**Chicago-Growth of a Metropolis**

This course explores the development of Chicago metropolitan region from the 1830s to the present day. Students will explore the urban area not only through texts, but also through fieldwork.

Outcome: Students will be able to demonstrate understanding of the geography, history and people of the Chicago metropolitan region.

**Components:** Lecture(In person)  
**Course Equivalents:** SOCL 125  
**Req. Designation:** Service Learning / Internship

**Social Welfare Policy & Serv I**

Prerequisite: sophomore standing. Analysis of institutional structures of welfare as they relate to social problems. Selected major values and interests in American society are used to analyze the social welfare institution.

Students will be able to describe and analyze current social welfare policies and social services within a historical, societal and political context.

**Components:** Lecture(In person)  
**Course Equivalents:** SOWK 201

**City, Suburbs & Beyond**

Study of the historical emergence of cities, focusing on the ecological, demographic, and organizational processes involved in the continuing growth and change of metropolitan areas and in the relationship of a metropolitan area to the surrounding region.

Outcome: Students will understand fundamental facts and theories about the character and development of cities and urban regions.

**Components:** Lecture(In person)

**Urban Economics**

Prerequisites: Sophomore standing, minimum grade of "C-" in ECON 201 and 202.

This course analyzes the economic role and functioning of cities and examines urban issues such as real estate markets, transportation, economic development, and crime.

Outcome: Students will understand the economic forces that shape urban agglomerations. Students will understand the economic and ethical trade-offs of various urban economic policies. They will be able to think critically about the economic forces that make a city grow and contract over time.

**Components:** Lecture(In person)  
**Course Equivalents:** ECON 320

**History of Mathematics for Middle Grade Teachers**

This course will provide a thematic approach to the history of mathematics with emphasis on contributions by noted mathematicians, mathematical societies and scientists highlighting women and under-represented populations. The history of numbers and numerals, computation, geometry, algebra, trigonometry, calculus, and science patterns will be explored emphasizing the contributions of the Babylonian, Egyptian, Chinese, and Roman civilizations as well as such individuals as Euclid, Fermat, Archimedes, Kepler, Pythagoras, Euler, Hypatia, Sonjs Kovalevsky, Emmy Noether and others as appropriate. The influence of technology and its applications will also be presented as appropriate.

Outcome: Students will obtain a unique historical perspective on the various areas of mathematics that are studied in the middle grade mathematics curriculum.

**Methods in Operations Research**

Prerequisite: MATH 212; STAT 203 or 335

This course provides an introduction to linear, integer, and non-linear programming, queuing theory, and game theory, with emphasis on applying the associated mathematical models to problems in economics, business, finance, and the behavioral sciences.

Outcome: Students will obtain a broad background in the methods of operations research that will allow them to apply these methods in a variety of areas.

**Introduction to Probability & Statistics**  
 This course is a Calculus-based rigorous introduction to basic topics in probability (distributions, expectations, variance, central limit theorem and the law of large numbers, moment generating functions, etc.) and statistics (estimation, hypothesis testing, regression, design of experiments) needed in engineering and science applications.

Prerequisite: MATH 132 or 162 (with grade of C or better)

Outcomes: The students will obtain required knowledge in probability and statistics useful in every area of engineering and science. They will learn how to assess data and outcomes of experiments.

Components: Lecture  
 Requirement Group: Pre-requisite: MATH 132 or MATH 162

**SAS Programming & Applied Statistics**  
Prerequisite: STAT 103 or 203 or 335

This course provides an introduction to SAS programming in the context of practical problems taken from applied statistics.

Outcome: Students obtain extensive experience with data-set manipulations, SAS procedures, and their application in contexts such as t-tests, simple and multiple regression, ANOVA, and regression.

**Components:** Lecture  
**Requirement Group:** Prerequisite: STAT 103 or 203 or 335  
**Req. Designation:** Honors  
**Room Requirements:** General Classroom(1)**STAT 304(3)** **Course ID:006770** **06-JUN-2018**  
**Introduction to Probability**  
Prerequisite: MATH 263

This course provides a calculus based introduction to probability theory, including topics such as combinatorial analysis, random walk, conditional probability, and a variety of statistical distributions.

Outcome: Students obtain the theoretical background in probability needed for further study in probability and statistics.

**Components:** Lecture  
**Course Equivalents:** MATH 304  
**Requirement Group:** Prerequisite: Completion of Math 263  
**Req. Designation:** Honors  
**Room Requirements:** General Classroom(1)**STAT 305(3)** **Course ID:006771** **06-JUN-2018**  
**Introduction to Mathematical Statistics**  
This course is a continuation of STAT 304 and applies the techniques of calculus and probability to the study of advanced topics in statistics.

Outcome: Students obtain the theoretical background in statistics needed for graduate level work in probability and statistics.

**Components:** Lecture  
**Course Equivalents:** MATH 305  
**Requirement Group:** Prerequisite: STAT 304  
**Req. Designation:** Honors  
**Room Requirements:** General Classroom(1)**STAT 306(3)** **Course ID:006772** **06-JUN-2018**  
**Intro to Stochastic Processes**  
Prerequisite: MATH 212; STAT 203 or 335

This course discusses topics such as finite-state Markov processes and Markov chains, classification of states, long-run behavior, continuous time processes, birth and death processes, random walks, and Brownian motion.

Outcome: Students will obtain a background in stochastic processes that will allow them to apply them in areas like genetics, population growth, inventory, cash management, and gambling theory.

**Components:** Lecture

College of Arts and Sciences - Neuroscience - Subject: Neuroscience**NEUR 300(1) Course ID:005481 15-JUN-2017****Seminar in Neuroscience**

Prerequisites: BIOL 202 or PSYC 202

The seminar introduces students to the interdisciplinary nature of modern neuroscience with an emphasis on the various neuroscience research activities that take place at Loyola University Chicago, and reviews current neuroscience research topics. NEUR 300 is cross-listed with BIOL 303.

Outcome: Students will demonstrate understanding of the interdisciplinary and multidisciplinary nature of modern neuroscience, and the research questions and experimental approaches used at the Lakeshore and Medical Center campuses. Students will complete one midterm essay and one final essay exam that will reflect their understanding of the topics discussed in the seminars.

**Components:** Seminar

Prerequisites: BIOL/PSYC 240 or BIOL 284/PSYC 382 and students must be either a Molecular/Cellular Neuroscience Major, a Cognitive/Behavioral Neuroscience major, or a Neuroscience Minor.

Students will be trained in various anatomical, physiological, behavioral, and neurobiological modeling techniques used to study the nervous system and the brain in the laboratory. NEUR 301 is cross-listed with BIOL 373 & PSYC 388.

Outcome: Students will demonstrate understanding of several research designs and methodologies of use in neuroscience research and will gain experience with basic neuroscience laboratory techniques. Students will complete experiments as assigned and will be responsible for timely reports reflecting the outcome of a set

Students will receive additional training and experience in specialized laboratory methods and techniques used by Loyola faculty in their Neuroscience research.

Outcome: Students will have the opportunity to conduct independent research projects in faculty and student laboratories. This experience will help prepare them to contribute creatively to neuroscience research. Students will be assessed as to the quality of 3 items: 1) a written proposal for the independent research project; 2) a 'meeting quality' scientific poster; and 3) a written 'publication quality' scientific paper summarizing the work done for the independent research project.

**Catholicism, Islam and Democracy**

Prerequisites: Sophomore status

This course comparatively explores themes related to the process of democratization in Catholic and Muslim settings. The second half of the 20th century saw significant and sustainable expansion of political rights and civil liberties especially in predominantly Catholic countries in Europe and Latin America. Most recently, democratic struggles have gained impetus in several Muslim countries in the Middle East and South-East Asia. Particularly interesting is the transformation of religious actors (e.g., the Catholic Church, clergy, non-governmental organizations, political parties) from bastions of authoritarian status quo into supporters of progressive political change.

**Seminar in Cognitive Neuroscience**

The way that information is represented and processed in the brain is central to a broad range of topics in psychological science. In this course we will consider how the methods of cognitive neuroscience including brain imaging (e.g., EEG/ERP, fMRI) and dissociation-based techniques such as neuropsychology and TMS, have revolutionized the exploration of these topics. We will pay particular attention to how these techniques can be used to understand higher-level cognition during development and in questions related to social psychology and psychopathology. Class participants will be introduced to these techniques, read, critique and present results from the primary literature, and also have an opportunity to develop ideas using these methods relating to their own research interests.

**Methodologies in Women's Studies and Gender Studies**

Over the last decades, issues of gender and sexuality have become integral parts of the academic enterprise. This class investigates how ideas about women, gender, and sexuality have developed, paying particular attention to how knowledge itself has been defined in terms of gender. The course explores the three foundational dimensions of feminist practice: (1) consciousness of inequality, (2) critical analysis of structures of inequality, and (3) transformation of both consciousness and structures of inequality to mutuality. Topics include a brief history and overview of feminist theory, the search for a feminist epistemology, the assessment of various research methods as employed by feminist scholars, and the actual practice of feminist research.

**System Consultation in School Discipline Reform**

The purpose of this course is to integrate and apply two interrelated broad literature bases within the field of education: (1) system change and data analysis literature informing best practices in analyzing system school data and needs assessment findings and using the findings to plan for system level discipline change; and (2) best practices in the school leadership and teaming to effect system level reform in school discipline. The focus of the course will be on the systems change process as it relates to the issue of school discipline. Through the course, students will gain skills and experience reviewing and analyzing school and district-level data, and they will develop and administer a needs assessment tool relating to school discipline and multi-tiered systems of support in their respective settings. They will also analyze system level variables, which have historically prevented true discipline reform (e.g., unreliable data collection systems, poorly structured teaming, access to systematic and ongoing professional development and

**Single Subject Design**

Prerequisite: RMTD 400

This course will introduce students to single-case experimental designs as they apply to research and practice in special education and other educational settings. Methods for single-case experiments are applicable to monitoring response to intervention as well as research on low-incidence conditions. Students will learn to critique single-subject experimental research studies and to design studies to monitor treatment interventions in educational settings.

**Bringing Language, Learning & Dev Theory into Practice**  
 In this module, students will observe and learn key principles and stages developmental and learning theories via clinical experiences in birth to grade 12 settings (including infant/toddler, preschool, elementary, middle, and high schools). The primary focus of these experiences is to explore the ways in which physical characteristics, communication skills, cognitive capacities, and social-emotional needs of children be used to understand theory and inform adult-child interaction and developmentally appropriate pedagogical practices in birth to grade 12 settings with both typically and atypically developing children.

Outcomes: Through guided observation, students will explore the ways in which social, cultural, and environmental contexts shape the development and cognitive processing at each age, and use this knowledge to inform recommendations for developmentally appropriate adult-child interaction and pedagogical practices with

This module is specifically designed for candidates to appreciate, discern and utilize the individual needs of students to plan instruction and support student achievement. In this module, student achievement is not only conceptualized as academic, but also social, emotional, behavioral, cultural and linguistic; in this way, candidates will explicitly focus on the multifaceted nature of planning for students with special needs and those who have been labeled as ELL. Through the use of case study research to collect individualized, authentic language and literacy assessment with one student, candidates will apply learning to the specific instructional context of a student who qualifies with at least one of the following labels: (a) student with special needs, (b) English language learner, or (c) struggling reader.

**Language and Literacy for Diverse Students**

This module (course) introduces teacher candidates (students) to essential foundations in teaching reading. Emphasized will be skills developmentally appropriate for the candidate's teaching endorsement level including phonological awareness, phonics, vocabulary, fluency and text comprehension. A balance of instructional practices appropriate for a variety of narrative and informational texts will be included.

Outcomes: Teacher candidates (students) will learn to design and teach lessons, focusing on standards based reading skills to linguistically diverse students, through use of research based reading strategies.

**Components:** Field Studies(In person)  
**Requirement Group:** Prerequisite: TLSC 220. Corequisites: TLSC 320 and 330. TLSC 310, 320 and 330 must be taken together.

**TLSC 478(1) Course ID:013137 24-APR-2015****Professional Learning IB MYP**

In this course, candidates conduct an IB Impact on Student Learning project in which they implement the MYP unit designed in TLSC 476 and TLSC 477. Prerequisites: TLSC 475 and TLSC 476.

Candidates carry out their instructional unit and evaluate their teaching based on post-assessment results.

**Components:** Lecture(Online)  
**Requirement Group:** Prerequisites: TLSC 475 & TLSC 476  
**Req. Designation:** Fieldwork  
**Room Requirements:** Classroom Not Needed(1)

ENGR 100(1) Course ID:013444 15-APR-2017  
**Engineering Design Fundamentals**  
 Restricted to students transferring into Engineering Science.

This course provides an introduction to engineering design for students transferring into Engineering Science, who have completed an external Engineering Graphics course. Major topics include engineering estimation, 2k factorial design, teamwork, engineering ethics, and requirement specifications.

Outcomes: Demonstration of proficiency in engineering design.

**Components:** Lecture(In person)  
**Requirement Group:** Restricted to Engineering Science students  
**Req. Designation:** Fieldwork  
**Room Requirements:** ENGR Design Lab(1)

---

ENGR 101(4) Course ID:013070 02-MAY-2015  
**Introduction to Engineering Design**  
 Restricted to School of Engineering students.  
 This course is the first of four engineering design courses in the Engineering Science curriculum. Major topics in this course include engineering estimation, three dimensional computer-aided design, 2k factorial design, teamwork, engineering ethics, requirement specifications, and design iteration.

