Before transferring, students should first meet with their advisor to identify the remaining degree requirements and their options to complete the degree, including transfer back. The Transfer Coordinator can help the student identify a transfer institution and transferable coursework. The student must submit the syllabus to the Transfer Coordinator for approval. Students can initiate the transfer back process by completing the Transfer Back Worksheet, with the Transfer Coordinator and submitting the completed form to the Office of Academic Affairs. The student can retrieve a copy of the Transfer Back Worksheet from the Office of Academic Affairs or the Transfer Coordinator. After earning a “C” or above in the transfer back coursework, the student will need to send an official transcript from the transfer institution to Loyola University Chicago.

Withdrawal

Voluntary Withdrawal from Course(s)

A student does not require any special permission to withdraw from a course if the withdrawal will leave them enrolled in at least 12 credits during a fall or spring term, or at least six credits during the summer term.

If the withdrawal will change the student's status to part-time enrollment, they must submit a *Request for Class Withdrawal & Part-Time Enrollment* to the Office of Academic Affairs. Before submitting this request, the student should first consult with their advisor to discuss their academic plans as well as with their financial aid counselor to determine if the withdrawal will impact their eligibility for aid or result in any financial liability. Last dates of actual attendance may be verified with instructors, which can impact final marks and financial aid eligibility.

Voluntary Total Withdrawal from an Academic Term

An enrolled student who wishes to withdraw from all of their coursework during an academic term must submit a *Request for Total Withdrawal* to the Office of Academic Affairs. Before submitting this request, the student should first consult with their advisor to discuss their academic plans as well as with their financial aid counselor to determine if the withdrawal will impact their eligibility for aid or result in any financial liability. Last dates of actual attendance may be verified with instructors, which can impact final marks and financial aid eligibility. Additional documentation may be required based on the timing of a total withdrawal request, such as a *Request for Emergency Withdrawal* if the request is submitted after the last date in the term to withdraw or a *Request for Leave of Absence* if submitted in the beginning of a new term.

Administrative Withdrawal for Non-Attendance

Enrolled students who demonstrate no academic activity within the first week of a new term (including attendance, submission of assignments, and/or logging into Sakai), and who do not notify the College of any circumstances that may preclude their activity, may be withdrawn from some or all of their classes at the discretion of, and with notification from the Office of Academic Affairs. Students withdrawn from all their classes for non-attendance in the first week of a term will not have financial aid disbursed and billing for the term will be canceled, but students will be liable for any outstanding balances from previous terms. Students withdrawn under these circumstances should contact their advisor to determine if they are eligible to re-enroll for the current or next academic term. Students withdrawn for non-attendance will not be officially discontinued from their program until or unless there is a second consecutive term of inactivity.

Undergraduate

Students are personally responsible to review the following general academic rules and regulations. If students have questions about particular regulations, they should contact their academic dean's office for clarification.

Academic Appeals

The University’s commitment to the care of the individual person is the foundation for an appeals process that affords students the opportunity to have a review of circumstances that impact their academic standing or progress at the University.

Student Rights in an Academic Appeal Process When a Hearing Will Take Place

All students have the right to be treated with dignity and respect throughout any interaction with the academic appeal process and have the following procedural rights during hearings:

1. Right to Participate: To be present throughout the hearing but not during the deliberation process of the hearing board
2. Right to an Advisor: To be accompanied by an advisor, if desired (see section on rights of an advisor)
3. Right to Review: To review all documentation concerning the potential policy violations during the hearing
4. Right to Refute: To refute information provided by witnesses

Appeal for a Change in Academic Record

A student's appeal to change an academic record (e.g., withdrawal date) must be submitted using the Request for Change to Academic Record or Status (https://cm.maxient.com/reportingform.php?LoyolaUnivChicago&layout_id=104) form to describe mitigating circumstances as to why the academic record should be changed. An appeal to change an academic record must be submitted within one calendar year after the last day of the academic term in question. Appeals for summer terms must be received by June 1 of the following academic year. This form is the only approved process to submit such a request.

Appeal of a Course Grade

Students who wish to contest a course grade may initiate the academic appeal process (https://cm.maxient.com/reportingform.php?LoyolaUnivChicago&layout_id=102). This form is the only approved process to submit such a request.

With very rare exceptions, the final decision on all grades rests with the professor. Students have the right to protection, through fair procedures, against arbitrary and capricious academic evaluations. Arbitrary and capricious means that there is no relationship between the grade given and the student's performance in the class and also, that a reasonable person could not find that the grade was deserved. Mere disagreement or dissatisfaction with a grade thus does not constitute a basis for an appeal.

Appeal a Finding of Academic Misconduct

Students who wish to contest a finding of academic misconduct may review the academic integrity policy (https://catalog.luc.edu/academic-standards-regulations/undergraduate/#/#ACADINT). If a student wishes to appeal a finding of Academic Misconduct they should submit the Academic Appeal Form (https://cm.maxient.com/reportingform.php?LoyolaUnivChicago&layout_id=100). This form is the only approved process to submit such a request.

Appeal for a Decision Related to Transfer Credit

Students requesting review of their transfer credit decision communicated by the Office of Registration and Records, may do so by submitting a formal written letter of appeal to the Office of Registration and Records, Associate Registrar at transfer-credit@luc.edu. This appeal is the student's opportunity to explain reasons why the transfer credit should be reconsidered. A syllabus must be provided to support the student's position. No appeal will be considered until all final, official transcripts are received by the Office of Registration and Records.

Students will be notified via Loyola email of the outcome of their appeal of transfer credit articulation decision by the Office of Registration and Records within 10 business days. All appeal decisions made by the Office of Registration and Records are final.

Appeal of Academic Dismissal

Students who are dismissed due to poor academic performance may appeal their dismissal by submitting the Appeal of Academic Dismissal (https://cm.maxient.com/reportingform.php?LoyolaUnivChicago&layout_id=105) form to their academic Dean's Office. Students enrolled in more than one school may only submit one appeal to the Dean's office of their choosing from which they were dismissed. This form (https://cm.maxient.com/reportingform.php?LoyolaUnivChicago&layout_id=105) is the student's opportunity to explain any mitigating circumstances as to why the student's dismissal should be reconsidered. Documentation must be provided to support the student's position. This form is the only approved process to submit such a request.

An academic dismissal will be overturned only when a student is able to produce specific documentation that proves University error or extraordinary circumstances beyond the student's control that warrant an exception to University academic policies.

The appeal must be made within 10 business days of the date of email notification of academic dismissal. The academic Dean's office may determine that a student meeting is required after the appeal is submitted. Appeal decisions will be made within 10 business days of the receipt of the appeal.

A student may request an appeal decision made by an Assistant or Associate Dean to be considered by the Dean. Appeal decisions made by the Dean are final.

Academic Appeal Process

Purpose of the Academic Appeal Process

With very rare exceptions, the final decision on all grades rests with the professor. Students have the right to protection, through fair procedures, against arbitrary and capricious academic evaluations. Arbitrary and capricious means that there is no relationship between the grade given and the student's performance in the class and also, that a reasonable person could not find that the grade was deserved. Mere disagreement or dissatisfaction with a grade thus does not constitute a basis for an appeal.

In order to provide a forum for the fair resolution of academic disputes involving individual student complaints of the appropriateness of course grades and accusations of academic misconduct the following processes have been developed and will be applied to all cases involving Loyola undergraduate students.

Academic Appeal Process: Course Grade Dispute

1. The student's first step in the event of a grade dispute is to confer directly with the instructor.
2. If the grade dispute is not resolved, a student must submit a formal request using the Academic Appeal Form: Course Grade Dispute (https://cm.maxient.com/reportingform.php?LoyolaUnivChicago&layout_id=102) for a grade change no later than 30 days into the following semester explaining in detail why the grade is arbitrary and capricious. This form is the only approved process to submit such a request.

1. If the final grade is assigned in spring or summer semester, the student must submit the appeal no later than 30 days into the fall semester.
2. If the final grade is assigned in fall or J-term, the student must submit the appeal no later than 30 days into the spring semester.
3. For a course offered by the School of Continuing and Professional Studies, the student must submit the appeal no later than 30 days after the final grade is officially posted.

3. The Department Chair and/or Dean's designee determines whether or not there are grounds for an appeal.
    1. When the Department Chair and/or Dean's designee determines there are no grounds for an appeal, the student will be notified via Loyola email that a hearing board will not be convened.
        1. If the student disagrees with the determination by the Department Chair and/or Dean's designee, the student may appeal to the appropriate academic Dean. In cases where the student is enrolled in a school other than the one in which the course is taught, the academic Deans of the two schools will review the appeal together. The student's academic Dean's office will notify the student of the final decision via Loyola email.
    2. When the Department Chair and/or Dean's designee determines there are grounds for an appeal, the student will be notified via Loyola email that a hearing board will be convened.
    3. It is up to the discretion of the Dean or his/her designee if a student may continue taking courses in a sequence where the course grade under review is a pre-requisite.
4. Each department will have a standing hearing board or have the means to constitute a hearing board for each dispute. Board members are chosen by the Department Chair and/or Dean's designee and will consist of three to five faculty members other than the faculty member involved or Department Chair. In smaller departments or interdisciplinary programs, board members may be members of different departments.
5. The chairperson of each hearing board will be selected by the person who appoints the hearing board. The chairperson of the hearing board receives all requests for hearings from the department, sets the calendar, notifies all involved parties of the dates and times of hearings via Loyola email, and informs students by written notice of the decisions of the board.
6. The hearing will be held within 10 business days of the receipt of the request for a hearing, if practicable.
7. The hearing will be private.
8. Hearings for a grade dispute generally proceed according to the following format:
    a. Introduction of all parties present (including witnesses, when applicable) and an overview of the hearing process.
    b. Review of the Student Rights in the Academic Appeal Process form (https://cm.maxient.com/reportingform.php?LoyolaUnivChicago&layout_id=101).
    c. Students should complete the electronic form in advance of the hearing.
    d. Hearing board chairperson reviews the nature of the grade dispute and the University policy potentially violated.
    e. Witnesses are excused until statements are needed (if applicable).
    f. Student(s) (and Instructor(s) when applicable) provide a personal account of the reported incident.
    g. Student(s) (and Instructor(s) when applicable) have the opportunity to review all documentation relevant to the case that will be used by the hearing board to make a decision.
    h. Hearing board members ask any remaining investigative questions to the parties present (including witnesses, if applicable).
    i. Student(s) are provided a final opportunity to make any closing comments.
    j. Instructor(s) are provided a final opportunity to make any closing comments.
    k. Hearing board chair may excuse all parties for deliberation if needed
    l. Student(s) (and Instructor(s) when applicable) are notified of the decision and any related outcomes either immediately after deliberation or, when further deliberation is needed, typically within 5 business days in writing via Loyola email.
9. Both the student and the faculty member involved may be accompanied by one advisor of their choice throughout the hearing process. The individual must inform the chairperson of the hearing board via Loyola email of the name of the advisor at least 2 business days before the hearing date.
    1. The role of an advisor is to provide a comforting presence for the student and/or instructor. An advisor may only speak to the advisee. An advisor may not ask questions, interject, advocate for, or otherwise speak on behalf of the advisee. Even if an advisor is an attorney, the advisor may not function as legal counsel or "represent" an advisee during the hearing process.
    2. If any advisor conducts themselves in a manner inconsistent with these guidelines, or if the advisor's behavior obstructs or interferes with the hearing process, the advisor will be warned by the board.
    3. If the advisor's interfering behavior continues or if the advisor engages in a manner that harasses, abuses, or intimidates any other participant, the advisor will be excused from the hearing immediately.
10. The student and/or instructor have the option of submitting relevant materials to the hearing board prior to or at the time of the hearing. Individuals in the hearing process have the responsibility of presenting truthful information.
11. The Board may address questions to any party.
12. The chairperson of the hearing board determines the hearing processes (e.g. location, order of proceedings, determining what evidence is relevant, determining if additional information is needed, etc.). The standard of evidence required for a board to determine that arbitrary and capricious academic evaluation occurred is known as a "preponderance of the evidence." This means the board must determine that it is more likely than not that arbitrary and capricious academic evaluation occurred based on the totality of available evidence.
13. All decisions of the board must be determined by a majority vote of the hearing board members. A final decision must be rendered by the board by the end of the hearing process.
14. The student and instructor will be informed in writing via Loyola email by the chairperson of the board's decision within 5 business days of the hearing. The decision is also shared with the Department Chair and/or Dean's designee.
    1. If the hearing board determines that a grade change is not warranted, the chair of the hearing board will notify the student and the instructor involved of the decision.

2. If the hearing board determines that a grade change is warranted, the Dean and/or Dean's designee submits a grade change request to the Office of Registration and Records. The Department Chair and/or Dean's designee will notify the student and the instructor involved of the decision vial Loyola email.

Should the student or instructor wish to contest the hearing board's decision, an appeal letter to the Dean and/or Dean's designee within 30 days of notice of the hearing board's decision may be sent using the Academic Hearing Board Appeal form (https://cm.maxient.com/reportingform.php?LoyolaUnivChicago&layout_id=103). This form is the only approved process to submit such a request.

1. The appeal letter must clearly identify the grounds for the appeal with appropriate supporting documentation. Mere disagreement or dissatisfaction with the decision does not constitute a basis for an appeal.
2. The grounds to appeal the board's decision must include one or more of the following criteria:
    1. New substantive information is available that was not reasonably available at the time of the hearing and could substantially impact the original findings or outcomes of the case.
    2. A substantive procedural error or error in the interpretation of University policy occurred that denied the student or instructor the right to a fair hearing and decision.
    3. The decision (findings or outcomes) is significantly incongruent with the established facts presented at the hearing or the established Undergraduate Academic Catalog.

Academic Integrity

Academic integrity is the pursuit of scholarly activity in an open, honest, and responsible manner. Academic integrity is a guiding principle for all academic activity at Loyola University Chicago, and all members of the University community are expected to act in accordance with this principle.

Standards

Failing to meet the following standards is a serious violation of personal honesty and the academic ideals that bind the University into a learning community. These standards apply to both individual and group assignments. Individuals working in a group may be held responsible if one of the group members has violated one or more of these standards.

1. **Students may not plagiarize.**
   Plagiarism involves taking and using specific words, phrases, or ideas of others without proper acknowledgement of the sources. Students may not:
    1. Submit material copied from a published or unpublished source.
    2. Submit material that is not cited appropriately.
    3. Use another person's unpublished work or examination material.
    4. Allow or pay another party to prepare or write an assignment.
    5. Purchase, acquire, or use a pre-written assignment for credit.
    6. Use generative artificial intelligence to complete or write assignments or exams, partially or fully, without prior permission of the instructor.
2. **Students may not submit the same work for credit for more than one assignment (known as self-plagiarism).**
   If a student plans to submit work with similar or overlapping content two or more times for any purpose, the student should consult with all instructors prior to submission of the work to make certain that such submission will not violate this standard.
3. **Students may not fabricate data.**
   All experimental data, observations, interviews, statistical surveys, and other information collected and reported as part of academic work must be authentic. Any alteration, e.g., the removal of statistical outliers, must be clearly documented. Data must not be falsified in any way.
4. **Students may not collude.**
    1. Students may not work with others on any exam, assignment or portion of an assignment without permission from the instructor.
    2. Students' work with one another on an exam or assignments may not exceed the terms of their instructors' directions for collaboration as part of the assignment.
    3. Students may not use work submitted by another student in a previous semester of a course.
5. **Students may not cheat.**
    1. Students may not obtain, distribute, or communicate examination materials prior to the scheduled examination without the consent of the instructor.
    2. Students may not take an examination by proxy.
    3. Students may not attempt to change answers after an examination or an assignment has been submitted.
    4. Students may not falsify medical or other documents for any reason.
    5. Students may not use unauthorized study aids in an exam. Examples include, but are not limited to:
        1. Bringing notes into an exam that does not allow outside materials.
        2. Programming equations into a calculator when the instructor has indicated that students are to be tested on the recall of those same equations.
        3. Using any electronic device that allows students to look up, translate, calculate, or communicate information with someone else.
    6. Students may not facilitate academic misconduct.
        1. For example, a student may not allow another student to copy from their exam or give their own work to another student.

Sanctions

An instructor is responsible for determining the sanctions for academic misconduct in the course sections they teach. This also applies to individuals responsible for administering placement tests. Sanctions are assigned on a case-by-case basis while considering precedent and the following standards below. Academic deans may add to or elevate the initial sanctions assigned by the instructor based on the student's prior academic misconduct history:

- the context and seriousness of the violation
- the student's demonstrated commitment not to engage in the same behavior in the future; and
- sanctions that appropriately foster accountability for one's behavior and prevent recurrence of similar behaviors

Below is a list of commonly assigned sanctions and instructors may choose from this entire list:

1. Educational Experiences
   Educational experiences provide space for students to reflect upon their conduct; to identify how their action harmed themselves,

others, and the community; and/or to explore why such conduct is unacceptable.

Educational experiences or projects may include:

1. Attendance and participation at a required meeting, workshop, special project, or other initiative.
2. Completing an online tutorial focused on academic integrity.
3. A written reflection about a specific topic or issue.
4. Resubmission of the assignment or exam for partial credit.
5. A required meeting with the appropriate dean to discuss the misconduct and the consequences.
6. Completing restorative service hours and/or a Values Workshop.

Deadlines for educational experiences may vary.

2. Failing Grade on the assignment
   A letter grade of F or zero points will be issued for the assignment or examination.
3. Failing Grade in a course
   A letter grade of F will be issued for the course.
4. If a Placement Assessment violation, a warning may be issued.
   A Placement Assessment Warning is an official notice to the student that the student's behavior on their placement assessment was inappropriate and violated the Undergraduate Studies Catalog.
5. University Suspension - may only be determined by the student's academic dean's office.
   University suspension involves the temporary removal of the student from the University for a specified period of time with the understanding the student may be allowed to return to the University at the completion of the suspension period after having satisfied any accompanying conditions. The Academic Dean's office may consider suspension as an elevated sanction.

   Suspension from the University further entails being withdrawn from all enrolled courses (resulting in "W" grades) restriction from visiting the University premises except when engaged in official business approved by the Office of the Provost. Visiting the University premises without gaining approval may result in arrest. Students suspended from the University remain responsible for tuition and fees. Students suspended from the University also must forfeit their Loyola ID (Campus Card) and turn it in to Campus Safety. University suspension may also include any other disciplinary action that is judged to be of value to the student.

   Persons notified of a student's suspension may include parent/guardian, The Office of the Provost, the Office of Registration and Records, the Bursar, the Office of the Dean of Students and their designees, Campus Safety, or other appropriate personnel at the discretion of the Office of the Provost. Suspended students may not study abroad or travel with the University and may not be approved to study abroad until 90 days after their suspension period has ended. University suspension is typically assigned for a minimum of the rest of the semester and may last any number of years.

   When a suspension is over and the student has completed any conditions accompanying the suspension, the student must contact their academic dean's office requesting reinstatement and providing documentation demonstrating that the student has satisfied the terms of the suspension (if applicable). The academic dean's office may require a meeting with the student before permitting reenrollment. The student may reenroll at the University only after the academic dean's office has made an affirmative decision, notified the student, and released the registration hold on the student's University account. If the suspension is for a period of one fall or spring semester, the student will return under the same catalog requirements that were in place for their declared majors/minors at the time of suspension. If the suspension is for a period longer than one fall or spring semester, the student will need to reapply to the university through the appropriate admission's office.
6. University Expulsion
   An academic dean may recommend a sanction of University Expulsion to the Provost. Expulsion from the University (also commonly known as dismissal) is the most serious University disciplinary action and means the permanent exclusion of the student from the University. Only the Provost may impose the sanction of expulsion as recommended by a Dean. The Provost's decision is final. A student is not eligible to reapply or be readmitted to any other programs at Loyola University Chicago following expulsion.

   Expulsion may include: forfeiture of all rights and degrees not actually conferred at the time of the expulsion; permanent notation of the expulsion on the student's academic record; withdrawal from all courses (resulting in "W" grades). Students expelled from the University remain responsible for tuition and fees. Students expelled from the University also must forfeit their Loyola ID (Campus Card) and turn it in to Campus Safety. Any student expelled from the University are not permitted to visit the University premises except when engaged in official business approved in advance and in writing by the Office of the Provost or Campus Safety. Visiting the University premises without gaining approval in advance may result in arrest.

   Persons notified of a student's expulsion may include parent/guardian, the Office of the Dean of Students and their designees, the Office of Registration and Records, the Bursar, Campus Safety, or other appropriate personnel at the discretion of the Office of the Provost.

Process

1. Instructors will gather the appropriate information and documentation when they suspect an instance of academic misconduct has occurred. The standard of evidence required for an instructor to determine responsibility is known as a "preponderance of the evidence." This means the instructor must determine that it is more likely than not that an alleged violation occurred based on the totality of available evidence.
2. If instructors conclude an instance of academic misconduct has occurred, then they will determine the sanction as it relates to the course.
3. Instructors will notify the student of their findings and sanction. Instructors should allow the student an opportunity to respond before reporting the incident.
4. If after talking with the student or the student fails to respond to the instructor's outreach within two business days and instructors have determined that academic misconduct has occurred, instructors will then report the instance of academic misconduct, including

supporting documentation, to the Department Chair and the student's academic Dean's office.

5. The case is reported through the Academic Misconduct Report form (https://cm.maxient.com/reportingform.php?LoyolaUnivChicago&layout_id=6). This form is the only approved process to submit such a request.
6. The student's academic Dean's office will notify the student that the instance of academic misconduct has been reported.
    1. The initial sanction determined by the instructor may be reviewed by the academic Dean's office.
    2. The final sanction will be included in the notification.
7. Incident reports and supporting materials regarding the academic misconduct are part of the student's academic record. The academic record is not a transcript; this academic record is maintained by the Office of the Dean of Students for a period of seven years from the date of the incident with the exception of cases resulting in University Expulsion (such files are retained indefinitely).

Appeals

1. Students retain the right to appeal the determination made at any stage of the process outlined above using the Academic Appeal Process described below.
2. The decision of the academic Dean's office is final in all cases except expulsion.

Academic Appeal Process: Academic Misconduct

1. If a student chooses to contest a finding of academic misconduct, the student's first step is to confer directly with the instructor.
2. If a student and instructor are unable to resolve the issue relating to academic misconduct and the student still chooses to contest the finding, the student may appeal by submitting the Academic Appeal Form: Finding of Academic Misconduct (https://cm.maxient.com/reportingform.php?LoyolaUnivChicago&layout_id=100) no later than 30 days into the following semester.
    1. If the dispute occurs within a class in the spring or summer semester, the student must submit the appeal no later than 30 days into the fall semester.
    2. If the dispute occurs within a class in the fall or J-term, the student must submit the appeal no later than 30 days into the spring semester.
    3. For a course offered by the School of Continuing and Professional Studies, the student must submit the appeal no later than 30 days after the final grade is officially posted.
3. The Department Chair and/or Dean's designee determines whether or not there are grounds for an appeal.
    1. When the Department Chair and/or Dean's designee determines there are no grounds for an appeal, the student will be notified that a hearing board will not be convened.
    2. If the student disagrees with the determination by the Department Chair and/or Dean's designee, the student may appeal to the appropriate academic Dean. In cases where the student is enrolled in a school other than the one in which the course is taught, the academic Deans of the two schools will review the appeal together.
4. The academic Dean's office will notify the student of the final decision.
5. When the Department Chair and/or Dean's designee determine there are grounds for appeal, the student will be notified via Loyola email that a hearing board will be convened.
6. Each department will have a standing hearing board or have the means to constitute a hearing board for each dispute. Board members are chosen by the Department Chair and/or Dean's designee and will consist of three to five faculty members other than the faculty member involved or Department Chair. In smaller departments or interdisciplinary programs, board members may be members of different departments.
7. The chairperson of each hearing board will be selected by the person who appoints the hearing board. The chairperson of the hearing board receives all requests for hearings from the department, sets the calendar, notifies all involved parties of the dates and times of the hearing and informs students by written notice of the decisions of the hearing board.
8. The hearing will be held within two weeks of the receipt of the request for a hearing, if practicable.
9. The hearing will be private and all information will be held confidential.
10. Hearings for refuting a charge of academic misconduct generally proceed according to the following format:
    1. Introduction of all parties present (including witnesses, when applicable) and an overview of the hearing process.
    2. Review the Student Rights in the Academic Appeal Process form (https://cm.maxient.com/reportingform.php?LoyolaUnivChicago&layout_id=101).
    3. Students should complete the electronic form in advance of the hearing.
    4. Hearing board chairperson reviews the nature of the alleged conduct and the University policies potentially violated.
    5. Witnesses are excused until statements are needed (if applicable).
    6. Student(s) (and Instructor(s) when applicable) provide a personal account of the reported incident.
    7. Student(s) (and Instructor(s) when applicable) have the opportunity to review all documentation relevant to the case that will be used by the hearing board to make a decision.
    8. Hearing board members ask any remaining investigative questions to the parties present (including witnesses, if applicable).
    9. Student(s) are provided a final opportunity to make any closing comments.
    10. Instructor(s) are provided a final opportunity to make any closing comments.
    11. Hearing board chair may excuse all parties for deliberation if needed.
    12. Student(s) (and Instructor(s) when applicable) are notified of the decision and any related outcomes either immediately after deliberation or, when further deliberation is needed, typically within five business days in writing, via Loyola email.
11. Both the student and the faculty member involved may be accompanied by one advisor of their choice throughout the hearing process. The individual must inform the chairperson of the hearing board of the name of the advisor before the hearing date.
    1. The role of an advisor is to provide a comforting presence for the student and/or instructor. An advisor may only speak to the advisee. An advisor may not ask questions, interject, advocate for, or otherwise speak on behalf of the advisee. Even if an advisor is an attorney, the advisor may not function as legal counsel or "represent" an advisee during the hearing process.

2. If any advisor conducts themselves in a manner inconsistent with these guidelines, or if the advisor's behavior obstructs or interferes with the hearing process, the advisor will be warned by the board.
3. If the advisor's interfering behavior continues or if the advisor engages in a manner that harasses, abuses, or intimidates any other participant, the advisor will be excused from the hearing immediately.

12. The student and/or instructor have the option of submitting relevant materials to the hearing board prior to or at the time of the hearing. Individuals in the hearing process have the responsibility of presenting truthful information.
13. The board may address questions to any party.
14. The chairperson of the hearing board determines the hearing processes (e.g. location, order of proceedings, determining what evidence is relevant, determining if additional information is needed, etc.). The standard of evidence required for a board to determine responsibility is known as a "preponderance of the evidence." This means the board must determine that it is more likely than not that an alleged violation occurred based on the totality of available evidence.
15. All decisions of the board must be determined by a majority vote of the hearing board members. A final decision must be rendered by the board by the end of the hearing process. All deliberations among the hearing board members are private.
16. The student and instructor will be informed in writing via Loyola email by the chairperson of the board's decision within 10 business days of the hearing. The decision is also shared with the Department Chair and/or Dean's designee.

    Should the student or the instructor wish to contest the hearing board's decision, an appeal to the Dean and/or Dean's designee within 30 days of notice of the hearing board's decision may be sent using the Academic Hearing Board Appeal form (https://cm.maxient.com/reportingform.php?LoyolaUnivChicago&layout_id=103). This form is the only approved process to submit such a request.
    1. The appeal letter must clearly identify the grounds for the appeal with appropriate supporting documentation. Mere disagreement or dissatisfaction with the decision does not constitute a basis for an appeal.
    2. The grounds to appeal the board's decision must include one or more of the following criteria:
        1. New substantive information is available that was not reasonably available at the time of the hearing and could substantially impact the original findings or outcomes of the case.
        2. A substantive procedural error or error in the interpretation of University policy occurred that denied the student or instructor the right to a fair hearing and decision.
        3. The decision (findings or outcomes) is significantly incongruent with the established facts presented at the hearing or the established Undergraduate Academic Catalog.
17. Upon receipt of the appeal letter, the Dean and/or the Dean's designee will review the appeal to determine whether or not to uphold the decision of the hearing board.

    The student and the instructor will be notified via Loyola email by the Dean's office of the final decision. This Dean and/or the Dean's designee decision is final and binding.

Academic Standing

Loyola University Chicago understands education to be a process of academic development and growth; therefore academic progress is an important element in an individual's life at the university. The university has instituted formal procedures for warning and ultimately dismissing those who are not progressing as required. Academic probationary status and even academic dismissal should be understood as necessary, although unfortunate, consequences for those students directly involved. During the period of academic probation no student will be allowed to represent the university publicly. Any exception to this restriction must come explicitly from the student's academic dean. The student's academic dean determines when a student is placed on academic probation or dismissed for academic reasons.

Generally, academic standing is determined using a basic grade point average (GPA) criteria. Students must maintain a grade point average of at least 2.00 to be in good academic standing. Graduation from the university requires at least a 2.00 average for all coursework attempted and a minimum of a least a 2.00 average in a student's major.

Note - some majors have additional GPA requirements. Students must check with their major department to learn of the minimum grade point guidelines.

Probation and Continued Probation

There are 2 types of academic probation: Academic Standing and Progress Toward a Degree.

Any undergraduate student who fails to maintain a 2.0 cumulative GPA (C Average) is placed on academic probation. To calculate the grade point average (GPA), averages are NOT rounded, i.e., 3.490 is not rounded to 3.50. While on academic probation, a student must earn a minimum term GPA of 2.3 in the next term enrolled. A student may continue on academic probation for as long as in each term of enrollment, a minimum term GPA of 2.3 is achieved. If a student is not able to earn the minimum GPA of 2.3 after being placed on probation and does not achieve a minimum cumulative GPA of 2.0, they may be dismissed from Loyola University Chicago due to insufficient academic performance. While on academic probation, a student will be limited to 15 credit hours in a fall or spring term until the 2.0 is reached.

Students may also be placed on academic probation for not making progress toward degree completion. Any student whose cumulative GPA is 2.0 or better but who fails to show timely progression toward completion of their degree requirements may, at the discretion of their dean, be placed on probation. In such cases, the dean may require a contract defining the terms under which the student can remove themselves from probation.

Academic Dismissal

Any student who has been on probation for at least two consecutive terms and has not achieved a cumulative GPA of 2.0 may be dismissed from Loyola University Chicago due to insufficient academic performance. If a student is not able to earn the minimum GPA of 2.3 after being placed on probation and does not achieve a minimum cumulative GPA of 2.0, they may be dismissed from Loyola University Chicago due to insufficient academic performance.

A student may appeal their dismissal to their Academic Dean's Office. Academic dismissal is stated on a student's transcript. A student who has been academically dismissed may not apply for readmission to the University until one fall or spring term has elapsed. A student dismissed for academic insufficiency may be required to demonstrate acceptable academic achievement at another accredited college or university before readmission is approved. Courses to be taken elsewhere must be pre-approved by the student's advising dean or director and a minimum grade of "C+" or higher must be earned in all such coursework. A student readmitted to the University after academic dismissal will be readmitted on academic probation.

Attendance Policy, Undergraduate

The undergraduate attendance policy specifies the role of students, instructors and university administrators in cases when students are absent from one or more classes.

The university does not require faculty to take attendance; however, if faculty use participation/ attendance in their grading rubric, they must include this policy on the course syllabus which must clearly define the consequences for non-attendance. If participation/attendance is identified as a portion of the students' final grade, faculty must maintain a record of students' attendance throughout the term.

Excused Absences

The university recognizes there are times when students must miss class due to extenuating circumstances. Regardless of the attendance policy of the faculty, the following are considered excused obligations and are not to be counted as absences in the class. Excused absences do not preclude the need to fulfill specific program requirements.

1. Jury duty, with appropriate documentation.
2. Short Term Military Obligation - Veterans Current Students (https://www.luc.edu/veterans/currentstudents/reservistsguardsmen/)
   a. (https://www.luc.edu/veterans/currentstudents/reservistsguardsmen/)This activity must be documented and provided to the faculty in advance of the activity.
   b. The documentation must be verified by the director or assistant director in the Military Veteran Student Services Office, who has confirmed that the student has orders to report for a short-term military obligation.
3. Day(s) for Religious Observances (https://www.luc.edu/campusministry/faithprograms/interfaith/religiousobservances/)
4. Participation in Division-1 athletics or other university-sanctioned events: Travel & Competition Policy (https://www.luc.edu/athleteadvising/travelcompetitionpolicy/)
   1. This activity must be documented and provided to the faculty in advance of the activity.
   2. The documentation must be verified by an administrator who is directly related to the activity (e.g. Division-1 athletics representative; musical group director; student development representative, etc.).
5. Absences resulting from legally mandated accommodation requirements (e.g., Title IX, ADA, etc.).
6. In the event of a state or national pandemic, the institution retains the right to amend this attendance policy.

Making Up Work from a Missed Class

The excused absences outlined above require the faculty to facilitate alternative means for students to make up classwork and/or get notes from a lecture. Labs, clinical hours, group work, performance, studio art, and other field-based classes are the exceptions to this because it may be impossible to make up classwork.

Unexcused Absences

Absences not listed above are unexcused. The ability to make up class work because of an unexcused absence is at the discretion of the faculty, as outlined in the faculty's attendance policy noted on syllabi. Note that the Loyola University Chicago Wellness Center does not provide documentation for absences.

Class Status and Academic Advising

Class Status and Academic Advising

First-year and sophomore students are advised in the Office of First and Second Year Advising; junior and senior students are advised in the Dean's Office of their school or college. In their first academic year at Loyola and in all subsequent years, transfer students (students who enter Loyola with 20 or more credits earned in a college or university setting) and students in the School of Professional Studies receive advising in the Dean's Office of their school or college.

For advising purposes first-year students are defined as those students who enter Loyola with fewer than 20 credits hours earned in a college or university setting. Sophomores have at least 30 earned credit hours, including credit earned at other colleges or universities; juniors at least 60 credit hours; and seniors at least 90 credit hours earned. Advanced Placement and International Baccalaureate credits are not counted in the determination of class standing for advising purposes.

Computation of Academic Grade Point Averages

The academic grade point average (GPA) at the end of a term is determined by dividing the total number of quality points earned by the total number of attempted graded credit hours carried in the term. Quality points are the result of multiplying credit points by credit hours. Courses taken under the Pass - No Pass Option are not counted in computing academic averages. For example, consider a student taking 15 credit hours for a semester.

Course	Credit Hours	Grade	Credit Points	Quality Points
UCWR 110	3 hrs	C+	2.33	6.99
ENGL 273	3 hrs	B-	2.67	8.01
MATH 100	3 hrs	P	0.00	0.00
PLSC 101	3 hrs	B+	3.33	9.99
HIST 103	3 hrs	B	3.00	9.00

This student has 12 graded hours. The total Quality Points are 33.99. To compute the semester average, quality points are divided by total attempted graded hours. The average here is 2.83. The cumulative grade point average is calculated by adding each semester's quality points and dividing by the total number of attempted graded credit hours.

Courses with the grade of "I" are not counted in the total credit hours until they have been replaced by a permanent final grade. If the grade of "I" is not replaced with a permanent final grade within six weeks of the following semester, the "I" will be replaced automatically at the end of that period with a grade of "F" and this grade will be computed into the academic average.

No grades earned by a student for courses taken at a college other than Loyola or at a program or college not formally affiliated with Loyola shall be computed into Loyola's term or cumulative grade point averages. Transfer credit will count toward the number of hours required for graduation from Loyola, but will not be reflected on grade reports under cumulative average.

Credit by Examination

Loyola University Chicago subscribes to three plans whereby undergraduate students may obtain credit and/or advanced placement for college-level studies completed by examination:

- Advanced Placement Program (AP),
- College Level Examination Program (CLEP), and
- International Baccalaureate (IB).

All AP and IB examinations must be completed before a student matriculates to the University. Official test scores must be submitted via the Undergraduate Admission Office and verified by the Office of Registration and Records within 30 days of matriculation. Transfer Credit Policy for New (First Time) Freshmen (p. 1933)

Students may take CLEP examinations after they have matriculated, but only if they:

- are not within 30 credit hours of graduation;
- have not previously completed, failed, or received credit from Loyola University Chicago (transfer or otherwise) in a comparable or more advanced course in the specific examination area;
- will not receive comparable credit in the CLEP examination area in the same term the examination is taken or in a subsequent term.

All official CLEP examination scores must be provided to the Office of Registration and Records at least one semester prior to anticipated graduation.

Credit Hour Limitation

Students may not carry more than 18 credit hours in one semester without approval of their academic advisor or advising dean.

Students on academic probation may be required to limit their credit-hour enrollment during the probationary term.

Disability Accomodations

Student Accessibility Center (https://www.luc.edu/sac/) (SAC) supports Loyola students who have documented permanent or temporary disabilities to provide accommodations in the college environment. If you are a student who used an IEP or 504 plan, SAC would be the college equivalent. To receive accommodations, students must register with the SAC team. SAC encourages all students to reach out as soon as possible once an identified disability need arises. To begin the process, please contact the SAC team either by email at SAC@luc.edu; calling phone number: 773-508-3700; or beginning an online application here: Student Accessibility Center Registration Form (https://nam12.safelinks.protection.outlook.com/?url=https%3A%2F%2Fluc-accommodate.symplicity.com%2Fpublic_accommodation%2F&data=05%7C02%7Cccorbran%40luc.edu%7Cbc052208c3134aedeb8f08de7dfc8ce7%7C021f4fe32b9c48248378bbcf9ec5ea4b%7C0%7C0%7C639086720828416129%7CUnknown%7CTWFpbGZsb3d8eyJFbXB0eU1hcGkiOnRydWUsIlYiOiIwLjAuMDAwMCIsIlAiOiJXaW4zMiIsIkFOIjoiTWFpbCIsIldUIjoyfQ%3D%3D%7C0%7C%7C%7C&sdata=Hf%2BjnmUbTrxedBShaEl9xQ%2BsBSUc1D2hTuN%2BAPHmlI8%3D&reserved=0). SAC looks forward to working with you!

Earning Two Majors or Two Baccalaureate Degrees

Double Majors

A student may complete the requirements for a double major leading to the Bachelor of Arts, Bachelor of Science, (in the College of Arts and Sciences) or Bachelor of Business Administration degree (in the Quinlan School of Business), provided the student completes the Core and all requirements for both majors and meets the 120 minimum total credit hours required for the degree.

Completing Two (2) Baccalaureate Degrees

Students can earn two bachelor's degrees within a minimum of 120 total credit hours. To do this, they must complete the Core requirements and all requirements for both degree programs.

Students who complete one major leading to a Bachelor of Arts and another leading to a Bachelor of Science in the College of Arts and Sciences will receive both degrees. Students may also earn two bachelor's degrees from different Schools and/or the College of Arts and Sciences, as long as all degree requirements are completed with a minimum of 120#credit hours.

In affiliation with various accredited engineering schools, Loyola University Chicago offers a Dual-Degree Program in Physics and Engineering, which enables a student to receive within five years a B.S. degree in Physics from Loyola and a B.S. degree in Engineering from one of the affiliated schools. Students typically attend Loyola for three years of study in the physical sciences and liberal arts and then complete the program with two more years at the engineering school. For more information can be found here (https://www.luc.edu/physics/engineering/index.shtml/).

Baccalaureate/Juris Doctor program

The Loyola University Chicago School of Law, in conjunction with the College of Arts and Sciences, offers a 6 year Baccalaureate/Juris Doctor program that provides an opportunity for a limited number of exceptionally well-qualified Loyola students to enter the School of Law after completing their junior year of undergraduate study and taking the LSAT (the Law School Admission Test). Students participating in this accelerated admission program attain their bachelor's degree following successful completion of the first year of law school and their law degree (Juris Doctor) after completing all of their law school studies. Careful and early planning is needed to achieve accelerated admission. Students should see the pre-law advisor during their freshman year to plan accordingly.

Enrollment in Courses

While academic advising is available through the First and Second Year Advising Office and in each school and college, each student is responsible for developing an accurate and appropriate schedule of classes each term. Students are allowed to change their registrations in conformity with the guidelines established by the Office of Registration and Records and the Bursar's office. Students are responsible for maintaining the accuracy of their enrollment and understanding the academic and financial consequences of adding or withdrawing courses.

The Family Educational Rights and Privacy Act (FERPA)

Confidentiality of Educational Records

Loyola University Chicago complies with the provisions of the Family Education Rights and Privacy Act of 1974 ("FERPA") when releasing personally identifiable information concerning students. FERPA stipulates that a student's education record is confidential information and must not be released without prior written consent of the student. FERPA does permit the release of "Directory Information." Directory information is information which would not generally be considered harmful or an invasion of privacy if disclosed. Students have the right to withhold "directory Information." However, the student should consider the consequences of such a request as Loyola University Chicago will honor the request, until removed in writing by the student. Loyola University Chicago has determined directory information to consist of a student's:

- Name
- Address(es) and telephone number
- University e-mail address
- Photograph
- Major and minor field(s) of study, including the college, division, department, institute or program in which the student is enrolled
- Dates of attendance
- Grade level (Such as freshman, sophomore, junior, senior or graduate level)
- Enrollment status (Undergraduate or graduate, full-time or part-time)
- Date of graduation
- Degree(s) received
- Honors or awards received, including selection to a Dean's list or honorary organization
- Participation in officially recognized activities or sports
- Weight and height of members of athletic teams

Final Examinations

Final examinations are given during the scheduled examination period in each session. Students are expected to take their exams as scheduled. If a student needs to deviate from the exam schedule in any way, the student must contact his or her advising dean's office. Students with more than 3 exams on a given day may contact their advising dean for assistance with rescheduling one of their exams. Tests or examinations may be given during the semester or summer sessions as often as deemed advisable by the instructor. Students who miss a final examination should contact their instructor.

Grading System

Credit Hour Defined

The credit hour, sometimes called the semester hour, is the standard for computing the amount of a student's scholastic work. A credit hour is normally defined as one lecture, recitation, or other class exercise of 50 minutes per week per semester. Two 50 minute periods of laboratory or studio work are frequently equivalent to one credit hour. Three or four 50-minute periods of clinical or fieldwork in some areas are equivalent to one credit hour. The recommended guideline for additional time spent outside the classroom for one credit hour is 2 to 3 hours per week, allocated among such activities as reading, homework, and test preparation.

Earned credit hours are those that a student receives by successfully passing a course. Attempted credit hours indicate the amount of work the student attempted without reference to grades received. The hours for any course with a final grade other than "W" (withdrawal), "WE" (emergency withdrawal), or "AU" (audit) are included in attempted credit hours. Attempted credit hours (with the exception of pass/no pass courses) are used in computing a student's scholastic average or standing.

Grades and Credit Points

Letter grades and plus/minus indicators (suffixes) are used by instructors to indicate a student's quality of achievement in a given academic course. The letter grades A, A-, B+, B, B-, C+, C, C-, D+, D, F, WF are assigned the following credit points for purposes of grade point average (GPA) calculations:

Grade	Grade Points
A	4.0
A-	3.67
B+	3.33
B	3.00
B-	2.67
C+	2.33
C	2.00
C-	1.67
D+	1.33
D	1.00
F	0
WE (effective Fall 2022)	0
WF (discontinued Fall 2022)	0

A student taking an elective course "pass/no pass" must receive a grade of C- or higher in order to earn a passing grade (P) for the course. Credit hours for which the student earns a grade of "P" will count toward graduation, but there is no grade computed in the grade point average. A student who receives a grade of D+ or lower in a course taken on the Pass/No Pass Option (see below) will receive a non-passing grade of "NP." Credit hours for which the student earns a grade of "NP" will not count toward graduation, and the grade will not be computed in the grade point average.

A grade of "W" indicates official withdrawal from a course through the allowed withdrawal period (see academic calendar for dates). The grade "W" is not counted in computation of academic standing as either attempted or earned credit hours, nor calculated in the grade point average. With a complete emergency term withdrawal, the grade of “WE” does not count towards attempted credit hours or in GPA (effective Fall 2022). However, both the “W” and the “WE” count towards attempted hours when determining Satisfactory Academic Progress (https://www.luc.edu/finaid/aid-process/responsibilities/academic-progress/) for continued financial aid eligibility.

A grade of "WF" indicates withdrawal from a class without proper authorization at any time and was also assigned for withdrawal after the approval deadline. A course with "WF" is counted as attempted credit hours in the computation of academic standing and is calculated as "F" (0 credit points) in the grade point average (discontinued Fall 2022).

NR: The notation of "NR" is assigned in instances where the student is registered at Loyola but never attended the course in question and never

completed any work for the course. A grade of "NR" does not impact attempted hours or the grade point average.

Incomplete Grades

A grade of "I" is a temporary grade and indicates the course is still incomplete. A temporary grade of Incomplete ("I") is assigned by the student's instructor and a permanent grade must be entered into the grade roster within six weeks of the start of the subsequent term. If a change of grade is not submitted by the faculty member by established due dates, the incomplete ("I") grade is converted into a "F" grade.

Policy

- Attendance, participation in class and completing work in the class has been satisfactory and the student's work to date meets the minimum requirements to pass the course.
- At least 75% of the coursework has been completed.
- A documented extenuating circumstance legitimately prevents completion of the required work by the due date.
- The required work will be able to be completed in the time frame allotted for the make up work, six weeks into the next semester.
- The student will complete the same work that the class completed. If there is any possibility that academic integrity would be violated by this process, an equivalent assignment(s) or examinations may be administered by the faculty.
- The student may not retake any portion of the class to complete the incomplete.
- For an understanding of how a grade of incomplete affects financial aid, please visit here (https://www.luc.edu/finaid/aid-process/responsibilities/academic-progress/).

Process

- A faculty member may not enter a grade of "I" or incomplete without first having the student request the incomplete using this form (https://www.luc.edu/regrec/aboutus/forms/). The grade of Incomplete is not a substitute for a failing grade in a course
- Should a student fail to sit for a final exam or project, the faculty member includes a grade of zero on the exam or project in the calculation of the final grade. If the student was unable to request the incomplete during the term and requests the incomplete after grades have been posted **AND** the request for an incomplete is approved, the faculty member will request a change of grade in LOCUS for the posted grade and change that grade to an "I".
- The student submits this form (https://www.luc.edu/regrec/aboutus/forms/) to each instructor where an incomplete is being requested. The form must be filled out to include all deliverables and their respective due dates that the student owes. Both faculty member and student must sign the form. Faculty members must submit the completed incomplete form to the student's school/college.
- If the Incomplete course is a prerequisite to a course the student has enrolled in for the following term, either the incomplete must be completed and a final passing grade posted or the student must withdraw from the next course in the sequence.
- If the coursework for the incomplete has not been completed by the deadlines agreed to with the student, the faculty member shall submit a change of grade in LOCUS that includes a complete calculation of work completed plus zero for all work not completed.
- If a change of grade is not submitted by the faculty member at the end of the time period to complete the Incomplete, a grade of "F" will be assigned.
- A student may not graduate with a grade of incomplete on their transcript.

Quality Points Defined

Quality points are determined by multiplying letter grade credit point value by the credit hours of a course. If a student earns the grade of "A" in a 3-credit hour course, he or she has earned a total of 12 quality points for the course (4 credit points for the "A" multiplied by 3 credit hours for the course). A student who earns a "B+" for a three credit-hour course, therefore, earns a total of 9.99 quality points for the course. Courses in which "F" or "WF" is earned are counted in the total attempted credit hours and receive zero quality hours. Courses with a "WE" are not counted towards attempted credit hours or in the GPA.

Pass/No Pass Option

The primary objective of the pass/no pass option is to encourage students in good standing to explore and experiment in academic areas outside their major or minor field. Students should be aware that the appearance of "P" and "NP" grades on their transcripts may have an adverse effect on changing their major or minor curriculum, transferring to other schools, and acceptance by graduate or professional schools. The following conditions govern this option:

1. This option is available to a student with a minimum of sophomore standing (30+ earned credit hours) in good academic standing who has satisfied the course prerequisites (or has the written permission of the course instructor).
2. A maximum of twelve credit hours may be taken under the pass/no pass option during a student's undergraduate career; the credits will be included in the total number of hours earned toward graduation but will not enter into the computation of the cumulative grade point average. A student may take a maximum of two courses under this option in any academic term. Grades of "P" for advanced placement courses that are accepted as transfer credit are not included in the 12-credit-hour total.
3. Only electives can be taken under the pass/no pass option. Permission will not be given for core, engaged learning, major or minor course requirements.
4. The grades of "P" and "NP" will appear on the official transcript of the students' courses taken at Loyola University and may not be converted to any other grade.
5. The pass/no pass option may be selected by a student only during the first two weeks of the semester or the first week of a summer session and the second day for J term. Once this option is chosen, a return to the regular grading system can only be accomplished during the first two weeks of the semester or the first week of a summer session or the third day for J term.
6. Credit hours earned under this option will not be included in the minimum 60 graded Loyola hours that must be completed to be eligible for academic honors at graduation.

Auditing Classes

Students wishing to take a course without receiving credit may audit the course. Applicable tuition will be charged. Though a course that is audited does not count as hours attempted, auditors are required to attend class and will be awarded the mark of "AU" upon completion. "AU" does not affect a student's GPA. Failure to attend class will result in the final mark of "W." Assignments, including examinations and term papers, are not required, but auditors have the right to participate in class discussion. Only students who are registered and rostered as auditors will be granted access to Sakai and other course specific media for which

registration is required. A course may not be converted to audit status after the first two weeks of the semester or the first week of a summer session.

Graduation

The Degree

Upon successful completion of a student's course of study the student is awarded a degree. The degrees awarded by Loyola University Chicago include associates, bachelors, masters, or doctoral and indicate that the student has met the rigorous requirements of the program of study in which they were enrolled.

The Diploma and Certificate

Loyola University Chicago presents a hard copy diploma to a student who has earned a degree and a hard copy certificate to a student who has completed a certificate program of study. The diploma and certificate are a public ceremonial symbol of the successful completion of the student's course of study and an indication that a degree or certificate credential has been awarded. A hard copy diploma is not a degree and a hard copy certificate is not a certificate credential.

Graduation Application Deadlines

Undergraduate Students

Students must file an application for their degree before the assigned dates below. Each degree requires a separate graduation application.

- Fall graduation: March 1
- J-Term graduation: March 1
- Spring graduation: October 1
- Summer graduation: October 1

Required Hours and Grade Point Average for Graduation

Students must complete 120 hours to graduate. Student must have a minimum cumulative 2.00 GPA. They must also have a minimum cumulative 2.00 GPA in their Core Curriculum.

Most departments require a minimum 2.00 GPA in their major(s) and minor(s). Students must check with their department(s) for policy on the minimum GPA in their specific major and/or minor.

Required Hours in Residence Needed for Graduation

In-residence hours refers to the course credit hours taken at Loyola University, the Rome Center, or taken from any of the Loyola sponsored study abroad programs through the Office for International Programs.

Students must take their final, uninterrupted 45 hours of instruction or a minimum of 60 hours in residence at Loyola University Chicago.

Graduation Honors

Laudatory Status

A student who earns a cumulative Loyola GPA of at least 3.50 will be graduated cum laude (with honors); of at least 3.70, magna cum laude (with high honors); of at least 3.90, summa cum laude (with highest honors). For the purpose of calculating the grade point average (GPA), averages are NOT rounded, i.e., 3.49 is not rounded to 3.50. Laudatory status requires exactly 3.50 or better. Transfer students must complete a minimum of 60 graded Loyola hours (excluding pass-no pass hours) to be eligible for academic honors. Work completed at a program or college not formally affiliated with Loyola will not be counted. The computation is based on the student's entire academic career at Loyola.

Laudatory status for the degree will be based on certification of all requirements and may differ from the status announced at graduation ceremonies if degree requirements are not certified at the time of the ceremony.

For academic honors conferred by individual schools or departments within schools, consult appropriate sections of this catalog.

Commencement Ceremony

Students who complete their Degree or Certificate Requirements within an Academic Year (Fall, J-Term, Spring or Summer) are invited to attend Loyola's Commencement Ceremony which takes place in May at the end of the Spring Term.

The Commencement Ceremony for Arrupe College students takes place in August.

Diploma & Certificate Information

Diploma and Certificate Name

Because third parties, such as degree verification services, employers, and the international community, etc., often use the name as it appears on the diploma or certificate as the basis for verification of education, it is very important that the name a student uses for their diploma or certificate accurately reflects (ideally be the same as) the student's Primary Name recorded in the student information system (LOCUS). In keeping with best practices within American higher education, the student's full Primary Name, as recorded in LOCUS, will be used on the diploma and all other official records printed on behalf of the student. As students prepare for graduation they should carefully check how their name(s) appears in LOCUS. This is a student's last best opportunity to make certain that their name(s), Primary and Diploma, are spelled correctly and have been correctly recorded in LOCUS.

Significant changes to the student's Name will be made only in response to a formal written request which includes the submission of a signed Name Change Form (https://www.luc.edu/media/lucedu/registrationrecords/pdfs/Name%20Change%20Request%20Form_August2024.pdf) accompanied by legal documentation showing the student's requested Name, e.g., driver's license, passport, court order, letter of safe passage, marriage license. The Name Change request must be submitted to the Office of Registration and Records.

Where a student wishes a variant of their Primary Name to be printed on the diploma, this name should be entered in the Diploma Name field in LOCUS, subject to the following rules:

- **First names** when used in full, must match the students Primary Name.
  - Existing first names may be reduced to an initial.
  - First names may be changed provided a formal name change request is submitted.
- **Middle names,** when used in full must match the student's Primary Name.
  - Existing middle names, may be omitted or reduced to an initial.
  - Middle names or initials may be added provided a formal name change request is submitted.
- **Last names** must match the student's Primary Name.
  - Last names may be changed provided a formal name change request is submitted.
  - Suffixes, such as Sr., Jr., II, III, etc., may be added provided a formal name change request is submitted.

- Titles and/or degrees, e.g., Esq. M.D., PhD, will not be printed on the graduate's diploma as part of the Diploma Name. Religious order affiliations can be included, e.g., S.J., OSU.
- The addition of names or initials, where such were not previously recorded, require verification/documentation, and will constitute a change to the student's Primary Name.
- Maternal surnames may be added provided a Name Change Form accompanied by legal documentation is provided.
- Hyphenated family-married last names may be used provided a Name Change Form accompanied by legal documentation is provided.
- Special diacritical (accent) marks may be used and should be entered in the Diploma Name field.
- Punctuations, added or omitted, will be printed on the diploma as entered in the Diploma Name field.

Verification and Ordering Process

- The Office of Registration and Records is responsible for providing students with their diplomas and certificates, after their respective schools complete degree audits for those students who have applied for graduation.
- The School certifying the credential(s) may require two to four weeks after final exams have been completed to:
  - Ensure that final grades have been submitted for students.
  - Verify that students have completed all requirements for their credentials.
  - Award the credential and post the degree and/or certificate to LOCUS.
- Diplomas and certificates are mailed directly to the graduate using the delivery information on file. See DIPLOMA PICK-UP section if students wish to pick up their diploma or certificate. All questions regarding diplomas should be addressed to diploma@luc.edu.
- If a student has a hold on their LOCUS record, the diploma or certificate will not be released until the hold has been resolved. Once the hold has been resolved, the student is responsible for contacting diploma@luc.edu to confirm ordering information.

Availability of Diplomas and Certificates

Below is an estimated time frame for Diploma and Certificate availability, based on completion term:

- Fall Undergraduate Students: Early February
- J-Term Undergraduate Students: Mid February
- Spring Undergraduate Students: Late June
- Summer Undergraduate Students: Late September

Diploma and Certificate Mailing

Diplomas and certificates are mailed to the student's Permanent Mailing Address unless a Diploma Mailing Address is recorded in LOCUS. Students are required to verify the accuracy of their address information and to make the necessary correction(s) in LOCUS. Incorrect address information will significantly delay or prevent the delivery of the diploma or certificate.

Diploma and Certificate Pick-Up

Using LOCUS, students wishing to pick up their diplomas or certificates in the Office of Registration and Records should use the Diploma Mailing Address fields and enter:

PKUP-Office of Registration and Records
820 North Michigan Avenue
Ste 510
Chicago, IL 60611

Please notify the Office by sending an email to diploma@luc.edu. The diploma or certificate will only be released to the student. Students will need to present their LUC photo identifications (or other government issued photo identifications) in order to pick up the diploma or certificate.

Diploma and Certificate Mailing Notification

Students are notified by e-mail when their diplomas or certificates are placed in the mail. A second email will be sent to students who requested to pick-up their diploma or certificate when it has arrived to the Office of Registration and Records and is available. If the Office of Registration and Records does not receive the pickup request before the diploma or certificate has been ordered, it will be mailed to the Permanent Address on file.

Return of Mailed Diploma or Certificate

Should a diploma or certificate be returned to the Office of Registration and Records due to an undeliverable address, the graduate will be notified by email to their luc.edu email address, or the email provided on the special order form. Returned diplomas and certificates are held for five years and will be re-mailed at no cost to the graduate, once a corrected mailing address is received. Once destroyed, a replacement fee will be assessed.

Recent graduates and those placing special orders are asked to notify the Office of Registration and Records if delivery has not been received within one calendar year. After one year, a replacement fee will be assessed.

Diploma and Certificate Replacement

Diplomas and certificates damaged in shipment will be replaced at no cost to the recipient. The damaged diploma or certificate must be first returned to the Office of Registration and Records.

Duplicate diplomas and certificates may be ordered by using the Diploma and Certificate Replacement (https://www.luc.edu/regrec/graduation-diplomas/) order form. The fee is $50.00 for the first diploma and $25.00 for each additional diploma. The fee is $25.00 for each additional certificate. Duplicate diplomas and certificates will carry, in small lettering, the text, "Duplicate" in the lower right corner of the document.

All questions regarding diploma orders should be addressed to diploma@luc.edu.

For additional information regarding graduation and credential ordering, see the Graduation and Diplomas (https://www.luc.edu/regrec/graduation-diplomas/) website.

Leave of Absence

Students may request a one-semester leave of absence from the university. A leave of absence should be requested prior to the start of a fall or spring term, and no later than the final date to withdraw from said term with 100% refund. A student's tuition and fees will be based upon the date of withdrawal. To request a leave of absence, a student must submit the Request for Change to Academic Record or Status (https://cm.maxient.com/reportingform.php?LoyolaUnivChicago&layout_id=104) to the appropriate advising dean, or academic advisor, indicating the reason (e.g. illness, family crisis, etc.) for the request. The advising dean of the student's school or college, acting on a case-by-case basis, will have sole authority to grant leave requests. During a leave of absence and at least one month prior to the subsequent semester, the student

must inform the advising dean or academic advisor in writing via Loyola email, of an intention to return. Student who request and receive a leave of absence for one semester will not need to reapply through the Office of Undergraduate Admissions unless they have attended a college or university elsewhere. Students who receive a leave of absence will return to their same academic program under the catalog year requirements that were in place as they took the leave of absence, provided they did not attend another college or university while on leave. Students who do not return after the one term leave of absence ends will be administratively withdrawn from the university. Withdrawn students will need to apply for readmission and will be held to the degree requirements of the catalog year in which they are readmitted. Students should reach out to the financial aid office (lufinaid@luc.edu) with questions regarding how a student's financial aid package will be affected by a leave of absence.

Military Service

Students who have been called into the armed services of the United States and who are consequently withdrawing from the university before the end of the withdrawal period will receive a refund of all tuition and fees paid for the period in question but no academic credit. If they withdraw after the end of the withdrawal period, they will receive full academic credit for the semester with grades as of the date of withdrawal but no refund of tuition.

Permission to Take Coursework at Other Universities

Policy on Prior Permission to Take Coursework at Other Universities

Undergraduate students are limited to a total of 12 hours of study at other accredited U.S. colleges and universities after they matriculate to Loyola. This includes those who matriculate as freshmen or as transfer students. Transfer students who transferred in with 60 or more hours may not take additional courses elsewhere.

Students seeking to take courses at another college or university must obtain prior permission. Prior permission will be granted by advisors, or an academic dean, chairperson, or program director for a summer term or J-Term only if a comparable course is not offered at Loyola. Financial reasons alone (e.g., a course is less expensive than at Loyola) are not sufficient for approval.

Students must obtain permission to take a course at another U.S. institution prior to enrolling in it. Concurrent enrollment at another college or university in a fall or spring term is only permitted in cases where Loyola University Chicago is not offering a course that is either required for a student in their graduating term or is a prerequisite course for a course that will be taken in a subsequent term that is necessary to keep a student on track for graduation. Prior approval by the appropriate academic dean or equivalent is required.

In addition, credit earned via Loyola-approved study abroad programs are not included in this 12-hour limit and are subject to a different approval process. For more information on how study abroad credit is approved, visit the **Study Abroad web site**.

Core Curriculum Credits

Because of the nature of Loyola's outcomes-based university Core Curriculum and the pedagogical integration of learning on knowledge, skills and values, all Core classes must be taken at Loyola. Special circumstances for granting exceptions to this policy will be the responsibility of the faculty director of the Core Curriculum.

Completing a Request for Approval

For courses at U.S. institutions, the student and academic advisor (or the dean, chairperson, or program director) must complete the following form: Appeal For Permission to Take Courses Elsewhere (https://www.luc.edu/regrec/aboutus/forms/). The student should meet with an academic advisor to discuss requests for permission to take courses at another U.S. institution in the summer. The form must be submitted in time to secure permission prior to enrolling in a course at another institution.

Students who wish to study abroad, i.e. take courses for credit at any institution outside the 50 United States (even if the courses or study abroad program is offered via a U.S. accredited institution) must apply through the Office of International Programs (OIP) and receive OIP permission before enrolling in courses or department from the U.S. This process and the associated deadlines are outlined on the Study Abroad web site.

Readmission Requirements and Procedures

Students in good academic and disciplinary standing who have been absent from Loyola University Chicago for not more than one semester may be readmitted to their same college or school with no change in degree requirements, provided they have not attended another college or university during their absence from Loyola. Such applicants for readmission should contact the office of their academic advisor or their advising dean for assistance with access to LOCUS and academic advising for registration.

Applicants for readmission who have attended other schools during their absence from Loyola must reapply through the Office of Undergraduate Admission (https://uao.luc.edu/register/?id=2a7b19e2-408f-c37c-14ab-cd104388fba7) and include official transcripts of their work from each institution with their application, before their application can be considered. The application for readmission will be evaluated according to the admission requirements for each college or school.

Applicants for readmission who have been dismissed from the university due to insufficient academic performance, may apply for readmission (https://uao.luc.edu/register/?id=2a7b19e2-408f-c37c-14ab-cd104388fba7) after a minimum of a fall or spring term of absence.

Applicants for readmission who have been dismissed from Loyola for disciplinary reasons must have their applications for readmission reviewed by the dean of students. If the dean approves readmission, the application (https://uao.luc.edu/register/?id=2a7b19e2-408f-c37c-14ab-cd104388fba7) will be reviewed according to the regulations stated above.

Registration

Registration at Loyola University Chicago is done through the LOCUS online registration system. For specific information on registration, please refer to the Registration & Records website (https://www.luc.edu/regrec/).

Registration in a course is required prior to attending classes. Individuals are not permitted to attend courses that they have not previously registered for. Please see the academic calendar (https://www.luc.edu/

academics/schedules/) for registration dates for all academic terms. Students must register for classes during specified registration dates and may not register for classes after late and change of registration has ended.

Repetition of Courses

Undergraduate students may need to repeat courses to meet degree requirements. Usually only grades lower than C- may be repeated. Students who earn a grade lower than C- may repeat a course one time without special permission from their academic dean, academic advisor or program director. The course or course equivalency (e.g. took STAT 103 earned D+ and enrolled in ISSCM 241 next time. ISSCM 241 is an authorized repeat) to be repeated must be repeated at Loyola University Chicago. The student must register for the course in LOCUS.

When a course repeat occurs, all grades achieved are recorded on the academic record with notation for the repeat. The credit and quality points for the highest grade earned (one grade only) will be used to calculate the student's cumulative GPA. If the student does not improve the grade on the second attempt, a student will need to seek permission from their academic dean, academic advisor or program director for a third or subsequent attempt.

In an authorized repetition of a course the student will only receive credit hours toward graduation for the course one time.

A student who repeats a course more than once without permission from their academic dean, academic advisor or program director, or for a course with an initial grade higher than a C-, earns neither credit hours nor quality points for the repeated course. For an understanding of how repeating courses affects financial aid, please visit here (https://www.luc.edu/finaid/aid-process/responsibilities/academic-progress/).

This policy is in effect in Fall 2026 and applies to any course that a student registers for as a repeated course starting in Fall 2026.

Student Enrollment Status

Half-time enrollment is required to receive federal loans, per Financial Aid (https://www.luc.edu/finaid/loans/enrollment/).

Enrollment Length	Half-Time	Full-Time
Undergraduate Semester	6-11 hours	12+ hours

Transcripts of College Records

All official transcripts of Loyola University academic records are issued by the Office of Registration and Records. For specific instructions to obtain a transcript, please refer to www.luc.edu/regrec (http://www.luc.edu/regrec/).

Transfer Credit Policy

Loyola awards transfer credit for college-level, academic courses completed at other accredited two-year and four-year post-secondary institutions in good standing with their academic accrediting association. Generally, those institutions will be accredited by one of seven accrediting associations:

- Western Association of Schools and Colleges, Accrediting Commission for Community and Junior Colleges (ACCJC)
- New England Commission of Higher Education (NECHE)
- Higher Learning Commission (HLC)
- Middle States Commission on Higher Education (MSCHE)
- Northwest Commission on Colleges and Universities (NWCCU)
- Southern Association of Colleges and Schools Commission on Colleges (SACSCOC)
- WASC Senior College and University Commission

Loyola University Chicago is a participant in the Illinois Articulation Initiative (IAI) (p. 996), a state-wide agreement that allows transfer students to complete the IAI General Education Core Curriculum (GECC) in lieu of a receiving institution's core curriculum.

Credit is awarded in semester hours. Courses completed in quarter hours will be converted into semester hours.

Credit Guidelines

- A maximum of 64 semester credits are accepted from two-year colleges. There is no maximum number of credits from four-year institutions.
- Once enrolled as a degree-seeking student at Loyola, students must request permission to take courses and earn college credit elsewhere. Transfer credit will not be accepted for courses taken elsewhere while the student is simultaneously enrolled at Loyola.
- Dual credit earned through Loyola's Dual Credit Program will be included on the Loyola transcript and calculated in the Loyola GPA. You may not replace the course and grade with credit by examination.
- Credit not eligible for transfer towards an undergraduate degree includes:
  - Trade school, job training, or adult/continuing education courses
  - Developmental courses (below 100-level)
  - English as a Second Language (ESL) course credit
  - Courses from institutions that are not accredited
  - Graduate level courses

Transfer Credit Policy for New (First-Time) Freshmen [1]

"New First-Time Freshmen" refers to students who have never completed any college credit **after** high school graduation. Students who complete college coursework while still in high school (known as Dual Enrollment Credit) qualify as new first-time freshman.

New first-time freshman may transfer a maximum of 36 semester hours of credit from AP/IB/CLEP and/or transfer credit toward their undergraduate degree requirements under the following conditions:

1. The college course must have been conducted in conjunction with an institution of higher education accredited by one of the seven accrediting associations (p. 1933) listed above. Students are required to produce an official transcript from the partner higher education institution. High School transcripts will not be accepted for transfer credit.
2. The student must have earned a grade of B or higher in such transfer courses. Grades of B- or below, P, S, or CR will not be granted credit.
3. Students awarded such transfer credit are limited to a maximum of 36 semester hours for the combined total of AP credit (https://catalog.luc.edu/academic-standards-regulations/undergraduate/#/#CREDEXAM), IB credit (https://catalog.luc.edu/academic-standards-regulations/undergraduate/#/#CREDEXAM), CLEP (https://catalog.luc.edu/academic-standards-regulations/undergraduate/#/#CREDEXAM) and/or transfer credit.

4. The transfer credits will be applied toward the normal 120 credit hour graduation requirement and be consistent with transfer articulation rules in effect for Core, Major, School, or Elective credit.
5. An exception may be granted to students who attended a high school in which students may earn an Associate of Arts (AA) or Associate of Science (AS) degree while in high school; students who earn an AA or AS degree while in high school may be granted up to 64 semester hours of eligible credit.[2] (An Associate of Applied Science or other terminal associate's degree does not qualify for this exception.)
6. Completion of an AA or AS degree does not exempt new first-time freshman from Loyola's Core Curriculum. Credits with a grade of B or higher will be evaluated course by course and applied to individual Core requirements if applicable. Students will need to take additional Core classes to complete their Core requirements (https://www.luc.edu/core/).
7. This policy will be administered by the Office of Registration and Records.
8. For questions concerning core requirements, please contact your Academic Advisor.
9. AP/IB/CLEP information can be found at: https://www.luc.edu/undergrad/academics/creditbyexam/
10. Course equivalency information can be checked using Transferology (https://www.transferology.com/login.htm).

[1] This policy applies to students admitted during the Fall of 2013 or later.
[2] Credit **not** eligible for transfer includes:

- Trade school, job training, or adult/continuing education courses
- Developmental courses (below 100-level)
- English as a Second Language (ESL) course credit
- Courses from institutions that are not regionally accredited

University Core Curriculum

Every Loyola Undergraduate, regardless of college or school, will complete the University Core Curriculum.

The Core Curriculum consists of 16 courses (48 credit hours) distributed over 10 Core Knowledge Areas. Students will complete coursework in:

Required Core Areas	Required Courses	Credit Hours
Artistic Knowledge and Inquiry (p. 990)	1	3
College Writing Seminar (p. 991)	1	3
Ethical Knowledge and Inquiry (p. 991)	1	3
Historical Knowledge and Inquiry (p. 991)	2	6
Literary Knowledge and Inquiry (p. 992)	2	6
Philosophical Knowledge and Inquiry (p. 993)	2	6
Quantitative Knowledge and Inquiry (p. 993)	1	3
Scientific Knowledge and Inquiry (p. 993)	2	6
Societal and Cultural Knowledge and Inquiry (p. 994)	2	6
Theological & Religious Knowledge and Inquiry (p. 995)	2	6
Total	**16 courses**	**48 hours**

Each course that has been approved for the University Core Curriculum will reinforce one or more of the following six Skills: communication, critical thinking, ethical awareness and decision making, quantitative and qualitative analysis and research methods, and technological literacy.

These courses also integrate the understanding and promoting of four Values essential to a Loyola education: understanding diversity in the US or the world; understanding and promoting justice; understanding spirituality or faith in action in the world; and promoting engaged learning.

Students' majors and minor may fulfill one or more areas of the Core Knowledge component. See here (p. 997) for specifics.

For more information on the University Core Curriculum and to see the list of approved core courses by Core Knowledge Area go here (p. 989).

University Core Curriculum Grade Requirements

Students must earn grades of at least D in approved Core courses to have that course count for Core credit, with the exception of the College Writing Seminar, which requires a minimum of C- for credit. Students must have an overall grade point average of 2.00 in all courses they apply to the Core Curriculum.

Required Hours and Grade Point Average for Graduation

Students must complete 120 hours to graduate. Student must have a minimum cumulative 2.00 GPA. They must also have a minimum cumulative 2.00 GPA in their Core Curriculum.

Most departments require a minimum 2.00 GPA in their major(s) and minor(s). Students must check with their department(s) for policy on the minimum GPA in the major and/or minor.

Withdrawal From a Class

After the last day to drop without a “W”, students may withdraw from a class or classes with the grade of “W” based on calendar dates noted for each term on the official university academic calendar.

Most students do not need permission to withdraw from a class or classes during any term. Students that are blocked from dropping a class or classes during an academic term should meet with their academic advisor, program director, or associate/assistant dean.

Students who stop attending a class but have not officially withdrawn will not earn a grade of “W”. A student in this situation will earn a grade based on coursework completed minus any work, including a final exam, that is not completed. This includes students that make the decision to stop attending after the final date to earn a “W”.

The bursar maintains the withdrawal schedule for any tuition credit for a class or classes that a student withdraws from during any term. This schedule is posted on the Bursar website.

Students contemplating withdrawal from a class and receiving or expecting to receive financial assistance should consult with the Office of Student Financial Assistance.

Withdrawal From the University

An enrolled student who wishes to completely withdraw from the university during any term must notify their academic advisor, academic program director, or assistant/associate dean of their college/school of their intent. Please complete the Request for Change to Academic Record or Status (https://cm.maxient.com/reportingform.php?LoyolaUnivChicago&layout_id=104) form. The form will be routed to your academic advisor, program director, or assistant/associate dean. A student is considered to be in attendance until such notice has been received by the academic advisor, program director, or assistant/associate dean and appropriate steps have been taken to completely withdraw a student from a term. The last date of class activity is the date utilized for both the "W" or "WE" grade and the Office of the Bursar's withdrawal refund calendar (https://www.luc.edu/bursar/withdrawalschedulechangecalendars/).

A student may be required to withdraw from the university because of academic deficiency, lack of sufficient progress toward completion of degree requirements, failure to adhere to university requirements and/or degree requirements, failure to adhere to university requirements and regulations for conduct, or failure to meet financial obligations to the university.

Complete Emergency Withdrawal

Students facing a significant emergency circumstance (see "Definitions" section below) that prevents them from continuing in or completing an academic term may submit a Request for Change to Academic Record or Status (https://cm.maxient.com/reportingform.php?LoyolaUnivChicago&layout_id=104) form to their primary academic advisor, program director or assistant/associate dean. All requests must be supported by appropriate documentation. The form is reviewed by the academic dean's office of the student's primary college/school for approval and processing.

Requests for complete emergency term withdrawals are considered after the last day of a term to drop a course or courses without a grade of "W." In cases where the student is incapacitated (see "Emergencies Resulting in Student Incapacitation" below for more details), the request for complete emergency term withdrawals may be submitted by a parent, spouse or legal guardian.

Complete emergency term withdrawals constitute a withdrawal from all classes that are in progress at the time of the request and may result in final grades of "WE" in all classes in progress for the given academic term.

In the case where a student may have already withdrawn from a course or courses and have a grade of "W" on their record, that course or courses will continue to show the grade of "W" and all other in progress courses will show the grade of "WE" when the emergency withdrawal has been approved.

If a student has completed a course or courses in a shorter-term session within the standard fall and spring semester that has officially finished and has a grade posted, that grade will remain on the student's record as the official grade of record. This action applies only to courses offered in a shorter-term session.

This policy does not apply in cases where the student has completed one or more final exams or final projects during the regular fall or spring semester. In a situation where a student has completed one or more final exams or final projects and experiences a significant emergency, the student is advised to reach out to their academic advisor, program director, or directly to faculty for any courses where the final exam or final project date has not occurred to review options including the possibility for a grade of Incomplete (I) (https://www.luc.edu/media/lucedu/registrationrecords/pdfs/UGRD_Request_%20for_Incomplete%20-%20FORM%202026.pdf) in remaining courses.

The University does not grant partial withdrawals (i.e., requests to withdraw from some classes but not others) for emergencies. Grades of "WE" have no impact on a student's cumulative GPA. The "WE" grade has no earned or attempted hours associated with the grade; however, "WE" counts towards attempted hours when determining Satisfactory Academic Progress (https://www.luc.edu/finaid/aid-process/responsibilities/academic-progress/) for continued financial aid eligibility.

When final grades have posted and a student is requesting a review of their status, students should utilize the Request for Change to Academic Record or Status (https://cm.maxient.com/reportingform.php?LoyolaUnivChicago&layout_id=104) form, and it will be routed to their primary academic advisor, program director or assistant/associate Dean.

The Office of the Bursar will determine the impact of the Withdrawal on the students account balance in LOCUS. The Student Account Balance will be determined by the University withdrawal calendar Loyola Withdrawal Schedule (https://www.luc.edu/bursar/withdrawalschedulechangecalendars/). The Bursar will not assess any late payment fees after the date of Emergency Withdrawal.

Emergencies Resulting in Student Incapacitation

It is required that a complete emergency term withdrawal request be submitted by the student. However, if an emergency situation has resulted in the student's temporary or long-term incapacitation for a period that may extend beyond the one-calendar-year deadline of this policy, the student's college/school academic dean's office, the Office of the Dean of Students, a parent (for minors), emergency contact person, or other legally assigned designee may submit a request on the student's behalf. In such cases, the student's college/school academic dean's office may require additional documentation (e.g., letter from medical doctor, hospitalization forms, power of attorney).

Potential Implications

The section below provides a non-exhaustive list and general information on the potential implications of a complete emergency term withdrawal. While the University offers a number of considerations that help support students who are facing emergencies, there are other important factors that should be taken into consideration before submitting a request for a complete emergency term withdrawal. Whenever possible, it is strongly recommended that a student discuss all possible options, including the potential implications of a complete emergency withdrawal with their primary academic advisor.

Financial Implications: Tuition and Financial Aid

Students are strongly encouraged to purchase tuition insurance (e.g., A.W.G Dewar, Inc.) prior to the start of the academic term.

Note that a complete emergency withdrawal does not automatically result in tuition credit. Please refer to the withdrawal schedule on the Office of the Bursar's website.

Complete Emergency Withdrawal Procedures During an Academic Term

1. Initial Step- Submit Request for Change to Academic Record or Status (https://cm.maxient.com/reportingform.php?LoyolaUnivChicago&layout_id=104)

Although it is recommended that the student submit as much information as possible, documentation does not need to specify details of the emergency that may be protected by law or considered private. Documentation must come from a verifiable authority (e.g., community/licensed healthcare provider, police agency, court of law, US military etc.) and minimally confirm the following:

- general description
- date (or time span)
- time, and
- location (if appropriate) of significant emergency circumstance
- Review and Decision

Requests for a complete emergency withdrawal will be reviewed and decided by the student's college/school academic dean's office. Other areas, such as the Office of the Dean of Students, the Office for Equity & Compliance, or Student Accessibility Center, may be consulted in cases where the student was either referred or is being supported by said office. Additional documentation and/or information may be requested of the student before a final decision is made.

The student will receive a written decision notification no later than 14 business days after receipt of original request via LUC email. If the school is unable to meet the 14 business-days deadline, the student will be notified in writing of the new deadline. If the request is approved, the effective date of the emergency withdrawal "WE" and further instructions before returning to campus (if necessary) will be provided. The date of the complete emergency withdrawal will be determined by the primary college/school dean's office based on the date of the last academically related activity.

Post-Emergency Complete Withdrawal Re-Entry Process

Unless otherwise indicated in the approval notification or by the Office of the Dean of Students in lieu of the Loyola University Chicago Behavior Concerns Team (BCT), the process for returning to the university will follow standard policies and procedures for re-enrollment. Students who were being supported by BCT before withdrawing or are returning because of a mental health hospitalization are required to consult the Office of the Dean of Students for instructions on potential re-entry requirements.

Definitions

Significant Emergency Circumstance – an unforeseen emergency situation that prevents a student from continuing in or completing an academic term. Some examples include but are not limited to:

- Chronic illness of withdrawing student
- Death of parent/legal guardian or medical issue of a family member and the withdrawing student must become a part-time or full-time caretaker of family member
- Extreme financial hardship
- Mental health condition, serious injury or illness of withdrawing student
- Sudden or consistent lack of transportation which affected the withdrawing student's ability to meet in-person attendance requirements
- Other situations, at the University's sole discretion, which are deemed to result in significant hardship to the withdrawing student

This list includes examples of emergency situations that directly affect the student.

Accelerated Master's Pathways

Guidelines for Accelerated Master's Pathways

Terms

- *Accelerated Master's Pathways (AMP)*: This document refers to pathways in which students share limited credits between their undergraduate and graduate degrees to facilitate completion of both degrees. Similar programs have previously been known as Accelerated Bachelor's/Master's Programs, 4+1 Bachelor's/Master's programs, 5 Year Programs, 5-year dual degree programs, or Combined Bachelor's/Master's programs.
- *Shared credits*: Graduate level credit hours taken during the undergraduate program and then applied towards undergraduate and graduate program requirements will be referred to as shared credits. Undergraduate courses (i.e., courses offered at the 300 level or below) cannot be counted as shared credits nor count toward the master's degree.

Introduction and Rationale

Loyola University Chicago has long included its Accelerated Master's Pathways as one of its attractions for undergraduates. Accelerated Master's Pathways offer students the opportunity to integrate learning at the undergraduate and graduate levels. These highly selective pathways are designed for undergraduates who can accomplish master's level work at the same time as they complete their bachelor's degree. Such pathways allow exceptional students to efficiently earn two degrees and jump-start their career by completing the Master's degree in less time than it would take to complete both degrees separately and at a lower cost than the sequential completion of the two degrees.

These guidelines apply to all Accelerated Master's Pathways at Loyola University Chicago. These guidelines are intended to bring uniformity to current and future pathways, simplify communication of requirements to students, faculty, and staff, and to raise the overall profile of these pathways so that they provide Loyola's most advanced undergraduate students with an exceptional undergraduate and graduate educational experience.

These guidelines serve to:

- regularize the overall structure of existing pathways
- establish uniform admission standards to attract the most capable undergraduates
- set baseline expectations for coursework such that the student begins graduate coursework while still earning an undergraduate degree while preserving the rigor of the master's program
- simplify coordination amongst various offices that serve these students to improve operational efficiency and student satisfaction

Proposals for new or modified Accelerated Master's Pathways should carefully consult this document to ensure that they conform to these guidelines.

Pathway Model

Loyola University Chicago follows an Accelerated Master's Pathway model, which allows master's programs to accept qualified applicants from any undergraduate major. Specific qualifications are outlined in the Admissions Requirements section below.

Admission Requirements

Accelerated Master's Pathways are designed to enhance opportunities for advanced training for Loyola's undergraduates. Admission to these pathways must be competitive and will depend upon a positive review of credentials by the program's admissions committee. Accordingly, the admission requirements for these pathways may be higher than those required if the master's degree were pursued entirely after the receipt of a bachelor's degree. That is, master's programs may choose to have more stringent admissions requirements for their AMP in addition to those minimal requirements below.

Requirements:

- Declared undergraduate major.
- By the time students begin taking graduate courses as an undergraduate, the student has completed or is approaching approximately 90 credit hours, or the credit hours required in a program with specialized accreditation.[1]
- A minimum cumulative GPA for coursework at Loyola that is at or above the pathway-specific requirements, a minimum major GPA that is at or above the pathway-specific requirements, and/or appropriate designated coursework for evaluation of student readiness in their discipline.[2]
- Undergraduates from any major may apply to an Accelerated Master's Pathway model; however, applicants must have completed pathway-specific prerequisite coursework and/or meet minimum GPA requirements to be considered for admission.[3]

Students not eligible for admission to the Accelerated Master's Pathway may apply to the master's program through the regular admissions process. Students enrolled in an Accelerated Master's Pathway who choose not to continue to the master's degree program upon completion of the bachelor's degree will face no consequences.

Ideally, a student will apply for admission in their junior year as they approach 60 to 90 credit hours. Programs are encouraged to begin advising students early in their major so that they are aware of the program and, if interested, can complete their bachelor's degree requirements in a way that facilitates completion of the master's program. Once admitted as an undergraduate student, a Student Group relevant to the master's program will be assigned in LOCUS to provide a tracking mechanism for Undergraduate Advising and the Graduate Program Director. Students with a relevant Student Group will be able to enroll in their shared 400-level credits according to guidelines provided by the master's program in the Academic Catalog. Students will not officially matriculate into the master's degree program and be labeled as a graduate student by the university, with accompanying changes to tuition and Financial Aid (see below), until the undergraduate degree has been awarded. Once admitted to the AMP, students must meet the academic standing requirements of their graduate program as they complete the program curriculum.

1 Programs with pathway/s that have specialized accreditation will adhere to the admissions criteria provided by, or approved by, their specialized accreditors.
2 The program will identify appropriate indicators of student readiness for graduate coursework (e.g., high-level performance in 300 level courses). Recognizing differences between how majors are designed, we do not specify a blanket requirement.
3 If students choose not to enroll in the Accelerated Master's Pathway, they still must complete all of the standard requirements associated with the undergraduate degree (e.g., a capstone).

Curriculum

Level and progression of courses

The Accelerated Master's Pathways are designed to be competitive and attractive to our most capable students. Students admitted to Accelerated Master's Pathways should be capable of meeting graduate level learning outcomes. Following guidance from the Higher Learning Commission, only courses taken at the 400 level or higher (including 300/400 level courses taken at the 400 level) will count toward the graduate program.[4,5]

In general, graduate level coursework should not be taken by an undergraduate prior to admission into the Accelerated Master's Pathway. Exceptions may be granted: a) for professional programs where curriculum for the Accelerated Master's Pathway is designed to begin earlier; b) if a particular graduate level course is only offered once every 2-3 years, and a student has demonstrated the necessary ability to be successful; or c) in rare cases, the Graduate Program Director may authorize enrollment in a 400-level course for a highly qualified and highly motivated undergraduate who has not yet been admitted to the graduate program, ensuring that the undergraduate's exceptional participation in the graduate class will not diminish in any way the experience of the graduate students regularly enrolled.

4 If students wish to transfer credits from another university to Loyola University Chicago, the program's Graduate Program Director will review the relevant syllabus(es) to determine whether it meets the criteria for a 400-level course or higher.
5 Programs with specialized accreditation requirements that allow programs to offer graduate curriculum to undergraduate students will conform to those specialized accreditation requirements.

Shared credits

While up to 50% of the total graduate level credit hours required in the graduate program may be counted in meeting both the undergraduate and graduate degree requirements, the curriculum for the AMP in the academic catalog will specify the maximum number of shared credits that are permitted. Depending on the connection of the master's program with the undergraduate major(s), an undergraduate may count shared credits as general electives towards their undergraduate degree requirements.

The program's Graduate Program Director will designate the number of credit hours to be shared through the Academic Catalog, and that number will be shared through advising and through the master's degree conferral review process. Shared credit hours will not be marked on the undergraduate record as having a special status in the undergraduate program. They will be included in the student's undergraduate earned

hours and GPA. Shared credit hours taken during the undergraduate program will be included on the master's transcript but courses will not be listed on the transcript and graduate credit hours will not be included in the graduate GPA calculation.

Student Advising

In collaboration with the Office of Graduate and Professional Enrollment Management, master's programs should ensure that robust marketing and advising exists to identify qualified students early in their undergraduate career. Students should be encouraged to apply for the program at or before earning 90 credit hours. The program's Graduate Director will work with the student on their applications. Graduate Program Directors should ensure that transfer students are aware of the program and ensure they have access to advising to determine eligibility.

The Graduate Program Director will closely advise students and monitor student enrollment in courses to ensure the proper courses are selected for degree completion.

Tuition and Financial Aid

The student will be charged undergraduate tuition until they have completed their undergraduate degree requirements. The student is eligible for undergraduate financial aid until the bachelor's degree is awarded. Once the student has earned the bachelor's degree, they will matriculate into their graduate career. Upon matriculation into their graduate career, the student will be charged tuition at the graduate level and will be eligible for graduate financial aid as well as merit award consideration if the graduate program has such aid available. All undergraduate aid or scholarship awards will no longer apply once the undergraduate degree is awarded.

Graduation

Degrees are awarded sequentially. All details of undergraduate commencement are handled in the ordinary way as for all students in the School/College/Institute. Once in the graduate program, students abide by the graduation deadlines set forth by the graduate program. In offering the option of an Accelerated Master's Pathways, the university is making possible the acceleration of a student's graduate degree completion. It should be understood that students may not request deferral of their matriculation into the Master's degree program. If students would like to delay their graduate studies after earning the undergraduate degree, they may apply for admission to the traditional master's degree program. Any application of graduate credit earned while in the undergraduate program is subject to the policies of the graduate degree granting school.

Graduate and Professional

Graduate and Professional Academic Standards and Regulations

Graduate and Professional Academic Standards and Regulations apply to all graduate and professional students in the university and will supersede all school level policies. Students are personally responsible to review the following general academic rules and regulations. If students have questions about particular regulations, they should contact their academic dean's office for clarification.

Attendance Policy for Graduate and Professional Students

The attendance policy for graduate and professional students specifies the role of students, instructors, and university administrators in cases when graduate and professional students are absent from one or more classes. The university does not require faculty to take attendance; however, if faculty use participation/ attendance in their grading rubric, they must include this policy on the course syllabus including a clear definition of the consequences for non-attendance. If participation/ attendance is identified as a portion of the students' final grade, faculty must maintain a record of students' attendance throughout the term.

Excused Absences

The university recognizes there are times when students must miss class due to extenuating circumstances. Regardless of the attendance policy of the faculty, the following are considered excused obligations and are not to be counted as absences in the class. Excused absences do not preclude the need to fulfill specific program requirements.

1. Jury duty (with appropriate documentation)
2. Short Term Military Obligation – Veterans Current Students (https://www.luc.edu/veterans/currentstudents/reservistsguardsmen/)
    1. This activity must be documented and provided to the faculty in advance of the activity.
    2. The documentation must be verified by the director or assistant director in the Military Veteran Student Services Office, who has confirmed that the student has orders to report for a short-term military obligation.
3. Day(s) for Religious Observances (https://www.luc.edu/campusministry/faithprograms/interfaith/religiousobservances/)
4. Participation in Division-1 athletics or other university-sanctioned events – Travel & Competition Policy (https://www.luc.edu/athleteadvising/travelcompetitionpolicy/)
    1. This activity must be documented and provided to the faculty in advance of the activity.
    2. The documentation must be verified by an administrator who is directly related to the activity (e.g. Division-1 athletics representative; musical group director; student development representative, etc.).
5. Absences resulting from legally mandated accommodation requirements (e.g., Title IX, ADA, etc.).
6. In the event of a state or national pandemic, the institution retains the right to amend this attendance policy.
7. At their discretion, faculty may permit excused absences for graduate and professional students' professional development and/or training.
8. Graduate and professional students should consult with supervising faculty and/or program leadership regarding the attendance policy for internship, study, and supervision classes.

Making Up Work from a Missed Class

The excused absences outlined above require the faculty to facilitate alternative means for students to make up classwork and/or get notes from a lecture. Labs, clinical hours, group work, performance, studio art, and other field-based classes are the exceptions to this because it may be impossible to make up classwork.

Unexcused Absences

Absences not listed above are unexcused. The ability to make up class work because of an unexcused absence is at the discretion of the faculty, as outlined in the faculty's attendance policy noted on syllabi. Note that the Loyola University Chicago Wellness Center does not provide documentation for absences.

Military Service

Students who have been called into the armed services of the United States and who are consequently withdrawing from the university before

the end of the withdrawal period will receive a refund of all tuition and fees paid for the period in question but no academic credit. If they withdraw after the end of the withdrawal period, they will receive full academic credit for the semester with grades as of the date of withdrawal but no refund of tuition.

Student Enrollment Status

Half-time enrollment is required to receive federal loans, per Financial Aid (https://www.luc.edu/finaid/loans/enrollment/).

Enrollment Length	Half-Time	Full-Time
Graduate Semester	3-5 hours	6+ hours
Graduate Quarter (Business)	3-5 hours	6+ hours
Medical School	0.5 hours	1+ hours
School of Law (JD only)	4-7 hours	8+ hours

Generally, to be considered half-time a graduate student must be enrolled in at least four graduate semester hours or three graduate quarter hours (depending on the program). Full-time enrollment is defined as eight graduate semester hours or six graduate quarter hours (depending on the program). However, a graduate student may be considered enrolled full-time in a term if any of the following conditions apply:

- Enrolled in eligible clerkship, internship, or practicum coursework (not all courses are eligible; typically these are classes requiring field/agency work); or
- Semester students enrolled in any masters or doctoral coursework that is considered full-time by **Registration and Records**.

Note: Students enrolled in Research are considered full-time in terms where their enrollment is at least eight graduate semester hours.

Withdrawal from the University

An enrolled student who wishes to withdraw from the university during any semester must notify the Dean's office and their graduate program director in writing. A student is considered to be in attendance until such notice has been received by the Dean or the Graduate Program Director. All financial refunds or obligations are dated from the date of the formal notice of withdrawal and not from the date of the last class attended; see the Bursar's website for more information. It is the student's obligation to inform the Graduate School promptly of the intention to withdraw. Telephone messages or non-attendance in class are not official notification.

A student may be required to withdraw from the university because of academic deficiency, lack of sufficient progress toward completion of degree requirements, failure to adhere to university requirements, degree requirements and/or regulations for conduct or failure to meet financial obligations to the university.

Complete Emergency Withdrawal

Students facing a significant emergency circumstance (see "Definitions" section below) that prevents them from continuing in or completing an academic term may submit an Intent to Withdraw form to their program director or the Graduate School. All requests must be supported by appropriate documentation. The Intent to Withdraw form is reviewed by the academic dean's office of the student's primary college/school for approval and processing.

Requests for complete emergency term withdrawals are considered after the last day of a term to drop a course or courses without a grade of "W." In cases where the student is incapacitated (see "Emergencies Resulting in Student Incapacitation" below for more details), the requests for complete emergency term withdrawals may be submitted by a parent, spouse or legal guardian.

Complete emergency term withdrawals constitute a withdrawal from all classes and may result in final grades of "WE" in all classes for the given academic term. The University does not grant partial withdrawals (i.e., requests to withdraw from some classes but not others) for emergencies. Grades of "WE" have no impact on a student's cumulative GPA. The "WE" grade has no earned or attempted hours associated with the grade; however, "WE" counts towards attempted hours when determining Satisfactory Academic Progress (https://www.luc.edu/finaid/aid-process/responsibilities/academic-progress/) for continued financial aid eligibility. This policy does not apply in cases where the student has completed final exams or final projects for classes in the term impacted by the significant emergency circumstance. When final grades have posted, students should utilize the Appeal for Change of Academic Record form and submit to their primary academic advisor, program director or assistant/associate Dean.

The Office of the Bursar will determine the impact of the Withdrawal on the students account balance in LOCUS. The Student Account Balance will be determined by the University withdrawal calendar Loyola Withdrawal Schedule (https://www.luc.edu/bursar/withdrawalschedulechangecalendars/). The Bursar will not assess any late payment fees after the date of Withdrawal.

EMERGENCIES RESULTING IN STUDENT INCAPACITATION

It is required that a complete emergency term withdrawal request be submitted by the student. However, if an emergency situation has resulted in the student's temporary or long-term incapacitation for a period that may extend beyond the one-calendar-year deadline of this policy, the student's college/school academic dean's office, the Office of the Dean of Students, a parent (for minors), emergency contact person, or other legally assigned designee may submit a request on the student's behalf. In such cases, the student's college/school academic dean's office may require additional documentation (e.g., letter from medical doctor, hospitalization forms, power of attorney).

POTENTIAL IMPLICATIONS

The section below provides a non-exhaustive list and general information on the potential implications of a complete emergency term withdrawal. While the University offers a number of considerations that help support students who are facing emergencies, there are other important factors that should be taken into consideration before submitting a request for a complete emergency term withdrawal. Whenever possible, it is strongly recommended that a student discuss all possible options, including the potential implications of a complete emergency withdrawal with their primary academic advisor.

FINANCIAL IMPLICATIONS: TUITION AND FINANCIAL AID

Students are strongly encouraged to purchase tuition insurance (e.g., A.W.G Dewar, Inc.) prior to the start of the academic term.

Note that a complete emergency withdrawal does not automatically result in tuition credit. Please refer to the withdrawal schedule on the Office of the Bursar's website.

COMPLETE EMERGENCY WITHDRAWAL PROCEDURES DURING AN ACADEMIC TERM

Although it is recommended that the student submit as much information as possible, documentation does not need to specify details of the emergency that may be protected by law or considered private.

Documentation must come from a verifiable authority (e.g., community/licensed healthcare provider, police agency, court of law, US military etc.) and minimally confirm the following:

Requests for a complete emergency withdrawal will be reviewed and decided by the student's college/school academic dean's office. Other areas, such as the Office of the Dean of Students, the Office for Equity & Compliance, or Student Accessibility Center, may be consulted in cases where the student was either referred or is being supported by said office. Additional documentation and/or information may be requested of the student before a final decision is made.

The student will receive a written decision notification no later than 14 business days after receipt of original request via LUC email. If the school is unable to meet the 14 business-days deadline, the student will be notified in writing of the new deadline. If the request is approved, the effective date and further instructions before returning to campus (if necessary) will be provided. The date of the complete emergency withdrawal will be determined by the primary college/school dean's office based on the date of the last academically related activity.

POST-EMERGENCY COMPLETE WITHDRAWAL RE-ENTRY PROCESS
Unless otherwise indicated in the approval notification or by the Office of the Dean of Students in lieu of the Loyola University Chicago Behavior Concerns Team (BCT), the process for returning to the university will follow standard policies and procedures for re-enrollment. Students who were being supported by BCT before withdrawing or are returning because of a mental health hospitalization are required to consult the Office of the Dean of Students for instructions on potential re-entry requirements.

DEFINITIONS
Significant Emergency Circumstance – an unforeseen emergency situation that prevents a student from continuing in or completing an academic term. Some examples include but are not limited to:

- Chronic illness of withdrawing student
- Death of parent/legal guardian or medical issue of a family member and the withdrawing student must become a part-time or full-time caretaker of family member
- Extreme financial hardship
- Mental health condition, serious injury or illness of withdrawing student
- Sudden or consistent lack of transportation which affected the withdrawing student's ability to meet in-person attendance requirements
- Other situations, at the University's sole discretion, which are deemed to result in significant hardship to the withdrawing student

This list includes examples of emergency situations that directly affect the student.

Graduate and Professional School Academic Policies

Students should be familiar with these regulations as they apply to their degree program. The academic unit which confers the degree holds the policies that are relevant to a particular degree. Questions should be directed to the office of the academic dean of the school or institute.

Marcella Niehoff School of Nursing (MNSON) Mission and Vision

Our Mission at the Marcella Niehoff School of Nursing is to advance the science of nursing and provide a transformative education in the Jesuit Catholic tradition that prepares compassionate, innovative, diverse nurse leaders who provide care for the whole person and partner locally and globally to promote social justice and health for all. OUR VISION at the Marcella Niehoff School of Nursing is to be a preeminent leader in transforming the health of persons, families, communities, and populations, while promoting social justice, health equity and quality care for all. More information can be found here (https://www.luc.edu/nursing/about/missionvisioncorevalues/).

Marcella Niehoff School of Nursing Core Values

The MNSON is committed to the five "hallmark characteristics of a Jesuit education." These characteristics provide the foundation for our core values. The MNSON core values challenge administrators, faculty, students, communities, and partners to think differently. Graduating professionals who are technically proficient is necessary, but not sufficient. Our graduates will shape the future of health and health care. To prepare them, we implement the following values:

"Commitment to Excellence: Applying well-learned lessons and skills to achieve new ideas, better solutions and vital answers." This is what it means in the MNSON:

- Promoting dialogue, critical thinking, and the discernment of meaning in the process of enhancing health of persons and communities, both locally and globally.

- Fostering an academic environment that supports and guides students in their transformation toward becoming health care leaders.

"Faith in God and the religious tradition: Promoting well-formed and strongly held beliefs in one's faith tradition to deepen others' relationship with God." This is what it means in the MNSON:

- Acknowledging that humans are physical, psychosocial, and spiritual beings.
- Recognizing that spirituality affects health.
- Respecting that spirituality is lived out differently through diverse faiths, beliefs, and religious traditions.
- Creating a safe place to search for meaning in the process of discovery and transformation, as well as social change.
- Respecting our potential for achievement while accepting our human limitations in the pursuit of good.

"Service that promotes justice: Using learning and leadership in openhanded and generous ways to ensure freedom of inquiry, the pursuit of truth and care for others." This is what it means in the MNSON:

- Committing to social justice by engaging individuals, families, and communities, both locally and globally, to improve and promote health.
- Recognizing that health disparities exist; those with the greatest need and with the least access hold a higher priority for action.
- Engaging in research and application of evidence-based practice or best practices that limit health disparities.

"Values-based leadership: Ensuring a consistent focus on personal integrity, ethical behavior in business and in all professions, and the appropriate balance between justice and fairness." This is what it means in the MNSON:

- Fostering synergistic collaborations within and between professions, disciplines, programs, and partners.
- Respecting the dignity and fundamental rights of all.
- Embracing the tension that exists between competing priorities (e.g., mission-driven, financially-driven, Ethical & Religious Directives for Catholic Health Care Services) when making choices.
- Accepting responsibility to make choices and act through discernment, being wise stewards of resources.
- Actively seeking diversity in people, programs, professions, and practice to strengthen the communities of which we are a part.
- Promoting a culture of purposeful transparency.

"Global Awareness: Demonstrating an understanding that the world's people and societies are interrelated and interdependent." This is what it means in the MNSON:

- Understanding that individuals are intimately connected to, live within, and operate within community.
- Recognizing that communities have cultural capital with unique strengths.
- Fostering relationships and engaging in partnerships in order to promote health.
- Embracing culture as a means to serve and to lead change toward better health.
- Applying the lessons we learn locally to global milieus and applying lessons learned globally to local initiatives.

Standards of the Profession

Exemplary behavior, consistent with the standards of the nursing profession, is expected at all times. The student is expected to maintain integrity and abide by the standards of clinical education and of the nursing profession, as further discussed in the following sections. The student is responsible for adhering to the policies in this manual and acknowledges acceptance of this student handbook by acknowledging that they have read and received the Student Handbook.

Inclusive Excellence Statement

Working toward inclusive excellence includes building intrapersonal and interpersonal awareness, engaging in curriculum transformation, teaching with an inclusive pedagogy, and building inclusive learning environments. We recognize that our community is strengthened by the diversity of our students, faculty, and staff along the social dimensions of race, color, religion, biological sex, age, sexual orientation, gender identity or expression, national or ethnic origin, ancestry, disability, marital status, parental status, military/veteran status, or any other characteristic protected by applicable law. We are especially committed to helping our nation create a culture of health, promote health equity to reduce health disparities, and improve the health and well-being of all, especially for those who experience the health system disparately due to systemic oppressions.

Chosen Name and Pronouns Statement

Class rosters and university data systems are provided to instructors with only students' legal names presented. Knowing that not all students use their legal names or identify with a gender that aligns with their sex assigned at birth, faculty members will use the name and/or personal pronouns you use. If you choose, you may email the faculty member directly to share your information. Additionally, if these change at any point during the semester, please let the faculty member know. For more information on how to change your name in LOCUS, please visit the Preferred Name Policy (https://www.luc.edu/dos/services/preferrednamepolicy/).

History and Overview of the Marcella Niehoff School of Nursing

The MNSON was founded in 1935. It is the oldest baccalaureate nursing program in the state of Illinois. The MNSON was the first school in the university in which women attended classes. At its inception, education focused on preparing nurses to assume leadership roles in meeting the health care needs of Chicago residents. The following programs are housed in the MNSON.

Bachelor of Science in Nursing (BSN)

The BSN program educates and graduates competent and caring nursing professionals to meet the health care needs of patients in a variety of national and international settings. The program is science-based and focuses on the knowledge and skills necessary to provide safe and competent nursing care to individuals, families and communities. Students are prepared to analyze complex health care situations using critical thinking to optimize health outcomes.

There are two program tracks in the BSN program. The 4-year BSN program track is a direct entry academic degree program. The Accelerated BSN (ABSN) program track offers a fast-track to professional

nursing for those who have already earned a baccalaureate degree or higher in another field of study.

Graduate Nursing Programs

In 1964, a Master of Science in Nursing (MSN) program was initiated to prepare professional nurses for advanced practice and leadership roles in health care delivery. The MSN programs currently include the following track: Nursing and Healthcare Administration Nurses with an Associate Degree or Diploma in Nursing can pursue this track via the RN-MSN program. In 2009, the Doctor of Nursing BSN Student Handbook 2025-2026 Practice (DNP) program was initiated. The DNP is a practice-focused degree designed to provide advanced knowledge and skills required to enhance the health and well-being of individuals and communities. Practice doctorate preparation includes options for a systems/leadership focus or advanced practice nursing with a specialty focus. The PhD program was initiated in 1988 to meet the need for nurse scholars, teachers, and leaders. Loyola PhD in Nursing graduates have assumed leadership roles in research, education, clinical practice, and health care administration nationally and internationally.

Certificate Programs

The Marcella Niehoff School of Nursing offers certificate programs for post-Baccalaureate and post Master's nurses and other health professionals looking to advance their knowledge and skills in their practice areas or to expand their career options. Post-graduate Advanced Practice Registered Nurse (APRN) certificate programs are available for master's prepared nurses who wish to gain needed content and clinical expertise to prepare for a Nurse Practitioner (NP) or Clinical Nurse Specialist (CNS) national certification examination. Information about Certificate Programs can be found at Degree Programs | School of Nursing: Loyola University Chicago.

Overview of the DNP Program

DNP Program Tracks

The DNP Program APRN tracks are designed for nurses seeking preparation as an Advanced Practice Nurse and also a terminal degree in nursing practice; this degree offers an alternative to research-focused doctoral programs. DNP prepared nurses will be equipped to fully translate research into practice. The changing demands of the nation's complex healthcare environment require the highest level of scientific knowledge and practice expertise to assure high quality patient outcomes. Thus Loyola's DNP program educates nurses for expert practice in leadership and clinical roles. The program focuses on populations at risk for disease, populations that are experiencing alterations in health, populations across the nation and globe, and systems that promote safe and efficient health care environments. Graduates are equipped to disseminate evidence-based practice initiatives to patients, families, communities and populations to assure high-quality, safe health care across all settings.

Loyola offers the following DNP tracks:

- The **Psychiatric Mental Health Nurse Practitioner program** can be completed in 68 semester hours. Graduates will have the knowledge and skills to assume system-wide leadership as Psychiatric Mental Health Nurse Practitioners.
- The **Psychiatric Mental Health Nurse Practitioner program with specialization in Substance Use and Addiction Disorders** can be completed in 73 semester hours. Graduates will have the knowledge and skills to assume system-wide leadership as Psychiatric Mental Health Nurse Practitioners with expanded roles in substance use and addiction disorders.
- The **Family Nurse Practitioner program** can be completed in 72 semester hours. Graduates will have the knowledge and skills to assume system-wide leadership as Family Nurse Practitioners.
- The **Family Nurse Practitioner program with a specialization in Emergency Room** can be completed in 84 semester hours. Graduates will have the knowledge and skills to assume system-wide leadership as Family Nurse Practitioners with a subspecialization in Emergency Medicine.
- The **Women's Health Nurse Practitioner program** can be completed in 71 semester hours. Graduates will have the knowledge and skills to assume system-wide leadership as Women's Health Nurse Practitioners.
- The **Adult-Gerontology Primary Care Nurse Practitioner** can be completed in 69 semester hours. Graduates will have the knowledge and skills to assume system-wide leadership as Adult-Gerontology Primary Care Nurse Practitioners.
- The **Adult-Gerontology Acute Care Nurse Practitioner** can be completed in 72 semester hours. Graduates will have the knowledge and skills to assume system-wide leadership as Adult-Gerontology Acute Care Nurse Practitioners.
- The **Adult-Gerontology Primary Care Nurse Practitioner program with specialization in Oncology** can be completed in 72 semester hours. Graduates will have the knowledge and skills to assume system- wide leadership as Adult-Gerontology Primary Care Nurse Practitioners with expanded roles in oncology.
- The **Adult-Gerontology Clinical Nurse Specialist program with specialization in Oncology** can be completed in 69 semester hours. Graduates will have the knowledge and skills to assume system-wide leadership as Adult-Gerontology Clinical Nurse Specialist with expanded roles in oncology.
- The **Adult-Gerontology Acute Care Clinical Nurse Specialist program** can be completed in 64 semester hours. Graduates will have the knowledge and skills to assume system-wide leadership as Adult-Gerontology Acute Clinical Nurse Specialists.
- The **System Leadership Track** can be completed in 30 semester hours depending on the verified number of practicum clocked hours the student received from their master's level education. Graduates will have the knowledge and skills to assume advanced roles in direct care and systems leadership domains at the highest level of nursing.

The DNP program APRN tracks with the exception of the Adult-Gerontology Clinical Nurse Specialist program with specialization in Oncology, requires students to be centrally located to the Chicago area since many of the courses require on-ground class time. DNP and Post Graduate Certificate Programs.

Program Accreditation

The baccalaureate degree program in nursing, master's degree program in nursing, Doctor of Nursing Practice program, and the post-graduate APRN certificate program at Loyola University Chicago are accredited by the Commission on Collegiate Nursing Education, 655 K Street, NW, Suite 750, Washington, DC 20001, 202-887-6791.

Program Goal and Outcomes

The goal of the Doctor of Nursing Practice (DNP) program is to prepare nurses to assume advanced roles in direct care and systems leadership domains at the highest level of nursing to improve health care outcomes through practice-based scholarship.

At the completion of the DNP program, the graduate has the knowledge and skills to:

- Apply integrated scientific, knowledge and clinical judgements at the highest level of professional nursing practice.
- Evaluate health care delivery approaches and healthcare systems, with an emphasis on quality and safety.
- Apply best evidence in approaches to client and system-centered practices.
- Apply analytic approaches and information technology in the delivery and improvement of client-centered health care and health care systems.
- Employ ethics, leadership, and advocacy concepts to advance healthcare quality and equity for individuals, systems and populations.
- Implement intraprofessional and interprofessional leadership and collaboration competencies and methods, at the highest level of professional nursing practice in advancing health and health outcomes.

Admissions

The Doctor of Nursing Practice (DNP) program is offered by the Marcella Niehoff School of Nursing (MNSON) at Loyola University Chicago. There are multiple tracks in the DNP program:

- DNP System Leadership Track
- DNP APRN Tracks
- DNP Post Graduate Certificate

Students in DNP tracks begin the program in the Fall (August) semester. Applications are accepted year-round. The admission committee reviews and releases admission decisions on a rolling basis.

Professional Nursing Standards and Guidelines

MNSON DNP Tracks utilize the following nursing standards and guidelines.

DNP APRN Program and the DNP Systems Leadership Program

- The Essentials of Doctoral Education for Advanced Nursing Practice (AACN, 2021).

DNP APRN Programs

- Consensus Model for APRN Regulation: Licensure, Accreditation, Certification, and Education (2008).
- Standards for Quality Nurse Practitioner Education: A Report of the National Task Force on Quality Nurse Practitioner Education (2022)
- Population-Focused Nurse Practitioner Competencies (for FNP and WHNP) (AACN, 2013).
- Adult-Gerontology Primary Care Nurse Practitioner Competencies (AACN, 2010).
- Psychiatric Mental Health Nurse Practitioner Competencies (AACN, 2003).
- CNS Competencies | National Association of Clinical Nurse Specialists (2019).
- Adult-Gerontology Clinical Nurse Specialist Competencies (AACN, 2010).
- Oncology Clinical Nurse Specialist Competencies (ONS, 2008)

APRN Certification and Licensure

Graduates of a Loyola University Chicago DNP APRN program track are prepared to sit for at least one nationally recognized certification exam that corresponds to the advanced practice role and population focus for which the student was prepared in the program. National certification assesses the broad educational preparation of the individual which includes graduate core, APRN core, NP or CNS role and core competencies, and the competencies specific to the population focus of the area of practice.

Upon successful completion of the program, students in each APRN track are prepared to apply for the following role and population-focused certifications:

Family Nurse Practitioner
American Nurses Credentialing Center (ANCC)
American Academy of Nurse Practitioners Certification Program (AANPCP)

Emergency Nurse Practitioner (Post Certification as a Family Nurse Practitioner)
American Academy of Nurse Practitioners Certification Program (AANPCP)

Women's Health/Gender Related Nurse Practitioner
National Certification Corporation (NCC)

Adult-Gerontology Primary Care Nurse Practitioner
American Nurses Credentialing Center (ANCC)
American Academy of Nurse Practitioners Certification Program (AANPCP)

Psychiatric Mental Health Nurse Practitioner
American Nurses Credentialing Center (ANCC)

Adult-Gerontology Clinical Nurse Specialist
American Nurses Credentialing Center (ANCC)

The APRN role and population focus is reflected on the transcript of each MNSON graduate student.

Immersion Requirements

All students will participate in the required on-campus intensive Immersions on consecutive days Friday/Saturday at Loyola's Health Sciences Campus in Maywood, IL each academic year. These Immersions incorporate course work, seminars, and presentations within a community of scholars as a key way to build community among students. The focus of the Immersions is more than content learning—it is experiential learning from each other in this academic setting.

Attendance at all Immersions is mandatory. Failure to attend DNP Immersion may result in a registration hold, course failure, or dismissal.

Distance Education Programming and Supports (All DNP Tracks)

Teaching-learning practices have been developed to support the needs of the adult, professional learner. Teaching methods used in the program include in-person, and synchronous and asynchronous instructional methodologies. A synchronous learning environment with real time visual and audio communication provided by web-conferencing assists students in dialoguing and exchanging ideas easily, and for clarification of asynchronously delivered content. The asynchronous learning environment with archived lectures provides faculty a method to deliver current course content for students to view at their convenience.

To accommodate different student learning styles, faculty incorporate a variety of teaching strategies in their course work. Students work individually, in small groups or teams, present their work in courses through voice-over presentations and face to face during Immersion consecutive days, participate in threaded discussions and blogs, and work with their onsite mentors in a cohesive programmatic effort. Additional teaching-learning practices include case studies, clinical practice experiences, critical thinking exercises, debates, video/teleconferencing, computer-based assignments, and use of library resources. To provide opportunities for DNP cohorts to build community, the Immersions are required each year for DNP students and for faculty members who are course instructors and Faculty Project Advisors. These Immersions provide valuable opportunities for students to interact with faculty in a "community of scholars" model.

In addition to the LUC online learning support services, the MNSON has designed its own Online Course Orientation to prepare students for the responsibilities of online learning. It is easily accessible, in Sakai on the "Information for DNP Students" site.

Academic Integrity and Academic Misconduct

Academic integrity is the pursuit of scholarly activity in an open, honest, and responsible manner.

Academic integrity is a guiding principle for all academic activity at LUC, and all members of the University community are expected to act in accordance with this principle.

Standards

The MNSON abides by the University Academic Integrity Standards.

A basic mission of a university is to search for and to communicate the truth as it is honestly perceived. A genuine learning community cannot exist unless this demanding standard is a fundamental tenet of the intellectual life of the community. Students of Loyola University Chicago are expected to know, to respect, and to practice this standard of personal honesty.

Academic honesty is an expression of an ethic of interpersonal justice, responsibility, and care, applicable to Loyola University Chicago faculty, students, and staff, that demands that the pursuit of knowledge in the university community be carried out with sincerity and integrity. Academic dishonesty is the failure to apply this ethic, (i.e., any action whereby faculty, student, or staff misrepresents the ownership of academic work submitted in her or his own name).

Failing to meet these standards is a serious violation of personal honesty and academic ideals. The standards apply to both individual and group assignments. Individuals working in a group may be held responsible if one of the group members has violated one or more of these standards:

1. **Students may not plagiarize.** Plagiarism involves taking and using specific words, phrases, or ideas of others without proper acknowledgement of the sources. Students may not:
   a. Submit material copied from a published or unpublished source.
   b. Submit material that is not cited appropriately.
   c. Use another person's unpublished work or examination material.
   d. Allow or pay another party to prepare or write an assignment.
   e. Purchase, acquire, or use a pre-written assignment for credit.
   f. Use generative artificial intelligence to complete or write assignments or exams, partially or fully, without prior permission of the instructor.
2. **Students may not submit the same work for credit for more than one assignment (known as self-plagiarism).** If a student plans to submit work with similar or overlapping content two or more times for any purpose, the student should consult with all instructors prior to submission of the work to make certain that such submission will not violate this standard.
3. **Students may not fabricate data.** All experimental data, observations, interviews, statistical surveys, and other information collected and reported as part of academic work must be authentic. Any alteration, e.g., the removal of statistical outliers, must be clearly documented. Data including medical records or other documents to petition for excused absences or extensions of deadlines must not be falsified in any way.
4. **Students may not collude.**
   a. Students may not work with others on any exam, assignment or portion of an assignment without permission from the instructor.
   b. Students' work with one another on an exam or assignments may not exceed the terms of their instructors' directions for collaboration as part of the assignment.
   c. Students may not use work submitted by another student in a previous semester of a course.
   d. Any other action that, by omission or commission, compromises the integrity of the academic evaluation process.
5. Students may not cheat.
   a. Students may not obtain, distribute, or communicate examination materials prior to the scheduled examination without the consent of the instructor.
   b. Students may not take an examination by proxy.
   c. Students may not attempt to change answers after an examination or an assignment has been submitted.
   d. Students may not falsify medical or other documents for any reason.
   e. Students may not use unauthorized study aids in an exam. Examples include, but are not limited to:
      - Bringing notes into an exam that does not allow outside materials.
      - Programming equations into a calculator when the instructor has indicated that students are to be tested on the recall of those same equations.
      - Using any electronic device that allows students to look up, translate, calculate, or communicate information with someone else.

Process

1. Instructors will gather the appropriate information and documentation when they suspect an instance of academic misconduct has occurred. The standard of evidence required for an instructor to determine responsibility is known as a "preponderance of the evidence." This means the instructor must determine that it is more likely than not that an alleged violation occurred based on the totality of available evidence.
2. If instructors conclude an instance of academic misconduct has occurred, then they will determine the sanction as it relates to the course.

3. Instructors will notify the student of their findings and sanction. Instructors should allow the student an opportunity to respond before reporting the incident.
4. If after talking with the student or the student fails to respond to the instructor's outreach within two business days and instructors have determined that academic misconduct has occurred, instructors will then report the instance of academic misconduct, including supporting documentation, to the Program Track Director and the Assistant Dean for Graduate Clinical.
5. The case is reported through the Academic Misconduct Report form. This form is the only approved process to submit such a request.
6. The Executive Associate Dean for Academic Affairs for the MNSON will notify the student that the instance of academic misconduct has been reported and the final sanction will be included in the notification.
7. **All of the cases of academic misconduct and academic appeals are managed through Maxient (the University system for these cases) and are part of the student's academic record.** The academic record is not a transcript; this academic record is maintained by the Office of the Dean of Students for a period of seven years from the date of the incident with the exception of cases resulting in University Expulsion (such files are retained indefinitely).

Sanctions

An instructor is responsible for determining the sanctions for academic misconduct in the course sections they teach. Sanctions are assigned on a case-by-case basis while considering precedent and the following standards below. The Assistant Dean for Graduate Clinical may add to or elevate the initial sanctions assigned by the instructor based on the student's prior academic misconduct history:

- the context and seriousness of the violation
- the student's demonstrated commitment not to engage in the same behavior in the future;
- and sanctions that appropriately foster accountability for one's behavior and prevent recurrence of similar behaviors.

Below is a list of commonly assigned sanctions and instructors may choose from this entire list:

1. Educational Experiences or Projects allow students to reflect upon their conduct and how their action harmed themselves, others, and the community; and/or to explore why such conduct is unacceptable. Examples include but are not limited to:
   a. Attendance and participation at a required meeting, workshop, special project, or other initiative.
   b. Completing an online tutorial focused on academic integrity.
   c. A written reflection about a specific topic or issue.
   d. Resubmission of the assignment or exam for partial credit.
   e. A required meeting with the appropriate dean to discuss the misconduct and the consequences.
   f. Completing restorative service hours and/or a Values Workshop.
2. Failing Grade on the assignment: A letter grade of F or zero points will be issued for the assignment or examination.
3. Failing Grade in a course: A letter grade of F will be issued for the course.
4. University Suspension or Expulsion. The MNSON Dean may recommend suspension from the University for a period of time, or expulsion from the University, depending on the severity of the misconduct.

Academic Probation

Probation is an academic status whereby the student is notified of not being in compliance with academic standards. Students who have been admitted to the program on strict academic probation receive specific instructions regarding coursework and required grades in the letter of admission.

All students must have a cumulative GPA of 3.0 or better in order to graduate. If a student's cumulative GPA drops below 3.0 at any time during the program of studies, the student is placed on academic probation. In that case, the student is expected to raise her/his/their GPA to the required level of3.0 or higher in the next two consecutive terms in which he/she/they is registered for classes or upon completion of nine semester hours, whichever comes first. A student may be placed on academic probation only once. The student will be dismissed if the GPA drops below 3.0 a second time. Additionally, students on academic probation may not enroll in a clinical course.

Academic Standards

Each student is required to abide by Loyola University Chicago policies as well as MNSON policies. LUC policies may be found in the university catalog. Marcella Niehoff School of Nursing: Loyola University Chicago Academic Course Catalog.

Grading System

The grading scale for nursing courses in the DNP program in the MNSON is as follows:

Grade	Grade Points
A	94-100
A-	92-93
B+	89-91
B	86-88
B-	84-85
C+	80-83
C	77-79
C-	75-76
D+	72-74
D	69-71
F	68 and below
WE	Withdrawal/Emergency
W	Withdrawal
I	Incomplete
P	Pass
NP	No Pass
NR	Registered Never Attended

The grading standard for each course is published in the course syllabus, provided to students at the beginning of the academic semester. Students are expected to maintain a cumulative grade point average of not less than (3.0 GPA). No grades of D or F are counted as fulfilling program requirements.

These grades, however, will be calculated in the grade point average. If a student earns a grade of D or F in a required course, that course must be repeated. No student is permitted to graduate from the DNP program with lower than a 3.0 cumulative GPA. DNP students must successfully complete the DNP Project for the degree to be conferred. Information specific to the DNP Project can be found in the DNP Project Handbook.

Quizzes, Exams and Assignments

Below are general policies related to quizzes, exams and assignments. Specific course policies are detailed in course syllabi.

1. Exams and quizzes must be taken on the day scheduled. If illness or other serious circumstance arises, the faculty is to be notified via email or voicemail before the exam or quiz begins.
2. Assignments are due on the date specified unless an extension is negotiated with the course instructor prior to the due date.
3. Faculty will determine the consequence of late or missing assignments.
4. Faculty will notify students of specific exam policies for each class.

Use of Generative AI Tools

Students may not use generative artificial intelligence tools (such as ChatGPT or similar platforms) to complete or assist with assignments, quizzes, or exams unless explicitly permitted by the instructor. This includes, but is not limited to, using AI to generate or revise any portion of a discussion post, paper, quiz, exam, or project.

The use of AI tools without permission is a violation of the Loyola University Chicago (LUC) and Marcella Niehoff School of Nursing (MNSON) academic integrity policies. According to these policies, using generative AI to produce academic work constitutes a form of plagiarism and will be treated as such. Examples of violations include (but are not limited to):

- Submitting work that was partially or fully written by an AI tool.
- Using AI to generate exam or quiz responses.
- Having AI revise or rewrite your work for submission.
- Falsification of reported clinical hours.

Using AI without citation in any work where its use has been approved.

Consequences

Violations of this policy will be addressed as academic misconduct. Consequences may include:

- A failing grade on the assignment.
- A failing grade in the course.
- Referral to the Academic Integrity Review process for further disciplinary action.

Students who are uncertain whether a specific tool or resource (including generative AI, tutoring platforms, or editing software) are appropriate for an assignment are responsible for consulting the instructor before proceeding. Misuse may result in a violation of academic integrity policies.

Final Examinations

Final examinations are given during the scheduled final examination period in each session. The student is expected to take their exams as scheduled; students are expected to be available for final exams through the last day of the final exam schedule. The student who is unable to attend a final examination because of illness or other serious circumstances must contact their instructor prior to the exam. Alternative arrangements to complete a final exam will not be granted for personal or leisure travel plans.

B- Grades

Students must maintain an overall GPA of 3.0 to remain in good standing.

Each program track has identified the following courses as covering essential material and students must receive a B- grade or higher in order to continue in the program. If a student receives lower than a B- grade in any of the following courses, the course must be repeated. Furthermore, if a student repeats the course and earns a grade lower than B-, the student will be dismissed from that program.

If a student withdraws from a course and later earns a grade below B- when repeating it, only one additional attempt is permitted.

DNP APRN Program tracks

Courses Requiring a B- or Better for all Students

- Advanced Health Assessment
- Psychiatric Mental Health Assessment Across the Lifespan
- Advanced Pharmacology
- Psychopharmacology
- Advanced Physiology/Pathophysiology
- DNP Project courses

Incomplete Grade

Students are expected to complete course assignments by the final date of the semester. However, extenuating circumstances may require that students request an extension in the form of a grade of Incomplete ("I"). Students are encouraged to avoid the use of "I" grades if at all possible. The student must submit a written request for an "I" to the course professor prior to the end of the semester in which the class is being taken; this form must be signed by both parties (see Form in Sakai site "Information for DNP Students"). Approval of this request is at the discretion of the instructor. If approved, the student will receive a temporary grade of "I" for the course. Students who are on Academic Probation may not request a temporary mark of incomplete in any course for the term in which they are on Academic Probation.

Unless the "I" has been negotiated prior to the end of the course, the professor will assign a grade based on the course work completed by the last day of class. The negotiation for the "I" grade must include the length of time in which the outstanding work will be done. The completion date, as negotiated, is considered a contract. If the student does not fulfill the contract, a grade of "F" will be recorded on her/his/their transcript. The maximum time to clear the "I" is one semester, excluding the summer semester. If the course for which the student is requesting a grade of "I" is a prerequisite for another course, the student may not register for the succeeding course until the "I" is replaced with an evaluative grade. If a student has two or more "I" grades, progression to the next semester must be negotiated with the Assistant Dean of Graduate Clinical Programs.

Graduate Student Improvement Plan

The Graduate Student Improvement Plan (GSIP) is designed to provide a structured action plan when a student is not meeting didactic or clinical course outcomes, or overall program expectations. It can also be used to outline a course completion plan before granting an incomplete grade. To ensure timely support, it is recommended that the plan be submitted as early as possible in the semester, allowing the school to

be more proactive in assisting the student. The GSIP may be initiated by either the faculty or the Program Track Director but should not be used for academic integrity violations. For guidance on academic integrity matters, please refer to the MSN/Certificate & DNP student handbooks.

Procedure

If initiated by the faculty, the faculty member meets with the student to provide feedback on their academic performance. With the faculty's guidance, the student completes the GSIP and submits it to the Program Track Director for review and recommendation.

- The GSIP must clearly identify the area(s) for improvement.
- The GSIP must identify specific, measurable, achievable, relevant, and time-bound goals that the student is expected to achieve.
- The GSIP must outline a plan for success, including specific strategies and resources that will be used to achieve academic goals.

After the Program Track Director reviews the GSIP, it is discussed with the student and the initiating faculty. Once finalized, both the faculty member and the student sign the form. The signed form is then sent to the Program Track Director for their signature, and the final signed copy is forwarded to the Assistant Dean of Graduate Clinical Programs.

Assessment

At the end of the time period specified in the GSIP, the initiating faculty will assess whether the terms outlined in the plan have been met:

- If the terms have been resolved, the faculty will document the resolution and any supporting information on the GSIP.
- If the terms have not been resolved, the faculty will record this on the GSIP form. The faculty may also choose to modify the GSIP, noting the date and reasons for any changes.

Once the terms outlined in the GSIP are resolved, both faculty and student sign it. The signed document is then forwarded to the Program Track Director for review and signature. Afterward, the final signed copy is sent to the Assistant Dean of Graduate Clinical Programs and is kept on file until the student either completes their program or is no longer enrolled.

If the Program Track Director initiates the GSIP, they meet with the student to provide feedback on their overall academic performance. With the Program Track Director's guidance, the student completes the GSIP as outlined above. Once finalized, both the Program Track Director and the student sign the form. The signed GSIP is then forwarded to the Assistant Dean of Graduate Clinical Programs. The Program Track Director is also responsible for the final assessment of the GSIP as outlined above.

Progression Guidelines

Students must meet admission requirements and maintain active RN licensure. Upon admission, progression in coursework for DNP degree should be completed in 5 years.

Progression Requirements

DNP Program Track

To progress in the DNP program track, students must:

- Maintain a minimum cumulative GPA of 3.0
- Earn a minimum grade of "B-" in all didactic courses in their program plan
- Earn a passing grade in all clinical and lab courses
- Resolve any incomplete grade (I) in accordance with LUC policy

Continuous Registration - DNP program track

All students are required to register for courses throughout the calendar year (Fall, Spring, and Summer terms) until all degree requirements are met, unless they have received an approved leave of absence or are unable to take courses in accordance with their program track.

Registration

Registration is completed through LOCUS (https://locus.luc.edu) (Loyola's Online Connection to University Services). LOCUS is a web-based, self-service system that enables students to access information and services online. Students consult LOCUS for class offerings by semester.

DNP Program Pre-requisite Course Requirements

Certain courses within the nursing major have pre-requisite requirements and these requirements must be taken into consideration as part of the overall academic planning process.

Academic Support

Academic Advising

The role of academic advising is to support students in their academic endeavors, in making informed and responsible decisions, and in setting and achieving short- and long-term goals. Advisors provide counsel and resources to students on a variety of topics, including:

- A course of study plan at Loyola, and deciding what courses to take in the upcoming semesters
- Degree requirements for all MNSON majors
- niversity policies and procedures and other important academic information
- University offices and resources
- Academic success strategies
- Registration concerns and LOCUS help
- Graduation Audits
- Transfer credit
- Academic performance
- Academic probation and dismissal
- Incomplete grades
- Dropping a class

Upon admission, all students are assigned a Program Track Director with whom they are to consult for the duration of the program. The student confers with their Program Track Director to create a program plan, using the LOCUS Planner, for completion of required course work. Changes in the program plan must be negotiated with and approved by the student's Program Track Director; revisions are entered into the LOCUS Planner. Each DNP Program Track Director serves as their students' Academic Advisor. Students should not adjust or change their program plans directly.

Role of the Program Track Director

- The primary responsibility of the Program Track Director is to provide direct oversight of the educational components included in the student's completion of the DNP program.
- Following admission to the program, a program plan is created for each student, using the LOCUS Planner. Program plan changes are made in concert with the Program Track Director. Students are not

permitted to make program plan changes without the Program Track Director's approval.

- The Program Track Director monitors the academic progress of the student through the program and is available to the student for guidance as needed.
- The Program Track Director assists the student who encounters problems that interfere with successful progression in the academic program and makes appropriate decisions that will facilitate academic progression. This may include recommending a LOA, reducing course load, etc.
- The Program Track Director determines the student's progression in the program and course sequencing.

Role of the DNP Student

- The student is responsible for contacting her/his/their Program Track Director to make any needed changes in her/his/their program of study.
- The student is responsible for notifying the Program Track Director when he/she/they:
  - Requests and then completes a grade of Incomplete.
  - Needs to change the program plan of study.
  - Needs to withdraw from or add a course in the current semester.
  - Needs to request a leave of absence (LOA).

Office of the Dean of Students (ODOS)

The Office of the Dean of Students (ODOS) serves as a central hub for student support, providing resources, guidance, and advocacy to foster student success and well-being. ODOS helps students navigate academic and personal challenges, empowering them to build self-awareness, accountability, and a sense of responsibility to themselves and others.

The office is made up of two collaborative teams that support students in different but complementary ways:

- The Student Rights, Responsibilities, and Conflict Resolution (SRCR) Team supports students in upholding community standards and are seeking guidance and resources related to conflict resolution and alleged violations of LUC's Community Standards.
- The Student Outreach and Support (SOS) Team assists students facing personal, emotional, or academic difficulties by connecting them to appropriate support services. More information is available here (https://www.luc.edu/deanofstudents/).

Access to Records/Federal Educational Rights and Privacy Act of 1974, as amended (FERPA)

In accord with the FERPA, students are allowed access to their records, files, and other data directly related to them. To obtain access, a written request must be submitted to the Assistant Dean of Graduate Clinical Programs. Please allow a two-week interval after submission of the initial request for access to records. Records and files may not be removed from the Marcella Niehoff School of Nursing.

Advanced Standing (APRN Programs)

Advanced standing is not permitted in APRN programs. All students must complete the prescribed curriculum in its entirety, regardless of prior coursework or certification. This ensures consistency in competency development, equity across learners, and compliance with AACN Essentials (2021), NONPF competencies, and NACNS spheres of impact.

Attendance

Although most coursework is on-line, attendance is required at all synchronous sessions, clinical learning experiences and Immersion sessions.

Clinical Experience Preparation

Clinical Affiliation Agreements

An executed Clinical Affiliation agreement between Loyola University Chicago and the clinical agency is a requirement of every student's clinical practicum placement. In consultation with their Program Track Director, students may seek a clinical preceptor who is employed by a site not currently affiliated with Loyola University Chicago. In these cases, students complete the form titled "Information Worksheet for New Clinical Preceptors and Sites" which can be found in the Sakai site "Information for DNP Students". Because this process can take a considerable amount of time, students must submit this completed form to their respective Program Track Director at least 6 months prior to the clinical rotation.

The MNSON is committed to fostering a safe learning environment for our students and protecting the health and well-being of patients, families and health care staff. All nursing students are required to submit documentation of compliance with the clinical requirements by the specified deadline and prior to the start of clinical experiences. Qualified First© is the platform used to track and manage immunizations and other clinical requirements. Detailed instructions are provided in the Info for DNP Students Sakai Site and an orientation program scheduled before clinical practicum coursework is started. Clinical agencies require verification that the student has met all health and pre-clinical screening requirements. Failure to comply with these requirements by the specified dates will result in a delayed clinical start and disruption to the student's program progression. The MNSON Clinical Placement (songradclinical@luc.edu) informs students of all requirements and expected dates of completion.

Health Requirements

The student must be in compliance with all health requirements for the entirety of their academic experience. The MNSON updates immunization requirements as indicated by the Center for Disease Control (CDC) and our affiliating agencies. The student will be informed of any changes that take place during their program. Documentation of these requirements must be uploaded to Qualified First.

Requirements include the following:

1. Physical Examination
   1. Submit documentation of a physical examination by your health care provider
   2. Physical examination must be within the last 12 months from the start of your first clinical experience
2. Measles, Mumps & Rubella (MMR)
   1. Submit positive antibody titers for all three components (Measles, Mumps, and Rubella)
   2. If any of the titers are negative or equivocal, a series of immunizations, and a repeat titer, are required

3. If the second titer is negative or equivocal, contact the School of Nursing for next steps

3. Varicella (Chicken Pox)
    1. Submit a positive antibody titer
    2. If the titer is negative or equivocal, the Varicella series of immunizations, and a repeat titer, are required
    3. If the second titer is negative or equivocal, contact the School of Nursing for next steps
4. Hepatitis B
    1. Submit a positive antibody titer – the correct titer to obtain is the Hepatitis B Surface Antibody (anti-HBs)
    2. If the titer is negative or equivocal, the Hepatitis B series of immunizations, and a repeat titer, are required
    3. If the titer is negative or equivocal, the Hepatitis B series of immunizations is repeated, and then the titer is also repeated.
    4. If the second titer is negative or equivocal, contact the School of Nursing for next steps.
5. Tuberculosis (TB)
    1. There must be documentation of one of the following:
    2. QuantiFERON Gold Blood Test (lab report required and must be uploaded to Qualified First)
    3. If positive results, provide a clear Chest X-Ray (documentation of results are required and must be uploaded to Qualified First©) AND additional follow-up with School of Nursing
        1. 1-step TB test annually
    4. Tetanus, Diphtheria, and Pertussis (Tdap)
    5. Submit documentation of a Tdap booster within the past 10 years.
    6. International students MUST have a series of three tetanus injections. One injection must be within 10 years. First and second injections must be at least 28 days apart AND the second and third injections must be at least six months apart.
6. Influenza (Flu Vaccine)
    1. Submit documentation of annual vaccination against influenza
    2. Flu vaccination should be obtained soon after it becomes available (generally around September), by October.
7. Immunization information must include the lot number and the location where the immunization was administered. Please check Qualified First® for due dates
8. COVID-19 Vaccination
    1. Submit documentation of your COVID-19 vaccination(s). If you are receiving the two-dose series, BOTH vaccines must be submitted at the same time for approval
9. N-95 Fit-Testing
    1. Submit documentation of annual N95 fit-testing to Qualified First

Students are responsible for ongoing monitoring of due dates and renewal dates in their Qualified First® account. Failure to meet these due dates, or renewal dates, means the student is out of compliance, and subject to removal from any scheduled clinical learning experiences. Any removal from a clinical learning experience due to not being in compliance, places the student at risk for not meeting the outcomes of the course, inability to complete the required hours of clinical resulting in unsuccessful grade and may warrant the initiation of a Graduate Student Improvement Plan.

Criminal Background Check

Clinical agencies require that the student complete a criminal background check prior to clinical placement. The student is required to complete a background check through the vendor used by the MNSON.

1. The Criminal Background Check must be deemed acceptable in order to progress in nursing courses and in accordance with agency policies for clinical placement.
2. The student may be required by MNSON administration or their assigned clinical learning site to complete additional criminal background checks or urine drug screens.
3. The student will be responsible for fees incurred with additional screening.

Ten Panel Urine Drug Screen

The MNSON is obligated to comply with the Loyola University Chicago Alcohol and Other Drugs Policy, as well as all federal and state laws and regulations dealing with usage and detection of drugs. Loyola will not permit the possession or use of marijuana at educational or other activities sponsored, conducted, or authorized by Loyola or its student organizations.

A number of states, including Illinois, have passed laws that make the use of marijuana for some medical conditions and recreational use legitimate under the law of that state. However, the possession or use of marijuana remains an offense under the Controlled Substances Act, a federal law.

Clinical agencies affiliated with the MNSON also have drug and substance use policies and require that nursing students comply with their drug testing policies. The drug testing policies and procedures of the hospital, clinic, nursing home, or facility will be followed while students are engaged in clinical activities as part of the program of study at LUC. Clinical agencies have the right to refuse any student for clinical placement based on concerns about that student's ability to deliver safe practice.

Procedures

All nursing students will undergo a Ten Panel Urine Drug Screen for the following substances:

1. Amphetamine/methamphetamine
2. Barbiturates
3. Benzodiazepines
4. Cocaine metabolite (BZE)
5. Codeine/Morphine
6. Marijuana Metabolite (THCA)
7. Marijuana Metabolite Quant.
8. Methadone
9. Phencyclidine
10. Propoxyphene

Types of Drug Testing

Requirement for Clinical Placement: The MNSON requires that the student complete a ten-panel urine drug screen prior to clinical placement. Safety in the delivery of care to patient/client populations is the basis for drug testing.

- **Retesting:** Retesting may be required if a clinical site requires a more recent test than is provided for by the MNSON policy.
- **Reasonable suspicion:** Any nursing student participating in clinical practice is subject to drug testing upon request if there

is reasonable cause to believe that the student may be using illegal drugs, misusing legal drugs, or misusing alcohol products. Circumstances which constitute reasonable cause, include but are not limited to: notification from OSSCR of any report that includes possession, use transfer, distribution, manufacture, or sale of illicit drugs: physiological signs of possible impairment from drugs. More information can be found here (https://www.luc.edu/osccr/communitystandards/alcoholdrugsandsmoking/).

- **Follow-up Testing:** Any student testing positive may be subject to repeated follow-up testing.

Negative Test Result

A negative result requires no further screens, and the student may participate in their clinical activities.

A test result of "dilute negative" is not acceptable and will require retesting at the student's expense. The student will not be cleared to attend clinical as long as their drug screen result is dilute negative.

Positive Test Result

If the student's drug screen is positive, they are not able to participate in a clinical placement until further documentation is provided and processed by the Medical Review Officer (MRO) of the drug screening vendor. If the MRO does not clear the result, the results may be acted upon by the MNSON and the LUC. A dilute positive drug screen result will be treated as if the test result is positive.

Refusal to Test

If a student fails to produce the requested sample by the date and time designated, the student will be treated as if the test result was positive.

Medical Review Process

The MNSON recognizes that some substances are used for legitimate medical purposes and the following procedures will be followed:

- Once the drug screen result is posted, any positive drug screen result will be referred to the Medical Review Officer (MRO) of the drug screening vendor. MNSON will be notified that there will be a delay of 3-5 days until the drug screen result
- The MRO will contact the student to conduct an interview
- Documentation from the student's health care provider will be required to show proof that a prescribed medication/drug (a copy of the prescription or verification from the healthcare provider that they are taking the medication/drug under supervision) lead to a positive drug screen, the MRO will note the outcome of the review.

Documentation Requirements

1. CPR Certification: Documentation of Healthcare Provider BLS Certification with skills check off completed through an American Heart Association Healthcare Provider course must be uploaded to Qualified First©.
2. Health Insurance Certification: Documentation of current health insurance plan (copy of both sides of health insurance card) or the Health Insurance Certification School form must be uploaded to Qualified First©. The student is responsible for updating any insurance information changes to Qualified First© within 30 days of the change.

Clinical Agency-Specific Requirements

Clinical agency-specific requirements are communicated to students by MNSON clinical placement coordinators. The student is responsible for completing all agency-specific requirements prior to the start of the clinical experience by the specified dates. Students who fail to complete the requirements by the specified dates will not be allowed to participate in clinical which may jeopardize their progression in the program.

Clinical Placement

Clinical placements are a critical component of advanced nursing education and are arranged within the greater Chicago area through long-standing partnerships with our clinical sites. These placements are not negotiable and are assigned based on availability, preceptor capacity, and program requirements. When a placement is assigned, students are expected to complete it as part of their professional and academic commitment. Travel is expected and refusals based on commuting distance or scheduling inconvenience will not be accommodated. Competition for clinical sites is increasing, and we do not have the resources to secure alternative placements for students who decline what has been offered.

Graduate education, particularly at the doctoral level—requires a high level of flexibility, accountability, and professionalism. Students must be prepared to balance personal and academic responsibilities and engage fully in all aspects of the program. This includes honoring the time and schedules of clinical preceptors, whose mentorship is essential.

New preceptor referrals are welcomed and coordinated through the School of Nursing Graduate Clinical Team (SONGradClinical@luc.edu). Please do note that adequate time is needed to secure necessary paperwork for new sites and preceptors. Students must be prepared to balance personal and academic responsibilities and engage fully in all aspects of the program, even when they are unfamiliar or inconvenient. This includes honoring the time and schedules of clinical preceptors, whose mentorship is essential to your professional development.

Logging of clinical hours including required demographics, diagnoses and procedures needs to occur in a timely manner and is recommended to occur weekly per student. For NP tracks, a minimum entry of 1 patient per hour is required. The software utilized (typhon) does have a 30–day lock in place. Therefore, if cases are not entered within 30 days of completion, the cases will be unable to be entered. Completion of required hours and required data fields will need to reflect the required hours to receive a passing grade for clinical content.

Clinical Transportation

The student is responsible for arranging their own transportation to clinical sites. The student should make transportation plans as soon as they are notified of their clinical placement. The student is encouraged to plan accordingly for their transportation in order to be on time for clinical experiences.

Dress Code

The student's personal appearance may have a significant impact on the safety, infection control, and comfort of patients, families, and other staff. For this reason, appropriate attire and appearance in all clinical, lab, and simulation areas is the standard. Ethnicity, national origin, and cultural traditions will be considered and reviewed when patient or student safety is not at risk. Professional clean tailored clothing free of images or graphics is expected at all times while in clinical. Students are to wear a labcoat with Loyola patch over their professional clothing while in clinical setting.

1. All students are required to be clean, well-groomed, and wear a Loyola photo identification badge above the waist with their picture clearly visible.
2. A Loyola University Health Sciences Campus (HSC) ID badge is required for all students seeking access to the Health Sciences Campus. This can be obtained from the Parking Office, located on the first floor of the Mulcahy Building. Students interested in using the facilities at the LUC Lake Shore and/or Water Tower campuses may want to obtain a LUC ID. The LUC ID is a different card and ID number than the HDS ID. Students can obtain this ID from the Campus Card Office.
3. Hair must be kept off face, above collar or pulled back. Beard and mustaches must be neatly groomed. In restricted and semi-restricted areas any facial and head hair must be covered.
4. Fragrances (cologne/perfume/lotions) should be subtle. All students and employees should be sensitive and respectful of the fact that some individuals are allergic to and/or have sensitivity to fragrances. Therefore, if someone brings to an individual's attention that a fragrance they are wearing is problematic, they should refrain from wearing it.
5. Piercings should be kept to a minimum. While providing direct patient care, earrings should be limited to studs. Some departments may be more restrictive based on patient safety and infection control requirements.
6. Fingernails should be trimmed, clean and neat, and should not interfere with skill performance. While providing direct patient care, students are prohibited from wearing artificial nails, including acrylic, silk wraps, nail tips, or nail decorations. If polish is worn, clear nail polish that is not chipped or visibly worn is permitted in order to inspect nails for infection related concerns.
7. Tattoos should be covered by clothing wherever possible. It is up to the Clinical Faculty and Clinical site if there are situations where the number and visibility of tattoos are inappropriate for the setting. In no event may obscene, inflammatory, discriminatory, or other similarly inappropriate tattoos be exhibited on campus or at a clinical site.

Uniform Guidelines

Recognizing that graduate students in our program serve as role models to staff nurses, undergraduate students, and represent the School of Nursing and the University, professional clothing and behavior is expected at all times.

Uniform guidelines for clinical experiences are as follows:

- Loyola student ID and Agency-Required ID, if applicable
- White lab coat with MNSON insignia patch on the upper left arm sleeve
- Shoes should be clean, well-polished, in good repair, and dedicated to work setting

Communication Systems

Loyola's Universal ID (UVID)

Loyola's Universal ID (UVID) is the primary means of authentication and identification throughout the University. The UVID provides access to most of Loyola's resources. This includes, but is not limited to, LOCUS, Sakai, Microsoft Outlook email, Lawson, Kronos, campus wireless access and campus networked computers.

Students receive a student logon ID and password from the Graduate Enrollment Management office following admission to the Master's and certificate programs. This ID is necessary to register for courses in LOCUS, access student email, and log-in to Sakai. Students encountering problems with registration involving logon should contact the HelpDesk (ITSServiceDesk@luc.edu) at 773-508-7190.

Loyola's Online Connection to University Services (LOCUS)

LOCUS is an integrated, web-based student information system that provides information access 24 hours a day. LOCUS allows the student to view course descriptions, enroll in courses, view and process financial aid information, change addresses and phone numbers, and request official transcripts. More information can be found here (https://locus.luc.edu/).

LUC Learning System – SAKAI

The learning management system, SAKAI, provides the student with all course information including the syllabus, course documents, calendar, assignments, grades, and at times, lectures. SAKAI can be accessed online from the LUC homepage. The student can access SAKAI for each course once they have registered through LOCUS. The Loyola University Chicago UVID and password must be used to access web-based course information.

Email Policy

The MNSON will only send e-mails to the student's LUC e-mail account. The student is responsible for checking their LUC accounts daily for important course, clinical and MNSON information and announcements. If the student chooses to forward their LUC e-mail to another account, they may go to this site (https://www.luc.edu/its/services/microsoft365/) to learn about this process.

Communication within the Program

All faculty and staff email communication with students is conducted via the Loyola University Chicago email account; students are responsible for consistently checking email throughout the program. To re-route Loyola email, students set a preferred email address using the LUC Password Self-Service tool.

Community Standards

Each student of Loyola University Chicago is expected to uphold the Community Standards (Loyola's Student Code of Conduct). Students have the responsibility to familiarize themselves with Community Standards, which provide a simple baseline for acceptable student conduct. Commonly referenced policies include, but are not limited to: a) alcohol, drugs, and smoking, b) identification policies, c) physical or emotional harm. For a complete list of policies, please refer to the Loyola Community Standards. More information can be found on the Student Rights, Responsibilities and Conflict Resolution site here (https://www.luc.edu/deanofstudents/communitystandards/).

Course Evaluations

At the end of every semester, students are provided with the opportunity, entrusted with responsibility, and strongly encouraged to evaluate each course and each faculty member. Students are informed of the evaluation procedure before the end of the semester. These evaluations provide the program with information/feedback that is essential in enhancing course learning.

CURA Network

CURA Network is a centralized website for reporting student concerns, led by the Office of the Dean of Students (DOS). The CURA Network

provides support, coordination, case management, and resource referrals for student concerns across the university. Behavioral, academic, personal, equity, Title IX, student conduct, conflict resolution, and general student concerns can be reported using this one website location. More information is available here (https://www.luc.edu/cura/).

1. Coordinated Assistance & Resource Education (CARE) - CARE is a part of the CURA Network that is designed to assist and support students through challenging times. Examples include students experiencing serious personal difficulties, struggling with general mental health concerns, or managing economic hardships. When a student requests CARE services, or is referred for CARE services, they are given an opportunity to work with a member of the Office of the Dean of Students staff to gain awareness of, or access to, various resources, engage in dialogue about solutions, and ultimately gain support to assist with navigating difficult or challenging situations. More information is available here (https://www.luc.edu/cura/about/coordinatedassistanceresourceeducationcare/).
2. Office of Equity and Compliance (OEC) - The OEC promotes a culture of inclusion, safety, and accessibility at Loyola by implementing equitable and person-centered policies, coordinating impartial and reliable investigations, and providing relevant and practical training. The OEC is comprised of the Executive Director for Equity & Compliance (Title IX Coordinator), three Deputy Title IX Coordinators, and a Paralegal/Case Management Specialist. The Deputy Title IX Coordinators serve as full-time, professional Equity Investigators who contribute to all aspects of the office's operations. The work of the OEC is also supported University-wide by several key partners, including but not limited to the Office of the Dean of Students, the Wellness Center, Campus Safety, Human Resources, and the Office of the Provost. More information is available here (https://www.luc.edu/equity/about/).
3. Student Academic Services (SAS) SAS provides students with opportunities for learning, growth, and reflection. SAS helps students learn about themselves and fundamentally evolve in the way they perceive, think and act in our global society, becoming driven toward action that leads to more just communities. More information is available here (https://www.luc.edu/sas/).

Dismissal for Academic Reasons

Dismissal is removal from MNSON and possibly LUC according to their respective policies.
A student may be dismissed from the DNP program for any of the following:

1. Earning a grade below B- in the same required course twice.
2. Earning a grade below B- in two separate required APRN core, project or practicum courses.
3. Failure to raise cumulative GPA to ≥ 3.0 following a probationary semester.
4. Failure to meet clinical/professional standards of safe practice, integrity, or ethical conduct.
5. Failure to comply with health, licensure, or compliance requirements for clinical placement.
6. Violations of academic integrity or professional behavior policies.

Dismissal may be recommended by the Program Track Director and approved by the Assistant Dean for Graduate Clinical Programs.

Degree Conferral and Graduation

The conferral of the DNP degree occurs after an audit confirms that the student has completed all program plan requirements. This includes completing DNP coursework with acceptable grades, within the required time limit and completing an approved DNP project accepted by DNP project committee.

The DNP degree is conferred following the date specified by Loyola University Chicago and is noted on the student's official transcript. The process of DNP degree conferral is separate from the application for, and participation in, the Loyola University Chicago commencement ceremony. Prior to the date of DNP conferral notated on student transcript, a student cannot claim the DNP credential. Additionally, MNSON does not endorse the use of (c) at any time during program matriculation [e.g.DNP (c)] to represent candidacy for the degree.

All students must apply for degree conferral in LOCUS, regardless of the semester in which they complete the program, or their intent to participate in the commencement ceremony. Deadlines for graduation application are posted on the Loyola University Chicago website. If a student applies for graduation but does not complete the degree requirements by the end of the intended graduation semester, the student must submit a new graduation application. The Loyola University Chicago commencement ceremony is held once each year, in May, at the Lake Shore Campus. Students receive an invitation to participate in the commencement ceremony.

Checklist for Program Completion and Graduation

In the semester prior to the one in which the last course is being taken, student is to meet with their Program Track Director to ensure that all course requirements have been met and that all "I" grades have been removed.

Deferred Matriculation

Admitted students may request deferral for one year. If the student does not enroll after one year, the student must reapply to the program. If approval is granted, the student will enter the DNP program under the program requirements for the term of matriculation, rather than the initial term of acceptance.

Formal Complaint Policy by Student

A formal complaint is defined by Loyola University Chicago's (the "University") Marcella Niehoff School of Nursing (the "MNSON") as any substantive complaint or concern, put forth in writing, by a student which requires a response from the administration of the MNSON.

Formal complaints may originate within the MNSON, or through a mechanism external to the MNSON, such as a University grievance process or the EthicsLine Reporting Hotline at 855.603.6988.

The MNSON adheres to all applicable University policies regarding the filing, review and resolution of formal complaints, as defined herein. The nature of the complaint dictates the review and resolution processes, as detailed further in this policy.

General Guidelines

- Student Complaints Related to Academic Issues.
  - Formal student complaints related to academic disputes involving the appropriateness of course grades and accusations of academic dishonesty are addressed through the MNSON's Academic Grievance and Appeals Process. Students enrolled

in degree programs housed in the Graduate School may also invoke the procedures under the MNSON Academic Grievance and Appeals Process to address disputes relating to dismissal from a program. Students enrolled in degree programs housed in the Graduate School whose disputes are related to course grades, accusations of academic dishonesty, or dismissal from a program, are not resolved after a hearing within the MNSON may continue the academic grievance process in accordance with the Graduate School's Academic Grievance Procedure (p. 2029).

- Formal student complaints relating to decisions affecting graduate academic standing or progress are addressed through the University's General Academic Appeals process.
- Formal student complaints relating to graduate changes of academic records or dismissal for poor scholarship are addressed through the University's Special Academic Appeals process.

- Student Complaints Related to Non-Academic Issues.
  - The University admits students without regard to their race, color, religion, sex, age, sexual orientation, gender identity, national or ethnic origin, ancestry, disability, marital status, parental status, military/veteran status, or any other characteristic protected by applicable law to all the rights, privileges, programs, and other activities generally accorded or made available to students at the school. The University does not discriminate on the basis of race, color, religion, sex, age, sexual orientation, gender identity, national or ethnic origin, ancestry, disability, marital status, parental status, military/veteran status, or any other characteristic protected by applicable law in the administration of its educational policies, admissions policies, scholarship and loan programs, and athletic and other school-administered programs, or in any aspects of its employment of faculty and staff. Students within the MNSON with questions about this policy or who believe they have been discriminated against because of their race, color, religion, sex, age, sexual orientation, gender identity, national or ethnic origin, ancestry, disability, marital status, parental status, military/veteran status, or any other characteristic protected by applicable law, may contact the EthicsLine Reporting Hotline at (855) 603-6988 or submit a report online (https://www.luc.edu/ethicsline/).
  - Inquiries about Title IX as implemented at Loyola may be directed internally to: Tim Love, Executive Director for Equity & Compliance and Title IX Coordinator for Equity & Compliance, who can be reached at (773) 508-7766 or via email (tlove@luc.edu).
  - Questions regarding Title VI of the Civil Rights Act of 1964 ("Title VI") may also be referred to Tobyn L. Friar, Interim Director of Financial Assistance, Sullivan Center, Suite 190, who can be reached at (773) 508-8636 or via email (tfriar@luc.edu), or the Department of Education's Office for Civil Rights.
  - Questions regarding Section 504 of the Rehabilitation Act of 1973 ("Section 504") may also be referred to Shawna Cooper-Gibson, Assistant Provost for Student Academic Services, Sullivan Center, Suite 255, who can be reached at (773) 508-7067 or via email (scoopergibson@luc.edu), or the Department of Education's Office for Civil Rights.
- Complaint Referral.
  - University administrators may refer certain formal complaints from MNSON students, including complaints made through the EthicsLine Reporting Hotline, to the MNSON Dean's office for appropriate action, including assistance in the investigation of a report. Where appropriate, the Dean will assign an administrator from the MNSON to assist in the investigation. Such assignments are made with consideration of the need for the investigation to proceed in an objective and non-biased manner.
- Complaints Received through the EthicsLine Reporting Hotline.
  - The EthicsLine Reporting Hotline exists as a means for University faculty, staff, students, administrators or other concerned parties to report activities that involve misconduct or violation of University policies. Reports may be made online (https://www.luc.edu/ethicsline/) or by dialing 855-603-6988.
  - As explained online (https://www.luc.edu/ethicsline/):
    - The University is committed to the highest ethical and professional standards of conduct as an integral part of its mission of expanding knowledge in the service of humanity through learning, justice and faith. To achieve this goal, the University relies on each community member's ethical behavior, honesty, integrity and good judgment. Each community member should demonstrate respect for the rights of others.
    - The University strongly encourages all faculty, staff, students, administrators or other concerned parties to use this Reporting Hotline to report suspected or wrongful acts of conduct by Loyola University Chicago community members. No University administrator, faculty, staff or student may interfere with the good faith reporting of suspected or actual wrongful conduct; no individual who makes such a good faith report shall be subject to retaliation, including harassment or any adverse employment, academic or educational consequence, as a result of making a report.
  - All reports to the EthicsLine Reporting Hotline are made available to specific individuals within the University on the University's EthicsLine Reporting Hotline Resource Team (the "Resource Team") who are charged with carefully reviewing and evaluating the report and assigning it to an appropriate case manager/investigator on the Resource Team, based on the type of alleged violation and location of the incident. The EthicsLine Reporting Hotline System does not create a new category of prohibited behavior or a new process for members of the University community to be disciplined or sanctioned. The Resource Team has no authority to discipline any student or member of the faculty or staff. When reported conduct is subject to existing University disciplinary or judicial procedures, appropriate referrals will be made by the Resource Team.
  - Reports submitted through the EthicsLine Reporting Hotline are handled as promptly and discreetly as possible, with facts made available only to those who need to investigate and resolve the matter. Individuals filing a report may follow-up online on the status of a report and to determine if further information is needed to proceed with an investigation.

Harassment (Bias Reporting)

It is unacceptable and a violation of university policy to harass, discriminate against or abuse any person because of his or her race, color, national origin, gender, sexual orientation, disability, religion, age or any other characteristic protected by applicable law. Such behavior threatens to destroy the environment of tolerance and mutual respect that must prevail for this university to fulfill its educational and health care mission. For this reason, every incident of harassment, discrimination or abuse undermines the aspirations and attacks the ideals of our community. The university qualifies these incidents as incidents of bias.

In order to uphold our mission of being Chicago's Jesuit Catholic University-- a diverse community seeking God in all things and working to expand knowledge in the service of humanity through learning, justice and faith, any incident(s) of bias must be reported and appropriately addressed. Therefore, the Bias Response (BR) Team was created to assist members of the Loyola University Chicago community in bringing incidents of bias to the attention of the university. If you believe you are subject to such bias, you should notify the Bias Response Team.

Funding and Financial Aid Information

Office of Student Financial Assistance

The Office of Student Financial Assistance houses resources and references about financial aid for students, at the Lake Shore and Water Tower campuses.

Office of Student Financial Assistance
773.508.7704
Email: lufinaid@luc.edu

In order to determine eligibility for financial assistance students must complete the Free Application for Federal Student Aid (FAFSA). If a student receives federal loans, they must be enrolled at least half- time. A graduate student must be enrolled in at least 4 graduate semester hours in the fall and spring semester and at least 2 semester hours in the summer semester to be considered half-time. Full-time enrollment is defined as 8 graduate semester hours in the fall and spring semester and 6 semester hours in the summer semester. However, when students enroll in clinical practicum courses, they are classified as full-time status.

Tuition and Fees

Information on current tuition and fees is available each semester on the Loyola University Chicago Bursar Office website. It is the student's responsibility to be aware of the University's policy on tuition and fees. For more information about the Office of the Bursar, visit their website (http://www.luc.edu/bursar/) or call 773.508.7705.

Tuition Term Payment Plans

The University offers students tuition payment plan options. Information about tuition payment options is available through the Bursar's Office (http://www.luc.edu/bursar/).

General Expectations of Professional Behavior of Marcella Niehoff School of Nursing Student

Professional conduct by the student facilitates learning opportunities and fosters a good working relationship between the MNSON and the clinical agencies. The student is expected to abide by the policies that are detailed in the syllabi for each clinical course as well as standards and guidelines of the institutions or agencies where they are assigned for clinical. The student is expected to demonstrate professional behaviors in attendance, punctuality, dress, demeanor, integrity, and ethical concerns.

Professional conduct by the student facilitates learning opportunities and fosters good working relationships within the MNSON and between the MNSON and clinical agencies or institutions. Complaints related to unprofessional behavior and conduct by students within the MNSON may originate from faculty, staff, other students, or from outside the University, such as a clinical site. Issues of unprofessional behavior or conduct that occur during a clinical learning experience will be addressed immediately as well as through the evaluation of student performance in the clinical course, as detailed in the course syllabus.

Complaints of unprofessional behavior or conduct within a classroom, simulation, or lab experience, or outside a clinical learning experience, are addressed through a formal complaint resolution process, as specified below.

1. The first attempt at resolution of the complaint should occur between the student and the other parties involved.
2. If the complaint of unprofessional behavior or conduct is not resolved among the parties involved, a formal complaint, in written form, is forwarded to the Program Director.
3. The Program Director reviews the complaint, any supporting documentation submitted by any of the parties, and meets with the parties involved individually. If the Program Director is directly involved in the complaint, the complaint instead is forwarded to the Assistant Dean of Graduate Clinical Programs.
4. If the complaint is not resolved at the level of the Program Director, the Program Director submits a recommendation for any action to be taken, along with any supporting documentation, to the Assistant Dean with jurisdiction over the degree program in which the student is enrolled.
5. The Assistant Dean, upon review of the recommendation, complaint and supporting documentation, meets with the parties to the complaint.
6. The Assistant Dean Graduate Clinical may dismiss the complaint or, upon finding that the student has engaged in unprofessional behavior and conduct, institute progressive corrective action with the student. Progressive corrective action typically begins with a verbal warning (documented) to the student, which details the nature of the complaint, corrective actions to be taken, and notifies the student that failure to correct the unprofessional behavior or conduct may result in more severe corrective action. The nature of the behavior dictates the severity of the action. The behavior may warrant immediate action beyond a verbal warning.
7. If the unprofessional behavior or conduct continues, the Assistant Dean may issue a written warning, which details the nature of the continuing concern related to unprofessional behavior or conduct, further corrective actions that are required, and notifies the student that failure to correct the unprofessional behavior or conduct may result in the student's withdrawal from a course or a recommendation for dismissal from the academic program. The decision to recommend a withdrawal or dismissal is based on the nature and severity of the unprofessional behavior.
8. If the unprofessional behavior or conduct continues, the Assistant Dean will either withdraw the student from a course or make a recommendation for dismissal from the academic program.
9. If the student is withdrawn from the course, the student will receive a W for the course depending on the time the decision is made.
10. In the event that unprofessional behavior or conduct continues following verbal and written warnings, the Assistant Dean may submit to the Dean a recommendation for the student's dismissal from the academic program. The Executive Associate Dean for Academic Affairs may authorize the student's dismissal from the program of study, in all cases except where expulsion from the University is also recommended.

General Information

Change of Personal Information

It is the responsibility of the student to change her/his/their name, address, phone number, or any other pertinent information in the LOCUS system. Failure to comply with this requirement may result in returned mail or email, thereby causing the student to miss valuable announcements or information.

Computer Lab

Computers and media-assisted learning available for student use are located in the Information Commons on the first floor of the School of Nursing building on the Health System Campus (708-216-9101).

Information Technology Services

Assistance for students can be found on-line at Information Technology Services, New Students.

Parking

Parking is limited on all campuses, and public transportation is encouraged. Parking and traffic regulations are enforced by the issuance of traffic citations that provide for a fine. A car in violation may be towed when circumstances warrant such action. For further parking information, contact:

- Health System Campus - 708-216-9092
- Lake Shore Campus - 773-508-7036
- Water Tower Campus - 312-915-6698

Security

The Security Department strives to maintain a safe environment on the various campuses of the University, 24 hours a day, and seven days a week. Escort service is available on the Health System and Lake Shore campuses. Students should report any suspicious or hazardous conditions on or near campus to the Security Department.

- Health System Campus: 708-216-9077
- Lake Shore Campus: 773-508-6039

School Address and Contact

Marcella Niehoff School of Nursing
2160 South First Avenue
Maywood, IL 60153
Phone: 708-216-9101
Fax: 708-216-9555

Grievance and Appeal Procedures

Academic Appeals

The Marcella Niehoff School of Nursing (the "MNSON") has developed an Academic Appeals Process that is consistent with the Loyola University Chicago (the "University") Academic Appeals Procedure. This process is meant to supplement, and may not supersede, any portion of the University Academic Appeals process.

The MNSON Academic Appeals Process provides specific direction for the academic grievance hearing and for appeals and is designed to achieve clarity, uniformity, and fairness in the handling of all academic disputes involving individual student complaints regarding course grades and accusations of academic misconduct. Any MNSON student may initiate the formal academic grievance procedure in order to have a complaint or appeal regarding a course grade or charge of academic misconduct reviewed in an impartial and thorough manner. In accordance with best educational practices and University policy, this process must be based on relevant information and afford both parties (student and involved faculty member(s) an equal voice in the proceedings.

Appeal of Course Grade

Consistent with the University Academic Appeals Procedure, a disputed grade will be changed only if the grading meets one or more of the following criteria:

1. Is found to be in significant violation of clearly established written school policies; or
2. Is a result of improper procedures; or
3. Is found to be arbitrary and/or capricious. Arbitrary and/or capricious grading is the assignment of a grade to a student which is:
   a. Based partially or entirely on criteria other than the student's performance in the course; or
   b. Based on standards different from those standards of grading applied to other students registered in the same course; or
   c. Based on a substantial departure from the announced grading standards for the course.

Appeal of Finding of Academic Misconduct

The student retains the right to appeal the determination of academic misconduct using the academic Appeal Procedures outlined below in Appeal Procedures section.

Appeal Procedures within the MNSON

1. In all cases, a sincere attempt should be made by the student to resolve the issue through discussion with the involved faculty member(s). The student first discusses the course grade or charge of academic misconduct with the involved faculty member(s) of the course. Every attempt is made by the involved faculty member(s) to answer fully the student's concerns at this level. If the involved faculty member(s) decides that a change-of-grade is appropriate (e.g., due to error by the involved faculty member[s]), the involved faculty member(s) will submit a grade-change request via the student information system. The grade change will be reviewed by the Assistant Dean of Graduate Clinical Programs.
2. If the student and instructor are unable to resolve the issue related to course grade and/or academic misconduct, and the student still chooses to contest the findings, the student may appeal by submitting the appropriate form:

   The Academic Appeal Form: Course Grade Dispute (https://cm.maxient.com/reportingform.php?LoyolaUnivChicago&layout_id=102)

   The Academic Appeal Form: Finding of Academic Misconduct (https://cm.maxient.com/reportingform.php?LoyolaUnivChicago&layout_id=100)

   The electronic form is the only accepted method to request an appeal. The form must be submitted no later than 30 days into the following semester. Failure to submit a request within this period and with this electronic form waives the right to appeal and renders the decision final.

   The student's request must:

- Specify the nature of the dispute; and
- Explain in detail how the issue falls within the established criteria for an academic grievance (e.g., the grading was in significant violation of clearly established written school policies; the grading is arbitrary and/or capricious);
- Describe the attempts made to resolve the matter; and
- Attach all relevant information or documentation to support the grievance.

3. The Assistant Dean of Graduate Clinical Programs or the Dean's designee determines whether or not there are grounds for an appeal.
   a. Declines the case for a hearing: The Assistant Dean of Graduate Clinical Programs and/or Dean's designee may decline to forward the case for a hearing if it is determined that there are no grounds for an appeal. In such instances the Assistant Dean of Graduate Clinical Programs or Dean's designee must justify, in writing, the reason for this decision and communicate the decision to the student, involved faculty member(s), Program Track Director, and Dean via Loyola email. If the student disagrees with the determination by the Assistant Dean of Graduate Clinical Programs and/or Dean's designee, the student may appeal to the appropriate academic Dean. In cases where the student is enrolled in a school other than the one in which the course is taught, the academic Deans of the two schools will review the appeal together. The student's academic Dean's office will notify the student of the final decision via Loyola email.
   b. Approves the case for a hearing: If the Assistant Dean of Graduate Clinical Programs or Dean's designee determines there are grounds for an appeal, the student, involved faculty members(s), Program Track Director, and Dean will be notified via Loyola email that a hearing board will be convened.
4. It is up to the discretion of the Dean or his/her designee if a student may continue taking courses in a sequence where the course grade under review is a pre-requisite.

Hearing Procedures

Pre-hearing

1. If the Assistant Dean of Graduate Clinical Programs and/or the Dean's designee determines that the academic grievance is sufficient to proceed with a hearing, the Dean shall be notified.
2. Within two weeks of the notification to the Dean, the Dean shall appoint a Chairperson and four faculty members to a Hearing Board. Every effort shall be made to appoint faculty to the Hearing Board who are not familiar with the student.
3. The Chairperson of the Hearing Board sets the calendar, notifies all involved parties of the dates and times of the hearing and informs students by written notice of the decisions of the Hearing Board.
4. The hearing will be held within 10 business days of the receipt of the request for a hearing, if practicable. The hearing will be private, and all information will be held confidential.
5. All parties, including the student, involved faculty member(s), and Hearing Committee members, will receive the student's name, written request for a grievance hearing, information identifying the charge of academic misconduct and related information submitted by the student, and information related to the hearing date/time/location, at least three business days in advance of the scheduled hearing date.
6. The student and/or faculty member(s) have the option of submitting other relevant materials to the hearing board prior to or at the time of the hearing. Individuals in the hearing process have the responsibility of presenting truthful information.
7. The faculty member(s) shall provide the Hearing Board Chairperson with:
   a. A copy of the course syllabus to include course outcomes if the hearing is focused on a grade dispute.
   b. Documentation and relevant information pertaining to the student's performance in the course or clinical learning experience or related to the allegation of the student's academic dishonesty.
   c. The names of any witnesses the involved faculty member(s) wishes to present and the name of any representative of the University community who will assist the involved faculty member(s) in presenting the case at the hearing.
8. Both the student and the faculty member(s) involved may be accompanied by one advisor of their choice throughout the hearing process. The individual must inform the chairperson of the hearing board of the name of the advisor at least 3 business days before the hearing date.
   a. The role of an advisor is to provide a comforting presence for the student and/or instructor. An advisor may only speak to the advisee. An advisor may not ask questions, interject, advocate for, or otherwise speak on behalf of the advisee.
   b. Even if an advisor is an attorney, the advisor may not function as legal counsel or "represent" an advisee during the hearing process.
   c. If any advisor conducts themselves in a manner inconsistent with these guidelines, or if the advisor's behavior obstructs or interferes with the hearing process, the advisor will be warned by the board.
   d. If the advisor's interfering behavior continues or if the advisor engages in a manner that harasses, abuses, or intimidates any other participant, the advisor will be excused from the hearing immediately.

The Hearing

1. The hearing will include: the student, involved faculty member(s), and designated advisor.
2. The Chairperson determines the hearing processes (e.g. location, order of proceedings, determining what evidence is relevant, determining if additional information is needed, etc.). The standard of evidence required for a board to determine responsibility is known as a "preponderance of the evidence." This means the board must determine that it is more likely than not that an alleged violation occurred based on the totality of available evidence.
3. Hearings for refuting a charge of academic misconduct generally include an introduction of all parties present, an overview of the hearing process, review of the nature of the alleged conduct and policies potentially violated. Students (and faculty member(s) when applicable will provide their account of the reported incident. Hearing Board members may ask questions to the parties present (including witnesses, if applicable).
4. All decisions of the Board must be determined by a majority vote of the hearing board members. A final decision must be rendered by the Board by the end of the hearing process. All deliberations among the hearing board members are private.

Notice of Decision

1. The student (and faculty member(s) when applicable) are notified of the decision and any related outcomes either immediately after deliberation or, when further deliberation is needed, in writing, via Loyola email by the Chairperson of the Board's decision within 10 business days of the hearing. The decision is also shared with the

Program Track Director, Assistant Dean and/or Dean's designee, and Dean.

a. In cases of a grade dispute, if the Hearing Board renders a decision in support of the student's petition, the faculty member submits a grade-change request consistent with the Hearing Board's findings. If the Hearing Board finds that the student's petition is without merit, the grade shall remain unchanged.
b. If a student is grieving a grade associated with a clinical experience, and the Hearing Board determines that the faculty grading was in significant violation of clearly established written school policies, or the result of improper procedures, or was capricious, the Hearing Board will communicate the decision to the Assistant Dean of Graduate Clinical Programs. Notwithstanding this decision, the Hearing Board and/or the Assistant Dean of Graduate Clinical Programs may require an independent re-evaluation of the student's performance (knowledge, skills, or behavior).
    i. If it is judged by the Hearing Board or the Assistant Dean of Graduate Clinical Programs that an independent reevaluation of the student's performance is warranted, the Assistant Dean of Graduate Clinical Programs will communicate the need for the evaluation to the Program Director, who will arrange for an independent reevaluation of the student that may involve a clinical, lab, or simulation session by a faculty member not known to the student. This independent reevaluation summary will be forwarded to the Hearing Board and the Assistant Dean of Graduate Clinical Programs for a final determination of the course grade.

Contesting the Hearing Board's Decision

Should the student or the instructor wish to contest the Hearing Board's decision, an appeal to the Dean within 30 days of notice of the hearing board's decision may be sent using the Academic Hearing Board Appeal form. This form is the only approved process to submit such a request.

a. The appeal letter must clearly identify the grounds for the appeal with appropriate supporting documentation. Mere disagreement or dissatisfaction with the decision does not constitute a basis for an appeal.
b. The grounds to appeal the board's decision must include one or more of the following criteria:
    1. New substantive information is available that was not reasonably available at the time of the hearing and could substantially impact the original findings or outcomes of the case.
    2. A substantive procedural error or error in the interpretation of University policy occurred that denied the student or instructor the right to a fair hearing and decision.
    3. The decision (findings or outcomes) is significantly incongruent with the established facts presented at the hearing or the established Undergraduate Academic Catalog.
c. Upon receipt of the appeal letter, the Dean will review the appeal to determine whether or not to uphold the decision of the hearing board.
d. The student and the instructor will be notified via Loyola email by the Dean's office of the final decision. The Dean's decision is final and binding.

Health Insurance Portability and Accountability Act of 1996 (HIPAA)

The Health Insurance Portability and Accountability Act of 1996 (HIPAA) is a federal law that provides for the protection and privacy of personal health information. The Privacy Rule and the Security Rule of this law affect health care providers, including students enrolled in clinical education activities. The Privacy Rule of the HIPAA defines protected health information as:

> "information, including demographic data, that relates to the individual's past, present, or future physical or mental health or condition; the provision of health care to the individual; or the past, present, or future payment for the provision of health care to the individual; and, that identifies the individual or for which there is a reasonable basis to believe it can be used to identify the individual" (citation (https://www.hhs.gov/hipaa/for-professionals/privacy/laws-regulations/?language=en))

All students must follow the HIPAA Privacy Rules and Guidelines when participating in clinical educational activities. Compliance with these rules and guidelines includes, but is not limited to, maintaining confidentiality of paper and electronic health records and protected health information.

All students are required to complete HIPAA training as mandated by their educational program. In addition to program-specific training, all students are required to complete any additional training mandated by the clinical facility where their clinical education is occurring.

