicago (3 Credit Hours)
This course is an introduction to live theatre in the rich Chicago theatre scene. Students will develop an appreciation and enjoyment of drama through attendance at live theatre performance and sharpen critical thinking skills through written critiques and discussion of those productions.
Outcomes:
Students will demonstrate knowledge of and appreciation for the range of theatrical experiences, traditions and expressions available in the City of Chicago

THTR 227 Stage Management (3 Credit Hours)
This course explores the role of the stage manager in theatrical production from pre-production through closing documentation.
Outcomes:
Students will demonstrate understanding of the responsibilities and duties of a Stage Manager to a production; develop the necessary communication and organizational skills to fulfill these responsibilities in a production experience; and be exposed to various techniques and tools used in professional stage management

THTR 241 Voice & Diction for Stage I (3 Credit Hours)
This course focuses on the techniques of effective voice and speech production.
Course equivalencies: THTR 241 / THTR 241E
Outcomes:
Through class exercises and presentations, students will demonstrate greater knowledge and control over their breath support, tonal placement, vocal resonance, projection, clarity of articulation, Standard American vowel and consonant formation, language orchestration and coloration

THTR 252 Theatrical Design I (3 Credit Hours)
This course introduces the theatre student to the fundamentals of design especially as they relate to the theatrical design of sets, lights, and costumes.
Knowledge Area: Artistic Knowledge and Experience
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Outcomes:
Students will demonstrate understanding of the tools a set, costume, and lighting designer use to express their ideas; improve their abilities to communicate their creative ideas; appreciate how design affects an overall theatrical experience; and be prepared to engage in practical design experience in our theatre

THTR 261 Beginning Acting (3 Credit Hours)
Beginning Acting is an introduction designed to provide a foundation in the critical understanding and practical application of contemporary acting theories and techniques. Content will focus on stimulating full utilization of the actor's instrument (mind, body, voice, imagination, and emotion) and using exercises and improvisations to provide a practical approach to standard acting challenges.
Knowledge Area: Artistic Knowledge and Experience
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Outcomes:
Students will develop skills in observation, concentration and imagination, as well as critical skills in script analysis

THTR 267 Acting Theories and Techniques II (3 Credit Hours)
Pre-requisites: THTR 261
This course builds on the skills introduced in THTR 261 and development of physical and vocal skills towards performance of character from classical texts.
Interdisciplinary Option: Shakespeare Studies
Outcomes:
Students will develop skills to research historical information for application in performance of characters and improve use of the body and voice to communicate character

THTR 300 Design Technology: Special Effects, Sound Engineer (3 Credit Hours)
Special Effects, Sound Engineering, Moving Light Programing, Projections, Computer Aided Drafting and Automation Design
Outcomes:
To provide a broad overview of current state of the art stage design technologies through lectures, demonstrations, and hands-on work

THTR 305 Theatre Workshop: Special Topics (3 Credit Hours)
This course introduces the student to a style, genre or method theatre making through active application in exercises, demonstrations, games and workshops.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will develop skills in applying performance theory to practice; develop performance skills in a particular style or genre; expand a repertoire of rehearsal techniques; and develop skills to create original theatre pieces

THTR 321 Practicum: Costumes (2 Credit Hours)
This course is a practical application of the material studied in a variety of theatre classes, and provides hands on experience scenic or costume construction.
Course equivalencies: THTR321/THTR 321E/THTR321C
Outcomes:
Students will acquire a variety of skills necessary for producing theatre; including collaboration and organization skills and will gain appreciation for the complexity play production

THTR 321C Practicum: Costumes (2 Credit Hours)
This course is a practical application of the material studied in a variety of theatre classes, and provides hands on experience scenic or costume construction.
Course equivalencies: THTR321/THTR 321E/THTR321C
Outcomes:
Students will acquire a variety of skills necessary for producing theatre; including collaboration and organization skills and will gain appreciation for the complexity play production

THTR 321E Practicum: Electrics (2 Credit Hours)
This course is a practical application of the material studied in a variety of theatre classes, and provides hands on experience with electrics.
Outcomes:
Students will acquire a variety of skills necessary for producing theatre; including collaboration and organization skills and will gain appreciation for the complexity play production

THTR 321P Theatre Practicum: Production Staff (1 Credit Hour)
Pre-requisites: Permission of the Department
This course is a practical application of the material studied in a variety of theatre classes, and provides hands on experience as production staff.
Outcomes:
Students will acquire a variety of skills necessary for producing theatre; including collaboration and organization skills and will gain appreciation for the complexity play production

THTR 321R Theatre Practicum: Running Crew (1 Credit Hour)
This course is a practical application of the material studied in a variety of theatre classes, and provides hands on experience with a running crew.
Outcomes:
Students will acquire a variety of skills necessary for producing theatre; including collaboration and organization skills and will gain appreciation for the complexity play production

THTR 321S Practicum: Scenic (2 Credit Hours)
Theatre Practicum (Scenery) is one of four experiential learning courses that will provide the student with an opportunity for practical application of varied techniques and theories in planning and construction of theatrical scenery and properties. The specific topics and skills the course will focus on vary from semester to semester as per the demands of each design.

THTR 321T Theatre Practicum: Scene Painting (1 Credit Hour)
Theatre Practicum: Scene Painting is a hands-on learning course that will provide the student with an opportunity for practical application of varied scenic painting techniques as applied to Loyola Theatre productions. The course is introductory and assumes no prior skills. A student with a background in painting in other mediums will be able to gain theatre specific, and more advanced, skills in this course.
Outcomes:
Students will acquire a variety of skills necessary for producing theatre, including collaboration and organization skills, and will gain appreciation for the complexity of play production

THTR 323 Rehearsal & Performance (1-12 Credit Hours)
Pre-requisites: permission of the instructor
This course allows students to receive credit for stage managing, acting in or directing a campus production during the semester. Completion and submission of a journal or paper is required. Course may be repeated up to 12 times for a total of no more than 12 credit hours.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will gain performance experience, assess personal artistic growth, and reflect on application of performance theory and technique covered in coursework to production practice

THTR 324 Applied Design and Management (1-3 Credit Hours)
This independent study course supports student scene, costume, lighting, make-up, sound or property designers and stage managers selected by the faculty to design or manage for university productions. Department Permission Required.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will deepen their understanding of a design process via first hand experience in our theatre

THTR 324D Applied Design (1-3 Credit Hours)
This class will teach Stage Design techniques in practice in production through mentorship. Students will design productions or assist faculty designers.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will accomplish goals in Communication, Collaboration and Conception; Design, Application and Reflection

THTR 324M Applied Management (1-3 Credit Hours)
This class will teach Stage Management techniques in practice in production through mentorship. Students will Stage Manage or Assistant Stage Manage productions.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will accomplish goals in Communication, Collaboration and Conception; Application; Reflection

THTR 327 Theatre Management and Arts Leadership (3 Credit Hours)
Pre-requisites: THTR 100 or THTR 203
This course is an introduction to the economic, managerial and administrative aspects of American Theatre and performing arts in general, with an emphasis on the non-for profit Chicago and Regional Theatre Industry and practical and contemporary aspects of the field. Any student looking to work in performing arts leadership or administration or start their own company will find this course valuable.
Outcomes:
Students demonstrate knowledge of the evolution of arts organizations and theatrical management; practical management tools; the economic challenges of producing theatre; production trends in the industry; the theories and processes behind planning and decision making; and students will gain appreciation for the importance of management in theatrical productions and organizations

THTR 329 Make-up and Mask Design (3 Credit Hours)
This course involves a hands-on study of make-up techniques especially as they relate to basic theatrical needs, character make-up, and special effects make-up.
Outcomes:
Students will be prepared to use make-up effectively in the theatre either as performers or beginning make-up designers, and to understand the variety of techniques and tools a make-up designer has available

THTR 331 Movement: Theories & Technique I (3 Credit Hours)
This course examines the relationship between the kinetic and kinesthetic experiences and personality development.
Course equivalencies: THTR 331 / THTR 331E
Outcomes:
Through a series of exercises, students will demonstrate an awareness of one's physical mannerisms, increased confidence in one's physical presence on stage and demonstrate physical transformation into character

THTR 335 London Theatre Experience (3 Credit Hours)
This course is a month long study abroad experience which allows the student to intensively study British theatre through excursions within London, special guest lecturers, walking tours, workshops, gallery and museum visits, and attendance of at least eight plays.
Outcomes:
Students will gain an understanding of the importance of London theatre and its influence on the rest of the world's theatre

THTR 336 Stage Combat for Actors (3 Credit Hours)
This class will teach Stage Combat techniques that will allow actors to perform fights effectively and safely. Students will work towards a final performance involving all students in a story told through violence.
Outcomes:
Be able to perform a choreographed stage combat sequence effectively and safely at full speed and before a live audience

THTR 341 Studies in Dramatic Form (3 Credit Hours)
This course studies the various structural forms drama has taken from the Greeks to the present. In particular it looks at tragedy, comedy, and melodrama and seeks to find their roots in the cultures which nurtured them.
Outcomes:
the student will be able to distinguish various dramatic forms as well as their roots in their cultures, and will have a vocabulary with which to discuss and evaluate them

THTR 344 Dialects for the Stage (3 Credit Hours)
This course provide instruction in the dialects most frequently used by the American actor and to explore a systematic approach to dialect acquisition which will serve the student in further independent dialect study.
Outcomes:
Students will acquire a working knowledge of the International Phonetic Alphabet, an understanding of the historical and cultural background of each dialect, skills in applying dialects to dramatic texts, and an introduction to the work of the dialect coach in the theatre