Outcomes:

1. Demonstration of proficiency in engineering design.
2. Application of teamwork principles to an open-ended design project.

**Components:** Lecture(In person)  
**Requirement Group:** Restricted to Engineering Science Majors  
**Req. Designation:** Fieldwork  
**Room Requirements:** ENGR Design Lab(1)

ENGR 102(1) Course ID:013206 03-NOV-2015  
**Engineering Science Freshman Seminar**  
 This seminar offers a shared learning experience with an assignment of a service project and exposure to Industrial Advisory Board members and Loyola administrators and faculty. In addition to providing intellectual enhancement to the program, these seminars give us a time and place to regularly interact. This class is restricted to Engineering Science freshman.

Outcomes: Encourage bonding through a service project, stimulate thoughtful interaction, provide connections with the faculty, and connect to the broader industry community.

**Components:** Seminar(In person)  
**Requirement Group:** Prerequisite: ENGR 101 with a minimum grade of "C-"; Restricted to Engineering Science freshman students  
**Req. Designation:** Fieldwork

Engineering Science - Engineering Science - Subject: Engineering**ENGR 201(3)** Course ID:013143 15-JUN-2017**Experiential Engineering**

Restricted to School of Engineering students. Prerequisites: ENGR 101, COMP 170, PHYS 112K; Co-requisite: CHEM 171

This lab course introduces students to data acquisition and analysis techniques. Major topics in the course include common sensor types, the Nyquist Sampling Theorem, analog-to-digital conversion, microcontroller system architectures, microcontroller programming, linear regression, and Bland-Altman analysis

## Outcomes:

1. Implementation of physiologic data acquisition using a microcontroller.
2. Analysis of sensor data to characterize a physical system.

**Components:** Laboratory(In person)**Requirement Group:** Prerequisites: ENGR 101, COMP 170, PHYS 112K Co-requisite: CHEM 171**Req. Designation:** Fieldwork**Room Requirements:** Lab - Computer(1)

**ENGR 311(3)** Course ID:013144 01-MAY-2015**Engineering Systems I**

Restricted to School of Engineering students. Prerequisite: ENGR 201. Corequisite: MATH 266

This lecture course introduces students to continuous-time linear time-invariant systems. Major topics in this course include convolution, Fourier series, Fourier Transform, unit impulse and unit step functions, and first-order and second-order systems.

## Outcomes:

1. Analysis of first-order and second-order continuous systems in the frequency domain.

**Components:** Lecture(In person)**Requirement Group:** Prerequisite: ENGR 201, Co-requisite: Math 266**Req. Designation:** Fieldwork**Room Requirements:** Electronic Classroom(1)

---

**ENGR 312(3)** Course ID:013145 01-MAY-2015**Engineering Systems II**

Restricted to School of Engineering students. Prerequisite ENGR 311.

This lecture course introduces students to control system theory. Students are exposed to classical methods (Laplace transforms and transfer functions, root locus design, Rough-Hurwitz stability analysis, Bode and Nyquist plots) and the state variable method (controllability and observability).

## Outcomes:

1. Design of a stable system using proportional-integral-derivative (PID) control.

**Components:** Lecture(In person)**Requirement Group:** Prerequisite ENGR 311**Req. Designation:** Fieldwork**Room Requirements:** Electronic Classroom(1)

---

**ENGR 313(3)** Course ID:013146 01-JAN-2018**Engineering Systems III**

Restricted to School of Engineering students. Prerequisite ENGR 312.

This lecture course introduces students to discrete signal processing and linear system identification. Major topics include z transforms, the bilinear transform, the autoregressive moving average with exogenous input (ARMAX) model, frequency selective filters, Least-Squares Method and Maximum Likelihood Method.

## Outcomes

Parsimonious estimation of the parameters in a linear system.

**Components:** Lecture(In person)**Requirement Group:** Prerequisite ENGR 312**Req. Designation:** Fieldwork**Room Requirements:** Electronic Classroom(1)

**Electronic Circuits and Devices**

Restricted to School of Engineering students.

Prerequisites: ENGR 201, PHYS 112K

Co-requisite: ENGR 311 &amp; MATH 266

This course introduces students to electrical, magnetic, diode, and transistor circuits. Major topics include nodal and loop analysis; Thevenin's and Norton's Theorems; alternating current steady-state analysis; magnetically coupled networks; and large and small signal analysis of diode and transistor circuits. The classroom has been flipped, which enables students to learn material through video instruction and practice circuit analysis during designated-classroom time.

**Components:** Lecture(Blended)  
**Requirement Group:** Prerequisites: ENGR 201, PHYS 112K Co-requisite: ENGR 311 & MATH 266  
**Req. Designation:** Fieldwork

**Chemical & Thermal Processes**

Restricted to School of Engineering students. Prerequisites: ENGR 321. Co-requisite: ENGR 324L.

This course introduces students to basic chemical and thermal processes, expressed through state-space representation. Major topics include mass balance, energy balance, the First and Second Laws of Thermodynamics, open and closed systems, entropy balance and exergy balance.

Outcomes: 1. Application of mass balance and energy balance to surface water and sustainable architecture problems.

**Components:** Lecture(In person)  
**Requirement Group:** Prerequisite: ENGR 311 with a minimum grade of C- Co-requisite: ENGR 324L Must be enrolled in the Engi  
**Req. Designation:** Fieldwork

ENGR 323(2) Course ID:013148 05-JUN-2015

**Digital Electronic & Computer Engineering**

Restricted to School of Engineering Students. Prerequisites: ENGR 321, ENGR 324L.

This course introduces students to elements of digital electronics and digital computers. Major topics include Boolean algebra, combinatorial logic, sequential logic, arithmetic circuits, computer architecture, micro-architecture, assembly -language programming, and memory systems. Mastering these topics enable students to complete the course project of building a microprocessor.

Outcomes:  
 Ability to construct and analyze a working microprocessor.

**Components:** Lecture(In person)  
**Requirement Group:** Prerequisite: ENGR 311 with a minimum grade of C- Co-requisite: ENGR 324L Must be enrolled in the Engi

ENGR 324(3) Course ID:013149 01-MAY-2015

**Mechanics**

Restricted to School of Engineering students. Prerequisite: ENGR 311. Co-requisite: ENGR 324L.

This lecture course introduces students to the fundamentals of modeling continuous media. Major topics include stress, strain and constitutive relations; elements of tensor analysis; basic applications of solid and fluid mechanics; and application of conservation laws to control volumes.

Outcomes:  
 1. Application of stress and strain to a wide range of engineering problems.  
 2. Application of the governing equations of motion and equilibrium of continuous media.

**Components:** Lecture(In person)  
**Requirement Group:** Prerequisite: ENGR 311 with a minimum grade of C- Co-requisite: ENGR 324L Must be enrolled in the Engi

Restricted to School of Engineering students. Prerequisites: ENGR 322, ENGR 323, ENGR 324, ENGR 324L.

This lecture course introduces students to the structure, properties, and processing of materials commonly used in engineering applications. Major topics include material structure (bonding, crystalline and non-crystalline structure, imperfections); properties of metals, metal alloys, ceramics and polymers; phase transformation and material failure.

## Outcomes

Selection of an appropriate material for an engineering application

## Presentation skills

Scientists must communicate their work in numerous venues, from giving oral presentations in seminars and conferences to writing papers and grant proposals. This course is designed to train students in the design and delivery of effective oral presentations, a skill that can be readily adapted to serve as a starting point for written communications.

## Outcomes:

1. Identify elements of an effective oral presentation
2. Deliver an effective oral presentation
3. Judge the effectiveness of oral presentations

**Catholic Bioethics in Clinical Practice**  
 This course offers a topical survey of bioethical issues pertinent to clinical practice in the Catholic context. The United States Conference of Catholic Bishops' document, Ethical and Religious directives for Catholic Health Care Services, 5th Edition, serves as the guiding document of the course. Topics and concepts considered include abortion, contraception, sterilization, nutrition and hydration, withdrawal of life support, care of the dying, cooperation, conscience, human dignity and personhood.

Outcomes: This course aims to assist students in establishing a substantive familiarity with the positions and moral reasoning of the Catholic tradition in clinical bioethics through a consideration of Church documents, scholarly texts and articles and formative debates within contemporary Catholic bioethics.

Grad Schl at Medical Center - Graduate School Programs - Subject: Bioethics and Health Policy**BEHP 416(3) Course ID:012008 12-MAY-2011****Catholic Bioethics and Social Justice**

This course involves an historical study of the development of the body of official Catholic Social Teaching (CST) specific to its impact on healthcare delivery in the United States. Current developments in select key social issues and movements are also addressed insofar as those issues and movements influenced healthcare delivery. The pastoral letters of the U.S. Bishops, especially their teachings on healthcare reform, also receive attention. The interface between religious faith and public policy debates is a constant concern throughout the course. Practical strategies for fostering a social justice consciousness in healthcare settings are also considered.

Outcomes: Extensive use of case discussion and analysis will help to develop the participants' understanding of the principles of CST and their application to the healthcare context.

This course will consider a major theoretical framework in bioethics that has emerged as a serious alternative to principle-based bioethics. In this course, students will gain an understanding of what narrative bioethics is, read theoretical texts related to narrative ethics, and also read a variety of narratives that relate to medicine and health care (stories, films, etc). The role of narrative in the ethics consultation process will also be explored.

Outcomes: This course aims to equip students with a sophisticated understanding of narrative and the role it plays in medicine and bioethics.

**Grad Schl at Medical Center - Infectious Disease Immunology - Subject: Infectious Disease & Immunology****IDIM 400(3) Course ID:012404 07-MAY-2012****Infections and Immunology**

IDIM400 integrates basic knowledge of infectious microorganisms with an understanding of innate and adaptive immune systems that react against them. Following a review of infections caused by specific infectious organisms, IDIM400 will focus on specific aspects of immune systems and how they interact to remove these infectious microorganisms.

Outcomes: 1. Explain the cellular basis of immune development 2. Differentiate between the mechanisms of activation of immune systems 3. Analyze the mechanisms involved in combating bacterial and viral infections.

**Components:** Lecture(In person)

IDIM401 integrates a basic science understanding of microorganisms with an understanding of their role in human health. Following a review of bacterial physiology and gene expression, the focus will be on bacterial disease, including basic strategies used to cause disease and details of pathogenesis by medically important bacterial pathogens.

Outcome: 1) Describe differences between bacteria and eukaryotes; 2) Understand mechanisms by which bacteria cause disease; 3) Understand limitations of current antimicrobial therapies; 4) Differentiate between similar diseases with different causes.

**Components:** Discussion(In person)

Prerequisite: IDIM 400

The Parasitology and Virology course IDIM 403 is designed to describe infections caused by microorganisms and animal diseases transmissible to man, with a primary focus on parasites and viruses. We will emphasize the pathophysiology of these diseases in humans of various ages. This course will promote an understanding of how the properties of certain infectious agents can in some cases avoid an adequate immune response.

Outcomes: 1. Explain the mechanisms of pathogenicity of various infectious agents. 2. Analyze the mechanisms by which emerging viruses arise. 3. Apply knowledge to viral vaccine development.

This course is designed as an introduction to environmental public health issues, laws, regulations, research, and advocacy. Environmental factors including biological, physical and chemical factors that affect the health of a community will be presented. The environmental media (air, water and land) and various community exposure concerns will also be presented. The course will utilize available internet resources to access environmental data, and focus related research. A team project will be completed requiring literature review and presentation and critical assessment of a successful (or unsuccessful) environmental advocacy campaign.

**Introduction to Epidemiology**

Epidemiology is the study of the distribution and determinants of disease in populations and remains the basic science of public health. This methodology is unique to epidemiology, and in some cases, has even been appropriated by other fields. The objective of this course is to familiarize students with the range of tools used to conduct epidemiologic analysis, including design and measures of association. This course will be taught as an online course combined with an intensive interactive session with faculty and students one weekend in Spring.

The goal of the Capstone project is to provide students the opportunity to demonstrate knowledge and skills acquired in the academic coursework and through practicum experience. The objective is to enable the student to work on a project which translates both general and discipline specific information into public health practice.

Students should complete the core, program specific courses. We recommend to split credits over last two semesters and register 1 credit each semester.

Outcomes : The Capstone will provide the students an opportunity to exhibit their proficiency in public health skills through a written report and oral presentation.

**The Epidemiology of Obesity: An Energy Balance Perspective**

This course is a survey course designed to expose MPH and other interested inter-professional students, e.g. nursing and dietetic students, to the multiple domains of the worldwide obesity epidemic. The course will explore determinants, outcomes and public health policy associated with obesity from the perspective of energy balance, i.e. that ultimately all determinants and outcomes of obesity.

Outcomes: Describe the concept of energy balance and how it is related to the development, treatment and prevention of overweight and obesity.

Explain the scope and historical trends of obesity prevalence among children and adults in both the industrialized and developing worlds.

**Components:** Lecture(In person)

**Topics:** An Energy Balance Perspective

**Environmental Health Policy**

This course provides an introduction overview of the health consequences associated with climate change and the local, federal, and global response to mitigate these negative health outcomes. During the course students will be expected to incorporate course content and develop a realistic response public health plan to climate change for a locality of their choosing.