When a concern is raised that a student has violated the confidentiality and privacy of patient information, the concern is addressed through the formal disciplinary process of the MNSON and the university.

Health Sciences Campus Ministry

The Office of University Ministry has a three-fold mission that focuses on the members of the Loyola University Chicago Health Sciences Campus. Inspired by Ignatian values and the practical spirituality of finding God in all things we work towards:

- Shaping Community: Through educational programs and events; prayer and worship; hospitality and outreach; social activities and attention to the needs of the individual, we build a welcoming and inclusive community for students, staff and faculty.
- Seeking Faith: We journey with the people who teach, learn and work at the Health Sciences Division by providing spiritual formation and faith development while facilitating individual and communal prayer. True to our experience of the Gospel, we welcome and engage individuals regardless of their faith background or tradition to grow into becoming men and women for others.
- Serving Broadly: By embracing a worldview that is both local and global we facilitate and sponsor opportunities for members of the Health Sciences Division to work with underserved communities in the greater Chicago area and beyond.

For more information about the HSD Ministry, visit their website (https://www.luc.edu/hsc/ministry/) or call 708-216-3245.

Independent/Directed Study

Students may petition to take an Independent Study course prior to the semester in which the Independent Study is intended to be conducted. The student completes the Independent Study form (see Form in Sakai

site “Information for DNP Students”) that is signed by the instructor and Program Track Director and then submitted to the Assistant Dean of Graduate Clinical Programs for approval. The Independent Study will not be approved if this procedure is not followed. The title of the independent/directed study is listed on the form and included on the student's transcript upon completion of the course. Courses that are regularly offered cannot be completed as an Independent Study unless the scheduled course offering was cancelled in the semester that the student needed the course for degree requirement completion.

Insurance Coverage

Students are expected to maintain adequate health, accident, and hospitalization insurance coverage, either through an insurance agent of the student's choice or through Loyola University Chicago. Information on the Loyola-sponsored student health insurance plan may be obtained from the Bursar’s Office. Evidence of health insurance must be presented before entry into the clinical courses.

Intellectual Capital

Each and every student is the owner of their own intellectual capital. However, the relationship between a student and their faculty member can have an enriching effect on the intellectual capital of both individuals. For those times that a faculty member and student collaborate on research, projects, articles for publications, videos, and other forms of communication of this intellectual capital, it is in the student’s best interest to clearly negotiate with the faculty member or other student colleague (if that be the partnership) the nuances of such matters as who is principal director/investigator of a project or research study, who is first author on a publication, etc. In addition, students who produce exemplary work are often asked by faculty whether they would be willing to make their work available to other students as exemplars for their learning. Faculty obtain written documentation regarding a student’s agreement to share their intellectual capital.

Leave of Absence

It is expected that a student will maintain continual registration in the University from the time of initial matriculation up to completion of the program. If this is not possible, a leave of absence (LOA) must be requested. An LOA should be requested prior to the anticipated date of the leave. Failure to request an LOA will mean that those semesters in which the student does not take courses will be included in the time limit (three years for the DNP Systems Leadership track & seven years for the DNP APRN tracks) set for completion of the program.

Students request the LOA for all semesters where they would be enrolled in courses, according to their program plan, including summer semesters. However, summer semesters do not count in the limit of four terms of LOA time (see below).

Students may request a leave of absence that is not to exceed two academic years (four terms, not including summer semesters) consecutively or interspersed throughout the program. Accruing more than two years of LOA will result in automatic dismissal from the program. Students must complete a Request for a Leave of Absence form (see Form in Sakai site "Information for DNP Students"); the form is provided to the Assistant Dean of Graduate Clinical Programs for approval.

Library Services

The Loyola Health Sciences Library has a large array of resources for students to use during program of study. The library is located on the 1st floor of the Marcella Niehoff School of Nursing. Health Sciences Library librarians and staff are present to serve patrons in-person, by phone, by chat, email, and Zoom from 8:30 am to 5:00 pm, Monday through Friday.

A staff member is present at HSL's Service Desk between 10:00 am and 3:00 pm, Monday - Friday. Services of the Health Sciences Library website (https://hsl.luc.edu/home/).

Students in the DNP program have access to all university library services.

Professional Behavior and Conduct

Students are expected to maintain professional behavior at all times while participating in the School of Nursing programs. Consistent with the mission of the SON mission, respect for clients, faculty, staff, and student colleagues is expected. Goals of the SON are to nurture an atmosphere of collegiality among students, preceptors, and faculty in order to foster a positive learning environment. Graduate students are expected to display professional behavior, such as honesty, punctuality, maturity, and respectful communication with faculty at all times. Unethical or unprofessional behavior may result in disciplinary action to the student, ranging from verbal or written warning, to withdrawal from the theory course or clinical setting, or to dismissal from the program. See the general guidelines for this policy in the appendix under Unprofessional Behavior and Conduct of Marcella Niehoff School of Nursing Students.

Graduate education, particularly at the doctoral level—requires a high level of flexibility, accountability, and professionalism. Students must be prepared to balance personal and academic responsibilities and engage fully in all aspects of the program, even when they are unfamiliar or inconvenient. This includes honoring the time and schedules of clinical preceptors, whose mentorship is essential to your professional development.

The following categories contain examples which require immediate action:

- **Regulatory Considerations:** Functions within the parameters of the state Nurse Practice Act and the policies and procedures of the health care agency in which the practicum is offered.
  - **Examples of Unsafe Pattern of Behavior:**
    - Performing a procedure outside the domain of nursing.
    - Performing a procedure in which the student has not been prepared.
    - Accessing patient health information without proper authorization
- **Ethical Considerations:** Functions within the guidelines of the American Nurses' Association Code of Ethics and Standards of Practice.
  - **Examples of Unsafe Pattern of Behavior:**
    - Disconnecting life support systems without authority.
    - Falsifying about provisions of care.
    - Stealing or personal use of drugs or supplies from agency.
- **Physiological and Psychosocial Considerations:** Functions in an emotionally and physiologically responsible manner and/or institutes means to correct difficulty or problems in these areas.

        - **Examples of Unsafe Pattern of Behavior:**
            - Inability to communicate verbally with a patient.
            - Depression or anxiety that paralyzes function.
            - Seizures, infection, or uncontrolled diabetes which inhibit cognitive functioning.
            - Drug or alcohol impairment or use while on duty.
            - Psychotic behavior.
- **Accountability:** Implements care that reflects adequate preparation and/or sufficient documentation to insure safe care of clients.
    - **Examples of Unsafe Pattern of Behavior:**
        - Absence from clinical unit without notification.
        - Charting or reporting not reflective of care given.
        - Lack of preparation to provide care.
        - Neglecting to give appropriate care.
- **Human Rights:** Implements care that demonstrates respect for the dignity and worth of individual clients' health.
    - **Examples of Unsafe Pattern of Behavior:**
        - Communications that are disrespectful.
        - Cruelty to patient.
        - Lying to patient.

Professional Liability Insurance

Loyola University Chicago insures graduate students in their student role when the student is registered and enrolled in a supervised clinical course. However, a student may choose to purchase additional malpractice insurance if they wish to have independent coverage.

Readmission Policy

Students dismissed for academic reasons may apply once for readmission to re-enter the Marcella Niehoff School of Nursing (MNSON) following dismissal.

Prior to applying, the student must meet with their Academic Advisor to review the process.

A petition must be submitted by the student to the DNP Readmission Committee including:

- Explanation of circumstances leading to dismissal.
- Evidence of remediation (academic coursework, continuing education, professional development).
- A detailed plan for success if readmitted.

If readmitted, the student must maintain a 3.0 GPA and achieve grades of B- or higher in all subsequent courses.

Any further course failure (below B-) will result in permanent dismissal.

Upon review of the petition provided, the committee may choose to meet with the student in person to answer questions. No one other than the student may attend this meeting.

The DNP Readmission Committee will notify the student of its decision by email.

Reasonable Accommodations

Loyola University Chicago is committed to excellence in accessibility. The University actively collaborates with students to develop innovative ways to ensure accessibility and create a respectful and accountable culture through our confidential and specialized disability support. We encourage students with disabilities to disclose and seek accommodation through the Student Accessibility Center (https://www.luc.edu/sac/).

Loyola University wishes to ensure that access to its facilities, programs, and services are available to students with disabilities. The University provides reasonable accommodations to students on a nondiscriminatory basis consistent with legal requirements as outlined in the Rehabilitation Act of 1973, the Americans with Disabilities Act (ADA) of 1990, and the Americans with Disabilities Act Amendments ACT (ADAAA) of 2008.

A reasonable accommodation is a modification or adjustment to an instructional activity, facility, program or service that enables a qualified student with a disability to have an equal opportunity to participate in all Loyola University student activities. To be eligible for accommodations, a student must have a documented disability as defined by the ADA and Section 504 of the Rehabilitation Act of 1973. The ADA, the ADAAA and Section 504 all define disability as:

a. A physical or mental impairment that substantially limits one or more major life activities of such individual;
b. A record of such impairment; or
c. Being regarded as having such a condition.

Decisions regarding reasonable accommodation are determined on a case-by-case basis taking into consideration each student's disability-related needs, disability documentation and program requirements. While Loyola University will make every effort to work with students with disabilities to accommodate their disability-related needs, the university is not required to provide accommodations that fundamentally alter or waive essential program requirements.

Students who, after review of the technical standards, determine that they require accommodation to fully engage in the program should contact the Student Accessibility Center (SAC) to confidentially discuss their accommodation needs. Given the clinical nature of our programs, additional time may be needed to implement accommodations. Accommodations are never retroactive; therefore, timely requests are essential and encouraged.

Representation on School of Nursing Committees

Each academic year, graduate student representatives are needed for various campus committees and/or organizations. Students may submit their names to the Assistant Dean of Graduate Clinical Programs to be considered for committee appointments.

Student Organizations and Service

Participation in extra-curricular activities provides an opportunity for personal growth while enhancing the student's experience during their graduate studies. Current Opportunities include the following:

- Graduate Student Nurse Association

Graduate students are encouraged to be join one or more professional nursing organizations. Below is a list of professional organizations to consider:

- Illinois Society for Advanced Practice Nurses (ISAPN)
- American Association of Nurse Practitioners (AANP)
- American Psychiatric Nurses Association (APNA)

- Gerontological Advanced Practice Nurses Association (GAPNA)
- Doctor of Nursing Practice, Inc

Student Accessibility Center (SAC)

The Student Accessibility Center (SAC) supports students with disabilities by fostering equitable access to all aspects of student life at Loyola University Chicago. In alignment with Loyola's Jesuit mission and the value of Cura Personalis—care for the whole person—SAC partners with students, faculty, and campus offices to remove barriers and support academic, personal, and professional success.

Loyola University Chicago provides reasonable academic and student life accommodations for students with disabilities. Students interested in receiving academic accommodations related to a disability or other health condition are invited to register with the Student Accessibility Center (SAC) (https://www.luc.edu/sac/applywithsac/). Students may register with the SAC at any point in their academic career, however the SAC encourages students to register as early as possible to reduce delay in delivery of accommodations. This is especially important for students needing accommodations in clinical or laboratory settings, which may require additional coordination.

Once registered, the student, SAC, and faculty will engage in an interactive process to determine how accommodations will be applied in each course. SAC staff work one-on-one with students to review documentation, determine reasonable accommodations, and support self-advocacy. Accommodations are not retroactive and must be renewed each semester through SAC's formal process.

Students are encouraged to meet with each professor individually to discuss how accommodations will be implemented in their course. All information is handled with confidentiality.

Students with disabilities who are seeking accommodations relating to clinical experiences are strongly encouraged to complete registration with the university's Student Accessibility Center (SAC) well before the priority deadlines listed below for each semester to discuss possible accommodations. This helps ensure enough time to review requests and coordinate reasonable accommodations in collaboration with the Marcella Niehoff School of Nursing and, when necessary, clinical sites. Accommodations for clinical experiences requests received after a priority deadline may not be able to be implemented for the upcoming semester due to the time required for review and coordination with clinical partners.

- Fall: June 1st
- Spring: November 1st
- Summer: March 1st

Audio Recording of Lectures

In some classes, students with approved accommodations may use audio-recording software to ensure equal access. These recordings are for personal study use only. They may not be shared, distributed, or used against faculty, lecturers, or classmates. All recordings must be deleted at the end of the semester.

Contact SAC

- Website (https://www.luc.edu/sac/) & Registration (https://www.luc.edu/sac/applywithsac/)
- Email (SAC@luc.edu)
- Phone: 773-508-3700

Time Limits for Completing Required Course Work

Students in the DNP Systems Leadership track must complete the DNP degree requirements within three years from the date of matriculation. Students in the DNP APRN tracks must complete the DNP degree requirements within seven years from the date of matriculation. An Extension of Time for Completion of Degree Requirements will be considered for special circumstances (i.e., medical, personal, professional, or research related reasons). A student requesting an extension completes an Extension of Time Limit for Completion of Degree Requirements form and submits to the Assistant Dean of Graduate Clinical Programs (see Form in Sakai Organization "Information for DNP Students"- Handbook/Forms) If an extension is approved, an official letter is sent to the student from the Assistant Dean of Graduate Clinical Programs. Extensions are ordinarily limited in duration to one full academic year.

Transfer Courses to the DNP Program

Students may apply for acceptance of transfer course credit during the first semester of the DNP program. The School of Nursing's decision regarding approval of hours for transfer credit is based on the grade earned in the course; the time interval since the completion of the course; and the applicability of the course to the student's current program of study at Loyola University Chicago.

Only those courses for which the student received a grade of B- or better will be considered for transfer credit, and clinical courses cannot be considered for transfer credit. Standards of recency apply: courses completed within the past 5 years can be considered for transfer credit. In cases where the time interval between prior course work and matriculation in the School of Nursing is longer than 5 years, consideration of transfer credit requires confirmation that the content of the course meets the current standards of the field. A syllabus including the course description and course outcomes, along with an outline of content included, must be submitted for any course to be considered for transfer credit. For probation and graduation purposes, transfer credit is not computed in the cumulative Grade Point Average. Acceptance of transfer course credit includes the completion of the School of Nursing 'Transfer Credit Form' that becomes part of the student's permanent academic record.

Students may request to have nine credits from an outside accredited university to be applied to the DNP degree prior to matriculation. Additional transfer credits may be granted with the discretion of the student's Program Track Director and the Assistant Dean of Graduate Clinical programs.

Once the student has started course work in the program, courses leading to the DNP Degree must be taken at Loyola University Chicago unless special approval is granted by the Assistant Dean of Graduate Clinical Programs.

Practicum courses are track-specific and may not be transferred across APRN tracks (e.g., Adult-Gerontology Primary Care NP practicum courses cannot substitute for Family NP practicum courses). The only exception is where a practicum course has been intentionally designed for multiple tracks (e.g., shared foundational primary care practicum). Practicum courses must be completed within the designated program track to ensure role-specific competency and eligibility for national certification.

Transcripts

Students obtain official academic transcripts from the Office of Registration and Records. Students may request official transcripts through LOCUS and obtain unofficial transcripts through LOCUS on Loyola's website.

Wellness Center

The Wellness Center provides high quality interdisciplinary medical, mental health, and health promotion services that enable the student to more fully participate and succeed in the college experience. Students currently attending classes (full or part time) are eligible to use the services provided at the Wellness Center at no charge. Wellness Center services are covered by Student Development Fee. Students who are not charged the Student Development Fee but would like to receive services must submit the Optional Enrollment form. A fee for the Wellness Center is assessed at the beginning of the Fall and Spring semesters and appears on every student's bill as part of the student activity fee. This covers medical assessment and short-term treatment by a staff nurse, physician, or nurse practitioner; assessment and either brief counseling with a mental health professional at the Wellness Center or assistance connecting to a community mental health provider; telephone advice from a nurse; and health education and wellness programs and resources at the Wellness Center, including unlimited group therapy visits. Some lab tests, immunizations, prescription medications, and materials are provided for an additional fee. More information about the Wellness Center resources is available here (http://www.luc.edu/wellness/).

Note: The Wellness Center does not provide medical clearance for return to clinical sessions.

Withdrawal

Withdrawal is the election of a student to change enrollment status by removing themselves from the official class roster. Withdrawal from specific courses in the DNP program may impact a student's ability to progress in the program. For more information about withdrawing from a course, or assistance, please see your assigned Academic Advisor.

According to University policy: Complete withdrawal before the beginning of the term start date will result in no financial responsibility. Complete withdrawal from all classes after the term start date will result in tuition charges according to the withdrawal schedule of the university.

According to University policy: During the late and change of registration period, a student may withdraw from a course without penalty, or notation, on their academic record. After the late and change of registration period, a designation of "W" will appear on the academic record. If a student withdraws after the University's final withdrawal deadline, a grade will be issued for the course, based on the work completed in the course. Students facing a significant emergency circumstance that prevents them from continuing in or completing an academic term may submit an Intent to Withdraw form to their primary academic advisor, program director or assistant/associate dean. All requests must be supported by appropriate documentation. Requests for complete emergency term withdrawals are considered after the last day of a term to drop a course or courses without a grade of "W." Complete emergency term withdrawals constitute a withdrawal from all classes and may result in final grades of "WE" in all classes for the given academic term. The University does not grant partial withdrawals (i.e., requests to withdraw from some classes but not others) for emergencies. Grades of "WE" have no impact on a student's cumulative GPA. Dates for these withdrawal conditions are published in the university academic calendar.

Students may withdraw only once with a grade of "W" from any one required course in their program plan. The second withdrawal from the same course will result in dismissal from the program. If a student withdraws from a course and subsequently earns a grade lower than a B- in that course (or vice versa), that will also result in dismissal from the program.

The Writing Center

The main goal of the Writing Center is to help the student become a better writer. The Writing Center offers writing assistance to meet the student's individual needs. Tutors are available to help at any point of the writing process—from brainstorming, to organizing, to putting the final touches on a bibliography. All LUC students are eligible to use their services. Online writing center services are also available to students. More information and writing resources are available here (https://www.luc.edu/writing/).

Master of Science in Nursing (MSN) Academic Policies

Marcella Niehoff School of Nursing (MNSON) Mission and Values

Mission Statement

The mission of the MNSON is to advance the science of nursing and provide a transformative education in the Jesuit Catholic tradition that prepares compassionate, innovative, diverse nurse leaders who provide care for the whole person and partner locally and globally to promote social justice and health for all.

Vision Statement

The Marcella Niehoff School of Nursing is to be a preeminent leader in transforming the health of persons, families, communities and populations, while promoting social justice, health equity and quality care for all.

Values

The Marcella Niehoff School of Nursing (MNSON) at Loyola University Chicago is committed to the five "hallmark characteristics of a Jesuit education." These characteristics provide the foundation for our core values. The MNSON core values challenge administrators, faculty, students, communities, and partners to think differently. Graduating professionals who are technically proficient is necessary, but not sufficient. Our graduates will shape the future of health and health care. To prepare them, we implement the following values:

- "Commitment to Excellence: Applying well-learned lessons and skills to achieve new ideas, better solutions and vital answers."
- "Faith in God and the religious tradition: Promoting well-formed and strongly held beliefs in one's faith tradition to deepen others' relationship with God."
- "Service that promotes justice: Using learning and leadership in openhanded and generous ways to ensure freedom of inquiry, the pursuit of truth and care for others."
- "Values-based leadership: Ensuring a consistent focus on personal integrity, ethical behavior in business and in all professions, and the appropriate balance between justice and fairness."

- "Global Awareness: Demonstrating an understanding that the world's people and societies are interrelated and interdependent."

Accreditation

The baccalaureate degree program in nursing, master's degree program in nursing, Doctor of Nursing Practice program, and the post-graduate APRN certificate program at Loyola University Chicago are accredited by the Commission on Collegiate Nursing Education, 655 K Street, NW, Suite 750, Washington, DC 20001, 202-887-6791.

Inclusive Excellence Statement

Working toward inclusive excellence includes building intrapersonal and interpersonal awareness, engaging in curriculum transformation, teaching with an inclusive pedagogy, and building inclusive learning environments. We recognize that our community is strengthened by the diversity of our students, faculty, and staff along the social dimensions of race, color, religion, biological sex, age, sexual orientation, gender identity or expression, national or ethnic origin, ancestry, disability, marital status, parental status, military/veteran status, or any other characteristic protected by applicable law. We are especially committed to helping our nation create a culture of health, promote health equity to reduce health disparities, and improve the health and wellbeing of all, especially for those who experience the health system disparately due to systemic oppressions.

MNSON Chosen Name and Pronoun Statement

Class rosters and university data systems are provided to instructors with only students' legal names presented. Knowing that not all students use their legal names or identify with a gender that aligns with their sex assigned at birth, faculty members will use the name and personal pronouns you use. If you choose, you may email the faculty member directly to share your information. Additionally, if these change at any point during the semester, please let the faculty member know. For more information on how to change your name in LOCUS, please visit the Preferred Name Policy.

Overview and History of the School of Nursing

The Marcella Niehoff School of Nursing (MNSON) of Loyola University Chicago was founded in 1935 and is the oldest baccalaureate nursing program in Illinois. Since the establishment of the MNSON, more than 7000 nursing degrees have been awarded. The original focus was education of public health nurses to assume leadership roles in meeting the health needs of Chicago residents. The MNSON was the first division of the University to have women attend classes at the Lake Shore Campus (LSC). The four-year Baccalaureate of Science in Nursing (BSN) program continues to attract students for their initial university experience, while the Accelerated BSN (ABSN) program, instituted in 1992, offers a fast-track to professional nursing for those already possessing a baccalaureate degree. In 1964, a Master of Science in Nursing (MSN) program was initiated to prepare expert clinicians. Currently the MSN program provides graduate education in Nursing & Healthcare Administration. Beginning in the Fall 2009 semester, the first Doctor of Nursing Practice (DNP) degree program was initiated. At present, there are 12 DNP programs comprised of eight Nurse Practitioner tracks, three Clinical Nurse Specialist (CNS) tracks, and one Systems Leadership track. The PhD in Nursing program was initiated in 1988 to meet the need for nurse scholars, teachers, and leaders.

Overview of the MSN Program

MSN Track

Students in the MSN program are prepared for leadership roles in Nursing and Healthcare Administration. The MSN program is a minimum of 39 semester hours. Courses are organized into the following levels: 1) Graduate Core, 2) Nursing and Healthcare Courses, and 3) Practicum Courses.

Electives

At present, the MSN program plans do not include elective courses.

Program Goal

The goal of the Master of Science in Nursing (MSN) program is to prepare nurses at the master's level who use advanced knowledge and skills to assume a leadership role in interprofessional healthcare delivery to improve health outcomes at the system, population, or individual patient levels.

Program Outcomes

At the completion of the MSN program, the graduate has the knowledge and skills to:

- Integrate scientific findings from nursing, healthcare, and biopsychosocial fields; public health sciences; and the Jesuit Catholic tradition for the continual improvement of nursing and healthcare across diverse settings.
- Function as a leader emphasizing ethical and critical decision-making, effective working relationships, and application of organizational sciences in a systems perspective, to promote safe and high-quality patient-centered care.
- Use translational science to integrate evidence into practice.
- Critically appraise healthcare technologies and information systems and incorporate data to promote optimal communication and healthcare delivery at the system and patient-care levels.
- Understand and appreciate the importance of health policies on health status and employ advocacy strategies to positively influence health care at the population level.
- As a leader or member of an interprofessional team, effectively communicate, collaborate, and consult with other health professionals to improve patient and population health outcomes.
- Working collaboratively with patients, families, and communities, utilize culturally sensitive evidence-based strategies for health promotion and disease prevention locally, nationally, and globally.
- Use expanded knowledge and change-agent skills for professional growth and the provision of indirect and direct care that enhances outcomes for individuals, populations, and systems

Professional Nursing Standards and Guidelines

- The Essentials of Master's Education in Nursing (AACN, 2021).
- The American Organization for Nurse Leaders (AONL, 2021).

Academic Advising and Program Planning

Upon admission, all students are assigned to the MSN Program Director with whom they are to consult for the duration of the program. The Program Director also serves as the MSN Academic Advisor. The student confers with their Program Director to create a program plan in the LOCUS Planner.

Course Sequencing

The student confers with their Program Director to create a program plan, using the LOCUS Planner, for completion of required course work. Sequencing requires that some courses be taken in a specific order. Any deviation from the course sequences listed below must be negotiated with the Program Director. Unapproved deviations may result in delayed program completion.

Role of the MSN Program Director

- The primary responsibility of the Program Director is to provide direct oversight of the educational components included in the student's completion of the MSN program.
- Following admission to the program, a program plan is created for each student, using the LOCUS Planner. Program plan changes are made by the Program Director. Students are not permitted to make program plan changes without the Program Director's approval.
- The Program Director monitors the academic progress of the student through the program and is available to the student for guidance as needed.
- The Program Director assists the student who encounters problems that interfere with successful progression in the academic program and makes appropriate decisions that will facilitate academic progression. This may include recommending a leave of absence (LOA), reducing course load, etc.
- The Program Director determines the student's progression in the program and course sequencing.

Role of the MSN Student

- The student is responsible for contacting their Program Director to make any needed changes in her/his/their program of study.
- The student is responsible for notifying the Program Director when they:
  - Requests and then completes a grade of Incomplete.
  - Needs to change the program plan of study.
  - Needs to withdraw from or add a course in the current semester.
  - Needs to request a leave of absence (LOA).
  - The student is responsible for identifying an appropriate faculty member to serve as Comprehensive Exam Faculty Director, and to collaborate with this Director during all phases of the Comprehensive Exam process.
  - The student holds responsibility for knowing all policies in this student handbook.

Academic Grievance Procedure

The Marcella Niehoff School of Nursing (the "MNSON") has developed an Academic Grievance and Appeals Process that is consistent with the Loyola University Chicago (the "University") Academic Grievance Procedure (p. 1914) and the University's Graduate School Academic Grievance Procedure (p. 2029). This process is meant to supplement, and may not supersede, any portion of the University or Graduate School Academic Grievance Procedures.

The MNSON Academic Grievance and Appeals Process provides specific direction for the academic grievance hearing and for appeals and is designed to achieve clarity, uniformity, and fairness in the handling of all academic disputes involving individual student complaints regarding course grades and accusations of academic dishonesty. Any MNSON student may initiate the formal academic grievance procedure in order to have a complaint or appeal regarding a course grade or charge of academic dishonesty reviewed in an impartial and thorough manner. Students enrolled in degree programs housed in the Graduate School may also invoke the procedures under the MNSON Academic Grievance and Appeals Process to address disputes relating to dismissal from a program. In accordance with best educational practices and University policy, this process must be based on relevant information and afford both parties (student and involved faculty member(s)) an equal voice in the proceedings.

Consistent with the University Academic Grievance Procedure, a disputed grade will be changed only if the grading meets one or more of the following criteria:

1. Is found to be in significant violation of clearly established written school policies; or
2. Is a result of improper procedures; or
3. Is found to be capricious. Capricious grading is the assignment of a grade to a student which is:
   a. Based partially or entirely on criteria other than the student's performance in the course; or
   b. Based on standards different from those standards of grading applied to other students registered in the same course; or
   c. Based on a substantial departure from the announced grading standards for the course.

Pre-Hearing and Hearing Procedures within the MNSON

1. In all cases, a sincere attempt should be made by the student to resolve the problem through discussion with the involved faculty member(s). The student first discusses the grade or charge of academic dishonesty with the involved faculty member(s) of the course. Every attempt is made by the involved faculty member(s) to answer fully the student's concerns at this level. If the involved faculty member(s) decides that a change-of-grade is appropriate (e.g., due to error by the involved faculty member(s)), the involved faculty member(s) will submit a grade-change request via the student information system. The grade change will be reviewed by the Assistant Dean of Graduate Clinical Programs or the Assistant Dean of the Undergraduate BSN Program.
2. If the attempt(s) to resolve the dispute (described in #1 above) fails, the student may submit a written request for an academic grievance hearing to the student's Program Director. If the student's Program Director is also the instructor, the written request would go directly to the Assistant Dean of Graduate Clinical Programs or the Assistant Dean of the Undergraduate BSN Program. This request must be submitted within 1 month after the beginning of the following semester. The student's written request must:
   a. Specify the nature of the dispute; and
   b. Identify how the issue falls within the established criteria for an academic grievance (e.g., the grading was in significant violation of clearly established written school policies); and
   c. Describe the attempts made to resolve the matter; and
   d. Attach all relevant information or documentation to support the grievance.
3. If a student has been accused of plagiarism or dishonest examination behavior, and the student denies the charge, the student may request an academic hearing review. The Dean will then constitute a hearing committee composed of a Chairperson and four faculty members ("Hearing Committee") to review the evidence of academic dishonesty

and to consider the imposition of additional sanctions beyond failure in the course. This process is delineated in #6 below.

4. For instances of grade disputes, and upon receipt of the written request, the Program Director will ensure completeness of the above requirements (#2 a-d) and forward the request to the Assistant Dean of Graduate Clinical Programs or the Assistant Dean of the Undergraduate BSN Program. Assistant Dean of Graduate Clinical Programs or the Assistant Dean of the Undergraduate BSN Program may decline to forward the case for a hearing if the dispute is not an academic dispute subject to the MNSON's Academic Grievance Process, or the written request fails to allege any of the necessary criteria for a disputed grade to be changed. In such instances, the Assistant Dean of Graduate Clinical Programs or the Assistant Dean of the Undergraduate BSN Program must justify, in writing, the reason for this decision and communicate the decision to the student, involved faculty member(s), the Program Director and Dean.
5. If the Assistant Dean of Graduate Clinical Programs or the Assistant Dean of the Undergraduate BSN Program determines that the academic grievance is sufficient to proceed with a hearing, the Dean shall be notified. Within two weeks of the notification to the Dean, the Dean shall appoint a Chairperson and four faculty members to a Hearing Committee. Every effort shall be made to appoint faculty to the Hearing Committee who are not familiar with the student. It is recommended that the Hearing Committee members be familiar with the course outcomes and expectations that are the subject of the grievance.
6. All parties, including the student, involved faculty member(s), and Hearing Committee members, will receive the student's name, written request for a grievance hearing, information identifying the charge of academic dishonesty and related information submitted by the student in #2 a-d above, and information related to the hearing date/time/location, at least three business days in advance of the scheduled hearing date. Both the student and involved faculty member(s) will be advised of their right to request assistance in presenting the case at the hearing by any member of the University community other than an attorney. No individual from outside the University may attend the hearing, including any legal representative for the parties involved in the dispute. The student and the involved faculty member(s) will be notified of their right to present witnesses at the hearing. If this notice is not provided at least 3 days prior to the hearing, or a party is unavailable to attend, the hearing will be re-scheduled.
7. Pre-Hearing Preparation:
    a. Responsibilities of the student: At least three business days prior to the hearing, the student shall provide the Hearing Committee Chairperson with:
        i. The documentation identified in #2 a-d above
        ii. The names of any witnesses the student wishes to present and the name of any representative of the University community who will assist the student in presenting his/her case at the hearing.
    b. Responsibilities of the faculty member(s): At least three business days prior to the hearing, the involved faculty member(s) shall provide the Hearing Committee Chairperson with:
        i. A copy of the course syllabus to include course outcomes, if the hearing is focused on a grade dispute.
        ii. Documentation and relevant information pertaining to the student's performance in the course or clinical learning experience or related to the allegation of the student's academic dishonesty.
        iii. The names of any witnesses the involved faculty member(s) wishes to present and the name of any representative of the University community who will assist the involved faculty member(s) in presenting his/her case at the hearing.
    c. Responsibilities of the Hearing Committee: The Hearing Committee Chairperson may request additional materials from the student and involved faculty member(s) at any time during the hearing process.
8. The hearing will include: the student, involved faculty member(s), and designated representatives of the University community who will assist in presenting an individual's case. Witnesses are typically excused from the hearing, except when their statements are needed. The hearing will be private and all persons present at the hearing will consider all information presented to be confidential. Individuals appearing before the Hearing Committee have the responsibility of presenting truthful information. The Hearing Committee, in reaching its decision, will evaluate the credibility of the parties and any witnesses. The student and involved faculty member(s) may make an opening statement. Presentation of evidence will only be made during the hearing. During the hearing, the Hearing Committee members may address questions to any party or witness. Both the involved faculty member(s) and the student may present materials described in item #6 above (or as included with the student's request for grievance hearing) before the Hearing Committee and in the presence of the other party. The conduct of the hearing is informal, and the Hearing Committee is not bound by rules of evidence or court procedures. Matters of procedure will be decided by the Chairperson of the Hearing Committee.
9. Within three business days of the hearing, the Hearing Committee will render a decision.
10. Within two weeks of the Hearing, the Chairperson of the Hearing Committee will communicate a summary of the Hearing Committee's findings and decision, in writing, to the student, faculty member(s) involved, Program Director, and Dean. E-mail is permitted.
11. In cases of a grade dispute, if the Hearing Committee renders a decision in support of the student's petition, the faculty member submits a grade-change request consistent with the Hearing Committee's findings. If the Hearing Committee finds that the student's petition is without merit, the grade shall remain unchanged.
12. If a student is grieving a grade associated with a clinical experience, and the Hearing Committee determines that the faculty grading was in significant violation of clearly established written school policies, or the result of improper procedures, or was capricious, the Hearing Committee will communicate the decision to the Assistant Dean of Graduate Clinical Programs or the Assistant Dean of the Undergraduate BSN Program. Notwithstanding this decision, the Hearing Committee and/or the Assistant Dean may require an independent re-evaluation of the student's performance (knowledge, skills, or behavior).
13. If it is judged by the Hearing Committee or the Assistant Dean that an independent reevaluation of the student's performance is warranted, the Assistant Dean will communicate the need for the evaluation to the Program Director, who will arrange for an independent reevaluation of the student that may involve a clinical, lab, or simulation session by a faculty member not known to the student. This independent reevaluation summary will be forwarded to the Hearing Committee and the Assistant Dean for a final determination of the course grade.

Appeals Process

The procedure for an appeal of a Hearing Committee decision varies depending on whether the student is enrolled in a program in the MNSON or if the student is enrolled in a degree program housed in the Graduate School.

1. Students enrolled in a program in the MNSON have a right to appeal in writing to the Dean within 30 days of notice of the Hearing Committee's decision. The decision of the Dean is final (except in cases of expulsion, in which case the sanction may be imposed only by the Senior Academic Officer upon recommendation of the Dean).
2. Students in the MNSON enrolled in degree programs housed in the Graduate School may appeal the MNSON's Hearing Committee decision by requesting a Graduate School hearing in accordance with the Graduate School's Academic Grievance Procedure (p. 2029). The request must be made to the Graduate School Dean within 30 days of the decision by the Hearing Committee and must specify the nature of the grievance and prior attempts to resolve the matter. A party may appeal the decision of the Graduate School hearing board to the Graduate School Dean in writing within 30 days of notification of the Graduate School hearing board's decision and must include an explanation of the basis for the appeal. The Graduate School Dean's decision is final in all cases (including dismissal from a Graduate School program), except those involving possible expulsion from the University, which may be imposed only by the Senior Academic Officer.

Access to Records/Federal Educational Rights and Privacy Act of 1974, as amended (FERPA)

In accord with the FERPA, students are allowed access to their records, files, and other data directly related to them. To obtain access, a written request must be submitted to the Assistant Dean of Graduate Clinical Programs. Please allow a two-week interval after submission of the initial request for access to records. Records and files may not be removed from the Marcella Niehoff School of Nursing.

Accessibility

Loyola University Chicago provides reasonable accommodations for students with disabilities. Any student requesting accommodations related to a disability or other condition is required to register with the Student Accessibility Center (SAC). Professors will receive an accommodation notification from SAC, preferably within the first two weeks of class. Students are encouraged to meet with their professor individually in order to discuss their accommodations. All information will remain confidential. Please note that in this class, software may be used to audio record class lectures in order to provide equitable access to students with disabilities. Students approved for this accommodation use recordings for their personal study only and recordings may not be shared with other people or used in any way against the faculty member, other lecturers, or students whose classroom comments are recorded as part of the class activity. Recordings are deleted at the end of the semester. For more information about registering with SAC or questions about accommodations, please contact SAC at 773-508-3700 or email (SAC@luc.edu).

Clinical Experiences Information

Clinical Affiliation Agreements

An executed Clinical Affiliation agreement between Loyola University Chicago and the clinical agency is a requirement of every student's clinical practicum placement. In consultation with their Program Director, students may seek a clinical preceptor who is employed by a site not currently affiliated with Loyola University Chicago. In these cases, students complete the form titled "Information Worksheet for New Clinical Preceptors and Sites" which can be found in the Sakai site "Information for MSN and Certificate Students". Because this process can take a considerable amount of time, students must submit this completed form to their respective Program Director at least 6 months prior to the clinical rotation.

New preceptor referrals are welcomed and coordinated through the School of Nursing Graduate Clinical Team (SONGradClinical@luc.edu). Please do note that adequate time is needed to secure necessary paperwork for new sites and preceptors. Students must be prepared to balance personal and academic responsibilities and engage fully in all aspects of the program, even when they are unfamiliar or inconvenient. This includes honoring the time and schedules of clinical preceptors, whose mentorship is essential to your professional development. Logging of clinical hours needs to occur in a timely manner and is recommended to occur weekly per student. Completion of required hours and required data fields will need to reflect the required hours to receive a passing grade for clinical content.

Dress Code and IDs

Recognizing that graduate students in our program serve as role models to staff nurses, undergraduate students, and represent the School of Nursing and the University, professional clothing and behavior is expected at all times. Professional dress regulations vary in specific clinical agencies; however, denim jeans, shorts, off the shoulder apparel, or short skirts or dresses in clinical sites are unacceptable. Body piercing other than a single earring in each ear must be removed while at the clinical agency. Students arriving at a clinical site in inappropriate clothing may be asked to leave the site.

A Loyola University Health Sciences Campus (HSC) ID badge is required for all students seeking access to the Health Sciences Campus. This can be obtained from the Parking Office, located on the first floor of the Mulcahy Building. Students interested in using the facilities at the LUC Lake Shore and/or Water Tower campuses may want to obtain a LUC ID. The LUC ID is a different card and ID number than the HDS ID. Students can obtain this ID from the Campus Card office (http://www.luc.edu/campuscard/).

Uniform Guidelines

Recognizing that graduate students in our program serve as role models to staff nurses, undergraduate students, and represent the School of Nursing and the University, professional clothing and behavior is expected at all times. Uniform guidelines for clinical experiences are as follows:

- Loyola student ID and Agency-Required ID, if applicable
- White lab coat with MNSON insignia patch on the upper left arm sleeve
- Shoes should be clean, well-polished, in good repair, and dedicated to work setting Health/State Requirements for Practicum Courses

Loyola University Chicago and MNSON are committed to fostering a safe learning environment and protecting the health and well-being of students and patients. All MSN students are required to submit documentation of health and additional requirements PRIOR to being assigned a clinical placement. These requirements are based on the Centers for Disease Control and Prevention (CDC) recommendations for healthcare providers and the health agencies' policies as well as part of the individual Clinical Affiliation Agreements between Loyola University and our clinical facilities.

CastleBranch© is the platform used to track and manage immunizations and other clinical requirements. Detailed instructions are provided through an orientation program scheduled before clinical practicum coursework is started.

Documentation may need to be updated and additional information may be necessary depending on clinical placement.

Students are also required to submit documentation of the required State of Illinois immunizations (https://www.luc.edu/wellness/medical/immunizations/).

All MNSON students are required to obtain an annual flu immunization. Documentation of this immunization must be uploaded to the Loyola Health App by the specified deadline each year. Please note that, for students in clinical experiences, the deadline for obtaining and submitting documentation of the flu immunization is earlier than the university deadline.

Clinical Requirements [1]

The Clinical Affiliation Agreement between the MNSON and our clinical facilities requires the following documentation of all students; forms and further information are available in Clinical Requirements link on the left side of the Sakai site "Information for MSN and Certificate Students."

- COVID vaccinations (shared clinical decision-making)
- Measles, Mumps & Rubella (MMR)
- Varicella (Chicken Pox)
- Hepatitis B
- TB Screening
- Tetanus, Diphtheria & Pertussis (Tdap)
- CPR Certification
- Physical Examination
- Health Insurance
- Influenza
- Professional License
- HIPPA Certification
- OSHA Certification
- Criminal Background Check[2]
- Urine Drug Screen
- Professional CV
- Release of Information Form

[1] Health and safety requirements are subject to change in order to maintain compliance with state and federal requirements, Center for Disease Control requirements and standards of practice.

[2] While not required for admission, you'll also need to complete a criminal background check before you can begin your clinical practicums. Please be aware the results of your background check may impact our ability to place you in a clinical/practicum setting.

Professional and Safe Behavior in the Practicum Setting

Students are expected to maintain professional behavior at all times while participating in MNSON programs and practicum. Consistent with the mission of the MNSON mission, respect for clients, faculty, staff, and student colleagues is expected. Graduate students are expected to display professional behavior, such as honesty, punctuality, maturity, and respectful communication with faculty, preceptors and clients at all times. Unethical or unprofessional behavior may result in disciplinary action to the student, ranging from verbal or written warning, to withdrawal from the clinical setting, or to dismissal from the program

Communication within the Program

All faculty and staff email communication with students is conducted via the Loyola University Chicago email account; students are responsible for consistently checking email throughout the program. To re-route Loyola email, students set a preferred email address using the LUC Password Self-Service tool.

Course and Comprehensive Examinations

Course Examinations

It is expected that students will take course examinations at the scheduled time. The student should not enroll in a course if conflicts with the course schedule and/or examinations are anticipated.

Absence from scheduled examinations is not excused except in cases of a serious emergency; in those cases, the student should contact the faculty member for possible options. Students are expected to be available through the final exam week of the semester if a final examination is included in a course.

Comprehensive Examination

Students must successfully complete the Comprehensive Examination to fulfill MSN degree requirements. The comprehensive exam consists of two components: submission of a publishable paper and an oral presentation (see Appendix section). A student may only repeat the Comprehensive Examination once.

Comprehensive Examination Guidelines

All students must successfully complete the Comprehensive Examination in order to fulfill MSN degree requirements.

The comprehensive exam is made-up of two parts:

1. Submission of a paper that is of publishable quality.
   a. An acceptable scholarly paper of publishable quality is required of all MSN students. Publishable is the key word; the paper does not need to be published for the student to pass the comprehensive examination. This paper will demonstrate the student's nurse leader, theory, and academic expertise.
2. Oral presentation of the paper.
   a. Once the student has passed the written part of the comprehensive exam, an oral presentation is required. This presentation takes place at the Day of Scholarship on the Loyola University Chicago Health Sciences Campus in Maywood IL. All students must participate in the full Day of Scholarship activities, including the student presentations and the Recognition Ceremony.

** Successful completion of both the written and the oral comprehensive exam is required before the MSN degree is conferred.

** If the student has completed all course work and is completing the Comprehensive Exam during a semester when they have no further courses to take, the student must register for the course GNUR 605 for no credit in order to maintain graduate status. A fee is assessed for enrollment in GNUR 605.

** At least 80 percent of coursework must be completed in order for the student to participate in the Comprehensive Exam. Any outstanding incomplete (I) grade must be removed before the final submission of the Comprehensive Exam paper.

Comprehensive Exam Procedure

- Choosing a Paper Topic.
  - The student is encouraged to select a topic that is of interest to her/him and would add to the body of nursing knowledge.
- Choosing a Comprehensive Examination Faculty Director.
  - The Comprehensive Examination includes a two-semester process, the details of which are outlined in the "Information for MSN and Certificate Students" Sakai site. Each student must select a Comprehensive Examination Faculty Director who will work with them in the development of the paper. Students are encouraged to select a Comprehensive Examination Faculty Director who has knowledge and expertise on the topic that the student has chosen. The Comprehensive Examination Faculty Director serves in an advisory role and evaluates the final copy of the Comprehensive Examination paper as pass/fail.
  - School of Nursing faculty members serve as Comprehensive Exam Faculty Director to a limited number of students per academic year. Therefore, students are encouraged to contact their desired Comprehensive Examination Faculty Director early.
  - Comprehensive Examination Faculty Directors are full-time faculty members in the School of Nursing. In unique situations, a student can negotiate with a part-time faculty member to serve as Comprehensive Examination Faculty Co-Director. Part-time faculty Co-Directors must meet the following criteria: 1) have demonstrated expertise related to the Comprehensive Examination topic; 2) teach on a regular basis in the MSN program, 3) be approved by the Master's and Doctoral Program Committee, and 4) be assigned a full- time faculty member to oversee the Comprehensive Examination process and product. In the case of Comprehensive Examination Co-Directors, both the full and part-time faculty member signatures must appear on the Comprehensive Examination Faculty Director Agreement Form.
- Filing the Proposal.
  - Upon receiving approval for the topic of the paper from the chosen Comprehensive Examination Faculty Director, students are required to complete and submit the "Proposal for Comprehensive Exam" form, which must be signed by the Comprehensive Examination Faculty Director by the due date and time posted in Sakai. This signed submission in Sakai becomes the timed record documenting submission for the Faculty Director.
- Query Letter.
  - With the assistance of the Comprehensive Examination Faculty Director, the student is to choose a journal and submit a query letter to the editor prior to preparing the manuscript. According to the selected journal, this query letter can be sent electronically, as an email attachment, or in hard copy.
- Deadlines.
  - All deadlines for comprehensive exam submissions are posted in Sakai under the "Information for MSN and Certificate Student" Sakai site. The student should discuss deadlines with the Comprehensive Examination Faculty Director and plan a schedule for submission of the required materials.
  - Students submit two copies of their paper: an initial copy and a final copy. The initial copy of the paper and the final copy must be received by the Comprehensive Examination Faculty Director by the posted deadlines or the paper will not be reviewed.
- Initial Copy.
  - Each student is assigned to a Comps Sakai site with their Comps Faculty Advisor and Program Director, which can be seen in the Sakai menu. Using this site, students submit all required Comprehensive Exam documents, including the following: the first initial paper using TurnItIn; the final copy of the paper; the Day of Scholarship form, and the Manuscript Query Letter.
  - The initial copy of the Comprehensive Exam must be submitted by the deadline posted in Sakai. The initial copy should be very close to being a completed paper. If the student submits an incomplete initial copy, the Comprehensive Examination Faculty Director will return the paper for further work without a review.
- Final Paper
  - Students use the feedback received from the initial copy to complete their final paper. The final paper is submitted through the Comps Sakai site by the posted deadline. No exceptions or deadline extensions will be made. Failure to meet this deadline results in a delay of program completion and graduation.
  - Along with the final paper the following must also be submitted via the Comps Sakai site: the query letter that was sent to the editor and the 'Day of Scholarship' form located in Sakai.
- Student/Faculty Authorship.
  - The student will always be the first author and the solo author prior to graduation. After graduation, should the graduate choose to continue to pursue publishing with the assistance and participation of the Comprehensive Examination Faculty Director, authorship responsibilities must be negotiated and consistent with the authorship guidelines of the journal.
- Grades for the Comprehensive Exam Paper.
  - Comprehensive exams will be graded by the Comprehensive Examination Faculty Director as follows:
    - Pass: The student has met requirements for the Comprehensive Examination paper.
    - Fail: In cases where the Comprehensive Examination Faculty Director evaluates the paper as not passing, two other faculty members will independently evaluate the paper. The three evaluators will then determine a consensus regarding the outcome of the Comprehensive Examination. The Comprehensive Examination Faculty Director also has the option of bringing the paper to the Master's and Doctoral Program Committee (MDC) for evaluation. The student may attempt to pass the comprehensive exam two times.

Paper Guidelines

- The scholarly paper should demonstrate the knowledge synthesized from the entirety of the MSN program. The topic must reflect advanced practice nursing knowledge using literature reviews and research critiques as a basis.
- The format of the paper will follow the journal guidelines to which the paper will be submitted.

- General guidelines for paper format:
  - Title.
  - Abstract.
  - Introduction.
  - Topic/Issue.
    - Thorough review of current literature.
    - Thorough synthesis of recent research.
    - Citations should be not more than five years old except for the seminal works.
  - Discussion.
    - Professional issues involved.
    - Strategies to address the issues.
  - Summary/Conclusion.

**These guidelines may be modified with consent of the Faculty Director, according to the format of the journal selected or the particular topic being addressed.

**Page limit should be approximately 15 to 25 pages, not including appendices, references, and title page. Although many journals may limit the submission to 12 to 15 pages, this may not be sufficient to meet the requirements for passing the comprehensive exam.

Evaluation Using the Following Criteria

- Form.
  - Format - margins, spacing, abbreviations, pagination, footnotes, quotations, and other details should be consistent with APA (latest edition) or the format of the journal to which the student chooses to submit. References are appropriate and written correctly.
  - Grammar - appropriate professional terminology, complete sentence structure, congruent verb tenses, proper punctuation, correct spelling, and clarity.
  - Idea Development - the degree of discussion devoted to the specific sections of the paper is appropriate (i.e., introduction, topic/issue, discussion, conclusion.).
  - Organization - the paper is organized so that it flows logically from the introduction to the summary. Headings and subheadings are included throughout the paper; the internal organization of the paper must be consistent with sections as listed.
  - Appearance - double spaced, typed, and neat.
- Resources.
  - Journal Articles - students may be asked to provide a copy of each journal article cited in the paper. These copies will not be returned to the student.
  - Diversity of Resources - a variety of pertinent nursing, psychiatric, allied health, and other literature must be included. Personal interviews must be noted as to the qualifications of the person(s) interviewed and must be appropriate and experts on the topics. Interviewees and/or references must be recognized by faculty as acceptable.
  - Internet References - Internet references should be kept to a minimum within the paper and come from a scholarly, peer-reviewed, reputable cite (i.e., CDC, NIH, etc.). Personal web pages and product cites (i.e., Lilly, Cook Care, etc.) are not allowed.
  - Current - no literature over five years old is used unless it is a "classic," i.e., original work upon which other concepts, theories, etc. are based (i.e., Selye's Stress of Life).
  - Adequacy - a minimum of 20 references are recommended for the comprehensive exam.
- Content.
  - Title - clear, concise, and descriptive; clearly delineates the intent of the paper.
  - Abstract - specific, representative of the manuscript, and in the correct format.
  - Introduction - defines specific topic precisely enough to allow in-depth coverage, explains rationale for selecting the topic (including its applicability to advanced practice), and delineates subject areas to be discussed in the paper.
  - Topic/Issue.
    - Citations should be less than five years old, except when citing classics or historical information. Objectively provides precise information pertinent to subject area under discussion. Literary review provides background information necessary to understand the problem under discussion. Review includes enough data and discusses a full and sufficient variety of view-points to validate the conclusion. Nursing and related literature must be included and are current and timely. Tables and figures compliment the text.
    - Inclusion and discussion of relevant research as it pertains to the topic. The student is expected to place an emphasis on articles that report on evidence- based practice. The synthesis and interpretation of research is accurate.
  - Discussion.
    - Presents a clear, concise analysis of the problem as it relates to advanced practice by synthesizing clinical experiences, personal experiences, didactic content, etc.
    - Demonstrates knowledge and understanding of the topic under discussion by realistically identifying implications for action related to client, self, nursing, and other professionals. Identifies strategies for change, professional issues involved, and strategies to address the issues.
  - Summary/Conclusion - presents a concise and accurate condensation of relevant elements from both resource data and discussion segments of the paper. Itemized major suggestion, changes, and recommendations from the rationale for the paper and as inferred by the body of the paper.
- Originality.
  - The information is fresh, new, timely, and useful to the reader. The student presents the material in a creative and useful manner.

Criteria for the Comprehensive Exam Oral Presentation

- Overall Guidelines. Students are required to attend the Recognition Ceremony, which immediately follows the oral presentations.
  - The presentation must be done using PowerPoint.
    - The student is required to review the PowerPoint presentation with the Faculty Director prior to the oral presentation.
    - The student must bring her/his/their presentation on a USB flash drive that will be loaded into a computer.
    - The projector for the presentation will be supplied.
  - Format for Presentation.
    - The paper presentation is limited to 10 minutes, followed by up to ten minutes for discussion with the audience. The following is the recommended format; this format may be adapted to fit the topic. On slides 2-7, include a text box with citations including the author(s) and year of publication.
    - Slide 1.

- Title of paper.
- Journal queried.
- Student name and program track.
- Name of director of comprehensive examination.

- Slide 2.
  - Introduction and significance.
    - Why this topic was chosen.
    - Why this topic is important.
- Slides 3-7.
  - Summary of key points.
    - What is known about this topic?
    - What remains unknown about this topic.
    - Conclusions/recommendations for future action.
- Slide 8.
  - Implications for advanced practice.
- Slide 9.
  - Selected references
- Slide 10.
  - Acknowledgements.

- Conduct of Presenter.
  - The student may not leave the room during the presentations. This is discourteous to the other presenters.
  - The student's attire must be business professional.
- Guests.
  - Students are encouraged to invite family, friends, and colleagues. However, due to room size constraints, each student should limit the number of invitees to six.

Course Evaluations

At the end of every semester, students are provided with the opportunity, entrusted with the responsibility, and strongly encouraged to evaluate each course and each faculty member. Students are informed of the evaluation procedure before the end of the semester.

Deferred Matriculation

Accepted students who wish to defer matriculation to a subsequent term must receive approval from the Assistant Dean of Graduate Clinical Programs. Admitted students may request deferral for one year. If the student does not enroll after one year, they must re-apply to the program. If approval is granted, the student will enter the MSN program under the program requirements for the term of matriculation, rather than the initial terms of acceptance.

Degree Conferral and Graduation

The conferral of the MSN degree occurs after an audit confirms the following:

1. the student has completed all MSN coursework with acceptable grades;
2. the student has met all MSN degree requirements within the required time limit;
3. the student has completed and passed the MSN Comprehensive Examination; and
4. all financial indebtedness and other obligations to the University (e.g., closure of IRB protocol) have been satisfied.

The MSN degree is conferred following each semester on a date specified by Loyola University Chicago and is noted on the student's official transcript. Prior to that date, a student cannot claim the MSN credential. Additionally, the MNSON does not endorse the use of (c) at any time during program matriculation [e.g., MSN (c)] to represent candidacy for the degree.

The process of MSN degree conferral is different than the application for graduation, and participation in, the Loyola University Chicago graduation ceremony. All students must apply for graduation in LOCUS, regardless of the semester in which they complete the MSN program, and regardless of their intent to participate in the ceremony.

Deadlines for graduation application are posted on the Loyola University Chicago website (http://www.luc.edu/regrec/graduation_diplomas.shtml/). If a student applies for graduation but does not complete the MSN degree requirements by the end of the intended graduation semester, that student must submit a new graduation application. The Loyola University Chicago graduation ceremony is held once each year, in May, at the Lakeshore Campus. Those students who have earned a GPA of 3.85 or higher are provided with an Honor Cord to be worn at the graduation ceremony.

Checklist for Program Completion and Graduation

- In the semester prior to the one in which the last course is being taken, meet with your Program Director to ensure that all course requirements have been met and that all "I" grades have been removed.
- All students must apply for graduation within LOCUS. The graduation application deadlines are:
  - Fall graduation: August 1
  - Spring graduation: December 1
  - Summer graduation: February 1
- Ensure that all outstanding fees/bills are paid and library books returned or official transcripts and diploma will not be issued.

Formal Complaint Policy by Student

A formal complaint is defined by Loyola University Chicago's (the "University") Marcella Niehoff School of Nursing (the "MNSON") as any substantive complaint or concern, put forth in writing, by a student which requires a response from the administration of the MNSON.

Formal complaints may originate within the MNSON, or through a mechanism external to the MNSON, such as a University grievance process or the EthicsLine Reporting Hotline.

The MNSON adheres to all applicable University policies regarding the filing, review and resolution of formal complaints, as defined herein. The nature of the complaint dictates the review and resolution processes, as detailed further in this policy.

General Guidelines

- Student Complaints Related to Academic Issues.
  - Formal student complaints related to academic disputes involving the appropriateness of course grades and accusations of academic dishonesty are addressed through the MNSON's Academic Grievance and Appeals Process. Students enrolled in degree programs housed in the Graduate School may also invoke the procedures under the MNSON Academic Grievance and Appeals Process to address disputes relating to dismissal from a program. Students enrolled in degree programs housed in the Graduate School whose disputes are related to course grades, accusations of academic dishonesty, or dismissal from

a program, are not resolved after a hearing within the MNSON may continue the academic grievance process in accordance with the Graduate School's Academic Grievance Procedure (p. 2029).
    - Formal student complaints relating to decisions affecting undergraduate academic standing or progress are addressed through the University's General Academic Appeals (p. 1919) process.
    - Formal student complaints relating to undergraduate changes of academic records or dismissal for poor scholarship are addressed through the University's Special Academic Appeals (p. 1919) process.
- Student Complaints Related to Non-Academic Issues.
    - The University admits students without regard to their race, color, religion, sex, age, sexual orientation, gender identity, national or ethnic origin, ancestry, disability, marital status, parental status, military/veteran status, or any other characteristic protected by applicable law to all the rights, privileges, programs, and other activities generally accorded or made available to students at the school. The University does not discriminate on the basis of race, color, religion, sex, age, sexual orientation, gender identity, national or ethnic origin, ancestry, disability, marital status, parental status, military/veteran status, or any other characteristic protected by applicable law in the administration of its educational policies, admissions policies, scholarship and loan programs, and athletic and other school-administered programs, or in any aspects of its employment of faculty and staff. Students within the MNSON with questions about this policy or who believe they have been discriminated against because of their race, color, religion, sex, age, sexual orientation, gender identity, national or ethnic origin, ancestry, disability, marital status, parental status, military/veteran status, or any other characteristic protected by applicable law, may contact the EthicsLine Reporting Hotline at (855) 603-6988 or submit a report online (https://www.luc.edu/ethicsline/).
    - Questions regarding Title IX may also be referred to the University's Title IX Coordinator, Timothy Love, Executive Director for Equity & Compliance, via email (tlove@luc.edu) or at (773) 508-7766. For more information please visit the Office for Equity and Compliance, Title IX webpage (https://www.luc.edu/equity/titleixequitylaws/titleix/).
    - Questions regarding Title VI of the Civil Rights Act of 1964 ("Title VI") may also be referred to the Office for Equity and Compliance via email (equity@luc.edu) or at 773.508.7766. For more information please visit the Office for Equity and Compliance, Title VI webpage (https://www.luc.edu/equity/titleixequitylaws/titlevi/).
    - Questions regarding Section 504 of the Rehabilitation Act of 1973 ("Section 504") may also be referred to Timothy Love, Executive Director for Equity & Compliance, via email (tlove@luc.edu) or at (773) 508-7766. For more information please visit the Office for Equity and Compliance, ADA and Section 504 webpage (https://www.luc.edu/equity/titleixequitylaws/ada504/).
- Complaint Referral.
    - University administrators may refer certain formal complaints from MNSON students, including complaints made through the EthicsLine Reporting Hotline, to the MNSON Dean's office for appropriate action, including assistance in the investigation of a report. Where appropriate, the Dean will assign an administrator from the MNSON to assist in the investigation. Such assignments are made with consideration of the need for the investigation to proceed in an objective and non-biased manner.
- Complaints Received through the EthicsLine Reporting Hotline.
    - The EthicsLine Reporting Hotline exists as a means for University faculty, staff, students, administrators or other concerned parties to report activities that involve misconduct or violation of University policies. Reports may be made online (https://www.luc.edu/ethicsline/) or by dialing 855-603-6988.
    - As explained at the EthicsLine webpage (https://www.luc.edu/ethicsline/):
        - The University is committed to the highest ethical and professional standards of conduct as an integral part of its mission of expanding knowledge in the service of humanity through learning, justice and faith. To achieve this goal, the University relies on each community member's ethical behavior, honesty, integrity and good judgment. Each community member should demonstrate respect for the rights of others.
        - The University strongly encourages all faculty, staff, students, administrators or other concerned parties to use this Reporting Hotline to report suspected or wrongful acts of conduct by Loyola University Chicago community members. No University administrator, faculty, staff or student may interfere with the good faith reporting of suspected or actual wrongful conduct; no individual who makes such a good faith report shall be subject to retaliation, including harassment or any adverse employment, academic or educational consequence, as a result of making a report.
    - All reports to the EthicsLine Reporting Hotline are made available to specific individuals within the University on the University's EthicsLine Reporting Hotline Resource Team (the "Resource Team") who are charged with carefully reviewing and evaluating the report and assigning it to an appropriate case manager/investigator on the Resource Team, based on the type of alleged violation and location of the incident. The EthicsLine Reporting Hotline System does not create a new category of prohibited behavior or a new process for members of the University community to be disciplined or sanctioned. The Resource Team has no authority to discipline any student or member of the faculty or staff. When reported conduct is subject to existing University disciplinary or judicial procedures, appropriate referrals will be made by the Resource Team.
    - Reports submitted through the EthicsLine Reporting Hotline are handled as promptly and discreetly as possible, with facts made available only to those who need to investigate and resolve the matter. Individuals filing a report may follow-up online on the status of a report and to determine if further information is needed to proceed with an investigation.

Unprofessional Behavior and Conduct of Marcella Niehoff School of Nursing Students

Exemplary behavior of students in Loyola University Chicago's (the "University") Marcella Niehoff School of Nursing (the "MNSON"), consistent with the standards of the nursing and health professions, is expected at all times. Students in the MNSON are expected to abide by the policies regarding professionalism in applicable student handbooks as well as the syllabi for each course, including professional behaviors with respect to attendance, punctuality, dress, demeanor, integrity and ethical conduct relative to the nursing and health professions. Professional conduct by the student facilitates learning opportunities and

fosters good working relationships within the MNSON and between the MNSON and clinical agencies or institutions.

Complaints related to unprofessional behavior and conduct by students within the MNSON may originate from faculty, staff, other students, or from outside the University, such as a clinical site.

Issues of unprofessional behavior or conduct that occur during a clinical learning experience are addressed through the evaluation of student performance in the course, as detailed in the course syllabus. If a student believes the grading related to his/her professional behavior and conduct is the result of a significant violation of clearly established written school policies, is the result of improper procedures, or is capricious, the student may pursue a grievance in accordance with the MNSON Academic Grievances and Appeals Procedure as written in the Undergraduate and Graduate Program Student Handbooks.

Complaints of unprofessional behavior or conduct within a classroom, simulation, or lab experience, or outside a clinical learning experience, are addressed through a formal complaint resolution process, as specified below.

1. The first attempt at resolution of the complaint should occur between the student and the other parties involved.
2. If the complaint of unprofessional behavior or conduct is not resolved among the parties involved, a formal complaint, in written form, is forwarded to the Program Director of the student's degree program.
3. The Program Director reviews the complaint, any supporting documentation submitted by any of the parties, and meets with the parties involved individually. If the Program Director is directly involved in the complaint, the complaint instead is forwarded to the Assistant Dean of Graduate Clinical Programs or the Assistant Dean of the BSN Program.
4. If the complaint is not resolved at the level of the Program Director, the Program Director submits a recommendation for any action to be taken, along with any supporting documentation, to the Assistant Dean of Graduate Clinical Programs or the Assistant Dean of the BSN Program with jurisdiction over the degree program in which the student is enrolled.
5. The Assistant Dean of Graduate Clinical Programs or the Assistant Dean of the BSN Program, upon review of the recommendation, complaint and supporting documentation, meets with the parties to the complaint.
6. The Assistant Dean of Graduate Clinical Programs or the Assistant Dean of the BSN Program may dismiss the complaint or, upon finding that the student has engaged in unprofessional behavior and conduct, institute progressive corrective action with the student. Progressive corrective action typically begins with a verbal warning (documented) to the student, which details the nature of the complaint, corrective actions to be taken, and notifies the student that failure to correct the unprofessional behavior or conduct may result in more severe corrective action. The nature of the behavior dictates the severity of the action. The behavior may warrant immediate action beyond a verbal warning.
7. If the unprofessional behavior or conduct continues, the Assistant Dean of Graduate Clinical Programs or the Assistant Dean of the BSN Program may issue a written warning, which details the nature of the continuing concern related to unprofessional behavior or conduct, further corrective actions that are required, and notifies the student that failure to correct the unprofessional behavior or conduct may result in the student's withdrawal from a course or a recommendation for dismissal from the academic program. The decision to recommend a withdrawal or dismissal is based on the nature and severity of the unprofessional behavior.
8. If the unprofessional behavior or conduct continues, the Assistant Dean of Graduate Clinical Programs or the Assistant Dean of the BSN Program will either withdraw the student form a course or make a recommendation for dismissal from the academic program.
9. If the student is withdrawn from the course, the student will receive a W or WF for the course depending on the time the decision is made.
10. The Assistant Dean of Graduate Clinical Programs or the Assistant Dean of the BSN Program may submit to the Senior Associate Dean for Academic Affairs a recommendation for the student's dismissal from the academic program, after the verbal and written warning steps are completed, if the unprofessional behavior or conduct continues. The Senior Associate Dean for Academic Affairs may authorize the student's dismissal from the program of study, in all cases except where expulsion from the University is also recommended (see #12 below).
11. A student who wishes to appeal a decision impacting his/her academic standing or progress at the University may make a written request for an appeal within 30 calendar days of the disputed decision being rendered, consistent with the University's policy on General Academic Appeals (p. 1919). The appeal will be reviewed and considered by the MNSON Dean within 30 calendar days of the receipt of the written student request for an appeal. The appeal decision made by the Dean is final and is ineligible for further appeal.
12. In cases where a student's expulsion from the University for Unprofessional Behavior and conduct is considered, the Senior Associate Dean for Academic Affairs forwards all relevant.

Harassment (Bias Reporting)

It is unacceptable and a violation of university policy to harass, discriminate against or abuse any person because of his or her race, color, national origin, gender, sexual orientation, disability, religion, age or any other characteristic protected by applicable law. Such behavior threatens to destroy the environment of tolerance and mutual respect that must prevail for this university to fulfill its educational and health care mission. For this reason, every incident of harassment, discrimination or abuse undermines the aspirations and attacks the ideals of our community. The university qualifies these incidents as incidents of bias.

In order to uphold our mission of being Chicago's Jesuit Catholic University - a diverse community seeking God in all things and working to expand knowledge in the service of humanity through learning, justice and faith, any incident(s) of bias must be reported and appropriately addressed. Therefore, the Bias Response (BR) Team was created to assist members of the Loyola University Chicago community in bringing incidents of bias to the attention of the university. If you believe you are subject to such bias, you should notify the Bias Response Team online (https://www.luc.edu/hr/biasreporting.shtml/).

Funding and Financial Aid Information

Office of Student Financial Assistance

The Office of Student Financial Assistance houses resources and references about financial aid for students, at the Lake Shore and Water Tower campuses.

Office of Student Financial Assistance (http://www.luc.edu/finaid/graduate.shtml/) | Email (lufinaid@luc.edu) | 773.508.7704

In order to determine eligibility for financial assistance students must complete the Free Application for Federal Student Aid (FAFSA). If a student receives federal loans they must be enrolled at least half- time. A graduate student must be enrolled in at least 4 graduate semester hours in the fall and spring semester and at least 2 semester hours in the summer semester to be considered half-time. Full-time enrollment is defined as 8 graduate semester hours in the fall and spring semester and 6 semester hours in the summer semester. However, when students enroll in clinical practicum courses, they are classified as full-time status.

Tuition and Fees

Information on current tuition and fees is available each semester on the Loyola University Chicago Bursar Office website. It is the student's responsibility to be aware of the University's policy on tuition and fees.

For more information about the Office of the Bursar, visit their website (https://www.luc.edu/bursar/) or call 773.508.7705.

Tuition Term Payment Plans

The University offers students tuition payment plan options. Information about tuition payment options is available through the Bursar's Office (https://www.luc.edu/bursar/payment.shtml/).

General Information

Loyola's Universal ID (UVID)

Students receive a student logon ID and password from the Graduate Enrollment Management office following admission to the Master's and certificate programs. This ID is necessary to register for courses in LOCUS, access student email, and log-in to Sakai. Students encountering problems with registration involving logon should contact the HelpDesk (ITSServiceDesk@luc.edu) at 773-508-7190.

Change of Personal Information

It is the responsibility of the student to change her/his/their name, address, phone number, or any other pertinent information in the LOCUS (https://locus.luc.edu) system. Failure to comply with this requirement may result in returned mail or email, thereby causing the student to miss valuable announcements or information.

Computer Lab

Computers and media-assisted learning available for student use are located in the Information Commons on the first floor of the School of Nursing building on the Health System Campus (708-216- 9101).

Information Technology Services

Assistance for students can be found online (https://www.luc.edu/its/services/technologyroadmap/newstudents/).

Parking

Parking is limited on all campuses, and public transportation is encouraged. Parking and traffic regulations are enforced by the issuance of traffic citations that provide for a fine. A car in violation may be towed when circumstances warrant such action. For further parking information, contact:

- Health System Campus - 708-216-9092
- Lake Shore Campus - 773-508-7036
- Water Tower Campus - 312-915-6698

Security

The Security Department strives to maintain a safe environment on the various campuses of the University, 24 hours a day, and seven days a week. Escort service is available on the Health Sciences and Lake Shore campuses. Students should report any suspicious or hazardous conditions on or near campus to the Security Department.

- Health System Campus: 708-216-9077
- Lake Shore Campus: 773-508-6039

School Address and Contact

Marcella Niehoff School of Nursing

2160 South First Avenue, Maywood, IL 60153

Phone: 708-216-9101, Fax: 708-216-9555

Grades and Academic Policies

Academic Integrity

A basic mission of a university is to search for and to communicate the truth as it is honestly perceived. A genuine learning community cannot exist unless this demanding standard is a fundamental tenet of the intellectual life of the community. Students at Loyola University Chicago are expected to know, to respect, and to practice this standard of personal honesty.

Academic honesty is an expression of an ethic of interpersonal justice, responsibility, and care, applicable to Loyola University Chicago faculty, students, and staff, that demands that the pursuit of knowledge in the university community be carried out with sincerity and integrity. Academic dishonesty is the failure to apply this ethic, (i.e., any action whereby faculty, student, or staff misrepresents the ownership of academic work submitted in her or his own name).

Academic dishonesty can take several forms, including, but not limited to, cheating, plagiarism, copying another student's work, and submitting false documents.

Academic cheating is a serious act that violates academic integrity. Cheating includes, but is not limited to, such acts as:

- Obtaining, distributing, or communicating examination materials prior to the scheduled examination without the consent of the instructor.
- Providing information to another student during an examination.
- Obtaining information from another student or any other person during an examination.
- Using any material or equipment during an examination without consent of the instructor or in a manner not authorized by the instructor.
- Attempting to change answers after an examination has been submitted.
- Removing examinations from the classroom.
- Unauthorized collaboration, or the use, in whole or part, of another student's work, on homework, lab reports, programming assignments, and any other course work that is completed outside of the classroom.
- Falsifying medical or other documents to petition for excused absences or extensions of deadlines.

- Using Artificial Intelligence (AI) assisted technology in the classroom or for assignments, quizzes, tests, papers, or any other deliverable, unless specifically authorized to do so by the course faculty.
- Any other action that, by omission or commission, compromises the integrity of the academic evaluation process.

Plagiarism is a serious form of violation of the standards of academic dishonesty. Plagiarism is the appropriation of ideas, language, work, or intellectual property of another, either by intent or by negligence, without sufficient public acknowledgement and appropriate citation that the material is not one's own. It is true that every thought probably has been influenced to some degree by the thoughts and actions of others. Such influences can be thought of as affecting the ways we see things and express all thoughts. Plagiarism, however, involves the taking and use of specific words and ideas of others without proper acknowledgement of the sources and includes the following:

- Submitting as one's own material copied from a published source, such as print, internet, CD- ROM, audio, video, etc.
- Submitting as one's own, another person's unpublished work or examination material.
- Allowing another or paying another to write or research a paper for one's own benefit.
- Purchasing, acquiring, and using for course credit a pre-written paper.

The above list is in no way intended to be exhaustive. Students should be guided by the principle that it is of utmost importance to give proper recognition to all sources. To do so is an act of both personal and professional courtesy as well as intellectual honesty. Any failure to do so, whether by intent or by neglect, whether by omission or commission, is an act of plagiarism. Generally speaking, student papers are submitted to TurnItIn®, a plagiarism detection software program accessed via the Sakai course management system.

In addition, a student may not submit the same paper or other work for credit in two or more classes without the expressed prior permission of all instructors. A student who submits the same work for credit in two or more classes without the expressed prior permission of all instructors will be judged guilty of academic dishonesty and will be subject to sanctions described below. This applies even if the student is enrolled in the classes during different semesters. If a student plans to submit work with similar or overlapping content for credit in two or more classes, the student should consult with all instructors prior to submission of the work to make certain that such submission will not violate this standard.

In all cases of joint authorship, individuals working together should previously establish the criteria for co-authorship. Final determination of authorship should reflect effort and contribution and not rank or status.

Lectures and course materials, including PowerPoint presentations, tests, study guides, outlines, and similar materials, are protected by U.S. copyright law and by LUC policy (https://www.luc.edu/copyright/use.shtml/). Faculty are the owners of the copyright in those materials that they create. Students may take notes and make copies of course materials for their own use. They may also share those materials with another student who is registered and enrolled in the same course during the same semester.

Students may not reproduce, distribute, or display (for example, posting or uploading to a website, such as CourseHero) any lecture notes, study guides, exams/quizzes, assignments, papers, recordings or any other course materials in any other way without the faculty's express written consent. Students who do so are in violation of Academic Integrity standards.

Academic Integrity Violations

Plagiarism or any other act of academic dishonesty will result minimally in the instructor's assigning the grade of "0" for the assignment or examination. The instructor may impose a more severe sanction, including a grade of "F" in the course. All instances of academic dishonesty must be reported by the instructor to the Assistant Dean of Graduate Clinical Programs.

The Assistant Dean of Graduate Clinical Programs may constitute a hearing board to consider the imposition of sanctions in addition to those imposed by the instructor, including a recommendation of expulsion, depending on the seriousness of the misconduct. In the case of multiple instances of academic dishonesty, the academic Dean of the student's college may convene a hearing board.

Students have the right to appeal the decision of the hearing board to the academic Dean of the college in which they are enrolled. The decision of the Dean is final in all cases except expulsion. The sanction of expulsion for academic dishonesty may be imposed only by the Provost, upon recommendation of the Dean. Students have a right to appeal any finding of academic dishonesty against them. The Academic Grievance Procedure may be found in the Appendix.

The MNSON and the university maintain a record of all instances of academic dishonesty. The information in that record is confidential. However, students may be asked to sign a waiver that releases that student's record of dishonesty as a part of the student's application to a graduate or professional school, to a potential employer, to a bar association, or to similar organizations.

Academic Grievance Procedure

Students, faculty, and administrators are strongly encouraged to discuss informally and resolve problems they encounter in the academic process. Irresolvable issues or violations of the institution's ethical standards may require the implementation of the grievance procedure. The Academic Grievance Procedure can be found in the Appendix. Steps in this process must be followed.

Grades

The grading standard for each course is published in the course syllabus, provided to students at the beginning of the academic semester. Students are expected to maintain a cumulative grade point average of not less than (3.0 GPA). No grades of D or F are counted as fulfilling program requirements. These grades, however, will be calculated in the grade point average. If a student earns a grade of D or F in a required course, that course must be repeated. No student is permitted to graduate from the MSN program with lower than a 3.0 cumulative GPA. MSN students must successfully complete the Master's Comprehensive Examination for the degree to be conferred.

Grading Scale

The standardized grading scale for the MSN program are as follows:

Grade	Grade Points
A	94-100
A-	92-93
B+	89-91
B	86-88
B-	84-85

C+	80-83
C	77-79
C-	75-76
D+	72-74
D	69-71
F	68 and below
I	Incomplete
W	Withdrawal
P	Credit/Pass
NP	No Credit/No Pass
AU	Audit

B- Grades

Students must maintain an overall GPA of 3.0 to remain in good standing.

Each program track has identified the following courses as covering essential material for role and population courses, and students must receive a B- grade or higher in order to continue in the program. If a student receives lower than a B- grade in any of the following courses, the course must be repeated. Furthermore, if a student repeats the course and earns a grade lower than B-, the student will be dismissed from that program.

If a student withdraws from a course and subsequently earns a grade lower than a B- in that course (or vice versa), only one additional attempt may be made to successfully pass that course.

Core Courses Requiring a B- or Better for all MSN Students

- Each clinical course

Incomplete Grades

Students are expected to complete course assignments by the final date of the semester. However, extenuating circumstances may require that students request an extension in the form of a grade of Incomplete ("I"). Students are encouraged to avoid the use of "I" grades if at all possible. The student must submit a written request for an "I" to the course professor prior to the end of the semester in which the class is being taken; this form must be signed by both parties (see Form in Sakai site "Information for MSN and Certificate Students"). Unless the "I" has been negotiated prior to the end of the course, the professor will assign a grade based on the course work completed by the last day of class. The negotiation for the "I" grade must include the length of time in which the outstanding work will be done. The completion date, as negotiated, is considered a contract. If the student does not fulfill the contract, a grade of "F" will be recorded on their transcript. The maximum time to clear the "I" is one semester, excluding the summer semester. If the course for which the student is requesting a grade of "I" is a prerequisite for another course, the student may not register for the succeeding course until the "I" is replaced with an evaluative grade. If a student has two or more "I" grades, progression to the next semester must be negotiated with the Assistant Dean of Graduate Clinical Programs.

Pass/Fail Grades

The MNSON does not issue Pass/Fail grades for any graduate lecture course.

Probationary Status

Students who have been admitted to the program on strict academic probation receive specific instructions regarding coursework and required grades in the letter of admission.

All students must have a cumulative GPA of 3.0 or better in order to graduate. If a student's cumulative GPA drops below 3.0 at any time during the program of studies, the student is placed on academic probation. In that case, the student is expected to raise their GPA to the required level of 3.0 or higher in the next two consecutive terms in which they is registered for classes or upon completion of nine semester hours, whichever comes first. A student may be placed on academic probation only once. The student will be dismissed if the GPA drops below 3.0 a second time. Additionally, students on academic probation may not enroll in a clinical course.

Health Insurance Coverage

Students are expected to maintain adequate health, accident, and hospitalization insurance coverage, either through an insurance agent of the student's choice or through Loyola University Chicago.

Information on the Loyola-sponsored student health insurance plan may be obtained from the Bursar's Office (https://www.luc.edu/bursar/insurance.shtml/). Evidence of health insurance must be presented before entry into the clinical courses.

Health Insurance Portability and Accountability Act of 1996 (HIPAA)

The Health Insurance Portability and Accountability Act of 1996 (HIPAA) is a federal law that provides for the protection and privacy of personal health information. The Privacy Rule and the Security Rule of this law affect health care providers, including students enrolled in clinical education activities. The Privacy Rule of the HIPAA defines protected health information as:

"information, including demographic data, that relates to the individual's past, present, or future physical or mental health or condition; the provision of health care to the individual; or the past, present, or future payment for the provision of health care to the individual; and, that identifies the individual or for which there is a reasonable basis to believe it can be used to identify the individual" (Citation (https://www.hhs.gov/hipaa/for-professionals/privacy/laws-regulations/?language=en))

All students must follow the HIPAA Privacy Rules and Guidelines when participating in clinical educational activities. Compliance with these rules and guidelines includes, but is not limited to, maintaining confidentiality of paper and electronic health records and protected health information.

All students are required to complete HIPAA training, as mandated by their educational program. In addition to program-specific training, all students are required to complete any additional training mandated by the clinical facility where their clinical education is occurring.

When a concern is raised that a student has violated the confidentiality and privacy of patient information, the concern is addressed through the formal disciplinary process of the student's school or college of Loyola University Chicago.

Health Sciences Campus Ministry

The Office of University Ministry has a three-fold mission that focuses on the members of the Loyola University Chicago Health Sciences Campus. Inspired by Ignatian values and the practical spirituality of finding God in all things we work towards:

- Shaping Community: Through educational programs and events; prayer and worship; hospitality and outreach; social activities and attention to the needs of the individual we build a welcoming and inclusive community for students, staff and faculty.
- Seeking Faith: We journey with the people who teach, learn and work at the Health Sciences Division by providing spiritual formation and faith development while facilitating individual and communal prayer. True to our experience of the Gospel, we welcome and engage individuals regardless of their faith background or tradition to grow into becoming men and women for others.
- Serving Broadly: By embracing a worldview that is both local and global we facilitate and sponsor opportunities for members of the Health Sciences Division to work with underserved communities in the greater Chicago area and beyond.

For more information about the HSD Ministry, visit their website (https://hsd.luc.edu/ministry/) or call 708-216-3245.

Intellectual Capital

Each and every student is the owner of their own intellectual capital. However, the relationship between a student and their faculty member can have an enriching effect on the intellectual capital of both individuals. For those times that a faculty member and student collaborate on research, projects, articles for publications, videos, and other forms of communication of this intellectual capital, it is in the student's best interest to clearly negotiate with the faculty member or other student colleague (if that be the partnership) the nuances of such matters as who is principal director/investigator of a project or research study, who is first author on a publication, etc. In addition, students who produce exemplary work are often asked by faculty whether they would be willing to make their work available to other students as exemplars for their learning. Faculty obtain written documentation regarding a student's agreement to share their intellectual capital.

Leave of Absence

It is expected that a student will maintain continual registration in the University from the time of initial matriculation up to completion of the program. If this is not possible, a leave of absence (LOA) must be requested. A LOA should be requested prior to the anticipated date of the leave. Failure to request a LOA will mean that those semesters in which the student does not take courses will be included in the time limit (five years) set for completion of the program.

Students request the LOA for all semesters where they would be enrolled in courses, according to their program plan, including summer semesters. However, summer semesters do not count in the limit of four terms of LOA time (see below).

Students may request a leave of absence that is not to exceed two academic years (four terms, not including summer semesters) consecutively or interspersed throughout the program. Accruing more than two years of LOA will result in automatic dismissal from the program. Students must complete a Request for a Leave of Absence form (see Form in Sakai site "Information for MSN and Certificate Students"); the form is provided to the Assistant Dean of Graduate Clinical Programs for approval.

Library Services

The Loyola Health Sciences Library has a large array of resources for students to use during program of study. The library is located on the 1st floor of the Marcella Niehoff School of Nursing. Health Sciences Library librarians and staff are present to serve patrons in-person, by phone, by chat, email, and Zoom from 8:30 am to 5:00 pm, Monday through Friday.

A staff member is present at HSL's Service Desk between 10:00 am and 3:00 pm, Monday - Friday. Services of the Health Sciences Library are described on their website (https://hsl.luc.edu/home/).

Students in the MSN program have access to all university library services.

Professional Behavior and Conduct

Students are expected to maintain professional behavior at all times while participating in the School of Nursing programs. Consistent with the mission and values of the MNSON respect for clients, faculty, staff, and student colleagues is expected. Graduate students are expected to display professional behavior, such as honesty, punctuality, maturity, and respectful communication with faculty at all times. Unethical or unprofessional behavior may result in disciplinary action to the student, ranging from verbal or written warning, to withdrawal from the theory course or clinical setting, or to dismissal from the program. See the general guidelines for this policy in the appendix under Unprofessional Behavior and Conduct of Marcella Niehoff School of Nursing Students.

Professional Liability Insurance

Loyola University Chicago insures graduate students in their student role when the student is registered and enrolled in a supervised practicum course. However, a student may choose to purchase additional malpractice insurance if they wish to have independent coverage.

Registration

Registration is completed through LOCUS (https://locus.luc.edu) (Loyola's Online Connection to University Services). LOCUS is a web-based, self-service system that enables students to access information and services online. Students consult LOCUS for class offerings by semester.

Continuous Registration

All students are required to register during the regular academic year, and according to their program plan, until all degree requirements are met, unless they have received an approved leave of absence.

Students who have completed all course work and are preparing for comprehensive examinations are to register for GNUR 605 Master's Study.

Representation on School of Nursing Committees

Each academic year, graduate student representatives are needed for various campus committees and/or organizations. Students may submit their names to their Program Director to be considered for committee appointments.

Student Accessibility Center (SAC)

The Student Accessibility Center (SAC) supports students with disabilities by fostering equitable access to all aspects of student life at Loyola University Chicago. In alignment with Loyola's Jesuit mission and the value of Cura Personalis—care for the whole person—SAC partners with students, faculty, and campus offices to remove barriers and support academic, personal, and professional success. Loyola University Chicago provides reasonable academic and student life accommodations for students with disabilities. Students interested in receiving academic accommodations related to a disability or other health condition are invited to register with the Student Accessibility Center (SAC) online (https://www.luc.edu/sac/applywithsac/). Students may register with the SAC at any point in their academic career, however the SAC encourages students to register as early as possible to reduce delay in delivery of accommodations. This is especially important for students needing accommodations in clinical or laboratory settings, which may require additional coordination. Once registered, the student, SAC, and faculty will engage in an interactive process to determine how accommodations will be applied in each course. SAC staff work one-on-one with students to review documentation, determine reasonable accommodations, and support self-advocacy. Accommodations are not retroactive and must be renewed each semester through SAC's formal process. Students are encouraged to meet with each professor individually to discuss how accommodations will be implemented in their course. All information is handled with confidentiality. Students with disabilities who are seeking accommodations relating to clinical experiences are strongly encouraged to complete registration with the university's Student Accessibility Center (SAC) well before the priority deadlines listed below for each semester to discuss possible accommodations. This helps ensure enough time to review requests and coordinate reasonable accommodations in collaboration with the Marcella Niehoff School of Nursing and, when necessary, clinical sites. Accommodations for clinical experiences requests received after a priority deadline may not be able to be implemented for the upcoming semester due to the time required for review and coordination with clinical partners. Fall: June 1st Spring: November 1st Summer: March 1st Audio Recording of Lectures In some classes, students with approved accommodations may use audio-recording software to ensure equal access. These recordings are for personal study use only. They may not be shared, distributed, or used against faculty, lecturers, or classmates. All recordings must be deleted at the end of the semester. Contact SAC • Website (https://www.luc.edu/sac/) & Registration (https://www.luc.edu/sac/applywithsac/) • Email (SAC@luc.edu) • Phone: 773-508-3700

Support Services

MSN students have access to the services of the Loyola University Chicago Writing Center (https://www.luc.edu/writing/). Additional academic support services available to students in the MSN program can be obtained by contacting the Assistant Dean for Student Affairs, or the Assistant Dean for Graduate Clinical Programs.

Time Limits for Completing Required Course Work

Students must complete all MSN degree requirements within five years of beginning the first course at Loyola University Chicago. A student may request an extension of time for completion of degree requirements due to special circumstances (e.g., medical, personal, professional, or research related reasons). A student requesting an extension completes an Extension of Time Limit for Completion of Degree Requirements form to the Assistant Dean of Graduate Clinical Programs (see Form in Sakai site "Information for MSN and Certificate Students"). If an extension is approved, an official letter is sent to the student from the Assistant Dean of Graduate Clinical Programs. Extensions are ordinarily limited in duration to one full academic year.

Transcripts

Students obtain official academic transcripts from the Office of Registration and Records (https://www.luc.edu/regrec/). Students may request official transcripts through LOCUS (https://locus.luc.edu) and obtain unofficial transcripts through LOCUS on Loyola's website.

Transfer Courses to the MSN Program

Students may apply for acceptance of transfer course credit during the first semester of the MSN program. The School of Nursing's decision regarding approval of hours for transfer credit is based on the grade earned in the course; the time interval since the completion of the course; and the applicability of the course to the student's current program of study at Loyola University Chicago.

Only those courses for which the student received a grade of B- or better will be considered for transfer credit, and clinical courses cannot be considered for transfer credit. Standards of recency apply: courses completed within the past 5 years can be considered for transfer credit. In cases where the time interval between prior course work and matriculation in the School of Nursing is longer than 5 years, consideration of transfer credit requires confirmation that the content of the course meets the current standards of the field. A syllabus including the course description and course outcomes must be submitted for any course to be considered for transfer credit. For probation and graduation purposes, transfer credit is not computed in the cumulative Grade Point Average. Acceptance of transfer course credit includes the completion of the School of Nursing 'Transfer Credit Form' that becomes part of the student's permanent academic record.

Students may request to have nine credits from an outside accredited university to be applied to the MSN degree prior to matriculation. Additional transfer credits may be granted with the approval of the student's Program Director and the Assistant Dean of Graduate Clinical Programs.

Once the student has started course work in the program, courses leading to the MSN must be taken at Loyola University Chicago unless special approval is granted by the Assistant Dean of Graduate Clinical Programs.

Wellness Services

All Loyola University students have access to the Wellness Center services. The array of services provided through the Wellness Center are detailed on the website (https://www.luc.edu/wellness/). MSN students may access Wellness Center services at any location (Lake Shore Campus, Water Tower Campus, or Health Sciences Campus) or through electronic means.

Withdrawal from Courses

Once the term has begun and a student wishes to withdraw from a course, they inform the course faculty, Program Director, and the Assistant Dean, Graduate Clinical programs. Students withdrawing from class will be assessed tuition based on the "Complete Withdrawal and Schedule Change Calendar" as noted on the University calendar. If a student withdraws from a course before the first published withdrawal

deadline, their transcript will show no record of the course. If the student withdraws after the first withdrawal deadline, but before the final withdrawal deadline, her/his/their transcript will show a W for the course. If the student withdraws after the University's final withdrawal, a grade will be issued for the course, based on the work completed in the course. No course requirements are waived for students who do not withdraw from a course by the final withdrawal deadline. Students are responsible for consulting the University academic calendar to determine withdrawal deadline dates. A student may withdraw from the same course only once. The second withdrawal will result in dismissal from the program. If a student withdraws from a course and subsequently earns a grade lower than a B- in that course (or vice versa), only one additional attempt may be made to successfully pass that course.

PhD Academic Policies

History and Overview of the School of Nursing

The Marcella Niehoff School of Nursing of Loyola University Chicago was founded in 1935 and is the oldest collegiate nursing program in Illinois. Since the establishment of the School of Nursing (SON), more than 7,000 nursing degrees have been awarded. The original focus was education of public health nurses to assume leadership roles in meeting the health needs of Chicago residents. The SON was the first division of the University to have women attend classes at the Lake Shore Campus (LSC). The four-year Baccalaureate of Science in Nursing (BSN) program continues to attract students for their initial university experience, while the Accelerated BSN (ABSN) program, instituted in 1992, offers a fast-track to professional nursing for those already possessing a baccalaureate degree. In 1964, a Master of Science in Nursing (MSN) program was initiated to prepare expert clinicians. Currently the MSN program provides graduate education in nursing and healthcare administration. Beginning in the Fall 2009 semester, the SON initiated a Doctor of Nursing Practice program. During the 2020-2021 academic year, all programs for advanced practice preparation (NP, CNS) were transitioned to the DNP degree. The PhD in Nursing program was initiated in 1988 to meet the need for nurse scholars, teachers, and leaders. There are over 150 PhD in Nursing graduates who have assumed leadership roles in research, education, clinical practice, and health care administration. Our PhD in Nursing graduate students have been successful in obtaining pre-doctoral fellowships, and graduates have distinguished themselves through postdoctoral fellowships and research supported through National Institutes of Health (NIH) funding.

Marcella Niehoff School of Nursing (MNSON) Mission and Vision

Mission Statement

The mission of the Marcella Niehoff School of Nursing (MNSON) is to advance the science of nursing and provide a transformative education in the Jesuit Catholic tradition that prepares compassionate, innovative, diverse nurse leaders who provide care for the whole person and partner locally and globally to promote social justice and health for all.

Vision

The vision of the Marcella Niehoff School of Nursing (MNSON) is to be a preeminent leader in transforming the health of persons, families, communities and populations, while promoting social justice, health equity, and quality care for all.

Values

The Marcella Niehoff School of Nursing (MNSON) at Loyola University Chicago is committed to the five "hallmark characteristics of a Jesuit education." These characteristics provide the foundation for our core values. The MNSON core values challenge administrators, faculty, students, communities, and partners to think differently. Graduating professionals who are technically proficient is necessary, but not sufficient. Our graduates will shape the future of health and health care. To prepare them, we implement the following values:

- "Commitment to Excellence: Applying well-learned lessons and skills to achieve new ideas, better solutions and vital answers."
- "Faith in God and the religious tradition: Promoting well-formed and strongly held beliefs in one's faith tradition to deepen others' relationship with God."
- "Service that promotes justice: Using learning and leadership in openhanded and generous ways to ensure freedom of inquiry, the pursuit of truth and care for others."
- "Values-based leadership: Ensuring a consistent focus on personal integrity, ethical behavior in business and in all professions, and the appropriate balance between justice and fairness."
- "Global Awareness: Demonstrating an understanding that the world's people and societies are interrelated and interdependent."

Inclusive Excellence

Working toward inclusive excellence includes building intrapersonal and interpersonal awareness, engaging in curriculum transformation, teaching with an inclusive pedagogy, and building inclusive learning environments. We recognize that our community is strengthened by the diversity of our students, faculty, and staff along the social dimensions of race, color, religion, biological sex, age, sexual orientation, gender identity or expression, national or ethnic origin, ancestry, disability, marital status, parental status, military/veteran status, or any other characteristic protected by applicable law. We are especially committed to helping our nation create a culture of health, promote health equity to reduce health disparities, and improve the health and wellbeing of all, especially for those who experience the health system disparately due to systemic oppressions.

Chosen Name and Pronouns

Class rosters and university data systems are provided to instructors with only students' legal names presented. Knowing that not all students use their legal names or identify with a gender that aligns with their sex assigned at birth, faculty members/I will use the name and/or personal pronouns you use. If you choose, you may email the faculty member/me directly to share your information. Additionally, if these change at any point during the semester, please let the faculty member/me know. For more information on how to change your name in LOCUS, please visit the Preferred Name Policy.

Land Acknowledge Statement

The Loyola University Chicago community acknowledges its location on the ancestral homelands of the Council of the Three Fires (the Ojibwa, Ottawa, and Potawatomi tribes) and a place of trade with other tribes, including the Ho-Chunk, Miami, Menominee, Sauk, and Meskwaki. We recognize that descendants of these and other North American tribes continue to live and work on this land with us. We recognize the tragic legacy of colonization, genocide, and oppression that still impacts Native American lives today. As a Jesuit university, we affirm our commitment to issues of social responsibility and justice. We further recognize our responsibility to understand, teach, and respect the past and present

realities of local Native Americans and their continued connection to this land.

Overview of the PhD in Nursing Program

Accreditation

The baccalaureate degree in nursing, the master's degree in nursing, the doctor of nursing practice programs, and the post-graduate certificate program at Loyola University Chicago are accredited by the Commission on Collegiate Nursing Education, 655 K Street NW, Suite 750, Washington, DC 20001, 202-877-6791.

PhD programs are not subject to professional accreditation.

Loyola University Chicago is accredited by the Higher Learning Commission.

Program Goal

The goal of the Doctor of Philosophy (PhD) in Nursing program is to prepare scholars who improve human health through the development and expansion of knowledge.

Program Outcomes

At the completion of the program the graduate has the knowledge and skills to:

- Initiate a beginning program of research that expands nursing and healthcare knowledge.
- Incorporate social, cultural, political, economic, and ethical considerations into nursing scholarship and practice.
- Participate in the international community of scholars to further the Jesuit mission of generation and dissemination of knowledge in the service of humanity.
- Assume leadership roles in nursing research, education, practice, policy development, and/or administration in order to improve the health of society.

Program of Study

Academic Year Program

PhD courses meet online two late afternoon-evenings per week in the fall and spring semesters. Two additional days of intensive in person training sessions per semester (Spring and Fall) are required. In person intensives meet on a rotating basis between the Lake Shore and Health Sciences campuses.

Prerequisite Course Work for the PhD in Nursing Program

All students must present transcript evidence of having completed a graduate level course in basic statistics. If an admitted student has not fulfilled this prerequisite statistics requirement prior to admission, they should be advised to complete such a course in the summer prior to their first semester or during their first semester of matriculation to the PhD Program. They must also be advised that this course is a prerequisite and, therefore, will not be counted toward fulfilling the minimum semester hour requirements of the PhD Program. The prerequisite statistics course may be taken at Loyola or any other accredited college or university. To be acceptable, the course must cover both descriptive and beginning inferential statistical methods. Courses from other academic institutions should be evaluated by the Assistant Dean for the PhD in Nursing Program to determine acceptability.

Prior Graduate Credits/Transfer Credits

Students may transfer up to 9 credits into their PhD in Nursing program. Transfer credits are normally limited to cognate requirements (6 credits) or elective coursework. All credits for transfer must be approved through the student's academic advisor and the Assistant Dean for the PhD in Nursing program. Transfer credit from courses completed before the time of admission to the program must meet the recency rules of the Graduate School (course completed within the previous 5 years) and the credits may not have been used to satisfy any other degree requirements (such as those taken during the master's degree program).

Courses taken through an institution other than Loyola University Chicago and after a student has been admitted to the program must be pre-approved by the student's Advisor and/or Assistant Dean of the PhD in Nursing Program prior to enrolling in the course. Transfer credits from an institution other than Loyola University Chicago are not factored into the calculation of the student's grade point average.

Curriculum Plan

The PhD in Nursing Program currently includes five major areas of study: Nursing Science, Research Methods, Philosophy and Ethics, Teaching, and Cognates supporting the proposed area of research. In addition to course work, students are required to complete a scholarly dissertation. The courses offered for the five major areas of study are outlined on the following page.

The Assistant Dean for the PhD in Nursing Program works with the student in the first semester to develop an individualized program of study. This program plan is created in LOCUS and can be accessed by the student, the Assistant Dean for the PhD in Nursing Program, the student's future Advisor/Dissertation Director, and the Executive Associate Dean for Academic affairs. It is recommended that the student and his/her Advisor/Dissertation Director update the program plan when necessary and notify the Assistant Dean for the PhD in Nursing Program when the Program Plan has been revised in LOCUS.

The list of course requirements can be found here (p. 1382).

Students must be registered for GNUR 610 Doctoral Study for the semester in which the Qualifying Examination is being taken. This is ordinarily during the fall semester of the third year. Students can only register for GNUR 610 twice.

Students who are working on their dissertation research register for GNUR 600 Dissertation Supervision. Each Dissertation Director has a specific section of GNUR 600 listed in LOCUS. Students register for the section assigned to their Dissertation Director. GNUR 600 Dissertation Supervision is offered every semester. The number of times that a student may register for GNUR 600 is limited.

A sample program plan can be found here (p. 1382). An updated, current program plan must be maintained by the student and the student's advisor and in LOCUS at all times. The timing and selection of cognate courses is determined collaboratively with the student's Advisor/Dissertation Director.

The program plan for students entering the PhD in Nursing with a master's degree is outlined here (p. 1382). In addition to the coursework, milestones, deliverables, and research socialization elements are noted to develop into the role of nurse scientist and scholar.

Distinguishing Cognate and Elective Courses

Cognate coursework is taken in a substantive or methodologic area, and the coursework is meant to deepen the student's knowledge and skills

in a topic area related to their research. Cognate courses have a specific and discernible connection to each other, and the student's research area.

Elective coursework is taken to broaden a student's knowledge and skills. These courses may or may not be related to the student's topic area.

Six credits of cognate coursework are required for the program.

BSN to PhD Option

The School of Nursing offers a BSN to PhD program for a select number of highly qualified students. Students in this option complete selected courses from the MSN and/or DNP program, and then progress directly to study in the PhD program.

An MSN or DNP degree is not awarded through this program of study, although students may choose to complete the additional requirements for the awarding of the MSN or DNP, either concurrently or after completing the PhD. A separate application to these degree programs would be required.

Approximately 22 credits of coursework at the MSN/DNP level are included in the BSN to PhD option.

Course Descriptions

Descriptions for all courses can be found here (p. 1459).

Progress Reporting

A PhD Student Progress Report form is available on the PhD in Nursing Sakai® site. Each time the student is enrolled in GNUR 600: Dissertation Supervision, this report must be completed by the student, and forwarded to the student's Advisor or Dissertation Director. The Advisor or Dissertation Director enters the grade for the course. The report is due on November 15 for the fall semester, April 15 for the spring semester, and August 1 for the summer semester. Satisfactory progress must be documented for a passing grade to be issued for these courses.

A progress report is required for GNUR 610 only when the time to complete the qualifying examination exceeds two semesters, as outlined in a subsequent section of this handbook.

Any student who does not submit a progress report and receives a NP (no credit) grade will have a registration block placed on their record. Any student who receives a NP grade must provide a written explanation of the reason(s) for their failure to complete and submit the progress report, along with a rationale to support their continued enrollment in the program. This statement must be submitted to the student's academic Advisor/Dissertation Director, with a copy sent to the Assistant Dean for the PhD in Nursing program. All instances of NP grades will be reviewed by the PhD in Nursing Program committee. Two grades of NP may be cause for dismissal from the program.

Program Progression

During the first semester after admission to the program, each student and his/her assigned Advisor or the Assistant Dean for the PhD in Nursing Program completes a program plan. The program plan is filed in the student's record. Students are expected to maintain close contact with their advisor regarding their progression through the program of study.

All students are required to maintain continuous registration (at a minimum, fall and spring semesters) until all degree requirements, including the dissertation, are completed. The PhD in Nursing Program does include some courses that are offered in only summer sessions as well. Once all coursework has been completed, students will typically register for the fall and spring semesters during their qualifying examination period and dissertation research. If, during these periods, students are using the resources of the university, such as faculty or library resources during a summer semester, enrollment during that semester is required.

Standards related to academic performance for satisfactory progression in the PhD in Nursing Program are detailed in the Academic Policies section of this handbook.

Post-baccalaureate students have a total of eight years from the time they first matriculate in the PhD in Nursing Program to complete the degree requirements, including the dissertation. Post-master's students have a total of six years from the time they first matriculate in the PhD in Nursing Program to complete the degree requirements, including the dissertation.

If students prolong the program beyond these limits, they must petition to the Dean of the Graduate School for an extension of the time to degree limit. The Extension of Time form must be secured from Graduate Student Progress System (GSPS) website at https://gsps.luc.edu/Secure/login.aspx completed and submitted to the GSPS website. The form must be approved by the student's Advisor or Dissertation Director, the Assistant Dean for the PhD in Nursing Program, and the Associate Dean of the Graduate School. The Graduate School has the final authority to approve or disapprove an extension of the time to degree. Approval of extensions is not guaranteed or automatic.

Academic Advising

Assignment of Advisor

The Assistant Dean for the PhD in Nursing Program serves as the first-year advisor for all PhD students. During that first year, students schedule meetings with faculty who are conducting research related to the student's phenomenon of interest or research area. By the end of the first year of course work, the student asks a faculty member to serve as their program advisor. The student works in consultation with the Assistant Dean for the PhD in Nursing Program to finalize the choice of the advisor. In some, but not all cases, this advisor will go on to become the student's Director of their Qualifying Exam and Dissertation Director.

The student's advisor is entered into LOCUS.

Advisor/Dissertation Director Responsibilities

- Guide the student in program planning with the selection of appropriate courses to meet the degree requirements for the PhD in Nursing degree. The student's initial program plan is developed in LOCUS by the Assistant Dean for the PhD in Nursing Program. If there are any changes to the student's program plan, the Advisor or Dissertation Director and student are responsible for making these changes and informing the Assistant Dean of the PhD in Nursing Program of the changes, as needed.
- The Advisor or Dissertation Director should monitor the academic progress of the student through the program and should be available to the student for guidance as necessary. Monitoring academic progress includes and follow-up on "I" grades and final course grades of less than B.
- The Advisor or Dissertation Director should be aware of pertinent Graduate School and School of Nursing policies. Policies and processes particularly related to the qualifying examination,

dissertation, leaves of absence, and incomplete (I) grades should be clearly understood by the Advisor and the student.

- The Advisor or Dissertation Director should assist the student who encounters personal problems that interfere with successful progression in the academic program and make appropriate recommendations that will facilitate academic progression, such as recommending a leave of absence, reducing course load, or similar actions.
- Evaluating coursework for transfer credit: If a course is being recommended to transfer credit, the Advisor or Dissertation Director must complete a transfer credit request form and submit the request and supporting documentation to the Assistant Dean for the PhD in Nursing Program. The Assistant Dean will process the request and submit to the Graduate School.
- The Advisor or Dissertation Director works with the student in the formation of the Qualifying Examination and Dissertation Committee.

Change in Advisor, Dissertation Director, or Committee Member

At any time during the program, if the student and/or the Advisor for any reason believe that an alternative advisor or committee member assignment would be more appropriate, the Assistant Dean of the PhD in Nursing Program should be notified in writing using the Change of Advisor/Committee Member form available through the PhD in Nursing Sakai® site. The notification should indicate the reason for the request and should reflect the agreement of the initial advisor/committee member, the proposed advisor/committee member, and the student. The Assistant Dean for the PhD in Nursing Program will notify The Graduate School of the change as needed.

Student Responsibilities Related to Advising

- The student is responsible for contacting his/her Advisor or Dissertation Director prior to each semester to verify the accuracy of the program plan and any needed updates, and plan course enrollment for the upcoming semester.
- The student is responsible for notifying the Advisor or Dissertation Director when:
  - An "I" grade is earned and make arrangements for its removal.
  - A grade of less than "B" is earned in any course.
  - There is a need to change the Program Plan of study.
  - There is a need to drop or add a course in the current semester.
  - There is a need to request a leave of absence (LOA) from the program or an extension of the time limit to complete the degree requirements.
- The student holds responsibility for being aware of all policies of the MNSON and the Graduate School pertinent to her/his program status.
- The student is responsible for collaborating with the Advisor or Dissertation Director in planning enrollment in an Independent Study (GNUR498) or Directed Study (GNUR 598) course.
- The student is responsible for collaborating with the Advisor or Dissertation Director in the selection of cognate coursework.

Academic Grievance Procedure

Students, faculty, and administrators are strongly encouraged to discuss informally and resolve problems they encounter in the academic process. Irresolvable issues or violations of the institution's ethical standards may require the implementation of the grievance procedure.

The Marcella Niehoff School of Nursing (the "MNSON") has developed an Academic Grievance and Appeals Process that is consistent with the Loyola University Chicago (the "University") Academic Grievance Procedure (p. 1919) and the University's Graduate School Academic Grievance Procedure (p. 2029). This process is meant to supplement, and may not supersede, any portion of the University or Graduate School Academic Grievance Procedures.

The MNSON Academic Grievance and Appeals Process provides specific direction for the academic grievance hearing and for appeals and is designed to achieve clarity, uniformity, and fairness in the handling of all academic disputes involving individual student complaints regarding course grades and accusations of academic dishonesty. Any MNSON student may initiate the formal academic grievance procedure in order to have a complaint or appeal regarding a course grade or charge of academic dishonesty reviewed in an impartial and thorough manner. Students enrolled in degree programs housed in the Graduate School may also invoke the procedures under the MNSON Academic Grievance and Appeals Process to address disputes relating to dismissal from a program. In accordance with best educational practices and University policy, this process must be based on relevant information and afford both parties (student and involved faculty member(s)) an equal voice in the proceedings.

Consistent with the University Academic Grievance Procedure, a disputed grade will be changed only if the grading meets one or more of the following criteria:

1. Is found to be in significant violation of clearly established written school policies; or
2. Is a result of improper procedures; or
3. Is found to be capricious. Capricious grading is the assignment of a grade to a student which is:
   1. Based partially or entirely on criteria other than the student's performance in the course; or
   2. Based on standards different from those standards of grading applied to other students registered in the same course; or
   3. Based on a substantial departure from the announced grading standards for the course.

Pre-Hearing and Hearing Procedures within the MNSON

1. In all cases, a sincere attempt should be made by the student to resolve the problem through discussion with the involved faculty member(s). The student first discusses the grade or charge of academic dishonesty with the involved faculty member(s) of the course. Every attempt is made by the involved faculty member(s) to answer fully the student's concerns at this level. If the involved faculty member(s) decides that a change-of-grade is appropriate (e.g., due to error by the involved faculty member(s)), the involved faculty member(s) will submit a grade-change request via the student information system. The grade change will be reviewed by the Associate Dean for Undergraduate or Graduate programs.
2. If the attempt(s) to resolve the dispute (described in #1 above) fails, the student may submit a written request for an academic grievance hearing to the student's Program Director. If the student's Program Director is also the instructor, the written request would go directly to the Associate Dean of Undergraduate or Graduate programs. This request must be submitted within 1 month after the beginning of the following semester. The student's written request must:
   1. Specify the nature of the dispute; and
   2. Identify how the issue falls within the established criteria for an academic grievance (e.g., the grading was in significant violation of clearly established written school policies); and

3. Describe the attempts made to resolve the matter; and
4. Attach all relevant information or documentation to support the grievance.

3. If a student has been accused of plagiarism or dishonest examination behavior, and the student denies the charge, the student may request an academic hearing review. The Dean will then constitute a hearing committee composed of a Chairperson and four faculty members ("Hearing Committee") to review the evidence of academic dishonesty and to consider the imposition of additional sanctions beyond failure in the course. This process is delineated in #6 below.
4. For instances of grade disputes, and upon receipt of the written request, the Program Director will ensure completeness of the above requirements (#2 a-d) and forward the request to the Associate Dean for Undergraduate or Graduate Programs. The Associate Dean for Graduate or Undergraduate Programs may decline to forward the case for a hearing if the dispute is not an academic dispute subject to the MNSON's Academic Grievance Process, or the written request fails to allege any of the necessary criteria for a disputed grade to be changed. In such instances, the Associate Dean for Undergraduate or Graduate Programs must justify, in writing, the reason for this decision and communicate the decision to the student, involved faculty member(s), the Program Director and Dean.
5. If the Associate Dean for Undergraduate or Graduate Programs determines that the academic grievance is sufficient to proceed with a hearing, the Dean shall be notified. Within two weeks of the notification to the Dean, the Dean shall appoint a Chairperson and four faculty members to a Hearing Committee. Every effort shall be made to appoint faculty to the Hearing Committee who are not familiar with the student. It is recommended that the Hearing Committee members be familiar with the course outcomes and expectations that are the subject of the grievance.
6. All parties, including the student, involved faculty member(s), and Hearing Committee members, will receive the student's name, written request for a grievance hearing, information identifying the charge of academic dishonesty and related information submitted by the student in #2 a-d above, and information related to the hearing date/time/location, at least three business days in advance of the scheduled hearing date. Both the student and involved faculty member(s) will be advised of their right to request assistance in presenting the case at the hearing by any member of the University community other than an attorney. No individual from outside the University may attend the hearing, including any legal representative for the parties involved in the dispute. The student and the involved faculty member(s) will be notified of their right to present witnesses at the hearing. If this notice is not provided at least 3 days prior to the hearing, or a party is unavailable to attend, the hearing will be re-scheduled.
7. Pre-Hearing Preparation:
    1. Responsibilities of the student: At least three business days prior to the hearing, the student shall provide the Hearing Committee Chairperson with:
        1. The documentation identified in #2 a-d above
        2. The names of any witnesses the student wishes to present and the name of any representative of the University community who will assist the student in presenting his/her case at the hearing.
    2. Responsibilities of the faculty member(s): At least three business days prior to the hearing, the involved faculty member(s) shall provide the Hearing Committee Chairperson with:
        1. A copy of the course syllabus to include course outcomes, if the hearing is focused on a grade dispute.
        2. Documentation and relevant information pertaining to the student's performance in the course or clinical learning experience or related to the allegation of the student's academic dishonesty.
        3. The names of any witnesses the involved faculty member(s) wishes to present and the name of any representative of the University community who will assist the involved faculty member(s) in presenting his/her case at the hearing.
    3. Responsibilities of the Hearing Committee: The Hearing Committee Chairperson may request additional materials from the student and involved faculty member(s) at any time during the hearing process.
8. The hearing will include: the student, involved faculty member(s), and designated representatives of the University community who will assist in presenting an individual's case. Witnesses are typically excused from the hearing, except when their statements are needed. The hearing will be private, and all persons present at the hearing will consider all information presented to be confidential. Individuals appearing before the Hearing Committee have the responsibility of presenting truthful information. The Hearing Committee, in reaching its decision, will evaluate the credibility of the parties and any witnesses. The student and involved faculty member(s) may make an opening statement. Presentation of evidence will only be made during the hearing. During the hearing, the Hearing Committee members may address questions to any party or witness. Both the involved faculty member(s) and the student may present materials described in item #6 above (or as included with the student's request for grievance hearing) before the Hearing Committee and in the presence of the other party. The conduct of the hearing is informal, and the Hearing Committee is not bound by rules of evidence or court procedures. Matters of procedure will be decided by the Chairperson of the Hearing Committee.
9. Within three business days of the hearing, the Hearing Committee will render a decision.
10. Within two weeks of the Hearing, the Chairperson of the Hearing Committee will communicate a summary of the Hearing Committee's findings and decision, in writing, to the student, faculty member(s) involved, Program Director, and Dean. E-mail is permitted.
11. In cases of a grade dispute, if the Hearing Committee renders a decision in support of the student's petition, the faculty member submits a grade-change request consistent with the Hearing Committee's findings. If the Hearing Committee finds that the student's petition is without merit, the grade shall remain unchanged.
12. If a student is grieving a grade associated with a clinical experience, and the Hearing Committee determines that the faculty grading was in significant violation of clearly established written school policies, or the result of improper procedures, or was capricious, the Hearing Committee will communicate the decision to the Associate Dean of the Undergraduate or Graduate program. Notwithstanding this decision, the Hearing Committee and/or the Associate Dean may require an independent re-evaluation of the student's performance (knowledge, skills, or behavior).
13. If it is judged by the Hearing Committee or the Associate Dean that an independent reevaluation of the student's performance is warranted, the Associate Dean will communicate the need for the evaluation to the Program Director, who will arrange for an independent reevaluation of the student that may involve a clinical, lab, or simulation session by a faculty member not known to the student.

This independent reevaluation summary will be forwarded to the Hearing Committee and the Associate Dean for a final determination of the course grade.

Appeals Process

The procedure for an appeal of a Hearing Committee decision varies depending on whether the student is enrolled in a program in the MNSON or if the student is enrolled in a degree program housed in the Graduate School.

1. Students enrolled in a program in the MNSON have a right to appeal in writing to the Dean within 30 days of notice of the Hearing Committee's decision. The decision of the Dean is final (except in cases of expulsion, in which case the sanction may be imposed only by the Senior Academic Officer upon recommendation of the Dean).
2. Students in the MNSON enrolled in degree programs housed in the Graduate School may appeal the MNSON's Hearing Committee decision by requesting a Graduate School hearing in accordance with the Graduate School's Academic Grievance Procedure at http://www.luc.edu/gradschool/academics_policies.shtml. The request must be made to the Graduate School Dean within 30 days of the decision by the Hearing Committee and must specify the nature of the grievance and prior attempts to resolve the matter. A party may appeal the decision of the Graduate School hearing board to the Graduate School Dean in writing within 30 days of notification of the Graduate School hearing board's decision and must include an explanation of the basis for the appeal. The Graduate School Dean's decision is final in all cases (including dismissal from a Graduate School program), except those involving possible expulsion from the University, which may be imposed only by the Senior Academic Officer.

Academic Integrity

Refer to Graduate School policy on Academic Integrity (p. 2029).

Academic Policies

In addition to the policies outlined below, students are also required to understand and adhere to the policies of the Graduate School, located here (p. 2029).

The Loyola University Graduate School Catalog identifies criteria for good standing, grade point average, probation and dismissal from the university. Consistent with The Graduate School, students are expected to maintain a grade point average of 3.0 (B) or greater. Students with a grade point average less than 3.0 may be placed on academic probation.

Only one instance of a grade of C+ or C is allowed in any of the required courses in the PhD in Nursing Program, and the student must maintain a grade point average of 3.0 or greater even with this C grade. If a second C + or C grade is received during the course of study, the student's progress will be evaluated by the PhD in Nursing Program Committee. Students with this pattern of grades may be considered for dismissal from the program.

Students with two C level grades (C+, C) will be required to repeat one of the courses in which a C level grade was obtained. The student's academic advisor and the PhD in Nursing Program Committee will determine which course will be repeated.

Students earning a grade lower than the C level will automatically be brought to the PhD in Nursing Program Committee for review. Any course in which a grade lower than C is earned must be repeated.

For students enrolled in or, a grade of "credit" (P) or "no credit" (NP) is assigned. A grade of "no credit" indicates unsatisfactory progress. Students receiving a "no credit" (NP) grade will be automatically reviewed by the PhD in Nursing Program Committee. Progress reports must be submitted as part of the course requirements for. Failure to submit a progress report by the posted deadline may result in a "no credit" (NP) grade being assigned for the course.

Continuous Registration

All students are required to maintain continuous registration during the academic year until degree requirements are met, unless the student has received a leave of absence. Students meet the continuous registration requirement through enrollment in the fall and spring semesters.

Students who have completed all coursework and are either preparing for the qualifying examination, working on the dissertation proposal, or working on the dissertation must still maintain continuous registration by enrolling in GNUR 610 or GNUR 600 for the appropriate semesters.

Students who do not meet the continuous registration condition will be considered inactive and not in good standing. After a break in continuous registration for a single semester, a block will be placed on the student's record, prohibiting enrollment in courses. A request for reinstatement must be submitted to the Assistant Dean for the PhD in Nursing Program who will evaluate the request, in collaboration with the PhD in Nursing Program Committee, and submit a recommendation on the request to the Graduate School.

Students who do not maintain continuous registration will be required to remit a reinstatement fee. The fee will be calculated using the dissertation supervision fee for the terms missed plus an additional penalty of $100.

Degree Conferral

Degrees are conferred on specific dates in May, August and December and this date is noted on the official transcript.

The conferring of a degree presumes the student has been properly admitted and classified, has completed all residency requirements, all coursework has been completed with acceptable grades, degree requirements have been met within the required time limit, an approved dissertation has been submitted and accepted by the Graduate School, all library books returned and fines resolved, and all financial indebtedness to the University has been eliminated.

Prior to the date of the degree conferral, a student cannot claim or indicate the PhD credential, even though all course, program, and dissertation requirements have been satisfied. Additionally, the School of Nursing does not recognize or endorse the use of (c) at any time during program matriculation [e.g., PhD(c)] to represent candidacy for the degree.

Students must apply to receive a degree. An application for a degree is good for a single degree conferral date (May, August, or December). The application for degree is completed through LOCUS. Go to the Student Self-Serve section and click on the tab for Degree Progression and Graduation.

Students are assessed a matriculation fee during their first semester of study and are not assessed a separate fee to apply for graduation. If the degree requirements are not met by the deadline for the degree conferral date included in the application, a new application for degree must be submitted through LOCUS (https://locus.luc.edu).

The deadline for completing the application for degree is published in the Academic Calendar. Application for degree deadlines are typically August 1 for degree conferrals at the end of the Fall semester and December 1 for a degree conferral occurring at the end of the Spring semester, and February 1 for degree conferrals at the end of the Summer semesters.

Dissertation

The dissertation is an independent research project undertaken as the final requirement for the Doctor of Philosophy degree. The dissertation research is conducted under the supervision of the dissertation committee.

The Dissertation Committee

The dissertation committee is officially appointed by the Graduate School. Committees are not official until this appointment is completed. The dissertation committee should be formed during the semester following the successful completion of the qualifying examination.

A dissertation committee will have a minimum of three voting committee members (one director and two readers). The student, in consultation with the Assistant Dean for the PhD in Nursing Program and the faculty advisor, requests faculty to serve as committee members. At least one half of the committee members must be Full or Associate members of the faculty of the Graduate School. The Dissertation Director must be a full-time faculty member of the MNSON and a Full member of the faculty of the Loyola University Chicago Graduate School (Full and Associate members of the faculty of the Graduate School are listed on the Graduate School website; not all MNSON faculty member hold Graduate Faculty appointments). The Dissertation Director ensures that all policies and practices are adhered to throughout the dissertation process.

Readers may be Full or Associate members of the Graduate Faculty, or Loyola University Faculty who do not hold Graduate Faculty status. Individuals from other institutions may also be recommended to serve as readers. In situations where the reader is not a Loyola faculty member or does have Full or Associate membership in the Loyola University Chicago Graduate School, the student must submit a copy of the curriculum vitae with the Thesis/Dissertation Committee Form through the Graduate Student Progress System (GSPS) (https://gsps.luc.edu/Secure/Login.aspx). Readers from other institutions must possess credentials that are consistent with those required for Full or Associate faculty status with the Graduate School of Loyola University Chicago. For an individual from another institution to be considered as a reader on the committee, the individual must hold a terminal degree in their field of study.

Emeriti faculty of the MNSON may serve on dissertation committees. Emeriti faculty are considered to be full members of the faculty of the Graduate School for the purposes of constituting the dissertation committee.

Committee members should possess expertise that is relevant to aspects of the dissertation topic and research methods.

The Assistant Dean for the PhD in Nursing Program is notified when a completed Thesis/Dissertation Committee Form has been submitted through the GSPS. The Assistant Dean will review and approve the committee.

Notification of the official appointment of the dissertation committee comes from the Graduate School. No dissertation proposal will be accepted in the Graduate School unless there is a dissertation committee officially appointed by the Graduate School. The dissertation committee must be appointed at least one semester prior to the defense of the dissertation.

Dissertation Proposal

A scholarly dissertation reporting original research on a topic related to nursing is required. Credit is not granted for dissertation research at Loyola University Chicago. During the period of the dissertation proposal development and the subsequent research, the student must register in GNUR 600: Dissertation Seminar (up to 2 times) and GNUR 600: Dissertation Supervision (after Dissertation Seminar is completed).

The dissertation proposal should include the first three chapters of the dissertation: 1) a discussion of the purpose or objective the proposed research; 2) review of the related literature, and 3) a discussion of the research methods being proposed to conduct the study. Students are encouraged to use the Formatting Manual for Theses and Dissertations https://www.luc.edu/gradschool/formatting.shtml as directed by their Dissertation Director, in the preparation of their proposal.

The dissertation proposal is submitted by the student to the Dissertation Director for review and approval. Once it has been approved by the Dissertation Director, the student will send the dissertation proposal to the committee members for review. Students should contact committee members to determine if they would prefer an electronic or hard copy of the dissertation proposal. Readers are given four weeks to review and evaluate the proposal. The student will work with the Dissertation Director to solicit feedback from the readers. This feedback will be used to determine if the student is ready for an oral defense of the dissertation proposal.

Dissertation Proposal Defense

The dissertation proposal defense is scheduled at a time of convenience for committee members and student. The student is expected to give an oral presentation of the proposal. The members of the committee will examine the student through critical questions related to the intended research. Unanimous approval is required for approval of the dissertation proposal.

After the unanimous approval of the dissertation proposal, the student must initiate the Ballot for the Approval of the Thesis/Dissertation Proposal to the oral defense of the proposal which can be found in the GSPS (https://gsps.luc.edu/Secure/Login.aspx) under the heading "Student Forms." Please follow the directions on this form.

A one-page abstract of the proposed research must accompany the ballot. Approvals from the Institutional Review Board (IRB) of Loyola, and other institutions as necessary and appropriate, must be obtained.

Approval of Research by the Institutional Review Board

All research must have Institutional Review Board (IRB) approval before data collection can begin. The student's Dissertation Director serves as the principal investigator (PI) for the submission of the IRB proposal. Students do not serve as the PI for any IRB submissions, or any grant submissions. The Dissertation Director must submit the IRB application to the Loyola University Health System (LUHS) Institutional Review Board. Students are listed as a co-investigator for the study. Even if

human subjects are not involved (e. g., data mining) IRB approval is necessary. The Assistant Dean for the PhD in Nursing Program must be listed as a "contact" on the IRB application. A copy of the IRB approval letter must be sent to the Assistant Dean for the PhD in Nursing Program, who will then forward the approval to the Graduate School.

If a student plans to collect data at Loyola University Health System (LUHS), they will need to complete the LUHS clinical nursing orientation, as directed. This process is also referred to as the on-boarding policy. Any student who is planning to collect data at LUHS or any of its affiliates must complete this process. It is recommended that the student allows up to at least two to three months to complete the clinical nursing orientation process. Please contact Assistant Dean for the PhD in Nursing Program who will work with you and the Associate Dean for Research and Scholarly Innovations to complete this process. Also refer to the appendices of this handbook for the policy and required form.

If data are being collected at another site, outside of LUC or LUHS, IRB approval as well as on-boarding requirements must be obtained from that institution as well as Loyola University Chicago. Data collection may not begin until all approvals have been obtained.

Students conducting their dissertation research through LUHS may need to present their proposal and completed research at the Nursing Research Council and Evidence Based Practice Council. Students should reach out to the Assistant Dean for the PhD in Nursing Program to obtain guidance and contact information for the Council.

It is mandatory, that two courses: 1) the Collaborative IRB Training Initiative (CITI) and 2) the Responsible Conduct in Research course (RCRS) are successfully completed prior to the Dissertation Director submitting your proposal to the IRB.

- Loyola University Chicago uses the online training course, provided by the University of Miami, called Collaborative IRB Training Initiative (CITI) course top provide convenient web-based training programs to the research community. Completion of the CITI course quizzes with an overall score of 80 percent is required for certification. To begin On-Line Training
  - Go to https://about.citiprogram.org/
  - Click on "Register Here"
- In accordance with Federal regulations, effective January 2010, Loyola University Chicago has implemented a new Responsible Conduct in Research and Scholarship (RCRS) course that incorporates research education into the curriculum for all students. Taught over a two-day period, students are presented with relevant information and background material on research integrity and ethics and given the opportunity to apply these ethical principles in a small group setting. Loyola RCRS program includes instruction in core areas such as:
  - research misconduct
  - conflicts of interest and commitment
  - data management practices: data ownership, collection, protection and sharing
  - mentor and trainee responsibilities
  - collaborative research
  - responsible authorship and publication practices
  - peer review
  - protection of human subjects
  - welfare of laboratory animals
- The RCRS training can be accomplished by taking either UNIV 370 Responsible Conduct in Research and Scholarship. UNIV 370 is offered at the LSC once a semester. It is a no cost, 0 credit, 2-day course. Registration for the course is through LOCUS (https://locus.luc.edu).
- Students and their dissertation advisor are responsible for the completion of all required IRB reports, such as annual reviews and adverse event reporting, in accordance with IRB policy. Proper closure and termination of the dissertation research study with all study-associated IRBs is required to be eligible for degree conferral.

Dissertation Fee

Once doctoral students have submitted all dissertation proposal materials, the Graduate School will conduct a doctoral candidacy review. This means that the Dean's office of the Graduate School will verify that all degree requirements, except for the completed dissertation, have been met.

Students will be assessed a one-time fee which will appear on their bill as "Matriculation Fee" during their first semester of study in the PhD in Nursing program. This fee replaces the proposal registration fee that was previously assessed by the Graduate School.

Candidacy

A student in good standing will be designated as a "PhD Candidate" upon:

- Completing all specifically required course work;
- Satisfying all research tool requirements;
- Successfully completing all aspects of the qualifying examination;
- Successfully defending and submitting an approved dissertation proposal.
- Obtaining the required approvals from the Institutional Review Board(s) to begin the dissertation research.

The Graduate School will notify the student of admission to candidacy and this milestone is then posted on the transcript.

The School of Nursing does not recognize or endorse the use of (c) at any time during program matriculation [e.g., PhD(c)] to represent candidacy for the degree. Students are not to use this designation in any form.

Dissertation Proposal Summary

After completion of Qualifying Examination:

- The student requests appointment of a dissertation committee using the Thesis/Dissertation Committee Recommendation Form available from the GSPS. This request is then forwarded through the GSPS to the Assistant Dean for Nursing Program. The committee should be formed the semester following the successful completion of the qualifying examination.
- Once the Assistant Dean for the PhD in Nursing Program approves the committee, the committee recommendation is forwarded to The Graduate School who then informs the student of the approval (or not) of the committee.
- The student, working with the Dissertation Director and committee members, drafts the dissertation proposal.
- The proposal is reviewed and approved by the Dissertation Director and then submitted to the other readers for review.
- Committee members are given four weeks to review and evaluate the dissertation proposal.

Semester of Dissertation Proposal Defense:

- An oral defense of the proposal is scheduled.
- Once the dissertation proposal has been voted on affirmatively by all the members of the dissertation committee, the student submits:
  - one copy of the proposal (if needed, check current requirements at the time of the proposal defense).
  - the Ballot for the Approval of the Thesis/Dissertation Proposal, and
  - a one-page abstract of the proposed dissertation research to the GSPS system under Student Forms Dissertation Proposal Ballot.
- An application for IRB review of the proposed research is initiated.

General Content Guidelines for the Dissertation

The content of the dissertation is dependent on the approach taken in the study (i.e. quantitative or qualitative). In general, all dissertations consist of five chapters of text. The general guidelines for each chapter, as well as the abstract and appendices are outlined below. Students work closely with their Dissertation Director and committee members regarding the specific content in each chapter.

Abstract

A concise summary of the purpose, design, site, sample, intervention (if applicable), concepts (including measures if applicable), analyses, results, conclusions and implications.

Chapter 1: Introduction

Background on the problem; e.g., nature of the problem; magnitude and importance of the problem; overall purpose, rationale, and logical development for the study; specific research questions and hypotheses (if applicable).

Chapter 2: Literature review

The conceptual framework/model or theory to be used for the study (quantitative); why this framework/model or theory is appropriate; whether/how it has been used to study this type of problem; how the proposed study is guided by that framework/model or theory; any changes that need to be made in the conceptual framework/model or theory to make it more useful for the proposed study, as appropriate.

A concise synthesis and critique of the relevant literature, a summary of what is known about the problem, and the gaps in knowledge that exist; summary of how the study contributes to knowledge development and resolving some of the gaps in knowledge related to the problem.

Chapter 3: Methods

Review of the study purpose and research questions, aims, and hypotheses (as applicable); description of the study design, study site, sample characteristics and size, sampling method(s); any intervention(s); conceptual and operational definitions of variables, instrumentation (including psychometric evidence); study procedures and protocol; data collection and management; data analyses; and ethical considerations.

Chapter 4: Results

Summary of sample characteristics; detailed results for each research question, aim and hypothesis; results for any exploratory analyses conducted; or additional analyses completed that were not part of the original research plan. Summarize data in figures and tables as appropriate.

Chapter 5: Discussion

Summarize and integrate results for each research question, aim and hypothesis; derive conclusions and provide explanations for findings; integrate findings with extant literature, discussing areas of convergence and divergence; discuss how findings address knowledge gaps; identify and discuss realistic implications of the findings for theory, research, practice, education, administration, and health as appropriate; address strengths and limitations of the study; identify directions for further study.

Appendices

Use this section to report information and provide examples to amplify sections of the research report. Include such items as research instruments and interview guides, consent documents, Institutional Review Board approvals, supplemental tables, letters or permission and other information as appropriate.

Dissertation Seminar and Dissertation Supervision (GNUR 600)

After the required approvals have been obtained, students work closely with their Dissertation Director during the conduct of the research. Students must maintain continuous registration for the fall and spring semesters to remain in good standing with the university. Continuous, full time registration is accomplished by enrollment in GNUR 600 Dissertation Supervision. Dissertation seminar is conducted in a group format, and the seminar is led by one to two members of the PhD in Nursing Program Committee or other graduate faculty. The seminar is taken the 1-2 semesters after successful completion of the qualifying exam.

After the dissertation seminar courses have been completed, students enroll in GNUR 600 Dissertation Supervision. Students register for the section of GNUR 600 that is specific to their Dissertation Director.

If students are using faculty or university resources during a summer session, registration for that semester may also be required.

A progress report must be submitted to the Dissertation Director for each semester the student is enrolled in GNUR 600 Dissertation Supervision. A progress report is not required during enrollment in GNUR 600, unless specifically requested by the Dissertation Director.

A grade of credit or no credit is entered for GNUR 600 for each semester of registration. Failure to submit a progress report, failing to make sufficient progress in the dissertation research, or failing to keep in contact with the Dissertation Director may result in a grade of no credit being assigned. No credit grades will be reviewed by the PhD in Nursing Program Committee. A student may be recommended for dismissal from the PhD in Nursing program if satisfactory progress is not made on the dissertation research. Two grades of NP are grounds for dismissal from the program.

Final Dissertation Text and Scheduling the Oral Defense of the Dissertation

The Graduate School publishes an unyielding deadline for submitting final electronic copies of the dissertation prior to degree conferral. Circulation of the readers' copy to committee members and scheduling the oral defense must be arranged with this deadline in mind in order to be eligible for a particular degree conferral date.

The student will work under the supervision of the Dissertation Director and committee during the course of the research. The Dissertation Director and student should agree on the process for submission of the dissertation (submit chapters as these are completed; submit entire document at once). The Dissertation Director should review the dissertation (which includes all chapters) and inform the student when the paper is of sufficient quality for it to be sent to other members of the

committee for review. While students work primarily with the Dissertation Director during this period, students should maintain contact with all dissertation committee members to discuss issues relative to their expertise and keep the members informed of progress.

Once the Dissertation Director has informed the student to submit the paper to other members of the committee, readers are given four weeks to review the dissertation document. The student will work closely with the Dissertation Director in soliciting feedback from the readers. If all members of the committee are in agreement, the oral defense may be scheduled. The oral defense is not scheduled if the dissertation is incomplete and/or there are serious issues with the research and/or the quality of the paper is not acceptable to any of the committee members. Committee members must agree that the text is in substantially its final form, with no major revisions required, before the defense may be scheduled.

Dissertation defenses are public examinations of the student and are announced through the distribution of an Announcement of an Oral Defense.

The Sample Oral Defense Announcement is available at The Graduate School web site (https://www.luc.edu/gradschool/formatting.shtml) and the PhD in Nursing Sakai® site. Once the date, time, and location of the dissertation defense have been agreed up, the student is responsible for creating the Announcement of an Oral Defense and forwarding this document to the Assistant Dean of the PhD in Nursing Program.

The Assistant Dean of the PhD in Nursing Program will distribute the announcement, and post notices of the announcement at the Lakeshore and Health Sciences campuses. Announcements must be posted and distributed at least two weeks prior to the defense. Zoom links should be included on the announcement, for use by faculty, guests, and PhD in Nursing students. All members of the committee must attend the defense in person, unless prior approvals for remote participation have been approved by the Assistant Dean of the PhD in Nursing program.

Students are responsible for reserving the room for the defense and any audiovisual or other equipment needed for the defense. Students should contact the Assistant Dean of the PhD in Nursing Program for assistance.

Format Check of the Dissertation Text

Students must make arrangements for a format check of their dissertation text. This format check must occur prior to the actual defense. Deadlines for the format check, in relation to the submission of final dissertation copies and degree conferrals, are published on the academic calendar (https://www.luc.edu/academics/schedules/index.shtml/) for the Graduate School. During the format check, Graduate School representatives will ensure the dissertation document adheres to the formatting guidelines of Loyola University Chicago. Students will receive email notification of any formatting changes required by the Graduate School. A copy of the formatting guidelines is available through the Graduate School website (https://www.luc.edu/gradschool/formatting.shtml/).

Dissertation Defense

All voting members of the committee must participate in the defense. In all cases, the Dissertation Director must be present at the oral defense and typically, all readers are also present. In certain rare circumstances, and with prior approval of the Dissertation Director, and the Assistant Dean for the PhD in Nursing Program, readers may participate in the oral defense via video conference.

The Dissertation Director presides over the defense. Prior to the presentation of the research, the Dissertation Director will explain the process for the defense and complete any necessary introductions.

The defense begins with a summary of the research and the significance of the research and findings. Candidates shall justify conclusions reached, identify implications of the findings, suggest areas for further investigation, and identify how the results of the study fill gaps in the extant literature. Plans for dissemination of the findings should be outlined. The presentation should take approximately 30 minutes.

Once the presentation has been completed, the Dissertation Director will preside over the question-and-answer session conducted between dissertation committee and the student. After the committee question and answer session is completed, the Dissertation Director may open the session up for limited comments and questions from the audience.

After the question-and-answer portion of the defense is completed, the candidate and any audience members will be excused while the members of the Dissertation Committee deliberate. Each committee member will be asked to comment on the candidate's defense and dissertation document.

The committee will then vote on the candidate's performance using a "pass/no pass" designation. The student is called back into the room and informed of the committee's decision.

The committee may award "Distinction" to designate outstanding work in both the text and oral defense. Votes of "Distinction" must be unanimous among the committee members and this designation will be noted on the transcript.

The result of the committee's deliberations on the text and oral defense is documented on the Ballot for the Approval of the Text and Oral Defense of a Thesis/Dissertation, available on the Graduate School website. Students should bring this document to the dissertation defense.

Once all signatures have been affixed to the ballot, the form is submitted to the Assistant Dean for the PhD in Nursing Program for signature, who will approve the form, and then submit the form to the Graduate School via the Graduate Student Performance System.

Terminating the Study with the Institutional Review Board

After a successful defense, the Dissertation Director, who served as the PI for the dissertation research, is responsible for terminating the dissertation research study through the Institutional Review Board. The application to close the study should be completed as soon after the defense as practical, as determined by the Dissertation Director.

Changes to Dissertation Text after the Defense

After the defense, committee members may require some changes to the dissertation text. These changes must be approved by the committee before submission of the final dissertation to the Graduate School. The committee members will determine the mechanism for approving post-defense changes. The Dissertation Director must complete the Thesis/Dissertation Approval Sheet, which is submitted to the Graduate School with the electronic final copy of the dissertation. The Approval Sheet must have the signature of the Dissertation Director.

Final Copies of the Dissertation

After all required revisions have been completed and the Dissertation Director has completed the Thesis/Dissertation Approval Sheet,

the dissertation text and other required documents are submitted electronically to the Graduate School. Instructions for final submissions are outlined in the policies for Dissertation/Thesis Formatting on the Graduate School website: https://www.luc.edu/gradschool/formatting.shtml.

All submissions must be completed on or before the published deadlines in the academic calendar. Students who miss the published deadline will not have their degree conferred and must complete a new application to receive a degree.

According to Graduate School policy, students must submit final copies of their dissertation, with the approved revisions, within one semester of a successful dissertation defense (e.g., if a student defends their dissertation successfully in the fall semester, the final copies of the dissertation must be submitted to meet the spring semester deadlines). If the deadline for submission of the final copies is not met, the student may be discontinued from the program and be required to apply for reinstatement to the program.

Dissertation Process Summary

Semesters following Dissertation Proposal Approval

- Work with Dissertation Director in the submission of the proposal to the required Institutional Review Board(s)
- Register for GNUR 600, Dissertation Seminar for up to two semesters, and GNUR 600, Dissertation Supervision for each semester thereafter, while working on the dissertation.
- Complete a progress report and submit to Dissertation Director each semester (November 15th for fall semester or April 15th for spring semester).
- Conduct the research and write the dissertation.

Semester of, or the Semester Prior to, the Dissertation Defense

- Submit copies of dissertation to committee members after approval by the Dissertation Director.
- Solicit feedback from dissertation committee members.
- Schedule defense when the Dean, Assistant Dean for the PhD Program, all committee members and Dissertation Director agree; arrange room, audiovisual equipment and assistance, and arrange for a zoom meeting so that distance students, faculty, and guests may attend.
- Arrange for notice of dissertation defense using the Sample Oral Defense Announcement (see the Sakai site for PhD Students and the appendices of this handbook). Notice of the defense must be posted at the Health Sciences and Lakeshore campuses at least two weeks in advance of the dissertation defense date. Submit the announcement to the Assistant Dean of the PhD in Nursing Program, who will then distribute and post the announcement.
- Obtain Ballot for Approval of the Text and Oral Defense of a Thesis/Dissertation from the Graduate School website. Bring this form to the defense.
- Arrange for a format check of the dissertation text through the Graduate School.

After the Defense

- Make any necessary revisions to the dissertation text as requested by the dissertation committee and/or the Graduate School. Obtain Dissertation Director approval of revisions request by the dissertation committee through the Thesis/Dissertation Approval Sheet.
- Initiate the process to close the study through the Institutional Review Board(s)
- Submit required electronic copies of the dissertation and supporting documents to the Graduate School within one semester of the successful defense, according to published deadlines.
- Verify all financial indebtedness and other obligations (such as closure of the IRB protocol) to the University have been satisfied.

Formal Complaint Policy by Student

A formal complaint is defined by Loyola University Chicago's (the "University") Marcella Niehoff School of Nursing (the "MNSON") as any substantive complaint or concern, put forth in writing, by a student which requires a response from the administration of the MNSON.

Formal complaints may originate within the MNSON, or through a mechanism external to the MNSON, such as a University grievance process or the Ethics Line Reporting Hotline.

The MNSON adheres to all applicable University policies regarding the filing, review and resolution of formal complaints, as defined herein. The nature of the complaint dictates the review and resolution processes, as detailed further in this policy.

General Guidelines

- Student Complaints Related to Academic Issues.
  - Formal student complaints related to academic disputes involving the appropriateness of course grades and accusations of academic dishonesty are addressed through the MNSON's Academic Grievance and Appeals Process. Students enrolled in degree programs housed in the Graduate School may also invoke the procedures under the MNSON Academic Grievance and Appeals Process to address disputes relating to dismissal from a program. Students enrolled in degree programs housed in the Graduate School whose disputes are related to course grades, accusations of academic dishonesty, or dismissal from a program, are not resolved after a hearing within the MNSON may continue the academic grievance process in accordance with the Graduate School's Academic Grievance Procedure (p. 2029).
  - Formal student complaints relating to decisions affecting undergraduate academic standing or progress are addressed through the University's General Academic Appeals (p. 1919) process.
  - Formal student complaints relating to undergraduate changes of academic records or dismissal for poor scholarship are addressed through the University's Special Academic Appeals (p. 1919) process.
- Student Complaints Related to Non-Academic Issues.
  - The University admits students without regard to their race, color, religion, sex, age, sexual orientation, gender identity, national or ethnic origin, ancestry, disability, marital status, parental status, military/veteran status, or any other characteristic protected by applicable law to all the rights, privileges, programs, and other activities generally accorded or made available to students at the school. The University does not discriminate on the basis of race, color, religion, sex, age, sexual orientation, gender identity, national or ethnic origin, ancestry, disability, marital status, parental status, military/veteran status, or any other characteristic protected by applicable law in the administration of its educational policies, admissions policies, scholarship and loan programs, and athletic and other school-administered programs, or in any aspects of its employment of faculty and staff. Students within the MNSON with questions about this policy or who believe

they have been discriminated against because of their race, color, religion, sex, age, sexual orientation, gender identity, national or ethnic origin, ancestry, disability, marital status, parental status, military/veteran status, or any other characteristic protected by applicable law, may contact the Ethics Line Reporting Hotline at (855) 603-6988 or submit a report online (https://www.luc.edu/hr/ethics/).
    - Questions regarding Title IX may also be referred to the University's Title IX Coordinator, Tim Love (tlove@luc.edu), Executive Director for Equity and Compliance, or to the Department of Education's Office for Civil Rights.
    - Questions regarding Title VI of the Civil Rights Act of 1964 ("Title VI") may be referred to the Office of Equity and Compliance, via email (equity@luc.edu) or 773-508-7766.
    - Questions regarding Section 504 of the Rehabilitation Act of 1973 ("Section 504") may also be referred to Tim Love, Executive Director for Equity and Compliance tlove@luc.edu or another member of the Office for Equity & Compliance staff, at (773) 508-7766 or via email (equity@luc.edu).
- Complaint Referral.
    - University administrators may refer certain formal complaints from MNSON students, including complaints made through the Ethics Line Reporting Hotline, to the MNSON Dean's office for appropriate action, including assistance in the investigation of a report. Where appropriate, the Dean will assign an administrator from the MNSON to assist in the investigation. Such assignments are made with consideration of the need for the investigation to proceed in an objective and non-biased manner.
- Complaints Received through the Ethics Line Reporting Hotline.
    - The Ethics Line Reporting Hotline exists as a means for University faculty, staff, students, administrators or other concerned parties to report activities that involve misconduct or violation of University policies. Reports may be made online at https://www.luc.edu/hr/ethics/ or by calling 855-603-6988.
    - As explained at on the EthicsLine website (https://www.luc.edu/hr/ethics/):
        - The University strongly encourages all faculty, staff, students, administrators or other concerned parties to use this Reporting Hotline to report suspected or wrongful acts of conduct by Loyola University Chicago community members. No University administrator, faculty, staff or student may interfere with the good faith reporting of suspected or actual wrongful conduct; no individual who makes such a good faith report shall be subject to retaliation, including harassment or any adverse employment, academic or educational consequence, as a result of making a report.
        - The University is committed to the highest ethical and professional standards of conduct as an integral part of its mission of expanding knowledge in the service of humanity through learning, justice and faith. To achieve this goal, the University relies on each community member's ethical behavior, honesty, integrity and good judgment. Each community member should demonstrate respect for the rights of others.
    - All reports to the Ethics Line Reporting Hotline are made available to specific individuals within the University on the University's Ethics Line Reporting Hotline Resource Team (the "Resource Team") who are charged with carefully reviewing and evaluating the report and assigning it to an appropriate case manager/investigator on the Resource Team, based on the type of alleged violation and location of the incident. The Ethics Line Reporting Hotline System does not create a new category of prohibited behavior or a new process for members of the University community to be disciplined or sanctioned. The Resource Team has no authority to discipline any student or member of the faculty or staff. When reported conduct is subject to existing University disciplinary or judicial procedures, appropriate referrals will be made by the Resource Team.
    - Reports submitted through the Ethics Line Reporting Hotline are handled as promptly and discreetly as possible, with facts made available only to those who need to investigate and resolve the matter. Individuals filing a report may follow-up online on the status of a report and to determine if further information is needed to proceed with an investigation.

Forms

School of Nursing Forms

Located in the PhD in Nursing Sakai® website

- PhD in Nursing Program Planning Worksheet[1]
- Course Contract with Faculty Mentor - GNUR 498, GNUR 532, GNUR 610[1]
- Qualifying Exam Eligibility Form[1]
- Course Contract for Qualifying Exam[1]
- Change of Advisor or Committee Member[1]
- GNUR 600 Student Progress Report[1]

Graduate Student Progress System Forms

Located on the GSPS system (https://gsps.luc.edu/Secure/Login.aspx) under Student Forms

- Change in Degree Seeking Status[1]
- Comprehensive Examination
- Degree Requirements
- Doctoral Candidacy
- Extension of Time[1]
- Leave of Absence[1]
- Research Tool Requirement
- Thesis/Dissertation Committee[1]
- Thesis/Dissertation Proposal[1]
- Thesis/Dissertation Defense[1]
- Thesis/Dissertation Overview
- Transfer Credit

Note: Check the Graduate Student Progress System (https://gsps.luc.edu/Secure/Login.aspx) for any updated versions of forms before submission

Graduate School Forms

Located on the Graduate School website (https://www.luc.edu/gradschool/index.shtml/); Select "Current Students" and "Forms."

- Audit Request
- Late Application to Receive a Degree[1]
- Re-Application for Admission[1]
- Reimbursement Form Instructions[1]
- W-9 form required for reimbursement; International students must complete W-8 form.

- Reinstatement Request[1]
- Request for Course Title[1]

Thesis/ Dissertation Forms

- Instructions for Thesis and Dissertations
- Ballot for the Approval of the Text and Oral Defense of a Thesis/ Dissertation (students print out and bring to the defense)[1]

[1] Indicates student initiates the form

Funding and Financial Aid Information

Office of Student Financial Assistance

The Office of Student Financial Assistance houses resources and references about financial aid for students, at the Lake Shore and Water Tower campuses.

Office of Student Financial Assistance | Website (http://www.luc.edu/finaid/graduate.shtml/) | 773.508.7704 | Email (lufinaid@luc.edu)

To determine eligibility for financial assistance students must complete the Free Application for Federal Student Aid (FAFSA). If a student receives federal loans they must be enrolled at least half-time. A graduate student must be enrolled in at least 4 graduate semester hours in the fall and spring semester and at least 2 semester hours in the summer semester to be considered half-time. Full-time enrollment is defined as 8 graduate semester hours in the fall and spring semester and 6 semester hours in the summer semester. However, when students enroll in clinical practicum courses, they are classified as full-time status.

School of Nursing Policy on Graduate Assistantships

A graduate assistantship is intended to help support a student work toward completion of a degree; assigned tasks should be consistent with this purpose. All graduate assistants are assigned relevant professional work for 16 to 19.5 hours per week. Examples of "relevant professional work" include teaching or assisting in a course (under the supervision of a director or mentor); grading for courses; working in a department-sponsored laboratory or instructional center; assisting a faculty member on a grant-sponsored or other research project; professional conference development; and tutoring.

Assistantships are competitive and are awarded for a period of one academic year. A recipient must reapply for each additional year of desired funding. Please let the Assistant Dean for the PhD in Nursing Program know if you are interested in applying for a position as a Research or Teaching Assistant.

Research Assistantships

Research Assistantships may include working with a faculty member on an existing research grant or providing general research support to one or more faculty members in the School of Nursing.

Teaching Assistantships

Teaching Assistantships are focused on providing instructional support to faculty who are teaching in the nursing programs within the School of Nursing. This support may include clinical or laboratory and simulation experiences, as well as supporting classroom instruction

Terms of the Award

Research Assistants' duties are assigned by the Associate Dean for Research and Scholarly Innovation or the faculty member for whom the student is working on a project (in consultation with the Associate Dean for Research and Scholarly Innovation). Teaching Assistants' duties are assigned and coordinated by the Executive Associate Dean for Academic Affairs.

An assistant's workload is distributed evenly and flexibly during the term of the award. During University study days, final examination periods, mid-term breaks, and between academic terms, the student and supervisors(s) should negotiate a mutually agreeable schedule at the beginning of the assistantship assignment, subject to the guideline that no student should be required to work on University holidays or during the entire period of mid-term breaks or the entire period between terms.

It is expected that the student holding a full graduate assistantship (i.e., an assistantship requiring a maximum of 19.5 hours of work per week) will refrain from taking an additional position of employment during the term of the assistantship so that the student may have adequate time to devote to graduate studies.

Evaluation and Criteria for Renewal of Assistantship

The evaluation process and criteria for the renewal of an assistantship will be reviewed with the student RA/TA by the faculty member that they are working with and the Associate Dean for Research and Scholarly Innovation and/or the Executive Associate Dean for Academic Affairs.

Policy Regarding Graduate Student Tuition Scholarships through Assistantships

The School of Nursing pays the tuition for only those courses that are to count toward the fulfillment of degree requirements; in addition, the number of credit hours of tuition eligible for payment by the tuition scholarship is limited to the number of credit hours required for the student to complete the program's degree requirements (e.g., if a student is in a program that requires 45 credit hours of graduate course work, once the student has completed the 45 credit-hour degree requirement, the tuition scholarship will not pay tuition for additional credit hours). It is the student's responsibility to register for and complete appropriate courses while receiving a tuition scholarship; the student is responsible for paying tuition for any courses not eligible for payment by the tuition scholarship.

The Associate Dean for Research and Scholarly Innovation and Executive Associate Dean for Academic Affairs consider this policy when recommending the number of credit hours for which a student's tuition scholarship is to pay.

The Nurse Faculty Loan Program

The Nursing Faculty Loan is available to provide funds to DNP and PhD students who commit to obtaining a position as a faculty member in a school of nursing at the conclusion of their program. Funding is available to assist with the cost of tuition. Room and board, transportation, and personal expenses cannot be included. To be eligible to receive a Nursing Faculty Loan, the student must:

- Be a U.S. citizen or eligible non-citizen;
- Complete the FASA application;
- Not be in default on a federal education loan;
- Be enrolled full- or part-time in an advanced nursing program which includes a specific component to prepare students for nurse faculty roles in schools of nursing;
- Be in good academic standing with the Niehoff School of Nursing and the Graduate School.

Funding each year is subject to the available funds. Students may be awarded loans through this program for up to five years. If funding is not sufficient to make awards to all qualified applicants, preference will

be given to continuing students who have previously participated in the program.

For further information related to this program, please contact the Assistant Dean for the PhD in Nursing Program.

All NFLP recipients must take and.is taught as a hybrid course every summer andis taught in the fall semester each year.

The Jonas Foundation Scholarship

The Jonas Nurse Leaders Scholar Program was created in 2008 to support educational development of new nursing faculty and stimulate models for joint faculty appointments between schools of nursing and clinical affiliates. The grants, made through institutional awards, also prepare doctoral candidates to help students address the needs of future patients – from dealing with co-morbidities and chronic illnesses to providing culturally competent care. Since the program's inception in 2008 with six Scholars in New York City, it has grown to include more than 1,000 Jonas Nurse Leader Scholars at 140 schools across all 50 states plus DC. The Jonas Scholarship supports PhD students who are in the last 2-3 years of their program.

National Research Service Award

These competitive individual awards from the National Institutes of Health are available to promote the training of persons intending a career in research. A major requirement is that the applicant be working with a recognized researcher in that person's area of expertise. These awards are intended to assist the applicant on the first stage of a program of research that will extend to the post-doctoral period and to an independent program of research. Faculty serve as sponsors for these awards. Therefore, contact your advisor about this opportunity.

Tuition Term Payment Plan

The University offers two tuition payment plan options for students.

Term Payment Plan (TTP)

This plan enables students to pay for each term's tuition and fee charges in installments. Semester students may choose from the available two, three, or four-month plans.

Employer Reimbursement and Deferred Tuition Plan (ERP)

This plan is designed to enable students who are eligible for tuition reimbursement from their employer to defer payment of tuition until reimbursement is received.

Information and applications on these plans are available through the Bursar's Offices at the Lake Shore and Water Tower campuses and online (https://www.luc.edu/bursar/).

General Information

Registration

Registration is completed through LOCUS (https://locus.luc.edu) (Loyola's Online Connection to University Services). LOCUS can also be found from the drop-down menu on the LUC (https://www.luc.edu) website. It is a web-based, self-service system that enables students to access information and services online. LOCUS will provide you with the most current class information. A schedule of graduate nursing courses can also be found a month before classes start at the LOCUS website. Students are responsible for information on tuition and fees that is available at the Bursar's Office website (www.luc.edu/bursar).

The Graduate School requires enrollment for eight hours per semester to be classified as a full-time student during the fall and spring semesters and enrollment for six hours to be classified as a full-time student for the summer semester. Enrollment in GNUR 600 and GNUR 610 also classifies students as full time.

Graduate Course Offerings

Some graduate-level nursing courses are reserved each semester and are listed as "Permission Only". Before a student can be enrolled in a Permission Only course, course specific requirements must be met. Registration for "Permission Only" courses is accomplished through the Assistant Dean for the PhD in Nursing Program.

If a student wishes to register for a course offered by another LUC college or school, department, and the specific course has been approved by the student's Advisor, the student will need permission to enroll in the course. The Assistant Dean for the PhD in Nursing Program will facilitate the enrollment.

Location of PhD in Nursing Courses

PhD in Nursing courses during the fall and spring academic year session are alternately scheduled on the Health Sciences Campus in Maywood and the Lakeshore Campus in Rogers Park.

Most graduate courses in nursing (with the exception of practicums, GNUR 509 Teaching Methods and GNUR 513 Qualitative Methods in Nursing Research) are taught 5 weekends each semester (fall and spring). GNUR 600 Dissertation Supervision, typically has 3-4 evening class meetings over the course of a semester. Summer courses are taught in a hybrid immersion format, with some online coursework and an on-campus immersion for class meetings.

Courses in departments other than the School of Nursing may be taught more than one day a week, either during the day or in the evening. The most current information regarding class scheduling is available through course schedule posted on LOCUS.

Student Login ID

Each student is assigned a Loyola University Chicago e-mail account upon acceptance into the program. The user id (also known as the Universal ID or UVID) and password are used to access various systems such as LOCUS, the Lakeshore Campus library from an off-campus location, the course information system, Sakai® and the Loyola University Chicago e-mail account. The password for the Universal ID is managed through password self-service (https://www.luc.edu/its/services/microsoftselfservicepasswordreset/).

E-mail Communication

Each student is assigned a Loyola University Chicago e-mail account and all official university communications are routed to that account. Students are responsible for monitoring their Loyola University Chicago email account on a regular basis. Official university communications, including communications from faculty during coursework, will not be sent to a student's personal email account.

Student Identification Card

Identification badges are needed by students to access campus buildings.

All students should upload their ID picture to the LUC website here (https://www.luc.edu/campuscard/services/photosubmission/).

The school of nursing will then facilitate the generation of a student identification card for the Health Sciences Campus. IDs will be distributed at the first class meeting.

A student ID is needed for the Lakeshore Campus as well. After the photo is uploaded, please email the Campus Card office (CampusCard@luc.edu) and copy the Assistant Dean of the PhD in Nursing Program, authorizing the Assistant Dean (by name) to pick up the LSC ID card on your behalf. IDs will be distributed at the first class meeting.

Security

The Security Department strives to maintain a safe environment on the various campuses of the University, 24 hours a day, and seven days a week. Escort service on the Lake Shore (LS) and Loyola University Medical Center (LUMC) campuses is available. Students should report any suspicious or hazardous conditions on or near campus to the Security Department. LS: 773-508-6039, LUMC: 708-216-9077.

Parking

To obtain information about parking at LUMC, contact the Parking Office at 708-216-9092. Daily parking in Lot A is $5.00. At the Water Tower Campus (WTC), reduced rate parking is available at some local parking lots after 4:15 p.m. To receive a reduced rate, your parking ticket must be stamped at the 25 East Pearson Building on the main level by the security desk. Daily parking at the LSC is available in the Main Garage and the Fordham Garage.

Research Computing Services

Services are available for doctoral students. These services include consultation in statistical computing, research database management, and the use of software packages on microcomputer and mainframe computer systems. Research computing services are available through the Information Technology Services department. Requests can be made through their website (https://www.luc.edu/its/rcs/) or the help desk at 773-508-4487.

Statistical Support

Statistical support services for students during their dissertation is available through the School of Nursing. Students should first discuss the nature and scope of support with their Dissertation Director. Questions regarding statistical support may be directed to the Assistant Dean of the PhD in Nursing Program for information on how to access these services. The initial meeting of the PhD student and the statistical consult must include the Dissertation Director.

Health Insurance Portability and Accountability Act of 1996 (HIPAA)

The Health Insurance Portability and Accountability Act of 1996 (HIPAA) is a federal law that provides for the protection and privacy of personal health information. The Privacy Rule and the Security Rule of this law affect health care providers, including students enrolled in clinical education activities. The Privacy Rule of the HIPAA defines protected health information as:

“information, including demographic data, that relates to the individual’s past, present, or future physical or mental health or condition; the provision of health care to the individual; or the past, present, or future payment for the provision of health care to the individual; and, that identifies the individual or for which there is a reasonable basis to believe it can be used to identify the individual”

All students must follow the HIPAA Privacy Rules and Guidelines when participating in clinical educational activities. Compliance with these rules and guidelines includes, but is not limited to, maintaining confidentiality of paper and electronic health records and protected health information.

All students are required to complete HIPAA training, as mandated by their educational program. In addition to program-specific training, all students are required to complete any additional training mandated by the clinical facility where their clinical education is occurring.

When a concern is raised that a student has violated the confidentiality and privacy of patient information, the concern is addressed through the formal disciplinary process of the student’s school or college of Loyola University Chicago.

Immunization Policy

Proof of immunity is an Illinois state requirement. All Loyola students enrolled in seven or more credit hours must complete the process to verify proof of immunity. Incomplete immunization information will block access to registering or changing classes. All students must enter immunization requirements into Loyola Health and upload supporting documents before the 10th day of the term.

All immunizations are to be uploaded to Loyola Health. Required Illinois state immunizations are Tetanus, Measles, Mumps, Rubella, and Meningococcal.

A series of three tetanus vaccines is required; One of them must be a TDAP that was given within the past ten years of enrollment.

Two MMR vaccines are required; the first dose must be given four days before your first birthday or after. The second dose must be given a least 28 days after the first dose.

Students who cannot provide proof of immunization may provide laboratory (serologic) evidence of measles, mumps, rubella immunity.

A Meningococcal ACWY vaccine that was given four days before your 16th birthday or after is required for students who enrolling under the age of 22.

Meningitis B does NOT meet this requirement.

All immunization records must be in English or accompanied by a certified translation or they will not be approved.

Guide to Upload Immunization Record

1. Go to Loyola Health (https://campushealth.luc.edu/loyolahealth/login (https://campushealth.luc.edu/loyolahealth/login/))
2. Sign in with UVID and password
3. Click UPLOAD HEALTH RECORDS then UPLOAD VACCINE RECORDS
4. Select ‘STATE MANDATED IMMUNIZATION’ under Vaccine Type
5. Select your Vaccine Name (Tdap, MMR, Meningococcal)
6. Input the date you received the vaccines (this must be done for each section)
7. Upload photo file (ONLY PDF, JPEG, JPG, JPNG, DOCX, or MOV) of record

8. Click 'Submit for Approval'
9. You will receive an upload confirmation email.

Incomplete Grades

The Graduate School expects students to complete all coursework by the end of the term during which the courses were taken. However, if a student and the instructor decide in advance, a student may receive a grade of "I" (Incomplete) at the end of the term. The student is to complete the outstanding work and submit it to the instructor according to a schedule approved by the instructor, subject to the following Graduate School policies.

The student must complete and submit all outstanding work to the instructor by the last day of the semester following the term in which the "I" grade was assigned. (For purposes of incomplete grades, the summer sessions are counted together as one term.) If the student does not turn in the work by the deadline, the "I" will automatically become an F. The Graduate School will not approve a change of grade if the student does not complete and submit the work to the instructor within one term of the assignment of an "I" grade.

Independent Study and Directed Study

Students and faculty mentors must complete and submit a completed course syllabus form to the Assistant Dean for the PhD in Nursing Program prior to start of the semester in which the independent study or directed study will be conducted. Students will not be registered for GNUR 498 Independent Study or GNUR 598 Directed Study course until this submission is completed. In most instances, GNUR 598 Directed Study, will be used.

At the discretion of the director of the independent or directed study and with agreement of the student, an annotated title may appear on the student's transcript for an independent or directed study course. This annotation will enable future reviewers of the student's transcript to understand the nature of the student's coursework.

The Request for Course Title form (https://www.luc.edu/media/lucedu/history/pdfs/Title-Request-Form.pdf) must be completed and submitted when the Independent or Directed Study syllabus form is submitted to the Assistant Dean for the PhD in Nursing Program.

Independent Study or Directed Study as Substitute for a Scheduled Course

Courses that are regularly offered in the PhD in Nursing Program cannot be taken as independent study unless the scheduled course offering was cancelled in the semester that the student needed the course for degree requirement completion.

Leave of Absence

It is expected that a student will maintain continual registration in the University from the time of initial matriculation up to graduation. If this is not possible, an approved Leave of Absence will mean that those semesters in which the student does not take courses will not be included in the time limits set for completion of the degree.

A Leave of Absence (LOA) must be requested by the student in writing. The letter should contain reasons for the leave and length of time being requested. This letter with the Leave of Absence Form (https://gsps.luc.edu/Secure/login.aspx) must be completed and submitted to the Assistant Dean for the PhD in Nursing Program in the School of Nursing. A LOA should be requested prior to the anticipated date of the leave. The Assistant Dean for the PhD in Nursing Program will make a recommendation regarding the LOA to the Graduate School. If the LOA request is granted, the student's program plan must be revised by the academic advisor to reflect this change. A request for a LOA may not exceed one academic year.

Library Services

PhD in Nursing students have access to all university libraries. The main library is housed at the Lakeshore Campus in Rogers Park. The Health Sciences Campus library is located on the 1st floor of the Marcella Niehoff School of Nursing on the Health Sciences Campus.

To access the services and resources of the main library, visit here (https://libraries.luc.edu/).

To access the services and resources of the Health Sciences Campus library, visit here (https://libraries.luc.edu/health_sciences/).

When accessing resources from off-campus, such as databases and electronic journals, login with the UVID and password are required.

Professional Activities for Graduate Students

In the GSPS system (https://gsps.luc.edu/Secure/login.aspx), there is a section for recording professional activities. Please visit this site and enter any information about internships, presentations, and/or publications each semester. Inform the Assistant Dean for the PhD in Nursing Program of any publications, presentations, or grant submissions/funding.

Professional Behavior and Conduct

Students are expected to maintain professional behavior at all times while participating in the School of Nursing programs. Consistent with the mission of the SON mission, respect for clients, faculty, staff, and student colleagues is expected. Goals of the SON are to nurture an atmosphere of collegiality among students, preceptors, and faculty in order to foster a positive learning environment. Graduate students are expected to display professional behavior, such as honesty, punctuality, maturity, and respectful communication with faculty at all times. Unethical or unprofessional behavior may result in disciplinary action to the student, ranging from verbal or written warning, to withdrawal from the theory course or clinical setting, or to dismissal from the program. See the general guidelines for this policy in the appendix under Unprofessional Behavior and Conduct area.

Progress Report

All PhD in Nursing students who have completed course work and are at stage of the qualifying examination or dissertation are required to complete a Progress Report Form at the end of each semester, until the dissertation defense is passed, and the dissertation is accepted by The Graduate School. This form may be found on the PhD in Nursing Sakai® site. Specific activities with deadlines are to be used to outline intended goals for progress towards completion of the program.

The completed form must be submitted to the Advisor/Dissertation Director by the specified deadline. Failure to submit the progress report by the specified deadline may result in the assignment of a "no credit" grade for the course in which the student is enrolled for that semester.

Any student who does not submit a progress report and receives a NP (no credit) grade will have a registration block placed on their record.

Any student who receives a NP grade must provide a written explanation of the reason(s) for their failure to complete and submit the progress report, along with a rationale to support their continued enrollment in the program. This statement must be submitted to the student's academic Advisor or Dissertation Director, with a copy sent to the Assistant Dean for the PhD in Nursing Program. All instances of NP grades will be reviewed by the PhD in Nursing program committee. Two NP grades may be a cause for dismissal from the program.

Qualifying Examination

Purpose

The purpose of the Qualifying Examination (QE) is to assess the depth, comprehension, integration and synthesis of knowledge that forms the foundation for the student to conduct dissertation research after completing required course work. It is not intended to assess the students' knowledge of course material, which has already been evaluated in each course. Rather the QE is intended to assess the students' ability to demonstrate a comprehensive knowledge of philosophy of science, ethics, concepts, theory, and advanced research methods within their developing program of research. Successful completion of the QE is required to progress to PhD candidacy.

Timing and Eligibility for the Qualifying Examination

Eligibility for the QE is in accordance with Graduate School policies. The exam should be scheduled after students have completed the required coursework for their program. Students who may be required to complete GNUR 510 Teaching Practicum may sit for the QE before this course has been completed. The QE may be taken before cognates are completed, at the discretion of the advisor. The QE is typically completed during the Fall Semester. Exceptions to the timing of the QE will be considered on a case by case basis.

A student will not be eligible to sit for the QE if there are any outstanding incomplete (I) grades. The student's Advisor is responsible for verifying all course requirements for any outstanding incomplete grades have been satisfied.

Eligibility for the QE is determined by the faculty advisor.

QE Committee

The QE Committee is convened the semester before the student is scheduled to take the QE. The QE committee is composed of a Director and 2 committee members.

The Director and the committee members must be full-time faculty members in the Marcella Niehoff School of Nursing. The student in consultation with the Director, requests faculty to serve as committee members.

The QE Director must be a Full member of the faculty of the Graduate School. At least one of the committee members must be Full or Associate member of the faculty of the Graduate School. The third committee member may or may not be a member of the Graduate Faculty.

(Full and Associate members of the faculty of the Graduate School are listed on the Graduate School website (https://www.luc.edu/gradschool/index.shtml/). Not all MNSON faculty members hold Graduate Faculty appointments)

Process and Timeline

The QE is composed of two consecutive parts: a written and oral component. A pass/no pass grade is awarded based on the culmination of the student's responses on both the written and the oral components. However, an unsatisfactory written component will preclude progression to the oral component.

Written Component

There are two options for the written component of the QE. The sequencing and process will depend on the option chosen. The decision regarding which option a student will take will be determined by the student in collaboration with the student's Director. Once the option has been chosen it cannot be changed to the other option during that semester.

Option 1. Written Set of questions

For the written set of questions, the QE committee will develop three questions for the student to demonstrate a comprehensive knowledge of philosophy of science, ethics, concepts, theory, and advanced research methods within their developing program of research.

Semester Prior to the Exam

- The student chooses a QE Director and 2 committee members.
- The Director and committee members develop the three exam questions.

Semester of the Exam

- In the first week of the semester, the committee and the student agree upon the timeline for exam questions to be distributed to the student, the due date of the exam, responses to the questions due to the committee and the date for the oral component.
- The student will receive the questions via email.
- The student can request to meet with the Director and committee members to clarify the questions within the first 3 calendar days of receiving the questions.
- The student will have two weeks (14 days) from the date the questions are sent to the student complete the responses.
- QE responses must be submitted via Turnitin® on the PhD in Nursing Sakai® site.
- The responses to the exam should adhere to the following criteria.
  - Single Microsoft Word® document with page numbers
  - 12-point Times New Roman font
  - Double space
  - 1-inch margins
  - Start each question response by retyping the question to start your response.
  - For each question, responses may be between 8-10 pages, exclusive of citations, tables and appendices.
  - Adhere to APA style.
  - Students may use inanimate sources (e.g. books, articles) as needed to answer the QE questions. However, they may not consult any person about the questions during the 2-week writing process.
- Criteria for evaluating the QE exam responses are as follows:
  - The degree to which the response answers the question. If the question includes multiple components, the response reflects a balanced answer to each component of the question.
  - Responses demonstrate synthesis of coursework where appropriate.
  - Responses present a logical flow with justification, elaboration, and conclusions.
  - Responses are well organized, well written and understandable.

- Committee members will have two weeks to review the responses to the exam.
- Committee members will provide written feedback to the Director within two weeks of receiving the exam responses.
- Based on the committee feedback, the Director will notify the student if he/she is ready to advance to the oral component.
- The Director will summarize the committee's comments as a cohesive written product and present it to the student.
- If the student successfully advances to the oral component of the QE, the Director will arrange a time to meet and give committee feedback to the student prior to the oral portion of the QE. The oral portion of the QE is completed as scheduled.
- If the student does not advance to the oral component portion of the QE, the entire committee will meet with the student and review the written feedback regarding the exam responses. More information about repeating the QE can be found on p. 26 of the PhD in Nursing Handbook.

Option 2. Paper

For the paper, the student demonstrates a comprehensive knowledge of philosophy of science, ethics, concepts, theory, and advanced research methods within their developing program of research.

Two Semesters Prior to the Exam

- The student chooses a QE Director and 2 committee members.
- The Director, committee members, and the student determine the focus of the paper.

Semester Prior to the Exam

- The student submits a detailed outline of the paper to the QE Director one month prior to the end of that semester.
- The Director will distribute the outline to the Committee
- The Committee meets to provide written feedback to the student before the end of that semester.

Semester of the Exam

- In the first week of the semester, the committee and the student agree upon the outline of the paper, timeline for the due date of the paper, and the date for the oral component.
- In accordance with the timeline set by the committee, the student will have approximately two months to complete the written portion of the paper.
- The QE paper must be submitted via Turnitin® on the PhD in Nursing Sakai® site.
- The paper should adhere to the following criteria.
  - Single Microsoft Word® document with page numbers
  - 12-point Times New Roman font
  - Double space
  - 1-inch margins
  - The paper is a maximum of 30 pages, exclusive of citations, tables, figures and appendices.
  - Adhere to APA style.
  - Students may use inanimate sources (e.g. books, articles) to complete the QE paper. However, they may not consult any person about the substance of the paper during the writing process.
- Criteria for evaluating the QE paper are as follows:
  1. Problem statement; rationale; concept chosen to study phenomenon of Interest; critique of existing theories related to the phenomenon of interest - Present the topic of study: a) frame the problem in the extant literature, discuss the rationale for this area of research; b) describe the central concept; c) describe and critique key theoretical or conceptual framework(s) pertinent to the problem.
  2. Literature review - Synthesize the literature related to the problem and include a) description of what is known; b) critique the research related to the problem (e.g., conceptual clarity, design, psychometrics of measures, and interpretation of findings).
  3. Identification and discussion of knowledge gaps and implications for research - Discuss implications for practice, research and policy around the gaps identified in the literature review. This may include a brief discussion of the next steps in addressing the problem through a program of research.
- Committee members will have two weeks to review the paper.
- Committee members will provide written feedback to the Director within two weeks of receiving the paper.
- Based on the committee feedback, the Director will notify the student if he/she is ready to advance to the oral component.
- The Director will summarize the committee's comments as a cohesive written product and present the summary to the student.
- If the student successfully advances to the oral component of the QE, the Director will arrange a time to meet and give Committee feedback to the student prior to the oral portion of the QE. The oral portion of the QE is completed as scheduled.
- If the student does not advance to the oral component portion of the QE, the entire committee will meet with the student and review the written feedback regarding the exam responses. More information about repeating the QE can be found on p. 29 of the PhD in Nursing Handbook.

Note: The procedures for Oral Component refer to both Option 1 and Option 2

Oral Component

- The oral component of the QE is attended on the scheduled day only by the members of the QE committee and the student.
- The student and all members of the committee will attend the oral component in the same room.
- The oral component will be scheduled to allow for at least a two-hour period.
- The student gives a formal presentation of no more than 30 minutes. After the presentation, questions are be posed to further evaluate the student's mastery of philosophy of science, ethics, concepts, theory, and advanced research methods within their developing program of research.
- At the conclusion of the oral component, the student will be asked to leave the room while members of the committee discuss the student's performance and determine if the student passed or did not pass the examination.
- The student is notified of the decision, immediately after the committee finishes deliberations.
- Once the student has passed the combined written and oral components of the QE, the Director notifies the Assistant Dean of the PhD in Nursing program of the outcome. The Assistant Dean records this milestone in the Graduate Student Performance System and enters the grade for GNUR 610 into LOCUS.

Passing the QE is based on the culmination of the student's responses on both the written and the oral components. However, an unsatisfactory written component will preclude progression to the oral component. If the QE committee determines that a student has not met the minimum standard on the oral component of the QE, student must repeat the entire

QE process. The student will receive a No Pass grade for that semester and will register for GNUR 610 again for the following semester.

Repeating the QE exam

The committee will meet with the student and provide written feedback and recommendations. The student will be required to take both components (written and oral) of the exam in repeating the QE. The student may choose either the written questions or paper as an option. The process will then follow as described under the chosen option in the semester immediately following the first attempt.

If a student does not pass on the second attempt, the PhD in Nursing Program Committee will be convened to discuss the results and decide on the student's progression in the program.

Student Accessibility Center

The Student Accessibility Center (SAC) provides support for students with disabilities through innovative services, programs, and partnerships. The SAC leads the campus community in its commitments to recognize disability as a valued aspect of diversity, to embrace access as a matter of social justice, and to design more welcoming and inclusive environments.