THTR 346 Scenic Art: Color Elevation to Scene Painting (3 Credit Hours)
This course is introduces the student to basic scene painting techniques for the theatre.
Outcomes:
Students will demonstrate understanding of the role of the scenic artist in relationship to the scenic designer, develop basic level skills required to execute the designer's intention or vision and execute a paint elevation

THTR 348 Theatre Pedagogy (3 Credit Hours)
This course explores the process of engaging children with teaching artistry techniques such as theatre acting games, design, and technical theatre as a means towards self-expression, personal development and content learning. This course will utilize planning tools and teach facilitation techniques that can be utilized across artistic practices. Laboratory experiences working with children are provided.
This course satisfies the Engaged Learning requirement.
Course equivalencies: THTR348/CIEPM95
Outcomes:
Students will articulate the differences and similarities between theatre for children and creative dramatics disciplines, develop age appropriate materials and exercises, identify appropriate facilitating methods and techniques and apply these techniques in a laboratory setting

THTR 352 Theatrical Design II (3 Credit Hours)
Pre-requisites: THTR 252
An Intermediate course of study to explore the process of Theatre Design (Scenic, Costumes, and Lighting). Collaboration and storytelling through visual means is the key to understanding text-based theatre. Each individual will have the opportunity to express ideas in class discussions, written critical analysis, and execution of design while enhancing the process of design.
Outcomes:
The purpose of this course is to develop intermediate design skills building upon those learned THTR 252 and preparing students for assistant level production design experiences; Students will learn to merge and implement visual ideas to communicate with directors, fellow designers, actors, and technicians; Students will develop a critical eye in a group setting and have the ability to appraise the process in an open forum of discussion and reflection; Students will demonstrate evidence of research and written analysis through technical skills, preliminary sketching, and drawing techniques; Students will develop a better understanding of how to read scripts and how to describe and discuss the material in a cohesive manner in a group, and discover new and innovative ways of translating the text into thoughtful and inspiring designs

THTR 353 Theatrical Design III (3 Credit Hours)
Pre-requisites: THTR 252 and THTR 352
This team taught course will alternate between full group discussions on topics valuable to all disciplines and small group instruction on specific techniques within sub-disciplines. Students will declare a discipline at the beginning of the course. Students can repeat the course to pursue a second discipline. Students will be placed in teams of complimentary disciplines.
Outcomes:
Students will gain advanced level theories, practices, and techniques in one of the following theatrical design disciplines: scenery, costumes, lighting, or sound; Students will further deepen collaboration, communication, and presentation skills; Students will develop individual artistic voice as expressed through theatrical design

THTR 354 Storytelling Design: Puppetry, Properties and Toy (3 Credit Hours)
Pre-requisites: THTR 252, and either THTR 261 or 266
Puppetry is one of the oldest forms of storytelling. This course is intended to allow the student to several explore different forms of storytelling through the use of puppets and puppetry. The course will explore shadow puppetry, toy theatre and hand & rod puppetry. Each student will develop, as a member of a series of "production teams", a brief performance piece base.
Outcomes:
Students will gain skill in design through the storytelling techniques of puppetry and toy theatre

THTR 364 Theatre History and Literature I (3 Credit Hours)
Pre-requisites: THTR 203 or THTR 100
Theatre History and Literature is a part of a four-course sequence that examines works of dramatic literature in their historical context. Theatre History and Literature I focuses on the development of theatre from Greek through Jacobean and Caroline periods.
Interdisciplinary Option: Shakespeare Studies
Outcomes:
Students will identify and describe events, practitioners, practices, theatre architecture, and significant plays within their historical context; Students will apply research to creative practice

THTR 365 Theatre History and Literature II (3 Credit Hours)
Pre-requisites: THTR 203 or THTR 100
Theatre History and Literature is a four course sequence that examines works of dramatic literature in their historical context. Theatre History and Literature II focuses on the development of theatre from the 16th through 19th centuries.
Interdisciplinary Option: European Studies, Shakespeare Studies
Outcomes:
Students will identify and describe events, practitioners, practices, theatre architecture and significant plays within their historical context, They will also apply research to creative practice

THTR 366 Theatre History and Literature III (3 Credit Hours)
Pre-requisites: THTR 203 or THTR 100
Theatre History and Literature is a part of a four-course sequence that examines works of dramatic literature in their historical context. Theatre History and Literature III focuses on the development of theatre from the 19th through mid-20th centuries.
Interdisciplinary Option: European Studies
Outcomes:
Students will identify and describe events, practitioners, practices, theatre architecture and significant plays within their historical context; Students will apply research to creative practice

THTR 367 Theatre History and Literature IV (3 Credit Hours)
Pre-requisites: THTR 203 or THTR 100
Theatre History and Literature is a four-course sequence that examines works of dramatic literature in their historical context. Theatre History and Literature IV focuses on contemporary and post-modern theatre.
Outcomes:
Students will identify and describe events, practitioners, practices, theatre architecture and significant plays within their historical context; Students will apply research to creative practice

THTR 368 Acting Theories and Techniques III (3 Credit Hours)
This course continues the work of THTR 261, based on the needs of the students, using plays by modern and contemporary playwrights as the primary material.
Outcomes:
Students will be able to demonstrate an understanding of how to interpret and effectively perform plays written since the early 19th century up to present day

THTR 369 Acting Theories and Techniques IV (3 Credit Hours)
Pre-requisites: THTR 267
This course continues the work of THTR 368 based on the needs of the students. Performance material is at discretion of the instructor.
Outcomes:
Students will further develop performance skills and workshop areas of weakness based on individual needs and interests

THTR 375 Play Direction: Theater Capstone (3 Credit Hours)
Pre-requisites: THTR 203, 252, 266, 267, 364, 365, 366 and 367, or 375 may be taken concurrently with THTR 367
This course explores the fundamental principles of play direction. Students are required to direct a monologue, select a play script for production, develop a production concept, stage a fifteen-minute scene, and develop a detailed Director's Notebook.
Outcomes:
Students acquire the skills to identify the basic elements of stage direction; analyze a play script from the point of view of the director; articulate and defend a production concept; develop actor-coaching skills; and identify elements of direction that communicate story, theme, and concept

THTR 377 Audition Seminar (3 Credit Hours)
Pre-requisites: THTR 368
This course focuses on preparing to audition for professional theatre, commercial and film with particular emphasis on audition for Chicago Theatre.
Outcomes:
Students will demonstrate the ability to engage an auditor through an audition, demonstrate the ability to score and read copy truthfully, develop a head shot and resume and develop a personal repertoire of suitable audition pieces

THTR 393 Shakespeare Seminar (3 Credit Hours)
Pre-requisites: ENGL 326, THTR 365, and 9 credit hours for electives in the minor
This course provides a capstone seminar experience for students, focusing on how Shakespeare has been interpreted on the page and the stage. It will culminate with a thesis project, either scholarly or creative, that will serve as the capstone for the Shakespeare Studies Minor.
Interdisciplinary Option: Shakespeare Studies
Outcomes:
Students will engage in advanced scholarly work in Shakespearean Studies towards development of a scholarly thesis or significant project

THTR 394 Internship in Theatre (1-6 Credit Hours)
Theatre students complete a semester long internship providing an opportunity to use their technical, research or organizations skills in a professional setting. Students must complete and reflect upon 50 hours of internship experience per credit hour that is pre-approved by the Department of Fine and Performing Arts. Department Permission Required. No more than 6 credit hours of Internship of Fieldwork may be applied to the major.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students gain professional experience working at a theatrical organization while reflecting on their work experience and applying theories and techniques acquired from their theatre courses

THTR 395 Seminar in Theatre (3 Credit Hours)
Subject and requirements of this course will be determined by needs and interests of the students.
Outcomes:
To be determined by the instructor in consultation with the chairperson

THTR 396 Seminar in Theatre II (3 Credit Hours)
Subject and requirements to be determined by needs and interests of the students.
Outcomes:
To be determined by the instructor in consultation with the chairperson

THTR 397 Fieldwork in Chicago - Theatre (1-6 Credit Hours)
Variable credit (1-6 hours) given for performances or projects undertaken with professional theatre organizations outside the university. Students keep a journal and write evaluative papers. Permission of the Department of Fine and Performing Arts Required. Repeatable for up to 6 credit hours, however no more than 6 credit hours of Internship or Fieldwork can be applied towards the major.
This course satisfies the Engaged Learning requirement.
Outcomes:
Specific outcomes and credit hours assigned to be determined by the student in consultation with the Director of Theatre and the project supervisor

THTR 399 Independent Study (3 Credit Hours)
Pre-requisites: written permission of chairperson
Independent study projects may be of various kinds and in any recognized area of the theatre arts. Such projects should be done under the close supervision of a theatre faculty member.
Outcomes:
To be determined by the student in consultation with the chairperson and theatre faculty supervisor

Theology (THEO)

Discover, search, courses (p. 2661)!