This course is offered both online and in-person.

## Outcomes:

- 1) Outline fundamental public health concerns that have been associated with climate change.
- 2) Identify and critique future steps forward to reduce public health concerns of climate change.

**Components:** Lecture(In person)

**Requirement Group:** Public health, and graduate students in Nursing, Social Work, Sociology, and Dietetics

**Meta-Analysis**

Meta analysis course provides instruction on methods for synthesizing clinical research information and how to assess the strength of the evidence for policy development and clinic contexts. The course is designed to highlight rigorous systematic review methods while students complete a systematic review on a topic of their choice.

Students should have completed Introduction to Epidemiology and Biostatistics I prior to enrolling in this course.

**Special Topics**

This course covers a specific topic in public health.

Restricted to students in the Master of Public Health (MPH) program, or with permission of the instructor.

Outcome: students will be able to articulate a general understanding of the selected topic.

**Components:** Lecture

**Topics:** Public Health Capstone, Public Health Practicum, The Epidemiology of Obesity:an energy balance pers, Public Health Law Theories and Cases, Human Behavior in Social Enviroment, Health Policy Health Systems, PH Policy Multidisciplin Persp, Advanced Statistics I & II, Public Health Biology, Social Epidemiology, Global Health Policy, Repeated Measures Analysis, Water and Health, Global Health Epidemiology, Public Health Response to Climate Change, Human Services Policy Research Methods, Advanced Epidemiologic Methods, Chronic Diseases, Independent Study, HSPR Methods II, Cancer Prevention and Control, Human Services Policy Research Methods I, Applied SAS Programming, SAS Applications, Envir Health Mosquitos & Ticks, Bayesian Statistics, Infectious Disease Epdml, HealthEconomics&Healthcare Fin, SAS-R, Mosquitoes and Ticks,

Prerequisites: Restricted to Master of Physiology Program students.

The major goal of the Cellular Physiology course is to define the molecular and cellular basis of systems Physiology and Pathophysiology. The course consists in distinct sessions of teaching, problem solving, and reviews.

## Outcomes:

- Understand the relationships among molecular, cellular and systems physiology.
- Understand membrane structure and function.
- Understand distinct metabolic and signaling pathways.

This course will present the basic concepts and principles of human physiology. The course topics will include: introductory cell & neurophysiology, skeletal and smooth muscle, cardiac electrophysiology, EKG, cardiac muscle mechanics, circulation, special circulations and pulmonary physiology. The format will be lectures, simulations, small group problem sessions and scheduled reviews. Small group problem sessions will be held after each subject area and will focus on clinical application and integration of conceptual information presented in lectures. Small group sessions and reviews also will provide the student with the opportunity to obtain clarification from instructors of any outstanding questions and are designed to encourage active learning, as well as develop critical thinking and problem solving skills. Students will be evaluated by multiple choice and essay exams given after each of the 5 major topic areas. Course material will be geared toward non-thesis Masters students. Given that physiology is the basis of medicine, this

**MPBH 420(3)** **Course ID:013307** **11-MAY-2016****Public Health Law: Theories and Cases**

This course explores how the law can be utilized to promote, or impede, proposed public health interventions at the local, state, federal level. Students review key theories of public health law that examine the role of the legislature, executive agencies, and the courts in crafting, executing, reviewing public health policy.

This course is geared towards MPH students in Public Health Policy and Management track, and no prior training in law or legal analysis is assumed.

Outcomes: Describe the inter-dependence of law and public health; Identify areas of law applicable to promoting public health; Articulate the legal, ethical and practical conflicts that arise in approaching

**Foundations of Environmental Science I**

**Prerequisites:** The course is intended for majors/minors within the Department Environmental Science. Students majoring in other disciplines may enroll if space remains after ENVS majors enroll.

This course will introduce concepts that form the basis of environmental science, including elemental cycling, energy flow/transformation, and the interconnectivity among atmosphere, lithosphere, hydrosphere and biosphere, and within ecosystems. Ways in which knowledge of these concepts informs policy, management and social perception to produce positive change will also be examined.

**Outcomes:** Recognize... interconnections among scientific disciplines and how their principles are used to investigate and address environmental issues; understand physical, chemical and ecological principles

**Applied Interdisciplinary Data Analysis**

Restricted to students in IES majors. This course teaches students to approach environmental problem-solving from a systems perspective by understanding the complex adaptive nature of socio-ecological. It introduces analytic techniques used in the natural/social sciences, and provides opportunity to analyze and connect data from various disciplines (e.g., ecology, economics, sociology) to address pressing environmental concerns.

Prerequisites: (ENVS 280 or BIOL 265) and (STAT 103 or STAT 203)

Outcomes: Students will be able to describe characteristics of complex adaptive systems, become familiar with analytical approaches suited to different sub-disciplines, and apply numerous analytical techniques to real data sets.

**Components:** Lecture(In person)  
**Requirement Group:** Prerequisites: (ENVS 280 or BIOL 265) and (STAT 103 or STAT 203)

**Environmental Health**

Epidemiology is the study of the distribution and determinants of disease in populations. This course is designed as an introduction to environmental public health issues, laws, regulations, research, and advocacy. Environmental factors including biological, physical and chemical factors that affect the health of a community will be presented. The environmental media (air, water and land) and various community exposure concerns will also be presented. The course will utilize available internet resources to access environmental data, and focus related research. A team project will be completed requiring literature review and presentation and critical assessment of a successful (or unsuccessful) environmental advocacy campaign.

**Introduction to Epidemiology**

Epidemiology is the study of the distribution and determinants of disease in populations and remains the basic science of public health. This methodology is unique to epidemiology, and in some cases, has even been appropriated by other fields. The objective of this course is to familiarize students with the range of tools used to conduct epidemiologic analysis, including design and measures of association. This course will be taught as an online course combined with an intensive interactive session with faculty and students one weekend in Spring.

**Winter Ecology**

Prerequisite: BIOL 265 or ENVS 280 or permission of instructor

Students will immerse themselves in the winter environment and learn about habitats on, in, and under snow, both terrestrial and aquatic, organisms that live in these habitats and their physiological, behavioral and morphological adaptations for survival. Students will gain an understanding of research on winter ecosystems.

Outcomes: Students will gain understanding of habitats and organisms present during winter in temperate ecosystems and gain experience with field techniques employed when studying these ecosystems.

**Conservation Biology**

Prerequisites: ENVS 280 &amp; 286

Students will learn to apply ecological and evolutionary biological principles to the preservation of wild plant/animal species, and to the preservation/management of ecosystems. Conservation approaches and challenges for all types of ecosystems, will be covered, with emphasis on contemporary threats to biodiversity, including habitat fragmentation, invasive species, and climate change.

Outcome: Students will understand how the science of ecology can be used to address issues in species/ecosystem conservation, and recognize that consideration of human actions is essential to address conservation problems.

Prerequisites: Prerequisite: ENVS 280/286; co-requisite ENVS 320.

Students will apply principles learned in ENVS 320 to conservation problems in the Chicago region and elsewhere, through visits to conservation sites and discuss concerns/initiatives with land managers and policy makers. They will develop skills in species identification, ecosystem delineation and description, and the use of field equipment and methods.

Outcomes: This course will provide practical field and lab experience in population, community and ecosystem conservation. Students will learn how the principles of Conservation Biology are applied, and the associated challenges.

Prerequisites: ENVS 280 or BIOL 265

This course provides an introduction to the environmental, social, and economic implications of sustainable agriculture. Students will learn the origins, major concepts, and current issues of sustainability in agriculture. Ecological concepts and principles applied to manage sustainable food production to support community health and economic justice will be explored.

Outcomes: Students will be able to explain the characteristics of the U.S. agricultural system, the inter-relation among components of sustainable agriculture, and steps necessary to develop a sustainable agricultural system.

In this hands-on course, students will build knowledge and skills in agriculture and ecology through work in greenhouse, laboratory, classroom, and field settings. Students will build on foundations of Environmental Science and Biology by examining challenges of food production, management decisions, and environmental change facing agroecosystems both locally and abroad.

Outcomes: Students will develop understanding of agricultural systems as related to sustainable practices, develop skills in ecological analysis of these systems, and demonstrate proficiency in communicating

This course provides an introduction to biomimicry (or biomimetics) and the application of biomimicry design principles. Biomimicry is the design of business products, processes, and systems modeled after nature's wisdom. In biomimicry, nature serves as the design inspiration for sustainable solutions to solve complex human problems.

Prerequisites: UCFS 137 or ENVS 137; MGMT 201 for Quinlan School of Business students

Outcomes: Students will learn the concept of biomimicry and life principles, be able to identify examples, apply biomimicry design principles, and view nature as model, mentor, and measure.

**Alternative Dispute Resolution Workshop**

One credit workshop focusing on dispute resolution in an employment setting. Workshop takes place over two days. Both the first and second day of the workshop involve resolution of an EEO complaint in full length simulations -- the first day using mediation, and the second day resolving the dispute using arbitration. Students are expected to read and research in preparation for both days of the workshop. Participation in the one credit workshop requires attendance in an evening Human Resources and Employment Relations (HRER) course. Students will be assigned to teams and will begin working with HRER team members at this evening session. Each workshop day is followed by a debriefing session. All participants will be observed and evaluated by employment attorneys skilled in ADR. Enrollment is limited to students simultaneously enrolled in Professor Sacha Coupet's other ADR course and students who are seeking an intensive mediation and arbitration experience in addition to that provided by the foundational ADR course.

**Class Actions**

Some of the most cutting-edge and challenging litigation in the courts today are class actions or complex cases involving numerous parties and/or very complicated claims. These cases can take up enormous resources of our courts and the litigants and yet result in resolutions that are fair and efficient if litigated and adjudicated properly. This course focuses on the emerging issues in such cases, the innovative uses to which scientific evidence is being put in class actions, and the methods used to resolve such disputes. Students will be expected to participate as part of litigation teams in strategic discussions and exercises highlighting the material covered in the course and will be evaluated on those exercises as well as a final examination. The class would meet, at a mutually convenient time, once a week for two credits and feature at least two guest speakers (e.g., class action lawyer, jurist, expert).

<b>Argument and Persuasion</b>		
Argument and persuasion are essential human activities. Both have been practiced, in one form or another, for as long as human beings have interacted with each other; both have also been the subject of study since earliest times. Much of what guides us today comes to us from the ancient Greeks, but modern cognitive psychology also contributes to our understanding as how audiences of various types are persuaded in various circumstances. This course is particularly interested in what constitutes effective legal argument, particularly in the resolution of constitutional questions by appellate courts. The first part of the course will consider the general problem of persuasion by focusing on classical theories of argument and, to some extent, on the understanding of effective persuasion derived from contemporary cognitive psychology. Since the aim of appellate advocacy is to persuade a particular and specialized audience, namely, appellate judges, the second part of the course will consider the particular demands and requirements of persuasion that arise

From the turn of the 20th century through today, law has been critically important to American cinema and American cinema has been critically important to the law. This course will examine how cinema represents the law, indoctrinates audiences in jurisprudence, and explores the position of law in our culture. The course will consider such topics as the ways in which cinema portrays the negotiation of cultural conflicts through the law, interrogates the associations between law and morality, and reinterprets historical cases, evincing cultural anxieties and desires with regard to the legal system. Further, we will analyze how law films investigate issues of guilt and justice, situate audiences as jurors, and create ideal and flawed images of the lawyer, law firms, and the lawyer-client association. Films for class discussion will include Anatomy of a Murder, To Kill a Mockingbird, Presumed Innocent, Judgment at Nuremberg, Compulsion, 12 Angry Men, Michael Clayton, Adam's Rib, Philadelphia, and The Social Network.

Philosophy of Law: Legal and Moral Issues of Economic Sanctions

This course will start with a brief overview of economic sanctions in the contexts of international relations and global governance, and will then look closely at the issues of effectiveness and humanitarian impact.

Throughout the course we will draw on materials from a number of sanctions regimes, including South Africa, Cuba, Iraq, and Iran. We will examine a number of ethical topics, looking at the issues of intent, consent, and moral agency in the context of economic sanctions. We will also look at a number of legal issues: whether sanctions come into conflict with international human rights law, such as the International Covenant on Economic, Social, and Cultural Rights; the problem of extraterritoriality; and the recent cases coming out of the European Courts on asset freezes, such as the Kadi case.

**Economics, Empirical Studies & the Law**  
This course teaches students to apply economic reasoning and empirical analysis to understanding legal issues. This course highlights the relevance of an economic approach to the foundations of the American legal system, including property, torts, contracts, criminal law, constitutional law and civil procedure. The use of law and economics is not confined to any particular world view or policy position, this course emphasizes the broad range of analytical tools that law and economics and empirical legal studies gives lawyers and legal scholars.