If individuals encounter academic, physical, technology, or other barriers on campus, SAC staff is available to help implement reasonable accommodations or partner to find good solutions.

To receive accommodations, students must be registered with the SAC. Please visit their website (https://www.luc.edu/sac/) or contact them directly at 773.508.3700.

Unprofessional Behavior and Conduct of Marcella Niehoff School of Nursing Students

Exemplary behavior of students in Loyola University Chicago's (the "University") Marcella Niehoff School of Nursing (the "MNSON"), consistent with the standards of the nursing and health professions, is expected at all times. Students in the MNSON are expected to abide by the policies regarding professionalism in applicable student handbooks as well as the syllabi for each course, including professional behaviors with respect to attendance, punctuality, dress, demeanor, integrity and ethical conduct relative to the nursing and health professions. Professional conduct by the student facilitates learning opportunities and fosters good working relationships within the MNSON and between the MNSON and clinical agencies or institutions.

Complaints related to unprofessional behavior and conduct by students within the MNSON may originate from faculty, staff, other students, or from outside the University, such as a clinical site.

Issues of unprofessional behavior or conduct that occur during a clinical learning experience are addressed through the evaluation of student performance in the course, as detailed in the course syllabus. If a student believes the grading related to his/her professional behavior and conduct is the result of a significant violation of clearly established written school policies, is the result of improper procedures, or is capricious, the student may pursue a grievance in accordance with the MNSON Academic Grievances and Appeals Procedure as written in the Undergraduate and Graduate Program Student Handbooks.

Complaints of unprofessional behavior or conduct within a classroom, simulation, or lab experience, or outside a clinical learning experience, are addressed through a formal complaint resolution process, as specified below.

1. The first attempt at resolution of the complaint should occur between the student and the other parties involved.
2. If the complaint of unprofessional behavior or conduct is not resolved among the parties involved, a formal complaint, in written form, is forwarded to the Program Director of the student's degree program.
3. The Program Director reviews the complaint, any supporting documentation submitted by any of the parties, and meets with the parties involved individually. If the Program Director is directly involved in the complaint, the complaint instead is forwarded to the Associate Dean of Undergraduate or Graduate Programs.
4. If the complaint is not resolved at the level of the Program Director, the Program Director submits a recommendation for any action to be taken, along with any supporting documentation, to the Associate Dean of Undergraduate or Graduate Programs with jurisdiction over the degree program in which the student is enrolled.
5. The Associate Dean of Undergraduate or Graduate Programs, upon review of the recommendation, complaint and supporting documentation, meets with the parties to the complaint.
6. The Associate Dean of Undergraduate or Graduate Programs may dismiss the complaint or, upon finding that the student has engaged in unprofessional behavior and conduct, institute progressive corrective action with the student. Progressive corrective action typically begins with a verbal warning (documented) to the student, which details the nature of the complaint, corrective actions to be taken, and notifies the student that failure to correct the unprofessional behavior or conduct may result in more severe corrective action. The nature of the behavior dictates the severity of the action. The behavior may warrant immediate action beyond a verbal warning.
7. If the unprofessional behavior or conduct continues, the Associate Dean of Undergraduate or Graduate Programs may issue a written warning, which details the nature of the continuing concern related to unprofessional behavior or conduct, further corrective actions that are required, and notifies the student that failure to correct the unprofessional behavior or conduct may result in the student's withdrawal from a course or a recommendation for dismissal from the academic program. The decision to recommend a withdrawal or dismissal is based on the nature and severity of the unprofessional behavior.
8. If the unprofessional behavior or conduct continues, the Associate Dean of Undergraduate or Graduate programs will either withdraw the student form a course or make a recommendation for dismissal from the academic program.
9. If the student is withdrawn from the course, the student will receive a W or WF for the course depending on the time the decision is made.
10. The Associate Dean of Undergraduate or Graduate Programs may submit to the Executive Associate Dean for Academic Affairs a recommendation for the student's dismissal from the academic program, after the verbal and written warning steps are completed, if the unprofessional behavior or conduct continues. The Executive Associate Dean for Academic Affairs may authorize the student's dismissal from the program of study, in all cases except where expulsion from the University is also recommended (see #12 below).
11. A student who wishes to appeal a decision impacting his/her academic standing or progress at the University may make a written

request for an appeal within 30 calendar days of the disputed decision being rendered, consistent with the University's policy on General Academic Appeals at https://www.luc.edu/media/lucedu/academics/catalog/undergrad/pdf/version_6_16_1.PDF. The appeal will be reviewed and considered by the MNSON Dean within 30 calendar days of the receipt of the written student request for an appeal. The appeal decision made by the Dean is final and is ineligible for further appeal.

12. In cases where a student's expulsion from the University for Unprofessional Behavior and conduct is considered, the Executive Associate Dean for Academic Affairs forwards all relevant documentation to the MNSON Dean for review. Upon recommendation from the Dean, an action of expulsion from the University rests with the Senior Academic Officer (the Provost of the University).

Wellness Center

- Lakeshore Campus - (773) 508-2530
- Health Sciences Campus – (708) 216-2250

Appointments can be made online, or by calling Dial-a-Nurse at 773-508-8883.

Writing Center

To help students, improve their writing skills, tutors are available to help during any point of the writing process, from brainstorming to organizing to putting the final touches on any assignment. For more information about the Writing Center, or to schedule an appointment for a tutoring session, visit the Writing Center website (https://www.luc.edu/writing/) or by calling 773.508.7708.

Parkinson School of Health Sciences and Public Health

Graduate Programs, Master's, MPH, MLS, and Certificates Academic Policies

Academic Advising and Program Planning

Program Directors for each of the study options provide support and guidance to the student during their program of study. Program Directors are available to discuss professional growth, career guidance, and professional opportunities. Program Coordinators work with the program directors to provide support on a variety of topics, including:

- A course of study plan at Loyola, and deciding what courses to take in the upcoming semesters
- Degree requirements for all majors and minors
- University policies and procedures and other important academic information
- Academic success strategies
- Registration concerns and LOCUS help
- Graduation audits
- Transfer credit
- Academic performance
- Academic probation and dismissal

Academic Grievance Procedure

The Parkinson School has developed an Academic Grievance and Appeals Process that is consistent with the Loyola University Chicago (the "University") Academic Grievance Procedure (https://www.luc.edu/academics/catalog/undergrad/reg_academicgrievance.shtml/) and the University's Graduate School Academic Grievance Procedure (p. 2029). This process is meant to supplement, and may not supersede, any portion of the University or Graduate School Academic Grievance Procedures.

The Parkinson School Academic Grievance and Appeals Process provides specific direction for the academic grievance hearing and for appeals and is designed to achieve clarity, uniformity, and fairness in the handling of all academic disputes involving individual student complaints regarding course grades and accusations of academic dishonesty. Any Parkinson School student may initiate the formal academic grievance procedure in order to have a complaint or appeal regarding a course grade or charge of academic dishonesty reviewed in an impartial and thorough manner. Students enrolled in degree programs housed in the Graduate School may also invoke the procedures under the Parkinson School Academic Grievance and Appeals Process to address disputes relating to dismissal from a program. In accordance with best educational practices and University policy, this process must be based on relevant information and afford both parties (student and involved faculty member(s)) an equal voice in the proceedings.

Consistent with the University Academic Grievance Procedure, a disputed grade will be changed only if the grading meets one or more of the following criteria:

1. Is found to be in significant violation of clearly established written school policies; or
2. Is a result of improper procedures; or
3. Is found to be capricious. Capricious grading is the assignment of a grade to a student which is:
   a. Based partially or entirely on criteria other than the student's performance in the course; or
   b. Based on standards different from those standards of grading applied to other students registered in the same course; or
   c. Based on a substantial departure from the announced grading standards for the course.

Pre#Hearing and Hearing Procedures within the Parkinson School of Health Sciences and Public Health

1. In all cases, a sincere attempt should be made by the student to resolve the problem through discussion with the involved faculty member(s). The student first discusses the grade or charge of academic dishonesty with the involved faculty member(s) of the course. Every attempt is made by the involved faculty member(s) to answer fully the student's concerns at this level. If the involved faculty member(s) decides that a change#of#grade is appropriate (e.g., due to error by the involved faculty member(s)), the involved faculty member(s) will submit a grade#change request via the student information system. The grade change will be reviewed by the Dean.
2. If the attempt(s) to resolve the dispute (described in #1 above) fails, the student may submit a written request for an academic grievance hearing to the student's Program Director. If the student's Program Director is also the instructor, the written request would go directly to the Dean. This request must be submitted within 1 month after the beginning of the following semester. The student's written request must:

a. Specify the nature of the dispute; and
b. Identify how the issue falls within the established criteria for an academic grievance (e.g., the grading was in significant violation of clearly established written school policies); and
c. Describe the attempts made to resolve the matter; and
d. Attach all relevant information or documentation to support the grievance.

3. If a student has been accused of plagiarism or dishonest examination behavior, and the student denies the charge, the student may request an academic hearing review. The Dean will then constitute a hearing committee composed of a chairperson and four faculty members ("Hearing Committee") to review the evidence of academic dishonesty and to consider the imposition of additional sanctions beyond failure in the course. This process is delineated in #6 below.
4. For instances of grade disputes, and upon receipt of the written request, the Program Director will ensure completeness of the above requirements (#2 a#d) and forward the request to the Dean. The Dean may decline to forward the case for a hearing if the dispute is not an academic dispute subject to the Parkinson School's Academic Grievance Process, or the written request fails to allege any of the necessary criteria for a disputed grade to be changed. In such instances, the Dean must justify, in writing, the reason for this decision and communicate the decision to the student, involved faculty member(s), and the Program Director.
5. If the Dean determines that the academic grievance is sufficient to proceed with a hearing, within two weeks, the Dean shall appoint a Chairperson and four faculty members to a Hearing Committee. Every effort shall be made to appoint faculty to the Hearing Committee who are not familiar with the student. It is recommended that the Hearing Committee members be familiar with the course outcomes and expectations that are the subject of the grievance.
6. All parties, including the student, involved faculty member(s), and Hearing Committee members, will receive the student's name, written request for a grievance hearing, information identifying the charge of academic dishonesty and related information submitted by the student in #2 a#d above, and information related to the hearing date/time/location, at least three business days in advance of the scheduled hearing date. Both the student and involved faculty member(s) will be advised of their right to request assistance in presenting the case at the hearing by any member of the University community other than an attorney. No individual from outside the University may attend the hearing, including any legal representative for the parties involved in the dispute. The student and the involved faculty member(s) will be notified of their right to present witnesses at the hearing. If this notice is not provided at least 3 days prior to the hearing, or a party is unavailable to attend, the hearing will be re# scheduled.
7. Pre#Hearing Preparation:
   a. Responsibilities of the student: At least three business days prior to the hearing, the student shall provide the Hearing Committee Chairperson with:
      i. The documentation identified in #2 a#d above
      ii. The names of any witnesses the student wishes to present and the name of any representative of the University community who will assist the student in presenting his/her case at the hearing.
   b. Responsibilities of the faculty member(s): At least three business days prior to the hearing, the involved faculty member(s) shall provide the Hearing Committee Chairperson with:
      i. A copy of the course syllabus to include course outcomes, if the hearing is focused on a grade dispute.
      ii. Documentation and relevant information pertaining to the student's performance in the course or clinical learning experience or related to the allegation of the student's academic dishonesty.
      iii. The names of any witnesses the involved faculty member(s) wish to present and the name of any representative of the University community who will assist the involved faculty member(s) in presenting his/her case at the hearing.
   c. Responsibilities of the Hearing Committee: The Hearing Committee Chairperson may request additional materials from the student and involved faculty member(s) at any time during the hearing process.
8. The hearing will include the student, involved faculty member(s), and designated representatives of the University community who will assist in presenting an individual's case. Witnesses are typically excused from the hearing, except when their statements are needed. The hearing will be private, and all persons present at the hearing will consider all information presented to be confidential. Individuals appearing before the Hearing Committee have the responsibility of presenting truthful information. The Hearing Committee, in reaching its decision, will evaluate the credibility of the parties and any witnesses. The student and involved faculty member(s) may make an opening statement. Presentation of evidence will only be made during the hearing. During the hearing, the Hearing Committee members may address questions to any party or witness. Both the involved faculty member(s) and the student may present materials described in item #6 above (or as included with the student's request for grievance hearing) before the Hearing Committee and in the presence of the other party. The conduct of the hearing is informal, and the Hearing Committee is not bound by rules of evidence or court procedures. Matters of procedure will be decided by the Chairperson of the Hearing Committee.
9. Within three business days of the hearing, the Hearing Committee will render a decision.
10. Within two weeks of the Hearing, the Chairperson of the Hearing Committee will communicate a summary of the Hearing Committee's findings and decision, in writing, to the student, faculty member(s) involved, Program Director, and Dean. E#mail is permitted.
11. In cases of a grade dispute, if the Hearing Committee renders a decision in support of the student's petition, the faculty member submits a grade#change request consistent with the Hearing Committee's findings. If the Hearing Committee finds that the student's petition is without merit, the grade shall remain unchanged.
12. If a student is grieving a grade associated with a clinical experience, and the Hearing Committee determines that the faculty grading was in significant violation of clearly established written school policies, or the result of improper procedures, or was capricious, the Hearing Committee will communicate the decision to the Dean. Notwithstanding this decision, the Hearing Committee and/or the Dean may require an independent re#evaluation of the student's performance (knowledge, skills, or behavior).
13. If it is judged by the Hearing Committee or the Dean that an independent reevaluation of the student's performance is warranted, the Dean will communicate the need for the evaluation to the Program Director, who will arrange for an independent reevaluation of the student that may involve a clinical, lab, or simulation session by a faculty member not known to the student. This independent

reevaluation summary will be forwarded to the Hearing Committee and the Dean for a final determination of the course grade.

Appeals Process

The procedure for an appeal of a Hearing Committee decision varies depending on whether the student is enrolled in a program in the Parkinson School or if the student is enrolled in a degree program housed in the Graduate School.

1. Students enrolled in a program in the Parkinson School have a right to appeal in writing to the Dean within 30 days of notice of the Hearing Committee's decision. The decision of the Dean is final (except in cases of expulsion, in which case the sanction may be imposed only by the Senior Academic Officer upon recommendation of the Dean).
2. Students in the Parkinson School enrolled in degree programs housed in the Graduate School may appeal the Parkinson School's Hearing Committee decision by requesting a Graduate School hearing in accordance with the Graduate School's Academic Grievance Procedure (p. 2029). The request must be made to the Graduate School Dean within 30 days of the decision by the Hearing Committee and must specify the nature of the grievance and prior attempts to resolve the matter. A party may appeal the decision of the Graduate School hearing board to the Graduate School Dean in writing within 30 days of notification of the Graduate School hearing board's decision and must include an explanation of the basis for the appeal. The Graduate School Dean's decision is final in all cases (including dismissal from a Graduate School program), except those involving possible expulsion from the University, which may be imposed only by the Senior Academic Officer.

Academic Integrity

Academic integrity is the pursuit of scholarly activity in an open, honest, and responsible manner. Academic integrity is a guiding principle for all academic activity at Loyola University Chicago, and all members of the University community are expected to act in accordance with this principle.

Standards

Failing to meet the following standards is a serious violation of personal honesty and the academic ideals that bind the University into a learning community. These standards apply to both individual and group assignments. Individuals working in a group may be held responsible if one of the group members has violated one or more of these standards.

1. Students may not plagiarize. Plagiarism involves taking and using specific words, phrases, or ideas of others without proper acknowledgement of the sources. Students may not:
    1. Submit material copied from a published or unpublished source.
    2. Submit material that is not cited appropriately.
    3. Use another person's unpublished work or examination material.
    4. Allow or pay another party to prepare or write an assignment.
    5. Purchase, acquire, or use a pre-written assignment for credit.
    6. Use generative artificial intelligence to assist or write assignments without prior permission of the faculty.
    7. Students may not submit the same work for credit for more than one assignment (known as self-plagiarism).
    8. If a student plans to submit work with similar or overlapping content two or more times for any purpose, the student should consult with all instructors prior to submission of the work to make certain that such submission will not violate this standard.
2. Students may not fabricate data. All experimental data, observations, interviews, statistical surveys, and other information collected and reported as part of academic work must be authentic. Any alteration, e.g., the removal of statistical outliers, must be clearly documented. Data must not be falsified in any way.
3. Students may not collude.
    1. Students may not work with others on any exam, assignment or portion of an assignment without permission from the faculty.
    2. Students' work with one another on an exam or assignments may not exceed the terms of their instructors' directions for collaboration as part of the assignment.
    3. Students may not use work submitted by another student in a previous semester of a course.
4. Students may not cheat.
    1. Students may not obtain, distribute, or communicate examination materials prior to the scheduled examination without the consent of the faculty.
    2. Students may not take an examination by proxy. Taking or attempting to take an exam for someone else is a violation by both the student enrolled in the course and the proxy.
    3. Students may not attempt to change answers after an examination or an assignment has been submitted.
    4. Students may not falsify medical or other documents for any reason.
    5. Students may not use unauthorized study aids in an exam. Examples include, but are not limited to:
        i. Bringing notes into an exam that does not allow outside materials.
        ii. Programming equations into a calculator when the faculty has indicated that students are to be tested on the recall of those same equations.
        iii. Using any electronic device that allows students to look up, translate, calculate, or communicate information with someone else.
5. Students may not facilitate academic misconduct.

Graduate student responsibilities regarding academic integrity extend outside the classroom to scholarship, research, and teaching. As such, graduate students are also subject to the following standards:

1. Original Research: Thesis and dissertation work is guided by the expectation of making an original contribution to the field. The determination of what constitutes "original research" is made by the thesis/dissertation committee and the academic unit.
2. Research Procedures: Data misrepresentation or fabrication are clearly unethical. Ownership of data and programs and privileged information and confidentiality of data need to be clarified and respected by all those involved in the research process.
3. Authorship: In all cases of joint authorship, individuals working together should establish ahead of time the criteria for their co-authorship. Final determination of authorship should reflect effort and contribution, not rank or status. Dissertations and theses may not be co-authored.
4. Copyright: Laws of the United States and the university need to be respected. Faculty and students are responsible for knowledge and implementation of university policy in this area.
5. Teaching: Intellectual honesty characterizes the teaching endeavor. Instructors have the responsibility of clearly stating at the beginning of a course any and all responsibilities of the course and specifying in percentages how the final grade is to be calculated. Furthermore,

instructors will inform themselves of appropriate university guidelines for the composition of course syllabi and ground rules.

Sanctions

Faculty are responsible for determining the sanctions for academic misconduct in the course sections they teach and students they mentor. Sanctions are assigned on a case-by-case basis while considering precedent and the following standards below. Academic deans may add to or elevate the initial sanctions assigned by faculty based on the student's prior academic misconduct history:

- the context and seriousness of the violation
- the student's demonstrated commitment not to engage in the same behavior in the future; and
- sanctions that appropriately foster accountability for one's behavior and prevent recurrence of similar behaviors

Below is a list of commonly assigned sanctions and faculty members may choose from this entire list:

1. Educational Experiences
   Educational experiences provide space for students to reflect upon their conduct; to identify how their action harmed themselves, others, and the community; and/or to explore why such conduct is unacceptable.

   Educational experiences or projects may include:
   1. Attendance and participation at a required meeting, workshop, special project, or other initiative.
   2. Completing an online tutorial focused on academic integrity.
   3. A written reflection about a specific topic or issue.
   4. Resubmission of the assignment or exam for partial credit.
   5. A required meeting with the appropriate dean to discuss the misconduct and the consequences.
2. Completing restorative service hours and/or a Values Workshop.
3. Failing Grade on the assignment. A letter grade of F or zero points will be issued for the assignment or examination.
4. Failing Grade in a course, comprehensive examination, proposal or final defense of thesis or dissertation. A letter grade of F will be issued for the course or milestone where academic misconduct occurred.
5. University Suspension - may only be determined by the student's academic dean's office. University suspension involves the temporary removal of the student from the University for a specified period of time with the understanding the student may be allowed to return to the University at the completion of the suspension period after having satisfied any accompanying conditions. The Academic Dean's office may consider suspension as an elevated sanction.

   Suspension from the University further entails being withdrawn from all enrolled courses (resulting in "W" grades) restriction from visiting the University premises except when engaged in official business approved by the Office of the Provost. Visiting the University premises without gaining approval may result in arrest. Students suspended from the University remain responsible for tuition and fees. Students suspended from the University also must forfeit their Loyola ID (Campus Card) and turn it into Campus Safety. University suspension may also include any other disciplinary action that is judged to be of value to the student.

   Persons notified of a student's suspension may include The Office of the Provost, the Office of Registration and Records, the Bursar, the Office of the Dean of Students and their designees, Campus Safety, or other appropriate personnel at the discretion of the Office of the Provost. Suspended students may not study abroad or travel with the University and may not be approved to study abroad until 90 days after their suspension period has ended. University suspension is typically assigned for a minimum of the rest of the semester and may last any number of years.
   When a suspension is over and the student has completed any conditions accompanying the suspension, the student must contact their academic dean's office requesting reinstatement and providing documentation demonstrating that the student has satisfied the terms of the suspension (if applicable). The Academic Dean's office may require a meeting with the student before permitting re-enrollment. The student may re-enroll at the University only after the academic dean's office has made an affirmative decision, notified the student, and released the registration hold on the student's University account. If the suspension is for a period of one fall or spring semester, the student will return under the same catalog requirements that were in place for their declared degree plan at the time of suspension. If the suspension is for a period longer than one fall or spring semester, the student will need to reapply to the university through the appropriate admission's office.
6. University Expulsion
   An academic dean may recommend a sanction of University Expulsion to the Provost. Expulsion from the University is the most serious University disciplinary action and means the permanent exclusion of the student from the University. Only the Provost may impose the sanction of expulsion as recommended by a Dean. The Provost's decision is final. A student is not eligible to reapply or be readmitted to any other programs at Loyola University Chicago following expulsion.

   Expulsion may include: forfeiture of all rights and degrees not actually conferred at the time of the expulsion; permanent notation of the expulsion on the student's academic record; withdrawal from all courses (resulting in "W" grades). Students expelled from the University remain responsible for tuition and fees. Students expelled from the University also must forfeit their Loyola ID (Campus Card) and turn it in to Campus Safety. Any student expelled from the University are not permitted to visit the University premises except when engaged in official business approved in advance and in writing by the Office of the Provost or Campus Safety. Visiting the University premises without gaining approval in advance may result in arrest.

   Persons notified of a student's expulsion may include, the Office of the Dean of Students and their designees, the Office of Registration and Records, the Bursar, Campus Safety, or other appropriate personnel at the discretion of the Office of the Provost.

Process

1. Faculty will gather the appropriate information and documentation when they suspect an instance of academic misconduct has occurred. The standard of evidence required to determine responsibility is known as a "preponderance of the evidence." This means the faculty member(s) must determine that it is more likely than not that an alleged violation occurred based on the totality of available evidence.
2. If faculty conclude an instance of academic misconduct has occurred, then they will determine the appropriate sanction(s) as

it relates to the charge and in accordance with the procedures described in this policy.

3. Faculty will notify the student of their findings and sanction. Faculty should allow the student an opportunity to respond before reporting the incident.
4. If after talking with the student or the student fails to respond to the faculty's outreach within two business days and faculty have determined that academic misconduct has occurred, faculty will then report the instance of academic misconduct, including supporting documentation, to the Graduate Program Director, Department Chair and the student's Academic Dean's office.
5. The student's academic Dean's office will notify the student that the instance of academic misconduct has been reported. This instance will also be documented in the University's centralized database.
   - The initial sanction(s) determined by the faculty may be reviewed by the academic Dean's office.
   - The final sanction(s) will be included in the notification.
6. Incident reports and supporting materials regarding the academic misconduct are part of the student's academic record.

Appeals

Students retain the right to appeal the determination made at any stage of the process outlined above using the Appeal Procedure described below. The decision of the Academic Dean's office is final in all cases except expulsion.

Appeal Procedure:#Finding of Academic Misconduct

1. If a student chooses to contest a finding of academic misconduct, the student's first step is to confer directly with the faculty.
2. If a student and faculty are unable to resolve the issue relating to academic misconduct and the student still chooses to contest the finding, the student may appeal by submitting a formal appeal request (see form) via Loyola email to the Department Chair/Dean's Designee no later than 30 days into the following semester.
   1. If the dispute occurs within a class in the spring or summer semester, the student must submit the appeal no later than 30 days into the fall semester.
   2. If the dispute occurs within a class in the fall or J-term, the student must submit the appeal no later than 30 days into the spring semester.
3. The Department Chair and/or Dean's designee determines whether or not there are grounds for an appeal.
   1. When the Department Chair and/or Dean's designee determines there are no grounds for an appeal, the student will be notified that a hearing board will not be convened.
      - If the student disagrees with the determination by the Department Chair and/or Dean's designee, the student may appeal to the appropriate academic Dean. In cases where the student is enrolled in a school other than the one in which the course is taught, the academic Deans of the two schools will review the appeal together.
   2. When the Department Chair and/or Dean's designee determines there are grounds for an appeal, the student will be notified that a hearing board will be convened.
4. The academic Dean's office will notify the student of the final decision.
5. Each department will have the means to constitute a hearing board for each dispute. Board members are chosen by the Department Chair and/or Dean's designee and will consist of three to five faculty members other than the faculty member involved or Department Chair. In smaller departments or interdisciplinary programs, board members may be members of different departments.
6. The chairperson of each hearing board will be selected by the person who appoints the hearing board. The chairperson of the hearing board receives all requests for hearings from the department, sets the calendar, notifies all involved parties of the dates and times of hearings and informs students by written notice of the decisions of the board.
7. The hearing will be held within two weeks of the receipt of the request for a hearing, if practicable. Hearings may be held virtually as necessary to accommodate members of the committee as well as parties to the appeal.
8. The hearing will be private and all information will be held confidential.
9. Hearings for refuting a charge of academic misconduct generally proceed according to the following format:
   1. Introduction of all parties present (including witnesses, when applicable) and an overview of the hearing process.
   2. Review the Student Rights in the Academic Appeal Process.
   3. Students should complete the electronic form in advance of the hearing.
   4. Hearing board chairperson reviews the nature of the alleged conduct and the University policies potentially violated.
   5. Witnesses are excused until statements are needed (if applicable).
   6. Student(s) (and Instructor(s) when applicable) provide a personal account of the reported incident.
   7. Student(s) (and Instructor(s) when applicable) have the opportunity to review all documentation relevant to the case that will be used by the hearing board to make a decision.
   8. Hearing board members ask any remaining investigative questions to the parties present (including witnesses, if applicable).
   9. Student(s) are provided a final opportunity to make any closing comments.
   10. Instructor(s) are provided a final opportunity to make any closing comments.
   11. Hearing board chair may excuse all parties for deliberation if needed.
   12. Student(s) (and Instructor(s) when applicable) are notified of the decision and any related outcomes either immediately after deliberation or, when further deliberation is needed, typically within five business days in writing, via Loyola email.
   13. Both the student and the faculty member involved may be accompanied by one advisor of their choice throughout the hearing process. The individual must inform the chairperson of the hearing board of the name of the advisor before the hearing date.
      1. The role of an advisor is to provide a comforting presence for the student and/or faculty. A faculty may only speak to the advisee. An advisor may not ask questions, interject, advocate for, or otherwise speak on behalf of the advisee. Even if an advisor is an attorney, the advisor may not function as legal counsel or "represent" an advisee during the hearing process.
      2. If any advisor conducts themselves in a manner inconsistent with these guidelines, or if the advisor's behavior obstructs or

interferes with the hearing process, the advisor will be warned by the board.

3. If the advisor's interfering behavior continues or if the advisor engages in a manner that harasses, abuses, or intimidates any other participant, the advisor will be excused from the hearing immediately.

14. The student and/or faculty have the option of submitting relevant materials to the hearing board prior to or at the time of the hearing. Individuals in the hearing process have the responsibility of presenting truthful information.
15. The board may address questions to any party.
16. The chairperson of the hearing board determines the hearing procedures (e.g. location, order of proceedings, determining what evidence is relevant, determining if additional information is needed, etc.). Hearings may be held virtually to accommodate committee members or parties to the appeal. The standard of evidence required for a board to determine responsibility is known as a "preponderance of the evidence." This means the board must determine that it is more likely than not that an alleged violation occurred based on the totality of available evidence.
17. All decisions of the board must be determined by a majority vote of the hearing board members. A final decision must be rendered by the board by the end of the hearing process.
18. The student and faculty will be informed in writing by the chairperson of the board's decision within two weeks of the hearing. The decision is also shared with the Department Chair and/or Dean's designee.
19. Should the student or faculty member wish to contest the hearing board's decision, they must submit in writing (via Loyola email) an appeal letter to the Dean and/or Dean's designee within 30 days of notice of the hearing board's decision.
    1. The appeal letter must clearly identify the grounds for the appeal with appropriate supporting documentation. Mere disagreement or dissatisfaction with the decision does not constitute a basis for an appeal.
    2. The grounds to appeal the board's decision must include one or more of the following criteria:
        1. New substantive information is available that could not have been discovered by a diligent respondent at the time of the hearing and that would have likely changed the outcome of the case.
        2. A substantive procedural error or error in the interpretation of University policy occurred.
        3. The decision (findings or outcomes) is significantly incongruent with the established facts presented at the hearing or the established Graduate School Academic Policies.
20. Upon receipt of the appeal letter, the Dean and/or the Dean's designee will review the appeal to determine whether or not to uphold the decision of the hearing board.

The student and the faculty will be notified by the Dean's office of the final decision. This Dean and/or the Dean's designee decision is final and binding.

Academic Misconduct Records and Privacy

Academic misconduct records are maintained at the University for seven years from the date of the incident, with the exception of cases resulting in University expulsion (such files are retained indefinitely). Such files may contain contact information, correspondence, decisions, assigned outcomes, reports, and other information pertaining to any case in which a student was found responsible. These files are maintained by the Graduate School Academic Dean's Office.

Students have a right to view a redacted copy their academic misconduct file that falls within the seven-year period or resulted in University expulsion, with any protected information about other students removed, during regular business hours. A minimum of five business days' notice is required to prepare files for review. In order to request to view a redacted copy of their academic misconduct file, students must complete the Permission to Release Education Record Information form found on the Office of the Dean of Students website. Forms are reviewed in the order they are received and the ODOS office will contact you to schedule a time for your meeting once your form is processed.

In order to request a release of your academic misconduct file information to another person or school/organization, students must complete the Permission to Release Education Record Information form found on the ODOS website and if applicable, submit any associated form from the school/organization they want to receive their academic misconduct file information. Forms are reviewed in the order they are received and are typically processed within 5-7 business days.

Privacy applies to affected parties, respondents, complainants, witnesses, advisors, Conduct Administrators, and members of Hearing Boards. All individuals are expected to adhere to the regulations set forth by the Family Educational Rights and Privacy Act of 1974 as Amended ("FERPA") regarding the dissemination of information pertaining to the academic misconduct process. All proceedings are private and unauthorized recording by any means is prohibited. The University reserves the right to share information regarding a case with other appropriate parties on a need-to-know basis. More information about FERPA can be found **here**.

Academic Policies

Each student is required to abide by Loyola University Chicago policies as well as Parkinson School policies. Graduate students are responsible for the following:

1. Graduate Policies, Graduate School Policies, and Deadlines: Graduate students are responsible for reviewing the Parkinson Graduate Student Policies, program specific handbooks or materials, and key Dates and Deadlines. They should familiarize themselves with their rights and responsibilities as graduate students and the requirements for completing their degree.
2. Communication with Program Director: Graduate students are responsible for communicating with the PD when issues arise that keep them from completing coursework, fulfilling degree requirements, or fulfilling general student responsibilities. Additionally, when issues arise that students are not comfortable bringing to other faculty, the PD should be their primary point of contact.
3. Registering for Courses: It is the graduate student's responsibility to register for academic courses.

Access to Records/Buckley Amendment

In accord with the Buckley Amendment, students are allowed access to their records, files, and other data directly related to them. To obtain access, a written request must be submitted to the Dean. Please allow a two#week interval after submission of the initial request for access

to records. Records and files may not be removed from the Parkinson School.

Attendance Policy

The graduate attendance policy specifies the role of students, instructors and university administrators in cases when students are absent from one or more classes.

The university does not require faculty to take attendance; however, if faculty use participation/ attendance in their grading rubric, they must include this policy on the course syllabus which must clearly define the consequences for non-attendance. If participation/attendance is identified as a portion of the students' final grade, faculty must maintain a record of students' attendance throughout the term.

Excused Absences

The university recognizes there are times when students must miss class due to extenuating circumstances. Regardless of the attendance policy of the faculty, the following are considered excused obligations by Loyola University and are not to be counted as absences in the class. Excused absences do not preclude the need to fulfill specific program requirements.

- Jury duty, with appropriate documentation.
- Short Term Military Obligation - Veterans Current Students. This activity must be documented and provided to the faculty in advance of the activity. The documentation must be verified by the director or assistant director in the Military Veteran Student Services Office, who has confirmed that the student has orders to report for a short-term military obligation.
- Day(s) for Religious Observances
- Participation in Division-1 athletics or other university-sanctioned events: Travel & Competition Policy. This activity must be documented and provided to the faculty in advance of the activity. The documentation must be verified by an administrator who is directly related to the activity (e.g. Division-1 athletics representative; musical group director; student development representative, etc.).
- Absences resulting from legally mandated accommodation requirements (e.g., Title IX, ADA, etc.).
- In the event of a state or national pandemic, the institution retains the right to amend this attendance policy.

Making Up Work from a Missed Class

The excused absences outlined above require the faculty to facilitate alternative means for students to make up classwork and/or get notes from a lecture. Labs, clinical hours, group work, performance, studio art, and other field-based classes are the exceptions to this because it may be impossible to make up classwork.

Clinical Experiences

Clinical Affiliation Agreements

An executed Clinical Affiliation agreement between Loyola University Chicago and the clinical agency is a requirement of every student's clinical practicum or internship placement. In consultation with their Program Director, students may seek a clinical preceptor who is employed by a site not currently affiliated with Loyola University Chicago. In these cases, students will speak to the director of the experiential learning center. Because this process can take a considerable amount of time, students must submit this completed form to their respective Program Director at least 6 months prior to the clinical rotation. Please direct questions related to clinical affiliation agreements to your program director.

Dress Code and IDs

Recognizing that graduate students in our program serve as role models and represent the Parkinson School and the University, professional clothing and behavior is expected at all times. Professional dress regulations vary in specific clinical agencies; however, denim jeans, shorts, or miniskirts in clinical are unacceptable. Students arriving at a clinical site in inappropriate clothing may be asked to leave the site.

A Loyola University Health Sciences Campus (HSC) ID badge is required for all students seeking access to the health Sciences Campus. This can be obtained from the Parking Office, located on the first floor of the Mulcahy Building. Students interested in using the facilities at the LUC Lake Shore and/or Water Tower campuses may want to obtain a LUC ID. The LUC ID is a different card and ID number than the HSC ID. Students can obtain this ID from the Campus Card office (http://www.luc.edu/campuscard/).

Professional and Safe Behavior in Clinical Practice

Students are expected to maintain professional behavior at all times while participating in the Parkinson School programs and clinical practice. Consistent with the mission of the Parkinson School mission, respect for clients, faculty, staff, and student colleagues is expected. Graduate students are expected to display professional behavior, such as honesty, punctuality, maturity, and respectful communication with faculty, preceptors and clients at all times. Unethical or unprofessional behavior may result in disciplinary action to the student, ranging from verbal or written warning to withdrawal from the clinical setting, or to dismissal from the program.

All graduate students are responsible for implementing safe practice during the supervised practice. A pattern of behavior that demonstrates unsafe clinical practice is cause for removal from the clinical situation, internship or capstone experience and may provide grounds for failing the course and dismissal from the program. A student whose pattern of behavior endangers the client, colleague, or self in the practice area may be suspended immediately from the practice site. Documentation describing the behavior is placed in the student's file and the Dean is notified immediately.

Degree Conferral and Graduation

The conferral of a graduate degree or certificate occurs after an audit confirms that the student has completed all program plan requirements. The degree is conferred following the date specified by Loyola University Chicago, and is noted on the student's official transcript.

The process of degree conferral is different than the application for, and participation in, the Loyola University Chicago commencement ceremony.

All students must apply for degree conferral in LOCUS, regardless of the semester in which they complete the program, or their intent to participate in the commencement ceremony.

Deadlines for graduation application are posted on the Loyola University Chicago website. If a student applies for graduation but does not complete the degree requirements by the end of the intended graduation semester, the student must submit a new graduation application. The Loyola University Chicago commencement ceremony is held once each year, in May, at the Lake Shore Campus. Students receive an invitation to participate in the commencement ceremony from Graduation Services.

For all inquiries pertaining to commencement may be directed here (commencement@luc.edu).

Dismissal From Program

Dismissal for Poor Scholarship

A student who fails to achieve the required GPA for the graduate program in Parkinson will be dismissed for poor scholarship. Students dismissed due to poor scholarship may appeal their dismissal by submitting the Appeal of Dismissal for Poor Scholarship form to their academic Dean's Office. This form is the student's opportunity to explain any mitigating circumstances as to why the student's dismissal should be reconsidered. Documentation must be provided to support the student's position. This form is the only approved process to submit such a request.

A dismissal will be overturned only when a student is able to produce specific documentation that proves University error or extraordinary circumstances beyond the student's control that warrant an exception to University academic policies.

The appeal must be made within 10 business days of the date of email notification of academic dismissal. The academic Dean's office may determine that a student meeting is required after the appeal is submitted. Appeal decisions will be made within 10 business days of the receipt of the appeal.

A student may request an appeal decision made by an Assistant or Associate Dean to be considered by the Dean. Appeal decisions made by the Dean are final.

Dismissal for Non-Academic Reasons

The Parkinson School reserves the right to dismiss a student regardless of GPA for reasons related to violations in professional role responsibilities, academic integrity or ethical practice. The student who is subject to dismissal from the Parkinson School is advised to meet with their Academic Advisor for support and guidance.

Email Policy

The Parkinson School will only send e-mails to the student's LUC e-mail account. The student is responsible for checking their LUC accounts daily for important course, clinical and Parkinson School information and announcements. If the student chooses to forward their LUC e-mail to another account they may go here (https://www.luc.edu/its/loyoladigitalexperience/datalossprevention/) to learn about this process.

Experiential Learning - Academic Internships, Capstones, or Other Field Experience

The Parkinson School is committed to fostering a safe experiential learning environment for our students and protecting the health and well-being of patients, clients, families, and health care staff. Prior to a student starting their experiential experience, specific information may be required to meet compliance for a specific external organization. In advance of an experiential learning experience, students will be contacted by the director of experiential learning.

Clinical and some non-clinical agencies require verification that the student has met all health and pre-clinical screening requirements. Failure to comply with these requirements by the specified dates will prevent academic internship, capstone or field placement. The student will be informed of all requirements and expected dates of completion by the Experiential Learning Team in the Parkinson School.

CastleBranch© is the third-party platform used to track and manage immunizations and other onboarding requirements such as drug screens, background checks, proof of health insurance, physical exam, and HIPAA and OSHA training. Students are responsible for any cost associated with Castlebranch clinical requirements.

Formal Complaint by Student Policy

A formal complaint is defined by Loyola University Chicago's (the "University") Parkinson School of Health Sciences and Public Health (the "Parkinson School") as any substantive complaint or concern, put forth in writing, by a **student** which requires a response from the administration of the Parkinson School.

Formal complaints may originate within the Parkinson School, or through a mechanism external to the Parkinson School, such as a University grievance process or the Ethics Line Reporting Hotline.

The Parkinson School adheres to all applicable University policies regarding the filing, review and resolution of formal complaints, as defined herein. The nature of the complaint dictates the review and resolution processes, as detailed further in this policy.

The University admits students without regard to their race, color, religion, sex, age, sexual orientation, gender identity, national or ethnic origin, ancestry, disability, marital status, parental status, military/veteran status, or any other characteristic protected by applicable law to all the rights, privileges, programs, and other activities generally accorded or made available to students at the school.

The University does not discriminate on the basis of race, color, religion, sex, age, sexual orientation, gender identity, national or ethnic origin, ancestry, disability, marital status, parental status, military/veteran status, or any other characteristic protected by applicable law in the administration of its educational policies, admissions policies, scholarship and loan programs, and athletic and other school-administered programs, or in any aspects of its employment of faculty and staff.

Students within the Parkinson School with questions about this policy or who believe they have been discriminated against because of their race, color, religion, sex, age, sexual orientation, gender identity, national or ethnic origin, ancestry, disability, marital status, parental status, military/veteran status, or any other characteristic protected by applicable law, may contact the Ethics Line Reporting Hotline at (855) 603- 6988 or submit a report online (https://www.luc.edu/ethicsline/).

General Guidelines

Student Complaints Related to Academic Issues

- Formal student complaints related to academic disputes involving the appropriateness of course grades and accusations of academic dishonesty are addressed through the Parkinson School's Academic Grievance and Appeals Process. Students enrolled in degree programs housed in the Graduate School may also invoke the procedures under the Parkinson School Academic Grievance and Appeals Process to address disputes relating to dismissal from a program. Students enrolled in degree programs housed in the Graduate School whose disputes are related to course grades, accusations of academic dishonesty, or dismissal from a program, are not resolved after a hearing within the Parkinson School may continue the academic grievance process in accordance with the Graduate School's Academic Grievance Procedure (p. 2029).
- Formal student complaints relating to decisions affecting undergraduate academic standing or progress are addressed through the University's General Academic Appeals (p. 1919) process.

- Formal student complaints relating to undergraduate changes of academic records or dismissal for poor scholarship are addressed through the University's Special Academic Appeals (p. 1919) process.

Student Complaints Related to Non#Academic Issues

- The University admits students without regard to their race, color, religion, sex, age, sexual orientation, gender identity, national or ethnic origin, ancestry, disability, marital status, parental status, military/veteran status, or any other characteristic protected by applicable law to all the rights, privileges, programs, and other activities generally accorded or made available to students at the school. The University does not discriminate on the basis of race, color, religion, sex, age, sexual orientation, gender identity, national or ethnic origin, ancestry, disability, marital status, parental status, military/veteran status, or any other characteristic protected by applicable law in the administration of its educational policies, admissions policies, scholarship and loan programs, and athletic and other school#administered programs, or in any aspects of its employment of faculty and staff. Students within the Parkinson School with questions about this policy or who believe they have been discriminated against because of their race, color, religion, sex, age, sexual orientation, gender identity, national or ethnic origin, ancestry, disability, marital status, parental status, military/veteran status, or any other characteristic protected by applicable law, may contact the EthicsLine Reporting Hotline at (855) 603#6988 or submit a report online (https://www.luc.edu/ethicsline/).

Complaint Referral

University administrators may refer certain formal complaints from Parkinson School students, including complaints made through the EthicsLine Reporting Hotline, to the Parkinson School Dean's office for appropriate action, including assistance in the investigation of a report. Where appropriate, the Dean will assign an administrator from the Parkinson School to assist in the investigation. Such assignments are made with consideration of the need for the investigation to proceed in an objective and non# biased manner.

Complaints Received through the EthicsLine Reporting Hotline

The EthicsLine Reporting Hotline exists as a means for University faculty, staff, students, administrators or other concerned parties to report activities that involve misconduct or violation of University policies. Reports may be made online (https://www.luc.edu/ethicsline/) or by dialing 855#603#6988.

As explained at the EthicsLine website (https://www.luc.edu/ethicsline/):

- The University is committed to the highest ethical and professional standards of conduct as an integral part of its mission of expanding knowledge in the service of humanity through learning, justice and faith. To achieve this goal, the University relies on each community member's ethical behavior, honesty, integrity and good judgment. Each community member should demonstrate respect for the rights of others.
- The University strongly encourages all faculty, staff, students, administrators or other concerned parties to use this Reporting Hotline to report suspected or wrongful acts of conduct by Loyola University Chicago community members. No University administrator, faculty, staff or student may interfere with the good faith reporting of suspected or actual wrongful conduct; no individual who makes such a good faith report shall be subject to retaliation, including harassment or any adverse employment, academic or educational consequence, as a result of making a report.

All reports to the EthicsLine Reporting Hotline are made available to specific individuals within the University on the University's EthicsLine Reporting Hotline Resource Team (the "Resource Team") who are charged with carefully reviewing and evaluating the report and assigning it to an appropriate case manager/investigator on the Resource Team, based on the type of alleged violation and location of the incident. The EthicsLine Reporting Hotline System does not create a new category of prohibited behavior or a new process for members of the University community to be disciplined or sanctioned. The Resource Team has no authority to discipline any student or member of the faculty or staff. When reported conduct is subject to existing University disciplinary or judicial procedures, appropriate referrals will be made by the Resource Team.

Reports submitted through the EthicsLine Reporting Hotline are handled as promptly and discreetly as possible, with facts made available only to those who need to investigate and resolve the matter. Individuals filing a report may follow#up online on the status of a report and to determine if further information is needed to proceed with an investigation.

Financial Aid and Funding Information

The Office of Student Financial Assistance houses resources and references about financial aid for students. Visit their website (http://www.luc.edu/finaid/graduate.shtml/), email (lufinaid@luc.edu), or call 773.508.7704.

To determine eligibility for financial assistance students must complete the Free Application for Federal Student Aid (FAFSA). If a student receives federal loans they must be enrolled at least half# time. A graduate student must be enrolled in at least 4 graduate semester hours in the fall and spring semester and at least 2 semester hours in the summer semester to be considered half#time. Full# time enrollment is defined as 8 graduate semester hours in the fall and spring semester and 6 semester hours in the summer semester. However, when students enroll in clinical practicum courses, they are classified as full#time status.

Grade Appeal Process

Academic Appeal of Course Grade

With very rare exceptions, the final decision on all grades rests with the professor. Students have the right to protection, through fair processes, against arbitrary and capricious academic evaluations. Arbitrary and capricious means that there is no relation between the grade given and the student's performance in the class and that a reasonable person could not find that the grade was deserved. Mere disagreement or dissatisfaction with a grade thus does not constitute a basis for an appeal. In order to provide a forum for the fair resolution of academic disputes involving individual student complaints of the appropriateness of course grades and accusations of academic misconduct the following processes have been developed and will be applied to all cases involving graduate students in the Parkinson School of Health Sciences and Public Health.

Appeals

1. Students retain the right to appeal the determination made at any stage of the process outlined above using the Academic Appeal Procedure described below.
2. The decision of the academic Dean's office is final in all cases except expulsion.

Academic Appeal Procedure: Course Grade Appeal

1. The student's first step in the event of a grade dispute is to confer directly with the instructor.
2. If the grade dispute is not resolved, a student must submit a formal request using the Academic Appeal Form for a grade change no later than 30 days into the following semester explaining in detail why the grade is arbitrary and capricious. This form is the only approved process to submit such a request.
    a. If the final grade is assigned in spring or summer semester, the student must submit the appeal no later than 30 days into the fall semester.
    b. If the final grade is assigned in fall, the student must submit the appeal no later than 30 days into the spring semester.
3. The Department Chair and/or Dean's designee determines whether or not there are grounds for an appeal.
    a. When the Department Chair and/or Dean's designee determines there are no grounds for an appeal, the student will be notified via Loyola email that a hearing board will not be convened.
        i. If the student disagrees with the determination by the Department Chair and/or Dean's designee, the student may appeal to the Parkinson Dean. In cases where the student is enrolled in a school other than the one in which the course is taught, the academic Deans of the two schools will review the appeal together. The student's academic Dean's office will notify the student of the final decision via Loyola email.
    b. When the Department Chair and/or Dean's designee determines there are grounds for an appeal, the student will be notified via Loyola email that a hearing board will be convened.
    c. It is up to the discretion of the Dean or his/her designee if a student may continue taking courses in a sequence where the course grade under review is a pre-requisite.
4. The Parkinson School will convene a hearing board for each dispute. Board members are chosen by the Department Chair and/or Dean's designee and will consist of three to five faculty members other than the faculty member involved or Department Chair. In smaller departments or interdisciplinary programs, board members may be members of different departments.
5. The chairperson of each hearing board will be selected by the person who appoints the hearing board. The chairperson of the hearing board receives all requests for hearings from the department, sets the calendar, notifies all involved parties of the dates and times of hearings via Loyola email, and informs students by written notice of the decisions of the board.
6. The hearing will be held within 10 business days of the receipt of the request for a hearing, if practicable. Hearings may be held virtually to accommodate committee members or parties to the appeal.
7. The hearing will be private.
8. Hearings for a grade dispute generally proceed according to the following format:
    a. Introduction of all parties present (including witnesses, when applicable) and an overview of the hearing process.
    b. Review of the Student Rights in the Academic Appeal Process.
    c. Students should complete the electronic appeal form in advance of the hearing.
    d. Hearing board chairperson reviews the nature of the grade dispute and the University policy potentially violated.
    e. Witnesses are excused until statements are needed (if applicable).
    f. Student(s) (and Instructor(s) when applicable) provide a personal account of the reported incident.
    g. Student(s) (and Instructor(s) when applicable) have the opportunity to review all documentation relevant to the case that will be used by the hearing board to make a decision.
    h. Hearing board members ask any remaining investigative questions to the parties present (including witnesses, if applicable).
    i. Student(s) are provided a final opportunity to make any closing comments.
    j. Instructor(s) are provided a final opportunity to make any closing comments.
    k. Hearing board chair may excuse all parties for deliberation if needed.
    l. Student(s) (and Instructor(s) when applicable) are notified of the decision and any related outcomes either immediately after deliberation or, when further deliberation is needed, typically within 5 business days in writing via Loyola email.
9. Both the student and the faculty member involved may be accompanied by one advisor of their choice throughout the hearing process. The individual must inform the chairperson of the hearing board via Loyola email of the name of the advisor at least 2 business days before the hearing date.
    a. The role of an advisor is to provide a comforting presence for the student and/or instructor. An advisor may only speak to the advisee. An advisor may not ask questions, interject, advocate for, or otherwise speak on behalf of the advisee. Even if an advisor is an attorney, the advisor may not function as legal counsel or "represent" an advisee during the hearing process.
    b. If any advisor conducts themselves in a manner inconsistent with these guidelines, or if the advisor's behavior obstructs or interferes with the hearing process, the advisor will be warned by the board.
    c. If the advisor's interfering behavior continues or if the advisor engages in a manner that harasses, abuses, or intimidates any other participant, the advisor will be excused from the hearing immediately.
10. The student and/or instructor have the option of submitting relevant materials to the hearing board prior to or at the time of the hearing. Individuals in the hearing process have the responsibility of presenting truthful information.
11. The Board may address questions to any party.
12. The chairperson of the hearing board determines the hearing processes (e.g. location, order of proceedings, determining what evidence is relevant, determining if additional information is needed, etc.). The standard of evidence required for a board to determine that arbitrary and capricious academic evaluation occurred is known as a "preponderance of the evidence." This means the board must determine that it is more likely than not that arbitrary and capricious academic evaluation occurred based on the totality of available evidence.
13. All decisions of the board must be determined by a majority vote of the hearing board members. A final decision must be rendered by the board by the end of the hearing process.
14. The student and instructor will be informed in writing via Loyola email by the chairperson of the board's decision within 5 business days of the hearing. The decision is also shared with the Department Chair and/or Dean's designee.

a. If the hearing board determines that a grade change is not warranted, the chair of the hearing board will notify the student and the instructor involved of the decision.
b. If the hearing board determines that a grade change is warranted, the Dean and/or Dean's designee submits a grade change request to the Office of Registration and Records. The Department Chair and/or Dean's designee will notify the student and the instructor involved of the decision vial Loyola email.

Should the student or instructor wish to contest the hearing board's decision, an appeal letter to the Dean and/or Dean's designee within 30 days of notice of the hearing board's decision may be sent to the Graduate School.

1. The appeal letter must clearly identify the grounds for the appeal with appropriate supporting documentation. Mere disagreement or dissatisfaction with the decision does not constitute a basis for an appeal.
2. The grounds to appeal the board's decision must include one or more of the following criteria:
   a. New substantive information is available that was not reasonably available at the time of the hearing and could substantially impact the original findings or outcomes of the case.
   b. A substantive procedural error or error in the interpretation of University policy occurred that denied the student or instructor the right to a fair hearing and decision.
   c. The decision (findings or outcomes) is significantly incongruent with the established facts presented at the hearing or established Academic Standards and Regulations in the Parkinson School.

Grade Policy

Grade Scale

A course instructor may set the grading scale in their course, i.e. a scale of A=90-100 versus A=94-100. In all cases, instructors must clearly communicate in the course syllabus how assignments and final course grades are calculated.

When instructors submit final course grades, those grades are then used to calculate cumulative grade point average using the university scale per below.

Grade	Grade Points
A	4.00
A-	3.67
B+	3.33
B	3.00
B-	2.67
C+	2.33
C	2.00
C-	1.67
D+	1.33
D	1.00
F	0.00
I	Incomplete
W	Withdrawal
WE	Emergency Withdrawal
P	Pass/Credit
NP	Non-Pass/No Credit
AU	Audit

Required Grades

Graduate students are expected to maintain a cumulative grade point average of 3.0 or higher. No grades of D or F are counted as fulfilling program requirements in any graduate course. These grades, however, will be calculated in the grade point average. If a student earns a grade of D or F in a required course, that course must be repeated. No student is permitted to graduate from the Master's program or complete a graduate certificate with lower than a 3.0 cumulative GPA. Note that a grade point average is not rounded.

No more than six semester hours of grades lower than C will be accepted while a student is completing requirements toward a master's degree, unless otherwise stipulated by a specific program, as outlined in their handbook. If a student receives more than six semester hours of grades lower than C, the student must take another course equal to the number of hours over the six semester hours of lower than B# grades allowed. NOTE: Students must still maintain an overall GPA of 3.0 to remain in good standing.

Incomplete Grades

Parkinson expects students to complete all coursework by the end of the term during which the courses were taken. However, if a student and the instructor make arrangements in advance, a student may receive a grade of I (Incomplete) at the end of the term. The student is to complete the outstanding work and submit it to the instructor according to a schedule approved by the instructor, subject to the following policies.

The student must complete and submit all outstanding work to the instructor by the last day of the semester following the term in which the I grade was assigned. (For purposes of incomplete grades, the summer sessions are counted together as one term.) If the student does not turn in the work by the deadline, the I will automatically become an F. The School will not approve a change of grade if the student does not complete and submit the work to the instructor within one term of the assignment of an I grade.

Process for Incomplete Grades

- A student may request an incomplete by completing a form and turning it in to the graduate program coordinator.
- Faculty submit the incomplete grade through LOCUS and make a plan for the student to resolve the incomplete
- When the incomplete is resolved, faculty should complete the grade change form and submit to the grade program coordinator or the Associate Dean of Academic Affairs. The form will then be checked and sent to Registration and Records.

Credit/No Credit

In some cases courses may be taken on a credit/no credit basis. A grade of P (pass) indicates that the student made satisfactory progress toward completion of course or degree requirements. A grade of NP (no pass) indicates that the student did not make satisfactory progress toward completion of course or degree requirements.

Audit

Auditors are not required to complete course assignments, including examinations and term papers. Class attendance is required, and auditors have a right to participate in class discussions. A grade of AU indicates satisfactory attendance; students who do not meet the attendance

requirement will receive a grade of W. Auditors are assessed one-half tuition.

Pass/Fail

The Pass/Fail option is not available for courses taken for graduate credit, unless the course is designated in the program as Pass/Fail, i.e. A comprehensive exam or thesis. The Pass/Fail option is available for other courses (e.g., foreign-language courses taken to fulfill a research-tool requirement).

Health Insurance Portability and Accountability Act of 1996 (HIPAA)

The Health Insurance Portability and Accountability Act of 1996 (HIPAA) is a federal law that provides for the protection and privacy of personal health information. The Privacy Rule and the Security Rule of this law affect health care providers, including students enrolled in clinical education activities. The Privacy Rule (https://www.hhs.gov/hipaa/for-professionals/privacy/laws- regulations/?language=en) of the HIPAA defines protected health information as:

> "information, including demographic data, that relates to the individual's past, present, or future physical or mental health or condition; the provision of health care to the individual; or the past, present, or future payment for the provision of health care to the individual; and, that identifies the individual or for which there is a reasonable basis to believe it can be used to identify the individual"

All students must follow the HIPAA Privacy Rules and Guidelines when participating in clinical/experiential learning activities (research, academic internships and service- learning opportunities). Compliance with these rules and guidelines includes, but is not limited to, maintaining confidentiality of paper and electronic health records and protected health information.

All students are required to complete HIPAA training, as mandated by their educational program. In addition, all students are required to complete any additional training mandated by the facility where internship or service-learning education is occurring.

When a concern is raised that a student has violated the confidentiality and privacy of patient information, the concern is addressed through the formal disciplinary process of the student's school or college of Loyola University Chicago.

HSC University Ministry

The Office of University Ministry has a three#fold mission that focuses on the members of the Loyola University Chicago Health Sciences Campus. Inspired by Ignatian values and the practical spirituality of finding God in all things we work towards:

- Shaping Community: Through educational programs and events; prayer and worship; hospitality and outreach; social activities and attention to the needs of the individual we build a welcoming and inclusive community for students, staff and faculty.
- Seeking Faith: We journey with the people who teach, learn and work at the Health Science Campus by providing spiritual formation and faith development while facilitating individual and communal prayer. True to our experience of the Gospel, we welcome and engage individuals regardless of their faith background or tradition to grow into becoming men and women for others.
- Serving Broadly: By embracing a worldview that is both local and global we facilitate and sponsor opportunities for members of the Health Sciences Campus to work with underserved communities in the greater Chicago area and beyond.

For more information about the HSC Ministry, visit their website (https://hsd.luc.edu/ministry/) or call 708#216#3245.

Immunizations Required for All Loyola Students

Proof of immunity is an Illinois state requirement. All Loyola students enrolled in seven or more credit hours must complete the process to verify proof of immunity. Incomplete immunization information **will block access to registering or changing classes**. All students must enter immunization requirements into Loyola Health and upload supporting documents **before the 10th day of the term**.

All immunizations are to be uploaded to Loyola Health. Required Illinois state immunizations are Tetanus, Measles, Mumps, Rubella, and Meningococcal.

A series of three tetanus vaccines is required; one of them must be a TDAP that was given within the past ten years of enrollment.

Two MMR vaccines are required; the first dose must be given four days before your first birthday or after. The second dose must be given a least 28 days after the first dose. Students who cannot provide proof of immunization may provide laboratory (serologic) evidence of measles, mumps, rubella immunity.

A Meningococcal ACWY vaccine that was given four days before your 16th birthday or after is required for students who enrolling under the age of 22. Meningitis B does NOT meet this requirement.

An annual flu vaccine is required for any student who will be spending time (i.e. class) at the Health Science campus.

All immunization records must be in English or accompanied by a certified translation or they will not be approved.

Independent Study

The student may have the opportunity to register for Independent Study. The purpose of Independent Study is to provide a focused experience in an area of interest. Independent studies can vary in credit (1-3 credits) and may be applied to LUC credit hour requirements. The student will meet with their Academic Advisor to discuss how the Independent Study will fit into their total curriculum plan. **Important:** An Independent Study does not substitute for a required course.

Leave of Absence (LOA)

Official long-term leaves of absence are intended for students who wish to discontinue temporarily their graduate studies due to special circumstances (e.g., medical, personal or professional reasons). Students who are on a long-term leave of absence may not use University resources, including faculty time. A long-term leave of absence postpones all deadlines concerning completion of degree requirements for the duration of the leave of absence.

Decisions regarding the approval of leaves of absence rest with the Dean's Office of the Parkinson School of Health Sciences and Public Health in consultation with the student's program director. When reviewing requests for a leave of absence, additional information or documentation from the student and the graduate program director may be required. In cases where the graduate program director recommends that the leave of absence not be granted, the student may petition the Dean's office to consider the request. International students admitted to the United States on temporary visas must also receive approval from

the university's Office of International Programs for information regarding eligibility for a leave of absence.

Leaves of absence are limited to a period of one full academic year. If a student is not prepared to return to active status after one year, the student may request a renewal of the leave of absence for a period of up to one year; in such cases, the graduate program director and the Dean's office will review the student's record and future plans to determine whether an additional leave is in the best interests of the student and the program. .

In order to be reinstated to active status, the student must notify their program director in writing upon returning from a leave of absence. Unless the student is granted a renewal of a leave of absence, the student must return to active status in the semester following the expiration of a leave of absence; failure to do so may result in dismissal from the program. If a student does not return from a leave of absence after two consecutive years, they must reapply for admission to the program.

Procedure

- A student must request a Leave of Absence with their assigned Program Director or Graduate Program Coordinator.
- Graduate program coordinator instructs student to complete the LOA Request Form (attached). Upon receipt from student, program director approves with signature and forwards to Associate Dean for Academic Affairs.
- Associate Dean approves the LOA Request Form with signature and submits the form back to the Graduate program coordinator who then generates a formal letter (example attached) and sends that, with the signature of the Associate Dean, to the student.
- The letter is saved in Sharepoint under the FERPA protected Academic Affairs folder under the respective program folder.
- The graduate program coordinator then edits the student status in LOCUS to Leave of Absence.
- If the student returns as an active student, the graduate program coordinator changes the student status in LOCUS to Active.
- If the student does not return as expected and does not communicate plans to return, the student will be marked as Discontinued in LOCUS 6 months after the last expected time of return.

Library Services

The Loyola Health Sciences Library (HSL) has a wealth of resources for you to use during your academic career. The library is located on the 1st floor of the Marcella Niehoff School of Nursing. Students have 24#hour online access. Staffed hours include Monday#Thursday: 8:30am#7pm and Friday 8:30am# 5:00pm

- Accessing HSL Resources: Whether on#campus or off, access the library's licensed resources using "Single Sign On" in which students need to register for a login ID.
  - Go to the library website (https://library.luhs.org/hslibrary/).
  - Click on a resource such as Cinahl. When the Connect page opens, click on the gold registration box and request a login ID.
  - Your ID will be sent to you via email within 24 hours when the library is staffed. Questions? Call 708#216#9192.

Probationary Status

Students who have been admitted to the program on strict academic probation receive specific instructions regarding coursework and required grades in the letter of admission.

If a student's cumulative GPA drops below 3.0 at any time during the program of studies, the student is placed on academic probation. In that case, the student is expected to raise her/his GPA to the required level of 3.0 or higher in the next two consecutive terms in which he/she is registered for classes or upon completion of nine semester hours, whichever comes first. A student may be placed on academic probation only once. The student will be dismissed from Loyola University Chicago if the GPA drops below 3.0 a second time. Additionally, students on academic probation may not enroll in a clinical, internship, or capstone course.

Support & Communication Systems

Writing Center

Located at Lake Shore and Water Tower Campuses. The main goal of the Writing Center is to help the student become a better writer. The Writing Center offers writing assistance to meet the student's individual needs. Tutors are available to help at any point of the writing process —from brainstorming, to organizing, to putting the final touches on a bibliography. All LUC students are eligible to use their services. Online writing center services are also available to students.

Tutoring Center

Located at Lake Shore and Health Sciences Campuses. The purpose of the Tutoring Center is to support the mission of Loyola University Chicago by providing academic services and resources which will foster development of skills and attitudes necessary to increase the knowledge and academic independence of all students. Through collaborative learning services, the Tutoring Center helps to contribute toward student success and the retention efforts that are made by Loyola University Chicago. Small Group Tutoring matches you with students from your course and a peer tutor for a regular meeting to enhance your understanding of course material. Other services include Supplemental Instructor (SI) and academic coaching. All LUC students are eligible to use their services.

Achieving College Excellence (ACE) Program

Designed to serve first-generation college students, students with high financial need, and/or students with a documented disability, the ACE program is committed to helping students succeed in their college journey at Loyola University Chicago and beyond.

Center for Engaged Learning, Teaching, and Scholarship (CELTS)

The Center for Engaged Learning, Teaching, and Scholarship serves students, faculty, staff, and community partners of Loyola as a resource for experiential learning opportunities and partnership in several key areas: Academic Internship Program, Service-Learning Program, Undergraduate Research Program, and Learning Portfolios (portfolio) Program.

Coordinated Assistance & Resource Education (CARE)

CARE services are designed to assist and support students through challenging times. When a student requests CARE services, or is referred for CARE services, they are given an opportunity to work with a member of the Office of the Dean of Students staff to gain awareness of, or access to, various resources, engage in dialogue about solutions, and ultimately gain support to assist with navigating difficult or challenging situations. CARE services can be conducted through formal and informal means. Such services may include outreach on behalf of a student to faculty or other campus partners, connecting students with appropriate campus or community resources, or simply checking in with a student to offer guidance and support, among other actions.

Career Services
Located at the Lake Shore and Water Tower Campuses. Loyola's Career Services counsels, educates, and empowers the Loyola student and alumni community. Counselors are available to provide guidance, support, resources and opportunities that assist students and alumni to reach their personal and professional goals. Contact Career Advisor at 773-508-7716 or by email (careercenter@luc.edu) for resume feedback, interview tips, job search strategy and more.

Student Accessibility Center (SAC)
SAC serves students with disabilities by creating and fostering an accessible learning environment. Their aim is to empower students with diverse needs by enhancing their self- awareness, self-determination and self-advocacy. SAC works closely with campus partners, students, families, and the Chicago community to create a safe environment for students to succeed academically and personally. All requests for accommodations are considered on a case-by-case basis. The student requesting accommodations should meet with a SAC staff member, as early as possible, preferably before the beginning of their first term at the University. Please note that Loyola does not provide aides, services, or devices for personal use or study. Any accommodation that fundamentally alters the nature of the course work, or the materials assigned, or is unduly burdensome financially or administratively will not be provided. Reasonable accommodations do not ensure academic success; rather they provide equal access to success during a student's time at Loyola University. The student is required to provide official documentation of their disability from an appropriate professional.

Special Health Accommodations
Documentation from a healthcare provider is required whenever a student has a health issue that demands certain precautions or accommodations that do not violate agency policies, yet allow the student to fulfill the objectives of the course. These situations may include other medical conditions that require modification and/or restrictions for student participation in clinical experiences. Documentation from a healthcare provider is required when the accommodations are no longer necessary.

Wellness Center
Lake Shore Campus and Health Science Campus. The Wellness Center provides high quality interdisciplinary medical, mental health, and health promotion services that enable the student to more fully participate and succeed in the college experience. All students are eligible for services provided at the Wellness Center.

Loyola's Universal ID (UVID)
Loyola's Universal ID (UVID) is the primary means of authentication and identification throughout the University. The UVID provides access to most of Loyola's resources. This includes, but is not limited to, LOCUS, Sakai, Microsoft Outlook email, Lawson, Kronos, campus wireless access and campus networked computers. UVID provisioning is automated for all students at Loyola.

Loyola's Online Connection to University Services (LOCUS)
LOCUS (http://www.luc.edu/locus/) is an integrated, web-based student information system that provides information access 24 hours a day. LOCUS allows the student to view course descriptions, enroll in courses, view and process financial aid information, change addresses and phone numbers, and request official transcripts.

LUC Learning System - SAKAI
The learning management system, SAKAI, provides the student with all course information including the syllabus, course documents, calendar, assignments, grades, and at times, lectures. SAKAI can be accessed online from the LUC homepage. The student can access SAKAI for each course once they have registered through LOCUS (http://www.luc.edu/locus/) (Loyola's Online Connection to University Services). The Loyola University Chicago UVID and password must be used to access web-based course information. Each undergraduate Parkinson School program maintains SAKAI sites for students with program announcements, calendars, and other information.

The Parkinson School Web Pages
In addition to the above methods of providing information to students, students may visit the Parkinson School programs here (https://www.luc.edu/parkinson/).

Title IX
Loyola University Chicago does not discriminate on the basis of sex in any education program or activity that the University operates, and is required by Title IX of the Educational Amendments of 1972 and 34 CFR Part 106 (collectively referred to as "Title IX") not to discriminate in such a manner. This requirement extends to admission and employment. For more information please go to the Office for Equity and Inclusion (https://www.luc.edu/equity/).

a. Complaint Referral

   University administrators may refer certain formal complaints from Parkinson School students, including complaints made through the Ethics Line Reporting Hotline, to the Parkinson School Dean's office for appropriate action, including assistance in the investigation of a report. Where appropriate, the Dean will assign an administrator from the Parkinson School to assist in the investigation. Such assignments are made with consideration of the need for the investigation to proceed in an objective and non- biased manner.

b. Complaints Received through the Ethics Line Reporting Hotline

   The Ethics Line Reporting Hotline exists as a means for University faculty, staff, students, administrators, or other concerned parties to report activities that involve misconduct or violation of University policies. Reports may be made online (https://www.luc.edu/ethicsline/) or by dialing 855-603-6988.

   As explained at Ethics Line (https://www.luc.edu/ethicsline/):

   The University is committed to the highest ethical and professional standards of conduct as an integral part of its mission of expanding knowledge in the service of humanity through learning, justice and faith. To achieve this goal, the University relies on each community member's ethical behavior, honesty, integrity and good judgment. Each community member should demonstrate respect for the rights of others.

   The University strongly encourages all faculty, staff, students, administrators or other concerned parties to use this Reporting Hotline to report suspected or wrongful acts of conduct by Loyola University Chicago community members. No University administrator, faculty, staff or student may interfere with the good faith reporting of suspected or actual wrongful conduct; no individual who makes such a good faith report shall be subject to retaliation, including harassment or any adverse employment, academic or educational consequence, as a result of making a report.

   All reports to the Ethics Line Reporting Hotline are made available to specific individuals within the University on the University's

Ethics Line Reporting Hotline Resource Team (the "Resource Team") who are charged with carefully reviewing and evaluating the report and assigning it to an appropriate case manager/investigator on the Resource Team, based on the type of alleged violation and location of the incident. The Ethics Line Reporting Hotline System does not create a new category of prohibited behavior or a new process for members of the University community to be disciplined or sanctioned. The Resource Team has no authority to discipline any student or member of the faculty or staff. When reported conduct is subject to existing University disciplinary or judicial procedures, appropriate referrals will be made by the Resource Team.

Reports submitted through the Ethics Line Reporting Hotline are handled as promptly and discreetly as possible, with facts made available only to those who need to investigate and resolve the matter. Individuals filing a report may follow-up online on the status of a report and to determine if further information is needed to proceed with an investigation.

Transfer Credit

It is ordinarily expected that all work towards a master's degree will be completed in the program at Loyola University Chicago. However, up to nine credit hours of graduate work completed in another Loyola program or at another institution may be applied toward a master's degree with permission of the program's Graduate Program Director (GPD) and the Graduate School. Transfer credits may cover electives and core credits.

Students may request transfer of credit during the student's first semester of the program. The program director is responsible for approving transfer credit. To ensure that each student is well prepared for undertaking scholarship in the student's current field of study, the program decision regarding transfer credit will be based on the quality of the student's work, the time interval since its completion and its relevance to the student's program of study at Loyola.

Only grades of B or better are accepted for transfer.

Procedure

- The student will provide a copy of the syllabi for which they are requesting to be transferred in for credit as well as a copy of the transcript with the course grade
- If the graduate program director approves they will document approval by uploading a formal letter of approval into docfinity.
- The graduate program coordinator will follow the procedures described on pages 2-4
- Upon degree conferral, the graduate program coordinator will confer with the graduate program director for questions on transfer credit

Unprofessional Behavior and Conduct

Exemplary behavior of students in Loyola University Chicago (the "University") is expected at all times. Students in the Parkinson School are expected to abide by the policies regarding professionalism in applicable student handbooks as well as the syllabi for each course, including professional behaviors with respect to attendance, punctuality, dress, demeanor, integrity and ethical conduct relative to health professions. Professional conduct by the student facilitates learning opportunities and fosters good working relationships within the Parkinson School and between the Parkinson School and clinical agencies or institutions.

Complaints related to unprofessional behavior and conduct by students within the Parkinson School may originate from faculty, staff, other students, or from outside the University, such as an academic internship or service-learning site.

Issues of unprofessional behavior or conduct that occur during an experiential learning experience will be addressed immediately as well as through the evaluation of student performance in the academic internship or service-learning course, as detailed in the course syllabus. If a student believes the grading related to his/her professional behavior and conduct is the result of a significant violation of clearly established written school policies, is the result of improper procedures, or is capricious, the student may pursue a grievance in accordance with the Parkinson School Academic Grievances and Appeals Procedure as written in the Undergraduate and Graduate Program Student Policies.

Complaints of unprofessional behavior or conduct within a classroom, simulation, or lab experience, or outside an academic internship or service-learning experience, are addressed through a formal complaint resolution process, as specified below.

a. The first attempt at resolution of the complaint should occur between the student and the other parties involved.
b. If the complaint of unprofessional behavior or conduct is not resolved among the parties involved, a formal complaint, in written form, is forwarded to the Program Director of the student's degree program.
c. The Program Director reviews the complaint, any supporting documentation submitted by any of the parties, and meets with the parties involved individually. If the Program Director is directly involved in the complaint, the complaint instead is forwarded to the Dean.
d. If the complaint is not resolved at the level of the Program Director, the Program Director submits a recommendation for any action to be taken, along with any supporting documentation, to the Dean with jurisdiction over the degree program in which the student is enrolled.
e. The Dean, upon review of the recommendation, complaint and supporting documentation, meets with the parties to the complaint.
f. The Dean may dismiss the complaint or, upon finding that the student has engaged in unprofessional behavior and conduct, institute progressive corrective action with the student. Progressive corrective action typically begins with a verbal warning (documented) to the student, which details the nature of the complaint, corrective actions to be taken, and notifies the student that failure to correct the unprofessional behavior or conduct may result in more severe corrective action. The nature of the behavior dictates the severity of the action. The behavior may warrant immediate action beyond a verbal warning.
g. If the unprofessional behavior or conduct continues, the Dean may issue a written warning, which details the nature of the continuing concern related to unprofessional behavior or conduct, further corrective actions that are required, and notifies the student that failure to correct the unprofessional behavior or conduct may result in the student's withdrawal from a course or a recommendation for dismissal from the academic program. The decision to recommend a withdrawal or dismissal is based on the nature and severity of the unprofessional behavior.
h. If the unprofessional behavior or conduct continues, the Dean will either withdraw the student from a course or make a recommendation for dismissal from the academic program.
i. If the student is withdrawn from the course, the student will receive a W for the course depending on the time the decision is made.

j. The Dean may recommend the student's dismissal from the academic program, after the verbal and written warning steps are completed, if the unprofessional behavior or conduct continues. The Dean may authorize the student's dismissal from the program of study, in all cases except where expulsion from the University is also recommended (see letter l below).

k. A student who wishes to appeal a decision impacting his/her academic standing or progress at the University may make a written request for an appeal within 30 calendar days of the disputed decision being rendered, consistent with the University's policy on General Academic Appeals (p. 1919). The appeal will be reviewed and considered by the Dean within 30 calendar days of the receipt of the written student request for an appeal. The appeal decision made by the Dean is final and is ineligible for further appeal.

l. In cases where a student's expulsion from the University for Unprofessional Behavior and conduct is considered, the Dean reviews all relevant information. An action of expulsion from the University rests with the Senior Academic Officer, upon a recommendation from the Dean.

Withdrawal from Courses

If a student withdraws from a course before the published withdrawal deadline, the student's transcript will show no record of the course. Students contemplating official withdrawal from a class and receiving or expecting to receive financial assistance should consult with the Office of Student Financial Assistance. A grade of "W" indicates official withdrawal from a course through the allowed withdrawal period (see academic calendar for dates). The grade "W" is not counted in computation of academic standing as either attempted or earned credit hours, nor calculated in the grade point average. With a complete emergency term withdrawal, the grade of "WE" does not count towards attempted credit hours or in GPA (effective Fall 2022). However, both the "W" and the "WE" count towards attempted hours when determining Satisfactory Academic Progress for continued financial aid eligibility.

School of Continuing and Professional Studies

SCPS Graduate Academic Policies

Academic Advising

Upon admission, graduate students are required to meet with their primary academic advisor to review their academic plan. After this point, students may schedule advising appointments at any time for questions related to registration, enrollment, or academic planning. *It is recommended that students check in with their primary academic advisor at least once each academic year.*

The University uses LOCUS—and specifically the Academic Requirements Report (ARR)—as the official record of all completed and required coursework. An electronic audit in Microsoft Excel may also be used as a supplemental planning tool to help students visualize their path to graduation.

A file review and graduation audit are completed for all graduate students when they apply for graduation to ensure that the classes necessary for graduation have been or will be completed.

Academic Appeals

SCPS graduate students must follow the University's academic policies for graduate students—or, when no graduate policy exists, the corresponding SCPS graduate policy—and should use the undergraduate appeal forms (linked below) when submitting these requests.

- Request for Change to Academic Record or Status (https://cm.maxient.com/reportingform.php?LoyolaUnivChicago&layout_id=104)
  - Leave of absence
  - Withdrawal from the university
  - Complete emergency withdrawal
  - Change of registration (e.g. change to withdrawal date)
- Appeal a Finding of Academic Misconduct (https://cm.maxient.com/reportingform.php?LoyolaUnivChicago&layout_id=100)
- Appeal of Dismissal for Poor Scholarship (https://cm.maxient.com/reportingform.php?LoyolaUnivChicago&layout_id=105)
- Course Grade Dispute (https://cm.maxient.com/reportingform.php?LoyolaUnivChicago&layout_id=102)

Academic Integrity

SCPS graduate students are held to the academic integrity policies and procedures outlined within the University's undergraduate academic standards and regulations (https://catalog.luc.edu/academic-standards-regulations/undergraduate/).

Academic Standing

A graduate student is in good academic standing if they:

1. Meet the standards of quality of their academic program and SCPS;
2. Makes satisfactory progress toward completion of degree requirements within the established time limit; and
3. Fulfills SCPS' requirement regarding grade-point average. Students who are not in good academic standing are not eligible to receive a degree and cannot hold an award.

A cumulative GPA of at least 2.8 is required for a student to be considered in good academic standing. Students must be in good academic standing to graduate and have their degree and/or certificate conferred.

Academic Probation

The review for academic standing is completed at the end of the term (fall and spring 16-week semester and 12-week summer semester) and not at the end of each 8-week session. When a student's cumulative GPA falls below 2.8 at the end of the term, they will be placed on academic probation and are required to complete an Academic Improvement Plan, and, may be restricted in enrollment.

Students will have one semester on academic probation. During this semester on academic probation, students must either:

a. Raise their Loyola cumulative GPA to at least 2.80 (i.e., return to good standing), or

b. Achieve a semester GPA of at least 3.00 to continue on probation for one additional semester.

If students do not satisfy either (a) or (b), they may be dismissed from the University (i.e., dropped for poor scholarship). For the semester on

academic probation, students may not request "Incompletes" or withdraw from a course without permission from their academic advisor.

Dismissed For Poor Scholarship

Students who do not meet the requirements of academic probation and do not return to good academic standing will be dismissed for poor scholarship.

Admission

Admission on Condition (Unofficial Transcripts)

Conditional admission may be offered to those who have submitted unofficial (self-submitted) or in-progress transcripts (applicant is still enrolled at previous institution at the time of admission). These admitted students must request that official transcripts be submitted to gradapp@luc.edu before the end of the first term of enrollment, or a hold will be placed on their account so that they may not register for future terms.

Admission on Probation

Admission on probation may be offered to students who do not meet the academic requirements for admission. These students will have the opportunity to demonstrate their ability to succeed academically while on academic probation.

For **undergraduate students**, the terms for admission on probation are as follows:

- Students must pass CPST 200 Introduction to Degree Completion in their first session.
- Students must earn a cumulative grade point average of 2.5 in their first 12 credit hours of coursework.

At the completion of their first 12 credit hours, the student's record will be reviewed to determine if the GPA and CPST 200 requirements have been met and their status updated to one of the following:

- Good academic standing. If the student achieves the required 2.5 GPA on the 12 credit hours and their cumulative GPA is 2.0 or higher.
- Continued on probation. If the student achieves the required 2.5 GPA on the 12 credit hours but still needs to bring their cumulative GPA to 2.0 or higher, they will be given the opportunity to continue to improve their GPA with future enrollment.
- Dismissal for poor scholarship. If the student fails to earn a 2.5 GPA on the 12 credit hours, they will be dismissed from the university.

For **graduate students**, the terms of admission on probation are as follows:

- Students must earn a cumulative grade point average of 2.8 (good academic standing) by the end of their first semester.

At the completion of their first semester, the student's record will be reviewed to determine if the GPA requirement has been met and their status updated to one of the following:

- Good academic standing. If the student achieves the required 2.8 cumulative GPA or higher.
- Dismissal for poor scholarship. If the student fails to earn a 2.8 cumulative GPA, they will be dismissed from the university.

Admission on Probation (Paralegal Studies Certificate Students)

Students who do not meet the 2.5 minimum undergraduate GPA requirement for the post-baccalaureate certificate programs maybe conditionally admitted if the admission committee agrees that the student has the potential for success in paralegal studies at this level. These students will have the opportunity to demonstrate their abilities by achieving a 2.5 minimum GPA in the first two sessions of study. At that point, their files will be reviewed for a change in status to either good academic standing or dismissal for poor scholarship.

Auditing a Course

All degree and non-degree seeking students auditing a course must first receive approval from the SCPS Assistant Dean. Course auditing will be allowed only in rare and special circumstances. Students auditing a course will be assessed tuition on a per-credit basis at 50% of the normal tuition rate.

Students must complete the University's graduate audit request form, email it to the Assistant Dean, and on approval it will be submitted to the Office of Registration & Records. This form is found on the Registration & Records website here: https://www.luc.edu/regrec/aboutus/forms/

Completion of this form does not constitute registration for the course; the student is responsible for registering for the course via the university's registration system and must do so prior to the late registration deadline to avoid a late registration fee. The completed form must be received by the SCPS Dean's office before the audit deadline as stated on the academic calendar on the SCPS website.SCPS will not approve a request received after the deadline.

Class attendance is required, and auditors have a right to participate in class discussions. A grade of AU indicates satisfactory attendance; a grade of W will be assigned in cases of unsatisfactory attendance. Auditors do not complete course papers, examinations, or other assigned projects.

A course that is audited does not count as hours attempted, and therefore is not considered in determining a student's enrollment status (i.e., whether the student is classified as full or part-time) and is not eligible for coverage by a tuition scholarship.

Class Attendance/Student Accountability

Expectations of Students

Students are expected to treat their classroom and SCPS community obligations as they would treat any serious professional engagement. The following expectations apply to all students within the SCPS community at all times:

- Students are expected to behave ethically and respectfully within the SCPS community, and according to the Academic Integrity policy and Community Standards as found in the Academic Catalog.
- Students must use and check Loyola email and Sakai for all correspondence with SCPS faculty and staff.
- Students are responsible for reviewing and understanding University and SCPS policies and calendars.
- Students should meet regularly with their academic advisor.

Students should also adhere to the following expectations before and during their courses:

Before classes:

- Complete Mastering Learning Tools (new degree-seeking students).
- Attend the SCPS orientation, when applicable.
- Purchase books or obtain course materials prior to the start of the course.
- Review the syllabus carefully prior to the start of the course and contact instructor with questions.
- Enroll prior to the session/term start date. Late enrollment is highly discouraged. Instructors are not required to make accommodations or accept late assignments due to late enrollment.
- Students who have accessibility needs must work with the Student Accessibility Center (SAC) prior to the start of class. Students should start the process with SAC at least two months prior to the start of the 8-week session.

During Classes:

- Adhere to deadlines and timetables established by the instructor and submit work on time. Any variations/conflicts must be communicated in advance and approved by the instructor.
- Proactively communicate with instructors and academic advisor about any concerns, difficulties, or scheduling conflicts or missed sessions of the course.
- Prepare thoroughly for each session in accordance with the instructor's request.
- Arrive promptly for the start and remain until the end of each synchronous class meeting.
- Participate fully and constructively in all class activities and discussions.
- Display appropriate courtesy to all involved in the class sessions. Courteous behavior specifically entails communicating in a manner that respects, and is sensitive to, the cultural, religious, sexual, and other individual differences in the University community.
- Provide constructive feedback to faculty members regarding their performance through the University's formal course evaluation, administered at the end of each 8-week session.

Class Attendance/Student Accountability

Due to the intensive nature of each course, students' success in SCPS courses will heavily depend on their attendance and participation in the course. The choice to pursue a degree or certificate will likely involve adjusting one's schedule to avoid conflicts whenever possible. The value placed on class participation as a component of the final grade in any course is at the discretion of the individual instructor and will be stated in the syllabus.

Courses may include both synchronous and asynchronous components. Asynchronous coursework is independent coursework students complete within a certain time frame, but students are not required to be online at a specific day or time. Synchronous coursework refers to online meetings that occur at a designated date and time as set by the course instructor. Required synchronous meetings will be communicated in advance of a student registering for a course and are included within the SCPS course schedule and are held in the evening (6-9pm, CST) or on Saturdays (9am-Noon, CST).

Students are expected to be present for every required synchronous meeting of the course. If they are unable to attend a class meeting or if they will be late for a class, they must notify the instructor in advance of the absence. Requests for missed class meetings should only occur for circumstances that are truly unavoidable and students are responsible for reaching out to their instructor in advance of the start of the session.

Each course's instructor reserves the right to make judgment on accepting and/or making up assignments missed because of class absence for a required meeting. That policy will be clearly expressed in the course syllabus. Unexcused absences may result in failing the course. Please understand, if an instructor allows an excused absence, even with an approved modification to the required meetings for a course, any change to the required components of a course will impact the student's experience and can impact a student's learning and performance.

SCPS adheres to the University class attendance policy and excused absences as found in the Academic Standards and Regulations within the Academic Catalog.

Understanding When a Class Begins

All classes start with the start of the 8-week session and not when the first required meeting date is scheduled for the course. Any required meeting a class has, whether it is a synchronous meeting for an online class or an on-campus meeting, will be clearly listed within the SCPS course schedule for the semester.

Non-Participation in Class and Withdrawal

Students must withdraw from a course within LOCUS to be considered withdrawn. Non-participation in a class, without formal withdrawal in LOCUS, does not constitute a withdrawal from a course. Students who do not withdraw from a course in LOCUS will have their grade computed on the basis of the work completed and may receive an 'F' grade.

Paralegal Studies Attendance and Participation Policy

Regular class attendance is required for Paralegal Studies (PLST) classes. Absences in PLST courses are excused only for serious, unavoidable situations, and you are expected to notify the instructor in advance of your absence. Absences from classes rescheduled because of public holidays are not excused, as these dates are provided at the time of registration. If you stop attending a class but do not officially withdraw from it, your grade will be computed on the basis of what work you did complete; you may receive an 'F' if that is the resulting grade.

This accelerated program of paralegal studies requires a heavy commitment of time and energy. We are all balancing personal and professional demands. Our responsibility to you is specifically to prepare you for a paralegal career. When you miss a class, you lose the benefit of our knowledge and experience in the legal workplace, as well as our personal interest in your progress. Your absence may also be unfair to a group project.

In particular, your absence from class generally cannot be excused because of your job responsibilities. You are expected to register for a reasonable course load in light of other demands on your time.

Your success in this program will depend heavily on your attendance and participation in the classroom. The instructor has the discretion to decide whether to accept a late assignment or allow a makeup assignment, and, if so, to impose a deduction in the grade for that assignment. Also, the

value placed on class participation as a component of the final grade in any course is at the discretion of the individual instructor.

Any student who has more than two absences, excused or unexcused, in a single 8-week session course will not be allowed to continue in that course without the Director's permission. The student will receive a final course grade calculated on the basis of zero scores on all subsequent tests and assignments.

The student must petition the Director for this permission in writing within three business days of the third absence. Relevant factors will include the student's performance in the class, the teacher's assessment of the student's ability to master the missed classes and assignments, and the reason for the absences. As noted above, absences from classes rescheduled because of holidays are not excused, as these dates are provided at the time of registration.

If some of the student's absences are excused, the student will have the opportunity to withdraw from the course, as long as the deadline for dropping a course has not yet passed. The student's grade will then be recorded as 'W'. However, the student is still responsible for the course tuition in accordance with the University's official withdrawal schedule.

Please note that teachers may continue to use class attendance as part of the grading criteria. Also, it is at the teacher's discretion to consider absent a student who arrives late to class or leaves early.

If you cannot attend a class, you are expected to make arrangements to obtain notes and assignments from other students, and to submit any assignments due by the appropriate deadline. It is not appropriate to expect your teacher to give you his or her class notes; this would be unfair to the students who attended the class. Nor is it appropriate to ask the teacher to review or summarize the class for you. Of course, you may ask the teacher questions after you have reviewed the material.

Students who miss exams or quizzes in a PLST course must immediately send a message requesting a makeup to both the instructor and the Director. The makeup will be allowed only on agreement of the Director and instructor that a serious, unavoidable situation (such as illness, family emergencies, or religious holidays) caused the absence. The Director and instructor have the discretion to impose a deduction in the grade for that exam or quiz.

The makeup exam or quiz must then be taken as soon as possible, before the next class meeting, and during regular office hours, 8:30 am to 5:00 pm. You will be expected to rearrange your work or personal schedule to accommodate the makeup. To schedule a makeup exam or quiz, please contact the Institute Office, 312-915-6820.

You may be asked to provide documentation of the reason for your absence before you will be allowed to make up any quiz or exam. A request to make up more than one missed quiz or exam within two 8-week sessions generally will not be approved by the Director.

Course Registration

Students register for courses via the University's LOCUS system. Registering for a course is the only way to guarantee a place in a course. Registration after the session start date will incur a late registration fee. SCPS does not operate waitlists for any of its courses.

When registration opens for a semester, SCPS students are advised to enroll in all sessions within that semester. For example, for fall and spring 16-week semesters, students should enroll in both 8-week session I and session II. Students who do not enroll in all available sessions may encounter billing and/or financial aid issues for the semester.

A student must be registered in a course before attending any classes or participating in the course. No student may register for a course after the late registration period.

Late Enrollments

Students may enroll in a course after it has begun only during the add/drop period in Week 1 of each 8-week session during the fall and spring semesters. The add/drop period for summer session courses are shorter, about 1-2 days. Late registration fees apply to enrollment completed during the add/drop period. Students should consult the academic calendar on the SCPS website to learn the dates for add/drop.

Students are strongly discouraged from enrolling after the start of an 8-week session as late enrollment may lead to missed class sessions and assignments. Students are responsible for informing instructors immediately of their late enrollment. Instructors are not required to make accommodations or accept late assignments due to late enrollment. Additionally, students should be aware that it takes up to 24 hours for a student to be uploaded into a course's Sakai site after enrollment in LOCUS.

Double Dipping

Students are permitted to complete multiple programs (i.e. certificates, degrees), even if program requirements overlap. For students completing multiple programs, conferral of your degree or certificate will not be done until program requirements for all programs have been completed. Please understand, while certificate requirements may be completed prior to finishing degree requirements, we cannot confer the certificate earlier in a student's time at Loyola. Conferral for all programs is completed at the same time.

Full-Time Status/Registration Limits

To be considered a full-time student, SCPS students must be enrolled for 12 credit hours per 16-week semester.

Students are not required to meet or maintain full-time status to be in good standing. However, some financial aid (student loans and scholarships), employer tuition reimbursement policies, and other situations may require full-time status in an educational program. It is recommended that students confirm the number of courses they are enrolled in for a given semester with Financial Aid to adjust their budgets accordingly.

SCPS students may register for no more than 9 credit hours in any one 8-week session. Students wanting to take more than the 9 credit hours must receive approval from the Assistant Dean.

Grading and Grading Policies

The University uses letter grades and plus/minus indicators to indicate the quality of a student's achievement in a course. The chart below shows the standardized grading scale used by all SCPS faculty for converting numerical scores into letter grades. No "A+" or "D-" grade is available.

Grade	Grade Points
A	4.0
A-	3.67

B+	3.33
B	3.0
B-	2.67
C+	2.33
C	2.0
C-	1.67
D+	1.33
D	1.0
F	0

Minimum Grade Requirement

Students must earn a C- or higher in all required graduate courses. Any grade less than C- will not satisfy program requirements.

No Record (NR) Grade

The notation "NR" is assigned in LOCUS for any course in which the student is enrolled but has not participated. Criteria for determining participation includes, but is not limited to:

- Physically attending a class where there is an opportunity for direct interaction between the instructor and students.
- Submitting an academic assignment.
- Taking an exam, an interactive tutorial, or computer-assisted instruction.
- Attending a study group that is assigned by the institution.
- Participating in an online discussion about academic matters.
- Initiating contact with a faculty member to ask a question or discuss a matter related to the course.
- For online or blended course, participation and attendance is defined as any class activity, including logging into the course on Sakai and accessing any of the course materials.

Pass/No-Pass Option

The Pass/No Pass option is not available for graduate courses or to SCPS graduate students.

Incomplete (I) Grade

SCPS expects students to complete all coursework by the end of the session or term during which a course is taken. However, if a student and the instructor make arrangements in advance, a student may receive a grade of Incomplete (I) at the end of the session/term. The student is to complete the outstanding work and submit it to the instructor according to a schedule approved by the instructor, subject to the following SCPS policies.

A grade of Incomplete for a course is assigned at the instructor's discretion, when justified by unexpected, disruptive situations or circumstances beyond the student's control. These may include personal illness or injury, a death in the immediate family, a natural disaster, or other such emergency. Documentation may be required, at the instructor's discretion.

Incomplete requests should only be submitted where a student has completed a significant portion of the course, and required coursework, and circumstances prevent the student from finishing remaining requirements by the end of the class. For example, if a student has been actively participating in and keeping up with coursework and they encounter life circumstances within the final few weeks of a course that prevents them from completing successfully, they should contact the instructor to request an incomplete. This request is not meant to be used in those situations where students have been non-participatory throughout the course and need additional time to make up missed assignments from the bulk of the course. In those cases, the student should contact their primary academic advisor to discuss their options.

For any incomplete request, the student must initiate the request by submitting the Incomplete form, found on the Registration and Records website, to the instructor. The instructor will then complete and submit the form according to its instructions and, if approved, enter the grade of Incomplete for the student in LOCUS.

The student must comply with all conditions specified on the form. The latest deadline permitted for submitting the missing work is six weeks after the start of the subsequent semester, but the instructor may specify an earlier due date. If the student does not submit the missing work by the deadline, the instructor enters a grade based on the work completed.

Grading Criteria & Late Assignments

Instructors include an explanation of the grading criteria for each course on the syllabus. Late assignments (if accepted) and exams or quizzes taken late (if permitted) may be marked down, at the instructor's discretion.

Graduation/Commencement

The University awards degrees and certificates four times within each academic year, after every semester: fall semester (December), J-term (January), spring semester (May), and summer semester (August).

Prospective graduates must submit a graduation application in LOCUS. Deadlines for the LOCUS graduate application are as follows:

- Fall graduation: August 1
- Spring graduation: November 1
- Summer graduation: December 1
- J-term graduation: February 1

All financial obligations to the University must be satisfied before the diploma or certificate can be mailed.

Laudatory Status/Honors

No SCPS graduate programs consist of the credit hours required for students to be considered for laudatory status upon graduation. Laudatory status is only available to eligible undergraduate students.

Commencement

The School of Continuing and Professional Studies has a commencement ceremony each year at the end of the spring semester in May on the Lake Shore Campus. Information can be found online at the University's Commencement website: http://www.luc.edu/commencement

The May Commencement ceremony includes graduates from the fall, spring, and summer semesters within that academic year.

Honor Societies

Alpha Sigma Lambda (ASL)

SCPS selects the top 20% of eligible undergraduate degree-seeking students and the top 35% of eligible graduate degree-seeking students.

The minimum cumulative GPA is 3.2 for undergraduates and 3.8 for graduate students, though the actual GPA cutoff may be higher depending on the overall pool of eligible students. Invitations are emailed each October or November, and inductees are honored at the SCPS induction ceremony in December.

Alpha Sigma Nu (ASN)

Alpha Sigma Nu inductees rank in the top 15%, academically, of students in the School of Continuing & Professional Studies. Loyola University Chicago inducts fewer than 5% of its students each year, so it considers Alpha Sigma Nu to be one of the highest honors the University can bestow.

Eligible students are sent an invitation to apply and must meet the following criteria:

- Actively enrolled at time of induction
- Undergraduate students must be juniors or seniors at the time of induction.
- Undergraduate transfers must have completed 1-1/2 semesters at a Jesuit institution.
- Graduate students must have completed 1/2 of their credit requirements at the time of induction.
- Must be in the top 15% of their class
- Demonstrated participation in service activities

SCPS Dean's List

For the fall and spring semesters, students who complete 12 credit hours during the semester and achieved a minimum semester GPA of 3.7 or higher are named to the SCPS Dean's List at the end of the semester.

Leave of Absence

Stop-Out Definition

A stop-out student is a student who has not enrolled for one semester/term or more. Students who do not enroll in a single 8-week session within the semester but enroll in the other 8-week session will not be considered a stop-out student.

Time to Completion Policy

Students have up to three (3) years to complete all program requirements and should consult with their advisor when making any adjustments to their schedule.

Leave of Absence Policy

Given that courses are only offered once an academic year, we recommend that students remain continuously enrolled and complete courses within the time frame set within your initial advising appointment. However, we understand circumstances may require you to step away from classes.

Students who need to stop-out of enrollment for anywhere from one semester up to one year, may request a leave of absence. Students should request a leave of absence before the start of the fall or spring semester, and no later than the start of the 8-week second session for the semester. Students choosing not to enroll in the summer semester do not need to request a leave of absence.

Students must submit the leave of absence form to their primary academic advisor to request a leave.

Returning From Leave/Extending Leave

Students on leave should contact their primary academic advisor when they are prepared to return to classes. Ideally, students should allow at least one month prior to the start of the semester to prepare for a return from leave.

If students need to extend their leave of absence, they should contact their primary academic advisor with this request. Extensions can only be provided to students who have requested a leave of less than one year, or three consecutive semesters.

Discontinuation & Readmission

Students who do not return from a leave of absence or who have exceeded their three (3) year time limit to complete all program requirements will be withdrawn from the university.

Withdrawn students may apply for admission to SCPS if they wish to return to classes. Students will be held to the degree requirements of the catalog year in which they are readmitted.

Applicants for readmission who have been dropped from Loyola for poor scholarship may apply for readmission only after complying with all terms outlined in their dismissal letter.

Applicants for readmission who have been dropped from Loyola for disciplinary reasons must have their applications for readmission reviewed by the Dean of Students Office. If the Dean approves readmission, the application will be reviewed according to the regulations stated above.

Non-Degree Student Status

Non-degree seeking students must submit a 'Non-Degree' application for admission for each semester where they will be taking classes. Students must meet any prerequisite requirements for a course they wish to complete. Non-degree students interested in taking graduate-level classes must provide an official transcript reflecting the completion of a bachelor's degree.

The non-degree-seeking option is for students who wish to sample classes before applying to a degree program, transfer credit to another institution, or obtain professional or personal enrichment.

Non-degree-seeking students may complete a maximum of 9 credit hours (3 courses) of graduate classes total. This is inclusive of all semesters where a non-degree student may request access to enroll. Admission as a non-degree-seeking student does not guarantee admission to a formal program. Should you decide to pursue a degree program, a new application and all supporting materials are required.

Non-degree seeking students are not eligible for Federal Financial Aid or the Returning Ramblers Scholarship.

Non-Traditional Credit

SCPS does not accept non-traditional sources of credit towards graduate program requirements.

Registration Changes and Withdrawals

A grade of "W" indicates official withdrawal from a course during the withdrawal period (see academic calendar on SCPS website for dates). The grade of "W" is not counted in computation of academic standing as either attempted or earned credit hours, nor calculated in the grade point average.

The financial impact of changes after the late/change registration period is determined in accordance with the University's withdrawal schedule, available on the Bursar's website. The website provides the official schedule for each term, but generally, the schedule for fall and spring semester 8-week sessions is as follows:

First week of session - *100% of tuition credit*

Second week of session - *80% of tuition credit*

Third week of session - *40% of tuition credit*

Fourth week of session and after - *0% of tuition credit*

The effective date of withdrawal is determined by the date the course is dropped in LOCUS, not by class attendance. In an online or blended course, participation and attendance are defined as any class activity, including logging into the course on Sakai and accessing any of the course materials. A student who does not officially withdraw from a course will receive a grade based only on the work completed and will remain responsible for all charges for that course.

Students may not withdraw after the withdrawal deadline and, after the deadline date, will be assigned the grade earned based on work completed. For students dealing with extenuating circumstances preventing participation in a course, they may submit an appeal for change in academic record.

Students may work with their primary academic advisor to learn more about the appeal process and find further information in the university's academic catalog under Academic Appeals (https://catalog.luc.edu/academic-standards-regulations/undergraduate/].SCPS). SCPS graduate students follow the standards and practice for appeals as found in the undergraduate catalog.

The Financial Aid Office is required to recalculate financial aid eligibility for students who withdraw from classes before 60% of the course has been completed. This includes a recalculation for withdrawals where the effective date of withdrawal is adjusted after an approved appeal.

Military Service

SCPS follows University policy for active military duty withdrawals and refunds, as outlined in the Graduate and Professional Academic Standards and Regulations page. (p. 1938)

Emergency Withdrawal

SCPS students are expected to follow the University's policies outlined on the Graduate and Professional Academic Standards and Regulations page (p. 1938) of the Academic Catalog.

Withdrawal from the University

SCPS students are expected to follow the University's policies outlined on the Graduate and Professional Academic Standards and Regulations page (p. 1938) of the Academic Catalog.

Repeated Courses

If a student, with the authorization of the SCPS Dean's office and graduate program director, repeats a course, only the most recent grade earned for the course will be used when evaluating whether all degree requirements have been met. In factoring a student's GPA, a repeated course grade does not replace the grade for a previous attempt. The average of all grades from all attempts is used in calculating a student's cumulative GPA.

Residency Requirement

It is expected that all work towards a graduate degree will be completed with academic credit earned at Loyola University Chicago. However, up to six (6) credit hours of graduate work completed at another institution may be applied toward a graduate degree with permission of the SCPS Dean's office.

If transfer credit is approved this does not mean that the credit hours required to earn a degree or certificate may be reduced. A student may be required to take another program course or elective to fulfill the credit hour requirements for a program.

Students may request transfer of credit during their first semester. The SCPS Dean's office maintains responsibility for approving all transfer credit. To ensure that each student is well prepared for undertaking scholarship in the student's current field of study, SCPS's decision regarding transfer credit will be based on the quality of the student's work, the time interval since its completion and its relevance to the student's program of study at Loyola. Coursework below a B grade will not be accepted. Students may not be able to transfer coursework that has been awarded as part of a conferred or completed graduate degree program.

For certificates consisting of 18 credit hours or more, up to six (6) credits may be accepted in transfer, and all other required credits must be earned at Loyola. For certificates consisting of fewer than 18 credit hours, transfer credit will not be accepted, and all courses must be completed entirely with Loyola academic credit.

Students completing a certificate first can apply these courses toward the completion of a degree in the same area, where program requirements overlap. The time interval since completion of a certificate to application for a degree in the same area must be less than five (5) years.

Transfer Credit

It is expected that all work towards a graduate degree will be completed with academic credit earned at Loyola University Chicago. However, up to six (6) credit hours of graduate work completed at another institution may be applied toward a graduate degree with permission of the SCPS Dean's office.

Students may request transfer of credit during their first semester. The SCPS Dean's office maintains responsibility for approving all transfer credit. To ensure that each student is well prepared for undertaking scholarship in the student's current field of study, SCPS's decision regarding transfer credit will be based on the quality of the student's work, the time interval since its completion and its relevance to the student's program of study at Loyola. Coursework below a B grade will not be accepted. Students may not be able to transfer coursework that has been awarded as part of a conferred or completed graduate degree program.

For certificates consisting of 18 credit hours or more, up to six (6) credits may be accepted in transfer, and all other required credits must be earned at Loyola. For certificates consisting of fewer than 18 credit hours, transfer credit will not be accepted, and all courses must be completed entirely with Loyola academic credit.

If transfer credit is approved this does not mean that the credit hours required to earn a degree or certificate may be reduced. A student may be required to take another program course or elective to fulfill the credit hour requirements for a program.

Students completing a certificate first can apply these courses toward the completion of a degree in the same area, where program requirements overlap. The time interval since completion of a certificate to application for a degree in the same area must be less than five (5) years.

School of Education

Graduate School of Education M.ED., ED.S. and ED.D. Academic Policies

For M.A. and Ph.D. policies, click here (p. 2029).

Academic Advising

A member of the faculty will be assigned as academic advisor to each student accepted for a graduate degree. Students may retain the same faculty advisor throughout their programs or they may select a different faculty member to serve as their dissertation director. Students are expected to confer with their advisors as often as may be necessary. It is the student's responsibility to seek conferences with the advisors, to secure supervision of the dissertation, and to keep the dissertation director informed of progress in the research and writing. It is important that students confer with their advisors prior to initial registration. Most programs in the School of Education also provide email groups and electronic advisory newsletters. Each student is responsible for participation in those services provided within his or her program.

Academic Grievance Procedures [1]

In instances where a student has concerns about an academic process, students are strongly encouraged to meet and hold informal discussions with the faculty member; such discussions can be effective in resolving problems encountered in the academic process. If the discussion between the student and faculty member does not resolve the problem(s), the faculty member(s) and student should (a) document measures proposed and/or taken to attempt to resolve the problem, and (b) contact the corresponding program chair to initiate the Informal Process. In cases where a faculty member has concerns regarding the performance of dispositions of students, program-specific procedures regarding academic review or dispositions should be followed.

Informal Process

The Informal Process is initiated in the event the above referenced documented meeting between the student and faculty member does not resolve the problem. To begin the process, the corresponding program chair should initiate a meeting with all involved parties to review the program's policies regarding the issue in dispute. At this meeting, attempts to resolve the problem at the program level are documented using the Informal Process Form (https://sakai.luc.edu/access/lessonbuilder/item/30161575/group/093bb87f-8722-45ea-897f-6e3379935dab/Concerns%20and%20Grievances/Grievance%20_Informal-process-form.docx). In the event of a grievance, this form will be submitted to the School of Education Grievance Committee to document attempts to resolve the issue at the program level.

Formal Process

In cases where direct discussions and Informal Process have failed to resolve the problem(s) from the student's perspective, he or she may file a formal grievance using of the School of Education's Grievance Procedure.1 The following procedure governs specifically academic matters such as ethical questions as well as those of scholarly competence. Thus, controversies arising from charges of, e.g., cheating in examinations, falsification of research data, plagiarism, evaluation of students, failure of the institution to recommend certification, and dismissal from programs are included within the meaning of "academic matters" that are "grievable" under these procedures.

With regard to the evaluation of students, the academic grievance procedures apply only to those cases in which the evaluation of the student is alleged to be capricious, in significant violation of clearly established written school policies, a result of improper procedures, or improperly discriminatory. An evaluation of a student is capricious if the evaluation is:

1. based partially or entirely on criteria other than the student's performance;
2. based on standards different from those standards of evaluation applied to other students; or
3. based on a substantial departure from announced standards of evaluation.

In cases other than those noted above, an evaluation of a student is not a basis for an academic grievance. In the event a student is disputing the application of a policy or decision as improper, the student must cite the specific criteria upon which he or she believes the decision properly should have been based.[2]

Steps in Filing a Grievance Petition with the Associate Dean of Academic Services

1. If the student is unable to achieve a satisfactory solution to the problem at the informal level and wishes to formally grieve the matter, the student must submit a written request within 30 days of the documented program meeting by filing a Statement of Grievance Form (https://sakai.luc.edu/access/lessonbuilder/item/30161576/group/093bb87f-8722-45ea-897f-6e3379935dab/Concerns%20and%20Grievances/Grievance-Formal-Form.docx), with the Associate Dean of Student Academic Services (ADSAS.) The request for a hearing must specify the nature of the dispute and include the student's copies of the documented attempts to resolve the matter (including the Informal Process Form) Specifically, a student who believes that he or she has valid grounds for a grievance under these procedures should submit a written and signed statement of grievance (Statement of Grievance Form), setting forth the specific allegations, including time line of events with dates, persons involved and outcome, relevant university policies, and desired outcome of the grievance. If any other University personnel are involved, the student will include the role of these parties in the student's grievance, unless such disclosure would violate the student's right to confidentiality. Should the student need assistance in putting the grievance into an appropriate format, the student may seek the assistance of the ADSAS, who will provide assistance regarding format and procedures, but who may not comment substantively on the merits of the grievance.

2. The ADSAS will refer the dispute to the School of Education Grievance Committee (SEGC), which is a standing committee of the Academic Council and consists of three faculty members from the School of Education, other than the ADSAS. If any of the three faculty members comprising the committee are involved in the dispute, replacement committee members will be appointed from the School of Education at the recommendation of the Dean.
3. The Chairperson of the Grievance Committee will establish a time and date for the hearing and notify the student and faculty involved, along with the other members of the Committee.
4. An effort will be made to schedule the hearing within 30 days of the receipt by the SEGC Chairperson of the materials filed by the student in support of the formal grievance.
5. The SEGC may request information from other sources as needed.
6. Upon receipt of the formal grievance, the Chairperson of the SEGC shall give those faculty member(s) relevant to the grievance and the program director a copy of the student's grievance documents.

Conduct of the Hearing

The hearing will be private and all persons present at the hearing will consider and treat all information presented to be confidential. If, however, the student disseminates information disclosed during the hearing, the student's interest in the confidentiality of the hearing will be deemed waived. Both the student and the faculty member involved may request assistance in presenting their case at the hearing by any person other than an attorney. The student and faculty member(s) must inform the Chairperson of the SEGC of the name(s) of their representative and any witnesses five working days before the hearing date. Prior to the hearing, copies of all written information to be considered by the SEGC shall be provided to all parties and will include:

- An explanation of committee procedure;
- An exchange of all documentation developed prior to the hearing that was not previously released and a list of student and faculty representatives (if any) and the names of witnesses for both the student and faculty member(s);
- Any University rules and policies relevant to the content of the grievance

At the hearing, the SEGC shall provide all parties the opportunity to present written and oral information relevant to the grievance. Individuals appearing before the committee have the responsibility of presenting truthful information. The committee in reaching its decision will evaluate the credibility of the witnesses. Presentation of evidence will be made only during the hearing. Any party may present witnesses or other evidence. The conduct of the hearing is informal, and the committee is not bound by rules of evidence or court procedures. Matters of procedure will be decided by the Chairperson of the SEGC. All decisions of the committee will be determined by a majority vote of the SEGC members present. The student and faculty member(s) will be informed in writing of the Committee's decision within two weeks of the hearing.

A copy of the decision will be forwarded to the Dean of the School of Education who then will subsequently inform the Chairperson of the SEGC and the relevant Program chair(s) of his or her disposition of the decision.

GROUP ACTIONS

Two or more students with substantially the same grievance may join in a group action. A single statement of grievance shall be submitted and processed in the manner described herein for individual grievances, but all those joining in such a group action must sign the statement.

APPEAL PROCESS

The student may appeal the decision of the SEGC in writing to the Dean of the School of Education within 30 days of receiving the SEGC's decision. The appeal should clearly indicate the alleged errors that occurred in the SEGC hearing. The Dean may approve, modify, or reverse the decision of the SEGC and will notify the student, the faculty members(s), the Chairperson of the SEGC, and the relevant Program chair(s) of her/his decision within two weeks of receiving the appeal, if practicable. The decision of the Dean is final in all cases.

WITHDRAWAL OF GRIEVANCE

A grievant may withdraw his or her grievance from further consideration at any time by submitting a written request to the ADSAS who will inform the Chairperson of the SEGC. No reason needs to be given for such a request to withdraw.

[1] These procedures are intended for use in the management of controversies in academic matters involving students in the School of Education, i.e. those in undergraduate Education minors and B.S.Ed. programs, M.Ed., Ed.S., and Ed.D. programs. Students in Ph.D. or M.A. programs should consult the grievance procedure in use at The Graduate School (p. 2029).

[2] Controversies arising from clearly non-academic matters fall within the jurisdiction of the Division of Student Affairs. Such cases may include: allegations of discriminatory treatment arising from the student complainant's age, race, gender, sexual orientation, disability, national origin, or religion. In cases in which jurisdiction is unclear or mixed, the Dean of the School of Education, in consultation with the Vice President for Student Affairs, will determine the correct jurisdiction.

Academic Integrity

In general, a violation of academic integrity occurs when the nature or source of academic work is misrepresented. This occurs in incidents such as, but not limited to, claiming work as one's own when it is not (e.g., plagiarism and cheating on tests) and/or falsifying data. It's the responsibility of the student to review the full policy (p. 1919).

Academic Standing

Good Standing

A degree-seeking student is in good academic standing if he or she:

1. meets the standards of quality of his or her academic program and the School of Education;
2. makes satisfactory progress toward completion of degree requirements within the established time limit;
3. fulfills the School of Education's requirement regarding continuous registration; and
4. fulfills the School of Education's requirement regarding grade-point average.

Students who are not in good academic standing are not eligible to receive a degree and may not hold a merit award.

Continuous Enrollment

Students are to maintain the status of continuous enrollment during their program of studies. This means that during each semester of each academic year (excluding Summer Sessions), each student must enroll in a least one course. Once a student has completed all coursework and is still considered a degree-seeking student in good standing in a graduate

program, he/she must continue to maintain his/her registration during the regular academic year until all degree requirements are completed. In most instances, this will be accomplished by enrolling in an appropriate internship, practicum course or dissertation supervision. Registration must be completed on the dates listed in the academic calendar and class schedules for each semester.

Students who do not meet the requirement of continuous registration are considered inactive and not in good academic standing.

To request reinstatement to active status:

1. One to two semesters: email the Associate Dean of Student Academic Services to request re-activation. If enrollment for dissertation supervision was appropriate, back registration must also occur for the terms missed.
2. One to five years: complete a reapplication (https://sakai.luc.edu/access/lessonbuilder/item/30614907/group/093bb87f-8722-45ea-897f-6e3379935dab/Student%20Forms/Re-Application_Form.pdf) and a statement justifying request for readmission (for students at the dissertation level, back registration must also occur for the terms missed).
3. Beyond the time limit for degree completion: Full application and a statement justifying request for readmission. Students are reviewed for admission following the standard admission process.
4. If permitted to resume studies, the student must meet the program requirements in effect at the time of readmission. This may include new requirements for the degree, prerequisites, and/or state licensure requirements.

Reinstatements are not automatic, and students whose requests are denied will not be permitted to continue in their programs. Repeated failure to maintain continuous registration is, itself, grounds for denying a request for reinstatement.

Grade Point Average

Graduate students are expected to maintain an average of "B" or better. Not more than two grades of "C" may be counted for a degree. Some programs require students to repeat particular key courses if they receive grades of C in such courses. No grades of "D" or "F" may be counted as fulfilling degree requirements (such grades, however, will be calculated into the grade point average). No student will be graduated with less than a 3.0 average for all graduate and undergraduate courses taken as part of the degree program.

All students are subject to annual review of progress. Students who earn more than two grades of "C" or show other aspects of insufficient progress may be subject to withdrawal from the program. Students who fail to maintain at least a 3.0 GPA will be placed on academic probation. If the GPA is not raised to a 3.0 during the next two consecutive terms in which the student registers, the student will be dismissed for poor scholarship. If a student is dropped from degree candidacy, he or she may be readmitted only under exceptional circumstances.

Dismissal from the Graduate School of Education

1. *Failure to maintain a cumulative grade point average of 3.0 or better*. Students whose cumulative grade point average falls below 3.0 are considered to be on academic probation. Students may continue on academic probation for no more than two semesters, in which enrolled (the summer sessions are considered in this instance as a single semester); failure to raise, within that period of time, the cumulative grade point average to 3.0 or better results in dismissal from graduate study. *Academic Dishonesty*. In general, academic dishonesty occurs when the nature or source of academic work is misrepresented. This occurs in incidents such as, but not limited to, claiming work as one's own when it is not (e.g., plagiarism and cheating on tests) and/or falsifying data. For incidents of academic dishonesty occurring in a course, the professor may assign a grade of "F"; the standard grievance procedures are (see Academic Grievance Procedure (p. 1919)) available to students in these instances.
2. *Failure to pass the required comprehensive examinations*. Students pursuing the M.Ed. will, as a matter of course, be allowed two attempts at passing the comprehensive examination. If they fail the second examination, a third examination will be permitted only after completion of four additional courses. Failure to pass the examination after three attempts will result in no M.Ed. degree being conferred. Students pursuing the Ed.D. will be allowed a second attempt at the examination only if the student's advisor and program chair so recommend.
3. *Failure to successfully sustain annual progress evaluations*. The performance of each student is reviewed annually by his or her program faculty. Students may be terminated from their programs if found substantially deficient in their knowledge, skills, or dispositions for the field. If a student is dropped from degree candidacy, he or she may be readmitted only under exceptional circumstances.
4. Failure to pass 610 – Doctoral Studies. a) If a candidate receives a NP in two consecutive semesters, the Graduate Program Chair will recommend to the Associate Dean of Academic Affairs that the student be dismissed from the program; b) If a candidate receives three NPs during their enrollment in 610 and 600, the Graduate Program Chair will recommend to the Associate Dean of Academic Affairs that the student be dismissed from the program.
5. *Failure to pass 600 – Dissertation Supervision*. a) Candidates are expected to make adequate progress each semester. If a candidate receives two consecutive NPs, the Graduate Program Chair will recommend to the Associate Dean of Academic Affairs that the student be dismissed from the program; b) If a candidate receives three NPs during their enrollment in 610 and 600, the Graduate Program Chair will recommend to the Associate Dean of Academic Affairs that the student be dismissed from the program.
6. Students dismissed for any of the above reasons may appeal, in writing, to the Dean of the School of Education, within two weeks (14 calendar days) of the date of letter/email notification of academic dismissal. The Dean of the School of Education will review the matters pertinent to this appeal and will provide a written decision of the candidate within 30 calendar days of the receipt of the written student request for an appeal. The decision by the Dean of the School of Education is considered final.

Accessibility

Students who have disabilities which they believe entitle them to accommodations under the Americans with Disabilities Act should register with the Services for Students with Disabilities (SSWD) office. To request accommodations, students must schedule an appointment with an SSWD coordinator. Students should contact SSWD at least four weeks before their first semester or term at Loyola. Returning students should schedule an appointment within the first two weeks of the semester or term. The University policy on accommodations and participation in courses is available at: http://www.luc.edu/sswd/.

Attendance

All graduate students are expected to attend classes and laboratories regularly. Specific regulations are subject to program decision. Certain

programs also require attendance at professional seminars and special program meetings. Consult each program for information.

Communication from Academic Deans

Official notices are presented to students through the deans' office, Loyola emails, and LOYOLA FOCUS for Graduate Students. Students are individually responsible for this information and should check their e-mail regularly. For reasons of confidentiality, as well as efficiency, communications to students will be sent to students' Loyola email accounts and not to any other email address. Students are responsible for checking this account and/or setting up a forwarding system. The Dean's Office may refuse to provide confidential information using a non-Loyola email account.

Comprehensive Assessments

Most programs require the completion of written and/or oral examinations, portfolios or final projects to assess the student's knowledge of the field and at the doctoral level to determine competency to undertake independent research. The comprehensive assessment, if required, is to be completed successfully before the student prepares a dissertation proposal for review by her or his committee.

Failure to pass the required comprehensive assessment

Students pursuing the M.Ed. will, as a matter of course, be allowed two attempts at passing the comprehensive assessment. If they fail the second assessment, a third attempt will be permitted only after completion of four additional courses. Failure to pass the assessment after three attempts will result in no M.Ed. degree being conferred. Students pursuing the Ed.D will be allowed a second attempt at the major assessment only if the student's advisor and program chair so recommend. Students who are dismissed for failing the major assessment twice may appeal in writing to the dean of the School of Education whose judgment is final.

Course Unit

Unless otherwise specified, graduate courses normally provide three semester hours of credit. Each semester hour implies a lecture period of at least fifty minutes or a laboratory period of at least one hundred minutes a week.

Degree Conferral (Graduation)

While the commencement ceremony is every May, degrees can be conferred May, August, and December. Students must apply for graduation/degree conferral. Students should apply for graduation in the semester they anticipate completing all degree requirements. Failure to meet application deadlines may result in a delay of the conferral of the degree to the following semester.

Applications for Degree (https://www.luc.edu/education/) Conferral are due:

- December Degree Conferral – August 1
- May Degree Conferral – December 1
- August Degree Conferral – February 1

Dissertation

It is the student's responsibility to become familiar and adhere to the dissertation policies and procedures (https://sakai.luc.edu/access/lessonbuilder/item/30614881/group/093bb87f-8722-45ea-897f-6e3379935dab/Student%20Forms/FINAL%20Directions%20for%20Student-Managed%20Submission%20of%20EdD%20Dissertation_Redacted.pdf) found on the SOE Student Community Site under "Forms". The student-managed submission of dissertations gives the student control over the process of preparing and submitting the dissertation. The process contains four parts. Please read the directions carefully. Do not submit the material for any part listed in the directions until it is accurate and complete; if the material is inaccurate or incomplete, the School of Education will not accept it.

Doctoral Candidacy

The requirements for doctoral candidacy are:

1. successful completion of all specifically required coursework;
2. successful completion of all comprehensive examinations;
3. approval of the dissertation proposal by the approved dissertation committee and the Institutional Review Board (IRB).

Electronic Communication Policies

The School of Education faculty, students and staff respect each other's rights, privacy and access to electronic resources, services, and communications while in the pursuit of academic and professional growth, networking and research. All members of the university community are expected to demonstrate the highest standards of integrity, communication, and responsibility while accessing and utilizing technology, information resources, and computing facilities.

- In-Person and Cyberbullying Policy (https://www.luc.edu/osccr/communitystandards/physicaloremotionalharm/)
- University Policies for Information Technology Services (https://www.luc.edu/its/aboutus/itspoliciesguidelines/)

Enrollment Status

Fall and Spring Semesters

Students are considered full time if they are either:

1. enrolled in at least eight credit hours of coursework;
2. enrolled in Dissertation Supervision (#600), Doctoral Study (#610), or a full-time clerkship, internship or practicum course; or
3. enrolled in and hold a full graduate assistantship or fellowship.

Students are considered half-time if they are enrolled in at least four but less than eight credit hours of coursework.

Summer Sessions

Students are considered full-time if they are either:

1. enrolled in at least six credit hours of coursework;
2. a full-time clerkship, internship or practicum course; or
3. enrolled in and hold a full graduate assistantship or fellowship.

Students are considered half-time students if they are enrolled in at least three but less than six credit hours of coursework.

Full and Part-Time Status (as defined above)

Full- and part-time status is reported to loan companies and to the U.S. government, including the INS. Full- and part- time status are not necessarily related to eligibility for health insurance, or to Loyola's fees.

Number of Courses Allowed

Typically, full-time graduate students take a maximum of nine semester hours in each regular semester session, and six semester hours in the summer sessions. Specific programs may exceed the maximum hours.

Grades

The grades in the School of Education are as follows unless otherwise indicated in a course syllabus:

Grade	Grade Points
A	4.00
A-	3.67
B+	3.33
B	3.00
B-	2.67
C+	2.33
C	2.00
C-	1.67
D+	1.33
D	1.00
F	0.0
I	Incomplete
W	Withdrawal
P/NP	Pass/No Pass
CR	Credit
AU	Audit
NR	No Credit

The notation of NR is assigned in instances where the student is registered at Loyola by never attended the course in question and never complete any work for the course.

Incomplete Grades

Students enrolled in courses offered by the School of Education are to complete all coursework by the end of the term in which the course is offered. However, if a student and the instructor make arrangements in advance, a student may receive a grade of I (Incomplete) at the end of the term. The student is to complete the outstanding work and submit it to the instructor according to a schedule approved by the instructor.

For Incompletes assigned in Fall 2014 and later, the student must complete and submit all outstanding work to the instructor by the last day of the semester following the term in which the I grade was assigned (For purposes of incomplete grades, the summer sessions are counted together as one term). If the student does not turn in the work by the deadline, the Incomplete grade will automatically become an F. The instructor will not approve a change of grade if the student does not complete and submit the work to the instructor within one term of the assignment of an incomplete grade. The student must submit the Graduate Student Request for an Incomplete form to the instructor of the class before the last day of the term for consideration and possible approval.

Withdrawal from Courses

Students may withdraw from courses on LOCUS with the grade of “W” until the University posted deadline (https://www.luc.edu/academics/schedules/). Students who withdraw after the deadline are assigned the grade of “WF”.

Pass/No Pass

Used for Doctoral Study (610), Dissertation Supervision (600), and those courses for which no semester hours ordinarily are awarded. The grade Pass (P) may be assigned for these courses. In cases where, in the judgment of the adviser, substantial progress has not been made, a grade of No Pass (NP) may be assigned.

Audit

Arrangements to audit a course must be made during registration periods. Tuition is charged for audited classes. Class attendance is required; if a student does not attend class, a final grade of "W" will be recorded. Assignments, including examinations and term papers, are not required, but the student has a right to participate in class discussions. Because a course which is audited does not count as hours attempted, it is not considered in determining a student's academic full-time or part-time status; however, tuition is charged at the full rate. After late and change of registration, students must have the course instructor's approval to convert a course from “credit” to “audit.” After midterm, the student must have the approval of the dean as well as the instructor to convert a course from "credit" to "audit." Prior to the term starting, students must submit a “Request to Audit a Class (https://www.luc.edu/media/lucedu/gradschool/pdfs/Audit%20Request%20Updated.pdf)”.

Graduate Credit

Graduate students may receive credit from:

1. Courses numbered 400-600.
2. Certain courses in the 300 group. Program approval is required for the inclusion of such courses in the graduate program. No more than three such courses will ordinarily be accepted for the master’s degree, no more than six for the doctoral degree, but programs may accept fewer. Students may not apply the same course to fulfill requirements for both undergraduate and graduate degrees, or for both professional and graduate degrees, or for two undergraduate or graduate degrees. However, transfer credit may be recommended by the appropriate program, subject to the approval of the Associate Dean of Student Academic Services.

Harassment (Bias Reporting)

It is unacceptable and a violation of university policy to harass, discriminate against or abuse any person because of his or her race, color, national origin, gender, sexual orientation, disability, religion, age or any other characteristic protected by applicable law. Such behavior threatens to destroy the environment of tolerance and mutual respect that must prevail for this university to fulfill its educational and health care mission. For this reason, every incident of harassment, discrimination or abuse undermines the aspirations and attacks the ideals of our community. The university qualifies these incidents as incidents of bias.

In order to uphold our mission of being Chicago's Jesuit Catholic University - a diverse community seeking God in all things and working to expand knowledge in the service of humanity through learning, justice and faith, any incident(s) of bias must be reported and appropriately addressed. Therefore, the Bias Response (BR) Team was created to assist members of the Loyola University Chicago community in bringing incidents of bias to the attention of the university. If you believe you are subject to such bias, you should notify the Bias Response Team at this link (https://cm.maxient.com/reportingform.php?LoyolaUnivChicago&layout_id=9).

Responsible Conduct in Research & Scholarship

For more information on Responsible Conduct in Research & Scholarship visit their website (https://www.luc.edu/ors/RCRHome.shtml/).

Time-Limit for Degree Completion

M.Ed. students must complete their program within five years. The period may be extended by special permission of the Associate Dean of Student Academic Services. Students should ask their advisor to submit the form for extension of time (https://sakai.luc.edu/access/lessonbuilder/item/30614908/group/093bb87f-8722-45ea-897f-6e3379935dab/Student%20Forms/Request%20for%20Extension%20of%20Time%20to%20Complete%20Degree%20Requirements%20-%20NEW.pdf).

Ed.D. students have a maximum of seven years to complete the degree. Each program area specifies ways in which residency requirements are satisfied. If students are unable to work on the degree for a period of more than one semester, they should request an official leave from the program. Furthermore, if students need more time to complete the degree, they must file an extension of time. Upon recommendation of the program chair, the Associate Dean of Student Academic Services will grant a leave of absence or extension of program time. However, more than one extension of program time will be granted only under extraordinary circumstance.

Extension of Time

An extension of time (https://sakai.luc.edu/access/lessonbuilder/item/30614908/group/093bb87f-8722-45ea-897f-6e3379935dab/Student%20Forms/Request%20for%20Extension%20of%20Time%20to%20Complete%20Degree%20Requirements%20-%20NEW.pdf) to complete the degree requires approval of the Program Chair, Dissertation Director (if appropriate) and the Associate Dean for Student Academic Services. Time extensions are typically restricted to one year.

Leave of Absence

Official leaves of absence are intended for students who wish to discontinue temporarily their graduate studies due to special circumstances (e.g., medical, personal, or professional reasons). A leave of absence postpones all deadlines concerning completion of degree requirements for the duration of the leave of absence. A student requesting a leave of absence is to complete a Leave of Absence form (https://sakai.luc.edu/access/lessonbuilder/item/30614906/group/093bb87f-8722-45ea-897f-6e3379935dab/Student%20Forms/Leave%20of%20Absence%20Form%20-%20NEW.pdf) and contact the program's graduate program chair.

Transcripts and Records

Students request official transcripts (https://transcriptrequest.luc.edu/alumni/pages/jsp/) of records through the Office of Registration and Records (https://www.luc.edu/regrec/). Transcripts will be issued only after the student has met all financial obligations to the university. Transcripts will include the record of work completed at Loyola University only and the amount of advanced standing, if any, allowed toward the graduate degree from institutions previously attended.

The Office of Registration and Records also handles verification of directory information including dates of attendance, attendance full-time or part-time, degree earned, the date a degree was conferred and major field of study. It is your right to deem this information strictly confidential. If you do not want the information released, notify the Office of Registration and Records. Students may use LOCUS, the online service of the Office of Registration and Records to:

- Add and drop classes
- Get information about classes
- See or print your class schedule
- Get your grades
- Confirm or change your permanent or local addresses
- Check out your financial aid award package(s)
- View or print your (unofficial) transcript
- Access your account balance

The School of Education respects the confidentiality of student records and adheres to the provisions of the Family Educational Rights and Privacy Act of 1974. See the office of the School of Education dean for details concerning access to student records.

University Code of Conduct

All members of Loyola University Chicago are expected to uphold Community Standards (https://www.luc.edu/osccr/communitystandards/) (LUC's Student Code of Conduct). Students are expected to abide by all university policies which include, but are not limited to, the policies outlined in the Community Standards. This document provides a baseline for acceptable student conduct.

Rights Reserved: Loyola University Chicago reserves the right to change the policies and procedures announced in this document, and to change the schedules, fees charged, and regulations affecting students. It the responsibility of each student to acquire an active knowledge of all policies and procedures set forth in this document.

Withdrawal from the University

An enrolled student who wishes to withdraw from the university during any semester must notify his or her graduate program chair in writing (email is sufficient). A student is considered to be in attendance until such notice has been received by the Program Chair. Financial obligations regarding withdrawals are based on university policies (https://www.luc.edu/bursar/additionaldetailsregardingwithdrawalpolicies/).

A student may be required to withdraw from the university because of academic deficiency, lack of sufficient progress toward completion of degree requirements, failure to adhere to university requirements, degree requirements and/or regulations for conduct or failure to meet financial obligations to the university.

School of Environmental Sustainability

SES Graduate Academic Policies

Academic Advising

Each active graduate student is to have an academic advisor throughout the period of graduate study. The Associate Dean of Graduate Studies serves as the primary academic advisor for all SES MSESS Professional Track and Graduate Certificate students and as the primary administrative advisor for SES MSESS Research Track students. Faculty Thesis Advisors serve as the primary academic advisor to their individual Research MSESS students. The Graduate Program Director (GPD) serves all of the MSESS Research Track students administratively in thesis documentation, preparation, and defense. See Appendix A: "Instructions for Registration, Thesis Preparation, Thesis Defense, and Graduation" for details.

The relationship between advisor and advisee is reciprocal and requires mutual effort in the planning and execution of all aspects of the student's progress. The faculty academic advisor, as a mentor, is to be diligent in providing guidance by being available for regular consultation and by working with the student in scheduling regular meetings of the thesis/

dissertation committee should this type of written work be required for the degree.

The student is responsible for actively seeking the guidance of the faculty advisor and, when appropriate, the thesis/dissertation committee members, for all matters pertaining to the student's progression through the program including degree completion.

Academic Grievance

The University's commitment to the care of the individual person is the foundation for a grievance process that affords students the opportunity to have a review of circumstances that impact their academic standing or progress at the University. Students, faculty, staff, and administrators are encouraged to attempt to informally resolve problems arising from academic matters. Open communication between all parties and mutual respect can lead to the resolution of a number of conflicts. When informal attempts at resolution fail, the management of academic grievances involving SES Graduate students is to proceed according to the formal procedures set forth below. All students have the right to be treated with dignity and respect throughout any interaction with the academic appeal process.

Jurisdiction

A graduate students faculty, staff, or administrator may invoke these procedures when academic grievances arise. Academic grievances include dismissal from a program as well as those that arise from matters involving scholarly competence and ethical scholarly behavior. Issues regarding evaluation of students, cheating on examinations, falsification or misrepresentation of research data and plagiarism are included within the meaning of "academic."

Allegations of misconduct in the design, conduct or reporting of research supported by federal funds shall be overseen through the procedures described in the university's policy (https://www.luc.edu/ors/misconductscholar.shtml/) concerning misconduct in scholarship published by the Office of Research Services.

Problems arising from non-academic matters fall within the jurisdiction of the university's Office of Student Conduct & Conflict Resolution. In cases in which the jurisdiction is unclear or mixed, the Dean of SES and the vice president for student development will determine the appropriate jurisdiction.

The academic grievance procedure based on evaluation of students applies only to those cases in which the evaluation of the student is alleged to be arbitrary and capricious, in significant violation of clearly established written school policies, or a result of improper procedures. An evaluation of a student is capricious if the evaluation is: 1) based partially or entirely on criteria other than the student's performance; 2) based on standards different from those standards of evaluation applied to other students; or 3) based on a substantial departure from announced standards of evaluation. In cases other than those noted above, an evaluation of a graduate student is not a basis for an academic grievance.

A graduate student believing they have a basis for an academic grievance, must provide notification to the SES Associate Dean of Academics via Loyola email, describing the nature and basis of the grievance and the requested relief, no less than 30 days after the student becomes aware, or with reasonable due diligence, should have become aware of the grievance. Within 10 business days of notification, the Associate Dean of Academics will determine and notify the grievant whether or not there exists a basis for academic grievance. If a basis is found, the Associate Dean of Academics shall do one of the following:

- Grant the requested relief.
- Grant a modified relief.
- Recommend the matter for hearing.

If the Associate Dean for Academics finds no basis for the grievance or the student disagrees with modified relief offered, the student may make a written request for a hearing. The request must be made via Loyola e-mail to the Associate Dean for Academics no less than 14 days from the date of the notification of the determination of a basis for the grievance.

Hearing

The purpose of the hearing is to ensure that all parties have full opportunity to present their views to the hearing board and to allow the hearing board to fairly and fully arbitrate the issue before it. The Dean of SES shall appoint a Hearing Chair and Board consisting of at least three faculty or staff with relevant subject matter knowledge of the issue area and with no specific conflicts. All matters of procedure are to be decided by the chairperson of the hearing board in accordance with the following guidelines.

The chairperson of the hearing board is to set the date, time, and location of the hearing. The hearing is to take place within 30 days of the request for a hearing, if practicable. All involved parties are to receive a timely written notice of the hearing and the matters to be considered. All supporting documentation relating to the matter is to be submitted to the Associate Dean for Academics at least three weeks prior to the hearing. The Associate Dean will distribute it in a timely manner to all involved parties prior to the hearing.

The hearing and material submitted to the hearing board are private and all parties involved in the grievance are to consider their contents confidential. However, if a party disseminates their own material, the party's interest in confidentiality is deemed waived. Electronic recording of the hearing is prohibited.

A party may obtain the assistance of members of the university community in preparing written documentation or in presenting information to the hearing board and may be accompanied in the hearing by one such assistant as an advisor. The role of an advisor is to provide a comforting presence for the parties. An advisor may only speak to their advisee. An advisor may not ask questions, interject, advocate for, or otherwise speak on behalf of the advisee. Even if an advisor is an attorney, the advisor may not function as legal counsel or “represent” an advisee during the hearing process. Individuals from outside the university, including attorneys, are not permitted to serve as advisors. The party must notify the chairperson of the hearing board of the names of the assistants at least one day prior to the hearing.

Each party may present information, both orally and in writing, to the hearing board. All parties are to be available throughout the hearing. Two formats for the hearing exist and are determined by the chairperson of the hearing board: all parties are present together during the hearing or the parties are heard separately at the hearing. Each party may call witnesses at the hearing during their initial statement period. Witnesses may only be present at the hearing during the time of their statements.

Unless the Chair determines modifications are necessary, the hearing shall follow the below process:

1. Introduction: Panel introduction and instructions from the Panel Chair

2. Grievant Case: The Grievant will have up to 30 minutes to state their case and answer questions of the Board.
3. Response: The Challenged party will have up to 30 minutes to state their case and answer questions of the Board.
4. Grievant Reply: Grievant will have up to 10 minutes to reply and answer questions of the Board.
5. The Board deliberates in private to make a final recommendation on the dispute.

In reaching its decision, the board will examine all documents and other exhibits and consider fully statements of all parties and witnesses. All decisions of the board must be determined by a majority vote of the board members. The standard of evidence required for a determination and evaluation is a "preponderance of the evidence." This means the Board must determine that it is *more likely than not* that the academic evaluation was arbitrary and capricious based on the totality of available evidence. The Board must render a final decision by the end of the hearing process.

The Associate Dean for Academics will notify the parties in writing of the board's decision within two weeks of the hearing.

Appeal

A party may appeal the decision of the hearing board to the Dean of SES. The party is to request an appeal in writing within 30 days of notification of the hearing board's decision. The request must include an explanation of the basis for the appeal. The Dean will notify all parties of the request for an appeal and will provide an opportunity for a response. The Dean will obtain from the parties and the hearing board information necessary to consider fully the parties' views and the hearing board's decision.

The Dean may affirm, modify, or reverse the hearing board's decision. The Dean will notify the parties of the disposition of the appeal within 30 days of receiving the appeal, if practicable. The Dean's decision is final in all cases (including dismissal from an SES Graduate program), except those involving possible expulsion from the university; the penalty of expulsion may be imposed only by the university's provost.

Academic Integrity

Students are personally responsible to act with academic integrity at all times and act in accordance with Loyola University Chicago general academic rules and regulations. Academic honesty is an expression of an ethic of interpersonal justice, responsibility, and care, applicable to Loyola University Chicago faculty, students, and staff, which demands that the pursuit of knowledge in the university community be conducted with integrity.

Academic dishonesty is characterized by the failure to apply this ethic, i.e., any action whereby faculty, student or staff misrepresents the ownership of academic work submitted in her or his name. A student's failure to practice academic honesty, depending upon the seriousness of the misconduct, will result in a sanction ranging from the grade of F for the assignment to expulsion from the university.

Boundaries of Academic Honesty and Dishonesty

The following sections discuss specific expressions of academic honesty and dishonesty

Examinations: Obtaining or distributing materials prior to the scheduled examination without the intention of the teacher; providing information to or obtaining information from another student during the examination; or attempting to change answers after the examination has been submitted are violations of the examination process.

Papers, Theses and Dissertations: Plagiarism is the use of ideas, language, or work of another without sufficient public acknowledgement that the material is not one's own. The following acts are regarded as such violations:

- Submitting another person's work as one's own
- Submitting a rewritten or paraphrased version of another person's work
- Allowing another or paying another to write a paper for one's own benefit.

Original Research: Thesis work is guided by the expectation of making an original contribution to the field. The determination of what constitutes "original research" is made by the respective thesis committee and SES.

Research Procedures: Data misrepresentation or fabrication are clearly unethical. Ownership of data and programs and privileged information and confidentiality of data need to be clarified and respected by all those involved in the research process.

Authorship: In all cases of joint authorship, individuals working together should establish ahead of time the criteria for their co-authorship. Final determination of authorship should reflect effort and contribution, not rank or status. Dissertations and theses may not be co-authored.

Copyright: Laws of the United States and the university need to be respected. Faculty and students are responsible for knowledge and implementation of university policy in this area.

Failure to Practice Academic Honesty

A student's failure to practice academic honesty, depending upon the seriousness of the misconduct, will result in a sanction ranging from the grade of F for the assignment to expulsion from the university. Channels for resolution of matters regarding academic honesty will originate with the relevant faculty members and student and will extend to SES Deans levels, as necessary. All instances of academic dishonesty must be reported to the Associate Dean of Graduate Programs.

Academic Standing

Good Standing

A graduate student is in good academic standing if he, she or they:

1. meets the standards of quality of the SES Graduate Program in their specific academic program;
2. makes satisfactory progress toward completion of program requirements within the established time limit;
3. fulfills SES's requirement regarding continuous registration; and
4. fulfills the SES Graduate program's requirement regarding grade-point average.

Students who are not in good academic standing are not eligible to receive a degree or certificate and cannot hold an award.

Incompletes

In extraordinary circumstances where a student will not be able to complete all assigned work before the end of the semester, an instructor may assign the temporary grade of "I" – Incomplete. The student must be unable to complete the work due to unanticipated reasons or emergency circumstances that have arisen toward the end of the semester. An

Incomplete should not be granted due to a failure to appropriately manage time throughout the semester.

The student must request the Incomplete before the end of the semester; the granting of an Incomplete grade is not automatic and is at the discretion of the instructor. An instructor can reject a request for an incomplete grade. If granted, the instructor has the right to determine the conditions for completing the course work. The student and instructor will work together to complete the "Graduate Request for a Mark of Incomplete" that identifies the work and deadlines for each assignment and the entire coursework. The student shall submit to the Associate Dean of Gradute Studies the completed and signed form by the student and instructor. If an extension is approved, the instructor must enter the grade of "I" in LOCUS during the semester final grade entry period.

Course work that is incomplete must be finished and submitted no later than 6 weeks into the start of the following term (6 weeks into the Fall term for Spring and Summer term work and 6 weeks into the Spring term for Fall and J-Term work). The instructor may, at their discretion, set an earlier date. Failure to complete required course work within the allotted time will result in a grade of "F." Please note: Students who are on Academic Probation may not request a temporary mark of Incomplete in any course for the term in which they are on Academic Probation.

Continuous Registration

All students, including those who have completed all coursework, are required to register during the regular academic year (not including summer sessions) until all degree requirements are met, unless they have received a leave of absence (see below).

Students who have completed all coursework and are preparing for a thesis proposal are to register for Thesis Supervision.

Failure to remain continuously enrolled at the thesis stage of a student's career carries a financial penalty as well. Master's students at the thesis supervision stage face a reinstatement fee should they fail to maintain continuous registration. The fee will be based on the combined thesis supervision fee for the terms.

Inactive Status

Students who do not meet the requirement of continuous registration are considered inactive and not in good academic standing. To request reinstatement to active status, the inactive student should discuss the matter with the Associate Dean of Graduate Programs. Reinstatements are not automatic and students whose requests are denied will not be permitted to continue in their programs. Repeated failure to maintain continuous registration is, itself, grounds for denying a request for reinstatement.

The Associate Dean may require additional information of the student as it reviews her/his/their request. In addition, the program may recommend completion of additional requirements (e.g., coursework or examinations) as a condition of reinstatement because of the time that has elapsed since discontinuation of studies at Loyola.

Communications

Official notices to students will be made via Loyola e-mail accounts. Students are individually responsible for this information and should check their Loyola e-mail regularly.

For reasons of confidentiality, as well as efficiency, communications to students will be sent to students' Loyola email accounts and not to any other email address. Students are responsible for checking this account and/or setting up a forwarding system. The Dean's Office may refuse to provide confidential information using a non-Loyola email account.

Course Levels

Graduate students may only receive credit toward a degree or certificate from courses at the 400-level and above.

Undergraduate courses, including all 100, 200, and 300-level courses, do not apply toward fulfillment of graduate coursework requirements or electives.

Degree Conferral

Students are to apply to receive a Graduate Certificate or MS degree through LOCUS. They should select a program conferral term at the end of which they expect to complete all program requirements. Deadlines for program conferral application are:

Completion	Deadline
Fall (December)	August 1
Spring (May)	December 1
Summer (August)	February 1

Please note that students submitting a thesis or dissertation must fulfill all degree requirements, including defense and submission of final copies, prior to degree conferral.

The SES graduate program commencement ceremony is held in conjunction with the School of SES ceremony. A commencement ceremony is held only once per academic year, in May, for all students whose program was conferred in Fall or is expected to be conferred in Spring and Summer. Please note, this is not the commencement for The Graduate School of Loyola University of Chicago. For more information, see Loyola's Commencement website (https://www.luc.edu/commencement/).

Leaves of Absence

Official leaves of absence are intended for students who wish to temporarily discontinue their graduate studies due to extraordinary circumstances (e.g., medical, personal, or professional reasons). Students who are on a leave of absence may not use University resources, including faculty time. A leave of absence postpones all deadlines concerning completion of degree requirements for the duration of the leave of absence.

The Leave of Absence form is available through the Graduate Student Progress System (https://gsps.luc.edu/). Please log in to create this form for approval.

Decisions regarding the approval of leaves of absence rest with SES; when reviewing requests for a leave of absence, the Associate Dean of Graduate Programs may require additional information or documentation from the student and, where applicable, the student's Research Advisor. In cases where the Associate Dean of Graduate Programs recommends that the leave of absence not be granted, the student may petition the Associate Dean of Academics to consider their request. International students admitted to the United States on temporary visas must also receive approval from the university's International Student and Scholar Services Office for information regarding eligibility for a leave of absence.

Leaves of absence are limited to a period of one full academic year. If a student is not prepared to return to active status after one year, the student may request a renewal of the leave of absence for a period of up to one year; in such cases, the Associate Dean of Graduate Programs

will review the student's record and future plans to determine whether an additional leave is in the best interests of the student, the program and SES.

To be reinstated to active status, the student must notify SES in writing upon returning from a leave of absence. Unless the student is granted a renewal of a leave of absence, the student must return to active status in the semester following the expiration of a leave of absence; failure to do so may result in dismissal from the program. If a student does not return from a leave of absence after two consecutive years, they must reapply for admission to the program.

Military Service

Students who have been called into the armed services of the United States and who are consequently withdrawing from the university before the end of the withdrawal period will receive a refund of all tuition and fees paid for the period in question but no academic credit. If they withdraw after the end of the withdrawal period, they will receive full academic credit for the semester with grades as of the date of withdrawal but no refund of tuition.

Registration

To be certified as active students and to have access to university resources, both new and continuing students must be registered before each term in which they are taking courses, working on a thesis, completing an internship or otherwise engaged in graduate study. Applicants must be officially admitted to SES before they will be permitted to register. While SES administration may assist students in the enrollment process, students are ultimately responsible for insuring they are registered for appropriate courses in a timely manner through the university's registration system.

No one is permitted to attend any class without first officially registering for that class. Students may not register for classes after the late registration period. A fee is charged for late registration. For specific information on registration, please visit the Office of Registration and Records website (https://www.luc.edu/regrec/).

Withdrawal from a Course

Students can withdraw from a class until the last day for withdrawal, as determined by the Bursar for that semester. The grade of "W" indicates official withdrawal from a course and is not counted in academic standing as either attempted or earned credit hours, nor calculated in a grade point average.

The effective date of withdrawal is determined by the date the course is dropped in LOCUS, not by class attendance or participation. In an online or hybrid course, participation and attendance are defined as any class activity, including logging into the course Sakai site, and accessing any of the course materials. Students who stop attending a class but have not officially withdrawn will receive the final grade based only on the work completed compared to all work required for the course completion. Voluntary and repeated unofficial withdrawals from class may result in the student being barred from further attendance in the university.

The financial impact of changes after the late/change registration period is defined by the University's withdrawal schedule. Please see the Office of the Bursar website for Key Dates and Deadlines. The schedule for fall and spring 8-week sessions is as follows:

- First week of session – 100% tuition credit
- Second week of session – 80% of tuition credit
- Third week of session – 40% of tuition credit
- Fourth week of session or later – 0% of tuition credit

Students contemplating official withdrawal from a class and receiving or expecting to receive financial assistance should consult with the Office of Student Financial Assistance.

Number of Credit Hours

Registration for nine credit hours per semester is considered the normal full-time courseload. The maximum courseload for SES graduate students is 12 credit hours per semester and six credit hours per summer session. A student seeking a greater course load must obtain permission from the Associate Dean of Graduate Programs.

Repetition of Courses

Students may repeat a course in which they previously received a passing grade only with the specific authorization of the Associate Dean of Graduate Programs. Authorization to repeat courses merely to improve the grade will rarely be given.

In an authorized repetition of a course the student will not receive credit hours toward graduation for both courses. The student will only receive credit hours toward graduation for the most recent attempt.

A student who repeats a course without permission of the Associate Dean will earn neither credit hours nor quality points for the repeated course.

Students with Disabilities

Students with disabilities who would like to seek accommodations at the university for their coursework or merit award (teaching and research assistantships) must contact the Coordinator of Services for Students with Disabilities. More information can be found on the Student Accessibility Center website (https://www.luc.edu/sac/).

Transcripts

All courses taken by the student and other relevant academic information are included on the student's official academic transcripts, which are maintained by the university's Office of Registration and Records (https://www.luc.edu/regrec/).

Transfer Credit

It is expected that all work toward a Graduate Certificate or Master's Degree will be completed within the SES graduate program. Under certain circumstances, up to six credit hours of graduate work completed in another Loyola program or at another institution may be applied toward a master's degree at the discretion of the Associate Dean of Graduate Programs. Students may request transfer of credit during the student's first semester in the SES Graduate Program. SES has full responsibility for approving transfer credit. To ensure that each student is well prepared for undertaking scholarship in the student's current field of study, the decision regarding transfer credit will be based on the quality of the student's work, the time interval since its completion, and its relevance to the student's program of study at Loyola. Coursework below a B grade will not be accepted. Students may not transfer coursework that has been awarded as part of a conferred or completed degree program. If a course fulfills the learning outcomes of a requirement in the student's master's program, and upon department recommendation, a specific required course may be substituted with an elective chosen in concert with the student's academic advisor.

Withdrawal from the University

An enrolled student who wishes to withdraw from the university during any semester must notify the Dean's office and his or her graduate program director in writing. A student is considered to be in attendance until such notice has been received by the Dean or the Graduate Program Director. All financial refunds or obligations are dated from the date of the formal notice of withdrawal and not from the date of the last class attended; see the Bursar's website for more information. It is the student's obligation to inform the Graduate School promptly of the intention to withdraw. Telephone messages or non-attendance in class are not official notification.

A student may be required to withdraw from the university because of academic deficiency, lack of sufficient progress toward completion of degree requirements, failure to adhere to university requirements, degree requirements and/or regulations for conduct or failure to meet financial obligations to the university.

Complete Emergency Withdrawal

Students facing a significant emergency circumstance (see "Definitions" section below) that prevents them from continuing in or completing an academic term may submit an **Intent to Withdraw** form to their program director or the Graduate School. All requests must be supported by appropriate documentation. The Intent to Withdraw form is reviewed by the academic dean's office of the student's primary college/school for approval and processing.

Requests for complete emergency term withdrawals are considered after the last day of a term to drop a course or courses without a grade of "W." In cases where the student is incapacitated (see "Emergencies Resulting in Student Incapacitation" below for more details), the requests for complete emergency term withdrawals may be submitted by a parent, spouse or legal guardian.

Complete emergency term withdrawals constitute a withdrawal from all classes and may result in final grades of "WE" in all classes for the given academic term. The University does not grant partial withdrawals (i.e., requests to withdraw from some classes but not others) for emergencies. Grades of "WE" have no impact on a student's cumulative GPA. The "WE" grade has no earned or attempted hours associated with the grade; however, "WE" counts towards attempted hours when determining **Satisfactory Academic Progress** for continued financial aid eligibility. This policy does not apply in cases where the student has completed final exams or final projects for classes in the term impacted by the significant emergency circumstance. When final grades have posted, students should utilize the **Appeal for Change of Academic Record** form and submit to their primary academic advisor, program director or assistant/associate Dean.

The Office of the Bursar will determine the impact of the Withdrawal on the students account balance in LOCUS. The Student Account Balance will be determined by the University withdrawal calendar **Loyola Withdrawal Schedule**. The Bursar will not assess any late payment fees after the date of Withdrawal.

Emergencies Resulting in Student Incapacitation

It is required that a complete emergency term withdrawal request be submitted by the student. However, if an emergency situation has resulted in the student's temporary or long-term incapacitation for a period that may extend beyond the one-calendar-year deadline of this policy, the student's college/school academic dean's office, the Office of the Dean of Students, a parent (for minors), emergency contact person, or other legally assigned designee may submit a request on the student's behalf. In such cases, the student's college/school academic dean's office may require additional documentation (e.g., letter from medical doctor, hospitalization forms, power of attorney).

Potential Implications

The section below provides a non-exhaustive list and general information on the potential implications of a complete emergency term withdrawal. While the University offers a number of considerations that help support students who are facing emergencies, there are other important factors that should be taken into consideration before submitting a request for a complete emergency term withdrawal. Whenever possible, it is strongly recommended that a student discuss all practical options, including the potential implications of a complete emergency withdrawal with their primary academic advisor.

Financial Implications: Tuition and Financial Aid

- Students are strongly encouraged to purchase tuition insurance (e.g., A.W.G Dewar, Inc.) prior to the start of the academic term.
- Note that a complete emergency withdrawal does not automatically result in tuition credit. Please refer to the withdrawal schedule on the Office of the Bursar's website.
- Complete Emergency Withdrawal Procedures During an Academic Term
- Although it is recommended that the student submit as much information as possible, documentation does not need to specify details of the emergency that may be protected by law or considered private. Documentation must come from a verifiable authority (e.g., community/licensed healthcare provider, police agency, court of law, US military etc.) and minimally confirm the following:
- Requests for a complete emergency withdrawal will be reviewed and decided by the student's college/school academic dean's office. Other areas, such as the Office of the Dean of Students, the Office for Equity & Compliance, or Student Accessibility Center, may be consulted in cases where the student was either referred or is being supported by said office. Additional documentation and/or information may be requested of the student before a final decision is made.
- The student will receive a written decision notification no later than 14 business days after receipt of original request via LUC email. If the school is unable to meet the 14 business-days deadline, the student will be notified in writing of the new deadline. If the request is approved, the effective date and further instructions before returning to campus (if necessary) will be provided. The date of the complete emergency withdrawal will be determined by the primary college/school dean's office based on the date of the last academically related activity.

Post-Emergency Complete Withdrawal Re-Entry Process

Unless otherwise indicated in the approval notification or by the Office of the Dean of Students in lieu of the Loyola University Chicago Behavior Concerns Team (BCT), the process for returning to the university will follow standard policies and procedures for re-enrollment. Students who were being supported by BCT before withdrawing or are returning because of a mental health hospitalization are required to consult the Office of the Dean of Students for instructions on potential re-entry requirements.

Definitions

Significant Emergency Circumstance – an unforeseen emergency situation that prevents a student from continuing in or completing an academic term. Some examples include, but are not limited to:

- Chronic illness of withdrawing student.
- Death of parent/legal guardian or medical issue of a family member and the withdrawing student must become a part-time or full-time caretaker of family member.
- Extreme financial hardship.
- Mental health condition, serious injury or illness of withdrawing student.
- Sudden or consistent lack of transportation which affected the withdrawing student's ability to meet in-person attendance requirements.
- Other situations, at the University's sole discretion, which are deemed to result in significant hardship to the withdrawing student.

This list includes examples of emergency situations that directly affect the student; it is not intended to be all-encompassing.

School of Social Work

Visit the School of Social Work's website for their MSW Handbook (https://www.luc.edu/socialwork/academics/studentresources/forms/).

The Graduate School

Graduate School Academic Policies

Academic Advising

Each degree-seeking student is to have a faculty academic advisor throughout the period of graduate study. The faculty academic advisor plays a major role in working with the student to ensure a planned, disciplined, and well-supervised approach to graduate study. Depending on the program, this advisor may be the Graduate Program Director, a faculty member in the student's area of concentration, the thesis/dissertation advisor, or some combination of these individuals.

The relationship between advisor and advisee is reciprocal and requires mutual effort in the planning and execution of all aspects of the student's progress. The faculty academic advisor, as a mentor, is to be diligent in providing guidance by being available for regular consultation and by working with the student in scheduling regular meetings of the thesis/dissertation committee should this type of written work be required for the degree.

The student is responsible for actively seeking the guidance of the faculty advisor and, when appropriate, the thesis/dissertation committee members, for all matters pertaining to the student's progression through the program including degree completion.

Academic Appeals

The University's commitment to the care of the individual person is the foundation for an appeals process that affords students the opportunity to have a review of circumstances that impact their academic standing or progress at the University.

Student Rights in an Academic Appeal Process When a Hearing Will Take Place

All students have the right to be treated with dignity and respect throughout any interaction with the academic appeal process and have the following procedural rights during hearings:

- Right to Participate: To be present throughout the hearing but not during the deliberation process of the hearing board
- Right to an Advisor: To be accompanied by an advisor, if desired (see section on rights of an advisor)
- Right to Review: To review all documentation concerning the potential policy violations during the hearing
- Right to Refute: To refute information provided by witnesses

The Graduate School recognizes three types of appeals.

1. Appeal of Course Grade

Students who wish to contest a final course grade may initiate a course grade appeal. This form is the only approved process to submit this request.

Link to: Appeal of Course Grade Form (https://www.luc.edu/media/lucedu/gradschool/pdfs/I.a.%20TGS%20Academic%20Appeal%20Course%20Grade%20FORM.pdf)

1. Appeal of Non-Coursework Evaluation

Students who wish to contest an evaluation of their non-course academic performance may initiate an of non-coursework evaluation. This form is the only approved process to submit this request.

Link to: Appeal of Non-Coursework Evaluation Form (https://www.luc.edu/media/lucedu/gradschool/pdfs/II.a.%20TGS%20Academic%20Appeal%20NonCoursework%20Evaluations%20FORM.pdf)

1. Appeal of Finding of Academic Misconduct

Students who wish to contest a finding of academic misconduct may review the Academic Integrity Policy and submit an appeal of a finding of academic misconduct.

Link to: Academic Misconduct Appeal Form (https://www.luc.edu/media/lucedu/gradschool/pdfs/III.a.%20Academic%20Misconduct%20Appeal%20Form.pdf)

Academic Appeal of Course Grade

Purpose of the Course Grade Appeal

With very rare exceptions, the final decision on all grades rests with the professor. Students have the right to protection, through fair processes, against arbitrary and capricious academic evaluations. Arbitrary and capricious means that there is no relation between the grade given and the student's performance in the class and that a reasonable person could not find that the grade was deserved. Mere disagreement or dissatisfaction with a grade thus does not constitute a basis for an appeal.

In order to provide a forum for the fair resolution of academic disputes involving individual student complaints of the appropriateness of course grades and accusations of academic misconduct the following processes have been developed and will be applied to all cases involving students in the Graduate School.

Appeals

1. Students retain the right to appeal the determination made at any stage of the process outlined above using the Academic Appeal Procedure described below.
2. The decision of the academic Dean's office is final in all cases except expulsion.

Academic Appeal Procedure:#Course Grade Appeal

1. The student's first step in the event of a grade dispute is to confer directly with the instructor.
2. If the grade dispute is not resolved, a student must submit a formal request using the Academic Appeal Form: Course Grade Dispute for a grade change no later than 30 days into the following semester explaining in detail why the grade is arbitrary and capricious. This form is the only approved process to submit such a request.
    a. If the final grade is assigned in spring or summer semester, the student must submit the appeal no later than 30 days into the fall semester.
    b. If the final grade is assigned in fall or J-term, the student must submit the appeal no later than 30 days into the spring semester.
    c. For a course offered by the School of Continuing and Professional Studies, the student must submit the appeal no later than 30 days after the final grade is officially posted.
3. The Department Chair and/or Dean's designee determines whether or not there are grounds for an appeal.
    a. When the Department Chair and/or Dean's designee determines there are no grounds for an appeal, the student will be notified via Loyola email that a hearing board will not be convened.
        i. If the student disagrees with the determination by the Department Chair and/or Dean's designee, the student may appeal to the appropriate academic Dean. In cases where the student is enrolled in a school other than the one in which the course is taught, the academic Deans of the two schools will review the appeal together. The student's academic Dean's office will notify the student of the final decision via Loyola email.
    b. When the Department Chair and/or Dean's designee determines there are grounds for an appeal, the student will be notified via Loyola email that a hearing board will be convened.
    c. It is up to the discretion of the Dean or his/her designee if a student may continue taking courses in a sequence where the course grade under review is a pre-requisite.
4. Each department will have a standing hearing board or have the means to constitute a hearing board for each dispute. Board members are chosen by the Department Chair and/or Dean's designee and will consist of three to five faculty members other than the faculty member involved or Department Chair. In smaller departments or interdisciplinary programs, board members may be members of different departments.
5. The chairperson of each hearing board will be selected by the person who appoints the hearing board. The chairperson of the hearing board receives all requests for hearings from the department, sets the calendar, notifies all involved parties of the dates and times of hearings via Loyola email, and informs students by written notice of the decisions of the board.
6. The hearing will be held within 10 business days of the receipt of the request for a hearing, if practicable. Hearings may be held virtually to accommodate committee members or parties to the appeal.
7. The hearing will be private.
8. Hearings for a grade dispute generally proceed according to the following format:
    a. Introduction of all parties present (including witnesses, when applicable) and an overview of the hearing process.
    b. Review of the Student Rights in the Academic Appeal Process.
    c. Students should complete the electronic appeal form in advance of the hearing.
    d. Hearing board chairperson reviews the nature of the grade dispute and the University policy potentially violated.
    e. Witnesses are excused until statements are needed (if applicable).
    f. Student(s) (and Instructor(s) when applicable) provide a personal account of the reported incident.
    g. Student(s) (and Instructor(s) when applicable) have the opportunity to review all documentation relevant to the case that will be used by the hearing board to make a decision.
    h. Hearing board members ask any remaining investigative questions to the parties present (including witnesses, if applicable).
    i. Student(s) are provided a final opportunity to make any closing comments.
    j. Instructor(s) are provided a final opportunity to make any closing comments.
    k. Hearing board chair may excuse all parties for deliberation if needed
    l. Student(s) (and Instructor(s) when applicable) are notified of the decision and any related outcomes either immediately after deliberation or, when further deliberation is needed, typically within 5 business days in writing via Loyola email.
9. Both the student and the faculty member involved may be accompanied by one advisor of their choice throughout the hearing process. The individual must inform the chairperson of the hearing board via Loyola email of the name of the advisor at least 2 business days before the hearing date.
    a. The role of an advisor is to provide a comforting presence for the student and/or instructor. An advisor may only speak to the advisee. An advisor may not ask questions, interject, advocate for, or otherwise speak on behalf of the advisee. Even if an advisor is an attorney, the advisor may not function as legal counsel or "represent" an advisee during the hearing process.
    b. If any advisor conducts themselves in a manner inconsistent with these guidelines, or if the advisor's behavior obstructs or interferes with the hearing process, the advisor will be warned by the board.
    c. If the advisor's interfering behavior continues or if the advisor engages in a manner that harasses, abuses, or intimidates any other participant, the advisor will be excused from the hearing immediately.
10. The student and/or instructor have the option of submitting relevant materials to the hearing board prior to or at the time of the hearing. Individuals in the hearing process have the responsibility of presenting truthful information.
11. The Board may address questions to any party.
12. The chairperson of the hearing board determines the hearing processes (e.g. location, order of proceedings, determining what evidence is relevant, determining if additional information is needed, etc.). The standard of evidence required for a board to determine that arbitrary and capricious academic evaluation occurred is known as a "preponderance of the evidence." This means the board must determine that it is more likely than not that arbitrary and capricious academic evaluation occurred based on the totality of available evidence.
13. All decisions of the board must be determined by a majority vote of the hearing board members. A final decision must be rendered by the board by the end of the hearing process.

14. The student and instructor will be informed in writing via Loyola email by the chairperson of the board's decision within 5 business days of the hearing. The decision is also shared with the Department Chair and/or Dean's designee.
    a. If the hearing board determines that a grade change is not warranted, the chair of the hearing board will notify the student and the instructor involved of the decision.
    b. If the hearing board determines that a grade change is warranted, the Dean and/or Dean's designee submits a grade change request to the Office of Registration and Records. The Department Chair and/or Dean's designee will notify the student and the instructor involved of the decision vial Loyola email.

Should the student or instructor wish to contest the hearing board's decision, an appeal letter to the Dean and/or Dean's designee within 30 days of notice of the hearing board's decision may be sent to the Graduate School.

1. The appeal letter must clearly identify the grounds for the appeal with appropriate supporting documentation. Mere disagreement or dissatisfaction with the decision does not constitute a basis for an appeal.
2. The grounds to appeal the board's decision must include one or more of the following criteria:
    a. New substantive information is available that was not reasonably available at the time of the hearing and could substantially impact the original findings or outcomes of the case.
    b. A substantive procedural error or error in the interpretation of University policy occurred that denied the student or instructor the right to a fair hearing and decision.
    c. The decision (findings or outcomes) is significantly incongruent with the established facts presented at the hearing or the established Graduate School Academic Standards and Regulations.

Academic Appeal of Non-Coursework Evaluation of Research and Scholarship

Students, faculty members, and administrators are strongly encouraged to attempt to resolve informally problems arising from academic matters. The Graduate School hopes that open communication between all parties and mutual confidence in one another's good will will lead to the resolution of problems in this manner. When informal attempts at resolution fail, the management of an academic appeal by a student in the Graduate School of an evaluation of research and scholarship outside of coursework is to proceed according to the formal procedures set forth below.

Jurisdiction

Evaluation of the quality of graduate student research and scholarship, including the student's successful completion of academic degree requirements outside of coursework including but not limited to qualifying or comprehensive exams, the thesis or dissertation defense proposal, and the thesis or dissertation, is entrusted to Graduate Faculty.

In cases where the student believes that the faculty or faculty concerning evaluation was arbitrary and/or capricious, the following Academic Appeal policy will determine whether the student has the right to appeal the results of the evaluation.

This policy does not apply to:

- An appeal of a course grade (including a grade of NP on a graduate study or supervision course) shall be handled through the Graduate School's policy on Course Grade Appeal.
- An appeal of a charge of academic misconduct shall be handled through the Graduate School's policy on Academic Integrity.
- An appeal of a charge of concerning an allegation of misconduct in the design, conduct or reporting of research supported by federal funds shall be handled through the procedures described in theuniversity's policy concerning misconductin scholarship published by the Office of University Research Services.
- Problems arising from clearly non-academic matters fall within the jurisdiction of the University'sOffice of StudentConduct & Conflict Resolution.

In cases in which the jurisdiction of a matter is unclear or mixed, the Dean of the Graduate School the Vice President for StudentDevelopment, and or the Office of Research Services when appropriate will determine the appropriate jurisdiction.

This academic appeal procedure applies only to those cases in which the evaluation of the student in the accomplishment of a required milestone (comprehensive examination, research tool, thesis or dissertation defense) in their academic degree progress outside of coursework, is alleged by the student to be arbitrary and capricious.

A decision is arbitrary and capricious if it is:

- In significant violation of clearly established written department, program, and/or school policies, and/or
- The result of improper procedures and/or
- Based partially or entirely on criteria other than the student's academic performance or quality of academic work and/or
- Based on standards different from those standards of evaluation applied to other students;
- Based on a substantial departure from announced standards of evaluation.

In cases other than those listed above, an evaluation of a student is not the basis for an academic appeal.

Process

When informal efforts at resolution fail, students must first address the issue at the departmental or programmatic level. Each university unit has an appeal (or grievance) procedure, and this procedure guides the process. If a complainant wishes to appeal the decision reached at the departmental/program level, the complainant can request a Graduate School hearing.

Graduate School Hearing

Request for a Hearing: The complainant is to make a written request for a hearing to the Dean of the Graduate School. Using the Academic Appeal-Non-Course Evaluation form, the request must specify the nature of the appeal and outline prior attempts to resolve the matter. The request must be made within thirty days of a decision reached at the departmental/programmatic level. If, upon review by the Graduate School, the appeal is deemed inappropriate for a hearing because it does not fall within the above standards, the process will not move forward. If the process moves forward, the Graduate School will request copies of all materials generated at the departmental/programmatic level, all materials deemed

salient by the student, and all materials generated by the Graduate School as an intermediary between the parties.

Hearing Board
The Graduate School will convene a hearing board, appointed by the Dean, consisting of at least three members, including one student. Only members of the Graduate School faculty or Graduate School students are eligible to serve on the hearing board. The hearing board will have a chairperson, appointed by the Dean, who is responsible for managing all procedures related to the hearing.

Hearing Procedure
The purpose of the hearing is to ensure that all parties have full opportunity to present facts and their views to the hearing board and to allow the hearing board to assure itself that it fully understands the parties' views. The conduct of the hearing is informal. It is not bound by rules of evidence or court procedures. All matters of procedure are to be decided by the chairperson of the hearing board in accordance with the following guidelines.

The chairperson of the hearing board is to set the date, time, and location of the hearing. The hearing is to take place within 30 days of the request for a hearing, if practicable. All parties involved are to receive timely written notice of the hearing and the matters to be considered. All supporting documentation relating to the matter must be submitted to the Graduate School's Associate Dean for Student Academic Services at least three weeks before the hearing. The Associate Dean will distribute it in a timely manner to all involved parties prior to the hearing.

The hearing and material submitted to the hearing board are private and all parties involved in the appeal are to consider their contents confidential. However, if a party disseminates their contents, the party's interest in confidentiality is deemed waived. Electronic recording of the hearing is prohibited.

A party may obtain the assistance of members of the university community (including, but not limited to, faculty, a Graduate Program Director, and/or staff of the Graduate School) in preparing written documentation or in presenting information to the hearing board, provided that the assistants are not attorneys. Individuals from outside the university, including attorneys, are not permitted to serve as assistants. The party must notify the chairperson of the hearing board of the names of the assistants at least one day prior to the hearing.

Each party may present information, both orally and in writing, to the hearing board. The Graduate School, if it has provided guidance to one or both parties and/or has served as an intermediary between the two parties prior to the filing of the appeal, also may present information to the hearing board. All parties are to be available throughout the hearing. Two formats for the hearing exist and are determined by the chairperson of the hearing board: all parties are present together during the hearing or the parties are heard separately at the hearing. Hearings may be held virtually to accommodate committee members or parties to the appeal. Each party may call witnesses at the hearing. The party is to submit to the chairperson of the hearing board the witnesses' names at least one week prior to the hearing; the hearing board will notify all parties of the names of witnesses in a timely manner prior to the hearing. The board may direct questions to any party or witness. All individuals presenting information to the hearing board have the responsibility of presenting truthful information.

After the hearing board has gathered all information necessary to understand fully the parties' views, the board will deliberate in private. In reaching its decision, the board will examine all documents and other exhibits and fully consider statements of all parties and witnesses. The decision of the board will be determined by a majority vote of participating board members.

The committee will provide their decision and justification to the Associate Dean within two weeks of the hearing. The Associate Dean of the Graduate School will notify the parties in writing of the board's decision within two weeks of receiving the committee's decision.

Appeal of the Hearing Board Decision

A party may appeal the decision of the hearing board to the Dean of the Graduate School. The party is to request an appeal in writing within 30 days of notification of the hearing board's decision. The request must include an explanation of the basis for the appeal according to the following:

1. The appeal letter must clearly identify the grounds for the appeal with appropriate supporting documentation. Mere disagreement or dissatisfaction with the decision does not constitute a basis for an appeal.
2. The grounds to appeal the board's decision must include one or more of the following criteria:
   a. New substantive information is available that was not reasonably available at the time of the hearing and could substantially impact the original findings or outcomes of the case.
   b. The decision (findings or outcomes) is significantly incongruent with the established facts presented at the hearing or the established Graduate School Standards and Regulations.

The Dean will notify all parties of the request for an appeal and will provide an opportunity for a response. The Dean will obtain from the parties and the hearing board information necessary to consider fully the parties' views and the hearing board's decision.

The Dean may affirm, modify or reverse the hearing board's decision. The Dean will notify the parties of the disposition of the appeal within 30 days of receiving the appeal, if practicable. The Dean's decision is final in all cases (including dismissal from a Graduate School program), except those involving possible expulsion from the university (i.e., a permanent prohibition of enrollment at the university); the penalty of expulsion may be imposed only by the university's provost or senior vice president for health sciences.

The Graduate School retains copies of all documentation related to the management of appeals under its jurisdiction in accordance with the university's record retention policy.

Academic Integrity Policy and Processes

Academic integrity is the pursuit of scholarly activity in an open, honest, and responsible manner. Academic integrity is a guiding principle for all academic activity at Loyola University Chicago, and all members of the University community are expected to act in accordance with this principle.

Standards

Failing to meet the following standards is a serious violation of personal honesty and the academic ideals that bind the University into a learning community. These standards apply to both individual and group assignments. Individuals working in a group may be held responsible if one of the group members has violated one or more of these standards.

1. Students may not plagiarize. Plagiarism involves taking and using specific words, phrases, or ideas of others without proper acknowledgement of the sources. Students may not:
   a. Submit material copied from a published or unpublished source.
   b. Submit material that is not cited appropriately.
   c. Use another person's unpublished work or examination material.
   d. Allow or pay another party to prepare or write an assignment.
   e. Purchase, acquire, or use a pre-written assignment for credit.
   f. Use generative artificial intelligence to assist or write assignments without prior permission of the faculty.
   g. Students may not submit the same work for credit for more than one assignment (known as self-plagiarism).
   h. If a student plans to submit work with similar or overlapping content two or more times for any purpose, the student should consult with all instructors prior to submission of the work to make certain that such submission will not violate this standard.
2. Students may not fabricate data. All experimental data, observations, interviews, statistical surveys, and other information collected and reported as part of academic work must be authentic. Any alteration, e.g., the removal of statistical outliers, must be clearly documented. Data must not be falsified in any way.
3. Students may not collude.
   a. Students may not work with others on any exam, assignment or portion of an assignment without permission from the faculty.
   b. Students' work with one another on an exam or assignments may not exceed the terms of their instructors' directions for collaboration as part of the assignment.
   c. Students may not use work submitted by another student in a previous semester of a course.
4. Students may not cheat.
   a. Students may not obtain, distribute, or communicate examination materials prior to the scheduled examination without the consent of the faculty.
   b. Students may not take an examination by proxy. Taking or attempting to take an exam for someone else is a violation by both the student enrolled in the course and the proxy.
   c. Students may not attempt to change answers after an examination or an assignment has been submitted.
   d. Students may not falsify medical or other documents for any reason.
   e. Students may not use unauthorized study aids in an exam. Examples include, but are not limited to:
      i. Bringing notes into an exam that does not allow outside materials.
      ii. Programming equations into a calculator when the faculty has indicated that students are to be tested on the recall of those same equations.
      iii. Using any electronic device that allows students to look up, translate, calculate, or communicate information with someone else.
5. Students may not facilitate academic misconduct.