THEO 100 Christian Theology (3 Credit Hours)
This course is an introduction to reflection on and analysis of the Christian theological tradition.
Knowledge Area: Foundational Theological Knowledge
Interdisciplinary Option: Catholic Studies, European Studies
Course equivalencies: ACTHE 101 / THEO 100
Outcomes:
Students will be able to demonstrate understanding of the tasks of Christian theology in its efforts to understand the human situation from the perspective of faith, various challenges to theology in the contemporary world, and will focus on one or more current theological issues

THEO 107 Introduction to Religious Studies (3 Credit Hours)
This course is an introduction to the contemporary field of religious studies, focusing on both the theoretical investigations of religious traditions, as well as on the study of selected religious texts and practices (such as creation stories, sacred biographies, sacred scriptures of a religious tradition(s) rituals, ritual taboos, religiously motivated behaviors.
Knowledge Area: Foundational Theological Knowledge
Course equivalencies: THEO170 / THEO270 / ACTHE 107
Outcomes:
Students will be able to analyze and interpret various ways in which religious traditions intersect with contemporary issues

THEO 185 Christian Ethics (3 Credit Hours)
Introduction to Christian Ethics is a core course that explores the major sources, methods, and insights of Christian social and theological ethics. Particular attention is given to Roman Catholic thought. The course will concentrate on the foundational sources in Christian ethics and examine the moral significance of major theological themes and affirmations.
Knowledge Area: Ethics
Outcomes:
Students will identify the major sources of Christian ethics (Scripture, Church tradition, philosophy, the social and human sciences, and human experience), and gain practice in identifying how different thinkers use, interpret, and prioritize these sources

THEO 186 Global Religious Ethics (3 Credit Hours)
Religious Ethics explores fundamental moral sources and methods in Christian ethics in dialogue with the ethical understandings of at least one other religious tradition, and with special attention to Roman Catholic thought. In doing so, it explores moral issues faced by individuals and communities from theological perspectives, particularly mindful of how the economic, political and cultural structures in a religiously plural world affect those issues.
Knowledge Area: Ethics
Interdisciplinary Option: Peace, Justice, and Conflict Studies
Outcomes:
In this course, students will explore and compare the ethical understandings of Christianity and at least one other religious tradition; With respect to each tradition, students will learn about the foundational sources, doctrines and questions that guide its ethical thinking

THEO 190 Loyola's Mission: Ignatian Traditions (3 Credit Hours)
The course introduces students to LUC's mission through theological reflection on the main themes of the Transformative Education mission-statement: spirituality and faith, interlinked human knowing, moral compass, civic and environmental responsibility.
Course equivalencies: THEO190 / THEO290
Outcomes:
Integration into the LUC community, ethos, and vision

THEO 203 Social Justice and Injustice (3 Credit Hours)
Pre-requisites: THEO 100, THEO 107, or equivalent; please check requirements for declared majors/minors for exceptions
The course introduces students to Catholic and Protestant approaches to social justice. Students will also study theories and analyses of social injustice. Students will study specific instances of social injustice (gender, race, and class). It will increase student awareness of diversity, in the United States and globally.
Knowledge Area: Tier 2 Theological Knowledge
Interdisciplinary Option: Bioethics, Peace, Justice, and Conflict Studies, Race and Ethnicity
Outcomes:
Summarize relevant social, economic, policy history/context that related to current sites of injustice related to racial-ethnic inequalities, economic inequality, immigration status, healthcare, and sex/gender inequality; Distinguish among distinct theories of justice in both theological and philosophical thought; Describe the moral challenges posed by injustice; Relate key ideas, traditions, & practices in Christian theological, philosophical, and other religious thought that may help individuals and societies move closer to approximating justice in society/world

THEO 204 Religious Ethics and the Ecological Crisis (3 Credit Hours)
Pre-requisites: THEO 100, THEO 107, or equivalent; please check requirements for declared majors/minors for exceptions
Advances in technology and industry confront us with unprecedented abilities for altering long standing climate patterns. These capacities challenge many traditional religious and ethical assumptions about humanity and our relationship to the nonhuman world. We will examine the resources that religious traditions of the world offer for promoting ecological responsibility.
Knowledge Area: Tier 2 Theological Knowledge
Interdisciplinary Option: Bioethics, Catholic Studies, Peace, Justice, and Conflict Studies
Outcomes:
students will be able to:*Summarize relevant history related to scientific, policy & political data and decisions *Describe central scientific and ethical challenges posed by the climate crisis *Relate key ideas, traditions, & practices in Christian theological, philosophical, and other religious thought that may help address this crisis

THEO 214 Introduction to the Qur'an (3 Credit Hours)
This course provides an introduction to the central Islamic scripture, the Qur'an in terms of its main features and themes, and as a basis for the theological and ethical teachings of Islam, employing both classical interpretive traditions and contemporary academic approaches. Outcome: Students will be able to demonstrate and understanding of the nature of the main Islamic scripture, the Qur'an, and its influence on Muslim beliefs, ethical understandings, and social and religious practices.
Knowledge Area: Tier 2 Theological Knowledge
Interdisciplinary Option: Black World Studies

THEO 231 Hebrew Bible/Old Testament (3 Credit Hours)
Pre-requisites: THEO 100, THEO 107, or equivalent; please check requirements for declared majors/minors for exceptions
This course provides an introduction to the Old Testament / Tanakh (Hebrew Scriptures).
Knowledge Area: Tier 2 Theological Knowledge
Interdisciplinary Option: Middle East and Islamic World Studies
Outcomes:
Students will be able to demonstrate understanding of central texts, beliefs, ethical understanding, and practices of Judaism and Christianity

THEO 232 New Testament (3 Credit Hours)
Pre-requisites: THEO 100 or equivalent; please check requirements for declared majors/minors for exceptions
This course is an introduction to the historical and theological reading of the various documents of early Christianity known as the New Testament.
Knowledge Area: Tier 2 Theological Knowledge
Interdisciplinary Option: Catholic Studies
Course equivalencies: X-THEO112/CATH112
Outcomes:
Students will be able to demonstrate understanding of the literary genres found in the New Testament and explain why the recognition of genre is essential to the interpretation of the New Testament, as well as the importance of how the New Testament documents have reached their present state

THEO 265 Sacraments and the Christian Imagination (3 Credit Hours)
Pre-requisites: THEO 100 or equivalent; please check requirements for declared majors/minors for exceptions
This course studies the realities of Christian faith life as expressed and celebrated in the concrete rituals of the Christian communities.
Knowledge Area: Tier 2 Theological Knowledge
Interdisciplinary Option: Catholic Studies
Course equivalencies: X-THEO265/CATH106
Outcomes:
Students will be able to demonstrate how a sacramental system of aesthetics is often embedded in cultural artifacts such as poetry, music, painting, literature, and film, and recognize and interpret the impact of history and cultures on the development of Christian doctrine and practices

THEO 266 Church & Global Cultures (3 Credit Hours)
Pre-requisites: THEO 100, THEO 107, or equivalent; please check requirements for declared majors/minors for exceptions
This course provides an introduction to ways in which the Christian churches, and primarily the Roman Catholic Church, understand and enact their identity in relation to the secular world of culture, economics, and politics, both nationally and globally.
Knowledge Area: Tier 2 Theological Knowledge
Interdisciplinary Option: Catholic Studies, Italian Studies
Course equivalencies: X-THEO105/CATH105
Outcomes:
Students will be able to analyze and interpret contrasting Christian understandings of the notion of original sin, and demonstrate knowledge, with attention to historical development, of the central texts, beliefs, ethical understandings, and practices of at least one religious tradition

THEO 267 Jesus Christ (3 Credit Hours)
Pre-requisites: THEO 100 or equivalent; please check requirements for declared majors/minors for exceptions
This course examines the life of Jesus Christ, utilizing the Gospels, the writings of Paul and other biblical authors, the early ecumenical councils, and the history of church doctrine, including contemporary scholarship.
Knowledge Area: Tier 2 Theological Knowledge
Interdisciplinary Option: Catholic Studies
Course equivalencies: THEO104/CATH104
Outcomes:
This course examines the life of Jesus Christ, utilizing the Gospels, the writings of Paul and other biblical authors, the early ecumenical councils, and the history of church doctrine, including contemporary scholarship

THEO 272 Judaism (3 Credit Hours)
Pre-requisites: THEO 100, THEO 107, or equivalent; please check requirements for declared majors/minors for exceptions
This course provides an introduction to Judaism.
Knowledge Area: Tier 2 Theological Knowledge
Interdisciplinary Option: Global Studies, Middle East and Islamic World Studies
Course equivalencies: THEO172/THEO272/INTS172
Outcomes:
Students will be able to name and discuss some of the most important Jewish scriptures, articulate the general outline of the historical evolution of Judaism, and define and discuss key concepts, terms, values, and religious practices foundational to Judaism

THEO 276 Black World Religion (3 Credit Hours)
Pre-requisites: THEO 100, THEO 107, or equivalent; please check requirements for declared majors/minors for exceptions
This course explores the revelatory manner in which the divine comes to unique presence and expression among African peoples throughout human history. It will examine the religious experiences and traditions of: Africa's ancient Nile valley civilizations, long recognized as cradling the world's spiritual and philosophical wisdom and as influencing the formative development of Judaism, Christianity, and Islam.
Knowledge Area: Tier 2 Theological Knowledge
Interdisciplinary Option: African Studies and the African Diaspora
Outcomes:
Students will demonstrate their knowledge of African peoples' religious experiences within their various historical and cultural contexts

THEO 278 Religion & Gender (3 Credit Hours)
Pre-requisites: THEO 100, THEO 107, or equivalent; please check requirements for declared majors/minors for exceptions
This course will study the role of women in at least one (if not more) of the major world religious traditions.
Knowledge Area: Tier 2 Theological Knowledge
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: THEO178/THEO278/WSGS278
Outcomes:
Students will be able to demonstrate understanding of the influence of religion on gender roles, and how women in the contemporary world are reinterpreting their religious traditions