**Applied Civil Procedure**  
This course will give students practical experience with common pre-trial civil litigation tasks they will encounter in private practice. The instructor's principal goals is to expose students to the "nut and bolts" of pleading, discovery and fact gathering - with particular emphasis on writing - so that they will be more effective junior lawyers on their first day or practice. Throughout the semester, each student will represent a client in simulated litigation of a fictional civil case in which one of their classmates is opposing counsel. Class time is devoted to discussing how to prepare and complete the tasks that arise in litigation generally and in the mock litigation in particular. As a result, students become familiar with the Federal Rules of Civil Procedure and obtain actual, albeit simulated, experience drafting pleadings, discovery and other writings. Specifically, this course will address: (i) conducting faculty investigations preceding and during litigation; (ii) drafting initial pleadings, such as complaints, answers, affirmative

Housing Law and Policy in United States

The course includes the study of public and private housing, with reference to federal and state constitutional and statutory law. In 1949, Congress declared the goal of a "decent home in a suitable living environment for every American family." However, more than 60 years later, over 95 million Americans confront serious housing problems or have no housing at all. Students will gain an understanding of the history of housing law, the lack of adequate housing in the United States, the consequences of inadequate housing, as well as the programs and legal tools designed to meet housing needs. Students will examine various programs designed to facilitate access to decent and affordable housing and develop strategies for addressing the housing crisis. Each student will prepare a seminar paper (or series of papers) on an aspect of housing as well as present in class on that topic.

Natural Law and Natural Rights

The purpose of this course is to introduce students to the role of natural law in the development of the law, with an emphasis on the position of natural rights in American Law and International Law. The specific context of our examination will be the natural rights of the human person. Three interrelated objectives of this course are (1) to develop an understanding of what the natural law is and what it is not; (2) to dispel the skepticism (myths) about the role of natural law; and (3) to demonstrate the critical role in the evolution of natural human rights in American Law and International Law. Several particular rights will be examined to sharpen the focus of our investigation and discussion. Our readings will consist of primary and secondary sources compiled into a reader that will be made available in electronic form. There is one required book that will have to be purchased, viz. Heinrich Rommen's "The Natural Law."

Law and the Subprime Debacle

Beginning in late 2007, a rash of defaults in subprime mortgages triggered a historic credit crisis. This crisis has now resulted in a historic global economic contraction. This class will examine the role of law in precipitating and propagating the crisis. Financial regulation, corporate governance, globalization, and housing law will be examined to determine the role of each in creating the crisis and amplifying the crisis. Specific solutions will be offered. Finally, an institutional assessment of law and regulation will be undertaken to consider broader reforms.

 Comparative Criminal Procedure  
 Comparative Criminal Procedure focuses on the salient points of comparison between the American adversarial system of criminal justice and the European civil law tradition, historically called an inquisitorial system. These points of comparison include the role of the judge/magistrate; the prosecutors role and plea bargaining, the role of defense counsel, the role of evidentiary and constitutional rules of exclusion of evidence, and, as an example of the substantive criminal law, the law of rape. Course materials include a short, thoughtful critique of the American system, "Trials without Truth", by Professor William Pizzi of the University of Colorado; and a course pack of law review articles. The format is a mixture of lecture and classroom discussion, including role play exercises in witness examination and argument, at trial and at motions to suppress. Three Italian guest lectures are expected to participate as in the past: a prominent magistrate; a defense lawyer/law professor, and a prominent literature/film scholar whose focus will be on

The Attorney General is the state's chief legal officer and is responsible for protecting the public interest of the state and its people through advocacy, legislating, and litigating. Protecting consumers and businesses that have been victimized by fraud, deception or unfair competition is one of the primary functions of the Attorney General. Her office receives 25,000 consumer complaints each year. In her many years of service since 2003, Attorney General Madigan has gained a solid, national reputation for prosecuting offenders perpetrating fraud against Illinois consumers. Most recently, she paired with a couple of other mid-west states Attorney Generals to prosecute the many big banks [too big to fail] for their predatory lending tactics, recovering billions of dollars. The course will focus on Consumer Law, including the role of the state in enforcing legislation protecting consumers. The course will also address the role of private

School of Law - Law Department - Subject: Law**LAW 190(2)** Course ID:004425 13-DEC-2010**Legal Writing I**

Students read and analyze legal authority and learn how to apply the legal authorities to particular fact situations. Through a series of legal memoranda writing assignments, students develop their analytical and writing skills. Students are taught legal research methods through written exercises, research memos, and lectures. Second semester, the course builds on the basic writing, analysis, and research skills students have learned first semester and introduces persuasive writing skills. Students also learn how to present an oral argument to the court. Computerized research techniques are included in the course. In order to provide significant opportunities for instructor feedback, the first-year writing classes are organized into sections of approximately twelve students. Each section is staffed by both a legal writing instructor and a student tutor.

School of Law - Law Department - Subject: Law**LAW 195(2)** Course ID:011643 31-MAR-2010**International and Comparative Antitrust**

This module explores the internationalization of competition law in the context of globalization and international trade. It examines the regulatory framework governing competition among firms internationally, identifying and analyzing the existing limitations and challenges in this regard. In particular, it looks into rules governing extraterritorial jurisdiction, discovery, recognition and enforcement of judgements in the international context. It also explores issues pertaining to merger review, trade and competition interface and the existing cooperation between antitrust agencies. The course is comparative in nature and focuses predominantly on US Antitrust and EU Competition Law. No prior knowledge of competition law (antitrust) or international economic law is assumed.

Assessment: Class participation (10%), two small class presentations (10% each, in total 20%), 6500 words

**LAW 197(2)** Course ID:007394 25-OCT-2013**Advanced Business Organizations including a Comparative Perspective**

This course focuses on U.S. corporate law and governance. It begins with an introduction to the different legal issues encountered in business entities across jurisdictions: agency problems between (1) directors and shareholders, (2) majority and minority shareholders, and (3) shareholders and other stakeholders (employees, creditors, the State, etc). It then turns to the three agency problems as they arise in private or publicly held corporations. This covers the questions of allocation of powers between shareholders and the board, directors; elections, executive compensation (say-on-pay), self-dealing transactions, going private transactions, insider trading, mergers and acquisitions, fiduciary duties and participation of other stakeholders in the corporate governance. For each topic, we will define the legal issues involved and examine how U.S. statutory and case law respond to them. We will also take a comparative perspective to analyze how other jurisdictions respond to the same legal issues. The comparison will thus provide students

Attorneys play an active role in business transactions every day in connection with mergers and acquisitions, estates and gifts, divorce, filings with the SEC, etc. This includes attorneys who are in private practice or in with a company. Understanding business valuations and financial statements form a cornerstone of most of these transactions. In fact, the business world today and the financial work involved demands that today's lawyer understand the value and financial reporting of a business. This course will help attorneys to better understand the methodology and techniques involved in business valuations. This will also include basic financial statement analysis. Topics will include the proper standards for valuation, valuation methodology, cash flow analysis, financial analysis techniques, financial reporting issues, international standards, and specific uses of valuations.

School of Law - Law Department - Subject: Law**LAW 200(1)** Course ID:009799 28-FEB-2012**Emerging Issues in Public International Law**

Over the past several decades, largely within the context of international organizations, the global legal community has faced complications posed by the threat of terrorism and the reemergence of genocide. As a result of these developments, there has been a reexamination of the traditional role of the sovereign state as the constitutive element of public international law. Consequently, there is an emerging trend to regard, at least by some, the need to augment the role of the sovereign state with that of the international organization to respond to these new global challenges. A principle illustration of this is the concept of the "responsibility to protect". Readings will be taken from primary sources (especially documents of international organizations) as well as contemporary secondary sources, principally scholarly articles. Students will be required to purchase a short book that introduces the major topics of public international law. While federal and state prosecutions in this area are at an all-time high, law enforcement and prosecutors continue to miss critical opportunities because they fail to fully understand the nature of the threat, and lack a solid grasp on the integrated arsenal of statutory tools at their disposal. The course will start with a legal and technical introduction to the electricity grid, including discussion of federal/state jurisdictional issues, basic engineering concepts (taught with lawyers in mind) of the grid, and the basics of regulated and deregulated electric markets. The class will then address issues involving emissions and emission prevention, including the Clean Air Act (Title V and recent coal emission rules), renewable energy (including state incentives, Commerce Clause issues, and basic market design issues), and carbon capture/sequestration (including liability issues and state incentives). For their research papers, students will propose emission-reducing programs for a hypothetical state with a hypothetical electric market and evaluate the arguments for and against those proposals, including any unintended consequences.

America could not function without the transportation industry. There have been a series of deregulations affecting the transportation industry over the years. After September 11, 2001, cargo security became an important issue for the United States, which lead to many new laws and regulations. This constant roller coaster of deregulation and regulation makes being a transportation attorney very exciting. This course will briefly describe the different modes of transportation and the regulating bodies for each. We will focus on the surface modes of transportation, namely trucking and rail. The main topics discussed will be contracts, tariffs, liability for loss and damage to cargo, tort liability of shippers, carriers, customers, and brokers during and after the transportation of freight and a comprehensive understanding of insurance and the various

This seminar will introduce students to the real world(s) of sports and entertainment law, examining the separate and distinct bodies of law and practices of both, while giving due to the many commonalities between the two fields, from intellectual property to professional contracts. As legal issues in both sports and entertainment law frequently appear in the headlines, this course will address up-to-the minute issues, while covering the seminal topics and cases within each, both in litigation and transaction. Guest lecturers may participate, as their schedules permit. As there will be efforts made to accommodate guests relevant to this course, the syllabus will be in flux. Further, attendance and class participation are required, making up a significant portion of the grade along with a take-home final examination. Reading assignments can be significant on a weekly basis relevant to the upcoming week's topic.

This one credit course explores issues in family law from an international and comparative perspective. The course examines the legal relationship among families and the state, with special emphasis on how human rights doctrine has shaped the role of government in family life. The course compares and contrasts primarily American and European family law on a number of issues, including regulation of marriage, divorce and human rights within the family. Within the short time that we will be meeting, we will address through reading, film and extensive discussion how concepts of {family} emerge within public policy and law, how cultural norms shape rules for entry to and exit from marriage, and how human rights law impacts families and the individuals within the family.

Comparative Law Seminar: Chile.

This seminar will introduce students to comparative legal research in the context of Chile. Each student selects a topic on which to do comparative research. Classroom sessions will introduce students to the civil law tradition, the basis of law in Chile. Through our sister law school in Chile, Universidad Alberto Hurtado, students spend the week of spring break in Santiago experiencing the Chilean legal system and conducting interviews with individuals who are expert in the area in which they are researching. Students make a classroom presentation and write a paper on their topic.

School of Law - Law Department - Subject: Law**LAW 243(3)** Course ID:012961 17-OCT-2014**Remedies: Problems and Practice**

First-year law students learn that there is no right without a remedy and focus extensively on determining the scope and content of rights. This practical upper-level class focuses on the client's crucial question: what remedy will he get? We will examine how attorneys determine the kinds of judicial relief available to a client, and how they devise litigation strategies to meet the client's unique remedial objectives. Specifically, we will cover the determination and calculation of damages arising from various causes of action; equitable remedies including injunction, specific performance and constructive trust; and restitution. While the content and teaching method of the course are highly pragmatic, Remedies is often considered a capstone, in which students revisit and synthesize the relationship among private law doctrines such as tort, contract and property and consider from a global policy perspective the purposes that law can and does serve on behalf of individuals and groups.

This course will address the role of the U.S. Supreme Court in our tri-partite framework of representative government and interacts with the other branches of the federal government (and the states) as it exercises the power of judicial review, consistent with the authority provided by Article III of the Constitution and the statutes which Congress has passed with respect to the jurisdiction of the federal courts, including the Supreme Court. The preliminary lectures by Professor Sullivan will provide the course foundation, exploring the constitutional and statutory provisions relating to the Court and its work and the ways in which the Court has chosen to structure its work within those constraints. The course will pay particular attention to the Court's case selection process and the ways in which lawyers succeed in getting their clients' cases to the Court. Justice Ginsburg will discuss the landmark cases of the current 2017-2018 court term; the workways of the Court; and the road to her appointment to the U.S. Supreme Court. The criminal justice process in the United States is shaped by the Constitution and Bill of Rights, statutes, rules and case law. This course will examine the role of these guiding principles in the various stages of the criminal justice process, such as the means by which information is gathered during an investigation, the circumstances under which an individual can be detained, and the type of evidence that can be used at trial. The course will focus on the salient points of comparison between the American adversarial system of criminal justice and the European civil law tradition, historically called an inquisitorial system. These points of comparison include the role of the judge/magistrate; the prosecutor's role and plea bargaining; the role of defense counsel; and the role of evidentiary and constitutional rules of exclusion of evidence. We will compare our criminal justice process to that of Italy and other countries, and Italian officials will participate as guest lecturers to talk about their own experiences with the Italian system. The purpose of this course is to provide exposure to contract drafting and negotiation to students with an interest in transactional law. During the course of the semester we will examine the purpose and process of drafting documents. We will also spend time discussing the business side of transactional law and how best to work with and counsel clients. In some instances, we will start with form documents borrowed from prior transactions (precedent) and we will revise these documents to reflect the particular facts and circumstances surrounding our transaction. In other instances we will work through drafting a document from scratch. Finally, we will spend time reviewing and revising existing documents and discussing the logistics of working through a variety of business transactions. The course will include numerous drafting exercises and some negotiation. By the end of the semester, students should have a basic understanding of how and why contracts are drafted and negotiated. In addition, each student should be able to draft a precise and practical

**International Arbitration**  
This is a one credit course taught sometimes in one of the summer programs. In this course, students will learn how international commercial arbitration works. In most international contracts, the parties agree that all disputes will be resolved by arbitration. This private dispute mechanism provides a number of advantages over litigation. One of the most important advantages is that by agreeing to arbitrate, a party avoids ending up in the other party's court system. An arbitration award is also more easily enforced in a foreign jurisdiction than a court judgment, because of an international treaty known as the New York Convention. Students will learn about the various laws and rules governing international arbitration, as well as specific, practical knowledge about arbitrating, such as how to draft an arbitration clause, how to choose an arbitral institution, how to select arbitrators, the ethical rules that apply to arbitrators, the bases for challenging arbitrators, the conduct of the arbitral hearing, rules governing admission of evidence,

Advanced Legal Research: Foreign and International Legal Research-

This course is designed to meet the growing demand for research competency in the fields of foreign, comparative, and international law (FCIL). Students in the class will be introduced to research techniques and resources specific to these fields that will be useful in practice and academic settings. Print and electronic resources will both be discussed, but emphasis will be placed on resources in electronic format. Resources on the WWW and at Loyola will be highlighted, although students will have an opportunity to explore the international and foreign holdings of another local law library. Weekly research exercises and a final project will allow students to apply specific FCIL sources.