Graduate student responsibilities regarding academic integrity extend outside the classroom to scholarship, research, and teaching. As such, graduate students are also subject to the following standards:

1. Original Research. Thesis and dissertation work is guided by the expectation of making an original contribution to the field. The determination of what constitutes "original research" is made by the thesis/dissertation committee and the academic unit.
2. Research Procedures. Data misrepresentation or fabrication are clearly unethical. Ownership of data and programs and privileged information and confidentiality of data need to be clarified and respected by all those involved in the research process.
3. Authorship. In all cases of joint authorship, individuals working together should establish ahead of time the criteria for their co-authorship. Final determination of authorship should reflect effort and contribution, not rank or status. Dissertations and theses may not be co-authored.
4. Copyright. Laws of the United States and the university need to be respected. Faculty and students are responsible for knowledge and implementation of university policy in this area.
5. Teaching. Intellectual honesty characterizes the teaching endeavor. Instructors have the responsibility of clearly stating at the beginning of a course any and all responsibilities of the course and specifying in percentages how the final grade is to be calculated. Furthermore, instructors will inform themselves of appropriate university guidelines for the composition of course syllabi and ground rules.

Sanctions

Faculty are responsible for determining the sanctions for academic misconduct in the course sections they teach and students they mentor. Sanctions are assigned on a case-by-case basis while considering precedent and the following standards below. Academic deans may add to or elevate the initial sanctions assigned by faculty based on the student's prior academic misconduct history:

- the context and seriousness of the violation
- the student's demonstrated commitment not to engage in the same behavior in the future; and
- sanctions that appropriately foster accountability for one's behavior and prevent recurrence of similar behaviors

Below is a list of commonly assigned sanctions and faculty members may choose from this entire list:

1. Educational Experiences
   Educational experiences provide space for students to reflect upon their conduct; to identify how their action harmed themselves, others, and the community; and/or to explore why such conduct is unacceptable.

   Educational experiences or projects may include:
   1. Attendance and participation at a required meeting, workshop, special project, or other initiative.
   2. Completing an online tutorial focused on academic integrity.
   3. A written reflection about a specific topic or issue.
   4. Resubmission of the assignment or exam for partial credit.
   5. A required meeting with the appropriate dean to discuss the misconduct and the consequences.
   6. Completing restorative service hours and/or a Values Workshop.

   Deadlines for educational experiences may vary.
2. Failing Grade on the assignment
   A letter grade of F or zero points will be issued for the assignment or examination.

3. Failing Grade in a course, comprehensive examination, proposal or final defense of thesis or dissertation.
   A letter grade of F will be issued for the course or milestone where academic misconduct occurred.
4. University Suspension - may only be determined by the student's academic dean's office.
   University suspension involves the temporary removal of the student from the University for a specified period of time with the understanding the student may be allowed to return to the University at the completion of the suspension period after having satisfied any accompanying conditions. The Academic Dean's office may consider suspension as an elevated sanction.

   Suspension from the University further entails being withdrawn from all enrolled courses (resulting in "W" grades) restriction from visiting the University premises except when engaged in official business approved by the Office of the Provost. Visiting the University premises without gaining approval may result in arrest. Students suspended from the University remain responsible for tuition and fees. Students suspended from the University also must forfeit their Loyola ID (Campus Card) and turn it in to Campus Safety. University suspension may also include any other disciplinary action that is judged to be of value to the student.

   Persons notified of a student's suspension may include The Office of the Provost, the Office of Registration and Records, the Bursar, the Office of the Dean of Students and their designees, Campus Safety, or other appropriate personnel at the discretion of the Office of the Provost. Suspended students may not study abroad or travel with the University and may not be approved to study abroad until 90 days after their suspension period has ended. University suspension is typically assigned for a minimum of the rest of the semester and may last any number of years.

   When a suspension is over and the student has completed any conditions accompanying the suspension, the student must contact their academic dean's office requesting reinstatement and providing documentation demonstrating that the student has satisfied the terms of the suspension (if applicable). The Academic Dean's office may require a meeting with the student before permitting re-enrollment. The student may re-enroll at the University only after the academic dean's office has made an affirmative decision, notified the student, and released the registration hold on the student's University account. If the suspension is for a period of one fall or spring semester, the student will return under the same catalog requirements that were in place for their declared degree plan at the time of suspension. If the suspension is for a period longer than one fall or spring semester, the student will need to reapply to the university through the appropriate admission's office.
5. University Expulsion
   An academic dean may recommend a sanction of University Expulsion to the Provost. Expulsion from the University is the most serious University disciplinary action and means the permanent exclusion of the student from the University. Only the Provost may impose the sanction of expulsion as recommended by a Dean. The Provost's decision is final. A student is not eligible to reapply or be readmitted to any other programs at Loyola University Chicago following expulsion.

   Expulsion may include: forfeiture of all rights and degrees not actually conferred at the time of the expulsion; permanent notation of the expulsion on the student's academic record; withdrawal from all courses (resulting in "W" grades). Students expelled from the University remain responsible for tuition and fees. Students expelled from the University also must forfeit their Loyola ID (Campus Card) and turn it in to Campus Safety. Any student expelled from the University are not permitted to visit the University premises except when engaged in official business approved in advance and in writing by the Office of the Provost or Campus Safety. Visiting the University premises without gaining approval in advance may result in arrest.

   Persons notified of a student's expulsion may include, the Office of the Dean of Students and their designees, the Office of Registration and Records, the Bursar, Campus Safety, or other appropriate personnel at the discretion of the Office of the Provost.

Process

1. Faculty will gather the appropriate information and documentation when they suspect an instance of academic misconduct has occurred. The standard of evidence required to determine responsibility is known as a "preponderance of the evidence." This means the faculty member(s) must determine that it is more likely than not that an alleged violation occurred based on the totality of available evidence.
2. If faculty conclude an instance of academic misconduct has occurred, then they will determine the appropriate sanction(s) as it relates to the charge and in accordance with the procedures in Graduate School's Academic Standards and Regulations.
3. Faculty will notify the student of their findings and sanction. Faculty should allow the student an opportunity to respond before reporting the incident.
4. If after talking with the student or the student fails to respond to the faculty's outreach within two business days and faculty have determined that academic misconduct has occurred, faculty will then report the instance of academic misconduct, including supporting documentation, to the Graduate Program Director, Department Chair and the student's Academic Dean's office.
5. The student's academic Dean's office will notify the student that the instance of academic misconduct has been reported. This instance will also be documented in the University's centralized database.
   - The initial sanction(s) determined by the faculty may be reviewed by the academic Dean's office.
   - The final sanction(s) will be included in the notification.
6. Incident reports and supporting materials regarding the academic misconduct are part of the student's academic record.

Appeals

Students retain the right to appeal the determination made at any stage of the process outlined above using the Appeal Procedure described below. The decision of the Academic Dean's office is final in all cases except expulsion.

Appeal Procedure:#Finding of Academic Misconduct

1. If a student chooses to contest a finding of academic misconduct, the student's first step is to confer directly with the faculty.
2. If a student and faculty are unable to resolve the issue relating to academic misconduct and the student still chooses to contest the finding, the student may appeal by submitting a formal appeal request (see form) via Loyola email to the Department Chair/

Associate Dean (when applicable) no later than 30 days into the following semester.

a. If the dispute occurs within a class in the spring or summer semester, the student must submit the appeal no later than 30 days into the fall semester.
b. If the dispute occurs within a class in the fall or J-term, the student must submit the appeal no later than 30 days into the spring semester.
c. For a course offered by the School of Continuing and Professional Studies, the student must submit the appeal no later than 30 days after the final grade is officially posted.

3. The Department Chair and/or Dean's designee determines whether or not there are grounds for an appeal.
   a. When the Department Chair and/or Dean's designee determines there are no grounds for an appeal, the student will be notified that a hearing board will not be convened.
      - If the student disagrees with the determination by the Department Chair and/or Dean's designee, the student may appeal to the appropriate academic Dean. In cases where the student is enrolled in a school other than the one in which the course is taught, the academic Deans of the two schools will review the appeal together.
   b. When the Department Chair and/or Dean's designee determines there are grounds for an appeal, the student will be notified that a hearing board will be convened.
4. The academic Dean's office will notify the student of the final decision.
5. Each department will have a standing hearing board or have the means to constitute a hearing board for each dispute. Board members are chosen by the Department Chair and/or Dean's designee and will consist of three to five faculty members other than the faculty member involved or Department Chair. In smaller departments or interdisciplinary programs, board members may be members of different departments.
6. The chairperson of each hearing board will be selected by the person who appoints the hearing board. The chairperson of the hearing board receives all requests for hearings from the department, sets the calendar, notifies all involved parties of the dates and times of hearings and informs students by written notice of the decisions of the board.
7. The hearing will be held within two weeks of the receipt of the request for a hearing, if practicable. Hearings may be held virtually as necessary to accommodate members of the committee as well as parties to the appeal.
8. The hearing will be private and all information will be held confidential.
9. Hearings for refuting a charge of academic misconduct generally proceed according to the following format:
   1. Introduction of all parties present (including witnesses, when applicable) and an overview of the hearing process.
   2. Review the Student Rights in the Academic Appeal Process.
   3. Students should complete the electronic form in advance of the hearing.
   4. Hearing board chairperson reviews the nature of the alleged conduct and the University policies potentially violated.
   5. Witnesses are excused until statements are needed (if applicable).
   6. Student(s) (and Instructor(s) when applicable) provide a personal account of the reported incident.
   7. Student(s) (and Instructor(s) when applicable) have the opportunity to review all documentation relevant to the case that will be used by the hearing board to make a decision.
   8. Hearing board members ask any remaining investigative questions to the parties present (including witnesses, if applicable).
   9. Student(s) are provided a final opportunity to make any closing comments.
   10. Instructor(s) are provided a final opportunity to make any closing comments.
   11. Hearing board chair may excuse all parties for deliberation if needed.
   12. Student(s) (and Instructor(s) when applicable) are notified of the decision and any related outcomes either immediately after deliberation or, when further deliberation is needed, typically within five business days in writing, via Loyola email.
   13. Both the student and the faculty member involved may be accompanied by one advisor of their choice throughout the hearing process. The individual must inform the chairperson of the hearing board of the name of the advisor before the hearing date.
      i. The role of an advisor is to provide a comforting presence for the student and/or faculty. A faculty may only speak to the advisee. An advisor may not ask questions, interject, advocate for, or otherwise speak on behalf of the advisee. Even if an advisor is an attorney, the advisor may not function as legal counsel or "represent" an advisee during the hearing process.
      ii. If any advisor conducts themselves in a manner inconsistent with these guidelines, or if the advisor's behavior obstructs or interferes with the hearing process, the advisor will be warned by the board.
      iii. If the advisor's interfering behavior continues or if the advisor engages in a manner that harasses, abuses, or intimidates any other participant, the advisor will be excused from the hearing immediately.
   14. The student and/or faculty have the option of submitting relevant materials to the hearing board prior to or at the time of the hearing. Individuals in the hearing process have the responsibility of presenting truthful information.
   15. The board may address questions to any party.
   16. The chairperson of the hearing board determines the hearing procedures (e.g. location, order of proceedings, determining what evidence is relevant, determining if additional information is needed, etc.). Hearings may be held virtually to accommodate committee members or parties to the appeal. The standard of evidence required for a board to determine responsibility is known as a "preponderance of the evidence." This means the board must determine that it is more likely than not that an alleged violation occurred based on the totality of available evidence.
   17. All decisions of the board must be determined by a majority vote of the hearing board members. A final decision must be rendered by the board by the end of the hearing process.
   18. The student and faculty will be informed in writing by the chairperson of the board's decision within two weeks of the hearing. The decision is also shared with the Department Chair and/or Dean's designee.
   19. Should the student or faculty member wish to contest the hearing board's decision, they must submit in writing (via Loyola email) an

appeal letter to the Dean and/or Dean's designee within 30 days of notice of the hearing board's decision.

1. The appeal letter must clearly identify the grounds for the appeal with appropriate supporting documentation. Mere disagreement or dissatisfaction with the decision does not constitute a basis for an appeal.
2. The grounds to appeal the board's decision must include one or more of the following criteria:
    1. New substantive information is available that could not have been discovered by a diligent respondent at the time of the hearing and that would have likely changed the outcome of the case.
    2. A substantive procedural error or error in the interpretation of University policy occurred.
    3. The decision (findings or outcomes) is significantly incongruent with the established facts presented at the hearing or the established Graduate School Academic Policies.

20. Upon receipt of the appeal letter, the Dean and/or the Dean's designee will review the appeal to determine whether or not to uphold the decision of the hearing board.

The student and the faculty will be notified by the Dean's office of the final decision. This Dean and/or the Dean's designee decision is final and binding.

Academic Misconduct Records and Privacy

Academic misconduct records are maintained at the University for seven years from the date of the incident, with the exception of cases resulting in University expulsion (such files are retained indefinitely). Such files may contain contact information, correspondence, decisions, assigned outcomes, reports, and other information pertaining to any case in which a student was found responsible. These files are maintained by the Graduate School Academic Dean's Office.

Students have a right to view a redacted copy their academic misconduct file that falls within the seven-year period or resulted in University expulsion, with any protected information about other students removed, during regular business hours. A minimum of five business days' notice is required to prepare files for review. In order to request to view a redacted copy of their academic misconduct file, students must complete the Permission to Release Education Record Information form found on the Office of the Dean of Students website. Forms are reviewed in the order they are received and the ODOS office will contact you to schedule a time for your meeting once your form is processed.

In order to request a release of your academic misconduct file information to another person or school/organization, students must complete the Permission to Release Education Record Information form found on the ODOS website and if applicable, submit any associated form from the school/organization they want to receive their academic misconduct file information. Forms are reviewed in the order they are received and are typically processed within 5-7 business days.

Privacy applies to affected parties, respondents, complainants, witnesses, advisors, Conduct Administrators, and members of Hearing Boards. All individuals are expected to adhere to the regulations set forth by the Family Educational Rights and Privacy Act of 1974 as Amended ("FERPA") regarding the dissemination of information pertaining to the academic misconduct process. All proceedings are private and unauthorized recording by any means is prohibited. The University reserves the right to share information regarding a case with other appropriate parties on a need-to-know basis. More information about FERPA can be found here (https://www.luc.edu/ferpa/).

Academic Standing

Good Standing

A degree-seeking student is in good academic standing if they: 1) meet the standards of quality of their academic program and the Graduate School; 2) make satisfactory progress toward completion of degree requirements within the established time limit; 3) fulfill the Graduate School's requirement regarding grade-point average; and 4) fulfill the Graduate School's requirement regarding continuous enrollment. Students who are not in good academic standing are not eligible to receive a degree and cannot receive financial support from the University (including assistantships, fellowships, tuition scholarships, and/or loans).

Continuous Enrollment

All students, including those who have completed all coursework, are required to enroll continuously for each semester of the regular academic year (not including summer sessions) until all degree requirements are met, unless they have received approval for a leave of absence. Continuous enrollment maintains the student's active status and permits access to University resources including faculty time and engagement.

Students who have completed all coursework and are preparing for examinations and/or preparing a thesis/dissertation proposal are to enroll in Master's or Doctoral Study. Enrollment in Master's/Doctoral Study is normally limited to two semesters; after this, students must enroll in Thesis/Dissertation Supervision until degree completion.

Inactive Status and Reinstatement

Students who do not meet the requirement of continuous enrollment are considered inactive and are not in good academic standing. A student who is inactive may not use University resources, including faculty time and engagement. Time spent in inactive status will count against a student's permitted time to degree. If a student wishes to step away from their graduate studies and pause their time to degree, the student is encouraged to request approval for a Leave of Absence.

To request reinstatement to active status in order to enroll and make progress toward the degree, the inactive student should discuss the matter with their Graduate Program Director and complete the Reinstatement Request Form (found on the Graduate School website). The form requires multiple levels of approval and the student should complete the required supporting material with care. Reinstatements are not automatic and a student whose requests are denied will not be permitted to continue in their graduate program. Repeated failure to maintain continuous registration is, itself, grounds for denying a request for reinstatement.

In considering a request for reinstatement, the program may require additional information of the student as it reviews their request. In addition, the program may recommend completion of additional requirements (e.g., coursework or examinations) as a condition of reinstatement because of the time that has elapsed since discontinuation of studies at Loyola.

In order to ensure that students have adequate knowledge of the current state of the field and the specialty, if a PhD student who has been inactive (i.e., not enrolled) for more than two years applies for reinstatement in a program, and if more than five years have elapsed since the student completed their doctoral examination(s), the program and/or Graduate School may require the student to retake and successfully complete the program's doctoral examination(s). The program may recommend to

the Graduate School an alternative to the examination as a means of satisfying the requirement that the student demonstrate contemporary knowledge of the field.

The Graduate Program Director will forward to the Graduate School the student's written request for reinstatement and the program's recommendation regarding the request. The Graduate School will notify the student and the program of its decision regarding reinstatement.

Admission on Probation

Admission on probation may be offered to students who do not meet the graduate program's academic requirements (e.g., GPA) for admission. Upon matriculation, these students will have the opportunity to demonstrate their ability to demonstrate good academic standing while on academic probation.

Note that probationary admission is distinct from Admission on Condition and from Probation.

Admission on Condition (Unofficial Transcripts): Conditional admission may be offered to those who have submitted unofficial (self-submitted) or in-progress transcripts (i.e., applicant is still enrolled at previous institution at the time of admission). These admitted students must request that official transcripts be submitted to gradapp@luc.edu before the end of the first term of enrollment, or a hold will be placed on their account so that they may not register for future terms.

Probation: As outlined in the Graduate School's Academic Policies (https://catalog.luc.edu/academic-standards-regulations/graduate-professional/graduate-school/), a continuing graduate student may be placed on probation if they fail to maintain good academic standing.

The following constitutes the Graduate School's policy on the use of Probationary Admission by a graduate program.

Accelerated Master's Pathways

The Graduate School does not permit a master's program with an accelerated master's pathway (AMP) to offer probationary admission to an undergraduate applicant. To qualify for admission, an AMP applicant must meet the program's minimum application requirements as specified.

Master's and Doctoral Programs

For master's and doctoral students, the terms of admission on probation are as follows:

Graduate students with probationary admission will have two semesters after matriculation to meet good academic standing for continuation. Students must earn a cumulative grade point average of 3.0 (good academic standing) by the end of their second semester.

At the completion of their second semester, the student's record will be reviewed by the Graduate School to determine if the GPA requirement has been met and their status updated to one of the following:

- Good academic standing. If the student achieves the required 3.0 cumulative GPA or higher.
- Dismissal. If the student fails to earn a 3.0 cumulative GPA, they will be dismissed from the University.

A master's or doctoral program that would like to make probationary admissions to applicants must, at the start of each entry term, share a list of matriculated students on probationary admission with their campus' Associate Dean.

Advanced Standing Toward the Doctoral Degree

A student who has been awarded a relevant master's degree by another institution may petition for advanced standing toward the coursework required for a doctoral degree program. A maximum of thirty credits of advanced standing may be awarded. Some doctoral programs may impose a lower limit or may not permit advanced standing at all. Requests for advanced standing should be made during the student's first year of enrollment in the Graduate School. Requests for advanced standing must be made to the Graduate Program Director (GPD) of the student's doctoral program, who will make a recommendation to the Graduate School for final review and approval. This recommendation will include both the number of advanced standing credits to be awarded and the number of credits of coursework that remain to be completed for the degree through registration in the Graduate School. Advanced standing does not alter a student's doctoral degree requirements outside of coursework (such as comprehensive exams) or confer candidacy. The number of approved credits of advanced standing will be recorded on the student's transcript but will not contribute to the student's Grade Point Average (GPA). Students entering their doctoral program with Advanced Standing should refer to Graduate School policy on time limit for completion of degree requirements for students.

Also see Transfer Credit Policy.

Appeal for Change of Academic Record

A student's appeal to change an academic record (e.g., withdrawal date) must be submitted using the **Appeal for Change of Academic Record** form to describe mitigating circumstances as to why the academic record should be changed. An appeal to change an academic record must be submitted within one calendar year after the last day of the academic term in question. Appeals for summer terms must be received by June 1 of the following calendar year.

Certificate Policy

This policy is intended to compliment the University's Certificate Policy (https://www.luc.edu/media/lucedu/academicaffairs/Certificate%20Policy%204.28.25.pdf) as it relates to students and certificates in the Graduate School.

In the Graduate School, a certificate requires a minimum of 8 credit hours. Post-baccalaureate certificates must be comprised of courses between 100 to 400 level and graduate certificates must be comprised entirely of courses at the 400 level or above. Students in the Graduate School may complete a post-baccalaureate certificate only if they have earned a bachelor's degree.

Transfer of External/Non-Loyola Certificate Credits to a Certificate

Students in the Graduate School may not transfer credit from outside of Loyola for application to a certificate unless those credits have already been approved by the Graduate School for application to a separate graduate degree.

Use of Credits from Loyola to Multiple Certificates or Degree Programs

Credits earned toward a graduate certificate may also be applied to a graduate degree program or graduate certificate at the discretion of the graduate program and the Graduate School.

Time Limit for Certificate Completion

Each certificate will have an established time limit for completion of the certificate. Students may request a leave of absence from a certificate and that leave of absence will not count against time to certificate completion.

Timing of Admission to Degree Program

If already enrolled in a degree program, a student must enroll in a certificate at least one semester before the semester of their degree conferral.

All other academic policies in the Graduate School will apply to students pursuing certificates as relevant.

Computation of Academic Grade Point Averages

The transcript reflects a student's actual academic record and the GPA includes all grades earned during the pursuit of the degree. Students must maintain at least a 3.0 or higher GPA for all courses taken while in graduate career.

If a student, with the authorization of the Dean and graduate program director, retakes a course, only the most recent grade earned for the course will be used when evaluating whether or not all degree requirements have been met.

No more than two courses for which a student receives a final grade of C+ (2.33) or C (2.00), and no course for which a student receives a final grade of less than a C (2.00), may be applied toward the fulfillment of degree or certificate requirements. Such grades, however, will be used in the calculation of a student's overall grade point average.

Communication from Academic Deans

Official notices are presented to students through the Dean's website or via Loyola e-mail account. Students are individually responsible for this information and should check their college's board and e-mail regularly.

For reasons of confidentiality, as well as efficiency, communications to students will be sent to students' Loyola email accounts and not to any other email address. Students are responsible for checking this account and/or setting up a forwarding system. The Dean's Office may refuse to provide confidential information using a non-Loyola email account.

Comprehensive Examinations

Most programs require the completion of written and/or oral comprehensive (or qualifying) examinations to assess the student's knowledge of the field and competency to undertake independent research. The comprehensive examinations, if required, are to be completed successfully before the student prepares a thesis/dissertation proposal for review by her or his committee. If a student fails all or a portion of the examinations, reexamination may be permitted, but only once. Failure of the reexamination will result in dismissal from the program. Students who have not completed the coursework for their programs, including outstanding Incomplete grades, will not be permitted to sit for comprehensive exams, nor will students on academic probation.

Coursework Requirements

Course Levels

Graduate students may only receive credit toward a degree or certificate from courses at the 400-level and above.

Undergraduate courses, including all 100, 200, and 300-level courses, do not apply toward fulfillment of graduate coursework requirements; such courses may, however, be used to fulfill prerequisite or research tool requirements (e.g., a 100-level language course may be used to fulfill a program's language requirement).

Degree Requirement Term

The degree requirements for the graduate or professional program pursued by a student will be consistent with the term of admission for the graduate or professional program noted in the admission letter. If a student leaves and is readmitted to a program, they will be held to the requirement term of re-admission. However, if a student changes their plan within a department and does not require a separate admission, they may retain their requirement term.

Degree Conferral/Graduation

Students are to apply to receive a PhD, MA or MS degree through LOCUS. The should select a degree conferral term at the end of which they expect to complete all degree requirements. Deadlines for degree conferral application are:

Conferral Term Deadline to Apply for Graduation

- FALL (December) - August 1
- SPRING (May) - December 1
- SUMMER (August) - February 1

Please note that students submitting a thesis or dissertation must fulfill all degree requirements, including defense and submission of final copies, prior to degree conferral.

The Graduate School's commencement ceremony is held once per academic year, in May. For more information, see Loyola's Commencement website: http://www.luc.edu/commencement/ (https://www.luc.edu/commencement/).

Dissertations and Theses

Several master's programs require the completion of a thesis; all PhD programs require the completion of a dissertation. To ensure that standards of quality are maintained consistently across programs, the Graduate School oversees matters relating to dissertations and theses.

The student has primary responsibility for preparing and submitting the dissertation or thesis to the Graduate School. The Graduate School's website provides information for establishing a thesis/dissertation committee, submitting an approved proposal and documenting approval of the text and oral defense. The Graduate School's Format Manual for Theses and Dissertations (https://www.luc.edu/media/lucedu/gradschool/pdfs/LUC Formatting Manual for Dissertations and Theses (revised Aug 2022)[91].pdf) contains information on the preparation and submission of the final copies to the Graduate School.

Committees

Thesis and dissertation committees have official standing only upon approval by the Graduate Program Director and the Dean (or their designee).

Affiliate Graduate Faculty and faculty from other universities may be recommended to serve as thesis or dissertation readers. In some departments or programs, Affiliate Graduate Faculty may direct theses upon approval by the Graduate Program Director and the Dean (or their designee).

The minimum number of voting members on a Lakeside Campuses committee is as follows: two for a thesis and three for a dissertation. The practice of the Health Sciences Campus is to have three and five

respectively. In specific cases, other programs may wish to recommend one or two additional members for the committee. In those cases where a committee exceeds the minimum number, the additional members may be added as “non-voting.” Each case will be handled separately. For a thesis committee of two members or a dissertation committee of either three or four members, a vote of “pass” must be unanimous. For a thesis committee of three members or a dissertation committee of five members, there may be one dissenting vote. Graduate Faculty are expected to provide timely and thoughtful feedback to students according to the timelines established by the department or program. Since all official members of a committee are to be present at the final oral defense, non-Loyola scholars who can reasonably be foreseen not to be able to attend the final defense should be included on the committee as extra, non-voting members. Graduate School policy allows for defenses to be held virtually.

To change the composition of their committee, the student creates a new committee form in GSPS, and the approval process is repeated. It is recommended that the committee chair or the Graduate Program Director inform the committee member/s who is to be removed and/or added of the rationale for this decision prior to submitting the material. All previous iterations of the committee remain on file.

Proposals

Thesis and dissertation proposals should include: 1) a discussion of the purpose or end of the proposed research; 2) a review of the related literature and 3) a discussion of the project's research methodology/procedure. Committee members are allowed one month to vote on a proposal. To secure committee approval of the proposal, the student must receive unanimous, unqualified approval from all committee members by written ballot.

As noted below, a student proposing to conduct research involving the use of human and/or vertebrate animal subjects must secure approval of the university's Institutional Review Board for Protection of Human Subjects (IRB) and/or the Institutional Animal Care and Use Committee (IACUC) after the dissertation/thesis committee approves the proposal and prior to undertaking the research.

Upon committee and (if necessary) IRB and/or IACUC approval of the proposal, and after paying the thesis/dissertation registration fee, the student is to submit to the Graduate School a copy of the proposal, the committee ballot and a copy of the approval letter from the IRB and/or the IACUC. The Graduate School will not record final approval of your proposal until all required documentation is received.

Text and Oral Defense

A public oral defense is required of all dissertations and most theses (see individual programs' requirements). The committee must indicate approval of the text to the student before the date of the oral defense is established; no oral defense may take place without the prior agreement among the committee members that the text is substantially in its final state, with no major revisions necessary.

All voting members of the committee must participate in the oral defense. In all cases the director of the committee must be present at the oral defense, and ordinarily all readers must be present as well. However, in exceptional circumstances and upon the approval of the director of the committee, readers may participate in the oral defense via telephone or video conference. The Graduate School will not accept a committee's approval of a thesis or dissertation if one or more voting members does not participate in the oral defense. The only exception to this policy is in the case of non-participation due to an emergency; in such cases, the Graduate School will accept the result of the oral defense only after consultation with all non-participating committee members.

In the case of a two-member thesis or three-member dissertation committee, approval of the text and oral defense must be unanimous. In the case of a lakeside thesis committee with more than two members, and in the case of all four- and five-member committees, approval of the text and oral defense must be with no more than one dissenting vote.

The committee may award "Distinction" to designate outstanding work on both the text and oral defense; this designation should be made only on rare occasions of truly exceptional work. Votes of "Distinction" must be unanimous. This designation will appear on the student's transcript.

The results of the committee's evaluation of the text and oral defense are noted on a written ballot, which the student is to submit to the Graduate School as soon as possible after the oral defense.

Final Copies of the Text

Students are required to submit to the Graduate School a final, approved electronic copy of the text and other necessary material in proper format. Deadlines for format check and final copy submission are published on the Graduate School website. In addition, in order to ensure that all theses and dissertations are accessible to the academic community and the interested public, all dissertations and theses must be published through ProQuest.

Students must submit final copies with approved revisions within one semester of a successful defense (e.g., if a student’s defense falls within a Fall semester, their final copies must meet the Spring semester submission deadlines). After one full semester a student may be discontinued and be required to apply for reinstatement.

Doctoral Candidacy

The requirements for doctoral candidacy are: 1) successful completion of all specifically required coursework; 2) fulfillment of all research tool requirements; 3) successful completion of all comprehensive examinations; 4) approval of the dissertation proposal by the approved dissertation committee, the IRB and/or the IACUC (if necessary) and the Graduate School.

Students have five years after admission to doctoral candidacy to complete all of their remaining degree requirements, including all dissertation requirements.

Please see below for details about time limits for degree requirements.

English Language Requirement

The Graduate School's English-language requirement is intended to further students' academic success and allow them to attain a level of proficiency expected of students completing a graduate program at a U.S. university. As stated in letters of admission, the requirement applies to degree-seeking students who have not received a bachelor's degree from an institution where English is the language of instruction. The requirement includes assessment of students' English skills and, depending on the results of the assessment, coursework. The English-language requirement is a degree requirement; students who have not fulfilled the requirement will not receive a degree. In addition, students must complete the requirement in their first term in order to be eligible for continued enrollment in the Graduate School and for renewal of awards.

The Graduate School may grant a student an exemption from the English-language requirement if the student has written and orally defended a thesis or dissertation as part of completing a graduate program at an

institution where English is the language of instruction. All requests for exemption must be in writing and include appropriate supporting documentation. Requests must be sent first to the student's graduate program director, who is to then send it to the Graduate School with a written recommendation regarding the request. The Graduate School will not grant an exemption without receiving a positive recommendation from the graduate program director. Requests for exemption must be received by the Graduate School: at least one week before the placement test preceding the student's first semester as a degree-seeking student. The Graduate School will determine whether the student qualifies for an exemption and will notify the student and the graduate program director of its decision.

Assessment

As indicated above, the English-language requirement includes a placement test to assess students' English skills. This placement test is administered by Loyola University Chicago's Department of English as a Second Language (ESL) and is not the same as either the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS), taken before admission.

Students entering a Graduate School program as a degree-seeking student during the Summer or Fall Semesters must take the placement test scheduled prior to the beginning of their first Fall Semester. Students entering a Graduate School program as a degree-seeking student during the Spring Semester must take the placement test scheduled prior to the beginning of their first Spring Semester.

The ESL department will notify students of the results of the test. Students whose score on the placement test indicates they have attained acceptable English proficiency will have fulfilled the English-language requirement. Students whose scores indicate they are in need of additional English instruction will be required to complete coursework. Students who take the placement test will not subsequently be eligible for an exemption from the English-language requirement.

Coursework

As noted above, students whose score on the placement test indicates they are in need of additional English instruction will be required to complete coursework in Loyola's ESL department to improve their English reading, writing and speaking skills. This coursework will be in addition to the courses required in the student's graduate program and must be taken immediately following the placement test.

Students are expected to attend all classes and complete all assignments. Students must receive a grade of CR (credit) for each required course; courses for which students receive a grade of NC (no credit) will not apply toward fulfillment of the English language requirement.

If extraordinary circumstances prevent one from taking required coursework in the first semester, the student may request to defer coursework for one semester. Requests for deferrals must be in writing and sent first to the student's graduate program director, who is to then send it to the Graduate School with a written recommendation regarding the request. Requests for deferrals must be received by the Graduate School within one week of notification of placement test results. The Graduate School will notify the student and the graduate program director of its decision.

Additional Information

Students with questions regarding the Graduate School's English-language policies should contact their graduate program director or the Graduate School. Students with questions regarding the nature of the placement test or coursework should visit the ESL department's Website

Enrollment in Courses

While academic advising is available from the student's program or department, each student is responsible for developing an accurate and appropriate schedule of classes each term. Students are allowed to change their registrations in conformity with the guidelines established by the Office of Registration and Records and the Bursar's office. Students are responsible for maintaining the accuracy of their enrollment and understanding the academic and financial consequences of adding or withdrawing courses.

STUDENT ENROLLMENT STATUS

Fall and Spring Semesters

Students are considered full time if they are either: 1) enrolled in at least eight credit hours of coursework; or 2) enrolled in Thesis Supervision (course #595), Master's Study (#605), Dissertation Supervision (#600), Doctoral Study (#610), or a full-time clerkship, internship or practicum course.

Summer Sessions

Students are considered full-time if they are either: 1) enrolled in at least six credit hours of coursework; 2) enrolled in Thesis Supervision (course #S59), Master's Study (#S65), Dissertation Supervision (#S60), Doctoral Study (#S61), or a full-time clerkship, internship or practicum course; or 3) enrolled in and hold a full graduate assistantship or fellowship. Students are considered half-time students if they are enrolled in at least three but less than six credit hours of coursework.

Full- and part-time status are reported to loan companies and to the U.S. government, including the INS. Full- and part- time status are not necessarily related to eligibility for health insurance, or to Loyola's fees.

Final Examinations

Final examinations are given during the scheduled examination period in each session. Students are expected to take no more than three final examinations in one day. Tests or examinations may be given during the semester or summer sessions as often as deemed advisable by the instructor. Students who miss a final examination should contact their instructor.

Grades

The grades (and associated grade-point values) in the Graduate School are as follows:

Grade	Grade Points
A	4.00
A-	3.67
B+	3.33
B	3.00
B-	2.67
C+	2.33
C	2.00
C-	1.67
D+	1.33
D	1.00
F	0.00
I	Incomplete
W	Withdrawal

WE	Emergency Withdrawal
P	Pass/Credit
NP	Non-Pass/No Credit
AU	Audit

Incomplete Grades

The Graduate School expects students to complete all coursework by the end of the term during which the courses were taken. However, if a student and the instructor make arrangements in advance, a student may receive a grade of I (Incomplete) at the end of the term. The student is to complete the outstanding work and submit it to the instructor according to a schedule approved by the instructor, subject to the following Graduate School policies.

The student must complete and submit all outstanding work to the instructor by the last day of the semester following the term in which the I grade was assigned. (For purposes of incomplete grades, the summer sessions are counted together as one term.) If the student does not turn in the work by the deadline, the I will automatically become an F. The Graduate School will not approve a change of grade if the student does not complete and submit the work to the instructor within one term of the assignment of an I grade.

Withdrawal from Courses

If a student withdraws from a course before the published withdrawal deadline, the student's transcript will show no record of the course. Students contemplating official withdrawal from a class and receiving or expecting to receive financial assistance should consult with the Office of Student Financial Assistance. A grade of "W" indicates official withdrawal from a course through the allowed withdrawal period (see academic calendar for dates). The grade "W" is not counted in computation of academic standing as either attempted or earned credit hours, nor calculated in the grade point average. With a complete emergency term withdrawal, the grade of “WE” does not count towards attempted credit hours or in GPA (effective Fall 2022). However, both the “W” and the “WE” count towards attempted hours when determining Satisfactory Academic Progress for continued financial aid eligibility.

Credit/No Credit

Thesis Supervision (course #595), Master's Study (#605), Dissertation Supervision (#600), Doctoral Study (#610) and certain other graduate courses are graded on a credit/no credit basis. A grade of P (pass) indicates that the student made satisfactory progress toward completion of course or degree requirements. A grade of NP (no pass) indicates that the student did not make satisfactory progress toward completion of course or degree requirements.

Audit

Auditors are not required to complete course assignments, including examinations and term papers. Class attendance is required, and auditors have a right to participate in class discussions. A grade of AU indicates satisfactory attendance; students who do not meet the attendance requirement will receive a grade of W. Auditors are assessed one-half tuition.

Pass/Fail

The Pass/Fail option is not available for courses taken for graduate credit. The Pass/Fail option is available for other courses (e.g., foreign-language courses taken to fulfill a research-tool requirement).

International Travel

Graduate Student's traveling internationally on university-related business (including research and conference attendance/participation) are expected to abide by university travel policies. The Graduate School provides financial assistance through travel awards, including support for the Insurance for International Travel fee.

Inter-University Visitation

Loyola University Chicago is a member of the Midwest Catholic Graduate Schools Consortium. Through an agreement with Marquette University, University of Notre Dame, and Saint Louis University, students matriculated in the Graduate School may, with approval, take course work at one of the partner schools to apply to their degree requirements at Loyola. This is not transfer credit, but rather consider in-residence credit earned in visitation to a partner school. The student is enrolled in a degree program at their home university (Loyola), and all financial arrangements are made through the home university, but the student attends the host university on a short-term basis with prior approval. Students who are interested in learning more should contact the Graduate School.

Leave of Absence

Official long-term leaves of absence are intended for students who wish to temporarily discontinue their graduate studies due to special circumstances (e.g., medical, personal, or professional reasons). Students who are on a long-term leave of absence may not use University resources, including faculty time. Students on a long-term leave of absence may not hold an assistantship or fellowship. A long-term leave of absence postpones all deadlines concerning completion of degree requirements for the duration of the leave of absence.

The Leave of Absence request form is available through the Graduate Student Progress System at https://gsps.luc.edu/. Please log in to create this form for approval. Students are encouraged to apply for a leave of absence before the last day to withdraw from courses with a full refund for the given semester. Before applying for a leave of absence, students should withdraw from any courses in which they are enrolled. Tuition and fees for courses that are assessed when a leave of absence is granted will be determined by the date of withdrawal.

Decisions regarding the approval of leaves of absence rest with the Graduate School; when reviewing requests for a leave of absence, the Graduate School may require additional information or documentation from the student and the Graduate Program Director. In cases where the Graduate Program Director recommends that the leave of absence not be granted, the student may petition the Graduate School directly to consider their request. International students admitted to the United States on temporary visas must also receive approval from the University's International Student and Scholar Services for information regarding eligibility for a leave of absence.

Leaves of absence are limited to a period of one full academic year. If a student is not prepared to return to active status after one year, the student may request a renewal of the leave of absence for a period of up to one additional year; in such cases, the Graduate Program Director and the Graduate School will review the student's record and future plans to determine whether an additional leave is in the best interests of the student, the graduate program, and the Graduate School.

In order to return from leave and be activated for enrollment by the Graduate School, the student must notify the Graduate School in writing of their intent to return at least one week prior to the start of the term. Unless the student is granted a renewal of a leave of absence, the student must return to active status in the semester following the expiration of a leave of absence; failure to do so may result in dismissal from the

program. If a student does not return from a leave of absence after two consecutive years, they must reapply for admission to the program.

Students should note that a leave of absence can have consequences for their financial aid. Before a leave is taken, it is strongly recommended that students consult with the Office of Financial Aid.

Military Service

Students who have been called into the armed services of the United States and who are consequently withdrawing from the university before the end of the withdrawal period will receive a refund of all tuition and fees paid for the period in question but no academic credit. If they withdraw after the end of the withdrawal period, they will receive full academic credit for the semester with grades as of the date of withdrawal but no refund of tuition.

Non-Degree-Seeking Students

Students admitted as non-degree-seeking graduate students must communicate with the program director in charge of the courses they wish to attend in order to enroll. For the name and contact information of the appropriate program director, prospective students must visit the Graduate and Professional Enrollment Management (https://gpem.luc.edu/portal/admission/?tab=home) website for the program of interest. You must meet with the program director each semester you are enrolled as a non-degree-seeking student.

Admission as a non-degree-seeking student does not guarantee admission to a formal program. Non-degree-seeking students are not eligible for loans or other financial assistance.

Students admitted to Loyola as non-degree-seeking graduate students may apply a maximum of 6 semester hours (2 courses) earned as non-degree-seeking toward a Graduate School degree or certificate program. Acceptance of credit towards the degree or certificate in accordance with catalog requirements for the program and at the discretion of the Dean of the Graduate School.

Probation and Dismissal

This policy outlines the conditions under which a student may be placed on probation or dismiss from their graduate program for academic performance reasons. Students should review the Academic Policy on Time Limit for Completion of Degree Requirements and be aware of departmental timelines. Please note that individual programs may have more stringent rules regarding probation and students should be aware of those policies as listed in their program handbook. Students may be placed on probation or dismissed from their graduate program in one of two cases:

1) Minimum GPA: Students who fail to maintain a grade-point average of at least a 3.00 will be placed on academic probation. In such cases, if the student does not raise the grade-point average to at least 3.00 during the next two consecutive terms in which the student registers, the student will be dismissed for poor scholarship.

Students who are near the end of their programs must raise their cumulative GPA to 3.00 in order to receive a degree. Students will require permission from their program and the Graduate School to continue taking courses after they have completed their program hours in the hope of raising their cumulative GPA above 3.00 in order to graduate.

2) Satisfactory degree progress post coursework: After completion of their coursework, students who are writing a thesis or dissertation must continue to make satisfactory, timely progress towards the degree. The determination of a student's failure to make satisfactory academic progress must be based on:

- Failure to meet one of the milestones according to the timeline for satisfactory academic progress set by the student's program
- Number of NPs: Master's and Doctoral Study and Supervision courses are graded on a P/NP (Pass/No Pass) basis. Students who are not making satisfactory progress should receive an NP, which will prompt the student to be on academic probation. Students who receive two NP grades may face dismissal.
- The outcome of the graduate program's annual graduate student review based on the quality or pace of the student's progress.

In each of these cases, the student must be provided with sufficient feedback and an opportunity to address the problem. The department or program should notify the student and the Graduate School, and the student will be placed on probation. Failure to complete the requirement or make the required progress during the probationary period will result in the case being forwarded to the appropriate faculty committee or unit for a vote on terminating the student from the degree program. While on probation, the student is expected to meet other program deadlines on schedule.

If the committee votes to terminate the student in the program, a program should submit a request for the student's dismissal to the Graduate School. Following the program's communication to the student of the dismissal and its rationale, the Dean will then send a letter of dismissal to the student. A student who is dismissed for failure to maintain satisfactory progress may appeal the decision to the Dean of the Graduate School following the procedure outlined in the Graduate School's Academic Appeal of Non-Coursework Evaluation of Research and Scholarship Policy.

Program-Specific Requirements

Because of the diversity of graduate work in different branches of knowledge, individual graduate programs have varying requirements about undergraduate prerequisites, graduate coursework, research tool requirements, comprehensive examinations, theses and dissertations and other matters. Please consult your department's website for individual program requirements listed in this catalog. In cases where there is a conflict between a program's publications and this catalog, the catalog governs.

Protection of Human and Animal Subjects in Research

A graduate student preparing to conduct research involving the use of human or vertebrate animal subjects, whether or not such research is pursued in connection with a thesis or dissertation, must secure approval of the university's Institutional Review Board for Protection of Human Subjects (IRB) or the Institutional Animal Care and Use Committee (IACUC) prior to undertaking the research.

Please consult the IACUC website (http://www.luc.edu/ors/iacuc/index.shtml/) for complete information.

Readmission after Dismissal

Students who are dismissed by the Graduate School for academic performance reasons may apply for admission after one year of absence. Graduate Program Directors will share applications for readmission with the Graduate School Dean's office and the final decision regarding readmission will be made by the Dean of the Graduate School. Remaining

degree requirements and time limit for degree completion will be articulated and communicated if a student is approved for readmission.

Registration

In order to be certified as active students and to have access to university resources, both new and continuing students are to register before each term in which they are taking courses, working on a thesis or dissertation, completing a practicum or internship or otherwise engaged in graduate study. Applicants must be officially admitted to the Graduate School before they will be permitted to register. Students are responsible for registering for courses in a timely manner through the university's registration system.

No one is permitted to attend any class without first officially registering for that class. Students may not register for classes after the late registration period. A fee is charged for late registration.

Registration at Loyola University Chicago is done through the LOCUS on-line registration system. For specific information on registration, please visit the Office of Registration and Records (http://www.luc.edu/regrec/) website.

Registration for Directed Study, Directed Readings and Independent Study

Individual programs/departments may require students to receive approval prior to registering for these types of courses. Students may request notation on of a specific title on the transcript by submitting to the Graduate School a completed Request for Course Title (https://www.luc.edu/media/lucedu/gradschool/pdfs/Request for Course Title.pdf) form.

Cross-Registration

Students intending to take a course outside the academic unit that includes their program must obtain approval from the course instructor and the "host" unit. Students should contact the host unit for information about registration procedures. They should also consult with their home program to see if these courses will count toward the degree.

Auditing a Course

The decision as to whether to designate particular graduate courses as open to auditors is made by the academic unit offering the course. In order to audit a course, a Graduate School student must 1) complete the Audit Request (https://www.luc.edu/gradschool/academics/forms/) form and 2) receive approval from the academic unit offering the course and the Graduate School. The completed form must be received by the Graduate School by the end of the second week of the semester or by the end of the first week of the summer or intersession term. The Graduate School will not approve a request received after the deadline. Once a course is converted to "audit" for a student, it will not be re-classified as a "for credit" course (i.e., a course that is being audited may not at anytime be counted as credit hours completed toward degree requirements). Completion of the form does not constitute registration for the course; the student is responsible for registering for the course via the university's registration system and must do so prior to the late registration deadline to avoid a late registration fee.

Class attendance is required, and auditors have a right to participate in class discussions. A grade of AU indicates satisfactory attendance; a grade of W will be assigned in cases of unsatisfactory attendance. Auditors do not complete course papers, examinations or other assigned projects. A course that is audited does not count as hours attempted and therefore is not considered in determining a student's enrollment status (i.e., whether the student is classified as full- or part-time) and is not eligible for coverage by a tuition award.

Withdrawal from a Course

Students can withdraw from a class until the last day to receive a W. Once the system switches to assigning WF's student can only withdraw from a class with the permission of the Dean and according to the procedure for change in registration. Please see our Key Dates and Deadlines (https://www.luc.edu/gradschool/key_dates.shtml/) page for specific withdrawal deadlines, which are maintained by the Office of the Bursar.

Students who stop attending a class but have not officially withdrawn will receive the final grade of "WF," which is a penalty grade and equivalent to a grade of "F". Students will incur full financial obligation to the university. Voluntary and repeated unofficial withdrawals from class may result in the student being barred from further attendance in the university. Students may withdraw from class with the final grade of "W" through the first ten weeks of the semester or first four weeks of a summer term.

Students contemplating official withdrawal from a class and receiving or expecting to receive financial assistance should consult with the Office of Student Financial Assistance.

Adding a Course

Students who would like to add a course after the regular registration period must complete a Change of Registration form and obtain the approval of their graduate program director. The form is then submitted to the Graduate School for approval. Such requests are approved only in extraordinary circumstances; forgetting to enroll or enrolling in the wrong course do not constitute adequate grounds for a late add.

Number of Courses Allowed

Registration for nine credit hours per semester is considered the normal full-time courseload. The maximum courseload for Graduate School students is 12 credit hours per semester and six credit hours per summer session.

Registration of Undergraduate Students in Graduate Course

Undergraduates who are judged capable of pursuing graduate studies may be admitted to graduate courses with the approval of the course instructor and the chairperson of the department offering the course. Such courses are ordinarily applicable only toward the student's undergraduate degree; however, under certain circumstances such courses may be applied towards a graduate degree (see the policy on transfer credit below).

Repetition of Course

Students may repeat a course in which they previously received a passing grade only with the specific authorization of the graduate program and the Graduate School Dean. Authorization to repeat courses merely to improve the grade will rarely be given.

In an authorized repetition of a course the student will not receive credit hours toward graduation for both courses. The student will only receive credit hours toward graduation for the most recent attempt.

A student who repeats a course without permission of the Dean and graduate program earns neither credit hours nor quality points for the repeated course.

Research Tool Requirement

Several programs have established a "research tool" requirement (e.g., knowledge of a foreign language, proficiency in statistics) to ensure

that students are adequately prepared to conduct research in their field. Students in these programs must meet the program's deadline for completing the requirement (i.e., prior to sitting for comprehensive examinations or prior to completing a thesis/dissertation proposal).

Responsible Conduct of Research and Scholarship Training

In support of the University Mission (http://luc.edu/mission/mission_vision.shtml/) and in accordance with federal regulations effective January 2010, Loyola University Chicago has implemented a Responsible Conduct in Research and Scholarship (https://www.luc.edu/ors/RCRHome.shtml/) program that incorporates ethics education into the curriculum for all students.

The Graduate School requires RCRS training for all matriculating PhD students and for master's students who are writing a thesis. Graduate Program Directors in non-thesis master's programs may recommend RCRS training for their students.

All PhD students and Master's students who are writing a thesis must successfully complete the Responsible Conduct in Research and Scholarship training as part of the degree requirements. It is strongly recommended that students complete this two-day training before beginning the dissertation/thesis stage of the program.

Students on the Lakeside campuses take UNIV 370, offered at least twice per academic year on campus, to complete this requirement. Students at the Health Sciences Campus, and in the Marcella Niehoff School of Nursing receive separate RCRS training, and students in some School of Education programs complete this requirement with their methods coursework.

Students with Disabilities

At times, students with disabilities may wish to avail themselves of the university's ancillary services. Students who would like to seek accommodations at the university for their coursework or merit award (teaching and research assistantships) need to contact the Coordinator of Services for Students with Disabilities. Contact information is available at www.luc.edu/depts/lac/disabilities.

Time Limit for Completion of Degree Requirements

PhD Degree

Students must complete all PhD degree requirements, including the dissertation, within eight years of beginning the first course at Loyola University Chicago applicable toward the doctoral degree. However, students who completed a relevant master's degree (or a significant amount of relevant graduate coursework) at another institution prior to entering the doctoral program must complete all Ph.D. requirements, including the dissertation, within six years of beginning the first course at Loyola University Chicago applicable toward the doctoral degree.

In addition to these limits, Ph.D. students must also make good progress at the dissertation stage. If a doctoral candidate does not successfully defend and submit the dissertation within five years after becoming a doctoral candidate (by approval of the dissertation proposal), the student will be dropped from candidacy. The student must then pass a second comprehensive examination or program-specific equivalent to be reinstated as a doctoral candidate, and the time limit for submitting the dissertation will be determined by the Dean of the Graduate School and the candidate's committee. Exceptions to the five-year time limit require a petition to the dissertation chair, who forwards the petition to the Graduate Program Director and then the Graduate School. This policy will become effective for students achieving candidacy in the fall 2006 semester or later.

Master's Degree

Students must complete all master's degree requirements within five years of beginning the first course at Loyola University Chicago taken as a degree-seeking student.

Extensions of Time Limits

A student may request an extension of the time limit for completion of degree requirements due to special circumstances (e.g., medical, personal, professional, or research related reasons). A student requesting an extension shall complete an Extension of Time Limit for Completion of Degree Requirements form, which can be accessed by logging into GSPS (https://gsps.luc.edu/Secure/Login.aspx), attach required information, and contact the dissertation/thesis director (if applicable) and the graduate program director. These faculty members are to then make a recommendation on the student's behalf to the Graduate School. Decisions regarding the approval of extensions rest with the Graduate School; when reviewing requests for an extension, the Graduate School may require additional information or documentation from the student or the graduate program. In cases where the graduate program recommends that the extension not be granted, the student may petition the Graduate School to consider her/his request.

Extensions are ordinarily limited in duration to one full academic year. If a student has not completed all degree requirements by the extended deadline, the student may request an additional extension for a period of up to one year; in such cases, the graduate program and the Graduate School will review the student's record and future plans to determine whether an additional extension is in the best interests of the student, the program and the Graduate School. Students who do not complete all degree requirements within the required time limit are subject to dismissal from the program.

Transcripts of Graduate Work

All courses taken by the student and other relevant academic information are included on the student's official academic transcripts, which are maintained by the university's Office of Registration and Records.

Transfer Credit

It is ordinarily expected that all work towards a master's degree will be completed in the program at Loyola University Chicago. However, up to six credit hours of graduate work completed in another Loyola program or at another institution may be applied toward a master's degree with permission of the program's Graduate Program Director (GPD) and the Graduate School. Students may request transfer of credit, and the program can make its recommendation to the Graduate School during the student's first semester in the Graduate School. The Graduate School maintains responsibility for approving transfer credit. To ensure that each student is well prepared for undertaking scholarship in the student's current field of study, the Graduate School's decision regarding transfer credit will be based on the quality of the student's work, the time interval since its completion and its relevance to the student's program of study at Loyola. Coursework below a B grade will not be accepted. Students may not transfer coursework that has been awarded as part of a conferred or completed degree program. If a course fulfills the learning outcomes of a requirement in the student's master's program, and upon department recommendation, a specific required course may be substituted with an elective chosen in concert with the student's program director.

For students entering a PhD program with prior graduate work completed in another Loyola program or at another institution, up to one-half of the total number of semester hours required by the doctoral program at Loyola may be applied toward the PhD degree. It may be possible for a completed relevant master's degree to be applied towards the PhD, and this is further elaborated in the Advanced Standing policy (Approved May 4, 2021).

Withdrawal from the University

An enrolled student who wishes to withdraw from the university during any semester must notify the Dean's office and his or her graduate program director in writing. A student is considered to be in attendance until such notice has been received by the Dean or the Graduate Program Director. All financial refunds or obligations are dated from the date of the formal notice of withdrawal and not from the date of the last class attended; see the Bursar's website for more information. It is the student's obligation to inform the Graduate School promptly of the intention to withdraw. Telephone messages or non-attendance in class are not official notification.

A student may be required to withdraw from the university because of academic deficiency, lack of sufficient progress toward completion of degree requirements, failure to adhere to university requirements, degree requirements and/or regulations for conduct or failure to meet financial obligations to the university.

Complete Emergency Withdrawal

Students facing a significant emergency circumstance (see "Definitions" section below) that prevents them from continuing in or completing an academic term may submit an Intent to Withdraw (https://www.luc.edu/media/lucedu/registrationrecords/provostpdfformsasof2022/Notice%20of%20Intent%20to%20Withdraw.pdf) form to their program director or the Graduate School. All requests must be supported by appropriate documentation. The Intent to Withdraw form is reviewed by the academic dean's office of the student's primary college/school for approval and processing.

Requests for complete emergency term withdrawals are considered after the last day of a term to drop a course or courses without a grade of "W." In cases where the student is incapacitated (see "Emergencies Resulting in Student Incapacitation" below for more details), the requests for complete emergency term withdrawals may be submitted by a parent, spouse or legal guardian.

Complete emergency term withdrawals constitute a withdrawal from all classes and may result in final grades of "WE" in all classes for the given academic term. The University does not grant partial withdrawals (i.e., requests to withdraw from some classes but not others) for emergencies. Grades of "WE" have no impact on a student's cumulative GPA. The "WE" grade has no earned or attempted hours associated with the grade; however, "WE" counts towards attempted hours when determining Satisfactory Academic Progress (https://www.luc.edu/finaid/aid-process/responsibilities/academic-progress/) for continued financial aid eligibility. This policy does not apply in cases where the student has completed final exams or final projects for classes in the term impacted by the significant emergency circumstance. When final grades have posted, students should utilize the Appeal for Change of Academic Record (https://www.luc.edu/media/lucedu/registrationrecords/provostpdfformsasof2022/Appeal%20for%20Change%20of%20Academic%20Record.pdf) form and submit to their primary academic advisor, program director or assistant/associate Dean.

The Office of the Bursar will determine the impact of the Withdrawal on the students account balance in LOCUS. The Student Account Balance will be determined by the University withdrawal calendar Loyola Withdrawal Schedule (https://www.luc.edu/bursar/withdrawalschedulechangecalendars/). The Bursar will not assess any late payment fees after the date of Withdrawal.

EMERGENCIES RESULTING IN STUDENT INCAPACITATION

It is required that a complete emergency term withdrawal request be submitted by the student. However, if an emergency situation has resulted in the student's temporary or long-term incapacitation for a period that may extend beyond the one-calendar-year deadline of this policy, the student's college/school academic dean's office, the Office of the Dean of Students, a parent (for minors), emergency contact person, or other legally assigned designee may submit a request on the student's behalf. In such cases, the student's college/school academic dean's office may require additional documentation (e.g., letter from medical doctor, hospitalization forms, power of attorney).

POTENTIAL IMPLICATIONS

The section below provides a non-exhaustive list and general information on the potential implications of a complete emergency term withdrawal. While the University offers a number of considerations that help support students who are facing emergencies, there are other important factors that should be taken into consideration before submitting a request for a complete emergency term withdrawal. Whenever possible, it is strongly recommended that a student discuss all possible options, including the potential implications of a complete emergency withdrawal with their primary academic advisor.

FINANCIAL IMPLICATIONS: TUITION AND FINANCIAL AID

Students are strongly encouraged to purchase tuition insurance (e.g., A.W.G Dewar, Inc.) prior to the start of the academic term.

Note that a complete emergency withdrawal does not automatically result in tuition credit. Please refer to the withdrawal schedule on the Office of the Bursar's website.

COMPLETE EMERGENCY WITHDRAWAL PROCEDURES DURING AN ACADEMIC TERM

Although it is recommended that the student submit as much information as possible, documentation does not need to specify details of the emergency that may be protected by law or considered private. Documentation must come from a verifiable authority (e.g., community/licensed healthcare provider, police agency, court of law, US military etc.) and minimally confirm the following:

Requests for a complete emergency withdrawal will be reviewed and decided by the student's college/school academic dean's office. Other areas, such as the Office of the Dean of Students, the Office for Equity & Compliance, or Student Accessibility Center, may be consulted in cases where the student was either referred or is being supported by said office. Additional documentation and/or information may be requested of the student before a final decision is made.

The student will receive a written decision notification no later than 14 business days after receipt of original request via LUC email. If the school is unable to meet the 14 business-days deadline, the student will be notified in writing of the new deadline. If the request is approved, the effective date and further instructions before returning to campus (if necessary) will be provided. The date of the complete emergency withdrawal will be determined by the primary college/school dean's office based on the date of the last academically related activity.

POST-EMERGENCY COMPLETE WITHDRAWAL RE-ENTRY PROCESS

Unless otherwise indicated in the approval notification or by the Office of the Dean of Students in lieu of the Loyola University Chicago Behavior Concerns Team (BCT), the process for returning to the university will follow standard policies and procedures for re-enrollment. Students who were being supported by BCT before withdrawing or are returning because of a mental health hospitalization are required to consult the Office of the Dean of Students for instructions on potential re-entry requirements.

DEFINITIONS

Significant Emergency Circumstance – an unforeseen emergency situation that prevents a student from continuing in or completing an academic term. Some examples include but are not limited to:

- Chronic illness of withdrawing student
- Death of parent/legal guardian or medical issue of a family member and the withdrawing student must become a part-time or full-time caretaker of family member
- Extreme financial hardship
- Mental health condition, serious injury or illness of withdrawing student
- Sudden or consistent lack of transportation which affected the withdrawing student's ability to meet in-person attendance requirements
- Other situations, at the University's sole discretion, which are deemed to result in significant hardship to the withdrawing student

This list includes examples of emergency situations that directly affect the student.

PROFESSIONAL LICENSE DISCLOSURES

Loyola University Chicago College of Arts and Sciences

Clinical Psychology PhD Program

Professional License Disclosures

In the table below, an asterisk (*) indicates that earning a doctoral degree from a program accredited by the American Psychological Association (APA) is deemed to meet the educational requirements for licensure in that State. The Clinical Psychology PhD Program in the Department of Psychology at Loyola University Chicago is currently – and has been continuously – accredited by APA since 1959 (see: https://accreditation.apa.org/). Please note that this table does not include an evaluation of state-specific requirements beyond that of educational or curricular requirements. State requirements are subject to change. These statements and program completion do not guarantee licensure. Students should review licensure requirements – including non-educational requirements such as certification/examination work experience, background checks, etc. – for the states in which they intend to see certification/licensure, and students who intend to change states should review their new states' requirements.

State or Territory	Program Satisfies Curricular Requirements?	State Professional Association or License Authority and Notes
California - CA	No	https://www.psychology.ca.gov/; Although a doctoral degree in Clinical is required, additional coursework or experience beyond what is routinely offered at the Clinical Psychology PhD Program at Loyola University Chicago may be required in California, including pre-license curriculum or training in: human sexuality (10 contact hours); alcoholism/chemical dependency detection and treatment (one semester or quarter); child abuse assessment (7 hours); spousal/partner abuse, detection and intervention strategies (15 contact hours); aging and long-term care (10 contact hours).
Michigan - MI	Yes	https://www.michigan.gov/lara/0,4601,7-154-89334_72600_ **Note:** Beginning in March 30, 2022, a one-time training in identifying victims of human trafficking must be completed before licensure
New Jersey - NJ	No	https://www.njconsumeraffairs.gov/psy (https://www.njconsumeraffairs.gov/psy/)/; In addition to a doctoral degree from an APA accredited program like the Clinical Psychology PhD Program at Loyola University Chicago, New Jersey requires the following breakdown of credits and topic areas: •Six (6) semester credits in Personality Theory and Human Development Theory; •Six (6) semester credits in Learning Theory and/or Physiological Psychology; •Six (6) semester credits in Psychological Measurement and Psychological Assessment; •Six (6) semester credits in Psychopathology; •Six (6) semester credits in Psychological therapy/counseling or Industrial/Organizational Psychology; and •Six (6) semester credits in Research and Statistical Design
New York - NY	Yes	http://www.op.nysed.gov/prof/psych (http://www.op.nysed.gov/prof/psych/)/; In addition to a doctoral degree from a program like the Clinical Psychology PhD Program at Loyola University Chicago, New York requires the following breakdown of credits and topic areas: •Three (3) semester credits in biological bases of behavior •Three (3) semester credits in cognitive-affective bases of behavior •Three (3) semester credits in social bases of behavior •Three (3) semester credits in individual differences •Three (3) semester credits in psychometrics •Three (3) semester credits in history and systems of psychology •Three (3) semester credits in research design, methodology, and statistics

Oklahoma - OK	Yes	https://www.ok.gov/psychology (https://www.ok.gov/psychology/)/; In addition to a doctoral degree from an APA accredited program like the Clinical Psychology PhD Program at Loyola University Chicago, New Jersey requires the following breakdown of credits and topic areas: •Three (3) semester credits in Scientific and professional ethics and standards; •Three (3) semester credits in Research design and methodology •Three (3) semester credits in Statistics and psychometrics •Three (3) semester credits in Biological bases of behavior •Three (3) semester credits in Cognitive-affective bases of behavior •Three (3) semester credits in Social bases of behavior •Three (3) semester credits in Individual bases of behavior

Medical Laboratory Science Professional License Disclosures

State requirements are subject to change. These statements and program completion do not guarantee licensure. Students should review licensure requirements – including non-educational requirements such as certification/examination work experience, background checks, etc. – for the states in which they intend to see certification/licensure, and students who intend to change states should review their new states' requirements.

For additional guidance on Medical Laboratory Sciences licensure requirements please visit https://www.ascp.org/content/board-of-certification/get-credentialed (https://www.ascp.org/content/board-of-certification/get-credentialed/)

State or Territory	Program Satisfies Curricular Requirements?	State Professional Association or License Authority and Notes
Alabama - AL	Yes	
Alaska - AK	Yes	
Arizona - AZ	Yes	

Arkansas - AR	Yes	
California - CA	No	Must pass ASCP BOC, take CA law online quiz; 3 semester hours of light and electricity physics, fee
Colorado - CO	Yes	
Connecticut - CT	Yes	
Delaware - DE	Yes	
Florida - FL	Yes	Must pass BOC, Fee; FL approved one hour course on HIV/AIDS within 6 months of license
Georgia - GA	Yes	Fee
Hawaii - HI	Yes	Must pass BOC, pay fee
Idaho - ID	Yes	
Illinois - IL	Yes	
Indiana - IN	Yes	
Iowa - IA	Yes	
Kansas - KS	Yes	
Kentucky - KY	Yes	
Louisiana - LA	Yes	Must pass BOC, pay fee
Maine - ME	Yes	
Maryland - MD	Yes	
Massachusetts - MA	Yes	
Michigan - MI	Yes	
Minnesota - MN	Yes	
Mississippi - MS	Yes	
Missouri - MO	Yes	
Montana - MT	Yes	Must pass BOC, pay fee
Nebraska - NE	Yes	
Nevada - NV	Yes	Must pass BOC, pay fee
New Hampshire - NH	Yes	
New Jersey - NJ	Yes	
New Mexico - NM	Yes	
New York - NY	Yes	Must pass BOC, state licensure exam, and pay fee
North Carolina - NC	Yes	
North Dakota - ND	Yes	Must pass BOC, pay fee
Ohio - OH	Yes	
Oklahoma - OK	Yes	
Oregon - OR	Yes	
Pennsylvania - PA	Yes	
Rhode Island - RI	Yes

Virginia - VA	Yes	
Washington - WA	Yes	
West Virginia - WV	Yes	Must pass BOC, pay fee
Wisconsin - WI	Yes	
Wyoming – WY	Yes	
American Samoa - AS	Yes	
District of Columbia - DC	Yes	
Guam - GU	Yes	
Northern Mariana Islands - MP	Yes	Must pass certification exam, pay fee
Puerto Rico - PR	Yes	Must pass BOC, pay fee
Virgin Islands - VI	Yes	

FACULTY

A

Abbadi, Sawsan. Senior Lecturer. Ed.D, College of Arts and Sciences, Literature in Translation, Modern Languages & Literatures

Abbasi, Rasha. Assistant Professor. Ph.D, College of Arts and Sciences, Physics

Abdalla, Widad. Lecturer. Ph.D, College of Arts and Sciences, Mathematical Sciences

Abdul-Rahim, Omar M. Lecturer. Ph.D, College of Arts and Sciences, Biology

Abegaz, Brook W. Associate Professor. Ph.D, College of Arts and Sciences, Engineering Science, Engineering, Engineering Science, Honors Program

Abouelazm, Ayesha. Instructor. M.F.A, School of Communication, Communication

Abraz, Osman. Lecturer. Quinlan School of Business, Business Administration, Info Sys and Supply Chain Mgmt

Abuhamad, Mohammed. Assistant Professor. Ph.D, College of Arts and Sciences, Computer Science, Digital Humanities, Mathematical Sciences

Abuzayyad, Tareq. Lecturer. Ph.D, College of Arts and Sciences, Physics

Acosta Navas, Diana. Assistant Professor. Ph.D, Quinlan School of Business, Management

Adams, Bill H. Assistant Professor. Grad Schl at Medical Center, Schl of Health Sci & Pub Hlth, School of Nursing, Biomedical Sciences, Public Health Sciences, General Nursing

Adler, Shifra. Clinical Asst Professor Ft. M.A., M.S., Arrupe College, Mathematics, Statistics

Aftab, Aqdas. Assistant Professor. M.A., Ph.D, College of Arts and Sciences, English

Ahumada, Minerva. Clinical Assoc Professor Ft. Ph.D, Arrupe College, Philosophy

Akchurin, Maria. Assistant Professor. Ph.D, College of Arts and Sciences, Sociology

Akelian, Lena. Instructor. School of Nursing, General Nursing, Maternal/Child Nursing

Akers, Robert T. Instructor. B.A., School of Communication, Communication

Alexander, Katherine. Assistant Professor. M.B.A, Quinlan School of Business, Business Honors, Management

Ali, Sarah. Clinical Asst Professor Ft. Ph.D, College of Arts and Sciences, Engineering Science, Engineering, Engineering Science, Honors Program, Mathematical Sciences

Allen, Jonathan. Assistant Professor. Grad Schl at Medical Center, Microbiology and Immunology

Alley, Charles. Instructor. Ph.D, College of Arts and Sciences, Mathematical Sciences

Alsip, Mike. Instructor. M.B.A, Quinlan School of Business, Info Sys and Supply Chain Mgmt, Info Systems & Operations Mgmt

Alvarez, René Luís L. Clinical Assoc Professor Ft. Ph.D, Arrupe College, History

Amouamouha, Maryam. Clinical Asst Professor. Ph.D, College of Arts and Sciences, Engineering

Anderson, Emily. Professor. College of Arts and Sciences, Grad Schl at Medical Center, Graduate School Programs, Biomedical Sciences

Anderson, Matthew M. Associate Professor. Schl of Health Sci & Pub Hlth, Healthcare Administration, Schl of Health Sci & Pub Hlth

Andrejevs, Olegs. Lecturer. College of Arts and Sciences, Theology

Andreoni, Ann A. Clinical Assistant Professor. School of Nursing, Comm Mental Hlth Admin Nurs, General Nursing, Maternal/Child Nursing

Andress, Reinhard. Professor. Ph.D, College of Arts and Sciences, School of Communication, Literature in Translation, Modern Languages & Literatures, Communication

Andrews, Michael F. Associate Professor. Ph.D, College of Arts and Sciences, Philosophy

Apostolopoulos, Dimitris. Assistant Professor. Ph.D, College of Arts and Sciences, Philosophy

Arias, Robert A. Assistant Professor. Ph.D, Quinlan School of Business, Marketing Department

Armstrong, Jennifer. Clinical Associate Professor. Ph.D, Arrupe College, Communication

Attie, Mario. Assistant Professor. Ph.D, College of Arts and Sciences, Philosophy

Avdeyeva, Olga. Associate Professor. Ph.D, College of Arts and Sciences, Political Science

Axelrod, Howard. Advanced Lecturer. M.F.A, College of Arts and Sciences, English

Azimi, Shabnam. Assistant Professor. Ph.D, Quinlan School of Business, Marketing Department

B

Bachmeier, Patti A. Clinical Asst Professor. School of Nursing, Medical/Surgical Nursing

Bacic, Dinko. Assistant Professor. Ph.D, Quinlan School of Business, Business Honors, Info Sys and Supply Chain Mgmt, Info Systems & Operations Mgmt

Bacidore, Vicki A. Clinical Assistant Professor. School of Nursing, General Nursing, Medical/Surgical Nursing

Baker, Aaron. Associate Professor. M.F.A, College of Arts and Sciences, English

Baker, Nicholas. Assistant Professor. Ph.D, College of Arts and Sciences, Psychology

Baker, Susan C. Professor. Grad Schl at Medical Center, Microbiology and Immunology

Bakowska, Joanna. Associate Professor. Grad Schl at Medical Center, Pharmacology

Balasubramanian, Savina. Assistant Professor. Ph.D, College of Arts and Sciences, Sociology

Balija, Amy. Lecturer. Ph.D, College of Arts and Sciences, Chemistry and Biochemistry

Ballicora, Miguel A. Professor. Ph.D, College of Arts and Sciences, Chemistry and Biochemistry

Banerjee, Swarnali. Associate Professor. Ph.D, College of Arts and Sciences, Biology, Mathematical Sciences

Barcus, Courtney. Clinical Assistant Professor. Ph.D, School of Education, Curr Instr & Educ Psyc, Teaching Learning & Leading

Barefield, David Y. Assistant Professor. Grad Schl at Medical Center, Physiology

Barnes, Bobby. Sr Lecturer. Ph.D, Quinlan School of Business, Economics

Basner, Andrew D. Lecturer. College of Arts and Sciences, Chemistry and Biochemistry

Bauer, Brittney. Assistant Professor. Ph.D, Quinlan School of Business, Marketing Department

Baura, Gail. Professor. Ph.D, College of Arts and Sciences, Engineering Science, Engineering, Engineering Science

Bayley, Elisabeth. Sr Lecturer. Ph.D, College of Arts and Sciences, English, Philosophy

Beach, Jordan. Assistant Professor. Grad Schl at Medical Center, Physiology

Beatty, Christine M. Advanced Lecturer. Ph.D, College of Arts and Sciences, Biology

Becker, Daniel. Professor. B.A., Ph.D, College of Arts and Sciences, Chemistry and Biochemistry, Philosophy, Theology

Becker, Mary Ann A. Clinical Professor Ft. J.D., School of Law, Law Department

Becklenberg, Amy. Clinical Associate Professor. School of Nursing, General Nursing

Beischel, William J. Assistant Professor. Ph.D, College of Arts and Sciences, Psychology

Bell, Jeannine. Professor. J.D., Ph.D, School of Law, Law Department

Beltran, David. Lecturer. M.A., College of Arts and Sciences, Latin American Studies, Modern Languages & Literatures

Berg, Bjorn K. Clinical Instructor. Ph.D, Quinlan School of Business, Accounting, Business Honors

Berg, Martin B. Professor. Ph.D, College of Arts and Sciences, Biology

Bergeron, Peter E. Lecturer. Ph.D, College of Arts and Sciences, Philosophy

Bergman, William. Clinical Instructor Ft. Quinlan School of Business, Economics, Finance

Bertozzi, Alberto. Lecturer. Ph.D, College of Arts and Sciences, Philosophy

Biderbost, Kate. Advanced Lecturer. M.F.A, College of Arts and Sciences, Dept of Fine & Performing Arts

Billingsley, Kelvin. Associate Professor. Ph.D, College of Arts and Sciences, Chemistry and Biochemistry

Binaku, Katrina. Advanced Lecturer. Ph.D, College of Arts and Sciences, Chemistry and Biochemistry

Bindrich, Cortney. Clinical Asst Professor Ft. Ed.D, School of Education, Curr Instr & Educ Psyc

Blackmond Larnell, Twyla. Associate Professor. Ph.D, College of Arts and Sciences, Political Science

Blajer De La Garza, Yuna. Assistant Professor. Ph.D, College of Arts and Sciences, Political Science

Blanke, Insa. Dir For & Intl Llm Prg-Instr. J.D., School of Law, Law Department, School of Law

Bloom, Michael P. Clinical Assoc Professor - Ft. College of Arts and Sciences, Honors Program

Bninski, Julia L. Clinical Assoc Professor Ft. Ph.D, Arrupe College, English, Writing and Composition

Bobay, Kathleen. Professor. Schl of Health Sci & Pub Hlth, School of Nursing, Health Informatics & Data Sci, Public Health Sciences, Schl of Health Sci & Pub Hlth, Comm Mental Hlth Admin Nurs, General Nursing

Bocchetta, Maurizio. Associate Professor. Grad Schl at Medical Center, Biochem & Molecular Biology, Oncology Research Institute

Bohanon, Hank M. Professor. Ph.D, School of Education, Counseling Psychology, Curr Instr & Educ Psyc, Teaching Learning & Leading

Bohnert, Amy. Professor. Ph.D, College of Arts and Sciences, Psychology

Booker, Danielle. Assistant Professor. Ph.D, Quinlan School of Business, Accounting

Bost, Suzanne M. Professor. Ph.D, College of Arts and Sciences, English, Women Studies

Bougie, Jon L. Professor. B.A., Ph.D, College of Arts and Sciences, Physics

Bourque, Matthew. Advanced Lecturer. Ph.D, College of Arts and Sciences, Mathematical Sciences

Boychenko, Leanna. Associate Professor. Ph.D, College of Arts and Sciences, Classical Studies

Boyer, Bruce. Clinical Professor Ft. J.D., School of Law, Law Department

Boyle, Jennifer R. Clinical Professor Ft. Ph.D, Arrupe College, Political Science

Boyle, Patrick. Associate Professor. Ph.D, College of Arts and Sciences, Political Science

Bradshaw, Melissa. Senior Lecturer. Ph.D, College of Arts and Sciences, Digital Humanities, English, Interdisciplinary Studies

Brauninger, Jason E. Clinical Assistant Professor. School of Nursing, General Nursing

Brecht, Mara. Associate Professor. Ph.D, College of Arts and Sciences, Theology

Breen, John M. Professor. J.D., School of Law, Law Department

Breen, Katherine M. Assistant Professor. School of Nursing, General Nursing

Brendel, Jennifer M. Clinical Professor Ft. J.D., School of Law, Law Department

Brentner, Laura. Advanced Lecturer. Ph.D, College of Arts and Sciences, Inst of Environmntl Sustainabl, Inst of Environmntl Sustainabl

Breslin, Peter W. Clinical Assoc Professor Ft. Ph.D, College of Arts and Sciences, Biology

Brito-Millan, Marlene. Assistant Professor. Ph.D, Inst of Environmntl Sustainabl, Inst of Environmntl Sustainabl

Bronsteen, John M. Professor. J.D., School of Law, Law Department

Brooks, Byron. Assistant Professor. Ph.D, College of Arts and Sciences, Psychology

Brown, Jessica R. Sr Professional In Residence/Lecturer. M.A., School of Communication, Communication

Bruder, Matthew. Clinical Assistant Professor. School of Nursing, General Nursing

Brunson, Samuel. Professor. J.D., School of Law, Law Department

Bucholz, Robert O. Professor. DPhil, College of Arts and Sciences, History

Buechele, Susan E. Clinical Assistant Professor. School of Nursing, Comm Mental Hlth Admin Nurs, General Nursing, Maternal/Child Nursing

Buitrón Vera, Gabriela A. Lecturer. Ph.D, College of Arts and Sciences, Literature in Translation, Modern Languages & Literatures

Buldak, Gerald L. Senior Lecturer. B.A., Ph.D, College of Arts and Sciences, Biology

Burgo, Clara. Associate Professor. Ph.D, College of Arts and Sciences, Modern Languages & Literatures

Burke, Daniel E. Clinical Assoc Professor Ft. Ph.D, Arrupe College, English, Writing and Composition

Burkhart, Elizabeth E. Professor. School of Nursing, General Nursing

Burkhart, Theresa M. Assistant Professor. Schl of Health Sci & Pub Hlth, Healthcare Administration, Schl of Health Sci & Pub Hlth

Burns, Michael B. Associate Professor. Ph.D, College of Arts and Sciences, Biology, Cmun Tech & Public Service, Graduate School Programs, Philosophy

Butler, Noah. Advanced Lecturer. Ph.D, College of Arts and Sciences, Anthroplogy Department

Byrn, Mary A. Associate Professor. School of Nursing, General Nursing, Maternal/Child Nursing

C

Cafferty, Siobhan M. Clinical Asst Professor Ft. Ed.D, School of Education, School of Law, Curr Instr & Educ Psyc, Education Leadership & Policy, Law Department

Cain, Emily R. Associate Professor. M.A., Ph.D, College of Arts and Sciences, Honors Program, Theology

Calpino, Teresa J. Lecturer. Ph.D, College of Arts and Sciences, Theology

Camacho, Ricardo. Clinical Asst Professor. Ed.D, School of Education, Counseling Psychology, Curr Instr & Educ Psyc

Campbell, Edward. Professor. Grad Schl at Medical Center, Microbiology and Immunology

Campbell Deem, Brian. Lecturer. Ph.D, College of Arts and Sciences, Physics

Canaris, Michael M. Associate Professor. Ph.D, Grad Schl at Medical Center, Institute of Pastoral Studies, Graduate School Programs, Pastoral Studies

Cannon, Brian L. Associate Professor. Ph.D, College of Arts and Sciences, Biology, Physics

Cantwell, Christopher. Assistant Professor. Ph.D, College of Arts and Sciences, Digital Humanities, History

Casebolt, Tara T. Assistant Professor. Schl of Health Sci & Pub Hlth, Public Health Sciences

Castellanos, Jose M. Clinical Assoc Professor Ft. Ph.D, Arrupe College, English, Writing and Composition

Cavallo, Susana A. Professor. Ph.D, College of Arts and Sciences, Honors Program, Modern Languages & Literatures

Cavanaugh, Daniel J. Associate Professor. Ph.D, College of Arts and Sciences, Biology, Neuroscience

Cejovic, Vesna. Clinical Associate Professor. Ed.D, School of Education, Curr Instr & Educ Psyc, Teaching Learning & Leading

Ceko, Theresa C. Clinical Professor Ft. J.D., School of Law, Law Department

Chakraborti, Lopamudra. Assistant Professor Of Economics. Ph.D, Inst of Environmntl Sustainabl, Quinlan School of Business, Inst of Environmntl Sustainabl, Economics

Chamberlin, Julie. Lecturer. College of Arts and Sciences, English

Chan-Tin, Eric. Associate Professor. Ph.D, College of Arts and Sciences, Computer Science, Digital Humanities

Chang, Eric. Lecturer. Ph.D, College of Arts and Sciences, Mathematical Sciences

Chee, Florence M. Associate Professor. Ph.D, School of Communication, Communication

Chen, Angela X. Instructor. M.B.A, Quinlan School of Business, Business Administration, Info Sys and Supply Chain Mgmt, Info Systems & Operations Mgmt

Chen, Hong. Senior Lecturer. B.A., B.S., College of Arts and Sciences, Modern Languages & Literatures

Chen, Vincent C-F. Associate Professor. Ph.D, College of Arts and Sciences, Engineering Science, Engineering, Engineering Science

Chen, Xiangpei. Assistant Professor. Ph.D, Quinlan School of Business, Accounting

Chen, Yanan. Assistant Professor. Ph.D, College of Arts and Sciences, Biology

Cheverud, Jim. Professor. Ph.D, College of Arts and Sciences, Biology

Chin, Emily. Clinical Assistant Professor. School of Nursing, General Nursing, Maternal/Child Nursing

Chinitz, David E. Professor. B.A., M.S., M.A., Ph.D, College of Arts and Sciences, English, Honors Program

Cho, Katherine S. Assistant Professor. Ph.D, School of Education, Education Leadership & Policy

Choi, Hae mi. Associate Professor. Ph.D, Quinlan School of Business, Finance

Cielto, Janene. Lecturer. M.S., College of Arts and Sciences, Psychology

Cinar, Mine. Professor. Ph.D, College of Arts and Sciences, Quinlan School of Business, Business Honors, Economics, Management

Ciszek, Jacob W. Professor. Ph.D, College of Arts and Sciences, Chemistry and Biochemistry

Classen, Timothy J. Assoc Prof - Dir Hlth Admin. Ph.D, Quinlan School of Business, Economics, Health Care Management

Clipstone, Neil. Associate Professor. Grad Schl at Medical Center, Pharmacology

Cochran, Dan L. Clinical Associate Professor. Ph.D, Arrupe College, English, Writing and Composition

Coffman, Elizabeth. Professor. B.A., M.A., Ph.D, School of Communication, Communication

Cole, Evan J. Instructor. B.A., M.S., College of Arts and Sciences, Mathematical Sciences

Coleman, Brett R. Research Assistant Professor. Ph.D, College of Arts and Sciences, Sociology, Urban Studies

Condon, Meghan. Associate Professor. Ph.D, College of Arts and Sciences, Political Science

Conley, Colleen. Associate Professor. B.A., Ph.D, College of Arts and Sciences, Psychology

Connor, Jorgia. Associate Professor. School of Nursing, Comm Mental Hlth Admin Nurs, General Nursing, Maternal/Child Nursing, Medical/Surgical Nursing

Contag, JaNae. Lecturer. M.F.A, College of Arts and Sciences, Dept of Fine & Performing Arts

Conway-Phillips, Regina. Associate Professor. Schl of Health Sci & Pub Hlth, School of Nursing, Healthcare Administration, General Nursing, School of Nursing

Cook, Blanche B. Professor. J.D., Arrupe College, School of Law, Criminal Justice, Law Department, School of Law

Cook, David. Lecturer. M.A., College of Arts and Sciences, Dept of Fine & Performing Arts

Cornelius, Ian. Associate Professor. Ph.D, College of Arts and Sciences, English, Honors Program

Coupet, Sacha. Professor. J.D., School of Law, Law Department

Cragwall, Jasper. Associate Professor. B.A., Ph.D, College of Arts and Sciences, English, Honors Program

Craita, Irina. Lecturer. Ph.D, College of Arts and Sciences, Physics

Crepelle, Adam. Assistant Professor. J.D., M.A., LL.M., School of Law, Law Department

Cullen, Sarah. Advanced Lecturer. B.A., College of Arts and Sciences, Dept of Fine & Performing Arts

Cummings, Jason L. Endowed Assistant Professor. Ph.D, College of Arts and Sciences, Sociology

Cunha Silva, Patrick. Assistant Professor. M.A., Ph.D, College of Arts and Sciences, Political Science

Cutrofello, Andrew. Professor. Ph.D, College of Arts and Sciences, Philosophy

D

Dale, Rodney. Associate Professor. Ph.D, College of Arts and Sciences, Biology

Damarjian, Alex. Instructor. Ph.D, College of Arts and Sciences, School of Communication, Computer Science, Communication

Darnell, Julie S. Associate Professor. College of Arts and Sciences, Inst of Environmntl Sustainabl, Schl of Health Sci & Pub Hlth, Inst of Environmntl Sustainabl, Public Health Sciences

Daubenmire, Patrick L. Associate Professor. Ph.D, College of Arts and Sciences, School of Education, Biology, Chemistry and Biochemistry, Computer Science, Mathematical Sciences, Physics, Curr Instr & Educ Psyc

Dault, David. Assistant Professor. Ph.D, Grad Schl at Medical Center, Institute of Pastoral Studies, Graduate School Programs, Pastoral Studies

Davidson, Denise A. Associate Professor. B.S., M.S., Ph.D, College of Arts and Sciences, Psychology

Davis, Steve. Advanced Lecturer. Ph.D, College of Arts and Sciences, Psychology

Davis, Timone. Associate Professor. DMin, Institute of Pastoral Studies, Pastoral Studies

Dawson Daniels, Dianne M. Clinical Professor Ft. Quinlan School of Business, Sch of Cont/Prof Studies, School of Communication, IT Leadership and Strategy, Schl of Cont/Prof Studies, Management, Communication

Williams, Matthew S. Advanced Lecturer. Ph.D, College of Arts and Sciences, Global & International Studies, Global Studies, Sociology

Williams, Neil G. Associate Professor. J.D., School of Law, Law Department

Wilroy, Marcy D. Clinical Asst Professor Ft. School of Social Work, Social Work, Social Work Field Instruction

Wilson, Andrew J. Advanced Lecturer. Ph.D, College of Arts and Sciences, History, Honors Program

Wilson, Stephanie J. Instructor. College of Arts and Sciences, Schl of Health Sci & Pub Hlth, Applied Health Sciences, Schl of Health Sci & Pub Hlth

Wilson, Susan. Lecturer. Ph.D, College of Arts and Sciences, Psychology

Wisotzki, Paula. Professor. Ph.D, College of Arts and Sciences, Dept of Fine & Performing Arts, Honors Program

Wolf, Olivia. Assistant Professor. Ph.D, College of Arts and Sciences, Dept of Fine & Performing Arts

Wolfe, Alan J. Professor. Grad Schl at Medical Center, Infectious Disease Immunology, Microbiology and Immunology

Wu, Meng-Jia. Associate Professor. Ph.D, School of Education, Curr Instr & Educ Psyc, Research Methods

Wu, Yee Ling. Assistant Professor. Grad Schl at Medical Center, Microbiology and Immunology

X

Xaverius, Pamela. Professor. Schl of Health Sci & Pub Hlth, Schl of Health Sci & Pub Hlth

Xi, Miles. Assistant Professor. Ph.D, College of Arts and Sciences, Mathematical Sciences

Y

Yacobellis, Robert. Sr Lecturer. M.B.A, College of Arts and Sciences, Computer Science, Digital Humanities

Yang, Jing. Associate Professor. Ph.D, School of Communication, Communication

Yang, Ning. Assistant Professor. M.A., Ph.D, Quinlan School of Business, Business Administration, Info Sys and Supply Chain Mgmt, Info Systems & Operations Mgmt

Yang, Zongfei. Associate Professor. Ph.D, Quinlan School of Business, Finance

Ye, Hui. Associate Professor. Ph.D, College of Arts and Sciences, Biology, Neuroscience, Psychology

Yi, Yeyin. Clinical Assistant Professor. School of Nursing, General Nursing, Medical/Surgical Nursing

Yim, Chris. Associate Professor. Ph.D, Quinlan School of Business, School of Communication, Management, Communication

Yoon, Eunju. Professor. Ph.D, School of Education, Counseling Psychology

Youm, Yoo Na. Assistant Professor. Ph.D, Quinlan School of Business, Management

Youngberg, Barbara. Professor. M.S.W, J.D., Quinlan School of Business, School of Law, Health Care Management, Law Department, School of Law

Yu, Wei-Ming. Associate Professor. Ph.D, College of Arts and Sciences, Biology

Z

Zack, Eric. Clinical Assistant Professor. School of Nursing, General Nursing, Medical/Surgical Nursing

Zeleznik-Le, Nancy. Professor. Grad Schl at Medical Center, Biomedical Sciences

Zeller, Thomas L. Professor. Ph.D, Quinlan School of Business, Accounting, Business Administration, Management

Zenati, Lynda. Instructor. Ph.D, College of Arts and Sciences, Mathematical Sciences

Zhang, Bo. Lecturer. Ph.D, Inst of Environmntl Sustainabl, Inst of Environmntl Sustainabl

Zhang, Jiwang. Professor. Grad Schl at Medical Center, Biochem & Molecular Biology

Zima, Aleksey V. Professor. Grad Schl at Medical Center, Physiology

Zimmermann, Joerg. Associate Professor. Ph.D, College of Arts and Sciences, Chemistry and Biochemistry

Zitzner, Jennifer. Senior Lecturer. Ph.D, College of Arts and Sciences, Biology

de Nesnera, Kristin. Lecturer. Ph.D, College of Arts and Sciences, Biology

jules, tavis d.. Professor. Ed.D, College of Arts and Sciences, School of Education, Honors Program, Education Leadership & Policy

COURSE DESCRIPTIONS

A

- Accounting (ACCT) (p. 2097)
- African Studies and the African Diaspora (AFR) (p. 2102)
- American Sign Language (ASL) (p. 2103)
- Anthropology (ANTH) (p. 2103)
- Arabic (ARAB) (p. 2112)
- Arrupe Accounting (ACACT) (p. 2113)
- Arrupe Biology (ACBIO) (p. 2113)
- Arrupe Chemistry (ACCHM) (p. 2114)

Accounting (ACCT)

Discover, search, courses (p. 2661)!

ACCT 201 Introductory Accounting I (3 Credit Hours)
Pre-requisites: Minimum 15 earned hours
The major emphasis is on the development and reporting of accounting information for use by investors, creditors, and others. The student is required to develop skills in the preparation and use of accounting information and must demonstrate an understanding of the accounting process, and be able to evaluate the impact of estimates, alternative accounting principles, and the limitations of the accounting model on accounting information. Topics include: preparation and use of financial statements; the accounting process; and the measurement and reporting of income, assets, liabilities, and owner's equity.
Course equivalencies: ACCT201/201H/CPST310/ACACT201
Outcomes:
The student will be able to understand the underlying principles, design, concepts, limitations, and the necessity of accounting systems; The student will gain an appreciation of the uses of financial data and financial statements and their impact on business decisions

ACCT 201H Introductory Accounting I - Honors (3 Credit Hours)
Pre-requisites: Restricted to students in the Quinlan Business Honors program
The major emphasis is on the development and reporting of accounting information for use by investors, creditors, and others. The student is required to develop skills in the preparation and use of accounting information and must demonstrate an understanding of the accounting process and be able to evaluate the impact of estimates, alternative accounting principles, and the limitations of the accounting model on accounting information. Topics include: preparation and use of financial statements, the accounting process, and the measurement and reporting of income, assets, liabilities, and owners' equity.
Course equivalencies: ACCT201/201H/CPST310/ACACT201
Outcomes:
The student will be able to understand the underlying principles, design, concepts, limitations, and the necessity of accounting systems; The student will gain an appreciation of the uses of financial data and financial statements and their impact on business decisions

ACCT 202 Introductory Accounting II (3 Credit Hours)
Pre-requisites: A minimum grade of "C-" in ACCT 201
This course highlights the differences between financial accounting and managerial accounting. The course begins by completing the study of transactions and events affecting financial statements. The cash flow statement is then explored in some detail. Finally, financial statement analysis as traditionally practiced, is considered a capstone for financial accounting. The course then focuses on the use of accounting data by management. Product costing in a manufacturing setting, assigning of costs to objects, learning how costs behave, and the use of accounting data by management in planning operations, controlling operations, and in short term decision making are all investigated.
Course equivalencies: ACCT202/ACCT202H/ACACT201
Outcomes:
The student will be able to understand the differences between cash and accrual accounting, the use of ratio analysis in investing and managing decisions, the value and importance of identifying and allocating costs, and the methods involved in the budgeting process

ACCT 202H Introductory Accounting II - Honors (3 Credit Hours)
Pre-requisites: C- or better grade in ACCT 201 or ACCT 201H; Restricted to SBA honors students
This course highlights the differences between financial accounting and managerial accounting. The course begins by completing the study of transactions and events affecting financial statements. The cash flow statement is then explored in some detail. Finally, financial statement analysis as traditionally practiced, is considered a capstone for financial accounting. The course then focuses on the use of accounting data by management. Product costing in a manufacturing setting, assigning of costs to objects, learning how costs behave, and the use of accounting data by management in planning operations, controlling operations, and in short term decision making are all investigated.
Course equivalencies: ACCT202/ACCT202H/ACACT201
Outcomes:
The student will be able to understand the differences between cash and accrual accounting, the use of ratio analysis in investing and managing decisions, the value and importance of identifying and allocating costs, and the methods involved in the budgeting process

ACCT 303 Intermediate Accounting I (3 Credit Hours)
Pre-requisites: Sophomore Standing and ACCT 202 with grade of C- or higher; ACCT 202 may also be taken as a corequisite
The first in a series of courses designed to provide in-depth coverage of the generally accepted principles underlying financial statements and financial reporting, from conceptual framework to application. Topics include alternatives for measurement of revenue and asset valuation, and presentation of financial statements. Lectures, discussions, and technical readings are supplemented with extensive problem and written assignments.
Outcomes:
Students will demonstrate their understanding of the accounting process leading to financial reports; Furthermore students will also develop the ability to apply critical thinking and analytical skills toward the solution of problems concerning valuation of assets, and revenue and expense recognition

ACCT 304 Intermediate Accounting II (3 Credit Hours)
Pre-requisites: Sophomore standing, a minimum grade of "C-" in ACCT 303 or Graduate Business student
This course is an extension of Intermediate I where students use the conceptual framework to consistently evaluate and explain accounting practice. This allows the student to not only understand the accounting methodologies but also recognize why these approaches are generally superior to alternative accounting treatments. Topics include concepts of present and future value, investments in financial instruments (debt and equity), leases, pensions, income taxes, earnings per share, and the statement of cash flow.
Outcomes:
Students will be able to demonstrate an understanding of the professional pronouncements as they relate to the measurement, recognition, and reporting of financial information; Students will also be able to demonstrate an understanding of how to research relevant accounting issues to better prepare for professional certification

ACCT 306 Advanced Financial Accounting (3 Credit Hours)
Pre-requisites: Junior standing; minimum grade of C- in ACCT 304
Topics include accounting for business combinations, cost & equity method investments, consolidated financial statements, governmental & not-for-profit, & accounting for multinational entities. Course includes extensive problem assignments.
Interdisciplinary Option: International Business
Outcomes:
Students will understand the accounting for corporate acquisitions, corporate consolidations including intercompany transactions, governmental and not-for-profit and international accounting issues

ACCT 307 Adv Accounting: Not-For-Profit Entities & Adv Financial Accounting Topics (3 Credit Hours)
Pre-requisites: Sophomore standing, a minimum grade of "C-" in ACCT 303
Topics include accounting concepts as applied to state and local government, along with financial reporting for other not-for-profit entities including hospitals, universities, and voluntary health and welfare organizations. Class may be taken prior to ACCT 306.
Outcomes:
Students will gain a comprehensive knowledge of the reporting requirements of not-for-profit entities

ACCT 308 Accounting Information Systems and Sustainability Reporting (3 Credit Hours)
Pre-requisites: Minimum grade of "C-" in ACCT 303 & INFS 247; Sophomore standing; Enrollment is open to Graduate Business Students
Included among the topics covered in this course are the primary accounting cycles, accounting information system internal controls, and selective fraud issues. Students will also build flowcharting skills and gain experience working on an enterprise resource planning system (ERP) with real-world company data.
Outcomes:
Students develop an application and analysis level of learning regarding the function of an accounting information system in business with specific emphasis on risk management, along with the ability to work with and deploy ERP tools

ACCT 309 Data Analytics for Accounting (3 Credit Hours)
Pre-requisites: Grade of C- or better in ACCT 303
This course provides students with an understanding of data analytic thinking and terminology as well as hands-on experience with data analytics tools and techniques applied to accounting. Students should leave this course with the skills necessary to translate accounting and business problems into actionable proposals that they can competently present to managers and data scientists.
Outcomes:
Students will learn database theory and how to convert the conceptual models into a physical database implementation that will record, maintain, and report financial and nonfinancial information; Students will learn how to leverage Tableau's (or other data visualization software) visual analytics capabilities to explore, analyze, and present accounting and business data effectively; Students will learn how to assess business process and information risks and apply the general, system, and application controls necessary to prevent or detect fraud and inaccuracies

ACCT 311 Auditing & Internal Control Systems (3 Credit Hours)
Course involves an in-depth investigation of internal control structure and systems and the theory of audit evidence. Theoretical principles and practical issues involved in planning and executing an audit are explored. Internal control policies and procedures and principal evidence techniques for major transaction cycles or account groups are studied in depth. Study of appropriate AICPA professional standards is an integral part of this course.
Outcomes:
Students who successfully complete this course will be able to: understand the role of professional standards in the audit of financial statements; demonstrate their ability to research those standards; and demonstrate their understanding of the audit process in particular the roles of evidence and internal control

ACCT 317 Managerial Accounting (3 Credit Hours)
Pre-requisites: Sophomore standing; minimum grade of "C-" in ACCT 303
This course critically evaluates product cost for inventory valuation and income determination, with an emphasis on budgeting and control procedures. Topics discussed include job order costing, process costing, activity-based costing, full absorption and direct costing, overhead allocation, and more. The course incorporates computer applications to managerial accounting analysis.
Course equivalencies: ACCT 317/ACCT 301

ACCT 323 Advanced CPA Topics (3 Credit Hours)
Pre-requisites: Sophomore standing; minimum grade of "C-" in ACCT 311
Topics include: audit and other reports, statistical sampling in auditing, attestation standards, reporting on future-oriented information, accountant's legal liability, Securities & Exchange Commission practice, professional ethics and using technology in auditing.
Outcomes:
Students will be familiar with issues under the AICPA Code of Professional Conduct, pronouncements of the Public Companies Accounting Oversight Board, the Sarbanes-Oxley Act, federal securities laws, and cases relating to CPA malpractice; Students will have a thorough professional knowledge of CPA reports on financial statements and special reports; Students will also learn how to apply statistical sampling in auditing

ACCT 326 Fraud Investigation (3 Credit Hours)
Pre-requisites: Sophomore Standing, minimum grade of "C-" in ACCT 311
Theoretical principles and practical issues involved in planning and executing an investigation are explored including internal control structure and evidence.
Outcomes:
Understand fraud investigation and the role it plays in the legal process; Understand and be able to apply investigative techniques in solving financial crimes

ACCT 328 Concepts in Taxation (3 Credit Hours)
Pre-requisites: Sophomore standing; minimum grade of "C-" in ACCT 201 and 202
This course provides a thorough exposure to federal income tax concepts and planning principles, with particular reference to individual taxpayers.
Outcomes:
Students will be able to demonstrate a basic core of technical knowledge concerning the federal income tax as it applies to individuals, an understanding of the conceptual and tax policy issues that underlie tax legislation, and fundamental skills in tax compliance, tax planning, and tax research

ACCT 331 Introduction to the Business of Applied Artificial Intelligence (3 Credit Hours)
Pre-requisites: ISSCM 241 or STAT 103
This course provides a concise introduction to Artificial Intelligence (AI) with a focus on applied business applications of machine learning and generative AI. Through engaging lectures, interactive labs, and exposure to real-world use cases, students will gain a deep understanding of the key concepts and practical business applications of AI. Students will also gain a fundamental understanding of how AI models are built and deployed to enhance their skills and career advancement. The latest applications of AI in marketing, accounting, finance, and retail will also be explored.
Outcomes:
Students will develop an understanding of how AI is executed in business settings, from ideation to deployment, and the tools and frameworks applied; Students will gain an understanding of core AI concepts, including machine learning and generative AI; Students will discover how models are built and evaluated to analyze data for prediction and generative AI to deliver actionable insights; Students will gain insights into ethical AI practices to be able to recognize and address ethical and social considerations to deploy AI responsibly; Students will explore business use cases to understand AI solutions applied to business challenges across domains such as accounting, finance, and retail; This course will foster collaboration and communication skills development by having students present AI-driven solutions effectively, translating solutions into impactful business narratives

ACCT 341 Advanced Studies in Taxation (3 Credit Hours)
Pre-requisites: Sophomore standing, minimum grade of "C-" in ACCT 328
This course provides a thorough exposure to the federal income tax concepts and planning principles applicable to business entities, trusts, and estates and to federal transfer taxes.
Outcomes:
Students will be able to demonstrate a basic core of technical knowledge concerning the federal income tax as it applies to business entities and to the federal gift, estate, and generation-skipping-transfer taxes, an enhanced understanding of the conceptual and tax policy issues that underlie tax legislation, and enhanced skills in tax compliance, tax research, and tax planning

ACCT 350 Accounting Full Time Winter Internship (6 Credit Hours)
Department Chair permission is required for registration. Students enrolled in this course are participating in a full time internship experience with an accounting firm.
Outcomes:
Students will work 40+ hours for an accounting firm during the spring semester

ACCT 395 Independent Study in Accounting (1-3 Credit Hours)
Pre-requisites: Junior standing, Instructor and Dean permission required
Independent study is in-depth research or reading, initiated by the student and jointly developed with a faculty member, into a specialized area of accounting not otherwise covered by department course offerings. Variable credit is allowed for the course. This course will not count toward major requirements. Permission of dean required.
Outcomes:
Students will demonstrate an in-depth understanding of a technical accounting topic

ACCT 399 Special Topics in Accounting (1-3 Credit Hours)
Pre-requisites: Sophomore standing or above
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

ACCT 400 Financial Accounting for Business Decisions (3 Credit Hours)
This course is an introduction to the accounting function that is used to measure and communicate business transactions. The focus is on understanding financial information to facilitate better decisions.
Outcomes:
Students will be able to identify the impact of business transactions on the basic financial statements: the income statement, the statement of financial position, the cash flow statement, and the statement of changes in owners' equity; Students will also be able to demonstrate an understanding of the financial statements and their implications on various business decisions

ACCT 400B Financial Accounting for Business Decisions (3 Credit Hours)
This course is an introduction to the accounting function that is used to measure and communicate business transactions. The focus is on understanding financial information to facilitate better decisions.
Outcomes:
Students will be able to identify the impact of business transactions on the basic financial statements: the income statement, the statement of financial position, the cash flow statement, and the statement of changes in owners' equity; Students will also be able to demonstrate an understanding of the financial statements and their implications on various business decisions

ACCT 400C Financial Accounting for Business Decisions (3 Credit Hours)
Pre-requisites: Enrollment is restricted to students in the Healthcare Management MBA Program
This course is an introduction to the accounting function that is used to measure and communicate business transactions. The focus is on understanding financial information to facilitate better decisions.
Outcomes:
Students will be able to identify the impact of business transactions on the basic financial statements: the income statement, the statement of financial position, the cash flow statement, and the statement of changes in owners' equity; Students will also be able to demonstrate an understanding of the financial statements and their implications on various business decisions

ACCT 400E Financial Statement Analysis and Decision Making (3 Credit Hours)
Pre-requisites: Restricted to the students enrolled in the Executive MBA program
Explores the development and application of financial statement information. Students will focus on basic concepts, standards, and practices of financial reporting to serve decision-making needs. Students will also work with financial ratio analysis software.

ACCT 402 Issues in Financial Reporting (3 Credit Hours)
Pre-requisites: ACCT 400 or equivalent
This course stresses research of selected accounting issues and uses the authoritative pronouncements to better understand financial accounting and reporting. The course structure includes lectures, class discussion, case analysis, and research of timely accounting issues. Group interaction is heavily emphasized.
Outcomes:
Students will be able to demonstrate an understanding of the professional pronouncements as they relate to the recognition and measurement of selected accounting topics; Students will also be able to work as a team to research an accounting issue and professionally communicate their research findings

ACCT 404 Financial State Analysis (3 Credit Hours)
Pre-requisites: ACCT 400 or equivalent
This course evaluates the information contained in the financial statements, footnotes, and management discussion and analysis for its usefulness in making investment and credit decisions. Students will synthesize these assessments via a comprehensive financial statement analysis project.
Outcomes:
Students will be able to assess the appropriateness of asset valuation, liability measurement, and equity values for judging the performance of an enterprise

ACCT 405 Accounting Theory I (3 Credit Hours)
Pre-requisites: ACCT 400 or equivalent with a grade of C- or better
The course involves a detailed study of the theory, concepts, and procedures of financial accounting. The course focuses on applications involved in accounting for assets, equities, and the valuation and measurement of related income items. It also focuses on the accounting model with emphasis on applying the accounting framework to revenue and asset valuation. Time is spent discussing the theory and logic behind the accounting model and how it impacts financial statements. Restricted to Graduate School of Business Students.

ACCT 406 Accounting Theory II (3 Credit Hours)
A continuation of ACCT 405, the course focuses on valuation issues related to liabilities and other special topics. Complex problems involving investments, earnings per share, pensions, leases, income taxes, bond valuation, and fair value accounting are studied.

ACCT 407 Tax Principles Applied to Individuals (3 Credit Hours)
Pre-requisites: ACCT 400 or equivalent
This course provides detailed coverage of the key Federal income tax concepts and planning principles applicable to individual taxpayers.

ACCT 408 Tax Principles Applied to Entities (3 Credit Hours)
This course provides detailed coverage of the key Federal income tax concepts and planning principles applicable to various business entities and an overview of Federal transfer taxes.

ACCT 409 Audit I -Audit and Assurance (3 Credit Hours)
This course introduces the student to the environment in which Public Accounting exists as well as the standards, both AICPA and PCAOB, which firms must follow in rendering audit and assurance services. The course covers both the theoretical and practical issues involved in planning an engagement, risk assessment and the audit risk model, evidence gathering and internal control policies and procedures. The audit of major transaction cycles (i.e. the revenue cycle) and account groups (i.e. Cash) are then covered highlighting internal specific control policies, testing of controls and substantive audit procedures to gather evidence. Study of appropriate AICPA and PCAOB professional standards is an integral part of this course.

ACCT 410 Audit II-Advanced Audit and Professional Ethics (3 Credit Hours)
This course consists of an in-depth study of specific topics related to both attest and non-attest services rendered by public accounting firms. Topics include: Professional ethics and a study of the AICPA Code of Professional Conduct; Accountants legal liability, federal securities laws and cases related to CPA malpractice; The use of technology and sampling in an audit; Securities & Exchange Commission practice, the integrated audit and the Sarbanes-Oxley Act; and Audit and other reports. Study of appropriate AICPA and PCAOB professional standards is an integral part of this course.

ACCT 411 Business Law and Accountants (3 Credit Hours)
This course is designed to familiarize the student with aspects of the legal environment of special concern to accountants. With emphasis on the legal aspects of commercial transactions, the course examines the laws governing sales transactions and the instruments for financing those transactions. Topics include contract law, the Uniform Commercial Code (sale of goods, negotiable instruments, secured transactions), and creditor-debtor relations.

ACCT 412 Special Topics in Accounting (3 Credit Hours)
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

ACCT 424 Managerial Accounting (3 Credit Hours)
Pre-requisites: ACCT 400 or equivalent
Topics include product costing and activity based costing concepts, development and analysis of information for short-run and long-run decision making, the impact of accounting information on divisional performance, cost estimation and cost-volume-profit analysis, segment analysis, transfer pricing, budgeting concepts, and behavioral issues associated with accounting information.
Outcomes:
Develop and use managerial accounting information for operational and strategic decision making

ACCT 424E Strategic Cost Accounting (3 Credit Hours)
Pre-requisites: Restricted to the students enrolled in the Executive MBA Program
Explores the application of internal accounting information. Students will focus on traditional and contemporary managerial accounting practices. Students will work to (1) understand cost behavior, (2) conduct activity analysis, and (3) predict cost under different business decisions.

ACCT 425 International Accounting (3 Credit Hours)
This course explores the similarities and differences of accounting principles and procedures between the United States and other countries. Topics include consolidation of foreign subsidiaries, performance evaluation of foreign operations, translation issues, inflation accounting, and efforts at standardization of accounting rules.
Outcomes:
Students will become familiar with international accounting issues including accounting harmonization, pronouncements of the International Accounting Standards Board, transfer pricing, foreign currency financial statements, foreign exchange, and international taxation

ACCT 431 Tax Research (3 Credit Hours)
This course will provide graduate business students with the basic techniques of conducting federal tax research, and enable them to apply those techniques to a variety of research cases and communicate their research results in both written and oral formats. Includes establishing relevant facts; identifying tax issues; developing & communication conclusions and recommendations in writing and orally.

ACCT 432 State, Local and International Tax (3 Credit Hours)
Pre-requisites: ACCT 408 with a grade of C- or better or its equivalent; Department Consent Required
This course will provide graduate business students with a basic understanding and familiarity with the principles of U.S. multi-jurisdictional taxation. The first half of the course will focus on the various types of state and location taxation and their common themes and differences. The second half will address Federal income taxation of cross-border transactions, both inbound and outbound.
Outcomes:
Demonstrate the ability to properly allocate taxable income between different taxing jurisdictions; Understand the basic principles and policies underlying state, local, and international taxation; Develop a working knowledge of the different types of taxes

ACCT 435 Internal Audit (3 Credit Hours)
This course will expose students to the fundamentals of internal auditing with an emphasis on internal controls. Topics covered will include an overview of internal auditing theory and internal audit in practice. After these overviews, an in depth review of internal controls will be examined, including internal controls best practices, risk assessment, control identification, audit design, testing of controls and audit reporting. Finally, the class may include a hands-on internal audit engagement in a real life setting. Student must have completed 9 hours of undergraduate accounting or 6 hours of graduate accounting courses.
Outcomes:
Students should have a clear understanding of how internal controls are used throughout a company and how auditors help design, test and report on their effectiveness

ACCT 436 Forensic Accounting and Fraud (3 Credit Hours)
The purpose of the course is to familiarize students to the field of Forensic Accounting and sensitize them to: the prevalence of fraud in all forms of business activity; the methods people use in initiating/perpetuating fraud scheme; ways of staying out of or getting out of a fraud conspiracy. Students are presumed to have strong accounting and auditing skills. This course will be covering ethics, accounting, auditing, misappropriation of assets, fraudulent financial reporting, electronic fraud and other fraud investigation/forensic accounting topics.
Outcomes:
Students who successfully complete this course will be able to demonstrate: knowledge of the nature and magnitude of economic fraud as it affects a variety of entities; understanding of the role of the accounting profession in fraud prevention and detection; technical knowledge of forensic accounting, forensic investigations and research

ACCT 437 Advanced Forensic Accounting (3 Credit Hours)
This course will focus on fraud audits of private entities. In the course of financial reviews questions arise about complex financial transactions, employee dishonesty, collusion, and breakdowns in internal controls. Normal audit procedures may discover the issue but additional steps are necessary to quantify and detect the extent of the fraud.
Outcomes:
Students in this course will develop basic forensic skills via analytical training

ACCT 439 Independent Study (1-3 Credit Hours)
Independent study is in-depth research and/or reading, initiated by the student and jointly developed with a faculty member, into a specialized area of accounting not otherwise covered by department course offerings. Student is typically expected to develop a manuscript worthy of publication. The project should require the workload associated with a graduate level course. Normally, this course may be taken one time for credit.
Outcomes:
Student must demonstrate a detailed understanding of the selected accounting topic

African Studies and the African Diaspora (AFR)

Discover, search, courses (p. 2661)!

AFR 201 African Studies and the African Diaspora (3 Credit Hours)
African Studies and the African Diaspora advances Loyola's mission to expand knowledge in the service of humanity through learning from African descended people's experiences, perspectives, and achievements, ranging from the earliest civilizations of the Nile valley, to the classical cultures of West Africa, to the present day liberation struggles to counter and overcome the enduring effects of slavery, colonialism, neocolonialism, apartheid, legalized segregation, racial terrorism, institutionalized racism, and all other past and current forms of white supremacist ideology and abuse.
Interdisciplinary Option: African Studies and the African Diaspora, Global Studies
Outcomes:
Ability to recognize and identify the unique gifts of Black World communities in the areas of spirituality, philosophy, literature, politics, and the arts and discuss the impact which these gifts have exerted in enriching world civilization for millennia; Ability to reasonably discuss Africa as the cradle of humanity and civilization, locate Black culture in space and time from its earliest beginnings, and describe the varied ways in which Black people's cultural identity and gifts have come to expression across global communities; Ability to understand the history of enslavement of Africans in the Western hemisphere and the European colonization of Africa as this history relates to current issues of racial injustice and social inequality in the US, Africa, and elsewhere; Ability to appreciate the liberation struggles of Black World communities and the inspirational impact these struggles have exerted globally on other civil and human rights movements; Ability to understand African descended peoples as actors or agents of justice rather than as helpless victims of injustice on the stage of history, recognizing that the primary reality is not what oppressors have done to Blacks, but what Blacks have done and are currently doing to resist, counter, and overcome their oppressor's power to enslave, exploit, defame, and dominate

AFR 295 Directed Readings in Black World Studies (3 Credit Hours)
This course allows students to engage in a directed self-study of a topic in the realm of African Studies and the African Diaspora that is not covered in other courses offered in the program. Students will work with the AFR Director or another advisor to develop their own class readings and research assignment. Director approval is required for this course.

AFR 397 Capstone/Internship (3 Credit Hours)
This capstone course may be completed in a variety of ways. This includes an internship at a business or organization that is related to the program, or a study abroad semester related to the program. Internships require a minimum of 10 hours/week verified service hours over the 15 week semester, amounting to 3 credit hours. Students may also make a 300 level AFR course into a "Capstone" by adding an additional, in-depth research assignment approved by the course instructor and the program director. Director approval is required for this course.
Interdisciplinary Option: African Studies and the African Diaspora
This course satisfies the Engaged Learning requirement.

American Sign Language (ASL)

Discover, search, courses (p. 2661)!

ASL 101 American Sign Language I (3 Credit Hours)
ASL 101 is the first class in the American Sign Language series at Loyola. It presents the basic skills and use of ASL and basic knowledge of Deaf & Hard of Hearing Culture.
Outcomes:
Students will: 1) demonstrate the basic abilities to comprehend and communicate in ASL; 2) demonstrate an understanding of Deaf & Hard of Hearing communities

ASL 102 American Sign Language II (3 Credit Hours)
Pre-requisites: ASL 101 or equivalent
This course is designed for students who have completed a college level ASL I course and have a basic knowledge of ASL. It is the second course in the ASL series at Loyola and presents intermediate skills and use of ASL and continued working knowledge of Deaf & Hard of Hearing culture.
Outcomes:
Students will: 1) demonstrate abilities to comprehend and communicate in ASL at an intermediate level; 2) demonstrate an understanding of Deaf & Hard of Hearing communities

ASL 103 American Sign Language III (3 Credit Hours)
Pre-requisites: Completion of ASL 102, or prior to enrolling in ASL 103, students must consult ASL professors for language placement, ensuring readiness based on prior experience
This course includes vocabulary-building and mastery of grammar through rigorous receptive and expressive activities. ASL skills development applied to complex grammatical structures. Topics include location and description of items in rooms and buildings, complaints, making suggestions, and making requests. Depicting /Indicating verb grammatical structures introduced. Discussions of Deaf culture. 2) Acquire adequate speed in expressive and receptive signing skills. 3) Expand sign terminology in areas such as classifiers, sentence types, numbers, NMS
Outcomes:
1) Demonstrate fluency in expressive, receptive fingerspelling/numbering in ASL

ASL 104 American Sign Language IV (3 Credit Hours)
Pre-requisites: Completion of ASL 103, or prior to enrolling in ASL 104, students must consult ASL professors for language placement, ensuring readiness based on prior experience
This intermediate ASL course refines students' expressive and receptive skills. Advanced linguistic structures introduced and put into practice. Vocabulary-building in specific challenging areas: academics, occupations, computer technologies, and abstract nouns. Current events discussed in ASL, giving students opportunities to apply linguistic-cultural knowledge while participating in open discussions.
Outcomes:
1) Comprehension and expression with intermediate ASL vocabulary and correct grammar; 2) Narrate and describe events in connected, paragraph-length ASL discourse; 3) Exchange information and perspectives in group settings at intermediate level

Anthropology (ANTH)

Discover, search, courses (p. 2661)!

ANTH 100 Globalization and Local Cultures (3 Credit Hours)
This course examines anthropological approaches to social and cultural changes associated with globalization, particularly how global patterns of inequality profoundly impact people's lives.
Knowledge Area: Foundational Societal Knowledge
Interdisciplinary Option: African Studies and the African Diaspora, Asian Studies, Global Studies, Human Services, International Business
Course equivalencies: ANTH100/271/INTS271
Outcomes:
Students will demonstrate an understanding of relationships between historic and contemporary global processes, especially ways globalization influences inequality and peoples' social, symbolic, material, political, and economic existence

ANTH 101 Human Origins (3 Credit Hours)
Pre-requisites: ENVS 101 or equivalent; please check requirements for declared majors/minors for exceptions
This course focuses on the biocultural evolution of our species, Homo sapiens. It addresses the basic human desire for self-understanding. We explore what it means to be human through the use of genetics, non-human primates, and the fossil record. Each section of the course contributes to an overall understanding of human origins and the process of evolution.
Knowledge Area: Tier 2 Scientific Knowledge
Interdisciplinary Option: Bioethics
Outcomes:
By the end of the semester students will have a better understanding of human nature, our relationship to the world around us, and our interactions with each other

ANTH 102 Culture, Society, and Diversity (3 Credit Hours)
Pre-requisites: ANTH 100, PLSC 102, SOCL 101, WSGS 101, or equivalent; please check requirements for declared majors/minors for exceptions
This course introduces the anthropological study of living people, or cultural anthropology, with particular focus on how people understand, act in, and transform their worlds. Students will also consider how anthropology can help us think about our own society and what it means to be human in different times and places.
Knowledge Area: Tier 2 Societal Knowledge
Interdisciplinary Option: Human Services, International Business
Outcomes:
Students will be able to demonstrate ways that central concepts of cultural anthropology help us understand cultural diversity; learn how to think critically about various cultures (including their own); and be aware of the ethical dimensions of research with living people

ANTH 103 Biological Background Human Social Behavior (3 Credit Hours)
Pre-requisites: ENVS 101 or equivalent; please check requirements for declared majors/minors for exceptions
This course examines possible biological bases of modern human behavior, from a scientific and multi-disciplinary perspective, to explore questions regarding what comprises "human nature".
Knowledge Area: Tier 2 Scientific Knowledge
Interdisciplinary Option: Bioethics
Outcomes:
Students will demonstrate an understanding of how science is conducted, as well as interactions between science and culture, in the context of how evolutionary approaches to animal behavior may be applied to the study of human behavior

ANTH 104 The Human Ecological Footprint (3 Credit Hours)
Pre-requisites: ENVS 101 or equivalent; please check requirements for declared majors/minors for exceptions
This course is an introduction to global human ecology and concentrates on how we as humans affect global ecosystems and how these changes can impact our behavior, health, economics, and politics.
Knowledge Area: Tier 2 Scientific Knowledge
Interdisciplinary Option: Bioethics, Global Studies, Peace, Justice, and Conflict Studies, Urban Studies
Course equivalencies: X-ANTH104ESP104PAX104INTS102
Outcomes:
Students will be able to draw connections between basic ecological processes and the global patterns of human population growth, health and disease, inequality and poverty, subsistence strategies, and land use and technology

ANTH 105 Human Biocultural Diversity (3 Credit Hours)
Pre-requisites: ENVS 101 or equivalent; please check requirements for declared majors/minors for exceptions
This course examines human variation through a biocultural approach, with specific attention paid to historical and contemporary ideas of race.We explore genetics and how evolution by natural selection has favored important adaptations, how those specific adaptations have helped humans migrate and survive across the planet's habitats, and socio-cultural and scientific ideas about race that have resulted in inequalities.
Knowledge Area: Tier 2 Scientific Knowledge
Interdisciplinary Option: African Studies and the African Diaspora, Bioethics, Neuroscience, Race and Ethnicity
Course equivalencies: X-BIET 105/ANTH 105
Outcomes:
Students will gain an understanding of how biocultural approaches help us understand human variation, with specific attention paid to skin color and the idea of race; Students will learn how scientific racism in anthropology contributed to our ideas of race, and how that can be seen in contemporary US society

ANTH 106 Sex, Science and Anthropological Inquiry (3 Credit Hours)
Pre-requisites: ENVS 101 or equivalent; please check requirements for declared majors/minors for exceptions
This course examines sex utilizing a scientific and anthropological lens. Anthropology brings a unique perspective to the study of sex by examining it across cultures and through an evolutionary perspective. In this class, we will travel around the world and through deep time to examine how sex is shaped by biological, cultural, and political factors. Topics include sex, sexuality, sexual orientation, gender, evolution, reproductive biology, parenting, sex work, and sexually transmitted infections.
Knowledge Area: Tier 2 Scientific Knowledge
Interdisciplinary Option: Bioethics, Women & Gender Studies
Course equivalencies: X-ANTH 106/WOST 106/WSGS106
Outcomes:
Students will be able to demonstrate an understanding of the intersection of sexology and anthropology, an evolutionary perspective on sex, the physiological and anatomical aspects of male and female sexual systems, a comparative view of human sexuality across the life course, and how globalization is influencing sex and gender

ANTH 107 Ancient Worlds (3 Credit Hours)
Pre-requisites: HIST 101, HIST 102, HIST 103, HIST 104, or equivalent; please check requirements for declared majors/minors for exceptions
This course explores societies in the near and distant past, with an emphasis on examining cultures left out of standard US and world history textbooks.
Knowledge Area: Tier 2 Historical Knowledge
Outcomes:
Students will be able to: 1) describe the early history and scientific foundations of archaeology; 2) explain important developments in human history; 3) apply their knowledge to decolonize world history

ANTH 203 Violence, Social Suffering, and Justice (3 Credit Hours)
Pre-requisites: ANTH 100, PLSC 102, SOCL 101, WSGS 101, or equivalent; please check requirements for declared majors/minors for exceptions
This class investigates violence, suffering and justice through an ethnographic and cross-cultural perspective. It asks, how are overt forms of violence related to larger social structures which produce less visible forms of suffering? How are violence and suffering related to other socio-cultural phenomena such as race, gender, sexuality and identity?
Knowledge Area: Tier 2 Societal Knowledge
Interdisciplinary Option: Global Studies, Peace, Justice, and Conflict Studies, Race and Ethnicity, Women & Gender Studies
Outcomes:
Students will understand: the ethnographic analysis of violence and social suffering; political and economic contexts of violence, including colonialism, globalization, racism, and poverty; movements for justice and safety

ANTH 205 Gender in Cross-Cultural Perspective (3 Credit Hours)
This course explores a broad range of cultural expectations for gender diversity and the experiences of women in different cultures.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-ANTH205/WOST205/WSGS205
Outcomes:
Students will be able to demonstrate understanding of how categories and concepts of sex and gender are culturally constructed and reflect wide variation both historically and cross-culturally

ANTH 207 Economies, Culture, and Development (3 Credit Hours)
Pre-requisites: ANTH 100 or ANTH 102
The course explores different types of and ideas about exchange, economies, and development in cross-cultural perspective and through ethnography.
Interdisciplinary Option: Global Studies
Outcomes:
The course will help students learn about (1) the development of social thought about non-Western economic activity; (2) the key theories from and debates within Economic Anthropology; (3) contemporary ethnography about economies and development; and (4) ways to think critically about and apply course concepts

ANTH 208 Language and Identity (3 Credit Hours)
Pre-requisites: ANTH 100, PLSC 102, SOCL 101, WSGS 101, or equivalent; please check requirements for declared majors/minors for exceptions
This course will examine how language both reflects and helps constitute identity in social and linguistic interaction. Presenting a broad introduction, this course will address complex and often intersecting relationships between language and gender, race, class, place, age, and social practice, using case studies from around the world.
Knowledge Area: Tier 2 Societal Knowledge
Interdisciplinary Option: Race and Ethnicity
Outcomes:
Students will learn how language is central to the expression and interpretation of social and cultural identities, and to human experiences of diversity

ANTH 210 Visual Representation of Culture (3 Credit Hours)
The course deals with how human cultural identities are represented through the construction of both moving and static visual images.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-ANTH210/IFMS210
Outcomes:
Students will gain critical skills resulting in greater visual literacy regarding how constructed visual images are used to represent cultures

ANTH 211 Peoples of Latin America (3 Credit Hours)
This course offers an anthropological overview of the major cultures and cultural regions of contemporary Latin America.
Interdisciplinary Option: African Studies and the African Diaspora, Global Studies, Latin American Studies, Race and Ethnicity
Course equivalencies: X-ANTH211/INTS211/LASP211
Outcomes:
Students will understand the basic cultural processes that led to the formation of the socio-political landscape of contemporary Latin American

ANTH 212 Peoples of Native North America (3 Credit Hours)
This course considers post-contact ethnography including key contemporary issues among indigenous North American peoples including Indian-white relations, assimilation, genocide, revitalization movements, sovereignty, environmentalism, urbanization, and native identity.
Outcomes:
Students will be able to describe the pattern and basis of cultural diversity among native North American peoples and their historical relationships with Euro-American colonists

ANTH 213 Culture in Africa (3 Credit Hours)
This course takes an interdisciplinary perspective, and includes discussion of African history, political economy, and contemporary forms of social life and culture. It also examines intellectual and historical trajectories informing how knowledge about Africa was and is produced.
Interdisciplinary Option: African Studies and the African Diaspora, Global Studies, Race and Ethnicity
Course equivalencies: X-ANTH213/BWS 213/INTS214
Outcomes:
Students will acquire a comprehensive grasp of significant issues in contemporary Africa, their historical relevance, and social and cultural impacts

ANTH 214 African-American Anthropology (3 Credit Hours)
This course offers an historical and contemporary exploration of various efforts undertaken by African Americans and their supporters to achieve racial parity, social justice and equality with other Americans, from the early presence of Africans in the Americas to the present period.
Interdisciplinary Option: African Studies and the African Diaspora
Course equivalencies: X-ANTH214/BWS 214
Outcomes:
Students will understand landmark legal cases brought to US courts of law by African Americans and their supporters and strengthen their critical thinking and writing skills on these and related topics

ANTH 215 Culture in Contemporary Asia (3 Credit Hours)
This course explores contemporary Asian culture from an ethnographic perspective.
Interdisciplinary Option: Asian Studies, Global Studies
Outcomes:
Students will acquire a comprehensive grasp of significant issues in contemporary Asia, their historical relevance, and social and cultural impacts

ANTH 216 Cultures of Migration (3 Credit Hours)
Using theoretical, ethnographic, and autobiographical literature from different world regions, we will explore three central questions: 1) How do people make the decision to move? 2) How do political policies structure the life chances of im/migrants in the "global north"? 3) How do im/migrants transform their own life situations and communities?
Interdisciplinary Option: Global Studies, Italian American Studies, Latin American Studies, Race and Ethnicity
Outcomes:
Students will understand: an anthropological approach to the study of migration; leading theories of migration; contemporary migration patterns; im/migrant labor; factors that shape the formation of im/migrant communities

ANTH 217 Mexican Culture & Heritage (3 Credit Hours)
In this class, students become familiar with Mexico and its people as we explore Mexican history, contemporary Mexico, and Mexican migration to the United States. At each juncture, we consider how sociocultural developments shaped Mexican society in the context of the region and the world.
Interdisciplinary Option: Global Studies, Latin American Studies, Race and Ethnicity
Course equivalencies: X-ANTH217/INTS217/LASP217
Outcomes:
Students will be able to explain concepts such as colonialism, neocolonialism, globalization, and migration through their application to Mexican culture and history

ANTH 220 Contemporary Cultures of the Middle East (3 Credit Hours)
Focusing on the culturally diverse region of the Middle East, the course considers historical dynamics, diversity of religious orientations, gender and ethics relations, nation-building strategies, and expressive arts (architecture, film, literature and media), from the Middle East.
Interdisciplinary Option: Arabic Language and Culture, Global Studies, Middle East and Islamic World Studies
Course equivalencies: X-ANTH220/IWS220/INTS222
Outcomes:
Students will be able to demonstrate an understanding of the history, geography, religious, cultural and ethnic diversity of the Middle East as well as the major ethnographic themes and scholarly debates concerning the area

ANTH 222 Culture in Contemporary Europe (3 Credit Hours)
This course explores culture in contemporary Europe from an ethnographic perspective. Topics include recent developments in European nationalisms; the EU and Europeanization; (im)migration and integration; family and gender; production and branding; international tourism; and the politics of language in both 'old' and 'new' Europe.
Interdisciplinary Option: European Studies, Global Studies
Outcomes:
Students will understand the role of culture in European current events, appreciate the challenges facing the European Union, and articulate connections between European history and contemporary European and global politics

ANTH 224 Social Movements, Culture, and Activism (3 Credit Hours)
This class examines social movements and activism from an ethnographic perspective. Case studies will examine movements across the globe. Topics to analyze include: what socio-cultural contexts shape, and are shaped by, social movements? How do social movements organize themselves, and what meanings or belief systems do they appeal to?
Outcomes:
familiarizing students with the ethnographic analysis of social movements; analyzing the socio-cultural effects of global commodity flows, secularization, environmental pollution, corporate power, migration and other political issues; examining how people resist, reproduce and alter relations of power; and introducing students to the broader field of political anthropology

ANTH 225 Museum Cultures (3 Credit Hours)
This course explores the museum as a dynamic site of cultural production and consumption. It examines the historical and contemporary relationships between museums, anthropology, and material culture, particularly the broader socio-cultural context of collecting from and representing cultures. Students will visit, discuss, and critique exhibitions in Chicago-based museums.
Outcomes:
Students will gain knowledge of museums as sites of anthropological study and practice, particularly the formation, history, and use of anthropological collections, and cultural representations

ANTH 231 Linguistic Anthropology (3 Credit Hours)
Pre-requisites: ANTH 100 or ANTH 102
This course introduces the subfield of linguistic anthropology through a survey of topics, including linguistic relativity, linguistic patterning and structure, nonverbal communication, indexicality, and linguistic diversity and inequality.
Outcomes:
Students will demonstrate knowledge of the historical, scientific, methodological, and analytical foundations of linguistic anthropology

ANTH 241 Principles of Archaeology (3 Credit Hours)
Pre-requisites: ANTH 101 or ANTH 104
Introduction to the ethical principles and scientific methods used to investigate the archaeological record, including issues of stewardship, community collaboration, research design, fieldwork strategies, materials analysis, and archaeological interpretation.
Outcomes:
Students will able to explain the basic methods and theory of the archaeological process; Students will also be to apply their knowledge to craft an archaeological research design

ANTH 242 Mesoamerican Archaeology and Survivance (3 Credit Hours)
This course explores the cultures and peoples of Mesoamerica (Mexico, Guatemala, Belize, Honduras, El Salvador) in long-term perspective, with emphasis on Indigenous survivance and heritage. Cultures examined include the Mayas, Olmecs, Teotihuacanos, Zapotecs, and Mexicas (Aztecs).
Interdisciplinary Option: Latin American Studies, Race and Ethnicity
Course equivalencies: ANTH242/LASP216
Outcomes:
Students will be able to: 1) define what is meant by Mesoamerica; 2) identify how Mesoamerican heritage connects to contemporary nations and descendants; 3) explain key themes in Mesoamerican archaeology

ANTH 243 North American Archaeology (3 Credit Hours)
Pre-requisites: ANTH 101 or ANTH 104
This course surveys archaeological evidence in North America with focus on regional patterns of indigenous adaptation and explanations for prehistoric culture change.
Outcomes:
Students will be able to describe the chronological pattern and regional diversity in the cultural evolution of prehistoric societies in North American from ice-age colonization to European contact

ANTH 244 Historical Archaeology (3 Credit Hours)
Pre-requisites: ANTH 101 or ANTH 104; Recommended: ANTH 241
Historical archaeology merges the study of documentary records with material remains to understand the overlaps, gaps, and contradictions in narratives about the human experience. This course is an introduction to the methods of historical archaeology, including issues of perspective, coloniality, and silencing that shape our understanding of history.
Outcomes:
Students will be able to 1) describe how archaeology and anthropology complement documentary analysis; 2) identify sources of bias in historical analysis; 3) apply intersectional and community-based methods to archaeology

ANTH 245 Gender in Deep Time (3 Credit Hours)
Students will critically reflect on gender in cross-cultural and long-term perspective. From an anthropological perspective, they will also deconstruct their own cultural biases and assumptions. With a deep and critical understanding of contemporary norms, students will apply evidence-based reasoning to examine the construction of gender in the past.
Interdisciplinary Option: African Studies and the African Diaspora, Women & Gender Studies
Outcomes:
1) Describe Western ideas of gender and sexuality; 2) identify connections between feminist movements and gender archaeology; 3) apply an intersectional approach to the study of gender both past and present

ANTH 246 Ancient Human-Animal Interactions (3 Credit Hours)
Pre-requisites: For Biology majors and minors and Biology-Ecology Emphasis majors: BIOL 102; For all others: ANTH 101, ANTH 104, BIOL 102, ENVS 101, or ENVS 137
This course focuses on human-animal interactions in the past and covers how humans have shaped the geographic ranges and behaviors of animals today. Questions on whether humans caused prehistoric animal extinctions and how animal domestication occurred will be explored using evidence from archaeological and paleontological records around the world.
Outcomes:
Students will demonstrate an understanding of how archaeologists use empirical data to answer questions about prehistoric human-animal interactions

ANTH 247 Aliens, Atlantis, and Archaeology (3 Credit Hours)
Students will examine the foundations of archaeological knowledge claims to distinguish science from pseudoscience. Students will also examine ways of knowing that go beyond Western science (i.e., Indigenous epistemologies). In the end, students will understand why academic archaeologists do or do not accept claims about ancient aliens or mythical moundbuilders. 2) Differentiate science from pseudoscience in popular media. 3) Construct an evidence-based argument about an archaeological controversy.
Outcomes:
1) Identify logical arguments and their supporting evidence

ANTH 258 Medical Anthropology & Global Health (3 Credit Hours)
This course examines how society and health are intertwined using medical anthropology and global health. Medical anthropology is the study of how health and illness are shaped, experienced, and understood cross-culturally, while global health is dedicated to improving the health of populations worldwide. Students will apply their knowledge to develop a research proposal.
Interdisciplinary Option: Bioethics
Outcomes:
Students will learn how medical anthropologists and global health scientists work in varying cultural contexts to understand health and illness

ANTH 280 Evolution of Human Disease (3 Credit Hours)
The complex interaction between humans and pathogens is explored throughout time, with particular emphasis on the role and impact of human biology, human culture, and changing environments.
Interdisciplinary Option: Bioethics
Outcomes:
Students will be able to demonstrate understanding of the human immunological system, competing paradigms of human health, the processes and mechanisms of biological evolution, the pathogeneses of specific diseases, and the archaeological, paleopathological, paleodemographic, and historical data used to explore the evolution of disease

ANTH 281 Evolution of the Human Diet (3 Credit Hours)
Pre-requisites: For Biology majors/minors and Biology-Ecology Emphasis majors: BIOL 102; For all others: ANTH 101 or BIOL 102
This interdisciplinary course explores the evolution of the human diet utilizing a biocultural perspective. The complex interplay between our diet, biology, and culture is examined through energy acquisition, primate and hominin nutrition, the Agricultural Revolution and Industrialization on human health, food sustainability, and nutritional inequality through socioeconomic and gender lenses.
Outcomes:
Students will identify the role food has played throughout the 6-7 million years of human evolution and its significance in terms of climate change variability, evolutionary adaptations, and contemporary inequality

ANTH 300 Anthropology Career Development (3 Credit Hours)
Pre-requisites: Restricted to ANTH/SANT majors and minors
This course empowers students to translate their undergraduate anthropology education into a professional portfolio that communicates their knowledge, skills, and experiences to graduate schools and future employers.
Outcomes:
Through personal reflection exercises, the preparation of professional and scholarly application documents, and proposal writing, students will gain insight into how their anthropological education informs their future professional interests

ANTH 303 People and Conservation (3 Credit Hours)
This course considers the interplay between indigenous peoples and environmental resources utilizing current perspectives from evolutionary and community ecology, conservation biology, anthropology, political ecology and economics.
Interdisciplinary Option: Bioethics, Global Studies
Course equivalencies: ANTH303/INTS303A/BIET303
Outcomes:
Students will demonstrate an understanding of factors influencing this interplay, including environmental ethics, traditional environmental knowledge, resource management, community-based conservation, property rights, common-pool resources, sustainable development, land tenure, indigenous movements, and eco-tourism

ANTH 304 Anthropological Theory (3 Credit Hours)
Pre-requisites: ANTH 100 or ANTH 102
In this course, we review major works of anthropological theory that have influenced anthropology over the course of the past two centuries. We attend to dynamic conversations that occur within the discipline, the geopolitical diversity (and lack thereof) of anthropological theorists, and we consider how these factors have shaped the trajectory of anthropological research over time.
Interdisciplinary Option: Race and Ethnicity
Outcomes:
Students will: Demonstrate in-depth knowledge of major paradigms and concepts in anthropology; apply anthropological theory to contemporary topics and debates; critically discuss ethical and political implications of anthropological research; demonstrate familiarity with main points of agreement and disagreement in the discipline

ANTH 305 Violence and Culture (3 Credit Hours)
This course examines the complex relationships between violence and culture using the ethnographic method as practiced by anthropologists and other social scientists.
Interdisciplinary Option: Global Studies, Sociolegal Studies
Course equivalencies: ANTH305/INTS303/PAX305
Outcomes:
Students will demonstrate an understanding of the ways violence destroys, alters or produces forms of cultural meaning and social action and the ways in which cultural difference impacts patterns of violence

ANTH 306 Anthropology and Human Rights (3 Credit Hours)
Pre-requisites: ANTH 100 or ANTH 102
This course examines the concept of universal human rights, and the social movement that has developed to promote human rights, from an anthropological perspective.
Interdisciplinary Option: Global Studies, Sociolegal Studies
Course equivalencies: ANTH306/INTS308/PAX306
Outcomes:
Students will be able to demonstrate an understanding of the social and historical origins of the concept of human rights and analyze the debates that arise out of applying the concept of human rights in cross-cultural contexts

ANTH 307 The Body and Culture (3 Credit Hours)
This course examines how culture shapes how the human body is understood, categorized and used, and it also examines how bodily experiences shape culture and society. Drawing on cultural anthropology, it analyzes diverse cross-cultural examples, possibly ranging from body decoration among Amazonian indigenous people, to plastic surgery, childbirth, or sports.
Interdisciplinary Option: Women & Gender Studies
Outcomes:
Students will learn how socio-cultural forces shape human bodies; understand how cultural anthropology examines the body; and examine classic social theories about bodies, gender, social class and subjectivity

ANTH 309 Urban Anthropology (3 Credit Hours)
This course is focused on defining characteristics of city life across a variety of societies. It particularly considers urban complexity in the context of the globalization of cities.
Interdisciplinary Option: Urban Studies
Outcomes:
Students will gain a cross-cultural and global outlook on the defining features of urbanism

ANTH 314 Applied Anthropology (3 Credit Hours)
Pre-requisites: ANTH 304 or Instructor approval
This course offers a hands-on introduction to the application of anthropological principles and methods to non-academic, "real world" problems. Course sessions will be dedicated to situating applied anthropology within the broader discipline, learning methods, and practicing applied cultural techniques. Students will also develop and carry out an applied cultural anthropology project.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will: situate applied anthropology in the broader discipline; practice a variety of applied methodological techniques; work with a community partner to design a project; prepare a comprehensive and clearly written report

ANTH 316 Anthropology of Religion & Ritual (3 Credit Hours)
Pre-requisites: ANTH 100 or ANTH 102
The course considers religion as a form and part of culture. The innovative as well as conservative features of religion in culture change are addressed. Religion's role as both a belief-system and ritual practice are underscored.
Outcomes:
Students will develop the capacity to view religion in a broad perspective and to understand it as a significant factor of belief and practice in cultural systems

ANTH 317 Explore Chicago: Research in Culture and History (3 Credit Hours)
This course takes an Anthropological perspective on Chicago and presents numerous opportunities for experiential learning through hands-on research. The course examines historical and cultural perspectives, with attention to communities and neighborhoods as important sites of everyday life. The history, multiculturalism, diversity, and inequality in Chicago present instructive opportunities to analyze themes of community, power, and social change.
Interdisciplinary Option: Urban Studies
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will: learn more about history and culture across Chicago, through archival research and experiential learning in different neighborhoods; learn more about different forms and methods of anthropological inquiry and ethnographic research; develop critical perspectives on theoretical approaches central to Anthropology; prepare a comprehensive, theoretically informed poster incorporating original ethnographic data

ANTH 319 Anthropology of Tourism (3 Credit Hours)
Pre-requisites: ANTH 100 or ANTH 102
This course explores the phenomenon of tourism from an anthropological perspective, addressing the social, cultural, economic, and environmental impact of tourism on host communities and nations.
Interdisciplinary Option: Global Studies
Course equivalencies: X-ANTH319/INTS319
Outcomes:
Students will demonstrate an understanding of the strengths/limitations of various theoretical models for understanding tourism dynamics; tourism's role in national development; the interplay between tourism and cultural imagery; gender dynamics in tourism; the role of tourism institutions (museums, souvenirs, travel literature) in the construction of "exotic others"

ANTH 321 Human Rights in Latin America (3 Credit Hours)
This course examines human rights in Latin America from a multidisciplinary perspective. It asks: what are human rights? Why have human rights abuses occurred and how have Latin Americans responded?
Interdisciplinary Option: Catholic Studies, Global Studies, Latin American Studies, Peace, Justice, and Conflict Studies, Sociolegal Studies
Course equivalencies: X-ANTH 321/LASP 398
Outcomes:
Students will understand the international human rights legal framework, be able to analyze why abuses have occurred, and understand how Latin Americans have mobilized by studying specific cases

ANTH 324 Human Evolution (3 Credit Hours)
Pre-requisites: ANTH 101 or ANTH 103
The course examines the discipline of paleoanthropology, including the techniques and methods, evolutionary framework, and detailed analysis of skeletal and archaeological material that form our current understanding of human evolution. Students will develop critical thinking skills in how to interpret the human fossil and archaeological records.
Interdisciplinary Option: Forensic Science, Neuroscience
Outcomes:
Students will be able to discuss the interdisciplinarity of paleoanthropology, including the use of specific geology, chemistry, and archaeological techniques

ANTH 325 Primatology-Behavior & Ecology (3 Credit Hours)
Pre-requisites: ANTH 101 or any 100-level Biology course
This course examines primate behavior and ecology from a comparative and evolutionary perspective. Students will be introduced to the diversity across taxonomic groups within the Order Primates. Through class discussion and observation, students will explore key issues in primate studies.
Interdisciplinary Option: Neuroscience
Outcomes:
Students will be able to describe the taxonomic diversity of non-human primates and explain the impact of biological, evolutionary, and ecological factors on primate behavior, Students will develop and apply skills in primate observation

ANTH 326 Human Osteology Lecture/Laboratory (4 Credit Hours)
Pre-requisites: ANTH 101, or ANTH 103, or background in Biology
This course focuses on developing a deep understanding of the human skeleton and ways in which biological anthropologists and forensic anthropologists use this knowledge to explore human biological diversity. Through hands-on exercises and class discussion, students will build analytical skills that are foundational to many techniques used by professionals and will appreciate the complex ethical considerations inherent to the fields of biological and forensic anthropology.
Interdisciplinary Option: Forensic Science
Outcomes:
Students will be able to demonstrate superior knowledge of skeletal anatomy, analyses of skeletal remains from archaeological contexts, and apply current techniques designed to understand and explore human variation, stature, ancestry, age-at-death, sex, and pathological conditions

ANTH 327 Dental Anthropology (3 Credit Hours)
Pre-requisites: ANTH 101 or any 100-level Biology course
This course examines teeth with an anthropological perspective. By using evolution by natural selection as our theoretical framework, students will learn dental anatomy, morphology, and variation. The course then focuses on embryology, dental development and eruption, and the biocultural ways humans use their teeth.
Outcomes:
Students will gain factual knowledge of teeth from an evolutionary perspective and will develop specific hands-on skills needed by dental anthropologists, dentists, and oral biologists, including dental molding, casting, and wear scoring

ANTH 328 Pompeii and Herculaneum (3 Credit Hours)
The two best known Roman towns - Pompeii and Herculaneum - whose remains were preserved by the eruption of Mt. Vesuvius in 79 CE - will serve as a microcosm for understanding Roman society.
Interdisciplinary Option: European Studies
Course equivalencies: HIST328/CLST328/ANTH328
Outcomes:
Students will gain an understanding of how recent archaeological discoveries have changed our view of Pompeii and Herculaneum and learn to "read" such things as dining and bathing rituals, gladiator games, and public and private architecture to gain insight into the structures of Roman social and cultural life

ANTH 330 Language in Popular Culture (3 Credit Hours)
Pre-requisites: ANTH 100 or ANTH 102 or ANTH 208
This course presents a critical approach to understanding language and linguistic innovation in popular culture, including entertainment and news media, digital communication, and political discourse.
Outcomes:
Students will 1) identify linguistic patterns and language ideologies in mass media and digital discourse, 2) critically assess linguistic evaluations and (mis)representations of social groups, 3) apply linguistic anthropological insights to their own experiences with language in pop culture

ANTH 332 Language, Race, and Inequality (3 Credit Hours)
Pre-requisites: ANTH 100 or ANTH 102 or ANTH 208
This course addresses how and why languages and speakers are associated with racialized stereotypes, and how linguistic discrimination operates in U.S. culture today. In-depth case studies examine language and race in education, mass media, material culture, and everyday interaction. Critical perspectives on sociolinguistic norms and relationships between language, Whiteness, and power are also included. Critical thinking and writing are emphasized.
Interdisciplinary Option: African Studies and the African Diaspora, Latin American Studies, Race and Ethnicity
Outcomes:
Students will identify relationships between language and race in everyday life, recognize and analyze instances of linguistic discrimination, stereotypes, and covert racism

ANTH 334 Intro to Classical Archaeology (3 Credit Hours)
Refer to CLST 334
Interdisciplinary Option: European Studies
Course equivalencies: X-ANTH334/CLST334

ANTH 334R Introduction to Classical Archaeology - Rome/Italy Focus (3 Credit Hours)
This course focuses on the main explorations and achievements in the recovery of monuments of the ancient Greco-Roman world, particularly in Rome and Italy, and on the methodologies involved with the recoveries.
Course equivalencies: X-ANTH334/CLST334
Outcomes:
Students should be able to recognize and interpret selected sites and monuments of the Greco-Roman world; They should be able to demonstrate knowledge of methodologies and the technical vocabulary of classical archaeology

ANTH 340 Classical Archaeology: Greek Temple (3 Credit Hours)
Refer to CLST 340
Course equivalencies: X-ANTH340/CLST340

ANTH 342 Rise & Fall of Civilizations (3 Credit Hours)
Pre-requisites: ANTH 101 or ANTH 104
This course examines the socio-cultural process that produced complex societies in the past, particularly the contrasting trajectories of Old World and New World civilizations. Emphasis is on the material manifestations of status differences, power relations, and ideological control.
Outcomes:
Students will appreciate the complicated dynamics that underwrite increasing socio-cultural differentiation and will understand the archaeological methods used to chart that differentiation through time

ANTH 346 Biology of Women (3 Credit Hours)
The biology of women at pivotal points in the lifespan, along with the biological changes that occur from one life stage to another. The interaction of society (eg, medical field) with women at each of these points in time. Topics to be discussed include the evolution of sex and gender, gender differentiation and diversity, reproductive processes, disease detection and treatment, and violence against women.
Interdisciplinary Option: Women & Gender Studies

ANTH 348 Museum & Material Culture Research (3 Credit Hours)
This course offers direct experience with anthropological research methods and analysis using material culture and archival holdings from the May Weber Ethnographic Study Collection. Grounded in object-based studies and using examples from the collection, this course will examine collecting contexts, formal and technical analyses, operational sequences, cultural contexts, and interpretation.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students gain knowledge of research techniques for working with museum-held objects while contributing to the permanent documentation and interpretation of the May Weber Ethnographic Study Collection through object research

ANTH 353 Epidemics and Pandemics (3 Credit Hours)
Pre-requisites: ANTH 101 or BIOL 101
This interdisciplinary course tracks how scientists from multiple disciplines have come together to understand and combat epidemics, such as Ebola, HIV, Zika, SARS, MERS, and COVID-19. From the molecular pathways underlying disease to the cultural contexts shaping public health responses, students will understand epidemics and pandemics from a biological and social perspective.
Interdisciplinary Option: Bioethics
Outcomes:
Students will be able to demonstrate understanding of the biological, epidemiological, clinical, and social aspects of key epidemics/pandemics; Students will develop critical thinking skills by using this information to develop locally-relevant public health recommendations

ANTH 356 Bioanthropological Lab Work (1-3 Credit Hours)
Pre-requisites: permission of department chairperson or instructor
Individualized opportunity to learn about and engage in the main laboratory methods used in bioanthropological research
Outcomes:
Students will gain detailed knowledge of the main bioanthropological lab methods

ANTH 359 Paleopathology (3 Credit Hours)
Pre-requisites: ANTH 101 or Instructor permission; ANTH 326 recommended
This course introduces advanced students to the exploration of the history of human disease through the analysis of human skeletal remains.
Interdisciplinary Option: Forensic Science
Outcomes:
Students will have command of biological anthropological approaches towards the understanding of human disease and will be familiar with theoretical issues germane to the field of paleopathology, biases and ethical issues, and the role that disease has played throughout human history

ANTH 360 Issues in Archaeology (3 Credit Hours)
Pre-requisites: ANTH 101 or ANTH 104
Specific theoretical, methodological, and research problems in archaeology with focus on current research in the discipline. Topics include but are not restricted to: environmental archaeology; ethnoarchaeology and experimental archaeology; the study of prehistoric craft specialization, trade, demography, and urbanism.
Outcomes:
Students will be able to draw connections between contemporary archaeological method and theory and current research issues in anthropology

ANTH 361 Issues Cultural Anthropology (3 Credit Hours)
Pre-requisites: ANTH 100 or ANTH 102
The course is a vehicle for topics of particular interest to the instructor or an issue of contemporary relevance. It may be a trial run for a course later added to the official list.
Outcomes:
Students will be able to demonstrate how cultural anthropology is relevant to contemporary issues or how a problem can be structured around a cultural anthropological viewpoint

ANTH 362 Issues in Biological Anthropology (3 Credit Hours)
Pre-requisites: ANTH 101 or BIO 101
This course considers specific topics pertinent to the discipline of physical or biological anthropology.
Outcomes:
Students will master theoretical perspectives and current information pertinent to the specific issues covered in each specific course

ANTH 362B Bioethics Minor Capstone: Anthropological Topics (3 Credit Hours)
Pre-requisites: Two Science courses and two Ethics courses
This course number will only be used when ANTH 362 is tagged with the Bioethics Minor Capstone course.
Interdisciplinary Option: Bioethics
Outcomes:
Students will understand the connection between ethical and anthropological issues with regard to the special topic in anthropology

ANTH 363 Issues in Linguistic Anthropology (3 Credit Hours)
Pre-requisites: ANTH 208 or ANTH 231
This course focuses on a current research question or area within linguistic anthropology.
Outcomes:
Students will be able to demonstrate appropriate knowledge and application of methods and findings from aspects of linguistic anthropology pertinent to the specific topic of the course

ANTH 365 Archaeology Lab Methods (3 Credit Hours)
Pre-requisites: ANTH 101 or ANTH 104
Practicum in analysis techniques for common archaeological materials, such as lithics, ceramics, faunal and floral remains, and historic debris. Topics include transformation processes; classification techniques; data recording and analysis standardization; curation; and computerized strategies of data management and analysis.
Outcomes:
Students will be able to identify, describe, and classify basic archaeological materials and relate these analyses with traditional techniques of material fabrication and processing

ANTH 366 Lithic Technology (3 Credit Hours)
This course is a laboratory analysis of archaeological stone tools through experimentation and ethno-archaeology.
Outcomes:
Students will demonstrate an understanding of causes of variability in raw material procurement, manufacturing techniques, use wear, discard, recycling, methodological and theoretical considerations of artifact classification and strategies of data management and analysis

ANTH 375 Archaeology of Early Greece (3 Credit Hours)
Refer to CLST 375
Course equivalencies: X-CLST375/ANTH375

ANTH 396 Internship in Anthropology (3-6 Credit Hours)
Pre-requisites: Students must receive instructor permission prior to enrolling and must complete (with signatures) the Course Contract Form Enrollment is limited to Undergraduate Anthropology Majors/Minors.
This course is designed to enhance student engagement by facilitating internship experiences within the department or in museums, service-oriented organizations, businesses, and non-profit organizations. Experiential learning is combined with rigorous academic work. This course may serve, if appropriate, as a capstone experience.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will produce a research paper, project, proposal, or assessed piece that reflects the application and integration of anthropological theory, methods, or techniques, to the internship experience

ANTH 396A Internship: Bioarchaeology & Forensic Anthropology (1-4 Credit Hours)
This course is designed to enhance student engagement by facilitating internship experiences in forensic anthropology and bioarchaeology, working in collaboration with community partner organizations. Experiential learning is combined with rigorous academic work. This course may serve, if appropriate, as a capstone experience. Instructor permission required.
This course satisfies the Engaged Learning requirement.
Course equivalencies: X-FRSC 390/ANTH 396A
Outcomes:
Students will produce a research paper, project, proposal, or assessed piece that reflects the application and integration of forensic-anthropological theory, methods, or techniques, to the internship experience

ANTH 396M Internship: Museum Collections Management (3 Credit Hours)
Pre-requisites: Instructor permission required
Through a 100-hour internship in the May Weber Ethnographic Study Collection on the Lakeshore campus, students will contribute to the ongoing professional management of a museum collection.

ANTH 397 Directed Readings-Anthropology (1-3 Credit Hours)
Pre-requisites: Permission of chairperson and faculty member
Individualized readings in varied topics within anthropology.
Outcomes:
Students will gain detailed knowledge of the specific topic of their directed readings subject

ANTH 398 Independent Study-Anthropology (1-3 Credit Hours)
Pre-requisites: Permission of chairperson and faculty member
Individualized program of independent study of anthropological problems and/or issues.
Outcomes:
Students will gain detailed knowledge of the specific study program they undertake

ANTH 399 Fieldwork in Anthropology (1-6 Credit Hours)
Pre-requisites: Permission of chairperson and faculty member
Application of anthropological concepts and methods to a specific field situation under the supervision of a faculty member.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will learn field techniques and data recovery and analysis techniques pertinent to the specific nature of their field experience

ANTH 399P Fieldwork in Anthropology: Primate Behavior (3 Credit Hours)
Pre-requisites: ANTH 325 and Instructor Permission
This course is designed to enhance student engagement by facilitating fieldwork experience in the observation of non-human primate behavior, working in collaboration with community partner organizations. Experiential learning is combined with rigorous academic work.
This course satisfies the Engaged Learning requirement.
Outcomes:
Complete ~20 hours of observation of non-human primates at the Lincoln Park Zoo; Keep a fieldwork journal that tracks dates and times spent observing primates, goals, accomplishments, insights, and questions; Collect, analyze, and interpret data collected from observations and summarize them in a final report

Arabic (ARAB)

Discover, search, courses (p. 2661)!

ARAB 101 Arabic I (3 Credit Hours)
This course is designed for beginners and those with modest acquaintance to Arabic. Through a culturally rich context, it focuses on functional articulation of Modern Standard Arabic with a limited exposure to Damascene (Shaami) dialect.
Interdisciplinary Option: Arabic Language and Culture, Middle East and Islamic World Studies
Course equivalencies: ARAB101/IWS101A
Outcomes:
Students will be able to write simple sentences, understand selected principles of basic grammar and vocabulary, and will be introduced to Modern Standard Arabic as well as to a modern spoken dialect; Students will learn aspects of Arab culture

ARAB 102 Arabic II (3 Credit Hours)
Pre-requisites: ARAB 101 completed with C- or higher; Students with equivalent preparation must be assessed for placement
This course continues focusing on active functional use of Modern Standard Arabic and Damascene dialect to help students develop speaking, listening, reading comprehension, and writing skills in diverse sociocultural contexts.
Interdisciplinary Option: Arabic Language and Culture, Middle East and Islamic World Studies
Course equivalencies: X-ARAB102/IWS102A
Outcomes:
Students are expected to be able to sustain conversations on daily life topics, to comprehend and compose simple authentic multimodal texts, and integrate interdisciplinary knowledge of the Arab world (language, religion, history, geography, or cultures) through a project

ARAB 103 Arabic III (3 Credit Hours)
Pre-requisites: ARAB 102 completed with C- or higher; Students with equivalent preparation must be assessed for placement
This course continues focusing on active functional use of Modern Standard Arabic and Damascene dialect in familiar topics reflecting the behavior of native speakers. Students are expected to reach low-mid intermediate proficiency levels.
Interdisciplinary Option: Arabic Language and Culture, Middle East and Islamic World Studies
Course equivalencies: ARAB103/IWS103A
Outcomes:
Students are expected to be able to initiate and sustain simple social interactions about self and immediate environment; Students will be able to comprehend and compose simple authentic multimodal texts and apply such interdisciplinary knowledge of the Arab world (language, religion, history, geography, or cultures) through a final project

ARAB 104 Arabic IV (3 Credit Hours)
Pre-requisites: ARAB 103 completed with C- or higher; Students with equivalent preparation must be assessed for placement
The course help students build an active learning solid foundation in the intermediate level of functional use of Arabic. Students are expected to learn how to own their learning process and engage critically in representations of self and others.
Interdisciplinary Option: Arabic Language and Culture, Middle East and Islamic World Studies
Course equivalencies: X-ARAB104/IWS104A
Outcomes:
Students are expected to be able to compose and comprehend more complex authentic multi modal texts in topics of relevance to student, investments and fields of study; They will articulate their integrative interdisciplinary knowledge of the Arab world through a final project

ARAB 250 Advanced Composition and Conversation (3 Credit Hours)
Pre-requisites: ARAB 104 or equivalent; Students' self-assessment is not sufficient for placement in an appropriate level of Arabic class
The focus of the course assignments is to connect classroom work and community-based service learning into a constructive coordinated dual relationship. Bedsides classroom language learning, students will complete 20 hours in community-based work at an organization of service to Arab and Muslim immigrants and refugees. Some readings may be in English.
Interdisciplinary Option: Arabic Language and Culture, Middle East and Islamic World Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: ARAB250/IWS250A
Outcomes:
Students will synthesize classroom and community-based learning contexts to reflect on collective and individual explorations of concepts of civic engagement with Arab/Muslim communities; They will demonstrate awareness of self and community through learning portfolios and public presentations

ARAB 251 Advanced Composition and Conversation II (3 Credit Hours)
This course emphasizes the development of advanced Arabic speaking and writing skills and examines grammar and vocabulary in relation to advanced skill development. Conducted entirely in Arabic.
Interdisciplinary Option: Arabic Language and Culture, Middle East and Islamic World Studies
Course equivalencies: X-ARAB251/IWS251A
Outcomes:
Students will be able to demonstrate advanced reading, writing, listening, and speaking skills in Arabic; Students will also be able to demonstrate knowledge of significant aspects of the Arab world and culture in relation to their major field of study

Arrupe Accounting (ACACT)

Discover, search, courses (p. 2661)!

ACACT 201 Introductory Accounting I (3 Credit Hours)
Pre-requisites: Either 15 earned credit hours or ACMAT 117 (ACMAT 117 may also be taken as a Corequisite)
The major emphasis is on the development and reporting of accounting information for use by investors, creditors, and others. The student is required to develop skills in the preparation and use of accounting information and must demonstrate an understanding of the accounting process, and be able to evaluate the impact of estimates, alternative accounting principles, and the limitations of the accounting model on accounting information. Topics include preparation and use of financial statements, the accounting process, and the measurement and reporting of income, assets, liabilities, and owners' equity.
IAI code: BUS 903
Course equivalencies: ACCT201/201H/CPST310/ACACT201
Outcomes:
The student will be able to understand the underlying principles, design, concepts, limitations, and the necessity of accounting systems; The student will gain an appreciation of the uses of financial data and financial statements and their impact on business decisions

ACACT 202 Introductory Accounting II (3 Credit Hours)
Pre-requisites: ACACT 201
This course highlights the differences between financial accounting and managerial accounting. The course begins by completing the study of transactions and events affecting financial statements. The cash flow statement is then explored in some detail. Finally, financial statement analysis as traditionally practiced, is considered a capstone for financial accounting. The course then focuses on the use of accounting data by management. Product costing in a manufacturing setting, assigning of costs to objects, learning how costs behave, and the use of accounting data by management in planning operations, controlling operations, and in short term decision making are all investigated.
IAI code: BUS 904
Course equivalencies: ACCT202/ACCT202H/ACACT201
Outcomes:
The student will be able to understand the differences between cash and accrual accounting, the use of ratio analysis in investing and managing decisions, the value and importance of identifying and allocating costs, and the methods involved in the budgeting process

Arrupe Biology (ACBIO)

Discover, search, courses (p. 2661)!

ACBIO 101 General Biology I (3 Credit Hours)
Co-requisites: ACBIO 111
General Biology I is a 3-credit lecture course that introduces the fundamental principles of Biology focusing the fields of cell structure and function, molecular genetics, and evolution. Topics covered in the course include introductory chemistry, cell structure and function, cellular communication, metabolic processes, cellular reproduction, and introductory genetics.
IAI code: BIO910; L1910L
Course equivalencies: ACBIO 101 / BIOL 101
Outcomes:
Students will be able to demonstrate an understanding of matter, energy, and organization in living systems; Students will be able to demonstrate an understanding of the biochemistry and metabolism of organisms; Students will be able to demonstrate and understand the fundamental concepts of cell structure, function, and processes; Students will be able to explain the major concepts of molecular genetics, including the flow of genetic information from DNA to RNA to proteins and how changes in genes impact cellular function, organismal health, and evolutionary trajectories

ACBIO 102 General Biology II (3 Credit Hours)
Pre-requisites: ACBIO 101 and ACBIO 111 with grade of C- or better
Co-requisites: ACBIO 112
General Biology II is a 3-credit lecture course that introduces the fundamental principles of Biology focusing the fields of evolution and evolutionary history, plant structure and function, animal form and function. Topics covered in the course include evolutionary processes, speciation, history of life on earth, plant biology, soils, homeostasis, animal biology, mammalian organ systems, community ecology, and environmental challenges as scientific and social problems.
IAI code: BIO910; L1910L
Course equivalencies: ACBIO 102 / BIOL 102
Outcomes:
Students will be able to demonstrate an understanding of biological evolution and differentiate between the processes of evolution; Students will be able to demonstrate an understanding of the evolutionary history of life on Earth; Analyze the functions and interrelationships of various organismal systems including plant structure and function, and animal form and function; Explain major concepts of ecology including nutrient cycling, trophic levels, population dynamics, and biodiversity

ACBIO 111 General Biology I Lab (1 Credit Hour)
Co-requisites: ACBIO 101
General Biology 1 Lab is a 1-credit laboratory course that introduces students to the fundamental principles of organismal biology.
IAI code: BIO910; L1910L
Course equivalencies: BIOL 111/ACBIO 111
Outcomes:
Differentiate between the major taxonomic groups; Make comparisons in cell structure and function among selected organisms; Identify characteristics of selected organisms and understand the evolutionary and ecological relationships among taxonomic groups; Demonstrate the ability to use current research techniques and instruments to study the diversity of organisms at the microscopic and macroscopic level

ACBIO 112 General Biology II Lab (1 Credit Hour)
Pre-requisites: ACBIO 101 and ACBIO 111 with a grade of C- or better
Co-requisites: ACBIO 102
General Biology lab is a 1-credit laboratory course that introduces the fundamental principles of Biology focusing on evolutionary principles and processes, cell structure and function, plant and animal biological processes, and ecological principles.
IAI code: BIO910; L1910L
Course equivalencies: ACBIO 112 / BIOL 112
Outcomes:
Differentiate between the major taxonomic groups; Make comparisons in cell structure and function among selected organisms; Identify characteristics of selected organisms and understand the evolutionary and ecological relationships among taxonomic groups; Demonstrate the ability to use current research techniques and instruments to study the diversity of organisms at the microscopic and macroscopic level

Arrupe Chemistry (ACCHM)

Discover, search, courses (p. 2661)!

ACCHM 100 Introductory Chemistry (3 Credit Hours)
A course emphasizing the general principles and theories of chemistry, including fundamentals of inorganic chemistry, atomic structure and states of matter, bonding, stoichiometry, acid-base concepts, periodicity and solution chemistry.
IAI code: P1902
Outcomes:
Understand the structure of matter and the chemical changes it undergoes, and predict those changes based on the periodic nature of the elements; Solve problems using chemical calculations concerning mass or concentration; Describe strong and weak acids and bases, and carry out related calculations; Develop the academic skills needed for future science courses including problem-solving, taking and reviewing notes, and multiple choice exams

ACCHM 101 General Chemistry I (3 Credit Hours)
Pre-requisites: ACMAT 117 (C- or higher); Corequisites: ACCHM 111
This course focuses on building a conceptual understanding of fundamental chemical principles. Topics include the periodic table of the elements, atomic structure, nuclear chemistry, basic concepts of quantum theory, bonding, stoichiometry of compounds and reactions, thermochemistry, solutions, acids and bases, and the gaseous state.
IAI code: CHM911; P1902
Course equivalencies: ACCHM / CHEM 101
Outcomes:
Build conceptual understanding of fundamental chemical principles

ACCHM 102 General Chemistry II (3 Credit Hours)
Pre-requisites: ACCHM 101 and ACMAT 118; Corequisite of ACCHM 112
Topics include the basic concepts of the liquid and solid states, solutions, reaction kinetics, equilibria, acid-base equilibria, solubility equilibria, reaction thermodynamics, and electrochemistry.
IAI code: CHM912
Course equivalencies: ACCHM / CHEM 102
Outcomes:
Continue building on conceptual understanding of fundamental chemical principles

ACCHM 111 General Chemistry Lab I (1 Credit Hour)
Co-requisites: ACCHM 101
This laboratory course translates theory and topics covered in the lecture (ACCHM 101) to application. Students will be introduced to basic chemical laboratory skills and techniques. Topics include lab safety, measurements and calculations, basic statistics, pH and titration, calorimetry, spectrophotometry, and a variety of chemical reactions.
IAI code: CHM911; P1902L
Course equivalencies: ACCHM / CHEM 111
Outcomes:
Students will be able to apply proper lab safety and proper procedures for handling and disposal of chemicals, demonstrate proper manipulation of common equipment, as well as use and understand selected instrumentation

ACCHM 112 General Chemistry Lab II (1 Credit Hour)
Co-requisites: ACCHM 102
The second semester of general chemistry laboratory exposes students to qualitative analysis and continues the process of experimenting and collecting data to test the validity of theories and models presented in lecture, including the liquid and solid states, solutions, equilibrium, acid-base equilibria, solubility equilibria, kinetics, thermodynamics, and electrochemistry.
IAI code: CHM912
Course equivalencies: ACCHM / CHEM 112
Outcomes:
Formulate or evaluate hypotheses, plan and conduct experiments, make systematic observations, interpret and analyze data, draw conclusions, and communicate results

Arrupe Communication (ACCOM)

Discover, search, courses (p. 2661)!

ACCOM 101 Public Speaking and Critical Thinking (3 Credit Hours)
This course is designed to supply students with an understanding of critical thinking practices, foundational tenets of communication theory, the skills of public address and persuasion, the role of visual aids in effective presentation, and a sense of the social responsibility that comes with the capacity for communication.
IAI code: C2 900
Course equivalencies: ACCOM 101/103 COMM 101/103
Outcomes:
Students gain skills in public speaking, preparing a presentation - including visual aids - and critical listening, thinking, and speaking

ACCOM 103 Business and Professional Speaking (3 Credit Hours)
Through theory and practice, the course will explore oral presentation in business and professional situations, including message design and audience analysis of organizations. Students will examine expectations for communication in business; after studying and analyzing professional context, students will complete three substantive presentations. Finally, students will gain a sense of social responsibility that comes with the capacity for communication.
IAI code: C2900
Course equivalencies: ACCOM 101/103 COMM 101/103
Outcomes:
Students gain skills in public speaking, preparing a presentation, including visual aids, and critical listening, thinking, and speaking with a focus on professional environments

ACCOM 200 Communication and New Media (3 Credit Hours)
This course explores the way technology affects personal, cultural, and mass communication through examining the historical, societal, and ethical implications of new and interactive forms of media.
Course equivalencies: X - COMM / ACCOM 200
Outcomes:
Students use audio, video, and digital tools to research and produce essays, projects, and presentations that analyze the impact of technology on communication

ACCOM 201 Introduction to Communication (3 Credit Hours)
This course gives a general and theoretical overview of communication. By approaching communication through a critical and historical lens, students will acquire a foundation for further study and practice in communication.
IAI code: MC911
Course equivalencies: ACCOM 201 / COMM 175
Outcomes:
Students will have an understanding of the nature and structure of communication and be able to critically evaluate oral and written communications

ACCOM 274 Introduction to Cinema (3 Credit Hours)
This course introduces students to cinema as an artform and a mode of mass communication. By developing a film vocabulary and studying film aesthetics, students will learn how to evaluate film and create written formal analyses of film texts. Students will also consider the historical and cultural impact of films and begin to explore film theory and criticism.
IAI code: F2908
Course equivalencies: ACCOM / COMM 274
Outcomes:
Understand film aesthetics and form; Develop basic filmic vocabulary related to production, distribution, and analysis; Develop critical standards for film evaluation; Critically evaluate films verbally and in written form; Recognize scholarly approaches to film studies and criticism; Analyze film texts considering historical and social context

Arrupe Criminal Justice (ACCRJ)

Discover, search, courses (p. 2661)!

ACCRJ 201 The Criminal Justice System (3 Credit Hours)
This course provides an overview of the development and operations of the US criminal justice system. Attention will be focused on law enforcement, judicial organization, and correctional processes. The course will also consider the nature and extent of crime and will survey main theories of criminal behavior.
IAI code: CRJ 901
Course equivalencies: ACCRJ 201 / CJC 101
Outcomes:
Students will be able to demonstrate an understanding of the structure and challenges facing the criminal justice system from historical, interdisciplinary, and inter-agency relationship perspectives

ACCRJ 204 Corrections (3 Credit Hours)
This course examines the history, functions, and processes of corrections. The primary focus is institutional corrections and its evolution based on philosophies of retribution, deterrence, incapacitation, and rehabilitation. The role and influence of community correctional practices and policy on institutional corrections are also covered.
IAI code: CRJ911
Course equivalencies: ACCRJ 204 / CJC 204
Outcomes:
Students will be able to identify and describe the role of institutional corrections in society and the criminal justice system and articulate the connection between theories regarding criminality and the purposes of incarceration that have historically guided and continue to guide American correctional practice historically and currently

Arrupe Economics (ACECO)

Discover, search, courses (p. 2661)!

ACECO 201 Microeconomics (3 Credit Hours)
This course is an introduction to demand and supply, consumer choice, price analysis in alternative industrial organizations, and the distribution of income.
IAI code: S3 902
Course equivalencies: ECON201/201H/ACECO201/CPST243
Outcomes:
Students will be able to think critically about price formation in different market structures and how prices, household incomes, and income distribution in a diverse society are determined with interpretations based on the concepts of opportunity costs and decision making under uncertainty

ACECO 202 Macroeconomics (3 Credit Hours)
This course is an introduction to national product, its components, money and the real sectors, and business fluctuations.
IAI code: S3 901
Course equivalencies: ECON202/ECON202H/ACECO202/245
Outcomes:
Students will be able to think critically about the economic environment of the nation and to measure growth, unemployment, inflation, fiscal, and monetary policies of the government to ultimately understand economic stability and the welfare of the individual citizen

Arrupe English (ACENG)

Discover, search, courses (p. 2661)!