THEO 279 Roman Catholicism (3 Credit Hours)
Pre-requisites: THEO 100 or equivalent; please check requirements for declared majors/minors for exceptions
This course provides an introduction to Roman Catholicism.
Knowledge Area: Tier 2 Theological Knowledge
Interdisciplinary Option: Catholic Studies, Italian Studies
Course equivalencies: THEO179/THEO279/CATH179
Outcomes:
Students will be able to demonstrate understanding of the most important Roman Catholic beliefs, the historical evolution of Roman Catholicism, the key Roman Catholic concepts, terms, values, and religious practices, and the main lines of current Roman Catholic identity in today's world

THEO 280 Religion & Interdisciplinary Studies (3 Credit Hours)
Course topics will rotate to incorporate the study of religion in a variety of other disciplines. Focus will be on the influence or application of religious teachings and traditions in the fields of healthcare, politics, education, etc.
Knowledge Area: Tier 2 Theological Knowledge
Course equivalencies: THEO180 / THEO280
Outcomes:
Describe the ethical implications of the religious beliefs and traditions of at least one religion for the primary field of study

THEO 281 Christianity Through Time (3 Credit Hours)
Pre-requisites: THEO 100, THEO 107, or equivalent; please check requirements for declared majors/minors for exceptions
The course is a survey course in the history of Christian thought. Not a course in Church history, this is a course whose primary goal is to investigate the major interactions between Christian thought and practice and the cultures that it has been a part of in its two thousand year history.
Knowledge Area: Tier 2 Theological Knowledge
Interdisciplinary Option: Catholic Studies, German Studies, Medieval Studies
Course equivalencies: THEO181/ THEO281/CATH181
Outcomes:
Students will learn to analyze and interpret religious texts, beliefs and practices using standard scholarly methods and tools

THEO 282 Hinduism (3 Credit Hours)
Pre-requisites: THEO 100, THEO 107, or equivalent; please check requirements for declared majors/minors for exceptions
This course provides an introduction to Hinduism.
Knowledge Area: Tier 2 Theological Knowledge
Interdisciplinary Option: Asian Studies, Global Studies
Course equivalencies: THEO196/ASIA196/INTS294
Outcomes:
Students will be able to demonstrate understanding of the most important Hindu scriptures, the general outline of the historical evolution of Hinduism, the key Hindu concepts, terms, values, and religious practices, and the basic narratives and imagery of Hinduism

THEO 293 Christian Marriage (3 Credit Hours)
Pre-requisites: THEO 100, THEO 107, or equivalent; please check requirements for declared majors/minors for exceptions
This course examines the Christian understanding of marriage.
Knowledge Area: Tier 2 Theological Knowledge
Interdisciplinary Option: Catholic Studies
Course equivalencies: THEO193/THEO293/CATH193
Outcomes:
Students will be able to demonstrate understanding of historical & ethical principles used to evaluate particular issues relevant to the understanding of the Christian tradition of marriage

THEO 295 Islam (3 Credit Hours)
Pre-requisites: THEO 100, THEO 107, or equivalent; please check requirements for declared majors/minors for exceptions
This course will provide an introduction to Islam.
Knowledge Area: Tier 2 Theological Knowledge
Interdisciplinary Option: Arabic Language and Culture, Asian Studies, Global Studies, Middle East and Islamic World Studies
Course equivalencies: THEO195/ASIA195/INTS295/IWS195
Outcomes:
Students will be able to demonstrate understanding of the most important Muslim scriptures, the general outline of the historical evolution of Islam, the key Islamic concepts, terms, values, and religious practices, and the diversity within Islam

THEO 297 Buddhism (3 Credit Hours)
Pre-requisites: THEO 100, THEO 107, or equivalent; please check requirements for declared majors/minors for exceptions
This course provides an introduction to Buddhism.
Knowledge Area: Tier 2 Theological Knowledge
Interdisciplinary Option: Asian Studies, Global Studies, Japanese Language and Culture
Course equivalencies: THEO197/ASIA197/INTS297
Outcomes:
Students will be able to demonstrate understanding of the most important Buddhist scriptures, the general outline of the historical evolution of Buddhism, including its different major branches, and the key Buddhist concepts, terms, values, and religious practices

THEO 299 Religions of Asia (3 Credit Hours)
Pre-requisites: THEO 100, THEO 107, or equivalent; please check requirements for declared majors/minors for exceptions
An introductory survey of selected teachings, institutions, and practices of the great religious traditions of South Asia and East Asia placed in historical context.
Knowledge Area: Tier 2 Theological Knowledge
Interdisciplinary Option: Asian Studies, Global Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: X-THEO199/ASIA199/INTS199
Outcomes:
Students will be able to demonstrate understanding of the central texts, beliefs, ethical understandings, and practices of at least three Asian religions

THEO 302 Wisdom Literature and Psalms (3 Credit Hours)
Pre-requisites: THEO 111
A study of the wisdom literature of the Old Testament, attention to the nature of the wisdom tradition in Israel; study of the Psalms as the prayer of Israel.
Outcomes:
Students will be able to demonstrate understanding of central texts, beliefs, ethical understanding, and practices of Judaism and Christianity

THEO 303 Pentateuch (3 Credit Hours)
Pre-requisites: THEO 111
The literary structure of the first five books of the Bible.
Outcomes:
Students will be able to demonstrate understanding of central texts, beliefs, ethical understanding, and practices of Judaism and Christianity

THEO 304 Israel Conquest to Exile (3 Credit Hours)
Pre-requisites: THEO 111
A study of the so-called historical books of the Bible (Joshua, Judges, Samuel, Kings) with attention to the history of Israel from conquest to exile.
Outcomes:
Students will be able to demonstrate understanding of central texts, beliefs, ethical understanding, and practices of Judaism and Christianity

THEO 308 Biblical Hebrew I (3 Credit Hours)
The sound, forms and grammar of biblical language. Selected readings from the Old Testament.
Course equivalencies: X-THEO308/CLST101
Outcomes:
Students will demonstrate an understanding of Biblical Hebrew

THEO 309 Biblical Hebrew II (3 Credit Hours)
Pre-requisites: THEO 308
Further study of biblical language. Selected readings from the Old Testament.
Course equivalencies: X-THEO309/CLST102
Outcomes:
Students will demonstrate an understanding of Biblical Hebrew

THEO 311 The Meaning of Jesus Christ (3 Credit Hours)
Pre-requisites: THEO 104
Interpretations of the person and work of Jesus.
Interdisciplinary Option: Catholic Studies
Outcomes:
Students will be able to demonstrate understanding of the nature of Jesus Christ as both human and divine, what this might mean, how this formulation was derived, and the varieties of understanding of Christ within the Scriptures, the church, and modern scholarship

THEO 313 Gospels of Matthew, Mark & Luke (3 Credit Hours)
Pre-requisites: THEO 112
An analysis of the development of the synoptic tradition (the gospels of Matthew, Mark and Luke).
Interdisciplinary Option: Catholic Studies
Outcomes:
Students will be able to demonstrate understanding of the various literary elements found in these particular gospels

THEO 314 Topics in Biblical Studies (3 Credit Hours)
This variable-topics course will focus on a specific method, theme, or topic in biblical scholarship. Areas of focus may include methods in biblical scholarship, thematic studies of the biblical canon, extracanonical literature, traditions of commentary on the biblical text, and historical, social, cultural, and economic realities pertinent to understanding and interpreting biblical texts.
Outcomes:
Students will analyze the relevant biblical and related ancient literature in light of the course's special topic, theme, or method; Students will critically evaluate biblical and ancient studies scholarship on the course topic, demonstrating awareness of the current state of scholarly debates; If the special topic is (or includes) a method of biblical or ancient scholarship, students will understand and utilize the method in the study of biblical literature and/or ancient literature relevant to biblical studies

THEO 317 Christian Thought: Ancient-Medieval (3 Credit Hours)
The development of various Christian doctrines in light of their historical milieu during the first fourteen centuries of Christian thought.
Interdisciplinary Option: Catholic Studies, European Studies, Medieval Studies
Course equivalencies: X-THEO317/CATH317/MSTU360
Outcomes:
Students will be able to assess how various configurations of theological perspectives can both expand and foreshorten the way human thinking has gone on

THEO 318 Christian Thought: Reformation to Modern (3 Credit Hours)
The development of various Christian doctrines in light of their historical milieu during the last six centuries of Christian thought.
Interdisciplinary Option: Catholic Studies, European Studies
Course equivalencies: X-THEO318/CATH318
Outcomes:
Students will be able to assess how various configurations of theological perspectives can both expand and foreshorten the way human thinking has gone on

THEO 330 Liberation Theology (3 Credit Hours)
An introduction to the contemporary theologies of liberation emerging in Latin American, African, and Asian Christian.
Interdisciplinary Option: Catholic Studies, Global Studies, Latin American Studies
Course equivalencies: X-THEO/INTS/LASP330/PAX332
Outcomes:
Students will be able to demonstrate understanding of ethical comprehension, analysis, and decision-making within the context of select theological and religious traditions

THEO 331 Theology of Secularization (3 Credit Hours)
An exploration of the history of secularization and the context it establishes for American Christianity. Focus on practical issues of Christian living.
Outcomes:
Students will be able to analyze and interpret various ways in which religious traditions intersect with contemporary issues

THEO 340 Foundations of Christian Morality (3 Credit Hours)
A survey of theological and philosophical issues which shape the articulation of specific moral principles.
Outcomes:
Students will be able to demonstrate understanding of ethical comprehension, analysis, and decision-making within the context of select theological and religious traditions

THEO 342 Perspectives on Life and Death (3 Credit Hours)
Examination of the exploration of our perception of the life range for possible reevaluation and rearticulation, in view of modern scientific developments.
Interdisciplinary Option: Bioethics
Course equivalencies: X-THEO342/BIET342
Outcomes:
Students will be able to demonstrate understanding of ethical comprehension, analysis, and decision-making within the context of select theological and religious traditions