**Communications Law**

This course surveys the field of electronic communications, from the telephone to broadcast media to the Internet. Historically, the field of communications has been divided between the traditional mass media (broadcasting, cable, satellite broadcasting) and telecommunications media (wireline and wireless telephone carriers). Today, the two general divisions are converging. One of the vehicles of that convergence is the Internet, which is capable of providing both mass media and individual communications services. This course will examine legal issues affecting all of these media. Much of the course material necessarily covers the history and theory of communications regulation as practically applied through FCC rulemakings.

Critical Legal Studies posits that the influence of the social construct of race in America is ubiquitous, including in law. Moreover, it suggests that so-called color blind law-making is unlikely to address the most important means by which race continues to operate to oppress many persons in America. Finally, it teaches that racial reform occurs only in accordance with the interests of those with political and economic power. This course will survey the key scholarly works that form the basis for these precepts and seek to test these positions against the reality of race in America today.

Illinois Civil Litigation Practice

This course will empower you to practice in Illinois state courts (where 90% of all litigation is heard) with the efficacy of a seasoned litigator. Teaming star civil litigators with veteran judges, this redesigned two-session intensive course will focus sharply on the crucial knowledge and skills needed to survive the confusing and hectic civil court system. The course will enhance your written and oral argument skills in the context of the labyrinth of procedural rules and statutes that govern different phases of civil litigation in Illinois. Using hypothetical scenarios, students will learn how the rules apply to the facts and substantive law in a concrete way, as well as how to argue issues arising in the pre-trial setting. You will write briefs (up to 8 pages), argue motions, serve as a judge, and instruct your fellow students on the law, all over two sessions, each one lasting one and a half days. The first session will generally focus on pleadings and motions directed to pleadings, while the second session will generally focus on discovery and

Some of the most cutting-edge and challenging litigation in the courts today are class actions or complex cases involving numerous parties and/or very complicated claims. These cases can take up enormous resources of our courts and the litigants and yet result in resolutions that are fair and efficient if litigated and adjudicated properly. This course focuses on the emerging issues in such cases, the innovative uses to which scientific evidence is being put in class actions, and the methods used to resolve such disputes. Students will be expected to participate as part of litigation teams in strategic discussions and exercises highlighting the material covered in the course and will be evaluated on those exercises as well as a final examination. When such disputes reach the courts, what law should be applied and how should the determination be made? The course explores these questions and the various methods courts and scholars have proposed and adopted to answer them. The contrasting points of view regarding choice of law, jurisdiction and recognition of foreign judgments are analyzed in terms of which policies best promote harmony and efficiency in the federal system and accord with the federal constitutional requirements of due process of law and full faith and credit to the judgments of sister states .A special focus this year will be on the application of these areas of law to family law issues.

This course is designed for students who have already taken Evidence and Trial Ad I and would like to learn how to direct and cross-examine with digital evidence such as photos, diagrams, maps and videos. Students will learn how to use a Trial Presentation Software (Sanction II) that will allow them to call up digital evidence, annotate that evidence, and utilize it effectively during trial. Particular attention will be devoted to video evidence such as video depositions and interrogation video. Students will be provided a case file that will be utilized throughout the weekend. They will also be provided with a free copy of Sanction II software for use with the class. Students are required to bring a laptop to class (PC preferred).

This course will examine important issues around access to civil justice, including the history of civil legal aid, current delivery systems and funding models, increased self-representation of litigants in the court system, and potential solutions to bridge the gap between the growing need for civil legal assistance and available resources.

To most effectively explore these issues, the course is divided into three components: bi-weekly seminars, several experiential activities and a research project. Each is described briefly below.

(1)The bi-weekly seminars will provide necessary framework and context for the experiential learning activities and the research projects. Our seminar will begin with an overview of the challenges of ensuring

**Remedies**

This course examines what courts, including juries, have the power to do in civil cases once a litigant shows he or she has been legally wronged or is threatened with legal wrong. The subject matter of Remedies, now a required subject of inquiry on most state bar examinations, is very broad, meaning, in part, that it draws on many topics of legal study. Constitutional Law, Torts, Contracts, and Federal Civil Procedure, in particular, bear directly on the subject matter of the course. Remedies is therefore sometimes called a "capstone course," because it provides students an opportunity to bring together what they have learned in other courses on substantive and procedural law. One important component of the course is review problem sets (problems similar to examination questions and often presaging them) that are discussed in class. Another is an emphasis on how the remedial issues that become the subject of appellate opinions arise in the first instance, and are presented and play out at the trial court level. Open to all second and third year

**Telecommunications Law**

This course surveys the field of electronic communications, from the telephone to broadcast media to the Internet. Historically, the field of communications has been divided between the traditional mass media (broadcasting, cable, satellite broadcasting) and telecommunications media (wireline and wireless telephone carriers). Today, the two general divisions are converging. One of the vehicles of that convergence is the Internet, which is capable of providing both mass media and individual communications services. This course will examine legal issues affecting all of these media. Much of the course material necessarily covers the history and theory of communications regulation as practically applied through FCC rulemakings.

During this two credit hour course, students will learn who can be an expert, what an expert can testify about, the pretrial disclosure requirements for experts, differences between Illinois and federal law regarding experts, and the fundamentals of direct and cross-examination of experts. Students will then participate in simulations including a discovery deposition and a mock trial where students will present and cross-examine psychology graduate students serving as expert witnesses. Students will be graded on their performance of these exercises as well as written exercises and classroom participation. The mock trial will serve as the final examination for the course. Completion of Trial Practice or Evidence is highly recommended.

The seminar will focus on recent Illinois zoning and land use cases. Land use and zoning is one of the most important substantive law areas applicable to real estate development. Each student will select a recent reported case concerning subject property in the Chicago area. The instructor will assign the cases leaving students free to propose suitable alternatives. Students may trade cases with other students. Once case assignments have been finalized, the student assigned the cases will visit the site(s), perhaps taking photographs or videos. To the extent possible, the parties and their counsel will be interviewed. No library research should be necessary. However, all students will read the court's opinion, and the student reporting on the case will also read the briefs of the parties. Each student will be given one full class period (50 minutes) to present an oral report to the seminar, beginning at the sixth week of classes. All members of the seminar will be required to attend these reports. After reporting and discussing the case with the seminar,

Deep controversies over political issues present now: immigration, health care, the power of states, even presidential power will be shaped and possibly resolved by law. This has been so from the Colonial era until this moment. The fundamental idea of this course is that, seen through the lens of history, law has molded and been molded by our social, political and economic relations. American law has been essential in determining the most fundamental questions affecting us: slavery, voting, property-holding, the status of women, the role of religion, what agreements we may make, who is responsible for accidents, whether wealth may be taxed, pollution, and countless other topics. The class critically surveys the legal concepts, forms and institutions that have shaped and been shaped by American society throughout its history.

This course is designed to train student lawyers in the art of storytelling and persuasive presentation for the courtroom. Training will focus on the goal of persuading juries by presenting complex material in narrative form with the ease of a conversation. Students will learn how to construct powerful stories that illustrate critical aspects of the case, using simple language, effective pacing, and vivid character development. Students will also learn how to use vocal inflection and body language to tell the story between the words, project confidence, and how to make a mental/emotional connection with the jury. Courtroom delivery is examined through principles that apply to all spoken interaction: use of space, use of visuals, and use of time. The course focuses concepts drawn from literature, theatre, and public speaking. Students learn the practical skills that apply to openings, closings, witness interrogation, and prospective client interviews. Each day includes both lecture and practical workshop components. **Global Access to Medicine: A Patent Perspective**

This course considers how patents impact access to medicine in today's global economy. While there are many issues that impact access to medicine, patents are the highlight here because patents are often poorly understood, yet have an enormous impact on access to medicine. After all, the existence of a life-saving or sustaining drug is essentially of no utility if it is priced beyond reach. This class aims to broaden students' consideration of different views of patents in the context of exploring a growing web of international agreements that require nations to adopt specific types of patent laws that have implications for the cost of drugs. No prior knowledge of patents or international law is required, although students will learn some aspects of each by the conclusion of the course. Student grades will be based on class participation and a final project that does not require outside legal research; there will be no final exam.

Exposure to attitudes and characteristics which act as the basis for success as a true professional in the practice of law. The class will present perspectives on how to succeed as a new lawyer, given expectations and competitive environment. The class will expose the traits identified by others that will equip law students to grow into lawyers who have true professional and personal success. The experience will aim to provide a framework of skills that are considered indispensable for professional success that are not otherwise the focus of attention in the traditional law school curriculum. Subjects such as civility, self-awareness, resilience, the setting of focused values, duties of confidentiality and competence, and other strategic goals will be explored. In sum, this course will be an experience in reflection, goal setting, and exposure to the realities awaiting the post-law school experience in the legal profession.

**Mediation Advocacy**

This course is designed to give you an important skill set: preparing for and negotiating on behalf of a client in a mediation setting. Unlike a trial, arbitration or appellate setting, where the people listening to you are neutral, in a mediation you are dealing with the decision makers on the other side, people who often behave in a hostile manner towards you and your client. Through practice you can acquire skills that will make you an effective advocate in a mediation setting, including learning to communicate information to the other side in a way they can hear it, identifying the various needs and interests of the parties (as opposed to just the positions), and approaching a dispute as an opportunity to solve a problem creatively. We will touch on the decision science (neuroscience, psychology, and behavioral economics) and cultural competency tools that can make you more effective, and also explore Online Dispute Resolution (ODR), which is quickly emerging as a way to resolve disputes using AI in combination with human mediators.

A significant portion of federal litigation occurs prior to the filing of a dispositive motion or a trial. This course will explore complex areas of federal litigation that are likely to result in a hearing before a federal judge. Each week, during the first part of the class, the students will explore a different area of substantive law involving frequently litigated topics in federal court such as attorney/client privilege, review of electronic evidence, use and scope of protective orders, and motions to compel. The second half of each class will involve the "litigants" presenting their arguments to the Court based on fact scenarios given to the litigants the prior week. The course is taught by federal judge, Hon. Virginia M. Kendall, and will take place in her courtroom in the Dirksen Federal Building.

**Professional Identity Formation**  
 Loyola's mission is to educate diverse, talented students to be responsible leaders in a rapidly changing, interdependent world, to prepare graduates who will be ethical advocates for justice and the rule of law, and to contribute to a deeper understanding of law and legal institutions through a commitment to research, scholarship and public service. The Professional Identity Formation course seeks to advance the mission of the law school by fulfilling two of the main education goals as Loyola Law: advancing the Jesuit tradition of social justice and ethics and law; and to prepare students to be accomplished and ethical leaders in the legal profession and the larger community. The individual development of a professional identity is critical to meeting these goals. This required 1 credit, 5 week first year course seeks to assist students in the recognition and elimination of personal bias and building awareness of how diversity and inclusion of others whose world view is different from one's own is critical to professional development and success in the

**Documenting and Negotiating Finance Transactions**

This course offers students an opportunity to focus on the legal issues that arise between borrowers and their financial advisor/banker. Topics covered include a focus on commercial loan agreements, other capital raising vehicles and mergers and acquisitions. The course also focuses on the perspective of the CFO and the banker in deciding when and how to raise additional capital, expansion through acquisition and partnership/joint-ventures with other entities. Students also study examples of actual loan agreements and other related documents as well as analyzing case law involving financial institutions and loan agreements. This course uses practical examples of actual transactions including details of their negotiation and execution with the student actively involved on a case study basis. Prerequisites: Students taking this class will be expected to have taken Business Organizations. Knowledge of Secured Transactions and Federal Income Tax would greatly assist the student; these classes are not, however, required to take the course.

Critical theory attempts to answer the age old question, "what is law?," by asserting that law is the reflection of the political values of the dominant group within society. After a brief introduction to the more traditional theories of justice; such as natural law, legal positivism, and legal realism, students will take up the challenge of Critical Legal Studies. Subjects covered include an economic analysis of law; gender and sexual orientation; and critical race theory. Other possible topics include an evaluation of law and economics; the emergence of Sharia law; and the role of feminism in the 21st century.

This course will be taught at Chicago Kent College of Law. (It may be taken as either a regular course with an exam at the end, or as a seminar with a paper in lieu of the exam.)

