

# HONORS IN BIOINFORMATICS

---

Graduating seniors recognized with departmental honors, Honors in Bioinformatics, excel not only in their coursework but also in their contributions to the scientific community. Students earning Honors in Bioinformatics have:

- an overall GPA at or above 3.5; and
- presented their research at a peer-reviewed conference (area, national or international non-undergraduate meeting) or co-authored a peer-reviewed publication.

**Note:** GPA requirement must be fulfilled the semester prior to commencement, e.g. Fall semester for Spring commencement. Conference approval rests with the Program Director.