THEO 343 Contemporary Christian Sexuality (3 Credit Hours)
Examination of inter-religious perspectives in contemporary sexual ethics.
Interdisciplinary Option: Bioethics
Course equivalencies: X-THEO343/BIET343
Outcomes:
Students will be able to demonstrate understanding of ethical comprehension, analysis, and decision-making within the context of select theological and religious traditions

THEO 344 Theology and Ecology (3 Credit Hours)
Examination of the ecological, ethical and theological analyses of humanity's relationship to the natural world.
Interdisciplinary Option: Bioethics
Course equivalencies: X-THEO344/ESP 344/BIET344
Outcomes:
Students will be able to demonstrate understanding of ethical comprehension, analysis, and decision-making within the context of select theological and religious traditions

THEO 348 Supervised Ministry (3 Credit Hours)
Placement in a ministerial position, on-site supervision, and biweekly individual or group meetings with the course director is required. This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to demonstrate how a sacramental system of aesthetics is often embedded in cultural artifacts

THEO 349 Theological Topics for the Bioethics Capstone (3 Credit Hours)
Pre-requisites: Two Science courses and two Ethics courses
The interdisciplinary team-taught Bioethics capstone course examines a topic in bioethics from both scientific and ethical points of view. Topics may include bio-technologies, concepts of race and gender, the environment, reproduction, and others. This course number provides an elective for Theology students when the Bioethics capstone's topic is theological.
Interdisciplinary Option: Bioethics
Outcomes:
Students will understand the connection between ethical and scientific issues with regard to the special topic in theology

THEO 350 Topics in Islam (3 Credit Hours)
A deeper and more focused study of significant aspects of the religion of Islam.
Interdisciplinary Option: Asian Studies, Global Studies, Middle East and Islamic World Studies
Course equivalencies: XTHEO350INTS387ASIA350IWS350
Outcomes:
Students will be able to demonstrate understanding of Islam

THEO 352 Topics in Buddhism (3 Credit Hours)
A deeper and more focused study of significant aspects of Buddhism.
Interdisciplinary Option: Asian Studies, Global Studies, Japanese Language and Culture
Course equivalencies: X-THEO352/INTS352/ASIA352
Outcomes:
Students will be able to demonstrate understanding of Buddhism

THEO 353 Religious Traditions (3 Credit Hours)
This course investigates the historical, social, ritual and reflective positions of one or more religious traditions. It likewise develops the student's abilities to use contemporary methods of historical, theological, and social scientific analysis of religious traditions.

THEO 356 Topics in Judaism (3 Credit Hours)
A deeper and more focused study of significant aspects of Judaism.
Outcomes:
Students will be able to demonstrate understanding of Judaism

THEO 365 Women, Gender and Embodiment in Islam (3 Credit Hours)
This course will consider gender both as articulated in normative Islamic religious and legal systems and as embodied during various historical periods in a range of Muslim societies.
Interdisciplinary Option: Arabic Language and Culture, Asian Studies, Global Studies, Middle East and Islamic World Studies, Women & Gender Studies
Course equivalencies: THEO/ASIA/INTS/WSGS/IWS365
Outcomes:
Students will read a number of the most important academic studies in this field and consider anthropological and cultural materials including films and short stories that disclose Muslim practices and concepts of maleness, femaleness, and gender relations

THEO 366 Contemporary Islamic Thought and Movements (3 Credit Hours)
This course will consider contemporary Islamic thought and movements world-wide. After a brief introduction to Islam and the historical development of the tradition up to the present, students will learn about a range of contemporary Muslim intellectual and activist movements and thinkers through the study of original writings and secondary analysis. Some major figures to be considered include: Syed Maududi, Sayyid Qutb, Fazlur Rahman, and other Muslim intellectuals representing movements such as Jama'at-i Islami, the Muslim Brotherhood, and Islamic liberalism. We will focus on the 20th century up to the most current trends. Some of the theological and social issues that will be discussed are gender, the ideal political order, Islamic law and its role in society, and pluralism.
Interdisciplinary Option: Asian Studies, Global Studies, Middle East and Islamic World Studies
Course equivalencies: X-THEO/ASIA/IWS366/INTS366A

THEO 373 Theology Capstone (3 Credit Hours)
Students enrolling in this course must have junior status and be Theology majors. This 3 credit capstone course gives students an opportunity to integrate various aspects of their theological education, drawing upon the major sources of Christian and Catholic tradition, including Scripture, History, Systematic Theology, and Ethics.
Outcomes:
Students will be able to demonstrate an understanding of the varied sources within Christian theological traditions and how to make reasoned theological arguments

THEO 378 Theology and Culture (3 Credit Hours)
This course can count as an elective for the major or minor. The course will be divided into three parts: (1) an exploration of the interaction between theological reflection & culture; (2) a look at some theological texts that compare Christian and non-Christian practices and practices in the U.S. where different cultural understandings interact; (3) a study of postmodernism.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 382 Readings-Liturgy (3 Credit Hours)
Examination of the readings, prayers, songs, rites of contemporary liturgies. Comparison of these materials with those of traditional liturgies and evaluation of the underlying principles.
Outcomes:
Students will be able to demonstrate how a sacramental system of aesthetics is often embedded in cultural artifacts

THEO 383 Theology Arts & Literature (1-3 Credit Hours)
Study of theological and religious symbols and themes in modern literature and/or in the arts.
Interdisciplinary Option: Catholic Studies
Course equivalencies: X-THEO383/ENGL383/CATH383
Outcomes:
The student who successfully completes this course will be able to demonstrate knowledge about religion and its intersections with selected contemporary ethical, social, political, economic, or cultural issues

THEO 392 Readings in Theology (3 Credit Hours)
A reading course with variable content in the area of theology. Open to major and non-majors with permission of instructor.

THEO 393 Seminar (3 Credit Hours)
An undergraduate seminar course for majors and minors in the Theology department; variable content, addressing topical issues that are not covered by the regular offerings at the 300 level.
Outcomes:
Students will gain an in-depth understanding of a selected topic

THEO 395 Theology Tutorial (3 Credit Hours)
Tutorials for seniors on selected topics in biblical, systematic, historical or moral theology.
Outcomes:
Students will gain an in-depth understanding of a selected topic

THEO 401 Tutorial in Biblical Studies (3 Credit Hours)
A reading course with variable content and readings in the area of biblical studies.

THEO 403 Topics in Rabbinic & Medieval Literature (3 Credit Hours)
Topics in post-biblical Jewish literature and thought, covering texts from approximately 200 to 1600.

THEO 404 History of Israel (3 Credit Hours)
A study of the history of ancient Israel, with particular attention to the principal features of its religion and its historical evolution, in the context of the ancient Near East.
Course equivalencies: IPS 440/THEO 404
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 405 Formation of The Pentateuch (3 Credit Hours)
An in-depth examination of the first five books of the Hebrew Bible and the Christian Old Testament, in their unity and discreetness, with a view to articulating the principal themes of the Pentateuch and the history of its composition.
Course equivalencies: IPS441/THEO 405
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 406 Basic Hebrew Grammar (3 Credit Hours)
Study of the fundamental elements of classical Hebrew.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 407 Hebrew Exegesis (3 Credit Hours)
Introduction to the fundamentals of classical Hebrew, including the Hebrew alphabet, basic syntax, and the basic grammatical forms of the language, designed to advance reading knowledge of the Old Testament.

THEO 418 Theological Prophets-Ancient Israel (3 Credit Hours)
This course examines the prophetic literature of ancient Israel, in its ancient historical context and as it can be illuminated by contemporary sociological and anthropological perspectives. Standard historical-critical methods will be used throughout.
Course equivalencies: IPS 442/THEO 418
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 420 Seminar (3 Credit Hours)
No course description is available
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 421 Directed Reading in Bible Studies (1-3 Credit Hours)
No course description is available
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 422 Directed Reading in Bible Studies (3 Credit Hours)
Independent research in topics in bible studies according to program developed jointly by the student & faculty director.

THEO 424 The Synoptic Gospels (3 Credit Hours)
Study of the diversity of early Christianity as represented in the Synoptic Gospels, particularly the commonalities and contrasts in the worldviews operative in Mark, Luke, and Matthew.
Course equivalencies: IPS 445/THEO 424

THEO 425 Luke-Acts & New Testament Church (3 Credit Hours)
This course examines the material on the early church in the Gospel of Luke and the Acts of the Apostles from a historical and critical point of view.
Course equivalencies: IPS 446/THEO 425
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 427 St Paul's Contribution to Christianity (3 Credit Hours)
Examination of Paul's thought through exacting analysis of Pauline passages; an attempt to formulate what is uniquely Pauline in the New Testament witnesses; and an awareness of how deeply Paul affected the formation of Christianity.
Course equivalencies: IPS 448/THEO 427
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 429 Person of Jesus in New Testament (3 Credit Hours)
In this course, attention will be given to the presentation of the meaning of Jesus Christ within the earliest Christian communities.
Course equivalencies: IPS 449/THEO 429
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 436 Christology (3 Credit Hours)
This course will study the speculations and formulations concerning the person of Christ and the redemptive incarnation from the early fathers and councils up to and including modern times.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 437 Mystery of God in Christian Theology (3 Credit Hours)
The Christian church has insisted, from the beginning, that Jesus Christ is decisive in humanity's access to, and understanding of, God. This realization was expressed in the doctrine of the Trinity.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 440 Seminar in Systematic Theology (1-12 Credit Hours)
No course description is available
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 441 Directed Reading in Systematic Theology (3 Credit Hours)
Independent research in topics in systematic theology according to program developed jointly by the student & faculty director.