An estimated 12 million people live and work in the United States illegally, according to many news accounts. As the immigration debate rages, the focus is on both the immigrant workers and the employers who supply the jobs. It has been illegal to employ unauthorized immigrants in the U.S. since 1986. The Immigration Form & Control Act (IRCA) requires all employers to verify employment eligibility through the I-9 form, but the government has not been consistent enforcing immigration laws in the workplace. Moreover, many states and municipalities have taken on the issue and have passed their own immigration laws. The Immigration and Customs Enforcement (ICE) agency is responsible for ensuring that employers comply with the law and has issued new priorities in workplace enforcement. Mediation is a dispute resolution process that enables parties to negotiate their own settlement with the assistance of an impartial third party neutral (the mediator), instead of having a judge decide the outcome for them. As it has become increasingly institutionalized within the legal system, it is important that lawyers be familiar with its benefits, as well as with how it works.

This course will offer an overview of mediation theory, techniques, applications, and history. Through simulations and other in-class exercises, students will consider how mediation differs from other types of dispute resolution processes, how mediation styles differ from one another, in what different contexts mediation is used (including commercial, divorce, community, and employment conflicts), and what the role of the attorney-advocate is during mediation.

This course examines the relationship between information communication technologies (ICT) and human rights in their interaction with governments, civil society, industry peers, and other stakeholders. Information technologies have created new challenges with regard to human rights protection, especially in the areas of data privacy and freedom of expression. These present complex legal questions and moral dilemmas with multiple tension points, which are at the heart of the ICT industry, but also evaporate through almost any other industry in the digital age, by means of the "internet of things." A growing discrepancy between the U.S. and EU privacy doctrines and the allowed government limits on freedom expression make this topic highly salient for any U.S. business operating in Europe, in particular. The course will include an optional practicum, which involves assigning the interested students to a real-life project on the topic with an ICT company, relevant international body, consulting firm, think tank in the field, law firm, relevant

The course is designed to introduce students to legal issues faced by international organizations planning to invest in the U.S.A. The course is based on a practical approach and will familiarize students with the legal framework attorneys consider when counseling clients on various options of foreign commercial activity in the U.S.A. Students will identify legal issues based on a client's actual business plan, and develop the best strategy to meet the client's investment goals. The simulation of the challenges of today's international corporate practice develops the student's strategic counseling skills.

The course will analyze the traditional vehicles of investments in the U.S., including supply/agency/distribution agreements and establishments of U.S. operations. Students will examine the legal implications of various forms of business enterprise (sales or distribution company; manufacturing

This course offers students the opportunity for a hands-on approach to developing their skills and knowledge of the procedures and dispute resolution strategies involved in federal tax controversies. This intensive course will offer experience with pre-controversy planning techniques such as: pre-filing motions, conflict resolution with the IRS through both examination and appeals, and preparing for tax court litigation. Students will be engaged in a series of real-time scenarios for identifying issues, drafting responses and preparing memos related to both corporate and individual tax disputes.

Experienced tax attorneys will guide students through a series of mock procedures and interactions with the IRS, and assist the students in developing and improving their analytical and writing skills. Through a mix of panel presentations and guests lectures, students will gain an understanding of the types of challenges

This course begins with an exploration of the legal and political structure of American education, including issues such as: (1) the role of government in mandating education; (2) the relationship between state and religion in the educational process; (3) the governance of educational institutions and the shaping of curriculum; and (4) the rights and responsibilities of teachers and students. The American legal system's resolution of these difficult issues are then compared to the resolution of these same issues by legal systems in other countries. Finally, students are asked to question the fundamental assumptions underlying the American educational system based on their understanding of different assumptions underlying the educational systems in other nations. Students are required to help to facilitate class discussions and to prepare a paper that analyzes critically an issue raised in the class.

Securitization is a form of highly sophisticated business transaction in which a company seeking financing gathers together pools of its financial assets, such as auto loans, deposits them in a bankruptcy remote subsidiary and causes the subsidiary to issue securities or borrow loans that are backed by the pool of financial assets. Well-known types of securitizations include mortgage-backed securities and collateralized debt obligations. Although these types of transactions received a great deal of scrutiny during and after the financial crisis, securitization also includes other forms of asset-backed securities that are an essential component of modern financial markets.

As this course will demonstrate, a successful securitization integrates a bunch of different bodies of commercial law, including securities law, bankruptcy law, secured transactions, corporation law, tax, and

**LAW 476(3)** Course ID:011958 21-MAR-2011**Art Law**

Art Law and Transactions is a study of the main legal issues involved in the acquisition, ownership and disposition of works of art. The primary perspective is that of an attorney in the representation of an art collector, and how the transactional arc involves regular concerns, such as contract law, as well as art specific concerns, such as Nazi-era looted art. Part I Acquisition begins with a focus on the legal issues raised by the various venues for art purchases (art commissions, through a dealer, at auction) and follows with the two core issues of authenticity and good title. Part II Ownership concerns three topics that could arise during the ownership phase: crossing borders, moral rights and art loans. Part III Disposition completes the transactional loop with a discussion of how one transfers works of art during life or at death, whether by sale or gratuitous transfers, including valuation concerns. The course will include several drafting exercises (some of which will be done in teams) and a one-hour in-class final.

Constitutions establish a framework of government and a regime of rights; they may also serve the purpose of expressing the deepest values and aspirations of the people for whom they are intended to provide a form of government. Constitutions come in all sizes and shapes, with varying substantive provisions, enforcement mechanisms, and amendment processes. Constitutions may contain provisions that are quite specific or highly general; most constitutions contain both. Some constitutional provisions may be transparent and straightforward, while others may be more or less opaque. To the extent that some provisions are opaque, that may be by accident or design. Public officials, including judges, must give meaning to constitutional provisions. How does one characterize the activity in which judges or other public officials engage when they are called upon to give some meaning to, or apply, constitutional provisions? Is there a proper method of constitutional interpretation applicable to all constitutional systems, regardless of their individually

The tax clinic is neither exclusively a "skills center" nor a "theory center." Instead, all the numerous components of tax law practice are integrated in the curriculum of both classroom study and legal practice with actual clients. Some of the subjects include client interviewing and counseling, negotiations, and tax litigation. Students handle cases at the IRS and Tax Court level on a clinical basis and, with the clinic attorneys, prepare all appropriate written responses to the IRS, prepare Tax Court petitions, and litigate tax cases. **Federal Courts**  
This course builds on the knowledge gained in constitutional law and civil procedure. One of the most important features of our constitutional system is the general division of governmental authority between state and national governments, and nowhere is that division of authority more important to practicing lawyers than in the allocation of judicial power between the state and federal courts. The former are, of course, courts of general jurisdiction, while the latter are courts of limited jurisdiction. The overall design of the course seeks to assist students in thinking about this allocation of power, not as a merely theoretical matter, but as one of real practical consequence in connection with a client's substantive goals and how best to serve them. Litigants typically want access to the federal courts for very specific (and often very important) reasons: to obtain remedies for violations of federal constitutional and statutory law, or, in some cases, to secure a forum that they believe will be more hospitable to their claims. To prepare for the visit to London, students are required to take Introduction to the English Legal Profession (1 credit) during the fall semester prior to the trip. Participants are then required to register for this course in the spring semester after the conclusion of the trip to London. Students are required to submit a 20 page research paper by a deadline in May on a topic approved by the instructor.

Each year, students are selected to travel to London for about two weeks between semesters. In London, students engage in a number of activities focusing on the British legal professions, the system of advocacy and legal history. For students who hope to be selected for the program, completion of Trial Practice I is recommended. Applications for the program are due each April and the program faculty selects the participants for the following year. There are always far more applicants to the program than available

**Construction Law**

Construction law draws upon many areas of law from contracts to torts to insurance and land use. This course allows students to understand how they interact and work together. It will focus on the legal issues common to the construction industry from transaction considerations to litigation. We will examine the parties involved in a construction project, project delivery systems, negotiation of contracts, scheduling and delays, insurance and bonding considerations, mechanics liens, defects, claims procedures, remedies, warranties, and termination. Students will gain practical experience in drafting construction contracts as well as writing complaints for a construction dispute. Readings will include state and federal cases and statutes, with a focus on Illinois law. In addition, this course will look at current construction projects and disputes going on in Chicago.

**Media Law**

This course will teach students the fundamentals of traditional media law with a particular focus on the intersection between injury law and constitutional speech and press protections. This area of study poses intriguing questions about the American balance between the rights of individuals to protect their reputation and privacy and the rights of those who speak via media ¿ whether traditional mainstream news reporters or citizens using social media platforms such as Facebook or Google Glass. In the words of former New Republic counsel Scott Gant, ¿we're all journalists now.¿ As a result, it is almost inevitable that even lawyers whose practice does not focus on media will confront questions about rights and liabilities arising from client speech. In addition to discussing defamation and privacy doctrine, we will cover statutory regimes that apply to public speech, such as the privilege to protect sources and rights of access to government institutions and documents, and consider whether and how those statutes apply to both old and new media

The legal regulation of elections and electoral politics is the foundational infrastructure of American democracy. This 2 credit course on Election Law will give students an understanding of the themes in the legal regulation of elections and politics. It will cover all the major Supreme Court cases with respect to the right to vote, regulation of political parties and candidates, redistricting, race and representation, and campaign finance. The course will also cover voter fraud and vote suppression. Election law is a product of federal and state law, both constitutional and statutory. Consequently, this course provides a good foundation for students interested in constitutional or statutory litigation. The course will be graded by class participation and either a paper or a take-home exam.

This course will teach the fundamentals of drafting precise and clear contracts. Drafting concepts will be taught through assigned readings, lectures, in-class exercises, hands-on drafting in pairs and alone, and review of, and comments to, an individual's work and the work of others. The majority of the semester will be devoted to drafting without the use of forms or precedent documents. For the first several weeks of class, students will draft the components of a contract, each component being either peer-reviewed or reviewed by the instructor. The components will be revised according to the comments received and integrated into a complete contract. The individual drafting will be supported by independent in-class exercises and review of the assigned reading and relevant cases. The final project will simulate a real-world drafting experience in which students will receive precedent documents, term sheets, emails, relevant statutes, and due diligence and will be required to prepare the first draft of the operative document for a transaction.

**Alternative Dispute Resolution**

This course aims to help law students become effective problem solvers through development of their knowledge and skills in negotiation, mediation, and arbitration as applied to a range of legal disputes. Students will learn to assist clients in identifying their goals and searching for creative solutions that produce efficient, expansive and effective outcomes. Students will learn about negotiation, mediation, and arbitration through lectures, but primarily through case simulations followed by critical feedback. Class attendance is critical.

Class focus will be on the mediation and collaborative legal forums of Alternative Dispute Resolution, with an emphasis on learning procedural aspects of mediation and arbitration, and the collaborative skills of negotiation. This course will provide students with the opportunity to gain practical knowledge and familiarity with the different methods of alternatives to litigation. Classes will include lectures,

Design Thinking and Early Childhood Education  
This unique law school class will immerse students in the principles of design thinking and apply them to issues involving the law, policy, and pedagogy of early childhood education. Design thinking is a human centered approach to solving complex problems that includes empathy, ideation, prototyping, testing, and iteration.  
In presenting the material, we hope to model best educational practices used in a variety of educational environments, particularly the social construction of knowledge through meaningful relationships. Accordingly, students are required to participate actively in collaborative design thinking activities such as empathy mapping and building prototypes, as well as role-playing, multiple means of expression, and documentation of learning. Students also are required to complete an impactful paper of publishable quality

People use the expression "trial and error" in reference to a continual experiment yielding both positive and negative results. Yet, it is all but forgotten that the federal courts developed in precisely this manner at the hands of many successive (and sometimes shortsighted) Congresses. Since 1789, Congress has tinkered with every conceivable detail pertaining to the Third Branch, from the important (such as defining federal jurisdiction) to the trivial (such as micromanaging times for holding court). Some of these efforts were short-lived, while others have persisted since the first Judiciary Act of 1789 and today constitute cornerstones of the modern federal judiciary. With that pedigree in mind, this course will examine certain aspects of the evolution of the federal courts from 1789 to the present, with particular emphasis on the structure and function of current, abolished and reconstituted Article III (i.e., constitutional) courts, federal judicial legislation, the federal judiciary, specialized Article III courts, the advent of Article I

The European Union establishes one of the largest markets in the world, is a major US trading partner, and a site of a number of US firms' overseas offices. The EU legal order is therefore an established component of the day-to-day business of numerous US firms. The EU legal order is likely to have an even more significant impact on US firms over time, as the current President of the European Commission has recently stated that one of the Commission's priorities is negotiating a trade agreement with the US to further trade between the EU and the US by abolishing custom duties on each other's products and adopting transatlantic product standards'

The purpose of this seminar is to enable students to fully understand the legal framework within which firms operate in the European Union. Some of the most common complaints about lawyers stem from a single fundamental truth: we are trained to talk, but we are not trained to listen. Clients tell us frankly that we "have poor listening skills," and further that we "don't genuinely care about them or their case," that we "think we know everything" and "nitpick every word they say." [1] Other client frustrations, such as "not communicating clearly," "not keeping [them] informed," and "kill[ing deals]" [2] are superficially unrelated to our listening skills, but at bottom reflect a failure to appreciate the client's point of view. In short, all lawyers need to know how to elicit and contextualize information from those they represent in order to represent them well. While interviewing is crucial to client relationships, its value does not end there. Young attorneys juggle many audiences in a day. These include assigning partners or department supervisors and those encountered in the course of doing the legwork that is a beginner's bread and butter: opposing counsel and their staff, or

In this digital, global age, how does modern banking and finance work so that payments can be made, funds transferred, and money borrowed? What is the law governing your credit or debit card, phone "apps" for point-of-sale payments, ATM machines, direct deposits into your bank account, promissory notes and checks, wire transfers, letters of credit, and more methods for moving funds? Modern payment systems exist within an evolving scheme of banking and finance. They depend on networks of laws, regulations, customs, and agreements that balance the speed of transferring funds domestically and internationally against the risks of error and fraud. As such, they pose provocative questions of consumer protection and national security. They have adapted older methods of banking and payment to the computer revolution. But, they have gone beyond traditional practices to create new ways for funds to be moved locally, nationally, and around the world. This class allows you to master the law governing these and older systems to effectively advise clients. It

**Community LawCtr Clinic I**  
The Community Law Center Clinic (LUCLC) course is designed to teach students the essential skills involved in the practice of law, including client interviewing and counseling, hearing advocacy, negotiation and practice management. These skills are taught in conjunction with the representation by students of clients in civil cases under the supervision of Professor Theresa Ceko and the law school's clinical faculty. The Law Center is located in Room 1005 of the law school.  
Students who enroll in the clinic course must be available to be in the clinic either one morning or one afternoon each week (Monday-Friday). The course also has a classroom component that meets each Wednesday from noon to 2 p.m. The purpose of the classroom component is to provide students with a theoretical overview of the lawyering skills that they perform at the clinic. In addition to regular clinic hours and classroom work, clinic students work on their cases during an additional 6 hours a week, most of this work done on the

Students in the LUCLC represent children in contested guardianship cases and clients in civil cases involving landlord/tenant, family and elder law problems. Many of LUCLC's clients are low income persons. Serving persons who cannot afford legal services sensitizes students to the special ways that the law affects the lives of the indigent.

