Learning Outcomes

Outcomes for all Certificate Programs:

- Students will have developed new technical skills in the area of their specializations.
- Students will have a better understanding of the domain contexts within which these skills can be applied.
- Students will have acquired a credential and additional knowledge allowing them to advance professionally.
- Students will be prepared to enter a graduate program in the Computer Science Department, with the transfer of certificate credits toward their master's degree.
- Students will acquire a better understanding of the structure of an organization and how this impacts and is impacted by technology acquisition.
- Students will develop models to support business decisions.

- Students will be able to identify IT system requirements and build a design or plan and execute a project to satisfy those requirements.