THEO 447 Philosophical Theology (3 Credit Hours)
A study of the ways in which philosophical assumptions, systems, and methodologies shape theological reflection.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 449 Phenomenology of Religion (3 Credit Hours)
This course will examine religion from a phenomenological point of view, allowing the methods and texts of phenomenology to shape our understanding of religious phenomena, such as revelation, givenness, metaphysics, incarnation, etc.. Topics may also include investigations of the borders between phenomenology and theology.

THEO 459 Contemporary Theology (1-12 Credit Hours)
Advanced study of readings and themes in contemporary theology, in conversation with a variety of disciplines.

THEO 460 Seminar in History of Theology (1-12 Credit Hours)
A consideration of the organizing models characteristic of theology in particular periods. The seminar is organized around a specific doctrinal theme determined, in part, by the specialized interests of the students.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 461 Directed Readings in History of Theology (3 Credit Hours)
Independent research in topics in history of theology according to program developed jointly by the student and faculty director.

THEO 464 Religion & Politics in Christian History (3 Credit Hours)
Exploration of the intersections of religious and political thought in Christian history from the 19th century to today.

THEO 470 Foundations Crititical Issues Theological Ethics (1-12 Credit Hours)
Devoted to a critical analysis of theological ethics firmly rooted in the historical method, studying the various methodologies, critical issues and the personalities.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 475 Natural Law & Theological Ethics (3 Credit Hours)
Some of the many theological interpretations of natural law developed in Western Christian thought will be examined. The issue of a specific Christian ethic vis-à-vis a universal humanistic ethic will be investigated.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 477 Feminist Issues in Theology and Ethics (3 Credit Hours)
Designed around current issues in feminist theology and ethics. Issues include the role of the Bible in feminist theology, hermeneutics, theological education, church and sacraments, as well as normative theory, sexuality and reproduction, and ecology.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-THEO477/WOST468/WSGS468
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 478 Issues in Medical Ethics (3 Credit Hours)
The course will deal with the problems of abortion, genetic engineering, technological reproduction, sterilization of the handicapped, prolonging life, etc.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 480 Seminar in Christian Ethics (1-12 Credit Hours)
In-depth study of select topics in contemporary Christian ethics. Topics vary from faith and morality, religion and politics, church-state relations, and work to ecology, sexuality, and eschatology.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 481 Directed Readings Christian Ethics (3 Credit Hours)
Independent research in topics in Christian ethics according to program developed jointly by the student and faculty director.

THEO 500 Theological Pedagogy I (0 Credit Hours)
Theological Pedagogy is designed for graduate students interested in teaching theology courses at LUC. The hope is to help future instructors succeed in the classroom with a thoughtful reflection on course learning goals and then constructing a syllabus that reflects those individual goals - all while discussing and keeping in focus the "special" nature of theology and religious studies.
Outcomes:
Students will reflect on course learning goals for their own future courses; Students will produce a syllabus for their own future courses

THEO 502 Theological Pedagogy II (0 Credit Hours)
Theological Pedagogy is designed for graduate students to take simultaneously with their first semester as an instructor of record for a core Theology course. Among other goals, students are encouraged to develop a greater sense of one's own personal identity in the classroom through the crafting of a Teaching Philosophy, foster a community of support and critical reflection with other first-time instructors, and participate in the culminating Symposium on the Teaching of Theology and Religious Studies.
Outcomes:
Students will craft a Teaching Philosophy that reflects on their personal identity in the classroom; Students will reflect on their teaching in the classroom through presenting in a Symposium on the Teaching of Theology and Religious Studies

THEO 515 Gospels in Early Christianity (3 Credit Hours)
This course will focus on the study of one or the other of the four gospels.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 517 Early Christian Letters (1-12 Credit Hours)
This course studies letters from Christian leaders of the first two centuries A.D. in their original Greek language.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 519 Latr Nt-Subapost Writ (3 Credit Hours)
This course studies New Testament and non-canonical Christian writings in their original Greek language from the late first and early second century A.D.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 523 Cultural-Religious Environment Early Christianity (3 Credit Hours)
This course examines specific aspects of the cultural and religious environment of the Mediterranean world between 200 B.C. and A.D. 300 relevant to early Christianity. Outcomes A deep level of understanding and of critical thinking with respect to the subject matter of the course.

THEO 527 Various Community Early Christianity (3 Credit Hours)
The course will examine the identity, cohesion, and institutions of various communal groups in early Christianity.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 530 Seminar - Variable Titles (1-12 Credit Hours)
Extensive and in-depth study of selected topic.

THEO 536 Christian Doctrine-Catholic Theology (3 Credit Hours)
This course will examine the dialectical relationships between Christian doctrine and theological learning.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 560 Contemporary Authors (1-12 Credit Hours)
This course will examine the methods, concerns, major issues, achievements, and lasting influence of twentieth century writers whose work has significantly shaped theology today.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 570 Fundamental Issues in Christian Ethics (1-12 Credit Hours)
Fundamental issues raised in defining Christian ethics, delineating its sources and methods, developing normative theories, and analyzing processes of moral decision-making.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 573 Roman Catholic Ethics (3 Credit Hours)
This course will concentrate on one or more classic topics in Roman Catholic ethics.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 575 Religious Ethics and Social Theory (3 Credit Hours)
This course investigates what religious ethics gains from and contributes to basic concerns.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 580 Christian Social Ethics (3 Credit Hours)
The course will examine the sources, transformation, problematics, and potential directions in developing the middle principles which articulate the interaction of theological ethics and social questions.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 585 Issues Applied Theology Ethics (3 Credit Hours)
An examination in depth one or more areas which have traditionally engaged religious ethicists.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 590 Directed Readings and Research (3 Credit Hours)
No course description is available
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 592 Directed Readings (3 Credit Hours)
Independent research according to program developed jointly by the student and faculty director.

THEO 593 Directed Readings (3 Credit Hours)
Independent research according to program developed jointly by the student and faculty director.

THEO 600 Dissertation Supervision (1 Credit Hour)
Students who have filed the dissertation paperwork and are currently writing, should be enrolled in this course. You must be enrolled in some course every semester.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 605 Master's Study (1 Credit Hour)
Students who have completed their Master's level course work and are preparing for the comprehensive exams should enroll in this course, unless they plan to take the exam while taking courses. You must be enrolled in some course every semester.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

THEO 610 Doctoral Study (1 Credit Hour)
Students who have completed their doctoral level course work and are studying for the written and oral comprehensive exams should be enrolled in this course. You must be enrolled in some course every semester.
Outcomes:
A deep level of understanding and of critical thinking with respect to the subject matter of the course

University CORE Literary Foundations (UCLR)

Discover, search, courses (p. 2661)!

UCLR 100 Interpreting Literature (3 Credit Hours)
This class will be a prerequisite for all second tier literature courses, as designated by each department. The foundational course of literary studies will require students to read closely and analyze carefully a representative variety of prose, poetry, and drama, master key literary and critical term, and explore a variety of core critical approaches to the analysis and interpretation of literature. Only one section of UCLR 100, UCLR 100C, UCLR 100E, or UCLR 100M may be taken for credit as an undergraduate.
Knowledge Area: Foundational Literary Knowledge
Course equivalencies: ACENG 110 / UCLR 100

UCLR 100C Interpreting Literature - Classical Studies (3 Credit Hours)
This foundational class will require students to read closely and analyze carefully a representative variety of prose, poetry, and drama. It will be a prerequisite for all second tier literature courses, as designated by each department. Only one section of UCLR 100, UCLR 100C, UCLR 100E, or UCLR 100M may be taken for credit as an undergraduate.
Knowledge Area: Foundational Literary Knowledge
Outcomes:
Students will master key literary and critical terms, and explore a variety of core critical approaches to the analysis and interpretation of literature

UCLR 100E Interpreting Literature - English (3 Credit Hours)
This foundational class will require students to read closely and analyze carefully a representative variety of prose, poetry, and drama. It will be a prerequisite for all second tier literature courses, as designated by each department. Only one section of UCLR 100, UCLR 100C, UCLR 100E, or UCLR 100M may be taken for credit as an undergraduate.
Knowledge Area: Foundational Literary Knowledge
Outcomes:
Students will master key literary and critical terms, and explore a variety of core critical approaches to the analysis and interpretation of literature

UCLR 100M Interpreting Literature - Modern Langs&Literatures (3 Credit Hours)
This foundational class will require students to read closely and analyze carefully a representative variety of prose, poetry, and drama. It will be a prerequisite for all second tier literature courses, as designated by each department. Only one section of UCLR 100, UCLR 100C, UCLR 100E, or UCLR 100M may be taken for credit as an undergraduate.
Knowledge Area: Foundational Literary Knowledge
Outcomes:
Students will master key literary and critical terms, and explore a variety of core critical approaches to the analysis and interpretation of literature

University Course (UNIV)

Discover, search, courses (p. 2661)!

UNIV 101 First Year Seminar (1 Credit Hour)
This class is intended to help first year students enhance their academic skills and social integration into Loyola University Chicago.
Course equivalencies: UNIV101 / ACUNI 101

UNIV 102 Loyola Seminar (1 Credit Hour)
This is a 1-credit, letter-graded, elective, special topics course taught by faculty or staff experts at Loyola. These small classes are intended to connect students to a faculty or staff member and their peers through meaningful discussions on topics of shared interest.