Another important aspect of the LUCLC course is the opportunity for students to develop their own sense of the lawyer's professional role. Students experience the complexity of the attorney-client relationship and the myriad ethical dimensions of lawyering. Students are exposed for the first time to the conflicts, frustrations and rewards inherent in legal practice.

This course examines international and domestic law regulating the use of the military as an instrument of war and other foreign policy as well as domestically. It examines international law regulating the resort to force against or within another nation-state as well as the norms that regulate the means and methods of force used. It then examines the Constitution's distribution of powers over the military, the effect of international law in the U.S. legal system, and statutes regulating the use of the military for domestic matters, including law enforcement and civil unrest. Seminar style discussions will also include student group presentations analyzing current and historical events. Final grade is based on class participation and an anonymously-graded take-home final exam.

This course examines the legal relationships among children, family and the state, primarily in the context of issues over which dependency (child welfare) courts traditionally have jurisdiction. The subject matter is divided into two sections, the first exploring Supreme Court jurisprudence on the issue of parental rights and family privacy. The second explores the emerging doctrine of children's rights, also looking to Supreme Court cases that have pronounced limited, but distinct, rights for minors, as well as civil matters including child neglect, abuse, termination of parental rights, and adoption. This is Trial Practice I with an emphasis on those issues important to advocacy in cases involving children. The course is taught by a team of lawyers and judges experienced in child advocacy, with a student/faculty ratio of no more than 8 to 1. The principal objective is to introduce students to litigation principles, and to teach them advocacy skills in an intensive learn-by-doing environment. The case files from which exercises are drawn also enable students to prepare for the special challenges involved in the representation of children (child witnesses, unique problems in expert testimony, special evidentiary issues, etc.). At the end of the course each student conducts a complete trial before a mock jury at the Daley Center. Evidence is a prerequisite and the course requires instructor permission.

The Childlaw Legislation and Policy Clinic is part of the Civitas ChildLaw Center. Students in this Clinic have an opportunity to work, under the supervision of a faculty member, on a legislative or policy project that may involve any or all of the following: critiquing pending bills or existing legislation, drafting bills, developing summaries and fact sheets about pending bills, and building and working with coalitions to develop legislative ideas and consensus. Topics cover a range of child and family issues. Spring semester students primarily work on projects begun during the Fall Clinic, including researching and drafting legislation concerning child protection and juvenile justice reform issues. Students work in teams and must have sufficient time or flexibility during the work day to participate in some internal team meetings as well as attend meetings outside the Law School, as needed. In the last decade, children have become "the newest kids on the human rights block." This seminar examines new laws and treaties developed to respond to age-old problems faced by children around the world. The course begins with a study of the U.N. Convention on the Rights of the Child, the most rapidly and widely accepted human rights document in the history of international law. It then examines ways in which these laws are being implemented, including a review of child and family law cases decided by the European Court of Human Rights in Strasbourg. The course explores such substantive areas as the comparative treatment of child abuse and delinquency, and the issues of child labor, international abduction, the plight of child soldiers, and the sexual exploitation of children.

Mediation is an alternative to litigation which enables disputing parties to negotiate their own agreed settlement. It involves an impartial third party neutral, the mediator, who assists disputing parties in this alternative dispute resolution (ADR) process. This course will offer an overview of mediation techniques, applications, and history. Through simulations and other in-class exercises, students will consider how mediation differs from other types of ADR processes, how mediation styles and models differ from one another, and how the role of the attorney-advocate changes during mediation. This course will be conducted in an intensive workshop format over the course of one weekend where students will role play as client and attorney. No textbook is required, nor is there a first assignment.

This mediation course allows students to mediate family cases through several community projects. Students are required to have participated in some type of 40-hour mediation training in order to register for this course. These students receive additional training in family mediation, co-mediation and related issues. Students mediate in family group conferences and other multiple party mediations. Students participate in multiple simulation and mediations and receive feedback on their skills. The course meets once a week for the two hours for most of the semester, however students are also required to mediate at other times during the semester. There is no examination. Grading is based on participation in mediations, simulations and discussions and self-evaluations. Students may take the course for 1 or 2 credits. For 2 credits, a paper on mediation theory or practice is required. Where the student is taking the course for 2 credits, the research paper is included in the grade. Enrollment is limited to eight students.

School of Law - Law Department - Subject: Law**LAW 668(4)** Course ID:012153 22-FEB-2016**Leadership Development**

One of the distinguishing features of the Online MJ in Children's Law and Policy is its focus on the development of leadership skills for child advocates across a range of disciplines and organizations. This required cornerstone course begins with an introduction to different types and styles of leadership before turning to a more practice-based preparation for leadership in such areas as operations, human resources, finance, and communications.

Designation:** Writing Intensive**LAW 671(2)** Course ID:012217 08-DEC-2011**Juvenile Justice Law and Policy**

This course explores the law, policies and practices of the American juvenile justice system, past, present and future. The focus is on children who are in conflict with the law and those who, by virtue of their status as children, are subject to the jurisdiction of the juvenile court for engaging in conduct such as curfew violations, running away, and other forms of potentially harmful adolescent behavior. Among other issues, the course will examine how juvenile justice law and policy has been shaped by new research on adolescent development, including brain research.

School of Law - Law Department - Subject: Law**LAW 673(2)** Course ID:012221 06-APR-2017**Mental Health Law and Children**

Mental health and substance abuse impacts everyone. According to the National Institute of Mental Health, in a given year approximately one quarter of adults in the United States are diagnosable for one or more mental illnesses. Additionally, one out of five children, either currently or at some point during their life, are diagnosed with a mental illness. Mental illness has a profound impact on children and families, including the legal response to these issues. Students will study the cases, statutes, and legal doctrines relating to the rights and inpatient/outpatient treatment of persons with mental illness or a developmental disability, with a special emphasis on children, youth, and parents and/or legal guardians. Topics covered include: informed consent to outpatient and inpatient treatment, admission/transfer/discharge, confidentiality of mental health records, litigation issues addressed by practitioners, and risk management strategies for mental health practitioners. This course will use cases and examples to compare and contrast application of

According to the National Center for Children in Poverty, children are disproportionately impacted by poverty, especially children of color and immigrant children. These risks are greatest for children who experience poverty when they are young and/or experience deep and persistent poverty. This course concerns those areas of civil law which most affect low income children and families, including public benefits such as welfare, housing, education, and health care. Other systemic issues will be explored, such as wealth discrimination, use of legal remedies to promote social change, and the delivery of legal and other services to children.

School of Law - Law Department - Subject: Law**LAW 679(2)** Course ID:012505 13-NOV-2012**Children's Health Law and Policy**

The purpose of this course is to teach interested students the application of law to critical public health issues that affect children and youth. Students will first learn basic principles of public health including the distinction between health promotion, disease prevention, and health protection. Next, the course will address the constitutional and statutory foundation of public health law, how legislative and regulatory decisions must negotiate the balance between individual rights and public good, and how the principles of parens patriae and state police powers affect child health. Cases studies in the areas of obesity, reproductive health rights of minors, mandatory school immunizations, student drug testing, and violence prevention will illustrate the application of public health jurisprudence from the national to the state levels.

The student will be engaged in research and in initiating the development of a curriculum targeted to a teen audience that educates teens about local and federal laws that have an impact on their lives as adolescents, including juvenile justice issues, mental health laws, custody issues, drinking and driving. The student has been working with adolescents on psychological issues as part of her field placement for the Masters of Social Work degree. This course will allow her to broaden that focus to include legal considerations that play an important role in helping teens who will soon be emancipated and facing lives as adults.

The first part of the course will require the student to identify the specific issues and laws that will be included in the curriculum and to explore resources, both in law journals and in interviews with teaching faculty, that will inform her presentation of the issues. The second part of the course will be devoted to developing the format for the curriculum that will be most effective in reaching this media savvy audience.

The course will run 14 weeks, with seven live lectures and seven weeks of assigned readings to introduce you to each live lecture topic. There is one Module for each topic. Each lecture will be presented by different legal experts and scholars on emerging topics in child and family law.

Students will be expected to participate either in every live class or to listen to the archive if synchronous attendance is not possible. Students will be asked to write a 3-5 page (double spaced) reflective paper at the end of the term choosing from ONE of the lecture topics. The paper should describe how the lecture enlarged or changed the student's understanding of the topic, or in the alternative, how it influenced or changed your professional practice in child advocacy or in related fields.

School of Law - Law Department - Subject: Law**LAW 683(2)** Course ID:013422 02-MAR-2017**Legal Issues in School Discipline**

The course will address the Constitutional implications of student discipline and the statutory provisions governing student discipline and the administrative hearing process. Students will learn about 'zero tolerance' policies, the role that school discipline plays in the 'school-to-prison pipeline' and the discriminatory impact of school discipline policies. Issues relating to discipline in charter schools and discipline of students with disabilities will also be addressed. Other topics to be discussed include disciplinary-related challenges that arise in the context of protecting vulnerable children, including issues of harassment and bullying of LGBT students and students with disabilities, and the legal tenets governing school districts; responses to cyberbullying and the rise of social networks and digital media. Emerging trends in alternatives to punitive school discipline practices, such as human rights approaches, positive behavior interventions and supports, and restorative justice, will be examined.

The purpose of this course is to integrate and apply two interrelated broad literature bases within the field of education: (1) system change and data analysis literature informing best practices in analyzing system school data and needs assessment findings and using the findings to plan for system level discipline change; and (2) best practices in the school leadership and teaming to effect system level reform in school discipline. The focus of the course will be on the systems change process as it relates to the issue of school discipline. Through the course, students will gain skills and experience reviewing and analyzing school and district-level data, and they will develop and administer a needs assessment tool relating to school discipline and multi-tiered systems of support in their respective settings. They will also analyze system level variables, which have historically prevented true discipline reform (e.g., unreliable data collection systems, poorly structured teaming, access to systematic and ongoing professional development and

This course begins with an intensive in-person weekend retreat where students will build relationships with each other and, through experiential exercises and lively discussion, internalize core principles. Throughout the retreat and course, students compare and contrast restorative and retributive justice models, practice proactive and responsive restorative techniques, and identify personal and professional shifts to exemplify a restorative mindset. Specific restorative techniques which students will learn include restorative language, facilitation of a variety of types of circles, restorative dialogue processes, and systems and structures to accommodate restorative practice within school life. Through additional seminars, students will strengthen their knowledge of the history, theory, research, and practice of restorative justice. The culminating focus of the course invites students to apply restorative principles and practices in their own school or district setting.

This course will serve as the capstone for the certificate. It will examine in-depth three to four major themes in the field of school discipline from the perspectives of law, policy and practice. The focus will be on analyzing "best practice" examples as a means to address the challenges relating to fundamental reform of school discipline practices. Potential themes to be addressed include: (1) racial inequities in school discipline; (2) the interlinkages between special education and school discipline; (3) the relationship between the school and the juvenile/criminal justice system; and (4) professional development to support teachers and other school stakeholders. As part of this course, participants will develop an action plan for school discipline reform in their respective settings. They will determine how potential system-wide barriers will be addressed (e.g., resources for teaming, support for MTSS planning, implementation and evaluation, teaming, leadership/administrative support, teacher buy-in and support, community engagement).

The U.S. Medicare program is a health insurance program for the aged, severely disabled and people with end stage renal disease. As a major federal entitlement program, the Medicare program raises a host of legal issues for beneficiaries of the Medicare program and the providers and suppliers who provide health care services to these beneficiaries. This course is a survey of the important legal issues that health lawyers are likely to face in representing Medicare beneficiaries, providers and suppliers. This course also provides an overview of how the Medicare program affects the regulation of health care organizations and professionals.