ACENG 110 Interpreting Literature (3 Credit Hours)
This is a foundational course in literary studies requiring students to read closely and analyze carefully a representative variety of prose, poetry, and drama, master key literary and critical terms, and explore a variety of core critical approaches to the analysis and interpretation of literature.
IAI code: H3900
Course equivalencies: ACENG 110 / UCLR 100
Outcomes:
Students will understand the structure and techniques of different literary forms and will be able to analyze the content of literary works with respect to the authors' purposes and meaning

ACENG 220 Introduction to Rhetoric: Classical & Contemporary (3 Credit Hours)
This course emphasizes the relevance of classical disputes for understanding current controversies over the nature and function of discourse. We will study several definitions of rhetoric, including rhetoric as "the art of persuasion," as the available means of persuasion, as identification, and others. Enrollment Conditions: Practical tools and theoretical methods will strengthen your skills in critical thinking, persuasive reasoning, and logical reasoning.
Course equivalencies: ACENG 220 / COMM 220

ACENG 271 Exploring Poetry (3 Credit Hours)
This class offers you the opportunity to become proficient in close reading and critical analysis of poetry with different styles, and from several different periods.
Knowledge Area: Tier 2 Literary Knowledge
IAI code: H3903
Course equivalencies: ENGL 271/ACENG 271
Outcomes:
practicing the skill of close reading & developing annotation strategies for literary texts; mastering key literary terms and integrating them into your own analyses of literature; placing the poems we read in conversation with their historio-political contexts; using different literary theoretical lenses to ask new questions of our texts; articulating [explaining/stating] your interpretations: in class, on tests, and for written assignments

ACENG 273 Exploring Fiction (3 Credit Hours)
Exploring Fiction focuses on reading and analysis of fiction, especially short stories and novels, from a variety of periods, while examining and applying key approaches to determining literary meaning, form and value.
Knowledge Area: Tier 2 Literary Knowledge
IAI code: H3901
Course equivalencies: ENGL 273/ACENG 273
Outcomes:
1) Critically analyze fiction, especially short stories and novels, from a variety of periods, and apply a narrative theory approach to literary interpretation; 2)Interpret literary texts within various contexts - biographical, social, political, aesthetic, etc

ACENG 274 Exploring Shakespeare (3 Credit Hours)
This course focuses on the dramatic works of Shakespeare as literature and as theatre, covering at least three of the four genres (comedy, history, tragedy, romance). The class experience includes attendance at and discussion of performances of the Chicago Shakespeare Theater.
IAI code: H3 905
Course equivalencies: ACENG 274 / ENGL 274
Outcomes:
Students will be able to demonstrate understanding of the theatrical works of Shakespeare, such elements of drama as plot, character, theme, imagery, and verse forms, and the personal, political, and theatrical world in which Shakespeare lived and worked

ACENG 276 Writing the Self (3 Credit Hours)
In this course, we will study nonfiction prose from a range of times and places. To focus our studies, we will investigate how a wide variety of authors have used writing to express, explore, and create a sense of self. When sharing their lives with an audience of readers, how do these authors navigate the territory between the private and public spheres, between internal experience and external reality, between self and environment? To answer this question, we will read a variety of nonfiction forms including diaries, essays, autobiographies, and graphic memoirs. Throughout the course, we will discuss issues of literary meaning, form, and value.
IAI code: H3 904
Course equivalencies: ACENG 276 / ENGL 290
Outcomes:
Upon completion of this course, students will have demonstrated inquiry and pursue self-directed learning, mastered key literary terms, read for comprehension, read for analysis, and argued for literary interpretation

ACENG 282 African American Literature (3 Credit Hours)
This course focuses on the development of the African American literary tradition, including analysis of historic and contemporary themes. Readings may cover any time period in African American literature through the present.
IAI code: H3910D
Course equivalencies: ENGL 282 / ACENG 282
Outcomes:
Students will be able to discuss the significance of major African American literary movements and the contributions of representative writers from these periods

Arrupe Fine Arts (ACFNA)

Discover, search, courses (p. 2661)!

ACFNA 100 Art and Visual Culture (3 Credit Hours)
A survey of the visual arts (painting, drawing, printmaking, sculpture, and architecture) as they transmit cultural traditions and humanistic and aesthetic values. Examines historical, social, and technological factors that contribute to understanding the function and meaning of works of art.
IAI code: F2 900
Course equivalencies: X - ACFNA 100 / FNAR 199
Outcomes:
1) Introduce students to an appreciation of the visual arts through an inter cultural, social/historical approach; 2) Emphasize the nature of the creative process, integrating a study of the conceptual principles, with methods and materials which influence artistic critical thinking, problem solving, exploration, and discovery

ACFNA 105 Western Art: Renaissance to Modern (3 Credit Hours)
A general survey which explores the development of art in Western culture from the Renaissance to modern art in the twentieth century.
IAI code: F2 901
Course equivalencies: ACFNA 105 / FNAR 201
Outcomes:
Students will be able to demonstrate knowledge of the ideas, formal expressions, themes, techniques, and functions of art in relation to their cultural, social, and historical contexts; Students acquire the skills to critically analyze the relationships between various art forms and their relation to historical cultures

ACFNA 112 Foundation Studio: Two Dimensional Design (3 Credit Hours)
This course explores the fundamental organizational systems of intentional visual expression through purposeful making of, and critical response to, traditional design concepts. The elements of art and the principles of design will be experienced through a range of media both tactile and digital, with emphasis on spatial perception, color theory, and visual communication.
IAI code: ART 907
Course equivalencies: FNAR112/ACFNA112
Outcomes:
Students will recognize and experience the core concepts and practices of visual communication through hands-on exercises and projects addressing observation and perception, composition, transformation and manipulation of the picture plane, sequence and narrative, and the physical and communicative properties of pigment and color; Students will manipulate various media to produce intentional spatial effects and use design methods, including scale, perspective, and composition, to guide a viewer's understanding of, and reaction to, visual information on a two-dimensional surface; Students will further engage these concepts through critical examination of images, texts, and objects representing a wide array of contemporary and historical visual culture; Students will demonstrate understanding of visual and linguistic design vocabulary and an awareness of professional design practices through self-assessment and group critique

Arrupe History (ACHIS)

Discover, search, courses (p. 2661)!

ACHIS 101 Western Civilization to the 17th Century (3 Credit Hours)
This course traces the early development of Western civilization from the ancient Near East, Greece and Rome, the medieval civilization(s), and the European Renaissance and Reformation.
IAI code: S2 902
Course equivalencies: X-HIST101/CATH101/ACHIS101
Outcomes:
Students will gain an understanding of history as a discipline, be able to place Judaism, Christianity, and Islam in historical context, explain the expansion of the West, and develop critical thinking and communications skills

ACHIS 102 Western Civilization from the 17th Century (3 Credit Hours)
This course traces the development and of western civilization and its global impact from the seventeenth century to the present.
IAI code: S2 903
Course equivalencies: ACHIS 102 / HIST 102
Outcomes:
Students will gain an understanding of history as a discipline and develop critical thinking skills based on historical knowledge about the key people, places, and events that shaped the modern world

ACHIS 104 Introduction to Global History since 1400 (3 Credit Hours)
This course surveys the history of the world since 1400 by introducing students to the origins of diverse people and the intellectual, social, political, and economic developments of their societies to the present.
IAI code: S2913N
Course equivalencies: HIST / ACHIS 104
Outcomes:
Students will gain an understanding of history as a discipline; differentiate intellectual, social, political, and economic aspects between and among diverse people and their societies; place contemporary global issues within their historical contexts; and develop critical thinking and communications skills

ACHIS 201 US History to 1865 (3 Credit Hours)
This course is an introduction to the history of the United States from the colonial era through the Civil War.
IAI code: S2 900
Course equivalencies: HIST201/HIST111/ACHIS201
Outcomes:
Students will demonstrate an understanding of Native American societies, the impact of European colonization, the creation and evolution of democratic institutions in a multicultural society, the geographic expansion of the United States, and the impact of slavery

ACHIS 202 US History since 1865 (3 Credit Hours)
This course is an introduction to the history of the United States from the Civil War to the present.
IAI code: H2 905; S2901
Course equivalencies: HIST202/HIST112/ACHIS202
Outcomes:
Students will demonstrate an understanding of how the United States became a modern industrial society, the emergence and evolution of the modern welfare state, the rise of the United States as a global power, and the impact of controversies over civil rights and liberties on American society

ACHIS 220 Introduction to Mexican American History (3 Credit Hours)
This course surveys of the history of Mexicans and Mexican Americans in the United States, examining their social, political, and economic contributions to the history of the U.S. from the 15th century to the present.
IAI code: S2 923D
Outcomes:
Analyze pre-Columbian societies, European colonization, and Mexican migration; synthesize various interpretations and sources; situate Mexican American history past, present, and future

Arrupe Information Systems (ACINF)

Discover, search, courses (p. 2661)!

ACINF 247 Introduction to Information Systems (3 Credit Hours)
This course is an introduction to using information technology to support business processes.
Course equivalencies: INFS247/ISOM/MGSC247/ACINF247
Outcomes:
Students will understand the purpose and composition of information systems and develop expertise in the use of information technology to develop business spreadsheets and database applications

Arrupe Interdisciplinary Science (ACISC)

Discover, search, courses (p. 2661)!

ACISC 101 Interdisciplinary Science: Scientific Basis of Environmental Issues (3 Credit Hours)
The foundational course in science is predicated on the view that understanding environmental issues and their underlying scientific principles will occupy a central role in our students' lives and will be critical in their development as informed and participating members of society. The overarching strategy of the course will be to frame environmental science in terms of a series of interacting systems to allow students to analyze a variety of environmental issues.
IAI code: LP 900
Course equivalencies: ENVS 101 / ACISC 101 / ENVS137
Outcomes:
1) Exhibit knowledge of the nature of the four Earth systems; 2) Draw inferences from evidence, constructing testable and falsifiable hypotheses and analyzing data; 3) Understand the role of energy and thermodynamics in ecosystems; 4) Understand and describe important cycles in nature

ACISC 102 Environmental Processes, Challenges, and Methods (4 Credit Hours)
This course examines scientific issues underlying a series of significant threats to the planet. These include the loss of biodiversity, ensuring access to a stable supply of food and water for all of the Earth's inhabitants, climate change, and the demands for energy and other resources. Students will also investigate possible responses to these planetary threats.
IAI code: LP 901L
Outcomes:
Students will understand the nature of contemporary environmental challenges, both as scientific and social problems

Arrupe Mathematics (ACMAT)

Discover, search, courses (p. 2661)!

ACMAT 100 Fundamentals of Math (3 Credit Hours)
This course focuses on the foundations of algebra. Topics include the real number system operations, variable expressions, linear equations and inequalities, graphing linear equations in two variables, slope and equations of a line, exponents and polynomials, applications of proportion, percent, and the use of formulas to develop problem-solving skills.
Course equivalencies: ACMAT100/MATH100
Outcomes:
Students will evaluate variable expressions; Students will solve and graph linear equations in two variables; Students will apply ratios and proportions

ACMAT 117 Precalculus I (3 Credit Hours)
Pre-requisites: "C-" or better in ACMAT 100 or by test placement
This course covers algebraic topics ranging from functions and their applications to complex numbers to inverse functions to the fundamental theorem of algebra.
Course equivalencies: ACMAT 117/MATH 117
Outcomes:
Students who plan to study calculus will obtain the algebraic background needed to enroll in precalculus

ACMAT 118 Precalculus II (3 Credit Hours)
Pre-requisites: "C-" or better in ACMAT 117 or required score on placement test
This course is a continuation of MATH 117 focusing on exponential, logarithmic, trigonometric, and inverse trigonometric functions, their graphs, and their properties. Techniques for solving equalities involving these functions are examined. Trigonometric identities, sum and difference formulas, double and half-angle formulas, the Laws of Sines and Cosines, and polar coordinates are also considered.
Course equivalencies: MATH 118/ ACMAT 118
Outcomes:
Students will build and improve their skills in algebra and pre-calculus topics in order to be able solve a variety of problems; The content and the strategies students will learn will prepare them to be successful in Calculus and courses beyond; Students will frequently be asked to express their mathematical thinking orally and in writing by working in groups and explaining their work

ACMAT 161 Calculus I (4 Credit Hours)
A traditional introduction to differential and integral calculus. Functions, limits, differentiation, the Intermediate Value Theorem, curve sketching, optimization problem, related rates, definite and indefinite integrals, the Fundamental Theorem of Calculus, logarithm and exponential functions, applications to the natural and social sciences. Restricted to Arrupe students. Students are eligible to enroll in the course upon successful completion of ACMAT 118 or by math placement exam.
IAI code: M1900-1
Course equivalencies: ACMAT 161/MATH 161
Outcomes:
Students will obtain the background needed to enroll in Calculus II; This course satisfies the quantitative literacy requirement of the core curriculum

ACMAT 162 Calculus II (4 Credit Hours)
Pre-requisites: A grade of C- or higher in ACMAT 161; math placement exam
This course is a continuation of ACMAT 161, Calculus I.
IAI code: M1900-2
Course equivalencies: ACMAT 162/MATH 162
Outcomes:
1) Select and apply appropriate models and integration techniques to solve problems involving algebraic and transcendental functions; these problems will include but are not limited to applications involving volume, arc length, surface area, force and work; 2) Recognize and implement appropriate techniques to integrate trigonometric functions and apply trigonometric substitutions to solve integrals; 3) Decompose a rational integrand using partial fractions; 4) Evaluate proper and improper integrals using various integration techniques: 5) Determine convergence of improper integrals with discontinuities in their domain or infinite limits of integration; 6) Apply basic anti-differentiation techniques to selected problems arising in various fields such as physical modeling, economics and population dynamics; 7) Find general solutions to basic differential equations and analytical solutions to separable differential equations; 8) Find solutions of various kinds of differential equations using Direction Fields and Euler's Method; 9) Develop the algebra associated with vectors in both two and three dimensions and define two fundamental operations for vectors: the dot product and the cross product; 10) Develop equations for lines and planes in space and explore their properties and uses; 11) Apply familiar single-variable function properties (domain, graphs, limits, continuity and derivatives) to multivariable functions; 12) Find maximum and minimum values of multivariable functions using partial derivatives; 13) Identify the Directional Derivatives and the gradient of a multivariable function

Arrupe Philosophy (ACPHI)

Discover, search, courses (p. 2661)!

ACPHI 130 Philosophy and Persons (3 Credit Hours)
This course examines the way philosophy looks for fundamental characteristics that identify life as a properly human life, asks about its ultimate meaning or purpose, and raises questions about what counts as a good life.
IAI code: H4 900
Course equivalencies: PHIL120/130/180/ACPHI130
Outcomes:
Students will be able to explain a claim to truth, to explain theories of value in human life, and to describe theories of the metaphysical nature of human persons

ACPHI 205 The Person and Society (3 Credit Hours)
A contemporary look at the origins of social problems, democracy movements (both domestic and international), and the role of government in society.
IAI code: H4 901
Course equivalencies: PHIL162/182/262/282/ACPHI205
Outcomes:
Students will understand the moral bases of social activity and have the ability to relate individual responsibilities with life in a society

ACPHI 274 Logic (3 Credit Hours)
Study of the rules of judging and reasoning, both inductive and deductive, in a traditional, language-centered context rather than a symbolic context. Logical analysis of both formal and informal fallacies and of the consistency and logical consequences of a given set of statements is included. Logical analysis is applied to problems dealing with knowledge of reality.
IAI code: H4 906
Course equivalencies: PHIL 174/PHIL 274/ACPHI 274
Outcomes:
Students will be able to formally analyze, evaluate, and demonstrate the various aspects of argumentation

ACPHI 281 Ethics (3 Credit Hours)
This course is a general introduction to ethics and moral philosophy.
IAI code: H4 904
Course equivalencies: PHIL 181 / PHIL 281 /ACPHI 281
Outcomes:
Students will be able to demonstrate understanding of criteria for choosing between conflicting ethical theories, moral disagreement, the justification of moral judgments, and the application of ethical standards to practical decision making and ethical questions that arise in everyday life

ACPHI 284 Society, Justice, and Health Care (3 Credit Hours)
A study of the role of ethics and moral reasoning in healthcare contexts. Emphasis is placed on identifying ethical issues that arise in a variety of contemporary healthcare settings and in critically applying ethical theories and concepts to respond to health care and medical issues.
IAI code: H4907
Course equivalencies: ACPHI 284 / PHIL 264/ PHIL 284
Outcomes:
Students will gain skills in ethical questioning, reasoning, and application, with an emphasis on the intersection of healthcare practice and broader social, political, and legal issues

Arrupe Political Science (ACPOL)

Discover, search, courses (p. 2661)!

ACPOL 101 American Government and Citizenship (3 Credit Hours)
This course examines American national government and politics, including institutions, group and electoral processes, and public policy. An underlying theme throughout the course identifies the rights and responsibilities of citizens within the American political system.
IAI code: S5 900
Course equivalencies: ACPOL 101 / PLSC 101
Outcomes:
Students will be able to demonstrate an understanding of the American political system, the patterns of political participation and behavior of diverse individuals and groups in American society, and evaluate the roles and processes of US political institutions

ACPOL 200 Introduction to Political Thought (3 Credit Hours)
An introduction to political thought, covering the principal ideas, controversies, and institutions of political society. Authors covered include Plato, Machiavelli, Locke, Hobbes, and Marx.
IAI code: PLS913
Course equivalencies: ACPOL 200 / PLSC 100
Outcomes:
Students will be able to demonstrate an understanding of major approaches to the normative study of politics, to identify the assumptions underlying philosophical arguments, and to critically assess different theories of political justice

ACPOL 202 International Relations (3 Credit Hours)
Competing perspectives on international politics and global issues such as North-South relations, human rights, war and peace, population growth, and environmentalism.
IAI code: S5 904
Course equivalencies: ACPOL 202 / PLSC 102
Outcomes:
Students will be able to demonstrate an understanding of the main approaches to the study of international politics and to analyze and assess such major substantive issues as interstate war, terrorism, arms control, international political economy, and sustainable development

ACPOL 205 Power, Rap Music, and Urban America (3 Credit Hours)
By focusing on rap music and urban American society since the 1960s, this course delves into the social scientific analysis of race, gender, socioeconomic status, and other identities.
IAI code: S9902D
Outcomes:
Derive a balance of the (1) concepts, (2) theories, (3) methods, and (4) conclusions of Political Science and Sociological inquiry; gain proficiency in reading, writing, and verbal communication within the disciplinary frameworks of Political Science and Sociology and gain proficiency in combining the frameworks for an interdisciplinary approach; identify, analyze, and question the political and sociological impact of race, ethnicity, socioeconomic status, and gender in urban American society; examine the political and social impact of Hip Hop culture (and rap music) in urban American society and the ethical issues contained; develop the academic skills needed for future social science and behavioral science courses including examining peer-reviewed scholarship, examining multimedia content, and producing technical, social scientific research projects related to political and social questions and problems

Arrupe Psychology (ACPSY)

Discover, search, courses (p. 2661)!

ACPSY 201 General Psychology (3 Credit Hours)
Introduction to concepts, theories, and methods in psychology. Emphasis is given to the scientific study of consciousness and human behavior. Topics include: human development, learning, thinking, perception, personality, testing, mental illness and mental health, and biological and social aspects of behavior.
IAI code: S6 900
Course equivalencies: ACPSY 201 / PSYC 101
Outcomes:
Students will master basic concepts and key theories and learn to apply them to real-world situations

ACPSY 273 Developmental Psychology (3 Credit Hours)
Survey of theory and research relevant to human growth and development with emphasis on physical, cognitive, and social development from infancy through adolescence.
IAI code: S6 902
Course equivalencies: ACPSY273/PSYC273
Outcomes:
Students will demonstrate understanding of basic theory and research in human development, and will develop skills in critical examination of psychological research as applied to current issues in human development

ACPSY 275 Social Psychology (3 Credit Hours)
Pre-requisites: ACPSY 201
This course is an introduction to the field of social psychology, which seeks to understand human behavior by viewing it within its social and cultural context.
IAI code: PSY908
Course equivalencies: ACPSY 275 / PSYC 275
Outcomes:
Students will be able to demonstrate understanding of cultural and social group differences, which is critical to the development of inter-cultural understanding and the reduction of inter-group (or inter-cultural) conflict

ACPSY 280 Abnormal Psychology (3 Credit Hours)
Pre-requisites: ACPSY 201 General Psychology
Nature and causes of maladjustment and mental disorders. History of mental illness, diagnosis, research, and treatment of mental disorders.
IAI code: PSY905
Course equivalencies: X-CPSY333/PSYC331/ACPSY280
Outcomes:
Students will demonstrate understanding of current approaches to researching maladaptive behavior, current views of maladaptive behavior, major categories of mental disorders, factors contributing to development of problems, different types of intervention strategies, and appreciation of social, ethical, and legal issues

Arrupe Statistics (ACSTA)

Discover, search, courses (p. 2661)!

ACSTA 103 Introduction to Statistics (4 Credit Hours)
This course provides an introduction to statistical reasoning and techniques in descriptive and inferential statistics and their applications. All foundational mathematics topics necessary for college level Statistics will be reviewed and reinforced throughout the course. Topics will include: data collection processes (observational studies, experimental design, sampling techniques, bias), descriptive methods using quantitative and qualitative data, bivariate data, correlation, least squares regression, probability theory, probability distributions (normal distributions and normal curve, binomial distribution), confidence intervals, hypothesis tests using p-values.
IAI code: M1902
Course equivalencies: ISSCM/H/241/STAT103/ACST101/03
Outcomes:
Students will develop the skills necessary to compute, compare and analyze numbers; obtain a background in the fundamentals of descriptive and inferential statistics; develop the skills necessary to analyze graphs and data sets; develop the algebra skills necessary to calculate descriptive statistics measurements; and explain the use of data sets and statistics as tools to reach reasonable conclusions

Arrupe Theology (ACTHE)

Discover, search, courses (p. 2661)!

ACTHE 101 Introduction to Christian Theology (3 Credit Hours)
This course is an introduction to reflection on and analysis of the Christian theological tradition.
Course equivalencies: ACTHE 101 / THEO 100
Outcomes:
Students will be able to demonstrate understanding of the tasks of Christian theology in its efforts to understand the human situation from the perspective of faith, various challenges to theology in the contemporary world, and will focus on one or more current theological issues

ACTHE 107 Introduction to Religious Studies (3 Credit Hours)
This course is an introduction to the contemporary field of religious studies.
IAI code: H5 900
Course equivalencies: THEO170 / THEO270 / ACTHE 107
Outcomes:
Students will be able to analyze and interpret various ways in which religious traditions intersect with contemporary issues

Arrupe University Course (ACUNI)

Discover, search, courses (p. 2661)!

ACUNI 101 First Year Seminar (1 Credit Hour)
This course introduces students to college life, especially that of an Arrupe student. The course focuses on Ignatian spirituality, community building, goal setting and attainment, academic success strategies, and task initiation.
Course equivalencies: UNIV101 / ACUNI 101

ACUNI 102 Academic Success Strategies (1 Credit Hour)
Designed to strengthen students' academic skills so that they can become more effective learners. By completing class readings and participating in class discussions and activities, students will learn and practice relevant and productive study strategies. Additionally, students will reflect on the motivations, achievements, and obstacles they encounter while working to become more successful students.
Outcomes:
Time management, motivation maintenance, study skills, and college resources

ACUNI 103 Career Exploration and Attainment (0 Credit Hours)
This course focuses on career exploration, development, and attainment. Students will identify their professional aptitudes and interests, develop their professional network, and hone their interviewing skills.
Outcomes:
1) Identify and evaluate career options based on aptitude and interests; 2) Identify and prioritize short-term and long-term steps for pursuing one or more careers of interest; 3) Use standard resume format; select and describe relevant educational, employment, and extracurricular experiences to demonstrate suitability for a specific position; 4) Develop an elevator pitch; 5) Use the STAR method to answer interview questions (STAR = Situation; Task; Action; Result)

ACUNI 104 College Transfer Seminar (0 Credit Hours)
This course is designed to help prepare first year students in identifying appropriate transfer institutions to apply to in the following fall and spring.
Outcomes:
Students will identify transfer institutions; Understand direct and indirect costs of attending college; Prepare their transfer applications; Identify support services at the senior institution

ACUNI 201 A Journey in the Spirit of Ignatius (1 Credit Hour)
The purpose of the sophomore seminar is to provide students with the opportunity to utilize Ignatian values and reflective practices to identify their values, accomplishments and future personal, academic and or professional goals. Restricted to Arrupe Sophomores.
Outcomes:
Students will reflect upon how Ignatian values connect to their personal experiences and how they see themselves becoming persons for others

Arrupe Writing and Composition (ACWRI)

Discover, search, courses (p. 2661)!

ACWRI 105 College Writing I (3 Credit Hours)
College Writing I is designed to help first-year Arrupe students understand and meet college expectations for writing. Students will complete at least four polished papers during this course. Activities will also include informal writing, invention exercises, and responding to peer and instructor feedback. At least 60% of the final grade will be based on formal, graded writing assignments.
IAI code: C1900
Outcomes:
Students will demonstrate an effective process for invention, drafting, and revision to produce polished academic work; communicate using written modes appropriate to audience and purpose; and analyze, synthesize, and evaluate texts

ACWRI 110 College Writing II (3 Credit Hours)
Pre-requisites: ACWRI 105
College Writing II is designed to help first-year Arrupe students understand and meet college expectations for writing. Students will complete at least three polished papers, including a long final paper that requires documented, multi-source writing. Activities will also include informal writing, invention exercises, information literacy instruction, and responding to peer and instructor feedback. At least 60% of the final grade will be based on formal, graded writing assignments.
IAI code: C1901R
Course equivalencies: ACWRI 110 / UCWR 110 / UCWR109
Outcomes:
In College Writing II, students will continue to practice and strengthen their writing process, including invention, drafting, and revision; Additionally, students will demonstrate skills needed in the research process, including finding, evaluating, and integrating material from reliable sources

Arts (ARTS)

Discover, search, courses (p. 2661)!

ARTS 200 Introduction to Teaching Artistry (3 Credit Hours)
Introduction to teaching artistry with an emphasis on art education, art integration, and community-based arts practices.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will identify and describe the practice of teaching artistry, reflect on a direct experience with an art organization, and create a lesson plan

ARTS 201 Grant Writing for the Arts (2 Credit Hours)
Introduction to grant writing for the arts. The course concludes with a completed grant proposal.
Outcomes:
Students will identify how to find grants that support the arts and engage in the process of applying for a grant or other arts funding

ARTS 397 Fieldwork in Arts Education (3 Credit Hours)
Credit given for arts education work outside the university undertaken under the guidance professional arts educators. Students keep an hour and activity log and write reflective evaluative papers. Permission of the Department of Fine and Performing Arts Specific outcomes and credit hours assigned to be determined by the student in consultation with the Teaching Artistry Faculty Coordinator and the project supervisor

Asian Studies (ASIA)

Discover, search, courses (p. 2661)!

ASIA 130 Introduction to Martial Arts (3 Credit Hours)
This course introduces the student to Chinese Wushu. Two forms of Wushu will be selected for in depth study each semester. Students will explore the origins of the sports studied and their importance to Chinese culture and philosophy while learning the specific physical techniques.
Course equivalencies: THTR130/ASIA130
Outcomes:
Students will improve their balance, flexibility and coordination while learning the basic moves of two forms of Wushu; They will develop a reference for appreciating the place of Wushu in Chinese culture and create a foundation for further Wushu training

ASIA 152 Drawing China (3 Credit Hours)
This is an introductory drawing course. There are no pre-requisites nor prior experience need to succeed in this course. Beijing is our laboratory and the topic of all class drawings.
Course equivalencies: FNAR152/ASIA152
Outcomes:
Students will be able to draw trees, buildings, automobiles, vegetables, human beings in real life situations and in perspective

ASIA 160 The Crafts of China (3 Credit Hours)
This course examines the artisan crafts of China historically and technically. The course explores how and why the crafts appeared, their historical trajectory and demonstrates how the crafts improved technically. Ceramics, Bronze Castings and Wood works will serve as prototypes. Students will undertake independent researches.
Course equivalencies: FNAR160/ASIA160
Outcomes:
Students will identify how the crafts of woodwork, bronze casting and ceramics evolved and how they are currently practiced in China; Students will articulate an understanding of the function of craft in Chinese culture as well compare and contrast it to the function craft in their own culture

ASIA 167 Religions in China (3 Credit Hours)
This course is a survey of various religions in China that may include, not only Confucianism and Taoism, but also Buddhism, Christianity, Islam, Judaism, Zoroastrianism, Manicheism and popular or "folk" religion. The course will consider the function of these various religions in the development of Chinese society and their significance in Chinese civilization from ancient mythology to contemporary practices and developments."
Course equivalencies: X-THEO167/ASIA167/INTS167
Outcomes:
Students will be able to demonstrate knowledge of the beliefs, practices, and institutions in varied contexts and historical periods in China, of various religions, both indigenous and "foreign

ASIA 168 Sacred Texts of China (3 Credit Hours)
Through the study of primary sacred texts of China (in translation), this class will provide a basic understanding of Chinese thought and its historical development. Interconnections among the various periods and different schools of Chinese philosophy such as Confucianism, Taoism, Buddhism and Neo-Confucianism will be demonstrated and discussed from ancient through the medieval and modern periods.
Course equivalencies: X-THEO168/ASIA168/INTS168
Outcomes:
Students will be able to demonstrate knowledge of the major Chinese sacred texts and teachings of various religious and philosophical traditions, and how they developed and interacted historically

ASIA 169 Taoism (3 Credit Hours)
Students will study the history and main ideas and practices of Taoism, meet the sages who wrote the Taoist texts, be introduced to the various schools of Taoist philosophy, and get a feel for what it means to practice Taoism today. The course will illustrate how religious Taoism established a relationship with Confucian thought and practice as well as how at each stage of its historical development, Taoism exerted a profound influence on Chinese politics, economy, culture, art, natural sciences, and social life.
Course equivalencies: X-THEO169/ASIA169/INTS169
Outcomes:
Students will be able to demonstrate knowledge of philosophical and religious Taoist beliefs, practices, and institutions in varied contexts and historical periods

ASIA 191 Traditional Chinese Philosophy (3 Credit Hours)
Students will investigate Chinese ancient philosophy in a way to let its own tendencies be sensed and appreciated. Topics include Confucianism, Mencius, Sunzi, Taoism, Legalism, Yin-Yang School, Tung Chung-shu, Chinese Buddhism and Neo-Confucianism. In addition, students learn about the relations among different schools or different thinkers in the same school. Comparisons between Chinese philosophies and western ones are encouraged.

ASIA 192 Chinese Ethics and Asian Values (3 Credit Hours)
This course offers an overview of the spirit of Chinese ethics, covering sacred and secular as well as intellectual and practical elements.

ASIA 193 Contemporary Chinese Philosophy (3 Credit Hours)
Students will analyze the development of Chinese contemporary thought in its different stages: rejection of the tradition and its recent reevaluation.
Course equivalencies: X-PHIL193/ASIA193/INTS193

ASIA 252 Peoples of China (3 Credit Hours)
This class introduces China's cultural diversity and unity as a whole. It provides a general overview of cultural mappings in China, and a detailed study of significant ethnic minorities.
Course equivalencies: SOCL251/ASIA252/INTS251
Outcomes:
Students will gain the ability to perceive cultural phenomena in a comparative framework and understand cultural differences more deeply

ASIA 263 Political and Social Movements in China (3 Credit Hours)
This course examines historical and contemporary movements pursuing political, economic and social reforms in China. It studies both state-sponsored and voluntary movements.
Course equivalencies: SOCL263/INTS263
Outcomes:
Students will gain a deeper understanding of China's ongoing transformation, and will learn how to develop their own scholarly analysis of such social change

ASIA 266 Development and Social Change in Modern China (3 Credit Hours)
This course examines change and development in modern China from the late Qing period to the present, focusing on the movement from a planned economy to a market-based economy.
Course equivalencies: SOCL266/ASIA266/INTS266WSGS297
Outcomes:
Students will gain knowledge of China's economic development path, and will apply gender and/or class-based analysis to patterns of social change

ASIA 272 Environment of China (3 Credit Hours)
This course provides a systematic introduction to major environmental issues in the context of recent social and economic development in China
Course equivalencies: X-NTSC270/ASIA272/INTS270

ASIA 292 Modern Chinese Fiction (3 Credit Hours)
This course introduces selected fictional works by some of the most insightful writers of modern China. The course focuses on significant aspects of these works with an objective to enhance students' fascination with and skill in the reading and analysis of modern Chinese fiction. Knowledge of modern Chinese fiction will enable students to understand central aspects of 20th century Chinese culture.
Course equivalencies: X-LITR292/ASIA292/INTS290
Outcomes:
Students will be able to analyze literary texts of a particular historical period and write critical essays on works read in the course

ASIA 297 Topics in Asia (3 Credit Hours)
Special topics or new approaches of current interest to the instructor. This course may be used to fulfill the Asian minor requirement for a 300-level course in Asia-related topics. Students may repeat the course for credit when the topic changes.
Interdisciplinary Option: Asian Studies
Outcomes:
Students will gain familiarity with the topic; the ability to make connections between secondary and primary sources; and the capacity to think critically about the ways that historians have approached major issues

ASIA 302 Discovering China Through Film (3 Credit Hours)
This course will give an overview of major films produced in mainland China since 1949. Students will examine the genres of Chinese film better known in contemporary China and consider them a major source of reflection upon, and critique of, contemporary Chinese society and culture.
Course equivalencies: CMUN301/ASIA/INTS/AIFMS302
Outcomes:
All films chosen for the course will help inform students' understanding of modern China in terms of its material conditions and ideology

ASIA 314 Modern Chinese Literature in Chinese (3 Credit Hours)
This course is a survey of modern Chinese literature from 1918 to the present. It requires the close reading of famous Chinese writers and poets as well as some of the avant-garde writers. Students will have the opportunity to explore their own ideas of the aesthetic characteristics of the Chinese literature in the 20th century, as well as its historical and social background and learn about one of the important aspects of modern Chinese culture.
Course equivalencies: X-CHIN341/ASIA314/INTS341A
Outcomes:
Students will demonstrate knowledge of principal, genres, themes and forms of modern Chinese literature through analytical oral and written arguments

Biochemistry & Molecular Biology (BMB)

Discover, search, courses (p. 2661)!

BMB 400 Special Topics: Molecular Biology (1-3 Credit Hours)
Courses of half a semester to a semester on different topics of molecular biology, treated in depth with readings of the current literature.
Outcomes:
To learn about diverse areas of Molecular Biology which are not treated in regular courses

BMB 417 Molecular Biology (3 Credit Hours)
The Biochemistry and Molecular Biology course will cover diverse subjects of importance to modern cell an organismal biology from a molecular biology perspective.

BMB 471 Comp Molecular Genetics (3 Credit Hours)
This course introduces advanced students to the importance of genetics to a wide range of biological problems.
Outcomes:
Students will demonstrate an ability to read, think, write, and speak critically about various genetic approaches used to identify essential genes, mutagenesis and recombination, transcription, development, symbiosis, and pathogenesis

BMB 490 Special Topics in Molecular Biology (1-3 Credit Hours)
This course covers a specific topic in molecular biology. The topics can vary among different special topics courses.

BMB 499 Research in Molecular Biology (1-9 Credit Hours)
The students do mentored work in a laboratory on a research project. Their performance is evaluated by their mentor at the end of the year, and is given a pass/not pass grade.
Outcomes:
To develop the ability to organize a research project proposing hypotheses and testing them in the laboratory and against the current literature

BMB 501 Molecular Biology Journal Club (0-1 Credit Hours)
This is a weekly course where students take turns to present a scientific paper. Following the presentation there is a discussion by students and faculty. Students prepare the presentation under the supervision of a faculty mentor.
Outcomes:
To develop the ability to read and analyze a scientific paper and to develop oral presentation skills and appropriate visual aids

BMB 502 Seminar in Molecular Biology (0 Credit Hours)
Biweekly seminars where invited speakers from outside the institution present their work. The presentation is followed by a discussion by students and faculty.
Outcomes:
To become familiar with current research in different molecular biology areas by listening to the actual scientist developing the work

BMB 524 Molecular Biology & Genetics of Development (2 Credit Hours)
This is a weekly course on Molecular aspects of Developmental Biology, with a mixture of lectures, discussions of original papers and presentations by external speakers.
Course equivalencies: X-BICH524/MBIO524
Outcomes:
An understanding of the principles of developmental biology with emphasis in the molecular genetics of development

BMB 526 DNA Repair & Recombination (2 Credit Hours)
This is a weekly course on mechanisms of mutagenesis, genetic repair and recombination. The course uses a mixture of lectures and discussions of original scientific papers.
Course equivalencies: X-MBIO526/BICH526
Outcomes:
An understanding of the basic mechanisms of mutagenesis, genetic repair, homologous recombination, and non-homologous end joining

BMB 590 Molecular Biology of Oncogenesis (3 Credit Hours)
The course will cover different subjects in cancer molecular biology with a combination of lectures and discussions of original scientific papers.
Outcomes:
A basic knowledge about mechanisms of oncogenesis and the biology of cancer, and an ability to search and understand the classic as well as modern literature on the subject

BMB 595 Thesis Supervision (1 Credit Hour)
Supervised research and writing leading to the completion of the masters of science thesis and degree.
Outcomes:
Form hypotheses, design and perform appropriate experiments to test these hypotheses; Search and critically evaluate scientific literature and data; Clearly and effectively communicate scientific information in both oral and written forms; Incorporate high standards of ethics into research design, execution, data interpretation, and presentation

BMB 600 Dissertation Supervision (1 Credit Hour)
The students work on their dissertation under the supervision of their mentor and of their dissertation committee. Their progress is evaluated by their mentor and is given credit or no credit.
Outcomes:
Propose original biomedical research questions and hypotheses; Design and execute critical experiments to evaluate the hypotheses proposed; Search and critically evaluate scientific literature and data; Clearly and effectively communicate scientific information in both oral and written forms; Incorporate high standards of ethics into research design, execution, data interpretation, and presentation

Bioethics & Health Care Leadership (BEHL)

Discover, search, courses (p. 2661)!

BEHL 401 Clinical Topics in Bioethics (3 Credit Hours)
This course will provide an overview of the major areas of clinical biomedical ethics. Issues will be examined and analyzed including problem-solving, theory and practice, end-of-life decision making, etc. Extensive use of case discussion and analysis will help to develop participants' ethical problem-solving skills.
Course equivalencies: IPS 651/BEHP 401/BEHL 401
Outcomes:
Participants will gain familiarity with terminology, resources, and major frameworks of ethical analysis in biomedical ethics

BEHL 402 Justice & Health Care (3 Credit Hours)
This course provides an overview of justice and health care with a special emphasis upon the developing world by examining prevailing theoretical frameworks and how justice is played out in various health care systems.
Outcomes:
Participants will gain a better understanding of what justice means with regard to health care

BEHL 403 Ethics Care Continuum (3 Credit Hours)
This course prepares students to identify biomedical ethical issues in settings such as long-term care, rehabilitation care, mental health, and hospice, and to develop moral frameworks for addressing these issues.
Outcomes:
Participants will be able to analyze cases and issues regarding health-care delivery and adapt principle frameworks of biomedical ethics to these settings

BEHL 404 Biomedical Ethics and Law (3 Credit Hours)
This course serves as an introduction to biomedical ethics and the law and will introduce the history of bioethics and the US legal system by surveying a number of seminal legal cases.
Outcomes:
Participants will have a better understanding of how bioethics has been shaping legal decisions and legislation throughout history

BEHL 405 Research Ethics (3 Credit Hours)
This interactive seminar will explore the responsible conduct of science with a focus on ethical issues in clinical research involving human participants. We will review federal research policies related to investigator responsibilities and institutional review board (IRB) function.
Outcomes:
Students will become familiar with the history, terminology, and resources of research ethics as well as key debates that have occurred/are occurring in the research ethics literature

BEHL 406 Principles of Health Care Ethics (3 Credit Hours)
This course provides an overview of important ethical theories in bioethics. We will mainly examine major works in the field by leading bioethics scholars to become better familiar with different approaches in the field.
Outcomes:
Students should be able to identify and analyze ethical theories and become familiar with various ethical approaches

BEHL 407 Social Determinants of Health and Bioethics (3 Credit Hours)
This course will review the theoretical work on social science (anthropology, sociology) and moral reasoning as it pertains to the discipline of bioethics, its philosophical roots, and the body of social science works in bioethics.
Outcomes:
Students will learn how to use the technique of self-reflexivity to understand cultural values

BEHL 408 Ethics, Genetics and Health Policy (3 Credit Hours)
This course will provide an introduction to genetic ethics and a survey of topics that constitute the professional and popular literature in the field. Topics to be considered include, but are not limited to, gene patenting, human cloning, and race and genetics.
Outcomes:
Students will have an understanding of ethical questions that genetic technological advances pose to our understanding of human identity and social justice

BEHL 409 Religion and Bioethics (3 Credit Hours)
This course is a thematic exploration of religion and bioethics with a specific concentration on its implications at the end of life.
Outcomes:
Students will better understanding of suffering and death, and meaning that underlie these issues in bioethics, and the practice of healthcare at the end of life

BEHL 410 Ethics Consultation Simulation Seminar (1-3 Credit Hours)
This is a two-month course of online learning (June-July) including a 3-day on-campus intensive experience for students including didactic sessions and ethics consultation skills development.
Outcomes:
Students will improve communication and interaction skills while doing ethics consultation

BEHL 411 Systems Ethics Frameworks (3 Credit Hours)
The course introduces current ethical issues in public health research, practice, and policy. Public health frameworks and approaches will be used to explore prevention, social justice, and health equity.
Outcomes:
Participants will be familiar with key readings, ethical frameworks, and practical tools for assessing public health challenges

BEHL 412 Organizational Ethics I: Business, Professionalism, and Justice (3 Credit Hours)
This course examines ethical issues in health care from the vantage point of decision makers who shape the system, e.g., physicians within a group practice, administrators within a health system, or advocates within a community.
Course equivalencies: IPS 652/BEHP 412/BEHL 412
Outcomes:
Participants will understand responsibilities social justice entails to self, one's profession, various institutions which a healthcare profession is a member, one's patients, and the underserved

BEHL 413 History of Medicine and Bioethics (3 Credit Hours)
This course seeks to situate and examine the emergence and development of the field of bioethics within the history of medicine and the ethical concerns embodied in medicine¿s practice.
Outcomes:
Participants will have an understanding of how bioethics emerged within the broader history of medicine and and continues today as a distinct discipline

BEHL 414 Moral Theology for Bioethics (3 Credit Hours)
This course provides an introduction to Catholic moral theology through a historical review of its development and a consideration of key documents, events, arguments and concepts beginning with the scriptural witness of Christ and concluding with the moral teaching of John Paul II as it bears upon contemporary Catholic moral theology.
Outcomes:
Its goal is to assist in establishing an historical and theoretical foundation for those who are interested in bioethics as it is considered and practiced in the Catholic tradition

BEHL 415 Ethical & Religious Directives for Catholic Healthcare Leadership (3 Credit Hours)
This course offers a topical survey of bioethical issues pertinent to clinical practice in the Catholic context. The United States Conference of Catholic Bishops' document, Ethical and Religious directives for Catholic Health Care Services, 5th Edition, serves as the guiding document of the course. Topics and concepts considered include abortion, contraception, sterilization, nutrition and hydration, withdrawal of life support, care of the dying, cooperation, conscience, human dignity and personhood.
Course equivalencies: IPS 654/BEHP 415/BEHL415
Outcomes:
This course aims to assist students in establishing a substantive familiarity with the positions and moral reasoning of the Catholic tradition in clinical bioethics through a consideration of Church documents, scholarly texts and articles and formative debates within contemporary Catholic bioethics

BEHL 416 Catholic Bioethics and Social Justice (3 Credit Hours)
This course involves an historical study of the development of the body of official Catholic Social Teaching (CST) specific to its impact on healthcare delivery in the United States. Current developments in select key social issues and movements are also addressed insofar as those issues and movements influenced healthcare delivery. The pastoral letters of the U.S. Bishops, especially their teachings on healthcare reform, also receive attention. The interface between religious faith and public policy debates is a constant concern throughout the course. Practical strategies for fostering a social justice consciousness in healthcare settings are also considered.
Course equivalencies: IPS 655/BEHP 416/BEHL 416
Outcomes:
Extensive use of case discussion and analysis will help to develop the participants' understanding of the principles of CST and their application to the healthcare context

BEHL 417 Narrative Ethics (3 Credit Hours)
This course will consider a major theoretical framework in bioethics that has emerged as a serious alternative to principle-based bioethics. In this course, students will gain an understanding of what narrative bioethics is, read theoretical texts related to narrative ethics, and also read a variety of narratives that relate to medicine and health care (stories, films, etc). The role of narrative in the ethics consultation process will also be explored.
Outcomes:
This course aims to equip students with a sophisticated understanding of narrative and the role it plays in medicine and bioethics

BEHL 418 Advancing Health Equity Practice (3 Credit Hours)
This course introduces the frameworks and practice of health equity as it pertains to the field of bioethics. The tools and materials help students more effectively incorporate health equity into all aspects of their work. Topics include: community health, multi-sector community engagement, and innovative approaches to clinical and community work to improve populations health.
Course equivalencies: IPS 656/BEHP 418 / BEHL 418
Outcomes:
Effectively incorporate health equity into all aspects of bioethics practice

BEHL 419 Organizational Ethics II: Ethical Leadership Changing Healthcare Envrnmnt (3 Credit Hours)
This course examines the theory, role, and elements of leadership that effectively serve non-profit healthcare systems. In particular, the nature of leadership is examined. Questions of leadership style and theories of what constitutes effective leadership are considered.
Course equivalencies: IPS 653/BEHP 419/BEHL 419
Outcomes:
Key focus on communication strategies and methods of organizational change

BEHL 420 Advanced Topics in Bioethics and Law (3 Credit Hours)
This class will explore the historical relationship between law and bioethics and examine how law and bioethics come together or may be at odds. Recognize/discuss changing nature of physician-patient relationship, continuing evolution of informed consent, intersection of commerce and science, changing definition of death, growing complexity of reproduction.
Outcomes:
Resolve dilemmas raised by changing biotechnology

BEHL 421 Practicum in Clinical Ethics (3 Credit Hours)
Pre-requisites: Department Consent Required
The goal of the clinical ethics practicum is to provide doctoral students on the clinical ethics track the opportunity to use knowledge and skills acquired in the academic program in a clinical setting (e.g. community hospital or academic medical center), under the direction of a preceptor at that setting.
Outcomes:
This practicum will expose students to the practical applications of clinical ethics

BEHL 422 Practicum in Organizational/Public Health Ethics (3 Credit Hours)
Pre-requisites: BEHL 419
The practicum will enable the student to work on a project which translates both general and discipline-specific information into organizational ethics or public health practice. Students must demonstrate the capacity to utilize knowledge and make evidence-based decisions regarding these topics, and exhibit leadership, creativity, and the ability to work well with others.
Outcomes:
Goal of the practicum is to provide students the opportunity to use knowledge and skills acquired in the academic program in a professional setting under the direction of a preceptor

BEHL 423 Doctoral Capstone I (3 Credit Hours)
Pre-requisites: Oral and Written Qualifying Exams
This course is an opportunity for doctoral students in our program to further develop a paper from their practicum experience and/or another course and revise it into a manuscript of publishable quality.
Outcomes:
Publishable peer-reviewed paper

BEHL 424 Doctoral Capstone II (3 Credit Hours)
Pre-requisites: BEHL 423
This course is an opportunity for doctoral students in our program to further develop a paper from their practicum experience and/or another course and revise it into a manuscript of publishable quality.
Outcomes:
Students will be required to appear on campus for a capstone presentation with faculty

BEHL 425 Empirical Bioethics (3 Credit Hours)
Provides an overview of empirical research in the increasingly interdisciplinary field of bioethics. Will examine the relationship between empirical data and normative claims and potential pitfalls that may arise when using information about what (is) to determine what (ought) to be done.
Outcomes:
Students will gain familiarity with the range of quantitative and qualitative research methods used in bioethics as well as academic disciplines, understanding of empirical studies on ethical problems in medicine, public health policy, and clinical research; Discussions will be relevant to a range of professional settings

BEHL 426 Ignatian Spirituality and Medicine (3 Credit Hours)
This course in will explore the roots of Ignatian Spirituality as presented in the Spiritual Exercise and other writings of Ignatius Loyola and the early Jesuits. From this historical starting point, the course will shift to explore key themes that have emerged from this spiritual tradition as it relates to medicine, paying special attention to the Spiritual Exercises.
Outcomes:
This course aims to assist students in establishing a substantive understanding of Ignatian spirituality and the tradition of Jesuit education in which they participate as a means for leading faithful, joyful, and hopeful lives as physicians

BEHL 427 Professionalism and Professional Ethics (3 Credit Hours)
This course will review and critically examine the professional codes of ethics of a variety of health-related professions: medicine, nursing, dentistry, social work, chaplaincy, risk management, and allied health. We will examine the growth of professionalism as a movement and answer questions related to this topic.
Outcomes:
Understand what is a profession, what are professional ethics; Difference between common morality and professional ethics, and difference between applied ethics and professional ethics; We will also discuss whether a pan-professional ethics code is needed for the health care professions

BEHL 428 Writing and Scholarship Skills (3 Credit Hours)
Writing skills are an essential form of communication not only between the instructor and students but also among and between the students themselves. Topics covered: Academic Integrity; Grammar; Resource Development/Citation; Clarity/Formality; Development of a Thesis and Writing of a Thesis Statement; Organization and Outlining; Critical Thinking/ Analysis/Reasoning; and Development of a Conclusion.
Outcomes:
This course will provide a review of basic writing skills as well help students develop analytical and communication skills that are critical to scholarly writing in the multidisciplinary field of bioethics

BEHL 429 Pediatric Ethics (3 Credit Hours)
This course will introduce ethical topics in the areas of pediatric medicine and research. Topics to be addressed may include decision making, neonatal issues, teens and decisional authority, research with minors.
Outcomes:
Discover aspects of the pediatric population that raise unique concerns, create novel moral environments, and thus require nuanced and sensitive attention to and tools of ethical inquiry

BEHL 430 Advanced Clinical Ethics Skills (3 Credit Hours)
Pre-requisites: BEHL 410 Ethics Consult Simulation Seminar
Two-month blended course of online learning and two-day intensive experience on Health Sciences Campus in Maywood. Course provides an opportunity for advanced graduate students to improve and refine clinical ethics skills. Participants will practice consultation skills, evaluate performance of others, and receive feedback from faculty reviewers.
Outcomes:
Students will develop their own portfolio for quality attestation

BEHL 431 Current Debates in Research Ethics (3 Credit Hours)
Pre-requisites: BEHL 405 or permission from instructor
This course will focus on unique ethical issues that arise in research with special populations. Included but not limited to children; women, fetuses, and embryos; prisoners; indigenous and racial/ethnic minority communities; healthy volunteers. Research in emergency and international settings as well as research at the end-of-life will be discussed.
Outcomes:
Material covered in this course will be relevant for ethicists, IRB members, and clinical investigators

BEHL 432 Global Bioethics (3 Credit Hours)
This course will survey major topics in global bioethics. Students will be introduced to global bioethics frameworks, practices, and governance bodies in order to place bioethical problems in a global context. Attention will be given to how the global realities of health disparities and neoliberal economic policies impact bioethical questions. Guest lecturers will share experiences working in clinical ethics, public health, social justice, health care policy, and research across the globe.
Outcomes:
Students will gain knowledge regarding clinical ethics, public health, social justice, health care policy, and research across the globe

BEHL 433 Mastering Clinical Ethics Consultation (3 Credit Hours)
Pre-requisites: BEHL 410 and BEHL 430
This 2 week on-campus course provides an opportunity for advanced bioethics doctoral students in the clinical ethics concentration to refine their clinical ethics skills to a mastery level. Students will participate in simulated ethics consultations, practice communication and interpersonal skills and receive feedback on their performance. With access to LUHS, students will participate in clinical rounds, case discussions, and active ethics consultations and debriefing sessions. This course will require students to reach a predefined mastery level of skill in simulated ethics case consultations using the Assessing Clinical Ethics Skills (ACES) evaluation tool. They will also be required to write chart notes for ethics consultations.
Outcomes:
Students will achieve mastery of clinical ethics consultation skills, written chart notes, and improve communication and interpersonal skills

BEHL 434 Oral Health Ethics (3 Credit Hours)
According to the CDC, "Oral health affects our ability to speak, smile, eat, and show emotions. It also affects self-esteem, school performance, and attendance at work and school. Oral diseases - which range from cavities to gum disease to oral cancer - cause pain and disability for millions of Americans." As with other areas of healthcare, ethical issues arise in oral health. Issues to be addressed in this course will include access to care, confidentiality, professional obligations of dentists, informed consent, treatment planning, and the importance of oral health to overall health and well-being.
Outcomes:
Participants will have a better understanding of ethical issues that arise within oral health care

BEHL 435 Disability Ethics (3 Credit Hours)
One in four individuals is considered disabled. What that means, however, differs from person to person, culture to culture, and environment to environment. Disability can be inborn or acquired, short-term or chronic, intellectual or not, etc. The term is broad in scope and is not subject to precise definition. Disability raises many bioethical issues across the lifespan. This course will examine definitions of disability as well as make distinctions between disability, disorder, disease, disfunction and identity. We will consider disability from the bio-medical model, psycho-social model, public health model and neurodiversity model. The lens through which we will explore disability is that of social justice. Readings, viewings and lectures will present a range of perspectives including historical framing, narrative of the lived experience, legal documents, theoretical and philosophical underpinnings and clinical discourse.
Outcomes:
Understand the complexities and variations in defining disability; Analyze disability through multiple models and frameworks; Explore the ethical implications of disability across different contexts; Engage critically with lived experiences and theoretical perspectives on disability; Develop a social justice-oriented approach to disability ethics

BEHL 436 Adolescent Health Ethics (3 Credit Hours)
This course will provide an overview of ethical issues in adolescent health and a survey of some topics that are unique to the field. This will build on concepts addressed in Pediatric Ethics and discuss how ethical decisions may change as children develop physically and psychologically. Classes will be topic driven and will draw upon a variety of sources including recent articles on a range of topics within the field, videos and cases. The ethical questions that are unique to adolescents will serve as the organizing themes of the course.
Outcomes:
Identify the unique ethical issues raised by adolescent patients; Understand how developing autonomy may impact healthcare decisions for adolescents distinct from children and adults; Consider the range of stakeholders involved in adolescent health care

BEHL 491 Special Topics (1-3 Credit Hours)
Provides an opportunity to introduce new courses.

BEHL 492 Master's Research - Capstone (3 Credit Hours)
The capstone course is the final course which provides an opportunity for the student to develop a paper of publishable quality.

BEHL 493 Independent Study (1-3 Credit Hours)
This course will provide students with a broad introduction to the history and role of mission leadership in Catholic health care and will introduce students to the five main competency areas: theology/ministry, spirituality, ethics, organizational management/finance, and leadership. Guest faculty lecturers will share experiences working in mission integration in Catholic health care.
Outcomes:
Students will be introduced to the CHA "Competencies for Health Care Mission Leadership" in order to understand the scope of the position and how the various competency areas interact

BEHL 500 Introduction to Healthcare Mission Leadership (3 Credit Hours)
This course will provide students with a broad introduction to the history and role of mission leadership in Catholic health care and will introduce students to the five main competency areas: theology/ministry, spirituality, ethics, organizational management/finance, and leadership. Guest faculty lecturers will share experiences working in mission integration in Catholic health care.
Outcomes:
Students will be introduced to the CHA "Competencies for Health Care Mission Leadership" in order to understand the scope of the position and how the various competency areas interact

BEHL 501 Church and Mission (3 Credit Hours)
In the 21st century the Church is a concept best understood within a global context. We will explore the biblical and apostolic concept of Church progressing through Vatican II. We will also examine the four marks of the Church from both historical and contemporary perspectives.
Course equivalencies: X -IPS 402/ BEHL 501
Outcomes:
Articulate a vision of Church, evaluate and critique different ecclesiologies, and understand the development and structure of the Church from biblical times through Vatican II and contemporary times

BEHL 502 Christian Doctrine (3 Credit Hours)
This course surveys the historical evolution of Christian doctrine and its theological interpretations from the early church through the 21st century. It assists students in understanding how theological doctrines apply to contemporary ministry contexts, particularly the work of Catholic health care. The course explores the early Christological controversies, the Trinity, Grace, liberationist theologies, and the role of dialogue as a fundamental feature of the development of doctrine.
Outcomes:
Students will understand theological doctrine and apply to contemporary ministry contexts in Catholic health care

BEHL 503 Foundations of Christian Spirituality (3 Credit Hours)
Christian spirituality (the 'lived experience of Christian faith') is a separate but partnered academic field with theology today. Key issues are: defining 'spirituality', methods in the field, spirituality vs. institutional religion, Jesus Christ (christology), major figures and movements in Christian spirituality's 2000 year history, and classical and contemporary themes.
Course equivalencies: X -IPS 545 / BEHL 503
Outcomes:
Facility defining spirituality and Christian spirituality, and an informed understanding of the person Jesus Christ, the history of Christian spirituality, and the relationship of spirituality to theology and institutional religion

BEHL 504 Spiritual Paths in World Religions (3 Credit Hours)
This course explores the spirituality, theology, and practice of the major religious traditions. You will encounter other faith traditions by entering into their sacred prayer and worship experiences and learning from practitioners of that tradition how they encounter the sacred in their own lives.
Course equivalencies: X -IPS 403/BEHL 504
Outcomes:
Recognize the vast complexity of every religious tradition, resisting the urge to oversimplify; Engage those who practice other traditions in conversation; Experience the spiritual practice of other religious traditions

BEHL 505 Advanced Concepts in Health Systems Management (3 Credit Hours)
The course is structured around a framework that links strategic management with health care outcomes for today and tomorrow. Areas covered include: leadership, team building, planning, customers, markets, information and analysis, communication skills, conflict resolution, resource management, budgeting and organizational performance.
Course equivalencies: X-CMAN 468/BEHL 505/IPS 657
Outcomes:
Analyze major strategic management processes, describe how evidence-research practice can be applied in health systems management, and integrate a framework for strategic management with the key concepts of outcomes-based performance management

BEHL 506 Fiscal Management for Health Care Organizations (3 Credit Hours)
The course explores the relationship between the national economic environment and the financial context for current models of health care delivery. A variety of fiscal concepts and techniques such as cost accounting, cost behavior, budgeting, cost benefit/cost effectiveness analysis, cost-volume-profit analysis, cost variance analysis, and performance budgeting are explored.
Course equivalencies: X-IPS 658/CMAN 533/BEHL 506
Outcomes:
Students will develop a framework for understanding key issues in health care financial management; Students will develop a quantitative approach to decision making in health care administration through application of concepts

BEHL 510 Integrated Doctoral Seminar in Ethics, Theology, and Healthcare (3 Credit Hours)
The Integrated Seminars in Ethics, Theology and Healthcare (ISETH) are the core of the Doctorate in Healthcare Mission Leadership (D.HMCL) degree program. Students in the DHCML program are required to complete three of these seminars, which will be offered every Fall and Spring term with variable topics, as part of their degree program. These courses will be primarily theoretical and methodological in focus, rather than practical.
Outcomes:
This course is designed to build on and integrate students' prior graduate coursework in theology and bioethics with their ongoing work in Catholic healthcare

BEHL 511 Mission, Leadership, and Spiritual Formation Seminar (3 Credit Hours)
This course explores the theology, traditions, and current practices foundational for understanding and achieving formation as an essential offering of Catholic health care ministries. By examining a Face to Face Online Hybrid (greater than 75% online) Blended (30%-70% online) variety of methods and models of formation programs of Catholic healthcare in the United States, students will cultivate personal practices that enhance their ability to design and operationalize experiences for persons in various roles within the ministries they serve - from new associate orientation to senior leadership.
Outcomes:
Gain an understanding and practical ability to ensure the programs, resources, and encounters they design and facilitate are grounded in tradition of Catholic ministry, inviting to diverse participant populations, and support the achievement of specified outcomes; In so doing, understand and develop skills necessary to implement integrative, professional, and valued programs of formation

BEHL 512 Canon Law, Sponsorship, and Church Relations (3 Credit Hours)
This two-month course explores the theology, traditions, and practical applications of canon law in the context of Catholic health care. The course will provide an overview of canon law, the emerging theology of sponsorship and ministerial juridic persons, and review a variety of models of church relations current in contemporary Catholic health care.
Outcomes:
Students will gain fluency in canon law, gain knowledge of the particular canons in Catholic health care, and develop a deeper understanding of sponsorship in order to understand the specific sponsorship model applicable to their own healthcare context

Bioethics (BIET)

Discover, search, courses (p. 2661)!

BIET 395 Special Topics (3 Credit Hours)
This interdisciplinary team-taught course examines a topic in bioethics from both scientific and ethical points of view. Topics may include: biotechnologies, concepts of race and gender, the environment, reproduction, and others.
Interdisciplinary Option: Bioethics
Outcomes:
Students will be able to understand the relevant scientific concepts, techniques, and methods, recognize ethical issues raised by the topic, and use ethical reasoning and ethical judgement (concepts, theories, methods) to discuss the topic

BIET 395A Bioethics Minor Capstone: Philosophical & Anthropological Topics (3 Credit Hours)
Pre-requisites: Two Science courses and two Ethics courses
This interdisciplinary team-taught course examines a topic in bioethics from both scientific and ethical points of view. Topics may include: biotechnologies, concepts of race and gender, the environment, reproduction, and others.
Interdisciplinary Option: Bioethics
Outcomes:
Students will be able to understand the relevant scientific concepts, techniques, and methods, recognize ethical issues raised by the topic, and use ethical reasoning and ethical judgment (concepts, theories, methods) to discuss the topic

BIET 395B Bioethics Minor Capstone: Philosophical & Biological Topics (3 Credit Hours)
Pre-requisites: Two Science courses and two Ethics courses
This interdisciplinary team-taught course examines a topic in bioethics from both scientific and ethical points of view. Topics may include: biotechnologies, concepts of race and gender, the environment, reproduction, and others.
Interdisciplinary Option: Bioethics
Outcomes:
Students will be able to understand the relevant scientific concepts, techniques, and methods, recognize ethical issues raised by the topic, and use ethical reasoning and ethical judgment (concepts, theories, methods) to discuss the topic

BIET 395C Bioethics Minor Capstone: Philosophical and Chemical Topics (3 Credit Hours)
Pre-requisites: Two Science courses and two Ethics courses
This interdisciplinary team-taught course examines a topic in bioethics from both scientific and ethical points of view. Topics may include: biotechnologies, concepts of race and gender, the environment, reproduction, and others.
Interdisciplinary Option: Bioethics
Outcomes:
Students will be able to understand the relevant scientific concepts, techniques, and methods, recognize ethical issues raised by the topic, and use ethical reasoning and ethical judgment (concepts, theories, methods) to discuss the topic

BIET 395E Bioethics Minor Capstone: Philosophical & Environmental Science Topics (3 Credit Hours)
Pre-requisites: Two Science courses and two Ethics courses
This interdisciplinary team-taught course examines a topic in bioethics from both scientific and ethical points of view. Topics may include: biotechnologies, concepts of race and gender, the environment, reproduction, and others.
Interdisciplinary Option: Bioethics
Outcomes:
Students will be able to understand the relevant scientific concepts, techniques, and methods, recognize ethical issues raised by the topic, and use ethical reasoning and ethical judgment (concepts, theories, methods) to discuss the topic

BIET 396A Bioethics Minor Capstone: Theological & Anthropological Topics (3 Credit Hours)
Pre-requisites: Two Science courses and two Ethics courses
This interdisciplinary team-taught course examines a topic in bioethics from both scientific and ethical points of view. Topics may include: biotechnologies, concepts of race and gender, the environment, reproduction, and others.
Interdisciplinary Option: Bioethics
Outcomes:
Students will be able to understand the relevant scientific concepts, techniques, and methods, recognize ethical issues raised by the topic, and use ethical reasoning and ethical judgment (concepts, theories, methods) to discuss the topic

BIET 396B Bioethics Minor Capstone: Theological and Biological Topics (3 Credit Hours)
Pre-requisites: Two Science courses and two Ethics courses
This interdisciplinary team-taught course examines a topic in bioethics from both scientific and ethical points of view. Topics may include: biotechnologies, concepts of race and gender, the environment, reproduction, and others.
Interdisciplinary Option: Bioethics
Outcomes:
Students will be able to understand the relevant scientific concepts, techniques, and methods, recognize ethical issues raised by the topic, and use ethical reasoning and ethical judgment (concepts, theories, methods) to discuss the topic

BIET 396C Bioethics Minor Capstone: Theological and Chemical Topics (3 Credit Hours)
Pre-requisites: Two Science courses and two Ethics courses
This interdisciplinary team-taught course examines a topic in bioethics from both scientific and ethical points of view. Topics may include: biotechnologies, concepts of race and gender, the environment, reproduction, and others.
Interdisciplinary Option: Bioethics
Outcomes:
Students will be able to understand the relevant scientific concepts, techniques, and methods, recognize ethical issues raised by the topic, and use ethical reasoning and ethical judgment (concepts, theories, methods) to discuss the topic

BIET 396E Bioethics Minor Capstone: Theological & Environmental Science Topics (3 Credit Hours)
Pre-requisites: Two Science courses and two Ethics courses
This interdisciplinary team-taught course examines a topic in bioethics from both scientific and ethical points of view. Topics may include: biotechnologies, concepts of race and gender, the environment, reproduction, and others.
Interdisciplinary Option: Bioethics
Outcomes:
Students will be able to understand the relevant scientific concepts, techniques, and methods, recognize ethical issues raised by the topic, and use ethical reasoning and ethical judgment (concepts, theories, methods) to discuss the topic

Bioinformatics (BIOI)

Discover, search, courses (p. 2661)!

BIOI 201 Introduction to Bioinformatics (3 Credit Hours)
This course provides an introduction to the fundamental concepts and practical applications of bioinformatics, the interdisciplinary field that combines biology, chemistry, computer science, and statistics. Students will explore how biological data - such as DNA, RNA, and protein sequences - are created, stored, analyzed, and interpreted. Topics include genome structure, sequence alignment, database searching, molecular evolution, structural bioinformatics, and essential computational tools for analyzing biological data. Through a mix of lectures and hands-on activities, students will learn to use key bioinformatics resources and software to solve real-world problems in genetics, molecular biology, and biotechnology.
Outcomes:
Identify applications of bioinformatics in biological research\\n; Introduce the interdisciplinarity of modern life sciences research; Demonstrate ability to use scripting language to work with sequence data; Utilize fundamental bioinformatics software and web tools

BIOI 300 Directed Readings (1-3 Credit Hours)
Readings from the scientific literature in any focused area of bioinformatics agreed upon by the student and the supervising faculty member.
Outcomes:
Students will gain knowledge, journal reading expertise, and scientific writing skills

BIOI 365 Exploring Proteins (3 Credit Hours)
Pre-requisites: CHEM 361
Computational tools are essential for the prediction of protein structures, protein interactions, and structure based drug design. This class will introduce fundamental concepts in the field of computational protein biology.
Interdisciplinary Option: Bioinformatics
Outcomes:
Students will obtain a general understanding of the principles of proteomics in addition to theoretical and practical experience with protein-based databases and bioinformatics tools to explore protein structure and function

BIOI 395 Special Topics: Bioinformatics (1-3 Credit Hours)
Special areas of bioinformatics outside the usual curriculum that vary each time the course is offered.
Outcomes:
Students will gain knowledge in and master a unique topic in bioinformatics

BIOI 397 Bioinformatics Survey (1-4 Credit Hours)
Pre-requisites: BIOL 101 and Instructor consent
This course trains students in conducting collaborative bioinformatics research as well reading and presenting scientific research.
This course satisfies the Engaged Learning requirement.
Outcomes:
Provides an alternative to individual research; reflects trends in the field for collaborative, group research

BIOI 398 Bioinformatics Internship (1-4 Credit Hours)
An independent research experience involving laboratory experiments, computer program development, or statistical analysis or any combination of these performed off-campus under the mentorship of a Bioinformatics scientist not affiliated with Loyola.
Interdisciplinary Option: Bioinformatics
This course satisfies the Engaged Learning requirement.
Outcomes:
All students will acquire skills to perform and report on independent research and to be intellectually responsible for evaluating their own and related work; Other outcomes will include at least one of the following: Experimental expertise, statistical evaluation of data sets, design and use of computational tools

BIOI 399 Bioinformatics Research (1-4 Credit Hours)
An independent research experience involving laboratory experiments, computer program development, or statistical analysis or any combination of these performed under the mentorship of one or more Bioinformatics faculty members.
Interdisciplinary Option: Bioinformatics
This course satisfies the Engaged Learning requirement.
Outcomes:
All students will acquire skills to perform and report on independent research and to be intellectually responsible for evaluating their own and related work; Other outcomes will include at least one of the following: Experimental expertise, statistical evaluation of data sets, design and use of computational tools

BIOI 400 Programming Biology (1 Credit Hour)
This is a 6-week course introduction to scripting programming languages within the framework of biological data analysis. Graduate-level standing required. Students will learn foundational methods and algorithms for analysis of biological data.

BIOI 494 Bioinformatics Research Design (1 Credit Hour)
Course Restricted to Bioinformatics MS students Research practices, including data collection and management, the experimental design process, and tools for critical analysis and preparation of scientific literature will be discussed.
Outcomes:
Students can describe and implement experimental design practices in bioinformatics

BIOI 495 Special Topics in Bioinformatics (1-12 Credit Hours)
The field of bioinformatics is ever evolving. As new technologies develop, demand arises for new methods and tools. Courses will focus on emerging trends in bioinformatics. Restricted to Bioinformatics Graduate Students. Student will learn about emerging topics in the field.

BIOI 498 Bioinformatics Internship (1 Credit Hour)
Pre-requisites: BIOI 500, Limited to MS Bioinformatics Non-Thesis track students only
An opportunity to obtain experience, knowledge, and skills in bioinformatics within a professional setting and thus expand the depth and breadth of the student's learning.
Outcomes:
Students can apply foundational principles in bioinformatics into practice

BIOI 499 Bioinformatics Research (1-12 Credit Hours)
Pre-requisites: Prerequisite: BIOI 494, Limited to MS Bioinformatics Thesis track students only
Students will conduct independent hypothesis-driven bioinformatics research under faculty guidance. Research efforts will include literature surveys, experimental design, algorithm and software development, and data analysis.
Outcomes:
Students can develop and utilize techniques for bioinformatics research

BIOI 500 Advanced Bioinformatics (3 Credit Hours)
Pre-requisites: BIOL 388 or BIOL 488
Students will study fundamental bioinformatics algorithms and emerging software tools in the field. The course will include the study of primary literature and design and implementation of bioinformatics algorithms.
Course equivalencies: X- BIOI 500 /BIOL 450
Outcomes:
Students can describe, design, implement, and evaluate bioinformatics algorithms

BIOI 501 Bioinformatics Seminar (1-2 Credit Hours)
Pre-requisites: BIOL 388 or BIOL 488
The seminar will introduce students to current topics in bioinformatics through presentations given by leaders in bioinformatics research. This course will also include more formal training in scientific presentation skills.
Course equivalencies: X-BIOI501/BIOL451
Outcomes:
Students can summarize, critique, and present bioinformatics research

BIOI 565 Exploring Proteins (3 Credit Hours)
Pre-requisites: Biochemistry, restricted to Bioinformatics Graduate Students
Proteins are polymer chains of amino acids that fold into compact states that differ in structure, size, shape, and dynamics. Computational tools are essential for the prediction of protein structures, protein interactions, and structure-based drug design.
Outcomes:
Students will learn the concepts of building blocks of protein structure, and protein folding

BIOI 595 Thesis Supervision (1 Credit Hour)
Pre-requisites: BIOI 499
Laboratory research under faculty guidance including training in scientific writing and the production of a thesis and research presentation.
Outcomes:
Students will develop skills in scientific writing and presentation; At the conclusion, students will present (written and oral) the results of their research

BIOI 605 Master's Study (1 Credit Hour)
This course provides FT status for a student who needs to meet the continuous enrollment requirement of the Graduate School while completing program requirements.

Biology (BIOL)

Discover, search, courses (p. 2661)!

BIOL 101 General Biology I (3 Credit Hours)
Fundamental principles of Biology including: introduction to the scientific method, basic biological chemistry, cell structure and function, energy transformations, mechanisms of cell communication, cellular reproduction, and principles of genetics.
Interdisciplinary Option: Bioethics, Bioinformatics, Forensic Science
Course equivalencies: ACBIO 101 / BIOL 101
Outcomes:
Students will be able to demonstrate understanding of the historical foundations, methodologies employed, general architecture, and functioning of the cell - the basic unit of life

BIOL 102 General Biology II (3 Credit Hours)
Pre-requisites: BIOL 101 and BIOL 111
A continuation of BIOL 101. Fundamental principles of Biology including: evolutionary theory, general principles of ecology, study of plant structure and function, and comparative animal physiology.
Interdisciplinary Option: Bioethics, Forensic Science
Course equivalencies: ACBIO 102 / BIOL 102
Outcomes:
Students will be able to demonstrate an understanding of the fundamental principles of ecology and evolution, as well as the anatomy and physiology of representative plant and animal phyla

BIOL 110 Liberal Arts Biology (3 Credit Hours)
Pre-requisites: ENVS 101 or ENVS 137 or equivalent, Please check requirements for declared majors/minors for exceptions
For non-science majors. Liberal Arts Biology is a Tier II Core course in the area of Scientific Knowledge and Inquiry. It covers fundamental principles of biological sciences at a level for non-science majors. The focus of the course will vary depending on expertise of the instructor. All instructors will address the same fundamental principles.
Knowledge Area: Tier 2 Scientific Knowledge
Outcomes:
Students understand the scientific method, diversity of life, classification of organisms, cell structure and function, the chromosomal and molecular basis of inheritance, and organ systems of the human body

BIOL 111 General Biology I Lab (1 Credit Hour)
Pre-requisites: BIOL 101 (may also be taken as a Corequisite)
Complements General Biology I lecture material through observation, experimentation, and when appropriate, dissection of representative organisms. Physical and chemical phenomena of life as well as systematics and comparative anatomy and physiology of selected organisms will be examined.
Interdisciplinary Option: Bioethics, Forensic Science
Course equivalencies: BIOL 111/ACBIO 111
Outcomes:
Students will be able to demonstrate an understanding of the diversity of living organisms, including comparisons in cell structure and function, and comparative organismal evolution and ecology

BIOL 112 General Biology II Lab (1 Credit Hour)
Pre-requisites: BIOL 101 and BIOL 111
Complements General Biology II Lecture material through observation, experimentation, and when appropriate, dissection of representative organisms. Physical and chemical phenomena of life as well as systematics and comparative anatomy and physiology of selected organisms will be examined.
Interdisciplinary Option: Bioethics, Forensic Science
Course equivalencies: ACBIO 112 / BIOL 112
Outcomes:
Students will be able to demonstrate an understanding of the diversity of living organisms, including comparisons in cell structure and function, and comparative organismal evolution and ecology

BIOL 195 Special Topics in Biology (1-4 Credit Hours)
Special Topics - Specific areas of study in the biological sciences.

BIOL 205 Plant Biology Lec/Lab (4 Credit Hours)
Pre-requisites: BIOL 102 and BIOL 112
Lecture and laboratory. Survey of the principles of botany including development and reproduction, structure, phylogeny and metabolism.
Outcomes:
Students will understand the basic morphology of plants; utilize morphology in the identification of local plants; understand the anatomy of plants; understand the relationship between anatomy and basic physiology; recognize that differences in physiological function allow different plants to be found in specific environments; appreciate the diversity of organisms called "plants"

BIOL 210 Laboratory Techniques (2 Credit Hours)
Pre-requisites: BIOL 102 and BIOL 112
Lab sessions designed to prove a firm foundation in basic techniques and procedures, use of equipment and apparatus, keeping a lab notebook, and in data collection and treatment.
Outcomes:
Students will acquire basic skills needed to work in a research laboratory

BIOL 242 Anatomy and Physiology I (4 Credit Hours)
Pre-requisites: BIOL 102, BIOL 112, and [(CHEM 102 and 112) or CHEM 106 or CHEM 180]
Lecture, laboratory, and demonstrations. Organization of the human body from the cellular to the organismal level. Anatomy of body systems and their physiology related to 1) support and movement (integumentary, skeletal and muscular systems) and integration and control (nervous and endocrine systems). Dissection of representative organs is required.
Outcomes:
Students will be able to demonstrate knowledge of human anatomy at the microscopic and gross levels; Students will be able to correlate structure and function and will have a firm understanding of the organizing principle of human physiology, homeostasis and explain the role of the nervous and endocrine systems in its maintenance

BIOL 243 Anatomy and Physiology II (4 Credit Hours)
Pre-requisites: BIOL 242
Lecture, laboratory, and demonstrations. A continuation of BIOL 242. Anatomy of body systems and their physiology related to regulation and maintenance (cardiovascular, lymphatic, respiratory, digestive, and urinary systems) and reproduction and development (male and female reproductive systems). Dissection of representative organs is required.
Outcomes:
Students will be able to demonstrate a comprehensive integrated knowledge and understanding of human anatomy and physiology at all levels

BIOL 251 Cell Biology (3 Credit Hours)
Pre-requisites: For Biophysics majors: (BIOL 101 and BIOL 111) and (CHEM 101, CHEM 105, or CHEM 160); All other majors: (BIOL 102 and BIOL 112) and (CHEM 101, CHEM 105, or CHEM 160)
This course covers basic molecular and cellular studies of living organisms, emphasizing the relationships between subcellular structures and biochemical and physiological functions of cells.
Outcomes:
Students will become familiar with a wide range of cell biological principles and experimental approaches that led to important discoveries, gain an appreciation of the scientific method, and learn about the goals of modern cell biology research

BIOL 252 Cell Biology Laboratory (1 Credit Hour)
Pre-requisites: BIOL 251 (may also be taken as a Corequisite)
Laboratory experiences designed to explore relationships between structure and function of subcellular components.
Outcomes:
Working knowledge of a variety of techniques utilized in the cell biology laboratory

BIOL 265 Ecology (3 Credit Hours)
Pre-requisites: BIOL 102, BIOL 112, and (CHEM 160 or CHEM 101 or CHEM 105)
Relationships of organisms to their environment and to each other at the organism, population, community, and ecosystem levels.
Outcomes:
Students will understand the fundamental principles governing the interactions of organisms and their environment at the population, community, and ecosystem levels

BIOL 266 Ecology Laboratory (1 Credit Hour)
Pre-requisites: BIOL 265 (may also be taken as a Corequisite)
Laboratory and field experience are designed to illustrate the principles of ecology and to give students experience in collecting, processing, and analyzing data. Field trips required.
Course equivalencies: BIOL266/ESP 266
Outcomes:
Students will understand the methodology and use techniques in studying interactions of organisms to the environment and to each other at the organism, population, community, and ecosystem levels

BIOL 282 Genetics (3 Credit Hours)
Pre-requisites: For Bioinformatics and Biophysics majors: BIOL 101 and (CHEM 101, CHEM 105, or CHEM 160); For all others: BIOL 102, BIOL 112, and (CHEM 101, CHEM 105, or CHEM 160)
This course surveys principles and processes of genetic inheritance, gene expression, molecular biology, developmental, quantitative, population, and evolutionary genetics.
Interdisciplinary Option: Bioinformatics, Forensic Science
Outcomes:
Students will develop knowledge and awareness of the genetic bases of modern biology; Students will understand Mendelian principles of inheritance, chromosome and DNA structure and replication, gene expression, molecular biology, genetic bases of development and other biological processes, and quantitative, population, and evolutionary genetics

BIOL 283 Genetics Laboratory (1 Credit Hour)
Pre-requisites: BIOL 282 (may also be taken as a Corequisite)
Experiments and demonstrations to illustrate chromosomal structures and transmission, molecular biology, gene linkage, gene frequencies, and variation.
Interdisciplinary Option: Bioinformatics, Forensic Science
Outcomes:
Students will develop technical skills and ability to interpret data from a variety of types of genetics experiments

BIOL 296 Introduction to Research (1 Credit Hour)
Pre-requisites: BIOL 102, 112; Permission of the instructor; Biology Core highly recommended
Students will begin reading the literature in the field of their mentor, conduct experiments designed by the mentor, and give a presentation on their work or studies, in preparation for upper level undergraduate research.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will develop critical reading skills and become familiar with basic lab techniques in the area of their mentor

BIOL 302 General Microbiology Lec/Lab (4 Credit Hours)
Pre-requisites: BIOL 251 and BIOL 282
Lecture and laboratory. Fundamental concepts of microbial life, physiology, and metabolism.
Outcomes:
Students will learn the differences between the 3 domains of life and will comprehend the biochemistry, morphology, growth characteristics, structure and ecology of microbes

BIOL 304 Intro to Developmental Biology (3 Credit Hours)
Pre-requisites: BIOL 251
The analysis of developmental processes such as; fertilization, embryonic cleavage, cell determination and cell differentiation in selected species. Emphasis will be on experiments that reveal how these processes are controlled at the molecular and cellular levels.
Outcomes:
Students will become familiar with a wide range of developmental biology principles and experimental approaches that led to important discoveries, gain an appreciation of the scientific method, and learn about the goals of modern developmental biology research

BIOL 307 Biology of Stem Cells (3 Credit Hours)
Pre-requisites: BIOL 251 and BIOL 282
Stem cell research represents an exciting area of biology. This course will cover the early discoveries that launched the field of stem cell biology, the different types of stem cells that exist, potential therapeutic uses of stem cells, and the ethical implications of these discoveries and therapies.
Outcomes:
Students will be able to read primary research articles, describe different stem cell types and therapeutic uses, and consider the ethical implications of stem cell research and therapies

BIOL 315 Introductory Immunology Lec/Lab (4 Credit Hours)
Pre-requisites: BIOL 251 and BIOL 282
The study of the nature and molecular basis of immune responses. History and vocabulary of immunology; experiments involving immune recognition and destruction; theories regarding self-tolerance and immunological diseases.
Outcomes:
Students will learn the morphology and histology of the cells involved in an immune response, as well as how the cells develop and the molecular mechanisms used to recognize and eliminate non-self material; Students will become familiar with the evasion strategies of pathogens and the consequences associated with either hyper or hypo-responsiveness

BIOL 316 Limnology Lec/Lab (4 Credit Hours)
Pre-requisites: BIOL 265 and CHEM 102 or CHEM 106 or CHEM 180
An introduction to the structure and function of lake and stream ecosystems. The course includes the integration of physical, chemical, and biological parameters. Laboratories include weekend field trips to aquatic habitats.
Outcomes:
Students will learn methods of sampling and analyzing physical, chemical and biological factors in lake and stream ecosystems, and how to integrate these complex data sets to answer ecosystem process-level questions; Students will learn to evaluate the trophic status and health of a lake by the end of the course

BIOL 317 Models of Human Disease (3 Credit Hours)
Pre-requisites: BIOL 251 and BIOL 282
This course explores approaches used to study human diseases from in vitro to in vivo levels and examines their strengths and weaknesses. Discussions will cover historical experiments and cutting-edge research to learn about the techniques used to generate data and how to interpret the results.
Outcomes:
Students will gain knowledge about human diseases and techniques used to model aspects of those diseases in the laboratory

BIOL 318 General Virology (3 Credit Hours)
Pre-requisites: BIOL 251 & BIOL 282
This course covers the molecular details of viral infection and the diverse strategies used by these pathogens to invade cells and avoid immune clearance. The focus will be on mammalian viruses of biomedical relevance.
Course equivalencies: BIOL 318 / BIOL 218
Outcomes:
Students will be able to demonstrate detailed understanding of basic viral structure, basic viral replication/infection cycles, and specific examples of viruses and their infection strategies

BIOL 319 Evolution (3 Credit Hours)
Pre-requisites: BIOL 282; BIOL 265 recommended
This course focuses on analysis of processes and patterns of evolution. Topics include population genetic principles, fossil patterns and geologic ages, phylogenetic analysis of relationships of species, experimental approaches to evolutionary questions, and evolutionary perspectives on human biology and relationships.
Outcomes:
Students will develop knowledge and awareness of evolutionary processes and patterns, the evidence for them, and how evolutionary hypotheses are tested experimentally; They will develop an appreciation of the primary literature through reading and discussing research articles

BIOL 321 Great Transitions in Vertebrate History (3 Credit Hours)
Pre-requisites: BIOL 265
The major vertebrate groups-fish, amphibians, reptiles, birds, and mammals-arose through great transitions in size and form. These transitions opened up previously inaccessible habitats for those groups to radiate throughout, creating the remarkable diversity we observe today. In this class, students will learn about the major transitions that occurred in vertebrate history within the context of Earth's geological history. Students will also learn about the adaptive changes in anatomy and life history that have allowed those radiations to successfully radiate in those habitats. Students will also learn about species whose unique attributes allow them to occupy the most extreme habitats on earth, such as the deep sea, arctic, and high elevation habitats.
Outcomes:
Learn the major radiations of vertebrates and their evolutionary relationships, the general characteristics of the major organ systems in those radiations, the major evolutionary transitions that occurred during vertebrate history, and how changes in ecology, life history, and anatomy change during organismal evolution

BIOL 323 Comparative Anatomy Lec/Lab (4 Credit Hours)
Pre-requisites: BIOL 251, BIOL 282
A study of homologous systems and vertebrate phylogeny in both lecture and lab.
Outcomes:
Students will understand the evolutionary relationships and processes that are involved in the development of vertebrate anatomy

BIOL 328 Conservation Biology (3 Credit Hours)
Pre-requisites: BIOL 265
This course explores species diversity, natural and human induced extinctions, environmental ethics, and conservation practices being developed at the population, community, and ecosystem levels.
Course equivalencies: X-BIOL328/ESP 330
Outcomes:
Students will be able to describe conservation strategies being used by institutions around the world and understand the ecological theory that supports those strategies

BIOL 330 Global Change Biology (3 Credit Hours)
Pre-requisites: BIOL 265 or ENVS 280
Human activities are changing our planet to such an extent that scientists have proposed we are in a new geological epoch, the 'Anthropocene'. Through lectures, discussions, and group projects we will examine key elements of global change including biodiversity loss, land-use alterations, climate change, and pollution.
Outcomes:
Learn global element cycles that drive biological processes; Read, critique, and discuss primary scientific literature

BIOL 341 Histology Lecture/Laboratory (4 Credit Hours)
Pre-requisites: BIOL 251 and BIOL 282
This course examines the microscopic anatomy of the four basic adult tissue types and how they are arranged and utilized in the construction of the major vertebrate organ systems.
Outcomes:
The major learning objectives for this course are (1) to become familiar with the gross and microscopic anatomy of cells, tissues, and organs and; (2) to understand how these anatomical features correlate with specific physiological functions

BIOL 344 Microbial Evolution and Human Well-being (3 Credit Hours)
Pre-requisites: BIOL 282
The course explores the many ways, both positive and negative, that the evolution of bacteria, viruses, and other microbes affects humans. Topics include infectious disease, the human microbiome, food production, and environmental microbes. The course is centered around reading and analyzing primary literature.
Outcomes:
Students will apply fundamental evolutionary principles to microbes, understand the broad relevance of microbial evolution to human life, and read and communicate about primary literature on the topic

BIOL 350 Vertebrate Physiology (3 Credit Hours)
Pre-requisites: BIOL 251, BIOL 282, and (CHEM 180 or CHEM 102 or CHEM 106)
This is an introduction to the physiology of marine, freshwater, and terrestrial vertebrates. Understanding how physiological concepts are manifested by animals facing different environmental challenges is emphasized. Topics to be covered include metabolism and energy balance, nervous and endocrine function, respiration, circulation, water balance and ionic regulation, and excretion.
Outcomes:
Compare and contrast how various vertebrates utilize major organ systems to maintain homeostasis; Describe how common physiological principles are manifested through vertebrates' adaptation to their environments

BIOL 351 Sleep/Circadian Rhythms (3 Credit Hours)
Pre-requisites: BIOL 251, BIOL 282, NEUR 101
We will cover circadian rhythms one very prominent circadian-regulated behavior: sleep. We will investigate these topics at several different levels, spanning from cellular and molecular mechanisms to systems and behavioral approaches, and finally will look at pathologies of these systems that lead to human disorders.
Interdisciplinary Option: Neuroscience
Outcomes:
Students will become familiar with a variety of model systems used to study circadian rhythms, and learn how to critically read primary literature and lead discussions of this reading

BIOL 353 Natural History of Vertebrates (4 Credit Hours)
Pre-requisites: BIOL 265
The objective of the course is to provide an in-depth study of the vertebrates in the Midwestern U.S. Topics will include the origin and evolution of vertebrates, and their ecology, behavior and specializations. The lab will focus on identification of vertebrate taxa and learning wildlife sampling techniques.
Outcomes:
Understand specifics of ecology, behavior, life history, evolution and conservation of all vertebrate taxa; Read, analyze, interpret, and discuss peer-reviewed literature

BIOL 356 The Evolution of Animal Sex (3 Credit Hours)
Pre-requisites: BIOL 251 and BIOL 282
Among animals, sex cannot be simplified down to X's and Y's, or even males and females. Sex is diverse and dynamic. The class will discuss modern research around three themes: 1) sexual differentiation, 2) animal weapons and ornaments, and 3) reproduction and mating systems.
Outcomes:
Students will gain a deeper appreciation of the sexual diversity among animals at genetic, physiological, morphological and behavioral levels

BIOL 357 Neural Disease, Degeneration, and Regeneration (3 Credit Hours)
Pre-requisites: BIOL 251, BIOL 282, NEUR 101
This course offers an overview of cellular and molecular mechanisms underlying common neurodegenerative disorders. Mechanisms of neuronal cell death and application of stem cells in CNS regeneration will also be covered. Students will learn by reading assigned background materials and research articles, and participating in class discussions.
Interdisciplinary Option: Neuroscience
Outcomes:
Students will understand current advances of genetic, developmental, molecular, and cellular mechanisms underlying the neurodegenerative diseases; Students will also learn how disease mechanisms affect neural function, cognition, and behavior

BIOL 358 Developmental Neurobiology (3 Credit Hours)
Pre-requisites: BIOL 251, BIOL 282, NEUR 101
This course focuses on cellular and molecular underpinnings of the development of neuronal features of the nervous system. Topics include neural induction and subsequent differentiation events, regulation of neuronal survival, axon guidance, target selection, and synaptogenesis.
Interdisciplinary Option: Neuroscience
Outcomes:
Students will become familiar with principles of neural development and the studies that led to those principles; Students will also learn how to critically read primary research papers and present these papers to the class

BIOL 361 Cellular and Gross Neuroanatomy (3 Credit Hours)
Pre-requisites: NEUR 101 and BIOL 251
This course explores the cellular and gross anatomy of the nervous system, with an emphasis on the functional anatomy of the human brain and spinal cord in the normal and pathological states. The major sensory, motor, and integrative neural systems of the human brain are discussed.
Interdisciplinary Option: Neuroscience
Outcomes:
Understanding of gross neuroanatomy, including major brain systems, spinal cord input and output, and cranial nerves; Understanding of cell types and their functions within the nervous system, and how diseases impact their function; Understanding of modern approaches to identifying cell types and connections among different structures in the brain and periphery

BIOL 361L Cellular and Gross Neuroanatomy Lab (1 Credit Hour)
Pre-requisites: NEUR 101, BIOL 251, and BIOL 361 (BIOL 361 may also be taken as a Corequisite)
This course gives students hands on experience with gross dissection methods and cellular and molecular approaches for identifying cell types and organization of neurons and their connections in the brain and in the periphery.
Interdisciplinary Option: Neuroscience
Outcomes:
Ability to identify neural cells; Ability to recognize, dissect, and label nervous system structures; Ability to conduct, interpret, and describe procedures that identify neural cell types and structures

BIOL 362 Neurobiology (3 Credit Hours)
Pre-requisites: NEUR 101 and BIOL 251
The purpose of this course is to introduce major principles and concepts of modern neurobiology. An emphasis is placed upon an understanding of the electrophysiology of the neuron and the manner in which groups of neurons are organized into functional nervous systems subserving sensory, motor or integrative functions.
Interdisciplinary Option: Neuroscience
Outcomes:
Student will gain a sold foundation in nervous system structure and function

BIOL 365 Writing a Scientific Manuscript (3 Credit Hours)
Pre-requisites: BIOL 102, BIOL 112
A Process from Data Collection to Writing a Scientific Manuscript. This course is designed for upper level students interested in practicing the scientific process; including hypothesis construction, experimental design, data collection, and writing of a scientific paper detailing Introduction, Methods, Results and Discussion.
Outcomes:
Students would learn to develop hypotheses, design experiments based on those hypotheses, analyze data, and learn to construct and peer-review a scientific manuscript

BIOL 366 Cell Physiology & Biochemistry (3 Credit Hours)
Pre-requisites: Bioinformatics majors: CHEM 224 or CHEM 222 or (CHEM 240 pre-req and CHEM 260 co-req); All other majors: BIOL 251 & CHEM 224 or CHEM 222 or (CHEM 240 pre-req and CHEM 260 co-req)
An introduction to biochemical principles as they relate to major biological themes such as the relationship between cellular structure and function, metabolism, thermodynamics, regulation, information pathways, and evolution. BIOL 366 is cross-listed with CHEM 361.
Interdisciplinary Option: Forensic Science
Course equivalencies: X-BIOL366/BIOI366/CHEM361
Outcomes:
Students will study the basic concepts of biochemistry and will understand how thermodynamics govern biochemical processes; Catalytic strategies, as well as the major pathways of both anabolism and catabolism, will also be learned

BIOL 366L Cell Physiology and Biochemistry Lab (3 Credit Hours)
Pre-requisites: CHEM 361 (may also be taken as a Corequisite)
Introduction to modern techniques and instrumentation with an emphasis on cellular metabolism and protein biochemistry including purification and quantitation methods and enzyme kinetics.
Interdisciplinary Option: Forensic Science
This course satisfies the Engaged Learning requirement.
Outcomes:
Proficiency in performing a variety of biochemical assays and the ability to write up results as a formal lab report

BIOL 368 Plant Ecology Lec/Lab (4 Credit Hours)
Pre-requisites: BIOL 265
Focuses on plant population dynamics; plant-animal interactions, including herbivory, pollination, dispersal; plant community dynamics, such as the processes of succession; and the effect of global climate on the distribution of major vegetation types. The laboratory is divided between weekend field trips to local forests, prairies and bogs, and laboratory studies.
Outcomes:
Students will achieve familiarity with major vegetation types and especially with local vegetation and natural areas; understand the dynamics of plant communities; understand the nature of research in plant ecology and gain familiarity with the primary literature; understand environmental issues as they relate to plant ecology

BIOL 369 Invertebrate Biology (3 Credit Hours)
Pre-requisites: BIOL 265
Broad survey of invertebrates including morphology, physiology, ecology, evolution, and systematics.

BIOL 370 Ichthyology Lec/Lab (4 Credit Hours)
Pre-requisites: BIOL 265
Lecture and laboratory and/or field trips. Systematics, phylogeny, anatomy, physiology, behavior, functional morphology and ecology of fishes. Includes field collecting trips in Lake Michigan and local streams and lakes and individual projects/research papers.
Outcomes:
Students will develop a detailed understanding of a range of topics in fish biology, with special emphasis on evolutionary relationships

BIOL 373 Laboratory in Neurophysiology and Behavior (4 Credit Hours)
Pre-requisites: BIOL 362 (may also be taken as Corequisite)
This lab course explores how cellular activity in the nervous system controls behavior. Students gain hands-on experience with anatomical, physiological, behavioral, and computational techniques used in cellular neurobiology, including microdissection, neural recording, stimulation, and modeling. Using Aplysia, students conduct group a research project, analyze data, and produce a publication-style paper.
Interdisciplinary Option: Neuroscience
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will develop scientific research skills in cellular neurobiology, including anatomical and physiological techniques, electrophysiological data acquisition, computational modeling of neural activity, and analysis and communication of empirical findings

BIOL 375 Aquatic Insects Lecture & Laboratory (4 Credit Hours)
Pre-requisites: BIOL 265
This course focuses on the classification and ecology of insects that have become fully or partially adapted to the aquatic environment. Emphasis will be on the ecology and biology (behavior, physiology and phylogeny) of aquatic insects. The course includes laboratory field trips to local and upper Midwest aquatic habitats.
Outcomes:
Students will acquire an understanding of the ecological relationships between aquatic insects and their physical and biological environment, including their interactions with humans

BIOL 376 Seminar in Molecular/Cellular Neuroscience (3 Credit Hours)
Pre-requisites: BIOL 282 and BIOL 362
This lecture/discussion will span synaptic plasticity, modern approaches to studying neural circuits, and the therapeutic potential of neural stem cells. Students become familiar with principles of molecular/cellular approaches to the study of the nervous system through review articles and the primary literature.
Interdisciplinary Option: Neuroscience
Outcomes:
Students will become familiar with principles of molecular/cellular approaches to the study of the nervous system; Students will also learn how to evaluate primary literature

BIOL 377 Molecular Pathogenesis (3 Credit Hours)
Pre-requisites: BIOL 251 and BIOL 282
Introduction to the molecular mechanisms of disease pathology and therapeutic and control strategies, using a particular disease as model.
Outcomes:
Students will be able to explain the molecular basis for particular disease symptoms, understand therapeutic strategies, and use experimental results to form conclusions about disease molecular mechanisms

BIOL 378B Biological Topics for Bioethics Minor Capstone (3 Credit Hours)
Pre-requisites: Two prior science courses and two prior ethics courses required
The interdisciplinary team-taught Bioethics capstone course examines a topic in bioethics from both scientific and ethical points of view. Topics may include bio-technologies, concepts of race and gender, the environment, reproduction, and others. This course number provides an elective for Biology students when the Bioethics capstone's topic is biological.
Interdisciplinary Option: Bioethics
Outcomes:
Students will understand the connection between ethical and biological issues with regard to the special topic in biology

BIOL 379B Biological Topics for Bioethics Minor Capstone (3 Credit Hours)
Pre-requisites: Two prior science courses and two prior ethics courses
The interdisciplinary team-taught Bioethics capstone course examines a topic in bioethics from both scientific and ethical points of view. Topics may include biotechnologies, concepts of race and gender, the environment, reproduction, and others. This course number provides an elective for Biology students when the Bioethics capstone's topic is biological.
Interdisciplinary Option: Bioethics
Outcomes:
Students will understand the connection between ethical and biological issues with regard to the special topic in biology

BIOL 380 Genetics and Evolution of Development (3 Credit Hours)
Pre-requisites: BIOL 282
This course explores the evolution of the embryo and the patterns of gene regulation and morphogenesis that drive early development. Topics include evolution of nervous system patterning, shared human, mouse and frog regulatory systems, and evolution of human genetic syndromes.
Outcomes:
Students will master the stages and regulation of development in a number of organisms through use of primary literature; Evidence of their mastery will be seen through grant writing exercises, in class presentations, and conventional exams

BIOL 381 Epigenetics (3 Credit Hours)
Pre-requisites: BIOL 251 and BIOL 282; CHEM 222 or CHEM 224 or (CHEM 240 pre-req and CHEM 260 co-req)
This course will introduce students to epigenetic mechanisms operating throughout life, which include chromatin regulation, DNA methylation, histone modifications and non-coding RNAs. Students will gain an appreciation of how different cell types can maintain drastically different gene expression patterns yet share the exact same DNA sequences.
Outcomes:
Students will understand epigenetic mechanisms, apply insights gained to evaluate the effect of epigenetic changes in development, disease and aging, and learn how to lead a class discussion

BIOL 382 Molecular Genetics (3 Credit Hours)
Pre-requisites: BIOL 251 and 282; CHEM 222 or CHEM 224 or (CHEM 240 pre-req and CHEM 260 co-req)
This course covers the molecular details of genetic processes such as DNA replication, RNA and protein synthesis, gene regulation and genome organization.
Outcomes:
Students will be able to demonstrate a detailed understanding of (1) basic molecular techniques, (2) the macromolecules involved in genetic processes, and (3) published experiments that underlie our knowledge of these processes

BIOL 384 Microbial Pathogenesis of Infectious Disease (3 Credit Hours)
Pre-requisites: BIOL 251 and BIOL 282
The course is focused on teaching students the way bacteria, viruses, fungi, and pathogens can adhere, invade, replicate, and cause damage and disease in their hosts. The course focuses on the techniques used by researchers to ask questions about these processes.
Outcomes:
Students will understand the ways pathogens cause disease, read and review primary literature, and apply techniques used in a grant proposal on a topic of their interest

BIOL 385 Principles of Electron Microscopy Lecture/Lab (4 Credit Hours)
Pre-requisites: BIOL 251 and Instructor Permission; BIOL 341 recommended
This course focuses on the various areas of Electron Microscopy, both Scanning and Transmission. Topics include sample preparation, microscope operation, image acquisition using photographic and digital techniques, history and development, and new and special techniques.
Outcomes:
Student will become adept with the various techniques needed to produce research quality electron micrographs; Students will also learn how to correctly interpret their results and properly present their data

BIOL 386 Human Genetics (3 Credit Hours)
Pre-requisites: BIOL 282
Students will learn the foundations of human complex trait genetics in this course-based undergraduate research experience. They will analyze and discuss primary literature in human genetics, understand how our genes do and do not influence human differences, apply software tools used in the field, and gain experience in oral and written presentation of research.
This course satisfies the Engaged Learning requirement.
Outcomes:
Learn the foundations of human complex trait genetics; Analyze and discuss primary literature in human genetics; Begin applying the scripting and software tools used in the field; Design, implement, and evaluate a guided genome-wide analysis of a human phenotype; Gain experience in oral and written presentations of research

BIOL 387 Genomics (3 Credit Hours)
Pre-requisites: BIOL 282 and BIOL 283
Genomics is the compilation, characterization, and evaluation of DNA sequence information and its integration with established methods and genetic knowledge. This course will introduce students to the study of genome structure and function and its application to biomedicine, agriculture, and evolution.
Interdisciplinary Option: Bioinformatics
Outcomes:
Students will acquire an in-depth knowledge of the nature of gene and genome structure, function, and evolution as well as the methods used to obtain and evaluate this knowledge; Students will be able to create meaningful web-based database search strategies and interpret the significance of results

BIOL 388 Bioinformatics (3 Credit Hours)
Pre-requisites: BIOL 282
Students will engage in the applications of computer-based tools and database searching to better understand the fields of genetics, genomics, evolutionary biology, and personalized medicine. Students will be introduced to scripting programming languages for analyzing biological data sets.
Interdisciplinary Option: Bioinformatics
Outcomes:
Students will be able to appropriately use computer software and databases to accurately analyze biological data and interpret the results, applying their understanding of genetic processes

BIOL 390 Molecular Biology Laboratory (4 Credit Hours)
Pre-requisites: For Bioinformatics majors: BIOL 282, BIOL 283, and (CHEM 222 or CHEM 224 or (CHEM 240 prereq and CHEM 260 coreq)); All other majors: BIOL 251, BIOL 282, BIOL 283, and (CHEM 222 or CHEM 224 or (CHEM 240 prereq and CHEM 260 coreq))
This course is an intensive laboratory course in the basic principles and techniques of molecular biology, including bacterial cloning, polymerase chain reaction, restriction mapping, agarose gel electrophoresis, and DNA sequencing.
Interdisciplinary Option: Bioinformatics, Neuroscience
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to demonstrate basic molecular biology skills including manipulation of bacterial cultures and DNA, plasmid minipreps, gel electrophoresis, cloning, polymerase chain reaction, and other molecular techniques that may be specific to their chosen independent projects

BIOL 392 Metagenomics (3 Credit Hours)
Pre-requisites: BIOL 282
Exploration of next-generation sequencing technologies for assessing microbial diversity in ecological niches.
Interdisciplinary Option: Bioinformatics
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will gain hands-on experience with metagenomic methodologies while working in an interdisciplinary, collaborative setting

BIOL 394 Special Topics in Biology Laboratory (1-4 Credit Hours)
Laboratory. Special areas of study outside the usual curriculum, that vary each time the course is offered.
Outcomes:
Students will master a unique topic in biology

BIOL 394E Special Topics in Biology Laboratory (Ecology Emph) (1-4 Credit Hours)
Laboratory. Special areas of study related to ecology outside the usual curriculum, that vary each time the course is offered.
Outcomes:
Students will master a unique topic in biology related to ecology

BIOL 394M Special Topics in Biology Laboratory (Molecular Emph) (1-4 Credit Hours)
Laboratory. Special areas of study related to molecular biology outside the usual curriculum, that vary each time the course is offered.
Outcomes:
Students will master a unique topic in biology related to molecular biology

BIOL 395 Special Topics in Biology (3 Credit Hours)
Special areas of study outside the usual curriculum, that vary each time the course is offered.
Outcomes:
Students will master a unique topic in biology

BIOL 395E Special Topics in Biology (Ecology Emph) (3 Credit Hours)
Special areas of study related to ecology outside the usual curriculum, that vary each time the course is offered.
Outcomes:
Students will master a unique topic in biology related to ecology

BIOL 395L Special Topics Laboratory (1-4 Credit Hours)
Laboratory. Special areas of study outside the usual curriculum, that vary each time the course is offered.
Outcomes:
Students will master a unique topic in biology

BIOL 395M Special Topics in Biology (Molecular Emph) (3 Credit Hours)
Special areas of study related to molecular biology outside the usual curriculum, that vary each time the course is offered.
Outcomes:
Students will master a unique topic in biology related to molecular biology

BIOL 396 Research (3 Credit Hours)
Pre-requisites: BIOL 296 (minimum 1 credit), Permission of Instructor; Contract Required
Laboratory or field research under faculty guidance emphasizing hypothesis testing, literature searches, experimental design, and use of appropriate techniques.
Interdisciplinary Option: Neuroscience
This course satisfies the Engaged Learning requirement.
Course equivalencies: BIOL299/BIOL396
Outcomes:
Students will learn the full set of research skills required in doing an independent project and reporting the results

BIOL 396E Research (Ecology Emph) (3 Credit Hours)
Pre-requisites: BIOL 296 (minimum 1 credit), Permission of Instructor; Contract Required
Laboratory or field research related to ecology under faculty guidance emphasizing hypothesis testing, literature searches, experimental design, and use of appropriate techniques.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will learn the full set of research skills required in doing an independent project related to ecology and reporting the results

BIOL 396M Research (Molecular Emph) (3 Credit Hours)
Pre-requisites: BIOL 296 (minimum 1 credit), Permission of Instructor; Contract Required
Laboratory or field research related to molecular biology under faculty guidance emphasizing hypothesis testing, literature searches, experimental design, and use of appropriate techniques.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will learn the full set of research skills required in doing an independent project related to molecular biology and reporting the results

BIOL 397 Course-Based Undergraduate Research Experience in Biology (1-4 Credit Hours)
Laboratory. Special areas of study outside the usual curriculum, that vary each time the course is offered. Students will be working on research contributing to current scientific questions in the noted special topic area.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will plan and execute appropriate experimental or observational methods, and evaluate the results to address a research question or explore a biological phenomenon; Students will review the scientific literature, and then use the appropriate language and style to communicate their findings effectively to targeted audiences

BIOL 397E Course-based Undergraduate Research Experience in Biology (Ecology Emph) (1-4 Credit Hours)
Laboratory. Special areas of study outside the usual curriculum related to ecology, that vary each time the course is offered. Students will be working on research contributing to current scientific questions in the noted special topic area.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will plan and execute appropriate experimental or observational methods, and evaluate the results to address a research question or explore a biological phenomenon related to ecology; Students will review the scientific literature, and then use the appropriate language and style to communicate their findings effectively to targeted audiences

BIOL 397M Course-based Undergraduate Research Experience in Biology (Molecular Emph) (1-4 Credit Hours)
Laboratory. Special areas of study outside the usual curriculum related to molecular biology, that vary each time the course is offered. Students will be working on research contributing to current scientific questions in the noted special topic area.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will plan and execute appropriate experimental or observational methods, and evaluate the results to address a research question or explore a biological phenomenon related to molecular biology; Students will review the scientific literature, and then use the appropriate language and style to communicate their findings effectively to targeted audiences

BIOL 398 Internship in Biology (1-3 Credit Hours)
Pre-requisites: Permission of Instructor; Contract required
A supervised field placement intended to give students training or work experience in aspects of biology that cannot be obtained on campus.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will acquire practical experience in biology-related job settings

BIOL 398E Internship in Biology (Ecology Emph) (1-3 Credit Hours)
Pre-requisites: Permission of Instructor; Contract required
A supervised field placement intended to give students training or work experience in aspects of biology related to ecology that cannot be obtained on campus.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will acquire practical experience in ecology-related job settings

BIOL 398M Internship in Biology (Molecular Emph) (1-3 Credit Hours)
Pre-requisites: Permission of Instructor; Contract required
A supervised field placement intended to give students training or work experience in aspects of biology related to molecular biology that cannot be obtained on campus.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will acquire practical experience in molecular biology-related job settings

BIOL 399 Individual Study (1-3 Credit Hours)
Directed study of a specific topic by an individual student studying with a single faculty member.
Outcomes:
Students will master a unique topic in biology

BIOL 399E Individual Study (Ecology Emph) (1-3 Credit Hours)
Directed study of a specific topic related to ecology by an individual student studying with a single faculty member.
Outcomes:
Students will master a unique topic in biology related to ecology

BIOL 399M Individual Study (Molecular Emph) (1-3 Credit Hours)
Directed study of a specific topic related to molecular biology by an individual student studying with a single faculty member.
Outcomes:
Students will master a unique topic in biology related to molecular biology

BIOL 401 Medical Literature and Ethics (3 Credit Hours)
The course will include lectures on the foundational concepts of modern ethics, in class discussions of ethics primarily centered on discussion of cases from different ethical perspectives, quizzes to assess reading mastery and familiarity with material to qualify students on how to discuss cases and formal case presentations by student working groups.
Outcomes:
Understand and articulate the philosophical basis for different ethical frameworks; Have a firm command of the "four principles" of Benevolence, Non-maleficence, Justice and Autonomy and their clinical applications; Be able to resolve clinical ethical issues and back up your reasoning

BIOL 402 Microbiology (3 Credit Hours)
Lecture and laboratory. Fundamental concepts of microbial life, physiology, and metabolism.
Outcomes:
Students will learn the differences between the 3 domains of life and will comprehend the biochemistry, morphology, growth characteristics, structure and ecology of microbes

BIOL 405 Advanced Development (3 Credit Hours)
Developmental Biology draws from Genetics, Molecular Biology, Genomics, and Embryology and is a foundational science for understanding problems in Humans ranging from birth defects to cancer. Because of its multidisciplinary foundation, Developmental Biology is best thought of as a SYSTEM OF IDEAS, EXPERIMENTS AND OBSERVATIONS, as such you will greatly expand your scientific vocabulary and problem solving abilities during the course of this semester. Often you will need to draw on your stored knowledge from many disciplines to understand the topics we will cover. The course will comprise lectures on general development, evolution and developmental genetics, followed by discussions of papers on particular topics, and student presentations.

BIOL 408 Writing for the Medical Professions (3 Credit Hours)
This course will be required for the Master of Arts in Medical Sciences (MAMS) program. It will include readings related to developing the student's physician persona, and writings that are required for the medical school application process. Pre-requisites: Admission to the MA in Medical Sciences program.
Outcomes:
Students will be prepared to write effective primary and secondary essays for their medical school applications; communicate clearly their motivation to pursue a career in medicine and the relevance of their experiences to their pre-medical preparation

BIOL 409 Advanced Genetics (3 Credit Hours)
Pre-requisites: Restricted to students in the MAMS Program (Note: MAMS = MSCI-MA)
The course will comprise formal discussions on the molecular basis of information storage and retrieval in the cell, the role of genetics in human development and homeostasis, the mapping of human genes in familial or population contexts, and modern understanding of the connection between genotype, phenotype and human traits.

BIOL 410 Advanced Cell Biology (3 Credit Hours)
This course explores, in depth, the life cycle and activities of a typical eukaryotic cell. Some of the topics covered are cell polarity, cytoskeleton, plasma membrane, protein modifications and trafficking, extracellular matrix and cell death. Competencies to be gained in this course: To develop the skill of reading and analyzing the primary literature on topics pertaining to cell biology. Judging whether a conclusion is supported by sufficient data. Identifying the controls in published experiments. Exam-taking skill improvement using short reading passages from the scientific literature as topics.

BIOL 413 Advanced Immunology (3 Credit Hours)
Introduces innate and adaptive immunity, lymphocyte development, T-cell and B-cell mediated immunity, leukocyte trafficking, immunological memory hyperimmune reactions, autoimmunity, tumor and transplant immunity. Must be enrolled in the Master of Arts in Medical Sciences (MAMS) program.
Outcomes:
Students will acquire an overview of the human immune system that prepares them for success in a medical school immunology class

BIOL 415 Advanced Parasitology (4 Credit Hours)
Lecture and laboratory. A study of animal parasites, their distribution, structure, adaptations, life cycles, and host relationships.
Outcomes:
Students will learn to recognize the major groups of animal parasites, be able to explain their life cycles and describe the mechanisms that hosts use to ward off parasite infestation

BIOL 416 Limnology Lec/Lab (4 Credit Hours)
Lecture and laboratory. An introduction to the structure and function of lake and stream ecosystems. The course includes the integration of physical, chemical, and biological parameters. Laboratories include weekend field trips to aquatic habitats. Students will learn to evaluate the trophic status and health of a lake by the end of the course.
Outcomes:
Students will learn methods of sampling and analyzing physical, chemical and biological factors in lake and stream ecosystems, and how to integrate these complex data sets to answer ecosystem process-level questions

BIOL 417 Wetland Ecology Lec/Lab (4 Credit Hours)
Lecture and laboratory. An introduction to the study of wetlands habitats. This course includes discussion of physical and chemical factors, biota, production and community dynamics. Laboratories include several field trips to regional wetland habitats.
Outcomes:
Students will understand the functioning of wetlands, become aware of the variety of wetlands and become familiar with wetland biota, especially wetland plants

BIOL 418 Aquatic Insects Lecture & Laboratory (4 Credit Hours)
Lecture and laboratory. This course focuses on the classification and ecology of insects that have become fully or partially adapted to the aquatic environment. Emphasis will be on the ecology and biology (behavior, physiology and phylogeny) of aquatic insects. The course includes laboratory field trips to local and upper Midwest aquatic habitats.
Outcomes:
Students will acquire an understanding of the ecological relationships between aquatic insects and their physical and biological environment, including their interactions with humans

BIOL 422 Research (1-6 Credit Hours)
Laboratory or field research under faculty guidance emphasizing hypothesis testing, literature searches, experimental design, and use of appropriate techniques.
Outcomes:
Students will learn the full set of research skills required in doing an independent project and reporting the results

BIOL 426 Entomology Lec/Lab (4 Credit Hours)
Lecture and laboratory. An introductory course that covers the morphology, metamorphosis, classification and biology of the major insect groups. The laboratory includes dissection and the use of analytical keys and figures to identify insect taxa. Field trips and student collections add to the laboratory experience. They will also learn to distinguish immature insects from adult insects and to recognize the numerous beneficial insects as well as the small number that are detrimental.
Outcomes:
Students will learn to identify major insect groups in the field and in the laboratory

BIOL 430 Virology (3 Credit Hours)
This course covers the molecular details of viral infection and the diverse strategies used by these pathogens to invade cells and avoid immune clearance. The focus will be on mammalian viruses of biomedical relevance.
Outcomes:
Students will be able to demonstrate detailed understanding of basic viral structure, basic viral replication/infection cycles, and specific examples of viruses and their infection strategies

BIOL 450 Advanced Bioinformatics (2 Credit Hours)
Pre-requisites: BIOL 388 or BIOL 488
Students will study fundamental bioinformatics algorithms and emerging software tools in the field. The course will include the study of primary literature and design and implementation of bioinformatics algorithms.
Course equivalencies: X- BIOI 500 /BIOL 450
Outcomes:
Students can describe, design, implement, and evaluate bioinformatics algorithms

BIOL 451 Bioinformatics Seminar (1 Credit Hour)
Pre-requisites: BIOL 388 or BIOL 488
The seminar will introduce students to current topics in bioinformatics through presentations given by leaders in bioinformatics research. This course will also include more formal training in scientific presentation skills. Students can summarize, critique, and present bioinformatics research.
Course equivalencies: X-BIOI501/BIOL451

BIOL 452 Human Anatomy and Physiology I (3 Credit Hours)
The course objectives are to learn the gross anatomical structures of the human body. To organize the relationships between these structures and systems using patterns of innervation and development. To be able to apply anatomical knowledge in ways pertinent to clinical issues.

BIOL 453 Human Anatomy and Physiology II (3 Credit Hours)
Pre-requisites: Restricted to students in the MAMS Program
This is the second semester of a 2 semester course. We will cover the physiology of the cardiovascular, respiratory, digestive, renal, reproductive, and endocrine systems, in addition to acid-base and fluid balance, temperature regulation, and exercise physiology. Functioning will be discussed from a systems level to a molecular level.

BIOL 455 Advanced Neuroscience (3 Credit Hours)
This course will focus on the cellular, anatomical, and functional organization of the human nervous system that range in topics from ion channel physiology to cognition. Students will survey the elements of the nervous system necessary for a foundation for medical school. An understanding of pathologies presented in disease, dysfunction, and injury will be included.
Outcomes:
Learn foundational neurological concepts presented to first year medical students; Learn the pathology of neurological disease, dysfunction, and injury through clinical cases; Understand the neurological basis of higher-order functions

BIOL 458 Developmental Neurobiology (3 Credit Hours)
This course focuses on cellular and molecular underpinnings of the development of neuronal features of the nervous system. Topics include neural induction and subsequent differentiation events, regulation of neuronal survival, axon guidance, target selection, and synaptogenesis. Students will also learn how to critically read primary research papers and present these papers to the class.
Outcomes:
Students will become familiar with principles of neural development and the studies that led to those principles

BIOL 461 Advanced Neurobiology (3 Credit Hours)
The purpose of this course is to introduce major principles and concepts of modern neurobiology. An emphasis is placed upon an understanding of the electrophysiology of the neuron and the manner in which groups of neurons are organized into functional nervous systems subserving sensory, motor or integrative functions.
Outcomes:
Student will gain a sold foundation in nervous system structure and function

BIOL 466 Advanced Biochemistry (3 Credit Hours)
Life is based on four principle cellular components: proteins, lipids, carbohydrates, and nucleic acids. Biochemistry is concerned with the structure, function, and interactions of these compounds with one another and their environment. As such biochemistry plays a vital part in all aspects of the medical sciences since it not only helps us to understand how the (human) cell works on a molecular level but also how to decipher and possibly counter pathogenic conditions. Consider that almost all drugs used in medical treatment target proteins or groups of proteins to modulate their biochemical properties.

BIOL 470 Biostats & Exp Design Lec/Lab (4 Credit Hours)
This course is designed for students who are in, or plan to attend, graduate or professional school, and thus, will be working with their own data or critically analyzing existing data. This course will emphasize the theory and application of commonly used statistics in biology.

BIOL 479 Biology AP Workshop (3 Credit Hours)
No course description is available

BIOL 482 Advanced Molec Genetics (3 Credit Hours)
This course covers the molecular details of genetic processes such as DNA replication, RNA and protein synthesis, gene regulation and genome organization.
Outcomes:
Students will be able to demonstrate a detailed understanding of (1) basic molecular techniques, (2) the macromolecules involved in genetic processes, and (3) published experiments that underlie our knowledge of these processes

BIOL 483 Pop Genetics (3 Credit Hours)
Fundamental principles of population, ecological, and evolutionary genetics, including molecular evolution and analysis of the genetic structure of populations. They learn how to apply basic tools of population genetic analysis.
Outcomes:
Students develop knowledge and awareness of population genetic theory and information

BIOL 485 Prin Electron Microscopy Lec/Lab (4 Credit Hours)
Lecture and laboratory. This course focuses on the various areas of Electron Microscopy, both Scanning and Transmission. Topics include sample preparation, microscope operation, image acquisition using photographic and digital techniques, history and development, and new and special techniques. Students will also learn how to correctly interpret their results, and properly present their data.
Outcomes:
Student will become adept with the various techniques needed to produce research quality electron micrographs

BIOL 488 Bioinformatics (3 Credit Hours)
Students will engage in the applications of computer-based tools and database searching to better understand the fields of genetics, genomics, evolutionary biology, and personalized medicine. Students will be introduced to scripting programming languages for analyzing biological data sets.
Outcomes:
Students will be able to appropriately use computer software and databases to accurately analyze biological data and interpret the results, applying their understanding of genetic processes

BIOL 493 Directed Reading (1-4 Credit Hours)
Student investigates a current topic in biology.

BIOL 495 Special Topics (1-4 Credit Hours)
Special areas of study outside the usual curriculum, that vary each time the course is offered.
Outcomes:
Students will master a unique topic in biology

BIOL 495L Special Topics Lab (0 Credit Hours)
Laboratory. Special areas of study outside the usual curriculum, that vary each time the course is offered. Outcome: Students will master a unique topic in biology.

BIOL 500 Scientific Logic (3 Credit Hours)
The Scientific Logic course is designed to teach scientific literacy in terms of writing grant proposals, reading scientific literature, scientific presentations and debate. The course is framed within an evolutionary foundation.
Outcomes:
Students will gain knowledge in advanced evolutionary topics, while preparing a grant proposal and developing skills with respect to critical thinking and scientific inquiry

BIOL 501 Seminar (1 Credit Hour)
Students present specific, current research topics including their own research to the class and faculty.

BIOL 502 Department Seminar (1 Credit Hour)
Students meet and discuss the research presented by seminar speakers.

BIOL 510 Instructions in Teaching Biology (1 Credit Hour)
Introduction to the fundamentals of teaching biology.

BIOL 511 Biology Teaching Practicum (2 Credit Hours)
Students gain firsthand teaching experience by assisting in undergraduate courses.

BIOL 595 Thesis Supervision (1 Credit Hour)
Students conduct thesis research under the direction of their Thesis Director.

BIOL 605 Master's Study (1 Credit Hour)
Students conduct thesis research under the direction of their Thesis Director.

Biomedical Sciences (BMSC)

Discover, search, courses (p. 2661)!

BMSC 402 Statistical Methods for Biomedical Science (2-3 Credit Hours)
This course covers a broad array of statistical methods for the biological and medical sciences. Topics include descriptive statistics, non-parametric methods, categorical data analysis, and regression methods for normal, non-normal, and repeated measures data. The course focuses on the analysis of real datasets using RStudio, although no previous programming experience is assumed.
Course equivalencies: CRME420/BMSC402/MPBH404

BMSC 405 Ethics in Biomedical Sciences (1 Credit Hour)
This is an interactive seminar course where students discuss and debate ethics in biomedical sciences to foster integrity, professional character, and ethical problem solving skills.

BMSC 406 Special Topics (1-3 Credit Hours)
This course covers a specific topic in biomedical sciences. The topics can vary among different special topics courses.

BMSC 410 Biochemistry and Molecular Biology (4 Credit Hours)
This course will give students a broad understanding of the synthesis and functions of the major macromolecules that comprise a cell, and the biochemical mechanisms by which these molecules interact to contribute to cellular function.

BMSC 412 Cell Biology (4 Credit Hours)
This course will provide students with knowledge of the structure and function of cells, including the experimental foundations of cell and molecular biology.

BMSC 414 Systems Biology (3 Credit Hours)
This course will provide first year graduate students with an introduction to human physiology. Emphasis is placed on the major organ systems including the nervous, cardiovascular, pulmonary, renal, gastrointestinal and endocrine systems. Basic physiology of blood, skin and bone, as well as introductory concepts in immunology and pharmacology are also covered.

BMSC 416 Methods Biomedical Science (1 Credit Hour)
This course will familiarize first year graduate students with various methods that are used in contemporary biomedical research. It will introduce methods relevant to molecular biology, tissue culture, transgenic model systems, imaging, biochemistry, bioinformatics, electrophysiology, and immunology.

BMSC 418 Presentation skills (1 Credit Hour)
Scientists must communicate their work in numerous venues, from giving oral presentations in seminars and conferences to writing papers and grant proposals. This course is designed to train students in the design and delivery of effective oral presentations, a skill that can be readily adapted to serve as a starting point for written communications.
Course equivalencies: IDIM418/BMSC418
Outcomes:
1) Identify elements of an effective oral presentation; 2) Deliver an effective oral presentation; 3) Judge the effectiveness of oral presentations

BMSC 499 Research (0-2 Credit Hours)
Pre-requisites: First year PhD students will register for one research rotation in the Fall semester (2 credit hours), and two research rotations in the Spring semester (3 credit hours)
Research rotation course for first year students in the Integrated Program in Biomedical Sciences.
Outcomes:
Research course will provide laboratory experience during the first year of study, expected to culminate in the selection of a dissertation research laboratory and mentor at the end of the first year

BMSC 600 Dissertation Supervision (1 Credit Hour)
Following completion of the required 48 credit hours in the first 2 years, IPBS PhD students maintain registration via BMSC 600.
Outcomes:
IPBS PhD students will work on their dissertation while registered for BMSC 600

Business Administration (BSAD)

Discover, search, courses (p. 2661)!

BSAD 400E Business Foundations (1.5 Credit Hours)
Enrollment limited to students enrolled in the EMBA or EMBA Health Care Management Programs. Introductory course delivered during initial residency/orientation week to lay foundation for business education in the EMBA and EMBA Health Care Management Programs. Course coverage includes: Jesuit traditions/values, Quantitative Methods, Business Communications, and current topical lecture.

BSAD 401E Effective Business Writing Workshop (0.75 Credit Hours)
Enrollment is restricted to the Executive MBA or Executive MBA Health Care Management program. This course introduces the fundamentals of good written and oral business communications. Course topics include: communicating strategically; making a business case (argumentation and persuasion); presenting data effectively; producing and delivering compelling PowerPoint presentations; and delivering a powerful presentation.

BSAD 402E Effective Business Presentation Skills Workshop (0.75 Credit Hours)
This course introduces the fundamentals of good oral business communications. Course topics include: presenting data effectively; producing and delivering compelling PowerPoint presentations; and delivering powerful presentations. Restricted to students enrolled in EMBA or MBA Health Care Management cohort

BSAD 409E Integrative Strategy (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Integrates functional area considerations with strategic decision-making at the end of the program.

BSAD 499E Special Topics (1.5 Credit Hours)
Enrollment is restricted to students in the Executive MBA Program. Offers students opportunity to gain additional understanding on a special business topic not otherwise covered in the standard EMBA curriculum. The subject and content vary and are offered on an ad hoc basis.
Outcomes:
Students will demonstrate understanding of specialized topics not otherwise covered in EMBA curriculum

BSAD 601E Special Topics (1.5 Credit Hours)
Restricted to Executive MBA students. Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

BSAD 609E Integrative Strategy (1.5 Credit Hours)
Restricted to Executive MBA students. Integrates holistic and humanistic concepts (social justice, sustainability, greater good, Jesuit perspectives, etc.) into scientific business management and one's individual lifestyle. Students apply these perspectives by addressing recent developments in emerging topics. In addition, students will present final Capstone project.

Business Ethics (ETHC)

Discover, search, courses (p. 2661)!

ETHC 321 International Business Ethics (3 Credit Hours)
Pre-requisites: Sophomore standing; minimum grade of C- in MGMT 201 and ECON 202
This course addresses the ethical challenges of international business for managerial decision making. The main emphasis of the course is on implementation, and standards, for operating ethically within multinational corporations and on ethical problems in specific countries or regions of the world.
Course equivalencies: ETHC 321 / ETHC 341/ ETHC 341H
Outcomes:
Students will develop ethical decision-making skills in global business by understanding complex interactions among market, policy, and society, analyzing personal decision-making, and improving communication abilities

ETHC 341 Ethics in Business (3 Credit Hours)
Pre-requisites: Junior standing; minimum grade of C- in (MGMT 201 or HSM 368) and ECON 202
This course focuses on ethical issues in the world of business and commerce. This course will address a number of interrelated questions: What are the rights and obligations of business in society? Can businesses "do good" and "do well"? Is business ethics a viable goal or an unachievable ideal?
Course equivalencies: ETHC 321 / ETHC 341/ ETHC 341H
Outcomes:
Critically discuss (via well-grounded arguments) philosophical issues and questions from the perspective of multiple methods, traditions, and historical contexts; Evaluate philosophical issues, questions, and problems critically and analytically; Formulate and evaluate their own understanding of a diverse range of philosophical problems, in both writing and discussion

ETHC 341H Ethics in Business - Honors (3 Credit Hours)
Pre-requisites: Junior standing; minimum grade of "C-" in (MGMT 201 or MGMT 201H) and (ECON 202 or ECON 202H); Restricted to students in the Quinlan School of Business Honors program
This course focuses on ethical issues in the world of business and commerce. This course will address a number of interrelated questions: What are the rights and obligations of business in society? Can businesses "do good" and "do well"? Is business ethics a viable goal or an unachievable ideal?
Course equivalencies: ETHC 321 / ETHC 341/ ETHC 341H
Outcomes:
Critically discuss (via well-grounded arguments) philosophical issues and questions from the perspective of multiple methods, traditions, and historical contexts; Evaluate philosophical issues, questions, and problems critically and analytically; Formulate and evaluate their own understanding of a diverse range of philosophical problems, in both writing and discussion

ETHC 399 Special Topics in Business Ethics (3 Credit Hours)
Pre-requisites: Junior standing
Special topics are scheduled classes offered on an ad hoc basis. Specific titles and content will vary.
Outcomes:
Varies with topic

ETHC 441 Business Ethics (3 Credit Hours)
This course examines the ethical aspects of individual and corporate decision making in business and provides resources for making ethical decisions within the context of managerial practice.
Outcomes:
Students will be acquainted with the concepts and principles of ethical reasoning that have been developed in ethical theory; be aware of the specific ethical issues that arise in management and of the ways in which these issues are commonly analyzed; and be able to make sound ethical and managerial decisions and to implement those decisions within the context of an organization in a competitive marketplace

ETHC 441B Business Ethics (1.5 Credit Hours)
This course examines the ethical aspects of individual and corporate decision making in business and provides resources for making ethical decisions within the context of managerial practice.
Outcomes:
Students will be acquainted with the concepts and principles of ethical reasoning that have been developed in ethical theory; be aware of the specific ethical issues that arise in management and of the ways in which these issues are commonly analyzed; and be able to make sound ethical and managerial decisions and to implement those decisions within the context of an organization in a competitive marketplace

ETHC 441E Business Ethics and Values (1.5 Credit Hours)
Pre-requisites: Restricted to students in the Executive MBA Program
This course combines Quinlan's core business ethics course with contemporary instruction in leadership. Students will develop a framework for ethical decision making and the leadership strength needed to advance business decisions.
Course equivalencies: ETHC 600E/ETHC 441E

ETHC 441N Business Ethics (3 Credit Hours)
Students are introduced to theories about social and political institutions, and how they affect our ability to make moral decisions. Topics may include social psychology, capitalism and its critics, democratic theory, labor relations, and social inequalities. Classes are dedicated to understanding and engaging with social and political theory on this topic. Assignments will involve students using these theories to critically assess corporate practices and contexts. School of Business graduate degree students
Outcomes:
Global Perspective & Awareness of Diversity: developing a global perspective and appreciating diversity, including class, culture, race, religion, and gender; Communication Skills: communicating complex moral and philosophical ideas effectively and appropriately in an oral and written manner

ETHC 443 Global Environmental Ethics (3 Credit Hours)
This course develops an understanding of the ethical issues and responsibilities arising from human interaction with the non-human natural environment. Perspectives from various religious traditions, Western philosophy, and the science of ecology are considered.
Outcomes:
Students will be able to demonstrate ethical awareness, reflection, and application of ethical principles in decision making

ETHC 446 International Business Ethics (3 Credit Hours)
This is an advanced business ethics course that addresses the ethical challenges of international business for managerial decision making. The main emphasis of the course is on implementation, and standards, for operating ethically within multinational corporations and on ethical problems in specific countries or regions of the world.
Outcomes:
The course aims to equip managers with ethical decision-making skills in global business by understanding complex interactions among market, policy, and society, analyzing personal decision-making, and improving communication abilities

ETHC 499 Special Topics in Business Ethics (3 Credit Hours)
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

Business Honors (BHNR)

Discover, search, courses (p. 2661)!

BHNR 300 Business Honors Seminar-Required (0 Credit Hours)
Pre-requisites: Restricted to students in the Quinlan Business Honors program
This seminar is a pass/no-pass program requirement providing honors students with opportunities to learn from and network with leaders at major companies and organizations. Seminar is primarily a speaker series presenting honors students with opportunities to attend corporate and organizational site visits, social activities, and other events. Through seminar, honors students are able to network with each other and build community.
Outcomes:
Encourage bonding, stimulate thoughtful interaction, provide connections with the faculty, and connect to the broader business and alumni community

BHNR 343 Integrated Analytical Decision Making (3 Credit Hours)
Pre-requisites: Enrollment is restricted to Business Honors students; Junior Standing; C- or better in ISSCM 241 or ISSCM 241H or STAT 103
This course will focus on the analysis of data, with applications of techniques to business problems. Students will conduct original research and create both a written analysis and presentation. This course satisfies the Engaged Learning requirement.
This course satisfies the Engaged Learning requirement.
Outcomes:
At the end of this course, the student will know how to formulate a business problem, then collect and analyze data, and interpret results that address the problem

BHNR 353 Research Practicum (3 Credit Hours)
This course introduces students to the process of business research, including research ethics as well as implications of research outcomes in the broader business and social context. Good research helps business managers understand issues and make informed decisions.
This course satisfies the Engaged Learning requirement.

BHNR 357 International Perspectives on the Social Impact of Business (3 Credit Hours)
Pre-requisites: Junior standing; Students in good standing in Quinlan Business Honors program
Through pre-trip classes developing an understanding of international business and a week-long study abroad, students will observe how foreign businesses navigate the unique dynamics of the country in which they operate, contribute to the country's development, and deploy innovative technologies that help the society become more equitable and sustainable. In pursuit of these learning outcomes, students will engage with several foreign companies. Additionally, daily reflection discussions and activities will aid students in connecting their day-to-day experiences in the foreign country with their understanding of the specific local context of political and economic development and the global context of international business. Through cultural activities, students will also develop a fuller appreciation of the challenges and opportunities of business in a foreign country, with an eye towards promoting positive and sustainable social and environmental impact.
Interdisciplinary Option: International Business
Outcomes:
Developing an understanding of the challenges and opportunities for foreign companies investing in underdeveloped markets, including the strategies companies use to enter and succeed in the market; Fostering an appreciation for the role of business in promoting economic and social development; Becoming aware of how investments in technology can promote equality and environmental sustainability

BHNR 395 Independent Study in Business Honors (3 Credit Hours)
Pre-requisites: Sophomore standing, Department Consent Required
Student will conduct in-depth research or reading, initiated by the student and jointly developed with a faculty member into a specialized area as determined between student and faculty member.
Outcomes:
Students will be able to demonstrate an in-depth understanding of a specialized area or topic of research

Catholic Studies (CATH)

Discover, search, courses (p. 2661)!

CATH 100 Introductory Topics in Catholic Studies (3-6 Credit Hours)
Introductory level course for topics cross-listed with other courses that focus on areas of Catholic studies but are not included among the courses listed in the Catholic Studies Program.
Interdisciplinary Option: Catholic Studies
Outcomes:
Students will master a topic in Catholic Studies not addressed in other courses

CATH 101 Evolution Western Ideas & Institutions to the 17th Century (3 Credit Hours)
This course traces the early development of Western civilization from the ancient Near East; Greece and Rome; the medieval civilization(s); to the European Renaissance and Reformation.
Course equivalencies: X-HIST101/CATH101/ACHIS101
Outcomes:
Students will gain an understanding of history as a discipline; be able to place Judaism, Christianity, and Islam in historical context; explain the expansion of the West; and develop their critical thinking and communications skills

CATH 101D Development of Western Thought Honors Discussion (3 Credit Hours)
Pre-requisites: Catholic Studies students must be enrolled in the Honors Program and must be completing the first section of the course HONR 101 (cross-listed with CATH 102)
This course is the second half of the Freshmen Honors program protocol of HONR 101, where students receive 6 credit hours for intensive reading, lectures, and discussion groups with professors.
Course equivalencies: X-HONRD101/CATH101D

CATH 102 Western Traditions Honors-Antiquity to Middle Ages (3 Credit Hours)
This course is restricted to Catholic Studies Minors enrolled in the Honors Program. This foundational course in the history of Western culture from antiquity to the Middle Ages discusses such writers ranging from Homer all the way to Augustine. Students will pose questions and comments about some of the ideas and texts that helped shaped Western culture, including many that come out of the western Christian tradition.
Course equivalencies: X-HONR10/CATH102

CATH 104 Jesus Christ (3 Credit Hours)
The study of the person of Jesus Christ.
Course equivalencies: THEO104/CATH104
Outcomes:
Students will be able to demonstrate understanding of the nature of Jesus Christ as both human and divine, what this might mean, how this formulation was derived, and the varieties of understanding of Christ within the Scriptures, the church, and modern scholarship

CATH 105 The Church in the World (3 Credit Hours)
How does Christian Theology inform how Christians act in the world? This is the central question that we will seek to answer throughout this course. Examining the intersection between theoretical and practical theology, we will explore the Church's engagement in the world at large, both in global cultures and political movements. Each class will focus on the sources of Christian doctrine, Biblical and Traditional, with an emphasis on Catholic teaching since Vatican II and on the lived reality of these teachings in a variety of historical and geographical contexts. Using contemporary examples of global issues, we will explore the practicality and potential benefits and drawbacks of doing theology in the public sphere.
Course equivalencies: X-THEO105/CATH105

CATH 106 Theology of The Sacraments (3 Credit Hours)
This course studies the realities of Christian faith life as expressed in the concrete rituals of Christian communities. Sacraments are more than just mechanical ways in which to experience God in Christian liturgy - defined traditionally as "visible signs of invisible realities." Certainly, the seven sacraments of the Catholic tradition perform the central mysteries of God's gracious self communication; however, as importantly, they also introduce and articulate a way of interpreting reality. This course will not only examine the historical development, central beliefs and communal practices of the sacraments, but will also explore the "sacramental principle" as a way to illuminate the theological dynamics that are such an essential component of Catholic liturgy and Christian spirituality. Students will investigate the nature of the sacramental system in Catholic worship, identify the key concepts of "sacramentality" and explore the religious practices that are part of the living tradition of sacramental theology. Finally, students will explore how, in the end, the sacramental principle affects everything and cannot be contained. Sacramentality is a way of being, an "eventing" that reminds us how dynamic and transcendent (as opposed to static and insulated) life is. So, we will follow the clues where they lead and assess current relationships among sacramental theology, liturgy, artistic reflection, cross-cultural expression, and daily life.
Course equivalencies: X-THEO265/CATH106

CATH 112 New Testament (3 Credit Hours)
The study of the New Testament.
Course equivalencies: X-THEO112/CATH112
Outcomes:
Students will be able to demonstrate understanding of the various literary genres found in the New Testament

CATH 179 Roman Catholicism (3 Credit Hours)
James Joyce famously called Roman Catholicism the "Here comes everybody" tradition, offering an apt description for a faith community made up of both sinners and saints, martyrs and missionaries, defenders and detractors all. This course on Roman Catholicism begins from the assumption that it is fundamentally a tradition of paradox, which establishes constancy through change and firmness through fluidity. Students will explore Roman Catholicism less as a set of definite beliefs and moral precepts, and more as a world-shaping perspective that forms Catholics to see and to be in distinctive ways. Finally, the course will address head-on a range of serious challenges confronting Roman Catholicism today, including widespread disaffiliation, clergy abuse, Magisterial teaching on gender and sexuality, women's ordination, and racism and anti-Judaism in the tradition.
Course equivalencies: THEO179/THEO279/CATH179

CATH 181 Christianity Through Time (3 Credit Hours)
This course will introduce you to the history and missionary movements of the Christian religion, from the early church to the present day. While the course is set up thematically in chronological order, you will read case studies based on primary sources, social history, and material culture that will give you an overview of Christian revelation, theological differences, community and controversies, circulation of ideas and counter-ideas, missionary tactics, power struggles, and people's experiences in ecclesial (liturgy and sacrament), para ecclesial, and personal ways. You will also visit the Art Institute of Chicago and the Newberry Library to see objects and manuscripts from the Christian tradition. The story this course seeks to reveal is how the Christian religion has defined the relationship between the divine and the human world.
Course equivalencies: THEO181/ THEO281/CATH181

CATH 193 Christian Marriage (3 Credit Hours)
Examination of the historical development of marriage within the Christian tradition as well as an investigation and evaluation of its condition in contemporary American society.
Course equivalencies: THEO193/THEO293/CATH193
Outcomes:
Students will be able to demonstrate understanding of ethical principles used to evaluate particular issues relevant to the understanding of the Christian tradition of marriage

CATH 200 Intermediate Topics in Catholic Studies (3-6 Credit Hours)
Intermediate level course for topics cross-listed with courses that focus on areas with Catholic studies but are not included among the courses listed in the Catholic Studies Program.
Interdisciplinary Option: Catholic Studies
Outcomes:
Students will master a topic in Catholic Studies not addressed in other courses

CATH 255 Music in Catholic Worship (3 Credit Hours)
This course will explore the relationship between music and the liturgies of the Roman Catholic Church. Theologies of liturgical music will be compared and contrasted using the official documents of the Church, theological perspectives and from pastoral experience.
Course equivalencies: X-MUSC255/CATH255
Outcomes:
For students seeking greater knowledge of sacred music, they will be introduced and become familiar with different styles of music, reflect upon and access the application and performance of sacred works within the course as well as in onsite experiences in Catholic parishes in Chicago

CATH 278 Medieval Culture (3 Credit Hours)
Europe in the Early Middle Ages was an unstable world, with its collapsing imperial framework, migrating peoples, contrary cultures, insecure economic structures and clashing political strategies. From that a new balance was struck, through the blending of Roman, Germanic, Celtic and Christian orders, and a Medieval Synthesis was forged. The readings emphasize primary sources and their interpretation while modern secondary sources will further inform our exploration into the phenomenon of cultural synthesis and its place in history.
Course equivalencies: X-ENGL279/CATH278/MSTU304

CATH 296 All Things Ignatian: Living and Learning in the Jesuit Trad (3 Credit Hours)
This course explores the founder of the Jesuits, St. Ignatius Loyola and considers his historical context and that of the Jesuits from Renaissance Europe to today. Second, the course will introduce "The Spiritual Exercises," a highly refined and adaptable method of prayer, contemplation and action. Finally, the course will examine Ignatian spirituality as a practical resource for addressing critical issues in the Church and world today. Identify and explain the chief characteristics and major themes of Ignatian spirituality. Locate, analyze, and demonstrate Jesuit apostolate of scholarship and teaching; identify the global contribution to education, particularly to university life. Experience direct service.
Interdisciplinary Option: Catholic Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: X-CATH 296/THEO 296
Outcomes:
Describe the life and history of Ignatius of Loyola and the Society of Jesus

CATH 297 The Jesuits: Life and History (3 Credit Hours)
This course examines the history of the Society of Jesus from its founding by Ignatius Loyola in the 16th century to its activities in the contemporary world.
Course equivalencies: X-HIST297/CATH297
Outcomes:
Students will gain a sense of the characteristics of Jesuit spirituality and the contribution of Jesuits to various fields of human endeavor such as evangelization, education, politics, literature, and the visual arts

CATH 300 Advanced Topics in Catholic Studies (3-6 Credit Hours)
Advanced level course for topics cross-listed with courses that focus on areas with Catholic studies but are not included among the courses listed in the Catholic Studies Program.
Interdisciplinary Option: Catholic Studies
Outcomes:
Students will master a topic in Catholic Studies not addressed in other courses

CATH 301 Catholics in America (3 Credit Hours)
This course uses canonization, the process by which the Catholic Church recognizes saints, to explore change over time in the history of both the Catholic Church and the United States. Drawing upon a cast of characters that includes saints and sinners, martyrs and missionaries, patriot priests and unruly women, we will explore how conceptions of sanctity and holiness have been shaped by popular devotion, papal power, gender, race, sexuality, nationalism, and commercialization.

CATH 302 Religion & Pop Culture: Europe (3 Credit Hours)
In this course, we will explore how religion is lived by ordinary people in the contexts of everyday life through various popular culture forms and genres. We will consider how religion animates popular culture, how popular culture itself does religious work, and how religious and non-religious groups and individuals approach popular culture at various times and in certain circumstances as both sacred and profane.

CATH 303 Topics in the Catholic Philosophical Tradition (3 Credit Hours)
Pre-requisites: One class in philosophy or permission of instructor
This course examines some aspect(s) of the Catholic philosophical tradition, drawing from various eras: its roots in ancient Greek philosophy, through the medieval period in the work of figures such as St. Augustine and St. Thomas Aquinas, and up to and including contemporary Catholic philosophy.
Course equivalencies: X-CATH 303 / PHIL 342
Outcomes:
Students will be conversant and familiar with some central features of the Catholic philosophical tradition, demonstrating proficiency in operating within the philosophical framework of this tradition

CATH 305 Medieval Philosophy (3 Credit Hours)
This course deals with selected works from such authors as Augustine, Anselm, Aquinas, Bonaventure, Scotus, and Ockham. The course may be on a particular author, or on a theme or issue characteristic of medieval thought.
Course equivalencies: X-PHIL305/CATH305/MSTU344

CATH 307 13th & 14th Century Philosophy (3 Credit Hours)
Modern thinkers of the 13th and 14th centuries, including at least some of the following: Albertus Magnus, Thomas Aquinas, Dun Scotus, William of Ockham, Roger Bacon. This course will focus on Thomas Aquinas, John Duns Scotus, and William of Ockham. In doing so we will try to get a sense of how they carried out the practice of philosophy, especially given the fact that each of them was a theologian by profession. Thus, the main theme of the course will be the relation of philosophy to theology - more broadly, faith and reason - as it was understood in this period. We will also look at a range of other issues that were of concern to the scholastics--chiefly questions of metaphysics and epistemology.
Course equivalencies: X-PHIL307/CATH307

CATH 309 History of Primitive Christianity (3 Credit Hours)
This course treats the history of Christian communities and beliefs from their emergence in cities of the early Roman Principate to the legalization of that religion in the Late Antique period.
Course equivalencies: X-HIST309/CATH309
Outcomes:
Students gain familiarity with messianism and eschatology in Second Temple Judaism, evangelization and growth of urban Christian churches, interaction with Roman Imperial government, and the flourishing of monasticism in the period of legalization

CATH 310 The Early Middle Ages 600-1150 (3 Credit Hours)
This course examines European society and culture in the early Middle Ages.
Course equivalencies: X-HIST310/MSTU328/CATH310
Outcomes:
Students will demonstrate an understanding of reasons behind the transformation of classical civilization; the so-called fall of Rome and the barbarian invasions; early Germanic kingdoms; Charlemagne and Carolingian Europe; the Vikings; and church and society in the eleventh century

CATH 311 Medieval World 1100-1500 (3 Credit Hours)
This course examines European society and culture in the later Middle Ages.
Course equivalencies: HIST311/MSTU332/CATH311
Outcomes:
Students will demonstrate understanding of new forms of schools and learning; the origins of national monarchies; the crusades; chivalry; courtly love and the role of women; the rise of towns; church and state relations; the Black Death and the Hundred Years War

CATH 312 Dante-The Divine Comedy (3 Credit Hours)
Refashioning the conventions of poetry, Dante (1265-1321) used the account of his presumed journey through the three realms of the Christian afterlife - Hell, Purgatory and Paradise - to explore the world at the close of the Middle Ages. The poem is both an adventure story and an exhaustive, assessment of the state of politics, society, religion, literature, philosophy, and theology at the beginning of the fourteenth century. This course examines a selection of cantos Dante's Inferno, Purgatorio, Paradiso in its cultural, theological, social and political context. In particular we will explore how the underground world imagined by the poet relates to late medieval urban life and culture. A guiding concern of the discussion is to assess the ways in which Dante changed our understanding of the relationship between the human and the divine, justice and love, will and reason, happiness and knowledge, literature and the Bible. Political turmoil, philosophical and theological paradigms social and religious conflict all converge in the making of the Comedy and will thus form crucial elements of our investigation.
Course equivalencies: X-ITAL312/CATH312/MSTU364

CATH 315 Mary and The Church (3 Credit Hours)
The course is structured as a chronological sweep through the history of ideas on Mary and her importance for understanding the God revealed in Jesus Christ. We will examine Mary's place throughout the seven major ages of Christianity with particular attention to the Early Church Age. After exploring the Mariologies of the Early Church Age, we will explore the continued development of Mariology, spending significant time thinking about Mariology in the Post-Modern Age through your papers and presentations.
Course equivalencies: THEO315/CATH315

CATH 316 The Reformation (3 Credit Hours)
This course examines the birth and progress of the Reformation in Europe from Luther's protest in 1517 to the conclusion of the Thirty Years War in 1648.
Course equivalencies: X-HIST315/CATH316
Outcomes:
Students gain familiarity with the social, religious, intellectual, and political background of the Reformation; Luther's personal religious experience and his theological convictions; the Swiss Reformation of Zwingli and Calvin; the nature and spread of Calvinism; the elements of the Radical Reformation; and the efforts for Catholic Reform culminating at the Council of Trent

CATH 317 Christian Thought: Ancient to Medieval (3 Credit Hours)
Early and medieval Christian Thought focuses upon the development of Christian thinking from the apostolic times to the eve of the Protestant Reformation. It centers on those individuals of the period who influenced thinking and practice in their as well as subsequent times. It also focuses upon important historical, social and political events that interacted with Christian doctrines throughout the centuries.
Course equivalencies: X-THEO317/CATH317/MSTU360

CATH 318 Christian Thought: Reformation to Modern (3 Credit Hours)
The development of various Christian doctrines in light of their historical milieu during the last six centuries of Christian thought.
Course equivalencies: X-THEO318/CATH318
Outcomes:
Students will be able to assess how various configurations of theological perspectives can both expand and foreshorten the way human thinking has gone on

CATH 320 The Philosophy of St Augustine (3 Credit Hours)
This course is a study of the principal works of Augustine, such as the Confessions, City of God.
Course equivalencies: X-PHIL320/CATH320/MSTU346
Outcomes:
Students will be able to understand and articulate philosophical problems and answers found in the works of Augustine

CATH 321 English Literature: Medieval Period (3 Credit Hours)
This course provides a survey of Old and Middle English Literature, studied partly in translation and partly in the original. Students will receive training in the understanding, appreciation, and criticism of works of medieval culture.
Course equivalencies: X-ENGL320/CATH321/MSTU308

CATH 322 Chaucer (3 Credit Hours)
This course introduces students to the life and writings of Chaucer through the reading of a representative selection (but not necessarily all) of The Canterbury Tales and through considering a variety of critical perspectives on them. Students will be able to demonstrate knowledge of Chaucer's poetry, the ability to read Middle English, and familiarity with some critical perspectives on Chaucer's works.

CATH 345 Roman Catholic Social Thought (3 Credit Hours)
An introduction to the social documents of the Catholic Church in the modern era. This course presents a synthesis of the methodology, the anthropology, and the principles used by the Church in its moral reflection on the various social problems of our day.
Course equivalencies: X-THEO345/CATH345

CATH 361 St Augustine Works (3 Credit Hours)
Pre-requisites: LATN 101 and LATN 102 or their equivalents
This course focuses on translation and understanding of the works of Saint Augustine.
Course equivalencies: LATN361/CATH361
Outcomes:
students should be able to translate these works with proficiency, and be able to demonstrate knowledge in detail about the author and his works, as well as deeper understanding and appreciation of the historical, social and intellectual contexts and influences pertaining to them

CATH 379 Ecumenism in The 20th Century (3 Credit Hours)
Investigation of the principles of ecumenism as formulated in Vatican II. Study of the agreed statements of bilateral discussions between Christian communities.
Course equivalencies: X-THEO379/CATH379
Outcomes:
Students will be able to assess how various configurations of a religious worldview can both expand and foreshorten the way human thinking has gone on

CATH 383 Theology Arts & Literature (1-3 Credit Hours)
Study of theological and religious symbols and themes in modern literature and/or in the arts.
Course equivalencies: X-THEO383/ENGL383/CATH383
Outcomes:
The student who successfully completes this course will be able to demonstrate knowledge about religion and its intersections with selected contemporary ethical, social, political, economic, or cultural issues

CATH 393 Seminar Theology (3 Credit Hours)
An undergraduate seminar course in theology with variable content, addressing topical issues that are not covered by the regular offerings at the 300 level.
Outcomes:
Students will gain an in-depth understanding of a selected topic

CATH 395 Directed Readings in Catholic Studies (3-6 Credit Hours)
An independent program of reading and research developed in consultation with either the Catholic Studies Program director or a supervising faculty member that teaches in Catholic Studies, culminating in a major project or paper.
Interdisciplinary Option: Catholic Studies
Outcomes:
Students will master a topic in Catholic Studies not addressed in other courses

CATH 396 Seminar in Medieval Phil (3 Credit Hours)
This course will study selected issues from medieval philosophy.
Outcomes:
Students will develop a more advanced understanding of medieval philosophy, through direct student participation in an interactive seminar environment

Cellular and Molecular Oncology (CMO)

Discover, search, courses (p. 2661)!

CMO 499 Research (1-9 Credit Hours)
Pre-requisites: Restricted to students enrolled in CMO MS program
CMO 499 is designed to give credit for laboratory research efforts that will result in a M.S. thesis. Students will learn theoretical and laboratory technical tools to investigate and test a hypothesis. Students will search the literature for background, rationale, and protocols for their research project. Students will communicate results and knowledge through written and oral communications.
Outcomes:
1) Clearly communicate, describe, and implement techniques used for a research problem; 2) Describe results-obtained; 3) Draw conclusions based on data-obtained; 4) List future directions; and 5) Understand the significance of the work

CMO 502 Seminar (0 Credit Hours)
A seminar will be held on a rotating basis once per week. CMO M.S. students will be required to attend seminars as part of the CMO 502 course. This course is designed to help students stay abreast of current topics in oncology. Students will attend weekly seminars, and are encouraged to interact with both invited and current faculty speakers by asking questions and contributing to group discussions. Upon completion of this course CMO 502, students will have gained a better understanding of current oncology research. Restricted to students enrolled in CMO MS program
Outcomes:
1) Describe results or conclusions from a given seminar presentation; 2) Understand how research is advancing knowledge in a given field covered by a representative seminar, 3) Question new data or their interpretation

CMO 503 Special Topics in Oncology (0-1 Credit Hours)
CMO 503 will be a new journal club course-discussing and analyzing papers from presenters in CMO 502 Seminar Series one week in advance of their seminar. CMO 503 and CMO 502 will be aligned to expose students to oncology-focused scientists presenting a seminar the following week. Students will read an article by the seminar speaker, participate in discussion sessions, and ask questions during the seminars. Restricted to students enrolled in CMO MS program
Outcomes:
1) Describe cutting edge research in the particular area of investigation covered by the course; 2) Discuss limitations to experimental approaches; 3) Discuss real-world application of the research topic being studied; and 4) Critically read scientific literature on cancer biology

CMO 595 Thesis Supervision (1 Credit Hour)
Pre-requisites: Completion of required coursework
Thesis supervision course for CMO MS students who have completed the required credit hours. Allows completion of thesis research and defense, required for degree.
Outcomes:
Form hypotheses, design and perform appropriate experiments to test these hypotheses; Search and critically evaluate scientific literature and data; Clearly and effectively communicate scientific information in both oral and written forms; Incorporate high standards of ethics into research design, execution, data interpretation, and presentation

Chemistry (CHEM)

Discover, search, courses (p. 2661)!

CHEM 101 General Chemistry A Lecture/Discussion (3 Credit Hours)
Pre-requisites: MATH 117 or equivalent
Co-requisites: CHEM 111 and MATH 118
A year of high school chemistry is recommended; This non-majors course deals with the development of basic chemical principles. Multiple perspectives of matter will be used to describe and explain characteristics, properties, and relationships across the following topics: atomic structure, nuclear chemistry, periodicity, molecular structure, chemical bonding, chemical reactions, thermochemistry, aqueous solutions, gases
Interdisciplinary Option: Bioinformatics, Forensic Science
Course equivalencies: ACCHM / CHEM 101
Outcomes:
Students will learn the foundational concepts of chemistry in these topic areas and develop skills in scientific problem solving and critical thinking

CHEM 102 General Chemistry B Lecture/Discussion (3 Credit Hours)
Pre-requisites: CHEM 101 or CHEM105; MATH 118 or equivalent
This non-majors course further develops principles from CHEM 101 & requires in-depth integration of concepts. Multiple perspectives of matter will be used to describe/explain characteristics, properties, & relationships across the following topics: liquids & solids, solutions, reaction kinetics, equilibria, acids & bases, reaction thermodynamics, electrochemical reactions.
Interdisciplinary Option: Bioinformatics, Forensic Science
Course equivalencies: ACCHM / CHEM 102
Outcomes:
Students will deepen their understanding of foundational concepts of chemistry and advance their skills in scientific problem solving, critical thinking and synthesis of concepts

CHEM 102D General Chemistry B Discussion (0 Credit Hours)
Discussion to accompany the CHEM 102 lecture section.

CHEM 105 Chemical Principles (4 Credit Hours)
Pre-requisites: Math Placement Test or Math 117
Lecture, discussion and laboratory course for majors covering stoichiometry, reactions in aqueous solution, states of matter, electronic structure, thermodynamics, chemical bonding, molecular geometry and intermolecular forces. Emphasis given to writing electron configurations and Lewis diagrams, predicting molecular geometry and properties, mass/mole conversions and solving thermodynamic and gas law problems.
Outcomes:
Students will learn basic chemical principles in these areas

CHEM 106 Basic Inorganic Chemistry (4 Credit Hours)
Pre-requisites: CHEM 105 AND MATH 118 or equivalent
Laboratory course designed to illustrate fundamental models and theories in chemistry with an emphasis on significant digits, calculations, and analysis and discussion questions.
Interdisciplinary Option: Bioinformatics, Forensic Science
Outcomes:
Students will be able to use equipment properly and demonstrate correct laboratory technique

CHEM 111 General Chemistry Lab A (1 Credit Hour)
Pre-requisites: MATH 117 or placement test equivalent
Laboratory course designed to illustrate fundamental models and theories in chemistry with an emphasis on significant digits, calculations, and analysis and discussion questions.
Interdisciplinary Option: Bioinformatics, Forensic Science
Course equivalencies: ACCHM / CHEM 111
Outcomes:
Students will be able to use equipment properly and demonstrate correct laboratory technique

CHEM 112 General Chemistry Lab B (1 Credit Hour)
Pre-requisites: CHEM 101 and 111 (or CHEM 105) and MATH 118 (or equivalent)
The second semester of general chemistry laboratory exposes students to qualitative analysis and continues the process of experimenting and collecting data to test the validity of theories and models presented in lecture.
Interdisciplinary Option: Bioinformatics, Forensic Science
Course equivalencies: ACCHM / CHEM 112
Outcomes:
Students will demonstrate success in lab by making perceptive qualitative observations and accurate quantitative measurements

CHEM 160 Chemical Structure and Properties (3 Credit Hours)
Pre-requisites: MATH 117 or equivalent
Lecture and discussion course designed to create foundational knowledge and proficiency in essential chemistry concepts and skills. Topics include atomic structure, periodic properties, bonding and properties of molecules, solid states, interactions and connections of light and matter, quantum and molecular mechanics models of atoms and molecules.
Outcomes:
Students will use multiple perspectives of matter to describe and explain how atomic, molecular and interparticle structure determines the properties of common materials

CHEM 161 Chemical Structure and Properties Laboratory (1 Credit Hour)
Pre-requisites: MATH 117 or equivalent
Laboratory course designed to create foundational knowledge and proficiency in essential chemistry lab skills including developing the knowledge and use of PPE, MSDS, and Chemical labels, basic statistical analysis and graphing, proper usage of common laboratory equipment and instrumentation, and keeping a laboratory notebook and writing reports.
Outcomes:
Students will learn essential chemistry lab skills, including best practices for chemical safety and hygiene, laboratory equipment, instrumentation, writing techniques, and measurements

CHEM 171 General Chemistry for Engineering Science Majors (3 Credit Hours)
Pre-requisites: MATH 118 or Math Placement Test; Co-requisite CHEM 173; Restricted to Engineering Science Students; A good background in high school chemistry is recommendation
This course is designed to acquaint students in engineering science with fundamental concepts of chemistry as well as their applications in the field of engineering. Students will survey topics in atomic structure, periodicity, chemical bonding, chemical reactions and reaction stoichiometry, gases, chemical thermodynamics, chemical kinetics, chemical equilibrium, and electrochemistry. A good background in high school chemistry is recommendation.
Outcomes:
Students should demonstrate proficient understanding of fundamental concepts and skills of general chemistry as well as their applications in the field of engineering

CHEM 173 General Chemistry Lab for Engineering Science Majors (1 Credit Hour)
Pre-requisites: MATH 118 or equivalent; Co-requisite: CHEM 173; Enrollment is restricted to declared ENGR majors; A good background in high school chemistry is recommendation
This lab course is a companion course to CHEM 171 General Chemistry for Engineering Science and is designed to support the development of chemistry concepts within the following topics: atomic structure, periodicity, chemical bonding, chemical reactions and reaction stoichiometry, gases, chemical thermodynamics, chemical kinetics, chemical equilibrium, and electrochemistry.

CHEM 180 Chemical Reactivity I (3 Credit Hours)
Pre-requisites: CHEM 160 and MATH 118 or equivalent
Lecture and discussion course designed to create foundational knowledge and proficiency in essential chemistry concepts and skills. Topics include acids and bases, buffers, chemical equilibrium, molecular thermodynamics and kinetics, nucleophilic substitutions, elimination reactions, carbonyl compounds and reactions with applications to biochemical pathways.
Outcomes:
Students will use qualitative and quantitative representations of matter to describe, explain, and predict how molecular structure and stability changes over time in chemical reactions

CHEM 181 Chemical Reactivity I Lab (1 Credit Hour)
Pre-requisites: CHEM 160, CHEM 161, and MATH 118 or equivalent
Laboratory course designed to utilize experiments to illustrate the relationships between the structures of compounds and their resulting properties Topics include identification of compounds using chromatography, mass spectrometry, infrared spectroscopy, and NMR, separation methods. Additional skills in analytical reasoning and information literacy will also be developed.
Outcomes:
Students will establish best practices for working safely in lab, analyzing compounds, interpreting spectra, and purification of reaction products

CHEM 186 Science and Culture of Food (3 Credit Hours)
Pre-requisites: CHEM 180 or CHEM 221 or CHEM 222 or CHEM 223 or CHEM 224; GNUR 160 may substitute for the CHEM course prerequisite
Food is chemistry, culture, and community. In this study abroad course, students explore the science that underlies the taste, texture, and transformation of foods--and how those scientific processes are deeply tied to local traditions and cultural identities. Through lectures, tastings, and local excursions, students discover the chemical and biochemical processes behind fermentation, baking, coffee and tea preparation, cheese making, and more. By engaging directly with local producers, artisans, and food experts, students connect chemistry with sustainability, history, and community well-being.
This course satisfies the Engaged Learning requirement.
Outcomes:
Describe basic chemical and biochemical processes that occur during food preparation and preservation; Explain how processing affects the sensory and nutritional properties of foods and beverages; Identify connections between local food traditions and the underlying chemistry; Reflect on how food and science connect to culture, sustainability, and personal experience; Communicate scientific and cultural insights clearly in writing and discussion; Demonstrate understanding of the chemical and biochemical processing and effects on the human biochemical processes of non-alcoholic beverages (tea, coffee, herbal infusions, juices)

CHEM 195 Foundational Concepts in Chemistry (1-3 Credit Hours)
Foundational Chemistry seminar/topics course, 1-3 credit hours. Chemical topics vary by section and are selected from the CHEM 100- and/or 200-level Departmental curriculum. Departmental consent required.
Outcomes:
Students will use multiple perspectives of matter to describe and explain characteristics, properties, and relationships of chemical systems

CHEM 212 Quantitative Analysis Lecture (3 Credit Hours)
Pre-requisites: CHEM 106 or 102 and 112
This lecture course provides an introduction to modern analytical quantitative chemistry. Topics include chemical equilibrium, statistical analysis of data as well as modern and classical methods of chemical analysis.
Interdisciplinary Option: Forensic Science

CHEM 214 Quantitative Analysis Laboratory (1 Credit Hour)
Pre-requisites: CHEM 106 or 102 and 112; Pre or co-requisite: CHEM 212
This laboratory course introduces students to classical and modern methods of chemical analysis and teaches wet chemical laboratory techniques.
Interdisciplinary Option: Forensic Science

CHEM 221 Organic Chemistry I Lec/Disc (4 Credit Hours)
Pre-requisites: CHEM 106; Chemistry and Biochemistry majors only
A lecture, discussion and laboratory course for chemistry majors covering structure and bonding in organic molecules; nomenclature, chemical and physical properties and reactions of non-aromatic hydrocarbons, alkyl halides, alcohols, ethers; stereochemistry and conformational analysis; and spectroscopy.
Interdisciplinary Option: Bioinformatics, Forensic Science
Outcomes:
Students will understand the chemical behavior of organic molecules and the mechanisms of reactions

CHEM 222 Organic Chemistry II Lec/Disc (4 Credit Hours)
Pre-requisites: CHEM 221; Chemistry & Biochemistry majors only
A lecture, discussion and laboratory course for chemistry majors continuing from 221 covering nomenclature, properties, reactions, syntheses, and spectroscopy of further classes of aliphatic and aromatic compounds, carbohydrates and other polyfunctional compounds.
Interdisciplinary Option: Bioinformatics, Forensic Science
Outcomes:
Students will be able to assign IUPAC names, spectroscopically identify, prepare, and propose reactions for these groups

CHEM 223 Organic Chemistry A Lec/Disc (3 Credit Hours)
Pre-requisites: (CHEM 102 or CHEM 106) and MATH 118 (or equivalent)
Lecture and discussion course for non-chemistry majors surveying nomenclature, structures, properties, stereochemistry, reactions, mechanisms, and syntheses of aliphatic hydrocarbons, alkyl halides, alcohols, and ethers.
Interdisciplinary Option: Bioinformatics, Forensic Science
Outcomes:
Students will identify classes of organic compounds and typical reactions, discriminate amongst intermediate stabilities, postulate reaction mechanisms, plan multi-step syntheses, and analyze/interpret spectroscopic data

CHEM 224 Organic Chemistry B Lec/Disc (3 Credit Hours)
Pre-requisites: CHEM 223 or 221
The second semester lecture and discussion course of a two semester sequence, a continuation of CHEM 223 for non-chemistry majors emphasizing the organic chemistry of conjugated systems, aromatic compounds, carbonyl compounds, amines, carboxylic acids and their derivatives, carbohydrates, lipids, and proteins.
Interdisciplinary Option: Bioinformatics, Forensic Science
Outcomes:
Students will identify classes of organic compounds and typical reactions, discriminate amongst intermediate stabilities, postulate reaction mechanisms, plan multi-step syntheses, and analyze/interpret spectroscopic data

CHEM 225 Organic Chemistry Lab A (1 Credit Hour)
Pre-requisites: CHEM 102 and 112 (or CHEM 106) and MATH 118 (or equivalent)
A laboratory course for non-chemistry majors designed to reinforce lecture topics from CHEM 223 and to expose students to the safe handling of organic chemicals.
Interdisciplinary Option: Forensic Science
Outcomes:
Students will acquire basic laboratory techniques and practices for working with organic chemicals

CHEM 226 Organic Chemistry Lab B (1 Credit Hour)
Pre-requisites: CHEM 223 and CHEM 225 (or CHEM 221)
A laboratory course for non-chemistry majors designed to reinforce lecture topics from 224 and to expose students to organic synthesis.
Interdisciplinary Option: Forensic Science
Outcomes:
Students will perform reactions to prepare known organic compounds and then isolate and characterize the reaction products

CHEM 240 Chemical Reactivity II (3 Credit Hours)
Pre-requisites: CHEM 180 and CHEM 181; Bioinformatics majors have Pre-requisite: CHEM 180 Outcomes: Students will increase their ability to use qualitative and quantitative representations of matter to describe, explain, and predict how molecular structure and stability changes over time in chemical reactions
Lecture and discussion course designed to create foundational knowledge and proficiency in essential chemistry concepts and skills. Topics include the reactivity of: alkenes, arenes, alkynes, and polyfunctional organic molecules. These topics will expand and enhance the ability to use chemical principles to explain natural phenomena.

CHEM 241 Chemical Reactivity II Laboratory (1 Credit Hour)
Pre-requisites: CHEM 180 and CHEM 181
Laboratory course designed to teach students how to perform chemical synthesis reactions and to evaluate and report the results.
Outcomes:
Students will utilize best practices for working safely in lab and for synthesizing, purifying, and characterizing chemical compounds

CHEM 242 Chemical Synthesis Laboratory (2 Credit Hours)
Pre-requisites: CHEM 180 and CHEM 181
Laboratory course designed to teach students how to perform chemical synthesis reactions and to evaluate and report the results. Students will also learn how to search the chemistry literature for existing synthesis laboratory procedures.
Outcomes:
Students will utilize best practices for working safely in lab and for synthesizing, purifying, and characterizing chemical compounds

CHEM 260 Quantitative Methods in Chemistry (3 Credit Hours)
Pre-requisites: CHEM 180, CHEM 181 and MATH 131 (or MATH 161); BIOI-BS majors, Pre-requisite: CHEM 180 and MATH 131 (or MATH 161)
Lecture and discussion course designed to create foundational knowledge and proficiency in essential chemistry concepts and skills. Topics include quantitative description of gases, liquids, and solutions, kinetics of chemical reactions, chemical equilibria, acids and bases, the thermodynamics of chemical reactions, electrochemistry, and spectroscopy.
Outcomes:
Students will deepen their understanding of foundational concepts of chemistry and advance their skills in scientific problem solving, critical thinking, and synthesis of concepts

CHEM 261 Quantitative Methods in Chemistry Laboratory (1 Credit Hour)
Pre-requisites: CHEM 180 and CHEM 181 and MATH 131 (or MATH 161)
Laboratory course designed for non-majors. The course provides students continued laboratory and chemical safety topics, scientific writing, peer review, and importance of articulating lab results in content. It will teach students how to perform chemical analysis using a variety of techniques including titration, kinetics, and spectrophotometry. Students also learn about the peer review process.
Outcomes:
Students will utilize best practices for working safely in lab during experiments designed to include kinetics, acids & bases, buffers, and spectrophotometry

CHEM 272 Analytical Chemistry Laboratory (2 Credit Hours)
Pre-requisites: CHEM 180, CHEM 181, and MATH 131 (or MATH 161)
This course continues exposure to laboratory and chemical safety topics, scientific writing, and articulating experiment results. The course utilizes hands-on lab experiments to teach a variety of analytical methods for quantifying a diverse set of chemical species. Data analysis, calibration methods, peer review are also of focus.
Outcomes:
Students will utilize best practices for lab safety, demonstrate application of analytical methods in chemical analysis, articulate results through scientific writing, and explain importance of accuracy & precision of data

CHEM 280 Environmental & Chemical Analysis (3 Credit Hours)
Pre-requisites: CHEM 240 and CHEM 260; Pre- or Co-requisite: CHEM 272
Lecture and discussion course designed to create foundational knowledge and proficiency in essential chemistry concepts and skills. Topics include the chemical analytical process, sample preparation, quantitative analysis, and data evaluation and validation. These topics will expand and enhance the ability to use chemical principles to analyze various types of environmental samples.
Outcomes:
Students will increase their ability to use both qualitative and quantitative reasoning to follow the chemical analytical process for various types of samples encountered in the Environment, Life Sciences, and Industry

CHEM 300 Undergraduate Research (1-6 Credit Hours)
Pre-requisites: Prior consultation with the instructor and a completed agreement form; Agreement forms for this directed study course are obtained from the department office, and the completed form (signed by the student, instructor, and chairperson) must be deposited in the chemistry office before the student can register for the course
This course gives undergraduate students an opportunity to participate in research in a selected area.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will accomplish the research task defined in the contractual arrangement between the student and the instructor

CHEM 300P Introduction to Chemistry Research (1 Credit Hour)
Pre-requisites: CHEM 101 and 111 (or CHEM 105)
This two week course will focus on issues of chemical safety, research protocols, data recording, and instrumentation use. Typical course meetings will involve in-class presentations, group discussions, and hands-on experience.
Outcomes:
Expose students to of essential and important issues of chemical safety, research protocols, data recording, and instrumentation use for students preparing for undergraduate and graduate chemistry research

CHEM 301 Physical Chemistry I (3 Credit Hours)
Pre-requisites: (CHEM 240 and CHEM 260) or CHEM 222 or CHEM 224; and MATH 162 or 263A; and PHYS 112 or 122
Lecture and discussion course covering principles and applications of thermodynamics and kinetic theory and emphasizing the laws of thermodynamics and statistical theory and their ramifications for equilibrium and non-equilibrium systems.
Outcomes:
Students will acquire fundamental knowledge of work, heat, their interconversions and the relationships between entropy, free energy and heat capacity

CHEM 302 Physical Chemistry II (3 Credit Hours)
Pre-requisites: (CHEM 240 and CHEM 260) or CHEM 222 or CHEM 224; and MATH 162 or 263A; and PHYS 112 or 122
Lecture and discussion course covering principles of quantum mechanics with the applications to chemical properties and spectroscopy of atoms and molecules.
Outcomes:
Students will acquire fundamental knowledge of the physical laws that govern chemical processes, and learn how to apply these laws to predict the structure and properties of chemical systems

CHEM 303 Physical Chemistry Lab I (2 Credit Hours)
Co-requisites: CHEM 302
Pre or This course covers principles and techniques of experimental physical chemistry including the practice of numerical data analysis, solid-state electronics, and vacuum technology along with their applications to magnetic resonance, high-resolution spectroscopy, and chemical thermodynamics. Outcome: Students will acquire broad-based knowledge of laboratory skills central to experimental physical chemistry.