UNIV 112 Strategies for Learning (1 Credit Hour)
This course is designed primarily for first and second year students to strengthen their academic skills. This course provides an opportunity for students to evaluate their goals and motivation for studying at Loyola and to develop effective strategies for academic success.
Course equivalencies: CIEP 112/UNIV 112
Outcomes:
Students will gain a clear view of their goals and the steps and strategies needed for achieve academic success

UNIV 114 Bridge to Loyola Workshop (1-3 Credit Hours)
As part of the Bridge to Loyola program this course is designed to develop critical thinking and effective strategies for academic success. Restricted to students in the LEAP and STEP programs.
Course equivalencies: UNIV 114/CIEP 111
Outcomes:
Students will develop a capacity for critical and ethical judgements, effective study strategies, an introduction to scientific inquiry, and an understanding of the Loyola Mission

UNIV 201 Transfer Seminar (1 Credit Hour)
Enrollment restricted to Transfer Students. This seminar course is designed for students who transferred to Loyola from other institutions. Students in this course will develop strategies to succeed academically, transition smoothly and strengthen their connection with Loyola.
Outcomes:
1) Understand Loyola's mission/identity and participate in the Loyola Experience; 2) Improve study habits and academic motivation; 3) Enhance ability to find and utilize campus support and resources

UNIV 224 Career & Life Planning Seminar (3 Credit Hours)
Unsure of how your classes and previous experiences will turn into a career? Many students feel unsure about how to plan for life post-graduation. This seminar will allow you to reflect on who you are as a person (not just as a particular "major"), as well as how to research and connect with relevant opportunities and plan effectively for the next chapter of your life. Highly recommended for 3rd/4th year students.
Course equivalencies: CPSY 224/UNIV 224
Outcomes:
Clarify career identity and appropriate pathways; develop effective application materials, networking, and job/internship search skills; develop plan for next steps

UNIV 301 Ricci Seminar Rome (3 Credit Hours)
A research seminar in which a Ricci Scholar develops a project and refines it under the tutelage of a faculty member based in Rome. The focus of the project will be Rome-, Italy-, or Euro-centered.
Interdisciplinary Option: Global Studies
This course satisfies the Engaged Learning requirement.

UNIV 302 Ricci Seminar Asia (3 Credit Hours)
Pre-requisites: Restricted to Ricci Scholar students; UNIV 301 (Can also be taken as corequisite)
A research seminar in which a Ricci Scholar develops a project and refines it under the tutelage of a faculty member based on location at a LUC-approved study abroad site in Asia. The focus of the project will be Asia centered, based on the study abroad location of the Ricci Scholar student.
Interdisciplinary Option: Asian Studies, Global Studies
This course satisfies the Engaged Learning requirement.
Outcomes:
Design and conduct original research on a topic selected by student and approved by the Ricci Scholars Program; Evaluate the merits of different research methodologies, and be able to adopt or modify existing methods to do qualitative and quantitative research in different cultural contexts; Communicate effectively through written reports, oral presentations, and discussion; Provide constructive feedback to peers and work collaboratively in a multi-disciplinary setting

UNIV 340 Ricci Scholars Seminar (1 Credit Hour)
Pre-requisites: UNIV 301 and UNIV 302
This course is the culmination of one year junior study abroad experience of RICCI scholars who have done their two supervised individual research projects on East (Vietnam) and on West (Italy). In the course, student's East and West research studies are combined and compared to make a cohesive final report of their findings.

UNIV 370 Responsible Conduct in Research and Scholarship (0 Credit Hours)
Loyola University actively promotes a culture of responsible and ethical behaviors among all people associated with the University. This includes the LUC faculty, staff, and students of all levels. This course provides students with a strong foundation of the basic ethical principles and professional standards that can then be built upon by future experiences. Topics include the nine identified by Office of Research Integrity critical to research activities as well as those of value to scholars here at LUC. Taught over a three day period, students will be presented with information and relevant background and given the opportunity to apply these ethical principles in a small group setting. NOTE: This course satisfies the LUC policy requirements for students that are enrolled in graduate programs, undergraduate students that are involved in research activities, and faculty and staff that receive funds from external agencies that require evidence of ethics training.

Urban Studies (URB)

Discover, search, courses (p. 2661)!

URB 397 Urban Studies Research (3 Credit Hours)
Pre-requisites: Junior or Senior standing
In Urban Studies Research, undergraduates work on collaborative, community-based research projects through CURL (Center for Urban Research and Learning). The research teams include graduate students, faculty, and community leaders. This course must be taken concurrently with SOC/PLSC 335 Students will contribute to a research project that addresses inequities in urban communities.
Interdisciplinary Option: Urban Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: X-PLSC397/URB397

Urdu (URDU)

Discover, search, courses (p. 2661)!

URDU 101 Introductory Urdu I (3 Credit Hours)
This course is an introduction to the Urdu language. No previous knowledge is assumed. It also introduces the Urdu script.
Interdisciplinary Option: Asian Studies, Middle East and Islamic World Studies
Outcomes:
Students will be introduced to the spoken language and the script in which Urdu is written

URDU 102 Introductory Urdu II (3 Credit Hours)
Pre-requisites: URDU 101
This course is a continuation of URDU 101. The course imparts basic grammatical structures and vocabulary of Urdu as well as greater familiarity in reading and writing using the Urdu script.
Interdisciplinary Option: Asian Studies, Middle East and Islamic World Studies
Outcomes:
Students will be able to develop basic proficiency in the language and will be able to speak, read and write in simple sentences at the elementary level

Women & Gender Studies (WSGS)

Discover, search, courses (p. 2661)!

WSGS 101 Introduction to WSGS from a Global Perspective (3 Credit Hours)
This is an introduction to the interdisciplinary fields of both Women's Studies and Gender Studies which explore the ways that sex and gender manifest themselves in social, cultural, and political arenas. It draws upon scholarship in women's studies, masculinities studies, and queer studies which themselves draw upon a variety of intellectual perspectives, including historical, psychological, rhetorical, sociological, literary, and biological.
Knowledge Area: Foundational Societal Knowledge
Interdisciplinary Option: Women & Gender Studies
Outcomes:
students will demonstrate understanding of historical developments, key concepts, theories and themes in women's studies and gender studies, the impact that gender can have on social, cultural, political and economic material conditions

WSGS 201 Contemporary Issues in WSGS (3 Credit Hours)
Pre-requisites: ANTH 100, PLSC 102, SOCL 101, WSGS 101, or equivalent; please check requirements for declared majors/minors for exceptions
This course explores issues in women's studies, feminism, and gender studies from the perspective of a particular discipline, depending on the faculty member teaching the course. This may, for example, include Communication, English, History, Sociology, or Theology.
Knowledge Area: Tier 2 Societal Knowledge
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST201/WSGS201
Outcomes:
Students will examine the subjects of women and gender, as well as the challenges of conducting feminist or gender scholarship, within the discipline and how new research changes or transforms that scholarship

WSGS 297 Topics in WSGS (3 Credit Hours)
This course allows students to explore intermediate courses or seminars focused on the intersection of gender, sexuality, race, class, and other categories of power, privilege, and oppression.
Interdisciplinary Option: Women & Gender Studies

WSGS 330 History of Feminist Thought and Social Action (3 Credit Hours)
This course focuses on the history and development of feminist thought and activism since the late eighteenth century. Attention goes beyond just U.S. and European feminist history, exploring Indigenous, Black, and postcolonial feminism to investigate their unique feminist ideas and the challenges they pose to "traditional" feminist thought and action.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X - WSGS 330 / HIST 339F
Outcomes:
Students will learn to identify key concepts, thinkers, activists; analyze and critique some of the major works; and develop an integrated understanding of the history of feminist thought, broadly conceived

WSGS 350 Global Feminisms (3 Credit Hours)
Pre-requisites: WSGS 101 or WSGS 201
This course offers critical and theoretical tools to evaluate feminist theories by women of color in the global South. Adopting a decolonial, anti-racist approach, the course evaluates how women and gender relations are affected by economic, cultural, and political changes related to the racial regimes of globalization and migratory movements.
Interdisciplinary Option: Women & Gender Studies
Outcomes:
Students will acquire and utilize key theoretical concepts in the study of feminisms, race theory, border studies, postcolonial studies, transnationalism, and migration studies

WSGS 360 Migration, Identity, Sexuality (3 Credit Hours)
Pre-requisites: WSGS 101 or WSGS 201
In this seminar WSGS course we will explore how crossing borders, identity politics, and sexuality intersect to produce a rich and necessary conversation on contemporary global immigration issues. We will explore the gendered dynamics and experiences of recent immigrants.
Interdisciplinary Option: Women & Gender Studies
Outcomes:
Acquire and utilize key theoretical concepts in the study of borders, identity politics, transnationalism, and sexuality from an intersectional lens

WSGS 370 Sexual Assault Advocacy (3 Credit Hours)
Pre-requisites: WSGS 101 or WSGS 201
This course provides specific skills of support and advocacy services to sexual assault survivors. Students will gain an understanding of the impact of sexual assault on victims, the social and cultural context in which sexual assault occurs, and the roles systems play to both support and inhibit survivors recovery.
Interdisciplinary Option: Women & Gender Studies
Outcomes:
Students who successfully complete the course may be eligible to serve as Loyola University Chicago sexual assault advocates

WSGS 375 Masculinity Studies: Equity, Race, Transformation (3 Credit Hours)
Pre-requisites: WSGS 101
This course highlights the intersectional exploration of how masculinity is embodied, experienced, and replicated in the United States and globally. With this transnational lens, students gain a better understanding of contemporary global masculinity sociocultural issues and concerns which include race/racism, "angry white men," and the "crisis of masculinity."
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WSGS 375/WSGS 475
Outcomes:
Students will acquire and utilize key theoretical concepts in Masculinity studies from an international lens; Students will apply a wide critical terminology to literary texts and visual/cultural phenomena globally