The Business Law Clinic (the "BLC") is a live client transactional legal clinic that represents for profit and not for profit businesses in the Chicagoland area. Student clinicians work with several BLC clients during the course of a semester. All work is overseen by BLC faculty. In addition to client work, the BLC includes a weekly seminar (Wednesday from 3:30 to 5 p.m.), which covers relevant substantive law, ethical issues and pragmatic lawyering skills, such as drafting, negotiating and client counseling. The work in the BLC is completely transactional in nature. The BLC does not handle contested matters or complex tax. Participation in the BLC requires a significant time commitment (a minimum of 6 hours per week, in addition the seminar), and a degree of flexibility in the student's schedule. All student clinicians are expected to communicate with their clients regularly, meet with their clients as needed, efficiently and effectively perform the related transactional work, maintain their client's files in an organized and professional

LAW 864(2) Course ID:011979 05-APR-2011

**Federal Criminal Trial Advocacy**

Students will follow the evolution of a federal criminal case from investigation to trial. The class will focus on one mock problem - which will likely be a federal narcotics investigation that resulted in a two-count indictment. The indictment will allege that the defendants conspired to distribute more than 280 grams of a controlled substance and that they indeed distributed the controlled substance. Because it will be too complex for a one-semester course, I do not recommend that the mock problem include a Title III investigation.

The class will be divided into three parts: 1) Investigation 2) Suppression Hearing and 3) Trial.

**Components:** Seminar(In person)

**Corporate Compliance**

This course will familiarize law students with the world of corporate compliance focusing on competition law issues, and provide basic skills to be employed in a corporate compliance department. Students will obtain a basic understanding of the legal principles related to compliance, or preventive law, and learn the interplay between compliance and ethics. They will become familiar with the principles of Chapter 8 of the United States Federal Sentencing Guidelines, which describe the fundamental rules for creating an effective compliance program. They will be able to understand and articulate how compliance and ethics failures impact on the success or failure of a business.

**Antitrust & Intellectual Property**

This seminar focuses on the interface between Intellectual Property (IP) and antitrust law. Patents, copyrights and trademarks and other IP regimes confer exclusionary rights. Exclusive rights provide incentives and serve other ends, but their exercise can also impede competition distort otherwise competitive markets. This seminar will address the intersection of IP and Antitrust with respect to issues such as standard setting, licensing, corporate strategy, product design, efforts to increase market share and mergers and acquisitions.

**Chinese and Indian Competition Law**

The People's Republic of China promulgated its Anti-Monopoly Law (AML) in 2008 following nearly a decade of study, drafting, debate, and revision. The AML is a unique and important competition law given China's status as both a socialist market economy and the world's second largest economy. This course will provide a survey of the development of the AML, its principal provisions, its unique method enforcement by three different government agencies, the early track record of enforcement, and the continuing questions regarding the effectiveness and fairness of the AML.

**U.S. Antitrust Law**

This course treats in depth many aspects of the Sherman and Clayton Acts. Emphasis is placed on an understanding of the policies and objectives underlying the antitrust laws and the extent to which enforcement of the antitrust laws has fulfilled those objectives. Areas examined include monopolies, price fixing, division of markets, exclusive dealing arrangements, boycotts, resale price maintenance, and mergers. Recent trends in sports and health care industry antitrust cases may be discussed. The impact of economic analysis in the antitrust area is also examined.

Open to: LLM students only. Each LLM student must write a paper of publishable quality. The paper, written under the guidance of a faculty advisor, should integrate a number of issues covered in the competition or consumer law curriculum. It is expected that each LL.M. paper will make an important contribution to competition or consumer law literature. Students must select a mutually agreeable topic with the Director or Associate Director of the Institute and then be paired with a thesis advisor selected from the full-time or adjunct faculty of the Law School. Students will be encouraged to apply the concepts from the rest of the curriculum to legal issues from their own jurisdiction.

With guidance of the faculty advisor, the LLM student will prepare a topic and thesis statement, a thesis outline, first draft, and final draft of the LLM thesis for completion by the end of the semester. In addition, the student will present a brief oral thesis defense to the faculty advisor and selected other

This course provides an overview of the laws and legal issues related to the review and regulation of mergers from an antitrust and competition law perspective. Although the course will draw primarily from the experiences in the United States and Europe, we will discuss and compare many jurisdictions around the world and the challenge of applying multiple merger laws to the same merger. We will start by distinguishing mergers from other types of business conduct which implicate antitrust and competition laws and address the question of why mergers are treated differently. The course will then address basic principles used in the substantive review of mergers. We will start by identifying the economic rationale supporting the prohibition of mergers and the basic economic theories used to distinguish permissible mergers from impermissible mergers. We will then ask whether these theories apply across jurisdictions.

We also will devote several sessions to the procedural context of merger review. We will discuss the basic

This course will develop the students' key knowledge and skills required to provide effective advise and assistance in a country with a culture and a legal system different from the culture and legal system in which students received their legal educations. The course will examine and compare the main elements of particular relevance to rule of law assistance work in each of the three major world legal systems: common law, continental civil law and Islamic law and the typical institutional frameworks adopted to organize each of these legal systems. It will also explore customary law sources in developing countries and how they are integrated in a formal way into modern legal systems and/or applied in practice. The course will also provide practical examples of successes and failures of cross-system rule of law assistance efforts attributable to success or failure to manage differences in legal systems and culture and explore relevant strategies for success. Finally, the course will encourage students to consider the ethical dimension of

This course will develop the students' working knowledge of the history, theoretical models and current approaches of academicians and practitioners to understanding the rule of law. It will examine the relationship between law and development and how that relationship operates in rule of law advising. The course will survey academically-oriented rule of law work in the 1960's and the earlier theoretical work upon which it was based and follow the development of the field to date with a focus on theory and practice of rule of law initiatives undertaken in the setting of international development assistance programs. Examples from bilateral and multilateral assistance efforts will be analyzed to learn from the successes and failures of rule of law initiatives aimed at the promotion of human rights, the promotion of democracy and good governance and the improvement of the legal framework for investment and trade. The course will also explore alternative change models to which rule of advisors can refer in their engagement with counterparts and in

This course will provide students with the knowledge and skills required to undertake the assessments of needs, the crucial lynchpin required for the design of specific rule of law initiatives. As this aspect of rule of law work requires the performance of tasks, which are generally outside the experience and training of law graduates, students will be provided with a new set of research and analytic tools and methodologies from outside their field. While concentrating on examples from the legal and justice sector, these tools will include interviewing skills, use of data from existing sources, the generation of new data, the design and conduct of reliable surveys, the use and interpretation of statistical data and the drafting of the assessment documents themselves. The course will relate closely to the courses on Comparative and Ethical Lawyering for the Rule of Law and the International Development Architecture, insofar as assessments will require analysis and description of the state of the target country's legal system, the functioning of

This course will prepare students to provide rule of law advice, which takes into account the complex framework of national and international legal and institutional arrangements and policies, which has gradually been established since 1945, especially as such framework relates to rule of law advisory work. The course will begin with a review of the Bretton Woods institutions and regional international financial institutions (IFI's) from both a legal and functional perspective to clarify the role of such organizations in international development and how they operate. It will analyze the loan and program portfolios of these organizations to develop an understanding of the direct role, which the IFI's are playing in the financing of rule of law projects and programs. The course will then compare the policies, portfolios and working modalities of a selection of national (bi-lateral) donors and the European Commission to identify how these donors are contributing to rule of law work. The course will group the substantive areas into three categories and explore the main issues and reform strategies for each. First, the course will explore issues related to the development of the legal framework for investment, international trade and business and the capacity to structure, manage, govern and negotiate in these areas. Second, the course will examine how rule of law initiatives are dealing with issues relating to the well-being and security of individuals and social groups. This will include an examination of how rule of law initiatives interact with such issues as human rights, trafficking of people, restoration of rights after conflicts or national disasters, transitional justice, gender equity, environment, land tenure, health and legal empowerment of the poor. **Community Health Nursing**

This clinical course provides the student with an opportunity to apply nursing and public health concepts to families, aggregates, communities, and populations. Opportunities to apply epidemiology and risk assessment strategies in a community assessment are provided. The role of the community health nurse as educator is addressed.

## Outcomes:

Upon completion of this course the student will be able to:

1. Apply nursing and public health concepts to community assessment utilizing databases and community engagement.
2. Evaluate the provision of health education and/or health information in the community.

**Nutrition Focused Physical Assessment**  
 Prerequisite: admission to MS/Dietetics program.  
 This course provides an introduction to the development of physical and lab skills that are necessary for support of the dietitian's practice; in particular these skills are used in nutrition assessment and the provision of medical nutrition therapy. Building upon basic nutrition assessment knowledge and skills, the focus of this course is on development of physical assessment and skills relevant to nutrition care of the individual, and/or to support nutrition program development, delivery or evaluation. Learning methods include lecture, demonstration, laboratory of physical skills, electronic media, and readings.

**Transition to Supervised Practice in the Dietetic Internship**  
 Prerequisite: admission to LDI.  
 This course begins skill development in preparation for the transition from the classroom environment to supervised practice in dietetics. Topics include ethical, legal, and safety issues for novice dietetic practice such as OSHA, HIPPA, IDPH, and standards of other regulatory agencies in health care. The nutrition care process including nutrition diagnostic language, planning and implementation of medical nutrition therapy (MNT) interventions are discussed. Basic familiarity and use of evidence-based practice protocols related to common conditions such as hypertension, diabetes, cardiovascular, renal, and/or gastrointestinal disorders, provision of specialized nutrition support and others. Medical terminology mastery is expected. Emphasis is placed on synthesis and application of undergraduate material, and effective clinical resource application.

FONU 422(3) Course ID:011728 06-JUN-2018

**Medical Nutrition Therapy Theory**

Prerequisite: FONU 420

This course includes the study of medical nutrition therapy (MNT) theory for dietetic practice including acute care, long term and outpatient environments. Complex medical conditions including trauma, burns, transplant, oncology, diabetes mellitus, sepsis, cardiovascular, gastrointestinal, neurological, renal and disorders. Alternate modalities of nutrition supported are included. The course includes theoretical foundations of patient care protocols, synthesis of research findings, and trends in health care related to practice protocols. This course should be taken in conjunction with FONU 423 for current Loyola dietetic interns.

FONU 423(2) Course ID:011729 06-JUN-2018

**Supervised Practice (SP) in Medical Nutrition Therapy**

Prerequisite: FONU 420 and admission to the Loyola Dietetic Internship.

This course requires the student to complete 480 hours of dietetic SP in health care environments that provide acute care and renal replacement therapy. Students work collaboratively with preceptors in hosting agencies. This accompanies FONU 422. Dates, hours and locations are arranged by the LDI faculty. Evaluation is based on practice performance, and assignments. Additional seminars are required as assigned by faculty.

**Psychiatric Mental Health Across the Lifespan I**  
 This course focuses on potential and actual psychiatric mental health disorders across the lifespan. Evidence-based practice treatment options and evaluation for selecting appropriate treatment modalities are discussed. The student will learn how to apply prevention and treatment models for psychiatric mental health disorders based on the client's age, lifestyle, values, cultural considerations, and legal requirements with psychiatric treatment protocols.

Prerequisites: GNUR 413 (Advanced Pharmacology) and GNUR 425 (Advanced Health Assessment Across the Lifespan)

Upon successful completion of the course, the student will be able to: 1. Synthesize evidence-based

 This course builds on the critical thinking, diagnostic reasoning, clinical judgment and decision making competencies developed in Psychiatric Mental Health Care Across the Lifespan I. A major focus of the course is the inter-professional integration of prevention and treatment strategies for clients and families.

Upon successful completion of the course, the student will be able to: 1. Apply clinical judgment and critical thinking to formulate collaborative psychiatric mental health care for clients. 2. Strategize coordinated care for children, adolescents, adult and older adults with psychiatric mental health disorders. 3. Evaluate evidence-based psychotherapeutic and psychopharmacological treatment strategies for clients with psychiatric mental health disorders. 4. Implement strategies to develop a psychiatric mental health treatment

**Psychiatric Mental Health Adv Practice Practicum**

The practicum course guides the student in a synthesis of content from nursing and related sciences and the application of this knowledge to the advanced practice role of the nurse practitioner in psychiatric mental health settings. Students will advance their proficiency in caring for clients with common acute, chronic, and complex psychiatric mental health problems across the lifespan. Students in the practicum experience are expected to progress throughout the clinical practicum from requiring assistance to becoming primarily independent.

Prerequisite GNUR 472-Psychiatric Mental Health Care Across the Lifespan I

Upon successful completion of the course, the student will be able to: 1. Elicit and document relevant health

Emergency Management Practicum

Prerequisite: HEM 201

The purpose of this course is to integrate and synthesize the theory and principles presented in the core classes of the healthcare emergency management major. To achieve this goal, the practicum will examine and assess various disaster case studies. Utilizing the resources of the Faculty Advisory Board, students will be placed in emergency services or public health positions to observe first hand the work of the healthcare emergency manager. In particular, students will observe and participate in such activities as strategic planning; inter-governmental agency communication and information sharing; risk analysis; disaster plan preparation and other aspects of public health threat preparedness; policy analysis; and related practices.