CHEM 305 Physical Biochemistry for the Biological Sciences (3 Credit Hours)
Pre-requisites: (CHEM 240 and 260) or CHEM 222 or CHEM 224, and PHYS 112, and MATH 132 or equivalent; Restricted to Biochemistry and Forensic Science majors
Lecture course covering principles and biological applications of thermodynamics, kinetics, quantum mechanics and molecular spectroscopy.
Interdisciplinary Option: Forensic Science
Outcomes:
Students will learn how fundamental concepts in physical chemistry can be used to understand biological processes

CHEM 306 Physical Biochemistry Lab (1 Credit Hour)
Pre-requisites: CHEM 305
This laboratory course will introduce apparatus, and analysis used in experimental physical chemistry for biochemistry students.
Outcomes:
Students will acquire broad-based knowledge of laboratory skills central to biophysical chemistry

CHEM 307 Inorganic Chemistry (3 Credit Hours)
Pre-requisites: (CHEM 240 and CHEM 242 and CHEM 260) or CHEM 222 or (CHEM 224 and CHEM 226); Restricted to Biochemistry majors
Lecture course covering atomic structure, chemical bonding, and transition metal, solid state, organometallic and bioinorganic chemistry.
Outcomes:
Students will learn chemical principles in important areas of inorganic chemistry

CHEM 314 Instrumental Analysis (4 Credit Hours)
Pre-requisites: (CHEM 272 and CHEM 280) or (CHEM 212, CHEM 214, and (CHEM 222 or (CHEM 224 and CHEM 226); and PHYS 112 or PHYS 122; Restricted to Chemistry majors
This course discusses and demonstrates how instrumental techniques such as atomic spectroscopy, molecular spectroscopy, mass spectrometry and chemical separations can be used to identify the chemical composition of a sample. The hands-on approach will enable students to perform instrumental analysis independently.
Outcomes:
Students will be able to select the most suitable analytical method to identify a sample

CHEM 323 Medicinal Chemistry (3 Credit Hours)
Pre-requisites: CHEM 361 or CHEM 370
This course examines how medicinal chemists design and synthesize drug candidates to meet FDA requirements of efficacy and safety, and how a testing strategy measures efficacy vs. toxicity comprising the therapeutic index. Topics include drug-receptor/enzyme binding, PK, ADME, patenting of IP, and the ethical aspects of pharmaceuticals.
Outcomes:
Students will be able explain the strategy of drug candidate analog design, synthesis, binding and inhibition constants, drug testing strategies, pharmacokinetics, structure-activity relationships (SAR), and the therapeutic index of drugs

CHEM 340 Advanced Inorganic Chemistry (3 Credit Hours)
Pre-requisites: CHEM 302
Lecture course covering modern theories of atomic and molecular structure as applied to inorganic chemistry with discussion of acid-base theories, the chemistry, spectra and reaction mechanisms of coordination and organometallic compounds. Symmetry is used to develop molecular orbital diagrams, predict geometry, hybridization schemes and interpret electronic spectra.
Outcomes:
Students will learn chemical principles in these areas

CHEM 341 Advanced Inorganic Laboratory (1 Credit Hour)
Pre- or co-requisites: CHEM 340
A laboratory course illustrating topics and techniques used in modern inorganic chemistry; coordination and organometallic compounds are prepared and characterized by IR, UV-Vis and NMR spectroscopy, and magnetic susceptibility measurements. All experimental work is recorded in a laboratory notebook and includes a formal written report.
Outcomes:
Students will demonstrate success in lab by making perceptive qualitative observations and accurate quantitative measurements

CHEM 361 Principles of Biochemistry (3 Credit Hours)
Pre-requisites: CHEM 222 or CHEM 224 or (CHEM 240 pre-req and CHEM 260 co-req)
This course examines the structural' functional relationships in proteins, nucleic acids, carbohydrates and lipids as well as their metabolic pathways. CHEM 361 is cross-listed with BIOL 366. CHEM 361 may not count towards CHEM-BS, BIOC-BS, or BIOC-BA degrees. These students must take CHEM 370.
Interdisciplinary Option: Bioinformatics
Course equivalencies: X-BIOL366/BIOI366/CHEM361
Outcomes:
Students will be able to demonstrate an understanding of biological molecules and how they are metabolized

CHEM 365 Proteomics (3 Credit Hours)
Pre-requisites: CHEM 361 or CHEM 370
Proteomics describes and deciphers the protein structures that are the result of biochemical interactions encoded in a genome. To understand these processes, proteins have to be identified, sequenced, categorized, and classified with respect to their function and interaction in a protein network. This course will teach students how to characterize functional protein networks, examine their dynamic alteration during physiological and pathological processes. The course will also cover techniques to analyze and identify proteins using protein databases and study protein to protein interactions in the discover of drugs for diseases.
Interdisciplinary Option: Bioinformatics
Course equivalencies: CHEM365/BIOI386

CHEM 370 Biochemistry I (3 Credit Hours)
Pre-requisites: CHEM 222 or (CHEM 224 and CHEM 226) or (CHEM 240 and CHEM 242 pre-req, and CHEM 260 co-req); Restricted to Chemistry and Biochemistry majors
This is the first part of a two-semester Biochemistry series that emphasizes important biochemical concepts on the structure and function of proteins, enzymes, carbohydrates, lipids and cell membranes as well as on the bioenergetic and regulatory principles behind the central and carbohydrate pathways. Chemistry and Biochemistry majors must take CHEM 370. CHEM 361 may not count towards CHEM-BS, BIOC-BS, or BIOC-BA degrees.
Course equivalencies: X- CHEM 370/CHEM 470
Outcomes:
Students will be able to demonstrate an understanding of structural-functional relationships in biological molecules and how carbohydrates are metabolized

CHEM 371 Biochemistry II (3 Credit Hours)
Pre-requisites: CHEM 370
This is the second part of a two-semester Biochemistry lecture series that emphasizes important biochemical concepts on lipid, amino acid and nucleotide metabolic pathways as well as the structure and function of nucleic acids. Special topics on sensory systems, motility, immunology and drug development will also be discussed.
Outcomes:
Students will be able to demonstrate an understanding of metabolic pathways and of current research topics in biochemistry

CHEM 372 Biochemistry Laboratory I (2 Credit Hours)
Pre-requisites: CHEM 242 or CHEM 222 or CHEM 226; and (CHEM 260 and CHEM 272) or (CHEM 212 and CHEM 214); and CHEM 370; Restricted to Biochemistry majors
This laboratory is designed to simulate a research experience and to teach basic techniques utilized in a biochemistry laboratory. The course theme involves a comparative investigation of the enzyme glyceraidehyde-3-phosphate dehydrogenase (GAPDH) from various animal sources. All procedures required in lab will be found by the student in the library and proposed to the instructor(s) as a pre-lab exercise. Each two-student team will be working on GAPDH from either an aquatic or land animal source, e.g., trout, tuna, pork beef or chicken.
Outcomes:
Students will be able to purify and characterize an enzyme in a research context

CHEM 373 Biochemistry Laboratory II (2 Credit Hours)
This laboratory course is designed to simulate a research project in which molecular biology techniques and biochemistry are integrated. Those techniques are used as important tools to help solve questions in enzyme structure and function. he course theme involves an investigation on the relationship between protein structure and function of the ADP-glucose pyrophosphorylase (ADP-Glc PPase) from Escherichia coli. All procedure required in lab will be found by the student in the library and proposed to the instructor(s) as a pre-lab exercise. Each two-student team will be working on a specific ADP-Glc PPase that has been previously obtained in a recombinant form. Their genes will be provided in a plasmid form. The student will learn strategies to produce and test a hypothesis in this area. Additionally, the student will learn how to integrate molecular biology techniques and biochemistry.
Outcomes:
Students will study the basic concepts of enzyme structure relationships and how to investigate them

CHEM 380 Chemistry Seminar (1 Credit Hour)
Pre-requisites: CHEM 240 or CHEM 222 or CHEM 224
A weekly seminar course with presentations, generally given by outside speakers, covering topics in chemistry usually not encountered in the classroom.
Outcomes:
Students will demonstrate their understanding by writing a one page summary of each presentation

CHEM 385 Advanced Enzyme Kinetics and Mechanisms (3 Credit Hours)
Pre-requisites: CHEM 370
The major themes in this course will be topics that are related to modern enzymology. The structure of this course will involve lectures by Dr. Ballicora for each topic, and discussion with the students.
Outcomes:
Students will be able to understand enzyme mechanisms and be able to make oral presentations on recently published articles

CHEM 386 The Chemistry of Enzymes (3 Credit Hours)
Pre-requisites: CHEM 370, restricted to Biochemistry majors
The course describes the chemical strategies employed by enzymes to accelerate reactions combined with an examination of the specialized methods employed to study enzyme chemistry. The course is lecture based with concurrent problems sets. The course content will focus on deductive reasoning to understand what is observed how best analyze data obtained from the study of enzymes.
Outcomes:
Students will gain an understanding of transient state chemical kinetics as it pertains to the study of enzymes

CHEM 387 Plant Biochemistry (3 Credit Hours)
Pre-requisites: CHEM 370
The major themes in this course will be about topics that are related to plant biochemistry and metabolism. The structure of the course will involve lectures for each topic, with discussion with the students. Students will learn how plants and photosynthetic organisms acquire and process energy. Plant metabolism will constitute a central part of the course, focusing on the main differences from other living organisms. A solid understanding of plant metabolism will inspire the student to think about all the possibilities that plant biochemistry and biotechnology offer to solve critical problems, such as malnutrition, global climate change, drug discovery, and infectious diseases.
Outcomes:
Students will be able to understand how knowledge of plant biochemistry is important in many areas, including medicine, nutrition and climate change

CHEM 388 Biophysical Chemistry (3 Credit Hours)
Pre-requisites: CHEM 361 or 370
Survey of experimental methods for the physicochemical characterization of biomolecules. Topics include electrophoresis, mass spectrometry, calorimetry, optical spectroscopy, NMR, and X-ray crystallography.
Outcomes:
Students will have a conceptual understanding of different experimental methods for the physicochemical characterization of biomolecules and will be able to evaluate utility and limitations of the different approaches

CHEM 395 Special Topics in Chemistry (0-3 Credit Hours)
Pre-requisites: Satisfactory progress toward completion of the core chemistry courses, and junior or senior status
Course content varies from semester to semester and has included advanced topics in analytical, inorganic, organic, physical, and biochemistry.
Outcomes:
Students will acquire an advanced understanding of a selected topic in chemistry

CHEM 395B Bioethics Minor Capstone: Chemical Topics (3 Credit Hours)
Pre-requisites: Two Science courses and two Ethics courses
This course number will only be used when CHEM 395 is tagged with the Bioethics Minor Capstone course.
Interdisciplinary Option: Bioethics
Outcomes:
Students will understand the connection between ethical and chemical issues with regard to the special topic in chemistry

CHEM 396 Special Topics in Biochemistry (1-3 Credit Hours)
1) Course content varies from semester to semester and includes advanced topics in biochemistry. 2) Satisfactory progress toward completion of the core chemistry courses, and junior or senior status. 3) Students will acquire an advanced understanding of a selected topic in biochemistry.

CHEM 399 Internship in Biochemistry or Chemistry (2-3 Credit Hours)
A supervised field placement to give students training or work experience in aspects of biochemistry or chemistry that are not commonly available on campus. Students will work outside the classroom (e.g. industrial setting or national lab) applying and extending their biochemistry or chemistry skills, typically for at least 150 hours to receive 3 credits or for more than 100 hours for 2 credits. Permission of faculty advisor Students must complete a total of 3 credits to receive engaged learning credit. This course satisfies the Engaged Learning requirement.
Outcomes:
Students will acquire practical experience in biochemistry or chemistry related job settings

CHEM 400 Chemistry Seminar (1 Credit Hour)
This weekly seminar series on current topics in Chemistry is presented by experts from outside Loyola.

CHEM 401 Chemistry Methodology and Communication (3 Credit Hours)
Pre-requisites: Graduate Standing
This is the common preparatory course providing all chemistry graduate students with the necessary skills to navigate towards their respective degrees and success post-degree. Topics include: notebooks, design of experiment, safety, ethics, effective communication of science, conflict resolution, and professional conduct.
Outcomes:
Students are prepared with the soft skills and formal training in research methodology and compliance expectations expected of a graduate student and a professional chemist in a senior role

CHEM 415 Special Topics in Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester.

CHEM 420 Advanced Organic Chemistry I: Struct-Stereo (3 Credit Hours)
Important organic chemical concepts. Includes discussion of the stereochemistry of carbon, organic quantum mechanics, chemical kinetics and related mechanistic concepts, and an introduction to synthetic methodology.

CHEM 422 Advanced Organic Chemistry III: Mechanism (3 Credit Hours)
This is an intensive review of the more general types of organic chemical mechanisms, such as electrophilic and nucleophilic additions, substitution reactions, elimination processes, and hemolytic processes. The experimental approach to mechanisms is emphasized.

CHEM 423 Medicinal Chemistry (3 Credit Hours)
This course explores how medicinal chemists design and synthesize new drug candidates as well as the hurdles that must be overcome in meeting the FDA requirements of efficacy and safety on the road to market, emphasizing the therapeutic index that underscores the risk/benefit consideration of every drug.
Outcomes:
1) Explain risk/benefit of drugs in efficacy vs. toxicity and the therapeutic index/window; 2) Summarize interactions of drugs with receptors, enzymes, or nucleotides; 3) Analyze structure-activity relationships given potency data

CHEM 424 Molecular Characterization Part A (3 Credit Hours)
Pre-requisites: Graduate Students Only
This course will include a closer look at the theory and applications of several spectroscopic methods used for analysis of organic as well as inorganic compounds, including 1D and 2D methods employing 1H and 13C NMR, in addition to other elements; UV/Vis, combined with mass spectrometry.
Outcomes:
Students will be able to identify a compounds molecular structure based of spectroscopic means and understand the working principles behind those spectroscopies

CHEM 425 Special Topics in Organic Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. Some courses are: natural products, free radicals, molecular rearrangements, photochemistry, heteronuclear NMR, carbocyclic chemistry, medicinal chemistry, synthetic organic methodology, pericyclic reactions, heterocycles.

CHEM 429 Research in Organic Chemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 430 Physical Chemical Survey (3 Credit Hours)
Pre-requisites: calculus and undergraduate physical chemistry
Covers chemical thermodynamics, molecular structure and spectra, and chemical kinetics. It includes review and survey of some recent research.

CHEM 431 Chemical Thermodynamics (3 Credit Hours)
Pre-requisites: calculus and undergraduate physical chemistry
An extended study of the principles of the thermodynamic laws followed by applications to real and ideal systems of gases, liquids, and solids; partial molal properties; principles and applications of quantum statistical thermodynamics to gaseous equilibria

CHEM 433 Chemical Kinetics (3 Credit Hours)
Pre-requisites: calculus and undergraduate physical chemistry
Description of rates of chemical reactions and interpretations thereof; principal theories of bimolecular and unimolecular processes; chain reactions; development of absolute reaction rate theory and application to a number of chemical systems; potential energy surfaces; includes heterogeneous kinetics, solution phenomena, isotopic effects, flow systems, empirical kinetic relations.

CHEM 435 Special Topics in Physical Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. Some courses are NMR spectroscopy, photophysical processes, molecular spectroscopy, computational chemistry, molecular modeling, and spectroscopy of surfaces.

CHEM 436 Statistical Thermo Dynamics (3 Credit Hours)
Methods of classical and quantum statistical mechanics applied to thermodynamic problems; calculation of thermodynamic quantities from spectral data; properties of real gases; selected problems in the solid sate.

CHEM 437 Quantum Mechanics I (3 Credit Hours)
Pre-requisites: CHEM 302 or equivalent; strong courses in calculus and modern physical chemistry, and some knowledge of computer programming
A thorough introduction to elementary quantum chemistry: angular momentum, quantum mechanical operators, interaction of radiation with matter, the many-electron atom, introduction to matrix mechanics, approximate methods, SCF calculations, electronic structure of polyatomic molecules, recent molecular orbital calculations.

CHEM 438 Quantum Mechanics II (3 Credit Hours)
Pre-requisites: CHEM 437
This course is a continuation of CHEM 437, which is a thorough introduction to elementary quantum chemistry: angular momentum, quantum mechanical operators, interaction of radiation with matter, the many-electron atom, introduction to matrix mechanics, approximate methods, SCF calculations, electronic structure of polyatomic molecules, recent molecular orbital calculations.

CHEM 439 Research in Physical Chemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 441 Advanced Inorganic Chemistry (3 Credit Hours)
The important topics in inorganic and organometallic chemistry are surveyed.

CHEM 445 Special Topics in Inorganic Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. Some courses are organometallic chemistry and catalysis, bioinorganic chemistry, physical methods in inorganic chemistry, inorganic reaction mechanisms, non-metal chemistry, transition metal clusters and X-ray crystallography.

CHEM 449 Research in Inorganic Chemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 451 Chemical Methods of Analysis (3 Credit Hours)
Topics covered include the statistical evaluation of analytical results and sources of errors, sampling and significance of proper samples, optimization of experiments, review of acid-base theory, chelometry and its applications, theory of precipitation, oxidation and reduction reactions and applications.

CHEM 452 Electrochemistry (3 Credit Hours)
Fundamentals of electrochemistry, the application of electrochemical techniques and current literature.

CHEM 454 Analytical Separations (3 Credit Hours)
Topics include aspects of chromatography, partition, thin layer, gas and liquid chromatography, mass spectroscopy and other techniques.

CHEM 455 Special Topics in Analytical Chemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. This course may involve a lab. Some courses are analytical absorption and emission spectroscopy, electroanalytical methods, environmental chemistry, lasers in analytical spectroscopy, and mass spectroscopy.

CHEM 456 Analytical Spectroscopy (3 Credit Hours)
We will discuss photometric instrumentation, absorption, emission and fluorescence spectroscopy and types of analytical laser spectroscopy.

CHEM 459 Research in Analytical Chemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 460 Biophysical Chemistry (3 Credit Hours)
This class will cover the role of molecular interactions in determining the structure and reactivity of complex biological molecules. Modern experimental techniques are used in studying these interactions in biological systems.

CHEM 461 Biochemistry (3 Credit Hours)
The conformation, dynamics and biological activities of macromolecules, generation and storage of metabolic energy, and genetic information and biosynthesis will be discussed.

CHEM 465 Special Topics in Biochemistry (3 Credit Hours)
Specific titles and contents vary from semester to semester. Some courses are protein chemistry, sequence and 3D structure, magnetic resonance spectroscopy, protein crystallography, bio-inorganic chemistry, molecular biology, molecular dynamics of proteins, and current developments in biochemistry and related areas.

CHEM 469 Research in Biochemistry (1-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 470 Biochemistry I (3 Credit Hours)
Pre-requisites: Completion of undergraduate organic chemistry
This is the first part of a two-semester Biochemistry series that emphasizes important biochemical concepts on the structure and function of proteins, enzymes, carbohydrates, lipids and cell membranes as well as on the bioenergetic and regulatory principles behind the central and carbohydrate pathways.
Course equivalencies: X- CHEM 370/CHEM 470
Outcomes:
Students will be able to demonstrate and understanding of structural-functional relationships in biological molecules and how carbohydrates are metabolized

CHEM 479 Research in Chemical Education (1-9 Credit Hours)
Co-requisites: RMTD 400 and CIEP 229; This course is restricted to Chemistry Ph.D. students
Prerequisites or This course will count toward the research credits of those students seeking a Ph.D. degree with a focus on Chemical Education. It will examine the effects of numerous variables on the learning and teaching of chemical principles and skills.
Outcomes:
Students will be able to: *describe the primary theoretical underpinnings of the chemical education research field; *describe and apply methods for preparing research data collected for publication; *describe and apply methods for analyzing chemical education research projects & manuscripts

CHEM 480 Chemistry for Teachers I (3 Credit Hours)
This course focuses on aspects specific to the teaching and learning of chemistry at post- secondary levels. Geared towards graduate students, undergraduate seniors, or current educators who plan on instructing college students, it explores principles surrounding how people learn chemistry and how to align pedagogies and environments to optimize learning opportunities for students. Course activities and assignments are designed to initiate the building of an instructional portfolio to prepare enrolled students for potential academic careers.

CHEM 491 Laboratory Investigations in Chemistry C (1 Credit Hour)
A course designed for high school science teachers to help construct and create chemistry laboratories for students in the context of urban high schools. Students must be enrolled in one of the SOE's M.Ed. in science ed cohorts.
Outcomes:
Learning how to teach inquiry based science labs; learning how to create labs within the constraints of an urban school district

CHEM 497 Organic and Bio Chemistry for Teachers (3 Credit Hours)
Pre-requisites: Must be enrolled in M.Ed. in Chem Ed program
A course designed for urban high school teachers to enhance knowledge of chemistry and chemistry teachers.
Outcomes:
Increased chemistry content knowledge, ability to teach inquiry based chemistry

CHEM 500 Graduate Student Seminar (1 Credit Hour)
This gives students an opportunity to prepare and present a professional chemistry seminar for other professional chemists. The presenter is trained in organizing materials for the 500 Graduate Student Seminar (1)presentation and has the experience of conveying high level technical information to a friendly audience in preparation for subsequent professional presentations in the industrial, academic, and/or scientific meeting arena. The topics of the seminar should not be related to the student's research. The course should be taken at least once by all degree-seeking students.

CHEM 501 Directed Study (1-6 Credit Hours)
A special reading project is undertaken by qualified students and directed by a faculty member of the department with chairperson's approval.

CHEM 509 Doctoral Research (0-9 Credit Hours)
Laboratory. Specific content varies on consultation with a faculty sponsor.

CHEM 595 Thesis Supervision (1 Credit Hour)
The course is for master's degree candidates after completion of course requirements.

CHEM 600 Dissertation Supervision (1 Credit Hour)
The course is for Ph.D. degree candidates after completion of courses, cumulative examinations, and research tool requirements.

CHEM 605 Master's Study (1 Credit Hour)
This course is for MS students in the (up to two) intervening semesters between completing coursework/research credits and beginning their thesis supervision.

CHEM 610 Doctoral Study (1 Credit Hour)
This course is for PhD students in the intervening two semesters (pre-candidacy) between completing coursework/research credits and beginning their dissertation supervision.

Chinese (CHIN)

Discover, search, courses (p. 2661)!

CHIN 101 Chinese I (3 Credit Hours)
This is an introductory course in Modern Standard Chinese (Mandarin) for students with none or little prior experience in Chinese. This course introduces the four basic communicative skills in Chinese: listening, speaking, reading and writing, and emphasizes on conversation. They will be able to understand and respond to greetings, as well as talk about family members, time, hobbies and friends. They will learn nearly 200 characters.
Interdisciplinary Option: Asian Studies, Chinese Language & Culture
Course equivalencies: X-CHIN101/ASIAC01
Outcomes:
Students will achieve active control of Chinese sound system and writing system

CHIN 102 Chinese II (3 Credit Hours)
Pre-requisites: CHIN 101
CHIN 102 is a continuation of CHIN 101. Students will expand their knowledge of Chinese characters, vocabulary and grammar, improve their skills on listening, speaking, reading, and writing skills, and learn more cultural knowledge. Aside from dialogues, they will also read a short dairy and a letter. They will learn some 200 new characters.
Interdisciplinary Option: Asian Studies, Chinese Language & Culture
Course equivalencies: X-CHIN102/ASIAC02
Outcomes:
Students will be able to make appointments, talk about Chinese learning experience, school life, shopping, weather and transportation

CHIN 103 Chinese III (3 Credit Hours)
Pre-requisites: CHIN 102
CHIN 103 builds on the knowledge and skills gained in CHIN 101-CHIN 102. This course develops conversational skills by using fundamental grammatical patterns and vocabulary in functional contexts.
Interdisciplinary Option: Asian Studies, Chinese Language & Culture
Course equivalencies: X-CHIN103/ASIAC03
Outcomes:
Students will learn dialogues used in the contexts of dinning out, studying in library, asking directions, attending birthday party, seeing a doctor, and dating

CHIN 104 Chinese IV (3 Credit Hours)
Pre-requisites: CHIN 103
CHIN 104 is the continuation of CHIN 103. This course further extends students' knowledge of Chinese vocabulary and grammar, and improves their skills in listening, speaking, reading, and writing.
Interdisciplinary Option: Asian Studies, Chinese Language & Culture
Course equivalencies: X-CHIN104/ASIAC04
Outcomes:
Students will learn expressions in the contexts of renting an apartment, mailing a letter and traveling in both mainland China and Taiwan, talking about hometown and sports, and checking in at the airport

CHIN 190 Business Chinese I (3 Credit Hours)
Pre-requisites: CHIN 101
Business Chinese I is primarily intended for students who are interested in pursuing a career that may involve working in China or doing business with Chinese corporate partners. Examples of topics include meeting with a manager, being introduced to colleagues, and attending social events.
Interdisciplinary Option: Chinese Language & Culture
Outcomes:
1) An expanded vocabulary (500-600 characters in total); 2) deeper knowledge of Chinese grammar; and 3) a multi-faceted introduction to Chinese business culture

CHIN 191 Business Chinese II (3 Credit Hours)
As a follow-on course to Business Chinese I (CHIN 190), this course is primarily intended for students who are interested in pursuing a career that may involve working in China or doing business with Chinese corporate partners. In CHIN 191, all the topics are practical for a "real world" business environment, for instance, making an appointment, visiting a company, introducing production facilities and products, dining etiquette, and socializing with colleagues after work.
Outcomes:
Upon completion of Business Chinese II, the student should have 1) an expanded vocabulary frequently encountered in a business environment, 2) deeper knowledge of Chinese syntax (sentence patterns and habitual usages), morphology (character construction and combinations), and other aspects of grammar (eg, verb tense markers, positioning of prepositional phrases and adverbials), and 3) a multifaceted introduction to Chinese business culture

CHIN 250 Composition and Conversation (3 Credit Hours)
Pre-requisites: CHIN 104
This course focuses on different aspects of Chinese life and society, enhancing students' ability to understand Chinese culture and Chinese ways of socializing, thinking, lifestyle, etc.
Interdisciplinary Option: Chinese Language & Culture
Outcomes:
Students will increase their vocabulary and improve their ability to compose formal speech and carry on discussions

CHIN 251 Advanced Composition & Conversation (3 Credit Hours)
Pre-requisites: CHIN 250
This course focuses contemporary aspects of Chinese life and society.
Interdisciplinary Option: Chinese Language & Culture
Outcomes:
Students will increase their vocabulary and improve their ability to compose formal speech and carry on discussions

CHIN 252 Advanced Composition and Conversation II (3 Credit Hours)
Pre-requisites: Students must have completed CHIN 251 or equivalent
In this course students will further expand their vocabulary, acquire more-advanced grammatical structures and usage patterns, learn to communicate in Chinese both in the classroom and in social settings and deepen their understanding of Chinese culture.
Interdisciplinary Option: Chinese Language & Culture
Outcomes:
Students will be able to further enhance their listening, reading, speaking and writing skills as well as appreciate the cultural nuances of the Chinese language

CHIN 253 Advanced Composition and Conversation III (3 Credit Hours)
Pre-requisites: Students must have completed CHIN 252 or equivalent
In this course students will further expand their vocabulary, acquire more-advanced grammatical structures and usage patterns, learn to communicate in Chinese both in the classroom and in social settings and deepen their understanding of Chinese culture.
Interdisciplinary Option: Chinese Language & Culture
Outcomes:
Students will be able to further enhance their listening, reading, speaking and writing skills as well as appreciate the cultural nuances of the Chinese language

CHIN 395 Tutorial (1-6 Credit Hours)
This independent study course provides an opportunity to explore a topic of interest to the student related to Chinese language and culture under the guidance of a faculty member.

Classical Civilization (CLST)

Discover, search, courses (p. 2661)!

CLST 206 Art of Ancient Greece (3 Credit Hours)
This course is an introduction to the art of the ancient Greek world from the Bronze Age through the Hellenistic period (to c. 50 B.C.E.), focusing on major trends and developments in Classical Greek architecture, sculpture, pottery and painting through close study of individual examples.
Knowledge Area: Artistic Knowledge and Experience
Interdisciplinary Option: European Studies, Italian Studies
Course equivalencies: X-CLST206/FNAR336
Outcomes:
Students should be able to recognize and interpret selected examples of ancient Greek art, including painting, sculpture, architecture, and other types; they should be able to apply their art-critical and appreciation skills to other types of art

CLST 207 Art of the Roman World (3 Credit Hours)
This course is an introduction to the art of the Roman world from c. 3000 B.C.E. to c. the fifth century CE. It focuses on major trends and developments in Etruscan, Roman and later Greek art, including architecture, painting, mosaic, and sculpture through close study of individual examples.
Knowledge Area: Artistic Knowledge and Experience
Interdisciplinary Option: European Studies, Italian Studies
Course equivalencies: X-CLST207/FNAR337/ROST307
Outcomes:
Students should be able to recognize and be able to interpret selected examples of ancient Roman art, including painting, mosaic, sculpture, architecture, and other types; they will be able to apply their art-critical and appreciation skills to other types of art

CLST 241 Religions of Ancient Greece (3 Credit Hours)
This course examines the beliefs and practices in ancient Greek religion by studying the written, artistic, and archaeological evidence for their forms and functions and the environment in which they flourished.
Interdisciplinary Option: European Studies
Course equivalencies: CLST241/CLST371
Outcomes:
Students will be able to demonstrate understanding of ancient Greek religions

CLST 267 Medical and Scientific Terminology in Context (3 Credit Hours)
This course focuses on the ancient Greek and Latin roots of terminology relating to the sciences, specifically, medical science. The development and changes in the scientific paradigm are explored through readings in translation of a variety of ancient Greek and Roman thinkers.
Outcomes:
Students should be able to demonstrate knowledge and better understanding of the language of modern science

CLST 271 Classical Mythology (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
This course focuses on Greek and Roman literature involving myth and how ancient and modern peoples use traditional narratives, characters, images and conceptions to explore, explain, and experiment with ideas about themselves and their surroundings in their historical, social, cultural and intellectual contexts.
Knowledge Area: Tier 2 Literary Knowledge
Interdisciplinary Option: European Studies, Shakespeare Studies
Course equivalencies: CLST271/CLST271G
Outcomes:
Students should be able to demonstrate knowledge of the fundamental myths of the ancient Greek and Roman world, their language and possible meanings, and how myth reflected important collective and individual concerns, values, beliefs, and practices then, even as modern myth does now

CLST 271G Classical Mythology - Women/Gender Focus (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
This course examines Greek and Roman literature involving myth and how peoples use traditional narratives and characters to explain and experiment with ideas about themselves and their surroundings in their historical, social, cultural and intellectual contexts. CLST 271G focuses, within this field, on concerns of women's studies and gender studies.
Knowledge Area: Tier 2 Literary Knowledge
Interdisciplinary Option: European Studies, Shakespeare Studies, Women & Gender Studies
Course equivalencies: CLST271/CLST271G
Outcomes:
Students should be able to demonstrate knowledge of the fundamental myths of the ancient Greek and Roman world, their language and possible meanings, and how myth reflected important collective and individual concerns, values, beliefs, and practices then, even as modern myth does now

CLST 271R Classical Mythology - Rome Focus (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
This course focuses on Greek and (especially) Roman literature involving myth and how ancient and modern peoples use traditional narratives, characters, images and conceptions to explore, explain, and experiment with ideas about themselves and their surroundings in their historical, social, cultural and intellectual contexts. Students should be able to demonstrate knowledge of the fundamental myths of the ancient Greek and Roman world, their language and possible meanings, and how myth reflected important collective and individual concerns, values, beliefs, and practices then, even as modern myth does now.
Interdisciplinary Option: European Studies
Course equivalencies: CLST271/CLST271G
Outcomes:
Students will gain factual knowledge of the essential characters and basic narratives of the most important myths of ancient Greece and Rome; Students will gain a broader understanding and appreciation of intellectual and cultural activity through Classical myth as simultaneously fixed and mutable narrative, one which depends on unchanging elements as it is refracted through different genres, authors, and time periods; Students will gain basic knowledge of modern myth theory as well as awareness of both its broad categorization and the difficulty of a universal definition of myth; Students will be able to analyze and evaluate critically particular versions of myths in their cultural and historical context as well as in reference to other versions of the same stories from different contexts; Students will be able to interpret myths using modern myth theories and to recognize the use of myth as consciousness-raising in religious contexts; Students will learn to apply course material to improve thinking by contextualizing their own moral sensibilities and aesthetic preferences by comparing the archetypes of ancient myths with modern archetypes

CLST 272 Heroes & the Classical Epics (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
This course centers upon the epics of the ancient Mediterranean world, their nature and significance, and, especially, the concepts of heroes and heroism.
Knowledge Area: Tier 2 Literary Knowledge
Interdisciplinary Option: European Studies
Outcomes:
Students should be able to demonstrate knowledge of ancient epic as a literary genre, what heroes are and why they are featured in epics, and how epics began and evolved to reflect audiences and their social, cultural, political and other concerns, values (such as leadership) beliefs and practices

CLST 273 Classical Tragedy (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
This course introduces students to extant Greek tragic drama, especially through the works of Aeschylus, Sophocles and Euripides.
Knowledge Area: Tier 2 Literary Knowledge
Interdisciplinary Option: European Studies, Shakespeare Studies
Course equivalencies: CLST273/CLST273G
Outcomes:
Students should be able to demonstrate knowledge of plot, characters and themes in Greek drama; understanding of the historical, social and cultural conditions implicated with each work; comprehension of concerns and values contained in them, such as justice, and how these are mirrored in modern literature and drama

CLST 273G Classical Tragedy - Women/Gender Focus (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
This course introduces students to extant Greek tragic drama, especially through the works of Aeschylus, Sophocles and Euripides. CLST 273G focuses, within this field, on concerns of women's studies and gender studies.
Knowledge Area: Tier 2 Literary Knowledge
Interdisciplinary Option: European Studies, Shakespeare Studies, Women & Gender Studies
Course equivalencies: CLST273/CLST273G

CLST 274 World of Archaic Greece (3 Credit Hours)
Pre-requisites: HIST 101, HIST 102, HIST 103, HIST 104, or equivalent; please check requirements for declared majors/minors for exceptions
This course investigates the history, literature, art, culture and society of Archaic Greece (c. 750-480 B.C.E.), the precursor of Classical Greece and western civilization.
Knowledge Area: Tier 2 Historical Knowledge
Interdisciplinary Option: European Studies
Outcomes:
Students should be able to demonstrate knowledge about the significant political, cultural and social accomplishments, events, institutions, trends, questions, and concerns, and the major figures of the age

CLST 275 World of Classical Greece (3 Credit Hours)
Pre-requisites: HIST 101, HIST 102, HIST 103, HIST 104, or equivalent; please check requirements for declared majors/minors for exceptions
The course investigates the history, literature, art, culture and society of Classical Greece (c. 480 B.C.E. to c. 300 B.C.E.), the origin of so much that has impacted western civilization; its primary focus is Athens in the fifth and fourth centuries B.C.E.
Knowledge Area: Tier 2 Historical Knowledge
Interdisciplinary Option: European Studies, Shakespeare Studies
Outcomes:
Students should be able to demonstrate knowledge about the significant political, cultural and social accomplishments, events, institutions, trends, questions, concerns, and the major figures of the age

CLST 276 World of Classical Rome (3 Credit Hours)
Pre-requisites: HIST 101, HIST 102, HIST 103, HIST 104, or equivalent; please check requirements for declared majors/minors for exceptions
This course investigates the historical development of the Roman people through study of their history, politics, society and culture especially in the 1st centuries B.C.E. and C.E., the turning points of Republican and Imperial Rome.
Knowledge Area: Tier 2 Historical Knowledge
Interdisciplinary Option: European Studies, Italian Studies, Shakespeare Studies
Course equivalencies: CLST276/ROST276
Outcomes:
Students should be able to demonstrate knowledge about the significant political, cultural and social accomplishments, events, institutions, trends, questions, and concerns, and the major figures of the age

CLST 277 World of Late Antiquity (3 Credit Hours)
Pre-requisites: HIST 101, HIST 102, HIST 103, HIST 104, or equivalent; please check requirements for declared majors/minors for exceptions
This course investigates the historical development of the Roman Empire in the 3rd to 5th centuries C.E. when the Mediterranean basin and Europe re-evaluated their classical past and decisively set their course toward Medieval and later governmental, religious and cultural history.
Knowledge Area: Tier 2 Historical Knowledge
Interdisciplinary Option: European Studies, Italian Studies
Outcomes:
Students should be able to demonstrate knowledge about the significant political, cultural and social accomplishments, events, institutions, trends, questions, and concerns, and the major figures of the age

CLST 278 Experiencing Mesopotamia (3 Credit Hours)
This course introduces daily life in Ancient Mesopotamia. Students will become acquainted with the ways in which individuals experienced family, government, sports, art, and societal interaction in the "cradle of civilization."
Interdisciplinary Option: Middle East and Islamic World Studies
Outcomes:
Students will understand the emergence of certain aspects of daily life in the world's first civilizations and be able to contextualize these developments within the Mesopotamian political and social sphere

CLST 279 Classical Rhetoric (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
This course explores how ancient Greeks and Romans practiced and interrogated the 'craft of speech' (rhetorike techne), specifically persuasive speech, especially as it would be delivered in public settings.
Knowledge Area: Tier 2 Literary Knowledge
Outcomes:
Students will learn to assess the relationship of Classical rhetorical literature to the world that produced and used it

CLST 280 Romance Novel in Ancient World (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
This course introduces students to the ancient masterworks of Greek and Roman fiction in the form of the novel.
Knowledge Area: Tier 2 Literary Knowledge
Interdisciplinary Option: Shakespeare Studies
Outcomes:
Students should be able to appreciate and explain the ancient romance novel, including the components of structure, characterization, theme, narrative technique, style, and meaning

CLST 281 War and War Experience, Ancient and Modern (3 Credit Hours)
This course focuses upon the institution of war and its effects upon individuals, especially in ancient Greece and modern times.
Interdisciplinary Option: Peace, Justice, and Conflict Studies
This course satisfies the Engaged Learning requirement.
Outcomes:
Students should be able to understand better and demonstrate knowledge of the many levels of active and passive war experience, including participant/observer, combatant/non-combatant, and various groups in and out of war, ancient and modern

CLST 282 The Use & Abuse of Ancient History (3 Credit Hours)
This course will evaluate the ways in which ancient events, individuals, art, and literature have been recycled, manipulated, and (mis)understood by modern societies, particularly in political contexts. We will tackle an entire range of the (mis)uses of ancient history, including its recontextualization in the service of pseudoscience; generational racism; historical revisionism; partisan politics; and sensationalized fiction. However, the course material is not only concerned with a presentist approach; we will develop these issues within an historical continuum, examining also the ways in which censorship, revisionism, and (mis)appropriation was incorporated into ancient narratives about their own distant pasts. The nature of the course framework is such that the students will receive a wide-angled survey of the ancient world, moving through periods associated with Ancient Near Eastern empires, all the way to imperial Rome. The class will be lecture and discussion-based.
Outcomes:
Understand how history was imagined and contrived in the ancient world; Interpret in historical, political, and social contexts the ways in which both ancient and modern civilizations have (mis)appropriated ancient history and myth in multiple media; Identify the rationale for the adoption of ancient cultural history in the modern era; Discover and present additional examples of references to ancient history in modern media; Understand the concepts of historical revisionism and censorship, and be able to apply these approaches to modern contexts; Enhance their research and writing skills through several in-class and written exercises by learning to write in an argumentative style using primary sources from the ancient world, secondary sources written about ancient culture, and in-class discussions

CLST 283 Classical Comedy & Satire (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
In this course, students engage with great literary works of the ancient world that combine social criticism with humor.
Knowledge Area: Tier 2 Literary Knowledge
Interdisciplinary Option: Shakespeare Studies
Outcomes:
Students should be able to demonstrate knowledge of such authors as Aristophanes, Menander, Terence, and Petronius, and their works, including the components of plot, characters and themes in the main works of ancient comedy and satire; as well as understanding of the historical, social and cultural conditions implicated with each work

CLST 288 Greek Literature in Translation (3 Credit Hours)
Students study a selected range of masterworks in ancient Greek literature. (This is a special topics course.)
Outcomes:
Students should be able to demonstrate deeper knowledge and understanding of selected Greek literature and its possible interpretations

CLST 289 Latin Literature in Translation (3 Credit Hours)
Students study a selected range of masterworks in Latin literature. (This is a special topics course.)
Course equivalencies: X-CLST289/ROST289
Outcomes:
Students should be able to demonstrate deeper knowledge and understanding of selected Latin literature and its possible interpretations

CLST 295 Women in the Classical World (3 Credit Hours)
This course investigates the social roles available to women in the ancient Greek and Roman worlds, together with beliefs, behaviors, and cultural expressions supporting ancient Greek and Roman constructions of womanhood.
Interdisciplinary Option: Italian Studies, Women & Gender Studies
Course equivalencies: X-CLST295/WOST295/WSGS295
Outcomes:
Students should be able to identify and discuss distinctive Classical patterns of thought and behavior regarding women and gender

CLST 304 History of Ancient Philosophy (3 Credit Hours)
See PHIL 304: The History of Ancient Philosophy
Interdisciplinary Option: European Studies
Course equivalencies: X-PHIL304/CLST304

CLST 305 Ancient Political Thought (3 Credit Hours)
See Ancient Political Thought. (PLSC 304)

CLST 306 Science in Ancient Greece and Rome (3 Credit Hours)
This course will focus on the origins of scientific thought and the scientific method in the Classical world and broader Mediterranean. We will survey the attitudes of Greeks and Romans towards physics, biology, evolution, medicine, and animal behavior, and ask why science emerged in Greece and Rome in the first place.
Outcomes:
Students will learn about the history of ideas of nature, physics, biology, medicine, and animal behavior in Ancient Greece, Rome, and the broader Mediterranean

CLST 308 History of Rome to Constantine (3 Credit Hours)
See HIST 308A: Roman History to Constantine
Interdisciplinary Option: Catholic Studies, European Studies
Course equivalencies: X-CLST308/HIST308/ROST308

CLST 309 Greece to Alexander the Great (3 Credit Hours)
See HIST 307: Greece to Alexander the Great
Interdisciplinary Option: European Studies
Course equivalencies: X-CLST309/HIST307

CLST 315 Alexander & Hellenistic World (3 Credit Hours)
This course centers on the history, literature, art, culture and society of the Hellenistic world from 336 to c. 31 B.C.E. and assays the impact of Alexander the Great particularly in the eastern Mediterranean, the site of the kingdoms established by the successors of Alexander; a particular focus is Egypt and its capital, Alexandria.
Interdisciplinary Option: European Studies
Outcomes:
Students should be able to demonstrate knowledge about the significant political, cultural and social events, institutions, questions, and concerns, and the major figures of the age

CLST 316 Western Patristic Thought (3 Credit Hours)
This course centers on first-hand study of the leading voices of early Christianity in the western portion of the Roman Empire, from the first century C.E. to Augustine.
Interdisciplinary Option: European Studies
Course equivalencies: X-CLST316/THEO316
Outcomes:
Students should be able to demonstrate detailed knowledge about the western Church fathers, their works, and the impact of these upon the Church and its teachings

CLST 318 Transformations of Rome in Late Antiquity (3 Credit Hours)
This course focuses on the City of Rome itself from the third century up to the reign of Charlemagne. It demonstrates that this period was a time of gradual transformation and continuity. Both literary sources and the archaeology and epigraphy of the City shall be combined to show that barbarian invasions did not destroy the walls of Rome, and that the arrival of Christianity did not cause the fall of classical culture.
Interdisciplinary Option: European Studies, German Studies
Course equivalencies: HIST 339/CLST 318
Outcomes:
Students will be able to demonstrate an understanding of the working of historical mechanisms, evaluate and critically analyze this historical period

CLST 324 Shipwreck Archaeology (3 Credit Hours)
Students study how the technology of scuba diving combined with scientific archaeology has created a new discipline of shipwreck archaeology since the 1960s. They follow the history of the discipline and explore shipwrecks from Bronze Age Greece to nineteenth-century Chicago.
Course equivalencies: XHIST324MSTU330ANTH347CLST324
Outcomes:
Students understand the importance of vessels conserved at Skuldelev, Lake Nemi and Uluburun for tracing the development of commerce and technology among the Vikings, the Romans, and the Syro-Palestinians of the Levant; They synthesize the research and conclusions of nautical archaeologists worldwide and organize those findings for presentation to a broader public in the coherent and imaginative form of their own Museum

CLST 328 Pompeii and Herculaneum (3 Credit Hours)
The two best known Roman towns - Pompeii and Herculaneum - whose remains were preserved by the eruption of Mt. Vesuvius in 79 CE - will serve as a microcosm for understanding Roman society.
Interdisciplinary Option: European Studies
Course equivalencies: HIST328/CLST328/ANTH328
Outcomes:
Students will gain an understanding of how recent archaeological discoveries have changed our view of Pompeii and Herculaneum and learn to "read" such things as dining and bathing rituals, gladiator games, and public and private architecture to gain insight into the structures of Roman social and cultural life

CLST 334 Intro to Classical Archeology (3 Credit Hours)
This course focuses on the main explorations and achievements in the recovery of monuments of the ancient Greco-Roman world and on the methodologies involved with the recoveries.
Interdisciplinary Option: European Studies
Course equivalencies: X-ANTH334/CLST334
Outcomes:
Students should be able to recognize and interpret selected sites and monuments of the Greco-Roman world; They should be able to demonstrate knowledge of methodologies and the technical vocabulary of classical archaeology

CLST 334R Introduction to Classical Archaeology - Rome/Italy Focus (3 Credit Hours)
This course focuses on the main explorations and achievements in the recovery of monuments of the ancient Greco-Roman world, particularly in Rome and Italy, and on the methodologies involved with the recoveries.
Interdisciplinary Option: Italian Studies
Course equivalencies: X-ANTH334/CLST334
Outcomes:
Students should be able to recognize and interpret selected sites and monuments of the Greco-Roman world; They should be able to demonstrate knowledge of methodologies and the technical vocabulary of classical archaeology

CLST 340 Classical Arch-Greek Temples (3 Credit Hours)
This course centers on the art and architecture of selected ancient Greek temples and upon the methodologies involved with their study and understanding.
Course equivalencies: X-ANTH340/CLST340
Outcomes:
Students should be able to recognize and interpret selected Greek temples and demonstrate knowledge of the methodologies and technical vocabulary associated with them

CLST 342 Geography of The Ancient World (3 Credit Hours)
This course focuses on the history of, ideas relating to, and expressions about the geography of the ancient Greco-Roman world as a background for the study of the ancient Mediterranean world.
Outcomes:
Students should be able to demonstrate knowledge of the significant authors, texts, and concepts relating to ancient Mediterranean geography; They should be able to demonstrate good comprehension of technical terms associated with that geography

CLST 344 Ancient Greek and Roman Coins (3 Credit Hours)
This course centers on the numismatics of the ancient Mediterranean world and upon coins as sources for the history, art, epigraphy and mythology of ancient Greece and Rome.
Outcomes:
Students should be able to recognize, assess and interpret various types of Greek and Roman coins; They should be able to demonstrate good comprehension of technical terms associated with ancient Mediterranean numismatics

CLST 348 Introduction to Museum Studies (3 Credit Hours)
In collecting, preserving, interpreting, and presenting items of material cultures, as the 20th century recognized and reconsidered, museums function as mass-media, social "tracers" as well as "objects-subjects" for economic and political elaboration. This course introduces students to relevant concerns of objects, conceptualization and communication, scholarship, cultural property, and identity.
Outcomes:
Students will gain understanding of how museums conserve cultural artefacts, serve academic research, educate specialist and non-specialist audiences, and focus social energy in local and touristic communities

CLST 361 Roman Political Theory & Practice (3 Credit Hours)
This course investigates the history, scope, principles and components of ancient Roman political institutions from earliest times to that of Justinian., as well as the legal appurtenances of those constituents.
Interdisciplinary Option: European Studies, Sociolegal Studies
Course equivalencies: X-CLST361/ROST361
Outcomes:
Students should be able to explain constituents of Roman civil and legislative procedure, including assemblies, magistracies, courts, etc

CLST 362 Roman Law (3 Credit Hours)
This course investigates the history, scope, principles, and components of Roman civil and private law from the archaic period to Justinian's codification.
Interdisciplinary Option: European Studies, Sociolegal Studies
Course equivalencies: X-CLST362/PLSC371/ROST362
Outcomes:
Students should be able to explain Roman legal and civil procedure, including the legal concepts of property, the person, family law, and legal obligations and issues, including contracts, civil wrongs, etc

CLST 363 Law & Legislature-Ancient Greece (3 Credit Hours)
This course investigates the history, scope, principles and components of ancient Greek law and legislation from Homeric times through the Classical Period., especially in Classical Athens.
Interdisciplinary Option: European Studies, Sociolegal Studies
Outcomes:
Students should be able to explain Greek legal, civil and legislative procedure, including concepts of justice and due process, as well as legal issues such as inheritance, homicide, etc

CLST 373 Daily Life in Ancient Greece (3 Credit Hours)
This course constitutes an investigation of the lives of individuals amidst the societies of ancient Greece, including, among other topics, their involvement in religion, politics, education, and their gender-relations.
Interdisciplinary Option: European Studies
Outcomes:
Students should be able to demonstrate knowledge of what it was like to be alive and active in ancient Greece, what important issues and concerns affected the ancient Greeks and how these are to be compared and contrasted with their own life issues and concerns

CLST 374 Private Life of Ancient Romans (3 Credit Hours)
This course constitutes an investigation of the lives of individuals amidst the society of ancient Rome (and the Roman Empire), including, among other things, their involvements in religion, politics, education, and their gender-relations.
Interdisciplinary Option: European Studies
Course equivalencies: X-CLST374/ROST374
Outcomes:
Students should be able to demonstrate knowledge of what it was like to be alive and active in ancient Rome, what important issues and concerns affected the ancient Romans (and subjects of Rome) individually, and how these are to be compared and contrasted with their own life issues and concerns

CLST 375 Archaeology of Early Greece (3 Credit Hours)
This course surveys archaeological research in Greece covering the Paleolithic Age through the early Iron Age (c. 700 B.C.E.).
Course equivalencies: X-CLST375/ANTH375
Outcomes:
Students should be able to demonstrate knowledge of the main archaeological sites and their contents and the importance of archaeological material for reconstructing knowledge about the period; students should also be able to demonstrate knowledge of archaeological methodology and how evidence is gathered, classified and interpreted

CLST 376 Homeric Questions (3 Credit Hours)
Pre-requisites: CLST 272 is recommended
An advanced course in the Iliad and/or Odyssey enriched by study of Homeric scholarship from the time of Wolf's Prolegomena (1795) to the present day. Concentrations can include such key issues as "the Homeric question," the Parry-Lord theory, narratology, rhetorical criticism, and the psychiatric interpretations of Dr. Jonathan.
Outcomes:
Students will be able to place the Homeric poems into their historical and literary context

CLST 378 Sport in Ancient Greece & Rome (3 Credit Hours)
This course focuses on the practices of and attitudes toward athletics of the ancient Greeks and Romans.
Interdisciplinary Option: European Studies
Course equivalencies: X-CLST378/PHED202
Outcomes:
Students should be able to demonstrate knowledge about the educational, philosophical, and political significance of athletics from Homeric times through the Roman Empire; They should be able to assess and interpret written, artistic and archaeological evidence relating to ancient athletics

CLST 380 Research in Classical Studies (3 Credit Hours)
Students complete a semester-long research project on a topic in Classical Studies.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will improve research methods and produce a research paper that engages with both primary sources and secondary scholarship

CLST 381 Directed Study (1-3 Credit Hours)
This course is centered on extensive and in-depth study of a selected author or topic involving ancient Greece or Rome. (This is a special study course, carried on by students usually under the direction of a faculty member of the department.)
Outcomes:
Students should be able to demonstrate deeper understanding of the selected author or topic

CLST 382 Internship in Classical Studies (3 Credit Hours)
Students complete a semester-long internship (100 hours minimum) that builds on their training in Classical Studies.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will gain practical experience while applying theories and techniques gained from coursework

CLST 383 The Humanism of Antiquity I (3 Credit Hours)
This course centers on extensive readings of pertinent classical authors from Homer to Plato, tracing the evolution of aspects of human belief. (This is a capstone course for majors in Classical Studies.)
Interdisciplinary Option: European Studies
Outcomes:
Students should be able to demonstrate deeper understanding of the nature of the human individual and the relationship of the human person both to the material and spiritual world; They should be able to assess and interpret ancient Greek texts concerned with these issues and topics

CLST 384 The Humanism of Antiquity II (3 Credit Hours)
This course centers on extensive readings of pertinent classical authors from early Rome to the High Empire, tracing the evolution of aspects of human belief. (This is a capstone course for majors in Classical Studies.)
Interdisciplinary Option: European Studies
Outcomes:
Students should be able to demonstrate deeper understanding of the nature of the human individual and the relationship of the human person both to the material and spiritual world; They should be able to assess and interpret ancient Latin texts concerned with these issues and topics

CLST 385 Historical Classic Greek Literature to 200 A.D (3 Credit Hours)
This courses surveys important authors and works of Greek literature in a chronological and topical fashion from Homer to the Hellenistic period.
Interdisciplinary Option: European Studies
Outcomes:
Students should be able to demonstrate detailed knowledge of authors and works; they should be able to assess and interpret texts covered

CLST 386 History of Classical Roman Lit (3 Credit Hours)
This courses surveys important authors and works of Roman (i.e., Latin) literature in a chronological and topical fashion from the 2nd cent. B.C.E.
Interdisciplinary Option: European Studies
Course equivalencies: X-CLST386/ROST386
Outcomes:
Students should be able to demonstrate detailed knowledge of authors and works; they should be able to assess and interpret the texts covered

CLST 388 Classical Backgrounds I (3 Credit Hours)
This course explores various environments of Greek literature, art, religion, etc., or other aspects of Greek civilization. (This is a special topics course.)
Outcomes:
Students should be able to demonstrate deeper understanding of the nature of these environments or aspects

CLST 389 Classical Backgrounds II (3 Credit Hours)
This course explores various environments of Latin literature, Roman art, religion, etc., or other aspects of Roman civilization. (This is a special topics course.)
Outcomes:
Students should be able to demonstrate deeper understanding of the nature of these environments or aspects

CLST 390 Fieldwork Greek Sites/Museums (1-4 Credit Hours)
This course comprises a study Greek or Roman art, monuments, topography or other cultural or historical artifacts or areas of interest on site. This study is accomplished through illustrated lectures or (when on-site) on-site lectures. (This is a special topics course.)
Outcomes:
Students should be able to demonstrate detailed knowledge of the material remains of ancient Mediterranean civilizations and the cultures within them

CLST 391 Topics in Comp Literature (3 Credit Hours)
This course centers on a comparison of ancient Greek or Roman literature with literatures of other times and other cultures. (This is a special topics course.)
Course equivalencies: X-LITR391/CLST391/ENGL391
Outcomes:
Students should be able to demonstrate detailed knowledge of the authors and works chosen for it

CLST 392 Theories of Myth (3 Credit Hours)
This course surveys important theoretical models used to interpret the mythology of Classical Greece and Rome and other cultures.
Course equivalencies: X-CLST392/LITR392
Outcomes:
Students should be able to demonstrate a sophisticated understanding of different interpretive theories applicable to mythology, their advantages and limitations; They should be able to apply these theories and to demonstrate what learning may be derived from them

CLST 395 Topography of Rome (3 Credit Hours)
The subject of this course is the topography and monuments of ancient Rome, from the city's beginnings through the Republican and Imperial periods to the time of Constantine. This study is accomplished through illustrated lectures or (when taught in Rome) on-site lectures.
Interdisciplinary Option: European Studies
Course equivalencies: CLST395/ROST395
Outcomes:
Students should be able to demonstrate detailed knowledge of the history of the buildings and monuments of ancient Rome

CLST 499 Directed Study (1-3 Credit Hours)
This course frames extensive and in-depth study of a selected author or topic involving the ancient Mediterranean world, for graduate students to pursue under the direction of a faculty member of the department.
Outcomes:
Students will engage with current scholarship in the field of the investigation, and will demonstrate significant learning

CM/MH/AD Nursing (CMAN)

Discover, search, courses (p. 2661)!

CMAN 272 Mental Health Patterns (3 Credit Hours)
Co-requisites: CMAN 272L
This course is designed to prepare students in assisting persons (individuals, families, communities) to achieve and maintain optimal mental health.
Outcomes:
The student will be able to use critical thinking to apply knowledge from nursing and other disciplines in the care of persons with mental health disorders

CMAN 272L Mental Health Patterns: Lab (3 Credit Hours)
Co-requisites: Must also enroll in CMAN 272
This course is designed to prepare students in assisting persons (individuals, families, communities) to achieve and maintain optimal mental health.
Outcomes:
The student will be able to use critical thinking to apply knowledge from nursing and other disciplines in the care of persons with mental health disorders

CMAN 380 Community Health (3 Credit Hours)
Pre-requisites: Must have taken and passed MSN 277, MSN 277L, GNUR 294, and GNUR 290 with a C- or better; Must also enroll in CMAN 380L
Nursing and public health concepts provide theoretical basis for care of families, aggregates, and communities outside institutional settings. Role of community health nurses in caring for specific aggregates is described. Clinical experiences are provided for application of concepts and implementation of nursing interventions in a variety of community settings.
This course satisfies the Engaged Learning requirement.
Course equivalencies: CMAN380/CMAN380A/CMAN375

CMAN 380L Community Health: Lab (3 Credit Hours)
Must also enroll in CMAN 380.
This course satisfies the Engaged Learning requirement.
Course equivalencies: CMAN375L/CMAN380C/CMAN380L

CMAN 403 Health Care Delivery and Organization (3 Credit Hours)
This course provides a foundation for understanding the contribution of formal US healthcare services to the nation's health. Content includes how the healthcare system is structured, how care is organized, delivered, financed and regulated. Major challenges that impact healthcare cost, quality and access are examined with underpinnings of social justice and impact on communities served. Emphasis is placed on quality, patient safety and information technology as center pieces of the modern health care environment.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Distinguish the roles, functions and responsibilities of healthcare system components (ie, delivery, financing and regulation); 2) Analyze the interaction of social; political and economic forces shaping healthcare delivery and their impact on cost, quality and access; 3) Compare the organization of multiple healthcare delivery structures to the effectiveness of meeting population health needs; 4) Analyze factors influencing trends in healthcare quality and patient safety

CMAN 407 Population Health Informatics (3 Credit Hours)
This course focuses on informatics in health care, with an emphasis on information systems and the use of information technology (IT) applications to support population health. Basic epidemiologic concepts of health are addressed. The key concepts of feasibility, usability and adaptability are addressed. This course includes evaluation of IT applications for healthcare administration, clinical practice, research, and education.
Outcomes:
1) Apply principles of health care informatics for population health; 2) Apply basic concepts of epidemiology for population health; 3) Analyze the role of population health informatics in understanding data, information, & knowledge; 4) Apply population health informatics in surveillance, interoperability and big data contexts; 5) Evaluate quality in electronic health records, mobile applications, and personal health records; 6) Identify the economic value and potential for sustainability in population health technologies

CMAN 417 Nursing and Health Care Administration Practicum (1-6 Credit Hours)
The practicum course guides the student in a synthesis of content from nursing and related sciences and the application of this knowledge to the role of the nurse in leadership and management experiences. Emphasis will be placed on the student's clinical engagement in management initiatives requiring critical assessment, planning, intervention, and evaluation activities using theoretical models and management tools. Students in the practicum experience are expected to progress throughout the clinical practicum from requiring assistance to becoming primarily independent.
Outcomes:
1) Apply knowledge of selected concepts, models, and theories from nursing and management sciences to achieve high quality nursing care and effective healthcare team coordination in a variety of settings; 2) Apply knowledge of healthcare policy, finance and regulatory environments to identify clinical questions, implement safety initiatives, and monitor patient outcomes; 3) Incorporate effective communication techniques to deliver evidence-based, patient-centered care; 4) Analyze and evaluate healthcare organization structure, mission, and philosophy as they relate to the standards of care, staffing and performance, development and marketing of programs and projects; 5) Evaluate the use of information technology to improve patient care outcomes and create a safe care environment; 6) Apply legal, ethical principles to the nursing role of leadership and management

CMAN 425 Advanced Quality and Safety in Health Care (3 Credit Hours)
This course focuses on managing the continuum between safety and quality and the strategic importance of these concepts to healthcare organizations and clients. Trends in patient safety and healthcare quality, practices in different healthcare environments, and practices related to improving safety and quality will be examined. The course is designed to provide students with knowledge and skills in systems thinking and in preventing, learning from and resolving error and addressing adverse events. Interprofessional teamwork, the use of information technology and data are emphasized in promoting safer healthcare and improved outcomes.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Explain the forces driving the focus on safety and quality in health care; 2) Evaluate strategies for improving safety and quality in health care; 3) Explain the influence of systems (environmental, organizational, provider, technological and task) on healthcare outcomes; 4) Analyze the role of various systems and factors in creating safe environments of care; 5) Explain the impact of just culture thinking on safety and quality improvement in health care; 6) Develop a plan for improvement of a safety and/or quality issue

CMAN 428 Psychiatric Mental Health and Illness Across the Lifespan (3 Credit Hours)
This course focuses on knowledge and competencies to deliver holistic, evidence-based mental health care across diverse populations and clinical settings. Students will examine the biological, psychological, social, and spiritual dimensions of mental illness and psychiatric disorders throughout the lifespan. Emphasis is placed on therapeutic communication, psychopharmacology, trauma-informed care, crisis intervention, and collaborative treatment planning within interprofessional teams. Students will develop assessment skills, clinical reasoning, and self-reflexive competencies essential for providing person-centered psychiatric care that respects human dignity across the mental health-illness continuum.
Outcomes:
Apply knowledge of neurobiology, psychopathology, and developmental theories to conduct comprehensive psychiatric assessments and formulate evidence-based person-centered treatment plans; Analyze therapeutic communication techniques, trauma-informed care, and evidence-based psychotherapeutic interventions to develop therapeutic relationships and support care and recovery across the lifespan; Apply pharmacological principles and psychopharmacology evidence to evaluate medication management strategies, monitor treatment responses, and educate patients about psychotropic medications and side effects; Understand risk factors for self-harm, suicide, violence, and psychiatric emergencies to implement evidence-based crisis intervention strategies and maintain safe therapeutic environments; Recognize interprofessional mental health teams, community resources, and support systems to develop comprehensive, recovery-oriented treatment plans that address the holistic needs of individuals with mental illness and address stigma related to mental illness; Understand ethical principles, legal standards, and mental health policy to navigate complex mental health dilemmas including confidentiality, informed consent, involuntary treatment, equitable care, and capacity determination while respecting patient autonomy and rights

CMAN 428L Psychiatric Mental Health and Illness Across the Lifespan Clinical (2 Credit Hours)
This clinical course focuses on preparing students to care for persons experiencing mental illness. Using a biopsychosocial model, students will engage in direct patient care across the mental health-illness continuum, working with individuals, families, and groups experiencing acute and chronic psychiatric conditions. Clinical experiences include community mental health centers, inpatient hospitals, integrated behavioral health settings, and outpatient psychiatric services. Emphasis is placed on therapeutic communication, interdisciplinary collaboration, trauma-informed care, and addressing social determinants of mental health within community contexts. Students work to cultivate clinical judgment, cultural humility, and advocacy skills essential for person-centered mental health care.
Outcomes:
Perform comprehensive biopsychosocial-spiritual psychiatric assessments using standardized screening tools and diagnostic criteria to formulate clinical impressions and develop person-centered treatment plans; Integrate therapeutic communication with individuals experiencing mental illness using communication techniques, empathy, and presence to promote care; Implement evidence-based psychotherapeutic interventions, including cognitive-behavioral techniques, motivational interviewing, and psychoeducation, in inpatient and community settings; Apply crisis intervention competencies by conducting suicide and violence risk assessments, reviewing de-escalation strategies, and appropriate emergency responses that ensure patient and community safety; Collaborate with interprofessional team members, community organizations, and social service agencies to coordinate comprehensive mental illness services that address housing, employment, substance use, and other social risks, and apply clinical reasoning and pharmacological knowledge to provide patient education and person-centered care; Apply trauma-informed care principles and cultural humility into clinical practice and reflect on personal values, biases, and emotional responses in mental health clinical encounters to promote professional growth, maintain therapeutic boundaries, and practice self-care strategies that prevent burnout and compassion fatigue

CMAN 430 Leadership and Administration in Health Care (3 Credit Hours)
This course focuses on the integration of core knowledge in leadership, administration, human resources and communication in health care organizations. Special emphasis is placed on leadership styles, the roles of the leader, human resources management and communication. The course is designed to provide the student with knowledge to practice the leadership skills necessary to positively impact healthcare systems. Selected Topics May Include: Leadership theory and style and professional practice a) leader competencies b) Influencing behaviors c) Relationship management d) Culture e) Nimble flexibility f) Professional accountability g) Motivation for high performance h) Strategic leadership and tactical leadership (Administration vs management) Human resource management a) Communication b) Difficult conversations c) Conflict resolution d) Coaching e) Performance evaluation f) Onboarding Power politics a) Development and management of partnerships/relationships/networks b) Strategic negotiation c) Power.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Relate essential nurse leadership competencies for effective management in healthcare organizations; 2) Evaluate the impact of leadership styles on organizational culture and effectiveness; 3) Generate strategies to optimize human resource performance in healthcare settings; 4) Identify strategies to address interpersonal and intraorganizational conflict

CMAN 438 Population Based Public and Community Health (3 Credit Hours)
This course examines population health across local, national, and global contexts, emphasizing the social, environmental, political, and economic factors that influence health outcomes. Students explore public health systems, epidemiology, policy, technology, and community health settings to understand health disparities and promote health equity. Using evidence-based frameworks, students apply population health concepts through community assessment, health education planning, and role exploration to support health promotion, disease prevention, and emergency preparedness across diverse populations.
Outcomes:
Apply the nursing process in the care of individuals, families, communities, and systems; Analyze population health trends using epidemiological data, surveillance systems, and public health indicators to identify priority health issues; Evaluate the role of social determinants of health, policy, politics, technology, social media, and health communication strategies on health outcomes across diverse populations and settings; Evaluate the roles of community health nurses across varied practice settings and populations, integrating principles of cultural humility, health literacy, and public health preparedness; Conduct a comprehensive community assessment to identify strengths, risks, and health needs of a defined population or aggregate; Design an evidence-based community health education intervention that promotes health, prevents disease, and addresses identified population needs

CMAN 445 Health Care Outcomes (3 Credit Hours)
This course focuses on the theory and methods to measure and evaluate healthcare outcomes. Concepts of population health will guide the comparison and analysis of health outcomes and measures. Current political, legal, regulatory, and ethical issues will be explored as these relate to health outcomes. Interprofessional teamwork, the use of information technology and data are emphasized in promoting safer healthcare and improved outcomes.
Outcomes:
Upon successful completion of the course, the student will be able to: 1) Analyze the political, legal, regulatory, and ethical influences in the development and current status of outcomes management; 2) Apply methods and processes for improving outcomes; 3) Utilize data-driven decision making for health outcomes; 4) Develop leadership and interprofessional competence in analyzing healthcare outcomes; 5) Generate data-driven change strategies to improve health outcomes

CMAN 448 Program Planning and Marketing in Health Care (3 Credit Hours)
This course presents an integrated approach to strategic planning, program planning, and marketing in nursing and health care organizations. Key models, elements and processes associated with strategic planning are presented with an emphasis on the leadership role in leveraging information, environmental scanning, and competitive analysis. Theories, models, tools, and processes for program planning, implementation, and evaluation and the marketing of nursing and healthcare services are addressed. The integration of strategic planning, program planning, and marketing with the mission, goals, and objectives of organizations and services is emphasized. 6. Relate the strategic planning, program planning, and marketing processes to nursing leadership competencies.
Outcomes:
Upon successful completion of this course, the student will be able to: 1) Analyze models and theories of strategic planning, program planning, and marketing; 2) Explain the relation between organization mission, goals, and objectives and the strategic planning, program planning, and marketing processes; 3) Apply tools of strategic planning to an organization; 4) Create a comprehensive plan focused on the needs, design, implementation and evaluation of a program that derives from an organizational strategic plan; 5) Evaluate marketing strategies

CMAN 460 Health Care Policy (3 Credit Hours)
This course is designed to introduce key policy issues and processes in public policy development. The impact of health care policy on management and health system improvement is discussed. The student is provided with advanced policy knowledge, frameworks, and skills required to assume a leadership role in health care. Emphasis is placed on using evidence to develop an understanding of the effect of health care policy on practice.
Outcomes:
1) Identify key policy issues in contemporary health systems; 2) Analyze the effect of health policy on practice; 3) Analyze strategies for health system improvement through public policy; 4) Advocate for policy adoption to a health care decision maker; 5) Identify the effects of government regulation on education and practice

CMAN 533 Fiscal Management in Health Care Organizations (3 Credit Hours)
This course prepares the graduate student to develop a framework for understanding key issues in financial management in health care from two perspectives. First, the course explores the relationship between the national economic environment and the financial context for current models of health care delivery. Second the course introduces a variety of fiscal concepts and techniques as applied to nursing and healthcare administration. Emphasis is placed on the way cost data influences operational decision making in healthcare administrative practice.
Course equivalencies: X-IPS 658/CMAN 533/BEHL 506
Outcomes:
Upon successful completion of the course, the student will: 1) Analyze the impact of political, social and economic factors on the cost of patient care delivery; 2) Examine cost behavior concepts as they relate to nursing and other health care models in healthcare organizations; 3) Apply cost accounting techniques in health care; 4) Analyze ethical and legal issues surrounding fiscal management

CMAN 569 Comparative Effective Research in Healthcare (3 Credit Hours)
Pre-requisites: GNUR 450 or equivalent required; CMAN 439 and 440 recommended
Comparative effective research (CER) is a central tenet of health care reform. This course offers an overview of policy implications and rationale for CER and explores different approaches of developing, analyzing and communicating CER. Research comparing the clinical and economic merits of different treatments, devices and procedures will be explored.
Outcomes:
Apply political, social and ethical perspectives to uses of CER, Demonstrate effective retrieval of CER reviews from public sources, Demonstrate knowledge of major CER methods and tools, Evaluate quality of evidence from CER reports, Assess treatment options in defined patient population

College Writing Seminar (UCWR)

Discover, search, courses (p. 2661)!

UCWR 109 University Core Writing Seminar: Writing Responsibly Writing Lab (6 Credit Hours)
Writing Lab for UCWR 110 Writing Responsibly. This workshop-based course supports the academic writing students are working on in UCWR 110. Will cover steps of brainstorming, peer review, revision, and final editing in order to articulate, organize, and support positions. The course will promote grammatical, compositional, methodological, and rhetorical skills in service of effective communication. Enrollment Conditions: Students placed in this course by WPA score of 109/110.
Knowledge Area: Writing Seminar
Course equivalencies: ACWRI 110 / UCWR 110 / UCWR109
Outcomes:
Students will develop writing strategies including generating ideas, peer review, and revision; They will gain a fuller understanding of grammar, compositional, and rhetorical skills and how these benefit their success in the core UCWR 110 Writing Responsibly course

UCWR 110 Writing Responsibly (3 Credit Hours)
Writing Responsibly instructs students in the conventions of academic writing. Students will develop flexible strategies for generating, revising, and editing their writing and will receive instruction in how to write clear, error free prose. Students will learn responsibility to their readers, responsibility to their sources, and responsibility to themselves as writers.
Knowledge Area: Writing Seminar
Course equivalencies: ACWRI 110 / UCWR 110 / UCWR109
Outcomes:
Use writing and reading for inquiry, learning, and communicating; Understand a writing assignment as a series of tasks, including finding, evaluating, analyzing, and synthesizing appropriate primary and secondary sources to clearly formulate a claim; Respond appropriately to different audiences and different rhetorical situations; Develop strategies for generating, revising, editing, and proofreading; Understand writing as an open process that permits writers to use later invention and re-thinking to revise work; Use standard written English clearly and effectively

Communication (COMM)

Discover, search, courses (p. 2661)!

COMM 100 SOC Career Prep Seminar (1 Credit Hour)
This is a professional development course to help students expand their knowledge of communication fields and to begin career preparation for those fields.
Outcomes:
Develop and polish professional communication tools (resume, cover letters, LinkedIn, etc); prepare for professional interactions (interviews, etc); and make connections within the SOC and beyond

COMM 101 Public Speaking & Critical Thinking (3 Credit Hours)
Pre-requisites: Student can only take one of the following: ACCOM 101, ACCOM 103, COMM 101, COMM 103
This introductory course is designed to supply students with the skills of public address, a fundamental understanding of critical thinking practices, foundational tenets of communication theory, a grasp of the relationship between context and communication, and a sense of the social responsibility that comes with the capacity for communication.
Interdisciplinary Option: Forensic Science
Course equivalencies: ACCOM 101/103 COMM 101/103
Outcomes:
Students gain skills in public speaking and an understanding of critical thinking

COMM 103 Business & Professional Speaking (3 Credit Hours)
Pre-requisites: Student can only take one of the following: ACCOM 101, ACCOM 103, COMM 101, COMM 103, Restricted to Quinlan School of Business Students
This class examines the theory and practice of audience analysis, message design, and oral presentation for professional speakers, with an emphasis on communication in organizational settings.
Course equivalencies: ACCOM 101/103 COMM 101/103
Outcomes:
Students will demonstrate presentation skills in simulated organizational settings

COMM 130 Intro to Audio Production (3 Credit Hours)
This class offers a study of basic audio production methods across new media platforms. Topics include acoustics, recording methods, digital editing, and sound as an industry and art form.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-COMM130/ICVM238/IFMS238
Outcomes:
Students will produce creative projects using the skills they have learned

COMM 135 Intro to Video Production (3 Credit Hours)
This course is a hands-on introduction to video field production. By designing and executing a series of short, creative production projects of varied forms, students explore how video techniques are used to structure meaning in media messages.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-COMM135/ICVM235IFMS235
Outcomes:
Student will be able to demonstrate an understanding of basic video production skills, such as preproduction planning, lighting, filming and editing, by producing several video texts

COMM 140 Intercollegiate Debate (1 Credit Hour)
This course offers students active participation in Loyola Debating Society. A maximum of six hours in intercollegiate debate credit allowed.
Outcomes:
Students will gain experience in debate

COMM 145 Video for Journalists (3 Credit Hours)
Pre-requisites: MJRN majors and minors may enroll, as well as EVCM minors
Entry-level course that will serve as an introduction to basic video/audio journalism. The goal of the course is for the student to develop the ability to capture great video images and audio, and to be able to edit those two elements together to tell a non-fiction video story. For MJRN majors and minors only An understanding of how to operate a video camera; how to capture/edit video; how to tell a journalistic story with video, and the differences between journalistic videos and fictional videos.
Course equivalencies: X-COMM135/ICVM235IFMS235
Outcomes:
An understanding of how to operate a video camera; how to capture/edit video; how to tell a journalistic story with video, and the differences between journalistic videos and fictional videos

COMM 175 Introduction to Communication (3 Credit Hours)
This course gives a general historical and theoretical overview of communication. By looking at communication through a critical, historical, and theoretical lens, students will acquire an intellectual framework for further study and practice in communication.
Course equivalencies: ACCOM 201 / COMM 175
Outcomes:
Students will increase communication literacy

COMM 200 Digital Communication and Society (3 Credit Hours)
Pre-requisites: COMM 175 or COMM 201
This course explores the ways technology affects personal, cultural, and mass communication through examining the historical, societal, and ethical implications of newer and interactive forms of media.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X - COMM / ACCOM 200
Outcomes:
Students use audio, video, and digital tools to research and produce essays, projects, and presentations that analyze the impact of technology on communication

COMM 201 Media Theory and Criticism (3 Credit Hours)
This course is an introduction to the study of traditional mass media and new media from a critical and interpretive perspective. Students taking the course should be able to understand and apply textual analysis methods to specific media texts, such as films, TV shows or videogames.
Course equivalencies: X-IFMS201/COMM201
Outcomes:
This course reviews semiotics and other methods of textual analysis of media

COMM 202 Story for Film and Television (3 Credit Hours)
Pre-requisites: COMM 274
An introduction to visual writing, story structure and character development for film and TV. Through in-class exercises, analysis of scripts, and assignments focused on storytelling fundamentals, students will learn what makes a compelling concept, where great ideas come from, and effective ways to build a narrative for the screen.
Outcomes:
Story will: write pitches, synopses, loglines and titles for the screen; create original characters; learn 3-act storytelling structure; develop original story treatments, outlines and pitches for film, TV or webseries

COMM 203 Topics in Cinema History (3 Credit Hours)
The course examines the aesthetic, social, technical, and theoretical evolution of cinema offered as specific topics that include, but are not limited to: war and revolution, social history and cinema, the role of women, Indian cinema, musicals, technology and style, and the realistic impulse.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-COMM203/ICVM260IFMS260
Outcomes:
Students are offered a variety of topics, broadening their view of the film industry

COMM 204 Community as Story (3 Credit Hours)
This course uses children's literature as a means of understanding urban community and individual identities within that community. Students will though, community service, interaction with local experts and ethnographic research, explore communities surrounding Loyola's lake shore campus and create their own children's picture books in collaboration with experienced student artists.
This course satisfies the Engaged Learning requirement.

COMM 205 Reporting Basics I: Writing and Interviewing (3 Credit Hours)
Pre-requisites: UCWR 110 with a grade of C- or higher
This course examines current issues in US journalism with strong emphasis on developing skills in news reporting, interviewing, and writing.
Outcomes:
News judgment; Writing concisely and clearly; Writing on deadline; AP style; Interviewing techniques; Grammar, spelling, and punctuation; Ethics and legal issues; Basic research methods

COMM 206 Hip Hop Culture and Social Change (3 Credit Hours)
Pre-requisites: COMM 175 or 201
Grounded in Black studies, communication studies, critical cultural studies, political advocacy, popular culture, and the growing field of hip hop studies, we will investigate hip hop's evolving relationship with social change in the U.S. and beyond. Particular attention will be paid to Chicago's hip hop scene and its community building.
Outcomes:
1) Gaining a basic understanding of the subject; 2) Developing knowledge and understanding of diverse perspectives, global awareness, or other cultures; 3) Gaining a broader understanding and appreciation of intellectual/cultural activity (music, etc)

COMM 207 Photojournalism (3 Credit Hours)
Pre-requisites: COMM 205
Photojournalism introduces students to the art of photographic storytelling.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Outcomes:
Students learn to distinguish journalistic photography from self-expressive photography through editing, critique, and digital manipulation and also understand the ethics of photojournalism through graphic concepts and page design

COMM 208 Reporting Basics II: Technology for Journalists (3 Credit Hours)
Pre-requisites: COMM 175 and COMM 205
This course teaches 21st century journalism skills and how to use the equipment and software to report and edit across platforms, including radio, television, and the Internet. Instruction will include how to use audio and video recording equipment, basic Web design, use of audio and video editing software, blogging, and social media programs.
Outcomes:
News judgment; Writing concisely and clearly; Writing on deadline: AP style; Interviewing techniques; Grammar, spelling, and punctuation; Ethics and legal issues; Basic research methods

COMM 210 Principles of Public Relations (3 Credit Hours)
Pre-requisites: COMM 175; Prerequisites waived for PCOM and EVCM minors
This course introduces the theory and practice of public relations in communicating and establishing relationships with diverse publics. Topics include professional roles and ethical responsibilities, strategies and tools, media resources, and public relations writing.
Outcomes:
Students will be able to demonstrate an understanding of the roles and practices of the public relations professional, develop PR plans, and create a portfolio or writing samples

COMM 211 Principles of Advertising (3 Credit Hours)
Pre-requisites: COMM 175; Prerequisites waived for PCOM and EVCM minors
This course provides an overview of the theory and hands-on practice of advertising including planning, strategy, creative development, and media planning. Elements of direct response, promotion, internet, and public relations are also presented.
Outcomes:
Students will be able to demonstrate an understanding of the principles of advertising and practice creative and decision-making skills in developing an advertising campaign

COMM 212 International Advertising (3 Credit Hours)
This course will build an understanding of the cultural, language, social, national and business factors that drive international markets. A key outcome is to broaden student perspectives on how organizations communicate with Italian and other European audiences.
Interdisciplinary Option: Global Studies

COMM 213 Digital Foundations (3 Credit Hours)
Pre-requisites: COMM 175 or 201; EVCM minors are waived from pre-requisite
Students will be introduced to digital media tools, including online content creation, SEO, website management, email marketing, social media engagement, digital advertising, analytics and emerging technologies that are used to create and build integrated digital campaigns for advertising and public relations.
Outcomes:
Ability to demonstrate elementary knowledge of digital communication tools; Practical understanding and capabilities for creating content across a wide range of media platforms; Knowledge of digital media platform technical requirements

COMM 214 Creative Concepts (3 Credit Hours)
Pre-requisites: COMM 211
This course introduces students to the creative process and idea generating techniques. Students explore what constitutes strong advertising concepts through exposure to award-winning ads and work in teams to create ads for assigned products.
Outcomes:
The emphasis is on conceptual development with students expected to express their ideas in rough rather than tightly finished layouts; The course focuses on print advertising but also provides opportunities to work across various other media

COMM 215 Ethics & Communication (3 Credit Hours)
Pre-requisites: COMM 175
COMM 215 does not meet Core Ethics. This course explores various approaches to ethical decision-making and applies that process to diverse aspects of every day, contemporary life.
Outcomes:
Students learn to discern a wide variety of ethical issues concerning communication behavior, apply systematic ethical analysis to various communication situations, and clearly explain their analyses

COMM 220 Introduction to Rhetoric (3 Credit Hours)
Pre-requisites: COMM 175
This course introduces theories of rhetoric, emphasizing the relevance of classical disputes for understanding current controversies over the nature and function of discourse. A central theme is the tension between rhetoric's promise for constructing a rich and meaningful civic life and the dangers of its descent into demagoguery and irrationality.
Course equivalencies: ACENG 220 / COMM 220
Outcomes:
Students will work through theoretical issues by examining speeches, films, and other rhetorical artifacts

COMM 226 Public Interest Communication (3 Credit Hours)
Pre-requisites: COMM 175
This course introduces students to the field of public interest communication--an evidence-based, interdisciplinary approach to using strategic communication for social good. Drawing from research and practice in communication, psychology, political science, and systems thinking, students learn how communication can shape public understanding, influence behavior, and support collective action. Through theory, case studies, and applied assignments, students develop skills in audience analysis, message design, and campaign evaluation while considering ethical implications and real-world applications in areas such as nonprofit advocacy, journalism, and corporate responsibility.\\n
Outcomes:
Describe and analyze the key components of public interest communication; Assess the effectiveness of at least one public interest campaign using appropriate theoretical and methodological frameworks; Design a strategic, public interest communication campaign plan that includes clear goals, target audiences, strategies, timelines, ethical implications and evaluation metrics

COMM 227 Social Justice and Public Communication (3 Credit Hours)
Pre-requisites: COMM 175, Prerequisites waived for Environmental Communication minors
This course examines the implications of communication processes and practices for democracy and social justice.
Interdisciplinary Option: Peace, Justice, and Conflict Studies
Outcomes:
Students will be able to articulate and defend their conception of the role of communication in achieving a just society and demonstrate an understanding of how existing communication institutions, laws, and norms impede or assist movement towards that goal

COMM 230 Argumentation & Advocacy (3 Credit Hours)
Pre-requisites: COMM 175; Prerequisites waived for PCOM minors
This course is an introduction to analyzing and critiquing arguments, and inventing extended arguments to advocate positions.
Outcomes:
Students will be able to analyze and critique both individual arguments and extended cases; demonstrate understanding of the relationship of argumentation to audience and context; and invent arguments and develop cases for advocacy

COMM 231 Conflict Management and Communication (3 Credit Hours)
Pre-requisites: COMM 175; Prerequisites waived for Professional Communication minors
This course explores the role of communication in conflict resolution. Special attention is paid to mediation and other forms of alternative dispute resolution.
Interdisciplinary Option: Peace, Justice, and Conflict Studies
Outcomes:
Students will acquire methods of analyzing the nature of conflict and applying appropriate communicative strategies for managing conflict

COMM 232 Cinematography I (3 Credit Hours)
Pre-requisites: COMM 135 and COMM 274
In this course, students will demonstrate their ability to apply aesthetic and theoretical principles and cinema production skills. Topics include pre-visualizations, preproduction planning, digital cameras system, cinematography, and lighting. Students work on individual and group projects involving project development, filming, and editing.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-COMM232/ICVM232/IFMS232
Outcomes:
Students will demonstrate deliberate control over cinematographic aesthetics, camera systems, production process and set protocols, lighting equipment, safety, and visual storytelling; Students will demonstrate an understanding of ethical issues related to the emotional, psychological, and spatial effects of imagery, and the role that lenses, lighting, and composition plays in conveying ideas; Students will engage in collaborative problem-solving and learn proper set protocols for the safe, efficient, and responsible execution of moving image production

COMM 234 Interviewing for Communication (3 Credit Hours)
Pre-requisites: COMM 175 or COMM 201; Prerequisites waived for PCOM minors
This course explores the crucial skill of interviewing necessary for many aspects of professional and daily life. Students will learn different ways of interviewing depending on communication context.
Outcomes:
These approaches will enhance students' interviewing ethics as they gain practical experience

COMM 236 Persuasive Presentations (3 Credit Hours)
Pre-requisites: COMM 220, COMM 230, or COMM 268; Prerequisites waived for Environmental Communication minors
This class focuses on the creation and delivery of persuasive messages to develop a variety of persuasive strategies and implement them in both individual and group presentations.
Outcomes:
Students engage in situation analysis and message critique

COMM 237 Small Group Communication (3 Credit Hours)
Pre-requisites: COMM 175; Prerequisites waived for PCOM minors
This class is an introduction to theory, research, and practice of communication that contribute to effective task-group discussion and decision making.
Outcomes:
The development of personal leadership skills and observational/analytic skills through guided, structured group activities

COMM 239 Moving China (3 Credit Hours)
This course offers a unique opportunity to film and document China as it changes virtually before our eyes.
Interdisciplinary Option: Asian Studies, Film & Digital Media Studies, Global Studies, International Film & Media Studies
Outcomes:
Students will have an intimate knowledge of China and Chinese culture and the talent and skill to produce a 15-minute documentary video in digital format

COMM 240 Communication Research Design (3 Credit Hours)
Pre-requisites: COMM 175
Introduction to research design with a focus on public communication and real-world ethical application, designed for undergraduate students from a range of disciplines. The course will review qualitative and quantitative approaches to inquiry and apply these approaches to social and communication problems. Students will learn how to structure research projects, collect and analyze data, and critically reflect on the relationship between research questions and the methods we use to answer them. No prior experience with research methods is required.
Outcomes:
Describe the key components of a research design, including the problem statement, research questions, methodology, and data collection strategy; Evaluate at least two published research studies, identifying strengths and limitations in their design choices and analyzing how those choices affect interpretation of results; Develop and present a proposal for a small-scale research study that includes a clearly defined research question, identification of key variables, justification of selected methods, and a detailed data collection plan

COMM 241 Digital Platforms (3 Credit Hours)
Pre-requisites: COMM 175
This course explores the digital platforms that shape our everyday lives--from social media and search engines to shopping and streaming services. Students will examine how platforms operate as invisible infrastructures that organize communication, commerce, and culture, drawing on scholarship about their political and social impact. Through research, discussion, and a final project, students will critically analyze how platforms influence our behaviors--and how they, in turn, understand us.
Outcomes:
Analyze the historical development and social functions of major digital platforms\\n; Evaluate platform governance that shape user experience and media ecosystems; Interpret and apply key scholarly arguments about platform politics, labor, and participation; Produce a research-driven project centered on platforms' social, cultural, and economic importance

COMM 242 Rambler Sports Locker (3 Credit Hours)
Pre-requisites: SPRT 130 or COMM 175, Students must apply to enroll; SoC will enroll
The School of Communication offers students the opportunity to engage in real-world media opportunities via Rambler Sports Locker. RSL provides Sports Media students with the opportunity to earn credit and produce professional, publishable work. Students must get permission to enroll in the course. Students are required to apply to the activity during the prior semester. Students will be vetted for GPA and reporting plan, which should be included in the enrollment submission form. If accepted, the student will be enrolled in the course. Students enrolled in RSL for credit will be held to tight deadlines and standards embedded in the current organization. As these groups are student-run cocurricular activities, enrolled students will be expected to work within the rules and hierarchies of the organizations.
Outcomes:
Write compelling and professional scripts and narratives; Perfect broadcast delivery & persona; Work in a team-setting; Meet tight deadlines; Conduct insightful and meaningful interviews; Utilize industry-standard equipment and software to produce news stories

COMM 243 Leadership and Social Change in Sports (3 Credit Hours)
Pre-requisites: COMM 175
This course explores the historical and rhetorical means by which sports leaders influence the policies, practices, and performances affecting members of sports teams, communities, news, and social media. The focus is on controversies, speeches, interviews, and social media posts. This course will use sports as an entry point to discuss historical movements, leadership, advocacy, ethics, and social justice. Students will explore activism, advocacy, political and social movements, and awareness of athletes, sports leaders, and sport personalities throughout time in a variety of mediums, discussions, and activities.
Outcomes:
Develop a personal and professional leadership plan and identity; Deliver effective persuasive and informative speaking presentations; Produce professional and academic written assignments; Understand the intersection of sports and social justice; Understand the intersection of positionality and leadership; Produce creative content to deliver multimedia messages; Advance knowledge around sports, culture, and history

COMM 244 Sports Analytics & Visualization (3 Credit Hours)
Pre-requisites: SPRT 130 or COMM 265
This course will examine the importance of numbers in the world of sports and computer-generated visualizations. Students will use contemporary tools to organize, scrape, clean, and present data in a way that synthesizes numerical information and packages it in a way that a general audience can consume. Students will delve into player, team, and league stats as well as the numbers around the business of sports and how to use data as a sports reporting tool.
Outcomes:
Locate accurate, primary data from open sources; Utilize computer languages to analyze sports data; Synthesize and interrogate data to tell a story; Produce striking designs to visualize data; Marry writing with numbers in journalistic reporting; Produce publishable news packages that lead with data and visuals

COMM 245 Sports Advertising & Marketing (3 Credit Hours)
Pre-requisites: (SPRT 130 or COMM 175) and (COMM 211 or COMM 213)
The world of sports is a unique combination of news, business, and entertainment. This course teaches students the history and fundamentals of sports marketing, advertising, events, and media planning, while also taking a historical look at sports advertising and commercial marketing. Students will examine advertising and marketing strategies of sports across media and develop their own campaign or event plan around sports for any media of their choice.
Outcomes:
Evaluate messaging across multimedia platforms; Use industry standard equipment and software to deliver marketing artifacts; Make ethical and creative contributions to the sports marketing field; Execute event plans across audiences and channels

COMM 250 Foundational ADPR Research Methods (3 Credit Hours)
Pre-requisites: COMM 175
This course introduces foundational research methods used in advertising and public relations to inform strategic decision-making. Students will learn how research supports audience understanding, message development, campaign evaluation, and ethical communication practice. Emphasis is placed on research literacy, applied methods, and interpretation of findings rather than advanced statistical analysis. Through hands-on exercises and a guided applied project, students will gain practical experience using research to solve real-world communication problems.
Outcomes:
Identify common research methods used in advertising and public relations; Explain when and why different research methods are used in communication planning; Apply basic qualitative and quantitative methods to communication scenarios; Interpret research findings and translate them into strategic insights; Evaluate ethical considerations in communication research

COMM 256 Broadcast Newswriting (3 Credit Hours)
Pre-requisites: UCWR 110 with a C- or higher and COMM 205
This course introduces basics of broadcast news and broadcast writing style. Students learn script writing and formatting, an introduction to radio and TV reporting, standard terms and basic newscast production, and an introduction to the studio. This course also provides a foundation for more advanced courses in the broadcast curriculum.
Outcomes:
Students gain experience writing for radio and TV news, as well as basic knowledge of the broadcast news industry and contemporary issues pertinent to the field

COMM 258 Game Studies (3 Credit Hours)
Pre-requisites: COMM 200
This course examines games and their complex role within contemporary culture. Games are approached as "texts" that can be "read" using a variety of theoretical lenses. Students will explore what games say about the nature of identity, community presence, learning, and communication and reflect on their own experience in a blog.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-COMM258/IFMS258
Outcomes:
Build their understanding of some key foundational concepts in the field of Game Studies; Articulate how the role of games are debated and discussed in governmental, industrial, and academic contexts around the world; Engage with the creation of their own games through a range of design tools and methods; Foster nuanced discussions of games and their relationship to our society; Gain insight into how cultural norms and values are embedded in games, their design/production, and how we think about play

COMM 259 News Editing (3 Credit Hours)
Pre-requisites: COMM 175
This course examines the skills needed to act as a newsroom leader and manager, including copy editing, researching, photo and visual editing, working as an assignment, project and online editor. This course will benefit those who want to be an editor, manage people, shape newsroom culture and build community trust.
Outcomes:
Students will gain experience with production skills in the print medium

COMM 260 Environmental Journalism (3 Credit Hours)
The mission of environmental journalism is to raise public awareness about environmental news and issues. It is about being ethical, accurate, fair, and clear, whether reporting, investigating, or advocating for change.
Course equivalencies: X-ENVS 260/ COMM 260
Outcomes:
Students will be able to find, report, and present challenging stories around this topic, in print and in broadcast writing

COMM 261 Social Media and Society (3 Credit Hours)
Pre-requisites: COMM 200
This course explores how individuals, organizations, and brands use social media to connect, communicate, and engage audiences in today's digital environment. Students will learn by observing and analyzing real-world social media practices, including interviews with professional practitioners who specialize in content creation, community management, and digital strategy. The course emphasizes what works--and what doesn't--in building connection and engagement online. Through hands-on projects, case studies, and self-assessment, students will gain a clearer understanding of the strategic choices behind social media activity and reflect on their own digital practices as communicators.
Outcomes:
Demonstrate understanding of how practitioner insights inform social media strategy by articulating key themes and lessons derived from professional practices; Understand and apply principles of social media evaluation, including identifying strategic goals, target audiences, and platform choices, and assessing their effectiveness using established criteria; Recognize and explain the strategic and contextual factors that influence successful and unsuccessful social media practices, as illustrated through case studies; Explain and critically reflect on the benefits and risks of social media use for individuals and organizations, particularly regarding engagement, reputation, reach, and sustainability; Audit and assess their own social media practices and produce a strategic plan that aligns their online behavior with defined personal or professional goals

COMM 262 Feature & Opinion Writing (3 Credit Hours)
Pre-requisites: COMM 175 and COMM 205
This course examines methods of researching and writing editorials, commentaries, and features for print media.
Outcomes:
Students will broaden their research and writing skills

COMM 263 Editorial Design I: Newspaper & Online (3 Credit Hours)
Pre-requisites: COMM 175 or COMM 201
Editorial Design I is an introduction to information processing and readership, and basic principles of layout and editing.
Outcomes:
Students experiment with a variety of printed formats and practice copy fitting, typography, and photo-editing

COMM 265 Sports Broadcasting (3 Credit Hours)
This course will teach students how to report and produce broadcast stories about athletes and athletic events. Students will have access to players and coaches on the professional and collegiate levels, attending games, practices and training. Students will learn to produce stories for radio and television, as well as sound broadcast presentation skills.
Outcomes:
Students will learn to conduct journalistic research, interviewing techniques, public speaking skills and how to produce stories for radio and television

COMM 266 Advertising Copywriting (3 Credit Hours)
Pre-requisites: COMM 214
This course will focus on the art of copywriting for advertising, be it for TV, print, outdoor, social media and the ever changing landscape of digital media. Students will learn to craft their words to make creative advertising based on strategies and insights.
Outcomes:
Through a series of creativity building exercises, short lectures, and readings, learners develop both an understanding of creativity and increase their own ability

COMM 268 Persuasion (3 Credit Hours)
Pre-requisites: COMM 175
This course is designed to explore theories related to persuasion, social influence, and compliance-gaining. Students will get practical experience in the analysis, criticism, and application of persuasive discourse across a wide variety of contexts.
Outcomes:
Gain familiarity with findings from empirical investigations on persuasion, social influence, and compliance gaining; Learn about strategies and techniques of persuasion relating to a wide variety of real-life communication contexts, situations, and settings; Identify strategies and tactics used by persuaders; Understand the ethical implications of persuasive strategies and tactics

COMM 269 Observing China (3 Credit Hours)
This course is about street-level China, as it is seen and as it happens. This course is a practicum, in which students, through a mix of lectures, briefings and discussions, will delve into nature of observation and engagement with and in China.
Interdisciplinary Option: Asian Studies, Global Studies
Outcomes:
Students will have a deeper understanding of how journalists and documentarians observe and write (or film) China, and over the course of the semester will make some efforts of their own to do original journalism and essay writing

COMM 271 Media Culture and Communication (3 Credit Hours)
Pre-requisites: COMM 175 or COMM 201
This course examines contemporary US American culture from a critical-theoretical standpoint while examining popular icons and social practices with particular attention to their influence on individual and collective identities.
Outcomes:
Students will learn critical cultural theories and do projects where they reflect upon the influences of contemporary cultural texts and practices with an eye for their economic, social and political influence on individual and collective identities

COMM 272 Intercultural Communication (3 Credit Hours)
Pre-requisites: COMM 175
This course introduces students to intercultural communication theory and research. Students explore how differences in ethnic, religious, economic, and geographical experiences produce social biases and engender conflict. Students are expected to explore their own cultural histories to understand how they create meaning and adopt attitudes.
Interdisciplinary Option: African Studies and the African Diaspora, Global Studies, Latin American Studies, Peace, Justice, and Conflict Studies
Outcomes:
Accurately use key intercultural communication concepts such as culture, positionality, power, colonization, globalization, whiteness, avowed and ascribed identity, and interdependence; Use the process of inquiry, framing, positioning, dialogue, reflection, and action (that is, praxis) to make sense of intercultural communication situations and practices; Design and successfully conduct an interview with an intercultural communication focus; Demonstrate awareness of one's own cultural identity, assumptions, and positioning

COMM 273 Interpersonal Communication (3 Credit Hours)
Pre-requisites: COMM 175; Prerequisites waived for PCOM minors
Students study speech to understand its role in human relationships. This course focuses on self-exploration of communication patterns by asking life's big questions about self and other. Students will gain competence in interpersonal communication through the development of perceptual accuracy, and clarification of values with regard to relational goals.
Outcomes:
Identify characteristics and types of communication and of interpersonal communication; Define communication competence; Discuss the roles of identity and the self in communication; Recognize the relationship between communication and culture/s; Discuss the linguistic, sociolinguistic, and psycholinguistic aspects of communication

COMM 274 Introduction to Cinema (3 Credit Hours)
This course is an introduction to the study of cinema as a complex medium of communication. This course will provide students with the basic terminology, observational skills, and theoretical background for the study of film aesthetics, language, cultural analysis, history, and the production of cinematic texts.
Knowledge Area: Artistic Knowledge and Experience
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: ACCOM / COMM 274
Outcomes:
Become familiar with and apply the basic approaches to film studies, such as narrative studies analysis, formalist analysis, and critical practices; Acquire the basic film vocabulary (eg, shot/reverse shot, sequence, lighting, editing, narrative/narration, point of view/POV, sound) and tools for analyzing films as texts; Become familiar with and differentiate among a variety of film forms (eg, documentary, animation, experimental film), film genres (eg, horror, western, musical, melodrama), film movements and styles, and national cinema; Analyze and evaluate films from different eras and cultures verbally and in written form

COMM 275 Web Design and Usability (3 Credit Hours)
Pre-requisites: COMM 200; Prerequisites for Visual Communication majors and minors is FNAR 383; Prerequisites waived for Professional Communication and Environmental Communication minors
This course will explore the design and usability of websites from several perspectives: how they look (aesthetics), how they work (navigability and usability), and how they are made (tools and software). Lectures, demonstrations, and in-class lab time will introduce students to the creative tools and software that power contemporary web design and usability. Emphasis will be on using a variety of tools and resources to meet one's own goals, rather than achieving the level of expert in any one piece of software.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Outcomes:
Explain the unique qualities of the web as a storytelling medium and how portfolio sites can communicate creative identity; Apply content-first and information architecture principles to organize and present work clearly for target audiences; Evaluate design choices--typography, color, imagery, and layout--for clarity, readability, and alignment with personal brand; Conduct and interpret user testing to refine and improve the digital experience; Design and present a personal portfolio website that showcases creative work and positions them for professional opportunities

COMM 277 Organizational Communication (3 Credit Hours)
Pre-requisites: COMM 175; Prerequisites waived for PCOM minors
This course is an introduction to theory and practice of organizational communication, with an emphasis on organization contexts, culture, and systems, and the role of communication in building relationships with internal and external stakeholders.
Outcomes:
Students will be able to analyze organizational communication, and understand the impact of technology, globalization, community and diversity on organizational systems

COMM 278 International Public Relations (3 Credit Hours)
This course explores the growing impact of globalization on public relations. As multinationals grow and social, economic, and environmental issues become worldwide in focus, PR professionals work in increasingly interconnected world. Students will explore the growth of international public relations by comparing countries, analyzing and discussing cases, and learning best practices.
Interdisciplinary Option: Global Studies

COMM 279 Critical Issues in Journalism (3 Credit Hours)
Pre-requisites: COMM 175
This course examines different approaches to understanding the role of journalism in contemporary society, emphasizing the historical development of issues that surround journalism today.
Outcomes:
Students explore varied critical perspectives on news and news-gathering to gain a broader understanding of the role of journalism in society

COMM 280 Media Technology & Society (3 Credit Hours)
Pre-requisites: COMM 175 or COMM 201
Through lectures, discussions, and assignments, learn the evolutionary history of media technologies from the telegraph through film, television, and digital media, and review contemporary theories about how technology shapes society.
Outcomes:
Learn histories of media technologies and their effects on the shape of societies; Review contemporary theories about how technology shapes the way people live; Demonstrate the ability to analyze and critically assess connections between media, technologies, and daily life

COMM 281 Communication, Language & Gender (3 Credit Hours)
Pre-requisites: COMM 175 or COMM 201
This course explores the role of communication practices in the production, reinforcement, and transformation of gendered identities. Students will learn how gender expectations within cultural contexts are created. They will also learn some of the ways that deeply-rooted assumptions limit social change and guide communication.
Interdisciplinary Option: Women & Gender Studies
This course satisfies the Engaged Learning requirement.
Outcomes:
Explain what gender/sex is, using biological, cultural, and psychological perspectives; Apply accurately key concepts related to the study of gender (eg, agency, standpoint theory, intersectionality, gender performance, heteronormativity, institutional limitations, and empowerment); Explain how gender/sex relates to language and communication; Describe how social institutions such as family, school, church, and work have influenced how we see and communicate about gender/sex; Reflect on their own gender performance

COMM 282 Media Law (3 Credit Hours)
Pre-requisites: COMM 175 or COMM 201; Prerequisites waived for EVCM minors
This course examines cases and issues in constitutional, statutory, and regulatory law affecting print and electronic media including First Amendment rights, libel, privacy, copyright and trademarks, Freedom of Information, and telecommunication regulations.
Course equivalencies: COMM282/CMUN252
Outcomes:
Students will be able to understand major legal precedents affecting current media communication and recognize their impact on professional practices in print, electronic media and the Internet

COMM 283 Global Media (3 Credit Hours)
Pre-requisites: COMM 175
This course examines how various forms of media and audiences travel and circulate in specific historical, political, and social conditions of consumption. We will learn about the global media flows, connections, and contexts of media markets through information, ideas about health/medicine, and popular culture.
Outcomes:
Evaluate the influence of historical, political, and social conditions on global media production, distribution, and consumption; Compare media systems and audiences across cultural and geographic boundaries to understand how local contexts shape global communication practices; Assess representations of health, medicine, and popular culture in transnational media, considering issues of power, identity, and accessibility; Apply theoretical frameworks of globalization and media studies to contemporary case studies involving global markets, platforms, and public discourse; Design and adapt a communication strategy or toolkit to address the needs of a defined audience

COMM 290 Branding and Positioning (3 Credit Hours)
Pre-requisites: COMM 210 or COMM 211
Examines the theory and practice of branding, target segmentation, and how the digital space and the rapid rise of consumer-generated content have impacted brand management. The course explores each stage of the communication planning process and introduces students to the way audience research, and the competitive sets are used to develop brand positions and benefits.
Outcomes:
Understand theories and practices of branding that impact brand management; Gain knowledge on how to evaluate, create, and improve brand positioning; Learn how to determine if a brand's advertising is consistent with its target audience and its brand positioning; Develop differentiating brand strategies for products and services by applying key branding and positioning principles

COMM 296 Themes in Advertising/Public Relations (3 Credit Hours)
Pre-requisites: COMM 175 or 201
Intermediate-level Advertising/Public Relations lecture course that examines specific areas of study. Topics vary each semester. This course may be repeated (with different topics) for a total of 9 hours, but only 6 may count toward the major. Students will gain access to a wide variety of topics in AD/PR.

COMM 297 Themes in Communication Studies (3 Credit Hours)
Intermediate-level Communication Studies lecture course that examines specific areas of study. Topics vary each semester. This course may be repeated (with different topics) for a total of 9 hours, but only 6 may count toward the major. Students will gain access to a wide variety of topics in COMM.

COMM 298 Themes in Multimedia Journalism (3 Credit Hours)
Pre-requisites: COMM 175
Intermediate-level multimedia journalism lecture course that examines specific areas of study. Topics vary each semester. This course may be repeated (with different topics) for a total of 9 hours, but only 6 may count toward the major. Students will gain access to a wide variety of topics in MJRN.

COMM 299 Themes in Film and Digital Media (3 Credit Hours)
Beginner to Intermediate-level Film and Digital Media course that examines specific areas of study. Topics vary each semester. This course may be repeated (with different topics) for a total of 9 hours, but only 6 may count toward the major.
Outcomes:
Students will gain access to a wide variety of topics in Film and Digital Media

COMM 300 Persuasive Campaigns (3 Credit Hours)
Pre-requisites: COMM 175
This course analyses the structure, development, and role of communication in political and advertising campaigns, with a focus on theories of media effects, message construction, and audience analysis.
Outcomes:
Students will use their analytic and research skills to broaden their understanding of the use and effects of communication as a means of public persuasion

COMM 301 Discovering China Through Film (3 Credit Hours)
This course will give an overview of major films produced in mainland China since 1949. Students will examine the genres of Chinese film better known in contemporary China and consider them a major source of reflection upon, and critique of, contemporary Chinese society and culture.
Interdisciplinary Option: Asian Studies, Film & Digital Media Studies, Global Studies, International Film & Media Studies
Course equivalencies: CMUN301/ASIA/INTS/AIFMS302
Outcomes:
All films chosen for the course will help inform students' understanding of modern China in terms of its material conditions and ideology

COMM 302 Sports on Screen (3 Credit Hours)
Pre-requisites: SPRT 130 or COMM 265 or COMM 274
This course will examine the portrayal of sports in film and television. From "Chariots of Fire" to "Ted Lasso," students will explore plots, performances, visuals effects, scenery, and more and produce their own reviews and analyses. Through a diverse selection of films and television shows, students will examine themes of personality, identity, culture, sportsmanship, community, and skill to analyze how this genre uses storytelling devices to deliver a narrative. Class discussion, writing assignments, and interviewing will encourage critical thinking about how film and TV influence our relationship with sports.
Outcomes:
Write compelling, persuasive reviews and news articles & using AP Style; Apply media theories and production techniques to sports film and TV productions; Analyze sports films and television series within their historical and cultural contexts, explaining how they reflect or contest prevailing societal attitudes toward sports; Evaluate how sports film and television narratives shape public understandings of athletes, competition, and the social role of sports, drawing on relevant theories of media and culture

COMM 303 Media, Politics, and Propaganda (3 Credit Hours)
Pre-requisites: (COMM 175 or COMM 201) and COMM 200
This course will enable students to understand the relationship between media and politics as well as be able to identify strategies used in propaganda, disinformation, and misinformation campaigns and the impact of technology on its history and evolution.
Interdisciplinary Option: Global Studies
Outcomes:
Students will be able to articulate the media's impact on the circulation of propaganda as well as be able to identify disinformation/misinformation and understand its significance in the political process

COMM 304 Rhetorics of Utopia & Revolution (3 Credit Hours)
Pre-requisites: UCWR 110
This reading-intensive course will examine rhetorics of utopia, revolution, and strategies of change. Students will read a variety of texts from activists, scholars, and revolutionary thinkers to understand the ways (historically and presently) that utopias and revolutions are imagined and created through communication, media texts, and discourse.
Outcomes:
By the end of this course, students will have a better understanding of utopia and revolution, how ideology operates and solidifies via discourse, and ways to enact social change

COMM 305 Animation (3 Credit Hours)
Pre-requisites: COMM 135; FNAR 233 is also required for Visual Communication majors and minors
This course will focus on animation with specific emphasis on the creation, refinement, and publishing of a visual story. Students will learn 2D and 3D techniques, cameras, CGI, and other software and equipment to create animated works.
Course equivalencies: COMM 305/COMM 455
Outcomes:
Theories of visual and image-based storytelling; script writing; character development; storyboarding; creating visual stories from images; animation enhancement/manipulation; graphic design; and contemporary animation design options for visual storytelling/promotion

COMM 306 Environmental Communication & Advocacy (3 Credit Hours)
Pre-requisites: Sophomore standing; Prerequisite is waived for undergraduate students in the School of Environmental Sustainability and for Environmental Communication minors
This course explores the rhetorical means by which citizens influence the policies and practices affecting our natural and human environments. The focus is on current controversies.
Interdisciplinary Option: Peace, Justice, and Conflict Studies, Urban Studies
Course equivalencies: X - COMM 306 / COMM 406
Outcomes:
The course seeks to provide an understanding of the history and range of communication styles in the US environmental movement and to help students develop practical skills relevant to entering into environmental debates

COMM 307 Communication and Social Movements (3 Credit Hours)
Pre-requisites: COMM 175; Prerequisites waived for Environmental Communication minors
This course explores the communication strategies used to promote and/or resist significant socio-political change. Students will demonstrate an understanding of how communication is used in particular societal struggles to effect socio-cultural change at an individual, community, institutional, or global level.
Interdisciplinary Option: Peace, Justice, and Conflict Studies
Outcomes:
Articulate and critically engage with the changing nature of movement and protest in regard to technology, media, and sociocultural forces; Students will understand the history of social movements and how their evolution has shifted the very nature of mobilization itself

COMM 308 Screen Directing (3 Credit Hours)
Pre-requisites: COMM 135 and COMM 274
This advanced course in screen directing is designed to further students' narrative filmmaking skills. Geared toward creating fiction films, the course focuses primarily on blocking for the camera, directing actors for the screen, and structuring dramatic scenes. Students should have a working knowledge of basic videography, nonlinear editing, shot composition, and film grammar.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Outcomes:
Communicate effectively with talent and crew; Analyze a narrative scene for its dramatic and stylistic elements; Direct single-camera narrative scenes; Produce and construct narrative films/videos from a screenplay

COMM 309 Designing Media for Social Change (3 Credit Hours)
Pre-requisites: COMM 220, COMM 227, COMM 230, COMM 231, COMM 237, COMM 268, COMM 272, COMM 277, or COMM 281; Prerequisites waived for Environmental Communication Minor
This course examines media and social change at the intersection of theory and practice. The class will be dedicated to analyzing the way social change is catalyzed and communicated through various media platforms. Students will gain a historical and multi-media perspective on a variety of design and communication strategies tied to a range of social and cultural issues.
Outcomes:
Grounded in theories of media power, communication networks, political advocacy, engaged scholarship, and the digital, materials in this course will explore the past, present, and future of designing media and communication practices

COMM 310 Production Design (3 Credit Hours)
Pre-requisites: COMM 274 or COMM 135 or THTR 252
Students develop an understanding for the evolution and history of production design, as it relates to film production, from its inception to the present. Students will pre-visualize and implement art direction--sets, costumes, makeup, color palettes--for student films in production.
Outcomes:
Students acquire the visual language and historical precedents for production design in film and television; They learn pre-visualization techniques, script breakdowns and build-out processes for art direction on film sets

COMM 311 Health Communication (3 Credit Hours)
Pre-requisites: COMM 205 or COMM 210
This course focuses on the growing field of health communication. Building on students' knowledge of public relations, advertising, communication, and marketing, this class aims to help students develop an area of specialization that offers career opportunities in many settings. Through guest speakers and field trips, the class is designed to provide an overview of what health communicators do and where they work.
Course equivalencies: COMM 311/COMM 461
Outcomes:
Provide a foundation of knowledge about the US healthcare system and acquaint students with how communications can play a vital role in accomplishing public health objectives

COMM 312 Special Events Planning (3 Credit Hours)
Pre-requisites: COMM 210
Students will gain hands-on experience in event planning. They will learn to anticipate and execute the needs of an organization or community planning special events.
Outcomes:
Students will gain hands-on experience in event planning; They will learn to anticipate and execute the needs of an organization or community planning special events

COMM 313 Corporate and Organizational Communication (3 Credit Hours)
Pre-requisites: COMM 175 and COMM 210; Prerequisites waived for Professional Communication Minors
Students will learn the theory and practice of responsive and strategic organizational communication in developing corporate identity and image.
Outcomes:
Students' understanding of the theory and practice of responsive and strategic organizational communication, public relations, and advertising will be enhanced

COMM 314 Public Relations Cases (3 Credit Hours)
Pre-requisites: COMM 210
The course focuses on issues, strategies, and solutions in creating and maintaining relationships with key publics including media relations, internal communications, community relations, public affairs, investor relations, and crisis communications.
Outcomes:
Students will gain experience analyzing, formulating and applying case-specific solutions and developing an integrated campaign

COMM 315 Advanced Reporting Topics (3 Credit Hours)
Pre-requisites: COMM 205 and 362; Junior Standing and above
This course offers in-depth attention to the challenges of writing complex stories characterized by careful research, use of sources, interviewing, and reporting and writing. Students examine writing for a "lay" audience in such areas as science and technology, finance, government, and religion. Can be repeated once with a different topic. Second completion can count as major elective in MJRN.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will broaden their writing and research experience

COMM 317 Media Planning (3 Credit Hours)
Pre-requisites: COMM 211
This course examines the advertising and marketing processes required to research, develop, and implement an effective media plan for budgeting appropriate advertising time and space.
Course equivalencies: COMM 317/COMM 417
Outcomes:
Student teams will develop competencies in decision-making processes and tools, including research methods, objectives, strategies, and tactics, to construct an advertising media plan

COMM 318 Public Relations Writing (3 Credit Hours)
Pre-requisites: UCWR 110 with a grade of C- or higher and COMM 210
This course focuses on strategic public relations, writing for publics including print, broadcast, and digital media with understanding of objectives, news values, and formats.
Outcomes:
Students develop competency writing and editing news releases, pitch letters, fact sheets, public service announcements, newsletters, and Web content to develop a portfolio of individual writing samples

COMM 320 Public Service Communication (3 Credit Hours)
Pre-requisites: COMM 210 and 211
This course examines public relations strategies and applications in cause-related campaigns, public service initiatives, and community relations activities for corporate and nonprofit organizations.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to analyze current issues and advocacy campaigns, define ethical communication and social responsibility, and develop a public service campaign for an organization

COMM 321 Advertising Campaigns (3 Credit Hours)
Pre-requisites: COMM 211
This is an advanced advertising course in a simulated agency environment to provide practical experience in the campaign planning process.
Outcomes:
Student teams develop competencies in creating and producing a professional advertising campaign that includes market research, development of creative and media recommendations, and an integrated marketing communication strategy

COMM 322 Guerilla Media (3 Credit Hours)
Pre-requisites: COMM 200
This course covers provocative, unexpected, and alternative methods for distributing media and gaining new audiences. It includes the history, theories and ethics behind the appropriation of "guerrilla" strategies as found in artistic, civic, commercial and political media work. SES majors and EVCM minors are waived from pre-requisites.
Interdisciplinary Option: Film & Digital Media Studies
Outcomes:
Students gain experiences with understanding, creating and distributing media work with guerrilla strategies around environmental, journalistic and commercial themes of their choice

COMM 323 Remixing Culture (3 Credit Hours)
Pre-requisites: COMM 200
This course explores the remix culture as cultural exchange. While studying about remix culture and collaborative process, students will manifest projects that involve mashing up media using various web-based and mobile media creation, web-based editing, live online broadcasting and sharing and techniques of online presentation.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-COMM323/ICVM323/IFMS323
Outcomes:
Students will learn about the intermixing of cultures through individual projects in which they will combine different types of media

COMM 324 Film Genre (3 Credit Hours)
Pre-requisites: COMM 274
Traces the evolution of independent filmmaking in the U.S, from the pioneering cinema of Maya Deren and John Cassavetes to seminal works of Spike Lee, Kelly Reichardt, and Barry Jenkins.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-COMM324/ICVM324/IFMS324
Outcomes:
Students will be able to demonstrate knowledge what constitutes a genre and the varied approaches used to analyze films within the context of genre studies

COMM 326 Screenwriting (3 Credit Hours)
Pre-requisites: COMM 202
This course introduces students to the process of writing for the screen. Through exercises and analysis of structure and storytelling fundamentals, students will develop a working sense of the art of crafting a screenplay, learning how to build a script, step by step, from an original and compelling idea.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Outcomes:
Extensive writing requirements cover all aspects of screenwriting, from creating a treatment and character bios to writing action and dialogue, culminating in the development of a detailed step outline and polished first act of a feature-length script (20+ pages); Students are required to bring an original movie idea to the first class

COMM 327 Mastering Video Reporting and Storytelling (3 Credit Hours)
Pre-requisites: COMM 135 or COMM 145
This course prepares students to report and produce video stories for broadcast and other similar media distribution. It emphasizes information gathering, source development and visual storytelling, and builds on the video and editing skills students learn in the beginning video production class.
Outcomes:
Students will learn how to capture great video and audio, research, write, produce, edit complex, effective video stories and present in a variety of ways

COMM 328 Editorial Design II: Magazine & Interactive (3 Credit Hours)
Pre-requisites: COMM 175 and COMM 205
This course gives advanced instruction in multi-page editorial layout and design by incorporating writing and photography into a complete, full-color magazine. Students will work as editors and designers in applying principles of design and production to existing articles and understand ethical issues in serving the readers of the magazine.
Outcomes:
Advanced skills in visual design concepts of color, typeface, space, and other basics; Advanced skills in working in a team toward a singular goal; Develop advanced creative capacities in visual communication and journalism

COMM 329 Advertising and Public Relations Design (3 Credit Hours)
Pre-requisites: COMM 210 or COMM 211
This course is for AD/PR majors who want to understand the creative and design discipline of the fields. Students will learn the fundamentals of print-based messages used in advertising and public relations. Students will employ various design programs applied in today's industry to develop visual communications projects, which will culminate in a final portfolio.
Course equivalencies: COMM 329/COMM 429
Outcomes:
Students will learn and become competent in the following: Current design programs including InDesign and Photoshop; Basic design principles, such as color, space, and typography; Common formats for designing integrated marketing communication print materials

COMM 330 Intermediate Advertising Design (3 Credit Hours)
Pre-requisites: COMM 214
Builds on the creative skills and understanding acquired in the introductory advertising creative courses to enhance students' conceptual abilities. Utilizing Adobe InDesign and Photoshop, students learn to design for various advertising formats including digital, print, and for client presentations.
Course equivalencies: COMM 330/COMM 463
Outcomes:
The best work is finished on computers and reviewed by advertising professionals at the end of the semester

COMM 331 Social Media Campaigns (3 Credit Hours)
Pre-requisites: (COMM 210 or COMM 211) and COMM 213
This interactive, hands-on, strategy-meets-execution course is designed to help you think like a social media campaign planner and campaign creator, capable of building insight-driven strategies, selecting platforms, developing creative ideas, and understanding paid/owned/earned dynamics. The goal is that at the end of the semester, you have mastered the fundamentals of consumer behavior on social platforms, strategic campaign development, creative ideation, media planning, and performance management that spans across advertising, public relations, and communication practices.
Course equivalencies: COMM 331/COMM 444
Outcomes:
Develop comprehensive social media strategies based on consumer insights: Students will learn to identify target audiences, uncover behavioral and cultural insights, and translate these findings into high-impact social media campaign strategies; Assess specific platform nuances and audience expectations: No single platform is the same and serves different objectives for brand development, Students will examine how different social media platforms operate -- including their engagement patterns and algorithmic structures that shape content and communication strategies; Map customer journeys and identify high-impact touchpoints: Students will gain experience in mapping consumer paths across platforms and identify moments of opportunity for engagement, influence, and/or conversion within multi-platform journeys; Generate creative content strategies tailored to platform-specific audiences: Students will gain experience in creating platform-specific campaigns that are targeted to specific audiences, delivering on the client's brief expectations; Present professional-level social media campaign recommendations to clients: Students will get firsthand experience in presenting an industry-standard integrated social media campaign program

COMM 332 Investigative Reporting (3 Credit Hours)
Pre-requisites: COMM 205 and COMM 362; Junior Standing
This course will teach you how to do investigative reporting with a data journalism approach. Through discussion of examples and our own work, we will explore how to find, request, and use data that can reveal important information about society.
Outcomes:
Analyze and interpret data for journalistic purposes, using appropriate tools and methods to uncover patterns, trends, and anomalies that support investigative findings; Integrate data analysis with traditional reporting techniques (interviews, documents, field reporting) to construct accurate, compelling investigative narratives; Evaluate the ethical and legal implications of investigative and data-driven reporting, making informed decisions about privacy, harm, transparency, and accountability in their work; Locate, request, and obtain public records and datasets from governmental and institutional sources, using relevant laws and procedures (such as FOIA and open data portals)

COMM 333 Cinematography II (3 Credit Hours)
Pre-requisites: COMM 232
Students learn and demonstrate techniques and roles for advanced cinematography: virtual production, assistant directing, sound stages, and location lighting.
Outcomes:
Camera/lighting setups for commercial spaces, virtual locations, lens/cameras for advanced aesthetic choices, assistant directing role/practices, drones, cranes, Steadicams, and other mobile camera framing techniques

COMM 334 Mobile Advertising (3 Credit Hours)
Pre-requisites: COMM 211 and COMM 213
Mobile is one of the most valued investments for advertisers. This course covers the latest practices and trends of mobile advertising which includes 1) branded mobile application design and development; 2) advanced mobile experiences with AR/VR experiments; and 3) various practices, tactics, and ethical concerns for native mobile advertising experiences.
Course equivalencies: COMM 334/COMM 464
Outcomes:
Knowledge of relevant human-computer interaction theories and branded mobile design/development; Ability to use digital tools to create mobile advertising campaigns; Understanding of importance and implications of ethics in mobile advertising

COMM 335 Creating ADPR Content with AI (3 Credit Hours)
Pre-requisites: (COMM 210 or COMM 211) and COMM 213
This course explores the current practices, opportunities, challenges, and ethics of strategic integration of Artificial Intelligence (AI) and Generative AI (GAI) into advertising, public relations, and communication workflows. Students learn various AI platforms and how to use AI for audience research, content creation, and campaign optimization while navigating the ethical and legal implications of automated communication.
Course equivalencies: COMM 335 / COMM 445
Outcomes:
Know the AI platforms and tools used for creating effective strategic communication content; Learn how to integrate AI to reduce creative production time; Understand the ethical implementations for AI use including navigating transparency, data privacy, and other issues; Know the skills of working effectively in teams to prepare marketing communication programs

COMM 336 Search & Display Advertising (3 Credit Hours)
Pre-requisites: COMM 211 and COMM 213
This course covers search engine optimization and advertising practices through lectures and hands-on practices. Students will learn technical terms and tactics involved in optimizing the search result and user experience with brand websites. Google AdWords, search network campaigns, display network campaigns and Google merchandiser set-up training will be included. (Consider scheduling to coincide with Google Challenge.)
Outcomes:
Understand the major concepts in search engine optimization; Working knowledge of the structure and terms used in Google AdWords; Be able to develop effective search engine and display advertising campaigns

COMM 337 AD/PR Multimedia Commercial Production (3 Credit Hours)
Pre-requisites: COMM 135, COMM 145, or COMM 211
This is an advanced video and advertising course designed to give students an introduction to various types of multimedia commercials as well as practical considerations of producing branded content and television spots, including for real clients.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: COMM 337/COMM 437
Outcomes:
Build experience in effective multi-tasking and teamwork, gain skills with technology and strategy, creative, and application process of broadcast production, and practice engaging with the community in media development efforts

COMM 338 Narrative Production (3 Credit Hours)
Pre-requisites: COMM 232, COMM 308, or COMM 359; Junior standing
Students work in teams to create short-subject narrative films taking their projects from preproduction to exhibition. Students will experience working as a part of a film production crew, be exposed to a variety of jobs, and produce and exhibit original films.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Outcomes:
Understand and experience the five phases of the narrative production process: development, pre-production, production, postproduction, and exhibition; Experience working as a part of a film production crew and be exposed to a variety of production jobs; Produce polished, original, short-subject films and arrange for their exhibition

COMM 339 Video Documentary (3 Credit Hours)
Pre-requisites: COMM 135 or COMM 145
This course offers hands on production of video documentaries through the study of electronic field production technology, the analysis of documentary texts, and the application of documentary research methods.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
This course satisfies the Engaged Learning requirement.
Course equivalencies: X - COMM 339 / COMM 439
Outcomes:
Students will gains hands-on video production experience in a non-narrative genre

COMM 342 Human Rights Reporting (3 Credit Hours)
In this course, Students will study the history of the concept of human rights and the legal mechanisms for enforcing human rights law, and they will read work by reporters covering human rights worldwide.
Outcomes:
Students will learn how to report on international conflicts by finding local angles of interest to Chicago readers and how to approach articles on domestic human rights issues

COMM 344 Portfolio I (3 Credit Hours)
Pre-requisites: COMM 266; and (COMM 329 or COMM 330)
Builds on skills acquired in intermediate creative courses to help students enhance their conceptual abilities and generate both print and integrated multimedia campaigns. Students work in teams to develop an extensive body of work that's exhibited in an awards show judged by advertising professionals.

COMM 345 Student Agency (3 Credit Hours)
Pre-requisites: COMM 175 and Instructor Consent
Course involves actual client work in Inigo, the student-run communications agency. Students gain skills/put theory into action as they provide public relations, digital communication, strategy and other services to companies and non-profits. Students apply prior semester. Contact instructor at cmcphil@luc.edu for details. All majors encouraged.
This course satisfies the Engaged Learning requirement.
Outcomes:
A fundamental understanding of what agencies are and how they function; A heightened sense of professionalism; Advanced-level teamwork; Increased written and verbal communication skills

COMM 346 Analytics, Insights, and Strategy (3 Credit Hours)
Pre-requisites: (COMM 210 or COMM 211) and COMM 250
This course provides a comprehensive look at analytical tools and methodologies used to transform quantitative and qualitative data into strategic insights. Students will explore how to use data to uncover the cultural, psychological, and social factors that drive human behavior. By mastering the transition from data analysis to actionable communication strategies, students will learn to move beyond simple observations to understand the why behind the what. The course culminates in the development of a real-world strategic program that demonstrates an integration of data analytics with a promotional framework.
Outcomes:
Understand the roles and tools used for analyzing data, finding insights, and developing a strategy in the advertising, public relations, and communication planning and development process; Have a process for identifying social, cultural, and behavioral data from multiple sources to synthesize into a single strategy for a brand's communication program; Develop a communication strategy that leverages marketplace and target audience insights relevant to a specific brand; Know the skills of working effectively in teams to prepare marketing communication programs

COMM 347 Influencers & Social Economy (3 Credit Hours)
Pre-requisites: (COMM 210 or COMM 211) and COMM 213
Content creators and influencers are at the center of a rapidly growing global industry. This course bridges the gap between creative content and commercial viability by examining the evolution of influencers from content creators to product entrepreneurs and strategic brand partners. Students will analyze the roles of diverse influencers--from nano to mega--across the customer journey and develop the technical skills required to manage these partnerships, including the use of influencer analytics tools and messaging control strategies. The curriculum covers the business of the creator economy, including strategic goal setting, diverse revenue streams (from affiliate marketing to proprietary product lines), ethics, and legalities. Whether an aspiring communication entrepreneur or a future brand strategist, students will master the framework necessary to navigate, monetize, and manage the modern social economy. Students will develop a real-world influencer communication program that integrates data analysis with a cultural or psychological strategy framework.
Outcomes:
Identify and categorize influencer types based on reach, niche, and engagement; Develop a comprehensive communication plan for an influencer-based brand; Understand the advertising, public relations, and communication strategies and tools used to build a public image relevant for influencers; Develop a brand-specific influencer strategy that maps creator archetypes to the brand customer journey and use industry-standard KPIs to measure performance; Learn the diverse revenue streams, from affiliate marketing to proprietary product lines; Know the skills of working effectively in teams to prepare marketing communication programs

COMM 350 Producing for Film & Digital Media (3 Credit Hours)
Pre-requisites: COMM 135 OR COMM 274; COMM 405 (for DMST students); OR Instructor Consent
Aesthetic choices meet the ethics and business of filmmaking in COMM 350. Producing covers how to develop story ideas from conception to writing, financing, production and distribution. Relevant issues in script breakdowns, safety, communication and contracts are covered. Students create pitch decks, basic budgets and a longer prospectus for potential investors.
Outcomes:
Understanding DEI issues while choosing stories to produce, hiring performers or crew; templates for budgets; best practices for safety on the set; creating engaging pitch decks and treatments

COMM 357 Programming Film & Media: Festivals, TV & Digital (3 Credit Hours)
Pre-requisites: COMM 200
This course examines programming and curating (selecting) media for film festivals, museums, streaming services and other platforms. Through work on a festival or similar project, students examine how audiences are identified, learn about distribution, and explore the challenges facing media outlets in selecting, reviewing and archiving media.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X-COMM357/IFMS369
Outcomes:
Evaluate, curate and present media work; improve critical thinking and writing about media; learn legal, creative and financial implications of programming and curating media

COMM 358 Newscasting and Producing (3 Credit Hours)
Pre-requisites: COMM 145 and COMM 256
This is designed as a capstone course for the broadcast journalism emphasis. It covers all aspects of TV (or web) newscasts, including producing, anchoring, reporting, photography and editing, as well as studio production. The class produces and delivers newscasts, designed to prepare students for work in the TV news industry.
Course equivalencies: COMM 358/COMM 458
Outcomes:
Report, write, and present news stories, demonstrating clear delivery, news judgment, and adherence to accuracy and fairness; Monitor and synthesize current news developments at Loyola, in Chicago, and at the state, national, and global levels, and incorporate this knowledge into journalistic work; Produce news that represents diverse perspectives and avoids misrepresentation or harm to individuals, groups, or alternative viewpoints; Evaluate their own and peers' newscasts, identifying strengths, weaknesses, and areas for improvement in content, ethics, technical quality, and on-air performance

COMM 359 Advanced Post Production (3 Credit Hours)
Pre-requisites: COMM 135 and COMM 274
This course combines advanced editing theory and practice, aimed at providing students with the skills required for editing motion pictures of all genres and for all platforms.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Course equivalencies: X - COMM 359 / COMM 459
Outcomes:
Students will learn how to edit for motion pictures of all forms

COMM 360 Digital Media Ethics (3 Credit Hours)
Pre-requisites: COMM 200
This course is designed to familiarize students with a new set of ethical dilemmas that have sprung up in the last decade with the rise of new media. Using classical ethical theories, students will formulate appropriate and responsible solutions to ethical dilemmas emerging in a new/digital media context.
Outcomes:
Students will learn about current ethical issues and solve these issues using classical ethical theories

COMM 361 New Media Criticism (3 Credit Hours)
Pre-requisites: UCWR 110 with a grade of C- or better and COMM 200
Wikipedia, Google, YouTube, Twitter, and mobile applications are complex designed objects. Students will learn a critical language for thinking of new media as art, narrative, culture, and code. This course is Writing Intensive.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
Outcomes:
Introduce students to key theories and methods in new media criticism and digital humanities; Train students to critically read and interpret new media texts such as social media, online news, games, apps, and streaming content; Explain how technology, power, and culture interact in digital environments; Provide opportunities to conduct academic research and apply its findings through argumentative discussion and written criticism

COMM 362 Multimedia Journalism Research Methods (3 Credit Hours)
Pre-requisites: COMM 175 and COMM 205; Prerequisites waived for Environmental Communication minors
This course advances student knowledge of resources, methods, and credibility standards for gathering and reporting news stories.
Outcomes:
Students will learn how to conduct research that is both accurate and balanced

COMM 363 Research Methods in Advertising/Public Relations (3 Credit Hours)
Pre-requisites: COMM 210 or 211
Course will introduce majors to sound and effective social science research methods used in Ad/PR, including surveys, focus groups, content analysis, and audience analyses. It will also give students a chance to apply for the national PR student Bateman Competition that would continue in a designated course the following spring.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will learn the research process and how to apply it to establish, build, and evaluate Ad/PR strategies, goals, and campaigns

COMM 365 Naturalistic Methods Communication Research (3 Credit Hours)
Pre-requisites: COMM 175 or COMM 201
This course examines how communication research is conducted in naturalistic settings using qualitative methods associated with observation and in-depth interviewing.
Interdisciplinary Option: Urban Studies
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will become familiar with the reading and evaluation of communication research, and apply the concepts studied in class to the design and development of a research project

COMM 366 Observing/Measuring Cmun Behavior (3 Credit Hours)
This course examines how communication processes and behaviors are studied, using the social-scientific techniques of observation and measurements. It also looks at the limitations of these methods; appropriate methodologies and ways of analyzing quantitative (numerical) data.
Interdisciplinary Option: Urban Studies
Outcomes:
Students will become familiar with the analysis of quantitative data, and apply their knowledge to the design of a research project

COMM 367 Rhetorical Criticism (3 Credit Hours)
Pre-requisites: UCWR 110 with a grade of C- or higher and (COMM 175 or COMM 201)
This course examines theory, research, and application of critical methods for analyzing historical and contemporary persuasive discourse.
Interdisciplinary Option: Urban Studies
Outcomes:
Students will be able to analyze rhetorical situations and critically assess efforts to respond to them

COMM 368 Ethnographic Research Methods in Communication (3 Credit Hours)
Pre-requisites: COMM 175 or COMM 201; Junior standing
This course teaches principles of participant-observation research as a critical practice to produce a 'thick description' of meanings, values, hierarchies of interests, power structures, and ideals of a particular cultural group or community.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students learn to conduct ethnographic research and its procedures - taking field notes, conducting interviews, examination of data and artifacts, and producing research results to a public audience

COMM 370 Special Topics in Advertising & Public Relations (3 Credit Hours)
These are advanced courses in specialized AD/PR areas. Titles and content vary and prerequisites are established according to course content. May be repeated with different topics for a total of 9 credit hours, but only 6 may count toward the major.
Course equivalencies: COMM 370/COMM 470

COMM 371 Special Topics Communication Studies (3 Credit Hours)
Pre-requisites: COMM 175; DMST-MC and GSCM-MS students may enroll without prerequisites
These courses offer in-depth reading, research, and discussion in specialized areas dealing with current social issues and communication practices. Course titles and content vary. May be repeated for up to 9 hours, but only 6 may count toward the major.

COMM 372 Special Topics: Multimedia Journalism (3 Credit Hours)
These courses offer in-depth reading, research, and discussion in specialized areas dealing with current issues in multimedia journalism. Course titles and content vary. May be repeated for up to 9 hours, but only 6 may count toward the major.
Outcomes:
Apply core journalistic standards--including accuracy, fairness, source verification, and transparency--when creating multimedia content on the semester's special topic; Adapt content for multiple digital platforms, revising headlines, visuals, and formats to suit different modes of distribution; Analyze multimedia news work for newsworthiness, storytelling effectiveness, audience engagement, and ethical/legal considerations

COMM 373 Digital Storytelling Abroad (3 Credit Hours)
Pre-requisites: COMM 135 or COMM 145
Participants will learn and execute multimedia storytelling in an international setting. This course will help students enhance their video, writing, interviewing, photography, and editing skills within another country and cultural context.
This course satisfies the Engaged Learning requirement.
Course equivalencies: COMM 373/COMM 473
Outcomes:
The course will require students to enterprise and execute a range of multimedia skills that help participants tell stories; The course will have an emphasis on community engagement and social justice; The course will give students an opportunity to apply technical knowledge and skills to a uniquely-designed study abroad experience

COMM 374 Special Topics: Film & Digital Media (3 Credit Hours)
These courses offer in-depth experiences in the production, design, writing and development of film and digital media. Course titles and content vary. May be repeated for up to 9 hours, but only 6 may count toward the major.

COMM 375 Media Relations (3 Credit Hours)
Pre-requisites: COMM 210 or 211
Students learn to develop influence through earned media. Skills taught include identifying news values, writing/creating multimedia press releases and media alerts, AP style, media training, creating media lists using Cision, working with syndication services, search engine optimization for news releases, creating a social presence and working with social influencers.
Outcomes:
Students learn to develop influence through earned media and how to build relationships with the media and other influencers in order to amplify stories for clients

COMM 378 Advertising/Public Relations Practicum (3 Credit Hours)
Pre-requisites: COMM 100 and Department Consent required; Restricted to Juniors and Seniors in the Advertising and Public Relations major
Students will gain advanced practical experience advertising/public relations projects.
Outcomes:
Create an Advertising/PR capstone project that integrates learning from all coursework and culminates in a professional project that is widely distributed to the public; Create and implement communication projects that are responsive to community needs and organizational goals in local and global contexts; Write copy and design messages to reach diverse publics and for distribution through multiple channels, including both traditional and digital media; Practice ethical communication in professional practices that are socially responsible and in the mutual interests of the organization and the community; Demonstrate the competencies to work as an entry-level professional in advertising or public relations

COMM 379 Digital Sustainability (3 Credit Hours)
Pre-requisites: Sophomore standing; SES undergrads can also enroll
Digital Sustainability explores the environmental impact of digital media. Mining precious metals to manufacture devices, burning fossil fuels to run data centers, global black market trading of e-waste are points where the digital world meets the physical world. Students will explore digital sustainability problems, and work toward creative solutions.
Course equivalencies: COMM 379 / COMM 479
Outcomes:
Learn about environmental issues stemming from digital media infrastructure; Critically evaluate different disciplinary perspectives to gain a broader understanding; Develop ethical reasoning regarding environmental impact resulting from digital media ecology

COMM 380 Debate Practicum (3 Credit Hours)
Pre-requisites: Instructor Consent
Students gain advanced practical experience in the Loyola Debate Society.
Outcomes:
To gain confidence as a speaker; To be able to construct well-reasoned arguments; To become an effective team member

COMM 381 Communication Practicum (1-3 Credit Hours)
Pre-requisites: Department Consent
Students gain advanced practical experience in service experiential learning projects. Student must develop a project with a full-time faculty member in COMM Studies. Paperwork is required: https://www.luc.edu/media/lucedu/soc/pdfs/resourceforms/ONLINEDirectedStudyPracticumForm.pdf.
This course satisfies the Engaged Learning requirement.
Outcomes:
Create a capstone project that integrates learning from all coursework and culminates in a professional project that is widely distributed to the public; Create and implement communication projects that are responsive to community needs and organizational goals in local and global contexts; Write copy and design messages to reach diverse publics and for distribution through multiple channels, including both traditional and digital media; Practice ethical communication in professional practices that are socially responsible and in the mutual interests of the organization and the community; Demonstrate the competencies to work as an entry-level professional in advertising or public relations

COMM 382 Multimedia Journalism Practicum (1-3 Credit Hours)
Pre-requisites: Department Consent
Students gain hands-on practical experience in developing multimedia journalism projects. Student must develop a project with a full-time faculty member in Multimedia Journalism. Paperwork is required: https://www.luc.edu/media/lucedu/soc/pdfs/resourceforms/ONLINEDirectedStudyPracticumForm.pdf.
This course satisfies the Engaged Learning requirement.
Outcomes:
Create a capstone project that integrates learning from all coursework and culminates in a professional project that is widely distributed to the public; Create and implement communication projects that are responsive to community needs; Produce journalistic stories to reach diverse publics and for distribution through multiple\ \nchannels, including both traditional and digital media; Practice ethical communication in professional practices that are socially responsible and\\nin the mutual interests of the organization and the community; Demonstrate the competencies to work as an entry-level professional in journalism

COMM 383 Radio Practicum (3 Credit Hours)
Pre-requisites: Department Consent
Students will work with WLUW radio station under the supervision of a faculty member participating in one or several of the following activities: generating story ideas, booking guests, interviewing guests, doing promotions using social networking and on-air productions, recording, editing and producing audio segments, and learning several facets of what it takes to produce a radio show.
This course satisfies the Engaged Learning requirement.
Outcomes:
Technical Proficiency: Operate studio and control-room equipment for live boards, automation, and remote recording, including digital audio workstations (eg, Adobe Audition, Pro Tools); Production Skills: Create, edit, and mix broadcast-ready content, including promos, PSAs, interviews, and news reports that meet industry loudness and quality standards; On-Air Performance: Demonstrate effective vocal techniques, interviewing skills, and show pacing while hosting live or pre-recorded shows; Content Creation: Develop and curate relevant, engaging content tailored for specific audiences

COMM 384 Film and Digital Media Practicum (1-3 Credit Hours)
Pre-requisites: Department Consent
Students will gain advanced practical experience creating digital cinema projects. They may choose to focus on a certain role and section: director/producer, writer, cinematographer, editor, production designer, sound designer, or publicist.
Interdisciplinary Option: Film & Digital Media Studies, International Film & Media Studies
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will gain advanced practical experience producing and collaborating on digital cinema projects

COMM 386 Advertising/Public Relations Capstone (3 Credit Hours)
Pre-requisites: Senior Standing; Restricted to Advertising & Public Relations majors
Students focus on integrating and applying knowledge and skills related to advertising and public relations. They will research a career interest area, interview working professionals, and create strategic communication portfolio materials. Students gain specialized industry knowledge, improve professional communication competence, and build contacts.
Outcomes:
Find, analyze, and synthesize information and prepare an academic research-style paper about a specific advertising or public relations practice and industry that you have the greatest interest in; Describe the professional practice and significant issues in your chosen field; Establish a relationship with professionals who are currently working in the area in which you want to develop a career; Develop a business portfolio (online if possible, IMC plan and work samples) that demonstrates a synthesis of the knowledge, competencies learned in the major and practical application that reflects responsible professional practices

COMM 387 New and Digital Media Capstone (3 Credit Hours)
Students focus on integrating and applying knowledge and skills related to new and digital media applications. They will gain specialized research and industry knowledge and skills, improve professional communication competencies, and build digital industry contacts.

COMM 388 Film and Digital Media Capstone (3 Credit Hours)
Pre-requisites: Department Consent; Senior Standing; Restricted to Film and Digital Media majors, Students must complete the COMM 388 form, describing your project, any participants/support materials/technology needed, and submit to Instructor
Project proposal must be approved by the program director and course supervisor by the end of the first week of the semester. A Public presentation of the project is required. Examples of appropriate capstone projects include assisting in the development of a film festival or presentation of a significant research project.
Outcomes:
Synthesize previous course work into a public presentation in the students' area of interest

COMM 389 Advertising Creative Capstone: Portfolio II (3 Credit Hours)
Pre-requisites: COMM 266 and COMM 344; Senior Standing; Restricted to Advertising Creative majors
Gives students an opportunity to develop new campaigns and refine existing work. Students receive feedback from advertising professionals throughout the semester to help them edit and develop their portfolios. Each member of the class creates a portfolio website and develops a job search plan. Final portfolios are critiqued by faculty and professionals.
Outcomes:
Develop a portfolio of innovative ideas and creative ads across multiple platforms; Learn skills to critique and edit portfolio material; Have a plan for pitching work to potential employees

COMM 390 Communication Studies Capstone (3 Credit Hours)
Pre-requisites: COMM 240 and (COMM 361, COMM 365, COMM 367 or COMM 368)
This course serves as a finishing academic experience which wraps up the student's academic work in Communication Studies, whether their concentration is Organizational Communication, Digital Media, or Social Media and Society. In this course, you will create a project on a topic that interests you within communication studies. The project should make an original contribution to communication studies by adding new ideas, insights, or perspectives. The project can take many forms, including an academic paper, a social media campaign, or a creative text such as a podcast, a performance, or a video. The student will determine the nature of their project in class and workshop ideas to peers and instructor.
Outcomes:
Design and produce an original research project, an applied communication project, or a creative text/performance that demonstrates intellectual rigor, methodological coherence, and ability to use creative skills; Integrate and apply key communication concepts and methods to make sense of a complex question, problem, or theme within their project; Present a project effectively using clear, engaging, and well-organized oral and mediated communication; Collaborate in workshop settings by giving and incorporating constructive feedback, demonstrating professional communication, reflective listening, and self-assessment of their own learning; Demonstrate professional competencies, work readiness and an understanding of the ethical implications of their academic or creative projects

COMM 391 Advertising/Public Relations Internship (3 Credit Hours)
Pre-requisites: Junior Standing (60 credits earned); Completed 18 credit hours in COMM courses; Restricted to ADPR majors; Instructor Consent; More info at: https://www.luc.edu/soc/resources/internships/
This supervised field experience enables students to have hands-on professional learning at a wide range of agency, corporate, and non-profit organizations as the basis for learning and refining professional communication skills.
This course satisfies the Engaged Learning requirement.
Course equivalencies: CMUN396/COM391/392/393/491/492

COMM 392 Multimedia Journalism Internship (3 Credit Hours)
Pre-requisites: Junior Standing (60 credits earned); Restricted to MJRN majors; Instructor Consent required; More info at: https://www.luc.edu/soc/resources/internships/
This supervised field experience enables students to have hands-on professional learning at a wide range of agency, corporate, and non-profit organizations as the basis for learning and refining professional communication skills.
This course satisfies the Engaged Learning requirement.
Course equivalencies: CMUN396/COM391/392/393/491/492
Outcomes:
Students gain proficiency in professional conduct and industry skills while systematically reflecting on their experiences

COMM 393 Communication Studies Internship (3 Credit Hours)
Pre-requisites: Junior Standing (60 credits earned); Restricted to CMAS and CMUN majors; Instructor Consent required; More info at: https://www.luc.edu/soc/resources/internships/
This supervised field experience enables students to have hands-on professional learning at a wide range of agency, corporate, and non-profit organizations as the basis for learning and refining professional communication skills. Students gain proficiency in professional conduct and industry skills while systematically reflecting on their experiences.
This course satisfies the Engaged Learning requirement.
Course equivalencies: CMUN396/COM391/392/393/491/492

COMM 394 Film & Digital Media Internship (3 Credit Hours)
Pre-requisites: Junior Standing (60 credits earned); Restricted to FDMD majors; Instructor Consent required; More info at: https://www.luc.edu/soc/resources/internships/
Complete an internship providing an opportunity to use their visual and technical and/ or skills in a professional setting.
This course satisfies the Engaged Learning requirement.
Course equivalencies: COMM 394/COMM 494
Outcomes:
Students work with others to develop and complete projects on a predetermined schedule; they get the opportunity to learn from professionals in the field; they find out how well they are doing as judged by the world outside the classroom

COMM 395 Sports Media Internship (3 Credit Hours)
Pre-requisites: Junior Standing; Restricted to Sports Media majors
This supervised field experience enables students to have hands-on professional learning at a wide range of sports-related roles and organizations, including but not limit to teams, venues, non-profits, agencies, and corporations as the basis for learning and refining professional communication skills in the sports industry.
Outcomes:
Work in collaborative environments; Synthesize academic and professional experiences; Market and present oneself as a communication professional

COMM 398 Directed Study (1-3 Credit Hours)
Pre-requisites: Department Consent, Student must develop a project with a full-time faculty member in their SOC major, Paperwork is required Course may be taken for variable credit (1-3 hours). Students will work independently in their area of interest with a supervising faculty member whose expertise is in that area. Projects may include, but are not limited to: a reading course, where a student contracts to read and create an annotated bibliography of research materials; a writing course, where a student has developed a strong paper for a course and wants to refine it for possible conference presentation and/or publication, etc.
Outcomes:
Conduct thorough research and collect quantitative and qualitative information for a research project or a creative project; Produce polished, professional-grade media content using the latest technology, such as 1) a documentary, experimental, or narrative film, 2) written long-form journalism, 3) a video or audio journalism project, 4) an advertising or public relations campaign, or 5) a marketing campaign for a non-profit organization; Apply advanced knowledge of narrative structure, visual storytelling, or media production equipment; Critically analyze, evaluate, and contextualize media messages or theoretical concepts in the field; Identify the social, historical, and ideological forces that shape media

COMM 400 Emerging Creative Technologies (3 Credit Hours)
Emerging Creative Technologies explores the dynamic intersection of user experience, multimedia storytelling, visual communication, and emerging creative technologies. Students will gain foundational knowledge in UX/UI design while developing hands-on skills across digital content formats, including video, visual design, generative AI, and portfolio creation. The course blends academic study with real-world creative application. Students will analyze contemporary media platforms, examine how digital environments influence audience behavior, and produce original creative work that reflects strategic thinking and professional identity. By the end of the session, students will build a polished portfolio showcasing their capabilities as digital creators, communicators, and storytellers.
Outcomes:
Apply UX and UI principles to digital storytelling, multimedia design, and content strategy; Create original digital content across multiple formats, including image, video, and written assets; Responsibly incorporate generative AI as part of creative ideation and production workflows; Evaluate the cultural, ethical, and strategic implications of content creation within digital environments; Build and refine a professional digital portfolio suitable for graduate-level and industry use; Develop a reflective understanding of creative identity and long-term professional goals

COMM 401 Foundations of Global Strategic Communication (3 Credit Hours)
This course delves into two areas impacting communicators' success in the global arena: new media and culture. Through a blend of class discussions, interactive activities and guest speakers, students will study frameworks for strategic communication in a global environment and then apply these lessons in group and individual projects. Enrollment limited to students in GSCM-MS Program. Students are expected to understand fundamental concepts in strategic communication, be able to identify and explain the role of strategic communication in the global business context, understand the importance of dialogue and engagement, and have the ability to construct effective messages.

COMM 402 Organizational Leadership and Change Management (3 Credit Hours)
Students will examine best practices in organizational leadership and change management. Students will also be introduced to major economic, financial and business principles and the terms, concepts and values that guide organizations. Finally, will gain insights that will enable them to work more effectively as communicators and organizational leaders. Enrollment limited to students in GSCM-MS Program. Students are expected to gain knowledge and leadership skills needed to help organizations chart a successful course through change. They are also expected to understand the major drivers of organizational change; the role leadership plays in anticipating, planning and navigating organizational change.

COMM 403 Strategic Communication Research Methods (3 Credit Hours)
This course is designed to provide students with a critical framework for evaluating communication research and first-hand experience in the research process. Specifically, we will examine how research questions, originating from client-specific interests, are translated into a research project. Enrollment limited to students in the GSCM-MS Program. Students are expected to know how to read and evaluate a research study, select appropriate research questions, develop measurements, draw a sample, collect and analyze data and interpret the results.

COMM 405 Story Development and Production (3 Credit Hours)
This course will give students a basic understanding of narrative theory and its evolution. It will also emphasize the idea that telling a good story begins with having something to say and a purpose for telling it to someone. Students must be enrolled in SOC Professional Degree Program MC in Digital Storytelling.
Outcomes:
Students will read, write and practice narrative techniques on electronic modes of communication while learning about narrative structure, content and form of delivery

COMM 406 Environmental Advocacy (3 Credit Hours)
Pre-requisites: COMM 100 and Sophomore standing; Prerequisites are waived for undergraduate and graduate students in the School of Environmental sustainability and for students in the Digital Media and Storytelling program
This course explores the rhetorical means by which citizens influence the policies and practices affecting our natural and human environments. The focus is on current controversies.
Course equivalencies: X - COMM 306 / COMM 406
Outcomes:
The course seeks to provide an understanding of the history and range of communication styles in the US environmental movement and to help students develop practical skills relevant to entering into environmental debates

COMM 409 Video Production Lab (3 Credit Hours)
Pre-requisites: Restricted to students in the Digital Media and Storytelling MC program
This six-week graduate course is designed as an entry-level introduction to the foundational concepts and techniques in video, audio, and editing production. This class prepares students with little to no prior experience in video and audio production to readily participate in the Digital Media and Storytelling (DMST) master's program. Students with some or greater knowledge in this field will also have the opportunity to expand their prior knowledge as the course focuses on developing practical skills to effectively capture and edit video and audio elements to create compelling visual narratives. Students will be provided access to industry- standard tools while learning how to shape stories using best practices in media production. Throughout the course, students will explore the fundamentals of video production, including camera operation, sound recording, and editing software using Adobe software. Emphasis will be placed on hands-on experience, with each student producing and editing short video projects that integrate both visual and audio storytelling techniques.
Outcomes:
Demonstrate proficiency in operating digital video cameras and audio recording equipment to capture high-quality footage and sound for storytelling purposes; Apply fundamental techniques of video composition, including framing, lighting, and shot sequencing, to create visually compelling narratives; Utilize industry-standard editing software, such as Adobe Premiere Pro, to edit and assemble video and audio elements into coherent short-form productions; Implement basic audio post-production techniques, including dialog editing, sound effects creation, and mixing, to enhance the overall quality of video projects; Develop and execute a complete video production workflow, from pre-production planning to final delivery, demonstrating an understanding of storytelling principles and best practices in digital media production

COMM 410 Media Law for Inclusive Digital Storytelling (3 Credit Hours)
This course addresses how courts and lawmakers have addressed legal issues presented by digital media. Students must be enrolled in Professional Degree Program MC in Digital Storytelling.
Outcomes:
Students will learn some of the ways that blogger's rights, intellectual property, libel, privacy and threats pose challenges to internet legal regulations and social ethics

COMM 411 Strategic Communication Ethics and Law (3 Credit Hours)
Pre-requisites: Restricted to students in the Global Strategic Communication MS and Digital Advertising MS programs
This course examines diverse methods for identifying legal and ethical issues that arise from organizational communication practices within strategic communication contexts. Students will develop the ability to recognize a broad spectrum of concerns and apply systematic analytical approaches to clearly resolve business-related challenges.
Outcomes:
Recognize the tensions inherent in serving as an advocate for an organization while also having duties to the public; Be able to recognize and critically assess ethical strategic communication issues; Apply classical ethical theories using ethical decision-making processes to evaluate potential courses of action in response to contemporary strategic communication ethics case studies; Be able to develop a workshop to introduce an ethical decision-making process that you recommend for adoption in an organization or profession; Demonstrate a broad understanding of the history and scope of the First Amendment as well as a thorough knowledge of the laws and regulations that uniquely affect media industries and media professionals; Identify legal problems in real and hypothetical situations and resolve those problems by applying legal principles; Reflect on the meaning of freedom of speech in society and the rights and duties of media professionals

COMM 412 Communication Content Mining and Analytics (3 Credit Hours)
This course is for students interested in learning practical data analysis/data mining techniques in strategic communication. A useful takeaway from the course will be the ability to perform powerful data analysis using popular statistic packages (e.g., R, SPSS, Excel) and web analytics (e.g., Google Analytics). Enrollment limited to students in the GSCM-MS Program. Students are expected to increase their critical thinking ability to assess the quality of consumer information and the limitations of online data. They will become familiar with frequently used data analysis tools.

COMM 413 Writing for Strategic Communication (3 Credit Hours)
This advanced writing intensive course engages students in the strategic process of professional-level writing by focusing on communication objectives, cultural differences among audiences, techniques, style and mechanics. Students will learn the importance of planning, research, pre-writing, editing and rewriting in the writing process. Restricted to Global Strategic Communication Students
Outcomes:
The course also provides practical, real world writing experience in diverse formats for a wide range of audiences, including memos, proposals, creative briefs, executive speeches, op-eds, fact sheets, news releases, blogs and other social media

COMM 414 Advertising Campaigns (3 Credit Hours)
Pre-requisites: Restricted to MS in Digital Advertising Students
In this Advertising Campaigns class, students will explore the profound impact of rapidly evolving technologies on modern advertising practices. The course examines how changing media consumption behaviors have transformed consumer journeys from linear patterns to complex, interconnected experiences driven by micro-moments and personal intents. Students will critically analyze traditional advertising agency models, identifying why many long-standing practices are becoming obsolete in today's digital landscape. The class will challenge participants to rethink creative processes and develop innovative approaches that align with current market demands and communication goals. Through collaborative projects and discussions, students will work to bridge the gap between conventional advertising wisdom and the realities of the digital age. The course emphasizes the need for original thinking and adaptability in crafting effective campaigns that resonate across various touchpoints in consumers' lives.
Outcomes:
Analyze the impact of changing technologies on consumer behavior and media consumption patterns; Evaluate traditional advertising models and identify areas for innovation in the digital age; Develop strategies to engage consumers across multiple touchpoints throughout their non-linear consumer journey; Create data-driven, intent-based advertising campaigns that resonate with target audiences in their micro-moments; Design integrated campaigns that seamlessly blend traditional and digital advertising approaches; Apply critical thinking skills to assess and adapt campaign strategies in response to rapidly changing market conditions

COMM 415 Career and Portfolio Development (3 Credit Hours)
This course prepares students for professional life after graduation by focusing on how to build and present themselves as media professionals. Students will clarify their strengths, shape a distinctive professional identity, and learn how to showcase creative work in ways that connect to specific roles and career goals. Topics include portfolio development, personal branding, professional pitching, client communication, platform etiquette, freelancing, and media entrepreneurship. Through hands-on projects, students leave the course with a set of practical, finished materials ready to use as they begin applying for jobs, seeking freelance clients, or pursuing entrepreneurial opportunities in the media industry.
Outcomes:
Articulate a clear professional identity and value proposition tailored to media industries\\n; Develop a portfolio strategy aligned with specific career goals, target audiences, and industries; Create and deliver professional pitches and application materials for employers, collaborators, and clients; Evaluate freelance, entrepreneurial, and creator-based business models for sustainable career development; Apply client communication and personal branding strategies to support long-term professional growth

COMM 417 Media Planning (3 Credit Hours)
Pre-requisites: Restricted to students in the Global Strategic Communication MS and the Dual Degree-Advertising & Public Relations BA programs
This course examines the advertising and marketing processes required to research, develop, and implement an effective media plan for budgeting appropriate advertising time and space.
Course equivalencies: COMM 317/COMM 417
Outcomes:
Student teams will develop competencies in decision-making processes and tools, including research methods, objectives, strategies, and tactics, to construct an advertising media plan

COMM 420 Digital Production: Storytelling with Impact (3 Credit Hours)
This lab-based course will introduce students to production techniques for digital storytelling. Students will acquire knowledge of videography, sound recording, video and audio editing, web design and interactivity.
Outcomes:
Students will find compelling stories, set scenes and use narrative techniques to craft influential stories designed for professional purposes in advertising, journalism or documentary production

COMM 421 Global Strategic Communication Boot Camp Chicago (3 Credit Hours)
Pre-requisites: Restricted to students in the Global Strategic Communication MS program
COMM 421 is a week-long immersion experience designed to provide students with direct engagement with leaders in public relations, advertising, digital marketing, and AI-driven communication. The course incorporates structured workshops, real-world simulation activities, and visits to professional organizations. Through these engaged learning experiences, students strengthen their understanding of strategic communication principles and develop competencies required for leadership roles in the global communication industry.
Outcomes:
Apply strategic communication frameworks in global and multicultural contexts; Analyze the role of AI and emerging technologies in PR and advertising; Engage with industry professionals to understand current trends and challenges; Reflect critically on the ethical and cultural dimensions of global communication practices

COMM 422 Global and Multicultural Audiences and Stakeholders (3 Credit Hours)
In this course students will investigate various audiences in today's global marketplace that organizations need to consider to remain relevant. The course will explore the concept of globalization and how, as a dynamic and uneven process, it requires practitioners to understand global and local audiences and those influenced by multiple cultures. Restricted to ADPR-BASD, GSCM-MS, and DMST-MC students.
Outcomes:
The goals of the course are to learn to be sensitive to a variety of cultures; recognize particular values, needs, and behaviors; and craft messages that connect and engage

COMM 425 AI-Powered Marketing and Analytics (3 Credit Hours)
This course will explore online audience behavior and measurement. Students will use analytics to understand user activities and to drive improvements in distribution performance. In the course of their development, students will come to understand intellectual property protection, self-publication, bandwidth issues, usability, file formats, social sharing, security, syndication, and mobile delivery.
Outcomes:
Analyze digital audience behavior using analytics tools to inform marketing strategies and content distribution decisions; Evaluate the legal, marketing, and economic factors affecting digital content distribution and audience targeting; Implement data-driven strategies to improve digital content performance and audience engagement across various platforms; Design digital marketing materials that comply with intellectual property laws and address security and usability concerns; Optimize digital content for multi-platform delivery, with a focus on mobile and social media channels, considering bandwidth and file format implications

COMM 426 Strategic Business Communication for Social Impact (3 Credit Hours)
The strategic simulation class setting will engage the students in the imaginary leadership role to exercise how to make an ethical decision on the issues and challenges. This incorporates a mix of lectures, case discussions, role-playing, and group projects in real-world applications.
Outcomes:
Apply fundamental principles of communication in different organizational contexts\\n; Demonstrate ability to write and present effectively, considering audience and purpose; Understand and address critical challenges during crises; Identify communication solutions to foster a positive team culture through employee communication; Leverage ethical communication in decision-making and problem-solving; Navigate cross-cultural and global communication issues and differences

COMM 429 Advertising and Public Relations Design (3 Credit Hours)
Pre-requisites: Restricted to students in the Global Strategic Communication MS and the Dual Degree-Advertising & Public Relations BA programs
This course is for students who want to understand the creative and design discipline of the fields. Students will learn the fundamentals of print-based messages used in advertising and public relations. Students will employ various design programs applied in today's industry to develop visual communications projects, which will culminate in a final portfolio.
Course equivalencies: COMM 329/COMM 429
Outcomes:
Students will learn and become competent in the following: Current design programs, including InDesign and Photoshop; Basic design principles, such as color, space, and typography; Common formats for designing integrated marketing communication print materials

COMM 430 Multiplatform Visual Design (3 Credit Hours)
Pre-requisites: Restricted to students in the Digital Media and Storytelling MC program
This course will focus on digital design with emphasis on creation, refinement, and publishing of content in multiple formats. Through the lens of visual storytelling, we will explore photography and photo-editing, typography and graphic design, and animation and motion graphics using a combination of research, discussion, and hands-on workshops. We will also discuss methods of print and web design in a practical context, both as artistic expression and commercial production.
Outcomes:
Develop an understanding of visual design principles; Gain experience using the Adobe Creative Suite (Photoshop, AfterEffects, Illustrator, InDesign); Learn basic technical skills for digital photographic equipment; Explore the theoretical and practical place of digital and print visual design

COMM 431 Campaign for Social Impact (3 Credit Hours)
This course empowers students to design, implement, and evaluate digital campaigns using Integrative Marketing Communication (IMC) principles with a strong emphasis on community service and engaged learning. Students will work on hands-on projects that address real-world community needs, applying research, planning, implementation, and evaluation strategies. Through case studies, client campaigns, and community-based initiatives, students will build a portfolio of projects that not only enhance their professional skills but also contribute positively to the community and society.
Outcomes:
Develop and manage online content promotion and branded digital campaigns to promote community-based initiatives and social causes; Apply critical thinking and research skills to craft clear messages and digital materials for social good; Execute social media engagement and user-oriented content strategies; Evaluate campaign success by setting the key performance indicators (KPIs) to assess the effectiveness of campaigns and their impact on community improvement; Engage in a cycle of practice, feedback, and refinement to develop transferable skills while making meaningful contributions to community projects

COMM 432 Public Interest Communication (3 Credit Hours)
This course explores the principles and best practices of strategic communication aimed at achieving lasting, positive social change in various areas, including climate change, racial justice, healthcare access, and housing policy. This interdisciplinary program draws from practice and scholarship in public relations, journalism, advertising, psychology, sociology, political science, anthropology, and neuroscience. This course is custom-tailored for current and future communications directors at a nonprofit organization or a media relations officer at a foundation being an account executive at a strategic communications firm.
Outcomes:
Identify and target issues that can be addressed with public interest communications; Conduct research to underpin strategic communications aimed at driving social change; Use systems thinking to identify a specific approach to driving change; Develop strategic communication initiatives that can drive positive social change; Advocate and advise in the use of visual collateral that can best reach the target community

COMM 433 Corporate Communication (3 Credit Hours)
Pre-requisites: For GSCM-MS students, COMM 401; DMST-MC students may also enroll without pre-requisite
This course develops a multiple stakeholder approach to managing the communication function in corporations. Management topics include developing a communication plan, budgeting, creating a communications calendar, working with agencies and other external resources, project management and evaluation.
Outcomes:
At the end of the course, students are expected to understand how the communication function is organized in corporations and non-governmental organizations (NGOs)

COMM 434 Business-to-Business Communication (3 Credit Hours)
The robust business-to-business (B2B) sector provides enormous opportunity in the global marketplace. This course will explore B2B's unique set of challenges that strategic communicators need to consider in developing and delivering effective messages. Restricted to Global Strategic Communication Students.
Outcomes:
Students are expected to gain a working knowledge of the theories, concepts, and issues of in B2B communication

COMM 435 Public Affairs and Issues Management (3 Credit Hours)
The course explores how to predict and identify emerging issues, which can proliferate rapidly through digital and social media; accurately assess the potential threat posed by issues; and plan and implement effective response to prevent issues from growing into crises. Restricted to Global Strategic Communication Students.
Outcomes:
At the end of the course, students will understand the role of the public affairs function in organizations, know how to monitor for and identify emerging issues and to build a firewall to make organizations less vulnerable to attack

COMM 436 Social Media Crisis Communication (3 Credit Hours)
This course focuses on realistic social media issues and crisis cases and students' practices on how to respond to fast-paced information on multiple social media channels and to create effective responses. This course is custom-tailored for current and future PR managers, digital specialists, community managers, and others who need to have a high degree of public visibility and responsibility.
Outcomes:
Master crisis communication theories; Identify different types of crises; Successfully manage social media during a crisis; Develop key messages and identify and implement the preemptive and responsive strategies; Train yourself as a spokesperson

COMM 437 Advertising and Public Relations Multimedia Commercial Production (3 Credit Hours)
Pre-requisites: Restricted to students in the Digital Media and Storytelling MC, the Global Strategic Communication MS, and the Dual Degree-Advertising & Public Relations BA programs
This is an advanced video and advertising course designed to give students an introduction to various types of multimedia commercials as well as practical considerations of producing branded content and television spots, including for real clients.
Course equivalencies: COMM 337/COMM 437
Outcomes:
Build experience in effective multi-tasking and teamwork; gain skills with technology and strategy, creative, and application process of broadcast production; and practice engaging with the community in media development efforts

COMM 438 Search & Display Advertising (3 Credit Hours)
Pre-requisites: Restricted to MS in Digital Advertising Students
This course covers the enduring foundation of digital advertising --- Search Advertising and Display Advertising, which is a part of the bigger scope called programmatic advertising. Students will be exposed to 1) fundamental concepts in search and display advertising, 2) hands-on practices on creating both search and display advertising campaign, and 3) evaluation skills in optimizing search & display advertising campaigns. This course is mostly built upon Google's advertising products. However, the fundamental logics, once acquired, can be applied to all forms of paid ads in digital space.
Outcomes:
Knowledge of the key terms and development process of search & display advertising; Knowledge of the various factors that could influence the success of search & display campaigns; Ability to develop and implement search & display advertising campaigns; Ability to evaluate and optimize for search & display advertising campaigns; Analyze and interpret complex campaign data using industry-standard analytics tools to drive performance improvements; Integrate search and display advertising strategies with broader digital marketing efforts for cohesive brand messaging and improved customer journey mapping

COMM 439 Video Documentary (3 Credit Hours)
Pre-requisites: Restricted to students in the Digital Media and Storytelling MC program
This course offers hands on production of video documentaries through the study of electronic field production technology, the analysis of documentary texts, and the application of documentary research methods.
Course equivalencies: X - COMM 339 / COMM 439
Outcomes:
Students will gains hands-on video production experience in a non-narrative genre

COMM 441 Global Strategic Communication Capstone (3 Credit Hours)
Students will synthesize & apply knowledge and skills from previous courses to demonstrate competence in a specialized area of strategic communication of greatest interest to them. Students will submit a comprehensive work, research project, media artifact, business plan, or any other comparable work approved by the instructor. In addition, students will develop fully annotated & professional quality final presentation. Enrollment is restricted to students in the GSCM-MS Program. Students are expected to become more knowledgeable in an area of specialization by exploring a specific type of strategic communication, engaging in research, building relationships with professionals and developing creative applications to demonstrate professional-level knowledge, understanding of practices, skills & competencies.

COMM 444 Social Media Campaigns (3 Credit Hours)
Pre-requisites: Restricted to students in the Global Strategic Communication MS and the Dual Degree-Advertising & Public Relations BA programs
This interactive, hands-on, strategy-meets-execution course that is designed to help you think like a social media campaign planner and campaign creator, capable of building insight-driven strategies, selecting platforms, developing creative ideas and understanding paid/owned/earned dynamics. The goal is that at the end of the semester, you have mastered the fundamentals of consumer behavior on social platforms, strategic campaign development, creative ideation, media planning, and performance management that spans across advertising, public relations and communication practices.
Course equivalencies: COMM 331/COMM 444
Outcomes:
Master the development of comprehensive social media strategies based on consumer insights: Students will learn to identify target audiences, uncover behavioral and cultural insights, and translate these findings into high-impact social media campaign strategies; Assess specific platform nuances and audience expectations: No single platform is the same and serves different objectives for brand development and students will examine how different social media platforms operate - including their engagement patterns and algorithmic structures that shape content and communication strategies; Create professional-level customer journey maps and identify high-impact touchpoints: Students will gain experience in mapping consumer paths across platforms and identify moments of opportunity for engagement, influence, and/or conversion within multi-platform journeys; Generate upper-level creative content strategies tailored to platform-specific audiences: Students will gain experience in creating platform-specific campaigns that are targeted to specific audiences, delivering on the client's brief expectations; Present professional-level social media campaign recommendations to clients: Students will get firsthand experience in presenting an industry-standard integrated social media campaign program

COMM 445 Creating ADPR Content with AI (3 Credit Hours)
Pre-requisites: COMM 211 or enrollment in the Global Strategic Communication (MS) program
This course explores the current practices, opportunities, challenges, and ethics of strategic integration of Artificial Intelligence (AI) and Generative AI (GAI) into advertising, public relations, and communication workflows. Students learn various AI platforms and how to use AI for audience research, content creation, and campaign optimization while navigating the ethical and legal implications of automated communication.
Course equivalencies: COMM 335 / COMM 445
Outcomes:
Have comprehensive knowledge of the AI platforms and tools used for creating effective strategic communication content; Master how to integrate AI to reduce creative production time; Understand at a professional level the ethical implementations for AI use including navigating transparency, data privacy, and other issues; Master the skills of working effectively in teams to prepare marketing communication programs

COMM 448 Short-Form Series Production (3 Credit Hours)
Pre-requisites: Restricted to students in the Digital Media and Storytelling MC program
This course prepares students to design, produce, and evaluate professional-quality short-form digital media through the creation of original, serialized video projects. Students will develop skills in visual storytelling, pacing, audience engagement, and multiplatform production while applying industry-standard workflows for planning, shooting, editing, and post-production. By the end of the course, students will be able to produce cohesive digital series content, make informed creative and technical decisions, and critically reflect on their work in ways that support both portfolio development and professional practice in contemporary media industries.
Outcomes:
Develop a multi-part story series with a clear theme connecting all episodes; Execute all stages from pre-production planning through final delivery, demonstrating competency in shooting, editing, sound design, and post-production; Apply critical feedback by engaging in constructive peer critique; Articulate the creative process behind their original content, including the challenges faced and solutions implemented during project development; Manage production timelines by working efficiently under deadline pressure, problem-solving independently, and delivering completed work on schedule

COMM 449 Capstone Seminar (3 Credit Hours)
Pre-requisites: COMM 400
Capstone Seminar is designed to equip students with the necessary skills, knowledge, and strategies to successfully complete their culminating capstone project. This course focuses on project planning, development and execution. Students will develop a clear project proposal, enhance their research and critical thinking skills. Through workshops, peer feedback, and faculty guidance, students will develop their capstone project idea and establish timelines. By the end of this course, students will have a solid foundation to confidently begin their capstone project.
Outcomes:
Students will develop skills in project planning and time management, including setting timelines, defining objectives, and coordinating resources for their capstone project; Students will analyze and critique various forms of digital media, understanding their impact on audiences and the techniques used to create them; Students will conduct research relevant to their capstone project, utilizing academic and industry sources to inform their work; Students will understand and apply ethical principles in digital media production, including copyright, privacy, and representation; Students will complete a proposal or preliminary work that prepares them for successful execution of their capstone project; Students will engage in self-assessment and reflection on their learning experiences, identifying strengths and areas for improvement as they prepare for their capstone

COMM 450 Capstone II (3 Credit Hours)
Pre-requisites: COMM 400, 405, 410, 415, 420, 425, and 430
This course involves integration of new media tools and storytelling, culminating in a professional project that is conveyed to public audiences and widely distributed.