WSGS 380 Queer Theory: Beyond the Binary (3 Credit Hours)
Pre-requisites: WSGS 101 or 201
This course maps the field of Queer Theory from an interdisciplinary, global perspective in order to cover a wide range of theoretical and disciplinary approaches (race theory, transnational theory, postmodernism, Latinx-American Studies, among others) and interpretative applications (film, literature).
Interdisciplinary Option: Women & Gender Studies
Outcomes:
Students will be able to identify key concepts and thinkers of this influential field of study; they will develop an intersectional, global understanding of this field of critical theory

WSGS 388 Women's Studies Practicum (3 Credit Hours)
This supervised field experience uses experiential learning at a wide variety uses experiential learning at a variety of women's political, cultural or educational organization as the basis for learning and refining skills which cab benefit gender equity.
Interdisciplinary Option: Women & Gender Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: WOST388/WSGS388
Outcomes:
Students demonstrate skill proficiency, professional conduct, and systematic reflection on their experience; Students learn about public and private sector responses to women's issues and concerns

WSGS 389 Independent Study (1-3 Credit Hours)
This course consists of independent research or engaged learning in a specific area of WSGS; work must be completed under the supervision of a WSGS faculty member.
Interdisciplinary Option: Women & Gender Studies
Outcomes:
Students will gain a deeper understanding of a specific WSGS topic through research, service, reading, or other mode of learning; The product of this work will vary depending on the interests of the student

WSGS 390 Directed Readings Women Studies (3 Credit Hours)
An independent program of reading and research arranged between the student and the supervising faculty member in the student's major department. Students will complete a final research project integrating their major fields with women's studies. Permission of women's studies director is required.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST390/WSGS390

WSGS 391 WSGS Methodologies (3 Credit Hours)
Pre-requisites: WSGS 101 or WSGS 201, and WSGS 330
This course is part of a two-semester sequence for the final year of the WSGS major and minor. In this course we review several approaches to feminist research methods and consider ways to put them into practice, individually or combined with other methods. Enrollment by permission.
Interdisciplinary Option: Women & Gender Studies
Outcomes:
Students will produce a project proposal that (1) demonstrates an interdisciplinary approach; (2) draws on theory and scholarship in WSGS; and (3) reflects the use of feminist methodologies in practice

WSGS 397 Special Topics in WSGS (3 Credit Hours)
This course allows students to explore advanced courses or seminars focused on the intersection of gender, sexuality, race, class, and other categories of power, privilege, and oppression.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST397/WSGS397
Outcomes:
Students demonstrate an understanding of a unique topic in women's studies

WSGS 398 Women's Studies Internship (3 Credit Hours)
This course uses supervised project-based experiential learning to allow students the opportunity to apply feminist analysis and practical skills to a student-designed project that will be completed within the timeframe of a course term.
Interdisciplinary Option: Women & Gender Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: WOST398/WSGS398
Outcomes:
Students learn application of feminist concepts and principles to pragmatic outcomes; leadership, planning, time management, and assessment skills

WSGS 399 WSGS Capstone (3 Credit Hours)
Pre-requisites: WSGS 330 and WSGS 391; Enrollment by permission
This is a project-oriented course that represents the culmination of the WSGS major. Students build on their work in WSGS 391/WSGS Methodologies to complete a project under the direction of a faculty or community organization mentor, either individually or as a group.
Interdisciplinary Option: Women & Gender Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: WOST399/WSGS399
Outcomes:
Students will complete a project that (1) demonstrates an interdisciplinary approach; (2) draws on theory and scholarship in WSGS; and (3) reflects the intentional use of feminist methodologies in practice

WSGS 401 History of Feminist Thought (3 Credit Hours)
This course surveys the historical development of feminist thought from Mary Wollstonecraft to second wave feminism and beyond and analyzes the impact of feminism on the general culture.
Course equivalencies: WOST401/WSGS401

WSGS 402 Foundations of Women's Studies (3 Credit Hours)
This course investigates how gender has become a critical category in education and knowledge and traces the institutional and intellectual development of women's and gender studies as a field, focusing on the evolution of WGS in the academy (here and in other countries) and on the changes in concepts of knowledge, in methodologies, and in pedagogy that women's studies scholarship has produced in various fields.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST402/WSGS402

WSGS 450 Global Feminisms (3 Credit Hours)
This course is a course that explores feminism and the study of gender in a global dimension. Chosen texts privilege the study of women, gender, and sexuality from an international perspective. The course highlights the intimate relationship between the study of feminism, (post/de)colonialism, and racism.
Course equivalencies: WOST450/WSGS450

WSGS 455 Feminist Pedagogy (3 Credit Hours)
Pre-requisites: Graduate Status
This course will focus on distinctly feminist ways of learning and teaching. As with feminist theory and research methods, feminist pedagogy has been understood to include characteristics like self-reflexivity, de-centered authority, standpoint epistemologies, examinations of power dynamics, and attention to embodied ways of learning and knowing.
Outcomes:
Understand the foundational principles of feminist pedagogy and related approaches to teaching; Develop skills to analyze and produce sound teaching practices within a feminist intersectional framework

WSGS 460 Migration, Identity, Sexuality (3 Credit Hours)
Pre-requisites: Graduate Status
We will explore how crossing borders, identity politics, gender, and sexuality intersect to produce a conversation on contemporary global immigration issues. Focus is on movement from three geographic locations from/to the Global South and North: Latin America to the US and Europe; Africa to Europe; Europe to Latin America and back.

WSGS 470 Sexual Assault Advocacy (3 Credit Hours)
Pre-requisites: Graduate Status
This course provides specific skills of support and advocacy services to sexual assault survivors. Students will gain an understanding of the impact of sexual assault on victims, the social and cultural context in which sexual assault occurs, and the roles systems play to both support and inhibit survivors recovery.
Course equivalencies: WOST370/WSGS370/WGSG470
Outcomes:
Students who successfully complete the course may be eligible to serve as Loyola University Chicago sexual assault advocates

WSGS 475 Masculinity Studies: Equity, Race, Transformation (3 Credit Hours)
Pre-requisites: Graduate Status
This course highlights the intersectional exploration of how masculinity is embodied, experienced, and replicated in the United States and globally. With this transnational lens, students gain a better understanding of contemporary global masculinity sociocultural issues and concerns which include race/racism, "angry white men," and the "crisis of masculinity."
Course equivalencies: WSGS 375/WSGS 475
Outcomes:
Students will acquire and utilize key theoretical concepts in Masculinity studies from an international lens; Students will apply a wide critical terminology to literary texts and visual/cultural phenomena globally

WSGS 480 Queer Theory (3 Credit Hours)
Pre-requisites: Graduate status
This graduate level course maps the field of queer theory from an interdisciplinary perspective in order to cover a wide range of theoretical and disciplinary approaches and interpretive applications. Outcome: Students will acquire and utilize theoretical concepts in queer studies, develop cultural competency in queer studies and present information about the field orally and in writing.
Interdisciplinary Option: Women & Gender Studies

WSGS 497 Topics in Women's Studies and Gender Studies (3 Credit Hours)
This topics course may originate in Women's Studies and Gender Studies or as a cross-listed course and deals with women's and gender topics including identity, sexuality, diversity, relationships of power in national, transnational and international contexts. The ethical and social justice implications of topics include feminist perspectives.
Course equivalencies: WOST497/WSGS497
Outcomes:
Students understand feminist perspectives on gender in literature; Students connect theory and practice in writing, performance, action or in combined formats

WSGS 498 Practicum (1-3 Credit Hours)
WSGS Practicum gives students the option of doing an internship, teaching assistantship, or research assistantship under the supervision of a faculty member. This practicum counts as an elective credit towards the student's MA degree.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST498/WSGS498
Outcomes:
Develop intersectional research and critical thinking skills in academic/socio-cultural contexts while being fully engaged in Practicum; Enhance written and verbal communication through creative use of Feminist pedagogy and methodology to enhance classroom education and public/academic presentations

WSGS 499 Independent Study (1-3 Credit Hours)
An independent study provides students with the opportunity to work closely and one-on-one with a faculty member. The student can choose her/their/his topic or creative project. The independent study should be comparable to a graduate-level course.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST499/WSGS499

WSGS 500 Thesis Research (3 Credit Hours)
A Thesis Research course allows graduate students to fine tune their research skills, academic writing, and independent thought while they are preparing their thesis proposal and/or writing their thesis.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST500/WSGS500

WSGS 595 Thesis Supervision (1 Credit Hour)
The focus of a Thesis Supervision is to help students better strategize, structure, and organize themselves as they write their thesis. Students will also be advised about how to prepare for a successful oral defense.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: WOST595/WSGS595

WSGS 599 Capstone Presentation (0 Credit Hours)
Pre-requisites: Successful completion of 12 hours in the MA program in WSGS
WSGS 599 is the culmination of the Master's program in Women's Studies and Gender Studies. Requirements include a 10 page synthesis paper or detailed outline, annotated bibliography, and public presentation at our biannual capstone ceremony.
Outcomes:
Synthesis of the students' graduate coursework; performance of the diversity of outcomes in WSGS; celebration of students' achievements; networking

WSGS 605 Master's Study (1 Credit Hour)
Continuing work on completion of the Master's Degree in Women's Studies and Gender Studies.
Interdisciplinary Option: Women & Gender Studies