COMM 455 Animation (3 Credit Hours)
Pre-requisites: Restricted to students in the Digital Media and Storytelling MC program
This course will focus on animation with specific emphasis on the creation, refinement, and publishing of a visual story. Students will learn 2D and 3D techniques, cameras, CGI and other software and equipment to create animated works.
Course equivalencies: COMM 305/COMM 455
Outcomes:
Theories of visual and image-based storytelling; script writing; character development; storyboarding; creating visual stories from images; animation enhancement/manipulation; graphic design; and contemporary animation design options for visual storytelling/promotion

COMM 458 Newscasting and Producing (3 Credit Hours)
Pre-requisites: Restricted to students in the Digital Media and Storytelling MC program
This is designed as a capstone course for the broadcast journalism emphasis. It covers all aspects of TV (or web) newscasts, including producing, anchoring, reporting, photography, and editing, as well as studio production. The class produces and delivers newscasts designed to prepare students for work in the TV news industry.
Course equivalencies: COMM 358/COMM 458

COMM 459 Advanced Post Production (3 Credit Hours)
Pre-requisites: Restricted to students in the Digital Media and Storytelling MC program
This course combines advanced editing theory and practice, aimed at providing students with the skills required for editing motion pictures of all genres and for all platforms.
Course equivalencies: X - COMM 359 / COMM 459
Outcomes:
Students will learn how to edit for motion pictures of all forms

COMM 460 AI and Media Experience Design (3 Credit Hours)
Pre-requisites: Restricted to students in the Digital Advertising MS program
This advanced, practice-oriented course examines how artificial intelligence is reshaping the end-to-end advertising value chain--from insight generation and creative development to personalization, media optimization, and customer experience design. Building on foundational AI-in-advertising concepts, students will develop the skills to design AI-enabled creative systems, prototype AI-driven experiences (including conversational and agentic interfaces), and evaluate the ethical, legal, and strategic tradeoffs of deploying AI in Business-to-Consumer (B2C) contexts. The course emphasizes hands-on experimentation with current AI tools, frameworks for trustworthy deployment, and professional communication of AI strategy to stakeholders.
Outcomes:
Explain core AI capabilities and limitations in advertising contexts; Design generative AI workflows for creative production; Translate business problems into AI-assisted insight and measurement plans; Prototype conversational/agentic customer experiences; Evaluate ethical, legal, and governance implications of AI deployment; Present AI strategy and implementation recommendations professionally

COMM 461 Health Communication (3 Credit Hours)
Pre-requisites: Restricted to students in the Global Strategic Communication MS and the Dual Degree-Advertising & Public Relations BA programs
This course focuses on the growing field of health communication. Building on students' knowledge of public relations, advertising, communication, and marketing, this class aims to help students develop an area of specialization that offers career opportunities in many settings. Through guest speakers and field trips, the class is designed to provide an overview of what health communicators do and where they work.
Course equivalencies: COMM 311/COMM 461
Outcomes:
Provide a foundation of knowledge about the US healthcare system and acquaint students with how communications can play a vital role in accomplishing public health objectives

COMM 462 Health Literacy & Digital Technology (3 Credit Hours)
This course explores a deeper understanding of the potential of digital communication tools to improve health literacy and contribute to better health outcomes across the full spectrum of healthcare. This course prepares these students to enter a local health department, community organization, or government agency, and global health communication PR consultancy, which contributes to health communication research, patient counseling, materials design, and program management.
Outcomes:
Be skilled in analyzing, interpreting, and communicating complex health concepts across a wide range of media platforms, equipping them to effectively manage health communication in a digital landscape; Describe and assess the ecological factors that affect health literacy; Assess the potential for digital technologies to either bridge or deepen health inequities based on factors such as age, education, socio-economic status, and geographic location; Evaluate the role of digital health interventions in addressing health system deficiencies, particularly in underserved or remote areas, and understand the challenges related to infrastructure and accessibility; Monitor and evaluate the utilization and impact of digital health technologies across different social groups to ensure that the benefits of digital health are equitably distributed; Develop communication interventions that leverage digital technologies to improve health equity, ensuring that these innovations do not reinforce existing social and health inequities

COMM 463 Intermediate Advertising Design (3 Credit Hours)
Pre-requisites: Restricted to students in the Digital Media and Storytelling MC, the Global Strategic Communication MS, and the Dual Degree-Advertising & Public Relations BA programs
Builds on the creative skills and understanding acquired in the introductory advertising creative courses to enhance students' conceptual abilities. Utilizing Adobe InDesign and Photoshop, students learn to design for various advertising formats including digital, print, and for client presentations.
Course equivalencies: COMM 330/COMM 463
Outcomes:
The best work is finished on computers and reviewed by advertising professionals at the end of the semester

COMM 464 Mobile Advertising (3 Credit Hours)
Pre-requisites: Restricted to students in the Digital Media and Storytelling MC, the Global Strategic Communication MS, and the Dual Degree-Advertising & Public Relations BA programs
Mobile is one of the most valued investments for advertisers. This course covers the latest practices and trends of mobile advertising which includes 1) branded mobile application design and development; 2) advanced mobile experiences with AR/VR experiments; and 3) various practices, tactics, and ethical concerns for native mobile advertising experiences.
Course equivalencies: COMM 334/COMM 464
Outcomes:
Knowledge of relevant human-computer interaction theories and branded mobile design/development; Ability to use digital tools to create mobile advertising campaigns; Understanding of importance and implications of ethics in mobile advertising

COMM 466 Advanced Quantitative Research Methods (3 Credit Hours)
Pre-requisites: Restricted to MS in Digital Advertising Students
This course is students to get familiar with sophisticated statistical techniques and data analysis procedures in conducting academic research in the field of advertising. The course will cover topics such as experimental design, survey design, regression analysis, moderation analysis, mediation analysis, structural equation modeling, and longitudinal data analysis. Hands-on sessions using statistical software (e.g., SPSS) will be integral, allowing students to gain practical experience with real datasets. The course will culminate in a final project where students will apply learned methods to a research question of their choice, fostering skills in research design, data analysis, and scholarly communication.
Outcomes:
Understand and apply advanced statistical methods in research; Proficiently use statistical software for data analysis; Design and execute quantitative research studies; Interpret and critically evaluate quantitative research findings; Communicate research findings effectively through written and oral presentations; Develop a research project proposal using advanced quantitative methods

COMM 467 Advanced Digital Analytics (3 Credit Hours)
Pre-requisites: Restricted to MS in Digital Advertising Students
This is an intense course designed for students who have a foundational understanding of digital data analysis and are looking to deepen their expertise. This course will explore the advanced techniques and tools used in the analysis of digital data, with a strong emphasis on SQL and its applications in digital analytics. The course integrates theoretical knowledge with practical skills, offering hands-on sessions where students will work with real data sets. Students will learn to extract, transform, and analyze data from various digital sources to make informed business decisions. The course culminates in a capstone project where students apply their skills to solve a real-world digital analytics problem.
Outcomes:
Demonstrate advanced understanding of digital data sources and structures; Proficiently use SQL for complex data queries and analysis; Apply statistical methods to analyze and interpret digital data; Integrate data from multiple sources for comprehensive analytics; Develop and execute a digital analytics project from conception to completion; Effectively communicate analytical findings to both technical and non-technical audiences

COMM 468 Consumer Psychology (3 Credit Hours)
This is a course designed for students who wants to explore the psychological principles and theories underlying consumer behavior, offering insights into how consumers think, feel, and make decisions. In a format of seminar discussion, students will be exposed to a blend of theoretical exploration and practical applications. They will also examine various aspects of consumer psychology to analyze real-world examples, and concludes with a project where students apply their understanding to a consumer behavior problem or opportunity.
Outcomes:
Understand key psychological theories relevant to consumer behavior; Analyze how consumer perception, motivation, and decision-making processes influence buying behavior; Apply consumer psychology principles to marketing and business strategies; Evaluate the impact of social and cultural factors on consumer behavior; Conduct research and analyze data to inform consumer psychology insights; Develop and present a comprehensive project that applies consumer psychology concepts to a real-world problem

COMM 469 Digital User Experience Strategy (3 Credit Hours)
Pre-requisites: Restricted to students in the Global Strategic Communication MS and Digital Advertising MS programs
This course is redesigned to cover emerging topics in persuasive technology design on different types of interfaces and settings. The course will cover the foundations of persuasive UX/UI design, specifically in the context of strategic communication. Students will learn the core user experience (UX) design principles, including usability heuristics, information architecture, and behavioral economics applied in digital advertising and marketing, such as urgency and scarcity tactics, social proof implementation, and neuromarketing principles. Students will learn the psychological triggers that drive purchase decisions and consumer engagement and satisfaction based on solid scientific evidence.
Outcomes:
Understand the principles of user experience and their application in persuasion; Apply design thinking to create innovative solutions; Design effective UI and UX systems for digital communication campaigns; Implement human-centered design approaches in digital strategies; Recognize and address ethical considerations in user experience for diverse audiences; Develop skills in virtual agent design for persuasion purpose; Create and evaluate a comprehensive project that integrates UI/UX and ethical considerations

COMM 470 Special Topics in Advertising and Public Relations (3 Credit Hours)
Pre-requisites: Restricted to students in the Global Strategic Communication MS and the Dual Degree-Advertising & Public Relations BA programs
These are advanced courses in specialized AD/PR areas. Titles and content vary, and prerequisites are established according to course content. May be repeated with different topics for a total of 9 credit hours, but only 6 credit hours may count toward the major.
Course equivalencies: COMM 370/COMM 470

COMM 471 Media Commerce and Platform Ecosystems (3 Credit Hours)
Pre-requisites: Restricted to students in the Digital Advertising MS program
This interactive, hands-on, strategy-meets-execution course is designed to prepare you to plan and operate advertising and content programs inside commerce and platform ecosystems, where media exposure and point of sale are increasingly inseparable. Students will learn a strategic overview of retail media networks, social commerce, and live commerce and practice the operational skills needed to drive measurable outcomes, including product visibility, add-to-cart, conversion, and revenue. The course moves beyond traditional ad metrics (clicks and impressions) to focus on commerce-ready creative, product data and merchandising fundamentals, shopper journey design, and performance measurement within online retail and social environments.
Outcomes:
Explain how commerce and platform ecosystems work; Plan commerce-first strategies based on shopper insights; Develop commerce-ready creative and content systems; Operate shopping and retail media campaigns; Measure performance using commerce metrics; Present professional commerce recommendations

COMM 473 Digital Storytelling Abroad (3 Credit Hours)
Pre-requisites: Restricted to students in the Digital Media and Storytelling MC program
Participants will learn and execute multimedia storytelling in an international setting. This course will help students enhance their video, writing, interviewing, photography, and editing skills within another country and cultural context.
Course equivalencies: COMM 373/COMM 473

COMM 479 Digital Sustainability (3 Credit Hours)
Pre-requisites: DMST and SES grad students can enroll
Digital Sustainability explores the environmental impact of digital media. Mining precious metals to manufacture devices, burning fossil fuels to run data centers, global black market trading of e-waste are points where the digital world meets the physical world. Students will explore digital sustainability problems, and work toward creative solutions.
Course equivalencies: COMM 379 / COMM 479
Outcomes:
Learn about environmental issues stemming from digital media infrastructure; Critically evaluate different disciplinary perspectives to gain a broader understanding; Develop ethical reasoning regarding environmental impact resulting from digital media ecology

COMM 480 Advertising and Emerging Media Capstone (3 Credit Hours)
Pre-requisites: Restricted to students in the Digital Advertising MS program
The MS Advertising and Emerging Media capstone project focuses on idea generation, research, and strategic planning. Students will choose between a data-driven research project or a production-focused advertising project, working closely with a supervisor to develop a comprehensive project proposal. For research-oriented projects, students will conduct a thorough literature review, identify research gaps, and formulate hypotheses or research questions. Those pursuing production projects will analyze market trends, extract consumer insights, and create a detailed creative brief for a real-world client. Both tracks emphasize critical thinking, strategic planning, and the development of a solid foundation for project execution. Through weekly meetings with supervisors and structured modules, students will refine their project concepts, ensuring they are well-prepared for the execution phase.
Outcomes:
Conduct comprehensive background research on a selected real-world client, understand the market challenge, and build a situational analysis; Formulate clear research questions, hypotheses, or creative briefs that guide the project's development; Develop a thorough project proposal, including objectives, methodologies, and expected outcomes; Demonstrate critical thinking in identifying research gaps or market opportunities; Apply ethical considerations in research design or advertising strategy development; Articulate complex ideas clearly in both written proposals and oral presentations

COMM 481 Project II (3 Credit Hours)
Building on the foundation laid in Phase 1, this course guides students through the execution, analysis, and presentation of their capstone projects. Students pursuing data-driven research will collect and analyze data, interpret findings, and prepare a comprehensive research paper. Those engaged in production projects will create tangible advertising materials based on their creative briefs, such as integrated campaigns, digital content, or other innovative advertising solutions. Both tracks emphasize practical application of skills, problem-solving, and the ability to adapt to challenges that arise during project execution. The course maintains a focus on weekly supervision meetings and structured modules to support students through data analysis or creative production, culminating in a final presentation of their completed projects. This phase prepares students to deliver high-quality, professional-grade work that demonstrates their readiness for advanced roles in the advertising industry or further academic pursuit.
Outcomes:
Execute the designed research methodology or creative strategy effectively; Analyze and interpret data or consumer insights to drive decision-making in research findings or creative execution; Create professional-quality deliverables, such as research papers or advertising materials, that meet industry or academic standards; Utilize technical skills relevant to their chosen project type, such as statistical analysis software or creative design tools; Manage a long-term project effectively, adhering to timelines and adapting to challenges as they arise; Demonstrate problem-solving skills in addressing unexpected challenges during project execution

COMM 491 Advertising/Public Relations Internship (3 Credit Hours)
This supervised field experience enables students to have hands-on professional learning at a wide range of agency, corporate, and non-profit organizations as the basis for learning and refining professional communication skills. Restricted to students in the ADPR-BASD and GSCM-MS programs. Students must attend an internship orientation and submit application packet to instructor. If approved, student is enrolled in course.
Course equivalencies: CMUN396/COM391/392/393/491/492

COMM 492 Multimedia Journalism Internship (3 Credit Hours)
This supervised field experience enables students to have hands-on professional learning at a wide range of agency, corporate, and non-profit organizations as the basis for learning and refining professional communication skills. Restricted to students in the DMST-MC program.
Course equivalencies: CMUN396/COM391/392/393/491/492
Outcomes:
Students gain proficiency in professional conduct and industry skills while systematically reflecting on their experiences

COMM 494 Film & Digital Media Internship (3 Credit Hours)
Complete an internship providing an opportunity to use their visual and technical and/ or skills in a professional setting. Restricted to students in the DMST-MC program.
Course equivalencies: COMM 394/COMM 494
Outcomes:
Students work with others to develop and complete projects on a predetermined schedule; they get the opportunity to learn from professionals in the field; they find out how well they are doing as judged by the world outside the classroom

COMM 498 Directed Study for Graduate Students (1-3 Credit Hours)
Students may sign up for a one to three credit hour course to work independently in the student's area of interest with a supervising faculty member whose expertise is in that area. Projects may include, but are not limited to: a reading course, where the student contracts to read and create an annotated bibliography of research materials, a writing course, where a student has developed a strong paper for a course and wants to refine it for possible conference presentation and/or publication. Restricted to students in the DMST-MC, ADPR-BASD, and GSCM-MS programs.

COMM 700 Certificate: Digital Media Ethics (0 Credit Hours)
Loyola's Center for Digital Ethics and Policy certificate course explores codes of ethics and ethical decision making, legal limits of online speech, strategies to spot and deal with fake content, intellectual property and user generated content, understanding privacy concerns, ethical issues with big data, the ethics of deception online, among other topics.
Outcomes:
Participants will be able to understand ethical issues that are most likely to come up in their particular professional contexts and be able to take this knowledge back to their organization to help guide policy and procedure

COMM 701 Organizational Leadership and Change Management (0 Credit Hours)
Loyola's School of Communication offers a new certificate course custom-tailored for managers who want to accelerate the pace of successful change in their organizations. This course combines online learning with a focused 3-day program at Loyola, plus personalized coaching afterward. Participants will be able to shape their learning around their organization's needs.
Outcomes:
This course will help managers who want to accelerate the pace of successful change in their organizations, leading change on the front lines and managers whose supervisors have identified them as emerging leaders

Computer Science (COMP)

Discover, search, courses (p. 2661)!

COMP 102 Web Design and Multimedia Publishing (3 Credit Hours)
This course introduces foundations of the world wide web technology, HTML, and multimedia publishing techniques. Topics include HTML syntax, CSS, XML, RSS, and various multimedia formats.
Outcomes:
An understanding of the technologies behind web sites and the ability to use them effectively

COMP 104 Computer Animation (3 Credit Hours)
The course introduces techniques for understanding and developing dynamic and interactive media by using sound, motion, images, and text. Relevant software knowledge areas are covered.
Outcomes:
Ability to publish created animated media projects to the web in a process that involves understanding human interface design

COMP 111 History of Computing (3 Credit Hours)
The social and organizational history of humanity is intricately entangled with the history of technology in general and the technology of information in particular. Advances in this area have often been closely involved in social and political transformations. While the contemporary period is often referred to by such names as the Computing and Information Age, this is the culmination of a series of historical transformations that have been centuries in the making. This course will provide a venue for students to learn about history through the evolution of number systems and arithmetic, calculating and computing machines, and advanced communication technology via the internet.
Course equivalencies: X - COMP 111 / HIST 279C

COMP 112 Loyola University Technology Ensemble (1 Credit Hour)
Loyola University Technology Ensemble (LUTE) is a performing ensemble with a composition & engineering component. Its primary instrumentation is electronic or electroacoustic, encompassing digital and analogue electronic instruments, live coding, circuit bending, and repurposing of devices or objects, etc. LUTE will appear in public at least once during each semester.
Course equivalencies: X-COMP 112/MUSC 112
Outcomes:
Collaborate to compose, engineer, and perform unique technology-driven musical experiences; design interface modules for electroacoustic performance; encode musical ideas in software or digital musical instruments; perform publicly

COMP 122 Introduction to Digital Music (3 Credit Hours)
This course explores the intersection of music and computing. Topics include sound, digital audio, sampling, synthesis, sequencing, and automation. Students encounter tools and techniques of digital music and data structures for encoding musical thought as well as examples of musical creativity and technological advances resulting from experimentation and interdisciplinary thinking.
Knowledge Area: Quantitative Knowledge
Course equivalencies: X-COMP 122/MUSC 122
Outcomes:
Understanding of the physics of musical sound and data structures for digital audio and music; facility with hands-on applications of digital music composition, musicology, sound design

COMP 125 Visual Information Processing (3 Credit Hours)
Pre-requisites: Restricted to Freshman or Sophomore standing OR majors other than COMP-BS AND CSEC-BS AND SWEN-BS
This course is an introduction to fundamental programming principles and techniques. Students encounter data structures, logical operations, quantitative inputs, and object-oriented thinking through graphics, animation and personal creativity. Emphasis is on coding for interactive applications. No prior experience in computer programming is required.
Knowledge Area: Quantitative Knowledge
Outcomes:
Understanding of computer mechanisms for representing and analyzing numerical information and the role of parameters inputs in computer algorithm execution; ability to implement programming techniques to solve practical problems

COMP 141 Introduction to Computing Tools and Techniques (3 Credit Hours)
This course introduces students to the Unix shell environment and essential tools for succeeding in computer science degrees. Students who complete this course will develop fluency in the Unix (Linux) environment, which is essential for solving problems in academic, research, and professional computing disciplines.

COMP 144 Cybersecurity for All (3 Credit Hours)
This course will cover cybersecurity fundamentals, including how to think like an adversary, general awareness of cybersecurity and privacy, and cybercrime. This course is intended for any student who wants to know more about general cybersecurity and privacy issues in the "cyber" world.
Outcomes:
Ability to quantitatively and qualitatively assess cybersecurity and privacy risks, and understanding fundamentals of protecting security and privacy in a cyberworld and connections to cybercrime and other real-life scenarios

COMP 150 Introduction to Computing (3 Credit Hours)
Pre-requisites: Freshman or Sophomore standing OR majors other than Computer Science BS, Cybersecurity BS, and Software Engineering BS
The world overflows with electronic data. This course introduces programming in a simple, powerful language like Python, with selection, repetition, functions, graphical effects, and dynamic interaction with the Internet, plus connections to lower level computer organization and computer implications in the wider world.
Knowledge Area: Quantitative Knowledge
Outcomes:
Empowerment to manage and transform masses of data; understanding of technical, societal, and ethical issues involved

COMP 163 Discrete Structures (3 Credit Hours)
Pre-requisites: MATH 110 or MATH 117 or placement into MATH 118 or higher
This course covers the mathematical foundations of computer science, including such topics as complexity of algorithms, modular arithmetic, induction and proof techniques, graph theory, combinatorics, Boolean algebra, logic circuits, and automata.
Course equivalencies: COMP211/COMP163
Outcomes:
The student will be prepared for the study of advanced ideas in computer science, from cryptography to databases to algorithms to computer architecture

COMP 170 Introduction to Object-Oriented Programming (3 Credit Hours)
Pre-requisites: MATH 110 or MATH 118 or Placement into a higher MATH course or COMP 125 or COMP 141 or COMP 150 or COMP 180 or permission or SCPS student; Prior experience with a procedural programming language is sufficient to obtain permission to enroll
This programming-intensive course with an integrated lab component introduces basic concepts of object-oriented programming.
Interdisciplinary Option: Bioinformatics
Course equivalencies: COMP170/ISOM/INFS370
Outcomes:
Ability to take a problem, break it into parts, specify algorithms, and express a solution in terms of variables, data types, input/output, repetition, choice, arrays, subprograms, classes, and objects; Ability to judge a good program

COMP 171 Scripting Languages (1 Credit Hour)
Scripting languages are rapid prototyping languages that are used extensively. This course covers the principles, syntax and semantics of widely used scripting languages.
Outcomes:
Students will learn how a program can be put together quickly and efficiently to solve problems

COMP 180 Computing and Data Analysis for the Sciences (3 Credit Hours)
Pre-requisites: MATH 110 or MATH 117 (or any higher MATH course such as 118, 131, 132, 161, 162) with grade of at least C- or placement into MATH 118
Scientific computing emphasizes data analysis and visualization in a scientific context - analyzing data quickly for understanding by the individual, sharing automated workflows with collaborators, and preparing results for later publication. This course will emphasize rapid, interactive, and reproducible collaborative analysis of data for scientific contribution.
Interdisciplinary Option: Neuroscience
Outcomes:
At the end of this course, students will be well versed in the use of a specific, interactive environment for data analysis (likely Python, R, or MATLAB as indicated in the course notes) for analyzing data and sharing results

COMP 215 Object Oriented Programming with Mathematics (3 Credit Hours)
Pre-requisites: MATH 132 or MATH 162 or MATH 162A
This is an introductory programming course for students interested in mathematics and scientific computing. Students will program primarily in a general object-oriented language such as Python, with supplementary exercises in a computer algebra system. Examples will be drawn primarily from applications of calculus, elementary number theory, and cryptography.
Course equivalencies: X-COMP215/MATH215
Outcomes:
Students will learn basic scripting and object-oriented programming, with the goal of being able to solve mathematical and scientific problems

COMP 231 Data Structures & Algorithms for Informatics (3 Credit Hours)
Pre-requisites: (MATH/COMP 215 OR COMP 170) AND (COMP 141 OR AMTH-BS OR MATH-BS) Advisory: MATH/COMP 215 preferred
This course introduces data structures and algorithms that are essential for data science and informatics. Here we will focus on identifying the right method for storing data and using the most efficient algorithm for analysis. A subset of data structures and algorithms fundamental to computer science will be covered.
Outcomes:
Students will learn fundamental data structures and algorithms frequently used in informatics and data science; Students will be able to apply this knowledge for data analysis

COMP 250 Research Writing: Open Source Tools and Techniques (3 Credit Hours)
Pre-requisites: UCWR 110 or equivalent; COMP 141 or instructor permission
This course trains students in free, open-source, and text-based software to support clear, well-organized, accurate, and verifiable writing in academic contexts. The software tool-chain includes Zotero, LaTeX, Pandoc, and Git. Key writing skills are note-taking, information management, and revision.
Course equivalencies: X - COMP 250 / ENGL 296
Outcomes:
Students will acquire working knowledge of text-based and open-source software tools to support academic research and writing; Students will create researched arguments that are clear, well-organized, accurate and verifiable

COMP 251 Introduction to Database Systems (3 Credit Hours)
Pre-requisites: COMP 125 or COMP 141 or COMP 150 or COMP 170 or COMP 180 or COMP/MATH 215
This course explores ways in which data collections are organized, stored, analyzed, and manipulated. Topics include relational databases, the SQL query language, and the basics of XML and web interfaces to data sets. Applications from a variety of domains illustrate the course's key concepts.
Course equivalencies: COMP 251 / COMP 368
Outcomes:
Students will organize data in ways to emphasize relationships, write simple programs to process, visualize and graphically display data, mine data for patterns, and design web interfaces to data

COMP 264 Introduction to Computer Systems (3 Credit Hours)
Pre-requisites: COMP 141 and (COMP 170 or MATH/COMP 215) and (coreq or prereq of COMP 163 or MATH 201); COMP 163 coreq or prereq and COMP 170 prereq preferred
This course studies the hierarchy of abstractions and implementations that constitute a modern computer system, with a particular focus on issues of interest to programmers, typically including some systems programming instruction.
Outcomes:
Understanding of system issues that affect the performance, correctness, or utility of user-level programs

COMP 271 Data Structures I (3 Credit Hours)
Pre-requisites: COMP 141 and COMP 170 and (co-requisite or pre-requisite of COMP 163 (preferred) or MATH 201); For Bioinformatics majors, pre-requisite of COMP 141 and COMP 170; For SCPS students, pre-requisite of COMP 170
This course studies basic data structures including array lists, linked lists, stacks, queues, binary trees, and hash tables. Efficiency of data structure operations, study of recursion, applications of data structures, and simple analysis of algorithms are covered.
Outcomes:
Students learn linear data structures and the performance of their operations, and they learn to solve simple computational problems by designing suitable algorithms and efficient data structures

COMP 272 Data Structures II (3 Credit Hours)
Pre-requisites: COMP 271 and (COMP 163 or MATH 201) and (MATH 131 or MATH 161)
This course studies advanced abstract data types, such as sets, maps, and graphs, and their implementation using arrays and dynamically allocated nodes in an object-oriented language. The course also studies the performance of the data structures built-in operations and related algorithms such as sorting, searching, and traversing.
Outcomes:
Students learn non-linear data structures and runtime performance of their operations, solve computational problems by choosing suitable data structures, and implement algorithms within the object-oriented paradigm

COMP 301 Introduction to Computer Security (3 Credit Hours)
Pre-requisites: COMP 170
This is an introductory course on computer security covering a broad range of topics, including basic security goals, encryption, penetration testing, software exploitation, reverse engineering, packet sniffing, and secure coding. The course teaches both the principles and concepts of computer security as well as some of the tools and technologies. Students will learn to think like an adversary, find and exploit vulnerabilities in computer and network systems, understand cryptography and security goals, and learn about some of the commonly-used tools.

COMP 305 Database Administration (3 Credit Hours)
Pre-requisites: COMP 231 or COMP 251 or COMP 271
Business and scientific institutions increasingly use large commercial data base systems. This course teaches the theory and practice for the definition, security, backup, tuning, and recovery of these systems.
Outcomes:
Students will be able to use theory and pragmatic approaches to define and implement realistic solutions for large database administration environments

COMP 306 Data Mining (3 Credit Hours)
Pre-requisites: (STAT 103 or STAT 203 or STAT 335 or ISSCM 241 or PSYC 304 or instructor permission) and (COMP 150 or COMP 170); Corequisites or Prerequisites: COMP 251 or COMP 353
This course covers theory and practice of the analysis (mining) of extremely large datasets. With data growing at exponential rates knowledge gathering and exploration techniques are essential for gaining useful intelligence.
Outcomes:
Students will be able to define and critically analyze data mining approaches for fields such as security, healthcare, science and marketing

COMP 309 Numerical Methods (3 Credit Hours)
Pre-requisites: (COMP 170 or COMP 215) and [(MATH 212 and MATH 264) or MATH 266]
This course offers an introduction to topics such as error analysis, interpolation and approximation, and the numerical solution of problems involving differentiation, integration, and ordinary and partial differential equations.
Course equivalencies: X-COMP309/MATH309
Outcomes:
Students will obtain an understanding of how numerical methods can be used in a variety of areas of mathematics

COMP 310 Operating Systems (3 Credit Hours)
Pre-requisites: COMP 264 and COMP 271
This course introduces principles of operating systems and how they are designed. Various important parts of operating systems such as memory addressing, file structures, processes, and threads are covered.
Outcomes:
Students will learn the different parts of an operating system at a functional level and how they interact with each other

COMP 312 Open Source Software Practicum (3 Credit Hours)
Pre-requisites: COMP 231 or COMP 271 or instructor permission
This course will cover the fundamentals of Free and Open Source software development. Topics to be addressed include licensing, Linux, typical software development tools, applications, and techniques for managing remote servers.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will learn to implement projects involving Free and Open Source software and learn how to participate in open-source projects effectively

COMP 313 Object-Oriented Design (3 Credit Hours)
Pre-requisites: COMP 272
Object-orientation continues to be a dominant approach to software development. This intermediate programming-intensive course studies the use of classes and objects with an emphasis on collaboration among objects.
Outcomes:
A thorough understanding of the principles of object-orientation: abstraction, delegation, inheritance, and polymorphism; exposure to basic design patterns; programming experience in mainstream object-oriented languages such as C++ and Java

COMP 314 Problem Solving Strategies I (1 Credit Hour)
Pre-requisites: COMP 271
Corequisite or This course allows students to sharpen problem-solving skills along with, or as part of, the ACM Programming Team. Groups generally work on old competition problems on alternate weekends, with short follow-ups during the next week.
Course equivalencies: COMP281/COMP314
Outcomes:
Ability to work in small groups, quickly and accurately assessing and solving focused problems involving many sorts of programming knowledge

COMP 315 Problem Solving Strategies II (2 Credit Hours)
Pre-requisites: COMP 314
This course allows students to sharpen problem-solving skills along with, or as part of, the ACM Programming Team. Groups generally work on old competition problems on alternate weekends, with short follow-ups during the next week.
Outcomes:
Ability to lead a small group, quickly and accurately assessing and solving focused problems involving many sorts of programming knowledge

COMP 317 Social, Legal, and Ethical Issues in Computing (3 Credit Hours)
Pre-requisites: Any COMP course and Ethics Core
This course covers social, legal, and ethical issues commonly arising in key areas related to computing technologies.
Interdisciplinary Option: Sociolegal Studies
Outcomes:
Understanding of laws and issues in areas such as privacy, encryption, freedom of speech, copyrights and patents, computer crime, and computer/software reliability and safety; understanding of philosophical perspectives such as utilitarianism versus deontological ethics and basics of the U.S. legal system

COMP 319 Introduction to UNIX (1 Credit Hour)
Pre-requisites: COMP 170 and COMP/MATH 215
An introduction to the UNIX operating system. Topics include files and directories, electronic mail, security, advanced file systems, network utilities, network file sharing, text utilities, shell programming, UNIX internals, UNIX system administration (essentials), the X windowing system, systems programming, and secure shell (SSH).
Course equivalencies: COMP219/COMP319
Outcomes:
After taking this course, students will develop working knowledge of Unix and be able to use modern Unix operating systems such as Linux, OS X, or Solaris

COMP 321 Computational Aspects of Modeling and Simulation (3 Credit Hours)
Pre-requisites: STAT 203 or STAT 335
This course uses SAS and R languages to address statistical modelling and to conduct statistical simulations to assess linear, generalized linear, nonlinear, and complex models, and experimental designs.
Course equivalencies: X-STAT356/COMP321/STAT321
Outcomes:
Students will gain practical experience and knowledge in real-world statistical situations for which underlying theory is cumbersome or intractable

COMP 322 Software Development for Wireless and Mobile Devices (3 Credit Hours)
Pre-requisites: COMP 231 or COMP 271
This course will focus on the unique challenges, methods, tools, and technologies for developing software applications for wireless and mobile devices, smart mobile phones, and the growing world of mobile connected devices.
Outcomes:
1) Understand challenges of software design for resource limited devices; 2) Know the architecture of one or more state-of-the-art mobile operating systems; 3) Gain experience designing, developing, testing embedded software

COMP 323 Game Design and Development (3 Credit Hours)
Pre-requisites: COMP 231 or COMP 271
This course studies design, development, and publication of games and game-based applications. This includes example games and designers, industry practices, and team-based project development.
Outcomes:
Students will acquire an awareness of different game design and development methods, technologies, and techniques suitable for the development of a variety of game based environments

COMP 324 Client-Side Web Development (3 Credit Hours)
Pre-requisites: COMP 231 or COMP 271
This course covers the design and implementation of the presentation layer of dynamic web applications. Topics include visual design and usability, multi-channel and multi-modal applications, markup of static and dynamic content, and client-side executable content. HTML/CSS/JavaScript are introduced quickly, followed up with the stack of current JavaScript frameworks and libraries used in practice.
Outcomes:
Familiarity with the most common effective tools for creating responsive, dynamic, and interactive web content with client-side tools

COMP 325 Rapid Application Development Methodology (3 Credit Hours)
Pre-requisites: COMP 271 with a grade of C- or above
This course will teach students how to effect rapid application development using a software framework such as the .NET Framework. Particular emphasis will be placed on enhancing object-oriented programming skills using a language such as C#.NET.
Outcomes:
Students will gain enhanced skill in object-oriented programming and development of such applications as database applications, web applications, Microsoft .NET services, Silverlight applications, and WCF Services

COMP 326 Digital Music Programming (3 Credit Hours)
Pre-requisites: One of: COMP/MUSC 122, MUSC 201, COMP 125, COMP 150, COMP 170, permission of instructor
This course is an exploration of coding for music applications. Topics include digital audio and synthesis theory and basic, musical data structures, and principles of computer music composition and interactivity. Students will design synthesis and sampling instruments, algorithmic music generators, signal processors, and interactive control systems using one or more music programming languages.
Course equivalencies: X-COMP 326/MUSC 326
Outcomes:
Create software modules for processing digital audio, MIDI, and generative music; develop interactive interfaces; export applications or modules; produce a portfolio of creative projects in areas of real-time audio/MIDI processing

COMP 328 Algebraic Coding Theory (3 Credit Hours)
Pre-requisites: MATH 212
Codes with algebraic structure for error control are examined. Block codes including Hamming codes and Reed-Muller codes, BCH codes, and other cyclic codes with algebraic structure and other cyclic codes and their implementation are treated. Other topics may include: convolutional codes, efficiency considerations, and Shannon's fundamental theorem of information theory.
Course equivalencies: X-MATH328/COMP328

COMP 329 Natural Language Processing (3 Credit Hours)
Pre-requisites: (COMP 231 or COMP 271) and (MATH 131 or MATH 161) and (STAT 103 or STAT 203 or STAT 335 or ISSCM 241 or PSYC 304 or instructor permission)
This course provides an introduction to the field of natural language processing (NLP). NLP is concerned with computational approaches to analyzing, generating, and understanding human language. This course will introduce the students to the problems, methods, and applications of NLP.
Outcomes:
Students will become familiar with such areas of natural language processing as information retrieval, sentiment analysis, machine translation, document classification, and question answering

COMP 330 Software Engineering (3 Credit Hours)
Pre-requisites: COMP 271
Students learn real-world theory and techniques organizations use to create high-quality software on time. Students work on a large programming team to create plans, review progress, measure quality, and make written and oral analyses of their project.
Outcomes:
Students will experience process based development, understand the dynamics of a professional software organization, and develop skills for implementing software with others

COMP 331 Mathematical Foundations of Cryptography (3 Credit Hours)
Pre-requisites: Theoretical Foundations: MATH 201 or COMP 363; Programming Foundations: COMP125 or COMP150 or COMP170 or COMP 180 or COMP/MATH 215
This course introduces the formal foundations of cryptography and also investigates some well-known standards and protocols, including private and public key cryptosystems, hashing, digital signatures, RSA, DSS, PGP, and related topics.
Course equivalencies: X-COMP331/MATH331
Outcomes:
Students will gain an understanding of cryptosystems widely used to protect data security on the internet, and be able to apply the ideas in new situations as needed

COMP 332 Requirements Engineering (3 Credit Hours)
Pre-requisites: COMP 330
This course aims to equip students with techniques for successful requirements analysis and requirements engineering (RE) of software-intensive systems. Students will learn a systematic process of developing requirements through co-operative problem analysis, representation, and validation.
Outcomes:
Students will learn and apply the current state of the art in requirements engineering and a systematic method for engineering high-quality requirements on realistic large-scale projects

COMP 333 Web Services Programming (3 Credit Hours)
Pre-requisites: COMP 313
Web services are building blocks for enterprise applications that use open data exchange standards and transport protocols to exchange data with calling clients. This course studies the architectures, frameworks, and tools required to develop and compose web services and clients, as well as integrate service-oriented systems with legacy systems.
Outcomes:
An understanding of the design space of software architecture; Proficiency in designing, implementing, deploying and composing systems from web services

COMP 335 Formal Methods in Software Engineering (3 Credit Hours)
Pre-requisites: COMP 272
As embedded and networked systems are becoming ever more ubiquitous, we depend increasingly on the correctness of the software that controls such systems. This course studies the formal specification, verification, and synthesis of software.
Outcomes:
An understanding of the role of formal methods in the construction of software systems; proficiency in representative methods and tools, such as UML and ESC

COMP 336 Markup Languages (3 Credit Hours)
Pre-requisites: COMP 231 or COMP 271
This course is concerned with XML and its various component frameworks. The core frameworks to be covered include Document Object Model (DOM), Simple API for XML processing (SAX), the XML Path language (XPath), and XSLT.
Outcomes:
After taking this course, students will have working knowledge of XML and its connections to other ideas such as HTML, object models, relational databases, and network services

COMP 337 Concurrent Programming (3 Credit Hours)
Pre-requisites: COMP 313
Many real-world software systems rely on concurrency for performance and modularity. This programming-intensive course covers analysis, design, implementation, and testing of concurrent software systems.
Outcomes:
An in-depth understanding of event-based and thread-based views of concurrency; the ability to develop concurrent software components using suitable languages, frameworks, and design patterns; familiarity with object-oriented modeling and development tools and test-driven development

COMP 338 Server-based Software Development (3 Credit Hours)
Pre-requisites: COMP 313
Server-based web applications and services have become part of everyday life. This programming-intensive course covers analysis, design, implementation, and testing of multi-tiered server-based software systems along with typical tier-specific technologies.
Outcomes:
An understanding of software architecture and integration in the development of multi-tiered server-based software; familiarity with object-oriented modeling and development tools and test-driven development

COMP 339 Distributed Systems (3 Credit Hours)
Pre-requisites: COMP 313 or COMP 363 or COMP 310
This course covers topics in modern distributed systems. This course places special emphasis on scalability (performance), reliability/fault tolerance, and security.
Outcomes:
After taking this course, students should understand the essential ingredients of distributed systems and how to build distributed systems that are resilient to transient network failures and other potential anomalies

COMP 340 Computer Forensics (3 Credit Hours)
Pre-requisites: COMP 264 or COMP 301 (may also be corequisites)
The course introduces the fundamentals of computer/network/internet forensics, analysis and investigations.
Outcomes:
The student will learn computer software and hardware relevant for analysis, and investigative and evidence-gathering protocols

COMP 341 Human-Computer Interaction (3 Credit Hours)
Pre-requisites: COMP 231 or COMP 271
Limitations in human-computer interaction are as much due to human factors, cognitive limits, expectations, motivations, and inertia as technological capabilities. Systematic methods will be used to evaluate and improve designs through both qualitative feedback and statistical, hypothesis-driven testing on web pages, GUIs, mobile apps and many non-traditional interfaces.
Outcomes:
Students will be exposed to a wide array of non-traditional computing interfaces, and be able to evaluate, design and develop better human-computer interfaces using research-based, systematic approaches

COMP 342 Introduction to Web Application Development (3 Credit Hours)
Pre-requisites: COMP 170
An introduction to webpage development using JavaScript, jQuery and associated client-side tools.
Course equivalencies: X- DIGH403/CPST342/COMP342
Outcomes:
Students will be able to create webpages using JavaScript and related tools and protocols, and interface a webpage with a database

COMP 343 Computer Networks (3 Credit Hours)
Pre-requisites: COMP 264 or COMP 271 or instructor permission
This course surveys packet-switched computer networks and attendant communication protocols, using the TCP/IP protocol suite on which the Internet is based as the primary model. Some programming may be required.
Outcomes:
Students will understand how the Internet is constructed, how data is routed to its destination, how connections are made, how congestion is handled, and how security can be addressed

COMP 344 Hands-on Approach to Security and Privacy (3 Credit Hours)
Pre-requisites: COMP 301 and (COMP 340 or COMP 347 or COMP 348 or COMP 349 or COMP 352)
This course will introduce students to privacy, cybersecurity competitions, and how computers can be compromised and secured. This course satisfies the Engaged Learning requirement.
Outcomes:
Students will demonstrate knowledge and competency in the cybersecurity and privacy fields by participating in competitions, capture the flag, cybersecurity challenges, cybersecurity certifications, and other cybersecurity events/activities; Students will apply what they know in a realistic professional setting, usually working in a team

COMP 345 Internet of Things Device and Application Security (3 Credit Hours)
Pre-requisites: COMP 301
It introduces the Internet of Things (IoT) comprising embedded devices and cloud-based resources. The course studies concepts and techniques used in designing and implementing IoT systems providing valuable functionality to consumers and valuable data to organizations. The course discusses methods for addressing related safety, security, reliability, and privacy concerns.
Outcomes:
Ability to design and implement secure software and establish safety, security, reliability, and privacy goals for embedded and IoT-based systems; Ability to visualize and analyze data from an IoT system

COMP 346 Telecommunications (3 Credit Hours)
Pre-requisites: COMP 264 or COMP 271
This course introduces the fundamental concepts of telecommunication networks, including requirements of voice networks, analog versus digital transmission, data link protocols, SONET, ATM, cellular phone systems, and the architecture of the current telephone system.
Outcomes:
Students will understand how modern telephone systems work

COMP 347 Intrusion Detection and Security (3 Credit Hours)
Pre-requisites: COMP 301
This course covers techniques and algorithms for detecting unusual usage patterns that typically signal a break-in, including techniques for detecting evasive or stealthy attacks. Also covered are differences in detecting local versus network intruders. Additional topics: computer viruses, computer security management, computer forensics.
Outcomes:
Students will learn to configure ID systems (eg SNORT) and analyze their output; They will also understand both network-based and host-based monitoring techniques

COMP 348 Network Security (3 Credit Hours)
Pre-requisites: COMP 301
This course involves a discussion of network security through the following areas which lead to an overall security posture: Security Frameworks, Implementation Security, System Best Practices, a Case for Centralized Configuration Management, Network Security Architecture, Standards Adherence, Risk Assessments, Testing and Review and Application Security.
Outcomes:
An understanding of how to secure networks using encryption, authentication, perimeter protection, restricted access policies, intrusion detection/prevention and other security frameworks

COMP 349 Wireless Networking and Security (3 Credit Hours)
Pre-requisites: COMP 301
This course will explore the wireless standards, authentication issues, and common configuration models for commercial versus institutional installations and analyze the security concerns associated with this ad-hoc method of networking.
Outcomes:
Students will gain an understanding of wireless networking, protocols, and standards and security issues

COMP 350 Applied Cryptography (3 Credit Hours)
This course covers the applications of modern Cryptography, while addressing theoretical foundations as necessary. The course begins by introducing modern Cryptographic notions of security in the form of adversary experiments/challenges. Practical applications of Cryptography using OpenSSL are discussed throughout the course. More recent advances in Cryptography are also discussed.
Outcomes:
Reason about the security of a cryptographic system under various assumptions; Implement and analyze various cryptographic protocols; Gain familiarity with OpenSSL; Understand the implications of Post-Quantum Cryptography and potential future avenues of application

COMP 351 Network Management (3 Credit Hours)
Pre-requisites: COMP 264 or COMP 271
This course introduces the current state of the art in automated management of computer networks, including protocols such as SNMP and its attendant naming conventions, network management systems, and important issues in administrative network configuration.
Outcomes:
Students will become familiar with the SNMP protocol, with how large-scale Network Management Systems operate and are configured, and with advanced network configuration

COMP 352 Computer Vulnerabilities (3 Credit Hours)
Pre-requisites: COMP 264 and COMP 301
This course will introduce students to computer vulnerabilities at the machine-code level, including viruses, browser vulnerabilities, buffer and heap overflows, return-to-libc attacks and others.
Outcomes:
Describe some recent computer software vulnerabilities at the machine-code level and how they can be leveraged into an attack; Run a virus in a virtual-machine sandbox with appropriate monitoring

COMP 353 Database Programming (3 Credit Hours)
Pre-requisites: COMP 231 or COMP 251 or COMP 271
This course introduces relational and object databases to support database creation and application development. Use of commercial database products will give a practical orientation.
Course equivalencies: COMP353/BIOI353
Outcomes:
Students will learn SQL, database design and application development using the latest software tools; Students will also learn techniques for web based data retrieval and manipulation

COMP 358 Big Data Analytics (3 Credit Hours)
Pre-requisites: ((Database experience: COMP 251 OR COMP 305 OR COMP 353) AND (Analytics experience: COMP 306 OR COMP 379 OR STAT 338 OR STAT 308)) OR permission of instructor
In this course, large data sets will be leveraged to solve challenging analytics problems. With more samples, analytics can use more complex learning models to automate more feature combinations for more robust model tuning, selection, and validation. Parallel, distributed processing will be performed with Apache Spark and Hadoop.
Outcomes:
Python or R will be used with parallel frameworks to perform proper model selection when testing large combinations of features, models, hyperparameters, and ensembles, with additional emphasis on deep learning

COMP 362 Computer Architecture (3 Credit Hours)
Pre-requisites: COMP 264 and COMP 271
Introduction to digital logic and Verilog. Design and implementation of a CPU pipeline. Processor design, instruction set design, and addressing. Control structures and microprogramming. Memory management, caches, and memory hierarchies. Interrupts and I/O structures. Instruction dependencies and hazards. Design synthesis on FPGAs.
Course equivalencies: COMP 260 / COMP 275 / COMP 362
Outcomes:
Ability to design complex digital systems using hierarchical organization and implementation in Verilog; Ability to reason about dependencies in an instruction sequence and how dependencies create pipeline hazards

COMP 363 Design and Analysis Computer Algorithms (3 Credit Hours)
Pre-requisites: COMP 272 and (MATH 132 or MATH 162)
Theoretical design and analysis of computer algorithms may be supplemented by small amounts of programming.
Interdisciplinary Option: Bioinformatics
Course equivalencies: X-COMP363/BIOI363
Outcomes:
The ability to design and analyze efficient algorithms; understanding of the necessary models and mathematical tools; understanding of a variety of useful data structures and fundamental algorithms; exposure to the classification of computational problems into different complexity classes

COMP 364 High Performance Computing (3 Credit Hours)
Pre-requisites: COMP 264 and COMP 272
This course covers parallel architectures and parallel models of computation. Algorithms for achieving high performance in various computational contexts are discussed. Models such as shared memory, message passing, and hybrid modes of computing are introduced.
Outcomes:
Students will learn how to engineer solutions to practical problems in multiprocessor architectures and using large physical memories

COMP 366 Microcomputer Design & Interfacing (3 Credit Hours)
Pre-requisites: COMP 271
This course covers computer architecture, CPU logic, data acquisition, signal conditioning, analog/digital conversion and computer interfacing.
Course equivalencies: X-PHYS366/COMP366
Outcomes:
Students will gain a working knowledge of interfacing techniques and design, hands-on experience with professional interfacing hardware and software, and the ability to document and report experimental results

COMP 367 Robotics Software Development (3 Credit Hours)
Pre-requisites: COMP 271; COMP 313 recommended
This course is an introduction to robotics and robotic software development using humanoid robots. The course will use modern robot platforms and provide hands on experience with robotic sensor systems, motion and navigation, robot behavior planning and implementation.
Outcomes:
Students will explore the history of robotics, overview the theory of autonomous robotic systems, and develop complete robot projects

COMP 369 Product Invention and 3D Printing (3 Credit Hours)
This course explores the role of products in the economy and how things are made, including: product conceptualization and design, physical design vs. design of things that are not physical, rapid prototyping, 3D printing, 2D conceptualization and sketching, 3D modeling, and design reviews.
Outcomes:
Students will be able to visualize ideas via sketching basic shapes, create 3D models using 3D modeling software, use a 3D Printer, and give constructive feedback in peer review sessions

COMP 370 Software Quality (3 Credit Hours)
Pre-requisites: COMP 330
The course teaches software testing and quality control concepts, principles, and techniques including black box and white box testing, coverage testing, test case development, and regression testing.
Outcomes:
Students will learn how to prevent errors, how to get 'bugs' out of software, and be able to apply this knowledge in other courses and projects

COMP 371 Programming Languages (3 Credit Hours)
Pre-requisites: COMP 264 and COMP 272
There are over two thousand programming languages. This course studies several languages that represent the much smaller number of underlying principles and paradigms.
Outcomes:
An understanding of key principles and paradigms underlying the design and implementation of commonly used programming languages; exposure to formal mechanisms for describing language syntax and semantics; programming experience in several representative languages

COMP 373 Advanced Object-Oriented Programming (3 Credit Hours)
Pre-requisites: COMP 313
Object-orientation continues to be a dominant approach to software development. This advanced programming-intensive course studies object-oriented analysis, design, and implementation from a design patterns perspective.
Outcomes:
Proficiency in the use of object-oriented languages, frameworks, and patterns; advanced understanding of key language mechanisms such as delegation, inheritance, polymorphism, and reflection; familiarity with object-oriented modeling and development tools and test-driven development

COMP 376 Formal Languages & Automata (3 Credit Hours)
Pre-requisites: COMP 163 or MATH 201 or MATH 212 or MATH 266
This course introduces formal language theory, including such topics as finite automata and regular expressions, pushdown automata and context-free grammars, Turing machines, undecidability, and the halting problem.
Course equivalencies: X-COMP376/MATH376
Outcomes:
An understanding of the theoretical underpinnings of computability and complexity in computer science

COMP 377 IT Project Management (3 Credit Hours)
Pre-requisites: COMP 231 or COMP 251 or COMP 271
This course is an introduction to the philosophy and practice of project management. The course involves a student group project to investigate and plan a 'real world' IT project that specifies project objectives, schedules, work breakdown structure and responsibilities, a written interim report, and a final oral and written report.
Outcomes:
Students will learn time management, work-flow management, and team dynamics to design, implement and test large-scale software projects

COMP 378 Artificial Intelligence (3 Credit Hours)
Pre-requisites: COMP 231 or COMP 271
This course introduces artificial intelligence theory and programming.
Outcomes:
Student will learn basic theory of artificial intelligence and be able to build small applications based on it

COMP 379 Machine Learning (3 Credit Hours)
Pre-requisites: (COMP 231 or COMP 271) and (MATH 131 or MATH 161) and (STAT 103 or STAT 203 or ISSCM 241 or STAT 335 or PSYC 304 or instructor permission)
Machine learning is the process of making predictions and decisions from data without being explicitly programmed. Topics include a variety of supervised learning methods. Ensemble approaches are used to combine independent models efficiently. Unsupervised and semi-supervised methods demonstrate the power of learning from data without an explicit training goal.
Outcomes:
Students in this course will learn how to apply sophisticated algorithms to large data sets to make inferences for prediction or decision making

COMP 380 Computer Graphics (3 Credit Hours)
Pre-requisites: COMP 271
This course introduces modern theory and practices in 3-D computer graphics, stressing real-time interactive applications using libraries like OpenGL.
Outcomes:
Student will learn how to program real-time interactive applications using libraries like OpenGL

COMP 382 Compiler Construction (3 Credit Hours)
Pre-requisites: COMP 264 and 272
This course covers the basics of writing a compiler to translate from a simple high-level language to machine code. Topics include lexical analysis, top-down and LR parsing, syntax-directed translation, and code generation and optimization. Students will write a small compiler.
Outcomes:
Students will learn how a compiler is built

COMP 383 Computational Biology (4 Credit Hours)
Pre-requisites: (COMP 231 or COMP 271) and COMP 381 (Equivalencies: BIOI/BIOL 388)
This course presents an algorithmic focus to problems in computational biology. It is built on earlier courses on algorithms and bioinformatics. Problems and solutions covered in this course include gene hunting, sequence comparison, multiple alignment, gene prediction, trees and sequences, databases, and rapid sequence analysis.
Interdisciplinary Option: Bioinformatics
Course equivalencies: COMP383/BIOI383
Outcomes:
Students will learn, in detail, foundational methods and algorithms in bioinformatics

COMP 386 Methods in Computational Neuroscience (3 Credit Hours)
Pre-requisites: NEUR 101; (MATH 131 or MATH 161); and (COMP 150, COMP 170, COMP 180, or DSCI 101) This course introduces the methods necessary to work with computational models of neural processing in the brain
These methods include differential equations for neuroscience, Simulink programming, linear algebra for neural networks, MATLAB coding, and probability theory for neuroscience. For each method, classes will include lectures, and computer exercises or illustrations.
Interdisciplinary Option: Neuroscience
Course equivalencies: X - COMP 386/PSYC 383
Outcomes:
Appreciation of the mathematical and computational techniques used to understand the brain, specially differential equations to model neurons, linear algebra used for neural networks, and probability theory capturing brain performance

COMP 387 Deep Learning (3 Credit Hours)
Pre-requisites: COMP 379 or STAT 338 or STAT 308 This course covers key concepts of neural network algorithms as well as their applications in computer vision and natural language processing
The topics will include popular building blocks of neural networks including fully-connected, convolutional, recurrent, attention, and transformer layers.
Outcomes:
Learn how to build and analyze popular modern neural network architectures; Learn how to design, build, and evaluate their models in the context of practical applications related to fields such as computer vision and natural language processing

COMP 388 Topics in Computer Science (1-6 Credit Hours)
This course is used to introduce emerging topics in computer science that do not yet have a regular course number. Content of the course varies.
Outcomes:
Understanding of an emerging area of Computer Science

COMP 389 Computational Modeling of the Brain (3 Credit Hours)
Pre-requisites: PSYC 383/COMP 386 or instructor permission This course uses a mix of lectures and computer labs to introduce computational models of the neural processing in the brain
These models capture single neurons and synapses, biological neural networks, and high-level computational theory. Each class will cover the models with lectures and computer labs, the latter using MATLAB and Simulink.
Interdisciplinary Option: Neuroscience
Course equivalencies: X - COMP 389/PSYC 384
Outcomes:
Appreciation that brain function cannot be understood without proper mathematical and computational frameworks, and ability to apply these frameworks adeptly in the various domains of neuroscience from neurons to cognition

COMP 390 Broadening Participation in STEM (Computing, Math & Science) (1-3 Credit Hours)
Students will learn about underrepresentation of various population groups in STEM fields (science, technology, engineering, mathematics), as well as some of the reasons and negative effects of this situation. They will learn about techniques and educational materials for ameliorating this situation and will engage in relevant service learning activities.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students gain first-hand experience with broadening STEM participation and seeing how they can make a difference in the lives of other students and contribute to national needs

COMP 391 Internship in Computer Science (1-6 Credit Hours)
Students work outside the classroom applying and extending their computer science skills, typically for at least 150 hours for 3 credits. A memorandum of understanding is required between a student, his or her employer, and the Undergraduate Internship Coordinator, followed by final reports from the student and the employer.
This course satisfies the Engaged Learning requirement.
Outcomes:
Application of classroom skills to real-world situations

COMP 395 Professional Development & Career Growth in CompSci/IT (1 Credit Hour)
Pre-requisites: Sophomore standing and any COMP course
This course is designed specifically for students pursuing a degree in computing-related fields, for example, Computer Science, Information Technology, Software Engineering, and Cybersecurity. They will learn about ways to develop themselves professionally, communicate their strengths, expand their contacts, and advance their careers. Students should acquire skills to professionally brand themselves, successfully network in technical circles, perform an effective job/internship search, and conduct themselves well in interviews.

COMP 397 Research Methods in Computer Science (1 Credit Hour)
Supplements CS Seminar by targeting students directly engaging in research and facilitating contributions in ongoing projects. Progress in outside projects tracked through milestones such as abstracts, small fellowship-style proposals, informal updates, and outcome-oriented goal setting. Emphasizes creating lasting impacts through establishing project continuity and presenting posters, papers, and slide shows.
Outcomes:
Regular progress on research projects and final presentations of results for demonstration to department faculty and students, and potential use at professional conferences

COMP 398 Independent Study (1-6 Credit Hours)
The student and a sponsoring faculty member will determine an advanced topic for the student to work on.
This course satisfies the Engaged Learning requirement.
Outcomes:
Knowledge of an advanced topic

COMP 399 Computer Science Seminar (1 Credit Hour)
The department seminar is designed to bring together students interested in understanding and engaging in extracurricular applications of computer science, with a focus on ongoing research. Speakers will include department faculty, research students, and invited outside speakers. Students will be asked to read relevant literature and participate in discussions.
Course equivalencies: COMP 399H / COMP 399
Outcomes:
Students will be exposed to a wide range of topics in computer science, participate in discussions, and provide feedback to assess their general understanding of the presented material

COMP 400A Object-Oriented Programming (3 Credit Hours)
This programming intensive course with its weekly lab component provides an exploration in problem solving for graduate-level courses, using object-oriented programming in a language such as Java.
Outcomes:
To analyze and decompose problems, specify algorithms, and construct solutions by synthesizing classes, objects and other components of object

COMP 400B Data Structures I (3 Credit Hours)
Pre-requisites: COMP 400A
This course explores introductory data structures including array lists, linked lists, stacks, queues, binary trees, and hash tables. Efficiency of data structure operations is analyzed. Recursion, applications of data structures, and simple analysis of algorithms are covered. Students will be able to select appropriate data structures to integrate into algorithms to solve computational problems.
Outcomes:
Students describe linear data structures and analyze the performance of their operations

COMP 400C Data Structures II (3 Credit Hours)
Pre-requisites: COMP 400B and COMP 400D
This course explores advanced abstract data types in depth, such as sets, maps, and graphs, and reproduces their implementation using arrays and dynamically allocated nodes in an object-oriented language. The course also analyzes the performance of the data structures' built-in operations and related algorithms such as sorting, searching, and traversing.
Outcomes:
Students describe non-linear data structures and analyze the runtime performance of their operations, solve computational problems by synthesizing and integrating suitable data structures, and implement algorithms within the object-oriented paradigm

COMP 400D Computing Tools and Techniques (1 Credit Hour)
This course introduces students to the Unix shell environment and essential tools.
Outcomes:
Students who complete this course will develop fluency in the Unix (Linux) environment

COMP 400E Discrete Structures (3 Credit Hours)
This course provides the mathematical foundations for graduate-level study in computer science, including such topics as complexity of algorithms, modular arithmetic, induction and proof techniques, graph theory, combinatorics, Boolean algebra, logic circuits, and automata.
Outcomes:
To analyze properties of functions, relations, graphs, trees, paths; evaluate Boolean Expressions; apply induction towards proving correctness of algorithm and classifying resource usage; synthesize finite-state machines and logic circuits

COMP 401 Computer Security (3 Credit Hours)
Pre-requisites: COMP 400A or instructor permission
This is a foundations course on computer security, covering a comprehensive range of concepts and technologies, including security goals, encryption, penetration testing, software exploitation, reverse engineering, packet sniffing, and secure coding. The final project requires a presentation and technical report where the students will show and describe what they accomplished.
Outcomes:
Students will find and exploit vulnerabilities in computer and network systems; articulate cryptography and security goals, and synthesize the knowledge of different tools and techniques by applying them to an intensive real-world project

COMP 403 Operations Management (3 Credit Hours)
Pre-requisites: COMP 400A
Application of concepts and methods for managing production and service operation. Topics include demand forecasting, aggregate and capacity planning, inventory management, facility layout and location, just-in-time, managing quality, project planning, resource allocation, logistics. Emphasis on decision support.
Outcomes:
Understanding of the role of operations management in organizations, and applying models of production and operations management to decision making

COMP 404 Organizational Development (3 Credit Hours)
Pre-requisites: COMP 400B
This course focuses on the manager's role in leading Organization Development and Change to maximize organization and individual effectiveness with a focus on Information Technology. The class explores Organization Development and Change theory, change practices, and discusses considerations a manager will face as a change agent in today's computing ecosystem.
Outcomes:
To understand the dynamics of change in organizations; learn techniques and strategies in managing change; develop skills that will enable a change agent mentality within the context of IT leadership

COMP 405 Database Administration (3 Credit Hours)
Pre-requisites: COMP 400B
Knowledge of the configuration and management skills needed for successful administration of a database server. The database administrator manages hardware, backup, security, tables and indexes, performance monitoring, query performance and optimization, and transaction performance. This course takes a user through the stages of maximizing the performance of a database server.
Outcomes:
Students will learn how to manage database performance, including topics such as the query optimizer, SQL EXPLAIN, table statistics, concurrency and transaction isolation levels, and security

COMP 406 Data Mining (3 Credit Hours)
Pre-requisites: COMP 400B
This course covers theory and practice of the analysis (mining) of extremely large datasets. With data growing at exponential rates knowledge gathering and exploration techniques are essential for gaining useful intelligence.
Outcomes:
Students will be able to define and critically analyze data mining approaches for fields such as security, healthcare, science and marketing

COMP 409 Advanced Numerical Analysis (3 Credit Hours)
Pre-requisites: (COMP 170 or COMP/MATH 215), MATH 212, and MATH 264
An introduction to advanced numerical analysis. Introduction to error analysis, numerical solution of equations, interpolation and approximation, numerical differentiation and integration, matrices, and solution of systems of equations, numerical solution of ordinary and partial differential equations.
Course equivalencies: X-COMP409/MATH409
Outcomes:
Students will have an understanding of advanced numerical analysis and its applications

COMP 410 Operating Systems (3 Credit Hours)
Pre-requisites: COMP 271 and COMP 264
The course introduces advanced operating system concepts including distributed, real-time and multi-threaded in addition to reviewing memory management, files, and processes.
Outcomes:
Students will learn important topics in advanced operating systems and be able to make presentations on the topics

COMP 412 Open Source Computing (3 Credit Hours)
Pre-requisites: COMP 400B
This course will cover the fundamentals of Free and Open Source software development. Topics to be addressed include licensing, Linux, typical software development tools, applications, and techniques for managing remote servers.
Outcomes:
Students will learn to implement projects involving free and open-source software and learn how to participate in open-source projects effectively

COMP 413 Intermediate Object-Oriented Development (3 Credit Hours)
Pre-requisites: COMP 400B
Principles of object-oriented design and implementation, including object modeling (UML or equivalent), interface design, refactoring and test-driven development. Study of design patterns, including Adaptor, Decorator, Iterator, Abstract Factory, etc. Coverage of implementation tools including IDEs, source-code control and testing.
Outcomes:
Use of interfaces in design; ability to recognize applications for design patterns, ability to refactor when necessary; ability to make effective use of test-driven development

COMP 417 Social and Ethical Issues in Computing (3 Credit Hours)
This course covers social, legal, and ethical issues commonly arising in key areas related to computing technologies.
Outcomes:
Understanding of laws and issues in areas such as privacy, encryption, freedom of speech, copyrights and patents, computer crime, and computer/software reliability and safety; understanding of philosophical perspectives such as utilitarianism versus deontological ethics and basics of the U.S. legal system

COMP 418 Combinatorial Mathematics (3 Credit Hours)
Pre-requisites: MATH 313 or COMP 163
The course covers basic combinatorial theory including permutations and combinations, the inclusion-exclusion principle and other general counting techniques, partitions, generating functions, recurrence relations, Burnside's Theorem, the cycle index, and Polya's formula.
Course equivalencies: X-COMP418/MATH418
Outcomes:
Students will learn mathematical techniques in discrete mathematics and applied combinatorics

COMP 420 Software Systems Analysis (3 Credit Hours)
Pre-requisites: COMP 400B or instructor permission
This course uses Unified Modeling Language and similar notation to model the early software analysis and design phases, from collection of user requirements to determination of class needs through object-oriented design.
Outcomes:
Students will be able to capture business requirements in a software modeling document, and determine appropriate object-oriented classes suitable for final project implementation

COMP 421 Math Models & Simulation (3 Credit Hours)
Pre-requisites: COMP 400A or equivalent
This course covers tools for analyzing problems that are mathematically difficult. Discrete event simulation techniques and software tools for simulating processes are covered.
Course equivalencies: X-COMP421/MATH421/STAT421
Outcomes:
Student will learn foundations of discrete event simulation

COMP 422 Software Development for Wireless and Mobile Devices (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 413
This course will focus on the methods, tools, and technologies for developing software applications for wireless and mobile devices, such as personal digital assistants (PDA) and smart mobile phones.
Outcomes:
Students will learn user interface design for small screens, programming techniques for devices with limited memory and processing power, data synchronization for mobile databases, and wireless network programming

COMP 424 Client-Side Web Design (3 Credit Hours)
Pre-requisites: COMP 400B
This course provides an in-depth study of the concepts and methods required for the design and implementation of the presentation layer of a web application. Coursework includes several substantial programming projects.
Outcomes:
Students will learn markup of static and dynamic content, content transformation, client-side executable content including client-side scripting and embedded applets, and web-based content management systems

COMP 425 Rapid Applications Development (3 Credit Hours)
Pre-requisites: COMP 400B
This course will teach students how to design Rapid Application Development using an integrated development environment such as the .NET framework and methodology. It is designed to support object-oriented programming concepts.
Outcomes:
Students will create database applications and web applications using server-side technologies

COMP 428 Algebraic Coding Theory (3 Credit Hours)
Pre-requisites: MATH 212 or Permission
In this course, major types of error-correcting codes, encoding and decoding , and their main properties will be studied. The codes examined will include the Hamming, Golay, BCH, cyclic, quadratic residue, Reed-Solomon, and Reed-Muller codes.
Course equivalencies: X-COMP428/MATH428
Outcomes:
Students will learn both the theory and application of error-correcting codes

COMP 429 Natural Language Processing (3 Credit Hours)
Pre-requisites: ((COMP 400B or COMP 271) and (MATH 131 OR equivalent) and (STAT 103 OR equivalent)) OR instructor permission
In this course, students examine in depth the problems, methods, and applications of NLP. Topics will include information retrieval, sentiment analysis, machine translation, document classification, and question answering. We will also cover the underlying theory from probability, statistics, and machine learning that are crucial for the field.
Outcomes:
Students will explain areas of NLP such as information retrieval, sentiment analysis, machine translation, document classification, question answering; Students will apply tools of NLP to a domain of their choice

COMP 431 Cryptography (3 Credit Hours)
Pre-requisites: COMP 271 and (Comp 163 or MATH 313 or MATH 201) or Permission
This course introduces the formal foundations of cryptography and also investigates some well-known standards and protocols, including private and public key cryptosystems, hashing, digital signatures, RSA, DSS, PGP, and related topics.
Course equivalencies: X-COMP431/MATH431
Outcomes:
Students will gain an understanding of cryptosystems widely used to protect data security on the internet, and be able to apply the ideas in new situations as needed

COMP 433 Web Services Programming (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 413
Web services are Web-based enterprise applications that use open, XML-based standards and transport protocols to exchange data with calling clients. This course provides the APIs and tools you need to create and deploy interoperable Web services and clients using .NET and Java WSDP.
Outcomes:
Students will learn the standards and protocols for deploying web services

COMP 434 Enterprise Software Development (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 413
The course shows how to use Enterprise JavaBeans to develop scalable, portable business systems. The technologies taught in the course include: component models, distributed objects, asynchronous messaging, and component transaction monitors.
Outcomes:
Students will learn the architecture of EJB, entity and message and session beans

COMP 435 Formal Methods in Software Engineering (3 Credit Hours)
Pre-requisites: COMP 400C
As embedded and distributed systems are becoming ever more ubiquitous, we depend increasingly on the correctness and security of the software that controls such systems. This course studies the formal specification, verification, and synthesis of software.
Outcomes:
An understanding of the role of formal methods in the construction of software systems; proficiency in representative methods and tools, such as static analysis, model checking, and runtime verification

COMP 436 Markup Languages (3 Credit Hours)
Pre-requisites: COMP 400B or equivalent
This course is concerned with XML and its various component frameworks. The core frameworks to be covered include Document Object Model (DOM), Simple API for XML processing (SAX), the XML Path language (XPath), and XSLT.
Outcomes:
After taking this course, students will have working knowledge of XML and its connections to other ideas such as HTML, object models, relational databases, and network services

COMP 437 Intro Concurrent Programming (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 413
Many real-world software systems rely on concurrency for performance and modularity. This programming-intensive course covers analysis, design, implementation, and testing of concurrent software systems.
Outcomes:
An in-depth understanding of event-based and thread-based views of concurrency; the ability to develop concurrent software components using suitable languages, frameworks, and design patterns; familiarity with object-oriented modeling and development tools and test-driven development

COMP 439 Distributed Systems (3 Credit Hours)
Pre-requisites: COMP 264 and COMP 400D or equivalent and (COMP 400C or equivalent or COMP 413)
This course presents a modern discussion of distributed computing systems. Distributed computation, interactive services, collaborative computing, peer-to-peer sharing, and grid/utility computing are just a handful of distributed technologies that go beyond the capabilities of the traditional client/server model by allowing a collection of computers to be leveraged as a collective resource.
Outcomes:
Students will learn design and implementation, scalability of performance, reliability, and security of loosely interconnected systems

COMP 440 Computer Forensics Investigations (3 Credit Hours)
Pre-requisites: COMP 401
This course introduces the fundamentals of computer/network/internet forensics, analysis and investigations.
Outcomes:
The student will learn computer software and hardware relevant for analysis, and investigative and evidence-gathering protocols

COMP 441 Human-Computer Interaction (3 Credit Hours)
Pre-requisites: COMP 400B or equivalent
This course studies the interaction between humans and computer-based systems. The course will provide students with the methods for evaluating, designing, and developing better interfaces between humans and systems.
Outcomes:
Students will acquire an awareness of different design and evaluation methods as well as practical, effective, and cost-conscience methods for improving systems and their interfaces

COMP 442 Server-Side Software Development (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 264 and COMP 413
Server-based web applications and services have become part of everyday life. This programming-intensive course covers analysis, design, implementation, and testing of multi-tiered server-based software systems along with typical tier-specific and technologies.
Outcomes:
An understanding of software architecture and integration in the development of multi-tiered server-based software; familiarity with object-oriented modeling and development tools and test-driven development

COMP 443 Computer Networks (3 Credit Hours)
Pre-requisites: COMP 400B or equivalent
Students should also have completed COMP 400D or equivalent. This course surveys packet-switched computer networks and attendant communication protocols, using the TCP/IP protocol suite on which the Internet is based as the primary model. We will also study general high-level network issues such as security, authentication, fault tolerance, and congestion.
Outcomes:
Students will understand how the Internet is constructed, how data is routed to its destination, how connections are made, how congestion is handled, and how security can be addressed

COMP 445 Internet of Things Device and Application Security (3 Credit Hours)
Pre-requisites: COMP 401 and COMP 400B
This course considers the safety, security, reliability, and privacy concerns of the embedded devices and cloud-based resources of the Internet of things. The course discusses methods for addressing these concerns.
Outcomes:
Design/implement secure software for embedded systems and the IoT; Establish safety, security, reliability, privacy goals for IoT-based systems; Understand security and privacy concerns of embedded systems and the IoT

COMP 446 Telecommunications (3 Credit Hours)
Pre-requisites: COMP 271 or COMP 264
This course introduces the fundamental concepts of telecommunication networks. Underlying engineering principles of telephone networks, computer networks and integrated digital networks are discussed.
Outcomes:
Students will learn how telephone and data networks work; They will also learn voice networks, analog versus digital transmission, data link protocols, SONET, ATM, cellular phone systems, and the architecture of the current telephone system

COMP 447 Intrusion Detection and Computer Forensics (3 Credit Hours)
Pre-requisites: COMP 401 and COMP 400B
This course will cover techniques for detecting the unusual usage patterns that typically signal a break-in. The course will also consider differences in detection of local intruders versus intrusion over networks. Finally issues in the prosecution of those breaking in to computers, particularly evidentiary issues are explored.
Outcomes:
Students will learn to configure ID systems (eg, snort) and analyze their output; They will also understand both network-based and host-based monitoring techniques

COMP 448 Network Security (3 Credit Hours)
Pre-requisites: COMP 401 and COMP 400B
This course will involve a discussion of the methods and tactics used to keep attackers at bay as well as the mechanisms by which we can identify and potentially stop potential intruders. The course covers topics such as Encryption, authentication, firewalls, NAT/PAT, restricted access policies, intrusion detection and other security frameworks.
Outcomes:
Students will gain an understanding of how to secure computers and network environments

COMP 449 Wireless Networking and Security (3 Credit Hours)
Pre-requisites: COMP 401 and COMP 400B
This course will explore the wireless standards, authentication issues, common configuration models for commercial versus institution installs and analyze the security concerns associated with this ad-hoc method of networking.
Outcomes:
Students will gain an understanding of wireless networking, protocols, and standards and security issues

COMP 450 Applied Cryptography (3 Credit Hours)
This course covers the applications of modern Cryptography, while addressing theoretical foundations as necessary. The course begins by introducing modern Cryptographic notions of security in the form of adversary experiments/challenges. Practical applications of Cryptography using OpenSSL are discussed throughout the course. More recent advances in Cryptography are also discussed.
Outcomes:
Reason about the security of a cryptographic system under various assumptions; Implement and analyze various cryptographic protocols; Gain familiarity with OpenSSL; Understand the implications of Post-Quantum Cryptography and potential future avenues of application

COMP 451 Enterprise Networking (3 Credit Hours)
Pre-requisites: COMP 400B or equivalent, and COMP 443, and COMP 400D or equivalent
Management of complex, high-speed, heterogeneous computer networks. Device management using SNMP and related protocols. Configuration and use of Network Management Systems. Data-flow management using LARTC and similar tools.
Outcomes:
Ability to interpret SNMP network data, ability to implement a Network Management System and use it to identify bottlenecks, familiarity with traffic-control principles and mechanisms

COMP 452 Introduction to Computer Vulnerabilities (3 Credit Hours)
Pre-requisites: COMP 401 and COMP 400B
This course will introduce students to computer vulnerabilities at the machine-code level, including viruses, browser vulnerabilities, buffer and heap overflows, return-to-libc attacks and others.
Outcomes:
Describe some recent computer software vulnerabilities; Describe how vulnerabilities can be leveraged into an attack; Describe a vulnerability or attack at the machine-code level

COMP 453 Database Programming (3 Credit Hours)
This course will cover advanced concepts in database access and programming including SQL, JDBC, SQLJ, JSP and servlets. Oracle 10g is used for projects.
Outcomes:
Students will learn application development using the latest software tools; Students will also learn techniques for web based data retrieval and manipulation

COMP 458 Big Data Analytics (3 Credit Hours)
Pre-requisites: At least a C in the following courses (COMP 405 or COMP 453) AND (COMP 406 or COMP 479 or STAT 408 or equivalent)
In this course, large data sets will be leveraged to solve challenging analytics problems. With more samples, analytics can use more complex learning models to automate more feature combinations for more robust model tuning, selection, and validation. Parallel, distributed processing will be performed with Apache Spark and Hadoop.
Outcomes:
Python or R will be used with parallel frameworks to perform proper model selection when testing large combinations of features, models, hyperparameters, and ensembles, with additional emphasis on deep learning

COMP 460 Algorithms & Complexity (3 Credit Hours)
This course will focus both on presenting general techniques for designing correct and efficient algorithms, as well as on formal methods for proving the correctness and analyzing the complexity of such algorithms.
Outcomes:
Students learn: the ability to design and analyze efficient algorithms; understanding of the necessary models and mathematical tools; understanding of a variety of useful data structures and fundamental algorithms; exposure to the classification of computational problems into different complexity classes

COMP 462 Advanced Computer Architecture (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 264
This course presents key principles underlying the design of modern digital computers. The course introduces quantitative techniques used to guide the design process. It describes CPU performance issues and introduces instruction set architectures. The course then uses a hypothetical computer design, with a simple RISC architecture, to show how modern digital computers are implemented, first using a simple non-pipelined implementation, followed by a higher-performance pipelined implementation.
Outcomes:
Students gain an understanding of the design of the memory hierarchy in modern digital computers, caching and virtual storage techniques, multiprocessor systems, and distributed shared memory systems

COMP 464 High-Performance Computing (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 413
This course will use a blend of foundational understanding as well as a set of practical tools to gain insight into performance engineering of software. The course introduces techniques to gain performance boost in Java programs and C++ (or C) programs by discussing the use of multiple processors.
Outcomes:
Students will learn shared memory, message passing and hybrid models of programming in both tightly-coupled and loosely-coupled computer systems

COMP 468 Database System Design (3 Credit Hours)
The course covers both relational and object databases. Issues of physical storage and use of indexes as well as optimization of queries are discussed. The course also covers transaction processing, concurrency, data warehousing, data mining, and distributed databases.
Outcomes:
Students learn the theory and practice of advanced database design and implementation; They will also gain an understanding of using commercial database environments such as Oracle

COMP 469 Product Invention and 3D printing (3 Credit Hours)
This course explores how things are made, including: physical design vs design on non-physical things; rapid prototyping; 3D printing; 2D conceptualization and sketching; modeling.
Outcomes:
Student will be able to: Visualize ideas via sketching basic shapes; Create 3D models using 3D modeling software; Use a 3D Printer; Give constructive feedback in peer review sessions

COMP 470 Software Quality and Testing (3 Credit Hours)
In this programming intensive course, students will learn effective automation, testing, and use of software metrics through the practices of Test Driven Development and Continuous Deployment.
Outcomes:
Students will be able to perform rigorous testing techniques that contribute to operational reliability, and identify programming practices that both contribute to software maintainability and help to avoid errors

COMP 471 Theory of Programming Languages (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 413
There are over two thousand programming languages. This course studies several languages that represent the much smaller number of underlying principles and paradigms.

COMP 472 Compiler Construction (3 Credit Hours)
This course covers the basics of writing a compiler to translate from a simple high-level language to machine code. Topics include lexical analysis, top-down and LR parsing, syntax-directed translation, and code generation and optimization. Students will write a small compiler.
Outcomes:
Students will learn the theory and practice of how to build a compiler

COMP 473 Advanced Object Oriented Programming (3 Credit Hours)
Object-orientation continues to be a dominant approach to software development. This advanced programming-intensive course studies object-oriented analysis, design, and implementation from a design patterns perspective.
Outcomes:
Proficiency in the use of object-oriented languages, frameworks, and patterns; advanced understanding of key language mechanisms such as delegation, inheritance, polymorphism, and reflection; familiarity with object-oriented modeling and development tools and test-driven development

COMP 474 Software Engineering (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 400B
The course discusses real-world theory and techniques organizations use to create high-quality software on time. Students work on a large programming team to create plans, review progress, measure quality, and make written and oral analyses of their project.
Outcomes:
Students will experience process based development, understand the dynamics of a professional software organization, and develop skills for implementing software with others

COMP 476 Automata & Formal Languages (3 Credit Hours)
Pre-requisites: MATH 201 or MATH 212 or COMP 163
This course introduces formal language theory, including such topics as finite automata and regular expressions, pushdown automata and context-free grammars, Turing machines, undecidability, and the halting problem.
Course equivalencies: X-COMP476/MATH476
Outcomes:
An understanding of the theoretical underpinnings of computability and complexity in computer science

COMP 477 IT Project Management (3 Credit Hours)
Pre-requisites: A grade of "B-" or better in COMP 400B
This course is an introduction to the philosophy and practice of project management. The course involves a student group project to investigate and plan a 'real world' IT project that specifies project objectives, schedules, work breakdown structure, and responsibilities, an written interim report, and a final oral and written report.
Outcomes:
Students will learn time management, work-flow management, and team dynamics to design, implement and test large-scale software projects

COMP 479 Machine Learning (3 Credit Hours)
Topics include a wide variety of supervised learning methods, both regression and classification, with an emphasis on those that perform well on large feature sets.
Outcomes:
Students in this course will learn how to apply sophisticated algorithms to large data sets to make inferences for prediction or decision making

COMP 480 Computer Graphics (3 Credit Hours)
This course introduces advanced topics in modern theory and practices in 3-D computer graphics, stressing real-time interactive applications using libraries like OpenGL.
Outcomes:
Student will learn how to program real-time interactive applications using libraries like OpenGL

COMP 483 Computational Biology (4 Credit Hours)
Pre-requisites: BIOL 488
This course presents an algorithmic focus to problems in computational Biology. As such it is built on earlier courses on algorithms and bioinformatics. Current algorithmic approaches, software tools, and scientific literature are discussed.
Outcomes:
Students will learn, in detail, foundational methods and algorithms in bioinformatics

COMP 484 Artificial Intelligence (3 Credit Hours)
This course advanced artificial intelligence concepts including theory, search techniques and programming.
Outcomes:
Student will learn the theory of artificial intelligence, search techniques, and be able to build small applications based on it

COMP 486 Computational Neuroscience (3 Credit Hours)
Pre-requisites: COMP 400A or equivalent
Introduces computational methods to understand neural processing in the brain. Levels of representation from low-level, temporally precise neural circuits to systems-level rate-encoded models, to information-theoretic approaches. Emphasis on sensory systems, primarily vision and audition, most readily demonstrating the need for such computational techniques.
Outcomes:
Students will be able to adeptly apply mathematical and computational frameworks in the various domains of neuroscience

COMP 487 Deep Learning (3 Credit Hours)
Pre-requisites: COMP 479
Deep learning is part of a broader family of machine learning methods based on artificial neural networks. This course will include key concepts of neural network algorithms as well as their applications in computer vision and natural language processing.
Outcomes:
Students will analyze popular modern neural architectures such as convolutional and recurrent neural networks, design and evaluate their own neural networks, and apply neural network models to a practical task

COMP 488 Computer Science Topics (1-4 Credit Hours)
This course is used to introduce emerging topics in computer science that do not yet have a regular course number. Content of the course varies.
Outcomes:
Understanding of an emerging area of Computer Science

COMP 490 Independent Project (1-6 Credit Hours)
Pre-requisites: Approval of the Computer Science faculty member supervisor
An independent project in computer science or related disciplines, under the supervision of a member of the faculty.

COMP 499 Internship (1-6 Credit Hours)
An opportunity to obtain experience in software development, design, networks, or related activities in computer science in a professional setting. The student must obtain the approval of the Graduate Program Director and the student's work supervisor. A final report from the student and the supervisor are required.

COMP 501 Equitable and Inclusive Computer Science Pedagogy (3 Credit Hours)
Pre-requisites: COMP 400C; Graduate standing
This class covers the design of computer science courses through an equity and inclusion lens, and covers evidence-based best practices as applied to specific student concerns. Includes basics of teaching and learning theory and pedagogical techniques, and equity, diversity, and justice concerns.
Outcomes:
Ability to explain justice-centered CS education; understand pedagogical frameworks; understand assessment approaches; understand Active Learning and Peer Instruction

COMP 502 Structure of Research Management and Funding (3 Credit Hours)
Pre-requisites: COMP 400C; Graduate standing
This class covers grant-proposal development, University compliance regulations, and laboratory and research management.
Outcomes:
Ability to create successful grant proposals and to understand research management

COMP 503 Technology Entrepreneurship (3 Credit Hours)
Pre-requisites: COMP 400C; Graduate standing
This course provides aspiring researchers with the skills to pursue new ventures and technology commercialization. Students learn how to transition an innovation from the lab to the marketplace.

COMP 590 PhD Independent Study (3 Credit Hours)
Independent study for PhD research, for students who have not yet completed the required credit hours.
Outcomes:
This will depend on the exact study or research project the student engages in, but generically the outcome is to gain expertise in a study topic or obtain research results

COMP 595 Thesis Supervision (1 Credit Hour)
Supervision for students working on a thesis while not for other classes. Restricted to students enrolled in the MS in Computer Science.

COMP 600 Dissertation Supervision (1 Credit Hour)
Dissertation work under the supervision of a faculty member.
Outcomes:
This course is an independent study course supervised by a research advisor, the purpose of the course is to enable PhD students to maintain full-time status while they prepare their dissertation proposal, and specific goals will vary for individual students, but in general, PhD students should be maturing as researchers

COMP 605 Master of Science Study (1 Credit Hour)
Course for continuing master's degree students engaged in study.

COMP 610 Doctoral Study (1 Credit Hour)
Dissertation preparation course, for when student has completed coursework but before student has defended their dissertation proposal. Can be taken only twice during a doctoral student's career at LUC.
Outcomes:
This course is an independent study course supervised by a research advisor; The purpose of the course is to enable PhD students to maintain full-time status while they complete their dissertation; Specific goals will vary for individual students, but in general, PhD students should be maturing as researchers and beginning to establish intellectual independence

Computer Science and Education (CSED)

Discover, search, courses (p. 2661)!

CSED 301 Introduction to Programming/Computer Science (3 Credit Hours)
This course provides an introduction to programming with an overview of other topics in computer science.
Outcomes:
Basic programming skills in a computer language such as VB.NET or Logo that may be suitable for teaching to young programmers; understanding of other fundamentals of how computer hardware and software tools work

CSED 317 Social Issues in Computing (3 Credit Hours)
This course covers social, legal, and ethical issues commonly arising in key areas related to computing technologies.
Outcomes:
Understanding of laws and issues in areas such as privacy, encryption, freedom of speech, copyrights and patents, computer crime, and computer/software reliability and safety; understanding of philosophical perspectives such as utilitarianism versus deontological ethics and basics of the U.S. legal system

CSED 330 Technical Administration PC Clusters (3 Credit Hours)
This course covers technical knowledge and practical skills needed to administer a PC cluster in a school or similar environment, focusing on security issues such as firewalls, viruses, and external and internal attacks, and also covers server and LAN configuration and storage management.
Outcomes:
Students will be familiar with the procedures and design tradeoffs involved in configuring a computer lab

CSED 331 Management of PC Cluster (3 Credit Hours)
Further topics in management of school-based PC clusters are covered: purchasing, staffing, troubleshooting, configuration, copyright and software licensing, facilities and resource management, use of IT outsourcing, acceptable-use policies, account management, content filtering, and reliability.
Outcomes:
Students will be familiar with issues and conflicts, both technical and social, that arise in school lab management, and with ways of addressing them

CSED 343 Introduction to Computer Networks (3 Credit Hours)
How a computer network is put together, from lowest to highest levels. TCP/IP protocols and the construction of the internet; LAN protocols such as Ethernet and ATM; internetworking protocols such as IP; transit protocols such as TCP and UDP; congestion and security issues.

Continuing Professional Studies (CPST)

Discover, search, courses (p. 2661)!

CPST 165 Special Topics (1-3 Credit Hours)
Course titles and content vary from term to term. Permission is required to enroll.

CPST 200 Introduction to Degree Completion (3 Credit Hours)
Enrollment is restricted to SCPS degree students only. CPST 200 exists to give newly admitted adult students a chance to ease themselves back into the academic environment while highlighting all of the tools and services available through the university. Improved academic writing through use of multiple drafts.
Outcomes:
Exposure to/familiarity with LUC resources

CPST 201 Civic Identity and Development (3 Credit Hours)
Pre-requisites: CPST 200; Co-requisite: UCWR 110; Enrollment is restricted to students in the School of Continuing and Professional Studies
In this course, students will examine their interconnected identities as engaged professionals in their communities using a variety of frameworks. They will learn to leverage the assets of their communities to enact positive change while also leveraging their own assets to grow as individuals. This course will also prepare students for the design and execution of the SCPS capstone project later on in their academic program.
Outcomes:
Students will develop civic awareness through examination of their identities and meaningful engagement with their communities

CPST 242 Design for the Web (3 Credit Hours)
This course prepares students to develop webpages through a study of Hypertext Markup Language (HTML), Cascading Style Sheets (CSS), Usability principles and Design principles. This course will teach students to plan, design, and construct webpages to work properly in modern web browsers, conforming to web standards while following best practices. Students will be able to: identify graphic design principles that relate to web design, develop webpages with HTML; style webpages with CSS; design and implement wireframes and mockups for websites.

CPST 243 Microeconomics (3 Credit Hours)
Pre-requisites: Restricted to students in the School of Continuing and Professional Studies
Introduction to economic analysis of the smaller components of the economy, household, firm and industry. Topics include economic, socio-economic, and political economic issues; includes a focus on behavioral economics; and provides students with an opportunity to analyze real world economic and public policy decisions that have been influenced by non-economic factors included within its field.
Course equivalencies: ECON201/201H/ACECO201/CPST243
Outcomes:
Explain the law of supply and demand; Distinguish characteristics of different market structures; Analyze how consumers maximize utility; Apply behavioral theory to economic decision-making; Analyze real world microeconomic decisions; Research a topic and present recommendations

CPST 245 Macroeconomics (3 Credit Hours)
Restricted to students in the School of Continuing & Professional Studies. Introduces economic analysis that studies system wide phenomena including inflation, economic growth and development and unemployment. Includes a focus on behavioral economics, and provides students with an opportunity to analyze real world economic and public policy decisions that have been influenced by non-economic factors included within its field.
Course equivalencies: ECON202/ECON202H/ACECO202/245
Outcomes:
1) Explain the law of supply and demand; 2) Describe the nature of macroeconomic issues and problems; 3) Articulate the objectives of monetary and fiscal policies and the function of the two principal policy makers; 4) Analyze historical macroeconomic crises; 5) Discuss basic macroeconomic goals such as GDP, CPI and unemployment; 6) Assess public policy decisions from a behavioral economic perspective

CPST 247 Computer Concepts and Applications (3 Credit Hours)
An introduction to computer and internet resources and skills with an emphasis on effective use of technology in the work place. Students will learn to identify and provide recommendations for technology-based issues in business using industry standard language, identify changes in information technologies and assess the impact on business and society. Restricted to students in the School of Continuing and Professional Studies.
Outcomes:
Understand the purpose and composition of information systems in business, and receive hands on experience developing business applications with tools such as Microsoft Office, social media, basic website construction

CPST 248 Web Accessibility and UX Strategy (3 Credit Hours)
This course explores the intersection of user experience (UX) design and web accessibility, emphasizing inclusive design principles and strategic UX planning. Students will learn how to evaluate and implement accessibility standards (e.g., WCAG), design user-centered interfaces, and develop strategies that enhance usability for diverse audiences, including individuals with disabilities. Students will understand the UX Design thinking process, including exploring personas, task analysis, and user journey mapping.
Outcomes:
Apply accessibility standards and UX principles to design and evaluate web interfaces that meet the needs of diverse user populations, including those with disabilities; Develop and communicate UX strategies that incorporate accessibility principles to support inclusive digital product design and user engagement; Analyze user personas, perform task analysis, and construct user journey maps to inform UX design decisions

CPST 249 User Experience Design Tools and Techniques (3 Credit Hours)
Pre-requisites: CPST 248 with C- or better
The course focuses on user and task analysis (goal setting and problem framing), field research (interviews, personas, planning, etc.), usability testing, the UX process (from wireframes through user journey mapping). These topics are explored through Design assignments that utilize the complete UX Design process. Students will be able to: apply the UX Prototyping process and UX Design Tools; apply the UX Design process, including the use of personas, task models, and user journey mapping.

CPST 250 Foundations of Organizations (3 Credit Hours)
Pre-requisites: CPST courses are restricted to students in the School of Continuing and Professional Studies
An introduction to contemporary management with emphasis on organizational culture, decision making, organizational structure and design, planning, communication and information technology.
Course equivalencies: MGMT201/201H/301/CPST250/ACMGT
Outcomes:
Students will demonstrate an understanding of the managerial roles in organizations, the four levels at which behavior is examined in organizations and will develop a framework for basic business operations

CPST 260 Artificial Intelligence in Practice: Tools, Ethics, and Strategy (3 Credit Hours)
This course examines the history and function of Large Language Models (LLMs), their ethical implications, and on-going societal impact. Students explore industry applications, evaluate real-world case studies, and develop strategies to integrate and utilize AI tools for responsible value creation. This course will provide practical experience in researching, analyzing, and adopting AI tools to enhance efficiency and task optimization.
Outcomes:
1) Describe fundamental artificial intelligence tools (generative, agentic, domain specific tools, etc), including their core functions, typical applications, and relevance across various domains; 2) Analyze the ethical implications of the transformative potential of AI and its impact on society; 3) Explain the History of AI and how Large Language Models Function; 4) Explore relevant industry applications that implement Large Language Models (LLMs) and how to harness value creation in the workplace; 5) Implement actionable strategies to integrate AI into an organization's culture

CPST 265 Special Topics (1-3 Credit Hours)
Course titles and content will vary from term to term. Permission is required to enroll.

CPST 291 Dynamic Programming Languages (3 Credit Hours)
Restricted to students in the School of Continuing & Professional Studies. Introduction to programming in dynamically typed languages, sometimes known as scripting languages. The primary language example will be Python; the course will cover Python data types, control structures, function definitions, objects and lambda expressions. A second language may be Ruby, PHP, Scheme or a similar language. The course will also briefly address how Javascript fits into the category of dynamic languages. - Ability to create a dynamic web page using Python or some other language
Outcomes:
Ability to write short programs in Python, using loops, lists and dictionaries; Ability to create graphical effects using Python; Familiarity with the software-development process, and how software can be organized using classes and functions; Familiarity with the advantages and disadvantages of dynamic languages, versus static typing; Ability to compare Python to some other dynamic language, such as Ruby or PHP

CPST 295 The Internship Experience (3 Credit Hours)
Pre-requisites: CPST 200 and CPST 201 (minimum grade of C+); Enrollment is restricted to SCPS degree seeking students; Minimum 2.5 GPA is required
This course provides an opportunity to broaden work and experiential base through immersion within a selected organization. Students spend approximately 8 hours a week interning with their chosen company, institution, nonprofit, small business or other professional setting. Optional to extend the internship a second term.
Outcomes:
To gain real-world professional experience within a targeted work environment; To apply skills and knowledge within context of selected environment; To develop networking opportunities within new professional workplace

CPST 310 Accounting Principles and Application (3 Credit Hours)
CPST courses are restricted to students in the School of Continuing and Professional Studies. This course introduces major concepts in the areas of financial and managerial accounting and develops understanding of accounting process and principles. Students will gain a deeper understanding of financial statements, accounting mechanics, accrual accounting, financial planning, variance analysis, internal controls and financial and financial analysis.
Course equivalencies: ACCT201/201H/CPST310/ACACT201
Outcomes:
Students will gain a deeper understanding of financial statements, accounting mechanics, accrual accounting, financial planning, variance analysis, internal controls and financial and financial analysis; The students will complete a final course project that demonstrates their ability to manage the financial data of a fictional organization

CPST 315 Professional Technical Writing (3 Credit Hours)
Pre-requisites: UCWR 110; Restricted to students in the School of Continuing and Professional Studies
Technical Writing prepares students to design effective technical documents for both written and digital media, with particular emphasis upon technical memos, problem-solving and decision-making reports, and organizational, product-support, and technical-information webs.
Outcomes:
Students able to write standard prose with appropriate citations, use a range of current online platforms and technology

CPST 320 Program Evaluation (3 Credit Hours)
Enrollment is restricted to students in the School of Continuing and Professional Studies. Conceptual frameworks and methods related to program evaluation will be covered including process, developmental, outcome, and impact evaluation. Students will be exposed to best practices to measure and document change on the individual, organizational, and macro level including the use of logic models. Quantitative, qualitative, and mixed methods design will be presented. Students will be exposed to analytical tools to interpret qualitative and quantitative data. The use of Big Data will be explored including the implications for behavioral change. Ethical issues in real world evaluation will be addressed. Course Objectives 1. Describe the main conceptual frameworks used in program evaluation including process(formative), developmental, outcome and impact. 2. Compare and contrast quantitative, qualitative, and mixed methods design for program evaluation. 3. Evaluate best practices in relation to the measurement and documentation of change (individual, organizational, and macro-level). 4. Develop process and outcome objectives and logic models. 5. Interpret data including Big Data to make judgements about the efficacy of program activities and intervention. 6. Describe ethical dilemmas with real world research.

CPST 322 Strategic Communication Tools for Applied Psych (3 Credit Hours)
Communication tools commonly employed in the behavioral sciences will be covered: interview development and implementation; best practices for conflict management, negotiation, consultation and persuasion; group facilitation best practices; change facilitation communication techniques including motivational interviewing; the impact of computer mediated communication on interpersonal dynamics; and cultural norms and interpersonal communication. Students interested in counseling and other helping professions, Human Resources, organizational development and the persuasion sciences will benefit from these tools. Enrollment is restricted to students in the School of Continuing and Professional Studies. Course Objectives 1. Identify best practices for core communication tools used in applied psychology (and behavioral sciences). 2. Develop skills in interview development and implementation, group facilitation, and motivational interviewing. 3. Evaluate techniques for conflict management, negotiation, consultation and persuasion. 4. Critique the impact of computer mediated communication of interpersonal dynamics. 5. Describe culturally agile communication techniques.

CPST 325 Data Processing, Analysis, and Visualization (3 Credit Hours)
Pre-requisites: STAT 103; CPST 291 with C- or better; Restricted to students enrolled in the School of Continuing and Professional Studies
This course studies the concepts, methods, and tools required to infer meaningful information and generate useful visualizations from large data sets. Visualize and analyze structured data using appropriate statistical data mining and visualization tools. Analyze distributed computing frameworks for processing large data sets.
Outcomes:
Implement scripting to convert raw data to structured data

CPST 335 Law and Regulations for Organizational Leaders (3 Credit Hours)
The role of the organization (for profit, non-profit and governmental) from the dual perspective of private and public law. Includes foundations of law and judicial process; contracts, torts, and property law; intellectual property rights; legal, securities and employment regulations; ethical considerations and policy issues.
Outcomes:
-Differentiate ethics and law/private and public law -Discuss Constitutional Law and government's role to regulate business -Apply basic legal principles to the private market -Explain legal principles of contracts

CPST 340 Marketing Concepts and Strategies (3 Credit Hours)
Pre-requisites: CPST 250; Restricted to SCPS
Students will demonstrate an understanding of the fundamental principles of marketing identifying organizational goals, marketing objectives, and variables that affect marketing. Students will examine the roles of advertising, public relations, and sales; integrated and strategic marketing within an organization.
Course equivalencies: MARK201/201H/301/CPST340
Outcomes:
Students will develop a comprehensive marketing plan analyzing a real marketing problem, determining strategies, developing sample materials and devising metrics to evaluate success for an organization

CPST 341 User Experience Design to Drive Business (3 Credit Hours)
Pre-requisites: CPST 249 with C- or better
In this course students will learn how to connect and align business objectives with UX Design goals. Students will learn how to bring high-level planning into concrete actionable steps. Students learn Strategy for continuously Developing Brand and Identity through Design. Students will be able to: Understand how effective UX is a strategic advantage for business; Connect and align business objectives with UX Design goals; Apply Design Thinking to create good UX.

CPST 342 Introduction to Web Application Development (3 Credit Hours)
This course studies the concepts, methods, and tools used in the analysis, design, implementation, testing, and deployment of typical multi-tier web applications. Specific topics include presentations, business, and data access layers, as well as integration with database systems. An introduction to webpage development using JavaScript, jQuery and associated client-side tools.
Course equivalencies: X- DIGH403/CPST342/COMP342
Outcomes:
Experience with commonly used web application development frameworks; Familiarity with database integration and deployment environments; Create webpages using JavaScript and related tools and protocols, and interface a webpage with a database

CPST 343 Software Development for Mobile Devices (3 Credit Hours)
Pre-requisites: COMP 170 with C- or better; Restricted to students enrolled in the School of Continuing and Professional Studies
This course introduces software development for the Android environment, using the App Inventor framework. The course also introduces the basics of user-interface design and mobile architecture. Development work may be done on either an Android device or on an Android emulator running on a Windows/Mac/Linux laptop.
Outcomes:
Be able to develop simple Android applications using the App Inventor framework; Be able to explain the basics of mobile-application architecture and design; Be familiar with the basics of user-interface design; Understand the role of mobile-device sensors, such as the touchscreen, the accelerometer and GPS; Understand the use of Wi-Fi versus mobile wireless, and the use of the cloud in mobile applications; Be able to work with developers to create applications

CPST 345 Introduction to IT: Networking, Cloud & Security (3 Credit Hours)
Pre-requisites: COMP 170 with C- or better; Restricted to students enrolled in the School of Continuing and Professional Studies
This course covers the fundamentals of IT systems, networking, and security. The course will cover fundamental computer networking concepts and principles, including the basics of the TCP/IP model and packet-based networking. Other topics include an overview of Wireless Networking, Cloud Computing, and an introduction to Cybersecurity.
Course equivalencies: CPST 345 / ITLS 445
Outcomes:
Students will be able to: Describe how the Internet works; Make connections between devices Assess how data is transferred end to end; Perform basic Cloud Computing implementation and deployment; Describe essential features of Mobile Computing; and, identify and assess Cybersecurity threats and describe solutions to those threats

CPST 349 Project Management (3 Credit Hours)
Pre-requisites: CPST 250; Restricted to students in the School of Continuing and Professional Studies
The art and science of project management as applied to a variety of business, commercial, and public management situations. Covers all phases of the project life-cycle; techniques for planning, scheduling and control of projects; project organizations; and techniques for building effective project teams. Student will gain a working knowledge of the fundamental principles and techniques of effective project management, and how to apply these principles and techniques in the business environment.

CPST 350 Human Resources Principles and Practices (3 Credit Hours)
Pre-requisites: CPST 250; Restricted to students in the School of Continuing and Professional Studies
Students will gain understanding of human of resource management functions, including the legal environment; equal employment opportunities requirements; job design and analysis; recruiting, orientation, and training; performance appraisal; compensation systems; labor relations; collective bargaining and grievance processes; and health and safety.
Outcomes:
Students will make a presentation about human resource components for an organization, including job description, recruiting plan, hiring procedures, performance evaluation, and collective bargaining considerations

CPST 360 Development and Change in Organizations (3 Credit Hours)
Pre-requisites: CPST 250
Students will investigate the theory and practice of organizational development, examine assumptions, strategies, models, intervention techniques for organizational development and change processes. Students will also study the formation of collaborative relationships, overcoming resistance, gaining commitment and realigning culture.
Outcomes:
Students will provide case studies that integrate data; design interventions, change strategies and an evaluation for diagnosing organizations, groups and jobs

CPST 365 Advanced Special Topics (1-3 Credit Hours)
Course titles and content vary. Variable (1-3) credit hours. Permission required to enroll. Restricted to students in the School of Continuing & Professional Studies. SCPS permission required to enroll.

CPST 370 Leadership Theories and Applications (3 Credit Hours)
Pre-requisites: CPST 250
Students will study leadership theory, concepts and the practical application of leadership at all levels. Students will analyze historical approaches to leadership and focus on influential contemporary leadership perspectives such as servant leadership, situational leadership, transformational leadership, and principle-centered leadership.
Outcomes:
Students will complete a leadership development plan and apply leadership theories to workplace situations through reflection, real-life examples, and case studies

CPST 371 Organizational Finance (3 Credit Hours)
Pre-requisites: CPST 243 or ECON 201, CPST 245 or ECON 202, STAT 103 or ISOM 241, CPST 310 or ACCT 201; Restricted to students in the School of Continuing & Professional Studies
Management involves the allocation and distribution of resources as well as an ongoing knowledge of the financial impact of the local, regional and national economies. This course offers an overview of the inter-relations of money and markets, investment, and financial management. It will focus on financial analysis, design and reporting from a managerial perspective, as well as organizational issues which have a financial impact on the entity. It will concentrate on organizational finance topics with an emphasis on financial analysis, fixed income securities, stocks, projects and their valuations, corporate valuation and governance and cash distribution.
Course equivalencies: FINC332/FINC 334/CPST271
Outcomes:
At the end of this course, the student will be able to 1) Read, develop and write financial analyses for managerial roles; 2) Develop concrete skills in regard to fiscal leadership; 3) Analyze cash flow and financial statements; 4) Describe the time value of money, bonds, and bond valuation regarding changes in interest rates; 5) Evaluate risk and return, valuation of stocks and corporations, and financial options in corporate finance; 6) Apply the cost of capital and cash flows to capital budgeting; 7) Describe how local, regional and national economies impact the success of the allocation of financial resources

CPST 377 Data in Management Decision-Making (3 Credit Hours)
Pre-requisites: CPST 250, STAT 103
Data, technology, and analytics capabilities have a direct impact on decision making. The integration of Financial/Enterprise Resource Planning (ERP) Systems and business analytics drives the ability to turn data into insights and action. This course will prepare students to understand, manage and visualize data, while also focusing on effective ways to communicate for decision-making. The course will introduce ERP systems and technology and the use of analytical tools in organizational decision-making.
Outcomes:
Utilize common enterprise systems and analytical tools in decision-making; Evaluate the use of databases in data management and data wrangling; Develop the ability to apply analytical techniques to data through mining; Practice important data visualization techniques and summary measures; Write to communicate insights gained from data analysis

CPST 380 Leadership, Culture and Ethics (3 Credit Hours)
Pre-requisites: CPST 250
Students examine organizational ethics, values, strategy, culture, leadership and coaching. Students self-assess and refine their own concept of leadership and decision-making in the context of attitudes, environments, cultures, and issues faced by leaders in organizations.
Outcomes:
Students will analyze descriptive and normative models of ethical decision making in business, leadership strengths and management style using real life situations, self-assessment and cases studies

CPST 381 Cybersecurity Governance (3 Credit Hours)
Effective Cybersecurity Leadership requires that there is a cogent Governance structure. Students in this course will learn how to manage Cybersecurity processes while meeting the needs of the Enterprise. Students will learn how to establish a Governance program, Cybersecurity management frameworks, how to develop and implement a Cybersecurity strategy. Students will be able to: Explain the strategic importance of effective, interdisciplinary, and multifunctional enterprise information security governance and information security management program and its execution.

CPST 382 Cybersecurity Incident Response Management (3 Credit Hours)
Students in this course learn key aspects of Cybersecurity Incident Response Management (CIRM). Students in this course will learn how to plan for, respond to, investigate, and report on Cybersecurity Incidents. Students in this course will learn from case studies of past cyber incidents. Skills developed include the developing of an Incident Response Plan; ethical, best practices on handling communications/disclosures after an incident; incident investigation techniques (forensics); interfacing with law enforcement; and post-incident recovery.

CPST 383 Cloud Security Strategy and Architecture (3 Credit Hours)
This course leverages cloud computing security guidelines set forth by the International Organization for Standardization (ISO), National Institute of Standards and Technology (NIST), European Union Agency for Network and Information Security (ENISA), and Cloud Security Alliance (CSA) to develop a Strategic perspective for the Cybersecurity practitioner. Skills developed include knowing best practices and standards; the ability to design and implement a cloud security architecture; and carefully working with 3rd party cloud infrastructure providers and other stakeholders.

CPST 390 Organizational Theory and Practice (3 Credit Hours)
Pre-requisites: CPST 380
This course extends knowledge of organizations by examining organizational behavior at the macro-level. Students will gain a deeper understanding of organizational theory and research including historical and modern era approaches. Students will also analyze organizational behavior and settings including an in-depth case study of a single company.
Outcomes:
Students will be able to explain and apply concepts within the main areas of organizational structure, culture, communication and process

CPST 397 Capstone (3 Credit Hours)
This course must be taken by SCPS students during the last semester prior to graduation. Students will collaborate with a community organization of their choosing to design and execute a capstone project that fulfills the University Engaged Learning requirement. This includes completing at least 20 hours of civic engagement, all necessary Center for Engaged Learning, Teaching, and Scholarship (CELTS) documentation, and a capstone project report. Grounded in Ignatian pedagogy, the course emphasizes reflection, discernment, and action, guiding students through individual and group exercises to deepen their learning and refine their project. By integrating knowledge from their SCPS coursework, students will develop their capstone projects while preparing for life after graduation as Civic-Minded Professionals.
This course satisfies the Engaged Learning requirement.
Outcomes:
Design and execute a capstone project with a community partner organization of their choosing; Complete a minimum of 20 hours of civic engagement with a community partner to satisfy the University Engaged Learning requirement; Present a capstone project report

CPST 398 Professional Studies Internship Seminar (2 Credit Hours)
To enroll students must complete the internship forms through the Center for Experiential Learning. The Internship Seminar is a way to earn academic credit for an internship completed while finishing one of the SCPS BA programs. Students taking CPST 398 must take CPST 399 the following session to get complete credit for the internship.
This course satisfies the Engaged Learning requirement.
Course equivalencies: CPST398/UNIV390
Outcomes:
Applied experience in a professional setting

CPST 399 Professional Studies Internship Seminar II (2 Credit Hours)
To enroll students must complete the internship forms through the Center for Experiential Learning. The Internship Seminar is a way to earn academic credit for an internship completed while finishing one of the SCPS BA programs. Students taking CPST 399 must first take CPST 398 the previous session to get complete credit for the internship.
This course satisfies the Engaged Learning requirement.
Outcomes:
Applied experience in a professional setting

CPST 465 Special Topics (1-3 Credit Hours)
Pre-requisites: Limited to students in the Graduate SCPS Programs
Course titles and content vary from term to term. Permission is required to enroll.

Counseling Psychology (CPSY)

Discover, search, courses (p. 2661)!

CPSY 100 Intro Var Chd Dev&Impl Sp Educ (3 Credit Hours)
No course description is available

CPSY 200 Psyc Acad & Persnl Effect (3 Credit Hours)
No course description is available

CPSY 220 Speech & Language Development (3 Credit Hours)
No course description is available

CPSY 224 Career and Life Planning Seminar (3 Credit Hours)
Because most students will make several career or job changes during their lives, the purpose of this course is to teach students a decision-making process that can be used when making career-related decisions. planning; and planning an effective job search campaign.
Course equivalencies: CPSY 224/UNIV 224
Outcomes:
Students will be able to apply the decision-making process to a decision they are trying to make (eg, choosing a major, choosing a career)

CPSY 273 Developmental Psychology (3 Credit Hours)
No course description is available
Course equivalencies: X-CPSY273/PSYC273

CPSY 323 Theories of Counseling and Psychotherapy (3 Credit Hours)
This course examines major theories of counseling and psychotherapy in a culturally-diverse society.
Course equivalencies: X - CPSY 323 / 423
Outcomes:
Students will be able to demonstrate an understanding of the relationship between counseling theory and counseling practice, and the key elements, concepts, and techniques associated with ten major theories of counseling and psychotherapy; Students will also be able to apply each major theory to potential client problem situations

CPSY 324 Career Counseling and Development (3 Credit Hours)
This course examines research and theories on career development and counseling and their applications to assessing, treating, and preventing career-related problems across the life-cycle.
Course equivalencies: X - CPSY 324 / 424
Outcomes:
Students will be able to demonstrate an understanding of five major theories of career development; the structure of vocational interests, needs, and abilities and how each can be assessed, major sources of occupational information; how to apply theory and research to problems of career choice-making, job finding, and work adjustment

CPSY 332 Multicultural Counseling (3 Credit Hours)
The course provides an overview of the experiences of various cultural groups with the United States, concerning issues of oppression, identity development, and acculturation, for instance. The course aims to develop multicultural competence by increasing students' awareness, knowledge and skill base.
Course equivalencies: X - CPSY 332 / 433
Outcomes:
Students will increase their awareness of their own cultural background, biases, and world view and their knowledge of the world view of culturally diverse clients and will begin to develop appropriate interventions strategies to work effectively with diverse populations

CPSY 333 Abnormal Psychology (3 Credit Hours)
No course description is available
Course equivalencies: X-CPSY333/PSYC331/ACPSY280

CPSY 334 Child, Family, and Community (3 Credit Hours)
No course description is available

CPSY 335 Attitudes, Values & Sexual Behavior (3 Credit Hours)
No course description is available

CPSY 337 Adolescent Development (3 Credit Hours)
Requirement: ANTH 100, PLSC 102, PSYC 100 or SOCL 101 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of Anthropology, Department of Criminal Justice, Department of Economics, Department of Psychology, Department of Political Science, the Department of Sociology, Human Services or the School of Nursing. This course introduces students to developmental processes, social context, variance (diversity), and psychological/educational implications of the life stage called "adolescence".
Outcomes:
Students will be expected to demonstrate an understanding the stages of normal adolescent development within a variety of cultural contexts as well as situations which compromise adolescent mental health and well being

CPSY 338 Psychology of Personality (3 Credit Hours)
No course description is available
Course equivalencies: X-CPSY338/PSYC338

CPSY 341 Principles of Guidance (3 Credit Hours)
No course description is available

CPSY 342 Identity and Pluralism (3 Credit Hours)
Requirement: ANTH 100, PLSC 102, PSYC 100 or SOCL 101 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of Anthropology, Department of Criminal Justice, Department of Economics, Department of Psychology, Department of Political Science, the Department of Sociology, Human Services or the School of Nursing. A critical examination of theory and research on the role of culture in identity development. Particular emphasis will be given to such concepts as racism, sexism, ethnicity, culture, class prejudice, and ethnocentrism and how these help shape an individual's identity and society's conceptualization of culture.
Outcomes:
Students will demonstrate ability to think critically about issues of race, class, culture, and gender, and to analyze how these issues play themselves out in our schools and school systems

CPSY 420 Counseling Skills (3 Credit Hours)
This course provides an introduction to counseling skills as they apply to the helping professions.
Outcomes:
Students will be able to demonstrate clinical attending, observing, and responding behaviors in one-to-one counseling interviews

CPSY 421 Professional Issues Counseling (3 Credit Hours)
The course will provide students with an overview of the current ethical, legal, and professional issues in the practice of counseling. The course will use American Counseling Association's Codes of Ethics and Standards of Practice as a foundation for examining ethical decision making.
Outcomes:
Students will demonstrate knowledge about the ethical standards of the counseling profession and will develop the ability to apply the knowledge base of their discipline in an ethical and reflective manner

CPSY 423 Theory Counseling and Psychotherapy (3 Credit Hours)
This course examines major theories of counseling and psychotherapy in a culturally-diverse society.
Course equivalencies: X - CPSY 323 / 423
Outcomes:
Students will be able to demonstrate an understanding of the relationship between counseling theory and counseling practice and the key elements, concepts, and techniques associated with ten major theories of counseling and psychotherapy; Students will also be able to apply each major theory to potential client problem situations

CPSY 424 Career Development and Counseling (3 Credit Hours)
This course examines research and theories on career development and counseling and their applications to assessing, treating, and preventing career-related problems across the life-cycle.
Course equivalencies: X - CPSY 324 / 424
Outcomes:
Students will be able to demonstrate an understanding of five major theories of career development; the structure of vocational interests, needs, and abilities and how each can be assessed; major sources of occupational information; how to apply theory and research to problems of career choice-making, job finding, and work adjustment

CPSY 425 Assessment in Counseling (3 Credit Hours)
This course provides an introduction to the basic principles involved in using tests, inventories, observational procedures, and other forms of assessment in counseling.
Outcomes:
Students will be able to demonstrate an understanding of the conceptual underpinnings of reliability, validity, and the use of norms and score transformations and how these apply to the professional and ethical use of assessment information in counseling

CPSY 426 Group Counseling: Theory and Practice (3 Credit Hours)
Pre-requisites: CPSY 423
This course provides an overview of prevailing group counseling models and theories and their application to conducting group counseling in various settings.
Outcomes:
Students will be able to understand and integrate various properties of groups into a meaningful theoretical framework, and develop and demonstrate an understanding of group process through participation in a group experience

CPSY 427 Clinical Mental Health Counseling (3 Credit Hours)
The first purpose is to conduct an in-depth examination of Community Counseling as a helping profession. Specifically, we will examine (a) historical, philosophical, and social/political influences on contemporary community counseling practices, (b) professional organizations to which community counselors belong, the settings in which they practice, and the roles of community counselors in those settings, (c) credentialing and licensing for community counseling practice, and (d) knowledge bases critical to community counseling. The second purpose is to provide students with an opportunity to develop their skills at presenting to professional audiences. Thus, students will have an opportunity to develop in-depth knowledge on a substantive topic relevant to the work of community counselors and present their findings to the class.
Outcomes:
Students will know the history of the counseling profession and current issues involved in the professional practice of counseling

CPSY 428 Foundations of Professional School Counseling (3 Credit Hours)
This course is designed to introduce students to the philosophy of a comprehensive, developmental K-12 school-counseling program and to the national standards for school counseling. The emphasis will be on school counselors' roles and functions as defined by the American School Counselor Association.
Outcomes:
Participants in this course will be able to develop and implement a school counseling program according to the American School Counselors Association's National Standards and the Illinois Developmental Counseling Model

CPSY 431 Advanced School Counseling & Consultation (3 Credit Hours)
Pre-requisites: CPSY 428 Intro to School Counseling
This course introduces the attitudes, concepts, and skills of indirect service delivery through consultation. This course is designed to produce consultation and organizational development skills that will facilitate effective professional school counseling practice. Reflection on the practice of consultation is also developed, as well as competencies for practice within a multiculturally diverse society.
Outcomes:
Students will understanding of the school culture and organizational and contextual factors to the consultation/intervention process and understand the consultative process

CPSY 433 Multicultural Counseling (3 Credit Hours)
The course provides an overview of the experiences of various cultural groups with the United States, concerning issues of oppression, identity development, and acculturation, for instance. The course aims to develop multicultural competence by increasing students' awareness, knowledge, and skill base.
Course equivalencies: X - CPSY 332 / 433
Outcomes:
Students will increase their awareness of their own cultural background, biases, and world view; Students will increase their knowledge of the world view of culturally diverse clients; Students will begin to develop appropriate interventions strategies to work effectively with diverse populations

CPSY 435 Selected Topics in Counseling (3 Credit Hours)
This is an advanced seminar on selected topics in counseling. Topics vary, but typically have included the following: school counseling, community counseling, psychology of oppression, prevention and outreach, and supervision.
Outcomes:
Outcomes vary with topic

CPSY 437 Addiction Counseling (3 Credit Hours)
This course is designed to provide an introduction to the fundamentals of addiction counseling. This course will supply students with the requisite knowledge relevant in this area.
Outcomes:
Students will demonstrate knowledge of the etiology and diagnosis of substance abuse problems and their treatment from major theoretical perspectives

CPSY 440 Practicum (3 Credit Hours)
Pre-requisites: Consent of Instructor
This course is a supervised experience in counseling taken for two semesters by students in the community and school counseling programs. A field placement is required.
Outcomes:
Students will demonstrate case conceptualization, treatment planning, and counseling skills with diverse clients in individual and group contexts, understand the ACA ethical standards of conduct, and participate in other professional roles required in their field placement

CPSY 441 Internship (3 Credit Hours)
This course is a supervised experience in counseling taken in a two semester sequence with CPSY 440 by students in the community and school counseling programs. A field placement is required.
Outcomes:
Students will demonstrate case conceptualization, treatment planning, and counseling skills with diverse clients in individual and group contexts, and understand the APA code of ethics

CPSY 442 Doctoral Practicum (3 Credit Hours)
Pre-requisites: CPSY 441 and consent of instructor
This is an advanced doctoral-level supervised experience for counseling psychology students and is a continuation of CPSY 441.
Outcomes:
Students will demonstrate case conceptualization, treatment planning, and counseling skills with diverse clients in individual and group contexts, understand the APA code of ethics, and participate in other professional roles related to the doctoral-level practice of counseling psychology

CPSY 443 Clerkship (1 Credit Hour)
Pre-requisites: CPSY 441 and 442
This is an elective supervised clinical experience in assessment or psychotherapy for doctoral students in counseling psychology. A field placement is required and all supervision is provided on site by a qualified supervisor employed by the agency in which the field work is taking place.
Outcomes:
Varies with goals of student and agreement with field site

CPSY 444 Family Therapy I (3 Credit Hours)
This course is designed to introduce students to foundational approaches and theories of family therapy.
Outcomes:
Students will be able to apply foundational theories and their corresponding interventions to clinical problems in a family context

CPSY 445 Family Therapy II (3 Credit Hours)
Pre-requisites: CPSY 444
Building on Family Therapy I, this course examines more advanced theories family therapy and considers feminist and multicultural critiques of these theories. Additionally, students will be introduced to integrated approaches to family therapy.
Outcomes:
Students will be able to apply multiple theories of family therapy in an integrated model to clinical problems in a family context

CPSY 446 Marital/Couples Therapy (3 Credit Hours)
Pre-requisites: CPSY 444
Building on Family Therapy I, this course examines more advanced theories family therapy and considers feminist and multicultural critiques of these theories. Additionally, students will be introduced to integrated approaches to family therapy.
Outcomes:
Students will be able to apply multiple theories of family therapy in an integrated model to clinical problems in a family context

CPSY 450 Research Methods in Counseling Psychology (3 Credit Hours)
The course is structured so that major quantitative research methods can be grasped by the student so that they can critically read and evaluate the professional literature and design their own study. The primary goal is for students to understand the fundamental ideas (i.e., big pictures of research methods) involved in each analytic tool and to be able to choose appropriate analyses for their research question. Added training/exercises might be needed for students to be able to apply analytic tools in a technically appropriate manner (i.e., technical procedures of research methods) but the focus of this course is to help students develop a strategic sense of research methods, based on which students can absorb detailed tactical procedures of research methods later.

CPSY 454 Human Development: Cognitive, Aff & Phys Bases (3 Credit Hours)
Restricted to Graduate Students. This course is a graduate-level survey of human development across the lifespan.
Course equivalencies: CPSY 454/454
Outcomes:
To build the students' foundational knowledge of lifespan developmental theories and research and to critically examine the extent to which cultural variation is included and/or excluded from developmental theories

CPSY 458 Adolescent Development and Counseling (3 Credit Hours)
Pre-requisites: CPSY 454
This course provides in-depth study of psychological theories and research relevant to adolescent development.
Outcomes:
Students will be able to apply relevant theories to promote well-being and academic success in adolescents and prevent psychological and academic problems

CPSY 461 Neuropsychology (3 Credit Hours)
This course is a survey of neuroanatomy and brain-behavior relationships.
Outcomes:
Students will be able to demonstrate knowledge of neuroanatomy and brain-behavior relationships

CPSY 482 Personality and Intellectual Assessment (3 Credit Hours)
This is a course in which students acquire basic proficiency in the administration and interpretation of objective and projective personality tests.
Course equivalencies: X-CIEP482/CPSY482
Outcomes:
Students will demonstrate skills with the administration, interpretation, and presentation of personality assessment results

CPSY 498 Independent Study (1-3 Credit Hours)
Topics chosen for individual study. Must be approved by an instructor and department chairperson.

CPSY 499 Independent Research (1-3 Credit Hours)
Research projects selected by the individual student, with the approval of the research supervisor and the department chairperson.
Outcomes:
Outcomes are chosen between the instructor and the student during the semester the student takes the course

CPSY 527 Prevention, Advocacy, and Outreach: Community-Based (3 Credit Hours)
This course will introduce students to the fundamentals of prevention, advocacy, and outreach work, components of a community counseling model. The course will integrate theory, practice, and evaluation research in its methods and will involve designing and implementing an actual community-based intervention program. A critical component of this course will be learning about the nuances of developing relationships with community systems.
Outcomes:
Students will be able to think critically about the conceptual and theoretical philosophies that underlie prevention practice and will be able to develop preventative interventions for use in school and community contexts

CPSY 528 Clinical Appraisal and Treatment Planning (3 Credit Hours)
This course focuses on developing intake interviewing skills, writing intake reports, conducting diagnoses, and developing treatment plans. Interviewing styles including social history interviews, mental status examinations, and behavioral interviews are explored.
Outcomes:
Students will be able to demonstrate the ability to collect useful information from clients through diagnostic interviews and mental status examinations, assign diagnoses, write treatment plans, and formulate treatment recommendations

CPSY 529 Psychology of Immigration (3 Credit Hours)
This course will cover such topics as the current status of U.S. immigrants, major theories and literature on immigration and acculturation, ethnic identity, social relationship issues, language issues, immigrant family issues, migratory loss, general and special topics for Latino/a immigrants, general and special topics for Asian immigrants, and special populations.
Outcomes:
1) develop skills, competencies, and points of view; 2) learn to analyze and critically evaluate ideas, arguments, and points of view; 3) acquire an interest in learning more by seeking answers

CPSY 530 Research Seminar in Counseling Psychology (3 Credit Hours)
Pre-requisites: consent of instructor
This doctoral seminar provides in depth coverage of important methodological issues involved in conducting research in counseling psychology and provides the student to develop a research proposal.
Outcomes:
Students will be able to demonstrate knowledge of methodological issues involved in conducting research in counseling psychology, including understanding and controlling threats to validity, understanding the limits of null hypothesis significance testing and the importance of effect size estimates to the interpretation of the results of individual experiments and to the accumulation of evidence across experiments; Students will also demonstrate the ability to translate a research interest into a researchable question and design a study to address the question

CPSY 531 Ethical and Legal Issues in Counseling Psychology (3 Credit Hours)
The course uses the American Psychological Association's Ethical Principles of Psychologists and Code of Conduct as a framework, to examine representative ethical, professional and legal issues commonly encountered in the exercise of our professional responsibilities as clinicians, teachers, supervisors, and researchers.
Outcomes:
Students will be able to demonstrate knowledge about the contemporary ethical, professional and legal issues relevant to the practice of professional psychology and will be able think critically about ethical dilemmas to make ethical decisions,

CPSY 532 Advanced Theories in Psychotherapy (3 Credit Hours)
This is an advanced course in reading, understanding, and applying theories of counseling and psychotherapy. It was designed to stimulate multiple aspects of learning experiences: introduction to contemporary theories, review of empirical evidence, session role-play, and development of theoretical orientation. Through the course, students are expected to synthesize theoretical, empirical, practical, and personal information about change to further formulate their theoretical orientation. Therefore, this course has two learning goals, including: (1) gaining knowledge of counseling theories, and (2) learning to apply knowledge and experiences to formulate personal theoretical orientation.

CPSY 533 Proseminar (0 Credit Hours)
CIEP 533 is a seminar class intended to provide supervision to first year School Psychology students enrolled in CIEP 477 for the Fall term. CIEP 533 focuses on the completion of a long-term academic case study and intervention within a 5-step problem solving framework. The case study requires candidates, working in teams, to complete all steps of a problem-solving process: Problem Identification; Problem Analysis; Plan Development; Plan Implementation and Monitoring; and Plan Evaluation. Candidates will collect individual student academic data, determine the nature and magnitude of a student's academic difficulty using appropriate comparison standards, develop an intervention plan, implement the plan, collect progress-monitoring and implementation fidelity data, evaluate the outcome of the intervention, and share the outcomes in written and oral formats.

CPSY 535 Seminar in Supervision & Consultation (3 Credit Hours)
Pre-requisites: permission of instructor
This seminar exposes students to theory and research on clinical supervision relevant to training mental health professionals.
Outcomes:
Students will be able to apply theoretical and research knowledge to conceptualize the development of clinicians-in-training and generate interventions to promote their growth

CPSY 536 Supervision Practicum (3 Credit Hours)
This course is an advanced graduate-level course in supervision practicum. You will be asked to apply your knowledge of supervision process, theory, and counselor development to your supervision of entry-level counseling professionals in a practicum setting.
Outcomes:
Students will demonstrate clinical supervisory skills based on appropriate theory and the ability to conceptualize counselor trainee development

CPSY 595 Thesis Supervision (1 Credit Hour)
To be registered for while working on an approved thesis project.

CPSY 600 Dissertation Supervision (1 Credit Hour)
To be registered for while working on an approved dissertation project.

CPSY 605 Master's Study (1 Credit Hour)
To be registered for while preparing a thesis proposal.

CPSY 610 Doctoral Study (1 Credit Hour)
This course can only be taken two times during a doctoral student's career while preparing a dissertation proposal. Restrict enrollment to CPSY PhD students and allow students to complete twice in a career.

CPSY 615 Internship: Counseling Psychology (1 Credit Hour)
Please consult the Counseling Psychology Graduate Program Handbook for the complete description of the internship.

CPSY 620 Dissertation Research (3 Credit Hours)
The purpose of this seminar is to guide students in the conceptualization of a proposal that ultimately will result in dissertation or capstone research project. This is not a research method or research design course, but a course focused on the actual application of research understandings, knowledge, concepts and terminology. Students must have completed the required courses: Qualitative Research (RMTD 420) Quantitative Research (RMTD 421) or RMTD 406, CIEP 448, and RMTD 400 and possibly the third required specific research methodology course. It is assumed that these research courses provided students with considerable research information, foundational knowledge and conceptual understanding of research methods. Students are well positioned to complete culminating project for doctoral candidacy upon completion of this course.

Criminal Justice & Criminology (CJC)

Discover, search, courses (p. 2661)!

CJC 101 Criminal Justice in a Global Context (3 Credit Hours)
This course introduces students to the study of the causes and control of crime from a global perspective. The course considers: the way crime and criminal justice reflects social, political, and cultural forces; the complex intersection between social inequalities and state responses to crime; and the diffusion of criminal justice reforms based on concepts of equality and justice.
Interdisciplinary Option: Forensic Science, Psychology of Crime and Justice
Course equivalencies: ACCRJ 201 / CJC 101
Outcomes:
Students will be able to demonstrate an understanding of the structure and challenges of state responses to crime from global, historical, and interdisciplinary perspectives

CJC 201 Theories of Criminal Behavior (3 Credit Hours)
This course will provide a detailed examination of past and present theories of criminal behavior, placing them in a socio-historical context and exploring their policy and practical implications.
Interdisciplinary Option: Psychology of Crime and Justice
Outcomes:
Students will be able to demonstrate an understanding of how the specific theories of criminal behavior can be compared and evaluated, how the theories evolved over time, and how they can be applied to criminal justice policy and practice

CJC 202 Criminal Courts (3 Credit Hours)
This course provides students with an overview of state and federal criminal courts and case processing, including the study of prosecutors, defense attorneys, judges, jury decision-making, plea bargaining, and sentencing.
Interdisciplinary Option: Psychology of Crime and Justice, Sociolegal Studies
Outcomes:
Students will be able to understand the functions of the state and federal criminal courts, the actors working in those courts and their respective roles, and the procedures for processing of criminal cases

CJC 203 Policing (3 Credit Hours)
This course examines the nature and purpose of policing in American society. Topical areas include the urban police function, contemporary U.S. police systems, principles of police organization and administration, basic operational methodology, and efforts to professionalize police agencies.
Outcomes:
Students will be able to demonstrate an understanding of changing role of police in modern society and articulate the role and challenges faced by police as it relates to the overall operation and goals of the criminal justice system

CJC 204 Corrections (3 Credit Hours)
This course examines the history, functions, and processes of corrections. The primary focus is institutional corrections and its evolution based on philosophies of retribution, deterrence, incapacitation, and rehabilitation. The role and influence of community correctional practices and policy on institutional corrections are also covered.
Interdisciplinary Option: Psychology of Crime and Justice
Course equivalencies: ACCRJ 204 / CJC 204
Outcomes:
Students will be able to identify and describe the role of institutional corrections in society and the criminal justice system and articulate the connection between theories regarding criminality and the purposes of incarceration that have historically guided and continue to guide American correctional practice historically and currently

CJC 205 Research Methods (3 Credit Hours)
An introduction to the logic and basic concepts of social research, with an emphasis on both basic and applied research within criminal justice and criminology. The course provides a basic conceptual framework for designing, conducting, interpreting, and evaluating social research.
Interdisciplinary Option: Human Services, Urban Studies
Outcomes:
Students will be able to demonstrate the capacity to effectively design, review and interpret research to answer questions within the field of criminal justice and other social science disciplines

CJC 206 Statistics (3 Credit Hours)
An introduction to the basic concepts and techniques of statistical analysis, with an emphasis on the study of delinquency, crime, and program evaluation within the criminal justice system.
Knowledge Area: Quantitative Knowledge
Interdisciplinary Option: Human Services
Course equivalencies: X-CRMJ206/SOWK391
Outcomes:
Students will be able to effectively perform and interpret statistical analyses and identify the appropriate use of these statistics in the analysis of crime and criminal justice system performance

CJC 302 Juvenile Justice System (3 Credit Hours)
This course will examine the history, theories, policies, and practices of the juvenile justice system. It will also include a discussion of diversion programs, child maltreatment, and gang behavior.
Interdisciplinary Option: Human Services, Psychology of Crime and Justice
Outcomes:
Students will be able to demonstrate an understanding of the structure and challenges facing the juvenile justice system as it responds to delinquency and abuse/neglect from an historical, interdisciplinary, and inter-agency relationship perspective, and how this differs from the adult (criminal) justice system

CJC 310 Contemporary Police Issues (3 Credit Hours)
This course provides an in-depth examination of specific contemporary issues in policing related to recruitment and training, education and retention, innovations in policing strategies, police policies and practices, professionalism and ethics.
Outcomes:
Students will be able to identify and discuss the impact that current issues in policing have on police operations, effectiveness, and police-community relations

CJC 312 Popular Culture and the Criminal Justice System (3 Credit Hours)
This course will examine the interrelationship among crime, the media, the criminal justice system, and other forms of popular culture. Topics include media representations of crime and criminal justice, social media, and the social construction of myths about crime and the criminal justice system.
Outcomes:
Students will be able to (1) know the meaning of the social construction of deviance; (2) know and be critical of the manner in which crime and criminal justice are portrayed in the media, and their effect on public opinions and images of the latter; and (3) analyze and evaluate the effects of popular culture

CJC 322 Criminal Law (3 Credit Hours)
This course is an introduction to the principles underlying the definition, constitutionality, and application of criminal laws. It includes the analysis of court decisions regarding various state and federal crimes, and the rules of individual responsibility and accountability for those crimes.
Interdisciplinary Option: Psychology of Crime and Justice, Sociolegal Studies
Outcomes:
Students will be able to demonstrate an understanding of the constitutional limitations on the construction of statutory crimes, the elements of different crimes, and the principles governing individual responsibility and accountability for those crimes

CJC 323 Criminal Procedure (3 Credit Hours)
This course provides an in-depth, sophisticated coverage of criminal procedures surrounding investigations, stops, searches and seizure, arrests, interrogations, and procedural remedies.
Interdisciplinary Option: Sociolegal Studies
Outcomes:
Students will be able to identify and articulate the origin, interpretation and application of legal procedures as they relate to matters involving the police, and how these relate to the overall operation and effectiveness of the criminal justice system

CJC 336 Political Violence and Crime (3 Credit Hours)
This course offers a thematic approach to the study of different forms of political violence and crime, their causes and consequences, how different types of violence and crime manifest in the present day, and how violence is represented in popular culture.
Interdisciplinary Option: Global Studies, Peace, Justice, and Conflict Studies
Outcomes:
Students will learn to evaluate the ways in which violence and crime are used for political ends and assess the countermeasures taken by various international and government agencies to combat political violence

CJC 337 Terrorism (3 Credit Hours)
An analysis of different types of terrorist organizations across the globe and of the efforts by governments to combat terrorism.
Interdisciplinary Option: Global Studies, Peace, Justice, and Conflict Studies
Course equivalencies: X-PLSC337/INTS337/CJC337
Outcomes:
Students will be able to explain what motivates the turn to terror as a method of struggle and to assess the morality and effectiveness of the counterterrorism tactics adopted by various governments

CJC 338 Community-Based Corrections (3 Credit Hours)
This course examines the history, purpose, and functioning of probation and parole as well as other aspects of community-based supervision, including: pre-trial supervision, electronic monitoring, house arrest/home detention, day reporting centers, and other programs that provide both supervision and treatment of offenders in the community.
Outcomes:
Students will be able to articulate the organizational structure of community corrections programs, the roles community corrections play in the criminal justice system, and the effectiveness and challenges facing community corrections agencies

CJC 345 Social Justice and Crime (3 Credit Hours)
Pre-requisites: ANTH 100, PLSC 102, SOCL 101, WSGS 101, or equivalent; please check requirements for declared majors/minors for exceptions
This course examines the social injustices in the criminal justice system's naming and sanctioning of harmful behaviors as crimes. Discussions will unpack the values, ethics, and ideologies underlying the current retributive system of sanctioning compared to social justice responses to crime.
Knowledge Area: Tier 2 Societal Knowledge
Interdisciplinary Option: Peace, Justice, and Conflict Studies, Psychology of Crime and Justice, Race and Ethnicity, Sociolegal Studies
Outcomes:
Articulate the meaning of social justice; Discuss restorative and retributive justice

CJC 346 Mental Illness and Crime (3 Credit Hours)
This course explores the relationship of mental illness to crime and violence. Topics include the nature, prevalence, and consequences of mental disorder, substance use, and violence among criminal offenders, violence risk assessment, and the institutional and other treatments for the mentally ill offender.
Interdisciplinary Option: Psychology of Crime and Justice
Outcomes:
Students will know (1) the history and development of research on mental illness and crime, (2) the various mental disorders endemic in the criminal justice system and their relationship to crime and violence, (3) assessment measures of the risk for violence, and (4) management and treatment of mentally ill offender

CJC 351 Organized Crime (3 Credit Hours)
This course offers an introduction to the study of organized crime in U.S. society. Emphasis is given to the history and development of traditional organized crime in Chicago. Emerging organized crime groups are also studied. In addition, this course offers an introduction to the concept of transnational organized crime.
Interdisciplinary Option: Italian American Studies, Italian Studies
Outcomes:
Students will articulate the extent and nature of organized crime, how it relates to other forms of criminal behavior, and the effectiveness of the justice system's response to it

CJC 352 Gangs (3 Credit Hours)
This course examines the historical development of urban street gangs with a view toward understanding their structure, characteristics, purposes, and activities. Particular emphasis is given to the history and development of street gangs in Chicago.
Interdisciplinary Option: Urban Studies
Course equivalencies: CRMJ352/URB352
Outcomes:
Students will demonstrate an understanding of the causes and history of street gangs, the methods used to control them, and their impact on society and the criminal justice system

CJC 353 White Collar Crime (3 Credit Hours)
This is a study of non-traditional crime engaged in by governmental and corporate entities, and persons in the "white collar" professions. It includes state political crimes, corporate violence and abuse of power, as well as occupational, financial, and environmental crimes, and enforcement of laws against such crimes.
Outcomes:
Students will be able to describe the nature and extent of white collar crime, how it differs from traditional crime, and the manner in which laws against such crimes are enforced

CJC 354 Cybercrime (3 Credit Hours)
This course examines the theory, practice, and prevention of cybercrime. It considers how advances in technology have led to the creation of cybercrime and new avenues for deviance. The course centers on various forms of cybercrimes and how theories of crime can be applied to explain and prevent cybercrime.
Outcomes:
Define the nature and scope of cybercrime, Analyze national and global digital law enforcement efforts, Critically consider laws and policies governing cybercrime detection and prosecution

CJC 360 Substance Use and Crime (3 Credit Hours)
This course will explore whether substance use is related to crime, the effect of drug trafficking on communities, the policies aimed at controlling drug use and their effectiveness, as well as the implications of current drug policies and practices on communities and on the criminal justice system itself.
Interdisciplinary Option: Psychology of Crime and Justice
Outcomes:
Students will describe the relationship between substance use and crime, the effects of substance use and abuse on communities, and the implications of currents drug policies and practices

CJC 365 Firearm Violence (3 Credit Hours)
This course provides a comprehensive overview of the extent and nature of firearm violence, existing laws related to the acquisition, ownership and use of firearms, patterns and reasons for firearm ownership, public health and criminal justice approaches to reduce firearm violence, and the effectiveness of such efforts.
Outcomes:
Students will be able to apply critical thought, scientific research, and a full understanding of the nature of firearm violence to objectively assess the effectiveness of policies that seek to reduce firearm violence

CJC 366 Crime Prevention (3 Credit Hours)
This course examines the theory and practice of crime prevention. The course will review theories of crime and justice with specific implications for crime prevention efforts. Students will trace the evolution of crime prevention efforts. Most importantly, the course will review crime prevention strategies, ranging from those designed to protect the individual to those designed to protect society at large.
Outcomes:
Define and explain crime prevention, as an idea and as a practice; Define and explain the three broad categories of crime prevention; Know and explain how theories of crime and justice provide the foundation for particular methods of crime prevention; Describe and understand the importance of evaluation in judging the effectiveness of crime prevention techniques; Differentiate between crime prevention techniques pitched at different levels (individual, household, business, neighborhood)

CJC 370 Women in The Criminal Justice System (3 Credit Hours)
Pre-requisites: ANTH 100, PLSC 102, SOCL 101, WSGS 101, or equivalent; please check requirements for declared majors/minors for exceptions
This course examines four areas relative to women in the criminal justice system: the historical view of female criminality; women as defendants in criminal cases and women in prison; women as victims of domestic violence and sexual assault; and women as professionals in the criminal justice system.
Knowledge Area: Tier 2 Societal Knowledge
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-CRMJ370/WOST395/WSGS395
Outcomes:
Students will be able to describe the extent, nature and theories of female criminality and victimization and how this is consistent with and different from male criminality and victimization

CJC 371 Victimology (3 Credit Hours)
This course examines the scientific study of victimization, the relationships between victims and offenders, the interactions between victims and the criminal justice system, and the connections between victims and other social groups and institutions.
Interdisciplinary Option: Peace, Justice, and Conflict Studies, Psychology of Crime and Justice
Course equivalencies: X-CRMJ371/PAX 369
Outcomes:
Students will be able to describe the legal, social and psychological issues related to crime victimization, and current knowledge about the victim-offender and victim- criminal justice system relationships

CJC 372 Race, Ethnicity, and Criminal Justice (3 Credit Hours)
Pre-requisites: ANTH 100, PLSC 102, SOCL 101, WSGS 101, or equivalent; please check requirements for declared majors/minors for exceptions
This course examines current research and theoretical perspectives related to race and ethnicity in crime and in criminal justice processing. It will cover such issues as racial profiling, the effects of drug laws on people of color, minority disenfranchisement from the criminal justice system, and crime and immigration.
Knowledge Area: Tier 2 Societal Knowledge
Interdisciplinary Option: African Studies and the African Diaspora, Human Services, Peace, Justice, and Conflict Studies, Psychology of Crime and Justice, Race and Ethnicity, Sociolegal Studies, Urban Studies
Course equivalencies: X-CJC/BWS/AFR/PLSC372/PAX373
Outcomes:
Students will demonstrate an understanding of contemporary issues relating to - and current research and theory about - race and ethnicity and their relationship to crime and criminal case processing

CJC 373 Intimate Partner Violence (3 Credit Hours)
This course will address the nature and scope of intimate partner violence, the factors that contribute to it as well as the theories that have been developed to explain it. Attention will be paid to society's responses to intimate partner violence.
Interdisciplinary Option: Human Services, Peace, Justice, and Conflict Studies, Psychology of Crime and Justice, Women & Gender Studies
Course equivalencies: CJC373/PAX374/WSGS392
Outcomes:
Students will be able to describe the theory, extent, nature, and impact of intimate partner violence, and how the community and criminal justice system respond to this problem

CJC 374 Miscarriages of Justice (3 Credit Hours)
This course takes an interdisciplinary approach to the study of criminal justice system error, drawing from criminology, psychology, and law, to examine wrongful conviction and acquittal, official misconduct, and discrimination. The course examines the rate of error, institutional responses to error, and how policies exacerbate, or minimize, miscarriage of justice.
Interdisciplinary Option: Psychology of Crime and Justice
Outcomes:
Critically evaluate criminal justice practices for their ability to administer justice; identify hallmarks of miscarriages of justice; analyze policy for its potential to prevent, or contribute to, miscarriages of justice

CJC 375 Punishment and Society (3 Credit Hours)
This course explores the dominant sociological approaches to understanding punishment in modern society. The course also focuses on punishment as practiced in the United States in light of these theoretical approaches, examining the collateral consequences of punishment and the importance of racial, gender, and sexual identities in relation to punishment.
Interdisciplinary Option: Race and Ethnicity
Outcomes:
Understand the philosophical justifications for punishment; understand social theories of punishment; critically assess the role punishment plays in modern society; understand the consequences of punishment for individuals, communities, and society

CJC 376 Childhood Exposure to Violence (3 Credit Hours)
This course examines the definitions, scope, and impact of violence and abuse in childhood. In particular, this course introduces students to the theoretical and empirical literatures relating to family violence, including child physical abuse, child sexual abuse, and child neglect, as well as child victimization in neighborhoods and schools.
Interdisciplinary Option: Human Services, Psychology of Crime and Justice
Outcomes:
To understand, critically analyze, and apply a variety of theories, conceptual frameworks, and empirical research to explain child victimization and the impact of exposure to violence on children

CJC 377 Psychology and Law (3 Credit Hours)
Pre-requisites: PSYC 101
Introduction to the areas of overlap between psychology and the law. Topics include roles of psychologists in legal settings, accuracy of eyewitness testimony, jury processes, accuracy of polygraph examinations, and issues surrounding the insanity defense.
Interdisciplinary Option: Peace, Justice, and Conflict Studies, Sociolegal Studies
Course equivalencies: X- CJC 377 / PSYC 372
Outcomes:
Students will learn to analyze biases in the US jury system, elucidate the weaknesses of eyewitness testimony, outline the issues in the insanity defense, understand the issues in Rape Trauma Syndrome and Battered Spouse Syndrome, understand the methods and effects of scientific jury selection, understand the complex issues surrounding confessions, and view the US justice system in a social justice context

CJC 378 International Criminal Justice (3 Credit Hours)
This course is an introduction to the nature and scope of international and transnational crime, and the emerging legal framework for its prevention and control. It includes the history of the internationalization of crime control and measurement, and international trends in law enforcement, victim assistance, courts, sentencing, and corrections.
Interdisciplinary Option: Global Studies
Outcomes:
Students will examine globalization of crime; learn about international crime statistics; understand the prevalence of common crimes internationally; identify emerging crime threats; and understand international trends in criminal justice

CJC 379 Leaving Crime Behind (3 Credit Hours)
Pre-requisites: CJC 201
This course provides students with an examination of desistance from crime and the potential for rehabilitation in the criminal justice system. The course discusses theories of desistance, empirical research on desistance, and the extent to which the criminal justice system contributes to individuals' ability to desist from crime.
Outcomes:
Students will be able to: 1) analyze desistance theories; 2) describe crime patterns across the life course; 3) identify individual and community-level factors associated with desistance; and 4) critique rehabilitation approaches grounded in desistance theories

CJC 380 Introduction to Forensic Science (3 Credit Hours)
This course provides an overview of the basic principles and uses of forensic science within the field of criminal justice. The course is designed for criminal justice majors emphasizing the application of the forensic sciences in the criminal justice system.
Outcomes:
Students will be able to identify the uses and limitations of the existing forensic science techniques used within the field of criminal justice

CJC 390 Capstone Experience Internship (1-6 Credit Hours)
Pre-requisites: CRMJ Majors and Minors, Psychology of Crime and Justice Minors, Forensic Science Majors
The purpose of this course is to enhance the student's development and learning through observational and participatory experience in criminal justice agencies.
Interdisciplinary Option: Human Services
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to contribute in a meaningful way to the operation of a specific criminal justice agency and be able to identify and describe the link between their field experience and prior courses

CJC 391 Capstone Experience Research (3 Credit Hours)
Pre-requisites: Instructor approval required; major in criminal justice; junior or senior standing; Students must complete CJC 205: Research Methods (or equivalent) and four additional CJC courses
The course will allow students to be actively engaged in a faculty member's research project, providing the student with an opportunity to apply the research skills that they already have and to acquire additional skills and knowledge about research design, statistical analysis, and writing research presentations, briefs, or papers.
This course satisfies the Engaged Learning requirement.
Outcomes:
increasing knowledge about the research process from design, analysis, presentation, writing and policy implications

CJC 395 Special Topics (3 Credit Hours)
Special topics courses provide students with an opportunity to examine various criminal justice topics not normally offered as part of the Department's regular curriculum.
Outcomes:
Students will be able to gain an understanding of new issues confronting the criminal justice system, or an advanced understanding of traditional subjects covered in basic courses

CJC 396 Independent Study (1-6 Credit Hours)
This course provides students with the opportunity to examine a specific topic in the field of criminal justice that is currently not offered or available.
Outcomes:
Students will gain an in-depth understanding of a specific criminal justice topic through directed readings and independent study

CJC 399 Senior Capstone (3 Credit Hours)
Pre-requisites: 6 courses in Criminal Justice and Criminology and senior-standing only
This course is for CJC majors slated to graduate within two semesters. This course is a culmination of the student's study of crime and criminal justice issues. It consists of projects aimed at integrating theory, knowledge, and research in the context of a variety of contemporary criminal justice problems, issues, and policies.
Outcomes:
Students will apply all that they have learned throughout their criminal justice courses and apply this knowledge to demonstrate a sophisticated understanding of criminal justice professions, practices, and policy

CJC 401 Politics and Policies in the Criminal Justice System (3 Credit Hours)
This course examines the interactional processes within and among the criminal justice system's components and their relationships to other public and private institutions. The role of politics in policy formulation, the policy making process, and the consequences of current policies on the operation of the criminal justice system are discussed.
Outcomes:
Students will understand the CJ policy-making process, including which factors facilitate/inhibit effective policy development and implementation, and how CJ research is used to formulate, implement, and evaluate CJ policies

CJC 402 Theories of Criminal Behavior (3 Credit Hours)
This is a comparative review of dominant contemporary theories and research on the causes of crime and delinquency. Competing theories on the causes of crime are analyzed, and their empirical support and implications for prevention programs and interventions are discussed.
Outcomes:
To analyze and discuss contemporary theories of criminal behavior

CJC 403 Research Methods and Program Evaluation (3 Credit Hours)
This course provides students with the substantive knowledge to be critical consumers of research studies and program evaluations. Students learn how to critique the internal, construct, and external validity of program evaluations and data collection efforts that seek to understand criminal behavior or the operation of the criminal justice system.
Outcomes:
To analyze and critique program evaluations and research designs

CJC 404 Applied Data Analysis and Interpretation (4 Credit Hours)
Students learn the skills and knowledge necessary to be critical consumers of statistical information often present in everyday criminal justice practice. Students learn which statistical tools are appropriate for specific measures and research questions, as well as how to generate and interpret statistical output using a statistical software package.
Outcomes:
Students will be able to select the correct statistical tools to use for conducting statistical analyses, use a statistical software package to analyze data, and interpret statistical output

CJC 408 Applied Research in Criminal Justice & Criminology (2 Credit Hours)
Pre-requisites: CJC 401, CJC 402, CJC 403, and CJC 404
In their final semester of the CJC graduate program, students complete a semester-long research project. This culminating experience is student-initiated and supervised by a member of the graduate faculty. This project encourages advanced students to approach the multifaceted problem of research as a set of interrelated issues ranging from tasks of concept formation and theory construction through research design and data collection to the assessment and analysis of the generated data.
Outcomes:
Students should be able to synthesize criminological theory, criminal justice policy, research methods, and data analysis into a final applied research project

CJC 410 Advanced Topics in Criminology (3 Credit Hours)
Pre-requisites: Graduate students only
Variable topics on theories or contemporary issues concerning criminal and victim behavior. Examples of topics include: Drugs and Violence; Gender and Crime; Intimate Partner Violence; Sexual Violence; Human Trafficking; Environmental Crime; Victimology; International Criminology; Advanced Criminology; Race, Ethnicity, and Crime.
Outcomes:
Students will understand a contemporary issue in criminology with a special emphasis on research and theory developments

CJC 411 Advanced Topics in Policing (3 Credit Hours)
Pre-requisites: Graduate students only
An advanced topics umbrella course for special and contemporary topics in the field of policing, including community- and problem-oriented policing, situational crime prevention, crime analysis, and Comp-Stat approaches to policing practice and management.
Outcomes:
Students will understand a contemporary issue in policing with a special emphasis on research and theory developments

CJC 412 Advanced Topics in Courts (3-6 Credit Hours)
Pre-requisites: Graduate students only
Variable topics on contemporary issues in courts. Examples of topics include: International Criminal Law and Anti-Terrorism Enforcement, The American Jury; Death Penalty; International Criminal Law; Public Views of Justice; Media, Culture, and Criminal Law; Legal Rights of Children.
Outcomes:
Students will understand a contemporary issue in the court system with a special emphasis on research and theory developments

CJC 413 Advanced Topics in Corrections (3-6 Credit Hours)
Pre-requisites: Graduate students only
An advanced topics umbrella course for special and contemporary topics in the field of corrections. Examples of graduate courses that will be offered as special topics courses under CJC 413 include: Principles of Punishment, Sentencing Policy, Restorative Justice, Risk Assessment, Re-Entry, What Works in Corrections, Mass Incarceration, and Juvenile Corrections.
Outcomes:
Students will understand a contemporary issue in corrections with a special emphasis on research and theory developments

CJC 414 General Special Topics (3 Credit Hours)
Special topic course titles will vary, and will cover issues that do not fit within the four advanced topics areas of criminology, policing, courts, and corrections. Topics may include: Crime Mapping; Social Psychology and the Criminal Justice System; Prejudice, Hate, and the Justice System.
Outcomes:
To analyze and discuss topics in criminal justice

CJC 415 Mental Illness and Crime (3 Credit Hours)
Pre-requisites: Graduate students only
This course explores the relationship of mental illness to crime and violence, the policies and programs concerning the treatment of individuals with mental illness in the criminal justice system, including the nature, prevalence and consequences of mental disorder among criminal offenders.
Outcomes:
Students will understand the history and development of research on mental illness and crime, assessments of risk for violence, as well as legal issues surrounding mentally disordered victims and offenders

CJC 416 International Criminal Justice (3 Credit Hours)
This course is an introduction to the nature and scope of international and transnational crime, to the emerging legal framework for its prevention and control, and to its impact on the U.S. criminal justice system. Emphasis will be placed on international aspects of the work of different criminal justice agencies, such as formal and informal police cooperation and the use of mutual assistance and extradition agreements, and on the bilateral, regional, and international structures created for crime prevention, punishment, and control.
Outcomes:
Students will understand how international legal and criminal justice systems interact to investigate, measure, and prosecute transnational crimes including trafficking, human rights violations, and war crimes

CJC 431 Criminal Victimization (3 Credit Hours)
Pre-requisites: Restricted to Graduate School students
This course critically explores the physical, emotional, and financial harm people suffer because of illegal criminal activities. The focus of the course is on the nature and extent of victimization, the estimation of risk, theories about the causes of victimization, and the consequences of victimization experiences. In addition, students will also study the emergence of special victims' groups, the implications of a victim-orientated perspective for the administration of justice, and system alternatives such as restitution and restorative justice.
Outcomes:
Articulate the history, nature, and magnitude of criminal victimization in the United States; Describe the theoretical underpinnings of victimization and current research on the risk and protective factors of criminal victimization; Differentiate the legal and social responses to criminal victimization; Describe the primary and secondary impact of criminal victimization on victims, their families, friends, and communities; Analyze data to examine trends and patterns of criminal victimization; Analyze data to examine the causes and correlates of criminal victimization; Identify which interventions and strategies offer the most promise for effective implementation and impact on preventing criminal victimization

CJC 432 Firearm Violence (3 Credit Hours)
Pre-requisites: Restricted to Graduate School students
This course will provide a comprehensive overview of the extent and nature of firearm violence, existing laws related to the acquisition, ownership and use of firearms, patterns and reasons for firearm ownership and acquisition, the various attempts to control access to firearms, and the effectiveness of such efforts. This course will explore both the criminal justice and public health perspectives and approaches to reducing firearm violence. Each discipline's framework, strategies, and challenges will be examined, with a focus on the opportunities and challenges of implementing interdisciplinary approaches in a "real world" setting. The class will emphasize the application of objective and rigorous scientific methods and research to understanding the extent and nature of firearm violence and evaluating interventions within the context of what is oftentimes a politically and emotionally charged debate.
Outcomes:
Articulate the extent and nature of firearm violence in the United States in a sophisticated way that illustrates an understanding of existing measures of firearm violence; Describe the strengths and limitations of existing data to measure the extent and nature of firearm violence, patterns and levels of firearm ownership, and firearm markets; Differentiate between the criminal justice and public health frameworks, and how each approaches firearm violence; Describe the importance and challenges of responding to complex issues like firearm violence from a multidisciplinary/intersectional/collaborative approach; Analyze data to examine trends and patterns of firearm violence; Analyze data to examine the correlates and causes of firearm violence; Describe evidence-based interventions and strategies to reduce firearm violence; Identify which interventions and strategies offer the most promise for effective implementation and impact on firearm violence

CJC 433 Wrongful Convictions and the Law (3 Credit Hours)
Pre-requisites: Restricted to Graduate School students
Wrongful convictions often include two types of errors, an innocent person is punished, and a guilty person escapes justice. In this class, we will explore how such errors occur by focusing on both investigation and adjudication practices. We will then apply what we have learned about criminal procedure to analyze individual wrongful conviction cases. This is an interactive course. Students will review case intake documents from a cooperating legal organization and help inform their case decisions. We will also work with the National Registry of Exonerations to draft case profiles for people who have already been exonerated. Ultimately, we will weigh the challenges of upholding defendants' rights without compromising public safety or producing additional errors.
Outcomes:
Evaluate criminal cases for potential errors, both episodic and systemic; Describe defendants' due process rights particularly under the 5th and 6th amendments and how these rights relate to criminal procedure in practice; Explain judicial opinions and their ability to remedy wrongful convictions; Identify the limitations of the appellate process and post-conviction review; Produce written content of publishable quality, with a special focus on accuracy and fact checking

CJC 499 Independent Study (1-6 Credit Hours)
Working with a member of the graduate faculty, this course provides students with the opportunity to examine a specific topic in the field of criminal justice through directed readings, interviews, and the completion of a major research paper related to the topic. Students will gain an in-depth understanding of a specific criminal justice topic through directed readings and independent study.

CJC 501 Thesis Research (2 Credit Hours)
Pre-requisites: Approval of Graduate Program Director and Grade of A- or better in CJC 403 and CJC 404
Supervision and guidance are given as students conduct their independent Masters' thesis research.
Outcomes:
Master's Thesis

CJC 502 Practicum in Criminal Justice (3-6 Credit Hours)
Pre-requisites: CJC 401, CJC 402, CJC 403, and CJC 404 Outcomes: Students will be able to contribute in a meaningful way to the operation of a specific criminal justice agency, and identify/describe the link between their field experience and prior courses through a research paper
This course enables the student to apply their knowledge (conceptual, theoretical, and methodological) in a practical agency setting.

CJC 595 Thesis Supervision (1 Credit Hour)
This is a non-credit course. Students who are working on approved master's thesis research and are not registered for any course are required to register for thesis supervision.

CJC 605 Master's Study (1 Credit Hour)
Pre-requisites: Completion of the graduate core courses; This course is a non-credit means of permitting students to be formally enrolled at Loyola while completing their culminating experience (i.e
, 408 project or thesis).

Curriculum, Instruction & Educational Psychology (CIEP)

Discover, search, courses (p. 2661)!

CIEP LM62 Secondary Methods: Mathematics Lab (1 Credit Hour)
No course description is available

CIEP M16 K-2 Literacy Methods for EC (2 Credit Hours)
This course is to introduce the preservice teacher candidate to the teaching and learning processes associated with research based comprehensive literacy instruction in K-2 elementary classrooms and will emphasize the scientific foundations of reading instruction: phonics, vocabulary, text comprehension and fluency.
Outcomes:
A student enrolled in CIEP M16 will demonstrate beginning competence in the knowledge base, skills, and strategies stated in the Illinois Professional Teaching Standards and ECE standards

CIEP M17 Early Childhood Math Methods (2 Credit Hours)
Two credit hour math methods course specifically for early childhood special education majors. this course is designed to reflect current ISBE standards, and best practices in early math. It addresses mathematical thinking, concepts, and skills across the birth to grade 2 continuum.
Outcomes:
It addresses mathematical thinking, concepts, and skills across the birth to grade 2 continuum

CIEP M30 Academic Assessments and Interventions (3 Credit Hours)
In this course, students will learn about psychological and educational assessment with a special focus on issues related to non-biased assessment and the link between assessment and intervention in the instructional consultative process.
Outcomes:
Students will develop and administer appropriate intervention plans related to the instructional needs of students with disabilities

CIEP M31 Behavior Interventions: Assessments and Supports (3 Credit Hours)
The purpose of this course is to develop the students ability to provide positive support to learners whose behavior(s) impedes their learning or the learning of others.
Outcomes:
The student will be able to plan and develop school wide group and individual supports, make adjustments as needed to IEPS, and assess the on-going progress being made by students for whom behavioral interventions have been planned

CIEP M32 Exceptional Learner II (3 Credit Hours)
This course provides in depth understanding of the ethical and professional issues related to collaborative service provision for children with disabilities.
Outcomes:
By viewing ability within the broader context of human diversity, students will learn instructional strategies that foster a student's meaningful participation in heterogeneous classrooms as well as the larger communities in which they live

CIEP M33 Accessing and Adapting the General Education Curriculum (3 Credit Hours)
Within this course, candidates explore methods to adapt the general education curriculum in order to meet the individual needs of students with disabilities. Issues of differentiating student needs, long and short-term planning, technology-assisted learning, and vocational and social skills curricula will be addressed along with behaviors and modification related to low incidence exceptionalities.
Outcomes:
Candidates will demonstrate an understanding of adapting the general education curriculum for students with special needs through the design of a universalized lesson plan, a synthesis of relevant literature, and researching assistive technology

CIEP M34 Family, Community and School-Based Consultation (3 Credit Hours)
Within this course, candidates explore how members of families affected by disability and school/community professionals can enter into productive partnerships and create positive outcomes for students in elementary and secondary schools. Different approaches to work on school or community based teams, the different aspects of planning and implementing team process, and the challenges and threats to that process, are examined.
Outcomes:
Candidates will demonstrate an understanding of collaborative relationships, and design and evaluate a wraparound plan for a student with a disability based on case study information and research

CIEP M42 K-2 Special Education Methods for ECSE (2 Credit Hours)
In this context, methods to adapt the curriculum to individualize instruction to meet the needs of students with special needs will be discussed. Issues of differentiating student needs, long and short-term planning, technology-assisted learning, and social skills curriculum will be addressed. Students will also learn how to actively create learning environments which promote positive learning results in general and special curricula by modifying the learning environment, using direct motivational and instructional interventions.
Outcomes:
Demonstrates current knowledge of integrated learning experiences for children from birth through grade three and understands the central concepts and tools of inquiry in each of the following content area: language and literacy (English language arts); mathematics; science; health, safety, nutrition, and movement (physical development and health); art, music, and drama (fine arts); and social science; understands how to plan developmentally and culturally appropriate curriculum; understands how to use and integrate appropriate technological resources into classroom instruction

CIEP M43 Special Education Methods: Infants, Toddlers and Preschoolers (3 Credit Hours)
This course provides an overview in curricular adaptations and instructional strategies that address the needs of young children.
Outcomes:
Candidates will gain experience in developing strategies for meeting the educational and developmental needs of infants and young children with disabilities, as well as those who experience circumstances and conditions that potentially interfere with optimal growth and development

CIEP 104 Mathematics for Teachers I (3 Credit Hours)
This course provides the foundation for teaching standards based mathematics in the elementary school classroom. In this first course, students study geometry, measurement, data analysis and probability and fulfill the civic engagement value of core by tutoring in the Chicago Public Schools.
This course satisfies the Engaged Learning requirement.
Course equivalencies: X-CIEP104/MATH147
Outcomes:
Students will broaden their understanding of elementary school mathematics instruction and tutor elementary-aged students

CIEP 105 Mathematics for Teachers II (3 Credit Hours)
This course provides the foundation for teaching standards based mathematics in the elementary school classroom. In this second course, students study algebra and numbers and operations.
Course equivalencies: X-CIEP105/MATH148
Outcomes:
Students will broaden their understanding of elementary school mathematics instruction and teach math lessons in middle school classrooms

CIEP 206 Children's Literature (3 Credit Hours)
This course is designed to explore the genres of children's literature. Coursework involves reading and responding to various genre and engaging in professional book discussions to learn key strategies for teaching.
IAI code: H3918
Course equivalencies: X-CIEP206/ENGL206
Outcomes:
Students will read and respond to multiple texts written for the adolescent reader, design instructional strategies to encourage reader response in classroom settings, and create a thematic literature-based teaching unit

CIEP 229 Introductions of Educational Psychology (3 Credit Hours)
Students will learn basic to apply psychological principles in varied instructional settings, including theories of learning and development.
Outcomes:
Students will demonstrate an understanding of basic educational psychological principles and their application to learning and instruction in the classroom

CIEP 260 Interdisciplinary Wrkshp: Sqnc Two-Intro Responsive & Inclusive Classrooms (1-4 Credit Hours)
The modules in Sequence Two explore how the school is itself a community and how the organization and environment of a school influence student learning. exploration of the local communities that schools are situated in. This course builds on candidates' initial explorations of diverse learning environments and continues to develop candidates' understanding of the School of Education's mission of professionalism in service of social justice and the core tenets of culturally responsive pedagogy; deepens teacher candidates' introduction to learning and development through consideration of the importance of healthy learning environments; builds on candidates' initial explorations of learning and the core tenets of culturally responsive pedagogy as candidates are introduced to backward design and Universal Design for Learning, The sequence addresses TLLSC Enduring Understandings 1, 3, 7, and 9.
Outcomes:
TLSC 140: Teaching, Learning and Leading for Social Justice: This module builds on candidates' initial explorations of diverse learning environments and continues to develop candidates' understanding of the School of Education's mission of professionalism in service of social justice and the core tenets of culturally responsive pedagogy; TLSC 150: Constructive Learning Environments for Diverse Students: This module deepens teacher candidates' introduction to learning and development through consideration of the importance of healthy learning environments; TLSC 160: Analyzing Culturally Responsive Classroom Instruction: This module builds on candidates' initial explorations of learning and the core tenets of culturally responsive pedagogy as candidates are introduced to backward design and Universal Design for Learning

CIEP 290 Debunking Classroom Myths: Investigating Common Beliefs Around Learning (3 Credit Hours)
The course investigates misconceptions about science, math, humanities, and social sciences through the lens of learners' varied social identities, prior knowledge and lived experiences, and research about how people learn. Students will identify misconceptions commonly learned in K-12 classes, reflect on how those misconceptions may shape ones' current understandings, and explore approaches for uncovering and confronting misconceptions and false beliefs in productive ways. This course satisfies the Engaged Learning requirement.
Outcomes:
Students who take this course will understand that 1) Misconceptions are derived from a variety of sources including information environments, prior experiences, peers, culture, language, teachers' explanations, and instructional materials and are often resistant to change; 2) Effective instruction is guided by research-based principles of how people learn; 3) Student learning is facilitated through effective instruction and assessment; 4) Instruction that promotes intellectual virtues, including open-mindedness and intellectual humility, courage, and diligence, can help prepare students to better resist misinformation and also promote empathy, caring, and responsibility

CIEP 305 Reading Teacher Practicum (3 Credit Hours)
This course is the culminating experience in the reading teacher endorsement minor.

CIEP 315 Language Development and Literacy (3 Credit Hours)
This course develops candidates' understanding of typical and atypical language development and principles that govern the process.
Outcomes:
Candidates learn how quality children's literature in early childhood programs can be used to maximize language and literacy development through authentic group experiences and activities

CIEP 327 Teaching English Language Arts in the Middle Grades (3 Credit Hours)
This course is based on the fundamental beliefs that people learn to write by writing; writing is a process; writing is a tool for thinking, and that writing is a social process. Candidates will be introduced to research based strategies, design effective writing lessons, develop a philosophy of teaching writing based on best practices, and recognize elements of valid writing assessment.
Outcomes:
Teacher candidates will recognize the significance of their role as writing models and will recognize and create connections to literacy instruction across the curriculum; Teacher candidates will become familiar with developmental issues related to learning to write across grades K -12, and issues related to struggling writers and students with culturally and linguistically diverse backgrounds

CIEP 328 Assessment and Diagnosis of Reading Problems (3 Credit Hours)
This assessment and diagnosis course provides the foundation knowledge and experiences in reading assessment and diagnosis that would be necessary for elementary or secondary classroom reading teachers.
Outcomes:
Reading teachers will recognize that reading is an active and complex process that involves skills, strategies, prior knowledge and purposes for reading within a goal-oriented process

CIEP 329 Materials, Resources, & Strategies for Reading Teacher (3 Credit Hours)
The purpose of this course is to provide teacher candidates in the reading teacher endorsement minor with an in depth knowledge and understanding of materials, resources, and strategies available to teachers whose primary teaching responsibility is the teaching of literacy.

CIEP 330 Typical and Atypical Development (3 Credit Hours)
The purpose of this course is to study the stages of psychological and cognitive development in children and adolescents with special attention to the similarities and differences among individuals with and without disabilities.
Outcomes:
Students will use their knowledge of typical/atypical development to design lessons, arrange learning environments, and select instructional strategies to promote their students' learning and social/emotional development

CIEP 332 School Wide Applications (3 Credit Hours)
This course focuses on the needs of a school as it develops and implements a LRE plan. It examines the planning involved in the development of comprehensive, school wide positive behavior support programs, the application of universal design to curriculum development, and the on-going evaluation of progress made by students for whom intervention is needed Outcome: Students will develop and school-wide behavior support plan.
Course equivalencies: CIEP 341 / CIEP 331 / CIEP 332

CIEP 336 Child Development and Implications for Education (3 Credit Hours)
Survey of theory and research relevant to the cognitive, emotional and social development of children.

CIEP 339 The Exceptional Child (3 Credit Hours)
This course is an introduction to the concept of exceptionality dealing with the educational implications of atypical child growth and development. Focus is given to the psychology and teaching of culturally diverse and atypical children including those with learning disorders.
Outcomes:
Students will have an increased understanding and demonstrate skills in: the connection between civil-rights issues and people with exceptionalities, and where the field of education has been, is now, and is going with regard to providing supports for people with special needs, their teachers, and family members

CIEP 340 Professional Applications in Special Education (3 Credit Hours)
This course will introduce candidates to research-based, hands-on teaching and learning tools to be implemented in the classroom. Designed to be taken during the special education student teaching experience, candidates will create appropriate learning tools to meet students' abilities and needs. Course
Outcomes:
Candidates will 1) develop competencies in the collaborative and consultative roles of special educators in the integration of individuals with disabilities into the general curriculum as well as educational and alternative settings; 2) reflect on their own practice to improve instruction and guide professional growth

CIEP 342 Transition Planning (3 Credit Hours)
The purpose of this course is to provide a background for transition education services-from childhood to adulthood- for individuals with disabilities. Students will look at legal mandates for transition planning and service provision, as well as how the People First movement has led to changes in our thinking and talking about people with disabilities and the specific challenges faced by adolescents with disabilities as they transition to adulthood. Students will examine instructional strategies for teaching functional, occupational, and career identification skills in The purpose of this course is to provide a background for transition education services-from childhood to adulthood- for individuals with disabilities. Students will look at legal mandates for transition planning and service provision, as well as how the People First movement has led to changes in our thinking and talking about people with disabilities and the specific challenges faced by adolescents with disabilities as they transition to adulthood. Students will examine instructional strategies for teaching functional, occupational, and career identification skills in secondary school and community settings. Current perspectives on self-determination and quality of life issues as they relate to individuals transitioning to adulthood will be introduced.

CIEP 343 Adaptive and Assistive Technology (3 Credit Hours)
In this course, students will learn how to make all physical and virtual aspects of school fully accessible for their students, other faculty, and family members. They will have hands-on experience with a wide range of assistive and adaptive technologies (low, medium, and high tech) and become familiar with the A/A terminology and the most recent legislation related to AAT.
Outcomes:
Students will be able to integrate AAT into assessment plans, the IEP process, lesson planning and review, and daily classroom routines; Keeping in mind the specific characteristics of individual students, they will choose and then make use of appropriate technology to accomplish specific instructional/academic, physical, and social/emotional objectives

CIEP 350 Adolescent Literature (3 Credit Hours)
This course introduces the languages arts education student to the relevance and need for incorporating adolescent literature in the middle/secondary classroom and to the development and strengthening of literacy.
Outcomes:
Students will have broad and detailed understanding of the realities and intellectual context of middle/secondary language arts education and the role of adolescent literature within this context

CIEP 351 Curriculum and Teaching in the Middle School (3 Credit Hours)
The purpose of the course is to help students construct a conceptual framework within which they can effectively respond to the needs of middle school students.
Course equivalencies: X - CIEP 351 / CIEP 455
Outcomes:
Students will learn the middle level philosophy and will examine how those beliefs and values affect both teaching and learning

CIEP 359 Teaching Reading (3 Credit Hours)
The purpose of this course is to introduce the preservice teacher candidate to the teaching and learning processes associated with research-based comprehensive literacy instruction and will emphasize the scientific foundations of literacy instruction: phonemic awareness, phonics, vocabulary, text comprehension and fluency. Developmental stages of learning to read and write, interactive teaching strategies, and instructional materials, methods and assessments will be presented. Emphasis will be placed on the development of a knowledge base needed to assist beginning teachers in making insightful decisions regarding their objectives and practices. Updated information on current trends, research, and state and national standards will be emphasized. Tier 1 classroom literacy instruction in accordance with a multi-tiered system of support philosophy and practice will be highlighted. An asset-based approach to understanding language and literacy development will ground all course experiences alongside content that supports candidates' ability to plan scaffolded instruction that incorporates students' linguistic and cultural identities and meets students' diverse learning needs. Current multi-cultural children's literature will be used in simulated classroom teaching experiences.
Outcomes:
Students will be able to make informed decisions regarding literacy instruction; They will be able to apply curriculum knowledge and instructional strategies in the development and teaching of literacy lessons

CIEP 360 Interdisciplinary Workshop: Culture & Identity TLSC 140/150/160 Rome, Italy (3 Credit Hours)
The modules in Sequence 2 explore how the school is itself a community and how the organization and environment of a school influence student learning. This sequence builds off of Sequence 1's exploration of the local communities that schools are situated in. The sequence addresses TLLSC Enduring Understandings 1, 3, 7, and 9.
Outcomes:
TLSC 140: Teaching, Learning and Leading for Social Justice: This module builds on candidates' initial explorations of diverse learning environments and continues to develop candidates' understanding of the School of Education's mission of professionalism in service of social justice and the core tenets of culturally responsive pedagogy; TLSC 150: Constructive Learning Environments for Diverse Students: This module deepens teacher candidates' introduction to learning and development through consideration of the importance of healthy learning environments; TLSC 160: Analyzing Culturally Responsive Classroom Instruction: This module builds on candidates' initial explorations of learning and the core tenets of culturally responsive pedagogy as candidates are introduced to backward design and Universal Design for Learning

CIEP 366 Special Topic Seminar (3 Credit Hours)
This course is a seminar for Special Topics for SOE undergraduate students. This seminar will allow SOE to pilot newly developed and approved courses. This seminar will be used by SOE - ADSU, TL, and SPSY - programs covering various educational subjects and interdisciplinary topics.
This course satisfies the Engaged Learning requirement.
Outcomes:
Seminar outcomes will be specific to the topic and program

CIEP 390 Field Study in Education (3 Credit Hours)
This course provides an opportunity to work with a small group of 8th graders from underserved Chicago public schools to improve their math achievement.
This course satisfies the Engaged Learning requirement.

CIEP 398 Independent Study (1-3 Credit Hours)
The student and a sponsoring faculty member will determine an advanced topic for the student to work on. Independent study of selected topics in Education under the supervision of a faculty member.

CIEP 401 The Exceptional Child (3 Credit Hours)
This course is designed to provide a psychological and educational examination of exceptionality as related to school- age children and youth.
Outcomes:
Students will articulate defining characteristics of a range of disabilities as well as knowledge of a range of educational modifications made for students with special needs

CIEP 409 Evidence Based Interventions (3 Credit Hours)
This course is designed to provide students with an introduction to evidence-based interventions used in school psychological service delivery. Course content includes definitions of evidence-based interventions, process for identifying evidence-based interventions in school psychology, and a review of well-established evidence-based academic and behavioral interventions used in school based settings. Restricted to EDS students.
Outcomes:
Upon completion of the course, students will be able to: Define "evidence-based intervention" and differentiate this concept from similar concepts (eg, empirically-supported intervention, evidence-based practice, etc); Identify organizational websites that collect, evaluate, and disseminate evidence-based academic and behavioral interventions for children and adolescents that can be used in school-based settings (eg, What Works Clearinghouse, Doing What Works, Johns Hopkins Best Evidence Encyclopedia, and SAMHSA's National Registry of Evidence-Based Programs and Policies); Interpret the foundational criteria that are used to evaluate the quality of research to determine the strength of an intervention's evidence; Identify several well-established academic and behavioral evidence-based interventions for children and adolescents in school-based settings; Understand the strengths and limitations of developing and implementing evidence- based interventions with minority populations

CIEP 410 Legal Issues - Educating Exceptional Children (3 Credit Hours)
Legal issues relevant to the education of persons with disabilities are examined.
Outcomes:
Students will demonstrate and understanding of legal issues that pertain to students with disabilities as well as other relevant case law in education

CIEP 412 Special Topics in Special Education (3 Credit Hours)
Seminar in Special Topics in Special Education. Topics will vary from term to term.

CIEP 413 Psychopathology & School Mental Health (3 Credit Hours)
Enrollment is limited to Graduate Students in the School Psychology Program The purpose of this course is to develop a working knowledge of childhood/adolescent psychopathology from multiple theoretical perspectives. The interactions of individuals, families, communities, schools and mental health providers in either etiology and/or treatment planning will be considered.
Outcomes:
Students will gain knowledge of child/adolescent psychopathology in terms of diagnosis, prevention and intervention

CIEP 414 Instructional Methods-Diverse Population (3 Credit Hours)
This course provides an analysis of and experimentation with various instructional strategies. Students learn how to develop strategies that are appropriate for their content area(s) and meet the needs of diverse learners.
Outcomes:
Students will design curriculum, practice instructional strategies, develop assessment tools, and examine school and community relationships for diverse settings

CIEP 415 Models of Instruction (3 Credit Hours)
This graduate course provides an analysis of and experimentation with various instructional strategies. Students learn how to develop strategies that are appropriate for their content area(s) and meet the needs of diverse learners.
Outcomes:
Students will design curriculum, practice instructional strategies, develop assessment tools, and examine school and community relationships for diverse settings

CIEP 416 SPED Administrator: Assessment of Atypical Child (3 Credit Hours)
This course is an introductory course in assessment principles and practices. It is designed to provide students obtaining certification as an administrator the foundation to understand the proper uses of assessment and data. Students will acquire a broad introduction to the topic of assessment. The introduction covers the knowledge of assessment principles and practices. This course will provide students the foundation to understand and discern the proper uses of assessment and data to make individual decisions and broad organizational decisions.

CIEP 417 Scientifically Based Research (3 Credit Hours)
No course description is available

CIEP 420 Multivariate Aspects of Research (3 Credit Hours)
No course description is available

CIEP 423 Advanced Literacy Instruction in the Content Area (3 Credit Hours)
This course focuses on the theoretical foundations of content instruction in the context of reading and writing to learn in the content areas. Current research on reading, writing, and thinking as well as topical issues related to teaching practices and state and professional guidelines and standards will be examined.
Outcomes:
Students will develop a knowledge base of current reading/writing/thinking theories which can be applied to the teaching of content areas in either elementary or secondary classrooms

CIEP 425 Theory and Practice in Assessment (3 Credit Hours)
This course addresses the purposes, methods, creation, and uses of assessments in a variety of learning contexts (e.g., classrooms, informal learning settings, workplace settings). The course will examine multiple assessment practices (e.g., testing, performance based, self-assessment, work based assessment). The course will also provide an introduction to the psychometrics of assessment.
Outcomes:
Candidates will be able to describe and explain the purposes, theories, and components of various assessment practices; Develop a variety of assessment practices to evaluate learning outcomes across different learning contexts; describe and explain the foundational aspects of psychometrics as it relates to assessment

CIEP 431 Three Tier Prevention: Advanced Primary Supports (3 Credit Hours)
This course focuses on universal preventions, which serve as the first tier of three levels of intervention.
Outcomes:
Candidates will learn skills to assist them in (a) identifying and assessing problem behaviors; (b) designing and implementing behavior interventions; (c) designing learning environments that prevent and remediate problem behaviors, and (d) involving key stakeholders to develop agreed upon expectations and strategies to facilitate success for all students

CIEP 432 Three Tier Prevention: Secondary and Tertiary Supports (3 Credit Hours)
This course will focus on the use of secondary and tertiary supports/interventions to enhance the capacity of schools, families, and communities to design effective environments that improve the fit or link between research-validated practices and the environments in which teaching and learning occurs.
Outcomes:
Candidates will learn skills to assist them in designing and implementing evidenced-based behavior interventions to targeted groups or individuals that improve lifestyle results (personal, health, social, family, work, recreation) for all children and youth by making problem behavior less effective, efficient, and relevant, and desired behavior more functional

CIEP 433 Self-Determination: Self-Management and Transition Planning (3 Credit Hours)
This course will focus on increasing student self-determination through the use of behavioral principles to understand and address problems in self-management. In addition, the course will introduce current perspectives on self-determination and quality of life issues as they relate to individuals transitioning through the life-span.
Outcomes:
Candidates will learn how to apply behavioral principles to develop and implement an individual self-management plan to reach a particular short-term goal

CIEP 434 Practicum I: Consultation and Collaboration-School Personnel (3 Credit Hours)
This course will provide candidates with the opportunity to practice the use of primary supports/interventions to enhance the capacity of schools to design effective environments that improve the fit or link between research-validated practices and the environments in which teaching and learning occurs.
Outcomes:
Candidates will demonstrate leadership when planning and implementing primary preventions strategies at the school-wide level across all students and will involve appropriate key stakeholders (school personnel, students, families, community members) to develop agreed upon school-wide expectations and strategies to facilitate success for all students

CIEP 435 Practicum II: Consultation and Collaboration-Family and Community (3 Credit Hours)
This course will provide candidates with the opportunity to practice the use of secondary and tertiary supports/interventions to enhance the capacity of schools, families, and communities to design effective environments that improve the fit or link between research-validated practices and the environments in which teaching and learning occurs.
Outcomes:
Candidates will demonstrate leadership by providing guidance and modeling to school personnel, family, and community member in the use of behavior interventions to improve the quality of life for all children

CIEP 440 Critical Investigations in the Field of Curriculum (3 Credit Hours)
This course critically examines the foundations of curriculum from a critical lens on the field of curriculum. Students study controversial curriculum issues across schools and communities drawing from curriculum theory and policy in lived and specific historical contexts. It starts with the discussion of the history of the field, multiple definitions of curriculum, paradigms, and philosophies and then moves on to wonder about the prospects for the future. Students examine a broad range of historical documents and theoretical essays as they consider essential curriculum questions both in schools and communities.
Outcomes:
This course will educate students in historical and philosophical curriculum inquiry across schools and communities; Students explore curriculum issues in real and particular historical, philosophical contexts and apply them to contemporary curriculum discourses

CIEP 442 Culturally Sustainable Curriculum Development & Implementation (3 Credit Hours)
This course provides the basis for curriculum development and implementation in schools or other professional learning settings. Students will learn theories and practices of developing curriculum based on culturally responsive and sustainable frameworks and practice how to apply these principles in curriculum development. Students will design and implement social justice-oriented curriculum for schools and/or professional settings.
Outcomes:
Students will understand key curriculum development frameworks that integrate culturally sustainable pedagogy

CIEP 444 Social Justice, Service, Quality (3 Credit Hours)
No course description is available

CIEP 447 Technology-Enhanced Instruction: AI Integration in Education (3 Credit Hours)
The course critically examines the evolving role of technology, especially artificial intelligence (AI), in educational settings. Students will engage with theories and models of technology integration and explore how AI is used responsibly in education. They will develop strategies to integrate AI into education and address related complex challenges through critical perspectives. The course promotes a human-centered, ethical, and responsible approach to AI implementation. Students will become leaders in the ethical use of AI in education and participate meaningfully in an AI-saturated society.
Course equivalencies: CIEP492/CIEP447
Outcomes:
Explain the history and impact of technology on education; Apply theories and models of technology integration in education; Integrate AI into education in a human-centered, critical, ethical, and responsible way; Use AI ethically to enhance learning outcomes and manage its challenges; Redesign curriculum and assessments to support the ethical use of AI; Develop guidelines and instructional programs to foster critical AI literacy

CIEP 450 Educational Psychology (3 Credit Hours)
The psychological bases of educational theories and practices related to human learning, development and psychological research are studied and critically examined.
Outcomes:
Students will demonstrate knowledge of leading learning theories, human development and assessment of learning as it pertains to evidence-based instruction and practice

CIEP 451 Psychology of Learning (3 Credit Hours)
The dual study of theory and research in human learning is presented, with an emphasis on behavioral and cognitive science models, as well as memory and retrieval systems.
Outcomes:
Students will demonstrate knowledge of validated learning theories in the behavioral and cognitive science domains

CIEP 455 Advanced Curriculum & Teaching in the Middle School (3 Credit Hours)
This graduate level course examines middle school (MS) education (grades 6-8), emphasizing the need to respond in appropriate educational ways to the developmental characteristics of diverse young adolescents (ages 10-14).
Course equivalencies: X - CIEP 351 / CIEP 455
Outcomes:
Effective middle school teacher candidates understand the needs of their students and attend to the development of the whole child, including social and emotional learning; Effective middle school teacher candidates will understand the importance of culturally sustaining teaching; Candidates understand middle school philosophy outlines key components of culture, community, and curriculum that are needed in effective middle schools teaching; Candidates understand effective instruction for middle school students is responsive to their developmental needs and growing cognitive abilities

CIEP 457 Implementation Strategies, Planning, and Practices (3 Credit Hours)
Implementing innovations in schools, community and business organizations requires individuals to possess the knowledge and skills to work successfully as change agents. This course is a study of the science, theories, models and strategies that can be used across organizational settings to facilitate the implementation of innovative practices.
Outcomes:
Students will be able to utilize theories, models and strategies to facilitate the planning and implementation of innovations within organizational settings

CIEP 461 Practicum in School Psychology I (3 Credit Hours)
This pre-internship, field-based course deals with supervised experience in assessments, interventions, counseling, and consultation.
Outcomes:
Students will demonstrate initial proficiency in individualized behavioral, academic, learning assessments, interventions, counseling and consultation under supervision

CIEP 462 Ethics and Professional School Psychology (3 Credit Hours)
Enrollment is limited to Graduate Students in the School Psychology program. The course focuses on the professional, legal, and societal context in which school psychology practice takes place and the major functions and competencies of school psychologists.
Outcomes:
The expected outcomes of the course are an enhanced understanding of the roles and functions of school psychologists and models of service delivery

CIEP 463 Practicum Schl Psychology II (3 Credit Hours)
This pre-internship, field-based course deals with supervised experience in assessments, interventions, counseling, and consultation.
Outcomes:
Students will demonstrate initial proficiency in individualized behavioral, academic, learning assessments, interventions, counseling and consultation under supervision

CIEP 466 School Psychology Special Topics (3 Credit Hours)
This course is designed to provide students with the information on constructing a school-based, action-research project that addresses a problem of practice within a school system. Students will learn the fundamentals of defining a problem of practice in a school setting, developing a robust literature review, designing an evidence-based implementation plan to address the problem of practice, and designing data organization tools to evaluate the implementation plan. While much of the information provided can be used to develop any kind of action research or systems change project, there will be a focus on developing the Capstone Project. Through this course you will learn skills to address problems in schools and districts, as well as address the requirements for the Capstone. Students will receive primary assistance on their own Capstone Project with their project chair.

CIEP 469 Issues that Shape Teaching and Learning in Urban Schools and Communities (3 Credit Hours)
This course examines the social, economic, political, cultural and historical factors that impact communities and shape teaching and learning in urban settings. A field experience with a local community organization working on an educational initiative will provide students with the opportunity to participate in, research, and develop understandings around the relationship among organizations, communities, and schools.
Outcomes:
Students will be able to demonstrate a complex understanding of issues that face urban schools, their relationship to local communities and the educational resources that can be generated by partner ships between schools and communities

CIEP 470 Principles of Instructional Design (3 Credit Hours)
Through the development of an instructional product candidates will engage in the activities associated with each step of the ADDIE process. Emphasis is placed on a cognitive model of learning; however, other models/theories of learning may be applied. In addition candidates will use theories of instructional motivation, principles of instruction as well as instructional strategies relevant to the type of knowledge and cognitive domain level of their product to in order to enhance learning. Analysis, Design, Development, Implementation, Evaluation (ADDIE) process to develop an instructional product.
Outcomes:
Candidates will use the steps involved in systematic instructional design process

CIEP 471 Theoretical Foundations of ESL-Bilingual Education (3 Credit Hours)
This course introduces the integral theoretical, historical, political frameworks and ideological constructs that shape the contemporary educational practices for culturally and linguistically diverse students. Content delves into key principles, policies, and practices of language education, including the various models of bilingual education, English as a second language (ESL), English as a foreign language (EFL), and sheltered content instruction. The course builds background of language acquisition theories, key legal precedents, and educational and language policies that influence school programming, assessment, instruction, teaching, and learning.
Outcomes:
Participants will explain how students develop and maintain languages, describe the research basis for bilingual education, and demonstrate how various school stakeholders implement language policies and programs with bilingual students

CIEP 472 Methods and Materials for Teaching ESL/Bilingual Education (3 Credit Hours)
This course provides a comprehensive framework for teaching bilingual students across a range of educational settings and explores the various theories of language teaching and learning that have been promoted at different times. The content delves into various approaches to teaching in monolingual and bilingual instructional settings, as well as pedagogical strategies to support disciplinary learning, language development, and bilingualism/biliteracy. Course topics include instructional planning and implementation, as well as the selection of culturally, linguistically, and developmentally appropriate materials to enhance instruction, understanding, and achievement.
Outcomes:
Participants will design and implement instruction that responds to students' cultural and linguistic backgrounds, supports language development, fosters meaningful interaction with peers, and maintains rigorous expectations for disciplinary learning

CIEP 473 Instructional Leadership for Multicultural Schools (3 Credit Hours)
This course focuses on building capacity in schools to promote the learning, development, and achievement of students from diverse linguistic, cultural, and racial backgrounds, particularly framed within the context of a society faced with issues of poverty, discrimination, racism, and sexism. The course probes important topics such as teacher expectations, student identity construction, and utilization of the rich resources that students bring to educational settings from their homes and communities.
Course equivalencies: X- CIEP 473/ ELPS 465
Outcomes:
Participants will critically analyze their school settings for issues of race, class, culture, language, and gender and then design professional development efforts to promote change with teachers, leaders, families, and communities

CIEP 474 Assessment of Bilingual Students (3 Credit Hours)
This course prepares educators to utilize assessment to inform classroom instruction, specifically focused on authentic assessment of language and content. Targeting educators of bilingual students, the course emphasizes theoretical and practical study of instruments and procedures for assessing culturally and linguistically diverse students. Educators collect data and make instructional decisions based on students' abilities in English and other languages, which involves distinguishing between learning exceptionality and second language acquisition.
Course equivalencies: X-CIEP474/CIEP526
Outcomes:
Participants will design and utilize formal and informal methods of evaluation to assess students' social, emotional, cultural, linguistic, and academic development and achievement, including critical analyses of existing assessment tools for validity, reliability, and bias

CIEP 475 Curriculum Workshop (1-3 Credit Hours)
The course is designed to contextualize, introduce and/or deepen the understanding and appropriation of Ignatian/Jesuit Education/Pedagogy for people who are already engaged in it or planning to engage in it. The course is designed as a philosophy of education course emphasizing the philosophical approach and roots of Jesuit Education. The course can also assist people in the field of education that want to know about Ignatian Pedagogy or are looking for ways of recreating their pedagogical practice from the perspective of Jesuit Education. However, the course can also be accommodated to those looking for an applied approach to enrich and improve a specific pedagogical practice. In this case please indicate this intention to the instructor to make the necessary adjustments.

CIEP 477 Prevention, Assessment & Intervention: Academic (3 Credit Hours)
Enrollment is restricted to Graduate students in School Psychology. To provide candidates with the knowledge, skills, and dispositions necessary to assist school-aged students experiencing academic difficulties. They will utilize and evaluate evidence based interventions and learn to effectively communicate this information orally and in writing to help teachers and parents develop, modify academic intervention plans.
Outcomes:
Candidates will be able to evaluate and utilize appropriate academic interventions and identifying evidence based practices

CIEP 478 Behavioral Intervention: Assessment & Support (3 Credit Hours)
The aim of this course is to familiarize students with the professional literature in consultation and to employ data-based decision-making in the design and delivery of consultative interventions.
Outcomes:
Students will be able to design and evaluate two consultation cases; one at the individual level and the second on a classwide-level

CIEP 479 School-Based Consultation (3 Credit Hours)
This course will provide an overview of the knowledge and skills necessary for school psychologists to engage in consultation, collaborative problem solving, and systems level intervention in educational settings. Course content will focus on the collaborative consultation processes, theory and issues related to these processes, as well as relevant research. Content will include adopting a systems level perspective with change being viewed from a preventative framework. Consultation from a cross-cultural view will also be emphasized. This course will also include the opportunity to observe, practice and evaluate the skills required to engage in school-based collaborative consultative services through applied case work, practice, role play, self-reflection, feedback and class discussion.

CIEP 480 Assessment School-Age Students & Adults (3 Credit Hours)
The emphasis of the course is on assessment skills and interpretation of individual cognitive measures with school-age children and adults.
Outcomes:
Students will be able to demonstrate proficiency in the administration and interpretation of a wide variety of commonly used measures of cognitive functioning

CIEP 481 Prevention, Assessment & Intervention: Early Childhood (3 Credit Hours)
Enrollment is restricted to Graduate Students in the School Psychology program. This course provides insight into the developmental assessment of infants & preschool children, and the planning and development of intervention goals.
Outcomes:
Students will gain proficiency in standardized and authentic assessment of language and social-emotional development, cognitive ability, motor skills, achievement, and adaptive behavior in young children

CIEP 482 Prevention, Assessment & Intervention: Behavior (3 Credit Hours)
Enrollment is restricted to Graduate Students in School Psychology. This course is designed to provide students with an introduction to strategies for promoting positive behavior in the context of instructional environments through the use of applied behavior analysis principles and procedures. Course content includes multiple methods of behavioral assessment linked to intervention planning.
Course equivalencies: X-CIEP482/CPSY482
Outcomes:
The students will be able to use strategies for promoting positive behaviors for students in the schools and link their assessments to interventions

CIEP 484 Biological Foundation: Behavior in Schools (3 Credit Hours)
This is a seminar course on cognitive neuropsychological foundations in school psychology. The cognitive neuropsychological basis of educational theories and practices are studied and critically examined. Emphasis is given to current brain research, assessment based on the Cognitive Hypothesis Testing model (Hale & Fiorello, 2004) and resultant neuropsychological process assessment and how medications impact learning, social interactions, and behavioral functioning within the school setting. The course is for nonmedical professionals and provides a basic knowledge of cognitive neuropsychological principles of brain functioning, medications and psychopharmacological treatment.
Outcomes:
Students will demonstrate an understanding of the biological basis for behavior and how these issues relate to academic and behavioral challenges faced in schools

CIEP 485 Prevention, Assessment & Intervention: Social-Emotional (3 Credit Hours)
Enrollment is restricted to graduate students in School Psychology. The students will have an understanding of the theoretical foundations of emotional and behavioral disorders; the diagnostic/eligibility criteria for emotional and behavioral disorders; and the social and emotional assessment instruments and procedures. Students will be introduced to early identification and intervention strategies with regard to social/emotional/behavioral functioning.
Outcomes:
Students will be able to assess and link interventions to help students with social emotional needs in the schools

CIEP 486 Internship: School Psychology (3 Credit Hours)
This course provides university-based supervision for school psychology students completing a nine-month full-time experience conducted in an approved public school setting under a state-approved internship plan.
Outcomes:
Student apply skills in assessing students, consulting with school personnel and parents, counseling students as part of a state-approved internship plan

CIEP 487 Tests and Measurements (3 Credit Hours)
This is a course overview of the history, purposes, and uses of various types of tests along with a survey of available tests and criteria used to select assessment measures.
Outcomes:
Students will demonstrate an understanding of the basic purposes of various psychometric tests and will understand statistical criteria that are used to select tests

CIEP 488 Participatory Action Research (PAR) in Schools and Communities (3 Credit Hours)
This course will provide candidates with the knowledge and skills to use participatory action research (PAR) practices and approaches. Candidates will develop theoretical and practical knowledge related to a collaborative approach to research. The theoretical framework situates stakeholders in schools and community organizations as experts in their field and sees collaborative research between institutions of higher learning and schools and communities as an opportunity to authentically address germane problems and issues while promoting shared learning.
Outcomes:
This course emphasizes valuing the epistemic assets that local stakeholders bring to identifying and working toward solutions that benefit their missions and finding ways to bring attention to their work through research and publications

CIEP 489 Intro School-Based Network (3 Credit Hours)
No course description is available

CIEP 496 Educational Evaluation (3 Credit Hours)
This course provides students with an overview of program evaluation, particularly as it relates to the field of education. Throughout the course, students will be able to practice program evaluation. An assumption of this course is that "the pursuit of professional practice in evaluation requires developing a life of the mind for practice" (Schwandt, 2015, p. 143). Evaluation practices include considering the ethical issues surrounding the role of the evaluator, understanding the social and political dynamics of an evaluation context, determining which evaluation approach to use in a given context, identifying the various roles of the evaluator, developing an evaluation plan, generating and collecting data, valuing and making value judgments, and facilitating use of the evaluation.
Course equivalencies: RMTD406 / CIEP496

CIEP 498 Independent Study (1-3 Credit Hours)
In preparation for advanced degree writing and research, candidates will utilize readings, discussions, and appropriate computer applications to interpret, organize, display, and summarize quantitative study results. Course concepts include probability, normal distribution, tests of significance and correlation, simple regression, and multiple regression are among the tests that may be utilized.

CIEP 499 Directed Research (1-3 Credit Hours)
This course is Directed Research. Course Content, Course Objectives and Outcomes are collaboratively constructed with Research Student and Supervising FT SOE Faculty member. The Directed Research Projects are approved by SOE Program Area faculty and SOE Associate Dean of Academic Affairs.
Outcomes:
Outcomes chosen between the instructor and the student during the semester the course is taken

CIEP 500 Child Development and Cognition (3 Credit Hours)
The purpose of this course is to provide students with a graduate level overview of the key theories of development and cognition. Students will learn about critical issues in development and learning that they will encounter and need to deal with working as psychologists in applied settings. Throughout the course students will be asked to analyze, reflect upon, and critique how theories learned may apply, or not, to those learners whose primary culture may be different from the majority through case studies, online discussion boards (or in-class discussions), and a critical analysis of comparative field site visits.

CIEP 501 Exceptional Learner II (3 Credit Hours)
The purpose of this course is to provide in depth understanding of ethical, professional, and collaborative service provision for children with special needs within a multicultural framework.
Outcomes:
Students will understand the current trends in service delivery for students with low incidence/significant disabilities (eg, partial participation, natural proportions) and the need to expand curriculum, instruction, and assessment strategies to meet individual learning styles and instructional needs

CIEP 502 Trauma Sensitive Schools (3 Credit Hours)
Students will explore literature on trauma sensitive schools and the intersection with race and discrimination. They will use Multi-Tiered systems of support to support students at each tier and support staff and families.
Outcomes:
Gaining a basic understanding of the subject (eg, factual knowledge, methods, principles, generalizations, theories); Learning to apply course material (to improve thinking, problem solving, and decisions); Developing specific skills, competencies, and points of view needed by professionals in the field most closely related to this course; Learning to apply knowledge and skills to benefit others or serve the public

CIEP 503 Culturally Relevant Literature for Children & Adolescents (3 Credit Hours)
This course introduces participants to texts and classroom materials that authentically portray and reflect the cultural and linguistic diversity of classrooms and communities. The course focuses on analyzing materials for relevance and authenticity, learning about bilingual students through diverse stories, and using culturally relevant texts to support students' learning and development in classrooms.
Outcomes:
Participants will find, select, and utilize culturally relevant and authentic literature to support students' learning and development in culturally and linguistically diverse classrooms

CIEP 504 Applied Linguistics for Teachers (3 Credit Hours)
This course emphasizes the complex and dynamic role of language in teaching and learning, including implications for effective policy and practice in culturally and linguistically diverse classrooms. The course prompts participants to engage in applied linguistics research to solve problems of practice in the teaching of bilingual students.
Outcomes:
Participants will apply in-depth understandings of language acquisition and development to make informed decisions in practice with the goal to support the learning and language development of linguistically diverse students

CIEP 505 Literacy and Numeracy for Principals (3 Credit Hours)
Pre-requisites: ELPS 481; CIEP 442
The purpose of this course is to introduce principal candidates to the foundations of numeracy and literacy development across PK - 12 settings. Included will be a focus on the development of knowledge and skills required to provide leadership in PK - 12.
Outcomes:
Through the internship experience candidates will gain an understanding of the leadership behaviors that promote just and equitable educational services to all members of the learning community

CIEP 506 English Language Learning Practicum (3 Credit Hours)
The practicum experience serves to integrate learning from across the Masters program within authentic teaching and learning environments spanning PK-20 settings. The course involves formal observation, support, and evaluation during classroom teaching with bilingual students, guided by specific practicum assignments that center on backward design via data analysis, classroom environment, and instructional units of study.
Outcomes:
Participants will demonstrate competence, effectiveness, and responsiveness in daily classroom practice with bilingual students

CIEP 507 Language Demands and Development in Disciplinary Classrooms (3 Credit Hours)
Everything we do in classrooms and schools requires language, yet the nuances and complexities of language are rarely explored in educator-preparation programs. As the population diversifies and more students come to schools with competencies in languages other than English, teachers must understand how language works so that they can support students in developing language spanning grades and disciplines. In this course, teachers will explore the language demands within and across academic disciplines and enact scaffolds to support multilingual students' language development by attending to these demands. Course understandings and related pedagogical practices emphasize the value of students' multilingual repertoires and competencies with foci on building metalinguistic awareness and encouraging translanguaging with languages and language varieties. Pedagogical practices will focus primarily on building classroom environments to support students' language development, including contextual features, scaffolds, and procedures.
Outcomes:
Participants will: Describe the role of language(s) in teaching and learning, including how it develops; Distinguish the components of language (eg, phonology, morphology, syntax); Apply knowledge of language components in support of language development; Describe the language functions, features, and domains of disciplinary classrooms; Apply knowledge of language demands to support students' language development; Explain the interplay of home and school languages (eg, metalinguistic awareness); Apply knowledge of metalinguistic awareness in support of language development

CIEP 508 Social Justice for Multilingual Learners (3 Credit Hours)
This course introduces educators to foundational principles and practices for promoting social justice and educational equity while teaching multilingual learners in today's classrooms. A central component to teaching for social justice for students labeled as English learners (ELs), this course prompts educators to deconstruct their identities, experiences, and perspectives on cultural and linguistic diversity as a means to recognize and deconstruct language ideologies, deficit-based perspectives, personal biases, and institutionally driven assumptions. Framed by larger sociolinguistic and sociopolitical themes in the field of EL/bilingual education, educators explore students' diversity in their classrooms and schools and reflect upon current practice with that lens. Participants then draw from the literature to develop personal philosophy statements for serving multilingual learners with goals for their own professional learning.
Outcomes:
Participants will: Discern the central and active role of teachers as language policy actors and language decision makers in classrooms, schools, and communities; Reflect upon previous experiences with and perspectives on language learners, language education, and language diversity; Probe the role of language ideologies in institutional practices in education as a means to examine and deconstruct biases and assumptions; Explore the diversity of classrooms, schools, and communities, including cultural, linguistic, familial, academic, social, emotional, behavioral, and sociopolitical factors; Analyze historical and current practices in schools for multilingual students in line with research and theory of supporting and promoting equity for multilingual students; Define personal philosophies and professional goals for teaching multilingual students

CIEP 509 Literacy Teaching for Bilingual & Multilingual Students (3 Credit Hours)
Literacy is widely seen as one of the most important skills that children need in order to be successful in school and beyond, however the teaching of reading and writing are largely still approached from a monolingual paradigm even though the vast majority of classrooms have students who speak (and are often literate to varied degrees in that language) in at least one other language beyond the language of instruction. Therefore, it is essential that educators acquire the knowledge and skills to consider the development of literacy from a broader, less restrictive linguistic paradigm in order to engage and effectively teach reading and writing to their students who are bi/multilingual. Regardless of teaching context (e.g., grade level; bilingual or monolingual instructional setting, etc.) educators in this course are supported to move away from a monolingual paradigm in relation to literacy development in order to make strong and effective use of their students' literacy knowledge across languages. Participants will apply new learning to implement strategies (such as contrastive analysis, reading and writing opportunities in both languages, etc.) that supports the development and transference of literacy learning across languages.
Outcomes:
Participants will: Explain the relationships between oral language and literacy development and first and second literacy acquisition; Describe the relationships between literacy development, identity and motivation; Describe the different paths to literacy development specifically in relation to oracy and literacy in another language; Identify the ways in which knowledge of different orthographic systems can be beneficial to learning a new one; Apply knowledge of different orthographic systems to support students' literacy development through teaching strategies such as contrastive analysis; Apply knowledge of bilingualism to support students' literacy development across languages; Design strategies for teaching reading and writing that build on students' linguistic and cultural funds of knowledge; Identify the components of knowledge needed to become literate in another language and distinguish between those aspects of literacy that are common across all languages and those that are unique to certain languages; Create classroom environments and materials that support students' bi- or multilingual literacies and engage them in shared literacy events

CIEP 510 Accessing & Adopting General Education Curriculum (3 Credit Hours)
This course provides a review of standards for K -12 student learning with special emphasis on reading and mathematics.
Outcomes:
The student will be able to Assess the curricular, social-emotional/behavioral needs of students with diverse learning and curriculum needs, and develop pedagogical skills to address those differences

CIEP 511 Development Theory & Disabilities (3 Credit Hours)
The purpose of this course is to study the stages of physical, cognitive, social, and emotional development of infants, toddlers, young children, and adolescents with special attention to the similarities and differences among individuals with and without disabilities. The influence of sensory, cultural, and environmental issues on the developmental needs of children and adolescents will be explored. The Council for Exceptional Children (CEC) Ethical Standards for Special Educators and Teacher Preparation Standards will also be addressed.

CIEP 512 Special Education: The Profession (3 Credit Hours)
The purpose of this course is to examine, test, and clarify the student's commitment and understanding of the teaching profession.
Outcomes:
Students will reflect on their role in the classroom through journaling and sharing

CIEP 513 Ethics & Law for Administrators (3 Credit Hours)
This course will deal in depth with current and timely legal and ethical issues in the education of children with disabilities, diverse learners and other children identified as having additional needs in any area of instruction and development, focusing on the administration of special education services in public schools. The approach to and focus on these topics is designed for candidates seeking endorsement as Illinois State-approved Director of Special Education. Students will learn federal and State statutory and regulatory procedures in determining eligibility for services, evaluation, development of the individualized education program, and the provision of a free appropriate public education in the least restrictive environment. The delivery of services to special needs children from early childhood through post-secondary transition will be addressed.
Outcomes:
The course will concentrate on statutory and regulatory compliance; fostering effective and productive relationships among administration, professional personnel, service providers and families in serving students with special needs; and timely, efficient, positive-focused dispute resolution

CIEP 514 Advanced Systems Consultation (3 Credit Hours)
As school psychologists who attend to issues of social justice, we sometimes find ourselves in positions where changes to systems need to be made in order to ensure that students' needs are being met. The purpose of this course is to explore systems change from the role of the school psychologist, including conducting a needs assessment and data-based decision-making, and the role of supervisors within school settings to support P-12 students and the professionals who serve them in evolving schools and districts.
Outcomes:
Gaining a basic understanding of the subject (eg, factual knowledge, methods, principles, generalizations, theories); Learning to apply course material (to improve thinking, problem solving, and decisions); Developing specific skills, competencies, and points of view needed by professionals in the field most closely related to this course; Learning to apply knowledge and skills to benefit others or serve the public

CIEP 518 Theories and Practices of Partnerships (3 Credit Hours)
This course explores current issues, literature bases, and practical examples related community-based and practice-oriented partnerships focused on improving learning opportunities for youth, their parents/guardians, and various stakeholders in the community.
Outcomes:
Teachers are vital to the success of the students in their classrooms, but we must recognize that teaching and learning happen across many time and spaces, and are influenced by a multitude of factors, beyond the classroom

CIEP 519 Data-based Decision Making (3 Credit Hours)
Enrollment is restricted to Graduate Students in School Psychology. The purpose of this course is for students to gain knowledge in universal behavioral and academic behavior data-based decision-making skills and ways to use these data to make informed curricular and intervention decisions that are of use to schools. The students will be able to use data-based and evidence-based decision-making in working with children and teachers in the schools.

CIEP 520 Doctoral Seminar (1 Credit Hour)
This course will provide doctoral students with an introduction and orientation to the Curriculum and Instruction EdD program as well as an introduction to the dissertation process. This course will focus on the methods and processes involved in developing a prospectus and review of the literature for a dissertation.
Outcomes:
Students will develop a plan of study for their degree as well as a prospectus for their dissertation

CIEP 521 Curr Theory & Rsrch Schools & Cmty:Positionalities,Prspctives,&Trnsformtns (3 Credit Hours)
The purpose of this course is to advance students' understanding of contemporary theoretical underpinnings of curriculum. In this course, the curriculum is understood as both the explicit planned course of learning put before students, and the hidden or latent experiences that students encounter in school and community settings. Students become familiar with the theoretical orientation of research on curriculum and to be able to evaluate the worth of research related to curriculum issues.
Outcomes:
Students will pose a problem, a question or a series of questions that would address the problem, collect data to facilitate answering some or all of the questions, analyze the data, and produce a series of reports on the state of their research in school and community settings

CIEP 522 Curriculum Policy Across Schools and Communities (3 Credit Hours)
This course offers a critical examination of the intersections of curriculum politics, policy, and practice in schools and communities. The goal is to increase students' understanding of the complexities of educational policy in practice as a means to assist them in becoming effective leaders and practitioners who influence and implement curricular policy in service of social justice.
Outcomes:
Students will examine historical and current trajectories of curricular policy spanning educational contexts, using various theoretical frameworks to probe how policy layers, locales, and actors influence the design and implementation in practice

CIEP 523 Curriculum Improvement and School-Community Change (3 Credit Hours)
Recognizing that the growth and development of schools and communities are inextricably linked, this course develops candidates' understanding of curriculum and school reform as well as community improvement. It examines historic school reform and contemporary school change models in addition to school-based reform strategies intended to improve teaching and learning in schools. The course further examines contemporary community development strategies such as community organizing, community economic development, and social service approaches in order to grant insights into the role communities play as potential partners in school improvement.
Outcomes:
Students will assess current research on curriculum reform and community development and their implications for improving student learning and achievement in school settings; Students will work with a local community organization or community schools' site in order to gain insights into how school and community organizations partner together to strengthen learning and developmental outcomes

CIEP 524 Prvlg, Power, & Possibilities: Teaching Soc Justice Schools & Communities (3 Credit Hours)
This course examines social justice issues through a critical lens. Readings focus on the role of race, ethnicity, and cultural contexts in the development of curriculum over time. The course emphasizes teaching for social justice through culturally and linguistically responsive and sustainable instructional and assessment practices.
Outcomes:
This course has been designed for graduate students who want to explore frameworks, perspectives, contexts, and strategies that will help them translate social justice in instruction and assessment practices

CIEP 525 Leading for Social Justice in School Psychology (3 Credit Hours)
Enrollment is restricted to Graduate Education students. This course provides an overview of individual, school-level, and national perspectives on leadership and systems change in school psychology, with an emphasis on strategies for bringing about socially just changes in schools.
Outcomes:
The intended outcome is the enhanced ability to lead for social justice as a school psychologist

CIEP 526 Assessment Culturally & Linguistically Diverse Populations (3 Credit Hours)
Enrollment is restricted to Graduate Education students. This course focuses on the socio-political issues that under-represented groups face in society including the historical misuses of tests in the placement of ethnic minority youth, and current legal and ethical standards for assessment and intervention with under-represented youth.
Course equivalencies: X-CIEP474/CIEP526
Outcomes:
To produce school psychologists who are aware of multicultural and diversity issues

CIEP 527 Ethics and Law for School Psychologists (3 Credit Hours)
Enrollment is restricted to Ed.D. Students in School Psychology This course focuses on the ethical standard for school psychologists. Students will explore the connection between the psychologist's vulnerabilities, ethical missteps and the development of ethical resilience.
Outcomes:
Students will identify and resolve ethical dilemmas and ethical violations in the practice of school psychology

CIEP 533 Proseminar: Educational Psychology/School Psychology (0 Credit Hours)
A required two-semester series of seminars designed for all students pursuing the Ph.D. degree in educational psychology or school psychology which focuses on critical issues in the field and the planning of a colloquium series
Outcomes:
Students will have an enhanced knowledge base of critical topic that drive the school psychology and educational psychology literature

CIEP 535 System Consultation in School Discipline Reform (2 Credit Hours)
Pre-requisites: Degree in Education or Law Related Field
The purpose of this course is to integrate and apply two interrelated broad literature bases within the field of education: (1) system change and data analysis literature informing best practices in analyzing system school data and needs assessment findings and using the findings to plan for system level discipline change; and (2) best practices in the school leadership and teaming to effect system level reform in school discipline. The focus of the course will be on the systems change process as it relates to the issue of school discipline. Through the course, students will gain skills and experience reviewing and analyzing school and district-level data, and they will develop and administer a needs assessment tool relating to school discipline and multi-tiered systems of support in their respective settings. They will also analyze system level variables, which have historically prevented true discipline reform (e.g., unreliable data collection systems, poorly structured teaming, access to systematic and ongoing professional development and technical assistance and rooted beliefs and biases).
Course equivalencies: LAW 684 / CIEP 535
Outcomes:
Students will analyze system level factors and data

CIEP 537 School Discipline Reform: Linking Law Policy and Practice (2 Credit Hours)
Pre-requisites: Degree in Education or Law-Related Field
The course will examine in-depth three to four major themes in the field of school discipline from the perspectives of law, policy and practice (e.g. racial and special education disparities, juvenile/criminal justice linkages and teacher).
Course equivalencies: CIEP 537 / LAW 686
Outcomes:
Participants will develop a three to five year action plan for school discipline reform

CIEP 540 Seminar Research Curriculum & Instruction (3 Credit Hours)
This course focuses on how current research in curriculum and instruction addresses key curricular questions such as, Does it work? For whom and under what conditions does it work? How does it work? Does a given theory hold?
Outcomes:
Students will be able to: 1) Understand key curricular questions and major areas of research in curriculum and instruction; 2) Evaluate a variety of professional articles and studies in terms of validity, methodology, findings, conclusions, alignment of various components with research question; 3) Synthesize research articles and studies into a coherent and appropriate literature review

CIEP 541 Seminar: Curriculum Issues (3 Credit Hours)
In this course students will study one aspect of current literature in the field of curriculum with intensity.
Outcomes:
Students will be able to apply the current research in an advanced curriculum situation; Students will be cognizant of current areas of curriculum research and be able to find references electronically

CIEP 544 Prevention, Assessment & Intervention: Advanced Skills (3 Credit Hours)
Enrollment is restricted to Graduate Students in School Psychology.
This course will provide students with in-depth hands on introduction to evidence-based cognitive behavioral treatments. The course will also focus on adaptations to match client presentation, ethnicity, culture, and socioeconomic status.
Outcomes:
The course will involve the modeling and practicing treatments such as CBT, which students will learn and demonstrate competently

CIEP 545 Systems Consultation (3 Credit Hours)
This is an advanced course for doctoral level students. The course has two separate but related prongs. First, the students will develop a working understanding of Organizational Development Consultation, demonstrating the skills necessary to perform the role of organization development consultant and in determining when and how to carry out this role.

CIEP 546 School Psychology Advanced Practicum (1-3 Credit Hours)
Enrollment is limited to Doctoral Students in School Psychology The purpose of this course is for students to complete a supervised advanced practicum in a clinical setting that can include schools, clinical or hospital environments.
Outcomes:
Supervised clinical experience in applied school psychology practice

CIEP 547 Clerkship: School & Educational Psychology (1 Credit Hour)
This is a non-credit doctoral level course that provides advanced experience in university teaching, research or direct service to children/adolescents.
Outcomes:
Students will demonstrate proficiency in an advanced area of academic training, based on supervised experience and evaluation by a site supervisor

CIEP 548 Family, School and Community Collaboration (3 Credit Hours)
Enrollment is restricted to students in the Graduate Education program.
Blending leading consultation approaches and ecological theory, this course provides an overview of the conceptual frameworks undergirding family/school community collaboration in schools.
Outcomes:
Students who take this course will leave with an enhanced ability to work effectively with families and communities across a wide spectrum of topics and opportunities

CIEP 550 Seminar Educational & School Psychology (3 Credit Hours)
This course is an overview of current topics in school and educational psychology with an emphasis given to the development of a plan for a program of scholarly activity.
Outcomes:
Students will write a research proposal as an entry point for a research program in a particular domain

CIEP 556 Seminar: Problem Solving Thinking & Creativity (3 Credit Hours)
This course focuses on the knowledge base related to human problem-solving, thinking and creating through the presentation of a variety of approaches as they relate to instructional design.
Outcomes:
Students will demonstrate an advanced theoretical understanding of current models of human problem-solving, thinking and creativity along with an understanding of how these approaches drive instructional interventions

CIEP 557 Seminar Learning Theory & Teaching (3 Credit Hours)
This course focuses on the analysis of advanced readings in behavioral and cognitive instructional technology.
Outcomes:
Students will have an enhanced ability critically examine the literature in behavioral and cognitive instructional technology

CIEP 558 Seminar Theories of Intelligence (3 Credit Hours)
No course description is available

CIEP 559 Seminar Theories of Learning (3 Credit Hours)
This course connects current learning theories with curriculum development, instruction, and assessment practices in the schools. Candidates examine school-based implications of theory and research in such areas as multiple intelligences, developmental stages, and ethical/moral development. This course is neither a methods course (focused on developing a repertoire of teaching and learning activities) nor an educational psychology course (focused on applying experimental research to instruction). It is a seminar in which students read the work of current theorists and practitioners in human learning and explore how knowledge of current of current research can impact educational decisions and instructional practice.

CIEP 563 Graduate Special Education-Student Teaching (6 Credit Hours)
Student teaching is the culminating experience of the Loyola University Teacher Education Program. This capstone course engages the student in the actual activity of teaching all day, everyday, during the semester. Student teaching gives the prospective teacher the opportunity to meld theory with practice in the actual activity of teaching.
Outcomes:
Students will demonstrate a basic level of competency in all aspects of full-time teaching including but not limited to lesson and curriculum planning, teaching, classroom management, formal and informal assessment, subject matter competency, and differentiated instruction

CIEP 571 School Discipline Workshop: Anti-Racism (0 Credit Hours)
As part of the Restorative Justice course, you must participate in an intensive on-campus weekend seminar on equity, anti-racism, and restorative justice. This seminar offers you the opportunity to network with other professionals and engage in exercises and skills-building related to the core principles and practices of restorative justice.
Outcomes:
Apply the principles of restorative practices to address challenges your school or district is facing; Develop an action plan to implement prevention-oriented alternatives to exclusionary school discipline practices in your respective setting

CIEP 586 Doctoral Internship: School Psychology (1 Credit Hour)
In collaboration with ISPIC and APPIC, the student will complete an advanced doctoral level 12 month supervised internship of 2000 hours.
Outcomes:
Students will follow a prescribed doctoral level internship plan to show advanced competencies as a school psychologist under the direction of a licensed clinical psychologist and certified school psychologist

CIEP 590 School Psychology - Supervision (0 Credit Hours)
The purpose of this course is to provide supervised teaching or field based experiences to SPYCH GRAD students. Students will learn to apply essential skills effectively to serve children in a school based setting.
Outcomes:
Develop specific school-based skills, competencies and points of views needed by professionals in the field of School Psychology

CIEP 600 Dissertation Supervision (1 Credit Hour)
To be registered for while working on an approved dissertation project.

CIEP 605 Master's Study (1 Credit Hour)
To be registered for while preparing a thesis proposal.

CIEP 610 Doctoral Study (1 Credit Hour)
This course can only be taken two times during a doctoral student's career while preparing a dissertation proposal.

CIEP 620 Legal Issues in School Discipline (2 Credit Hours)
The course will address the Constitutional implications of school discipline and the statutory provisions governing student discipline and the administrative hearing process. Students will learn about "zero tolerance" policies, the role that school discipline plays in the "school-to-prison pipeline," and the discriminatory impact of school discipline policies.
Course equivalencies: X-CIEP 620/LAW 683
Outcomes:
Develop a solid understanding of the fundamental legal principles and law that guide school discipline practices in public elementary and secondary schools, including constitutional law, federal and state statutory law and administrative regulations, and case law; Enhance understanding of the policy concerns that have arisen regarding school discipline practices and develop knowledge of alternative approaches

CIEP 625 Restorative Justice in Schools (2 Credit Hours)
This course begins with an immersion experience where students will build relationships with each other and, through experiential exercises and lively discussion, internalize core principles. Throughout the immersion and course, students compare and contrast restorative and retributive justice models, practice proactive and responsive restorative techniques, and identify personal and professional shifts to exemplify a restorative mindset. Specific restorative techniques which students will learn include restorative language, facilitation of a variety of types of circles, restorative dialogue processes, connections between racial and restorative justice, and systems and structures to accommodate restorative practice within school life. Through additional online seminars, students will strengthen their knowledge of the history, theory, research, and practice of Restorative Justice. The culminating focus of the course invites students to apply restorative principles and practices in their own school or district setting.
Outcomes:
Distinguish between restorative and punitive motivations, techniques, strategies, and outcomes; Define a restorative mindset within a trauma framework by explaining the components of repairing harm between individuals and within communities; Plan, facilitate, and reflect on proactive and responsive circles (including those focused on: community building, healing, understanding, peace and mediation, celebration); Plan, facilitate, and reflect on effective restorative conversations; Plan, facilitate, and reflect on generating effective restorative consequences through a restorative conversation; Describe the connection between anti-racism and racial justice with principles of Restorative Justice; Identify systems, structures, and stakeholders to support the implementation of restorative justice principles to achieve school or district wide culture change

Dance (DANC)

Discover, search, courses (p. 2661)!

DANC 111 Ballet I: Introduction to Ballet Theory and Technique (3 Credit Hours)
Ballet I is designed to introduce the concepts and vocabulary of ballet with a focus on developing student's body awareness and control. Students will learn about the art form of ballet in relationship to theatre, music and other forms of dance.
Knowledge Area: Artistic Knowledge and Experience
Course equivalencies: THTR111/DANC111
Outcomes:
Students will improve their posture, flexibility and coordination; They will develop a reference for enjoying ballet performances and create a foundation for further dance training

DANC 121 Modern Dance I: Theories and Techniques (3 Credit Hours)
Modern Dance I is designed to increase student's body awareness, strength, flexibility and musicality. The course studies the technique and theory of Fall and Recovery developed by Doris Humphrey.
Knowledge Area: Artistic Knowledge and Experience
Course equivalencies: THTR121/DANC121
Outcomes:
Students will develop a basic dance technique and be able to describe and demonstrate the differences between modern dance and ballet; They will understand the history of the development of modern dance as a uniquely American art form

DANC 131 Jazz Dance I: Theories and Techniques (3 Credit Hours)
Jazz I is designed to increase the student's body awareness, enjoyment of movement and appreciation of Jazz dance in theatrical productions. May be repeated once for credit.
Knowledge Area: Artistic Knowledge and Experience
Course equivalencies: THTR131/DANC131
Outcomes:
Students will improve their strength, coordination, flexibility and correct posture; They will develop basic skills and vocabulary for performing Jazz movements and a framework to view dance in theatrical productions

DANC 212 Ballet Dance II: Theory and Technique (2 Credit Hours)
Prerequisite Skills: Students should be familiar with the five feet and arm positions and be able to work in 5th position of the feet. Dancers should demonstrate correct alignment of the pelvis and spine in plie and releve and while working at the barre. Dancer must be able to execute correct articulation of the feet and leg in tendu. They should be familiar with basic petite allegro and action of the feet, hips and legs while jumping. This is a continuing ballet class designed to build on established vocabulary and movement fundamentals with emphasis on ballet as a theatrical art form.
This course satisfies the Engaged Learning requirement.
Course equivalencies: THTR212/DANC212
Outcomes:
This class further develops strength, posture, flexibility and coordination; Progressions include more work en relev at the barre, development of leg extensions, single leg jumping and more complex movement combinations; Students will develop awareness of a dancer's role in a ballet production

DANC 213 Ballet III: Advanced Continuing Ballet (2 Credit Hours)
Pre-requisite skills: Student must demonstrate correct alignment and articulation at the barre and in the center when standing in first or fifth position. Student should have introductory proficiency in pirouettes en dehors and en dedans as well as petit allegro. This course serves students who have achieved proficiency in the basic elements of Continuing Ballet, but need to develop skills to meet the Intermediate level. Course focuses on reinforcing foundational technique in alignment and articulation and provides opportunities to develop strength, coordination and vocabulary required to advance to 311 Intermediate Ballet.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will increase their awareness of overall dance alignment and articulation; They will develop strength, coordination and vocabulary preparing them for Intermediate Ballet; Students will enhance their ability to travel across the floor as well as conduct pirouettes; Adagio work in the center and grand allegro is introduced

DANC 222 Modern Dance II: Theory and Technique (2 Credit Hours)
Prerequisite Skills: Dancers should be able to maintain correct alignment of the legs, back and pelvis standing and shifting their weight. Must be familiar with 1st and 2nd position of the legs and demonstrate basic articulation of the legs in tendu and jumping. This course is designed to further increase student's body awareness, strength, flexibility and musicality. We will study the technique and theory of Fall and Recovery developed by Doris Humphrey as well as learn short excerpts of repertory to be analyzed. May be repeated once for credit.
This course satisfies the Engaged Learning requirement.
Course equivalencies: THTR222/DANC222
Outcomes:
Students will further develop their modern dance technique and be able to execute more physically challenging falls and longer and more complex movement combinations

DANC 224 Majors Modern II (1 Credit Hour)
This course is designed for Dance majors to increase their body awareness, strength, flexibility and musicality through the study the technique and theory of Fall and Recovery developed by Doris Humphrey. Restricted to Dance Majors.
Outcomes:
Students will develop their modern dance technique including falls and longer and more complex movement combinations; They will further their understanding of spatial patterns and musicality

DANC 232 Jazz Dance II: Theories and Techniques (2 Credit Hours)
Prerequisite Skills: Dancers should demonstrate correct placement of the legs, back and pelvis standing and in plié. They should be able to demonstrate basic jazz turns, jazz runs and pas de bourée. Dancers need to use correct position and opposition of the arms in combinations. Jazz II is designed to further develop student's technical ability and awareness of Jazz dance in theatrical productions. Students will learn about professional Jazz dance in Chicago and improve their strength, coordination, flexibility and correct posture in increasingly complex combinations applying the vocabulary and principles of jazz dance. May be repeated once for credit.
This course satisfies the Engaged Learning requirement.
Course equivalencies: THTR232/DANC232
Outcomes:
Students will improve their dance technique, performance skills and appreciation of Chicago's rich tradition of Jazz dance performance

DANC 240 Dance Practicum (1 Credit Hour)
Pre-requisites: THTR 253
Students apply stagecraft for dance in a variety of domains: costuming, lighting, electrics and sound. They will work as running crew for a mainstage dance production.
Outcomes:
Students will acquire a variety of skills necessary for producing dance; including collaboration and organization skills and will gain appreciation for the complexity dance production

DANC 250 Historical Contexts in Contemporary Dance Practice (3 Credit Hours)
Pre-requisites: Must be a Dance major or Dance minor
This course surveys historical flashpoints in the evolution of American contemporary dance. It provides a critical framework for interrogating cultural and sociopolitical influences on concert dance practice and performance. Students will analyze intersecting aesthetics originating from the French courts of Catherine de Medici and Louis XIV, the Atlantic slave trade and Asian theatrical dance forms such as kabuki and bharatanatyam in the development of ballet, modern, tap, jazz and musical theater dance.
Outcomes:
Students will be able to identify historical figures and events that have significantly influenced American theatrical dance; This course gives students the ability describe and interpret dance history by contextualizing sociopolitical and cultural influences on the evolution of dance aesthetics while applying critical race, queer and feminist theoretical frameworks to their understanding of contemporary dance in America

DANC 260 Topics in Dance (2 Credit Hours)
This course is a studio course that explores the theories and techniques of various dance forms. A specific dance genre will be selected each time the course is offered. The course may be repeated two times for credit.
Outcomes:
The student will gain a historical perspective on the dance form presented, as well as demonstrate specific skills required of the dance form

DANC 261 Topics in Applied Dance (1-2 Credit Hours)
This is an all-inclusive heading for courses rarely offered that serve under the Applied Technique designation for the Dance Minor.
Outcomes:
Each offering will provide discipline-specific vocabulary and applied skill acquisition

DANC 270 Dance Kinesiology (3 Credit Hours)
Pre-requisites: Must be an enrolled Dance Major or Dance Minor
The purpose of this class is to present dancers with basic knowledge of the anatomy, physiology, and biomechanics of human movement in dance and non-dance applications.
Outcomes:
Students participate in lecture, physical practice, group and individual projects to understand the mechanisms for dance movement and how movement patterns contribute to the presence or absence of dance injuries

DANC 275 Global Influences on Contemporary Dance Practice (2 Credit Hours)
Pre-requisites: Must be Dance Major or Dance Minor or have instructor approval
This seminar-styled course provides essential experience and knowledge through applied study of diverse lenses and movement styles contributing to contemporary dance practice.
Outcomes:
Identify, Demonstrate and Discuss non-western influences on contemporary dance choreography and practice

DANC 280 Dance & Disability: Interdisciplinary Theory & Applied Movement Practices (3 Credit Hours)
This course explores interdisciplinary theory and applied innovation at the intersection of movement, science, and community engagement.
Outcomes:
Students will demonstrate a working knowledge of best interdisciplinary practices in disability dance practices, and will develop strategies that address the physical, social, and cultural implications of physically integrated dance in multiple settings

DANC 312 Pointe I: Theory and Techniques (1 Credit Hour)
Co-requisites: DANC 213 or 341
This course is practice-oriented and builds on dancers' knowledge of ballet vocabulary, alignment, and strength. Pointework is geared towards the development of a higher level of articulation in classical footwork.
Outcomes:
The student will gain a deeper understanding of ballet technique en pointe, as well as demonstrate specific skills required of the dance form

DANC 314 Pointe II: Continuing Pointework (1 Credit Hour)
This is a studio class that explores ballet technique en pointe. This course is to be taken concurrently with DANC 213 Ballet III, DANC 341 Ballet IV, or DANC 343 Ballet V. This course explores continuing ballet technique en pointe. It requires students to apply and synthesize all aspects of pointework studies including technique, spatial awareness, dynamics and group forms by preparing and presenting a public performance. It must be taken concurrently with Ballet III, Ballet IV or Ballet V. May be taken 8 times for credit.
Outcomes:
Students gain a deeper understanding of pointe technique, as well as demonstrate specific advanced skills required of the dance form; Students apply and synthesize material in a public performance

DANC 323 Rehearsal and Performance (1 Credit Hour)
Pre-requisites: Permission of the department
Dancing, choreographing, or stage managing, in a campus production. Completion of a journal or paper is required. May be repeated up to 12 times.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will gain performance experience, assess personal artistic growth, and reflect on application of performance theory and technique into production practice

DANC 324 Modern III: Theory and Techniques (1 Credit Hour)
This studio course develops core strength, coordination and musical, spatial and performance skills through the study the technique and theory developed by Martha Graham as well as contemporary dance practices.
Outcomes:
Dancers will improve coordination, phrasing, physical power, shift of weight, anatomical awareness, performance, projection, flexibility and placement

DANC 331 Jazz Dance III: Intermediate Jazz Dance Theories and Techniques (2 Credit Hours)
Pre-requisites: Permission of the Instructor
This course develops students' ability to execute Jazz dance technique at an intermediate level. Students improve their dance technique, dynamic, spatial and performance skills. Students apply and synthesize all aspects of jazz dance technique in public performance. This course may be taken six times for credit.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students improve core strength, coordination, flexibility and correct posture at the intermediate level, in increasingly complex combinations applying and synthesizing all concepts and technique in public performance

DANC 341 Ballet IV: Anatomical Foundations and Cultural Context (1 Credit Hour)
This applied studio technique course emphasizes contemporary scientific anatomical research and cultural context in the study of ballet. Course skills and concepts are applied and synthesized through presentation of a public performance.
Outcomes:
Students will improve strength, alignment, and ensemble skills, develop knowledge and apply anatomical principles, connect the study of ballet to cultural and artistic context

DANC 343 Ballet V: Advancing Ballet: Contemporary Methodologies in Applied Ballet (1 Credit Hour)
This applied studio technique course emphasizes contemporary best practices in the study of Ballet in performance and theory in order to advance artistic and technical proficiency. Course skills and concepts are applied and synthesized through presentation of a public performance.
Outcomes:
Students will improve strength, alignment, and ensemble skills, develop knowledge of universal dance principles and advance their proficiency in contemporary ballet practice; Course skills and concepts are applied and synthesized through presentation of a public performance

DANC 360 Dance Pedagogy (3 Credit Hours)
Pre-requisites: Dance major or dance minor
The study child development, sequential dance pedagogy, biomechanics, nutrition and classroom management techniques as it relates to the teaching of dance. Coursework includes lecture, readings, model teaching, and research. Students observe master teachers instructing children of all ages and create sequential lesson plans consisting of all elements of dance pedagogy.
Outcomes:
Students will demonstrate a working knowledge of child development in relationship to age-appropriate dance skills as well as behavioral expectations; They will develop strategies that address the sequences of skill acquisition as well as concrete strategies for classroom management

DANC 370 Dance Composition (3 Credit Hours)
Pre-requisites: Must be a Dance Major or Dance Minor to enroll; Placement in Level III or higher dance technique courses; Permission of the department required
This course takes students from an introduction to dance composition theory and techniques through the process of creating a group work for the stage. Course work includes lecture, discussion, selected readings, viewing of masterworks of dance composition, creation of several dance studies on various themes and culminates in the creation of a work for performance in the Student Choreographic Showcase.
This course satisfies the Engaged Learning requirement.
Outcomes:
Through the development of short dance students learn the principles of dance composition and then apply them to their own creation performed for a public audience

DANC 380 Senior Showcase Capstone (1 Credit Hour)
Restricted to Senior Dance Majors. This course serves as the capstone of the Dance major and creates a platform for dancers to apply technical skills, theory and practice from many required courses for the Bachelor of Arts including DANC 341/DANC 343 Majors Ballet, DANC 321 Majors Modern, DANC 323 Rehearsal and Performance and DANC 370 Dance Composition.
Outcomes:
Dance majors will apply and synthesize all applied technique courses taken for their dance majors as well as integrate their knowledge of the choreographic and performance process

DANC 394 Internship in Dance (1-12 Credit Hours)
Dance students complete a semester long internship providing an opportunity to use their technical, research or organizations skills in a professional setting. Students must complete and reflect upon 50 hours of internship experience per credit hour that is pre-approved by the Department of Fine and Performing Arts. Department permission is required.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students gain professional experience working at a dance organization while reflecting on their work experience and applying theories and techniques acquired from their first dance courses

DANC 395 Independent Study (1-12 Credit Hours)
Pre-requisites: Written permission of chairperson
Independent study projects may be of various kinds and in any recognized area of the dance. Such projects should be done under the close supervision of a dance faculty member.
Outcomes:
To be determined by the student in consultation with the chairperson and dance faculty supervisor

DANC 397 Fieldwork in Chicago - Dance (1-12 Credit Hours)
Variable credit (1-6 hours) given for performances or projects undertaken with professional dance organizations outside the university. Students keep a journal and write evaluative papers. Permission of the Department of Fine and Performing Arts Required. Repeatable for up to 6 credit hours, however no more than 6 credit hours of Internship or Fieldwork can be applied to the major.
This course satisfies the Engaged Learning requirement.
Outcomes:
Specific outcomes and credit hours assigned to be determined by the student in consultation with the Director of Dance and the project supervisor

DANC 398 Research in Dance (1-12 Credit Hours)
Pre-requisites: DANC 323
Faculty serve as mentors for dance students pursuing research opportunities. Platforms cross various domains in cognitive, psychomotor, and artistic development. Students and faculty work together to generate qualitative and quantitative data documented in multiple modalities including: dancemaking, regression analyses, interviews, correlational and case studies. This course satisfies the Engaged Learning-Undergraduate Research requirement.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will learn discipline-specific language skills, research ethics and methodologies; Students will gain valuable skills disseminating research through performances, scholarly articles, conference presentations and research symposia

Data Science (DSCI)

Discover, search, courses (p. 2661)!

DSCI 101 Fundamentals of Modern Data Science with R (3 Credit Hours)
This course is designed to be an introduction to the basics of data science with R. Students will learn the very basics of data science and introductory programming skills for working with data.
Outcomes:
Students will learn basic programming skills for working with different types of data as well as data visualization, data wrangling, and data management practices

DSCI 399 Data Science Internship (1-3 Credit Hours)
Pre-requisites: DSCI internship coordinator and DSCI program director consent required
This course provides data science students with an opportunity to apply the knowledge obtained through their previous coursework as well as obtain course credits by working on data science projects through paid or unpaid internships. All projects for this course must be accompanied by a written form to be filled out by the student and their internship supervisor, and approved by the data science internship coordinator (DSIC). Students will receive 1 credit hour for every 50 hours worked at the approved internship for a maximum of 3 credit hours. Students taking this course will fulfill their data science capstone requirement.
This course satisfies the Engaged Learning requirement.
Outcomes:
The ability to manage large data sets in preparation for data science analysis; The ability to perform a data science analysis from beginning to end while adhering to the principles of reproducible research; The ability to program in both the R and Python programming languages

DSCI 401 Introduction to Data Science (4 Credit Hours)
Pre-requisites: Restricted to Graduate students
This course provides students with an introduction to data science using the R programming language covering such topics as data wrangling, data visualization, interacting with databases, principles of reproducible research, building simple statistical models/machine learning and data science ethics.
Outcomes:
Students will obtain an extensive background in the basic tools used in the field

DSCI 470 Data Science Consulting (2 Credit Hours)
Pre-requisites: STAT 408
Students will work on a research project with a client acting as a consultant on the statistical and computational aspects of the project. Students are required to meet with a client, develop a strategy for addressing their problem, and present their results to the client (and their classmates).
Outcomes:
Students will apply methods learned in prior classes to address a real-world problem, gain oral and written presentation skills, and improve collaboration skills

DSCI 494 Data Science Research Design (2 Credit Hours)
Restricted to DSCI Graduate students. Research practices, including data collection and management, the experimental design process, and tools for critical analysis and preparation of scientific literature will be discussed.
Outcomes:
Students can describe and implement research design practices in data science

DSCI 499 Data Science Research (1-8 Credit Hours)
Restricted to DSCI Graduate students. Students will conduct independent hypothesis-driven data science research under faculty guidance. Research efforts will include literature surveys, research design, algorithm and software development, and data analysis.
Outcomes:
Students can develop and utilize techniques for data science research

DSCI 595 Thesis Supervision (1 Credit Hour)
Pre-requisites: DSCI 499
Research under faculty guidance including training in scientific writing and the production of a thesis and research presentation.
Outcomes:
Students will develop skills in scientific writing and presentation; At the conclusion, students will present (written and oral) the results of their research

Digital Humanities (DIGH)

Discover, search, courses (p. 2661)!

DIGH 400 Introduction to Digital Humanities Research (3 Credit Hours)
Enrollment in DIGH 400 is the prerequisite for DIGH 401, 402, 500, 595. An introduction to the digital humanities, work in a variety of humanities disciplines--literature, art, philosophy, theology, and history--that involves computer assistance in conducting or presenting research. This includes, for example, digitizing, markup, editing, publishing, archiving, analyzing, visualization, modeling, interpretive gaming, and instructional and interface design. This course will emphasize research questions and methods from a range of humanities disciplines--not computer technology per se but ways that computing can further humanities research agendas.
Outcomes:
Knowledge of how computing affects research in humanities, critical thinking about technology and humanities, awareness of broad social and ethical questions surrounding old and new, print and digital, media in contemporary culture

DIGH 401 Introduction to Computing (3 Credit Hours)
Pre-requisites: DIGH 400 co-enrollment
Primarily for DH students, the course combines historical study with a hands-on approach to computers their growing role in academic research, publishing, libraries, and the arts. Topics will include the structure of computers, the relation of hardware and software, text and image markup and publishing, database theory and design, modeling and visualization, text analytics, procedural logic, and the basic concepts of programming, artificial intelligence, and the social, ethical, and intellectual contexts for computing.
Outcomes:
Procedural literacy, historical knowledge of hardware and software platforms, ability to be a scholar-programmer or to collaborate fruitfully with scholar-programmers

DIGH 402 Digital Humanities Design (3 Credit Hours)
Introduces students to design and human computer interaction.
Outcomes:
Students gain practical experience with design, testing, and building ethical digital projects

DIGH 403 Introduction to Web Application Development (3 Credit Hours)
Pre-requisites: DIGH 400, DIGH 401, DIGH 402
This course studies the concepts, methods, and tools used in the analysis, design, implementation, testing, and deployment of typical multi-tier web applications.
Course equivalencies: X- DIGH403/CPST342/COMP342
Outcomes:
Experience with commonly used web application development frameworks

DIGH 405 Special Topics in Digital Humanities (3 Credit Hours)
Special topics in Digital Humanities or new approaches of current interest to the instructor.
Outcomes:
Dependent upon course topic; must be approved by GPD

DIGH 499 Independent Study in Digital Humanities (1-3 Credit Hours)
Students work under the direction of a faculty member on a particular area of interest within Digital Humanities.
Outcomes:
Students advances their research projects with direct and regular input from a faculty member

DIGH 500 Digital Humanities Practicum (3 Credit Hours)
Pre-requisites: DIGH 400 and DIGH 402
This course invites students to learn about and engage in collaborative project-building. Students will contribute to building an active faculty-led digital humanities research project. Work will be informed by weekly readings and seminar-style discussions. Possible work may include coding, data modeling, digitization, proposal-writing, grant-writing, project management, design, and research.
Outcomes:
A collaborative contribution to a digital humanities research project run by a faculty or staff member and sponsored by the CTSDH

DIGH 501 Digital Humanities Project (3 Credit Hours)
Pre-requisites: DIGH 400 and DIGH 402
In this capstone, students will apply skills they've learned throughout the program, and develop new technological and research skills as the project demands. Students will develop their own digital humanities research project that demonstrates their competency in a facet of digital humanities and expertise within their chosen subject area.
Outcomes:
A working, practical final digital humanities project published online

DIGH 605 Master's Study (1 Credit Hour)
Students register for this course to maintain active enrollment in the Graduate School during the fall or spring semesters if they are not registered for any graduate class at the master's level while finishing up any MA requirements, such as their field examinations and research project.
Outcomes:
Advancement to degree completion

Doctor of Nursing Practice (DNP)

Discover, search, courses (p. 2661)!

DNP 510 Capstone Seminar (1-3 Credit Hours)
The DNP scholarly project demonstrates an in-depth knowledge of each student's area of specialization in nursing practice. This project relates to advanced practice in the nursing specialty and benefits a group, population, or community rather than an individual patient. The DNP Scholarly project is a synthesis of the student's work and lays the groundwork for future scholarship with the goal of a tangible and deliverable academic product derived from the practice courses and immersion experience. The DNP scholarly project, unlike that of PhD level research, may take a number of forms such as: practice change initiative; pilot study; program evaluation; quality improvement project; evaluation of a new practice model; or a consulting project. This course addresses the unique needs and challenges second year DNP students face while completing their projects. Seminar content focuses on skills necessary for successful clinical project completion through: presentations, selected readings and online forums. The seminar operates at the group level and is designed to work in concert with and support individual students' DNP Faculty Director and external mentor (often the student's preceptor at the project site). Course content parallels the three overall stages of a DNP Scholarly Project: the design, proposal submission and proposal approval (First semester); project implementation (second semester); and, final presentation and dissemination (third semester). Students are expected to have a Faculty Director for their project and a tentative external mentor in place prior to course entry. This seminar is completed sequentially over a minimum of three semesters. Students are expected to be enrolled in this course each semester that they are working on the DNP Scholarly Project.

DNP 511 Practicum (1-6 Credit Hours)
Theory, evidence, and the systematic translation of research into practice serve as the foci for DNP practicum experiences across the program of study. Students investigate clinical problems and refine their clinical translational capabilities within the context of the broader health care system. Clinical learning is directed toward systematic application of knowledge and scientific discovery in resolving new or persistent problems affecting the safety and quality of patient care. Mentored clinical application of evidence-based knowledge and skills, as well as independent investigation and evaluation of outcomes, supports integration of the DNP role into the complex circumstances of contemporary nursing practice. Leadership, consultation, advocacy, fiscal accountability and interdisciplinary collaboration serve as core competencies to effect organizational change.

Economics (ECON)

Discover, search, courses (p. 2661)!

ECON 201 Principles of Microeconomics (3 Credit Hours)
Pre-requisites: ANTH 100, PLSC 102, SOCL 101, WSGS 101, or equivalent; please check requirements for declared majors/minors for exceptions
This course is an introduction to demand and supply, consumer choice, price analysis in alternative industrial organizations, and the distribution of income.
Knowledge Area: Tier 2 Societal Knowledge
Course equivalencies: ECON201/201H/ACECO201/CPST243
Outcomes:
Students will be able to think critically about price formation in different market structures, and how prices, household incomes and income distribution in a diverse society are determined with interpretations based on the concepts of opportunity costs and decision making under uncertainty

ECON 201H Principles of Microeconomics - Honors (3 Credit Hours)
Requirement: ANTH 100, PLSC 102, PSYC 100 or SOCL 101 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of Anthropology, Department of Criminal Justice, Department of Economics, Department of Psychology, Department of Political Science, the Department of Sociology, Human Services or the School of Nursing. Restricted to SBA honors students or Honors students. This course is an introduction to demand and supply, consumer choice, price analysis in alternative industrial organizations, and the distribution of income.
Knowledge Area: Tier 2 Societal Knowledge
Course equivalencies: ECON201/201H/ACECO201/CPST243
Outcomes:
Students will be able to think critically about price formation in different market structures, and how prices, household incomes and income distribution in a diverse society are determined with interpretations based on the concepts of opportunity costs and decision making under uncertainty

ECON 202 Principles of Macroeconomics (3 Credit Hours)
Pre-requisites: ANTH 100, PLSC 102, SOCL 101, WSGS 101, or equivalent; please check requirements for declared majors/minors for exceptions
This course is an introduction to national product, its components, money and the real sectors and business fluctuations.
Knowledge Area: Tier 2 Societal Knowledge
Course equivalencies: ECON202/ECON202H/ACECO202/245
Outcomes:
The students will be able to think critically about the economic environment of the nation and to measure growth, unemployment, inflation, fiscal and monetary policies of the government, to ultimately understand economic stability and the welfare of the individual citizen

ECON 202H Principles of Macroeconomics - Honors (3 Credit Hours)
Pre-requisites: Restricted to students in the School of Business Honors program
This course is an introduction to national product, its components, money and the real sectors and business fluctuations.
Course equivalencies: ECON202/ECON202H/ACECO202/245
Outcomes:
The students will be able to think critically about the economic environment of the nation and to measure growth, unemployment, inflation, and fiscal and monetary policies of the government to ultimately understand economic stability and the welfare of the individual citizen

ECON 303 Intermediate Microeconomics (3 Credit Hours)
Pre-requisites: Sophomore standing; minimum grade of C- in (ECON 201 or ECON 201H) and (ECON 202 or ECON 202H) and one of the following: MATH 130 (Recommended), MATH 131, or MATH 161
This course is a detailed study of consumer and firm behavior, market structures, and the elementary propositions concerning welfare economics.
Outcomes:
Students will develop analytical skills to understand and predict consumer and firm behavior, understand the underlying pinning of antitrust legislation and dynamic market strategies

ECON 304 Intermediate Macroeconomics (3 Credit Hours)
Pre-requisites: Sophomore standing; minimum grade of C- in (ECON 201 or ECON 201H) and (ECON 202 or ECON 202H) and one of the following: MATH 130 (Recommended), MATH 131, or MATH 161
This course develops the framework used by economists in government, business, and academia to analyze the key determinants of economic growth, the business cycle, unemployment, inflation, the level of interest, and exchange rates, as well as explaining how all these variables are influenced by monetary and fiscal policy.
Outcomes:
Students are able to understand and critically analyze business cycles and financial market fluctuations; Students are able to study inflation and unemployment policies

ECON 320 Urban Economics (3 Credit Hours)
Pre-requisites: Sophomore standing; minimum grade of "C-" in ECON 201, ECON 202, and ECON 303
This course analyzes the economic role and functioning of cities and examines urban issues such as real estate markets, transportation, economic development, and crime.
Interdisciplinary Option: Urban Studies
Outcomes:
Students will understand the economic forces that shape urban agglomerations; Students will understand the economic and ethical trade-offs of various urban economic policies; Students will be able to think critically about the economic forces that make a city grow and contract over time

ECON 323 International Economics (3 Credit Hours)
Pre-requisites: Sophomore standing, minimum grade of "C-" in ECON 201 and 202
This course analyzes microeconomic and macroeconomic theories of global trade; balance of payments, adjustment problems and the international monetary system.
Interdisciplinary Option: Global Studies, International Business
Course equivalencies: X-ECON323/INTS323
Outcomes:
Students will be able to demonstrate the ability to critically apply microeconomic and macroeconomic concepts to the understanding of international economic phenomena/problems; This course emphasizes the role of economic leadership to promote peace and justice in a global diverse world

ECON 324 International Monetary Relations (3 Credit Hours)
Pre-requisites: Sophomore standing, minimum grade of "C-" in ECON 201 and 202
Examination of the operation of the international monetary system and an analysis of the determination of currency flows between countries, with topics of balance of payments statements, currency flows between countries, determination of exchange rates, and international liquidity problems.
Interdisciplinary Option: Global Studies, International Business
Course equivalencies: X-ECON324/INTS324
Outcomes:
Student will be able to demonstrate an understanding of the operation of the international currency market and be able to analyze exchange rates with an emphasis on international liquidity and currency problems, and risk management of currency fluctuations

ECON 325 Economics of Growth & Development (3 Credit Hours)
Pre-requisites: Sophomore standing, minimum grade of "C-" in ECON 201 and 202
This course describes and analyzes the problems and policy issues facing developing countries and the third world with respect to their economic and social policies and programs.
Interdisciplinary Option: Global Studies, International Business
Course equivalencies: X-ECON325/INTS325
Outcomes:
The students are trained to evaluate the economic conditions that are conducive to economic growth and critically assess ethical arguments as they relate to growth, trade, and poverty in emerging countries; The role of leadership is emphasized

ECON 327 American Economic & Business History (3 Credit Hours)
Pre-requisites: Sophomore standing, minimum grade of "C-" in ECON 201 and 202
This course emphasizes the evolution and the role of past business leaders of the American economy from the colonial times to the present, emphasizing the entrepreneurs and the environments in which they operated. Economic and business change in the period 1865-1914 receives particular attention, as do the enterprises of Chicago-area entrepreneurs.
Outcomes:
Students learn the skills required of entrepreneurs and business leaders and their contribution to society; Students will develop an awareness of the historical dynamics that produced the current economy, and how its institutions evolved and the importance of markets in allocating resources

ECON 328 Environmental Economics (3 Credit Hours)
Pre-requisites: Sophomore standing, minimum grade of "C-" in ECON 201
This course applies economic theory to environmental and natural resource problems and policies, investigates the role economic incentives play, and discusses externalities, property rights, common property problems, pollution and pollution control, and renewable and non-renewable resource management.
Course equivalencies: X-ECON328/ESP 328
Outcomes:
Students will understand that environmental problems are fundamentally economic problems that come about because there is a market failure (eg, an externality or public good) and that environmental problems have economic solutions

ECON 329 Health Economics (3 Credit Hours)
Pre-requisites: Sophomore standing and a minimum grade of "C-" in ECON 201
This course provides an understanding of the unique economic complexities of the health care industry and individual health behaviors. Relying on economic principles of scarcity, efficiency, productivity, and market behavior, demand and supply of health care, the role of government in determining health care policy, and medical practices are explored.

ECON 334 Economics of Government Expenditures & Taxation (3 Credit Hours)
Pre-requisites: Sophomore standing, minimum grade of "C-" in ECON 303 and 304
This course is an analysis of taxation and expenditure, instruments and policies as they relate to the allocative, distributive, and stabilization functions of government and society and ethical responsibilities of each.
Outcomes:
The student are able to understand and analyze public policy issues, specifically as it relates to the voting process, size of government, tax policy debates, and long-term problems of transfer payments in an aging society

ECON 336 Monetary and Fiscal Policy (3 Credit Hours)
Pre-requisites: Sophomore standing, minimum grade of "C-" in ECON 201, 202 and 304
This course uses macroeconomics to critically analyze the evolution of monetary and fiscal policy from the late 19th century to the present as well as current trends and topics relating to monetary and fiscal policy.
Outcomes:
Students will develop critical economic thinking skills as they apply macroeconomic theory to historical events and discuss the potential future paths of the world economy and for assessing the leadership role of the government and Federal Reserve System in stabilizing the domestic and world economy

ECON 346 Econometrics (3 Credit Hours)
Pre-requisites: Sophomore standing; minimum grade of "C-" in ISSCM 241 or ISSCM 241H or STAT 103; ECON 202; ECON 303; and MATH 130 or MATH 131 or MATH 161
This course teaches students how to use statistical tools to evaluate hypotheses about economic models.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to interpret and critically analyze quantitative information related to economics; Students will understand regression analysis and understand how to use it to test economic models and to measure important economic parameters, and to predict economic relationships

ECON 360 Labor Economics (3 Credit Hours)
Pre-requisites: Sophomore standing, minimum grade of "C-" in ECON 303
This course is an intensive examination of the market for labor services, and discusses wage determination, occupational and earnings differentials, diversity, investments in education, collective bargaining, and the ethical implications of labor market inequality.
Outcomes:
Students will gain a broad understanding of how economists study labor market issues and outcomes, and be able to use critical economic reasoning to better appreciate such issues as labor force participation decisions, human capital, and the variation in wages across individuals

ECON 370 Pricing & Industrial Organization (3 Credit Hours)
Pre-requisites: Sophomore standing, minimum grade of "C-" in ECON 303
This course investigates firm behavior, strategies and market outcomes in settings of less than perfect competition.
Outcomes:
Students learn to evaluate various strategies both in terms of firm profitability as well as consumer surplus

ECON 395 Independent Study in Economics (1-3 Credit Hours)
Pre-requisites: Sophomore standing, instructor and dean permission required
Student will conduct in-depth research or reading, initiated by the student and jointly developed with a faculty member, into a specialized area of Economics not otherwise covered by department course offerings.
Outcomes:
Students will be able to demonstrate in-depth understanding of a specialized area or topic in Economics

ECON 399 Special Topics in Economics (1-3 Credit Hours)
Pre-requisites: Sophomore standing
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

ECON 420 Managerial Economics (3 Credit Hours)
Pre-requisites: ISSCM 400 OR ISSCM 400N
This course uses tools of economic analysis to understand demand, supply, profits, production, competition, pricing policies, business criteria for investment, output, and marketing decisions.
Outcomes:
Students are able to do critical managerial decisions with respect to output and pricing policies in different business and industrial environments

ECON 420B Managerial Economics (3 Credit Hours)
Pre-requisites: ISSCM 400 or ISSCM 400N
This course uses tools of economic analysis to understand demand, supply, profits, production, competition, pricing policies, business criteria for investment, output, and marketing decisions. Restricted to students in the Baumhart Scholars Program.
Outcomes:
Students are able to do critical managerial decisions with respect to output and pricing policies in different business and industrial environments

ECON 420C Managerial Economics (3 Credit Hours)
Pre-requisites: Enrollment is restricted to students in the Healthcare Management MBA Program
This course uses tools of economic analysis to understand demand, supply, profits, production, competition, pricing policies, business criteria for investment, output, and marketing decisions.
Outcomes:
Students are able to do critical managerial decisions with respect to output and pricing policies in different business and industrial environments

ECON 420E Managers, Markets and Decision Making (3 Credit Hours)
Pre-requisites: Restricted to the students in the Executive MBA program
The purpose of this course is to guide students in recognizing, analyzing, and solving managerial problems related to firms and markets under conditions of uncertainty. The course uses economic analysis to understand demand, supply, profit, production, competition, pricing policies, and business criteria for investments. Strategic decisions using economic laws influenced by FED will also be examined.

ECON 421 Business Fluctuations (3 Credit Hours)
Pre-requisites: ECON 420
This course studies the economic environment's impact on the firm where topics include national income accounting, factors in economic fluctuations and growth, fiscal and monetary policies, economic forecasting, the relationship of foreign trade and balance of payments on economic activities, economic indicators and measures, and problems of public policy.
Outcomes:
Students learn to recognize the macro environment and the business cycles in which to operate in and to make learned forecasts

ECON 424 International Business Economics (3 Credit Hours)
Pre-requisites: ECON 420
This course analyzes topics in international economics, specialization and comparative advantage, balance of payments and foreign exchange, elements of commercial policy, and international investment.
Outcomes:
The students develop skills in this course in analytical and creative thinking, Communication and team-work in evaluating trade policies and opportunities, comparative advantage, exchange rate dynamics and fluctuations and risk management

ECON 424E Global Issues in Economics (1.5 Credit Hours)
Pre-requisites: Restricted to the students in the Executive MBA program
Examines the role of prices, incomes, interest rates, exchange rates, trade policy, and the global monetary system in determining the movement of outputs and inputs across national boundaries. The gains from trade and the conflicts created by the manner in which those gains are distributed provide a foundation for examining current issues.
Course equivalencies: ECON 424E/ECON 602E

ECON 429 Independent Study in Business Economics (3 Credit Hours)
Student will conduct in-depth research or reading, initiated by the student and jointly developed with a faculty member, into a specialized area of economics not otherwise covered by department course offerings.
Outcomes:
Students will be able to demonstrate in-depth understanding of a specialized area or topic in economics

ECON 522 Game Theory & Strategy (3 Credit Hours)
Pre-requisites: ECON 420
This course studies cooperative and non-cooperative games and winning strategies and discusses prisoners dilemma, tragedies of common resources, executive compensation and auctions as applied to mergers and acquisitions.
Outcomes:
Students learn to think systematically to set strategy for the modern corporate firm in both cooperative and non-cooperative situations and to solve conflicts arising from principal agent problems

ECON 599 Special Topics (3 Credit Hours)
Pre-requisites: ECON 420; Restricted to Graduate School of Business students
Scheduled classes are offered on an ad hoc basis. Specific titles, prerequisites and content will vary.
Outcomes:
Students will be able to demonstrate understanding of specialized topics not otherwise covered by department regular course offerings

ECON 602E Global Issues in Economics (1.5 Credit Hours)
Examines the role of prices, incomes, interest rates, exchange rates, trade policy, and the global monetary system in determining the movement of outputs and inputs across national boundaries. The gains from trade and the conflicts created by the manner in which those gains are distributed provide a foundation for examining current issues.
Course equivalencies: ECON 424E/ECON 602E

ECON 622 Derivative Securities (3 Credit Hours)
Pre-requisites: FINC 450
This course is a comprehensive introduction to the theory, use, and valuation of derivative securities, with particular emphasis on options and forward/futures contracts. A sound understanding of the intuition underlying option pricing is critical to a thorough understanding of modern finance and financial risk management. We may also look at other types of derivatives as well as some extensions of the most fundamental models.

ECON 625 Applied Econometrics (3 Credit Hours)
Pre-requisites: ECON 420 and ISSCM 491
The purpose of this course is to help students understand feasible econometric techniques in order to mine information to understand economic and financial patterns and to forecast. A rigorous exposition of the theory behind econometric techniques will help students understand the issues raised in different published papers. Topics of econometric techniques covered in this course include panel data analysis, time-series models, discrete choice models, and methods to identify causality between variables. Practical applications will prepare students to use these methods in their own projects.
Course equivalencies: X-ECON625/FINC625

Educational Leadership and Policy Studies (ELPS)

Discover, search, courses (p. 2661)!

ELPS 125 Introduction to Leadership Studies (3 Credit Hours)
This course is designed to provide an introduction to foundational theory and perspectives related to leadership. This includes an exploration of contemporary leadership knowledge and skills that are transferable to a variety of disciplinary contexts.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students will be able to describe various historical and contemporary perspectives on leadership as well as recognize critical knowledge and skills associated with leadership practice across various disciplines

ELPS 219 History of American Education (3 Credit Hours)
Pre-requisites: HIST 101 or HIST 102
No requirement for students with a declared major or minor in History. This course examines the history, aims, organization, and control of public and private schools in the United States. Emphasis is placed on the historical examination of issues of diversity, inclusion and exclusion as they relate to education.
Outcomes:
Students will demonstrate the ability to evaluate and explain the forces of historical continuity and change in American education

ELPS 222 Foundations of Ethics and Social Justice in Leadership (3 Credit Hours)
Pre-requisites: ELPS 125
This course introduces theories of ethics and social justice as critical frameworks through which to interpret leadership. Attention toward the process of ethical decision-making, using critical reflection as a tool for understanding complex leadership issues, and strategies for advancing leadership focused on social responsibility.
Outcomes:
Students will demonstrate competence in applying ethical and social justice frameworks in the interpretation and analysis of complex leadership issues as well as in the practice of leadership across a variety of disciplines

ELPS 223 Contextual Influences in Applied Leadership: Internship (3 Credit Hours)
Pre-requisites: ELPS 125 and ELPS 222; Leadership Minor
This online and experiential course provides a platform for students to apply learning associated with leadership theory, ethics, and social justice in practice through an applied internship experience. The internship site will provide a discipline specific experience through which to integrate and refine core skills and competencies associated with socially responsible leadership.
Outcomes:
Students will increase their capacity to engage effectively in socially responsible leadership in a discipline specific work context

ELPS 224 Cross Cultural Leadership: Lessons from Rome (3 Credit Hours)
Pre-requisites: ELPS 125
This course is designed to examine global and cultural influences on the manifestation of leadership using Rome as a historical and contextual reference point and learning laboratory. The course will examine cultural influences in the understanding of power, authority, and social justice as they relate to leadership and the development of cross-cultural competence.
Outcomes:
Students will be able to identify and describe cultural and global influences associated with power, authority, and social justice on leadership in social contexts

ELPS 230 Globalization, Education and Childhood (3 Credit Hours)
This course examines contemporary global shifts and transformations in how schools and other educational settings are set up and operate. In tandem with this the course examines the experience of childhood and notions of what it means to be a child both in terms of how this varies culturally, socioeconomically, and regionally, as well as how these experiences and conceptualizations are presently being transformed.
Interdisciplinary Option: Global Studies
Outcomes:
Students will be able to demonstrate an understanding of how global and local issues are interwoven with regard to education; Students will be able to articulate a nuanced understanding (as regards schooling and education) of the ways that social justice concerns are being both advanced and hindered in our contemporary globalized world

ELPS 240 Urban Education: Policy and Practice (3 Credit Hours)
This course introduces students to some of the central policy questions currently afoot in American public education through consideration of one particular field of concern, Urban Education. Explores the sociological dimensions of schooling, the important questions of how race, social class and ethnicity impact American education, and the relationship between resources and outcomes at the heart of arguments about schools. Students will be able to demonstrate an understanding of the ways that policy is connected to practice in urban education.
Outcomes:
Students will be able to analyze the multiple and contested factors that influence urban education in the US

ELPS 265 Cultural and Educational Policy Studies Internship (3 Credit Hours)
The Internship in Cultural and Educational Policy Studies course is intended to help students integrate theoretical and research coursework with a practical field-based experience to reflect on their own development as professionals working in the field of education.
This course satisfies the Engaged Learning requirement.
Outcomes:
Students develop and refine their professional skills and competencies; Students will be able to identify key education issues domestically and/or internationally and critically analyze them in terms of the relationship(s) between policy and practice

ELPS 300 History of Education (3 Credit Hours)
This course introduces students to the history of education in the United States, exploring the ideologies and theoretical frameworks that have been paramount in different historical periods and the ways they have shaped the social, cultural, economic, and political dimensions of educational institutions in America.

ELPS 301 History of Western Education (3 Credit Hours)
A historical analysis of the rise and development of educational movements, trends, institutions, and policies in the multicultural context of American society.
Course equivalencies: X-ELPS301/HIST302
Outcomes:
Students will be able to demonstrate a historical understanding of the development of educational policy and schooling institutions, and demonstrate a knowledge of the historiographic approaches and debates in the history of education

ELPS 302 Philosophy of Education (3 Credit Hours)
Requirement: PHIL 130 for students admitted to Loyola University for Fall 2012 or later. No requirement for students admitted to Loyola prior to Fall 2012 or those with a declared major or minor in the Department of Philosophy or Department of Political Science. Study of major philosophical theories about educational practice, especially as these relate to pedagogical practice, curriculum development, and the response of schools to particular individual, community, and societal interests.
Outcomes:
The student will become adept at identifying philosophical issues embedded in current educational practice and controversies, especially as these relate to promoting the values of a democratic society, accommodating the interests of the society and particular groups within it, and the realization of social justice

ELPS 310 Leadership: Group Dynamics and a Mission Centered Approach (1 Credit Hour)
This course is designed to familiarize Resident Assistants/Managers with a variety of topics that have been formulated to assist them in building community, developing interpersonal relationships, creating intentional programs, and improving their crisis intervention skills. Topics may include, but are not limited to: identity formation, counseling, ethics, diversity, health, and current events in higher education.
Outcomes:
To inform and therefore improve students performance within university housing through reflection exercises and solution-based problem solving skills

ELPS 311 Student Leadership: Using Social Justice in Developmental Models (1 Credit Hour)
This class will examine social justice as it relates to building communities and creating positive interpersonal relationships between both the Resident Assistant/Manager and hall residents as well as among residents themselves. Topics may include, but are not limited to: program planning, the use of technology, service learning, vocation, career development, and the RA/RM impact on students.
Outcomes:
To inform and therefore improve students performance within university housing through reflection exercises and solution-based problem solving skills

ELPS 325 Leadership Studies Capstone (3 Credit Hours)
Pre-requisites: ELPS 125; ELPS 222; ELPS 223; and enrollment in the Leadership Minor
This course will explore topics such as social change and globalization, creative conflict resolution, the nature of power, oppression and influence, and systemic leadership.
Outcomes:
Students will understand the role of and capacities associated with leading personal and social transformation within their career fields and communities

ELPS 350 Finding Jesuit Jesus:Preparing Prof Life-Live Sprtual Exercise St. Ignatius (3 Credit Hours)
An adapted version of the Spiritual Exercises of St. Ignatius of Loyola, founder of the Jesuits, this 14-day course in Rome, Italy@JFRC provides students the structured time and study to reflect more deeply on faith, the power of God's love and relationships with others as they frame their professional life design. Time for personal prayer, reflection, liturgies, thematic walks and talks are embedded in this course and all of which will help assist students in their faith journey and as they discern, plan and prepare for a professional life. The course intends to advance opportunity for student exploration and understanding of Jesuit history, values and principles - what does it mean to walk, live, discern and work, as people of Ignatius regardless of faith origin. This course is an invitation to imagine and to plan to live a life of service regardless of profession or career choice.
Course equivalencies: ELPS 350/ELPS 450
Outcomes:
To further student understanding of diversity of ideas and beliefs in the world; To enhance student knowledge of concepts and designs of social justice while exploring the ancient history of Rome; To better understand Ignatian spirituality and faith in action in our global and diverse world; To engage in service learning to better understand the plight of refugees around the world and expand student knowledge in the service of humanity through learning, discerning and faith; To advance opportunity for student discernment and understanding of personal and professional vocation; what does it mean to walk, and work as people of and with Ignatius - regardless of faith origin

ELPS 398 Independent Study (1-3 Credit Hours)
This course is an independent study under the supervision of a faculty member.
Outcomes:
The outcome for this course is an independent project, paper or other product that demonstrates advanced knowledge of a topic

ELPS 400 Inquiry Into Educational Policy (3 Credit Hours)
No course description is available

ELPS 403 Qualitative Research Methods in Education (3 Credit Hours)
This course explores the discipline and practice of qualitative research, introducing students to the discipline of qualitative research through examination of various theories, traditions, genres, and components of this form of inquiry.
Course equivalencies: RMTD405 / ELPS403
Outcomes:
Students will be able to discuss the meanings of research and of research traditions within the social sciences, to recognize and discuss various epistemologies, traditions, designs, theories, ethical issues and components of qualitative research, to analyze qualitative studies in terms of design, methodology, validity, findings, ethics and conclusions in oral and written critiques, to conceptualize, design, and implement a small-scale qualitative study, and to interpret and present research study findings

ELPS 404 Entrepreneurial Approaches to Catholic Education (3 Credit Hours)
Mark Casson in his book The Entrepreneurs: An Economic Theory, says that the theory of entrepreneurship rests upon the following definition: "An entrepreneur is someone who specializes in making judgmental decision about the coordination of scarce resources." This could also be the definition of a Catholic school leader! Catholic education is the largest non-public education system in America. But it is also half the size it was in 1960. To stay relevant and thriving, Catholic education must become more innovative and entrepreneurial. We will investigate the process by which innovations are designed and will critically assess the efficacy of a wide range of innovations. What leads to innovation and how is it scaled effectively? We will read and talk to educators, entrepreneurs, and policy makers about design innovations, and will critically assess the efficacy and scalability of a wide range of innovations targeting students, teachers, and schools.

ELPS 405 Introduction to Educational Policy Analysis (3 Credit Hours)
This course is an introduction to educational policy analysis that allow students to critically access the underlying assumptions and politics that guide particular policy choices and evaluate their design, implementation, and impacts.
Outcomes:
Students will demonstrate the ability to critically examine and conceptualize policies, design alternatives and argue persuasively for these alternatives while gaining fluency in the current policy debates

ELPS 406 Foundations Using Data for Continuous Improvement (3 Credit Hours)
This is the foundation course for data-based decision making within the principal preparation series. This graduate course provides skill sets to help future school leaders and administrators to access, interpret, and encourage the use of data to improve student educational outcomes. Restricted to graduate students in the School of Education. Students will learn how to organize, analyze, and synthesize data in order to interpret student and teacher assessment results.

ELPS 407 Leading for Data-based Decision Making (3 Credit Hours)
The primary purpose of this course is to provide candidates with the knowledge, skills, and dispositions necessary to assist school-aged students to accomplish educational outcomes. Restricted to graduate students in the School of Education.
Outcomes:
Candidates will examine data and the use of data in making decisions on several different levels

ELPS 408 Leading for Diversity (3 Credit Hours)
This course focuses on meeting the needs of children from diverse linguistic, cultural, and racial backgrounds within the context of a society faced with issues of poverty, discrimination, racism, and sexism. This course explores issues of second language and second culture acquisition and consider the relationship between identity construction and school success.

ELPS 409 Fundamentals of Instructional Coaching (3 Credit Hours)
The instructional coach provides instructional leadership by supporting evidence-based instructional practices with classroom teachers. This course focuses on developing the elements of instructional coaching: assessment for learning, delivery of effective curriculum, enhancing classroom instruction, and effective classroom management. In developing the role of the instructional coach, candidates will develop skill in building trusting relationships, facilitating support from administrators, and providing confidential, non-evaluative job-embedded professional development for faculty. Models of coaching will be explored as well as a focus on conferencing and facilitation skills.

ELPS 410 Sociology of Education (3 Credit Hours)
This course introduces students to the field of the sociology of education. It examines the societal role of education and the enactment of education using macro-historical, meso-institutional and micro-interactional perspectives, and exposes students to major theoretical traditions in the discipline.
Outcomes:
Knowledge of theories and empirical research that can guide critical evaluation of 1) conditions and problems in K-12 schools 2) ideas, arguments, and points of view regarding K-12 schools

ELPS 413 Critical Social Theories (3 Credit Hours)
This survey course examines the foundations, applications, and practice of critical social theories in U.S. education. Through rigorous texts, engaged discussion, and reflective assignments, this course aims to address the following central questions: What is theory and who gets to define that?; What is social theory?; What is critical about critical social theories?; How is theory pertinent to practical, everyday educational practices?; How can and does education contribute to either reinforcing or challenging relations of power and domination in the modern era?; and What is your relationship to critical social theory?
Outcomes:
This course has been designed to meet the following objectives: Students will: 1) Use prior knowledge to make real-word connections to critical social theories; 2) Understand and apply critical social theories to their personal and professional contexts; 3) Increase their reflexivity with regards to critical social issues; 4) Engage in aesthetic educational practices; 5) Embrace conflict as a necessary part of the learning process; 6) Examine the hidden curriculum of higher education through the application of critical social theories; 7) Explore with "play" as a necessary aspect of authentic learning; 8) Experience multimodal approaches to engaging the course content

ELPS 418 Writing Workshop in Rome, Italy (1 Credit Hour)
Immersed in the city of Rome for 14 days, students will use historical and cultural site visits to inspire their daily research and writing sessions. Students will engage in the exploration of our rich Jesuit tradition by studying a brief history of St. Ignatius and the city of Rome and by examining basic Jesuit ideals and principles while using their reflections to support their daily writing sessions. This course is a graduate level course for graduate thesis, comprehensive exams, capstones, and dissertation writers. Academic projects may be completed during this course. This course is a one-credit hour self-guided writing course. This course is open to LUC graduate students and visiting students, Alumni, and faculty who are currently engaged in professional and academic writing and research.
Outcomes:
Students will demonstrate sustained writing productivity by producing measurable progress on a substantive writing project through disciplined daily writing, rigorous critical reflection, ethical research practice, and iterative faculty-guided feedback within an immersive international learning environment; Writers will have completed at least 50 hours of dedicated writing during this workshop - dissertation, defense presentation, academic project, or work project

ELPS 419 Leadership in Higher Education (3 Credit Hours)
This course is designed to provide foundational grounding in leadership theory and research. Specific attention is paid to the evolution of leadership theory, interdisciplinary conceptualizations, administrative applications, pedagogy for teaching and learning, and the leadership development process of college students.
Outcomes:
Students will be able to describe various historical and contemporary perspectives on administrative leadership and their application in higher education, including the influence of gender and culture on leadership development

ELPS 420 Philosophy of Education (3 Credit Hours)
This course examines the philosophical questions embedded in teaching, learning, and schooling.
Outcomes:
Students acquire familiarity with the history of philosophic thinking about education and develop an ability to formulate valid arguments about the fundamental issues in teaching, learning, and schooling

ELPS 421 Theories of Knowledge and Education (3 Credit Hours)
This course examines theories of knowledge and their implications for educational practice from a philosophic.
Outcomes:
Students understand different philosophic explanations of learning and knowledge and acquire the ability to interpret educational practices according to these explanations

ELPS 422 Modern Theories of Education (3 Credit Hours)
An examination of modern theories of education from a series of philosophical perspectives.
Outcomes:
Students develop a critical understanding of modern theories of education

ELPS 423 Value Theory and Education (3 Credit Hours)
Using various value theories, the course examines the practices of teaching, learning, and schooling.
Outcomes:
The student acquires familiarity with theories of value and is able to use them in critically examining the practices of teaching, learning, and schooling

ELPS 424 Jesus the Teacher: A Theology of Education (3 Credit Hours)
The course develops a theology of education based on the account of Jesus provided in the New Testament.
Outcomes:
The student is able to interpret the task of education in light of the life of Jesus

ELPS 425 Foundations in Student Affairs (3 Credit Hours)
This course provides an introduction to the college student affairs profession. Special attention is focused on historical and philosophical foundations, organizational structures, professional roles, functions, and services, and challenges, opportunities, and issues faced by professional staff.
Outcomes:
Students will be able to describe factors contributing to America's diverse system of higher education and its impact on the design and delivery of student affairs programs and services

ELPS 426 Student Affairs Administration Higher Education (3 Credit Hours)
No course description is available

ELPS 427 Foundations in Higher Education (3 Credit Hours)
The purpose of this new course is to provide a comprehensive examination of the foundations of higher education in the United States.
Outcomes:
This course is designed to help students critically engage with central features of higher education institutions, policies, and constituents; Of special interest is the evolution of policies, ideologies and practices that have a direct impact on social justice concerns

ELPS 428 The Junior and Community College (3 Credit Hours)
This course introduces the two-year college and its role in American higher education, including a focus on historical origins, characteristics of students and faculty, curriculum development, governance and collective bargaining, and contemporary issues.
Outcomes:
Students will be able to describe factors influencing the development of the two-year college within the broader system of higher education in the United States, and understand the special role that the two-year institution serves in American society

ELPS 429 Selected Topics in Higher Education (3 Credit Hours)
This course will discuss special topics in higher education policy and practice.
Outcomes:
Students will be able to identify, review and critically analyze significant higher education policy and practice issues

ELPS 430 Curriculum and Pedagogy in Higher Education (3 Credit Hours)
This course examines the notion of curriculum. This course will allow you to consider the following central questions: What are curriculum and pedagogy?; What has curriculum and pedagogy looked like in your schooling experiences?; What roles do curriculum and pedagogy play in the context of higher education & student affairs?; What are the explicit and implicit curricula of higher education & student affairs?; How is higher education & student affairs curriculum created, by whom, and for what purpose?; What is your own understanding and experiences with curriculum and pedagogy in your own life?
Outcomes:
This course aims to model effective curricular design course activities, assignments, readings, and relationships; While the explicit nature of such items is critical, the implicit framings of this course should prove even more impactful

ELPS 431 Evaluation in Higher Education (3 Credit Hours)
This course examines evaluation and assessment philosophy, approaches, models, and practice in higher education with focus on institutional accountability and assurance of quality programs.
Outcomes:
Students will gain an appreciation for the importance of evaluation and assessment of educational programs in higher education and understand strategies employed by institutions to achieve their goals and objectives; Students will also gain an understanding of the range of quantitative and qualitative tools available to measure student learning and developmental outcomes

ELPS 432 Multiculturalism for Social Justice in Higher Education (3 Credit Hours)
Enrollment is restricted to Graduate Education students. This course provides an introduction to theory and research related to multiculturalism and social justice. Learning is targeted at increasing students' multicultural awareness, knowledge, and skills in the context of higher education practice.
Outcomes:
Understand social justice conceptual foundations and the various ways in which oppression influences individuals, institutions, and the broader society

ELPS 433 Student Development in Higher Education (3 Credit Hours)
This course introduces cognitive and psychosocial research and theory focused on the maturation and development of traditional aged college students, particularly in the domains of identity, cognition, and moral reasoning.
Outcomes:
Students will demonstrate an understanding of key theories of college student development and their application in improving plans and policies implemented in the context of administration and/or teaching

ELPS 434 American College Student (3 Credit Hours)
This course explores who goes to college, and the affects of cultural background and campus environments on college student experiences.
Outcomes:
Students will be able to explain how campus environments influence student learning and identity including analyzing the experiences of different students and student groups using anthropological and sociological constructs

ELPS 435 Enrollment Management in Higher Education (3 Credit Hours)
This course examines research and theory focusing on student demand for higher education, college choice, recruitment and marketing, public aid policy, retention and student success, and best practices related to enrollment management.
Outcomes:
Students will demonstrate factors influencing both demand for higher education and student choice of institutions, with focus on the role of public financial aid policy in access and choice

ELPS 436 Women in Higher Education (3 Credit Hours)
This course explores issues unique to women as academic leaders and administrators in higher education. It examines the history and challenges that women have faced as students in higher education institutions, exploring the factors that have affected their participation, matriculation, and completion of programs, over time and today. Last, this course will explore gender and expanding issues around identification and sexual orientation, as related to institutional inclusiveness and student supportive services.

ELPS 437 Today's Community College Students (1 Credit Hour)
No course description is available

ELPS 438 Designing Effective Community College Courses (1 Credit Hour)
No course description is available

ELPS 439 Assessing Student Learning in Community Colleges (1 Credit Hour)
No course description is available

ELPS 440 Community College Students as Learners (1 Credit Hour)
No course description is available

ELPS 441 Community College Teaching (3 Credit Hours)
This course examines the curriculum and programs offered within community colleges and the instructional philosophies and strategies used to encourage student success. It will examine the heterogenous population of students who attend these institutions and their learning needs and preferences. The course will also require students to understand the curricular issues faced in today's colleges including elimination of developmental education, use of early college courses, articulation agreements and expanding offerings to include topics germane to diverse students.

ELPS 442 Humanistic Foundations of Education (3 Credit Hours)
No course description is available

ELPS 443 Educational Classics (3 Credit Hours)
Analysis of selected works of major importance in the development of educational theory.
Outcomes:
Student acquires an advanced understanding of the thinking of some persons who have made a major contribution to educational theory

ELPS 444 American Schooling and Social Policy: A Historical Perspective (3 Credit Hours)
A historical analysis of the economic, political, cultural, and social factors that helped to shape educational policy and schooling in the United States.
Outcomes:
Students will be able to demonstrate a historical understanding of the development of educational policy and schooling institutions and demonstrate a knowledge of the historiographic approaches and debates in the history of education

ELPS 448 International Higher Education (3 Credit Hours)
This course introduces students to the higher education systems of countries around the world, placing a particular emphasis on how each system is confronting the challenges of globalization.
Outcomes:
Students will understand how IHE's respond to challenges of internationalization, massification, scholar & student exchange, access challenges, accountability demands, was well as international trade agreements on the exchange of educational goods & services

ELPS 450 Finding Jesuit Jesus:Preparing Prof Life-Live Sprtual Exercise St. Ignatius (3 Credit Hours)
An adapted version of the Spiritual Exercises of St. Ignatius of Loyola, founder of the Jesuits, this 14-day course in Rome, Italy @JFRC provides students the structured time and study to reflect more deeply on faith, the power of God's love and relationships with others as they frame their professional life design. Time for personal prayer, reflection, liturgies, thematic walks and talks are embedded in this course and all of which will help assist students in their faith journey and as they discern, plan and prepare for a professional life. The course intends to advance opportunity for student exploration and understanding of Jesuit history, values and principles - what does it mean to walk, live, discern and work, as people of Ignatius regardless of faith origin. This course is an invitation to imagine and to plan to live a life of service regardless of profession or career choice.
Course equivalencies: ELPS 350/ELPS 450
Outcomes:
To further student understanding of diversity of ideas and beliefs in the world; To enhance student knowledge of concepts and designs of social justice while exploring the ancient history of Rome; To better understand Ignatian spirituality and faith in action in our global and diverse world; To engage in service learning to better understand the plight of refugees around the world and expand student knowledge in the service of humanity through learning, discerning and faith; To advance opportunity for student discernment and understanding of personal and professional vocation; what does it mean to walk, and work as people of and with Ignatius - regardless of faith origin

ELPS 453 Legal Aspects of American Higher Education (3 Credit Hours)
This course examines complex sources of law that impact higher education with a special focus on the student-institution and faculty-institution legal relationship.
Outcomes:
Students will demonstrate a heightened awareness of the key role that the law serves in its relationship with higher education administration and policy; Students will critically evaluate and implement preventative legal strategies on the campus and understand the ethical and social justice implications of such work

ELPS 454 Budgeting and Finance in Higher Education (3 Credit Hours)
This course examines finance-related issues and trends in higher education and reviews budgeting techniques used by colleges and universities.
Outcomes:
Students will demonstrate skills in analyzing higher education financial statements and other fiscal documents, and understand current patterns of higher education finance and their strengths and limitations

ELPS 455 Comparative Education (3 Credit Hours)
The application of historiographic and social scientific theories and methods to understanding international issues of education.
Outcomes:
Students will demonstrate a sound grasp of the field's major issues and perspectives, the nature of comparativist research, and the work of major figures

ELPS 456 Education & Democratization (3 Credit Hours)
This course will explore some of the conceptual underpinnings of democracy as they relate to contemporary education policy. Texts read include books by Richard Rorty, John Dewey, Cornell West Claudia Rankine and other contemporary writers who work on democracy and education. Themes to be addressed include citizenship education, identity politics, hyper-partisanship, and new nationalisms.

ELPS 457 Comparative Theory (3 Credit Hours)
Pre-requisites: ELPS 455 or consent of instructor
A course in the philosophy and sociology of comparative education knowledge.
Outcomes:
Students will demonstrate a sound grasp of the field's major epistemological issues and a sense of how their own work and that of others fit into the theoretical landscape of comparative education

ELPS 458 International Education (3 Credit Hours)
This Advanced Seminar, which is both theoretical and applied, introduces students to issues and institutions involved in international educational development. This course will provide students with a deep understanding of the changing role of educational development projects in light of the post-2015 development agenda, post-financial crisis and global recession, post-Ebola epidemic, and post-Arabic Spring periods. Students will spend time exploring and understanding how these many `post-contexts and settings¿ are changing the nature of development and the educational responses that are now coordinated across different scales and spaces (national, regional, and global levels). With the aid of class readings and paying particular attention to endogenous and exogenous challenges that Africa and the Middle East confront, discussions will be framed through a comparative and international educational perspective that exposes students to how different theories of education and development influence policy, priorities, and programs of international, national, and local institutions in these regions.

ELPS 459 Organization & Governance in Higher Education (3 Credit Hours)
This course examines the organizational and governance structures of higher education institutions, including key internal and external factors influencing institutional planning and policy decisions.
Outcomes:
Students will demonstrate both an understanding of and ability to apply several different organizational models and metaphors to higher education organizations, and an informed, critical perspective on the implications these models may have for institutional policy making and leadership

ELPS 460 School Administration (3 Credit Hours)
This course serves as an introduction to the administration and governance of American public schools. The course provides an overview of educational administration and the systemic forces that impact upon its functioning.
Outcomes:
Students will be able to apply a systems model approach to school leadership; Students will be able to articulate how to transform school inputs into successful school outputs that build positive will and capacity in order to accomplish the school's vision and mission

ELPS 461 Issues in School Law (3 Credit Hours)
An in-depth examination of current legal issues and their educational implications for district leaders. Emphasis is given to legal issues in personnel practices and district-wide compliance with state and federal laws and regulations. State standards affecting school administration are also examined.
Outcomes:
Students will become familiar with and be able to address school law decisions within the context of school leadership; Students will be able to lead district-wide compliance with state and federal laws and regulations

ELPS 462 The Principalship (3 Credit Hours)
Study of the leadership and administrative responsibilities of elementary and secondary school principals. Topics include: creating a learning community, team-building, school improvement planning, budgeting, staffing, scheduling, and ethical and operational issues in decision-making.
Outcomes:
Students will be able to demonstrate understanding of and competencies relevant to the ethical and operational issues in decision-making inherent in the leadership role of the school principal as they pertain to various leadership tasks

ELPS 463 School Leadership and the Law (3 Credit Hours)
Provides prospective administrators with an overview of the legal system as it impacts school operations. Intended as a first course in school law, topics include: constitutional, statutory and regulatory sources of school law, common school legal issues involving students, curriculum and personnel, problems of equity and justice in applying the law to school situations, and implications for administrative practice.
Outcomes:
Students will be able to demonstrate understanding of an overview of the legal system as it impacts school operations including constitutional, statutory and regulatory sources of school law, common school legal issues involving students, curriculum and personnel, problems of equity and justice in applying the law to school situations from the lens of the educational leader

ELPS 464 Workshop: Superintendency (3 Credit Hours)
This course is a required course for ISBE Superintendent Endorsement. This course is online with a combination of synchronous, asynchronous class sessions and field experiences in District Leadership offices. This course provides students with the opportunity to develop skills, understandings, and dispositions required of a superintendent - collaborating with boards of education, citizens of the community, and other relevant stakeholders. Restricted to LUC Graduate students.
Outcomes:
Facilitate the development, articulation, implementation, and stewardship of a vision of learning that is shared and supported by the school community; Facilitate and engage in activities that utilize data gathering techniques and analysis to inform programmatic decisions; Facilitate the development of an effective school-community relations program, which is grounded in effective communication and that instills community support while responding to diverse community needs; Understand and can monitor and evaluate district management and operational systems

ELPS 465 Workshop (Variable Topics) (3 Credit Hours)
These workshops focus on specific areas of educational leadership, such as: Instructional Leadership, Equity and Justice, Collective Bargaining, Research in Educational Leadership, Cultural Context for Informed Decision Making, and The Superintendency.
Course equivalencies: X- CIEP 473/ ELPS 465
Outcomes:
Students will be able to demonstrate understanding of and leadership competencies in the relevant workshop area

ELPS 466 School Finance and Budgeting (3 Credit Hours)
Study of the processes by which financial decisions are made by local school districts, with special emphasis on the roles of building and district administrators in the budgeting process. Included are the techniques of constructing and managing the budget, while addressing issues of need and equity in the school community. Also covered are the sources of school revenues and an introduction to the process and principles of facility planning. This course is intended as a first course in school finance.
Outcomes:
Students will be able to demonstrate understanding of and competencies pertinent to the school leader's role in building, maintaining, and managing the school budget while addressing issues of need and equity

ELPS 467 School Law & Government (3 Credit Hours)
The legal basis of public education in the United States, with special reference to Illinois major court decisions and statutes are reviewed through the lens of the district-wide leader. Due process, special education, multi-cultural differences, school board relations and other related legal matters will be examined through the role of the superintendent. This course is intended as a second course for a law minor.
Outcomes:
Students will be able to demonstrate an understanding of due process, special education, multi-cultural differences, school board relations and other related school legal matters through the lens of the superintendent

ELPS 468 Problems in Finance and Business Management (3 Credit Hours)
Examination of the social justice issues inherent in developing and evaluating state and local school finance policy, including equity, adequacy, the social and ethical issues associated with allocating resources and relating school costs to achievement. Selected problems of school district financial management are studied, including central office organization, financial management and control, securing and accounting for grant funds, debt financing, insurance and support services management. This course covers topics especially pertinent to district administrators and superintendents.
Outcomes:
Students will be able to demonstrate understanding of and competencies relevant to district level leadership in financial management, control, and allocation through the lens of social justice issues

ELPS 469 Human Resources in Educational Organizations (3 Credit Hours)
This course explores various facets of human resource administration in educational organizations. Topics covered include organizational equity in strategic planning and compensation, employment justice in recruitment, selection, staff development, performance appraisal, discipline, and an introduction to unionism.
Outcomes:
Students will be able to create a strategic plan from recruitment through continual employment for both certified and classified personnel that supports the school's mission and promotes educational excellence for all

ELPS 470 School Supervision (3 Credit Hours)
This course is designed to examine school formative and summative school supervision and its role in improved teaching and learning.
Outcomes:
Students will be able to demonstrate understanding of the nature of teaching and learning, develop the skills for conducting the pre-conference, classroom observation, and post-conference of the clinical supervision model, and develop the capacity to facilitate action research, study teams and cooperative supervision

ELPS 471 MTSS for Instructional Leaders (3 Credit Hours)
The purpose of this course is to provide candidates with the skills to (a) identify and assess the universal level of academic and behavior programming (b) create and sustain secondary and tertiary systems of support (targeted group or individual interventions) (c) develop continuous improvement plans to support the development of the necessary MTSS systems, practices, and processes.

ELPS 472 Administration of Special Education and Pupil Services (3 Credit Hours)
An exploration of legal provisions governing the most current legal issues related to special education and No Child Left Behind, including state rules, regulations and case law. Also examined are the practical issues, such as administering fiscally and ethically responsible service delivery models at the local level. Leadership dimensions necessary to enhance the learning process in an inclusive setting are a special concern.
Outcomes:
Students will be able to demonstrate an understanding of legal provisions of special education and No Child Left Behind, as well as the practical issues, such as administering fiscally and ethically responsible inclusive service delivery models at the local school building level

ELPS 473 Problems in School Supervision (3 Credit Hours)
This course focuses on the critical skills of leading supervision for school leaders within districts and schools. Upon completion of this course, candidates will practice supervision and evaluative skills related to the delivery of curriculum and student outcomes.

ELPS 474 Curriculum Development for Instructional Leaders (3 Credit Hours)
This course focuses on the critical skills of leading curriculum development within schools. Upon completion of this course, candidates will practice leadership skills related to the delivery of curriculum.

ELPS 475 Human Resource Administration for the School District Leader (3 Credit Hours)
Within this course, students explore various facets of human resource administration in educational organizations at the district/macro level. Human resource leadership, as it specifically relates to promoting district vision and mission, will be researched and simulated to develop preferred professional practice that promotes integrity and social justice for the entire educational community.
Outcomes:
Students will demonstrate an understanding of: strategic planning, human resources' system auditing, supervision and evaluation of educational administrators, unions, and collective bargaining

ELPS 476 Technology in School Administration (3 Credit Hours)
A laboratory-based course on the issues and uses of technology and the related skills of applying technology to problem solving in school administration. This includes design of information systems, networks and data bases, software selection and use, instruction, student testing and program evaluation, scheduling, communications and managing school support services. This course includes examining issues with an emphasis on data based decision-making.
Outcomes:
Students will be able to examine school leadership issues through the use of technology in order to make data-driven decisions

ELPS 480 Residency Seminar for MEd Administration & Supervision (0-3 Credit Hours)
This course is part of a sequence of courses for students in the Master's Principal Preparation Program. Restricted to students in M.Ed. Administration and Supervision. Students will meet with their assigned university coach to make progress in completing the electronic onboarding plan.

ELPS 481 Mission Driven Leadership for Principals (3 Credit Hours)
This course will provide the basis for making sound theoretical, ethical, and practical administrative decisions with particular attention given to data-driven decision making to improve student outcomes.
Outcomes:
Candidates will gain an understanding of various leadership theories, adult learning theory and professional practice, and applying leadership theory to improve student outcomes

ELPS 482 School Supervision for Principals (3 Credit Hours)
This course is designed to examine the broad concept of supervision as well as formative and summative school supervision and its role in improved teaching and learning.
Outcomes:
Candidates will acquire the knowledge, skills and dispositions for supervision of teaching that supports the ongoing growth and professional learning of teachers, leading to improved student outcomes for every student

ELPS 483 Human and Fiscal Resource for Principals (3 Credit Hours)
This course explores various facet of human and fiscal resource management in educational organizations through theory and practical application.
Outcomes:
Candidates will acquire the knowledge, skills and dispositions necessary to take a strategic approach to resource management in educational organizations

ELPS 484 School Law, Policy Formation, and Community Involvement (3 Credit Hours)
This course covers school law and policy formation designed for candidates seeking to become building leaders in schools.
Outcomes:
Candidates will acquire the knowledge, skills and dispositions necessary to understand school law and ethical decision making with particular attention given to building safety, current legal "hot topics," understanding the governance of the local school board and working with the various communities associated with a school

ELPS 485 Instructional Leadership: Equity and Justice (3 Credit Hours)
This course is a required course for ISBE Superintendent Endorsement. This course is online with a combination of synchronous, asynchronous class sessions and field experiences. Students study community engagement, board relations development, cultural and community context through the lens of district instructional leadership. Scope: Access, equity and ethical leadership. Restricted to LUC Graduate students.
Outcomes:
Develop appropriate procedures and relationships for working with local governing boards; Facilitate the development, articulation, implementation, and stewardship of a vision of learning that is shared and supported by the school community; Facilitate the development of an effective school-community relations program, which is grounded in effective communication and that instills community support while responding to diverse community needs

ELPS 490 Introduction to Educational Policy Studies (3 Credit Hours)
This policy analysis course examines the general conceptual, ethical, and empirical issues related to educational policy-making at both the macro (national, regional, and state) and micro (local and institutional) levels.
Outcomes:
Students will be able to demonstrate a knowledge of educational policy analysis strategies

ELPS 491 Issues in Educational Policy (3 Credit Hours)
Analysis of selected case studies of important policy issues from various levels of education.
Outcomes:
Students will be able to identify, review, and critically analyze significant educational policy issues

ELPS 498 Independent Study (1-3 Credit Hours)
Pre-requisites: consent of instructor
No course description is available

ELPS 499 Directed Research (1-3 Credit Hours)
Pre-requisites: Consent of instructor
In-depth independent research developed jointly by the student and a faculty director. The topic should be one with which the student has some familiarity so that the research can be an examination of it in-depth.
Outcomes:
Learning outcomes are created individually for each Independent Study

ELPS 500 Seminar in Current Educational Literature (3 Credit Hours)
Overview of methods and techniques of bibliographic research related to students' research material.

ELPS 501 Leadership / Capacity Building Organizations (3 Credit Hours)
M.Ed. IEPE Cohort: Students will acquire knowledge around leadership theory and develop skills related to enhancing organizational capacity and efficacy. Emphasis will be placed on organizational cultures and organizational learning. Restricted to IEPE Cohort.
Outcomes:
Students will acquire knowledge around leadership theory and develop skills related to enhancing organizational capacity and efficacy; Emphasis will be placed on organizational cultures and organizational learning

ELPS 503 Critical Perspectives on the Internationalization of Higher Ed (3 Credit Hours)
In this course, students will examine the following question, "What does meaningful, socially responsible internationalization look like?" The course will expose students to a diversity of approaches to internationalization and to prepare them to make informed decisions about internationalization strategies that are 1) congruent with their institutions' mission, constituencies, resources, and values; 2) informed by best practices and empirical research; and 3) rooted in principles of equity and inclusiveness.
Outcomes:
Upon completion of this course, students will be able to articulate the different modalities of internationalization and the main geopolitical, societal, and economic forces shaping the internationalization of higher education worldwide; reflect on how these forces translate into concrete strategies, expectations, and challenges surrounding internationalization at the institutional level; critically analyze the impact that internationalization can have on students, faculty, and other institutional actors, especially in terms of perpetuating inequitable, discriminatory, and exclusionary societal structures; and integrate this knowledge into empirically-supported recommendations for internationalization strategic planning in real-world settings

ELPS 504 Advanced Financial Strategies in Higher Education (3 Credit Hours)
The purpose of this course is to build on a basic understanding of program budgeting to examine institutional financial strategies; state, and federal institutional funding; and public and financial aid polices that effect who has access to higher education. Apply higher education budget fundamentals to gain insight on institutional financial challenges. 2. Identify and assess the impact of the macro-dimensions of finance and how they inform campus level dynamics (e.g., budgeting, planning, equity) that complicate institutional financial decision-making
Outcomes:
Students should be able to demonstrate observable growth in their ability to: 1

ELPS 505 Seminar in Leadership Theory (3 Credit Hours)
This course is designed to provide grounding in leadership theory and research. Critical perspectives will be used to examine the evolution of leadership theory, interdisciplinary conceptualizations of the topic, administrative applications of theory, and pedagogy for teaching and learning about leadership.
Outcomes:
Students will be able apply critical perspectives to the deconstruction and reconstruction of leadership in professional practice

ELPS 506 Strategic Executive Leadership in Higher Education (3 Credit Hours)
This course examines strategic executive leadership in higher education and in particular leader role performance in complex organizational structures. This exploration is grounded in the rich, interdisciplinary body of knowledge on leadership theory and complemented by the infusion of critical perspectives.
Outcomes:
Students will be able apply and engage in executive leadership from a perspective grounded in social justice

ELPS 507 Advanced Governance in Higher Education (3 Credit Hours)
This course examines the governance structures of higher education institutions, including key internal and external factors influencing institutional planning and policy decisions.
Outcomes:
Students will demonstrate both an understanding of and ability to apply several different organizational models and metaphors to higher education organizations, and an informed, critical perspective on the implications these models may have for institutional policy making and leadership

ELPS 508 Equity and Justice in Higher Education (3 Credit Hours)
his workshop/course focuses on diversity, equity, inclusion, and justice in higher education, providing a learning environment for advanced discussions, as well as opportunities for EdD doctoral students to apply learning to practice.
Outcomes:
Students will be able to demonstrate understanding of and leadership competencies in the area of diversity, equity, inclusion and justice in higher education

ELPS 509 Introduction to Analytics in Higher Education (3 Credit Hours)
This course is designed to help students leverage data sets and systems in applied ways to improve their leadership. The course will cover key education data portals (e.g., IPEDS, Census data, proprietary systems) as well as introduce students to different data visualization techniques (e.g., geospatial mapping, infographics, etc.). Students will produce reports or grant proposals relevant to their career trajectory as a key deliverable.
Outcomes:
After taking a class on data analytics, students should have acquired a range of technical and nontechnical skills, as it relates to higher education as well as gained an understanding of the key concepts and methods used in data analytics

ELPS 512 Sociology of Teaching (3 Credit Hours)
This course investigates the practice and profession of teaching of teaching from a sociological perspective. Empirical data and social theory will guide students' learning about the practice and profession of teaching and how different demographic, professional, organizational, and political factors shape them. Students will expand their factual knowledge about the historical and contemporary topics related to the sociology of teaching, and will develop their ability to investigate, analyze and communicate effectively about topics related to the practice and profession of teaching.

ELPS 514 The School as Organization (3 Credit Hours)
This course will expose students to organization theory and its application to understanding the operation, performance, and effectiveness of educational organizations.
Outcomes:
Students will become familiar with foundational literature in organization theory and organizational behavior, and will develop their ability to apply concepts from organization theory and organizational behavior to their analysis to educational organizations

ELPS 515 Seminar in Education Policy (3 Credit Hours)
This course is an advanced seminar that will focus on a specific education policy topic. Students will read in-depth on the course topic (reading both theoretical literature and case material) and will develop their understanding of texts and the topic through intensive seminar discussion. Student develops an advanced understanding of the seminar topic and knowledge of the research literature related to it.

ELPS 520 Seminar in the Philosophy of Education (3 Credit Hours)
An in-depth examination of a topic in educational theory.
Outcomes:
Student develops an advanced understanding of the ways in which an educational issue can be analyzed

ELPS 525 Practicum Higher Education I (1-3 Credit Hours)
Required Field experience in Higher Education setting.

ELPS 526 Practicum Higher Education II (1-3 Credit Hours)
Required Field experience in Higher Education setting.

ELPS 527 Higher Education Capstone (3 Credit Hours)
ELPS 527 will be offered in both Fall and Spring semesters for all Higher Ed students. This course is a culminating seminar course that facilitates broad conversations, audits and guidance about values discernment, job search process, critical considerations for job fit and placement -successful transition to Higher Ed job market and Higher Ed work communities.

ELPS 528 Internship Higher Education II (1-3 Credit Hours)
Required Internship Experience for graduate Higher Education programs.

ELPS 529 Seminar in Higher Education (3 Credit Hours)
Pre-requisites: consent of instructor
This course is a topical seminar, typically for doctoral students, addressing one or more historical and/or contemporary topics or issues within higher education.
Outcomes:
Students will demonstrate a deepened understanding of one or more topics or issues and the ability to critically analyze these topics/issues using research and theory

ELPS 530 Proseminar: Higher Education (3 Credit Hours)
This course is restricted to Higher Education Doctoral Students

ELPS 550 Seminar on Globalization and Education (3 Credit Hours)
This advanced comparative education seminar examines globalization (economic, social and cultural) both as something that has a profound impact on schooling and as something that education produces. The course will focus on how globalization can be productively theorized and studied by social scientists.
Outcomes:
Students in the course will understand and be able to critically evaluate the diverse range of approaches used by comparative and international education scholars to study education and globalization

ELPS 560 Seminar in School Administration (3 Credit Hours)
Pre-requisites: Admission to either the Superintendent Endorsement Program or the Administration and Supervision doctoral program
This course provides specific practical recommendations for those leaders who seek to transform their schools into professional learning communities. Students will analyze their current organizational culture and core beliefs through the reframing process.
Outcomes:
Using Wiggins and McTighe (2005 backwards-design model, students will create a needs assessment to gather data on one of their current organization's core beliefs; From this data, students will create a school improvement plan for the change process to close the gaps between the current and desired reality of their organization

ELPS 561 Seminar in Current Issues in Administration (3 Credit Hours)
Pre-requisites: Admission to either the Superintendent Endorsement Program or the Administration and Supervision doctoral program
This course is intended to provide future and practicing administrators with a mindful framework for raising the questions to realize the moral/ethical dimensions that are currently at stake in our educational institutions with an emphasis on ethical dilemmas involving human resource administration.
Outcomes:
Using professional obligations as a framework for dialogue, students will examine the philosophies of utilitarianism, deontology and ethic of care as they pertain to human resource management in schools; Based on these three ethical lenses, students will create their own professional code of conduct and apply it to resolve multiple ethical dilemmas surrounding human resource management and leadership in schools

ELPS 562 Practicum School Administration (3 Credit Hours)
Pre-requisites: consent of program director and must be either the last course or next to last course of a student's program
Required of all students seeking administrative certification, i.e. Illinois Type 75 Principal or Superintendent. This course involves students in leadership activities to be carried out at a work site under the supervision of the university instructor and a cooperating administrator at the work site. Students must complete a minimum of 100 hours of approved leadership activities. Students are required to attend an orientation session during the semester prior to the semester in which they enroll in the practicum. Practicum is offered only in the fall and spring semesters.
Outcomes:
Students will be able to demonstrate competencies in a myriad of leadership and administrative areas relevant to the leadership role appropriate to the certification sought, the school principal or the school superintendent

ELPS 563 Administrative Internship (3-6 Credit Hours)
This course is designed as a supervised internship to provide aspiring teacher leader an on-the-job leadership experience in an elementary, middle, or secondary school. The on-site administrative mentor will have appropriate credentials and experiences for the level and department in which the internship is scheduled and experienced. The internship provides the opportunity for teacher leader candidates to relate knowledge and skills acquired through formal course work, readings, research, and simulations to actual teacher leadership experiences. The internship is both an active and a reflective experience designed to encourage the intern to examine the potential role of teacher leaders and functions of schooling and education in light of changing demographics, current local and national trends, and global issues.

ELPS 564 Education Policy Internship (3 Credit Hours)
Pre-requisites: ELPS 405 & ELPS 410
This course provides Cultural & Educational Policy Studies graduate students with an engaged learning opportunity that integrates coursework with professional practice in the context of education policy information, analysis, implementation and/or evaluation and research. Students develop and refine professional skills as well as identify and reinforce connections between graduate coursework and professional experiences.

ELPS 565 International Education Internship (3 Credit Hours)
Supervised experience with an international governmental or non-governmental agency approved by the Director or Associate Director of the Center for Comparative Education.
Outcomes:
Students will demonstrate working knowledge of an internationally oriented organization whose activities are related to their area of scholarship

ELPS 566 Principal Internship One (3 Credit Hours)
This is the first of four courses (fours semesters) of the principal internship. It is designed for candidates whose goal is to assume the leadership role as the principal of a school building.
Outcomes:
Through the internship experience candidates will gain an understanding of the leadership behaviors that promote just and equitable educational services to all members of the learning community

ELPS 567 Principal Internship Two (3 Credit Hours)
This is the second of four courses (fours semesters) of the principal internship. It is designed for candidates whose goal is to assume the leadership role as the principal of a school building.

ELPS 568 Principal Internship Three (3 Credit Hours)
This is the third of four courses (fours semesters) of the principal internship. It is designed for candidates whose goal is to assume the leadership role as the principal of a school building.
Outcomes:
Through the internship experience candidates will gain an understanding of the leadership behaviors that promote just and equitable educational services to all members of the learning community

ELPS 569 Principal Internship Four (3 Credit Hours)
This is the fourth of four courses (fours semesters) of the principal internship. It is designed for candidates whose goal is to assume the leadership role as the principal of a school building.
Outcomes:
Through the internship experience candidates will gain an understanding of the leadership behaviors that promote just and equitable educational services to all members of the learning community

ELPS 570 Supervision Seminar (3 Credit Hours)
Provides students with an in-depth examination into a special topic. Topics vary by section. Course may be repeated.

ELPS 571 Seminar in Current Issues in School Supervision (3 Credit Hours)
Pre-requisites: Admission to either the Superintendent Endorsement Program or the Administration and Supervision doctoral program
This course is designed to examine current issues in supervision and their impact on providing instructional leadership directed toward school improvement and reform.
Outcomes:
Students will be able to demonstrate a critical examination of issues in the differentiated model of supervision, develop the skills for developing collaboratively a learning organization that frames, analyzes, and resolves problems in instructional improvement, and develop the capacity to work with faculty and other stakeholders to identify needs for professional development, to organize, facilitate, and evaluate professional development, and to ensure that professional development activities focus on improving student outcomes

ELPS 580 Residency Seminar for Students in Educational Leadership (0-4 Credit Hours)
A seminar taken to address the interests and needs of students during Ed Leadership studies. The topics include preparation for the comprehensive examination, Writing Workshop, Internship planning and on-boarding, planning and writing the capstone or dissertation and other topics planned by the EDLD faculty.
Outcomes:
EDLD Students will be able to demonstrate understanding of the various seminar topics presented - internships, dissertation, comprehensive exams

ELPS 595 Thesis Supervision (1 Credit Hour)
This course is a Thesis Research and Writing course. Student is engaged in thesis writing and research; and supervised by SOE program faculty. Course outcomes, objectives and assessments are negotiated collaboratively with SOE Supervising faculty member and thesis student. Culminating project is Thesis and thesis defense. Completion of all forms required for thesis completion are the responsibility of SOE graduate student.

ELPS 600 Dissertation Supervision (1 Credit Hour)
This course is a Dissertation Research and Writing course. Student is engaged in dissertation writing and research; and supervised by SOE program faculty. Course outcomes, objectives and assessments are negotiated collaboratively with SOE Supervising faculty member and dissertation student. Culminating project is Dissertation and Dissertation defense. Completion of all forms required for Dissertation completion are the responsibility of SOE graduate student.

ELPS 601 Capstone Supervision (1 Credit Hour)
This course is to develop a Capstone project. Students are engaged in planning and writing of the capstone project; and supervised by SOE program faculty. Course outcomes, objectives and assessments are negotiated collaboratively with SOE Supervising faculty member and capstone student. Culminating project is the Capstone Project and Capstone defense. Completion of all forms required for Capstone completion are the responsibility of SOE graduate student.
Outcomes:
School of Education students will complete and defend their required capstone project for an EdD degree; Students will research, write and defend their capstone project under the supervision of a Capstone Chair and Capstone committee

ELPS 605 Master's Study (1 Credit Hour)
This is Master's study course designed for in-depth study, writing and research.

ELPS 610 Doctoral Study (1 Credit Hour)
Restricted to School of Education Doctoral students (PhD & EdD). This course can only be taken two times during a doctoral student's career.

ELPS 620 Dissertation Research (3 Credit Hours)
Conducting research is a complex, demanding, and time-consuming task. The instructor suggests that while one can be familiar with different paradigms of inquiry, one may not necessarily know how to actually undertake the task of planning and effectively proposing an investigation (Locke, et al, 1987). Others assert that what is important and might be challenging is to frame a valid problem and a specific purpose, in addition to ask the right questions which will give direction to relevant research activities (McEwan & McEwan, 2003). Given the challenge and complexity of designing proposals and conducting research activities, it is anticipated that doctoral students may benefit from additional learning experiences that may lead to the successful completion of their research projects (Ovando, 2010) including a support team to facilitate the task of planning a dissertation proposal. As others note, "Having access to a group of peers who are also engaged in the doctoral studies journey provides an excellent source of moral support. In addition, cohort members provide empathetic listening, share resources and offer honest and constructive feedback" (Ovando, Ramirez & Shefelbine, 2008, p. 45). In the spirit of the writing workshop (Calkins, 1986) and the professional learning community (Kanold, 2010), it is expected that all students will engage in literature searches, scholarly writing, and collaborative inquiry in a respectful and productive way in order to enhance their research capacity (conceptual, technical and interactive skills), attitudes and dispositions. Such engagement will lead to the development of a sound dissertation proposal, CITI research approval as a researcher, and to the preparation for the rigor of conducting investigations The purpose of this seminar is to guide students in the conceptualization of a proposal that ultimately will result in dissertation research project. This is not a research method or research design course, but a course focused on the actual application of research understandings, knowledge, concepts and terminology. Students must have completed the required courses: Qualitative Research (RMTD 420) Quantitative Research (RMTD 421), and possibly the third required specific research methodology course. It is assumed that these research courses provided students with considerable research information, foundational knowledge and conceptual understanding of research methods.

ELPS 621 EdD Capstone Research (3 Credit Hours)
This course focuses on the application of research understandings, knowledge, concepts and terminology so this is an opportunity for students to incorporate research information, foundational knowledge and conceptual understanding of research methods. While the nature of the capstone project is more personal, this scholarly work is a culmination of student learning. 2) Learn, design, and write the initial chapters of their capstone project. 3) Provide meaningful feedback to their peers regarding specific areas of their capstone project development and writing. 4) Understand the importance of the capstone committee chairperson and other members of the committee.
Outcomes:
1) Enhance their research inquiry capacity and ability to critically analyze research proposals, research reports and reviews of literature

ELPS 661 Internship in School Business Management I (3 Credit Hours)
This required semester-long internship course (16 week) in the Chief School Business Official's Endorsement (CSBO) program supports the development of Ignatian servant-leaders in public schools and school district communities. Integrity and professional competence are demonstrated as candidates show their understanding of the basic concepts; best practices; and requisite dispositional capacities related to ethical school business management. Approval of ADSU Program Director. Limited to 6 students per semester.
Outcomes:
Gain practical experience within the school district business environment; acquire knowledge of the industry in which the internship is done; and apply knowledge and skills learned in the classroom in a work setting

ELPS 662 Internship in School Business Management II (3 Credit Hours)
This required semester-long internship course (16 week) in the Chief School Business Official's Endorsement (CSBO) program supports the development of Ignatian servant-leaders in public schools and school district communities. Integrity and professional competence are demonstrated as candidates show their understanding of the basic concepts; best practices; and requisite dispositional related to ethical school business management. This course completes the state's required two semesters of CSBO Internship. Approval of ADSU Program Director. Limited to 6 students per semester.
Outcomes:
Gain practical experience within the school district business environment; acquire knowledge of the industry in which the internship is done; and apply knowledge and skills learned in the classroom in a work setting

Engineering (ENGR)

Discover, search, courses (p. 2661)!

ENGR 101 Introduction to Engineering Design (4 Credit Hours)
Restricted to Engineering students. This course is the first of four engineering design courses in the Engineering curriculum. Major topics in this course include engineering estimation, three dimensional computer-aided design, 2k factorial design, teamwork, engineering ethics, requirement specifications, and design iteration.
Outcomes:
1) Demonstration of proficiency in engineering design; 2) Application of teamwork principles to an open-ended design project

ENGR 102 Engineering Freshman Seminar (1 Credit Hour)
This seminar offers a shared learning experience with an assignment of a service project and exposure to Industrial Advisory Board members and Loyola administrators and faculty. In addition to providing intellectual enhancement to the program, these seminars give us a time and place to regularly interact. This class is restricted to Engineering freshman.
Outcomes:
Encourage bonding through a service project, stimulate thoughtful interaction, provide connections with the faculty, and connect to the broader industry community

ENGR 201 Experiential Engineering (3 Credit Hours)
Pre-requisites: COMP 170 and (PHYS 112K or PHYS 122) (each with minimum C-); Corequisite: CHEM 171
This course introduces students to environmental, biomedical and computer engineering-based sensors and signal analysis techniques. Major topics in this course include an introduction to common biomedical sensors, electronics, signals, sampling, analog-to-digital conversion, c programming, microcontroller system architectures, and microcontroller programming.
Outcomes:
Provide an experiential environment to learn about instrumentation and sensors in biomedical, computer and environmental engineering; Introduce complex devices and systems to understand, measure and analyze signals

ENGR 311 Engineering Systems I (3 Credit Hours)
Pre-requisites: ENGR 201 with a minimum grade of C-; Restricted to Applied Mathematics and Engineering majors; Concurrent enrollment in MATH 266 (Engineering majors only)
ENGR 311 covers the fundamentals of signal and system analysis, focusing on representations of discrete-time and continuous-time signals and representations of linear, time-invariant systems. Major topics in this course include convolution, Fourier series, Fourier Transform, and unit impulse and unit step functions. Applications are drawn broadly from engineering and physics.
Outcomes:
Understand basic concepts of discrete and continuous time signals; Employ Fourier analysis to analyze simple LTI systems; Proficiently use MATLAB as a numerical analysis tool

ENGR 312 Engineering Systems II (3 Credit Hours)
Pre-requisites: ENGR 311, ENGR 321, (MATH 264 or MATH 266), and COMP 170
Introduces numerical methods and control systems theory. Students are exposed to root finding, numerical integration and differentiation, numerical solutions to ODEs, curve fitting and regression techniques, classical control system theory methods (Laplace transforms and transfer functions, root locus design, Routh-Hurwitz stability analysis, Bode and Nyquist plots) and the state variable method (controllability and observability). Employ the state variable method.
Outcomes:
Understand the concepts of numerical methods, their strengths and weaknesses; Use MATLAB as a numerical analysis tool; Apply Laplace transforms and transfer functions

ENGR 313 Engineering Systems III (3 Credit Hours)
Pre-requisites: ENGR 312 with a minimum grade of C-; Restricted to Applied Math and Engineering majors
This course is an introduction to discrete-time signal processing and system identification. Major topics include the z-transform, infinite/finite impulse response filters, discrete/fast Fourier transform, models of linear time-invariant systems, and parameter estimation methods.
Outcomes:
Reinforce fundamental knowledge of signal processing concepts; Execute discrete-time signal processing techniques; Solve real-world problems through use of modeling, prediction, and estimation methods

ENGR 321 Electronic Circuits & Devices (2 Credit Hours)
Pre-requisites: PHYS 112K or PHYS 122 (minimum C-); Corequisites: ENGR 311 and (MATH 266 or MATH 264)
This course is an introduction to electronic circuits and devices. Major topics in this course include an introduction to Ohm's Law, Kirchhoff's Current Law, Kirchhoff's Voltage Law, Nodal and Loop analysis, Thevenin's and Norton's Theorems, and alternating current steady-state analysis.
Outcomes:
Define and explain the terminology associated with linear circuit theory; Identify and solve linear circuits utilizing the most appropriate method for the analysis

ENGR 322 Chemical & Thermal Processes (3 Credit Hours)
Pre-requisites: (CHEM 171 or CHEM 102), (PHYS 111 or PHYS 121), (PHYS 112K or PHYS 122), and MATH 162 (each with minimum C-)
This course provides an introduction to basic chemical and thermal processes. Major topics include open and closed systems, control volumes, microscopic vs. macroscopic, mass and energy balances, first and second laws of thermodynamics, entropy balance, exergy balance, thermodynamic cycles, thermodynamic property relations, gas laws, and chemical thermodynamics.
Outcomes:
Describe engineering systems and cycles using mass and energy conservation laws, quantify chemical and thermodynamic properties of pure substances, and analyze thermodynamics cycles and processes

ENGR 323 Digital Electronic & Computer Engineering (3 Credit Hours)
Pre-requisites: (PHYS 112K or PHYS 122) and COMP 170 (each with minimum C-); Corequisite: ENGR 324L
This course is an introduction to digital design. Major topics in this course include, but is not limited to, binary conversions, logic gates, combinational logic design, sequential logic design, microprocessor architecture, and an introduction to hardware description languages.
Outcomes:
Understand the fundamental building blocks of digital systems; Understand and apply knowledge in the implementation and design of digital circuits

ENGR 324 Mechanics (3 Credit Hours)
Pre-requisites: (PHYS 111 or PHYS 121), (PHYS 112K or PHYS 122), and (MATH 264 or MATH 266) (each with minimum C-)
Mechanics covers the fundamentals of modeling continuous media. Major topics include stress, strain, and constitutive relations; elements of tensor analysis; basic applications of solid and fluid mechanics; and application of conservation laws to control volumes.
Outcomes:
Construct free-body diagrams to undertake structural analysis; Apply the laws of conservation to solve engineering problems

ENGR 324L Core Engineering Lab (1 Credit Hour)
Pre-requisites: ENGR majors only; Corequisites: ENGR 322, ENGR 323, and ENGR 324
This lab course enables students to experiment with concepts learned in concurrently taken core engineering courses ENGR 322, ENGR 323, and ENGR 324.
Outcomes:
Understand, apply and create an assembly-based program for ARM-based microprocessors; Apply Thermodynamic and Flow principles in an experimental context

ENGR 325 Materials Engineering (3 Credit Hours)
Pre-requisites: ENGR 322 and ENGR 324 (minimum of C-)
This course introduces concepts related to the structure, properties, and processing of materials commonly used in engineering applications. Major topics include material structure, bonding, crystalline and non-crystalline structures, imperfections, properties of metals, metal alloys, ceramics and polymers, phase transformation, and material failures.
Outcomes:
Describe the microscale structure of metals, ceramics, polymers, and composites; quantify and describe relationships among structure, processing, and properties; understand the role of material selection in contemporary engineering design applications

ENGR 341 Medical Device Systems (3 Credit Hours)
Pre-requisites: MATH 266, ENGR 321, ENGR 323, ENGR 324, BIOL 101, and CHEM 171; ENGR majors only; Corequisites: ENGR 325, ENGR 341L, and ENGR 313
The relevant physiology, clinical need, history, and system descriptions of eighteen fundamental medical devices are discussed and analyzed. Students are also introduced to several medical device systems, including medical instruments, electrical stimulators, and combination products. These topics provide a foundational background for medical device product development and regulation.
Outcomes:
Understand and analyze the clinical need and common subsystems underlying eighteen fundamental medical devices; Evaluate the battery requirements for commonly implantable medical devices

ENGR 341L Medical Device Systems Laboratory (1 Credit Hour)
Introduction to the graphical user interface, data acquisition, and sensors of common medical devices. The lab experiments are synchronized with the presentation of medical device topics in ENGR 341. Students also create a software application for a Sponsor from the School of Nursing. Restricted to Engineering majors. Concurrent enrollment in ENGR 341.
Outcomes:
Use common medical devices subsystems, Apply FDA design control principles for creation of a nursing software application and accompanying requirement and design specifications

ENGR 342 Medical Device Software Development I (3 Credit Hours)
Pre-requisites: ENGR 341 and ENGR 341L, each with a minimum grade of C-
This is the second semester of a three-semester Specialty course series for students specializing in Biomedical Engineering. During the first four weeks, students increase their programming skills through exposure to recurrence solving, sorting, and data structures. They then learn how design and verify medical device software using model-based engineering. Restricted to Engineering majors. Concurrent enrollment in ENGR 381.
Outcomes:
Design a medical device through model-based engineering concepts

ENGR 343 Medical Device Software Development II (3 Credit Hours)
Pre-requisites: Restricted to Engineering majors
This is the third semester of a three-semester Specialty course series for students specializing in Biomedical Engineering. During four weeks, students increase their programming skills through exposure to advanced data structures and graph algorithms. Separately, software issues that the Food and Drug Administration considers during medical device submissions are highlighted. ENGR 342 with a minimum grade of C-, concurrent enrollment in ENGR 391.
Outcomes:
Analyze software issues that the FDA considers during medical device submissions; Create user interface and cybersecurity code, according to Requirements Specifications provided by the instructor

ENGR 351 Electronic Circuit Analysis and Design (3 Credit Hours)
Pre-requisites: ENGR 201, ENGR 312, and ENGR 321 (each with minimum of C-); Corequisite: ENGR 351L
A course for engineering students (computer engineering) that introduces advanced topics in the design and analysis of analog and digital electronic circuits. Areas of emphasis include an introduction to semiconductor physics, diodes, BJT transistors, CMOS devices, advanced operational amplifier circuits and frequency response fundamentals.
Outcomes:
Understand and apply fundamental concepts of semiconductor physics; Understand and apply complex models to analyze analog and digital microelectronic circuits

ENGR 351L Circuit Design Laboratory (1 Credit Hour)
Co-requisites: ENGR 351
A lab for engineering students (in the computer engineering specialization) to provide a first experience working with semiconductor devices (such as diodes, BJTs, MOSFETs, and Operational Amplifiers) for the design, creation and analysis of microelectronics using lab instruments.
Outcomes:
Identify integrated circuit design issues and develop applicable solutions; Apply advanced principles in analog circuit design, creation and analysis

ENGR 352 Methods and Algorithms for Computer Engineers (3 Credit Hours)
Pre-requisites: ENGR 351 and ENGR 351L (each with minimum of C-)
ENGR 352 is the second semester course of a three-semester Specialty course series for students specializing in Computer Engineering. The areas of emphasis are the analysis of the methods and algorithms used in computer engineering. The course includes hands-on experiments and a design project related to the computing performance and efficiency improvement of engineering systems
Outcomes:
Evaluate the design and implementation of methods and algorithms in computer engineering; Analyze the performance, efficiency and computational complexities of algorithms using the time-and-space tradeoff

ENGR 353 Programmable Systems (3 Credit Hours)
Pre-requisites: ENGR 352 (minimum C-)
ENGR 353 is the third semester course of a three-semester Specialty course series for students specializing in Computer Engineering. The course consists of an introduction to programmable logic controllers, relays, timers, counters, shift registers, human-machine interfaces and programmable embedded systems. The course includes hands-on experiments and a design project to evaluate the performance and efficiency of programmable systems, related safety issues and hardware troubleshooting for control and automation systems.
Outcomes:
Evaluate the performance and efficiency of programmable controllers, embedded systems and processors; Design modern engineering tools to integrate hardware and software components, and input-output devices used in industries

ENGR 361 Fundamentals of Environmental Engineering (3 Credit Hours)
Pre-requisites: MATH 266, ENGR 322, ENGR 324, and ENGR 325 (each with minimum C-); ENGR majors only; Corequisite: ENGR 361L
This is the first of three Specialization courses in Environmental Engineering. Topics include aquatic chemistry, chemical thermodynamics and kinetics, environmental soil and biogeochemistry, environmental organic chemistry, surface and groundwater hydrology, atmospheric processes, and fate and transport modeling of contaminants in natural and engineered systems.
Outcomes:
Apply principles of environmental engineering to describe and quantify key physical, biological and chemical phenomena in natural and engineered systems

ENGR 361L Fundamentals of Environmental Engineering Lab (1 Credit Hour)
Pre-requisites: ENGR majors only; Corequisite: ENGR 361
This laboratory course introduces students to the analytical techniques such as mass spectrometry and titration, relevant to environmental engineering practice. This course emphasizes the design of field sampling campaigns of water and soil environments and the statistical data analysis of experimentally estimated water and soil parameters.
Outcomes:
Quantify fundamental environmental parameters with emphasis on water quality; Design and conduct a field sampling campaign

ENGR 362 Water & Wastewater Engineering (3 Credit Hours)
Pre-requisites: MATH 266, ENGR 324, and CHEM 171 (each with minimum C-)
Theoretical and conceptual design of systems for treating municipal wastewater and drinking water which include reactor theory, process kinetics, and models. Physical, chemical, and biological processes are presented, including sedimentation, filtration, biological treatment, disinfection, and sludge processing. Re-use of water and waste products are also covered.
Outcomes:
Undertake calculations related to unit processes and undertake the required calculations to design a municipal water and wastewater treatment facility

ENGR 363 Contemporary Environmental Engineering Challenges (3 Credit Hours)
Pre-requisites: MATH 266 and ENGR 324 (minimum C-)
This is the third semester of a three-semester Specialty course series for students specializing in Environmental Engineering. Overview of engineering solutions to present day environmental issues. Technologies focused on the mitigation and adaptation to climate change, the modeling and design of best management practices Overview of engineering solutions to present day environmental issues. Technologies focused on the mitigation and adaptation to climate change, the modeling and design of best management practices for stormwater management, an exploration of conventional and renewable energy technologies and the design of green infrastructure.
Outcomes:
Make aware of present and future environmental challenges; Understand the current methods being employed to tackle current environmental issues

ENGR 381 Biomedical Engineering Capstone Design I (4 Credit Hours)
Pre-requisites: Restricted to Engineering majors; ENGR 341
A major design experience based on the knowledge and skills acquired in earlier course work and incorporating appropriate engineering standards and multiple realistic constraints. Each group is assigned an industry-sponsored medical device software problem to solve. Each week, a medical device product development or regulation topic is also introduced.
Outcomes:
ABET Student Outcome (2): An ability to apply engineering design to produce medical device solutions that meet specified needs with consideration for public health, safety, welfare, and other factors

ENGR 382 Computer Engineering Capstone Design I (4 Credit Hours)
Pre-requisites: Restricted to Engineering majors; ENGR 351
First part of the team-based Capstone Design series for Computer Engineering students. Students focus on the design of an industry-sponsored project with practical, economic, and ethical constraints. They learn the fundamentals of product development, quality, reliability, ethics and project management as it relates to the field of computer engineering.
Outcomes:
ABET Student Outcome (2): An ability to apply engineering design to produce microelectronic solutions that meet specified needs with consideration for public health, safety, welfare, and other factors

ENGR 383 Environmental Engineering Capstone Design I (4 Credit Hours)
Pre-requisites: MATH 266, ENGR 324, and ENGR 322 (each with minimum C-); ENGR majors only
A major design experience based on the knowledge and skills acquired in earlier course work and incorporating engineering standards and multiple realistic constraints. Each group is assigned an environmental engineering industry-sponsored design problem to solve. During the semester, specific environmental design and regulation case studies will be introduced.
Outcomes:
ABET Student Outcome (2): An ability to apply engineering design to produce environmental engineering solution that meet specified needs with consideration for public health, safety, environmental and other factors

ENGR 391 Biomedical Engineering Capstone Design II (4 Credit Hours)
Pre-requisites: Restricted to Engineering majors; ENGR 381 during the same academic year, ENGR 342, concurrent enrollment in ENGR 343
Second semester of a major design experience based on knowledge and skills acquired in earlier course work and incorporating appropriate engineering standards and multiple realistic constraints. Each group continues work on the industry-sponsored medical device projects assigned in ENGR 381. Medical device product development or regulation topics are also introduced.
This course satisfies the Engaged Learning requirement.
Outcomes:
ABET Student Outcome (2): An ability to apply engineering design to produce medical device solutions that meet specified needs with consideration for public health, safety, welfare, and other factors

ENGR 392 Computer Engineering Capstone Design II (4 Credit Hours)
Pre-requisites: Restricted to Engineering majors; ENGR 382 during the same academic year, ENGR 352, concurrent enrollment in ENGR 353
Second semester of a major design experience based on knowledge and skills acquired in earlier course work and incorporating appropriate engineering standards and multiple realistic constraints. Each group continues work on the industry-sponsored design projects assigned in ENGR 382. Computer engineering or professional development topics are also introduced.
This course satisfies the Engaged Learning requirement.
Outcomes:
ABET Student Outcome (2): An ability to apply engineering design to produce computer engineering solutions that meet specified needs with consideration for public health, safety, welfare, and other factors

ENGR 393 Environmental Engineering Capstone Design II (4 Credit Hours)
Pre-requisites: ENGR 383 (minimum C-)
Second semester of a major design experience based on knowledge and skills acquired in earlier course work and incorporating appropriate engineering standards and multiple realistic constraints. Each group continues work on the industry-sponsored design projects assigned in ENGR 383. Environmental engineering or professional development topics are also introduced. ENGR majors only.
This course satisfies the Engaged Learning requirement.
Outcomes:
ABET Student Outcome (2): An ability to apply engineering design to produce environmental engineering solutions that meet specified needs with consideration for public health, safety, welfare, and other factors

ENGR 398 Independent Study (1-3 Credit Hours)
The course enables independent study of selected topics in Biomedical, Computer, and Environmental Engineering, under the supervision of a faculty member. It may be repeated for credit. Restricted to Engineering majors. Permission of Director.
Outcomes:
Application of engineering concepts, and analysis of Biomedical, Computer, or Environmental Engineering systems

English (ENGL)

Discover, search, courses (p. 2661)!

ENGL 100 Developmental Writing (3 Credit Hours)
English 100 is a basic writing course that provides instruction in fundamental composition skills to prepare the student for UCWR 110. The course emphasizes mastery of grammar, usage, and punctuation. Placement required.
Outcomes:
Students will develop skill in: writing with a clear audience and purpose in mind; developing a clearly stated thesis which acts as the governing idea of an essay; writing coherent paragraphs and well-organized longer essays using various invention strategies; using transitions to link ideas; exhibiting a working knowledge of basic grammar, usage, and punctuation conventions

ENGL 102 College Composition ESL 1 (3 Credit Hours)
English 102 is the first of a two-course sequence designed to improve the linguistic abilities of those for whom English is a second language. This course provides grammar and writing instruction for students who require more focused work in revising language usage and composing than English 103 can provide. Placement required.
Outcomes:
Students will develop skill in: writing essays that develop a clearly-stated governing idea and that provide relevant support for that idea; proceeding through all stages of the writing process: prewriting, drafting, and revising, with emphasis on improving language usage; editing their own compositions, and working with other students in peer-editing groups; consistently employing English-language grammar, usage, and punctuation

ENGL 103 College Composition ESL 2 (3 Credit Hours)
English 103 is the second of two courses intended to improve the linguistic abilities of those for whom English is a second language. English 103 stresses the acquisition of necessary language skills in the areas of grammar and usage, comprehension and critical reading, and writing at a level appropriate to university study in an English-speaking country. Placement required.
Outcomes:
Students develop skill in: writing with a clear audience and purpose in mind; developing a clearly stated thesis which acts as the governing idea of an essay; writing coherent paragraphs and well-organized longer essays using various invention strategies; using transitions to link ideas; exhibiting a working knowledge of grammar, usage, and punctuation

ENGL 210 Business Writing (3 Credit Hours)
English 210 provides training and practice in various forms of writing (such as memos, instructions, letters, resumes, proposals, and reports) relevant to students who are considering careers in business.
Outcomes:
Students will demonstrate familiarity with genres and styles of writing commonly used in business, with the stages of the writing process, and with individual and collaborative methods of composing

ENGL 211 Writing for Pre-Law Students (3 Credit Hours)
Pre-requisites: successful completion of UCWR 110
Studies in argument and exposition from a lawyer's perspective for students considering the study of law.
Interdisciplinary Option: Sociolegal Studies
Outcomes:
Students will gain an understanding of the principles involved in writing clear and effective prose for a variety of legal purposes, and be able to apply these principles to their own writing in the field

ENGL 212 Science Writing, Technical Communication, and Problem-Solving in Public (3 Credit Hours)
It doesn't matter how brilliant your work is if no one can understand it. Communication in technical and scientific fields involves presenting solutions to complex problems to a wide variety of audiences. Your research is important and this class is designed to help you better communicate your work and its significance. This course will introduce you to the principles and practices of technical writing, emphasizing clear, concise, and effective communication across contexts. This course focuses on training the skills you need to make your work legible beyond a narrow specialty area. You will learn how to write, design, revise, and analyze technical and scientific documents, including reports, proposals, research grants, instructional guides, and literature reviews. The term will conclude with a poster session, presentation, and research paper. Through hands-on assignments and team-based projects, you will develop the skills to communicate complex information clearly, tailor content to specific audiences, and collaborate effectively.
Outcomes:
Recognize characteristics and conventions of technical writing across fields; Research, analyze, and synthesize technical information; Present research findings and data across a variety of modalities; Develop proficiency in writing about technical topics for a variety of audiences; Design graphics to communicate technical, scientific, and statistical information; Deliver effective technical presentations; Develop an understanding of collaborative team dynamics, including conflict resolution; Write clear, concise, correct, and professional prose

ENGL 220 Theory and Practice of Tutoring Writing (3 Credit Hours)
This seminar explores Writing Center pedagogical theory and practice. It includes a community-based service-learning component that involves community-service, professional development, leadership development, civic engagement, and cross-curriculum collaboration on a daily basis to continually improve the quality of the writing tutoring services.
This course satisfies the Engaged Learning requirement.

ENGL 271 Exploring Poetry (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
The course will survey British and American poetry, especially from the Romantic movement on, especially of lyric kinds. Class discussion will generally focus on the form and sense of individual poems, and will in general be about poetic ways of meaning, and individual poets' understandings of what poetry is and what it is to do.
Knowledge Area: Tier 2 Literary Knowledge
Course equivalencies: ENGL 271/ACENG 271
Outcomes:
Students will be able to demonstrate an understanding of significant poems by selected British and American poets, demonstrate an understanding of basic critical terminology, and demonstrate an understanding of relevant critical perspectives on poetry

ENGL 272 Exploring Drama (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
This course focuses on the understanding, appreciation, and criticism of drama; extensive readings and several critical analyses are required. Students will also be able to demonstrate understanding of how plays are constructed in different ways to serve different purposes.
Knowledge Area: Tier 2 Literary Knowledge
Outcomes:
Students will be able to demonstrate understanding of drama's ability to express the deepest and most complex feelings and concerns of human beings as individuals, as family members, and as members of society: the individual's place in the universe, in relation to others, and in relation to the socio-political system that he or she inhabits

ENGL 273 Exploring Fiction (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
This course focuses on the understanding, appreciation, and criticism of prose fiction.
Knowledge Area: Tier 2 Literary Knowledge
Course equivalencies: ENGL 273/ACENG 273
Outcomes:
Students will be able to demonstrate understanding of fiction as a means of exploring human experience and understanding the creative process, and be able to use the technical vocabulary necessary for understanding fiction

ENGL 274 Exploring Shakespeare (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
This course focuses on the works of Shakespeare as literature and as theatre, covering at least three of the four genres (comedy, history, tragedy, romance).
Knowledge Area: Tier 2 Literary Knowledge
Course equivalencies: ACENG 274 / ENGL 274
Outcomes:
Students will be able to demonstrate understanding of the theatrical and poetic works of Shakespeare, such elements of drama as plot, character, theme, imagery, and verse forms, as well as the personal, political and theatrical world in which Shakespeare lived and worked

ENGL 282 African-American Literature (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
This course focuses on the development of the African American literary tradition from the emergence of the slave narrative to the contemporary present.
Knowledge Area: Tier 2 Literary Knowledge
Interdisciplinary Option: African Studies and the African Diaspora
Course equivalencies: ENGL 282 / ACENG 282
Outcomes:
Students will be able to discuss the significance of major African American literary movements and the contributions of representative writers from these periods

ENGL 282B African-American Literature 1700-1900 (3 Credit Hours)
This course focuses on the development of the African American literary tradition from the emergence of slave narrative to the contemporary present. This particular version of the course focuses on material within the time period 1700-1900.
Knowledge Area: Tier 2 Literary Knowledge
Interdisciplinary Option: African Studies and the African Diaspora, Race and Ethnicity
Outcomes:
Students will be able to discuss the significance of major African American literary movements and the contributions of representative writers from these periods

ENGL 282C African-American Literature since 1900 (3 Credit Hours)
This course focuses on the development of the African American literary tradition from the emergence of slave narrative to the contemporary present. This particular version of the course focuses on material since 1900.
Knowledge Area: Tier 2 Literary Knowledge
Interdisciplinary Option: African Studies and the African Diaspora
Outcomes:
Students will be able to discuss the significance of major African American literary movements and the contributions of representative writers from these periods

ENGL 283 Women in Literature (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
This course focuses on the representation of women in literature, as discussed in a variety of literary works.
Knowledge Area: Tier 2 Literary Knowledge
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: ENGL283/WOST283/WSGS283
Outcomes:
Students will be able to demonstrate understanding of the representations of women in various periods of literary history and diverse cultural contexts

ENGL 284 Asian American Literature (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
This course introduces the range of Asian American literature from its earliest works around the turn of the 20th century to its proliferation in contemporary literature.
Knowledge Area: Tier 2 Literary Knowledge
Interdisciplinary Option: Race and Ethnicity
Outcomes:
Students will trace major developments in Asian American literature, recognize the diversity of Asian American identities and histories, and apply key concepts and historical contexts from Asian American culture

ENGL 287 Religion and Literature (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
This course introduces the study of literature and religion as a contemporary field of inquiry. It aims to explain and illustrate the nature and theoretical strategies of a religious literary criticism, and to encourage an appreciation of this valuable and productive way of reading.
Knowledge Area: Tier 2 Literary Knowledge
Interdisciplinary Option: Catholic Studies
Outcomes:
Students will be able to use the technical vocabulary necessary for discussing literary representations of religious and spiritual experience

ENGL 288 Nature in Literature (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
This course focuses on the relationship of human beings and the environment in which they function, as represented in a variety of literary works.
Knowledge Area: Tier 2 Literary Knowledge
Interdisciplinary Option: Peace, Justice, and Conflict Studies
Course equivalencies: X-ENGL288/ESP 288/PAX 288
Outcomes:
students will be able to demonstrate understanding of the representations of ""nature"" in various periods of literary history and diverse cultural contexts

ENGL 290 Human Values in Literature (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
This variable topics course focuses on a perennial psychological or philosophical problem facing the individual as exemplified in literary works, e.g., the passage from innocence to experience, the problem of death, and the idea of liberty.
Knowledge Area: Tier 2 Literary Knowledge
Course equivalencies: ACENG 276 / ENGL 290
Outcomes:
Students will be able to demonstrate understanding of the ability of literature to express the deepest and most abiding concerns of human beings, and how literary works come to be

ENGL 292 South Asian Literature and Civilizations (3 Credit Hours)
Pre-requisites: UCLR 100, UCLR 100C, UCLR 100E, UCLR 100M, or equivalent; please check requirements for declared majors/minors for exceptions
An introduction to South Asian literatures and civilizations, from ancient to contemporary times, with attention to social institutions, religious practices, artistic achievements, literature, and modern challenges.
Interdisciplinary Option: Global Studies
Outcomes:
Students will gain an understanding of the cultures and civilizations of South Asia

ENGL 293 Advanced Writing (3 Credit Hours)
Pre-requisites: UCWR 110 or equivalent (grade of C- or higher)
This advanced writing course will focus on scholarly theories about the practice and process of writing. Course work will center on students' reconsiderations of their own writing processes in the context of scholarly composition theory.
Outcomes:
Students will develop and demonstrate theoretical knowledge of advanced strategies for producing academic writing

ENGL 294 Writing in/with New Media (3 Credit Hours)
Pre-requisites: UCWR 110 or equivalent, grade of C- or higher
This advanced writing course will consider how communication is mediated and remediated in the digital age, and draw connections between historical moments of print culture with that of contemporary technological advancement. Writing will engage emerging digital genres (websites, blogs, memes), digital storytelling, multimodal composition, and social media.
Outcomes:
Learn terms/theories/concepts of new media historically and in the present; identify interactions between new media, writing, and other disciplines; effectively move a piece of writing from concept to revision

ENGL 295 Writing Toward Social Justice: Eloquentia Perfecta (3 Credit Hours)
Pre-requisites: UCWR 110 or equivalent, grade of C- or better
Course will address problems of community concern through Jesuit rhetorical practice, with basis in thinking, acting and reflecting. Students will learn how to write and speak in a variety of outward-facing modalities. They will work in partnership with a local community organization, applying techniques and practices learned in the classroom. This course satisfies the Engaged Learning requirement.
Outcomes:
Reflection: personal concerns and values; Community organization collaboration: writing and presentation projects; Peer review and group writing; Proficiency in modalities: op-ed pieces, funding requests, promotional writing, multimodal presentations, grant writing

ENGL 296 Research Writing: Open Source Tools and Techniques (3 Credit Hours)
Pre-requisites: UCWR 110 or equivalent; COMP 141 or instructor permission
This course trains students in free, open-source, and text-based software to support clear, well-organized, accurate, and verifiable writing in academic contexts. The software tool-chain includes Zotero, LaTeX, Pandoc, and Git. Key writing skills are note-taking, information management, and revision.
Course equivalencies: X - COMP 250 / ENGL 296
Outcomes:
Students will acquire working knowledge of text-based and open-source software tools to support academic research and writing; Students will create researched arguments that are clear, well-organized, accurate and verifiable

ENGL 299 Topics in Advanced Writing (3 Credit Hours)
Pre-requisites: UCWR 110
This is a course in writing clear and effective prose in whatever form/genre is being studied; the subtitle will define the form/genre more precisely.
Outcomes:
Students will gain an understanding of the principles involved in writing clear and effective prose in whatever form/genre is under study, and be able to apply these principles to their own writing in this form/genre

ENGL 300 History of English Language (3 Credit Hours)
Study of the origin and development of English: its sounds, word-forms, and syntax.
Outcomes:
Students will demonstrate knowledge of the history of English and some understanding of linguistic theory

ENGL 303 Grammar: Principles & Pedagogy (3 Credit Hours)
A study of English grammar focusing on linguistic applications such as the teaching of Standard American English to native and non-native speakers, to speakers of Ebonics, and other classroom applications. Required for students planning to teach high school English, but open to others.
Outcomes:
Students will demonstrate understanding of grammar and sentence structure sufficient to teach them

ENGL 306 Studies in Women Writers (3 Credit Hours)
This course investigates significant issues raised in and by women-authored works. Readings may cover fiction, drama, and/or poetry from any literary period.
Interdisciplinary Option: Women & Gender Studies
Outcomes:
Students will gain knowledge about women's lives and writings; will understand the difference gender makes to the writing, reading, and interpretation of literature; and will acquire the critical vocabulary that will enable them to describe and analyze, and formulate arguments about, women-authored literature

ENGL 306A Studies in Women Writers Before 1700 (3 Credit Hours)
This course investigates significant issues raised in and by women-authored works. Readings may cover fiction, drama, and/or poetry from before 1700.
Interdisciplinary Option: Women & Gender Studies
Outcomes:
Students will gain knowledge about women's lives and writings; will understand the difference gender makes to the writing, reading, and interpretation of literature; and will acquire the critical vocabulary that will enable them to describe and analyze, and formulate arguments about, women-authored literature

ENGL 306B Studies in Women Writers 1700-1900 (3 Credit Hours)
This course investigates significant issues raised in and by women-authored works. Readings may cover fiction, drama, and/or poetry within the period from 1700-1900.
Interdisciplinary Option: Women & Gender Studies
Outcomes:
Students will gain knowledge about women's lives and writings; will understand the difference gender makes to the writing, reading, and interpretation of literature; and will acquire the critical vocabulary that will enable them to describe and analyze, and formulate arguments about, women-authored literature

ENGL 306C Studies in Women Writers Since 1900 (3 Credit Hours)
This course investigates significant issues raised in and by women-authored works. Readings may cover fiction, drama, and/or poetry since 1900.
Interdisciplinary Option: Women & Gender Studies
Outcomes:
Students will gain knowledge about women's lives and writings; will understand the difference gender makes to the writing, reading, and interpretation of literature; and will acquire the critical vocabulary that will enable them to describe and analyze, and formulate arguments about, women-authored literature

ENGL 307 Topics in Feminist and Gender Studies (3 Credit Hours)
This course is an intensive study of selected issues in women's studies or gender studies in relation to literature.
Interdisciplinary Option: Women & Gender Studies
Course equivalencies: X-ENGL307/WOST307/WSGS307

ENGL 311 U.S. Latino/a Literature (3 Credit Hours)
Pre-requisites: UCWR 110 plus one 200-level ENGL course
Students will study literature by U.S. Latino and Latina writers (esp. Mexican American, Puerto Rican, Dominican American, and Cuban American). Readings will highlight the variety of aesthetic styles and cultural points of view that characterize this rapidly growing field. Issues like language (bilingualism, translation, and code-switching), immigration, nationalism, transnationalism, and citizenship will be especially important.
Interdisciplinary Option: Latin American Studies
Outcomes:
Students will develop analytical tools, culturally-specific terms, and critical questions to help them to interpret and to write about Latino/a literature

ENGL 312 Studies in World Literature in English (3 Credit Hours)
Pre-requisites: UCWR 110 and a 200-level English course
This course adopts a transnational, trans-historical approach to Anglophone world literatures. Readings may include global, postcolonial, and/or diasporic literatures in English.
Interdisciplinary Option: Global Studies
Outcomes:
Students will develop analytical tools, culturally-specific terminology, and critical questions to enable them to interpret and formulate arguments about global English-language literatures

ENGL 312A Studies in World Literature in English Before 1700 (3 Credit Hours)
This course will introduce students to a range of critical and theoretical approaches to the study of world literatures in English. Authors studied may include leading theorists like Frantz Fanon, Edward Said, Gayatri Spivak, Homi Bhabha, Paul Gilroy, and Arjun Appadurai; and literary writers before 1700.
Outcomes:
Students will be able to demonstrate understanding of the critical skills and theoretical insights necessary for discussing, analyzing and formulating arguments about world literatures in English

ENGL 312B Studies in World Literature in English 1700-1900 (3 Credit Hours)
This course will introduce students to a range of critical and theoretical approaches to the study of world literatures in English. Authors studied may include leading theorists like Frantz Fanon, Edward Said, Gayatri Spivak, Homi Bhabha, Paul Gilroy, and Arjun Appadurai; and literary writers within the period of 1700-1900.
Interdisciplinary Option: Global Studies
Outcomes:
Students will be able to demonstrate understanding of the critical skills and theoretical insights necessary for discussing, analyzing and formulating arguments about world literatures in English

ENGL 312C Studies in World Literature in English Since 1900 (3 Credit Hours)
This course will introduce students to a range of critical and theoretical approaches to the study of world literatures in English. Authors studied may include leading theorists like Frantz Fanon, Edward Said, Gayatri Spivak, Homi Bhabha, Paul Gilroy, and Arjun Appadurai; and literary writers since 1900.
Interdisciplinary Option: Global Studies
Outcomes:
Students will be able to demonstrate understanding of the critical skills and theoretical insights necessary for discussing, analyzing and formulating arguments about world literatures in English

ENGL 313 Border Literatures (3 Credit Hours)
This course will survey a range of contemporary fiction that crosses national, cultural, social, political and personal borders. The study of border literatures will vary, and may include Hispanic-American writers, the Caribbean poet, Derek Walcott, and other literatures that move between disparate locations (England, India, Africa, Burma, etc.).
Interdisciplinary Option: Global Studies, Race and Ethnicity
Outcomes:
Students will be able to demonstrate familiarity with contemporary theoretical approaches, and to analyze texts that demonstrate how personal, cultural, and political identities develop in transnational contexts

ENGL 313A Border Literature Before 1700 (3 Credit Hours)
This course will survey a range of contemporary fiction that crosses national, cultural, social, political and personal borders. The focus of the study of border literatures before 1700 will vary, and may include various writers in literatures that move between disparate locations (England, the Americas, India, Africa, Burma, etc.).
Outcomes:
Students will be able to demonstrate familiarity with contemporary theoretical approaches, and to analyze texts that demonstrate how personal, cultural, and political identities develop in transnational contexts

ENGL 313B Border Literature 1700-1900 (3 Credit Hours)
This course will survey a range of contemporary fiction that crosses national, cultural, social, political and personal borders. The study of border literatures from within this period will vary, and may include various writers in literature that move between disparate locations (England, the Americas, India, Africa, Burma, etc.).
Outcomes:
Students will be able to demonstrate familiarity with contemporary theoretical approaches, and to analyze texts that demonstrate how personal, cultural, and political identities develop in transnational contexts

ENGL 313C Border Literature Since 1900 (3 Credit Hours)
This course will survey a range of contemporary fiction that crosses national, cultural, social, political and personal borders. The focus of the study of border literatures from within this period will vary, and may include various writers in literatures that move between disparate locations (England, the Americas, India, Africa, Burma, etc.).
Outcomes:
Students will be able to demonstrate familiarity with contemporary theoretical approaches, and to analyze texts that demonstrate how personal, cultural, and political identities develop in transnational contexts

ENGL 315 South Asian Literatures in English (3 Credit Hours)
This course focuses on the study of literature written in English from South Asia and the South Asian diaspora. Authors studied may include Narayan, Naipaul, Desai, Sidhwa, and Rushdie.
Interdisciplinary Option: Asian Studies, Global Studies
Outcomes:
